| Lorain | South Barton Road Water Main Replacement | Relocation of approximately 2,200 linear feet of existing deteriorated water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$118,600 |
| Lorain | EMERGENCY GENERATORS AT WWPCP | A BACK-UP POWER GENERATION SYSTEM WAS DESIGNED IN 2007 FOR THE CITY'S WASTEWATER POLLUTION CONTROL PLANT THAT WOULD ALLOW OPERATION OF THE FACILITY'S CRITICAL EQUIPMENT DURING POWER OUTAGES. THIS PROJECT WOULD REDUCE POLLUTANT DISCHARGES DUE TO UNRELIABLE EQUIPMENT DURING OUTAGES. IT IS WIDELY ACCEPTED THAT EPA PLANS TO REQUIRE BACK-UP POWER FOR THESE TYPES OF FACILITIES IN THE NEAR FUTURE. | CITY OF ELYRIA | 30 | 31 to 90 days | \$900,000 |
| Lorain | Boulder Drive Water Main Replacement | Relocation of approximately 2,300 linear feet of existing deteriorated water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$236,200 |
| Lorain | Repair, Reconstruction and Resurfacing of East Riv | Replace all curbs, sidewalks and driveway aprons, widening of existing roadway to uniform 2x12 driving lanes with curb & gutter, replace existing traffic signal and grid & resurface deteriorated surface. The project is 1.2 miles long. The existing pavement is deteriorated and the surface has several adjacent cracks and large potholes. The road's major access to the City and to the Elyria Memorial Hospital. | City of Elyria | 30 | 91 to 180 days | \$1,457,759 |
| Lorain | TERNES STREET SANITARY SEWER | THERE IS A BOTTLENECK IN THE SANITARY SEWER SYSTEM THAT MUST BE ELIMINATED TO ALLOW FOR FUTURE EXPANSION IN THE SOUTHEAST PORTION OF THE CITY. THIS PROJECT, IN CONJUNCTION WITH THE SOUTH-EAST INTERCEPTOR PROJECT, WOULD ALLOW SEVERAL OPTIONS TO BUSINESS DEVELOPERS FOR SEWER ACCESS TO THEIR PROPERTIES. THESE OPTIONS ARE 50% COMPLETED BUT MUST GO THROUGH EPA APPROVAL PROCESS. | CITY OF ELYRIA | 20 | 91 to 180 days | \$450,000 |
| Lorain | Cornell Avenue Water Main Replacement | Relocation of approximately 6,400 linear feet of existing deteriorated water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$316,000 |
| Lorain | Otten Rd. and Barres Rd. Water Main Connection | Connect the existing water main on Barres Road to the existing dead end water main on Otten Rd. to reinforce the water main distribution network and provide better water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$30,000 |
| Lorain | RIDGEWAY DITCH RESTORATION | BEAVER DAMS AND FALLEN TREES HAVE CAUSED A CREEK TO MEANDER TOWARDS THE CITY'S WASTEWATER POLLUTION CONTROL PLANT AND HAVE CAUSED THE LEVEL TO RISE. THE PLANT'S CURRENT STORM WATER SYSTEM CAN NO LONGER PUMP INTO THE CREEK DUE TO THE RAISON OF THE WATER, WHICH IN TURN CAUSES A SUBJECT TO FLOOD DAMAGING PLANTS, CONTROLS AND OTHER EQUIPMENT NECESSARY FOR PLANT OPERATIONS. DURING THE DESIGN OF THIS PROJECT, WHICH IS 90% COMPLETE, IT WAS NOTICED THAT THE MEANDERING OF THE CREEK HAS CAUSED THE AREA TO BECOME A WETLANDS. THIS PROJECT WOULD PRESERVE THE NEW WETLANDS HABITAT WHILE ALLOWING FOR THE PLANT TO CONTINUE ITS OPERATIONS. | CITY OF ELYRIA | 20 | 31 to 90 days | \$200,000 |
| Lorain | WTP Low Service Rehabilitation | Install 8 new low service vertical turbine pumps (8-12 MGD). New pumps would replace 3 existing 1954 pumps and 2 would be installed in open pits. Replace existing 10" "horon" main with a modern traveling water screen. | City of Elyria | 15 | 91 to 180 days | \$540,000 |
| Lorain | Race Rd. and Center Ridge Rd. Water Main Connectio | Connect the existing water main on Race Rd. and Center Ridge Rd. to the existing high pressure water transmission line to reinforce the water main distribution network and provide better water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$45,000 |
| Lorain | CASCADE PARK STREAMBANK RESTORATION | CASCADE PARK IS THE LOCATION OF THE CONFLUENCE OF THE EAST AND WEST BRANCHES OF THE BLACK RIVER. INCREASED FLOW DUE TO DEVELOPMENT WITHIN THE WATERSHED HAS CAUSED THE RIVERBANKS WITH THE PARK TO ERODE. THE RIVER IS APPROXIMATELY TWO MILES LONG INSIDE THE PARK AND THE MAJORITY OF THE RIVERBANKS NEED RESTORED. THIS PROJECT WOULD RESTORE ONLY APPROXIMATELY 2,000 LINEAR FEET OF THE WORST SECTIONS OF THE BANK. THESE SECTIONS CAUSE SAFETY CONCERNS TO PEOPLE AND CITY STAFF THAT USE AND MAINTAIN THE PARK. | CITY OF ELYRIA | 20 | 91 to 180 days | \$800,000 |
| Lorain | Root Road Water Main Replacement | Relocation of approximately 2,400 linear feet of existing deteriorated water main which experiences frequent breaks with a new water main to provide better water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$180,000 |
| Lorain | Protect and Secure Sheffield Lake | As Sheffield Lake Mayor, I, John J. Piskura, personally certify that the following investment requests are fully vetted and are appropriate uses of the paper's dollars. The City of Sheffield Lake has the highest domestic violence rate in Lorain County and the 3rd highest foreclosure rate. We also, have the highest Caucasian loan rejection rate in Lorain County. To combat the growing issues of unemployment, that has reduced jobs and destabilized family security, plus still provide protection with reduced tax income. Sheffield has been forced to go to one man patrol cars with two cars per shift. Officer security and efficiency has been sacrificed. To improve City security we need to have better officer support. By providing a third car on duty, Sheffield Lake needs to hire three more officers. The cost of providing 3 officers is \$210,000 the first year. The City will match the balance and is requesting a Grant of \$180,000 for the first year with "COF Green" reductions for the next two years. The City guarantees that these officers will remain on duty for at least four years. | City of Sheffield Lake | 3 | 31 to 90 days | \$189,000 |
| Lorain | Green Service for Sheffield Lake | As Sheffield Lake Mayor, I, John J. Piskura, personally certify that the following investment requests are fully vetted and are appropriate uses of the paper's dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living Center. To back up our claims as a Green City, Sheffield Lake needs to service the City with one ton trucks that operate on alternative fuels. To purchase two one ton Ford alternative fuel trucks to plow snow and patch roads and trails the City must spend \$158,000. To Create an alternative fuel fleet, we are requesting \$122,000. A Ford Plant is located in our City and although we do not have commitment yet, we hope to secure Ford support for our fleet. | City of Sheffield Lake | 3 | 31 to 90 days | \$122,000 |
| Lorain | Green Service for Sheffield Lake | As Sheffield Lake Mayor, I, John J. | Lorain | EPI | Hazardous Material Storage Cabinets line. Home Health Aide Workforce Training Program. This project, in partnership with Lorain County Community College, will provide home health aide (HHA) workforce training, curriculum development, and patient education to address the home health aide workforce shortage and the needs of individuals with chronic diseases while reducing the rate of acute care hospitalizations and the high cost of disease exacerbation. Our long-range goal is to create a curriculum and teaching methods which results in an industry-recognized credential that becomes a national standard. Once the pilot project is complete, the program could be replicated throughout the state to address similar needs. | Environmental Products, Inc. | 10 | 0 to 30 days | \$250,000 |
| Lorain | Chronic Disease Management Home Health Aide Workfo | Program Goals and Objectives Currently, there are no national or State of Ohio training standards for the HHA field. This program would enable VNAHPO to develop a HHA curriculum to be taught in the classroom setting and as a practicum in the home as well. Students also will receive specialized training in chronic disease care. Sheffield Lake has engineered a highway and bikeway improvement for Walker Road (an intermediate highway that crosses 3 Cities). The project has some State and local money already committed and two phases of the five Phase Project are already completed. To finish this project, the City needs \$1,000,000. This Project will open land across the field from the Ford Plant and provide Sheffield Lake with 1,0000 sewers and 2,5000 storm sewers where none exist today. This 2,7000 highway connection will complete the intermediate for direct access to OH 501. The 5,00000 Bike trails will aid School Children on their trips to School and will connect with two other Cities and Metro Park. The land on the last big piece of property in Sheffield Lake approximately 60 acres that can be developed for industrial and commercial use. Sheffield Lake is a residential community with the third highest foreclosure rate in Lorain County, with the development the City will be able to use commercial use in an industrial area. Engineering is complete, estimating is complete, advertising will take 3 weeks and the project which will employ at least 1 company for six months and can begin now. | Visiting Nurse Association Healthcare Partners of | 200 | 31 to 90 days | \$400,000 |
| Lorain | Sheffield Lake Recovery Plan | Sheffield Lake has the highest domestic violence rate in Lorain County and the 3rd highest foreclosure rate. We also, have the highest Caucasian loan rejection rate in Lorain County. To combat the growing issues of unemployment, that has reduced jobs and destabilized family security, plus still provide protection with reduced tax income. Sheffield has been forced to go to one man patrol cars with two cars per shift. Officer security and efficiency has been sacrificed. To improve City security we need to have better officer support. By providing a third car with a computer and a dash camera we will make each officer more effective and secure. The cost of providing another new fully equipped car with cameras, mounts and computer is \$25,000. The City will match the balance and is requesting a Grant of \$25,000. | City of Sheffield Lake | 200 | 31 to 90 days | \$1,090,000 |

| Lorain | Sheffield Lake Recovery Plan | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living Center. The project cost is over \$100,000,000 but an investment of \$2,000,000 in rebranding US-6 to one level, putting a green center in the median and connecting lake and walking trails through a center entrance at circles a 500' West Wind Turbine and features geo thermo heating will pay dividends. By providing this investment the City will begin to attract private investment for Green Buildings and Shopping, Working and Living Center. With federal help, the City which has the third highest foreclosure rate in Lorain County can create a New City Center that also features Lake Erie, Post Office, City Hall and Green Living, Working and Shopping and a functioning harbor. The Plans are complete we are bidding for our wind turbines and geo thermo drilling and can begin now. | City of Sheffield Lake | 200 | 31 to 90 days | \$1,090,000 |
| Lorain | Sports Development | This project was briefly presented to Anne Hill, from Governor Strickland's Cleveland office in March of 2008. With the opportunity to present it to its primary, the State of Ohio could possibly grant a standard for the country in regards to sports and education. If the plan is not approved, presented, it could further harm the industry. Our group would like the industry to meet with someone from the education department to present the plan. | Sports Development LLC | 500 | 31 to 90 days | \$50,000 |
| Lorain | Lorain Black River Tunnel-Phase I Design | The Phase I RTI Tunnel project is wastewater storage and conveyance tunnel with a pump station. The City of Lorain is seeking construction funding for the Phase I RTI Tunnel project. The City of Lorain is seeking construction funding for the Phase I RTI Tunnel project. The City of Lorain is seeking construction funding for the Phase I RTI Tunnel project. The City of Lorain is seeking construction funding for the Phase I RTI Tunnel project. | City of Lorain | 40 | 0 to 30 days | \$3,000,000 |
| Lorain | Lorain Black River Tunnel-Phase I Construction | The City of Lorain has spent approximately \$90,000,000 on EPA mandated projects. The tunnel is the last of the mandated projects. The City of Lorain has spent approximately \$90,000,000 on EPA mandated projects. The tunnel is the last of the mandated projects. The City of Lorain has spent approximately \$90,000,000 on EPA mandated projects. The tunnel is the last of the mandated projects. | City of Lorain | 50 | 91 to 180 days | \$53,000,000 |
| Lorain | Black River Wastewater Treatment Plant - Design | The City of Lorain is in the process of revisiting their lake front (Lake Erie) and river front (Black River) to help stimulate economic development and job growth. The City's current Black River WWTSP sits on Lake Erie at the mouth of the Black River. The City has evaluated moving the plant to a former steel mill site that was donated to the City. The City has been working with Ohio DOD to evaluate, plan and carry out the remediation. The City has also explored regionalized wastewater treatment with the construction of the new plant to serve surrounding communities. Many of the communities are in favor of the reorganization due to the financial benefits of the regional facility. The new Black River WWTSP would have a capacity of 24 MGD and designed to be a EED certified facility. | City of Lorain | 55 | 31 to 90 days | \$17,200,000 |

| Lorain | Sheffield Lake Clean Green Living, Working and Shop | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down Shopping Center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living Center. The project cost is over \$100,000,000 but an investment of \$2,000,000 in the construction of a 5,000sq ft Hub in the center of the new development will bring great dividends. By moving the Water Department and Major City Hall functions to the Center, we will attract 1,800 people who would not have to visit the Center otherwise. The focus of the City will be on conservation of energy through geo thermo heating and cooling plus wind power for our City Hall. By providing this investment the City will begin to attract private investment for Green Buildings construction in our Shopping, Working and Living Center. With federal help, the City which has the third highest foreclosure rate in Lorain County, can create a New City Center that also features Lake Erie and a functioning harbor. | City of Sheffield Lake | 200 | 91 to 180 days | \$2,000,000 |
| Lorain | Sheffield Lake Clean Green Living, Working and Shop | As Sheffield Lake Mayor, I, John J. Pisura, personally certify that the following investment requests are fully vetted and are appropriate uses of taxpayer dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down Shopping Center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living Center. The project cost is over \$100,000,000 but an investment of \$500,000 in the construction of a geo thermo energy field for heating and cooling for a new 5,000sq ft Hub in the center of the new development will pay great dividends. THERE IS A 8 YEAR PAYBACK ON OUR INVESTMENT IN GEO THERMO ENERGY. The focus of the City will be on conservation of energy through geo thermo heating and cooling plus wind power for our City Hall. By providing this investment the City will begin to attract private investment for Green Building construction in our Shopping, Working and Living Center. With federal help, the City which has the third highest foreclosure rate in Lorain County, can create a New City Center that also features Lake Erie and a functioning harbor. | City of Sheffield Lake | 200 | 91 to 180 days | \$200,000 |
| Lorain | Sheffield Lake Green, Clean, Living, Working and So | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living Center. The project cost is over \$100,000,000 but an investment of \$800,000 for the construction of a 500 foot break wall from Beach Street extending into Lake Erie, with a circular wind turbine platform at the end, will allow the City to construct a 500' West Wind Turbine on our break wall in Lake Erie, on a circular wind turbine platform, will allow the City to power part of our City Center. This power will be coupled with geo thermo heating and cooling to make our Center Clean and green. By providing this investment the City will begin to attract private investment into our Green Buildings and Shopping, Working and Living Center. With federal help, the City which has the third highest foreclosure rate in Lorain County will begin to create a New City Center that also features Lake Erie and a functioning harbor. The City is currently constructing two wind turbines in the Center to power the outdoor lights. | City of Sheffield Lake | 200 | 91 to 180 days | \$800,000 |
| Lorain | Sheffield Lake Green, Clean, Living, Working and So | As Sheffield Lake Mayor, I, John J. Pisura, personally certify that the following investment requests are fully vetted and are appropriate uses of taxpayer dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. The City is currently constructing two wind turbines in the Center to power the outdoor lights. | City of Sheffield Lake | 200 | 91 to 180 days | \$850,000 |
| Lorain | Eastside Fire Station | The City of Lorain's East Side Fire Station is absolutely critical to the safety of the surrounding neighborhood because the area is subject to being isolated due to a washout and a drawbridge. When the roads in this neighborhood are obstructed, this is the only station that can respond to emergencies on this island. The original station was built in 1919 and is now functionally obsolete and in a state of decay. Structural problems are present, and the building lacks the up-to-date necessities for today's firefighters and equipment. A new replacement station has been designed, and it efficiently and efficiently houses the required firefighters and equipment. In fact, the already completed design of the surrounding neighborhood houses while using a lightweight corner panel as the site. * Should ready project substantially designed * Absolutely critical fire station rebuilt to today's standards * Elimination of height * Neighborhood sensitive design | City of Lorain | 21 | 91 to 180 days | \$495,000 |
| Lorain | Fire Equipment Replacement | The Fire equipment replacement project will allow for the purchase of technical rescue equipment including new hydraulic rescue tools, air bags, water and air rescue equipment, rope and confined space equipment. Purchases could begin immediately following funding of this project. Design has been an ongoing research project but has not been achieved due to lack of funds. Operators would begin immediately following delivery of equipment with proper training. | City of Lorain | retained | 0 to 30 days | \$125,000 |
| Lorain | Lorain Black River Restoration Project | Ecological restoration of approximately 6 miles of the Black River and adjacent riparian corridor, starting at the mouth at Lake Erie, see page's details. | City of Lorain, Ohio | 20 | 0 to 30 days | \$9,500,000 |
| Lorain | Sheffield Lake Clean Green Living, Working and Sho | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping, Working, and Living Center. This project cost is over \$100,000,000 but an investment of \$100,000 in Geo Thermo heating and cooling system for our 47' Year Old Post Office which the city owns would integrate private investment in the total development of our Living, Working, and Shopping Center. Not only would the building be constructed but geofeat heat exchangers and heat absorbing window covers will be used. The Village and City of Sheffield/Sheffield Lake, Ohio needs a new Post Office but improving the energy efficiency of our current Post Office will save money only because our theme of Green Energy. With Sheffield Lake having the 3rd highest foreclosure rate in Lorain County and having over 178 vacant homes, this investment is not only warranted but is essential for our City. | City of Sheffield Lake | 200 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------------|----------------|--------------------|---------------------------|
| Lorain | West Side Fire Station | Project will be the construction of a West Side Fire Station to replace an inefficient structure. Project will enable city to replace a highly inefficient structure with a practical station which will be properly located to reflect the increased population and development on Lorain's west side. Station will house an engine company, the fire mechanics division, and possibly Fire Prevention components of the Lorain Fire Department. Project is a planning stage with plenty of suitable locations currently available. Design aspects will include using current city mill housing floor plans to create the living quarters in an affordable and neighborhood conforming design. Design features should include energy efficient/green technologies to ensure future cost savings and efficient operations. Construction could start within six months of funding with operations starting immediately after completion of construction. | City of Lorain | 40 | 91 to 180 days | \$850,000 |
| Lorain | City of Lorain Water Connection | Project will provide emergency water supply during water tower rehabilitation and future emergencies. Lorain's highway infrastructure is old and deteriorating. Engineer estimates of \$70,000,000.00 have been stated to bring Lorain's roadways to an average acceptable level. These infrastructure improvements coupled with sewer, storm water and neighborhood revitalization projects will enhance the quality of life in Lorain and increase outside investment for business growth and expansion. It is estimated to generate 2000 construction jobs and potentially several hundreds of new jobs from business attraction and expansion. | City of Vermilion | 10 | 91 to 180 days | \$75,000 |
| Lorain | Infrastructure Reinvestments | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to renovate our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living center. The project cost is over \$100,000,000 but an investment in \$2,000,000 in a plus 2 story green retailing unit with a solar roof Garden Roof building that overlooks Lake Erie and provides 6 modular retail units with 8 condo units on the second floor. By providing this investment the City will begin to attract private investment in Green Buildings and Shopping, Working and Living Center. With federal help, the City which has the most high-tech workforce in Lorain County can create a New City Center that will peak interest in Lake Erie Living and draw people to the Center of our Town which will feature a functioning harbor. | City of Lorain | 2000 | 91 to 180 days | \$55,977,672 |
| Lorain | Sheffield Lake Green Living, Working and Shopping | In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to renovate our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living center. The project cost is over \$100,000,000 but an investment in \$2,000,000 in a plus 2 story green retailing unit with a solar roof Garden Roof building that overlooks Lake Erie and provides 6 modular retail units with 8 condo units on the second floor. By providing this investment the City will begin to attract private investment in Green Buildings and Shopping, Working and Living Center. With federal help, the City which has the most high-tech workforce in Lorain County can create a New City Center that will peak interest in Lake Erie Living and draw people to the Center of our Town which will feature a functioning harbor. | City of Sheffield Lake | 200 | 31 to 90 days | \$2,800,000 |
| Lorain | Regional Wastewater Treatment | <ul style="list-style-type: none"> Treatment plant. Direct: Lorain is currently under Findings and Orders from OEPA for SSO's, the tunnel violates the final F&O. The proposed tunnel provides capacity for wet weather events and regional operation. Construction of a regional sewer will provide the opportunity to eliminate up to ten smaller sewers, eliminating discharges into local creeks in the region, potentially improving water quality in the region. The existing Black River WWTP in Lorain is landlocked on the shores of Lake Erie (the head of downtown Lorain) and is in need of the sewer will open the lakefront for redevelopment and move the sewer discharge upriver to a new site, which will be a redeveloped brownfield. The new site is a brownfield was donated to the City by RTI Steel. The City is currently working with Ohio Department of Development to assess and clean up the brownfield to prepare the site for the proposed regional sewer. The City is working with several community organizations to reach an agreement to provide regional wastewater treatment, a feasibility study has been completed. Immediate economic stimulus through construction jobs creation. Long term regional economic growth by providing capacity for residential and industrial users on the west side of Lorain. Preparation for compliance with potential future Ohio EPA, DWP regulations. Better Emergency Response preparedness for the west side of Lorain because of increased capacity and stabilized pressure in the water distribution system. Design incorporates energy efficiency and SCADA. | City of Lorain | 11875 | 181 days or more | \$250,000,000 |
| Lorain | Westside Water Tower | <ul style="list-style-type: none"> Long term regional economic growth by providing capacity for residential and industrial users on the west side of Lorain. | Lorain | Dist 3, PID #5418, Ph II Lorain Cnty Trans Center | Phase II Lorain County Transportation Center | Ohio Department of Transportation | 100.5 | 31 to 90 days | \$3,500,000 |
| Lorain | Black Pearl District | The construction of public streets into the Port owned property at the southern half of Black River Landing connecting downtown Lorain to the Black River, creating an entertainment district and connecting the approximately 40,000 of Great Lakes Maritime Museum. This project results in eight distinct developable waterfront parcels and links downtown to the waterfront. A developer looking to locate its corporate headquarters has expressed an interest in investing approximately \$9,000,000 to develop the first parcel and is interested in developing the entire project site. The City and Great Lakes Historical Society have already entered into agreements for the construction of the museum subject to funding. | City of Lorain | 910 | 181 days or more | \$31,262,400 |
| Lorain | Lorain Diked Disposal Site | The project involves the continued re-development of Lorain's waterfront on a portion of a U.S. Army Corps of Engineers 58 acre dredge disposal site. The project is part of a plan to diversify Lorain's economy and to develop Lorain into a waterfront destination community. The initial Phase of Phase II was completed in 2008 and involved the development of a new marina promenade and redevelopment of a public parking lot. Part of this improvement was \$100,000. The proposed \$34 million project will continue the redevelopment of the promenade into the dredge site, rehabilitate the east pier for enhanced public accessibility and further extend public parking on the site, as well as, enhance public water use and shuttle discharge facilities. In addition, that this project is part of the Port Authority's overall master plan for the waterfront which initially included development of a 600 slip \$5.6 million marina complex and public open space areas. | City of Lorain | 160 | 181 days or more | \$3,383,618 |
| Lorain | Eagles Cultural Facility | <ul style="list-style-type: none"> Cultural development project - sports the imagination & promises to be an economic development generator. Construction of a glass atrium between the Eagles Building and the Palace Theater, which would not only physically join the two historic buildings but would serve as a key connector between the City's waterfront and its downtown business district. The atrium would include ADA compliant restrooms, information kiosks, informal dining venues, small retail establishments, an elevator, and pedestrian access to Broadway. The conversion of the Eagles Building from a vacant historic building to a multifunctional arts center - programmatically joined with the Palace Theater. Construction of covered parking adjacent to the Eagles Building supports and expands market opportunities for existing manufacturers in area, and provides alternate shipping options to logistics and distributor networks in the Midwest. Site has readily available rail access and is three miles from Interstate 80/90 at Baumhart. Improve regional industrial access to foreign markets. Have a spin-off effect of increasing the number of jobs in the manufacturing and logistic industry sectors. Support the current local and regional manufacturing sector by reducing costs, thereby making the local manufacturers more competitive. Supports the redevelopment of a major brownfield adjacent to the site - 250 acres, 4.5 million of Lorain Ford Assembly Plant. Reduce train and truck traffic, resulting in a significant decrease in congestion and pollution from emissions. Take advantage of existing infrastructure currently in place, i.e., rail, highways, water and sewers. Create no disruption to neighborhoods or to the business community. All seem the decline of housing while stabilizing and eventually increasing property values. This rehabilitated housing will create lead paint, employ the use of renewable energy, and bring these properties into code compliance. This program will be open to all occupied households regardless of income. Existing rental properties can take advantage of the program if they provide a 5% percent match. Truly large enough in scale to make a difference for the inner city older housing neighborhoods this program will reverse 500 existing homes in a large inner city area. A revolving loan concept includes the City issuing a deferred low interest loan that finances the renovations, and then the loan is due upon property transfer. Repaid principle and interest would then flow back to the city to be loaned out again on future rehabilitation projects. Large scale residential renovation of aging housing stock. Abatement of asbestos and health hazards. Implementation of renewable energy systems. Urban Redevelopment Project to directly revitalize 7 blocks of inner city Lorain including demolition of approximately 80 structures and resettlement of affected homeowners, business owners, and tenants. Construction of City of Lorain High School Campus with the following: <ul style="list-style-type: none"> One new High School to consolidate the current two (2) high schools in the City (funded separately) Library - combined public and school (funded separately) Recreation Center - combined public and school Health campus of Lorain County Community College | City of Lorain | 342 | 181 days or more | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lorain | Fire Department Hybrid Vehicles | The Fire Support Fleet replacement project would enable the Lorain Fire Department to purchase replacement vehicles for its Command unit, Mechanics truck, towing division and fire prevention units. Vehicles would be chosen from state bid listings with fuel efficiency and hybrid technology as a definite consideration in appropriate vehicles. Vehicle orders could be placed within 30 days of funding with operators to begin upon delivery. The significance of this project would be the ability to replace a support fleet of vehicles that have out served their useful life span and have become unreliable and non-efficient. The current fleet includes vehicles that were purchased used and are from the late 1980's and early 1990's and are not fuel-efficient getting only in the 10-mpg range. With the purchase of hybrid vehicles, the City of Lorain will be able to operate in a much more efficient manner and begin to operate in a more environmentally friendly manner. | City of Lorain | 10 | 0 to 30 days | \$95,000 |
| Lorain | Fire Engine Replacement | Fire Engine replacement project will replace on older engine in our fire department fleet. A new engine for central fire district will allow us to move the existing engine to a reserve status and allow our department to retire a 1981 engine that is long past its prime and is an unsafe reserve apparatus. The ordering of this apparatus could be completed either 30 days of funding. The design of this apparatus is complete and will achieve a standardized fleet in the City of Lorain as this design has been incorporated in three of our four districts already. Bids for this apparatus is to be received in 10-15 business days. Start of operations would be immediately following delivery. The significance of this project would be the achievement of a standardized fleet for the Lorain Fire Department. Funding for this project would enable the Fire Department to retire a 1981 engine that is well past its operational age. Engine 2 is not current on any N.F.P.A. standards including it does not have enclosed seating which became a requirement in the late 1980's. Our central station engine is the heaviest engine in the city and responds to any structure fire in the city. To comply with the P25 mandate by the FCC rules, all radios have to be low band capabilities and the only way to accomplish this is to convert our in car radios and portable to digital radios, without the conversion to digital radios switching to low band digital radios would cause disruption in our Communications and would be an officer safety hazard. Will enhance interoperability capabilities. Currently, we have five radio repeater towers and five radio tower sites (phone lines). All sites have to comply with the P25 requirement by the FCC by 2011, which means they have to go from high band to low band. When going to low band, it is necessary to have digital radio towers and equipment, or the reception will be limited and it would be an officer safety hazard. The new tower sites need to be converted to microwave towers. Would enhance interoperability capabilities. | City of Lorain | 10 | 0 to 30 days | \$475,000 |
| Lorain | Communication Devices (Portable) | | City of Lorain | 10 | 0 to 30 days | \$246,500 |
| Lorain | Police Communication Infrastructure | | City of Lorain | 10 | 31 to 90 days | \$150,000 |
| Lorain | Solar Traffic Signal Retrofit | Fabricate and install solar panels and a control system on each traffic signal at each intersection. During daylight hours, when the solar energy the traffic signal will switch to solar power, saving energy from the utility. At night and during cloudy days the solar energy will be stored in a battery bank. Energy savings will occur during the peak utility demand periods, but sunny summer days. Job Creation will come from the manufacturing of the solar systems and installation on each traffic light. Estimating installation on 1,200 traffic signals in Lorain County, saving 40% of the electric power or \$448 per year per light or \$538,400 annually. This project would reduce green house gas emissions and would save heat from the utility companies at their peak power demand. The pay back on installation is 5 years based on electricity rates in Lorain County with future fuel cost savings per county for \$550,000. This proposal is for a pilot project for Lorain County. The solar panels are manufactured in the state of Ohio. The job creation estimates for direct jobs only the solar cells are also produced in Ohio and so the job creation is also expected. | MHP Controls LLC | 20 | 91 to 180 days | \$650,000 |
| Lorain | Police Officer Hiring | Four officers to be assigned to each three major districts of the City to combat crime and gang activity and activities involving terrorism, natural disasters, large scale events, high risk incidents and to utilize for temporary emergency communications in the events that our primary Communications Center goes down or is disrupted. | City of Lorain | 12 | 31 to 90 days | \$960,000 |
| Lorain | Command Vehicle | | City of Lorain | 10 | 0 to 30 days | \$300,000 |
| Lorain | Prisoner Transport Vehicles | Large numbers of prisoner are arrested and transported to the City Jail and the Lorain County Correctional facility. Average 15 transports daily and the trip to the county is a 45-minute commute. Currently, we have two paddy wagons, one is five years old and the other is fourteen years old, with over 100,000 miles and needs to be replaced. We need a larger transport vehicle to be used for county and court runs, and we would like to have a van or suburban type for operational use to provide support to patrol officers on the streets (currently involved in aggressive anti-violence program with Lorain Department Northern Ohio Violent Crime Consortium). | City of Lorain | 10 | 0 to 30 days | \$100,000 |
| Lorain | Police Body Armor | Current ballistic vests are close to their expiration and need to be replaced by the end of 2008. This item will enhance officer safety, especially since the Department is currently engaged in an aggressive anti-violence program (Northern Ohio Violent Crime Consortium). | City of Lorain | 10 | 0 to 30 days | \$94,500 |
| Lorain | NX | Establish new manufacturing facility to produce corrosion resistant steel reinforcement bar ("rebar") and dowel for use in reinforced concrete projects such as bridges, roads, dams, canals, ports, airports, wind-mill farms, water and waste treatment plants and buildings. The rebar produced by NX, known as NX-SCR, has carbon steel core clad with a stainless steel outer layer that is manufactured using a patented technology. NX-SCR exhibits all of the corrosion resistance qualities and long service life of solid stainless steel rebar (SSSR) but sells at prices approximately 20-25% lower than SSSR. The facility is proposed to be located in Lorain, Ohio subject to state and local incentive packages. The project will create between 170 and 200 new Ohio jobs. | NX Infrastructure Limited | 170 | 91 to 180 days | \$35,000,000 |
| Lorain | West Point Retention Basin Expansion and Wetland | Expand existing storm water retention basin and add a constructed wetland to provide additional storm water storage, flood control and storm water quality measures. | City of North Ridgeville | 10 | 31 to 90 days | \$210,000 |
| Lorain | Sanitary Sewer Infiltration Repairs at Subbasins 1 | Provide repairs to existing sanitary sewers including grouting, ratiing and point repairs to reduce storm water infiltration into sanitary sewer system (approximately 3,000 linear feet of sanitary sewer). | City of North Ridgeville | 10 | 31 to 90 days | \$90,000 |
| Lorain | Sanitary Sewer Infiltration Study at Subbasins 6 | Field testing to determine repairs needed to sanitary sewers to prevent storm water infiltration. Approximately 3,000 linear feet of sanitary sewer system in study area. | City of North Ridgeville | 10 | 31 to 90 days | \$69,000 |
| Lorain | Sanitary Sewer Manhole Realignment Project | Repair / relocate existing sanitary sewer manholes to provide improved flow conditions for sewage at approximately five locations. | City of North Ridgeville | 10 | 31 to 90 days | \$120,000 |
| Lorain | Westerly Sanitary Trunk Sewer Extension to Chestnu | Install approximately 3,700 linear feet of sanitary sewer line development of a health / hospital education campus and to allow future extension of sewer on Chestnut Ridge Road to eliminate septic systems. | City of North Ridgeville | 10 | 31 to 90 days | \$1,080,000 |
| Lorain | Shady Drive Sewer Extension & Westfield WWTP Elim | Install approximately 1,000 linear feet of sanitary sewer to eliminate the Westfield Wastewater Treatment Package Plant. | City of North Ridgeville | 10 | 31 to 90 days | \$300,000 |
| Lorain | Sheffield Lake's Clean Green Living, Working, and | As Sheffield Lake Mayor, I, John J. Piskura, personally certify that the following investment requests are fully vetted and are appropriate uses of the player's dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to convert our City a Clean, Green, Eco-friend and Renewable Energy Shopping, Working, and Living Center. This project cost is over \$100,000,000 but an investment of \$340,000 in Gas Thermo heating, cooling and refrigeration system for our 44,000sq ft Apple's Store, would give private interest in the total development of our Living, Working, and Shopping Center. The project would include inverter covers for windows, with 100 geo-thermo wells and geothermal recovery system. With Sheffield Lake having the highest house prices in Lorain County and having over 178 vacant homes, this investment is not only warranted but is essential for our City. | City of sheffield Lake | 200 | 31 to 90 days | \$100,000,000 |
| Lorain | Highbridge Road Bridge Replacement | Construct new bridge over Norfolk Southern RR. | City of Vermilion | 15 | 91 to 180 days | \$1,000,000 |
| Lorain | Jerusalem Road Rehabilitation Project | Street Rehabilitation, build up intermediate and surface course, aggregate base and cement stabilization of subgrade. | City of Vermilion | 10 | 31 to 90 days | \$973,472 |
| Lorain | Sunnyside Road Rehabilitation | Street Rehabilitation, build up intermediate and surface course, aggregate base and cement stabilization of subgrade. | City of Vermilion | 10 | 31 to 90 days | \$1,184,211 |
| Lorain | New Commercial Hangar Flight Center and Airport Of | Construction of new hangar, flight center, and offices at the Lorain County airport. | lorain county community development | 200 | 181 days or more | \$6,000,000 |
| Lorain | Center Ridge Road Widening Environmental Phase | The total cost of the environmental phase is estimated to be \$960,000. The project consists of widening Center Ridge Road from three to five lanes from Shoney Ridge Rd. to Lear Nagle Rd. (approximately 10,000 linear feet or 1.8 miles) including the upgrading and optimization of the existing traffic signals and addition of turn lanes where needed. The project also includes the addition of a six-foot wide sidewalk on the north side of the road and a 10-foot wide multi-use path on the south side of the road. Two connector roads will also be added to enable side street traffic to enter commercial developments without using Center Ridge Rd. | City of North Ridgeville | 100 | 31 to 90 days | \$600,000 |
| Lorain | New Buses for Transit with Fare Boxes | Retaining new fare boxes for Lorain Transit buses | lorain county community development | 0 | 91 to 180 days | \$235,000 |
| Lorain | Avon Belden Rd. & Mills Rd. Intersection Reconstru | Reconstruction of an existing intersection including the addition of left turn lanes, replacement of the existing traffic signal, extension of an existing culvert, and storm sewer improvements. | City of North Ridgeville | 10 | 31 to 90 days | \$1,080,000 |
| Lorain | Extension of Utilities to New Commercial Flight Ce | Building utilities infrastructure to the newly built commercial flight center at the Lorain County airport. | lorain county community development | 175 | 91 to 180 days | \$1,200,000 |
| Lorain | Lear Nagle Road Widening / Reconstruction | The total project cost including engineering, right of way acquisition and construction is estimated to be \$10,830,450 for the widening and reconstruction of existing two-lane Lear Nagle Rd. from Center Ridge Rd. to Lorain Rd. (approx. 1.25 miles). Lear Nagle Rd. is an urban collector and a major access to Interstate 480 and the Ohio Turnpike from North Ridgeville and the surrounding communities. It is proposed to widen the road to three lanes to reduce traffic congestion. One lane is to be a center turn lane. The road will be widened to four or five lanes at its intersections with Lorain Rd. (S.R. 10) and Chestnut Ridge Rd. | City of North Ridgeville | 10 | 0 to 30 days | \$7,980,825 |
| Lorain | Chestnut Ridge Rd. Culvert No. 3 Replacement | Replacement of an existing deteriorated stone and concrete arch culvert on Chestnut Ridge Rd. east of Lear Nagle Rd. with a 12' x 8' reinforced concrete box culvert including upstream roadway reconstruction. | City of North Ridgeville | 10 | 91 to 180 days | \$102,000 |
| Lorain | Lorain Road Reconstruction Phase 3B | Reconstruction of existing Lorain Road between Honeycutt Rd. and Island Rd. (approximately 1600 linear feet) with two 14-foot lanes of concrete pavement including curbs and storm sewers. | City of North Ridgeville | 10 | 91 to 180 days | \$653,000 |
| Lorain | Westside Sewer Interceptor Sanitary Sewer Line | Construct a new Sewer Interceptor and Sanitary Line on the westside of the County. | loraincounty community development | 175 | 91 to 180 days | \$24,000,000 |
| Lorain | Chestnut Ridge Rd. Reconstruction Phase 1 | Reconstruction of existing Chestnut Ridge Rd. asphalt pavement between Lear Nagle Rd. and 2200 feet west of Lear Nagle Rd. with two 14-foot lanes of concrete pavement including curbs and storm sewers. | City of North Ridgeville | 10 | 91 to 180 days | \$958,800 |
| Lorain | Dreco Industrial Parkway | Construction of a new concrete interlocking parking (approximately 850 feet long) including curbs, storm sewers and a culvert at a major ditch crossing. | City of North Ridgeville | 10 | 91 to 180 days | \$750,000 |
| Lorain | Airport Spur Road between Airport and SR 10 | Construction of road connecting the Lorain County airport with State Route 10. | lorain county community development | 350 | 91 to 180 days | \$7,029,000 |
| Lorain | Columbia Safety | Currently only 2 sheriff patrols in Lorain County, due to current budget cuts. These 2 patrols have to service 300 square miles. Our community does not have its own police department. We rely solely on the Lorain County Sheriff. With these cutbacks, our businesses and residents out with little to no protection against crime. Our businesses are plagued with break-ins and robbery of equipment from their premises. This project had been studied in 2007 and ran through part of 2008. Its purpose was to assist in right time parole in our area due to high crime. We would like to restart this program and funding would secure it's effectiveness for 2 years until additional funding could be acquire or budget cuts restored. This project would give protection to our local businesses and residents during the night time, when break-ins escalate. It would give us the 7 figures a week protection which we currently do not have. | Columbia Chamber of Commerce | 4 | 31 to 90 days | \$145,600 |
| Lorain | Elimination of Bender Rd. Curve | Realignment and reduction of degree of horizontal curves in Bender Rd. to increase safety and design speed of the roadway including reconstruction of approximately 275 linear feet of roadway pavement, right of way acquisition, addition of curb and storm sewers, and culvert replacement. | City of North Ridgeville | 10 | 91 to 180 days | \$285,000 |
| Lorain | EastView Ave. and Hadaway St. Roadway Construction | Construction of approximately 675 linear feet of roadway pavement in existing right of way including storm sewers. Project also includes closing Bidgeway Blvd. at Center Ridge Road and providing a out-de-sac turnaround. | City of North Ridgeville | 10 | 91 to 180 days | \$540,000 |
| Lorain | Lorain County Transportation Center Phase 3 & 5 | Improvements to an existing transportation center to add train platforms, canopies, stairs and elevators. | Lorain County | 50 | 91 to 180 days | \$3,000,000 |
| Lorain | Lorain County Regional Airport | This project will make improvements to existing systems to allow for energy cost savings to the existing structures. | Lorain County Community Development Department | 50 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lorain | Lorain County Parking Garage | This will complete the final repairs to the parking structure adjacent to the Lorain County Administration Building. This structure has 485 spaces and is used by county employees and the general public. | Lorain County Community Development Department | 2 | 91 to 180 days | \$1,000,000 |
| Lorain | West Shore Corridor Transportation Project | The purpose of the West Shore Transportation Projects is to identify cost-effective regional transportation solutions that speed travel and regional access, improve mobility for all citizens and boost economic development between Lorain and Cleveland and points further west. | Lorain County Community Development Department | 1,000 | 91 to 180 days | \$1,000,000 |
| Lorain | Replacement of Avon Belden Rd. Culvert @ Phelon Di | Replacement of existing undersized culvert on Avon Belden Rd. with a new properly sized culvert including approach roadway reconstruction. | City of North Ridgeville | 10 | 91 to 180 days | \$90,000 |
| Lorain | Lorain County Regional Airport Industrial Park | Road infrastructure improvements to existing roadway and construction of new 50,000 square foot building to be used as a business attraction and to promote development of an existing industrial park co-located at the Lorain County Regional Airport | Lorain County Community Development Department | 200 | 91 to 180 days | \$4,000,000 |
| Lorain | Highbridge Road Water Tower | Rehabilitation of interior and exterior of tank. | City of Vermilion | 10 | 31 to 90 days | \$450,000 |
| Lorain | Elberta Beach Sanitary Sewer Rehabilitation | Rehabilitation of Sanitary Sewer to meet EPA requirements. | City of Vermilion | 10 | 91 to 180 days | \$1,189,100 |
| Lorain | "Carlisle-Eaton Wastewater Project" Phase-I | The project will create 37.5 linear miles of sewer collection line, 13 underground pump stations and 2 above ground pump stations. LORCO is partnered with Avon Lake Municipal Utilities for waste treatment. Center collection sewer service will be provided to 1,500 existing homes and an anticipated 3,000 new homes and businesses over a 10 to 15 year period. This project will eliminate a high number of on-site septic systems with a verified 42.7% failure rate. Septic systems are non point source pollution to the Black River basin that will be under complete control for wastewater flow in the future. Six contracts will immediately create 100 good paying construction jobs. Stimulus money will be used to greatly reduce the debt service to the benefited users and the low to moderate income and fixed income households. The project is engineered and partially funded under the USDA-Rural Development loan guarantee program with private sector funding. Storm water runoff will be significantly reduced and eliminate further future waste overflow. This project creates a tool for local zoning control and structured growth governed by the townships and villages it serves. | Lorain County Community Development District (LORCO) | 100 | 31 to 90 days | \$8,100,000 |
| Lorain | Sheffield Lake Green, Clean, Efficient, Renewable | As Sheffield Lake Mayor, I, John L. Piskura, personally certify that the following investment requests are fully vetted and are appropriate uses of the paper's dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living center. The project cost is over \$100,000,000 but an investment in \$1,200,000 in widening US 6 by one lane, putting a green center in the median and connecting bike and walking trails through a center entrance that circles a 500kWt Wind turbine that features geo thermo heating. By providing this investment the City will begin to attract private investment in Green Buildings for Shopping, Working and Living. With federal help, the City which has the third highest foreclosure rate in Lorain County, can create a new City Center that also features Lake Erie and with a functioning harbor. | Sheffield Lake | 200 | 31 to 90 days | \$1,200,000 |
| Lorain | Sheffield Lake Green, Clean, Efficient, Renewable | As Sheffield Lake Mayor, I, John L. | Lorain | Elyria WTP New High Service | Replace existing 20MGD high service pump station (40-40 yrs. old) with a new more efficient high service pump station. The high service pumps pump water from the shore of Lake Erie to the City of Elyria approximately 7 miles. The City of Elyria also supplies water to surrounding communities (Amherst, Huron/Erie County Water Authority, North Ridgeville, Elyria Township). A new more efficient pump station will save money by decreasing electrical energy consumption and will allow the flexibility to adjust the pumping rate to match consumption based on seasonal demands. Project shall include new pump building and 4-6 new pumps. | City of Elyria | 60 | 91 to 180 days | \$4,000,000 |
| Lorain | New Library in Downtown Lorain | Build a new 75,000 square foot library in downtown Lorain, Ohio. The current facility was built in 1927 and is well used by Lorain Courthouse. It is 64,000 square feet. Last year over 277,000 people visited this library. We are excited about the type of programs that we offer that include Babytime and computer classes. We currently have over 100 people on a waiting list for who are interested in using computer classes at our library. If we had a new larger building we could offer more programs, more meeting room space for the public and more computers. I believe that our Library is a source of pride for this community and a new library would add a much needed community revitalization of downtown Lorain. It has been difficult for us to come up with funding for this project because of the high unemployment and poverty in this area. We would appreciate any help that we could get. Thank you. | Lorain Public Library System | 100 | 181 days or more | \$200,000,000 |
| Lorain | The Greening of Sheffield Lake Living, Working & S | As Sheffield Lake Mayor, I, John L. Piskura, personally certify that the following investment requests are fully vetted and are appropriate uses of the paper's dollars. In order to jump start Sheffield Lake's economy, we purchased a \$3.5 Million run down shopping center in the center of our City. We decided to reinvent our City as a Clean, Green, Efficient, Renewable Energy Shopping and Living center. The project cost is over \$100,000,000 but an investment in \$2,000,000 in a small wind turbine farm and a geo thermo heating and cooling system for all the green buildings, with a 500kWt Wind turbine and 3 smaller turbines will assist in powering the green buildings. By providing this investment the City will begin to attract private investment in our Green Buildings and Shopping, Working and Living Center. With federal help, the City which has the third highest foreclosure rate in Lorain County can create a New City Center that also features Lake Erie and a functioning harbor. | City of Sheffield Lake | 200 | 31 to 90 days | \$2,000,000 |

| Lorain | Safety program creation and employee training | As the 2008 winner of the Manny Award and the 8th place finisher in the 2008 Weatherhead 100, Military Products Group is experiencing tremendous growth in sales, employment, and capital investment. We are looking to develop a safety program second to none that can serve as a model for all Ohio companies. The successful implementation will allow us to continue to grow while ensuring the safest possible work environment for our dedicated employees. This project would support the increase in employees last year from about 30 to over 60. In addition we spent approximately \$800,000 on capital investments in 2008. In that respect, we are asking for retroactive consideration but we also expect an additional 20% or greater increase in new hires this year and additional significant capital purchases. | Military Products Group, Inc. | 30 | 31 to 90 days | \$80,000 |
| Lorain | Erg-O-Cart | Our second facility is located in New London, OH 44851 which is in Huron County and is a HUB Zone | Benko Products, Inc. | 20 | 0 to 30 days | \$250,000 |
| Lorain | small business tax breaks and vehicle purchase inc | A safety product specifically for the beverage delivery industry, along with our few personnel who drive it to pick up products and do demos of our products - not for hire. Also as a small business we need tax breaks to compete in other states where our competitors face lower taxes. We do not want to lay off personnel in these times but will have little choice without some relief and soon. Regards, Mark Conron President | FSI North America | 2 | 0 to 30 days | \$20,000 |
| Lorain | Charlemont comprehensive headwater streams restora | The project involves the comprehensive restoration of 3 headwater streams and the surrounding 500 acres to address channel stability, biological diversity, water quality, and habitat restoration. | Lorain County Metro Parks | 30 | 31 to 90 days | \$1,700,000 |
| Lorain | Repair, Reconstruction and Resurfacing of Gulf Roa | Reconstruction and Resurfacing of about 1.0 mile of Gulf road. This is a major collector through the City. The existing surface has deteriorated considerably with alligator cracks and pot holes. This roadway serves as major access to several schools, business districts and downtown. The surface is beyond repairs and needs to be resurfaced. | City of Elyria | 30 | 91 to 180 days | \$627,401 |

| Lorain | Lorain County Regional Airport; Spur Road | Linking the Lorain County Regional Airport and its Aviation-Related Industrial Park site to State Route 101-480 divided highway system will greatly enhance Lorain County. This short 2.3 miles will allow people, goods and services to be transported quickly and easily by road and air. If this is money, clearly this proposed \$7,000,000 road will impact the economic development of the county more positively than any other 21st Century infrastructure investment. Estimate project cost: \$7,000,000.00 Schedule: 31-90 days | Lorain County Board of Commissioners | 15 | 31 to 90 days | \$7,000,000 |
| Lorain | Lorain County Transportation Center; Phases 3, 4 & | Lorain County and create an attractive space for public events. Phase 3 and 4 New entry patio complete with ramps, stairs, canopied walkways and sidewalks Paved bus areas for Lorain County Transit hub Park and Ride and public parking area Curbcut and landscape improvements Construct a stair and elevator tower for rail access. Elevator machine room with operating equipment Reinforce concrete foundations, stairs and minor modifications to existing wall Helical hydraulic, 5,000 lbs. capacity, passenger elevator Lighting and appropriate ventilation and heating system Secure (electronic) door lock/release hardware on entrance door Rail platform with exterior lighting and communication systems Interior site improvements at floor level. Phase 5: Park -> Ride Demolish two (2) buildings at the northeast corner of Broad Street and East Avenue in downtown Elyria and provide an asphalt parking area to be used as a Park -> Ride lot to support the Transportation Center. | Lorain County Board of Commissioners | 15 | 91 to 180 days | \$4,000,000 |
| Lorain | Lorain County Regional Airport; Energy Conservatio | Scope of Work This will include: Building envelope repairs, window system improvements Lighting system retrofit Natural Gas conversion Replace HVAC systems Rehabilitate Main Storage Doors Estimated cost for project: \$1,000,000.00 Schedule: Above Ready Engineering is underway and the scope of work will be finalized by the end of December, 2008. Construction can begin as early as March, 2009 | Lorain County Board of Commissioners | 15 | 31 to 90 days | \$1,200,000 |
| Lorain | Lorain County Regional Airport; Job Ready Site Bui | Job Ready Site; Scope of Work Construct a 50,000 square foot manufacturing facility on property currently owned by the Lorain County Board of Commissioners adjacent to the Lorain County Regional Airport. The County has an interested tenant who will provide 24 immediate jobs and a total of 36 new jobs within 3 years. This company currently has a 5 year contract with the U.S. military and predicts 6% annual growth. Estimated project cost: \$6,000,000.00 Schedule: 13 Months RFP for architectural services 3 Months Design and bidding documents 4 Months Construction: 6 Months | Lorain County Board of Commissioners | 36 | 91 to 180 days | \$6,000,000 |
| Lorain | Local Roadway Rehabilitation Project 2009 - Part 1 | Project proposes to rehabilitate eight (8) local roadways. A total of 3.4 lane miles of roadway will be rehabilitated. Work will include base repairs, asphalt wearing course, portland cement concrete replacement, drainage improvements, safety upgrades, signage and pavement markings. Recycled materials will be utilized. | Lorain City Engineering Dept. | 11 | 0 to 30 days | \$330,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Lorain | Lorain County Regional Airport; Office/Storage Bui | Design and construct a new building for office space and storage needed at the airport inside the existing security fence. There is demand for additional airport office space, including storage space for airport operations, maintenance equipment, service equipment and snow treatment materials. Estimated Project Cost: \$1,500,000.00 Schedule: 91-180 days | Lorain County Board of Commissioners | 0 | 91 to 180 days | \$1,500,000 |
| Lorain | Lorain County Regional Airport; Stormwater Plan | Lorain County Regional Airport Airport Stormwater Plan An airport stormwater plan will be developed in order to determine proposed improvements which will improve stormwater management at the airport. The existing airport stormwater drainage network and outfall system is primarily a surface and ditch system. Street flow toward structures and ditch back flows have damaged the foundation of several structures. A state of the art designed surface flow interception, subsurface collection and outfall system would reduce damage to occupied buildings, terraces and pavement areas. With this plan the existing conditions will be evaluated, alternatives for stormwater management improvement will be developed and evaluated and detailed design will be completed for recommended alternatives. Estimated Project Cost: \$300,000 Schedule: Engineer Available | Lorain County Board of Commissioners | 0 | 91 to 180 days | \$300,000 |
| Lorain | West Shore Corridor Transportation Project | Scope of Work Alternative Analysis Study Estimated cost \$1,000,000.00 Schedule: 91-180 days Project Description The purpose of the West Shore Transportation Project (WSCPT) is to identify cost-effective regional transportation solutions that speed travel and regional access, improve mobility for all citizens and boost economic development within the West Shore Corridor between Lorain and Cleveland and possibly points further west as well. The WSCPT study phase for which funding is now being requested is the Alternatives Analysis phase. During Alternatives Analysis the proposed regional/commercial rail services would be evaluated against a number of options including: no rail, light, transportation systems management (TSM - the option that produced RTA's Euclid Corridor Silver Line low speed transit, light rail, trolleys and roadway improvements. Projected costs, ridership, mobility/job access and corridor development potential will be amount the projects included in the Alternatives Analysis. | Lorain County Board of Commissioners | 15 | 91 to 180 days | \$1,000,000 |
| Lorain | Lorain County; Westside Interceptor | Residential homes and businesses were established in many of our small villages in Lorain County, like Kipton and Bower, before, on small lots 60' x 200 feet with an individual septic sewage treatment facility (septic tanks with leach beds). These individual septic systems installed nearly 70 years ago and few have been upgraded since. When built these systems had a useful life of 35 to 40 years if properly maintained. Only 3 per cent of the Westside soils are suitable for septic on individual lots. 97 percent of the area is not suitable for septic. Only 3 per cent only be developed through the use of a sanitary sewer lines. All engineering and boring work has been completed for this project. This is waiting to be submitted to Ohio EPA for a Permit to install and can be installed in 90 days. The City of Lorain is currently in the process of installing a sewer plant facility from the mouth of the Black River to an upstream location. Lorain City will need a larger sewer base with its new location and deep tunnel transmission system. This \$24 million Westside interceptor sewer will provide the needed sewer base needed. In addition | Lorain County Board of Commissioners | 15 | 91 to 180 days | \$24,000,000 |
| Lorain | Repair, Reconstruction and Resurfacing of East Ave | Repair, Reconstruction, and Resurfacing of East Avenue from Broad Street to South Corporation Line of about 1.0 mile long. This is Major Arterial entering in to the City. The existing asphalt surface has deteriorated considerably with large alligator cracks and pot holes. This roadway serves as access to industrial and business districts and downtown. The surface is beyond repairs and need to be repaired. | City of Elyria | 20 | 91 to 180 days | \$404,466 |
| Lorain | Repair, Reconstruction and Resurfacing of Clevelan | Repair, Reconstruction, and Resurfacing of Cleveland Street from Our Road to East Corporation Line of about 1.4 mile long. This is Major Arterial entering in to the City. The existing asphalt surface has deteriorated considerably with large alligator cracks and pot holes. This roadway serves as access to industrial and business districts and downtown. The surface is beyond repairs and need to be repaired. | City of Elyria | 30 | 91 to 180 days | \$812,541 |
| Lorain | North South Roadway | Lorain & Ashland County N&S Roadway - Lorain to 71 Lorain and Ashland Counties have worked collaboratively to design an at-grade divided highway to be located between Lake Erie (City of Lorain) and Interstate 71 (Ashland County). The 38 mile north-south divided highway has a vision to allow people, goods and services to travel at the speed of commerce. During this time of low employment due to plant closing and company layoffs, the decline in property values, and dwindling open space availability on the western side of Lorain County, are reasons that dictate this now is the perfect time to begin \$20 million in infrastructure need. Over the next 50 years and with this advent and common use of I-zoom-passes also known as e-2 pass used nationally to collect tolls this road could be considered as a toll road. Estimated Project Cost: \$20,000,000.00 Schedule: 91-180 days | Lorain County Board of Commissioners | 15 | 91 to 180 days | \$20,000,000 |
| Lorain | Martin Run Flooding Mitigation | Incidents throughout the watershed during moderate to heavy rainfall events as a result of the storm sewer system surcharging and insufficient channel capacity. The project consists of lowering the existing channel bottom of Martin Run approximately 3 to 4 feet with an 8 foot wide channel bottom between West 55th Street and West 4th Street. The channel would be lined the entire length with rock channel protection except in severely confined sections which will require retaining walls to protect existing structures. A detention basin is also proposed upstream of Oberlin Avenue to reduce the peak flow entering the Martin Run channel within the City of Lorain. A study of the Martin Run storage basin has been completed, and firm recommendations have been made for improvements including channel improvements and construction of a detention basin. • The City of Lorain currently owns the property for the detention basin • The liability of the Martin Run watershed to assimilate moderate rainfalls has resulted in flooded basements and flooded streets. | City of Lorain | 203 | 31 to 90 days | \$4,275,000 |
| Lorain | Repair, Reconstruction and Resurfacing of Lake Ave | Repair, Reconstruction, and Resurfacing of Lake Avenue from Furness Street to SR-113 of about 1.25 mile long. This is Major Arterial entering in to the City. The existing asphalt surface has deteriorated considerably with large alligator cracks and pot holes. This roadway serves as access to industrial and business districts. The surface is beyond repairs and need to be repaired. | City of Elyria | 20 | 91 to 180 days | \$710,027 |
| Lorain | Lorain County Regional Airport; Extension of Runway | Lorain County Regional Airport Extension of Runway - Airport Runway 725 The extension of runway 725 from its current 5,000 foot length by 1,300 linear feet would greatly increase usage of the airport and enhance safety. A new runway length of 6,300 linear feet will allow our General Aviation Airport to encourage larger planes to utilize our FAA facility. The additional length will allow the airport to better fulfill its role as a reliever airport for Northeast Ohio. Lorain County Regional Airport can provide corporate air services in the western side of the Cleveland/Canton/Kipton metropolitan statistical area. Estimated Project Cost: \$8,000,000.00 Schedule: Engineer Available | Lorain County Board of Commissioners | 15 | 181 days or more | \$8,000,000 |
| Lorain | Repair, Reconstruction and Resurfacing of Middle A | Rehabilitation, Repair, Reconstruction, and Resurfacing of Middle Avenue from Broad Street to Oberlin Avenue of about 1.2 mile long. This is Major Arterial entering in to the City. The project will include reconstructing median, replacing curbs, replacing existing street lights and other works. The existing asphalt surface has deteriorated considerably with large alligator cracks and pot holes. This roadway serves as access to King High School, business districts and downtown. The surface is beyond repairs and need to be repaired. | City of Elyria | 50 | 181 days or more | \$2,909,115 |
| Lorain | Vermilion River Riparian Buffer Preservation | Program WPCFLP This is a green infrastructure project focused on the establishment of riparian buffers along a total of 4.1 miles (21,780') of the Vermilion River. Western Reserve Land Conservancy is partnering with two public entities to preserve 3 stretches of the Vermilion River. Erie MetroParks is partnering with WRCFLP to preserve riparian buffers in Erie County while Lorain County MetroParks wants to help preserve water quality and the hydrology of the Vermilion River with two projects in Huron and Lorain County. The properties would each protect a significant portion of the miles of the Vermilion River which is currently being evaluated for State Scenic River status. The floor plan forest land that would be preserved would be in flood relief. Planning and Design In Progress - Currently working with Landowner to secure contract. | Western Reserve Land Conservancy | 10 | 181 days or more | \$1,100,000 |
| Lorain | Lorain County Regional Airport; Taxiways A,B,C&D; | Lorain County Regional Airport Remark Taxiways A,B,C and D, Pavement Maintenance. Due to weathered taxiway markings as well as recent surface sealing and were has severely reduced guidance visibility. Remarking of the taxiways is necessary to assist pilots with navigation to and from the runway and aprons. Taxiway marking will include taxiway centerlines, hold bars and edge markings where necessary. Implement an effective pavement maintenance program as an effective means of preserving airport runways, taxiways and apron pavements. The pavement maintenance program will help the airport to identify repair methods and bring to cost-effectively maintain the pavement at the airport. With this project, crack sealing will be performed on the runway, aprons and taxiways. Crack sealing will be performed using FAA specifications. Crack sealing is a cost effective measure in extending the useful life of the pavement strength and wearing course. Estimated Project Cost: \$81,000.00 Schedule: 31-90 days | Lorain County Board of Commissioners | 0 | 31 to 90 days | \$81,000 |
| Lorain | Lorain County Regional Airport; Rehabilitate Taxiway | Lorain County Regional Airport Rehabilitate Taxiway B Taxiway B is approximately 5,000 feet long and 50 feet wide. According to ODOT records, it was constructed in 1971. The taxiway exhibits cracks which have been previously repaired several times. The ODOT Pavement Condition Evaluation record 02/27/2012 class Taxiway B at PCI of 78. It is anticipated that the PCI will fall below a 70 by 2012. With this project 2' of asphalt surface course will be placed on granular fabric on a scratch asphalt leveling course. Also included in the project are minor drainage improvements, taxiway marking, topsoiling, seeding and mulching. Estimated Project Cost: \$785,000.00 Schedule: Engineer Available | Lorain County Board of Commissioners | 0 | 181 days or more | \$785,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lorain | Lorain County Regional Airport; Rehabilitate Main | Lorain County Regional Airport Rehabilitate Main Apron The apron to be rehabilitated is approximately 200' x 300' and is located northeast of the FBO building. The existing apron is concrete and is in very poor condition. When rehabilitated, this apron will provide much needed additional tie-down areas for relevant aircraft. With this project, alternatives for rehabilitation will be evaluated and final plans and specifications will be produced. Estimated Project Cost: \$2,000,000.00 Schedule: Engineer Available | Lorain County Board of Commissioners | 0 | 91 to 180 days | \$2,000,000 |
| Lorain | Lorain County Regional Airport; New FBO-Airport Ma | Lorain County Regional Airport New FBO - Airport New Main Terminal/Hangar The construction of a new State-of-the-Art Commercial Terminal Hangar is needed immediately. Building on the north side of the runway this high-bay and high-floor facility will modernize the airport while greatly enhance the potential use of the facility. This six million dollar project will include infrastructure extension that allows development of an additional 300 acre aviation-related industrial park facility. Estimated Project Cost \$6,000,000.00 Schedule: 181 days or more | Lorain County Board of Commissioners | 5 | 181 days or more | \$6,000,000 |
| Lorain | Lorain County Parking Garage | Scope of Work Complete the final repairs to this parking structure adjacent to the Lorain County Administration Building. Repairs will include: Complete repair of the east half of levels 6 and 7 Apply new traffic bearing membrane Reinforcing of parking areas Continue repair of the west half of level 6 with topping and full-depth tee flange repairs. Remove and replace a portion of the slab on ground, topping, and full-depth tee replacement as necessary and install a new joint at the intersection of the framed floor and slab on ground at level 7. Repair concrete spalls in beam ledges of inverted tee beams at the crossovers Full-depth repair of the double tee flange and topping slab at three cross on level 4. Repair of spalled panels at the exterior surface Sealing of panel joints Sealing of joints at stairs Repair of corroded steel plates between tee flanges. Estimated cost for project \$1,000,000.00 Schedule 12 - 18 Months This parking garage has 445 parking spaces and is used by both county employees and the general public. | Lorain County Board of Commissioners | 0 | 31 to 90 days | \$1,000,000 |
| Lorain | Local Roadway Rehabilitation Project 2008 OPWC Pro | Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. | Lorain City Engineering Dept. | 12 | 0 to 30 days | \$425,000 |
| Lorain | South Broadway Rehabilitation Project 2009 | Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. Project proposes to rehabilitate six (6) local roadways of which two (2) are Fed. Aids Routes. Total length of the rehabilitated are 5.338 miles. | Lorain City Engineering Dept. | 6 | 31 to 90 days | \$585,000 |
| Lorain | Local Roadway Rehabilitation Project 2009 - Part 2 | Project proposes to rehabilitate five (5) local roadways for a total of 2.38 lane miles of roadway. Work includes base pavement repair, pavement replacement, asphalt resurfacing, drainage improvements, safety upgrades, pavement markings, signage, etc. Recycled materials will be utilized. | Lorain City Engineering Dept. | 12 | 91 to 180 days | \$410,000 |
| Lorain | Diked Ddisposal Site Phase I Site Improvements | The project involves the continued re-development of Lorain's waterfront on a portion of a U.S. Army Corps of Engineers 58 acre dredge disposal site. The project is part of a plan to diversify Lorain's economy and to develop Lorain into a waterfront destination community. The initial Phase I of Phase I was completed in 2008 and involved the development of a new marina entrance and redevelopment of a public parking lot. Cost of this improvement was \$150,000. The proposed \$3.4 million project will continue the redevelopment of the waterfront into the dredge site, rehabilitate the east pier for enhanced public accessibility and further extend public parking on the site, as well as, enhance public water taxi and shuttle dockage facilities. It should be noted, that this project is part of the Port Authority's overall master plan for the waterfront which initially included development of a 600 slip \$5.4 million marina complex and public open space areas. | Lorain Port Authority | 161 | 31 to 90 days | \$3,383,618 |
| Lorain | Lorain Heritage Streetcar Project | The Black River Landing multi-modal center will serve as the hub for the streetcar line. Phase I will run approximately one mile south providing a north-south connection to serve downtown and provide a direct waterfront connection, and maintenance storage building. Initially the Heritage Streetcar Line will serve the 200,000 - 300,000 annual festival and event site visitors, thereby enhancing access and reducing traffic congestion and parking requirements. The scope of the project includes: the restoration of existing railway cars that once operated in the Lorain Lorain Streetcar Line and transportation heritage to the present, the use of contemporary light rail vehicles (PCCs, ADA equipped for comfortable public access, and a new transit system as the base of operation and destination facility for the street car line. Overall, the project will connect the downtown to the waterfront, interconnect waterfront developments, reduce highway congestion, reduce parking requirements, promote utilization of various modes of transportation and promote transit oriented development. | Lorain Port Authority | 12 | 31 to 90 days | \$7,087,014 |
| Lorain | Ohio State Route 58 Resurfacing - PID No. 79452 | Proposes to rehabilitate 1.1 lane miles of state highway through the City of Lorain. This is a Federal Aid Route. Work includes base pavement repair, milling, asphalt resurfacing, repairs to three bridges, pavement markings, safety upgrades, signage, etc. | Lorain City Engineering Dept. | 14 | 31 to 90 days | \$500,000 |
| Lorain | Oberlin Avenue Rehabilitation - Part 2 - ODOT PID | Project proposes to rehabilitate 5.34 lane miles of Oberlin Avenue. This is a Federal Aid Route. Work consists of milling, base pavement repairs, asphalt resurfacing, curb replacement, re-striping to three lanes, pavement markings, casting replacements, signage, safety upgrades, etc. Recycled materials will be utilized. | Lorain City Engineering Dept. | 15 | 91 to 180 days | \$1,828,000 |
| Lorain | SR 60 & Mason Rd. Pump Station Suction Loop | Install approximately 5 miles of new 16 inch water main between an existing tank and pump station to boost suction pressure at the Mason Rd. & SR 60 Pump Station to increase pumping capacity. The project also includes an additional mile of new 16 inch water main and piping changes to allow Northern Ohio Rural Water to receive water from both of its sources simultaneously. This project is intended to fortify Northern Ohio Rural Water's Main District water supply. | Northern Ohio Rural Water | 20 | 91 to 180 days | \$3,000,000 |
| Lorain | Washington Building | Elyria City Schools is rehabilitating the 1893 Washington Building, listed on the National Register of Historic Places, as the centerpiece of a \$50 million new high school complex. The Washington Building will be rehabilitated at a cost of about \$12 million. Part of that project involves asbestos remediation and energy saving. A grant from this program would visibly benefit the citizens of Elyria and can result in funding levels reasons that can make this building more energy efficient, adding savings to the citizens for years to come. | Steven McQuillin & Associates | 200 | 0 to 30 days | \$500,000 |
| Lorain | Avon Lake Wastewater Treatment Plant Renovations | Complete renovation of the Wastewater Treatment Plant including new "headworks", additional sludge thickening, dewatering equipment, energy efficient pumps & aeration blowers and ultra violet disinfection. Treatment plant serves the City of Avon Lake, portions of the City of Avon and future flows from 16 Townships in Lorain County. Project will include innovative technology, energy efficiency and reduce contaminant discharge to Lake Erie. | City of Avon Lake Municipal Utilities | 35 | 0 to 30 days | \$9,750,000 |
| Lorain | Jaycox Combined Sewer Separation | Project will eliminate wet weather sanitary discharge to Lake Erie from a 66 inch combined sewer drainage area. Project will reduce pollution to Lake Erie from combined sanitary/sewer waste discharges during rain events. | City of Avon Lake Municipal Utilities | 20 | 31 to 90 days | \$1,750,000 |
| Lorain | LORCO 13-Mile Sewer Force Main and Pump Station | 13-mile sanitary force main and pump station to transport waste water from Eaton and Clarick Townships in Lorain County to the Avon Lake Waste Water Treatment Plant for treatment and discharge to Lake Erie. Project will eliminate Black River and stream pollution from failed septic tanks and package treatment systems. | City of Avon Lake Municipal Utilities | 65 | 31 to 90 days | \$4,000,000 |
| Lorain | Repair, Reconstruction and Resurfacing of Schaden | Repair, reconstruction and resurfacing of Schaden Road from SR-57 to West End including portion in Elyria Township. The project will involve about 4,400 sq. ft. and 225,000 sq. ft. of asphalt road. The existing asphalt surface is deteriorated considerably with large alligator cracks and potholes. This roadway is an access to major industrial district and to a cancer research hospital in the City. This road is major collector. The surface is beyond repairs and needs to be replaced. | City of Elyria | 20 | 91 to 180 days | \$557,584 |
| Lorain | Chronic Disease Management Home Health Aide Workfo | The Visiting Nurse Association Healthcare Partners of Ohio (VNAHPO) respectfully requests \$400,000 for the Chronic Disease Management Home Health Aide Workforce Training Program. This project, in partnership with Lorain County Community College, will provide home health aide (HHA) workforce training, curriculum development, and patient education to address the home health aide workforce shortage and the needs of individuals with chronic diseases while reducing the rate of acute care hospitalizations and the high cost of disease escalation. Our long-range goal is to create a curriculum and teaching method which results in an industry-recognized credential that becomes a national standard. Once the pilot project is complete, the program could be replicated throughout the state to address similar needs. | Visiting Nurse Association Healthcare Partners of | 200 | 31 to 90 days | \$400,000 |
| Lorain | Streetscaping, Repair and Reconstruction of Elyria | Program Goals and Objectives Currently, there are no national or State of Ohio training standards for the HHA field. This program would enable VNAHPO to develop a HHA curriculum to be taught in the classroom setting and as a practicum in the home as well. Students also will receive specialized training in chronic disease care - diabetes, cardiovascular, mobility, and Alzheimer/dementia - as well as hospice care. To derive full potential from this program, the program will include: - Streetscaping, Repair and Reconstruction of Elyria Downtown Commons Area. The project will include replacing 60,000 sq. ft. of sidewalk panels, sewers in alleys, existing trees and decorative street lights. The project will also include upgrading of traffic signals, provide irrigation for plantings, install new fountains in the park area, install miscellaneous bins, Downtown area comprised of businesses, retail stores, office complexes, County and City Offices, County Justice Center and City Municipal Court. Improvement of the area is necessary for protecting existing work force and encouraging future growth. | City of Elyria | 100 | 181 days or more | \$5,535,750 |
| Lorain | Wellington Route 58 Grade Separation | Project Description: Construction of an underpass grade separation with State Route 58 at the CSX railroad tracks on a new roadway alignment. The project length is .26 miles and will involve reconstruction of North Main Street and improvements to Taylor Street and Clay Street to maintain access. Federal stimulus funds would be combined with committed state, local and CSX funds to complete an important separation of the railroad grade at the CSX double main line track, which crosses State Route 58 on the northern edge of the downtown Wellington, Lorain County, Ohio. This project would make possible the construction of a 4-lane underpass that would serve local and through traffic using SR 58. Hourly traffic counts at this location are in excess of 1,200 vehicles and the average daily train count was 90 in 2005. The volume of both forms of traffic remains similar if not higher as of today. Perhaps more importantly, the railroad grade divides the village of a half and separates and impedes access, response and transport times for public safety forces such as fire, ambulance and police. | Village of Wellington | 465 | 31 to 90 days | \$6,000,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase I | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The following 4 bridges have been identified as being deficient and in need of replacement: Pine Road - Wellington Twp Middle Ridge Road - Brownhats Twp Slung Road - Ashland Twp West Road - Pottsville Twp The project consists of the replacement of existing steel beams, steel trusses and concrete bridges with new concrete box beam bridges at widths to support future roadway expansion. The projects would utilize the existing substructures where possible thus expediting the bridge replacement. The plans for these projects are complete. | Lorain County Engineer | 80 | 0 to 30 days | \$1,757,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Lorain | Lorain County Roadway Resurfacing Program | The Lorain County Engineer has had an aggressive program to upgrade the County Road system to meet federal highway standards. The program has consisted of resurfacing, paved barrier improvements, new signage, as well as other safety upgrades. This is an ongoing program whereby we have obtained federal dollars each year to upgrade the County Road system. Some of the roadways that have been upgraded to meet federal standards are in need of resurfacing to maintain the integrity of the roads. The Lorain County Roadway Resurfacing Program as attached will extend the life of these roadways. The project consists of the resurfacing of approximately 24.5 miles of roads in the County Roadway system. The work consist of milling the existing asphalt roads, base repairs as necessary, resurfacing with a 3 inch asphalt overlay, and new pavement markings. | Lorain County Engineer | 270 | 0 to 30 days | \$5,700,000 |
| Lorain | Cooper Foster Park Road Bridge Replacement | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The Cooper Foster Park Road bridge is in need of replacement. The new bridge will be widened to accommodate the increase in traffic that has occurred on this main arterial road. The carriage of Cooper Foster Park Road is the Corporation Limit between the City of Lorain and the City of Amherst. The County Engineer is coordinating the project since the road was once a County Road. The project consists of the replacement of existing steel beams, steel trusses and concrete bridge with a new concrete box beam bridge. The project would utilize the existing substructure where possible thus expediting the bridge replacement. | Lorain County Engineer | 40 | 31 to 90 days | \$744,000 |
| Lorain | Flow Equalization Basin | To balance flows and eliminate sanitary sewer overflows | City of Amherst | 40 | 181 days or more | \$4,500,000 |
| Lorain | Trunk Main Replacement at Lift Station | Upgrade and enlarge main trunk line at Cooper Foster lift station to Water Pollution Control Center | City of Amherst | 25 | 181 days or more | \$765,000 |
| Lorain | Sanitary Sewer Lining & Misc. | Cooper Foster Park Rd. State Rt. 58, to Oberlin Avenue sanitary lining and miscellaneous | City of Amherst | 10 | 181 days or more | \$192,000 |
| Lorain | Safe Schools | With a public officer for the City of Amherst to resume the position of School Resource Officer that the police department had to remove. Street scape our sidewalks are in very bad condition and are not handicap accessible. our town hall parking lot is in bad shape, and some of our streets need work done to them. we need about 400 feet of side walks put in. Kipton is a small town and we don't have much money. the need to do something here before we have nothing left. Thanks for your time. Hope you can help the town of Kipton. | Amherst | 1 | 91 to 180 days | \$180,000 |
| Lorain | streets and sidewalks and parking lot | Mayor Robert Melancon | Kipton Village | 15 | 91 to 180 days | \$75,000 |
| Lorain | Reconstruct taxiways | Reconstruct three taxiways adjacent to three hangars. | Lorain County Regional Airport | 5 | 91 to 180 days | \$307,000 |
| Lorain | Sanitary Sewer Lining & Miscellaneous | Cooper Foster Park, Terra Lane to State Rt. 58 Sanitary Sewer Lining and Miscellaneous work | City of Amherst | 10 | 181 days or more | \$112,000 |
| Lorain | Dodge Drive Sanitary Relief | Dodge Drive Sanitary Sewer Relief and Lining | City of Amherst | 10 | 181 days or more | \$48,000 |
| Lorain | Royal Drive | Royal Drive Sanitary Lining upgrade to eliminate inflow and infiltration. | City of Amherst | 10 | 181 days or more | \$88,000 |
| Lorain | Lancer Drive | Lancer Drive sanitary lining to eliminate inflow and infiltration. | City of Amherst | 10 | 181 days or more | \$96,000 |
| Lorain | Siphon Chamber | Siphon Chamber to eliminate overflow | City of Amherst | 20 | 181 days or more | \$495,000 |
| Lorain | Loperwood Street Reconstruction | The street serves as a main arterial connector within the Village. Average daily traffic includes a significant number of school buses, emergency vehicles, passenger vehicles & trucks | Village of LaGrange | 15 | 91 to 180 days | \$1,856,700 |
| Lorain | U.S. Grant Street Reconstruction | The street serves as a main arterial connector within the Village. Average daily traffic includes a significant number of school buses, emergency vehicles, passenger vehicles & trucks | Village of LaGrange | 15 | 91 to 180 days | \$1,250,000 |
| Lorain | Clean Green Renewable energy Fire station improvem | Under Title VI, Department of Home Land Security, Firefighter Assistance funding for fire station improvements is available. Sheffield Lake has a 50 year old Fire Station that does not have enough for new firefighting equipment. Quarters are inadequate and an aerial ladder truck will not fit in the station. Water firefighters are not adequately supported. Sheffield Lake is a Coast Guard safe harbor City on Lake Erie. The City has permitting authority and capability for Fire and Police enforcement on the Lake. The City wants to add gas thermal heating and cooling to the existing building plus provide a large bay for equipment and sleeping quarters for all firefighters. Installation of a new 10.5, generator Multi-Point Pressure Filtration system at the WTP. The treatment system includes a clarifier, multi-media filter, and a granular activated carbon filter | City of sheffield Lake | 18 | 91 to 180 days | \$3,500,000 |
| Lorain | WTP Multi-Tech Expansion | Replacement of underaged sanitary sewer on Forest Street | Village of Wellington | 10 | 91 to 180 days | \$828,500 |
| Lorain | Forest Street Sanitary Sewer Replacement | Project replaces 12,500 LF of existing deteriorating waterline installed in 1952 | Village of Wellington | 10 | 181 days or more | \$300,000 |
| Lorain | Western Distribution Main Replacement | 11,800 LF of Storm Sewer Replacement and upgrading, including catch basins, yard drain, manholes, driveway and pavement repairs, lawn restoration and elimination of standing water and flooding. | Village of Wellington | 25 | 181 days or more | \$1,736,000 |
| Lorain | Elizabeth, Puth, Joseph Storm Sewer Replacement an | WTP Ultraviolet Disinfection Improvements | City of Avon | 15 | 31 to 90 days | \$1,040,000 |
| Lorain | WTP Ultraviolet Disinfection Improvements | WTP improvements are necessary to assure adequate and quality water supply | Village of Wellington | 10 | 91 to 180 days | \$177,900 |
| Lorain | Erie Street/Industrial Avenue Elevated Tank Feed L | Project will install replacing 840 LF of existing deteriorating 48" 50 year old cast-iron & provide a direct feed connection to the Industrial Avenue Elevated Tank. | Village of Wellington | 10 | 91 to 180 days | \$1,380,000 |
| Lorain | WWTP Clarifier Improvements | Project will consist of removal and replacement of clarifiers, weirs, plunger skidde pumps | Village of Wellington | 15 | 31 to 90 days | \$328,400 |
| Lorain | Wenner Street Reconstruction & Waterline Replacem | The project will involve the replacement of approximately 3,200 LF of concrete pavement, installation of 324 LF of 12" conduit, 2,885 LF of 4" underdrain, and 1,430 LF of waterline replacement | Village of Wellington | 10 | 91 to 180 days | \$827,940 |
| Lorain | Elizabeth, Puth, Joseph, Sanitary Sewer Replacem | 3,400 LF of Sanitary Sewer extension including manholes, driveway and pavement repairs, lawn restoration and elimination septic systems and BOD discharge. | City of Avon | 15 | 31 to 90 days | \$1,600,000 |
| Lorain | Adams Street Reconstruction & Sanitary Sewer Repla | The project involves the reconstruction of 1,220 LF of roadway, with associated water, storm and sanitary improvements | Village of Wellington | 10 | 91 to 180 days | \$1,042,225 |
| Lorain | Lincoln Street Reconstruction & Sanitary Sewer Rep | The proposed project includes the installation of new 8" thick concrete pavement, 20' wide with 6" integral concrete curbing, pavement subgrade compaction and stabilization, installation of a pavement under-drainage system to maintain the condition of the improved grade side, and replacement of storm sewers and catch basins also found to be in a deteriorated condition | Village of Wellington | 10 | 91 to 180 days | \$900,125 |
| Lorain | Chester Road Relocation and Extension | Relocation and Extension of Chester Road consisting of 4 acres of clearing, 2,500 SF of pavement removed, 2,200 LF of storm sewers, 440 LF of 24" box culvert, 11,000 SF of Concrete Pavement, 3 Way Signalized Intersection, Pavement Markings, Phase Utility Extensions and Relocations, and restoration. | City of Avon | 20 | 181 days or more | \$1,464,000 |
| Lorain | Lorain Community Educational Complex | Construction of a new, centrally located high school to take the place of hearnshaw high schools on the edges of the school district. OSFC already has \$80 million set aside for two replacement high schools. The new high school will be situated on about 80 acres of land in a highland area of the city, together with a public library, new recreational center, new office building and space for Lorain County Community College. All of the entities would share their facilities with each other thereby eliminating the need for redundant facilities in other parts of the city. The project would require the demolition of the St. Joseph Community Center, which is an old hospital facility that is currently under utilized and inefficient. The offices housed in that center would be housed in a new office building located on the campus. The total cost is estimated at \$125 million as follows: \$66 for high school; \$20 for library; \$25 for rec center; \$55 for office building and \$55 for land acquisition and demolition. In addition to 200 construction and 450 permanent jobs, the project will enhance educational opportunities while reducing operating costs for all entities | Lorain City School District/Lorain Public Library/ | 450 | 181 days or more | \$10,000,000 |
| Lorain | Weatherize, insulate and provide other energy effi | Weatherize, insulate and provide other energy efficiency improvements for homes of low to moderate income residents | City of Oberlin | 1 | 31 to 90 days | \$75,000 |
| Lorain | Refrigerator replacement (50) to achieve energy | Replace 50 refrigerators to achieve energy efficiency for low to moderate income residents | City of Oberlin | 1 | 31 to 90 days | \$37,500 |
| Lorain | Develop combined heat and power (CHP) plant using | Develop a combined heat and power (CHP) plant using landfill gas. Oberlin College and the City of Oberlin are working to acquire the rights to a methane gas produced at a local landfill and to expand the power generation capability to fully utilize the available landfill gas. This project will serve as a major source of power for the community and enable the College to end its use of coal to generate steam heat for College buildings. The first phase of this effort involves acquisition of the landfill gas rights (estimated \$8-12 million) and planning, design and development of infrastructure to bring the gas to the landfill for the site of the CHP plant (approximately \$15-20 million). | City of Oberlin | 10 | 181 days or more | \$18,000,000 |
| Lorain | Develop a community solar collector "farm" | Develop a community solar collector "farm" using 100 acres of the art Greenfield Solar tracking collectors. Greenfield Solar has developed high efficiency tracking PV collector systems that produce both electricity and thermal energy. The community solar collector "farm" would be located so that the thermal energy from the systems could provide heat for a community facility such as the Lorain County Men's/Park's swimming pool or other municipal facility. | City of Oberlin | 10 | 91 to 180 days | \$950,000 |
| Lorain | Upgrade and renovate Oberlin Fire Station | Provide a safer working environment for Oberlin firefighters by renovating and upgrading the 30+ year old fire station. Ensure Oberlin firefighters have safe, adequate facilities to conduct training and store emergency vehicles/equipment. The current station is too small, it cannot keep pace with the growth in service demands and operational requirements, and does not meet current codes and safety/health standards. | City of Oberlin | 10 | 31 to 90 days | \$3,400,000 |
| Lorain | Colony Drive resurfacing | Colony Drive resurfacing | City of Oberlin | 0 | 31 to 90 days | \$250,000 |
| Lorain | Install drainage/pave parking lot at the Hamilton | Install drainage/pave parking lot at the Hamilton Street Recreation Complex to reduced dust pollution problems for nearby property owners | City of Oberlin | 0 | 31 to 90 days | \$250,000 |
| Lorain | Site improvements, pavilion for future Underground | First stage of site improvements, pavilion and amenities for the future Underground Railroad Center in Oberlin | City of Oberlin | 0 | 31 to 90 days | \$250,000 |
| Lorain | Reroof future Oberlin Underground Railroad Center | Reroof the Oberlin Underground Railroad/Clubhouse Building with historically accurate slate and copper gable materials, repair of rafters and framing, installation of underlayment. | City of Oberlin | 0 | 31 to 90 days | \$140,000 |
| Lorain | Reroof future Oberlin Underground Railroad Center | Sidewalk Repair in downtown to improve safety, new sidewalk installation for school children/pedestrian safety - multiple locations; improved signage, street marking and other measures as an outcome of ODOT safe route to school plan. In collaboration with local school district. | City of Oberlin | 0 | 91 to 180 days | \$335,000 |
| Lorain | Sidewalk repair and installation for pedestrian/st | Sidewalk Repair in downtown to improve safety, new sidewalk installation for school children/pedestrian safety - multiple locations; improved signage, street marking and other measures as an outcome of ODOT safe route to school plan. In collaboration with local school district. | City of Oberlin | 0 | 91 to 180 days | \$335,000 |
| Lorain | South Pleasant Street/Edison Street repaving | South Pleasant Street/Edison Street repaving following 2008 water line improvements | City of Oberlin | 0 | 91 to 180 days | \$150,000 |
| Lorain | UV water disinfection system installation at Oberl | As part of the overall water plant project add UV water disinfection system installation at Oberlin Water Treatment Plant | City of Oberlin | 0 | 91 to 180 days | \$32,500 |
| Lorain | Gladys Court sanitary sewer replacement | Gladys Court sanitary sewer replacement and street repaving following sewer improvements (\$250,000) * | City of Oberlin | 0 | 91 to 180 days | \$250,000 |
| Lorain | South Main Street Storm Sewer replacement | South Main Street Storm Sewer replacement | City of Oberlin | 0 | 91 to 180 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------------|----------------|--------------------|---------------------------|
| Lorain | South Main Street waterline replacement | South Main Street waterline replacement | City of Oberlin | 0 | 91 to 180 days | \$750,000 |
| Lorain | teeth replacement | replace teeth of locals who's family lack them | red necks of america | 5 | 0 to 30 days | \$100,000 |
| Lorain | Construction of a new junior high school | The school district will build a new junior high school to be opened for the 2012 - 13 school year. As the economy has spiraled downward the relocation of the community dropped, therefore leaving the district short of dollars to build the junior high to full capacity. | Avon Local School District | 150 | 31 to 90 days | \$6,000,000 |
| Lorain | Chemical Optimization and Solids Handling | The Elyria Water Treatment Plant last major plant expansion was in 1986. Since this time drinking water regulations and solids handling have become more stringent. This project would improve the over all treatment of water by modernizing line and raw water. Utilizing decreasing chemicals and improving the treatment process. | City of Elyria | 65 | 91 to 180 days | \$3,000,000 |
| Lorain | Dunton Road Sanitary Sewer Extension | The cost of the project is very high, estimated at the time to be \$17,400 per house, due to the added cost to extend a lengthy outlet sewer to the point of discharge. Due to home sewer objections to the high assessment costs, the Commissioners stopped the project in late 2008 in hopes of obtaining additional funding. | Lorain County Engineer | 83 | 0 to 30 days | \$1,490,000 |
| Lorain | Griswold Road Trunk Sanitary Sewer | Project Components: 5,596 feet of sanitary sewer, 11 sanitary manholes, 56 eye connections, 815 square yards of asphalt replacement, maintenance of traffic and appurtenances. | Lorain County Engineer | 202 | 0 to 30 days | \$4,040,000 |
| Lorain | ABBE ROAD (S) RESURFACING AND WIDENING FROM UNIVER | REPAIR, RESURFACING AND WIDENING OF APPROXIMATELY 1.5 MILES OF ABBE ROAD (S). THIS SECTION OF THE STREET IS LOCATED WITHIN A COMMERCIAL, INDUSTRIAL AND RESIDENTIAL SECTION OF THE CITY AND IS USED AS A MAJOR COLLECTOR ROADWAY DURING HIGH VOLUME TRAFFIC. TRACTOR TRAILERS AND HIGH VOLUMES OF EVERY DAY TRAFFIC HAS CAUSED POTHOLES AND OTHER SIGNIFICANT DEFECTS TO THE PAVEMENT. THE ROADWAY IS NARROW FOR COMMERCIAL AND INDUSTRIAL SECTOR THAT IT SERVES. AT SOME INTERSECTIONS, PEDESTRIAN CROSSINGS DO NOT MEET CURRENT ADA REQUIREMENTS. | CITY OF ELYRIA | 30 | 31 to 90 days | \$622,875 |
| Lorain | Rolling Heights Allotment Sanitary Sewer Project | Project Components: 9,918 ft of sanitary sewer, 28 sanitary manholes, 154 eye connections, 2200 sq. yds. of asphalt replacement, a rail road bore, maintenance of traffic and appurtenances. | Lorain County Engineer | 178 | 0 to 30 days | \$3,500,000 |
| Lorain | Water Transmission Main No. 3 | New 900" x 48" potable water transmission main to supply adequate volumes of water to an approximate 60 square mile water service area in Lorain, Medina, Cuyahoga, Erie and Huron Counties. It is located in Avon Lake and transports the water to Pump Stations in the city of Avon, Ohio and then out to the area noted herein. | Avon Lake Utilities | 20 | 91 to 180 days | \$1,500,000 |
| Lorain | CLARK STREET REPAIR AND RESURFACING FROM EAST RIVE | REPAIR AND RESURFACING OF APPROXIMATELY 0.5 MILES OF CLARK STREET. THIS STREET IS CONSIDERED A MINOR COLLECTOR ROADWAY AND IS LOCATED WITHIN A COMMERCIAL, INDUSTRIAL AND RESIDENTIAL SECTION OF THE CITY. THE STREET IS CONCRETE WITH ASPHALT OVERLAY AND HAS NOT BEEN RESURFACED IN 15 YEARS. SURFACE DETERIORATION, INCLUDING POTHOLES, CRACKING AND RUTTING, HAS BEEN ACCELERATED BY THE POOR DRAINAGE AND TRACTOR TRAILER TRAFFIC. PEDESTRIAN CROSSINGS DO NOT MEET CURRENT ADA REQUIREMENTS. | CITY OF ELYRIA | 25 | 91 to 180 days | \$199,393 |
| Lorain | FOURTH STREET AND EAST AVENUE REPAIR AND RESURFACI | REPAIR AND RESURFACING OF APPROXIMATELY 0.50 MILES OF FOURTH STREET FROM EAST RIVER ST. TO WEST AVE. AND 0.25 MILES OF EAST AVENUE FROM FOURTH ST. TO BROAD ST. | CITY OF ELYRIA | 25 | 91 to 180 days | \$323,704 |
| Lorain | 2" Water Main Replacement | Replace approximately 11,000 linear feet of 2-inch water main with 8-inch. Hydro-pneumatics shall be added for both water quality flushing purposes and fire protection. This project would eliminate all 2-inch water mains within the City. | City of Elyria | 20 | 181 days or more | \$750,000 |
| Lorain | CAROL LANE, SIXTEENTH STREET, CANTERBURY ROAD AND | REPAIR AND RESURFACING OF APPROXIMATELY 1100 FEET OF CAROL LANE FROM BAYBERRY ROAD TO DEFIANCE AVENUE, 2400 FEET OF SIXTEENTH STREET FROM WEST AVENUE TO EAST AVENUE AND 3000 FEET OF CANTERBURY ROAD AND CANTERBURY COURT. | CITY OF ELYRIA | 25 | 91 to 180 days | \$440,938 |
| Lorain | 4-Inch Water Main Replacement | Replace approx. 15,000 linear feet of 4-inch water main with 8-inch water main. This would represent approximately 15% of all the 4-inch water main within the City. We would only replace areas with excessive breaks and extremely poor fire protection. New 8-inch will increase fire protection to these areas as well to those surrounding areas. | City of Elyria | 20 | 181 days or more | \$1,000,000 |
| Lorain | WASHINGTON AVENUE, OHIO STREET, ST. CLAIR STREET A | REPAIR AND RESURFACING OF APPROXIMATELY 2125 FEET OF WASHINGTON AVENUE FROM THE BRIDGE TO OHIO STREET, 1700 FEET OF OHIO STREET FROM WASHINGTON AVENUE TO GLENWOOD STREET, 1010 FEET OF COLUMBUS STREET FROM ST. CLAIR STREET TO GLENWOOD STREET AND 500 FEET OF ST. CLAIR STREET FROM OHIO STREET TO HAMILTON AVENUE. | CITY OF ELYRIA | 25 | 91 to 180 days | \$348,017 |
| Lorain | Abbe Rd (N) 12" Water Main Replacement | Replace approx. 10,000 linear feet of 12-inch water main on Abbe Rd (N) (SR-301) from Hilliard Rd north to the co-opsition line. Existing 12-inch water main has experienced excessive amount of breaks. The existing water main is approximately 10 foot depth also making it difficult to repair. This water main is a main supply line to the northeastern part of the City and also acts as an emergency connection between the City of Elyria and Sheffield Village. | City of Elyria | 20 | 181 days or more | \$1,400,000 |
| Lorain | THIRD STREET AND SECOND STREET REPAIR AND RESURFAC | REPAIR AND RESURFACING OF APPROXIMATELY 1900 FEET OF SECOND STREET FROM GATEWAY BOULEVARD TO WEST AVENUE AND 2000 FEET OF THIRD STREET FROM GATEWAY BOULEVARD TO WEST AVENUE. | CITY OF ELYRIA | 30 | 91 to 180 days | \$281,548 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Lorain | teeth the children | Many people in amherst lack teeth. I am going to coordinate a repairman so the needy people get teeth. | missing tooth repair shop | 5 | 31 to 90 days | \$100,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 2 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Blanche Drive in Carlisle Twp has been identified as being deficient and in need of replacement. The project consists of the removal of the existing structure and replacement with a new precast concrete box culvert, widened approaches, and guardrail improvements to meet current federal design standards. | Lorain County Engineer | 8 | 0 to 30 days | \$142,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 3 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The Oberlin Road bridge in the City of Oberlin has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and guardrail meeting all current Federal design standards. | Lorain County Engineer | 14 | 0 to 30 days | \$278,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 4 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Quarry Road in Wallington Twp has been identified as being deficient and in need of replacement. The project consists of the removal of the existing structure and replacement with a new precast concrete box culvert, widened approaches, and guardrail improvements to meet current federal design standards. | Lorain County Engineer | 8 | 0 to 30 days | \$150,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 5 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Baird Road in Camden Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and guardrail meeting all current Federal design standards. | Lorain County Engineer | 17 | 0 to 30 days | \$350,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 6 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on New London Eastern Rd in Rochester Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and guardrail meeting all current Federal design standards. | Lorain County Engineer | 10 | 0 to 30 days | \$204,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 7 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Parsons Road in Carlisle Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and guardrail meeting all current Federal design standards. | Lorain County Engineer | 12 | 0 to 30 days | \$244,000 |
| Lorain | Amherst Public Library Building Expansion Project | Repair and renovation of Amherst Public Library in Amherst, Ohio. Existing plans include a 25,000+ square foot addition and renovation of a 15,000+ existing building. Planning for this project is already underway. Funding for this project without Federal Stimulus money would require a community tax levied/raise. | Amherst Public Library | 50 | 91 to 180 days | \$11,000,000 |
| Lorain | SR 57 Widening/Reconstruction | Road Reconstruction | Village of Grafton | 25 | 91 to 180 days | \$1,800,000 |
| Lorain | Nord Center Electronic Medical Records | The Nord Center is a community behavioral health care center in Lorain County serving approximately 7,700 mental health consumers per year. The agency was incorporated in 2007 in order to enhance the efficiency and effectiveness of its service delivery. The Nord Center is seeking to convert from paper medical records to an integrated database system which includes an Electronic Medical Record. This system would integrate billing, human resources, accounting, scheduling and medication management systems, thereby substantially reducing the time needed to perform manual cross-media between and among the current systems. Employees no longer required to perform manual functions relating to paper medical records and their system cross walks would be reallocated to provide customer service, transportation, residential support, community education and outreach to the increasing number of people served by the agency each year. The move to an electronic health record will give clinicians the ability to see changes to a patient's record in real time which will help the agency provide the best possible care and the best possible utilization of the community's behavioral health resources. | The Nord Center | 43 | 91 to 180 days | \$500,000 |
| Lorain | Elevated Water Storage Tank Replacement | Replacement of existing water storage tank with new 300,000 gallon tank, which would ensure adequate available supply of possible drinking water, per EPA requirements | Village of Grafton | 20 | 91 to 180 days | \$1,200,000 |
| Lorain | SR 57 Drainage Project | Project shortfall is \$952,000, which is needed to ensure this important storm sewer/drainage project proceeds | Village of Grafton | 15 | 91 to 180 days | \$562,000 |
| Lorain | WWTP Renovation | Renovation of existing WWTP. Improvements required due to age of existing facility and need to comply with current design standards | Village of Grafton | 25 | 91 to 180 days | \$2,500,000 |
| Lorain | Mechanic Street Improvements Phase 1 | The proposed reconstructed roadway will be 26 feet wide, with the replacement of the existing 6 inch water main. | Village of Grafton | 10 | 91 to 180 days | \$517,500 |
| Lorain | Mechanic Street Improvements Phase 2 | Road reconstruction and water main replacement | Village of Grafton | 10 | 91 to 180 days | \$585,000 |
| Lorain | Victory Lane Improvement Project (Industrial Park) | Construction of a new industrial parkway approximately 2,300 linear feet of concrete pavement to open land for commercial development and an Ohio Sports Park (soccer and softball fields) | City of North Ridgeville | 10 | 0 to 30 days | \$1,080,000 |
| Lorain | Allen Memorial Art Museum | Interior paint upgrades are needed in order to create a site that is aligned with a more sustainable future, while also preserving Oberlin's architectural heritage. Therefore, this project will include the installation of a new energy efficient system to replace a 30 year old antiquated system, installation of a geothermal well system and heat pump, construction elements to achieve a LEED Silver certification, including the use of sustainable materials, rainwater harvesting, and construction waste management; and retrofitting existing space within the footprint of the museum to expand art storage. | Oberlin College | 100 | 31 to 90 days | \$5,635,000 |
| Lorain | Old AT&T / City Hall Addition Renovations Phase 1 | Modify a current vacant building to use as a City Hall Annex to provide additional space for overcrowded City Hall space. | City of North Ridgeville | 10 | 31 to 90 days | \$720,000 |
| Lorain | Apollo Theater | Renovations will create a community outreach center for music education while striving toward the standards of a LEED silver rating. The project further seeks to enhance use of the Apollo Theatre for business, community and academic purposes. The first phases of the Apollo Theatre preservation will bring the theater into compliance with Ohio Building Code, ADA standards, lobby, concession and ticket booth. This will involve upgrades to the lobby, concession space, ticket booth, restrooms, finished, shell, electrical and lighting systems. Future phases will include an updated projection space, a refurbished and enlarged seating area, the installation of multimedia equipment, an area for community and academic film editing and production, a stage and multi-use theater, lighting for community performing arts, theater and other venues. In addition, a fire suppression system will be installed, existing roof panels and sheathing will be replaced or repaired, as will the exterior windows. | Oberlin College | 25 | 31 to 90 days | \$3,200,000 |
| Lorain | Oberlin College Green Arts District | Encompassing an entire city block, the energy efficient Green Arts District will be anchored by the college's world-class cultural facilities, and incorporate housing, retail, commercial and institutional offices, a hotel and conference center, and performance spaces. This project is being undertaken with support of the City of Oberlin and the Oberlin City Schools, and is an example of the College's environmental leadership by virtue of its inclusion of large scale energy conservation technologies. It will have a distinct impact on the community's efforts to revitalize local and regional economic growth through the demonstration of new green technology and innovation. | Oberlin College | 500 | 181 days or more | \$200,000,000 |
| Lorain | Oberlin College Green Arts District | Encompassing an entire city block, the energy efficient Green Arts District will be anchored by the college's world-class cultural facilities, and incorporate housing, retail, commercial and institutional offices, a hotel and conference center, and performance spaces. This project is being undertaken with support of the City of Oberlin and the Oberlin City Schools, and is an example of the College's environmental leadership by virtue of its inclusion of large scale energy conservation technologies. It will have a distinct impact on the community's efforts to revitalize local and regional economic growth through the demonstration of new green technology and innovation. | Oberlin College | 500 | 181 days or more | \$200,000,000 |
| Lorain | Solar Photovoltaic Array | A solar photovoltaic array will provide and monitor the energy use of a large portion of Oberlin College and the City of Oberlin, Ohio. The PV will be linked to the historic Apollo Theater, the East College St. Project, the Oberlin Public Library, and the New Union Center for the Arts, thus ensuring that it directly affects a city block within Oberlin. The PV provides a unique opportunity to expand local green building efforts, to provide clean and affordable energy options, and to increase awareness of energy use. Furthermore, it will monitor the energy consumption of part of the College and surrounding town and will make those results public and accessible, thus incorporating efficient and environmentally friendly practices into the everyday lives of the citizens and students in the Oberlin community. | Oberlin College | 50 | 91 to 180 days | \$1,100,000 |
| Lorain | The first carbon neutral school district in America | We are seeking to build an energy-neutral school district for the children of Oberlin. This district is half minority, has half the student population as the largest school district in Ohio, and is in the process of becoming the first district in Ohio to become carbon-neutral to deliver the International Brotherhood of Teachers award. We are building our curriculum around STEM, sustainability and 21st century learning. | Oberlin City School District | 250 | 91 to 180 days | \$55,000,000 |
| Lorain | STEM installation | We seek to double our K-8 STEM Program of Excellence with additional lab equipment and professional development for all of our K-8 teachers. | Oberlin City School District | 4 | 31 to 90 days | \$250,000 |
| Lorain | Athletic Facilities | Rebuild the track, tennis and lighting infrastructure at Oberlin High School for the use of the schools and the community. | Oberlin City School District | 15 | 0 to 30 days | \$380,000 |
| Lorain | Lorain County 2009 Crack Seal Program | The project involves crack sealing approximately 70 miles of County Roads throughout Lorain County. The project will protect the existing pavement and extend the life of the existing pavement structure. | Lorain County Engineer | 10 | 0 to 30 days | \$200,000 |
| Lorain | Replacement of 1994 Village Police Vehicle (our on | Purchase new police cruiser with accessories to replace the village's only cruiser—a 1994 model with serious repair problems. Our sheriff's office currently has 15 dispatches and always will be without police protection if we don't get a new vehicle as current vehicles go to the end of useful service and is becoming unsafe to drive. | Village of Kipton Police Department | 5 | 0 to 30 days | \$35,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------|----------------|--------------------|---------------------------|
| Lorain | Lorain County 2009 Bridge Program, Phase 8 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Snell Road in Columbia Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and gantrial meeting all current Federal design standards. | Lorain County Engineer | 13 | 0 to 30 days | \$276,000 |
| Lorain | I90 / Nagel Road Interchange | construction of a new interchange to serve a 220 ac business and industrial park development. Project consists of a new bridge deck & viaduct ramps. Some relocation of public utilities will also be required. Project has received US approval and FHWA approval anticipated by the end of April, 2009. All non-federal project costs are available and controlled by City and private developer of business park. The Jacobs Group, Professional engineering completed and final engineering in progress. Immediate result will be construction of a 300-bed Cleveland Clinic facility immediately following interchange project that will create 500 jobs. Independent Economic Impact study projects over 8,000 new jobs to be created by project over 23 years. | City of Avon, Ohio | 6743 | 31 to 90 days | \$5,000,000 |
| Lorain | Lorain County Waterline Replacement Project, Phase | Project is supported by NACAA, Lorain County, and was the County's highest ranked 2008 Job Ready Sites project. 1920's and 1930's with cast iron pipe material, which is brittle and obsolete in today's standards. Pipe joints continually leak water and corrosion has reduced the water flow needed for fire protection. O & M costs for the system is very high. Water repair crews are often called out at night during off-work hours to repair leaks which would not normally be expected of such a system. The most cost effective solution to provide a safe dependable distribution is to completely replace the water mains, their valves and hydrants. To allow this project to proceed, funding is needed. The Phase II project will replace 18 miles of water mains, valves and hydrants within Elyria, Sheffield and Carlisle Townships. This project will be completed in 18 phases (1 phase per mile), with an estimated cost of \$659,500 per mile. Project Components: 84,968 feet of 8" water main, 153 valves, 206 fire hydrants, asphalt pavement and drive replacement, roadway bores, service stops, maintenance of traffic, seeding and appearance. | Lorain County Engineer | 636 | 0 to 30 days | \$11,866,800 |
| Lorain | Lorain County Waterline Replacement Project, Phase | 1920's and 1930's with cast iron pipe material, which is brittle and obsolete in today's standards. Pipe joints continually leak water and corrosion has reduced the water flow needed for fire protection. O & M costs for the system is very high. Water repair crews are often called out at night during off-work hours to repair leaks which would not normally be expected of such a system. The most cost effective solution to provide a safe dependable distribution is to completely replace the water mains, their valves and hydrants. To allow this project to proceed, funding is needed. The Phase I project will replace 17 miles of water mains, valves and hydrants within Elyria, Sheffield and Carlisle Townships. This project will be completed in 17 phases (1 phase per mile), with an estimated cost of \$661,500 per mile. Project Components: 89,945 feet of 8 - 16" water main, 133 valves, 180 fire hydrants, asphalt pavement and drive replacement, roadway bores, service stops, maintenance of traffic, seeding and appearance. | Lorain County Engineer | 592 | 0 to 30 days | \$11,246,400 |
| Lorain | job opportunity | \$0.000 to help employ 1 or 2 more workers, but mainly to keep employed 6 employees for a small business. | Beno Concrete | 7 | 0 to 30 days | \$50,000 |
| Lorain | Lorain County Chip and Seal Program, Phase 1 (Nort | The project involves the chip and sealing of approximately 35 miles of County Road in the northern section of the County. The project conserves several Townships in the County and would improve the integrity of the roads and extend their useful life. | Lorain County Engineer | 18 | 0 to 30 days | \$350,000 |
| Lorain | Lorain County Chip and Seal Program, Phase 2 (Sout | The project involves the chip and sealing of approximately 35 miles of County Road in the southern section of the County. The project conserves several Townships in the County and would improve the integrity of the roads and extend their useful life. | Lorain County Engineer | 18 | 0 to 30 days | \$350,000 |
| Lorain | Lorain County Full Depth Reclamation Program | This program rebuilds asphalt pavements by completely recycling the existing roadway, thus conserving natural resources, resulting in no waste. The program would recycle approximately 1.5 million tons of asphalt. | Lorain County Engineer | 24 | 0 to 30 days | \$500,000 |
| Lorain | Lorain County Salt Storage Facility | The project would consist of the construction of a new 6,000 ton salt storage facility at the County Garage on Russia Road. The new facility would replace the existing storage building constructed in 1980. The new facility would also enable the County to meet the new EPA requirements by providing a new drainage system for the facility. The county provides salt to many of the Townships in the County, as well as school districts, the Mansfield, Cuyahoga and Villages, and other governmental agencies. Lorain County has taken an aggressive approach regarding pollutant discharges within its General Sewer District. Over the past several years, more than 5 million dollars of local funds were allocated to improve the wastewater facilities within the township. The cost of the necessary improvements were borne by the users of the facilities through higher sewer rates. System users are now faced with additional costs to rehabilitate their sanitary collector sewers. Removal of infiltration/inflow within the sanitary sewers and manholes is needed to eliminate discharge of pollutants at the wastewater treatment plants, which is being mandated by the DEP. The sewers constructed in the 1920's will require replacement, lining, or major spot repair. Project Components: 12.13 miles of mainline sanitary sewer cleaned, TV inspected, smoke tested and dye tested. The county estimates that 90% of the mainline sewers will be joint tested and require grout sealing and 20% of the sewers will require either lining or replacement. Most of the manholes will require sealing and/or replacement. This project will be completed in 12 phases (1 mile/phase), at an estimated cost of \$332.75 per mile. | Lorain County Engineer | 20 | 0 to 30 days | \$450,000 |
| Lorain | Lorain County Sanitary Sewer Rehabilitation Progra | The geographic basins of the sandstone quarry property on the County's west side has drawn developers to the area. The proposed development will have a focus on nature and outdoor activities and can include 1,000 new homes. Developers, with the support of the township boardmembers have requested that the County extend sanitary sewers to the area as soon as possible. The County estimates that the project could generate millions of dollars in economic activity. The project's service area is within the Facilities Planning Area Boundary of the City of Lorain Beaver Creek Drainage Basin. The Quarry area can be served by constructing a sanitary trunk sewer from the City of Lorain southerly to the Village of South Amherst. The trunk sewer would be used to transport wastewater from both the Quarry area and the township properties within the drainage basin (8,100 acres). When completed, the project will lessen the release of pollutants from existing on-site septic systems which have failed. Project Components: 8.36 miles of sanitary trunk sewer, including a lift station, and other appurtenances. | Lorain County Engineer | 197 | 0 to 30 days | \$3,912,771 |
| Lorain | Northwest Sanitary Trunk Sewer | The project's service area is within the Facilities Planning Area Boundary of the City of Lorain Beaver Creek Drainage Basin. The Quarry area can be served by constructing a sanitary trunk sewer from the City of Lorain southerly to the Village of South Amherst. The trunk sewer would be used to transport wastewater from both the Quarry area and the township properties within the drainage basin (8,100 acres). When completed, the project will lessen the release of pollutants from existing on-site septic systems which have failed. Project Components: 8.36 miles of sanitary trunk sewer, including a lift station, and other appurtenances. | Lorain County Engineer | 1164 | 0 to 30 days | \$24,500,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 8 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Snell Road in Columbia Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and gantrial meeting all current Federal design standards. | Lorain County Engineer | 13 | 0 to 30 days | \$276,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 9 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Foster Road in Parfield Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and gantrial meeting all current Federal design standards. | Lorain County Engineer | 11 | 0 to 30 days | \$228,000 |
| Lorain | Existing City Hall Renovations, Phase 2 | Renovate existing City Hall. Relocate several departments to space vacated in Phase 1. | City of North Ridgeville | 10 | 31 to 90 days | \$120,000 |
| Lorain | New Fire Station at Barres Rd. and Stoney Ridge Rd | Construct new Fire Station at the intersection of Barres Rd and Stoney Ridge Rd to provide adequate response times to residents and provide adequate housing for modern fire equipment. | City of North Ridgeville | 50 | 91 to 180 days | \$1,800,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 10 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The Hughes Road bridge in Pittsfield Twp has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and gantrial meeting all current Federal design standards. | Lorain County Engineer | 36 | 0 to 30 days | \$754,000 |
| Lorain | New Combined Police and Fire Facility | Construct new combined Police and Fire Station to provide adequate response times to residents and provide adequate housing for modern fire equipment. | City of North Ridgeville | 50 | 91 to 180 days | \$7,800,000 |
| Lorain | Lorain County 2009 Bridge Program, Phase 11 | The Lorain County Engineer has an ongoing program to replace deficient bridges in our system based on our annual inspection of our bridges. There is a nationwide focus on bridges that is felt at the local level that demands that the County's bridges be maintained to a high standard. The bridge on Pyle South Amherst Road in the City of Oberlin has been identified as being deficient and in need of replacement. The project will consist of removal of the existing structure and construction of a new bridge built with prestressed concrete box beams and concrete substructure. The project will also include improvements to the roadway approaches and gantrial meeting all current Federal design standards. | Lorain County Engineer | 14 | 0 to 30 days | \$290,000 |
| Lorain | Service Dept. Complex Storage Building | Construct new storage building for vehicles to meet EPA requirements for protection of quality of waters of the State. | City of North Ridgeville | 50 | 31 to 90 days | \$600,000 |
| Lorain | CEI Detention Basin Expansion | Expand existing storm water detention basin to provide additional flood control. | City of North Ridgeville | 10 | 31 to 90 days | \$90,000 |
| Lorain | Street Repair Program | Repair of various concrete and asphalt streets within the community. The existing roadway conditions particularly in the concrete streets are getting worse by the year. The City has not been able to keep up with the street repairs in the past several years. An expenditure of roughly \$1,000,000 dedicated monthly, or completely, to concrete street repairs would greatly improve road conditions within the City. An expansion of the program of this magnitude in one year could bring the conditions to a manageable level. A project of this size could incorporate alternative repair methods such as white topping which would be new technology and could be a "showcase" of new products. Install four quadrant gate systems with vehicle presence detectors at the four at grade railroad crossings in the city in order to establish a quiet zone to prevent trains from sounding horns to improve the quality of life of the residents being adjacent to the railroad and provide additional safety for the traveling public at the crossings. Digital forwarding of City infrastructure records to provide better service to public; modernize recordkeeping and meet EPA recordkeeping requirements. | City of Avon Lake | 40 | 31 to 90 days | \$750,000 |
| Lorain | Railroad Quiet Zone Project | Install four quadrant gate systems with vehicle presence detectors at the four at grade railroad crossings in the city in order to establish a quiet zone to prevent trains from sounding horns to improve the quality of life of the residents being adjacent to the railroad and provide additional safety for the traveling public at the crossings. | City of North Ridgeville | 10 | 91 to 180 days | \$1,081,000 |
| Lorain | ARC/GIS Record Scanning | Digital forwarding of City infrastructure records to provide better service to public; modernize recordkeeping and meet EPA recordkeeping requirements. | City of North Ridgeville | 2 | 31 to 90 days | \$90,000 |
| Lorain | Retention Basin B Improvements on St. of Ohio Prop | Construct storm water retention basin on State of Ohio property to reduce flooding. | City of North Ridgeville | 10 | 31 to 90 days | \$144,000 |
| Lorain | Lorain & Bagley Rds. Connect Water Main to Transmi | Connect existing distribution water main to existing high pressure transmission line to reinforce distribution network and provide better water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$93,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lorain | Chestnut Ridge & Avon Belden Rds. Water Main Conne | Connect existing distribution water mains to existing high pressure transmission line to reinforce distribution network and provide better water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$93,000 |
| Lorain | Reconstruction of Avon Belden & Mills Rd. Intersec | Reconstruct congested intersection to improve traffic flow and safety and promote economic development. | City of North Ridgeville | 10 | 31 to 90 days | \$1,080,000 |
| Lorain | Carlisle-Easton Wastewater Project | This project will create 37.5 linear miles of sewer collection line, 13 underground pump stations and 2 above ground pump stations. LORCID is partnered with Avon Lake Municipalities for sewer treatment. Current collection sewer service will be provided to 1,500 existing homes and an anticipated 3,000 new homes and businesses over a 10 to 15 year period. This project will eliminate a high number of on-site septic systems with a verified 42.7% failure rate. Septic systems are not point source pollution to the Black River basin that will be under complete control for wastewater flow in the future. Six contracts will immediately create 100 good paying construction jobs. Stimulus money will be used to greatly reduce the debt service to the benefit of Lanes and the low to moderate income and fixed income households. The project is engineered and centrally funded under the USDA Rural Development loan guarantee program with private sector funding. Stimulus money will be significantly reduced and eliminate further human waste overflow. This project creates a tool for local zoning control and structured growth. LORCID is governed by the township and village's zoning. | Lorain County Rural Wastewater District | 100 | 31 to 90 days | \$8,100,000 |
| Lorain | HB 300 Energy Plan for City Hall and City-Owned Bu | Modify several existing City buildings to provide energy efficiency updates. | City of North Ridgeville | 10 | 31 to 90 days | \$720,000 |
| Lorain | New Senior Center | Construct new senior center building in City of North Ridgeville to meet demands of growing senior population. | City of North Ridgeville | 10 | 91 to 180 days | \$1,200,000 |
| Lorain | Service Dept. Complex Truck Wash | Construct new indoor truck wash in City of North Ridgeville Service Department Complex in order to meet EPA requirements regarding prevention of pollution to storm water and to protect waters of the State. | City of North Ridgeville | 10 | 31 to 90 days | \$60,000 |
| Lorain | Service Dept. Complex EPA Required Storm Water Imp | Construct miscellaneous improvements at City of North Ridgeville Service Department Complex in order to meet EPA requirements regarding prevention of pollution to storm water and to protect waters of the State. | City of North Ridgeville | 10 | 31 to 90 days | \$30,000 |
| Lorain | Shady Park Restrooms | Construct new ADA-compliant restrooms at existing Shady Park. | City of North Ridgeville | 10 | 31 to 90 days | \$37,000 |
| Lorain | South Center Park Restrooms | Construct new ADA-compliant restrooms at existing South Center Park. | City of North Ridgeville | 10 | 31 to 90 days | \$37,000 |
| Lorain | Sidewalk Needs Study / Access to Schools | Study to determine measures needed to address pedestrian safety including at school areas. | City of North Ridgeville | 10 | 31 to 90 days | \$30,000 |
| Lorain | French Creek WWTP Fisher Diffuser Replacement | Replace diffuser at existing WWTP as part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 10 | 31 to 90 days | \$18,000 |
| Lorain | French Creek WWTP Airline Replacement | Replace existing leaking and energy inefficient airline at existing WWTP as part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 10 | 31 to 90 days | \$180,000 |
| Lorain | French Creek WWTP Rehabilitation of Mix Tank No. 2 | Replace existing Mix Tank No. 2 at existing WWTP as part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 10 | 31 to 90 days | \$270,000 |
| Lorain | French Creek WWTP Fiber Optic Line Installation | Replace existing fiber optic lines to update control of plant functions at existing WWTP as part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 10 | 31 to 90 days | \$108,000 |
| Lorain | French Creek WWTP New Grit Unit Installation | Replace existing grit unit at existing WWTP as part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 10 | 31 to 90 days | \$195,000 |
| Lorain | Wind Generator | Furnish and install a 100 kw wind turbine. | Bay Mech. & Elect. Corp | 6 | 31 to 90 days | \$200,000 |
| Lorain | French Creek WWTP SCADA Plant Computerization | Part of an ongoing rehabilitation of plant facilities. | City of North Ridgeville | 5 | 31 to 90 days | \$36,000 |
| Lorain | CO2 Vapor Recovery System | Reducing Carbon Emissions: Our present CO2 carbon emissions is about 34,000 tons/year. With a Vapor Recovery System we will be able to reduce our carbon emissions to 400 tons/year. What is required will be a 1,000 sq ft building, a 30-bar liquid CO2 Storage Tank, and the Vapor Recovery System. The system and component requirements will be American made. There are a number of facilities in just about every state throughout the country, with the majority being in the oil and gas industry. The CO2 is not a manufactured product. It is a by-product of industry. Example: Natural Gas and Fertilizer plants. The CO2 is either form (Liquid or Solid) is used in just about every manufacturing industry, including the food, beverage, tire, and nuclear semiconductor. This has been in business for nineteen years and unable to afford this type technology. | Cryogenesis | 6 | 0 to 30 days | \$2,000,000 |
| Lorain | Rehabilitation and Ungrading of Traffic Signals th | Replace all old traffic signals in the City with the Mast Arm type poles, signals with new technology, traffic prescription system, install computerized video detection system and other improvements. | City of Elyria | 50 | 181 days or more | \$4,800,000 |
| Lorain | Oberlin Landfill Gas Project | Oberlin College and the City of Oberlin are working to acquire the rights to a local landfill and expand its current landfill gas (LFG) facility into an energy generation plant producing power, heat, and motor fuel. When realized, this project will effectively remove Oberlin from the "carbon grid" and create a source of clean power for northeast Ohio. Acquisition of the landfill is estimated to cost \$8-12 million, while the necessary infrastructure will be an additional \$10-12 million. While our reading of the legislation indicates that the State may have limited authority to advance this initiative, we wanted to bring this to your attention. | Oberlin College | 100 | 181 days or more | \$24,000,000 |
| Lorain | Oberlin Landfill Gas Project | Oberlin College and the City of Oberlin are working to acquire the rights to a local landfill and expand its current landfill gas (LFG) facility into an energy generation plant producing power, heat, and motor fuel. When realized, this project will effectively remove Oberlin from the "carbon grid" and create a source of clean power for northeast Ohio. While our reading of the legislation indicates that the State may have limited authority to advance this initiative, we wanted to bring this to your attention. | Oberlin College | 100 | 181 days or more | \$24,000,000 |
| Lorain | Slope Stabilization and Erosion Control in City Pa | The Cascade Park in the City is experiencing several landslides causing safety concerns and disruption of access to the facility. The unstable lands has caused great inconvenience to the public using this facility. | City of Elyria | 50 | 181 days or more | \$2,000,000 |
| Lorain | South Amherst | RLCWA is in the process of acquiring the water distribution system of the Village of South Amherst. Once that process is complete, RLCWA will own and operate 80% of the existing South Amherst Distribution System. It has been registered for decades and is past its useful life. 20,000 radio read residential water meters installed throughout Rural Lorain County Water Authority (RLCWA) water distribution system. To replace existing meters, some of which are 20 years old. | RURAL LORAIN COUNTY WATER AUTHORITY (RLCWA) | 8 | 31 to 90 days | \$3,500,000 |
| Lorain | Radio Read Meters | Replace existing meters, some of which are 20 years old. | Rural Lorain County Water Authority (RLCWA) | 8 | 31 to 90 days | \$3,500,000 |
| Lorain | Wellington Township Waterline | Install 20,000 linear feet +/- of 12 inch water main to replace 20,000 linear feet +/- of 9" waterline. The 9" waterline is too small. The 12" waterline will also act as a transmission line that will allow a greater power efficiency rating with a considerable amount savings in power and an important environmental benefits. This project is ready to go to bid. We are currently waiting for the PFI. The French Creek YMCA located on 122 acres on a 122-acre site is a regional health and wellness, and recreational facility meant to serve near west and eastern Lorain County reaching 200,000 residents within 15 minutes of the location. | Rural Lorain County Water Authority (RLCWA) | 8 | 31 to 90 days | \$700,000 |
| Lorain | French Creek YMCA at Avon | The Project is unique collaboration with the City of Avon and the YMCA of Greater Cleveland where the City had donated the land, site improvements, and \$8 million dollars for the project. The Cleveland YMCA must raise \$5.5 million. Weather permitting, construction of the facility will begin creating construction jobs for 12 months. Upon opening of the facility more than 100 new jobs will be creating for Lorain County residents. These jobs will range from full-time professionals to hourly employees. | YMCA of Greater Cleveland | 110 | 0 to 30 days | \$1,000,000 |
| Lorain | Community Park Road & Parking Lot Improvements | Project includes extension of access road, sanitary sewer and waterlines, 150+ space parking lot and two football fields, will also provide access for four future baseball diamonds | Village of LaGrange | 15 | 91 to 180 days | \$697,370 |
| Lorain | Kept it Clean and Green Just Bag It. | Sheffield Lake has the 3rd highest foreclosure rate in Lorain County. We are also surrounded by a Steel Mill and a Ford Plant, which are on temporary shutdown. The City has purchased a \$3.5 Million run-down shopping center and is renovating it. To assist City workers in this task and also continue to keep the City Clean & Green, Sheffield Lake could hire 8 local people to assist in clean up and summer work activities. The Cost is \$12,000 and the City can match with \$3,000. Please consider that Sheffield Lake also has the highest loan rejection rate for Caucasians in Lorain County. By providing only \$9,000 work can continue and out of work families can receive some additional income. | City of Sheffield Lake | 8 | 31 to 90 days | \$9,000 |
| Lorain | Kept it Clean and Green Just Bag It. | Sheffield Lake has the 3rd highest foreclosure rate in Lorain County. By providing only \$9,000 work can continue and out of work families can receive some additional income. I, John A. Piskura, Mayor, certify that these project is vetted and is not a waste of Tax Payers' Money. | City of Sheffield Lake | 8 | 31 to 90 days | \$9,000 |
| Lorain | Apollo Theater | Renovators will create a community outreach center for media education while striving toward the standards of a LEED silver rating. The project further seeks to enhance use of the Apollo Theater for business, community and academic purposes. The first phase of the Apollo Theater presentation will bring the theater into compliance with Ohio Building Code, ADA standards, lobby renovation and food booth, restrooms, fitness, electrical and lighting systems. Future phases will include an updated projection space, a refurnished and enlarged seating area, the installation of multimedia equipment, an area for community and academic film editing and production, a stage and multi-use theater, lighting for community performing arts, theater and other spaces. In addition, a fire suppression system will be installed, existing roof repairs and sheathing will be replaced or repaired, as will the exterior structure. | Oberlin College | 25 | 31 to 90 days | \$3,200,000 |
| Lorain | The Clean Green Renewable Shopping, Living and Wor | I, John J. Piskura, certify that this project is vetted and is not a misuse of Tax Payers' money. Sheffield Lake bought a run-down shopping center in the middle of our City for \$3.5 Million. We are renovating the Center as a Clean Energy Center with Wind and Geothermal energy power. To power the Center by wind the City wants to build a 4000kw wind turbine on site and extended break ways from our shore. This break will be double as another side of our small craft harbor. The wind turbine will take advantage of the Avon Point wind and can be power most of the time. The break will be an additional \$20 to Phase I with a road to access to the turbine and water ways to allow shore line sediment to move up and down between Lorain and Avon Point. The wall will provide boat dockage, fishing and protection from northwest and west winds. The reduction of this wall with power will jump start our Green Center and provide the incentive for private investment. Engineering has begun and the project delay will be permitted by Ohio and the Federal Government. Help Sheffield Lake recover from economic stagnation. | City of Sheffield Lake | 200 | 181 days or more | \$5,600,000 |

| Lorain | Western Lorain Wind Turbine Project- 40 Turbines | Construct 40 General Electric medium to large wind turbines on 28 acres of vacant former industrial land near adjacent to Lake Erie shoreline. Turbines would be spaced at a minimum 100 feet apart. Turbines would be installed in First Energy by the east side of the site. The goal would be to have 15 to 20 turbines on line and producing electricity within 6 to 9 months. An additional 20 wind turbines would be in place by the end of the 4th quarter 2010. The location would not conflict with residential properties and I anticipate favorable support from local, county and state agencies. This funding request is not for studies or analysis. This funding is intended for actual approved ready construction of these wind turbines with the expected outcome of producing alternative wind generated electricity for commercial and residential consumption within Lorain and Huron Counties by the end of 2009. The land is available, there are no environmental impact concerns and I anticipate this project to be a catalyst for other wind turbine farm development throughout the Great Lakes over the next 5 years. I am positioned to move quickly and efficiently on this project within 30 days. I would like to buy housing development to use as housing in Lorain county the need is great and with your help I can help the people in need, and at the same time I can help get the housing market moving by buying homes in foreclose. | Olmssted Development Group | 30 | 31 to 90 days | \$3,600,000 |
| Lorain | Low income housing | I am positioned to move quickly and efficiently on this project within 30 days. I would like to buy housing development to use as housing in Lorain county the need is great and with your help I can help the people in need, and at the same time I can help get the housing market moving by buying homes in foreclose. | Self | 15 | 91 to 180 days | \$1,500,000 |

|----------------|---|---|---|----------------|--------------------|---------------------------|
| Lorain | Free Surety Bail Bonds Classes to Ohio residents. | We would offer the Surety Bail Bonds pre-hearing Classes to Ohio residents this will help them obtain employment in the insurance field. We will provide them with the 20 hour Pre-Licensing course required by the Ohio Department of Insurance at no cost. We will also assist them with the job training and job-placement assistance. We plan to offer our program in Cincinnati, Dayton, Springfield, Columbus, Cleveland, Akron, Toledo, Youngstown and Lima. Our company is certified with the Ohio Department of Insurance, candidates can apply for this program in any city in the state of Ohio. | Bonding and Insurance Back to Work Program | 10,000 | 31 to 90 days | \$150,000 |
| Lorain | Expansion, relocation and additional employees | Facility will be used for expansion and relocation of services currently located outside of the state in Lorain County, and for the upgrade of local equipment and facilities. With the expansion and relocation there will be an immediate requirement for 2 to 4 new full time employees with the addition of up to 6 more by the end of the calendar year. | GEMCO Web Solutions | 10 | 31 to 90 days | \$550,000 |
| Lorain | Save the Elyria Parks and Recreation Department | I would like to be able to keep all of Elyria Parks and Recreation centers open with all current sporting programs available to our children. This includes upgrading all outdoor courts that are in need of repair, the 9 soccer fields, and the numerous baseball fields. Elyria has been well known in Lorain County for our Parks & Rec program for decades, but now our Mayor Grace says we no longer have the funds to keep a running court. We have no place to go after school for our children this summer which means they will be sitting at home with no more problems. However, the Mayor is also cutting our police and fire department personnel leaving little time power to deal with our youth running a muck. | Save the Elyria Parks and Recreation Department | 300 | 0 to 30 days | \$3,000,000 |
| Lorain | living the American dream | This is a personal request. As a single 30 year old woman living alone I recently became part of the American dream by purchasing my own home. It is very hard to pay a mortgage and utilities alone. The President passed this stimulus package to help create jobs and fix things in the community, but that has people need direct help also. That is what I am asking for stimulus money to help with paying my mortgage. I do not want to become another foreclosure statistic. I just need to be able to keep up and I figured I would give this a try. I will never know if I would be awarded some money if I didn't try. So when considering what projects the stimulus money will go to, I know they are all important and I realize we all have a little gully to ask for help. But to me, my need is important also. I sincerely thank you for your time. | none | 0 | 0 to 30 days | \$20,000 |
| Lorain | new home roof | I need a new roof for my home and cannot afford one, if one is not put on by the spring I will be forced to leave my home that I have owned for 25 years. | none | 4 | 31 to 90 days | \$10,000 |
| Lorain | Pyrotechnician Training Schools | To provide regional training schools for the purpose of training individuals in the art and science of setting up and safely firing fireworks displays and special effects pyrotechnics for stage, promenade and theatrical use throughout the state, who can then go on to be located under the laws of Ohio and other states as well. This training would include: the science and chemistry of pyrotechnics; firing techniques and systems; manufacturing site selection; State and Federal laws governing manufacture, use, shipping, storage and transportation; choreography and computerized programming, and much, much more. | RJR PYROTECHNIC SERVICES | 500 | 31 to 90 days | \$400,000 |
| Lorain | RBS | Development of a training facility for the purpose of education and enhancing the skills for future and better livelihood. | Radney Business Solutions | 200 | 181 days or more | \$6,000,000 |
| Lorain | Work/Job | To learn a new skill and open a computer business and hire 1 to 3 other people. I was injured on the job in 2008 and can not return to the type of work I was doing. The business would be for all classes of people with their computer needs also train people on the computer. | Self | 2 | 31 to 90 days | \$50,000 |
| Lorain | save police dept jobs | We will continue to support the police dept. And we will keep local jail open, and some record clerks to keep their jobs. We will help keep road pattern on the road. And we will give the city a place to keep bad people off the streets. | elyria city jail | 20 | 0 to 30 days | \$700,000 |
| Lorain | Diaphragm Pacing in Medicare/Medicaid Patients | Provide 100 Diaphragm Pacing Devices to be implanted in Medicare/Medicaid spinal cord injured patient at National Model Spinal Cord Injury Treatment Centers. Project will quantify the anticipated \$4.2 - \$8.1 million savings per year (\$50 - 90 million lifetime savings) to Medicare with improved healthcare outcomes and improved quality of life. | Synapse Biomedical, Inc. | 20 | 0 to 30 days | \$3,160,000 |
| Lorain | Transportation Drive Traffic Signal | The Synapse Diaphragm Pacing device received FDA approval last summer. Spinal cord treatment centers are reluctant to implant the Medicare/Medicaid patients (which causes the patient reimbursement issues). The device has received Medicare/Medicaid justification for higher reimbursement and therefore facilitate adoption and therefore increased and sustained patient care in Ohio. | Village of Sheffield | 10 | 0 to 30 days | \$588,000 |
| Lorain | Transportation Drive Extension | This is a new traffic signal to relieve congestion and dangerous intersection of Transportation Drive and Dunbar. This will provide direct connection for French Creek Business park with I-90. This roadway will provide economic development for this industrial park. This business park is slow ready for economic benefits. The lack of direct access hinders the development. The property owners are willing to be assessed for improvements if funding becomes available. | Village of Sheffield | 30 | 31 to 90 days | \$1,613,000 |
| Lorain | Business Development | The development of the commercial and industrial properties will give growth to the Greater Lorain and Cuyahoga counties. The marketing for National and International businesses and manufacturing would bring light the availability of locations within our state. Each metropolitan area in Ohio should have the same program allowing the access for development for both commercial and industrial development. This program will show the world through advertising with use of the internet and other available sources that Ohio has the products of airports, international water ports, highways and utilities with industrial sites available along with the manpower in all areas of business and manufacturing. | National Business Brokers, Inc. | 10 | 31 to 90 days | \$3,000,000 |
| Lorain | Working folks' pets | Building project improvements - putting in a 12 foot ceiling to reduce the heating costs of heating a 4,000 sq. ft. A-frame warehouse. Applying a rubber coating on the concrete floor - easier on the joints. Advertising the indoor gymnasium available for dogs - raises the bottom on hard-working pet owners by having their dogs exercised and socialized while they're at work. Decreases the need for nighttime walks with their dogs that decreasing the possibility of them being victims of a crime...injured...out of work. If you know Lorain county, you know that it's not safe to be walking the neighborhoods at night. With the physical improvements and an advertising bonanza we could bring in 30+plus dogs per day (as compared to the 15 currently, due to the economic recession). We would need to hire 6-10 people to monitor the dogs at play...11 hrs a day, 5 days a week. | The Canine Club | 10 | 0 to 30 days | \$100,000 |
| Lorain | Student loans | I have acquired \$50,000 in student loans. This debt is a result of required certifications that are instituted by the Great State of Ohio. I am a total of education designed to instruct our country's future (our children). Consider this pay-out as an investment in our country's future. I work at the county level, so I teach students that are troubled/handicapped of our society. These students need extra attention and care. I appreciate your time on this matter. Thank you. | E.H.O. Esc. | 1 | 0 to 30 days | \$50,000 |
| Lorain | State Route 301(Abbe Rd.) Widening | This project will add 5th lane to State Route 301 from State Route 254 to Lorain Community College. This roadway is highly congested and a dangerous during most hours. A large number of wrecks occur on this corridor. The project is scheduled for engineering through the Lorain County Engineers but no financing has been secured. | Village of Sheffield | 0 | 91 to 180 days | \$3,030,264 |
| Lorain | Colorado Ave. Waterline Replacement Phase III | This is additional funding for the water line replacement. The existing water line is obsolete and continues to deteriorate. Multiple breaks and weak areas plague this section of waterline. The project is partially funded through the OPWC. | Village of Sheffield | 0 | 0 to 30 days | \$280,000 |
| Lorain | French Creek Road Resurfacing Project | This will rehabilitate French Creek Rd. This project includes removal of existing failed layers and installing new wear surfaces. Providing affordable computer training in various business software where the average length of class time is six to eight weeks. Average cost of training would be approximately \$250 to \$300. Class size would be limited to five students per class so as to allow intensive one-on-one training on the computer. Current offerings in computer training are not adequate or practical. People need real and intensive training to compete in the job market. Community colleges are too expensive and take too long for the average unemployed worker. Computer training through Ohio unemployment are not adequate or available to those desired employment. Instructor is state certified by the Department of Education for vocational training and ready to begin. Business site would be in Lorain County which has a very high unemployment rate. Project costs would cover equipment, teaching materials, and lease of business space. Initially there would be two full-time employees and one part-time employee. Once up and running, could see more staffing. Remaining of displaced workers would greatly benefit those who are lost manufacturing and factory jobs. | Village of Sheffield | 0 | 0 to 30 days | \$375,000 |
| Lorain | Low-cost intensive computer training | This will rehabilitate French Creek Rd. This project includes removal of existing failed layers and installing new wear surfaces. Providing affordable computer training in various business software where the average length of class time is six to eight weeks. Average cost of training would be approximately \$250 to \$300. Class size would be limited to five students per class so as to allow intensive one-on-one training on the computer. Current offerings in computer training are not adequate or practical. People need real and intensive training to compete in the job market. Community colleges are too expensive and take too long for the average unemployed worker. Computer training through Ohio unemployment are not adequate or available to those desired employment. Instructor is state certified by the Department of Education for vocational training and ready to begin. Business site would be in Lorain County which has a very high unemployment rate. Project costs would cover equipment, teaching materials, and lease of business space. Initially there would be two full-time employees and one part-time employee. Once up and running, could see more staffing. Remaining of displaced workers would greatly benefit those who are lost manufacturing and factory jobs. | K-8 Websites, Inc. | 6 | 31 to 90 days | \$100,000 |
| Lorain | Arbor Ave. Pavement and Drainage Project | Rehabilitate 1420 ft of dog roadway. This project includes widening the roadway from 17ft. to 26 ft. The drainage ditches would be enclosed. Telling a Renewable resource (HO) and putting the resource three a system making a fuel that is inrehaustible that will replace natural gas, propane, or electric and provide home heating. | Village of Sheffield | 0 | 0 to 30 days | \$368,105 |
| Lorain | Home Heating with Hydrogen = HHH project | This will allow the U.S. to stop using Fossil Fuels. 1 = low cost heating 2 = Saving our Environment 3 = With this kind of Chemistry we can make OHIO the center for The New Technology and Manufacturing again. Develop Solar panels to be used in our stand-by and back-up power supplies, also develop panels to be used in other products that we manufacture for our traffic control equipment including, but not limited to, red-light cameras. | King Labs | 5 | 31 to 90 days | \$2,500,000 |
| Lorain | Solar Powered Power Supplies | Develop Solar panels to be used in our stand-by and back-up power supplies, also develop panels to be used in other products that we manufacture for our traffic control equipment including, but not limited to, red-light cameras. | Multilink, Inc. | 10 | 0 to 30 days | \$250,000 |
| Lorain | Bill Consolidation | Need to start up an artificial medical car. This is to keep our home! | Self | 2 | 0 to 30 days | \$40,000 |
| Lorain | Brookside High School Replacement | This is a new High School for the Sheffield/Sheffield Lake School System. It will replace the current school which was constructed in 1968. The school district already owns the land needed for construction. The current building has been declared obsolete and the new building is on the list for funding. | Village of Sheffield | 20 | 181 days or more | \$30,000,000 |
| Lorain | Sheffield Middle School | This project will replace the existing Mettle School originally constructed in 1928. | Village of Sheffield | 20 | 181 days or more | \$20,000,000 |
| Lorain | Sheffield Schools All Weather Track | This project will replace a cinder track with all weather material. The school has not had the opportunity to host home track meets as marching band competitors due to the state of order material. | Village of Sheffield | 0 | 0 to 30 days | \$325,000 |
| Lorain | Education | This is to finish my education for a Bachelor in Psychology and Master in Social Work | None | 1 | 31 to 90 days | \$10,000 |
| Lorain | Colorado Ave. Sanitary Sewer | This project will install new sanitary sewers along Colorado Avenue. The sewers will connect an elementary middle, and high school and will also remove a significant number of septic systems from the watershed. | Village of Sheffield | 1 | 31 to 90 days | \$2,970,000 |
| Lorain | Clean Air in the home | This is a residential air duct cleaning business. This is a service that is needed done in all homes Most of these older homes have standard tan fins on for heat and cooling. People buy new furniture or add on an AC unit to the existing system, and never have their duct work cleaned. What happens now is they are pulling mold and contamination in the duct work on top of all the years of collecting dust, pet dander, pollen, bacteria and cigarette smoke. This mold enters the cooling and heating systems, makes eyes, scratchy throat, head aches etc. In most cases it ends up being back in the duct work, spreading mold spores in the air, contaminating the air they breathe in their homes. What I do is come in with a powerful vacuum & suck 2000-2500 cubic feet of air & mold. Hook the machine to an opening and around closing all openings, when the system is all closed, I go back and run a 225 x120 rotary brush down each duct, when the heat ducts are completed I hook up to a cold air return and do the same process. When this is completed the ducts are clean New & deodorize the system using 2 operators with Biocheck & Emulsion (offer the avg for \$450.00) | Chuck's Vacu Unit | 7 | 31 to 90 days | \$26,000 |
| Lorain | HALLOWEEN | ANNUALLY CELEBRATING THE TRADITIONAL HALLOWEEN NIGHT IN NUMEROUS SCHOOLS GYMNASIUMS INSTEAD OF ON THE STREETS WOULD CREATE SEASONAL JOBS FOR UP TO THREE PEOPLE PER SCHOOL, AND WOULD ELIMINATE CHILDREN WALKING AROUND THE COLD DARK NIGHT. PARENTS COULD BY ON BLEACHERS WHILE NEIGHBORHOOD CHILDREN WALKED WORKING SAFELY. EACH YEAR THE ONLY REAL COST WOULD BE PAYING THREE PEOPLE PER SCHOOL FOR ORGANIZING THE EVENT, PASSING OUT FILERS DECORATIONS, LITLES FOR ONE NIGHT A YEAR AND MAYBE A METAL DETECTING WAND PER SCHOOL. TO CHECK CANDY BROUGHT IN BY PARENTS TO PASS OUT. ALOT OF PARENTS WOULD GLADLY DONATE MONEY TO HELP THIS CAUSE EVENTUALLY ELIMINATING THE NEED FOR SEASONAL ASSISTANCE AND HELPING OUR CHILDREN A LITTLE SAFER ON A DARK NIGHT. UNDERSTAND THIS IDEA WILL NOT CREATE ALOT OF JOBS BUT IF MORE THAN A HANDFUL OF NEIGHBORHOODS STARTED DOING THIS IT COULD CREATE A LITTLE BIT OF SEASONAL WORK AND WOULD NOT COST ALOT OF MONEY, BUT WOULD KEEP OUR KIDS OUT OF DANGER FOR AT LEAST ONE NIGHT. | NOT CREATED YET | 3 | 91 to 180 days | \$5,000 |
| Lorain | Recover 20% cut in employee time | We wish to bring our staff back to full capacity. We were forced to cut our hours when we were given a county general fund budget 20% less than any year. | Lorain County Prosecutor's Office | 18 | 0 to 30 days | \$620,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lorain | Sips N Strokes | My entity would rent extra space in Avon, Ohio to house a franchise location for Sips N Strokes. Sips N Strokes is an art and painting studio which teaches adults to paint and use other art mediums. Each class lasts 2 to 4 hours and the entire class is completed at the end of each session. Instructors would be hired for each class utilizing at least 10 instructors in a month. The company would also employ at least one secretary and assistant. Locations in Ohio are in excess of 100. In addition and most important, Sips N Strokes would host fund raising for local elementary and secondary schools to raise funds for art programs. In addition to the fund raisers, I would be committed to donating 10% of the company's net profit to local schools (in particular the schools having to cut art programs). The benefits to the community are numerous: approximately 15 jobs, an inexpensive, safe, and creative way for community members to socialize and come together; art classes and birthday parties offered for children; and funding for local schools' art programs. The last benefit being the most important in this time of economic hardship and school funding being reduced. | Sips N Strokes Franchisee | 10 | 31 to 90 days | \$100,000 |
| Lorain | need help | Need to pay off house to have money to pay other bills so we don't lose our house like everyone else husband has no job, job went out the money 4 years ago no one will hire a 50 year old man unless he goes to walmart the 30,000 dollars will save the job more we don't have to worry about when the money will come from to keep our house. I am a bus driver and make very little money you can only live off family for so long that has left us with nothing. Thank You | none | 1 | 0 to 30 days | \$30,000 |
| Lorain | Therapy K-9 Team | I am currently providing K-9 Therapy to the Ohio Veterans Home in Sandusky, Ohio to the veterans coming home from the war as well as children, elderly, and patients in local hospital. My certified K-9 is reaching the age of retiring and my new K-9 needs funding for training and certification. | Knights of Columbus Council #4539 | 1 | 0 to 30 days | \$5,000 |
| Lorain | Tradeswomen TOOLS - Lorain County | HHW, in partnership with organizations in each region of the state, is preparing to launch Tradeswomen TOOLS: Training, Outreach, Opportunity, Leadership and Support. Funds will support establishment of a Regional Office in Elyria, Ohio with a Supportive Services Coordinator, Workshop Manager, a Tradeswomen Liaison, and K-12 program specialist. This program will use the expertise of women already working in nontraditional fields to enhance diversity initiatives in the fields of construction, heavy highway, energy, and advanced manufacturing. Providing resources for outreach, education and support to increase women's participation in these jobs. Programs offered year-round include: orientation to nontraditional careers, individualized career counseling, one-step career career referrals, employer-sponsored training, math tutoring and tradeswomen leadership development. HHW's mission and expertise is unique in the state. HHW embraces a sector strategy approach, using demand-driven programming to connect job seekers to employers. | Hard Hatted Women | 10 | 31 to 90 days | \$200,000 |
| Lorain | GET UP AND RUNNING | Purchase acceptable home and vehicles for family also achieve college education for all family members so they can find appropriate careers that in turn will allow family to go out and stimulate the economy. | KERSHAW FAMILY ORGANIZER | 5 | 0 to 30 days | \$400,000 |
| Lorain | Rehire Laid Off Deputies/Continue Community Polici | Recently have 15 full-time road patrol deputies and 8 part-time court deputies on laid off status since December 28, 2008. This funding would bring back all laid off personnel plus add an additional 8 full-time road patrol deputies and continue our Community Policing efforts in the 18 municipalities throughout Lorain County. Lorain County is 495 square miles and the Lorain County Sheriff's Office patrols 207 square miles of this area. We presently have 3-4 deputies working each shift, with bringing back personnel and hiring 8 additional, I would take us up to 7-8 officers on each shift. Something that is definitely needed for citizen and officer safety. This would also allow us to continue our Community Policing concept which was started at the Lorain County Sheriff's Office in 1985. | Lorain County Sheriff's Office | 28 | 0 to 30 days | \$1,836,000 |
| Lorain | House Party Program for Moms & Housewives | Spiked Foods, LLC is beginning a job-creating "house party program" targeted specifically for moms and housewives to supplement their income. It is to create full-time careers. The retail cost of supplies and marketing materials would be covered for 50 of these women if this request is approved. | Spiked Foods, LLC | 50 | 31 to 90 days | \$10,000 |
| Lorain | Catholic Charities Community Connection | We are requesting funds for our Community Connection/Day Shelter, which are provided for homeless and working poor at our Family Center on West 8th Street in central Lorain. This program helps ensure clients' safety and protection, and provides a place for them to socialize with other people in the community. Additionally, clients may access information about program and services that will help them become more self-sufficient. People who access services such as, Ohio Benefits Bank, free clinic, GED classes and learn about where benefits, The Family Center is the only day shelter in Lorain that provides a hot meal. We also run a food pantry 2 times a week. | Catholic Charities | 1000 | 91 to 180 days | \$25,000 |
| Lorain | mid-tier tree propagator for local & county govt. | I am seeking to reduce the burden upon my family that I have become due to my disability from a stroke in 2006. I have been severely physically disabled, at the time of becoming disabled, I was planning to engage in tree farming on a hobby scale, seeking to create a fully realized tree production operation. The ultimate goal of this undertaking is to create a self-sustaining source of income for my family and to provide for the purposes of education and pension control. Additional benefits would result in establishing wildlife cover and employment for my children and other family members. The tree varieties I am proposing for development include Pine, Birch, Ash, Apple, Crabapple, Dogwood, Hickory and my varieties of many other species. Thank you, Robert H. Steved | unemployed due to disability | 6 | 0 to 30 days | \$200,000 |
| Lorain | Elyria Youth Tackle Football | The continuing of football program dedicated to area poverty-stricken children coming from mostly government housing and single parent households to stress leadership, education, pride, and community involvement in making our less fortunate youths into tomorrow's leaders. We stress integrity, education, and respect from all individuals. Plus all coaches work free. | Stone Sports | 5 | 0 to 30 days | \$25,000 |
| Lorain | Catholic Charities Family Center of Elyria | Traditionally in the United States, parents are the central source of emotional, financial and social support for their children. Many youth are also fortunate to be part of larger networks including grandparents, other relatives neighbors and community and religious organizations. Adults in these networks can offer youth extra attention, affection, guidance and a sense of direction. Family, communities and civic life in the country are changing. Due to transient nature of families, children do not live near family who can offer support. Statistics show that now many more households are headed by a single parent. Catholic Charities Team Mentoring program is community based and individualized to meet the needs of youth in the community. We have help hundreds of teens but now improvement for the facility center is desperately needed to accommodate more teens and a larger space for activities. | Catholic Charities Community Service | 0 | 181 days or more | \$50,000 |
| Lorain | Community Connection Program-Lorain County | The Catholic Charities Community Connection Shelter program provides for homeless and working poor at our Family Center on West 8th in central Lorain. The Community Connection program helps ensure the safety and protection and provides a place for the to socialize which reduces isolation. Additionally, clients may access information about program and services that will help them become more self-sufficient. People who access services such as, Ohio Benefits Bank, free clinic, GED classes and learn about where benefits, The Family Center is the only day shelter in Lorain that provides a hot meal. We also run a food pantry 2 times a week. | Catholic Charities Community Services | 500 | 181 days or more | \$25,000 |
| Lorain | Bottled Bulk Water Station | Benefits Lorain County Fairgoers and area residents by providing access to safe drinking water. | Village of Wellington | 15 | 91 to 180 days | \$177,000 |
| Lorain | Community Connection Family Center Lorain | Community Connection Day Shelter Program provides for homeless and working poor at our Family Center in Lorain. This program ensures clients' safety and protection and provides a place for them to socialize which reduces isolation. Additionally, clients may access information about program and services that will help them become more self-sufficient. People who access services such as, Ohio Benefits Bank, free clinic, GED classes, classes on job search, anger management to mention a few. This is the only program in the county that offer daily hot meals and a food pantry twice a month. Increase hours of instruction to juveniles traffic offenders ordered to attend youth program to educate each on the consequences of driving actions, i.e. speeding, accidents, poor judgments. Program uses volunteer youth and adults to interact and teach course that consists of 25 attendees. For each course, two times a month. Our community needs additional funds to continue to operate the program and keep the community involved. We currently rely on the State Highway Patrol to attend and seek volunteers to become involved. We need funds for instructional materials, increase in hours for program services for treatment activities, operational funds for staff. We hope to increase the numbers of youth served, add an additional class, and provide an outreach program to the suburbs to involve inner city youth. We also seek funds to provide a Don't Drink and Drive educational program with area high schools prior to prom season. With increased funds we can increase the number of youth served, increase the recruitment of participants, increase community involvement, and retain the program assistant that coordinates the program. Ultimate outcome change behaviors & education. | Catholic Charities Community Services | 500 | 181 days or more | \$25,000 |
| Lorain | Lorain County Carteens | Expansion of 4 elementary schools and 1 middle school due to growth. Classrooms will house projected enrollment for next 10 years. Instruction to accommodate increased school days. Relocation of Bus garage off of High School campus for safety. Renovation of outdoor athletic stadium, ADA Compliant seating, Turf, Restrooms. Memorial Stadium has not been renovated for approximately 50 years. It is the only lighted field in Avon Lake and is used exclusively school, city rec and soccer association teams year-round. | Lorain County Carteens-OSU 4 H | 1 | 0 to 30 days | \$10,000 |
| Lorain | Avon Lake City School Addition | REPAIR EMPLOYMENT TO CONFLICTED FLOOD AND MINORITIES PROPERTY CLEANUP AND PRESERVATION, MOSTLY IN FORECLOSED PROPERTIES IN LORAIN, CUYAHOGA COUNTIES. REPAIR FORECLOSED HOMES AND ASSIST IN PLACING FAMILIES IN THE HOMES. ALSO OFFERING HOMES AND FINANCING FOR FLOODS AND FAMILIES OF FLOODS. | Avon Lake City School District | 100 | 0 to 30 days | \$14,000,000 |
| Lorain | AL Field Renovation | Due to the downturn in economic conditions my company has recently down sized and moved. The company is no longer able to stay at its current location and will have to move again. | Lorain | office move | Due to the downturn in economic conditions my company has recently down sized and moved. The company is no longer able to stay at its current location and will have to move again. The requested funds are for moving expenses, set up at new location and advertising of new location to keep business flowing. | Paragon Mortgage, LLC | 4 | 91 to 180 days | \$10,000 |
| Lorain | Construction Pre-Apprenticeship Statewide Pilot Pr | 1) training and placement of 300 new workers. 2) Creation of a state-recognized and accredited pre-apprenticeship construction program that can be replicated nationally by DCR or DOL. 3) Development of a national model for diversified engagement for the Construction Industry. 4) Regional construction labor-management advisory councils in the target locations. 5) Pilot program in each of the targeted areas (2-4 based on findings) which include recruitment, assessment, pre-apprenticeship training, and one-renter services development. 6) Increased awareness of construction careers for future and displaced workers. 7) Recommendations for long-term sustainability of programming for industry. 8) Report to parent findings - pilot analysis. 9) Demonstrate strength of JATC training model. 10) Highlight Sector Strategy Partnerships. 11) Demonstrate career pathways. | Great Lakes Organized Labor Management Council | 300 | 0 to 30 days | \$233,825 |
| Lorain | In Home Family Support for Older Adults | Older Adult Services improve the quality of life for older adults by helping seniors live active, healthy and independent lives and by promoting positive attitudes towards aging. Catholic Charities' program, Older Adult Services, provides a Licensed Practical Nurse/case manager who completes an assessment and designs an individualized care plan to meet each senior's needs at home. The LPN/case manager then provides or arranges for the most appropriate mix of in-home services available in the county. The ultimate goal of the service is to support seniors in their homes so that they may remain as independent for as long as possible. | Catholic Charities Community Services Lorain Count | 0 | 181 days or more | \$32,000 |
| Lorain | Grid Reliability Redundant Electrical Grid Interco | Interconnection to a second transmission line with the first energy source, transmission grid, including joint, interconnection, noise, wiring and appropriate, and an access drive and facility fencing. Purchase of an electrical city speed street legal service truck, solar collectors and grid interconnection to make the vehicle carbonless. On 11/9/08, the primary interconnection suffered a failure of a transformer/starting point owned by First Energy, which resulted in the total loss of power to the community. Workers were able to create a hard wire by-pass of this component, but there was a loss of power village wide for approximately two and one-half hours. This was the largest and longest power outage the village has suffered in decades. Replace a gas service truck with an electric city street speed rated service truck. Stimulus funds would be used to purchase this truck. Sufficient photovoltaic cells would be installed on the roof of the Electric Department office and service garage to generate the power the truck consumes on a daily basis. The solar panels would be integrated into the electric grid or off-peak daytime consumption equal to the overnight rate. | Village of Wellington | 315 | 31 to 90 days | \$1,330,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Lorain | Carbon nanotubes | To develop carbon nanotube applications for commercialization. Perhaps no single nanomaterial has the potential of Carbon Nanotubes (CNTs), as they are the strongest material known to man (with a mechanical strength at least 20 times stronger than high-strength steel), the best-known electrical conductor, and the best known heat conductor. Advanced Functional Additives (functional CNTs)-Additives are often used in industry to provide additional properties to host resins. When properly applied, CNT-based additives can provide increased strength, electrical conductivity, and thermal conductivity beyond that of traditional additives in use today. Carbon fiber industry leaders predict that the Wind Energy sector (using carbon fiber to make wind blades) will soon become the largest consumer of carbon fiber material. The drive for carbon fiber's application in wind blades is the need to optimize stiffness-to-weight as wind turbine designers increase blade length to make turbines more cost effective. | PolyOne Corporation | 500 | 0 to 30 days | \$5,000,000 |
| Lorain | Bioplastics | Objectives: (1) Create hundreds of high salary, technology focused Ohio jobs, (2) create commercial Ohio tax revenues, (3) increase the overall quality of the Tri-state and job growth for Ohio. PolyOne Corporation, a \$2.1 billion Ohio based company, and a premier global provider of specialized polymer materials, services, and solutions has identified a rapidly emerging need for renewable, bio-based technologies in the polymer marketplace. PolyOne has focused fundamental plasticizer technology patents from Columbia-based, Battelle. In addition, PolyOne and Avulcor, Dennis Miller (ADM), a \$70 billion leading agricultural company with operations in Ohio, have entered in a joint agreement to leverage the Battelle technology to develop, produce, and market plasticizer technologies derived from renewable feedstocks such as soy and corn. To date, bio-based plasticizers have been too expensive and/or lacked the necessary performance to give serious consideration for widespread use. However, developments over the past six years by PolyOne, Battelle and ADM have demonstrated the potential commercial viability of a new family of bio-based plasticizers. | PolyOne Corporation | 500 | 0 to 30 days | \$6,000,000 |
| Lorain | SR 611-05.66 | Sheffield: Reconstruct and widen to 3 lanes (SR-611 from Sheffield West Corporation Line to Abbe Road) PID No. 22080 STIP ID #0499 | NOACA | 118 | 31 to 90 days | \$5,313,000 |
| Lorain | Voice over IP Phone system for five school district | Provide five Lorain County School districts with an upgraded Voice over Internet Protocol phone system. System would be hosted and administered at a central data center in Elyria Ohio. | Lake Erie Educational Computer Association | 1 | 31 to 90 days | \$1,600,000 |
| Lorain | Off-site data backup system for school districts | System would include voicemail and handsets for school administrators and teaching staff. Create an off-site centralized data backup system for ten to twenty area school districts. | Lake Erie Educational Computer Association | 1 | 31 to 90 days | \$250,000 |
| Lorain | Utility Parking Lot,repaving and repair | The City of Sheffield Lake Utility Department has a joint parking lot that is built on a spring. The asphalt has failed and needs to be replaced. To properly cap the spring and repave will recycled asphalt, the City will need a loan for \$5,000. The project cost is \$5,000. The City has the 3rd highest foreclosure rate in Lorain County and has high unemployment due to Ford and the Steel Mill shutdown. | City of Sheffield Lake | 8 | 0 to 30 days | \$95,000 |
| Lorain | Utility Parking Lot,repaving and repair | The City of Sheffield Lake Utility Department has a joint parking lot that is built on a spring. The asphalt has failed and needs to be replaced. To properly cap the spring and repave will recycled asphalt, the City will need a loan for \$5,000. The project cost is \$5,000. The City has the 3rd highest foreclosure rate in Lorain County and has high unemployment due to Ford and the Steel Mill shutdown. | City of Sheffield Lake | 8 | 0 to 30 days | \$95,000 |

| Lorain | Utility Parking Lot,repaving and repair | The City of Sheffield Lake Utility Department has a joint parking lot that is built on a spring. The asphalt has failed and needs to be replaced. To properly cap the spring and repave will recycled asphalt, the City will need a loan for \$5,000. The project cost is \$5,000. The City has the 3rd highest foreclosure rate in Lorain County and has high unemployment due to Ford and the Steel Mill shutdown. | City of Sheffield Lake | 8 | 0 to 30 days | \$95,000 |
| Lorain | Station Road (Phase II) | Widen lanes and resurface Station Road from SR82 (Elyria Twinsburg Road) to Sprague Road PID No. 77708 STIP ID #0464 | NOACA | 53 | 31 to 90 days | \$2,393,160 |
| Lorain | Utility Parking Lot,repaving and repair | The City of Sheffield Lake Utility Department want to replace old water meters with new remote meters that provide constant telemetry for customer service and to save water when breaks occur. The cost of the project is 640,000 for 3,000 meters and telemetry system. The meters are made in Lorain County. | City of Sheffield Lake | 8 | 91 to 180 days | \$640,000 |
| Lorain | Lorain County Transit Replacement Vehicles SFY 201 | Purchase replacement vehicles. Federal stimulus request and the total cost of the project represents two years of funding. PID No. 83210 Columbia Twp: Widen lanes and resurface Station Rd. from Crocker Rd. to SR-82 (Elyria-Twinsburg Rd.) | Northeast Ohio Areawide Coordinating Agency (NOACA) | 21 | 31 to 90 days | \$756,000 |
| Lorain | Station Rd. (Phase I) | Widen lanes and resurface Station Rd. from Crocker Rd. to SR-82 (Elyria-Twinsburg Rd.) PID No. 77709 STIP ID No. 0463 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 53 | 31 to 90 days | \$2,379,300 |
| Lorain | SR-57-09.00 (RW) | Acquisition of right-of-way (RW) to reconstruct and add turn lane on SR-57 (Grafton Rd.) from the CSX RR to Grafton Village Corporation Line RW only. PID NO. 80993 STIP ID No. 0481 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 10 | 91 to 180 days | \$766,500 |
| Lorain | Wellington, Oh. small business | Due to the severe economic down turn a low cost, yet quality provider of perishable & nonperishable goods, in bulk would be a boon to our community. Many take lengthy trips to other counties to buy goods in bulk because there isn't a local, low cost quality provider in the area. We would provide basic food stuffs in bulk at reasonable prices. This would help monies and shoppers in Lorain county in general, and in Wellington city specifically. We would provide the basics. This is the great need of the hour - basics. Our customer base would be the middle to lower middle class population. Those hit hardest by the recession. There is always a need for the essentials, we'd make sure that need would be met. This also would save the gas and related money often spent on trips outside Lorain county to buy in bulk (e.g. Holmes, Wayne county). Columbus | The Grainery | 5 | 31 to 90 days | \$100,000 |
| Lorain | SR-57-09.00 (C) | Reconstruct and add turn lane on SR-57 (Grafton Rd.) from CSX RR to Grafton Village Corporation Line Construction Phase PID No. 80993 STIP ID No. 0481 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 87 | 91 to 180 days | \$5,058,900 |
| Lorain | Baumhart Road Resurfacing Project | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 5.7 miles of Baumhart Road from Russia Road, north to Lorain City Limits in Brownhelm and Henrietta Townships. | Lorain County Engineer | 62 | 0 to 30 days | \$1,315,000 |
| Lorain | Butternut Ridge Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 2.6 miles of Butternut Ridge Road from SR 301, east to Grafton Road in Carlisle Township. | Lorain County Engineer | 28 | 0 to 30 days | \$570,000 |
| Lorain | Pyle South Amherst Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 1.6 miles of Pyle South Amherst Road from SR 511, north to Grafton Road to New Russia Township. | Lorain County Engineer | 18 | 0 to 30 days | \$351,000 |
| Lorain | Grafton Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 2.6 miles of Grafton Road from SR 57, north to Elyria City Limits in Carlisle Township. | Lorain County Engineer | 28 | 0 to 30 days | \$592,000 |
| Lorain | Oberlin Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 4.6 miles of Oberlin Road from Oberlin City Limits, north to SR 113 in New Russia Township. | Lorain County Engineer | 52 | 0 to 30 days | \$1,074,000 |
| Lorain | Russia Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 4.0 miles of Russia Road from Baumhart Road, east to SR 58 in New Russia and Henrietta Townships. | Lorain County Engineer | 44 | 0 to 30 days | \$921,000 |
| Lorain | Vermilion Road Resurfacing | County roads that are on the Federal Highway System. These roads were previously reconstructed to Federal Standards. The project would consist of milling and filling 3.8 miles of Vermilion Road from SR 511, north to SR 113 in Henrietta Township. | Lorain County Engineer | 42 | 0 to 30 days | \$877,000 |
| Lorain | parking lots | The Library has no facilities which need parking for resurfacing. There are areas of open voids, and cracking. One area has been overlaid with asphalt and is not properly drained. Total area to be resurfaced: 80,000 sq. ft. | Elyria Public Library System | 20 | 91 to 180 days | \$200,000 |
| Lorain | elevator upgrade | The Central Library was built in 1967 with a single bottom cylinder unit installed in the building which consists of a basement and one ground floor. The State of Ohio recommends that we replace it with a double bottom cylinder or a Liftjack device. | Elyria Public Library System | 5 | 91 to 180 days | \$25,000 |
| Lorain | Light fixtures | The library has two branches which are older than 15 years. Both libraries plan to replace the existing light fixtures to a new energy efficient fixture which could save up to 200,000 kWh per year for a dollar savings of about \$20,000 per year. If we add photo sensors to fixtures near the windows it would save up to \$2500 more per year. | Elyria Public Library System | 15 | 91 to 180 days | \$120,000 |
| Lorain | Fire Station 2 | Sheffield Village is separated by at grade railroad crossings. The Fire Station is located on the North side of the rail crossings while a significant number of MVA and Roadkill calls are in the south. The southern section of the Village is commercially developed and the highways are congested and dangerous. A significant number of doctor's offices and a community college are located in the southern section. | Village of Sheffield | 9 | 91 to 180 days | \$1,750,000 |
| Lorain | Fire Fighter Staffing | The staffing levels of the fire fighters would return to 7 per shift. | Village of Sheffield | 7 | 0 to 30 days | \$555,250 |
| Lorain | Police Staffing | This will return staffing to previous levels | Village of Sheffield | 5 | 0 to 30 days | \$309,536 |
| Lorain | Detroit Rd. Sanitary Sewer | This project will install sanitary sewers on Detroit Rd. Landowners agreed to be assessed for this project. The project petition has been signed by 90% of affected landowners. This will eliminate septic systems in this quadrant of Sheffield Village. | Village of Sheffield | 35 | 31 to 90 days | \$1,550,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Lorain | American Dream | I would like to get myself out of debt. This is about not been seen as comical. We have billions of dollars being lost by Corporate America (AGDM Ford etc). These companies should be filing for bankruptcy as I have had to do. I don't believe I should fund their poor decisions along with my bankruptcy. Just today AGM didn't even have a plan for us to get out of debt. They lost \$618 in the 4th qtr. This does not sound like someone we should help. Please consider the Ohioans like myself that have worked all of their lives, have families, and cannot seem to get ahead in life. When in reality all we want to do is live the American Dream. Thank you, Eric Lorain County Health & Dentistry (LCH&D) is a federally qualified health center "Look Alike" serving over 11,000 low-income and underserved persons each year. | Leth | 1 | 0 to 30 days | \$10,000 |
| Lorain | Community Health Center Facility | LCH&D will build a new 25,000 sq ft health center in Central Lorain, about 0.4 miles from its current location, a site it leases. Federal stimulus funds are requested to construct the new medical and dental patient care facility. A new site and building is necessary to secure the health center's future in Lorain. LCH&D's current landlord is facing significant financial challenges and it is unknown whether the landlord will continue to maintain this large, mostly vacant building. The health center's lease expires in June, 2010. | Lorain County Health & Dentistry | 36 | 181 days or more | \$2,700,000 |
| Lorain | LOR-20/57-16.93/16.17 | The request is for the Change Order amount over and above Federally Funded Project Cost. The Change Order is primarily due to increase in Asphalt Price Index, additional pavement joint repairs and stabilization of slope along embankment near Black River. The increase due to Asphalt Price Index is estimated to \$1.2 M. This increase is due to steep increase in Gasoline price after awarding the contract in April 2008. | City of Elyria | 20 | 31 to 90 days | \$1,800,000 |
| Lorain | First Step | First Step is a contract program we have been administering for the Lorain County Jobs and Family Services office for the past four years. This program has been incredibly successful in employment placement with individuals identified as having the most significant barriers to employment. The program is unique as it addresses the "whole person" as opposed to only looking at the dimension of employment. In this way it addresses many related issues such as poverty, addiction, domestic violence, parenting, health and wellness etc. Currently, we are in the process of scheduling a meeting (called by State Senator Sue Moricucci) with representatives from Governor's office (Ann Gill) and possibly Lt. Governor's representatives to discuss this program. I expect the meeting will happen in March. We believe this program's success could be duplicated in other counties in the State of Ohio and would be willing to support this initiative if a plan were developed to do so. | Common Ground - The Cindy Nord Center for Renewal | 500 | 0 to 30 days | \$200,000 |
| Lorain | Truck Parking Electrification | Electrification of truck parking area at Middle Ridge Service Plaza, Milepost 139.5, westbound Ohio Turnpike. Electrification will permit trucks to shut off engine, thereby reducing emissions along with air and noise pollution. | Ohio Turnpike Commission | 20 | 91 to 180 days | \$600,000 |
| Lorain | Burns Road Improvement | Lorain County Community College owns the section of Burns Road in Elyria that runs through the campus and connects to North Franklin Road. The segment of this road is in critical condition and needs to be repaired to repair roughly one-quarter mile of the roadway that connects to the LCCC campus as well as the Great Lakes Technology Park. | Lorain County Community College | 20 | 91 to 180 days | \$750,000 |
| Lorain | Energy Savings Projects | Lorain County Community College has developed a Strategic Energy Plan. The plan recommends the acquisition of a Building Management System. It also calls for improvements to building efficiency with new double pane windows, thicker roof insulation, and new external doors, etc. The plan includes recommendations for the installation of a Combined Heat Power engine as well as the implementation of the comprehensive steam heat system with hot water heat. It is estimated that with the implementation of these recommendations, LCCC can reduce energy consumption and reduce its carbon footprint by nearly 40%. | Lorain County Community College | 20 | 91 to 180 days | \$10,000,000 |
| Lorain | Roof Projects | Lorain County Community College has a number of older roofs that are well beyond their warranty period and need replacement. Funding would support the replacement of the Business Building and College Center roofs along with a couple of auxiliary roofs. Replacement of the roofs should reduce maintenance costs and improve energy efficiency of those buildings. | Lorain County Community College | 30 | 91 to 180 days | \$500,000 |
| Lorain | Cleveland Street Reconstruction - South Main Street | Reconstruction of Cleveland Street from South Main Street to Cooper Foster Park Road (3,560 L.F.) consisting of 4,232 SF of pavement removed and replaced with new concrete pavement, catch basin and storm sewer repairs, Signal Replacements at Church Street, Washington Street and St. Joseph. Pavement Markings, and restoration. | City of Amherst | 15 | 181 days or more | \$1,600,000 |
| Lorain | S.R.58 Reconstruction - Cleveland St to Cooper Foss | Reconstruction of S.R.58 (now called Road) from Cleveland Street to Cooper Foster Park Road (4,545 L.F.) consisting of 28,785 SF of pavement removed and replaced with new concrete pavement, catch basin and storm sewer repairs, Signal Replacements at Cleveland Street, Dugmar, Spruce Tree Lane, S.R.22 (Kensley), Kings Lane and Cooper Foster Park Road. Pavement Markings, and restoration. | City of Amherst | 25 | 181 days or more | \$3,932,800 |
| Lorain | Lorain County Drug Task Force | Y/Multi jurisdictional agency including the county sheriff, county prosecutor, 16 local political subdivisions and 4 federal & state agencies that cover 402 square miles including 2 miles of coastline to the Canadian border. According to the latest census figures, Lorain County's population is just under 300,000. Lorain County is a major corridor for rail, auto and air traffic. The Lorain County Drug Task Force addresses all drug, weapons & human trafficking crimes; infrastructure protection and coordination and intelligence gathering that includes terrorist-related criminal activity. EXPECTED OUTCOME: Disrupt drug trafficking organizations, protect infrastructure and international border security. Gather intelligence on criminal, terrorist enterprises and terrorist-related activities and to share same with appropriate state and federal agencies. These efforts will cause a decrease in drug-related crimes and will enhance the quality of life for all citizens who live, work, recreate or travel through Lorain County, Ohio. | Lorain County Drug Task Force | 17 | 0 to 30 days | \$1,445,000 |
| Lorain | Lorain International Port and Intermodal Hub | The port of Lorain is on a federally designated navigation Channel and currently is used primarily as a delivery point for raw materials for the steel industry. These operations are currently provided by private corporations and there is virtually no outboard cargo. The project is to plan, design and build a publicly-owned Intermodal Port and Intermodal Transportation Hub to service not only Lorain, but the entire state. The operation would accommodate the import and export of containers, breakbulk and bulk shipments. Our proximity to international markets via the St Lawrence would allow the Lorain Port to provide Ohio companies a cheaper, faster and safer mode of transport than is currently available. Phase 1 A temporary port operation on land owned by the city will be opened for both import and export. This will allow us to establish trade relationships, the per operation for this site will be minimal, fences, loading unloading, grading. Within 2 to 3 years we should be able to move to the permanent site 1.5 miles upriver. Phase 1 also includes the acquisition of two parcels (8 and 20 acres) to build the Port. | Lorain Port Authority | 1100 | 31 to 90 days | \$35,000,000 |
| Lorain | Bottled Bulk Water Station (Revisions to previous) | Benefits Lorain County Fairgoers and area residents by providing access to safe drinking water | Village of Wellington | 15 | 91 to 180 days | \$177,000 |
| Lorain | Emergency Food and Shelter Local Board | Dollars would be used to fund existing programs receiving funds through the Emergency Food and Shelter Program - Phase 27. Our team took time. My husband and I are thinking of starting this space into an indoor go-kart track. We feel this would be a great business opportunity for us as I lost my job in October 2008 and my husband and I have been laid off since January 2009. Not only would this be a great business opportunity for us but it will bring business and jobs into our community and give the children of our community something fun to do rather than get into trouble. The space is empty, we would need to get a designer to design the race track, purchase go-karts, purchase all the necessary safety walls, helmets, etc. We would also need to update electrical and plumbing and create a concession area for small food items such as pizza, wings, sandy, etc. This will be an expensive job but in the long run will bring other families into our community, boost our community with the recognition we will be receiving from the one and only indoor go-kart track in the area that will run all year round. Please consider giving us the money to start our own business. | United Way of Greater Lorain County | 25 | 0 to 30 days | \$75,000 |
| Lorain | Indoor Go-Kart Rink | | Independent - small business | 25 | 91 to 180 days | \$2,000,000 |
| Lorain | Lincoln Street Reconstruction & Sanitary Sewer Rep | The proposed project includes the installation of 6" thick concrete pavement, 20" curb with 4" integral concrete curbing, pavement subgrade compaction and stabilization, installation of a pavement under drainage system to maintain the continuity of the improved subgrade soils, and replacement of storm sewers and catch basins also found to be in a deteriorated condition | Village of Wellington | 10 | 91 to 180 days | \$900,125 |
| Lorain | Adams Street Reconstruction & Sanitary Sewer Repla | The project involves the reconstruction of 1,220 LF of roadway, with associated water, storm and sanitary improvements. | Village of Wellington | 10 | 91 to 180 days | \$1,042,225 |
| Lorain | Werner Street Reconstruction & Waterline Replaceme | The project will involve the replacement of approximately 3,300 SF of concrete pavement, installation of 24" LF of 12" conduit, 2,685 LF of 4" underdrain, and 1,430 LF of waterline replacement | Village of Wellington | 10 | 91 to 180 days | \$827,940 |
| Lorain | WWTP Clarifier Improvements (Revisions to previous | Project will consist of removal and replacement of clarifiers, weirs, plunger skudge pump | Village of Wellington | 15 | 31 to 90 days | \$328,400 |
| Lorain | Erie Street/Industrial Avenue Elevated Tank Feed L | Project will install/replace 8,402 LF of existing deteriorating 40-year old waterline & provide a direct feed connection to the Industrial Avenue Elevated Tank. | Village of Wellington | 10 | 91 to 180 days | \$1,380,000 |
| Lorain | WTP Ultraviolet Disinfection Improvements (Revisio | UV improvements are necessary to assure adequate and quality water supply | Village of Wellington | 10 | 91 to 180 days | \$1,779,900 |
| Lorain | Western Distribution Main Replacement (Revisions t | Project replaces 12,500 LF of existing deteriorating waterline installed in 1952 | Village of Wellington | 25 | 181 days or more | \$1,735,000 |
| Lorain | Forest Street Sanitary Sewer Replacement | Replacement of underdrain/sanitary sewer on Forest Street | Village of Wellington | 10 | 181 days or more | \$300,000 |
| Lorain | WTP Multi-Tech Expansion (Revisions to previously | Installation of a new 10.5 diameter Multi-Tech Pressure Filtration system at the WTP. The filtration system includes a clarifier, multi-media filter, and a granular activated carbon filter | Village of Wellington | 10 | 91 to 180 days | \$828,500 |
| Lorain | Food and Housing Aid | North Ridgeville Community Care operates with the help of local churches and schools, donations, grants, and over 50 dedicated volunteers. Tending to the needs and giving aid to nearly 1000 less fortunate families and clients in North Ridgeville, Ohio. Applicants are eligible for aid including food, clothing and necessary housing and utility payments. Clients are accepted by process of application, personal interview and income qualifications. 100% of funding and donations will be allocated to either food or utility support. The funding will assure that our clients needs are continually met. We endeavor to maintain a persons dignity and privacy and offer assistance and referral in whatever area of concern our clients bring to us. | North Ridgeville Community Care | 53 | 0 to 30 days | \$50,000 |
| Lorain | College Center Addition & Renovation | The current College Center Building is one of the original campus structures - erected in 1966. It has two stories and a partial basement. College Center was always intended to be a major campus hub. It has contained the bookstore, the cafeteria, student services, college administration, and student organizations, and originally the campus library collection. The renovated College Center is designed to programmatically complement the new Library/Community Resource Center next door. The first floor of the renovated College Center will contain an expanded bookstore, a new "destination" food service area, as well as a multi-purpose space to better serve the student and community events. The second floor will continue to house the administrative, business offices and other campus support divisions. In addition, it will house tutoring, writing and assessments, services for special needs students, and student records. Student organizations will have club and mobile spaces on the second level of the renovated College Center. The total square footage impacted by this project exceeds 100,000 square feet. New 1.0 MG elevated water tank on the Westside of Lorain to help provide pressure equatization and emergency water storage for new industrial development and expansion of the water service area. | Lorain County Community College | 60 | 0 to 30 days | \$15,000,000 |
| Lorain | 1.0 MG Westside Tank Project | | City of Lorain | 47.5 | 31 to 90 days | \$3,800,000 |
| Lorain | Pin Oak Parkway Extension | This project is 3,880 feet in length and will connect the City's industrial parkway between Moore Road and Miller Road. The biggest benefit for the project is the fact that the water utility runs along the Pin Oak Parkway. This project would open up approximately 200 acres of industrially zoned land to Ford suppliers. This project will also include a Ford overpass to cross the Norfolk Southern spur track to access Miller Road. The City has been in discussions with N&S to permit an in-grade crossing but so far has been unsuccessful. A preferred outcome for this project exceeds beyond the construction of the parkway extension. When Ford brings a new product line to the Avon Lake Assembly Plant a need will exist for industrial land close to the plant for suppliers. This project will give access to land that will create additional jobs beyond the in-house construction project. Jobs and business that utilize rail access are an asset unique to this location and will be exploited should this project occur. | City of Avon Lake | 200 | 91 to 180 days | \$4,725,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lorain | Chronic Disease Management Home Health Aide Workfo | The Visiting Nurse Association Healthcare Partners of Ohio (VNAHPO) would like to implement a Chronic Disease Management Home Health Aide Workforce Training Program. We are presently exploring opportunities to pilot this project in partnership with Lorain County Community College. The project will provide home health aide (PHA) workforce training, curriculum development, and patient education to address the home health aide workforce shortage and the needs of individuals with chronic disease while reducing the rate of acute care hospitalizations and the high cost of disease exacerbation. Our long-range goal is to create a curriculum and teaching method which results in a highly recognized credential that becomes a national standard. Once the pilot project is complete, the program could be replicated throughout the state to address similar needs. Currently, there are no national or State of Ohio training standards for the PHA field. This program would enable VNAHPO to develop a PHA curriculum to be taught in the classroom setting and as a practicum in the home as well. Students also will receive specialized training in chronic disease care – diabetes, cardiovascular, mobility, and alzheimers/dementia – as well as hospice care. To derive full potential from this program, the | Lorain County Community College | 100 | 31 to 90 days | \$450,000 |
| Lorain | Jaycox Road Sewer Separation Project | This project will install 8,300 linear feet of sanitary sewer and will convert the existing combination sewer into a storm sewer. This project will include work on the following streets: Jaycox Road, Electric Boulevard, Lake Road (1/2 to 1/4), Harvey Parkway, Yoder Blvd., and Cherry Lane. This project will also install roadside storm drainage along Jaycox Road and eliminate the roadside swales. Once the sewer separation is complete the project will equalize and improve the stream flows and improve the project site. The project requires 1,000 linear feet of asphalt concrete and 1,000 feet of concrete streets. This project can be considered a safety project due to the existing conditions of the roads. This project is also an environmental project since the current conditions include a combined sewer overflow directly into Lake Erie. The combined sewer overflow will be converted into a storm sewer which will greatly improve lake conditions in this area. Currently, raw sewage is discharged into a private beach area making the area unusable for the neighboring residents. Provides financial incentives for non-profits in Lorain County to recruit and retain good clinical staff and prevention staff for substance abuse treatment and prevention programs. There have been medical colleges on rates that non-profits can bill (since 2000) that limit the agency budgets. Hence, many qualified clinicians to locate out of Lorain County for better pay scales elsewhere. We have actively recruited and implemented evidence based programs with results we just need the ability to pay our staffs at a going rate to keep our best in our community to service our families | City of Avon Lake | 50 | 31 to 90 days | \$2,625,000 |
| Lorain | Workforce Development for substance abuse counselo | | ADAS Board of Lorain County | 100 | 31 to 90 days | \$100,000 |
| Lorain | ADA handicap accessibility project | ADA handicap accessibility for the lower level of our donated building. This would allow non-profits to rent the facility for their use without limits in Lorain County, Ohio at a very reasonable cost. We need to ensure there is a bathroom as well as handicap seats and to get an unchained person to that level. We are also creating a Community Chiropractic for families to access substance abuse prevention materials in this lower level. This chiropractic has been funded by the Office of National Drug Control Policy. We just need the handicap access. | ADAS Board of Lorain County | 25 | 31 to 90 days | \$100,000 |
| Lorain | Welding Labs | Lorain County Community College is upgrading its current Welding/Metals joining facilities housed in the Nord Advanced Technology Center. CCCC received an NSF Grant to create Weld Ed, which is a collaboration with business and industry to improve the quality, quantity, and availability of welding technicians through advancement of educational curriculum and instructor professional development. The Weld Ed portion of the Nord Center will be redesigned to include state-of-the-art welding lab facilities, new classrooms and offices to support the education. The lab facilities are being built using "cutting edge" technology in the materials joining industry through partnerships with the major welding equipment supply manufacturers. | Lorain County Community College | 20 | 91 to 180 days | \$1,500,000 |
| Lorain | Jackson Street Reconstruction - Elyria Ave to Clew | Reconstruction of Jackson Street from Elyria to Cleveland Street (1.366 L.F.) consisting of 11,158 SF of pavement removed and new concrete pavement, curb, edge and storm sewer repair, Pavement Markings, and restoration. | City of Amherst | 15 | 181 days or more | \$1,555,200 |
| Lorain | Mental Health Housing Aquisition Rehabilitation Pr | Lorain County Board of Mental Health has funded the provision of safe and affordable housing for consumers with severe mental illness for the past 15 years. This has primarily been accomplished through subsidies and capital improvement grants. The entity that has been contracted with for residential services has recently indicated that serving this population creates an unsustainable financial burden. The current safe and affordable housing options remain for these consumers, the Board is interested in acquiring the properties where the consumers have been residing. Recently completed renovations have indicated that the vast majority of the properties are in need of major renovation. The costs for these renovations will exceed the amount that the Board initially estimated for this project. If the Board can utilize stimulus funds for rehabilitation and restoration of these properties, the need for these renovations will be reduced. The Board is interested in utilizing stimulus funds for rehabilitation and restoration of these properties. The Board is interested in utilizing stimulus funds for rehabilitation and restoration of these properties. The Board is interested in utilizing stimulus funds for rehabilitation and restoration of these properties. | Lorain County Board of Mental Health | 27 | 91 to 180 days | \$528,000 |
| Lorain | Medical Records Management for In Office Arthrosc | Clear Image Technology is a developer of medical devices and are focused on improving patient outcomes, reducing health care costs, and improving hospital efficiency. Clear Image Technology has developed a medical device that eliminates the significant cost of arthroscopic procedures performed in the operating room by providing surgeons with a minimally invasive system to perform these procedures in a physician's office. The patient experiences better treatment without the need and expense of general anesthesia. The procedure is done in an outpatient setting and the patient can walk away from the procedure moments later - the substantial cost of a hospital stay is no longer required. Clear Image Technology has developed software to improve the patient's medical records. Clear Image Technology is working with surgeons in Lorain County to improve this software to further reduce costs, improve efficiencies, and increase security of patient's medical records. This project will lead to an electronic data records management system for in office endoscopic procedures. This will bring in additional revenue for Lorain County and address a full time high skilled job. | Clear Image Technology | 5 | 0 to 30 days | \$125,000 |
| Lorain | Police Motorcycle Purchase | Purchase and equipment for two motorcycles for the Avon Lake Police Department. Two motorcycles can be used to better monitor the multiple park properties and better watch for traffic violations. Avon Lake does not currently have motor officers therefore having this new equipment would support the effectiveness of the department. Motorcycles can be used for public educational programs, in access-controlled areas in the parks and "beat" traffic control. | City of Avon Lake | 2 | 0 to 30 days | \$30,000 |
| Lorain | Central Avon Lake Drainage (CALDP) Phase 2 | This project would be the second of two phases to install a trunk storm sewer from Lake Erie to the City's south corporation line at Avon Ballon Road. The first phase was installed in 2008 and ends at Walker Road. Phase 2 of the project would install 5000 feet of concrete storm sewer ranging in size from 42 inch diameter down to a 36 inch diameter sewer. Plans for this phase of the project have been completed and would require minimal refinement due to new construction along the project routing. The City has access to the necessary routing and the project could be ready for bidding within 30 days of notice of award of a grant. | City of Avon Lake | 20 | 0 to 30 days | \$500,000 |
| Lorain | Fire Apparatus | This request is for the purchase of new equipment for a proposed second Fire Station within Avon Lake. This request is a complimentary request to the request for funding to construct a new station on the east side of the city. The equipment needed to be purchased would include but is not limited to (1) L-Series truck, (2) Pumper truck, (3) Rehabilitation, and miscellaneous equipment to make the truck functional. Part of the recommendation of the study completed in 2008 for analyzing response times the City is proposing to construct, equip and staff the first of two new stations. This, being the first new building, will require all new equipment and staff. The second station once constructed on the west side can utilize the current staff and equipment. | City of Avon Lake | 30 | 31 to 90 days | \$2,500,000 |
| Lorain | Easterly Fire Station | The City of Avon Lake has conducted a study on response times from the current central fire station. The resulting recommendation is to construct eastern and western stations to reduce the response times to the outward reaches of the community. This request is for the construction of the eastern station. The eastern station, near Lake Road east of the City is beyond the national standards for response times and this portion of the City is fully built out. Construction of a new station in the Lake Road and Walker Road area is the recommendation of the study and is proposed as the first phase of the program implementation. This project would purchase the property which the City has started discussions on with two possible property locations and construct a new 24-hour station. | City of Avon Lake | 30 | 31 to 90 days | \$1,900,000 |
| Lorain | Biomedical Engineering Professional Development | Clear Image Technology is a developer of medical devices that are focused on improving patient outcomes, reducing health care costs, and improving hospital efficiency. Clear Image Technology is launching several new product lines that will help eliminate unnecessary costs in the health care system. This proposal is for the development of a Professional Development program for students and new college graduates. This program will have the following outcomes: 1. A rotational internship/co-op program creating 1 full-time highly skilled engineering jobs. 2. Educational opportunities for students to translate their academic experience into an industrial setting. 3. Improve the skill set of new engineers and increase their workforce marketability | Clear Image Technology | 5 | 0 to 30 days | \$250,000 |
| Lorain | 09 Business Growth Initiative | 7 will immediately recruit four employees that have been laid-off for over a year and are still unemployed. One of them will be trained to assist me in running the operations of the business as I further my education. I will start an aggressive advertising campaign to ensure new growth, long-term sustainability, and future new hires. I will also purchase new book of the trade for the business to replace some that have worn out. \$200,000 will be to offset payroll and business expenses and provide working capital \$ 10,000 in advertising expenses \$ 90,000 in new equipment needed to staff additional crew. | Pengov Inc. | 4 | 0 to 30 days | \$306,000 |
| Lorain | Elyria/Lake Erie- CRS - Plume (EPA site 0HD057018 | Revised TCE, PCE and related solvents. Extensive EPA monitor set up costs. The deep nature of the plume and high water table made all previous efforts futile. ABS Materials reactive sands are believed to be able to resolve the worst are impacting Lake Erie Waters. | Absorbent Materials Company of Wooster Ohio | 35 | 31 to 90 days | \$8,500,000 |
| Lorain | Lorain - Black River TCE Plume Remediation (Lake E | Conduct TCE Plume Remediation on demised steel cleaning yard on W. Shore of Black River Basin on former steel degreasing/pickling pond site. Remediation in compliance with EPA standards would allow for repositioning of demised industrial site and compliance of water quality of run-off entering Lake Erie. | ABSorbent Materials Company of Wooster Ohio | 35 | 31 to 90 days | \$22,500,000 |
| Lorain | Lorain - Black River TCE Plume Remediation | ABS Materials has worked with Lorain County Water Works, and the Black River Boat Basin to test concentrations of non-point source runoff TCE and PCE entering Lake Erie via the Black River. Program would fund development of a detector based on the swelling glass property of Osorb material to make a plume detector, well monitor system which does not need a power source or battery system to operate. Initial water level read out between City of Lorain & City of Vermilion water mains. This will provide an emergency back up water supply and provide adequate water pressure during the rehab of the 1,000,000 gallon water tank within the City of Vermilion. Rehabilitation of 1,000,000 gallon overhead water tank for the City of Vermilion. This rehab has been planned for 10 years but no funding was available to do the project. | Absorbent Materials Company of Wooster Ohio | 12 | 0 to 30 days | \$400,000 |
| Lorain | Lorain Water Line Connection | | City of Vermilion | 10 | 31 to 90 days | \$60,000 |
| Lorain | Water Tank Rehabilitation | | City of Vermilion | 20 | 91 to 180 days | \$450,000 |
| Lorain | Martin Run Flooding Mitigation ENGINEERING COSTS | ENGINEERING COSTS FOR THE Martin Run watershed experiences recurring flooding problems at numerous locations throughout the watershed during moderate to heavy rainfall events as a result of the storm sewer system undersizing and insufficient channel capacity. The project consists of lowering the existing channel bottom of Martin Run approximately 3'. A feet with an 8 foot wide channel bottom between West 30th Street and West 44th Street. The channel would be lined the entire length with rock channel protection except in severely confined sections which will require retaining walls to protect existing structures. A detention basin is also proposed upstream of Oberly Avenue to reduce the peak flow entering the Martin Run channel within the City of Lorain. | City of Lorain | 203 | 31 to 90 days | \$450,000 |
| Lorain | City Wide Water Valve Replacement and Waterline In | Replacement of existing low line valves and additional of new line valves, waterline microconnections to increase pressure and create redundancy. THE SUBMITTAL REPLACES PRIOR SUBMITTAL WITH SAME PROJECT NAME. PRIOR SUBMITTAL PROGRAM WAS INADVERTENTLY NOTED AS HIGH SPEED RAIL. NEW AND REPLACES SANITARY SEWER AND NEW SANITARY LIFT STATION TO UPGRADE AND REPLACE EXISTING LIFT STATIONS AND EXTEND SANITARY SEWERS INTO CURRENTLY UNSERVED AREAS AND ELIMINATE SEPTIC IN SOME RESIDENTIAL NEIGHBORHOODS. NEW LIFT STATION WILL DISCHARGE THROUGH FORCE MAIN TO EXISTING SANITARY SYSTEM TRIBUTARY TO EXISTING TREATMENT PLANT. 800 LF SANITARY SEWER, LIFT STATION, 800 LF FORCE MAIN | City of Amherst | 15 | 31 to 90 days | \$138,400 |
| Lorain | PROPOSED NAGLE DISTRICT SANITARY ***REPLACEMENT OF | | CITY OF AVON | 35 | 0 to 30 days | \$2,396,800 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lorain | Linn, Weaver, Virginia, Waterline Replacement | Replacement of existing under sized 4" waterline with 8" D.I.P., hydrants, bends, services, and restoration. | City of Amherst | 15 | 31 to 90 days | \$158,000 |
| Lorain | PROPOSED NAGEL DISTRICT WATER | NEW AND REPLACED WATERMANS AND PRESSURE REDUCING STATION TO UPGRADE AND REPLACE EXISTING MAINS TO PROVIDE CAPACITY FOR EXISTING CUSTOMERS AND TO ACCOMMODATE REQUIREMENTS OF ANTICIPATED NEW DEVELOPMENT 6100 LF OF NEW WATER MAIN NEW PRESSURE REDUCING STATION | CITY OF AVON | 25 | 0 to 30 days | \$1,163,000 |
| Lorain | Sharondale, Columbia, Wlshire, Waterline Replacem | Replacement of existing under sized 4" waterline with 8" D.I.P., hydrants, bends, services, and restoration. | City of Amherst | 15 | 31 to 90 days | \$215,000 |
| Lorain | Idelwood, Sunset, Shupe Waterline Replacemnt | Replacement of existing under sized 4" waterline with 8" D.I.P., hydrants, bends, services, and restoration. | City of Amherst | 15 | 31 to 90 days | \$140,000 |
| Lorain | PROPOSED NAGEL DISTRICT SANITARY | NEW AND REPLACED SANITARY SEWERS AND NEW SANITARY LIFT STATION TO UPGRADE AND REPLACE EXISTING LIFT STATIONS AND EXTEND SANITARY SEWER TO CURRENTLY UNSEWERED AREAS AND ILLUMINATE SEPTIC SYSTEMS IN SUBURBAN NEIGHBORHOODS. NEW LIFT STATION WILL DISCHARGE THROUGH NEW FORCE MAIN TO EXISTING SANITARY SYSTEM TRIBUTARY TO EXISTING TREATMENT PLANT. | CITY OF AVON | 35 | 0 to 30 days | \$2,396,800 |
| Lorain | Proposed Water Tower and 16inch Feeder | 1000 LF SANITARY SEWER, LIFT STATION, 800 LF FORCE MAIN Proposed improvements include a 3 million gallon storage water tower, 10,000 ft of 16" D.I.P. line valves, bends, 200 ft of 16" bored, hydrants, restoration, maintenance of traffic, restoration, property acquisition and signage. Our main goal continues to be to create a continuing cycle of jobs through our community partners such as HomeAid, Homeless, police, youth organizations, senior services, government, family support, and other youth service agencies. We believe the community center concept will be well received. The addition of a new Community Center can provide the neighborhood with a new building that builds upon many of the existing area services and provides a new and exciting venue for community events and gatherings. Additionally, the community center is part of a broader collaborative vision for South Lorain entitled "The Pearl Avenue Corridor". The project deals with infrastructure improvement and provides the opportunity for an underserved neighborhood in one of the Midwestern cities most devastated by economic trends over many years. The Pearl Avenue Corridor Project matches the needs of all six youth, the elderly and everyone in between. The project will create jobs during its execution as well as ongoing jobs for the operation of the community center. | City of Avon | 50 | 0 to 30 days | \$5,083,200 |
| Lorain | South Lorain Community Center | | Boys & Girls Clubs Lorain County | 50 | 91 to 180 days | \$2,000,000 |
| Lorain | Read and Rise Family Literacy Program | The Read and Rise Family Literacy believes that the home is a Child's First School ** We train parents, caregivers and any member of the family who is involved in raising a child. They learn about the developmental stages that child goes through, how to help, the child achieve each milestone or how to find help if they are unable to help a child develop appropriate skills. ** We provide basic educational resources to low-income families. At minimum, kids receive books and dictionaries. We teach parents how to use these resources to simulate the love of learning in their children. ** The teach parents how to use the computer - everything is now available on the world-wide web. Computer training also helps parents to upgrade their own skills so they can earn more, potentially. ** Part of the fund will help us to create a read-computer to read-computer in our Neighborhood Reading Centers where we read and read to our children who have anyone reading to them at home. ** We will formal and train needed staff to read to children at 21 Summer Food Service Program Sites in Lorain County. Last year, we were able to read to children at 3 sites. All children receive free books. | Lorain County Urban League | 20 | 31 to 90 days | \$375,000 |
| Lorain | computer repair | Start a computer repair business that allows people to bring in their computers and be taught basic installation and upgrades on-site and a class room set up where services can come in and get basic skills to better communicate through internet email, shopping, etc. There will be rental space that can set up and used by individuals to teach specific classes, such as a college student who will be offering a computer lab in Excel. We hope to have 3+ employees plus the contracted area users. | fish computer repair | 3 | 91 to 180 days | \$500,000 |
| Lorain | Security Updates | To provide funding for the purchase of an up to date magnetometer for security screening at Court Entry. To provide funds for training of Security Staff in the Municipal Court. Update Camera system to provide recording capabilities and security monitoring in the courtooms. | Elyria Municipal Court | 5 | 91 to 180 days | \$75,000 |
| Lorain | blazina family recovery | Secure a assisted living home for my parents or repair their home so they can remain there. To get the 100K pocket expenses for a healthcare person to check on them if they are in assisted living facility. To reduce the care given in the home so they can be able to give assistance when necessary. To have an amount of money in trust for their living expenses since they rely on social security alone. This trust will also help several family members that are age who have disabilities and will need assistance later. The recovery of this family is important. I believe due to circumstances in the past few years, assisting them is a good and necessary thing. | blazina family recovery | 2 | 31 to 90 days | \$500,000 |
| Lorain | COMunity Reinvestment Program (CORP) | Establish a specialized docket in the Elyria Municipal Court to identify, evaluate and service individuals, especially Pro Se Defendants, who are in need of specialized services prior to sentencing to determine treatment, vocational or offers that may be provided. Link Court Officers, Attorneys and Community assets to provide a holistic approach to identify and target offenders with multiple issues and help them complete the cycle of violence committed within the community. Build offender accountability with regular appearances before the court and require that offenders remain time free, employed and in treatment. | Elyria Municipal Court | 3 | 31 to 90 days | \$75,000 |
| Lorain | Project GRAD Ohio | Project GRAD is a proven comprehensive K-12 school reform model currently underway in 13 economically disadvantaged communities across the nation, serving more than 120,000 students. Project GRAD Ohio was initiated in 2007. There are currently three Project GRAD sites in Ohio: Akron, Cincinnati and Lorain serving over 15,000 students. Project GRAD Ohio's mission is to provide a high quality public education for all children in economically disadvantaged communities so that high school graduation rates increase dramatically and graduates are prepared to enter and succeed in college. In the largest served group of schools, GRAD achieves an average college rate of a new 10% above the national average for students from similar demographic backgrounds. GRAD Scholars are also outpacing their peers in pursuit of science, technology, engineering, and mathematics (STEM) degrees, earning STEM degrees at a rate 71% above the national average for minority students. GRAD has already offered over 7,500 scholarships worth over \$30 million to its high school graduates to attend post-secondary institutions all over the nation. | Project GRAD Ohio | 25 | 0 to 30 days | \$2,000,000 |
| Lorain | Elyria Warm Safe and Dry | The Elyria City School District is in the process of constructing a new High School replacing a deteriorated structure with sections built in the late 1970s. Our remaining school buildings are old and in critical need of replacement or major renovation. Elyria has also applied for stimulus funds to pay the School Board share of the Ohio School Facilities Commission Master Plan. It is requested for the construction of new schools is not accepted, we need resources to keep our students warm, safe and dry in our existing facilities. The funds would be used to replace old leaking roofs and inefficient HVAC systems with efficient and effective green technology. The project would also include the renovation of the remainder of district building envelopes including replacement or repair of paint, masonry, concrete walks and steps, windows, doors, and upgraded security systems. Our district does not have a permanent replacement loop to pay for such improvements which are long term needs. Our architects are in place and our construction team is ready to move forward upon approval. The project would enhance the educational environment, save energy and reduce our ongoing cost of operation. | Elyria City School District | 200 | 0 to 30 days | \$20,000,000 |
| Lorain | Elyria School Construction OSFC Master Plan | The Elyria City School District is in the process of constructing a new High School replacing a deteriorated structure with sections built in the late 1970s. The new school will be a green school with at least a Silver LEED rating. Elyria passed a bond issue for 40% share of the \$70,000,000 project. Our remaining school buildings are in critical need of replacement or major renovation. The cost of the replacements is \$20,000,000. Our share would total 80% or \$15,000,000. Elyria is now eligible for the state funds to complete the master plan but due to the economic challenges and the shrinking tax base it is not possible to pass another bond issue at this time. Elyria is risking the permanent loss of the state contribution. The district is one of the 121 school districts with a poverty level approximating 70% Elyria provides a quality program. The new schools would make the district more efficient and effective in the delivery of the academic program. Our design and construction team are in place and ready to move forward. | Elyria City School District | 400 | 91 to 180 days | \$75,000,000 |
| Lorain | Citywide Signalization Project | The City needs additional funds to cover the local share costs of a citywide traffic signal upgrade project with ODOT. The City at this time cannot afford to cover the remaining costs of final design and local share costs of construction. Through ODOT (PID 7026) and MOCA this project has all clearances and is ready for final design. This is a public safety project where all of the traffic signals will be updated to LED with battery backups and pre-emption. The City has already completed the environmental clearance, preliminary right-of-way assessment, signal warrants (three signals have already been removed) and detailed review by ODOT. The remaining steps are for the City's consultant Burgess & Nipke to finish the design drawings and submit the project to ODOT for construction. Without additional assistance the City will likely delay the project indefinitely and therefore lose the current funding. | City of Avon Lake | 20 | 31 to 90 days | \$500,000 |
| Lorain | Mid-tier tree propagator for local & county govt. | The next result of this effort will be the creation of a large, self-sustaining inventory of young transplantable trees for use in expansion of forest acreage of our metro parks districts, for brownfields reclamation, erosion control in watershed district Hamilton PD occupies 10 acres of forested habitat and one part time patrol officer. We have one officer just return from Iraq and was unavailable to cover any shifts since 5/09. Two officers are in the reserves and they have both been deployed at various times. We have one officer recovering from an extensive back surgery and he is on light duty to at least 5/10. Due to financial constraints our current detective helps to cover shifts at docks are one juvenile detective. | Unemployed due to disability | 6 | 31 to 90 days | \$200,000 |
| Lorain | investigative bureau unit funding assistance | The influx of money would allow us to utilize our part time staff more than creating more work for one of our staff that was just recently laid off from the Lorain County Sheriff's Department it would also improve our investigative capabilities and allow us to fill use of our drug lab force structure that is assigned to the Lorain Co Drug Task Force. | vermillion police department | 1 | 181 days or more | \$50,000 |
| Lorain | Q2 Health Clinics | Adding up 12 retail medical clinics in Ohio to take care of minor acute illnesses in order to free up emergency rooms and urgent care centers for real emergencies. To treat under and uninsured as well as provide care at hours that are more convenient for working people. More people will give quality medical services in Ohio at a cost effective price. | Q2 Health Clinics, LLC | 38 | 0 to 30 days | \$1,140,000 |
| Lorain | HELP ME READ LITERACY PROGRAM | The Yula M Reed Literacy Program is designed to help school aged kids, grades kindergarten through 5th, who either can't read or read below grade standards learn to read with reading skills. The program will be geared toward low income families who suffer from lack of money to pay for the extra help for their primary school student to ensure enough success in secondary school to obtain scholarships and funding for post-secondary schooling. | TOWER EDUCATIONAL CONSULTING GROUP, INC | 21 | 0 to 30 days | \$1,343,500 |
| Lorain | Wind/Solar power for personal use - self generated | purchase & install additional solar panels @ \$399.00 each, replace existing lead acid deep cycle batteries with 24 AHM 12v deep cycle batteries @ \$322.00 each, replace existing solar charge controller with larger Apollo T88 charge controller @ \$124.00, replace existing modified sine wave inverters (3) with one 21 kw 12V pure sine wave inverter @ \$1300.00. This will enable us to cut our electric bill even further, reduce our carbon footprint & create our own renewable energy, even more so than we are doing now. | None | 0 | 91 to 180 days | \$12,690 |
| Lorain | Business redevelopment | Rehire sales and staffing force to re-develop and existing outside sales firm. Servicing the outdoor sporting market in all Ohio counties. | DRD Outdoor Sports | 5 | 0 to 30 days | \$350,000 |
| Lorain | Safety and Security Service | This is a Security and Patrol company that provides mobile patrol services throughout the State of Ohio for different corporations for their employees safety and prevention from criminal activity, so this funding would go for the much needed vehicles, two-way radios, educational training for my employees, and new or additional employees. | Continental Security Patrol, Inc. | 18 | 0 to 30 days | \$161,560 |
| Lorain | Eastwood Elementary Energy Conservation Upgrades | Eastwood Elementary school is a 1980 building with many original single pane steel frame windows. This grant will allow the district to replace the oldest of these windows with high efficiency energy saving windows that will greatly reduce heating and cooling costs, and allow the carbon footprint of the building. | Oberlin City Schools | 15 | 31 to 90 days | \$45,000 |
| Lorain | Replacement of the Boilers at Oberlin High School | The heating equipment at Oberlin High School is antiquated and in immediate need for replacement. A new high efficiency heating plant will drastically reduce overall energy consumption, save the district thousands of dollars a year in natural gas costs, and greatly reduce the buildings carbon emissions. | Oberlin City Schools | 5 | 31 to 90 days | \$150,000 |
| Lorain | Oberlin City Schools Bus Garage | Oberlin City Schools would like to build a bus lot garage for 5 to 12 buses. This is no bus storage or bus maintenance facility currently. The garage would be located next to the new City of Oberlin Senior Center, on property donated by the City of Oberlin. The building will be constructed under the highest LEAD standards. This facility will allow for the removal of an old underground storage tank, and save the school district thousands of dollars a year in bus maintenance by combining resources with the city. Plans are already in process, and the proposed project could be complete in the next 6 months. | Oberlin City Schools | 15 | 31 to 90 days | \$500,000 |
| Lorain | Project - Targeted Maximum Output | This is a grade school level of training program for 5 to 12 graders. This program is designed to teach both girls and boys how to improve on their speed, quickness and agility to play their respective sport. This program will run over a 6 to 8 weeks developing their knowledge and skills to become the best athletes they can be. The request for funds is making to purchase the equipment for the first group of 6 to 8 kids to do an activity together, hence being able to work with 30 - 40 kids at a time. I thank you for reviewing my request. | St. Jude | 2 | 0 to 30 days | \$6,000 |
| Lorain | Seawall/Infrastructure Replacement | 1200 Linear feet of new seawall piling and restoration wall with water and electrical utilities. All material will meet Bay Area standards and will be done using local union labor drawn from two of the counties with the current highest unemployment rate in Ohio, Erie and Lorain Counties. The Marine Industry is vital to the region, with depressed economic conditions and the difficulty in borrowing we are requesting assistance to sustain our the 22 pilot cutter on our marina, but employ local steel and concrete workers as well. | Romp's Water Port, Inc. | 27 | 91 to 180 days | \$100,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lorain | Community Regional Medical Center - Energy Reducti | The Community Regional Medical Center is a 2,200-bed, non-profit, not-for-profit organization providing inpatient, outpatient and ancillary services. CHP is requesting funding for energy reduction opportunities across the hospital including the following: upgrades and remodeling of antiquated patient care areas, replacing asphalt parking area surrounding medical center that is deteriorating and is traversed daily by several thousands, roofing causing interruptions in patient care, replacing medical center domestic hot water heating and storage system with new high efficiency unit, replacing antiquated windows and doors with new energy efficient windows and doors, will improve patient comfort and reduce energy consumption, replacing underground conduit, replacing antiquated fire system in medical center, convert pneumatic controls in medical center to digital operation, replacement of air handling units, HVAC operation redesign, and installation of a Medical Center easy access PAR Coarse on north grounds to provide a means for the community to engage preventive health measures. | Mercy Health Partners | 19 | 0 to 30 days | \$7,659,150 |
| Lorain | Sewer project on Dyke Ave in North Ridgeville | The City of North Ridgeville and the Health Department has decided to put in sewers, sidewalks and a new street. Each resident of the street is expected to pay \$8,000.00. If you don't have the money, then expect us to take out a loan to pay for it. The majority of the residents are elderly on fixed incomes and with the economy, many of us are out of work. My husband's plant is shutting down and now we have the worry of obtaining additional funds to pay for this. We cannot afford this and are hoping that our about residents can obtain the money needed to pay for the project. The stimulus is supposed to get people to work, which this will do. Please help us. | N | 50 | 0 to 30 days | \$500,000 |
| Lorain | self | I am about ready to lose my house. I have been employed at various jobs since I was 16 years old and now find myself unemployed. I do not get any unemployment benefits and my savings are almost down to zero. I have no insurance (health or automobile), I have creditors calling me constantly and I am about ready to put my car out. I am not asking for much compared to the big businesses who seek for and received billions of dollars - I just need something to get out of the bind that I am in. | self | 1 | 0 to 30 days | \$10,000 |
| Lorain | Purchase of a new fire engine | New NFPA, EPA compliant fire engine to replace a 1991 engine and 6 Mobile Data Terminals for Computer Aided Dispatch and preplans. EDCo is a concept that will grow Ohio's "green" economy by creating union manufacturing, installation & labor jobs. The program will financially reduce Ohio's carbon footprint. The request is for non-profit starting costs for a program that converts viable commercial, industrial, governmental, and residential buildings into certified energy efficient buildings utilizing governmental, solar and wind technologies. After an environmental viability assessment, and subsequent infrastructure improvement, guaranteed energy savings will provide direct service dollars for the payback of the improvement. During the payback period, with energy costs dramatically reduced, total monthly overheads / cash outlays will be lowered. After the payback period, participants will realize the entire benefit of our environmentally engineered efficient systems, heating up significant cash flow, which will energize Ohio's economy. We will maintain high enough reserves to continue the program indefinitely, eventually expanding to new construction. We will work with state, and local governments / local waste districts to create labor made programs for individual municipalities. | Avon Lake Fire Department | 0 | 31 to 90 days | \$550,000 |
| Lorain | Efficient Ohio Geo (EO-Geo) | EOGeo is a concept that will grow Ohio's "green" economy by creating union manufacturing, installation & labor jobs. The program will financially reduce Ohio's carbon footprint. The request is for non-profit starting costs for a program that converts viable commercial, industrial, governmental, and residential buildings into certified energy efficient buildings utilizing governmental, solar and wind technologies. After an environmental viability assessment, and subsequent infrastructure improvement, guaranteed energy savings will provide direct service dollars for the payback of the improvement. During the payback period, with energy costs dramatically reduced, total monthly overheads / cash outlays will be lowered. After the payback period, participants will realize the entire benefit of our environmentally engineered efficient systems, heating up significant cash flow, which will energize Ohio's economy. We will maintain high enough reserves to continue the program indefinitely, eventually expanding to new construction. We will work with state, and local governments / local waste districts to create labor made programs for individual municipalities. | EO-Geo | 50 | 31 to 90 days | \$3,500,000 |
| Lorain | Save Our Sons | American & Hispanic males ages 18-74 within Lorain County. Project in collaboration with the Maranatha School of Medicine: Community Center for the Unemployed. Save Our Sons will work with over 100 targeted males, providing diabetes and other related health workshops, a varied program of exercise (fitness centers, swimming, tennis, walking, basketball, etc.) on multiple days each week, and teach the targeted population to prepare healthier meals (with recipes) in their homes, and live healthier lifestyles (like You Tube - Save Our Sons). Outcomes: Targeted population will enjoy improved health (reducing cholesterol, blood sugar and weight), Men will be able to find medical homes, secure employment, incorporate healthier lifestyles for themselves and their families, and utilize instruction and help on activities to break the cycle which currently traps African American & Hispanic Males as the fastest dying population in the country. We will work with hospitals, churches, and other support organizations. This project will add to the tax base rather than absorb money just to make people feel good about being poor. We are seeking for assistance from those of your state for "HELP" programs and will get you a photocopy of a page out of a 40 page report on how we can give you money to contractors with real good ideas when I could do some actual good with the money? Thanks | Lorain County Urban League | 60 | 0 to 30 days | \$200,000 |

| Lorain | Columbia Middle School addition | Columbia Local Schools has been developing a plan to remove students from an Elementary School Building with initial construction in 1921, 1938 and 1953 respectively. The Ohio Ohio School Facilities assessment recommended the entire building be rebuilt. Kindergarten through fourth grade will be moved to a new addition to Columbia Middle School as soon as funding is approved and received. Student will be moved to a building with safe conditions, including the building structure, heating, air conditioning and ventilation with improved air quality. ADA compliance for handicapped students and families would be implemented and modern technology and learning environment will be available to all students. | Columbia Local Schools | 50 | 91 to 180 days | \$2,979,923 |
| Lorain | request advice as sales agent for SMBE general dis | We are a certified reliable SMBE with expertise in electrical wire and cable, metals, and construction materials. I need advice on selling to state and federal government and government contractors, any suggestions will be appreciated. Requests and replace obsolete in kind which was damaged by hurricane IKE. | Kero International, Inc. | 10 | 0 to 30 days | \$1,000 |
| Lorain | Steeple rebuild, replacement | Church is listed on national register of Historic buildings. built in 1980 - steeple is landmark in village and a beacon for all christians. Internal fund raising to start shortly, receipt of stimulus funds would hasten project. | 1st United methodist church of Wellington | 5 | 91 to 180 days | \$180,000 |
| Lorain | Public Warning Sirens | Installation of two new public warning sirens to supplement an existing WWVI area central siren. Because of growth in the village, existing siren area at the outer limits of the effective range of the current siren. Two additional sirens placed on the outskirts of the village would give enhanced geographic coverage, including two audible warnings in the area of the highschool and fairgrounds areas. The new sirens would also be multiple tone pattern design, which would improve our ability to communicate more specifically with the public. Location that will eliminate an existing blowfield on the city's inventory list. The proposed 68,000 square foot building would provide a warehouse, shop areas, vehicle maintenance area and flexible space along with office space for the management and support staff of the Lorain City Schools Operations Department. Due to many years of limited funding, where the bulk of available funds went to educate children, these areas of the school system have not been well supported. The new single building would be much more energy efficient than the District's existing scattered facilities, several of which are more than 70 years old. The new location would centralize facility/operations activities for the entire district. The building would utilize a geothermal heating system, and include an onsite windmill for electrical power generation. The 68,000 square foot building design is complete, and the 7.5 acre site has already had substantial environmental study done to it. Lorain City Schools prefers the funds be sent to the City to build the facility, their district takes ownership. Request current operators to purchase/rebuild used vehicles and equipment in order to get another small crew up and running in our interior residential and commercial parking company. | Village of Wellington | 5 | 31 to 90 days | \$28,000 |
| Lorain | Lorain City Schools Facilities Department Building | The building would utilize a geothermal heating system, and include an onsite windmill for electrical power generation. | Lorain | WIND TURBINE GEARBOX | WIND TURBINE GEARBOX THIS PROJECT IS TO DEVELOP AND MARKET A NEWLY DESIGNED (PATENT PENDING) SPEED INCREASER SPECIFICALLY DESIGNED FOR USE IN WIND TURBINES. THIS DESIGN ADDRESSES THE MAJOR PROBLEM ENCOUNTERED IN CURRENT WIND TURBINE INSTALLATIONS, NAMELY GEAR BOX FAILURE. THE 2 BIGGEST FAILURES IN CURRENT GEAR BOXES ARE GEAR FAILURE AND BEARING FAILURE. BRIEFLY, THIS DESIGN ELIMINATES A NUMBER OF BEARINGS AND GEARS AND ALLOWS A GREATER NUMBER OF METALS IN CONTACT RESULTING IN GREATER POWER TRANSMISSION. SOME BENEFITS FOR THIS UNIT ARE LIGHTER WEIGHT, HIGH POWER TO WEIGHT RATIO, FEWER COMPONENTS, LARGE MAIN BEARING LOAD CHARACTERISTICS AND FLEXIBLE CONFIGURATION. MANUFACTURING COSTS FOR THIS UNIT ARE ALSO MUCH LESS THAN CURRENT UNITS. A LARGE MARKET EXISTS FOR THESE TURBINES AND WILL CONTINUE TO GROW AND THERE ARE NOT ENOUGH MANUFACTURING CAPABILITIES EXISTING TO ACCOMMODATE THE CURRENT DEMAND. ADI WIND HAS BEEN GRANTED MONEY FROM LORAIN COUNTY COMMUNITY COLLEGE GILDE FUND AND WILL START PRELIMINARY DESIGN ON A 120 KW UNIT THAT CAN BE BUILT AND TESTED HERE AT ADI WIND. WE ARE WORKING WITH TOLEDO UNIV. TO CONFIRM OUR CALCULATIONS, PROOF OF CONCEPT MODELS EXIST. To improve our bus routing system, transportation maintenance, bus time and travel, and to improve the safety of transporting our students to and from school and activities, we have purchased a new system and GPS equipment. | ADI WIND | 30 | 0 to 30 days | \$500,000 |
| Lorain | Columbia Computer Bus Routing | Without the funding our school district can only afford to sustain 7 of our 15 mobile carts. Why is this important? Starting school year 09/10 we will be deploying new collaboration software called ClassSpot. This software will be installed in all 222 classrooms teacher station computers that run the ClassSpot software. The wireless laptop carts are moved from room to room based on a schedule. The laptops in the cart associate with the teacher station and collaboration can begin. Each laptop acts as its own independent client and can also participate in a group effort to control the teacher station. This would allow the potential of up to 40 laptops to simultaneously edit and enhance the same document along with the teacher facilitating the collaboration effort at the Promethean Activboard. We are working 1 on with the software now at the elementary level and we believe this is a critical part to teaching at the 2100st century level. Thank you for your consideration. Over the past three years the Avon City Schools District has been reviewing to create a 2100st century classroom and teachers form PreK-12. We have equipt all 222 classrooms in the ALCS District with voice enhancement, sound systems and the Promethean Activboards technology. We are implementing interactive student personal devices that the students use through the use of the PFA and find cases. And now in order to complete the goal of the ActivClassroom in the 2100st century we need to complete the distance learning portion of the project. The distance learning portion of the project entails a 3.5m video camera (performs high res streaming video, document camera functions and low to medium resolution) and an integrated classroom microphone to be installed in each classroom. These components accompanied by the distance learning collaboration software called Edmentum will allow us to share audio, video and allow remote control of desired applications. We have had success and continue this individual effort with a student that regularly attends the Cleveland Clinic that participates in class while getting analysis. It benefits grade level readings across buildings. Thank you Principal and Eastern Elementary District serves a rural and social economic diverse population, with over 40% free and reduced lunch. Improving literacy achievement in grades PK to 5 is a major focus of our schools district. The help improve instruction in these areas we would like to install two, 40 station thin client computer labs, one for each of these schools. These labs will allow the district to extend the student school day by 45 minutes, and provide every student in grades K-4 with remote, computer based instruction. The grant amount will pay for the hardware and infrastructure upgrades. | Columbia Local School District | 18 | 31 to 90 days | \$30,000 |

| Lorain | John Spain Builders Home Energy Efficiency Program | John Spain General Contracting has been specializing in custom new home construction, and home renovation in Lorain County, OH for the past 35 years. We have a professional team that is qualified in GREEN home construction. We encourage our customers to use GREEN products in their home projects, but due to the additional cost that is created when using these products many customer resist from using them simply because that cannot afford it. We would like to use the federal funding to offer GREEN products at the conventional product cost. Creating more energy efficient homes through the use of products such as, Customized Heating and Air Conditioning, Tankless Water Heaters, Timber Strand Floor, Insulated Concrete Form Framing, Composite Lumber, Composite Decking Systems, Lysiane Insulation, Energy Efficient Windows, Energy Efficient Appliances and Solar Panel Technology. | John Spain General Contracting | 10 | 0 to 30 days | \$750,000 |
| Lorain | Employment Training Project | EMPLOYMENT TRAINING PROJECT New Life United Community Action desires to remodel 6,000 square ft of commercial property to help train young adults. This project will create jobs for laid off workers and young adults interested in the construction trades. The immediate goal is to get people back to work by remodeling a space that will be used for the development of our youth. Future plans of New Life is to collaborate with agencies and surrounding trade schools such as Lorain Joint Vocational School and Lorain County Community College to offer opportunities for young adults to have hands on experience in the fields of construction and the service field. In addition to teaching construction trades the purpose of remodeling is to have a place for community and family activities. The remodeled building will afford a safe place for our children to play off the streets inside a safe environment. | New Life United Community Action | 30 | 31 to 90 days | \$400,000 |
| Lorain | School Building Construction/Renovation | Harrison Cultural Community Centre (HCCC) has been in existence for 17 years. We operate an Alternative School for Lorain City School children in the 4th, 5th, and 6th grades who exhibit learning problems, which, if not addressed, would lead to children offloading down the road. Some of the children we serve have physical limitations. ***This request will assist HCCC to build a 12,000 Sq. feet recreational facility for the use of children in the day school as well as the after school program. Renovation in the current facility include: --making it handicap accessible. -- Replace the roof - current roof is over 20 years old -- Face the parking lot with correct slop youth can play basketball outside in the summer. ***A moveable stage will be designed to allow the Rec Center to be used for plays and other theatrical activities. | Harrison Cultural Community Centre | 40 | 0 to 30 days | \$750,000 |
| Lorain | Making Our Building Green! | We have purchased an adjoining building to our existing building and want to "go green" with this entire project. I have spoken to colleagues at Oberlin College in our environmental studies department and they have given me some good resources to start with. It is the funding that I am trying to look in to. My estimates are very rough. I want to expand our current business in Elvira to create more positions for people of the neighborhood. With the purchase of the adjoining building we own a large corner property on Lake Avenue with a large parking lot and a moving out. I want to add to the beauty of Elvira by improving our business and going green in order to be kind to the environment. We currently have a very limited amount of hours to offer to outside employees, but with the addition of this building and expanding our hours we can increase our employee count to 10. We get inquiries often for people seeking additional part time work so supplement that through our business such as ours will be just the start. Thank you for considering assisting us in our expansion. Sandy Austin Elvira abandoned manufacturing inner city space to create a state of the art training facility, create many jobs with services in the future include industry, automotive technology, diesel technology, refrigeration/air conditioning technology use of state of the art training equipment, providing training to all order price and great funding work in conjunction with government job services for training, employing and providing government instructors plus business support staff finance officers for student loans maintenance dept for the building and other staff to train our youth for the future. | DanSan Inc. | 10 | 181 days or more | \$50,000 |
| Lorain | lorain auto diesel tech school | | tech training | 200 | 0 to 30 days | \$25,000,000 |
| Lorain | Harrison Cultural Community Centre (Critical Repair) | This is a capital repair project for a non-profit community center that serves the City of Lorain. The request is for critical roof repairs that will stop a currently leaking roof, HVAC upgrades that will save large amounts of energy and associated costs, and the replacement of a flood-damaged parking lot. The Harrison Cultural Community Centre is a vital neighborhood center that supports the community in a significant way by offering educational, recreational and social services for children and families. This is a very important local neighborhood center. | City of Lorain | 12 | 31 to 90 days | \$254,382 |
| Lorain | COL TRAINING AND PLACEMENT PLAN | REPRESENT A FOR PROFIT TRUCK DRIVING SCHOOL LOCATED IN THE CENTER OF WHAT WAS OHIO'S INDUSTRIAL BELT. WE WORK WITH DISPLACED WORKERS FROM LORAIN, CUYAHOGA, SUMMIT, MEDINA AND SURROUNDING COUNTIES TO HELP THEM RE-ENTER THE COLS. WE ALSO HAVE AN AGGRESSIVE APPROACH TO PLACEMENT. NEARLY 80% OF OUR STUDENTS ARE CURRENTLY EMPLOYED. WE ARE HAVING DIFFICULTIES TRYING TO PLACE SOME STUDENTS DUE TO LACK OF LEADERS. WE HAVE A FEW STUDENTS WHO ARE TRYING TO CALL US TO SEARCH FOR OPENING FOR OUR STUDENTS AND WOULD LIKE TO MAKE THIS A FULL TIME POSITION. THE MONEY WOULD BE USE TO INCREASE THEIR INDIVIDUAL SALARY AND THE INCREASE IN STUDENT NEEDS AS WE GROW. WE ARE COMMITTED TO SERVING THE GROWING NEED FOR OHIO'S UNEMPLOYED. | GREAT LAKES TRUCK DRIVING SCHOOL | 150 | 181 days or more | \$58,000 |
| Lorain | Education Stimulus-Building Improvement | Our program was recently awarded a One Star rating by Ohio Job and Family Services even with all the above mentioned drawbacks. We could provide a much better educational environment with better heating, replacement of the leaky windows, and a complete kitchen to provide better meals. Outcomes: To provide a warmer environment to encourage better learning skills for 140 children. To provide more nutritional hot meals with a more adequate institutional kitchen. To provide a more nurturing educational environment for more than 140 children and teachers by replacing leaky windows and a heating system badly in need of repairs. | Vermilion Family YMCA | 45 | 31 to 90 days | \$250,000 |
| Lorain | Community Center | The PACE Foundation represents a collaborative effort between over twenty faith-based and community organization leaders as well as community business leaders. Founded in March 2006, the foundation seeks to empower residents in Lorain and provide opportunities to transform lives in northeastern Ohio. It consists of both short-term and long-term program goals to increase the economic viability of the area, and provide residents with the ability to live productive and self-sufficient lives. Currently as a result of economic downturns, factory closures and subsequent layoffs needs of residents in the area are complex in nature. According to the US Census 2005 estimates nearly 80 percent of Lorain residents have completed high school, but only 10 percent have college degrees. As a result, the PACE Foundation (501)(c) (3) tax exempt corporation was organized to address three key areas in the community. These core areas include: (1) Youth Development (2) Job Training and Traditional Development and (3) Economic Development. | Pace Foundation | 15 | 0 to 30 days | \$500,000 |

| Lorain | Stabilize and Sustain Housing (Down Payment Assist | Lorain County Community Action Agency is one of three HUD-certified programs in Lorain County. Our Housing Program is designed to educate, build assets, and work for sustainable home ownership for low-income clients. Through this project we would re-engage our Down Payment Assistance initiative and begin to include rental assistance. In 2008 we helped 19 low-income families purchase homes after directly preparing them with credit counseling, financial literacy training, and homebuyer education. Through this project, we will continue what we have proven we do well and help 30 more families purchase homes. We will also begin to offer rental assistance. We administered a rental assistance program in the past. This will re-engage with much resources that will assist a minimum of 30 families with assistance up to \$600 each. Lorain County Community Action Agency is one of three HUD-certified programs in Lorain County. Our Housing Program is designed to educate, build assets, and work for sustainable home ownership for low-income clients. In 2008, we prepared \$1,594,083 in local property values by helping 14 families stay in their family homes. With this project, we will expand our proven program and assist 50 low-income (200% PLI or below) families each month with foreclosure counseling and case management. The driving objective will be to preserve home ownership. In cases where this is not possible, a secondary objective will be ensuring legal rights are known and respected and that the best solution possible is reached. | Lorain County Community Action Agency | 1 | 0 to 30 days | \$106,950 |

| Lorain | Energy renovations to Charleston and PACE Academy | This project will include renovations to current low energy windows and doors. The renovations will include replacement of the original 1950's heating boilers, the original single glazed, metal frame windows and doors. These items will be replaced with Energy Star, high efficiency items that will significantly reduce the annual energy consumption while improving the environment and comfort of the occupants. The need for a stand alone domestic hot water heater will be eliminated as the heating boilers could also supply domestic hot water. Installation of these systems would require the buildings be abated of asbestos further insuring the safety of students and staff. This project would help stimulate the local economy which has been plagued with high unemployment, high poverty rate, and low per capita income. A grant for these desperately needed repairs would insure that our limited resources would be used to educate our children, and not on high energy costs associated with inefficient boilers, windows, and doors. | Lorain City Schools | 107 | 31 to 90 days | \$2,252,350 |
| Lorain | Energy renovations to Charleston and PACE Academy | This project will include renovations to Lorain City School's Charleston Administration Center and PACE Academy. The renovations will include replacement of the original 1950's heating boilers, the original single glazed, metal frame windows and doors. These items will be replaced with energy Star, high efficiency items that will significantly reduce the annual energy consumption while improving the environment and comfort of the occupants. The need for a stand alone domestic hot water heater will be eliminated as the heating boilers could also supply domestic hot water. Installation of these systems would require the buildings be abated of asbestos further insuring the safety of students and staff. This project would help stimulate the local economy which has been plagued with high unemployment, high poverty, and low per capita income. A grant for these desperately needed repairs would insure that our limited resources would be used to educate our children, and not on high energy costs associated with inefficient boilers, windows, and doors. | Lorain City Schools | 107 | 31 to 90 days | \$2,252,350 |
| Lorain | Saving Menlo Park Academy | These funds would enable Menlo Park Academy, Ohio's only community school for gifted students, currently ranked 2nd out of 1800 elementary schools, to continue operations and allow the expected growth to continue. The most significant outcome of the myriad of positives that we are experiencing and expect to continue is the enrolling of a population of children that presently are not being adequately served at their gifted education. This truly unique and innovative program that is currently operating and attaining incredible results will allow our politicians and policy makers to directly help a program of the type in Ohio that is not being funded. It will enable pioneering educators to continue to better develop the potential of our gifted children, which can only benefit all. | Menlo Park Academy | 4 | 0 to 30 days | \$1,000,000 |
| Lorain | Lighting Upgrade | Replace mercury vapor lamps in our Elyria, Ohio mfg facility with high efficient 1-5 bulbs. Estimated annual savings by reducing KWH consumed would be \$24,000. | A-D Technologies | 50 | 31 to 90 days | \$20,000 |
| Lorain | Equipment | New equipment investment to be able to work on the turbine projects that are slated for the state of Ohio. | B.M. Rebuilders, Inc. | 12 | 31 to 90 days | \$500,000 |
| Lorain | Pheasant Run Water Works | To build a storage basin given our current information that would be capable of handling 800,000 gallons of water that infiltrates our sewer system. This would eliminate a fear that the intrusion of raw sewage is a small creek that runs through our property and to septic properties down stream. In the present, we are still conducting studies to see if there are other options which might limit the size of the storage basin. Our costs for the different basins to limit the size of the storage basin could be used from other basins. This would be a significant savings. The project would also include adding lines to some of them. This could help reduce the amount of ground water that enters our sewer system. This could also help with the conjunction of sewer line maintenance of close to 30,000 linear feet using a non digging method to repair any leaking pipes or cracks. This project could help reduce or eliminate additional expense to the SDJ plus homeowners in this homeowners association. In this homeowners we would keep our sanitation plant from being flooded which results in the over flow of raw sewage. This would go a long way in helping us in complete. | Pheasant Run Homeowners Association | 10 | 181 days or more | \$2,000,000 |
| Lorain | Underground Tank Removal | Removal and cleanup of underground oil and gasoline tanks. Stabilization and/or replacement of soil. Combination of new products in the oil and gas industry has made it possible for our company to offer the alternative energy power generation at a significantly lower price than conventional and turbines, with a reduced time to market. The experience in titanium manufacturing methods and a passion for revolutionary practices, we have teamed with Power Reserve power generation to provide a mobile power system with greater power on a mobile platform which has significant advantages to commercial, military, and industrial sectors. We are currently negotiating with leaders in each of these markets to implement our product. We are requesting for funding to improve our manufacturing efficiency, improve manufacturing efficiency, implement sales production, invest in advertising and complete construction of our communication infrastructure. We have worked with several industry leaders to commercialize this product including, but not limited to, NASA, U.S. Army, U.S. Navy, Case Western Reserve University, Toledo University, LCCC Innovation Fund, and AREA. Great Lakes Wind Network, Roll-Roll and many other leading professionals. We would be grateful for an opportunity to present our product. | Jake's Garage Inc | 50 | 0 to 30 days | \$500,000 |
| Lorain | Mobile Power System | ADJ Wind, Inc. | 80 | 0 to 30 days | \$500,000 | |
| Lorain | Oberlin Landfill Gas Project | UPDATE TO AN EXISTING SUBMISSION Oberlin College and the City of Oberlin are working to acquire the rights to a local landfill and expand to current landfill gas (LFG) facility into a generation plant producing power, heat, and motor fuel. When realized, this project will effectively remove Oberlin from the carbon grid, and create a source of clean power for Lorain County. Acquisition of the landfill is estimated to cost \$8-12 million, while the necessary infrastructure will be an additional \$10-12 million. This could represent a prototype for landfills throughout Ohio. The entire project will generate up to 100 megawatts. | Oberlin College | 100 | 181 days or more | \$24,000,000 |
| Lorain | Solar Photovoltaic Array | UPDATE TO AN EXISTING SUBMISSION The PV will be linked to the historic Apollo Theater, the East College Street Project, the Oberlin Public Library, and the New Union Center for the Arts, thus ensuring that it directly affects the blocks within Oberlin. The PV provides a unique opportunity to continue the college's leading efforts to provide clean and affordable energy options, and to increase awareness of energy use. Furthermore, it will monitor the energy consumption of part of the College and surrounding area and will make those results public and accessible, thus incorporating efficient and environmentally friendly practices into the everyday lives of the citizens and students in the Oberlin community. | Oberlin College | 100 | 91 to 180 days | \$1,100,000 |
| Lorain | Apollo Theater | Updates to an existing submission. Renovations will create a community outreach center for media education while striving toward the standards of a LEED silver rating. The project offers to enhance use of the Apollo Theater for business, community and academic purposes. The first phase of the Apollo Theater preservation will bring the theater into compliance with the Ohio Building Code, ADA standards, lobby renovation and select both restrooms, kitchen, shell, electrical and lighting systems. Future phases include an updated projection space, a refreshed and enlarged seating area, the installation of multimedia equipment, an area for community and academic film editing and projection, a stage and multi-use theater lighting for community performing arts, theater and other events. In addition, a fire suppression system will be installed, existing roof restored and heating will be repaired or replaced, as will the exterior windows. The Boys & Girls Clubs of Lorain County plays a powerful role in making summer a time for learning and developmental gains for children. Since 1959 we have implemented a summer program that gives young people meaningful opportunities to practice reading and mathematics skills on a daily basis. Our Summer Enrichment Camp will provide what researchers consistently identify as missing ingredients in many formal summer school programs: 1) educational activities that look and feel slightly different from the regular school day, 2) high levels of youth engagement and motivation and 3) proactive, real-time monitoring. The Camp is designed for children ages 6-12 years old. Breakfast, lunch, and snacks will be served daily to all children. Meals and snacks meet minimum USDA standards as specified in the CACFP's food program. The Club uses a thematic approach to guide the implementation of our summer program. Staff members serve as positive adult mentors during the summer months by teaching productive problem-solving strategies, encouraging children to be self-directed learners and ensuring that youth have the resources they need to meet high expectations. | Oberlin College | 50 | 31 to 90 days | \$3,200,000 |
| Lorain | Summer Enrichment Camp | Boys and Girls Clubs of Lorain County | 48 | 31 to 90 days | \$125,000 | |
| Lorain | Operation Neighborhoods | Founded in 1987 as a non-profit, non-denominational charity, Our Lady of the Wayside is a full-time residential service provider for nearly 300 individuals with Mental Retardation and Developmental Disabilities in Lorain and Cuyahoga Counties. The agency operates 48 neighborhood homes where individuals live "family style" to maximize their abilities to live independently as possible. This project is to complete energy audits on all 48 homes and cover costs associated with their rehabilitation. The Wayside owns several of the homes and leases others from non-profit landlords, whereas the project would be a collaborative venture. Government and Medicaid fees comprise 85% of the agency's operating revenue. A balanced 2009 operating statement of \$16 million will be abated by saving on heating and air conditioning costs both near and long-term. | Our Lady of the Wayside, Inc. | 30 | 0 to 30 days | \$467,600 |
| Lorain | The Learning Center: Building the Next Generation | The International Boxing Club (IBC) was created to empower youth in the greater Toledo area to succeed in life. IBC uses amateur boxing as a tool to reach underserved youth who are at risk for dropping out of school, drug, gangs, and teen pregnancy. While all youth develop physical fitness through boxing, they must maintain passing school grades to participate. We saw profound academic deficits and so developed The Learning Center (LTC) to help with homework, tutoring, and promoting academic success. We seek additional funding to support a new year-round academic training initiative at LTC for 200 economically disadvantaged 14-21 year olds to learn employable work skills. The paid staff a team of professional volunteers will help kids prepare for careers in cooking, photography, woodworking, construction, and computers; they will also serve as weekly speakers and examples of overcoming disadvantaged backgrounds. LTC will provide young people with access to work experience, adult mentors, leadership development, occupational skills training, support and follow up services. We will use process, impact, satisfaction, and outcomes evaluation to measure the project's success. | International Boxing Club | 5 | 0 to 30 days | \$75,000 |
| Lorain | Replication/Sustainable Project | REVISOR SUBMISSION Oberlin College made the headlines of a New York Times story last July having an enviable reputation as one of the nation's greatest campuses. Within the realm of higher education, the words "Oberlin" and "environment" are nearly synonymous. Oberlin College/City of Oberlin today into the environmental spotlight began in 1998 with the construction of the \$7 million Adam Joseph Lewis Center for Environmental Studies. Currently, we, College, Eaton Corporation and NorTech are designing Ohio's first "Smart Grid" project in a rural community. The Replication/Sustainable Project, as designed, will provide an active model for other small college towns throughout the State to follow a low-carbon path toward sustainability. Oberlin College/City of Oberlin would share the model and other best practices and provide direct guidance, mentoring and support in the form of instruction, oversight, the "How To's" and process for developing sustainable communities within small college towns. This Project will create jobs to 3.5 to 5.6 time positions. Costs \$300,000.00 | Oberlin College | 4 | 91 to 180 days | \$300,000 |
| Lorain | Replication/Sustainable Project | Within the realm of higher education, the words "Oberlin" and "environment" are nearly synonymous. The Sierra Club published a top 10 list of the "coolest" (most ecologically friendly) schools with Oberlin at the top of the list. Oberlin College/City of Oberlin today into the environmental spotlight began in 1998 with the construction of the \$7 million Adam Joseph Lewis Center for Environmental Studies. Its use of green materials, energy-efficient building design, solar energy systems and geothermal heating and cooling methods became a prototype for green buildings nationwide. Currently, we, College, Eaton Corporation and NorTech are designing Ohio's first "Smart Grid" project in a rural community. Further, our college and town are developing a Green Arts District, a national model for environmental and artistic development through creative integration of historical properties, new construction and state-of-the-art green technologies on a 13-acre college owned property located downtown. The Replication / Sustainable Project, as designed, will provide instruction, oversight, the "How To's" and process for developing sustainable communities within small college towns. This Project will create jobs to 3.5 to 5.6 time positions. Costs \$300,000.00 | Oberlin College | 4 | 91 to 180 days | \$300,000 |
| Lorain | Smart Grid project | State Energy Pheochahator Oberlin College, a nationally recognized leader in sustainability, Eaton Corporation, a global power management company focused on protecting the environment through the development of energy efficient products and reducing emissions, and NorTech, a leader in building Northeast Ohio's technology agenda for the 21st century, and the City of Oberlin's Municipal Light and Power System (MLPS) are partnering to install smart power distribution and proactively manage demand to reduce up to fifty (50) percent energy consumption. The Partnership will collaborate to develop and implement a new "Smart Grid" for the City of Oberlin. It is estimated that the project would create hundreds of jobs for the region. The project would be designed as an energy prototype replicable and sustainable for rural communities. Other renewable energy components would include: • Solar Photovoltaic Array • Geothermal well systems and pumps Project cost estimate is up to \$25 million. | Oberlin College | 600 | 31 to 90 days | \$25,000,000 |
| Lorain | Photovoltaic electric generation system | Provides turnkey installation of a 10.8 MW photovoltaic (solar) generation system comprised of 48 solar electric modules located on roof of a fire station rehabilitation/expansion project. System shall be NABCEP certified, using UL-listed components and interconnection shall comply with IEEE 929. | City of Oberlin | 0 | 31 to 90 days | \$200,000 |
| Lorain | Playground Improvement Project | To continue our playground improvement project by (a)replacing the ground surfacing material of much with a poured in place surfacing allowing playground access to children of various abilities, and (b) adding a second shade structure to protect the children from harmful UV rays and provide a cool environment for outdoor activities. | Next Generation Child Development Center | 0 | 0 to 30 days | \$25,000 |
| Lorain | Scholarships | Funding tuition scholarships for preschool students that do not qualify for county/federal aid who would not be able to benefit from a preschool education. This would ensure the retention of 1 teacher and perhaps add a second depending on enrollment numbers. | Next Generation Child Development Center | 2 | 0 to 30 days | \$10,000 |
| Lorain | Train Depot Restaurant | Rent and renovate existing train depot building into restaurant that will employ 20 people serving BBO, chili and more. | Brand X Catering | 20 | 31 to 90 days | \$250,000 |
| Lorain | Restore Layed-off Firefighters | Stimulus funds will be used to bring back 10 layed-off firefighters allowing us to respond 1 to 2 firefighters. | Elyria Fire Department | 10 | 0 to 30 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---------------------------------------|----------------|--------------------|---------------------------|
| Lorain | Summer Enrichment Camp | The Boys & Girls Clubs of Lorain County plays a powerful role in making summer a time for learning and developmental gains for children. Since 1997 we have implemented a summer program that gives young people meaningful opportunities to practice reading and mathematics skills on a daily basis. Our Summer Enrichment Camp will provide what researchers consistently identify as missing ingredients in many formal summer school programs: 1) educational activities that look and feel different from the regular school day, 2) high levels of youth engagement and motivation and 3) a proactive, multi-year approach to summer learning. The Camp is designed for children ages 6 through 12 years old. Breakfast, lunch, and two meals will be served daily to all children. Meals and snacks meet minimum USDA requirements specified under the CACFP food program. The Club uses a thematic approach to guide the implementation of our summer program. Staff members serve as positive adult mentors during the summer months by teaching problem-solving techniques, encouraging children to be self-directed learners and ensuring that youth have the resources they need to meet high expectations. | Boys and Girls Clubs of Lorain County | 48 | 31 to 90 days | \$125,000 |
| Lorain | Junior Staff Career Development | The Junior Staff Career Development program objectives are to provide youth with: 1) An opportunity to participate in a comprehensive career development program consisting of leadership and service activities, and employment skill-building and development; 2) An essential guidance/career support system designed to help them examine the values inherent in human services; 3) Tools and resources to actively pursue a career; and 4) Immediate financial needs within their homes. Program participants will receive a stipend in exchange for providing program support to trained Boys & Girls Club Staff. Boys & Girls Club staff ensure that Junior Staff participants receive the training and hands-on experience necessary to pursue a career in the youth services field. We will employ a total of ninety six (96) participants annually. We 20 Junior staff members at each of our twelve (12) locations per quarter. Typically, participants in the Junior Staff Career Development Program leads improved attendance and better grades in school, improved work habits, increased involvement in community affairs, improved self-image and greater self-confidence. | Boys and Girls Clubs of Lorain County | 96 | 0 to 30 days | \$153,600 |
| Lorain | WPD Crime Reduction and Reporting | This project will allow the procuring of the necessary equipment, training, and deployment of a record management system by a Ohio certified OIBRS vendor, obtain equipment to implement an AFIS live scan system, and employing 3 additional law enforcement officers. The overall goal is to become OIBRS compliant within 30 to 60 days from the beginning of project, increase the timely submission of crime data through use of an AFIS system, and decrease the current amount of crime by providing more law enforcement officer coverage. | Wellington Police Department | 3 | 0 to 30 days | \$66,000.00 |
| Lorain | Stalking Advocacy | How a Stalking Advocate to coordinate stalking cases across jurisdictions, to address the unique complexities of stalking & respond effectively to the multi-jurisdictional and non-criminal nature that victims face. She will conduct safety planning, crisis counseling, & education for 50 victims. This will increase the victim's safety, knowledge of resources in the county, and cooperation which will result in more thorough investigations, better prosecutions, and more convictions. | Lorain County Safe Harbor | 1 | 0 to 30 days | \$25,190.00 |
| Lorain | Lorain RTIS Academy | Lorain City Schools, in partnership with Education Development Center (EDC) and DigPen (Miamiado University) operate a middle school magnet program focused on Real Time Interactive Simulation (RTIS). The school provides instruction in programming concepts and skills that are integrated across the academic curriculum. The RTIS academy will reduce or, pending, federally funded high school similar learning community, to provide a seamless link to the RTIS middle school. Approximately 250 students in grades 6-12 would be served. The RTIS academy will build upon programming skills developed in middle school, provide exposure to RTIS professionals and careers, and will offer students summer camps in RTIS related fields. Students involved in the project will be prepared to pursue careers in the growing virtual gaming industry. | Lorain City Schools | 58 | 91 to 180 days | \$890,000.00 |
| Lorain | Lorain Academy of the Arts | With the advent of a federal magnet school assistance project in 2007, arts education had virtually disappeared within the district. Currently, the district has introduced arts instruction in four schools as an element of several strategies aimed at improving student performance. Ineffective arts teachers at the high school level do not allow students interested in the arts to pursue those passions. To address this the Lorain City School District will operate similar learning communities targeting the arts at each of its two high schools. The project will provide students with ongoing instruction in music, dance and the dramatic arts. Students matriculating from current art magnet schools will be provided instruction in the arts, career guidance related to post-secondary education and careers in the arts, and summer employment opportunities in arts related organizations. The project will serve 600 students in grades 9-12, and provide summer employment for 60 students in grades 9-12. By summer research, the infusion of the arts in the daily instruction of students will yield increase in student attendance and performance on standardized tests. | Lorain City Schools | 60 | 91 to 180 days | \$890,000.00 |
| Lorain | Lorain Green Academy | Formerly a robust manufacturing center, Lorain's economy has been devastated by the loss of nearly 30,000 jobs. Over the past 30 years, largely in the fields of heavy manufacturing and for its service economy and for its students to be equipped for the jobs of the future. In partnership with the Education Development Center, Inc. (EDC) Lorain City Schools will convert one of its high school similar learning communities into a Green Academy. The program will provide 500 students in grades 9-12 for careers in environmentally friendly occupations. The program will build on existing programs in science at elementary and middle schools and provides students the academic grounding in science that will be needed to transition successfully to college programs in the related sciences, environmental sciences, etc. While high school students will be provided hands-on experience to green careers and will be offered summer employment in local green affiliated industries. Summer employment in green related jobs will be offered 100 students. | Lorain City Schools | 112 | 91 to 180 days | \$1,000,000.00 |
| Lorain | Lorain Guidance & College Access | In the City of Lorain, the high school drop out rate is 25% and lower than 6% of residents have obtained a bachelor's degree. Currently, less than 4% of high school seniors even apply for post-secondary options. Additionally, 80% of students are economically disadvantaged and socio-economic issues such as lack of health care, parental neglect, and mental health issues are barriers to academic success. More than 50% of students do not pass state assessment tests. Therefore, Lorain City Schools will enhance its existing college access program by adding ten certified high school counselors to reduce the student counselor ratio to 165:1 to more intensive services. The program will provide college awareness education, including the application process and financial aid options. The district will further partner with Lorain County Job & Family Services to place ten additional social workers at the high school level to address the socio-economic issues. A guidance counselor will be the conduit to link counselors, social workers, families and schools to community agencies as well as provide direction and focus for the entire program. | Lorain City Schools | 21 | 31 to 90 days | \$1,500,000.00 |
| Lorain | Lorain One-to-One Laptop Program | Hardware and paper pencil tasks. All 8,500 students in the district will be provided with their own laptop that is loaded with electronic versions of all textbooks. This program permits student access to current technologies and informational learning tools, allows teachers to provide innovative and enriching education opportunities to expand student knowledge, and ensures students develop the technology skills needed to compete in the 21st Century workforce. The laptops allow all students, regardless of their abilities or location, to have access to the latest information available to help them produce high quality work. | Lorain City Schools | 17 | 31 to 90 days | \$2,004,000.00 |
| Lorain | Lorain Physical Education Program | The district currently offers this program to all ninth and tenth grade students, and sixth grade students will have access before the end of the 2008-2009 academic year. Stimulus funds will expand this innovative program to include all students within the district. The program will create 17 technical support positions that are necessary to maintain and repair the laptops. | Lorain City Schools | 18 | 31 to 90 days | \$2,452,400.00 |
| Lorain | Lorain After School & Summer Activities | Beginning with the 2009-10 school year, Ohio schools must align physical education curriculum to meet the new state standards passed by the Ohio State Legislature. These standards require students to engage in physical activity for 150 minutes per week and learn to interpret results from fitness assessments and design, implement and modify a personal fitness program. To meet these standards, Lorain City Schools will modify its PE program by infusing new activities and courses into the curriculum such as ballet, tap, hip hop and jazz dance, golf, bowling, and personal fitness. In recent years, financial difficulties have forced the district to reduce the PE staff by 20%. Therefore, an additional eleven elementary, three middle and four high school teachers will be hired to revise the curriculum and teach new courses before and after school. | Lorain City Schools | 27 | 31 to 90 days | \$5,000,000.00 |
| Lorain | Lorain Performing Arts Center | Few after school and summer opportunities exist in the City of Lorain, leaving for too many children wandering the streets when school is not in session. Decades of research show that children are most likely to engage in criminal activity during the hours of 4 and 6 pm. Lorain City Schools in collaboration with the Boys & Girls Clubs of Lorain County will expand its existing after school and summer program for approximately 1,000 students in grades K-4 to take place within ten elementary schools. Current after school programs are full to capacity with many families on waiting lists. The program will provide extended learning opportunities to students in fine arts, physical fitness and academic enrichment in language arts and the STEM subjects - science, technology, engineering and math. The primary purpose of the after school and summer programs is to increase student achievement by providing high quality learning opportunities that keep students safe and "off the streets" when school is not in session. The program will create 27 jobs. | Lorain City Schools | 35 | 31 to 90 days | \$4,570,000.00 |
| Lorain | Lorain Universal Preschool | Classified by the Ohio Department of Development as a Long-Term Economically Distressed City. Currently the unemployment rate is 12% the national average and 6% of school children qualify for free and reduced price lunch. This project is a partnership between Lorain City Schools and the Lorain Palace Theatre, a national historic landmark on the brink of closure due to limited financial resources. | Lorain City Schools | 54 | 0 to 30 days | \$6,919,700.00 |
| Lorain | Lorain Class Size Reduction | The purpose of the Lorain Performing Arts Center is to enhance and expand existing art education for 8400 preschool through 12th grade students in the Lorain City Schools and to expose Lorain's 68,000 residents to the arts. Additional teaching staff, material and professional productions will infuse arts education into the curriculum, building essential 21st Century workforce skills. Research shows that developing the arts is a viable economic development tool and that education through the arts increases student academic performance. The overall quality of life for a low-income community will be enhanced and 20 jobs will be created. | Lorain City Schools | 140 | 0 to 30 days | \$11,500,000.00 |
| Lorain | Ziftech training | On average, 80% of Lorain's kindergarten enter school each year academically unprepared to succeed (NORAL assessment). As a result, most of the district's students require intensive intervention and struggle to achieve. The Universal Preschool program will expand existing services provided by the Lorain City Schools in partnership with Head Start to serve more than 700 low-income children. In the past few years, Lorain City Schools has enhanced its preschool program by providing intensive professional development to teachers and a literacy-rich, research-based curriculum. As a result 81% of students who participate in the district's preschool program are academically prepared to enter kindergarten (NORAL assessment). Full funding for additional teacher staff, materials and transportation will enable the district to provide these high quality services for the majority of Lorain's preschool children. This program will improve the educational attainment and skill development of a generation. National research indicates that children attend preschool are more likely to do well both academically and socially as well as later in life. More than 64 jobs will be created. | ZIFTECH Inc. | 2 | 0 to 30 days | \$150,000.00 |
| Lorain | H&H Protectors (The Protector) | Lorain City Schools state assessment data reveal that on average 80% of kindergarten enter school each year academically unprepared and therefore require intensive academic interventions. District-wide, OAT and OGT scores indicate that more than 65% of students are below proficient in math, reading, science and social studies. Decades of research conducted by the U.S. Department of Education document that reducing class size improves student achievement. Therefore, Lorain City Schools will hire additional teachers so that the student teacher ratio in 80% of classrooms will be 15:1. Stimulus and Title I funds will be utilized to accomplish this goal. Specifically, district funds will be used to hire an additional twenty elementary teachers, thirty middle school teachers and fifty high school teachers. At the high school level, these additional teachers will support students who are struggling academically, as well as teach new courses designed to teach 21st Century workforce skills such as biomedical technology, computer physics, and forensic science. More than 100 jobs will be created. | H&H Protectors | 20 | 91 to 180 days | \$5,000,000.00 |
| Lorain | Elyria Police Department Staffing | Training for manufacturing in the Machine trades field of education. Jobs will seek for ZIFTECH Inc. to learn on the job skills. To prepare them for future jobs in this trade of employment at ZIFTECH Inc. or a new job. Cost estimation is for 1 year. | Elyria Police Department | 14 | 0 to 30 days | \$1,210,899.10 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Lorain | Elyria Police Department | Funding from JAG will allow the EPD to hire 14 officers & return to full staffing. More officers can then work with neighborhood and community groups to gather data on criminal and social activities within the community that have a direct impact on safety and violence crime issues. This same interaction allows the EPD and the city to pass information back to the members of the community. JAG Funding will allow the EPD to play a more active role in bringing community groups into closer contact with other City and social services by joining more officers in the community a position to act as liaisons between those community groups and the various governmental offices (city, county and state). The EPD will use the additional manpower allowed using JAG funding to renew and intensify our pro-active response to the citizens of Elyria and their needs. Having dedicated police officers in place is the only way that the EPD can accomplish that goal. The financial state that our economy presently is in causing that goal to falter. JAG funding is needed to help provide the police officers necessary to properly do what is best for the community. | Elyria Police Department | 14 | 91 to 180 days | \$1,127,481.70 |
| Lorain | Energy Efficiency Project | Replace three old 15 ton HVAC units on agency's main building, this will result in improved energy consumption resulting in annual savings that will be used to hire three additional staff. Current units are 10 to 20 years old and operating at less than 50% efficiency. Company is the Greater African American MBE Construction firm in northeast Ohio. | Lorain County Alcohol and Drug Abuse Services, Inc | 3 | 31 to 90 days | \$70,950.00 |
| Lorain | New Workforce | With the injection of cash, Brooks Concrete, Inc. will position itself to: • Bid on viable Government, Commercial and Public Construction projects to grow to a profitable company as it will have the bonding requirements and working capital needed to effectively bid on said projects. To date, the company has the proven skill set to successfully complete all projects exceeding the quality expectations and within given timelines and budget. Currently, Brooks Concrete has been bonded on bidding on profitable jobs as it cannot obtain the bonding requirements to bid. • Procure necessary, reliable equipment and transportation necessary to travel to projects within a 200 mile radius. Without adequate trailers, pump trucks and equipment, Brooks Concrete has been hindered on bidding on projects outside of a 25 mile radius for fear of equipment failure. Also, in order to fully abide by OSHA laws, a significant financial investment is required to beef-up safety equipment in order to comply. • Reduce the unemployment percentage in Lorain, Ohio by providing competitive salaries and hiring top quality skilled laborers and professional | Brooks Concrete Inc | 10 | 31 to 90 days | \$2,000,000.00 |
| Lorain | Alternative to incarceration Monitoring Program | The goals of the Alternative to Incarceration Monitoring Program (AIM) for the Lorain County Domestic Relations Court to reduce the number of non-violent youth detained in the Lorain County Detention Home (DH) and improve the level of their supervision in the community through the implementation of new offender monitoring system technologies. The purchase of 20 electronic monitoring units and 10 alcohol detection units will provide the Court with an alternative to incarceration as well as reducing the amount of time an offender is detained. This alternative to incarceration would translate into a saving of resources, provide increased space at the DH for more serious, violent offenders and would allow the Court to retain 1 full time and 2 part time positions. | Lorain County Domestic Relations Court | 3 | 31 to 90 days | 37,500 |
| Lorain | Student Training in Sensors and Microsystems | The Microsystems Industry has not developed adequate protocols to assess risk factors and failure mechanisms to enable reliability assessment in sensor systems. For reliability (and long-term) design is a critical aspect of Microsystems design services related to service, maintenance and various stages of the Microsystems' manufacturing, packaging, prototyping, and manufacturing process. While there are reliability standards can and should be applied to MEMS, progress is slow, inadequate and underemphasized in most research programs. Specifically targeting test and evaluation for design suitability. This proposed effort seeks to the utmost of the design and reliability through the development of a hands-on training program for youth. Students will participate in 12 week training program at the Microsystems Academy, testing and evaluation of sensors equipment at the Microsystems Academy located at the Entrepreneur Innovation Center in Lorain, Ohio. | Ohio MEMS Association | 15 | 31 to 90 days | 250,000.00 |
| Lorain | Youth Development and Child Care Training Center | Build new 10,000 sq community center to replace existing Horizon Center located 1.5 miles from site. New center will house licensed childcare for low income families as they work or train for new jobs. Science Technology Engineering and Math (STEM) training programs offered to youth and young adults. Children and young adults referred to displaced workers. Many area residents layoff workers. Need training and child care. Organization has site located and up to \$500,000 in capital reserve to invest in project. Organization has completed 4 similar projects in Lorain and Cuyahoga Counties, but with banks not lending, and cannot complete this project without help. Additional prevailing wage construction jobs will be created actual construction. Construction time is approximately 9 months. | Horizon Activities Centers | 150 | 91 to 180 days | 1,500,000 |
| Lucas | Sphere Energy | Sphere Energy has created a patented, Reductive Combustion Process (RCP) for the manufacture of SO ₂ -S ₂ (Sulfur). The RCP is a safe, patented "clean" process that creates no hazardous new materials or produces any such industrial waste. The process delivers a final product at a cost that is 65% less than the current, traditional, most efficient production methodology and can produce photovoltaic grade polysilica that requires 1/10th of the energy input of the current processes. This opportunity offers the perfect fit for Toledo and Northwest Ohio as the glass capital of the world combined with the largest Thin Film solar manufacturer in the world. Sphere's business model is broken down into three phases. First, the development of a pilot plant in Toledo. Toledo is competing with several other locations around the world. Second, a commercially feasible, mass production annual capacity of 1000 tons. Third, future expansion and growth. The initial pilot plant will cost \$5,000,000 and that is the request of the Federal Stimulus package. Next construction jobs, this project will initially create 10 new jobs. Job will pay approximately \$20 per hour with benefits. | Regional Growth Partnership | 18 | 0 to 30 days | \$5,000,000 |
| Lucas | AP Alternatives | AP Alternatives, a current tier 1 automotive supplier, was established for the purpose of enhancing the integration of solar and wind technology by designing, developing, manufacturing and marketing the processes, hardware and installation of equipment for large utility scale feed projects and smaller scale residential and commercial ground and mount solar and installations. The goal is to provide the mounting hardware, university to commercial, residential and utility scale roof and ground installations. AP Alternatives is seeking \$5,500,000 for mold tooling, equipment development and operator training. This project will create 30 jobs that will pay approximately \$28 per hour with benefits. | Regional Growth Partnership | 30 | 31 to 90 days | \$5,500,000 |
| Lucas | Jeep Parkway | The Port Authority has demonstrated its ability to acquire and redevelop former Brawfield sites. The oldest auto manufacturing property in the county has become available and the Port Authority is actively negotiating for its acquisition. This site is unique as it offers more than 100 acres served by important transportation assets. However, this site was used to manufacture autos for more than 100 years. As a result, there is a significant amount of testing and remediation that needs to be done to put the land back into the stream of commerce. The redevelopment of this site will offer the community much needed inventory to serve the growing market for clean industrial land. This market is characterized by alternative energy manufacturing companies. The request of the federal stimulus package will allow for the acquisition and remediation of the site in addition to removing a serious liability to Chrysler Corporation. | Toledo-Lucas County Port Authority | 1200 | 91 to 180 days | \$6,600,000 |
| Lucas | ASR Gassification | The traditional method to dispose of automobiles is to shred them. This process produces a byproduct called Auto Shredder Residue (ASR). This material is the remaining parts of the automobiles that cannot be separated and reused. As a result, ASR is disposed of in landfills. On a monthly basis, more than 70,000 tons of ASR is transported to northeast Ohio from other parts of the country and placed in landfills. Resource Reclamation has developed a process that is able to eliminate ASR. This process separates all remaining materials of value like metal and leaves only that material that can be put through a gassification process. This process produces synthetic gas that can be used to power a generator that in turn can make electricity. Resource Reclamation intends to construct a demonstration module that will marry an industrial gasifier and engine generator to the current recycling operation that will show how the synthetic gas can produce electricity. The total request is for \$5 million. Resource Reclamation has already invested more than \$20 million in this recycling operation in Toledo. | Toledo-Lucas County Port Authority | 40 | 0 to 30 days | \$5,000,000 |
| Lucas | Dr. Martin Luther King Jr. Plaza and Toledo Express | The Port Authority owns or manages two important public transportation related assets, the train station located in downtown Toledo and Toledo Express Airport located in western Lucas County. Both of these assets have tenants that are burdened by the high costs of utilities. An energy audit has recently been completed and the recommendations of that audit amount to \$60,000 for their implementation. These measures will not only reduce the financial burden to the Port's tenants but also make these public facilities more competitive with other competing sites. | Toledo-Lucas County Port Authority | 25 | 0 to 30 days | \$500,000 |
| Lucas | Fabrication Shop | The Port Authority owns 866 acre of real estate in a former industrial region of Toledo. This property offers tremendous redevelopment potential. On a small portion of this property, there are low rectangular buildings that are ideal for the development of a fabrication shop. Currently, there is a great demand for this type space. However, the subject buildings are in need of a complete rebuild in terms of a possible energy efficient site and a new energy efficient roofing system. The Port just lost a large project due to the poor condition of these assets. | Toledo-Lucas County Port Authority | 130 | 0 to 30 days | \$1,300,000 |
| Lucas | Seaport Crane and Reach Stacker Acquisition | While the existing cargo cranes at the Port of Toledo have been sufficient for handling "Traditional" bulk and break bulk cargo since the 1950's, they are aging and will need to be replaced or enhanced by the addition of new equipment suited for multiple purposes. Current crane capacity for container handling with existing cranes is twelve TEU/hour. Modern cranes have the ability to move 20-35 TEU/hour and up to forty swings per hour for bulk material handling. Modern cranes of this caliber are utilized at coastal ports but do not yet exist at major ports on the Great Lakes. Short Sea Shippers operating feeder services will require faster loading and unloading rates to keep services profitable, on schedule, and competitive. A new high speed crane and reach stacker at the Port of Toledo will enable job creation through the additional business that the port would be able to handle with modern equipment. Skilled longshoremen would be needed to operate the equipment along with additional labor for other associated operations. The new equipment in this proposal can significantly contribute to the improvement and modernization of Ameri | Toledo-Lucas County Port Authority | 20 | 0 to 30 days | \$6,800,000 |
| Lucas | GeoThermal Utility Project | An energy costs escalate many homeowners are having to absorb significantly higher energy costs. To help Lucas County remain competitive in terms of cost of living, the County has been investigating the use of a geo thermal demonstration project for residential homeowners. Part of the project would be funded through the Toledo-Lucas County Port Authority's financing programs. Essentially, homeowners would be given the opportunity to have a geo thermal installed in their homes and have one, predictable payment for their heating and cooling needs. | Lucas County Improvement Corporation | | 0 to 30 days | \$5,000,000 |
| Lucas | Central Power Plant | County government has identified the cost of heating and cooling its real estate assets in the downtown Toledo area as one of the main drains on its budget. This drive is the result of older, less energy efficient buildings. The County has designed and engineered a central power plant concept that would use bio fuel as an energy source. The concept is to not only reduce the expenditures on utilities but also to retrofit buildings that are currently in need of a heating and cooling upgrade as their current sources have outlived their useful life span. This central power plant concept would be consistent with northeast Ohio's goal of being recognized as the center for alternative energy. | Lucas County Improvement Corporation | 50 | 0 to 30 days | \$25,000,000 |
| Lucas | Willis B. Boyer Museum Ship Restoration | The S.S. Willis B. Boyer Museum Ship is in dire need of structural and aesthetic restoration. For nearly 20 years she has served her community as a platform for tourism and education. Yet, during this time she has experienced significant deterioration due to the inherent imperfections of ship construction. In order to ensure future success it is imperative that the vessel is placed in dry-dock for maintenance and repairs at the earliest possible opportunity. During this period she will undergo full inspection/repair, removal of hazardous materials, sandblasting, and painting, and emerge with a new lease on her calibrated and historic existence. The restoration of the S.S. Willis B. Boyer will create business for the newly re-opened Toledo Shipyard and labor opportunities for newly trained shipyard workers. Restoration will provide and increase tourism and regional economic growth leading to increased museum attendance and public education. Restoration will also significantly add to the aesthetic improvement of Toledo's waterfront and preserve a historic asset of the maritime trade which has served as the foundation of Toledo's economy for over a century. | Toledo-Lucas County Port Authority | 20 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Lucas | Toledo Shipyard Modernization | Horsham Marine Inc. operates the Toledo Shipyard through a lease agreement with the Toledo-Lucas County Port Authority. Horsham Marine would like to implement the following projects at the Toledo Shipyard to expand and modernize the facility. To expand the High Rise Building (add 300') to accommodate large conversions, wind tower construction and other large scale fabrication projects (ESM). To acquire essential equipment to handle and wind turbine construction projects including a plate roll, plate press machine and a plasma cutting table (ESM). To repair or replace the purpohouse, sea wall, and make gate improvements for additional shipbuilding capacity (ESM). These improvements would result in 100 jobs over the next several years and probably many more. Toledo has a proposed pending reauthorization for manufacturing and these will likely be many similar alternative energy related fabrication opportunities in the near future. As short sea shipping becomes a reality on the "north coast" there will also be opportunities to construct container barges or reef older vessels for container movements in addition to expanded traditional shipyard maintenance and repair work. | Toledo-Lucas County Port Authority | 100 | 0 to 30 days | \$15,000,000 |
| Lucas | Internship Network | This program is an internship network that will create 200-500 job annually and help with 2,500 job placements in 5 years. The \$5,000,000 would be distributed equally over a period of 5 years. Top college students would be matched, mentored and placed with employers. Investment of \$200,000 would be used to secure a larger facility with sufficient freezer space, purchase additional equipment to expand the production line, invest in higher inventory and accounts receivable due to substantially increasing sales volume, and to create and sustain 14 additional full time jobs with benefits. | Ohio IT Alliance | 2500 | 0 to 30 days | \$5,000,000 |
| Lucas | Hot Mama Foods Expansion | Storing frozen inventory on site would eliminate the energy costs of transportation from manufacturing to storage. The increased electrical cost would more than be offset by the savings of rent, which is currently being paid for offsite storage. Expanding production would allow for multiple efficiencies like larger product runs and lower downtime for cleaning and reset between product runs. Maintaining higher inventory levels will improve order fulfillment time, which also shortens invoicing and collection turnaround. Creating clean jobs for displaced factory workers in the Toledo area benefits the local economy. Reducing costs allows the company to maintain current price levels | Hot Mama Foods | 14 | 0 to 30 days | \$300,000 |
| Lucas | Acute Care Electronic Health Record | ProMedica Health System will implement a complete CCHT certified acute care electronic health record. This system will exchange clinical data with the ProMedica physician electronic health record and other CCHT certified systems. The acute care EHR includes bar coding, medication administration, clinical documentation, computerized physician order entry, computerized physician notes and decision support. The project will be implemented in 8 hospitals in Ohio. A Michigan starting with 3 hospitals (but coding & clinical documentation by 1/2012) and ending in 2/2012. Benefits include reduction of medication errors, reduction in patients length of stay, increased operational efficiency between all care givers and general access to electronic patient portal. Physicians will have access to the complete patient record electronically through a physician electronic portal. | ProMedica Health System (PHS) | 36.5 | 0 to 30 days | \$38,100,000 |
| Lucas | Robotics Training Center | The Toledo Hospital will establish a dedicated training center for robotics in northwest Ohio. The program under the leadership of Benjamin Martinez, MD, will have three objectives: Develop an centrally coordinated curriculum for training physicians to use robotics Establish a training center for physicians Use the training center as the foundation for research and development of new robotic equipment which will result in more than 100 jobs in other words start the surgical team before the job not on the job Dr Martinez is a nationally and internationally recognized vascular surgeon with over ten years experience in using the Endovascular surgery. The 6 week Robotics Training Program currently located on The Toledo Hospital campus cover Basic Skills, Basic Robotics and Advanced Robotics. The program will also be the foundation for research and development of minimally invasive surgical techniques. This project is a collaboration of an established companies and a university partner to enable significant advances in the development of lithium-ion battery technology for hybrid systems in the commercial truck market. The project will be completed in three phases: 1) Engineering and Validation (2009 - 2010), 2) Battery Pack Manufacturing (2011-4). Phase 1 will require the collaborators to work on proof-of-concept and demonstration of the battery pack technology, followed by design and process validation. Phase 1 is expected to require the creation of 31 engineering jobs. The estimated cost for the parties for Phase 1 is \$7 million. Phase 2 is expected to require the lease of 20,000 SF of space and the creation of 25 full-time jobs in the first year, and annual job creation in five years. The estimated capital investment for Phase 2 is \$3 million for machines and equipment and leasehold improvements. One of the company partners ("X Corporation") will be the customer of the battery packs that are produced, which will allow X Corporation's truck trip to achieve significant sales growth in the U.S. and other regions of the world. | ProMedica Health System | 20 | 91 to 180 days | \$2,587,550 |
| Lucas | Lithium-ion Battery Project | Phase 1 will require the collaborators to work on proof-of-concept and demonstration of the battery pack technology, followed by design and process validation. Phase 1 is expected to require the creation of 31 engineering jobs. The estimated cost for the parties for Phase 1 is \$7 million. Phase 2 is expected to require the lease of 20,000 SF of space and the creation of 25 full-time jobs in the first year, and annual job creation in five years. The estimated capital investment for Phase 2 is \$3 million for machines and equipment and leasehold improvements. One of the company partners ("X Corporation") will be the customer of the battery packs that are produced, which will allow X Corporation's truck trip to achieve significant sales growth in the U.S. and other regions of the world. | Duff & Phelps LLC | 60 | 0 to 30 days | \$10,000,000 |
| Lucas | Xunlight | Xunlight has reached in 2012 to commercialize high efficiency xenon/argon sodium color cells using a roll to roll manufacturing process. Xunlight's PV modules uniquely combine the stainless steel substrates that are flexible and lightweight with a triple junction structure that have low installation costs and a 10% stable efficiency rating. Because of the strong demand for PV not being currently satisfied by 6-8 products, Xunlight is perfectly positioned to meet and compete for that market share and raise Northwest Ohio's presence in the Solar Market. Xunlight has already raised more than \$30 million in private equity to complete its research and development pilot production facility and requires an additional \$10 million in debt funding to complete the construction of a 25 MW line. The Port Authority is requesting debt financing through the Northwest Ohio Bond Fund to provide up to \$10 million in fixed rate bond financing. This request for Federal Stimulus funds is to provide a credit enhancement in the form of a loan guarantee for the construction of the 25 MW production line. | Regional Growth Partnership | 148 | 0 to 30 days | \$10,000,000 |
| Lucas | Frame Books | The series covers 29 concepts drawn from the common themes found in many powerful, positive, self-development books and courses for adults. The concepts are taught in language and with examples that children can understand. The series targets 4 separate age groups: 2-7, 6-10, 9-12, 13-16. Independently publishing these books will bring this teaching to children and families quickly. To date, 14 of the books are written, the cover design is created, website design is begun, and the publishing company is established. Even parents and caregivers unfamiliar with positive thinking and empowerment can easily understand, learn and teach these concepts using the Frame Books. Adults who are familiar with Emotional-Social Intelligence (EQ), The 4 Agreements, The 7 Habits of Highly Successful People, The Secret, Landmark Education, or the Law of Attraction can use the books to teach their children the concepts they themselves have found so powerful! | Good Books for Children Publishing Company | 2.5 | 0 to 30 days | \$50,000 |
| Lucas | Acute Care Electronic Health Record | ProMedica Health System will implement a complete CCHT certified acute care electronic health record. This system will exchange clinical data with ProMedica physician electronic health record and other CCHT certified systems. The acute care EHR includes bar coding, medication administration, clinical documentation, computerized physician order entry, computerized physician notes and decision support. The project will be implemented in 4 of its 8 hospitals by January 2012. This phased in approach will have three hospitals with full coding and clinical documentation by April 2010. Benefits include reduction of medication errors, reduction in patients length of stay, increased operational efficiency between all care givers and patient access to electronic patient portal. Physicians will have access to the complete patient record electronically through a physician electronic portal. | ProMedica Health System | 36.5 | 31 to 90 days | \$38,100,000 |
| Lucas | Physician Electronic Health Record | ProMedica Physician Corporation a subsidiary of ProMedica Health System will convert all 208 Physicians from manual paper based system to Full Physician Electronic Health Record. This project will start in 30 days having 25 physicians converted by October 2009 and remainder by end of 2010. The software used is full CCHT certified and will exchange Electronic Health Information with other health care providers and systems, including ProMedica Acute Care Electronic Health Record. The project includes electronic prescription writing, voice recognition, physician order entry, physician decision support and the ability to query for quality. This benefits the physician by having patient's full history electronically in the patient's room. Supports the physician by medication interaction verification, along with clear concise prescription orders for the pharmacist; benefits the office by reducing paper flow, manual transcription and automatic billing; benefits patient by reducing the necessity to fill out paper forms. The patient will have access to their Electronic Health Record via secured patient portal. | ProMedica Health System | 8 | 31 to 90 days | \$2,500,000 |
| Lucas | Physician Electronic Record | ProMedica Physician Corporation a subsidiary of ProMedica Health System, will convert all 208 Physicians from manual paper based system to Full Physician Electronic Health Record. This project will start in 30 days having 25 physicians converted by October 2009 and remainder by end of 2010. The software used is full CCHT certified and will exchange Electronic Health Information with other health care providers and systems, including ProMedica Acute Care Electronic Health Record. The project includes electronic prescription writing, voice recognition, physician order entry, physician decision support and the ability to query for quality. This benefits the physician by having patient's full history electronically in the patient's room. Supports the physician by medication interaction verification, along with clear concise prescription orders for the pharmacist; benefits the office by reducing paper flow, manual transcription and automatic billing; benefits patient by reducing the necessity to fill out paper forms. The patient will have access to their Electronic Health Record via secured patient portal. | ProMedica Physician Corporation | 8 | 31 to 90 days | \$2,500,000 |
| Lucas | Radio Frequency Identification (RFID) | ProMedica Health System will implement Radio Frequency Identification (RFID) at its hospitals. The system will identify and track equipment, patients as they move throughout the hospital. Equipment will be tagged so that caregivers know exactly where it is located. Example: each floor has a specific number of medication pumps. If a care giver is looking for one, they may have to take time away from the patient to find an available pump. The system will automatically know where every pump is and what pump is open, giving the caregiver the location of the open pump. Benefit is the caregiver can spend more time delivering patient care, not looking for equipment. Patients can be monitored as they move to radiology or other departments in the hospital. Some equipment is small enough to be misplaced and thrown out by accident, increasing the cost of patient care. RFID will identify a specified person so they can locate the missing equipment and reduce purchasing replacement equipment. | ProMedica Health System | 3 | 31 to 90 days | \$500,000 |
| Lucas | The Toledo Hospital South Building Partial Demolt | The Toledo Hospital South Building Partial Demolition project entails the demolition of the floor six through nine and mechanical floor of a 600,000 sq. ft. extension of the building that will be necessary to replace the current facility in a three-story building. Architectural artifacts from the top will be salvaged and reinstalled. A demolition bid package has been completed and the project will start approximately seven months to finish. It is estimated that the demolition will result in a 1,621,543 square reduction in costs. | ProMedica Health System | 5 | 91 to 180 days | \$6,300,000 |
| Lucas | Northwest Ohio Sickle Cell Treatment Center | The Northwest Ohio Sickle Cell treatment Center will be a new service that provides comprehensive care to both adult and pediatric individuals with sickle cell disease. The center will be dedicated to the treatment of sickle cell disease, as well as maintaining and improving the quality of care. Currently, there is no center in Northwest Ohio that provides comprehensive treatment for sickle cell disease. Sickle cell disease is a genetic disorder in which most medical providers have little experience in treating. Creating a center will provide access to care, moving treatment that many times is occurring in the emergency room to a less expensive clinic site. | ProMedica Health System | 6 | 31 to 90 days | \$630,603 |
| Lucas | Radio Frequency Identification (RFID) | ProMedica Health System will implement Radio Frequency Identification (RFID) at its hospitals. The system will identify and track equipment, patients as they move throughout the hospital. Equipment will be tagged so that caregivers know exactly where it is located. Example: Each floor has a specific number of medication pumps. If a care giver is looking for one, they may have to take time away from the patient to find an available pump. The system will automatically know where every pump is and what pump is open, giving the caregiver the location of the open pump. Benefit is the caregiver can spend more time delivering patient care, not looking for equipment. Patients can be monitored as they move to radiology or other departments in the hospital. Some equipment is small enough to be misplaced and thrown out by accident, increasing the cost of patient care. RFID will identify a specified person so they can locate the missing equipment and reduce purchasing replacement equipment. | ProMedica Health System | 3 | 31 to 90 days | \$500,000 |
| Lucas | Asthma Education and Follow Up | Asthma is one of the most common disorders in children, and the incidence is higher in the low income poverty level population. Parental education is essential for compliance to the treatment regimen. ProMedica now provides that a coordinated asthma education program as part of primary care improves compliance and reduces emergency room visits and hospitalizations. This program would be coordinated by a registered nurse working with a respiratory therapist. Families would be offered individual or class education for medications, household triggers, and other asthma management information. The asthma staff would follow up with families to make sure appointments are kept as well as other assistance with questions. This program would be offered to a large primary pediatric clinic that has 90% Medicaid population. | ProMedica Health System | 2 | 31 to 90 days | \$110,080 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Bay Park Community Hospital Women's Services Expan | Bay Park Community Hospital (BPHC) is committed to providing services closer to the communities served in an effort to improve community access. A midwifery practice in Ottawa County is an example of this commitment. The midwifery practice is the only obstetric/gynecologic services in Ottawa County and reaches women in Erie and Sandusky Counties. The midwifery practice is comprised of a multidisciplinary team and provides education, prevention, screening and diagnostic services to women of all ages and socioeconomic levels. Care through the program affords women a direct referral and evaluation to specialty physicians as needed. The expansion of the midwifery practice will provide one stop access, meet the total health care needs of women, facilitate early identification of diseases that result in timely intervention and referral and improved health outcomes. | ProMedica Health System | 3 | 0 to 30 days | \$414,000 |
| Lucas | Robotics Training Center | TTH will establish a dedicated training center for robotics in northwest Ohio. The program under the Leadership of Bernardo Martinez, MD, will have three objectives: 1. Develop an externally credentialled curriculum for training physicians to use robotics; 2. Establish a training center for physicians; 3. Use the training center as the foundation for research and development of new robotic equipment which will result in more jobs for our region. Dr. Martinez is a nationally and internationally vascular surgeon with over ten years experience using robotic vascular surgery. The 6 week Robotic training program primarily located on The Toledo Hospital campus will cover Basic skills, Basic Robotics and Advanced Robotics. The program will also be the foundation for research and development of minimally invasive surgical technology. | ProMedica Health System | 20 | 91 to 180 days | \$2,587,550 |
| Lucas | Healthcare Workforce Development Program | ProMedica Health System, a not-for-profit serves 27 counties in NW Ohio and SE Michigan and is one of the largest employers with over 11,000 employees in 8 hospitals and 60+ outpatient facilities. A consistent shortage in several areas (currently ICU nurses and acute/nurse nurse roles) indicates a need to grow our own workforce (either dislocated workers or new grads). To develop a qualified and diverse healthcare workforce, PHMS will work with WOTC, public schools and local universities to inform teachers, guidance counselors and parents and their children (7th-12th grades) about the myriad healthcare employment opportunities in healthcare and educational requirements. PHMS and WOTC will partner to create a curriculum, video modules and companion Website as a resource for teachers and students to explore the industries, skills and training necessary to pursue a successful career in the 10 healthcare professions outlined. Programs will be distributed into the schools via an existing network, teacher/guidance counselor workshops and on an interactive Website. | ProMedica Health System (PHS) | 70 | 0 to 30 days | \$3,304,744 |
| Lucas | TCH Kids | TCH Kids is a 4 year old program of Toledo Children's Hospital, one of 6 hospitals & the tertiary care center for children in ProMedica Health System. The purpose of the program is to improve the health of children, aged 0-12, through improved diet and exercise. Kids are referred by physicians and school nurses. About 200 kids each year have gone through the program. Funding is requested to expand the program to 4 additional counties in NW Ohio. The program consists of a 10-week course attended by the child and parent where they learn about good nutrition and exercise. The courses are held in Family Resource Centers in the communities or at local hospitals. The expansion, if funded, will add 2 full time dietitians and 1 full-time exercise therapist as well as travel and supplies for the new counties. It is anticipated that the program will reach an additional 425 participants each year. | ProMedica Health System (PHS) | 3 | 0 to 30 days | \$183,799 |
| Lucas | Toward a Seamless Electronic Health Record | PHS committed \$16.7 million toward the infrastructure and transition to an acute care EMR, including \$3.3 million in hardware, \$14.6 million in software, and \$800,000 in construction. This \$1,200,000 request for additional funds is for the following: \$200,000 acute care EMR backup hardware for primary disaster recovery; \$100,000 Uninterruptable Power Supply (UPS) replacement for 3 locations; \$300,000 network upgrades at hospitals in Darke County and Seneca County; \$300,000 medical record system upgrade; \$100,000 network upgrade; \$100,000 DB-Traffic/VM; EMR to complete transition in the OB nursery. PHMS will save jobs by retaining existing resources that support this specialized technology. The project will also bolster the existing disaster preparedness plan and provide essential information on disaster hospital settings and community to ensure continuity of care in event of an emergency. | ProMedica Health System | 23 | 31 to 90 days | \$1,200,000 |
| Lucas | Clinical Documentation for Peri-operative Care | In order to modernize the health care delivery system within The Toledo Hospital's surgical services, we are ready to begin the phase of implementation of the Peri-operative documentation (electronic medical record clinical, which includes Pre-Operative, Intra-Operative Post Anesthesia Care List and Bar Coding within the Instrumentation and Supply Chain processing for surgical services. These changes will reduce medical and documentation errors and improve patient quality. Integrating these patient care events into peri-operative health system will maximize the delivery of quality patient care information amongst caregivers and eliminate duplicating patient information. This will lead to transcription errors, allergies, medications and procedure errors. Estimated cost of equipment, computer, and software is \$5.2 million. | ProMedica Health System | 2 | 91 to 180 days | \$5,200,000 |
| Lucas | Sugant Systems | Sugant is a company founded in 2006 under an exclusive licensing agreement with the University of Toledo and is involved in developing technologies for the sustainable and competitive production of cellulose ethanol using renewable biomass. Sugant has been awarded three grants worth \$1.4 million. Sugant's goal is to produce a facility that can manufacture 4000L/day (1000 gallons) of cellulosic ethanol. This facility will hire initially 30 professionals with a pay rate of \$55 per hour plus benefits. | Regional Growth Partnership | 30 | 0 to 30 days | \$13,500,000 |
| Lucas | Renovation of Patient/Employee Garages | Patients and employees of The Toledo Hospital and Toledo Children's Hospital have been using the north and south parking garages since the 1970s. The garages provide direct and covered access to the outpatient and inpatient services. In January 2008, TTH/CH opened the new 7-level, 50,000-square-foot hot bed tower. The completed facility includes 289 private adult and pediatric patient rooms, spacious visitor waiting areas, new state-of-the-art surgical intensive care and newborn intensive care units, a children's cancer center, a rooftop helipad and separate dedicated elevators for patients, visitors and hospital staff. The Jobs and Macintosh towers house 10 floors of outpatient clinic, physician offices and other health administration offices. The Education Center includes 11 conference rooms and an auditorium which community organizations reserve for their meetings. The thirty-year facility is in need of repairs, safety hazards include falling concrete and bursting drainage pipes. Changes within the financial markets have required this project to be placed on hold. | ProMedica Health System | 20 | 0 to 30 days | \$1,200,000 |
| Lucas | Renovation of Patient/Employee Garages | Patients and employees of The Toledo Hospital and Toledo Children's Hospital have been using the north and south parking garages since the 1970s. The garages provide direct and covered access to the outpatient and inpatient services. In January 2008, TTH/CH opened the new 7-level, 50,000-square-foot hot bed tower. The completed facility includes 289 private adult and pediatric patient rooms, spacious visitor waiting areas, new state-of-the-art surgical intensive care and newborn intensive care units, a children's cancer center, a rooftop helipad and separate dedicated elevators for patients, visitors and hospital staff. Changes within the financial markets have required this project to be placed on hold. | ProMedica Health System | 20 | 0 to 30 days | \$1,200,000 |
| Lucas | Wind Turbine Farm Facility #3 | The Port Authority owns and manages a Confined Disposal Facility (CDF) at the mouth of the Maumee River. The entire CDF is 3069 acres with more than 400 acres filled and 100 acres equipped with landfills. The CDF is adjacent to First Energy's Sandusky Power Plant which makes an ideal location for the installation of a wind turbine farm capable of producing more than 20 MW of electricity per year. The State of Ohio does not have any wind turbines on an adjacent to the coast of Lake Erie. The Port Authority is developing a business plan to build a wind farm, one of the largest wind farm developers in the country, to design and construct such a wind farm. In order to begin this process, the ODNR, Coastal Management and US Fish and Wildlife require a substantial amount of modeling and environmental impact studies. These studies will cost \$135,000 and will be critical to the development of wind turbines on the north shore of Lake Erie. Eurus has committed the necessary financial resources to the project pending the sourcing of the \$135,000. | Toledo-Lucas County Port Authority | 10 | 0 to 30 days | \$135,000 |
| Lucas | Red Lion | Red Lion Bio-Energy LLC has developed an integrated "thermolytic" process that produces a bio fuel degradable portable energy technology that utilizes multiple feedstocks (waste). This unique process is based on pollution prevention rather than pollution control and through the integration of several processes, allows for internal recycling of compounds that not only improves efficiency, but also produces a very clean "refined" gas that can be used as a power source. Red Lion has secured a \$1 million award to install a pilot plant. Red Lion is in need of funds to build a fabrication shop to construct the equipment that carries out this process. This shop will produce 48 positions at a salary range of \$23-28 with benefits. | Regional Growth Partnership | 46 | 0 to 30 days | \$12,000,000 |
| Lucas | Free Mammography Screenings | Due to restrictions, only 20% of eligible women are enrolled in Ohio's Breast and Cervical Cancer Screening Program resulting in a tremendous gap in accessible services for women with limited resources. As compared with the 76.7% Ohio rate of women who have had a mammogram in the past two years, the Lucas County rate is 47%. ProMedica Health System proposes to initiate a free mammogram program for women in Lucas County who lack resources to get a mammogram. Working through our community network, locations will be distributed at senior and community centers and health fairs. Family Medicine residents who regularly call at these centers will discuss the importance of having annual screenings. It is estimated that we can reach an additional 250 women each year. Funding is requested to pay for the mammograms (est. \$800 each), brochures and travel. | ProMedica Health System (PHS) | 0 | 31 to 90 days | \$297,000 |
| Lucas | Radio Frequency Identification (RFID) | ProMedica Health System will implement Radio Frequency Identification (RFID) at its hospitals. The system will identify and track equipment, patients as they move throughout the hospital. Equipment will be tagged so that caregivers know exactly where it is located. Example: Each floor has a specific number of medication pumps. If a caregiver is looking for one, they may have to take time away from the patient to find an available pump. The system will automatically know where every pump is and what pump is open, giving the caregiver the location of the open pump. Benefit is the caregiver can spend more time delivering patient care, not looking for the equipment. Patients can be tagged as they move to radiology or other departments in the hospital. Some equipment is small enough to be misplaced and thrown out by accident, increasing the cost of patient care. RFID will identify a specified person so they can locate the missing equipment and reduce purchasing replacement equipment. | ProMedica Health System | 3 | 31 to 90 days | \$500,000 |
| Lucas | Expansion of Goerlich Center | The Goerlich Center, located on the campus of Flower Hospital, is a long-term care facility serving patients with Alzheimer's Disease and Seniors. It was established in the 1990s. Currently, the facility has 48 beds and also provides a day care program to provide support for caregivers. There has been a noticeable increase in the number of people requiring services. There are currently 100 beds in the waiting list to get into the Goerlich Center. To help accommodate the need, funding is requested to expand the facility to 60 beds as well as increase the number of staff available to support the 60 and \$26,937 to hire 6 new positions, 3 aides, 2 RNs, and a licensed social worker. In addition, the construction will bring work to a lagging industry. | ProMedica Health System | 6 | 0 to 30 days | \$1,258,937 |
| Lucas | Michigan - Lafayette to Madison | Major arterial from the CBD which accesses I 75 and the Anthony Wayne Trail is seriously deteriorating, and requires rehabilitation. Project was previously fast reviewed with ODOT (PD# 85097, and is on the TMAOC TIP. Very needed project. | City of Toledo | 14 | 91 to 180 days | \$1,690,000 |
| Lucas | Collingwood Bridge over Swan Creek | Project plans are completed will need at least 90 days for ODOT to review and City to bid and award. Bridge in serious need of rehabilitation | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Helping Students establish a future | We are TONIGUY Hairdressing Academy. We are an elite hair dressing academy with a strong emphasis in hands on experience that help students to be well equipped to enter the exciting world of cosmetology. With the tightening of our student loans, many are being laid off. We are willing to finance 20% of tuition cost at NO INTEREST if we are awarded this stimulus money in order to help students. We are looking forward to partnering with this stimulus program in order to train the many eager students who are having financial difficulty. | TONI&GUY Hairdressing Academy | 15 | 0 to 30 days | \$350,000 |
| Lucas | Rowdway Preventive Maintenance | Place overlays on major arterial streets throughout the city that will extend their useful life. Plans are 95% complete | City of Toledo | 16 | 91 to 180 days | \$2,000,000 |
| Lucas | Crabb Rd. Bridge over Shantee Creek | Project plans are 95% completed. Project will rehab a deteriorated bridge in west Toledo | City of Toledo | 6 | 91 to 180 days | \$550,000 |
| Lucas | Crabb Rd. Bridge over Shantee Creek | Project plans are 95% completed. Project will rehab a deteriorated bridge in west Toledo | City of Toledo | 6 | 91 to 180 days | \$550,000 |
| Lucas | Lucas County Single Stream Recycling material recy | Lucas County Single Stream Recycling material recovery facility (RRF). This facility would be constructed at the new Lucas County Solid Waste Management District offices on 1111 Metzger Rd in Toledo, Ohio. This would include a subgrantee partnership to increase recycling in the Toledo area and limit the amount of waste that enters our landfills. The Board of County Commissioners (also Board of Directors for the Solid Waste Management District) have received proposals and are currently negotiating with a RRF provider and processor. We believe this would be an ideal project to create jobs, stimulate the economy and address a very critical need in Lucas County. | Lucas County, Ohio | 25 | 91 to 180 days | \$10,000,000 |
| Lucas | Hill - Westwood to Detroit | Project rehabilitates an unimproved arterial roadway in the city of Toledo. This section of Hill Ave. will provide access for a proposed intermodal hub to be located at Arline Yard, and also serves the Scott park campus of the university of Toledo. | City of Toledo | 18 | 91 to 180 days | \$2,200,000 |
| Lucas | Brownstone Improvements | Project rehabilitates pavement in a commercial area of the City near the Southwick mall. | City of Toledo | 10 | 91 to 180 days | \$1,246,000 |
| Lucas | Cheyenne Blvd. Improvements | Rehabilitates pavement on a street adjacent to Southwick mall, which is planned for redevelopment. Pavement base failure necessitates this work as soon as possible. | City of Toledo | 11 | 91 to 180 days | \$1,283,000 |
| Lucas | Champion Street Bridge over Swan Creek | Plans are 100% complete, but need ODOT review, then bidding and award. Bridge in dire need of rehabilitation | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Nursing Technology Project | This project will strengthen the education of students and provide them with a competitive edge in the workforce. Advancement in technology, instructional resources, and equipment upgrades for the nursing program will build the capacity of Lourdes College faculty and provide students with a comprehensive nurse education experience. In return, Lourdes is able to address nursing shortages (and nurse faculty shortage) by gaining primary healthcare providers for the northwest Ohio region. 94% of Lourdes College graduates work, live and volunteer in the community. | Lourdes College | 100 | 0 to 30 days | \$657,300 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Lucas | e-Learning Initiative | e-Learning is the use of technology to deliver an education to students. The purpose of technology in education is to make the process of educating students more efficient. Technology promotes collaborative, inquiry-based learning while streamlining administrative and operational functions. An online student support services environment will diversify student learning opportunities by delivering a comprehensive educational experience available to practitioners in the community. e-Learning is targeted at the 2,200 Lourdes College students in which 94% of our graduates live and work in this community impacting the quality of life and the economic stability of the region. | Lourdes College | 250 | 0 to 30 days | \$700,000 |
| Lucas | City of Toledo Wheeling Avenue Sewer Separation | Construction of sewer separation improvements in the Wheeling Area to reduce combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. The project is to construct a 2 MW solar project on an industrial brownfield site and sell the energy to the industrial client and also enter into a net metering arrangement with First Energy. | ARCADIS | 224 | 0 to 30 days | \$4,485,000 |
| Lucas | Hull Solar | The project will use Ohio made First Solar panels and will also use Ohio labor for construction. All ongoing maintenance, accounting, and billing jobs will also be Ohio based. This will be the largest solar project to date in the State of Ohio. It will support First Solar's expansion of their facility in Toledo and will use about 1% of the total annual production capacity of the plant. The project is ready to move forward pending the final rules from the PUCO on the implementation of SB211 relative to renewable energy credits. | Hull & Associates Inc. | 35 | 31 to 90 days | \$3,500,000 |
| Lucas | City of Toledo Ash Street Sewer Separation | Construction of sewer separation improvements in the Ash Area to reduce combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. | ARCADIS | 414 | 0 to 30 days | \$8,280,000 |
| Lucas | City of Toledo Highland Sewer Separation | Construction of sewer separation improvements in the Highland Area to reduce combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. | ARCADIS | 270 | 0 to 30 days | \$5,405,000 |
| Lucas | Dist 2, PID 84407, LUC SR 2 9 R83 EB lanes reconfig | Project To Revise The Traffic Control Plan On Eastbound Sr-2 (Airport Hwy) From Spring Meadows East Dr To Sb I475 Signalized Intersection To Improve Lane Utilization. | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Lucas | City of Toledo Knapp & Williams Inflow Reduction | Construction of sewer improvements to reduce infiltration and inflow that contribute to combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. | ARCADIS | 92 | 0 to 30 days | \$1,840,000 |
| Lucas | City of Toledo New York Inflow Reduction | Construction of sewer improvements to reduce inflow that contributes to combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. | ARCADIS | 75 | 0 to 30 days | \$1,495,000 |
| Lucas | City of Toledo Wooddale Inflow Reduction | Construction of sewer improvements to reduce inflow that contributes to combined sewer overflows. This high priority project is part of the \$500 million ongoing Toledo Waterways Initiative program designed to improve the water quality of Lake Erie and local rivers and streams. | ARCADIS | 230 | 0 to 30 days | \$4,600,000 |
| Lucas | Dist 2, PID 25528, LUC IR 75 5.10 Prev Maint | Priority System Preventive Maintenance Project On Luc-75 From About Us-24/Collingswood, Near Phillips Ave. To Cecilia, Perform Necessary Related Work. | Ohio Department of Transportation | 14.4 | 31 to 90 days | \$500,000 |
| Lucas | Dist 2, PID 25555, WOO/LUC IR75 32.6/0.00 Brdg Ovl | Hydrodemo The Existing Wearing Course And Overlay With Micro-Silica. | Ohio Department of Transportation | 292.7 | 31 to 90 days | \$10,200,000 |
| Lucas | Dist 2, PID 85633, LUCtoledo Shipyard Modernizatio | City of Toledo Shipyard Modernization - The project involves adding 300 feet to existing High Bay building for barge conversions, production of wind towers and opportunities in the future with increased emphasis on alternative energy. Purchasing of essential equipment for barge and wind projects (spare roll and glass presses machines, plasma cutting tables) are part of the project. Also improvements will be made in the pump house, sea wall, gate improvements for additional shipping capacity. | Ohio Department of Transportation | 430.5 | 31 to 90 days | \$15,000,000 |
| Lucas | Secor Rd. Improvement, Monroe to Laskey | Project rehabilitates and resurfaces the pavement on an urban arterial located in the northwest portion of the City. Project plans are 100% complete. ODOT review and internal bidding process should be completed in just over 90 days. | City of Toledo | 37 | 91 to 180 days | \$4,500,000 |
| Lucas | Citywide Traffic Signal LED's | Project converts existing incandescent traffic signal light bulbs to energy efficient LED bulbs. Project will promote safety while also saving energy. | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Southwick Blvd. Improvements | Project will rehabilitate pavement adjacent shopping mall which is primed for redevelopment. Pavement is in extremely poor condition. | City of Toledo | 32 | 91 to 180 days | \$4,000,000 |
| Lucas | Computer System Upgrade | Upgrade of the City's computer system infrastructure: (1) public data storage - overview to accommodate video, photo, scans, and case management data; (2) email and archiving solution; (3) email system upgrade; (4) server replacement; (5) wireless connection between the mobile police units and the network; (air cards); (6) internet bandwidth usage and traffic control. The project will allow the City to meet the growing needs of the safety forces requirements for data storage and their communications needs. | City of Toledo | 30 | 31 to 90 days | \$1,127,000 |
| Lucas | Dist 2, PID 25528, LUC IR 75 5.10 Prev Maint | Priority System Preventive Maintenance Project On Luc-75 From About Us-24/Collingswood, Near Phillips Ave. To Cecilia, Perform Necessary Related Work. | Ohio Department of Transportation | 14.4 | 31 to 90 days | \$500,000 |
| Lucas | Dist 2, PID 85633, LUCtoledo Shipyard Modernizatio | City of Toledo Shipyard Modernization | Ohio Department of Transportation | 430.5 | 31 to 90 days | \$15,000,000 |
| Lucas | Dist 2, PID 25555, WOO/LUC IR75 32.6/0.00 Brdg Ovl | Hydrodemo The Existing Wearing Course And Overlay With Micro-Silica. | Ohio Department of Transportation | 292.7 | 31 to 90 days | \$10,200,000 |
| Lucas | South Ave. Daniels to Spencer | Fully rehabilitated pavement in need of rehabilitation on local's south side. | City of Toledo | 9 | 91 to 180 days | \$330,000 |
| Lucas | South Ave. - Detroit to Airport | Fully rehabilitated pavement in need of rehabilitation. This street is one of the main arteries into the downtown area. | City of Toledo | 6 | 91 to 180 days | \$620,000 |
| Lucas | Matzinger Rd. - Lint to Enterprise | Pavement on major industrial arterial in the northern part of the city is in need of rehabilitation. Pavement is in extremely poor condition, which would negatively affect deliveries to and from the City's primary industrial park area. | City of Toledo | 14 | 91 to 180 days | \$1,700,000 |
| Lucas | Road sign upgrades | roadway signs on major major arterials are badly faded, and in some cases non reflective at night. This project which had plans already well developed, is intended to upgrade regulatory as well as guide signs. | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Road sign upgrades | roadway signs on major major arterials are badly faded, and in some cases non reflective at night. This project which had plans already well developed, is intended to upgrade regulatory as well as guide signs. | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Dist 2, PID 25528, LUC IR 75 5.10 Prev Maint | Priority System Preventive Maintenance Project On Luc-75 From About Us-24/Collingswood, Near Phillips Ave. To Cecilia, Perform Necessary Related Work. | Ohio Department of Transportation | 14.4 | 31 to 90 days | \$500,000 |
| Lucas | Sidewalks Raised by trees | The City maintains responsibility to repair sidewalks located within the public right of way that have been broken or raised by tree roots. Currently there is a 5 year backlog of complaints. Funding this project would essentially replace step back basins, and would provide safe pedestrian access through our community for children and joggers. | City of Toledo | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Dist 2, PID 25555, WOO/LUC IR75 32.6/0.00 Brdg Ovl | Hydrodemo The Existing Wearing Course And Overlay With Micro-Silica. | Ohio Department of Transportation | 292.7 | 31 to 90 days | \$10,200,000 |
| Lucas | Collingwood Resurfacing - Monroe to Cherry | Rehabilitation of Collingwood Boulevard by resurfacing, along with some reconstruction as required. Pavement is in very poor condition. Project is under 10% done. From Reynolds to Holland Divisions. Project is already in respect of Ohio DOTIC funding, so will be funded locally through ODOT of approximately \$5,000,000. ODOT PID is 75578. | City of Toledo | 12 | 91 to 180 days | \$1,476,000 |
| Lucas | Hill - Reynolds to Holland Sylvania | Project is already over 10% completed through ODOT and TMACOG in the approximate amount of \$300,000.(PID 80510). The \$100,000 would complete the funding on this project. | City of Toledo | 52 | 31 to 90 days | \$4400,000 |
| Lucas | Glendale-Byrne to Charmaine | Project is already over 10% completed through ODOT and TMACOG in the approximate amount of \$300,000.(PID 80510). The \$100,000 would complete the funding on this project. | City of Toledo | 5 | 91 to 180 days | \$100,000 |
| Lucas | Telegraph Rd. Urban Paving | Project rehabilitates poor pavement on Telegraph Rd. | City of Toledo | 5 | 91 to 180 days | \$215,000 |
| Lucas | Detroit Ave. Urban Paving | Project has already received some state funding through ODOT (PID 83586). Stimulus funding would satisfy the local match for this project. Resurfacing Detroit Ave. is needed. The ODOT has already agreed to supply approximately \$800,000 in state urban paving funds to assist with this project. Stimulus funds desired to pick up the remaining local match. | City of Toledo | 8 | 91 to 180 days | \$500,000 |
| Lucas | Secor Roar right of way | Project is funding for this widening project is in place via ODOT PID 75578. Construction to widen Secor and improve safety via geometric revisions is planned for 2010. RWY is being acquired in 2009. However. | City of Toledo | 9 | 181 days or more | \$354,000 |
| Lucas | Secor Roar right of way | Project is funding for this widening project is in place via ODOT PID 75578. Construction to widen Secor and improve safety via geometric revisions is planned for 2010. RWY is being acquired in 2009. However. | City of Toledo | 9 | 181 days or more | \$354,000 |
| Lucas | Library Improvement Project | The project is a long-term solution to provide a suitable learning and research environment to students, to preserve rare books and to upgrade educational facilities with energy efficient materials and equipment. Lourdes enrollment has reached over 2,200 students while still offering 110:1 student faculty ratio. This is particularly significant considering that 80% of our students are first-generation college students, 40% are low income, and 25% percent are minority. 94% of Lourdes College graduates stay in Ohio, strengthening our work force and quality of living. The Toledo Children's Hospital plans to provide a clinical facility to provide the first step in early assessment, intervention and support services for autism spectrum disorder through a multi-centered collaborative effort, utilizing multi-disciplinary care providers. The prevalence of autism is currently 1 in 150 children, with approximately 24,000 children born annually with some form of autism. The Autism Center for Clinical Excellence will provide a clinical triage site to ensure early diagnosis and appropriate intervention. Total Project costs include equipment, space and salaries to implement to project. | Lourdes College | 25 | 31 to 90 days | \$600,000 |
| Lucas | Autism Center for Clinical Excellence | The Toledo Children's Hospital plans to provide a clinical facility to provide the first step in early assessment, intervention and support services for autism spectrum disorder through a multi-centered collaborative effort, utilizing multi-disciplinary care providers. The prevalence of autism is currently 1 in 150 children, with approximately 24,000 children born annually with some form of autism. The Autism Center for Clinical Excellence will provide a clinical triage site to ensure early diagnosis and appropriate intervention. Total Project costs include equipment, space and salaries to implement to project. | Promedica Health System | 6 | 91 to 180 days | \$518,000 |
| Lucas | Fields of Green | Fields of Green will purchase a Mobile Market vehicle for ProMedica. To provide fresh produce and nutritional products from local Farmers Market and local-area neighborhood and neighborhood housing complexes, advise producers of market needs in highest and most accessible low. The Market will accept EBT cards, provide health screenings, recipes, meal plans, and cooking demonstrations, and will educate and engage individuals in good nutrition and physical activity through interactive learning maps. The maps will also be used to hold education sessions at local before/after school programs, community centers, and YMCA's. | Promedica Health System | 3 | 0 to 30 days | \$360,000 |
| Lucas | Worker Safety Program | The Toledo Hospital will reduce employee injury and its consequences in lost productivity and increased healthcare costs by purchasing specialized safety equipment used to move patients who are not ambulatory. An average of 62 employees were injured each year from 2005 through 2008 at The Toledo Hospital in the movement of patients. Each of these injuries costs an average of \$80,000 in health care costs and lost productivity for a total cost of \$4,200,000 (US Dept. of Labor) in addition to the pain and suffering of individual workers and the loss of financial security for families and their families. The consistent use of lifting and repositioning devices has been demonstrated to reduce the incidence of caregiver injury (Nelson, 2006). With stimulus funds, the hospital will immediately purchase active and passive patient transfer systems and devices, a lateral transfer device, and other related equipment. | The Toledo Hospital | 0 | 0 to 30 days | \$323,290 |
| Lucas | Toward a Seamless Electronic Health Record | PHS committed \$18.7 million toward the infrastructure and transition to an acute care EMR, including \$13 million in hardware, \$14.6 million in software, and \$800,000 in construction. This \$1,200,000 requires additional funds for the following: \$200,000 in acute care EMR hardware for primary disaster recovery in 3 Lucas County hospitals; \$100,000 Uninterruptible Power Supply (UPS) replacement for 3 Lucas County hospitals to maintain safety for patients and meet increasing capacity needs for disaster recovery; \$100,000 in health care equipment at hospitals in Defiance County and Seneca County; \$300,000 medical residency program equipment to meet EMR requirements; and \$200,000 for The Toledo EMR in complete electronic transition in the OB history. PHS will work with by retaining approximately \$100,000 to build and support this specialized technology. The project will also bolster the existing disaster preparedness plan and provide essential interconnection between hospital setting and community to ensure continuity of care in event of an emergency. | Promedica Health System | 23 | 31 to 90 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Dist 2, PID 85547, TARTA 10 - <30 Ft Buses ADA Par | TARTA - 10 -<30 foot buses ADA Paratransit (Replacement) | Ohio Department of Transportation | 38 | 31 to 90 days | \$2,250,000 |
| Lucas | Dist 2, PID 85551, TARTA - 7 REPL. Serv Supp Vehcl | TARTA - 7 Replacement Service Support Vehicles | Ohio Department of Transportation | 4 | 31 to 90 days | \$210,000 |
| Lucas | Renovation of Existing Schools | Seven School Buildings are scheduled for renovation with Bond money supported by voters. The additional stimulus money would mbe used to provide complete renovations for these schools including LEDS silver designs and technology. The number of construction jobs would be needed much larger as these renovations would use various trades at various times. | Toledo Public Schools | 300 | 91 to 180 days | \$25,000,000 |
| Lucas | Technology Upgrades: Hardware, Software, Training | Additional funds would make these renovations complete versus only providing upgrades and would complement our other building programs. The district is exploring adding a new operating system and software upgrades to bring our district wide system up to current and future standards. Included in this cost is a complete software systems with a one time cost of \$1.2 million. additional hardware systems include upgraded computers, servers, phone upgrades, security systems for schools including radio access for buses and GPS systems to monitor buses and various system hardware improvements, and training for employees to integrate the new systems. | Toledo Public Schools | 50 | 31 to 90 days | \$6,700,000 |
| Lucas | Alternative Energy Retrofitting of School Building | The district can provide training facilities and professional development funds but these additional dollars will allow for immediate upgrades rather than gradual upgrades that are based on available funds. Our Schools have been either rebuilt or are in the process of being rebuilt or renovated but the money was not available to make the schools less reliant on traditional energy use. With this proposal schools could be retrofit to incorporate alternative energy sources including wind, solar, ground water heat pumps and other alternative sources. The types of alternative energy sources would be customized to fit the schools designs, locations, and accessibility and could be used not only to reduce energy use but to be a model for educating students about these alternative energy sources. Wind turbines producing 90 kilowatt cost \$225,000 with a 15 year payback. Solar Photovoltaic panels cost \$200,000 per 1 Kilowatt with costs estimates of approximately \$1,000,000 per high school with a 40 year payback. Ground water heat pumps would have a reduced payback period and would cost approximately \$300,000 per elementary school. All of these are estimates from our architects who have assisted us in designing our buildings. For existing buildings these could be nearly met in 60 - 90 days. | Toledo Public Schools | 150 | 91 to 180 days | \$15,000,000 |
| Lucas | BAX Global Expansion | BAX Global would like to implement the following projects to expand their air cargo operation at Toledo Express Airport: A new 100,000 sq ft terminal on the west end of the existing building, the addition of a cross dock facility and bulk truck dock, and the relocation of existing U.S. facilities from the existing Sorting Facility to an area in the Logistics Facility. Based on the strategic plans for the Toledo Express Airport, the following increases in volume through their Toledo Hub: (2) Asia 747 flights twice a week, (1) Latin America MD80 flights twice a week, (2) line haul truck increases through Toledo. With the existing facilities, BAX would increase cargo capacity by 100,000 lbs per week which would require 40 full time equivalent positions for a 7 day a week operation. The economic impact of these projects is roughly \$1.7 million a year in payroll, not including increases in construction, customs, and other job creation opportunities BAX has seen in their expansion work being. | Toledo-Lucas County Port Authority | 40 | 0 to 30 days | \$6,982,996 |
| Lucas | Heller & Finzel Road Mill & Resurfacing Project | Mill and resurface 1.6 miles of village roadway | Village of Whitehouse, Ohio, | 0 | 0 to 30 days | \$175,000 |
| Lucas | Dredging Ottawa River from Suder Ave. to the Mouth | The Ottawa River needs to be dredged from Suder Ave. to the mouth of the river (Lake Erie). The Corp. of Engineers have a plan to dredge from Suder to the mouth of the river. 100' wide 5' deep from LWD. This project would help the entire area of Point Place, Toledo for summer recreation. The river is so shallow now, boats cannot use it. In the past money has been allocated and needed projects from several areas connected, but the Bush years and now balancing the budget have come first. Dredging this river would have a very big beneficial impact for this area. Thank you for reading this message, Jim Meyer | Point Place , Toledo | 100 | 91 to 180 days | \$10,000,000 |
| Lucas | Mobility Alliance of Northwest Ohio Regional Capit | 1. AUTOMATED CALL BACK SYSTEM—These funds will be used to purchase scheduling software to notify paratransit passengers (TARPS) by phone when their vehicle is close to being arrived at the designated pick up location. This will benefit paratransit riders by easing their worries about missing a bus, not being able to see a bus, or having to wait in an area where they are not comfortable due to personal or nature safety concerns. Cost: \$80,000 2. TRAVEL TRAINING EQUIPMENT—These funds will be used to purchase necessary capital items to open a Travel Training Center to assist all available persons by working with many agencies and institutions to assist those in need of travel training of all available modes. Cost: \$50,000 3. CALL CENTER EQUIPMENT—These funds will be used to purchase necessary capital items to open a Call Center to assist all available persons by working with many agencies and institutions to assist those in need of information of all available modes. Cost: \$50,000 4. REGIONAL FACILITY—These funds will be used to purchase or lease a facility and retrofitting to house the not-for-profit organization, travel training and call centers. Cost: \$30,000 | Mobility Alliance of Northwest Ohio | 10 | 181 days or more | \$500,000 |
| Lucas | Wastewater Trunk sewer inspection and cleaning | The Lucas County Wastewater trunk sewer was constructed in the early 1970s. The trunk sewer serves all of western Lucas County, including Maumee, Sylvania, Waterville and Whitehouse. The trunk wastewater line is over ten miles long and ranges in size from 54 inches to 90 inches in diameter. There are three inspection on the trunk they need to be inspected and cleaned along with the entire trunk line. We have the specifications prepared and ready to advertise. This project will provide a complete asset management evaluation with recommendations on how to repair or rehabilitate the trunk sewer. | Lucas County | 20 | 91 to 180 days | \$500,000 |
| Lucas | Harbor View Waterline No. 209 Replacement | The Village of Harbor View waterline was installed almost 75 years ago and is deteriorating rapidly. The Lucas County Sanitary Engineers office has responded to numerous emergency water main breaks in recent years and made repairs to the main. The replacement project is a low income household area and any interruption to the households will impose a financial hardship. | Lucas County | 20 | 91 to 180 days | \$381,400 |
| Lucas | Fuller's Creekside Sanitary Sewer Evaluation Study | The Lucas County Fuller's Creekside Sanitary Sewer Evaluation Study (SSES) will provide an investigation of the infiltration and inflow. We presented a package plan in the early 1990s by installing a pumping station (Pump) at Fuller's Creekside pumping station that ultimately discharges to the Toledo Bayview Wastewater Treatment Plant. The age of the system is such that the wastewater collection system has stormwater entering at multiple locations. This is evident by the large volume of water that is pumped by the Fuller's Creekside pumping station during and immediately following rain events. We believe the SSES will result in findings and recommendations on how to remove the stormwater from being treated at the wastewater treatment plant along with elimination of sanitary sewer overflows due to the significant loadings that occur during wet weather periods. | Lucas County | 2 | 91 to 180 days | \$50,000 |
| Lucas | Wastewater Trunk sewer repairs/rehabilitation | The Lucas County Wastewater trunk sewer was constructed in the early 1970s. The trunk sewer serves all of western Lucas County, including Maumee, Sylvania, Waterville and Whitehouse. The trunk wastewater line is over ten miles long and ranges in size from 54 inches to 90 inches in diameter. This project will be a follow up to the inspection of the trunk wastewater line and implementation of necessary repairs and rehabilitation of the trunk sewer. | Lucas County | 40 | 181 days or more | \$1,000,000 |
| Lucas | Wastewater Treatment Plant Solids Handling Improve | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the purchase and installation of a new scroll centrifuge to replace the existing belt filter press for sludge dewatering. The filter press was installed in 1984 and at the end of its useful life without an extensive overhaul investment. A new scroll centrifuge will be needed for increased production capacity to reduce run times and result in more efficient biosolids cake. | Lucas County | 37 | 31 to 90 days | \$600,000 |
| Lucas | Wastewater Treatment UV Modules Installation | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the installation of new Trojan 4000 ultraviolet (UV) modules in existing open tanks to enable West Plant to disinfected treatment flow greater than 15 MGD during storm events. The work includes the installation of four UV modules and control system programming. The result will allow us to treat higher flows being discharged to the Maumee River during wet weather events. | Lucas County | 8 | 31 to 90 days | \$145,000 |
| Lucas | Wastewater Treatment Clarifier Equipment replaceme | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the mechanical overhaul of the original two first clarifiers for the East Plant installed in 1976, and replacing the motorized weirs in the final clarifier installed in 1996. The mechanical equipment on the 1976 clarifiers has lasted 10 years longer than their projected life. The original mechanical and structural equipment, including the catwalk bridge, head stand pipe, scraper assemblies, suction tube, motor systems, boom baffles, and weirs will need to be replaced. | Lucas County | 48 | 91 to 180 days | \$800,000 |
| Lucas | Wastewater Treatment Grit Chamber Replacement | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. The inspection of the grit removal scraper, auger, and aeration header in the Spring of 2008 showed extensive wear and corrosion on the mechanical equipment and piping. The original equipment, installed in 1976, needs to be removed and replaced with new aeration drop legs & diffusers, a new grit collection scraper assembly, and a new bucket removal conveyor. | Lucas County | 8 | 31 to 90 days | \$140,000 |
| Lucas | Wastewater Treatment WAS Pump Replacement | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the installation of new Ingersoll Rand sludge pumps, associated piping modifications, and new controls for the East Plant Aeration Sludge Process. Currently, the East Plant feeding is manually accomplished on a batch basis via a gravity flow to a drainage sump. The new pump installation will pump the WAS from the East RAS channel to the East Plant Primary Clarifiers, eliminating the use of the drainage sump. | Lucas County | 7 | 31 to 90 days | \$90,000 |
| Lucas | Wastewater Treatment Odor Control Improvements | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the installation of odor control equipment to reduce the offensive emissions from the treatment plant. This project includes evaluation and ranking of potential odor sources as well as implementation, and installation of equipment used to reduce odor emissions from the facility and reduce corrosion of plant equipment. | Lucas County | 80 | 91 to 180 days | \$2,000,000 |
| Lucas | Wastewater Treatment Electrical/Energy System Impr | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project will increase the amount of digester gas co-generated (identically) for use on-site at the plant. Presently, the facility is not utilizing the methane gas produced by the anaerobic digesters. Electrical infrastructure improvements are necessary to enable the plant to use the remainder of the gas and produce additional electricity at the plant. | Lucas County | 50 | 91 to 180 days | \$1,500,000 |
| Lucas | Wastewater Treatment SCADA System Improvements | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the upgrade of the existing PLC network from Omron to Ethernet compatible. The PLC's are not Ethernet compatible and will need an additional card and hardware to bring system to reasonable and reliable speeds for efficient plant operations. | Lucas County | 2 | 31 to 90 days | \$65,000 |
| Lucas | Wastewater Treatment East Effluent Flume Rehabilit | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the repair of the East Flume flume structure to eliminate raw sewage contamination of the final effluent flume. The flume, originally constructed in 1977, will need to have joints sealed or the two high pressure flumes fixed to prevent raw wastewater from entering the final effluent. This project will help protect the Maumee River. | Lucas County | 2 | 31 to 90 days | \$50,000 |
| Lucas | Wastewater Treatment Generators for Aeration Blower | The Lucas County Wastewater Treatment Plant provides service to western Lucas County as well as Holland, Maumee, Sylvania, Waterville and Whitehouse. This project is for the installation of additional power generators for the aeration blowers in each the East & West Treatment Plants. Under the current power generation scheme, both the East & West Plants do not have sufficient backup generation power to operate the air blowers. Therefore, an extended power outage will have a large impact on the treatment efficiency of the secondary treatment processes. This project will help ensure protection of the effluent discharged to the Maumee River. | Lucas County | 29 | 91 to 180 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lucas | Toledo Express Airport Intermodal Cargo Hub Expans | The TLCPA is requesting funding assistance for the expansion of the existing Intermodal Cargo Hub located at the Toledo Express Airport (TOL) in order to retain BAX Global and allow for the expansion of its operations. BAX does not have the necessary facilities to complete at this location. It would previously close or move its operations to Memphis or Louisville. TOL currently has 30 businesses operating at the airport that provide more than 2,750 jobs and generates an estimated annual payroll of approximately \$198.1 Million. TOL provides a \$640 million annual economic impact to the community. Of 702 jobs at TOL, 1,100 are jobs at TOL, 1,100 are jobs at TOL, 1,100 are jobs at TOL. 20 jobs are provided by U.S. Customs and 849 are jobs provided by the project beneficiary, BAX Global. If BAX closes its operations, TOL would be in jeopardy of closing its public operation. The proposed project includes the construction of a 100 x 134' Cross Dock facility with a canopy roof connecting the proposed to the existing Sorting Facility and an approximately 33,000 sq. ft. expansion to the existing building. | Toledo-Lucas County Port Authority | 889 | 91 to 180 days | \$3,265,500 |
| Lucas | Angola Rd Sanitary Sewer Extension and pumping sta | The Angola Road sewer extension will include approximately 3,800 feet of gravity sanitary sewer pipe to eliminate a sanitary sewer pumping station. This project will also allow Springfield Township to plan improvements that will provide sanitary sewer service along the route. The pumping station was originally installed as a private pumping station that is now operated and maintained by Lucas County. The discharge of the current pumping station and force main have caused many odor and corrosion problems at the outlet. In addition to the Township offices, existing developments and potential development of property, there is a private trailer park that will benefit from the gravity sewer extension. | Lucas County | 40 | 181 days or more | \$1,000,000 |
| Lucas | Ottawa Hills Sanitary Sewer Rehabilitation and Rep | A majority of the Ottawa Hills sanitary sewer system was installed in the mid 1920s. For several years, we have made repairs to the sanitary sewers in response to sewer block and/or basement. The problem has substantially increased over the last three years and recent testing shows that stormwater is infiltrating the sanitary sewers through joints and cracks in the sanitary sewer pipe. A few years ago, a portion of the sanitary sewer system was lined with glass geotextile and this project will further that effort on a larger scale. | Lucas County | 40 | 91 to 180 days | \$1,000,000 |
| Lucas | Mead Lane Sanitary Sewer Repair | This project will include the repair of a local sanitary sewer that has settled on Mead Lane in Springfield Township. The sanitary sewer is flows to a nearby sanitary sewer pumping station that provides service to the residential area. Replacing the sanitary sewer will prevent additional back-ups caused by the restriction in the gravity sanitary sewer. | Lucas County | 2 | 31 to 90 days | \$50,000 |
| Lucas | Southwest Lucas County Greenwaste Recycling Facili | Construct a greenwaste composting and recycling facility with security fencing and lighting, hazardous waste separation, storage and composting surfaces. Construct small office and restrooms facility. Construct service access roadway and turn around drive. Hire staffing and required equipment. | Village of Whitehouse, Ohio, | 5 | 31 to 90 days | \$115,000 |
| Lucas | Field Avenue Reconstruction Project | Reconstruct 1.9 miles of deteriorated village roadway, construct curbing, stormwater drainage, sidewalks, replace water and sanitary sewers, road markings, signage, improved lighting and landscaping. | Village of Whitehouse, Ohio, | 0 | 31 to 90 days | \$567,000 |
| Lucas | Finzel Road Round About | Design a major village road and State Route Road Intersection by constructing a modern round about. This improvement will improve traffic flow and safety at the Community's highest volume road intersection. This intersection supports a major school facility and is the main route for citizens commuting to work in Toledo, Perrinton and Maumee. | Village of Whitehouse, Ohio, | 10 | 31 to 90 days | \$1,110,500 |
| Lucas | Preferred Properties | Preferred Properties proposes the creation through new construction of 90 units of affordable housing for low income seniors and persons with disabilities in Lucas County, Ohio. The project will be located in rural and semi-rural communities. The project will leverage funding from other sources and create a number of construction and construction related jobs. The project will also create jobs locally and in the United States. Also, job creation will be realized from the property management and supportive services provided to the population. The project will receive funding and start construction 2008. Construction and "income generation" will continue through 2011. The project will be approximately one year from start to finish, use green technology, and the latest energy efficient technologies. Upon completion the project will provide long term community and health benefits to citizens with incomes at or below 120% AMIG. Collaboration between 10 local governments also provides long term community and health benefits to citizens with incomes at or below 120% AMIG. Collaboration between 10 local governments also provides long term community and health benefits to citizens with incomes at or below 120% AMIG. Collaboration between 10 local governments also provides long term community and health benefits to citizens with incomes at or below 120% AMIG. | Preferred Properties, Inc. | 100 | 91 to 180 days | \$3,000,000 |
| Lucas | Sylvania Avenue Bridge # 109 Repair | This project rehabilitates a bridge on Sylvania Avenue over Ten Mile Creek by placing a new monolithic concrete wearing surface. | Office of Lucas County Engineer | 16 | 91 to 180 days | \$230,000 |
| Lucas | Oregon Sanitary Sewer Rehabilitation Project Phase | Project consists of rehabilitating or lining 7072' of 10" - 36" existing collector or trunk sanitary sewer with installed. The initiative is a strategic approach to continuously reduce energy costs and supports the stimulus bill passed by the state and federal government. The project will include the installation of energy efficient equipment and energy sustainability efforts. The project will include the installation of energy efficient equipment and energy sustainability efforts. The project will include the installation of energy efficient equipment and energy sustainability efforts. | City of Oregon | 45 | 0 to 30 days | \$712,000 |
| Lucas | Sustained Energy Initiative | Project consists of replacing individual windows with energy efficient windows. • Replacing individual windows with energy efficient windows. • Replacing 80 year old clay roof and tuck-point masonry preventing further deterioration. • Preserving the historical significance of the campus. | Lourdes College | 50 | 31 to 90 days | \$1,000,000 |
| Lucas | LUC-CR 65 - 0.00 to 2.31 (Crissey Road) | Milling and asphalt concrete resurfacing of the existing pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$575,000 |
| Lucas | WTP Generator | Project consists of installing a 1500 KW diesel generator and transfer switch that is capable of handling total plant operation with peak demand pumping. | City of Oregon | 40 | 31 to 90 days | \$800,000 |
| Lucas | WTP Chlorination System Replacement | Project consists of replacing chlorine container vacuum system, piping and diffusers. | City of Oregon | 5 | 31 to 90 days | \$100,000 |
| Lucas | Whitehouse Dutch Road Sanitary Sewer Construction | Construct 6,800 linear feet of 12" Gravity Sewer to provide Sanitary Sewer Service to 1,000 acres of developable property. This property will be the final use for a 40 bed senior care facility, a medical clinic, a school facility expansion and a major truck body facility. The property is already available. This area has recently been assigned to the Whitehouse Village Sanitary Sewer Service Area. This project is expected to generate at least 40 new jobs largely in the health services profession. This project will also create 50 school administrative and construction jobs. | Village of Whitehouse, Ohio, Lucas County | 40 | 0 to 30 days | \$567,000 |
| Lucas | LUC-CR 84 - 6.14 to 7.09 (Garden Road) | Milling and asphalt concrete resurfacing of the existing pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$572,000 |
| Lucas | Sylvania Ave trunk water main improvements | The public water system in northwest Lucas County is served with a pumping station that provides water through the distribution system and operates on a draft-off cycle with an Elevated Tank. A hydraulic analysis of the water system shows that a gap in the raw water system needs to be constructed in order to meet distribution needs of the residential and businesses throughout northwest Lucas County. The elevated storage supplements the pumped water supply during peak system demands. However, over the last two years, the elevated storage has become inoperable. The pumping station could not fill the tank after a demand situation due to the bottle neck in the water distribution system. The installation of approximately 4000 feet of trunk water main will greatly enhance the system to better serve the area. | Lucas County | 20 | 31 to 90 days | \$500,000 |
| Lucas | Southshore Waterline Replacement - Phase 3 | Project consists of replacing existing 8" waterlines with 8" waterlines, including new fire hydrants and appurtenances. | City of Oregon | 35 | 31 to 90 days | \$741,415 |
| Lucas | Village Maintenance Building Improvements | Construct a 10,000 sq. ft. addition to an existing Maintenance Building. Rehabilitate existing 17,000 sq. ft. facility and truck bay. Replace Heating and ventilation systems. Construct a ventilated sectioned welding repair center. Construct a small office and break room area. Build a 6,000 sq. ft. storage facility. | Village of Whitehouse, Ohio, | 5 | 0 to 30 days | \$250,000 |
| Lucas | Big Ditch Improvement | The installation of a new outlet of Big Ditch into Lake Erie, 9,000 linear feet of new open stream channels, the installation of 13,200 linear feet of stream channel pipe ranging from 24" to 36" diameter to existing HERSOP existing 17,000' of facility and truck bay. | City of Oregon | 175 | 31 to 90 days | \$3,200,000 |
| Lucas | LUC-CR 133 - 2.22 (Dutch Rd @ Waterville-Monclova | Construction improvement by constructing a modern road, including a center landscape island, truck apron, pavement, splitter islands, pipe, sidewalks, lighting, storm sewer and other related work. | Office of Lucas County Engineer | 30 | 181 days or more | \$615,000 |
| Lucas | LUC-CR 73- 0.00 to 0.36 (McCord Road) | Milling and asphalt concrete resurfacing of the existing pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$295,000 |
| Lucas | Otter Creek Road Improvement | 11,400 feet of roadwork on Otter Creek Road between Corduroy Road and Bay Shore Road, including the York Street Intersection. Project consists of reconstructing existing concrete pavement sections of Otter Creek Road with concrete rubblization and asphalt overlay. The project will include new underdrains, berm, storm culverts, site grading, and right-of-way restoration. | City of Oregon | 150 | 31 to 90 days | \$3,000,000 |
| Lucas | Hill Ave Sanitary Sewer Extension and pumping stat | The Hill Ave sanitary sewer extension will include approximately 3,400 feet of gravity sanitary sewer pipe to eliminate a sanitary sewer pumping station and provide public sewers to existing residents along the route. The pumping station serves the largest subdivision in Springfield Township with significant electrical usage and is operated and maintained by Lucas County. The discharge of the pumping station and force main also cause odor and corrosion problems at the outlet. We have obtained some funding from the existing developments to contribute toward this project and believe the additional costs associated with this road extension may create an economic benefit to the other property owners along the route that do not have public sanitary sewer. The project will also allow the County to remove existing septic tanks and leach fields along the route. | Lucas County | 34 | 91 to 180 days | \$400,000 |
| Lucas | Sanitary Sewer System Inspection and I/I Removal P | Project consists of cleaning and video inspection of 133,333 linear feet of existing sanitary sewer, smoke testing 200,000 linear feet of existing sanitary sewer, and sanitary sewer repair to eliminate infiltration (I/I) sources. | City of Oregon | 30 | 31 to 90 days | \$479,000 |
| Lucas | Nebraska Ave Sanitary Sewer Extension and pumping | The Nebraska Ave sanitary sewer extension will include approximately 4,000 feet of gravity sanitary sewer pipe to eliminate a sanitary sewer pumping station. The project will also allow for construction of public sanitary sewer service along the route, thereby eliminating existing septic tanks. The pumping station was installed for service to a subdivision and elimination of a package treatment plant as a mobile home park that is operated and maintained by Lucas County. The discharge of the current pumping station and force main have caused odor and corrosion problems at the outlet. Lucas County has collected a portion of the funds from the existing development with additional funds needed to finance the project. | Lucas County | 40 | 91 to 180 days | \$715,000 |
| Lucas | Village Streets Mill And Resurfacing | Mill and resurface 610ths of a mile of village roadway. Roadway is located in residential areas and serve as critical connecting roads. | Village of Whitehouse, Ohio, | 0 | 0 to 30 days | \$80,000 |
| Lucas | Preferred Properties | New construction of 90 apartments for low income seniors and persons with disabilities. Project to be constructed in rural and semi-rural communities. Collaboration will include non-profits, public, private, and non-profits. Project will generate immediate economic benefits through 2011. Continued economic benefits will result to the local retail community. Project will use local products and products made in U.S.A to the extent feasible. Project will utilize green technologies during construction, and maximize energy efficiency during the life of the project. Local jobs will be created short-term and long term. Project can start immediately. | Preferred Properties, Inc. | 100 | 0 to 30 days | \$3,000,000 |
| Lucas | Port Authority Short Line Rail Road | Establish a Short Line Rail System to expand rail access to the Port of Toledo and maximize access to the Ironton Multi-modal facility by establishing a connection between the Class I Railroad, one Class II Railroad and the Port of Toledo. Both the Midwest Terminal and Midwest Terminals of Toledo International docks currently have limited service, with only access to one Class I RR (CSX). This limits the number of end-user customers who can ship/receive quantities to and from the docks to those which have CSX service or the other end of the regional chain. Although switching is available between CSX and other Class I RR, this is most often uncommercial. A Shortline Railroad can provide an economical means to connect between Class I railroads that will significantly increase the number of end-user customers who can ship/receive quantities to and from the multi-modal facilities. The expanding bio-fuel market and Toledo railway expansion are stressing the existing modes of transportation to eastern markets. By having rail, truck, pipeline, and vessel modes in one location at the Port of Toledo the shortline connection can be optimized and true multimodal efficiency can be realized. | Toledo-Lucas County Port Authority | 15 | 0 | \$3,300,000 |
| Lucas | LUC-CR Various (Traffic Signal Upgrades) | The work provides signalization upgrades at 13 Lucas County Intersections with revised phasing, controllers, wiring, signal heads, pullboxes, LED installation, video detection systems, etc. | Office of Lucas County Engineer | 10 | 91 to 180 days | \$420,000 |
| Lucas | Solar Array | The Toledo Science Center is a publicly funded organization whose mission is to bring science and technology into the lives of children so that they are prepared for jobs in the knowledge based economy. One of the largest expenses for the TSC is the operation and maintenance of their facility located in downtown Toledo. TSC is requesting funding for the installation of a solar array photovoltaic system. This system will provide 50 kw and be used specifically to offset the cost of electricity as the system will be connected directly to the grid. This project will create or retain a total of 15 jobs. Moreover, the materials to create this solar array will be purchased from First Solar, the project solar panel manufacturer in the region. | Toledo Science Center | 15 | 31 to 90 days | \$540,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Coy Road & Starr Avenue Intersection Improvement | The Project consists of two (2) components: Traffic Control System and Roadwork. Traffic Control System – Upgrade existing four-way stop controlled intersection with a new traffic control system to allow the intersection to function as a fully actuated signal, which will significantly improve the performance of the intersection. The new system will include pedestrian crossing signal heads with ADA ramps as noted below. Roadwork – The intersection will be widened to three lanes of appropriate width with left turn lanes and sufficient turning radii in all four directions. The roadwork will include new sidewalks and pedestrian crossings with ADA ramps for all legs of the intersection. The limits of the Coy Road Improvement will be approximately 200' North and South of Starr Avenue. The limits of the Starr Avenue Improvements will be approximately 500' East and West of Coy Road. Roadway clear channeling easement which is insufficient by today's modern cargo handling standards. Rotary dumping of cars provides a number of advantages. Rotary dumping eliminates the wasted volume under the sloping bottoms of a traditional hopper car. They also eliminate fugitive dust generated during discharge from rotary control equipment. Rotary Dumpers facilitate year-round efficiency. Bulk materials have to be hauled in order to top unload a rail car. Cars without discharge damage for not unloading cars quickly, a frozen load represents an added expense. Most methods of quickly freeing the cars present safety hazards including ignition. Rotary dumping eliminates both risks. The greatest advantage of the system is that it can unload 100 to 150 rail cars of dry bulk material can be unloaded in approximately two and a half hours using a rotary dumper as opposed to 4 rail cars every two and a half hours via unloading. Fast unloading will keep rail service providers profitable, on-schedule, and competitive. | City of Oregon | 35 | 91 to 180 days | \$400,000 |
| Lucas | Rail Car Unloading System Acquisition | The Toledo Science Center is a publicly funded organization whose mission is to bring science and technology into children's lives so that they are prepared for the available jobs in the knowledge-based economy. One of the Science Center's largest expenses is the cost of utilities to the facility located in downtown Toledo. The TSC is seeking funds for the installation of a geothermal system that will circulate water through a system of closed loop wells to be drilled underground. The system will replace a 25 year old chiller system that is at the end of its useful life. This upgrade will reduce operating expenses, reduce electrical demand and eliminate the need for a system that utilizes chlorofluorocarbon (CFC) refrigerants. The TSC is requesting funding in the amount of \$2.3 million. 10 jobs will be created or retained. | Toledo-Lucas County Port Authority | 7 | 31 to 90 days | \$5,400,000 |
| Lucas | Geothermal Installation Project | The Toledo Science Center is a publicly funded organization whose mission is to bring science and technology into children's lives so that they are prepared for the available jobs in the knowledge-based economy. One of the Science Center's largest expenses is the cost of utilities to the facility located in downtown Toledo. The TSC is requesting funds to install a chilled water delivery system. This new system will replace the current antiquated system of cooling towers, chillers, and water pumps. The current system is at the end of its useful life and is need of replacement. The new, modern system will cost \$600,000 and create or retain 25 jobs. | Toledo Science Center | 10 | 31 to 90 days | \$2,300,000 |
| Lucas | Dry Bulk Vessel Loading System Acquisition | The Inroville Terminal at the Port of Toledo is under development and will require the capability to load dry bulk material onto vessels twelve four hours per day / seven days per week. In order to modernize the Port of Toledo, increase throughput capacity and support existing businesses while attracting new business this system is required to be installed at the Inroville Terminal. A ship loading conveyor obtaining 1200 tons per hour would make the Port of Toledo's ship loading capability competitive on a global scale. The loading system would serve the agricultural, mining construction, aggregate, power producing and steel producing industries in the United States by providing a terminal with capability for quick ship loading and an avenue for exporting U.S. products into global markets. | Toledo-Lucas County Port Authority | 6 | 31 to 90 days | \$350,000 |
| Lucas | Chilled Water Delivery System | The Toledo Science Center is a publicly funded organization whose mission is to bring science and technology into children's lives so that they are prepared for the available jobs in the knowledge-based economy. One of the Science Center's largest expenses is the cost of utilities to the facility located in downtown Toledo. The TSC is requesting funds to install a chilled water delivery system. This new system will replace the current antiquated system of cooling towers, chillers, and water pumps. The current system is at the end of its useful life and is need of replacement. The new, modern system will cost \$600,000 and create or retain 25 jobs. | Toledo Science Center | 27 | 31 to 90 days | \$600,000 |
| Lucas | Elephant-Rhino-Hippo Exhibit | The Toledo Zoo is seeking funds to construct a new facility for elephants, rhinos and hippos. The elephants are in need of a larger enclosure and more interior space for female elephants and a larger outdoor area that can be shared with male elephants. The current Rhino enclosure is in dire need of renovation. The funding request is for a view of water exhibits for the elephants and rhinos. The funding request is for a view of water exhibits for the hippos. The funding request is for a view of water exhibits for the hippos. The funding request is for a view of water exhibits for the hippos. | Toledo Zoo | 123 | 91 to 180 days | \$10,480,000 |
| Lucas | New Educational Facility | The Toledo Zoo is seeking funding for the creation of a new Leadership in Energy and Environmental Design (LEED) certified educational facility. The Zoo is a huge attraction for students throughout the region. To serve this segment of the Zoo's audience, a new type of facility is needed. The facility will encompass more than 18,000 square feet and by use of the art in terms of energy and water conservation. The project cost is \$4,500,700 and will create or retain 53 jobs. | Toledo Zoo | 53 | 0 to 30 days | \$4,500,700 |
| Lucas | Solar Walkway | The Toledo Zoo is seeking funding for a demonstration project that will create a walkway that will provide shade with a shelter from inclement weather and will also utilize solar panels provided by First Solar. The project will accomplish two goals: First, the project will help offset operating costs for the Zoo by utilizing a renewable energy source and two, the project will provide an opportunity for additional jobs constructed by First Solar, the largest solar panel manufacturer in the region. | Toledo Zoo | 10 | 31 to 90 days | \$903,852 |
| Lucas | Amphitheater Preservation Project | The Toledo Zoo is seeking funding for the preservation of its WPA era Amphitheater. The Amphitheater provides a venue for many activities enjoyed by the public including concerts, performances and educational presentations. The project will totally renovate all windows and doors to the highest energy efficiency possible while retaining the architectural preservation. The project will make the area ADA and modernize the seating. The project will improve lighting in the area and ensure that it is the most energy efficient type available. Finally, the stone floor will be restored. The total funds requested is \$5,583,430 and there will be 66 jobs retained or created. | Toledo Zoo | 66 | 0 to 30 days | \$5,583,430 |
| Lucas | Starr Extension Bridge Replacement over Wolf Creek | The project consists of the replacement an existing 14' span concrete slab bridge with a new 16' ft span 3 sided precast reinforced concrete box structure on reinforced concrete spread footings with precast wingwalls on Starr Extension over Wolf Creek. The project will also involve minor approach roadway work including drainage, guardrail, signing, paving, wetline relocation and related work. Total Project Length is approximately 250 linear feet. | City of Oregon | 15 | 0 to 30 days | \$350,000 |
| Lucas | LUC-CR 202- 0.00 to 1.24 (North Curtice Road) | Milling and asphalt concrete resurfacing of the existing 1.24 miles of pavement with spot full depth repair, placement of pavement markings, and other related work | Office of Lucas County Engineer | 20 | 181 days or more | \$423,000 |
| Lucas | Public Grain Transfer and Multi-modal Delivery Sys | Construct a grain transfer system at the Inroville terminal at the Port of Toledo that will facilitate the movement of grain between rail, truck, and vessel by charging also with grain from one mode for temporary storage, and transfer back to another mode. This system would allow for two million bushels of grain to be stored in four 500,000 bushel bins to facilitate flexibility of grain storage and accommodate up to 30,000 tons of grain. The addition of the grain handling infrastructure will contribute to the modernization of the Port of Toledo, add to the existing grain handling capacity at the Port, and provide a neutral grain handling system that is open to the public and not affiliated with major grain producers. The facility can provide extra storage capacity for Toledo's private grain terminal operators during peak periods. The location of the terminal will provide access to all modes of transportation and intermodal capability. | Toledo-Lucas County Port Authority | 20 | 181 days or more | \$5,000,000 |
| Lucas | Taylor Street Bridge Replacement over Otter Creek | The project consists of the replacement an existing 20 ft single span concrete slab structure on existing concrete abutments with a new 26 ft span 3 sided precast reinforced concrete box structure on new reinforced concrete spread footings with cast-in-place wingwalls on Taylor Road over Otter Creek. The project will also involve minor approach roadway work including drainage, guardrail, signing, paving, and related work. Total Project Length is approximately 150 linear feet. | City of Oregon | 15 | 181 days or more | \$300,000 |
| Lucas | Oregon Sanitary Sewer Rehabilitation Project - Pha | The project consists of rehabilitating or lining 6,000 linear feet of 10-inch through 30-inch existing collector or trunk sanitary sewers by the installation of a resin-impregnated flexible tube, which is tightly formed to the original conduit. The Cured-in-Place Pipe (CIPP) will be continuous and tight fitting. The project will also include the rehabilitation of approximately 650 vertical linear feet of sanitary sewer manholes to provide a consistent riser level that restores wells to original surface levels and eliminates water intrusion and seepage. The project will also include sanitary sewer manhole adjustments, manhole casing replacement, and related work as necessary. | City of Oregon | 31 | 31 to 90 days | \$800,000 |
| Lucas | Lallendorf Road Bridge Replacement over Amolsch Di | The project consists of the replacement an existing 6 ft single span concrete slab structure on existing concrete abutments with a new 12 ft span 3 sided precast reinforced concrete box structure on new reinforced concrete spread footings with precast wingwalls on Lallendorf Road over Amolsch Creek. The project will also involve minor approach roadway work including drainage, guardrail, signing, utility relocation and related work. Total Project Length is approximately 200 linear feet. | City of Oregon | 20 | 181 days or more | \$425,000 |
| Lucas | LUC-CR 86- 0.00 to 1.02 (Albon Road) | Milling and asphalt concrete resurfacing of the existing 1.02 miles of pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$262,000 |
| Lucas | Liquid Fuels and BioFuels Storage, Blending, and L | The addition of a new Port of Toledo fuel storage and blending facility will help to modernize the port, expand material handling capability, and grow business at the facility. The Port of Toledo is served by pipeline, rail, highway and marine transportation modes. There are two major refineries within three miles of the Port and the location of Toledo, on the eastern edge of the Midwest agricultural and bio-bases production area, provides the most efficient location to ship fuels to the eastern US and world markets. The new fuel storage and blending facility would increase the number of movements a product must undergo to get from the producer to the consumer. The producer moves product to the tanks and from the tanks can reach customers via barge, truck, rail or pipeline. The described efficiency and flexibility provides superior supply chain management and cost savings to attract, retain, and grow businesses in Toledo. The facility would also promote bio-based production in the area by providing the ability to blend to consumer requirements. The project supports the refining, agriculture, bio-based, marine transportation, and pipeline industries. Milling and asphalt concrete resurfacing the existing 0.57 miles of pavement with spot full depth repair, placement of pavement markings, and other related work. | Toledo-Lucas County Port Authority | 16 | 181 days or more | \$4,900,000 |
| Lucas | LUC-CR 65- 3.52 to 4.49 (Criskey Road) | Milling and asphalt concrete resurfacing the existing 0.97 miles of pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$220,000 |
| Lucas | LUC-CR 71- 1.10 to 1.42 (King Road) | Milling and asphalt concrete resurfacing the existing 0.32 miles of pavement, constructing four foot wide paved shoulders, performing spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 173,000 | 91 to 180 days | \$173,000 |
| Lucas | LUC-CR 95- 7.89 to 8.40 (Monclova Road) | Milling and asphalt concrete resurfacing the existing 0.51 miles of pavement, with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$133,000 |
| Lucas | Storage Facility for Biofuel Feedstock | This project involves constructing a large weather proof storage facility for feedstock associated with cellulosic ethanol production at the Port of Toledo. Feedstock for cellulosic ethanol production includes recycled waste wood products, switch grass, and other carbon based digestible materials. The material must remain until used in a digester which produces ethanol and chemicals used in the plastics industry. The strategic advantage of producing cellulosic ethanol at the Port of Toledo is that the feedstock and finished products can move via vessel or single pipeline, rail, or truck. | Toledo-Lucas County Port Authority | 3 | 91 to 180 days | \$3,000,000 |
| Lucas | Renovation of Ursuline Center | The Ursuline Center is Blakes Nursing Facility located in Toledo, Ohio. We operate a 36 bed facility for religious persons. Our facility is approaching 25 years of age and numerous projects are needed in order to maintain the facility, including a new roof, updated computer equipment including wireless internet equipment and various furniture and equipment that needs to be replaced. We are seeking ways to help us continue our mission by renovating the facility. | Ursuline Convent of the Sacred Heart | 5 | 31 to 90 days | \$250,000 |
| Lucas | Red Lion assembly facility for the production of s | This project involves the construction of a manufacturing facility at the Port of Toledo that produces synthetic gas plants. The gas plants use carbon based organic matter wastes produced as feedstock to produce a clean source of energy, syngas, while creating lower emissions than traditional gas producing technologies. Production of these plants involves assembly of each component necessary to make a complete syngas producing plant. Once completed, the plants will be shipped in modular form from the production site at the Port of Toledo to and users anywhere in the world via rail, truck, vessel or barge. The plants will verify gas for municipalities, defense projects, government, and other interested in green energy technology. | Toledo-Lucas County Port Authority | 30 | 181 days or more | \$10,000,000 |
| Lucas | LUC-CR-Variou (Raised Pavement Markers) | Installation of raised pavement markings on approximately 40 centerline miles of Lucas County Roads. | Office of Lucas County Engineer | 10 | 31 to 90 days | \$97,000 |
| Lucas | 2009 Road Resurfacing Program | The proposed work consists of resurfacing and/or repaving approximately 13.5 centerline miles of various streets including, but is not limited to: Warning Course Removal; Patching; Base Repair; pavement markings; Resurfacing; Manhole Adjustments; Monument Adjustments, and related work. | City of Oregon | 25 | 0 to 30 days | \$500,000 |
| Lucas | LUC-CR Variou (Pavement Markings 644) | The application of thermoplastic pavement markings on approximately 4 centerline miles of multi-lane Lucas County roads. | Office of Lucas County Engineer | 10 | 0 | \$214,000 |
| Lucas | LUC-CR-Variou (Pavement Markings 642) | The installation of painted pavement markings on approximately 30 miles of Lucas County, Township, and Village roads. | Office of Lucas County Engineer | 10 | 31 to 90 days | \$220,000 |
| Lucas | LUC-CR-1-11.54 to 14.31 (Fulton-Lucas Road) | Milling and asphalt concrete resurfacing the existing 2.77 miles of pavement with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$502,000 |
| Lucas | LUC-CR-4-2.20 to 3.21 (Sylvania-Metamora Road) | Milling and asphalt concrete resurfacing of the existing 1.01 miles of pavement, with spot full depth repair, placement of pavement markings, and other related work. | Office Of Lucas County Engineer | 20 | 91 to 180 days | \$464,000 |
| Lucas | LUC-CR Variou (Guardrail) | The installation, replacement, or reconstruction of guardrail over approximately 2.8 miles of Lucas County Roads. | Office of Lucas County Engineer | 10 | 91 to 180 days | \$330,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Toledo Shipyard Crane Replacement | This Project would demolish and replace existing shipyard gantry cranes servicing the Port of Toledo's two dry docks. The cranes are used to lift and lower equipment to and from the vessels, tugs, and barges in drydock. These cranes are essential to ship maintenance and repair operations as well as any future vessel or tug reconstruction projects that would take place at the facility. The demolition and replacement of existing gantry cranes is critical for the future operation of the Toledo Shipyard as the existing cranes are defunct and it would be cost prohibitive to repair them. Also, the existing cranes are electric powered and inefficient and their obsolescence impacts the electricity demand of the Shipyard to a point where the electric billing rate spikes. New cranes for the facility will be a significant step in the modernization of the Shipyard operated by Inland Marine Inc. and the Port of Toledo. | Toledo-Lucas County Port Authority | 5 | 31 to 90 days | \$5,000,000 |
| Lucas | Boosting Toledo's Economy | We will be providing top notch education in the cosmetology field. Salons will want to hire our students due to the high caliber of education received. Training is well known in the industry. The hair has had many positive comments that people are excited to have a Toledan in Toledo. We are looking for funds to supplement our start up so that we can continue with the venture. Our start up will be ramping up for two years, after that we are hopeful that we will be able to break back to the community in 800 weeks. Thank you for your consideration. | Toni&Guy Hairdressing Academy | 18 | 0 to 30 days | \$325,000 |
| Lucas | LUC-CR 143-5.98 to 6.69 (Newwash Road) | Milling and asphalt concrete resurfacing of the existing 0.71 miles of pavement, with spot full depth repair, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$230,000 |
| Lucas | LUC-CR 4-0.00 to 2.20 (Sylvania-Metamora Road) | Milling and asphalt concrete resurfacing of the 2.2 miles of existing pavement, with spot full depth repairs, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 20 | 91 to 180 days | \$605,000 |
| Lucas | LUC-CR Various (Sign Upgrades) | Replace signs on various Lucas County Roads to meet current federal guidelines for sheeting retroreflectivity. | Office of Lucas County Engineer | 10 | 91 to 180 days | \$100,000 |
| Lucas | LUC-CR 143-4.94 to 5.98 (Newwash Road) | Milling, sealing, and asphalt concrete resurfacing 1.04 miles of existing pavement, with spot full depth repairs, storm berm construction, minor storm sewer adjustments, placement of pavement markings, and other related work. | Office of Lucas County Engineer | 25 | 181 days or more | \$660,000 |
| Lucas | Red Eye | Provide low income families the opportunity to have an infrared Scan completed on their home to pin-point heat loss and reduce energy costs. | Detection Infrared Service | 5 | 0 to 30 days | \$150,000 |
| Lucas | Rehabilitate Runway 14-32 at Metcalf Field | Rehabilitate Runway 14-32 at Metcalf Field | Toledo-Lucas County Port Authority | 47 | 31 to 90 days | \$2,921,000 |
| Lucas | TASC Statewide Pre-release Initiative | This project would build off Ohio's existing network of TASC programs. Each ODCR adult institution would be assigned a Community Liaison/TASC case manager who would be responsible to help inmates with 90 days of release contact with community based services. Lucas County TASC would be the lead agency in this project, but utilize the network of Ohio's 13 TASC programs to cover each of the adult institutions. The expected outcome would be to help reduce recidivism by 50% over the next 5 years. | Lucas County TASC, Inc. | 35 | 181 days or more | \$2,000,000 |
| Lucas | Alternative Energy Source - Wind Turbine | Energy BYWC Event 10kW wind turbine step a 100 foot gamed lattice tower. Install an Excel 8 grid-inverter inverter to the existing electrical system. This will be a turn key project; the prices will include all concrete, foundations, trenching, electrical, cranes, etc. The finished system will be installed and started up per manufacturers specifications. Experienced contractors will provide an alternative energy source for our therapeutic program and our developmental disability healthcare vocational center providing services to 20 individuals. In addition, the system will be fed into the main electrical grid for outside consumption. | Sunshine Inc. of Northwest Ohio | 5 | 31 to 90 days | \$70,159 |
| Lucas | Central Utility Plant | Central utility plant for Lucas County to enhance energy efficiency for County owned & operated buildings | Lucas County | 30 | 31 to 90 days | \$20,000,000 |
| Lucas | Swanton Township Hall Green Restoration Project | Upgrades to Historic Structure to improve energy efficiency. Roof Replacement, Tank Tank Block Work, Insulation, HVAC improvement | Swanton Township | 10 | 0 to 30 days | \$25,000 |
| Lucas | Swanton Township Hall ADA accessibility | Install ADA accessibility to the Swanton Township Hall and install an accessible bathroom. | Swanton Township | 4 | 0 to 30 days | \$7,500 |
| Lucas | Construction of a Road Salt Storage Facility | Construction of a building to accommodate road salt utilized by local government in connection with the winter maintenance program. The building, if the facility is fully funded there will be excess storage capacity which will make it possible to share this resource with other government entities. | Swanton Township | 5 | 0 to 30 days | \$15,000 |
| Lucas | Wind tower manufacturing building construction | The total project cost does not include the value of the township owned property upon which the building will be constructed. | Toledo-Lucas County Port Authority | 20 | 181 days or more | \$5,200,000 |
| Lucas | Quality Improvement in Prevention Measures: | This project involves construction of a 80,000 sq. ft. manufacturing facility for producing the teaser component for the turbines at the Port of Toledo. The Seaport is perfectly positioned to host such a facility as raw materials can be trucked, raised, brought in by vessel and finished work can be loaded on in the same manner. The project also includes the acquisition of 100 acres of land to be used as a state refer for tower manufacturing. A specialized tower production facility at the Port of Toledo can employ 100 workers and provide jobs to many people in all facets of construction from metal forming to painting and will also contribute to the Port's stewarding workload 10 years to come. | ProMedica Health System | 3 | 91 to 180 days | \$540,000 |
| Lucas | Photocatalyzed-Solar Conversion of (CO2+H2O) into | The Fluor Hospital Family Medicine Residency Program will establish a multi-disciplinary team (social worker, RN, & medical records coordinator) to focus on quality improvement of oral prevention measures (screening for cervical, breast and colorectal cancer) & diabetes, HbA1c, diabetes LDL, diabetes nephropathy, appropriate use of medications in asthma and osteoporosis management) and family medicine resident training in the area of preventive medicine. The objectives are: 1) improve healthcare quality in the community setting by focusing on prevention rather than end-stage disease management; 2) enhance the delivery of patient-centered care by ensuring that all patients, regardless of their socioeconomic status, have access to preventive procedures; and 3) reduce future family physicians in the development of "prevention" and provide a medical home for all patients, which will result in improved compliance with preventive care. | EMTEC | 26 | 0 to 30 days | \$1,000,000 |
| Lucas | Police Information & Video Equipment | One major alternative source of transportation fuel is gasification of virtually any gaseous, liquid or solid hydrocarbon into synthesis gas followed by Fischer-Tropsch conversion to liquid fuel. EMTEC proposes to lead a team with the University of Toledo and ProPac Plastics demonstrate how concentrating solar-powered reactor can augment production of synthetic liquid fuel by converting CTL or CTL waste products (CO2 and H2O) to additional synthesis gas. In this process energy from the sun is used to simultaneously split the synthesis production of the gasifier and to heat the production of greenhouse gases. In addition, mill scale, a waste product from the steel industry, is used as a reduction catalyst that is converted into a highly magnetic material for manufacturing soft ferromagnetic materials that are used in electric motors. The heat required for the catalytic reduction (CO2 + H2O + syngas) will be provided by a solar concentrator (a parabolic mirror) coated with a reflector that will be fabricated by RepRap Plastics. Initially, two reactor designs will be evaluated to assess the optimal performance in terms of rate of fuel conversion and product yield. | Village of Whitehouse, Ohio, | 0 | 0 to 30 days | \$42,000 |
| Lucas | Police Officer Funding | Purchase two In Car Video Cameras, four Mobil Data Terminals, and replace 10 duty vehicles which are 20 years old. This equipment will increase officer safety, overall communications and information access capabilities and reduce maintenance/repair costs. | Village of Whitehouse, Ohio, | 1 | 0 to 30 days | \$300,000 |
| Lucas | Scott Park Alternative Energy Campus | Here a film still time police officer for a three year funded period. This position would be absorbed into the full time police force in six to eight years beyond the funded period. This added officer would assist the Village in meeting an expanded work load in a growing municipality. In addition work load has been increased by the resumption of prisoner transport. The Municipality needs an additional officer but because of budget benefit and compensation costs and prisoner incarceration fees has been unable to hire another police officer. | University of Toledo | 300 | 0 to 30 days | \$40,000,000 |
| Lucas | Energy Conservation and Efficiency | The University of Toledo authorizes The Campus of Innovation for Advancing the World in Alternative, Renewal and Sustainable Energy. It will be the only one of its kind in the world. The University of Toledo is the world's recognized leader in advanced environmental and solar innovation technologies. The University of Toledo's ambitions do not stop there, we are currently working with world leaders in turbine technologies, advanced battery and smart current storage, sales of renewable power, alternative fuels, hydrogen, direct hydrogen from solar concentrators, advanced solar and other advanced alternative fuels. This campus will allow for more than the development of alternative energy. The University of Toledo Campus of innovation will be designed to educate the next generation of engineers, scientists and physicists to better manage existing and emerging energy resources. | University of Toledo | 300 | 0 to 30 days | \$40,000,000 |
| Lucas | St. Lawrence Drive Realignment | The University of Toledo authorizes The Energy Conservation and Efficiency Project. The University is developing the feasibility of constructing and installing generation capacity up to its peak load requirements. These generating facilities would be comprised of alternative energy solutions. These solutions will come in the form of wind, solar, biomass and clean coal technology. Carbon is a by-product of the University's energy use, a feasibility and conceptual proposal for an aggressive conservation program to determine the true connected power requirements. | Toledo-Lucas County Port Authority | 10 | 0 to 30 days | \$1,900,000 |
| Lucas | Renewable Energy Incubation Renovation | The realignment of St. Lawrence Drive will provide public access to the businesses currently land locked at the Port of Toledo. This project will restore public right-of-way as traffic must currently pass through private property to reach certain businesses in the area. | University of Toledo | 100 | 0 to 30 days | \$15,000,000 |
| Lucas | Health Science Campus Pharmacy Building | The University of Toledo authorizes a request for \$15M to be used to create additional labs and faculty offices within the current Clean & Alternative Energy Incubator building, home of the Wright Center for Photovoltaic Innovation and Commercialization (PVIC) to convert it into the nation's premier academic solar energy research center, and for the construction of a new facility for the Clean & Alternative Energy Incubator. The University of Toledo authorizes the renovation to modernize existing and expanding advanced energy technologies who wish to gain a technological advantage by locating where the workforce talent is coupled with proximity to the University of Toledo's research and solar energy testing facilities. The renovation to the current Clean & Alternative Energy Incubator will be used to create the home of the new School of Solar & Advanced Renewable Energy, additional research laboratories and testing facilities. This solar energy research center will create state-of-the-art laboratories for current faculty. | University of Toledo | 250 | 0 to 30 days | \$25,000,000 |
| Lucas | Rail loop construction | The University of Toledo authorizes this proposal. The University is in the final stages of construction documents that will construct a 179-foot precast square foot steel deck rail facility for the purpose of pharmaceutical studies and research. This facility will be constructed on the University's Health Sciences Campus adjacent to the University Medical Center. This environment will give our pharmacy students the daily interaction of medication dispensing and practical medical application. The project will construct nearly 1200 linear feet of new rail track at the Port of Toledo to expand on dock rail capacity allowing for more efficient use of servicing and switching. It will add to the current rail network at the inland/out marine facility and provide a better solution for ship to rail to truck transfers. | Toledo-Lucas County Port Authority | 12 | 0 to 30 days | \$1,900,000 |
| Lucas | Environmental & Research Technology Building | The University of Toledo authorizes a request for \$25M to establish an innovative and interactive multidisciplinary facility for environmental research specifically for the development of enabling measurement technology to address global environmental problems. The new building will house a globally expanded faculty encompassing state-of-the-art instrumentation, facilities and a central parallel-competing faculty where the currently dispersed faculty will be consolidated and upgraded. The proposed building plan will foster integrative and transformational research and will serve as the hub for cutting edge technology and human expertise on diverse subjects within the common thread of "Energy and the Environment." Sharing of complementary research tools will promote inter- and cross-disciplinary work with clear advantages for the future. Benefits will be gained not only for UT and the local economy, but also for the economy of the state and the nation. | University of Toledo | 250 | 91 to 180 days | \$25,000,000 |
| Lucas | Locker Rooms & Facility Upgrade | Renovations to existing recreational/sports facility. Alumni associations at 2 High schools are attempting to raise some funds to offset local match on the imminent project. | Tam-O-Shanter | 10 | 91 to 180 days | \$380,000 |
| Lucas | ARS Research Building | The University of Toledo authorizes this project. Through funds previously provided by Congress, the Agricultural Research Service of the USDA completed a Program of Requirements in 2006 that outlined the space needs of the various activities to be housed within a new research facility and research greenhouse to be located on the campus of the University of Toledo. The ARS also commissioned a design study and has now completed the design document for a 40,000 square foot research office and greenhouse facility. The facility will support the ARS mission of advancing the nation's horticulture industry and will provide a means for ARS scientists to interact with University of Toledo faculty and students to address problems related to the industry. The ARS has a technical office in Toledo directed by the ARS Wagoner Chief officer that is working in collaboration with University of Toledo scientists with industry stakeholders in Ohio and Michigan to determine and overcome problems facing the horticulture industry. The research team has been successful in addressing problems related to water, nutrients, and pesticides. | University of Toledo | 250 | 0 to 30 days | \$18,000,000 |
| Lucas | General Cargo Facility Dock Face Improvement | The linear dock at the Port of Toledo's general cargo facility is 4,100 feet long. The seawall retaining structure along the dock is falling and requires replacement in several locations. The retaining wall pier cap requires reconstruction and safety rail and bollards require replacement. The entire length of the dock requires re-banking. These investments in infrastructure at the Port of Toledo will help to modernize the terminal and provide safe vessel berthing for years to come. | Toledo-Lucas County Port Authority | 36 | 0 to 30 days | \$5,500,000 |
| Lucas | Immunotherapeutics Center | The University of Toledo authorizes a request for \$8M to renovate the laboratory space to be occupied by the Ohio Center for Innovative Immunotherapeutics Therapeutics (OCIIT), which is an interdisciplinary translational research unit recently founded by the Trust Foundation Program of the State of Ohio. The requested funds will be used to directly promote our OCIIT mission of research, development, and commercialization of a new generation of immunosuppressive therapeutics for common disorders. | University of Toledo | 20 | 0 to 30 days | \$8,000,000 |
| Lucas | New Skate Park | Construction of a new skate park area that will give skate board enthusiasts a safe location. The need for a park became more evident with the recent tragic death of a 14 year old skate boarder on a public road. | Sylvania Recreation District | 10 | 91 to 180 days | \$500,000 |
| Lucas | Sylvania Pacesetter Park Walk/Bike Path | Expansion of existing building, essential equipment for large & wind projects & pump house, sea wall, gate improvements for additional shipbuilding capacity | Sylvania Recreation District | 15 | 91 to 180 days | \$85,000 |
| Lucas | Shipyard Improvements | Expansion of existing building, essential equipment for large & wind projects & pump house, sea wall, gate improvements for additional shipbuilding capacity | Toledo-Lucas County Port Authority | 150 | 91 to 180 days | \$15,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Spinal Research & Bone Cement Laboratory | The University of Toledo authorizes a request for \$ 5 million for the Spinal Research and Bone Cement Laboratory for the research and treatment of orthopedic injuries. The University of Toledo is well recognized in Spinal Orthopedics research and recently garnered a State of Ohio grant of \$4.4M in collaboration with Cleveland Clinic. This grant can be leveraged with the proposed laboratory upgrade to increase spinal and bone research. This program is about developing a multi-functional calcium phosphate based cement for repairing complex orthopedic injuries, for example, the cement could be used for creating non-fused and spinal injury. The cement could be used to repair and can be used in the local delivery of antibiotics and/or agents in tissue engineering of bone. The idea is to be able to repair a wide variety of bone injuries. | University of Toledo | 10 | 0 to 30 days | \$5,000,000 |
| Lucas | Waterline replacement along George Hardy Drive | This project entails the reconstruction and installation of waterlines along George Hardy Drive, the main entrance to the General Cargo Facility at the Port of Toledo. The water main serving all vessels along George Hardy Drive is beyond its design life. Frequent water main breaks cause substantial disruptions to business operations and a safety concern. | Toledo-Lucas County Port Authority | 7 | 0 to 30 days | \$1,100,000 |
| Lucas | Research Science Building | To construct a research center focusing on chemical science & technology to serve the current & future needs of NW Ohio and the nation. The requested funding would be used for asbestos abatement and additional environmental remediation in the historic Continental Baking Company building in Toledo. This is the first phase in a proposed \$3.6 million rehabilitation of the vacant factory building for market-rate rental housing and retail uses. By bringing new housing and businesses to downtown Toledo, this catalytic project is expected to generate significant additional economic development. | University of Toledo | 100 | 91 to 180 days | \$30,000,000 |
| Lucas | Continental Baking Company | University of Toledo is developing the feasibility of constructing & installing generation capacity up to its peak load requirements. | Sandvick Architects, Inc. | 20 | 31 to 90 days | \$200,000 |
| Lucas | Energy Generation and Conservation | The University of Toledo authorizes this request. Funding for the Autism Center at the University of Toledo Medical Center will work on significant research in obtaining accurate and timely diagnosis, effective and evidence-based treatments, and coordinated services for Autism. | University of Toledo | 100 | 91 to 180 days | \$40,000,000 |
| Lucas | Autism Center | This project involves replacing the pavement on George Hardy Drive, the road that serves as the main entrance to the Port of Toledo. The pavement has failed in its entirety. Safe and efficient access to the Port of Toledo is in jeopardy if the road is not reconstructed soon. University of Toledo is in the first stages of construction documents that will construct 54,000 SF, state of the laboratory space for the purpose of pharmacologic studies & research. | University of Toledo | 20 | 91 to 180 days | \$2,000,000 |
| Lucas | Reconstruct George Hardy Drive, Entrance to the Po | This project involves replacing the pavement on George Hardy Drive, the road that serves as the main entrance to the Port of Toledo. The pavement has failed in its entirety. Safe and efficient access to the Port of Toledo is in jeopardy if the road is not reconstructed soon. University of Toledo is in the first stages of construction documents that will construct 54,000 SF, state of the laboratory space for the purpose of pharmacologic studies & research. | Toledo-Lucas County Port Authority | 8 | 0 to 30 days | \$1,300,000 |
| Lucas | Pharmacy | University of Toledo is preparing construction documents for bidding an indoor practice facility to be used for collegiate sports activities including soccer, football, golf, baseball & basketball. | University of Toledo | 100 | 91 to 180 days | \$25,000,000 |
| Lucas | Indoor Practice Facility | University of Toledo is preparing construction documents for bidding an indoor practice facility to be used for collegiate sports activities including soccer, football, golf, baseball & basketball. | University of Toledo | 100 | 91 to 180 days | \$11,500,000 |
| Lucas | Advance Technology Park, Phase II | Infrastructure for Phase II of the Advanced Technology Park will add to the recently completed 40 plus acre project that will create 350-425 jobs. Not only will this project provide the necessary infrastructure to access additional development, but will provide improved access by connecting the park to Detroit Avenue. | University of Toledo | 170 | 91 to 180 days | \$2,000,000 |
| Lucas | Reconstruct St. Lawrence Drive, main thoroughfare | This project entails reconstructing the pavement (to include supporting drainage structures) on St. Lawrence Drive, which serves as the main thoroughfare to and through the General Cargo Facility at the Port of Toledo. Approximately 50% of the pavement has failed as well as 50% of the supporting drainage structures. Efficient movement of traffic cannot be maintained at the port of the road and drainage is not reconstructed in the near future. | Toledo-Lucas County Port Authority | 10 | 0 to 30 days | \$1,500,000 |
| Lucas | Construct vessel slip to expand number of ship ber | This project involves building a new berth for vessels to dock at the Port of Toledo that would allow more vessels to call on the Port at any one time. It would also provide a dock that would facilitate loading or discharging a vessel from either side of the vessel or the bow. Currently, this near dock a vessel can only be accessed from one side. | Toledo-Lucas County Port Authority | 20 | 181 days or more | \$3,000,000 |
| Lucas | Construct 500,000 sq. ft. of warehouse capacity at | The existing warehouses at the Port of Toledo's general cargo facility are in excess of forty years old, require substantial repairs, and are operationally and energy inefficient. Constructing the new warehouses further from the waterfront than the existing warehouses would allow for more vessel side cargo staging area and make the general cargo facility more efficient. New warehouses would be more energy efficient and modernize the facility to be competitive in the global marketplace. | Toledo-Lucas County Port Authority | 93 | 181 days or more | \$14,000,000 |
| Lucas | Whitehouse Employee Wellness Program | Renovate a section of the existing Village Fire Department Station House. Construct a drywall partition. Purchase fire extinguishers, weightlifting equipment, aerobic/tonation equipment, an elliptical trainer and heart rate based processing equipment. The facility will encourage village staff and their families to work on their personal fitness which overtime should reduce health care costs and improve employee health and quality of life. | Village of Whitehouse, Ohio, | 0 | 0 to 30 days | \$25,000 |
| Lucas | Whitehouse Police Officer Grant | Provide an additional full time officer for a three year period. | Village of Whitehouse, Ohio, | 1 | 0 to 30 days | \$300,000 |
| Lucas | Commercial Building Energy Efficiency Evaluations | Recommendations will be provided to building owners and operators as to insulation, structure and infrastructure upgrades / repairs to reduce energy consumption, energy reducing operating costs. Our evaluations will in turn support residential and material suppliers quality in a trickle down added benefit to the economy. Our project will help retain 8 jobs in the consulting engineering industry in northern Ohio as well as provide new work for material suppliers, material manufacturers and construction workers. | HT Bernsdorf, Inc | 8 | 0 to 30 days | \$149,600 |
| Lucas | Wheeling Street Improvement | We plan to apply a very modest \$85 / hour engineering rate for the work performed (as compared to the \$150 / hour industry standard). The project consist of the improvement of 0.37 miles of Wheeling Street by replacement of the existing bridge over I-280 including roadway widening and resurfacing between Brown Road and Navarre Avenue (SR 2). The existing 2-lane interchange bridge will be replaced with a 6-lane bridge to accommodate the existing traffic. The project will also include traffic signals, lighting, drainage, sidewalk, curb and gutter, guardrail, grading, pavement markings, waterline relocation, utility relocation and related work. | City of Oregon | 450 | 181 days or more | \$1,700,000 |
| Lucas | Get Out of the Dark | OCTC will hold free seminars, free hands-on workshops and free public appearances with a portable functioning solar model home to bring public awareness of how renewable energy works and cost savings to the students and residents of Ohio. OCTC will partner with two public school districts and various local governments to reach residents in Northwest and Northeast Ohio. | Oregon Career & Technology Center | 0 | 91 to 180 days | \$40,000 |
| Lucas | GI Hydrogen™ - The Solar Paradigm | We anticipate reaching 12,800 homeowners, do-it-yourself individuals and city officials bringing public awareness of solar renewable energy. Current ways by which we generate and use energy are inefficient and costly to the environment. Direct solar-thermal cracking of natural gas (methane) leading to the generation of CO and CO2-free hydrogen and elemental carbon has been demonstrated on a lab scale. In this project a reactor based tube will be loosely enclosed in porous pellets made out of spherulitic, nanoporous diatomaceous earth (DCE) support, embedded with nanoparticles of Fe or Ni. This will facilitate: (1) direct methane cracking and (2) formation of high quality CNTs within the pores of the DCE matrix. The clean cracking of light hydrocarbons (LHC) has been achieved both catalytically and non-catalytically using Fe or Ni-metal supported alumina matrices. Depending upon the particle size and morphology of the support metal, graphitic, filamentous, fibrous or nanotubular (single-walled and multi-walled) carbon deposits have been found. The carbon deposit is of very high quality and hence commercially valuable, rather than a solid waste, it has been used in a number of applications. | EMTEC | 18 | 31 to 90 days | \$1,000,000 |
| Lucas | Marina District River Stabilization and Erosion Con | This project includes stabilization of the banks of the Maumee River through a sheet pile wall, plus storm drainage and erosion control within the Marina District. All plans and construction drawings are complete. This project is ready for construction immediately. | City of Toledo | 40 | 0 to 30 days | \$4,500,000 |
| Lucas | Airline Yard Rail Project | Norfolk Southern is committed to revise the layout of Airline Yard to increase the capacity from 30,000 lbs per year to 60,000 lbs per year, while minimizing any disruption of the adjacent rail mainline. Plans are in progress, which will enable construction to occur within 90 days. | City of Toledo | 50 | 31 to 90 days | \$8,000,000 |
| Lucas | ACME Plant Environmental Remediation | The City of Toledo needs to invest \$2 million dollars to complete asbestos remediation in the former ACME power plant, which is owned by the City. This project can be bid as soon as funding is available. | City of Toledo | 20 | 0 | \$2,000,000 |
| Lucas | Fiberglass Tower Energy Efficiency | The owner of the Fiberglass Tower proposes to spend \$3 million for energy efficiency retrofits on the building. Combined with the solar panels described above, the owner hopes to create a model for transforming other buildings. The project is expected to create 50 new jobs. Plans and design are in progress. This project can be started within 90 days of funding. | City of Toledo | 50 | 31 to 90 days | \$3,000,000 |
| Lucas | Swan Creek Revitalization | The City of Toledo and Tetra Tech have identified several parcels requiring environmental evaluation and remediation. Significant work has been performed so that this project could be bid very quickly. | City of Toledo | 45 | 31 to 90 days | \$5,000,000 |
| Lucas | Riverside Hospital | The former Riverside Hospital requires environmental evaluation and remediation, estimated to cost \$1 million. This project can be bid very quickly. | City of Toledo | 15 | 31 to 90 days | \$1,000,000 |
| Lucas | Beazer Environmental | The Beazer property needs environmental evaluation and remediation. The estimated cost for this project is \$1.75 million and can be bid very quickly. | City of Toledo | 15 | 31 to 90 days | \$1,750,000 |
| Lucas | Unison electronic record | We need 100 laptops to give to home based mental health workers. We also need to have our charts entered into an electronic record. This would enable our home based workers to enter client information directly into the chart while treating our clients during a home visit. It would also enable our Physicians and nurses to enter information about our clients medication directly into the chart while they are examining the client. This would eliminate the thousands of pieces of paper that are filed into charts every year and also allow easy transition for our clients from one provider or agency to another. It would also prevent errors caused by poor handwriting. | Unison Behavioral Health Group | 15 | 31 to 90 days | \$250,000 |
| Lucas | Photovoltaic Solar panel Installation | Install and utilize photovoltaic solar panels to supply electricity to a junior high school. | Maumee Board of Education | 12 | 91 to 180 days | \$1,250,000 |
| Lucas | Rudyard, Roan, Meade Sewer Project Lucas County | 83,424 new linear feet of sewer lines and 83,424 of new drain that must be reconstructed due to sewer project. In one year area of Sylvania Township known as Dogpatch. Project has been sensitive any times but people are poor and can't afford. many having trouble with septic tanks and leach fields and some condemned. Project is designed and ready to go. Contact at Lucas County Sanitary Engineers office is Jan Shaw 419-246-0969 | City of Toledo | 100 | 31 to 90 days | \$2,000,000 |
| Lucas | Rudyard, Roan, Meade storm sewers Lucas County | 83,424 new linear feet of storm drains for one of poorest areas of Lucas County Contact Greg Hoffmann 419-880-0037 with Sylvania Township | Sylvania Township | 50 | 181 days or more | \$1,500,000 |
| Lucas | Ohio Theatre Revival | Complete renovation of the 88 year old building to what it was when it first opened in 1921. This theatre is the last of 60 neighborhood movie houses which served the Toledo area during the movie era. Now it is the last neighborhood movie house standing and operating as it was originally designed for. Expansion of the theatre will be addressed with the construction, and new, larger lobbies, bathroom and concession area will be added. Also, reference rooms, dressing room, green room and other necessary areas will be added for convenience to all who use the theatre. The University of Toledo authorizes a request for funding to renovate and maintain University Hall, which is the primary administrative, teaching, and central location for the College of Arts and Sciences offices and classrooms. University Hall requires \$7 million dollars for maintenance, which includes the following areas: Upgrades for the mass notification over fire system; A new emergency power distribution system; Upgrades for windows, doors, walls, ceilings, and elevators; Upgrades for piping, and Upgrades for sprinklers. | The Ohio Theatre, Inc. | 25 | 0 to 30 days | \$5,000,000 |
| Lucas | University Hall Renovations | The University of Toledo authorizes this proposal. This expansion proposal will fund the architectural plans and permits for our \$5 million expansion to build Phase I and II. Phase I will contain a new office wing, a new laboratory wing of "clean" labs for molecular oncology, a greenhouse on the roof, and a 150 seat auditorium (desirable in lieu of two small conference and the monthly public lecture series). Phase II will comprise two apartment-style units for visiting scientists and a group short-term residence featuring 6 double rooms, 2 bathrooms, and a central kitchen/dining/living area. The expansion will be designed as state-of-the-art "green" facility, thereby exceeding the local green recommendations of the U.S. Green Building Council, with the goal of achieving LEED platinum certification for Phase II (the highest level) and gold for Phase I. The Lake Erie Center expansion thus will serve as an education showcase for the university, community, and the public and will be featured on local tours as a demonstration site. | University of Toledo | 250 | 31 to 90 days | \$11,400,000 |
| Lucas | Lake Erie Center Renovations | The University of Toledo authorizes this proposal. This expansion proposal will fund the architectural plans and permits for our \$5 million expansion to build Phase I and II. Phase I will contain a new office wing, a new laboratory wing of "clean" labs for molecular oncology, a greenhouse on the roof, and a 150 seat auditorium (desirable in lieu of two small conference and the monthly public lecture series). Phase II will comprise two apartment-style units for visiting scientists and a group short-term residence featuring 6 double rooms, 2 bathrooms, and a central kitchen/dining/living area. The expansion will be designed as state-of-the-art "green" facility, thereby exceeding the local green recommendations of the U.S. Green Building Council, with the goal of achieving LEED platinum certification for Phase II (the highest level) and gold for Phase I. The Lake Erie Center expansion thus will serve as an education showcase for the university, community, and the public and will be featured on local tours as a demonstration site. | University of Toledo | 100 | 0 to 30 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lucas | ADS Biotechnology | The University of Toledo Authorizes this proposal. This project is focused on medical research and clinical product development to protect, support and advance the health and welfare of deployed military personnel. The project's aim is to accelerate the clinical product development of a blood product technology called PEG-AB, a pegylated human serum albumin that is designed for use as a damage control resuscitation fluid for combat medic first responders, in the Combat Support Hospital setting and during patient transport. PEG-AB offers the military the first and only definitive treatment for capillary leak systems, a life threatening condition that is a serious complication of any severe bodily injury and is the cause of morbidity and mortality among soldiers injured in battle or infected with microbiological pathogens. The impact of PEG-AB to positively impact mortality and morbidity of our injured military personnel emphasizes urgency in accelerating the development of the technology. | University of Toledo | 50 | 0 to 30 days | \$18,000,000 |
| Lucas | Fiberglass tower Solar | The owner of the Fiberglass Tower has plans to cover the south side of the building with solar panels. It is anticipated that this project will be a landmark vertical solar field and will generate significant utility savings for the building. The estimated cost for this project is \$2 million. The project is expected to create 25 new jobs. Plans and design are in progress. This project can be started within 90 days of funding. | City of Toledo | 25 | 31 to 90 days | \$2,000,000 |
| Lucas | Alternate Fuel for Municipal Vehicles | The City of Toledo plans to invest \$1 million to convert municipal vehicles for alternate fuel use. Current programs underway include converting vehicles to use compressed natural gas and fuel processed from culcure waste. The City of Toledo anticipates that this program will strengthen its position as a leader in renewable alternative energy and will generate fuel savings. The project is expected to create 10 new jobs. The plans and specifications are complete. This project can be started within 90 days of funding. | City of Toledo | 10 | 31 to 90 days | \$1,000,000 |
| Lucas | Citywide Traffic Signal LEDs | The City of Toledo could save significantly on utility bills by converting the City of Toledo traffic lights to LED lighting. The estimated cost for this project is approximately \$1 million. The project is expected to create 7 new jobs. The plans and specifications are in process. This project can easily be started within 90 days of funding. | City of Toledo | 7 | 0 to 30 days | \$1,000,000 |
| Lucas | Municipal Building Retrofits | The City of Toledo proposes to spend \$18 million for energy efficiency retrofits on municipal buildings. It is estimated that the retrofits will save the City of Toledo \$2 million per year in reduced utility costs. The project is expected to create 25 new jobs. Plans are in progress. This project can be started within 90 days of funding. | City of Toledo | 25 | 31 to 90 days | \$18,000,000 |
| Lucas | Marina District Green Energy Central Heat | The project includes a central boiler/hot water plant and initial distribution piping to provide hot water heating for the entire Marina District. It will reduce greenhouse gas emissions by 75% and will reduce total energy consumption by 40%. Initial plans and engineering plans are complete. Construction plans have not yet been started, but can be completed in 60 days. | City of Toledo | 25 | 31 to 90 days | \$2,000,000 |
| Lucas | Municipal Solar Field | The City of Toledo proposes to spend \$5 million on a solar field to generate electricity, as well as test and display solar panels. As a leader in the area of renewable alternative energy, the municipal solar field will strengthen the City's position in the development and manufacture of solar panels. The project is expected to create 25 new jobs. This project can be started within 180 days of funding. | City of Toledo | 25 | 91 to 180 days | \$5,000,000 |
| Lucas | Regional Health Information Network/Exchange | ProMedica Health System (PHS) which serves 29 counties in Ohio and Michigan proposes establishing a Regional Health Information Knowledge Exchange (RHINE), a network linking to the National Health Record Database. PHS will use already developed 3rd party software, 3M and innovations. This software is used in multiple hospitals as a clinical repository and multiple sites for state-funded Regional Health Information Organizations. PHS started using the 3M software product in 1998 as a clinical repository. The product merges multiple administrative data across our 8 hospitals and 90 other clinical sites plus a physicians' network, creating a single electronic health record that is accessible to care for our patients. PHS was the first in the industry to implement this product. Benefits include new jobs, the ability to integrate multiple clinical sites into a single electronic health record, proven ability to work with 3M and their products to create a secure system and a track record in assisting patient information flow and access. It is estimated the RHINE would be implemented in 180 days and operational sites for 4.5 years would be \$6.75 million. | ProMedica Health System | 7 | 91 to 180 days | \$12,750,000 |
| Lucas | Marina District Solar | The project includes plans to cover the roof of the former ACME power plant building with solar panels. It is anticipated that this project will be a very visible solar field and will generate significant utility savings for the Marina District buildings. The estimated cost for this project is \$3 million. The project is expected to create 25 new jobs. Plans and design are in progress. This project can be started within 90 days of funding. | City of Toledo | 25 | 91 to 180 days | \$3,000,000 |
| Lucas | Collins Park Wind Turbine Project | The City of Toledo plans to establish a wind farm at Collins Park to generate electricity for the City's power plant. The estimated cost of the wind farm is \$5 million. The project is expected to create 12 new jobs. The wind analysis study has been completed. This project can be started within 180 days of funding. | City of Toledo | 15 | 91 to 180 days | \$2,000,000 |
| Lucas | Marina District Pedestrian Mall | This project involves the development of a pedestrian mall area in the Marina District along the Maumee River. Everything is ready except the funding. This project can be done immediately. | City of Toledo | 20 | 0 to 30 days | \$3,000,000 |
| Lucas | Marina District Amphitheater | This project includes an amphitheater and gathering area within the Marina District along the Maumee River. All plans and construction drawings are complete. This project can be done immediately. | City of Toledo | 30 | 0 to 30 days | \$3,500,000 |
| Lucas | Minor Storm Drainage Additions | Drainage Improvement | City of Toledo | 0.7 | 91 to 180 days | \$100,000 |
| Lucas | Minor Storm Drainage 2010 | Drainage Improvement | City of Toledo | 2.0 | 181 days or more | \$300,000 |
| Lucas | Purchase an electric patrol vehicle | Drainage Improvement Purchase an electric vehicle Ranger patrol vehicle for our Willowood Metropark. This will reduce the maintenance and gasoline usage from our present gasoline powered engine in a Ford Crown Victoria. This will also allow for improved Ranger interaction with our park visitors and allow the Rangers to drive on trails to more remote locations than they can do at present. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$8,000 |
| Lucas | Xunlight | Xunlight has developed promising solar energy technology and needs to build a production facility. | City of Toledo | 100 | 31 to 90 days | \$10,000,000 |
| Lucas | Sugant | Sugant has developed very promising technology to convert culcure waste to fuel. The company needs to build a plant for production. | City of Toledo | 30 | 0 | \$13,500,000 |
| Lucas | replace 5 old 12 gauge shotguns | Purchase 5 new 12 gauge shotguns which will be carried in 5 patrol vehicles. These would replace 5 very old shotguns which potentially could malfunction at a critical time. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$3,500 |
| Lucas | Install closed circuit cameras in 8 metroparks par | CCTV cameras would be installed in parking lots at eight Metroparks. This would allow the Rangers to view those parking lots on the MOT's in their patrol vehicles. This would also offer information to an investigator following up on a crime committed in one of the parking lots. | Metroparks of the Toledo area Ranger Department | 1 | 181 days or more | \$160,000 |
| Lucas | Sphere Energy | This system would record all vehicles entering and exiting the parking lots as well as the rear license plate. | City of Toledo | 18 | 91 to 180 days | \$5,000,000 |
| Lucas | Crabb Rd. Bridge | Sphere has developed very promising technology related solar panels and is now ready to build a plant for production. | City of Toledo | 2 | 31 to 90 days | \$300,000 |
| Lucas | Delaware Creek SSO Elimination | Drainage Improvement SSO Elimination | City of Toledo | 5 | 31 to 90 days | \$310,000 |
| Lucas | Large Diameter Sewer Rehabilitation | Sewer Rehabilitation | City of Toledo | 4.1 | 91 to 180 days | \$315,000 |
| Lucas | Dead End Water Mains | Water Main Improvement | City of Toledo | 1.3 | 91 to 180 days | \$200,000 |
| Lucas | Water Main Replacement Program | Water Main Replacement | City of Toledo | 13.3 | 91 to 180 days | \$2,000,000 |
| Lucas | Dorr St. 24" Main Replacement | Water main replacement | City of Toledo | 14 | 31 to 90 days | \$2,100,000 |
| Lucas | Crabb Rd. Bridge | Drainage Improvement | City of Toledo | 2 | 31 to 90 days | \$300,000 |
| Lucas | Dexter Alley Sanitary Sewer | Sewer Replacement | City of Toledo | 2.6 | 31 to 90 days | \$198,120 |
| Lucas | Dearden/Birdsall Sanitary Sewer | Unsewered Area | City of Toledo | 2.9 | 91 to 180 days | \$428,391 |
| Lucas | Delaware Creek Drainage Improvement | Drainage Improvement | City of Toledo | 8 | 0 to 30 days | \$700,000 |
| Lucas | Minor Storm Drainage Improvements | Drainage Improvement | City of Toledo | 1.3 | 0 to 30 days | \$200,000 |
| Lucas | Parkside Area Sanitary Sewer Overflow Elimination | SSO Elimination | City of Toledo | 36.7 | 181 days or more | \$5,500,000 |
| Lucas | Peterson Ditch Improvements | Drainage Improvement | City of Toledo | 19.4 | 181 days or more | \$2,910,000 |
| Lucas | General Motors Water Main Improvement | Water Main Extension | City of Toledo | 2.5 | 91 to 180 days | \$378,000 |
| Lucas | Detroit Ave. Sanitary Sewer Overflow Elimination | SSO Elimination | City of Toledo | 20.4 | 181 days or more | \$3,054,000 |
| Lucas | Bennett Area Sewer Improvement | Sewer Improvement | City of Toledo | 34.9 | 181 days or more | \$5,235,000 |
| Lucas | Autism Center for Clinical Excellence - REVISED | The Toledo Children's Hospital plans to develop a clinical facility to provide the first step in early assessment, intervention and support services for autism spectrum disorder through a multi-centered collaborative effort, utilizing multi-disciplinary care providers. The prevalence of autism is currently 1 in 150 children, with approximately 24,000 children born annually with some form of autism. The Autism Center for Clinical Excellence will provide a critical space site to ensure early diagnosis and appropriate intervention. Total Project costs include equipment, space and salaries in implement to project. | ProMedica Health System | 6 | 91 to 180 days | \$518,000 |
| Lucas | Clinical Documentation for Peri-operative Care - R | In order to modernize the health care delivery system within The Toledo Hospital's surgical services, we are ready to begin the next phase of implementation of the Peri-operative documentation (electronic medical record) clinical, which includes Peri-Operative/Post-Anesthesia/Pain Assessment Care Unit and Bar Coding within the Instrumentation and Supply Chain processing for surgical services. These technologies will reduce medical and documentation errors and improve patient quality, integrating these patient care events into peri-operative computer system will maximize the delivery of quality patient care information amongst caregivers and eliminates duplicating patient information that can lead to transcription errors (diagnosis, medications and procedures). Estimated cost of equipment upgrades, computer hardware, software implementation and training is \$5.5 million. | ProMedica Health System | 4 | 91 to 180 days | \$5,200,000 |
| Lucas | Healthcare Workforce Development Program - REVISED | ProMedica Health System, a not-for-profit serves 27 counties in NW Ohio and SE Michigan and is one of the largest employers with over 11,500 employees in 8 hospitals and 50+ outpatient facilities. A consistent shortage in several areas (currently ICU nurses and state-certified nurses added) indicates a need to grow our own workforce (either displaced workers or new grads). To develop a qualified and diverse healthcare workforce, PHS will work with WQTE, public schools and local universities to inform teachers, guidance counselors and parents and their children the 20+ careers about the myriad healthcare employment opportunities in healthcare and educational requirements. PHS and WQTE will partner to create a curriculum, video modules and companion Website as a resource for teachers and students to explore the academics, skills and training necessary to pursue a successful career in healthcare professions selected. Programs will be distributed into the schools via an existing network, teacher/guidance counselor workshops and on an interactive Website. | ProMedica Health System | 3 | 0 to 30 days | \$3,304,744 |
| Lucas | Hospital to Home Diabetes Support Program - REVISE | The Toledo Hospital requests \$127,973 to implement a Hospital-to-Home Diabetes Support Program for at-risk pregnant women. Diabetic women are at high risk for poor birth outcomes. These funds will purchase an electronic patient registry system and will enable a nurse practitioner to be able to monitor patient activities from their homes, track and report specific health indicators, and to evaluate and implement additional quality improvement activities. The current financial crisis has generated additional quality improvement activities. An aquaculture provides existing and prospective farmers an economically viable and environmentally sound alternative. Farm of freshwater production. Traditionally aquaculture production in the state has been limited to food fish. Ohio's Lake Erie phosphorus and its numerous inland lakes create a high demand for recreational bait fish production. A native species, the spot fish shiner, has been studied as an alternative to the golden shiner that has been historically raised outside of Ohio's borders and shipped in. Current demand for in Ohio calls for 225 million bait fish annually at a value of \$40 million. | ProMedica Health System | 1 | 31 to 90 days | \$127,973 |
| Lucas | Bait Fish Production Utilizing Recirculating Aquac | Creating a native Ohio supply will keep \$40 million in Ohio and generate \$120 million in multiplier effects. Furthermore, in developing this new industry utilizing RAS technology 250 jobs will be created in five years. Expected Outcomes: Market ready RAS technology for fish adaptation, Urban/ rural aquaculture training, Production research/Urban/ rural development, Business development, Entrepreneurial training/Waste management, Business plan development. | Ohio State University | 250 | 91 to 180 days | \$650,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lucas | Northwest Ohio Sickle Cell Treatment Center - REVI | The Northwest Ohio Sickle Cell treatment Center will be a new service that provides comprehensive care to both adult and pediatric individuals with sickle cell disease. The center will be dedicated to the treatment of sickle cell disease, as well as maintaining and improving the quality of care. Currently, there is no center in Northwest Ohio that provides comprehensive treatment for sickle cell disease. Sickle cell disease is a genetic disorder in which most medical providers have little experience in treating. Creating a center will provide access to care, moving treatment and many times occurring in the emergency room to a less expensive clinic site. | Promedica Health System | 11.5 | 31 to 90 days | \$630,603 |
| Lucas | Pediatric Psychiatric Unit Expansion - REVISED | Toledo Children's Hospital (TCH) Adolescent Behavioral Unit serves patients aged 12-17. Inpatient volume for the unit has steadily increased since its opening in 2003. Hospital administration has received requests from ODMH, Lucas County Health Department, and local crisis and rescue center to investigate the potential of expanding the scope of the unit to help children from the ages of 6-12 who are experiencing psychiatric problems. TCH is requesting federal appropriations funding to expand the current Pediatric Behavioral Unit to serve children aged 6-12. This unit is located in one of the best towers of the hospital and is next to a large inpatient area that is not being used and therefore an expanded unit can be joined to the current unit by eliminating walls and reconfiguring the space to meet current regulatory standards and improve efficiencies. In addition to the operational efficiencies, there will be additional staff to complement the current behavioral unit staff. A feasibility study indicated that these positions will be self-sustaining within 12-month period. Referrals to the unit will come from the twenty-seven counties and the rescue crisis center. | Promedica Health System | 12 | 91 to 180 days | \$369,000 |
| Lucas | Renovation of Patient/Employee Garages - REVISED | Patients and employees of The Toledo Hospital and Toledo Children's Hospital have been using the north and south parking garages since the 1970s. The garages provide direct and covered access to the outpatient and inpatient services. In January 2008, TTH/TCH opened the new 10-level, 500,000-square-foot east tower. The completed facility located includes 288 private adult and pediatric patient rooms, spacious visitor waiting areas, new state-of-the-art surgical intensive care and newborn intensive care units, a children's cancer center, a nursing helipad and separate dedicated elevators for patients, visitors and hospital staff. The Jobst and Macintosh towers house 10 floors of outpatient clinic, physician offices and other health administration offices. The Education Center includes 11 conference rooms and an auditorium which community organizations reserve for their meetings. The thirty-year facility is in need of repairs, safety hazards include falling concrete and bursting drainage pipes. Changes within the financial markets have required the project to be placed on hold. | Promedica Health System | 20 | 0 to 30 days | \$1,200,000 |
| Lucas | Robotics Training Center - REVISED | TTH will establish a dedicated training center for robotics in northwest Ohio. The program under the Leadership of Bernardo Martinez, MD, will have three objectives: 1. Develop an extremely credentialized curriculum for training physicians to use robotics; 2. Establish a training center for physicians; 3. Use the training center as the foundation for research and development of new robotic equipment which will result in more jobs for our region; 4. Martinez is a nationally and internationally vascular surgeon with over ten years experience in using robotics in vascular surgery. The 6 week Robotic training program primarily located on The Toledo Hospital campus will cover Basic Skills, Basic Robotics and Advanced Robotics. The program will also be the foundation for research and development of minimally invasive surgical technology. | Promedica Health System | 14 | 91 to 180 days | \$2,587,550 |
| Lucas | The Toledo Hospital South Building Partial Demolt | Patients and employees of The Toledo Hospital and Toledo Children's Hospital have been using the north and south parking garages since the 1970s. The garages provide direct and covered access to the outpatient and inpatient services. In January 2008, TTH/TCH opened the new 10-level, 500,000-square-foot east tower. The completed facility located includes 288 private adult and pediatric patient rooms, spacious visitor waiting areas, new state-of-the-art surgical intensive care and newborn intensive care units, a children's cancer center, a nursing helipad and separate dedicated elevators for patients, visitors and hospital staff. The Jobst and Macintosh towers house 10 floors of outpatient clinic, physician offices and other health administration offices. The Education Center includes 11 conference rooms and an auditorium which community organizations reserve for their meetings. The thirty-year facility is in need of repairs, safety hazards include falling concrete and bursting drainage pipes. Changes within the financial markets have required the project to be placed on hold. | Promedica Health System | 20 | 91 to 180 days | \$6,300,000 |
| Lucas | Worker Safety Program - REVISED | The Toledo Hospital will reduce employee injury and its consequences in lost productivity and increased healthcare costs by providing specialized safety equipment used to move patients who are not ambulatory. An average of 12 employees were injured from 2005 through 2008 at The Toledo Hospital in the movement of patients. Each of these injuries costs an average of \$66,000 in medical care costs and productivity loss in a dollar cost of \$4,000 USD Dept. of Labor in addition to the pain and suffering of the injured employee. The hospital has lost financial security for themselves and their families. The consistent use of lifting and repositioning devices has been demonstrated to reduce the incidence of caregiver injury (Nelson, 2006). With stimulus funds, the hospital will immediately purchase the most effective and positive patient transfer equipment and devices, L-shaped transfer device, and other related equipment. | Promedica Health System | 0 | 0 to 30 days | \$323,290 |
| Lucas | Public Health Department Construction - Renovation | Facility to house medical treatment clinics servicing pediatric, prenatal, women's health, adult medical and other clinical services; operations for mental services targeting low income individuals; pharmacy center for low income and qualifying individuals. Interview rooms, clinic areas, teaching rooms and associated space for large WIC supplemental nutrition project servicing income eligible women, infants and children. Development of electronic medical record (EMR) system for the patients at this facility. Project will enhance patient care and increase efficiency and due to timely access of patient information and records. Additional operational revenue will be recognized in the future due to the enhanced billing capabilities. In addition to being the community's medical safety net, this project will supply updated facilities for our Environmental Health Unit that works on such issues as the Clean Indoor Air program (indoor second-hand smoke), soil and water contamination, the eradication of lead, and other environmental health issues. | Toledo-Lucas County Health Department | 130 | 91 to 180 days | \$6,600,000 |
| Lucas | Railroad Street/Jefferson Street Reconstruction | Road reconstruction | Village of Holland | 15 | 91 to 180 days | \$600,000 |
| Lucas | Madison Street/Kittle Road Reconstruction | Road reconstruction | Village of Holland | 15 | 91 to 180 days | \$450,000 |
| Lucas | From Algae to Aviation Fuel & Ethanol Simultaneous | With our method of rapid growing and harvesting algae, aviation fuel can be economically produced using our photobioreactor system and our steam repositioning process. The Cauffiel photobioreactor system is a closed loop, controlled atmosphere responsive green-house with energy efficient LED UV lights. The Cauffiel photobioreactor system consists of brush type reciprocating paddles that stir the algae very slowly to minimize algae reproduction and also cover the algae as required. Nitrogen and CO2 are pumped in at the bottom of long shallow ponds at a controlled rate to allow the algae has the best possible UV radiation and environment to grow. To assure maximum phytoplankton, reflective glass coated with spores above the ponds, the photobioreactor and the green house is kept dark by the use of the brush type reciprocating paddles. This assures that algae can grow not only at the surface, but through the liquid medium up to 0.2 dry pounds per gallon of water every 24 hours. The air extracted from the pond will be used for bio and aviation fuel, then the cellulose leftovers are put into the steam reposition reactor for the making of the ethanol. | Cauffiel Technologies | 50 | 0 to 30 days | \$5,000,000 |
| Lucas | Completion of Solar Roof Installation | Installation of additional photovoltaic (PV) system on the roof of the Toledo Museum of Art. This installation is in conjunction with the Museum's objective to reduce the use of conventional electric power, reducing peak power demand on a daily basis and save overall operating costs. This project is phase 2 of a multi-phase program to maximize the benefits of renewable energy as part of the Museum's aggressive alternative energy policy. The solar installation is projected to provide up to an additional 5% of the energy use of the Museum. Specific: Resource roofing to support solar installation. Install 16 kW PV system located on the roof of the Museum, flush mounted galvanized steel and aluminum. Wire in a series parallel configuration. Connect to the building's electrical system using multiple inverters and existing electrical breaker panels. | Toledo Museum of Art | 10 | 31 to 90 days | \$450,000 |
| Lucas | Geothermal Heat Pump cost reduction | Geothermal National Laboratory Report #ORNL/TM-2008/232 - The key underlying concern, clearly outlined in this report, is the high first cost of geothermal (Ground-Source) Heat Pump systems (GSHP). I currently have a patent pending for a device that could significantly reduce this high first cost. More specifically, this device would greatly reduce the installation cost of the ground loop heat exchanger. In addition, it would permit installations into areas that would not be possible or practical using existing methods, e.g., under buildings, wooded lots, parking lots, etc. This device would also allow for deeper installations into the earth where the moisture contents are higher, making for more efficient heat exchanges. The machine would be portable and could be set up and operated by one person. After the initial setup, the robot system would automatically install the outside ground loop pipe system. At present, I am working to obtain funding to have a prototype built to prove the viability of this technology. Our goal must be to search for technology that will economically reduce energy consumption and limit greenhouse gas emissions. Thanks for you | Thad Bick | 25 | 31 to 90 days | \$2,000,000 |
| Lucas | Integrated Electronic Medical Record | Identify, purchase and implement an electronic medical record that can support evidence based care for integrated service delivery (behavioral healthcare, primary healthcare, vocational rehabilitation, mental retardation/developmental disabilities). EMR would provide clinical decision support, e-prescribing, electronic billing as well as facilitate client/patient access to their healthcare information. Project would improve the efficiency and effectiveness of service delivery, ensure coordination of care across disciplines, and improve patient/client involvement in and access to their healthcare information. | Harbor Behavioral Healthcare | 4 | 31 to 90 days | \$750,000 |
| Lucas | Amolsch/Driftmeyer Ditch Relocation | Project consists of relocating Amolsch/Driftmeyer Ditch. Relocating of Amolsch/Driftmeyer Ditch will consist of constructing 12,200 feet of new channels and four new structures to cross under existing rail and roadways. Relocation of the ditch will reduce the risk of the railway area thus improving railway operations as well as reducing the potential for environmental degradation of the ditch and Lake Erie. Ditch relocation will increase stream capacity, provide opportunities for establishment of wetlands and reduce flooding in the City of Oregon. | City of Oregon | 180 | 181 days or more | \$2,880,000 |
| Lucas | Cedar Point Road Realignment | Project consists of 14,400 feet of new roads to realign Cedar Point Road from Otter Creek to Wynn Road, relocating a portion of Dupont Road. Road improvements include: improvements at the existing intersection of Otter Creek Road and Millard Crossover including traffic signal improvements; two lanes interchanged roads and railway drive; and call crossing protective structures. Relocating Cedar Point Road will assist with an orderly expansion of the existing refinery, improve safety of adjacent traffic and maintains circulation for traveling public. | City of Oregon | 285 | 181 days or more | \$4,560,000 |
| Lucas | Purchase 9 Motorola mobile radios for Ranger patro | We currently have 13 patrol vehicles of which four are equipped with mobile radios. The Rangers operating the other 9 vehicles have only portable radios for communication with the dispatcher and other agencies. Installed mobile radio would provide an alternate means of communication should the portable be dropped or otherwise inoperative. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$40,000 |
| Lucas | Municipal Building Renovation | Building renovation | Village of Holland | 12 | 91 to 180 days | \$270,000 |
| Lucas | Cadaver Lab | Establishing Cadaver Laboratory is the best way to educate students about human anatomy than through carefully and thoughtfully developed laboratory experiences using cadaver dissection and/or the exploration and examination of preserved cadavers. The opportunity to observe and wonder at the complexity of the human body, the impact of disease on human structure, the effects of age and the subtle or anatomy, and structural variations related to development are unique attributes of a cadaver experience. Laboratory experiences should be based on observational and practical training that results in a recognition and appreciation for the three-dimensional structure of the body, the interconnections between organs and organ systems, and the structural uniqueness of the human organism. This laboratory project provides interaction and collegiality between medical residents and nursing students, educational insight and knowledge from mutual collaboration between academic gross anatomy course and clinical practice, and community outreach to professionals requiring anatomical review. | Lourdes College | 5 | 91 to 180 days | \$100,000 |
| Lucas | Student to student peer-tutoring program | Students For Other Students (SOOS) is a non-profit organization that raises funds and provides the funds to public school districts (mainly in Ohio). SOOS uses pre-qualified students to tutor other students who are "falling through the cracks". Each participating school or district must provide a report at the end of the year. The tutors are paid between \$7.00 and \$8.00 per hour. Students was founded in 1989 by Ford B. Cauffiel. | Students For Other Students | 10,000 | 0 to 30 days | \$3,200,000 |
| Lucas | Digital Hospital Communications | We are requesting support to install a digital phone system at the University of Toledo Medical Center (UTMC) in order to reduce and/or eliminate phone wait times, misrouted calls and inappropriately dropped calls from patients, their families, referring hospitals and collaborating physicians. The antiquated phone system currently in use has been repeatedly cited as a major deterrent to the efficient and effective delivery of outstanding healthcare to patients in northwest Ohio. In addition, a digital phone system will form the backbone of a comprehensive network, allowing faculty specialists at UTMC to consult and assist in the care of patients at rural hospitals throughout Ohio. We believe that dramatically enhancing the phone system at UTMC will translate into a substantially better care, improving customer satisfaction and ultimately, ward to reduced mortality and morbidity among the population we serve. | University of Toledo Medical Center | 85 | 0 to 30 days | \$1,850,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lucas | Automated Patient Notification System | Automated patient notification by phone of upcoming appointments, tests, and therapies greatly enhances the reliability of delivering this critical information and dramatically reduces the occurrence of missed appointments. Eliminating errors in scheduling, reducing and eliminating no-shows to our clinics, and providing reliable and consistent information to patients as they prepare for upcoming appointments significantly decreases wasted time and resources in our healthcare environment. We are requesting 36 months of partial support for an automated phone system that will remind our patients of upcoming appointments and inform them of matters they should bring to the appointment in order to maximize the value of that visit. The automated system calls the patients' home cell the messages is received and is scheduled at times more likely to achieve successful contact. This initiative will reduce unused resources and simultaneously generate additional revenue through the elimination of clinic cancellations and no-shows, allowing us the opportunity to hire additional staff in order to further enhance our health care delivery system. | University of Toledo Medical Center | 45 | 31 to 90 days | \$83,904 |
| Lucas | Maintenance Building Addition | Building addition | Village of Holland | 12 | 91 to 180 days | \$200,000 |
| Lucas | Kipling Drive Reconstruction, Phase 2 | Road reconstruction | Village of Holland | 15 | 91 to 180 days | \$350,000 |
| Lucas | Dunn Drive Improvements, Phase 2 | Road reconstruction and water main replacement | Village of Holland | 15 | 91 to 180 days | \$273,590 |
| Lucas | Maumee Street Improvements | 325 Feet of Maumee Street will be reconstructed and widened from 18 to 23 feet. 1,070 feet of sewer will also be rehabilitated | Village of Holland | 15 | 91 to 180 days | \$177,480 |
| Lucas | Job Placement Services | Provide sequential employment services including job readiness, unpaid work experiences, job skills training, job placement and retention for 600 individuals with barriers to employment. Deliverables would include identification of strategies to overcome individual challenges to obtaining/training employment, increase employment rate and earnings of participants, reduce dependence on government benefits, and move people into employment. | Hudson Behavioral Healthcare | 40 | 31 to 90 days | \$1,300,000 |
| Lucas | Water Street Station | Rehabilitation of historic vacant power plant for housing and retail. | Sandwich Architects, Inc. | 6 | 31 to 90 days | \$2,000,000 |
| Lucas | Expansion of Goerlich Center - REVISED | The Goerlich Center, located on the campus of Flower Hospital, is a long-term care facility serving patients with Alzheimer's Disease and Dementia. It was established in the 1990s. Currently, the facility has 48 beds and also provides a day-care program to provide support for caregivers. There has been a notable increase in the number of people requiring these services. There are more than 80 people on the waiting list to get into the Goerlich Center. To help accommodate the need, funding is requested to expand the facility to 100 beds as well as increase the number of staff available to support the \$2.0 million and \$258,937 to hire 6 new positions; 3 aides, 2 RNs, and a licensed social worker. In addition, the construction will bring work to a lagging industry. | Promedica Health System | 21 | 0 to 30 days | \$1,258,937 |
| Lucas | Continental Baking Company (Wonder Bread) | Rehabilitation of historic vacant factory for housing and retail. | Sandwich Architects, Inc. | 21 | 181 days or more | \$400,000 |
| Lucas | Indoor Air Quality and Energy Monitoring | Install indoor air quality monitors throughout every public school in Ohio capable of continuously recording and reporting via the internet five critical variables including temperature, relative humidity, CO2, CO, and GVOC. Identify unhealthy indoor air for remediation and energy efficiencies in the heating and cooling systems. Expedited outdoor air would be improved air quality in the building by identifying and addressing symptoms for students and teachers while reducing energy costs by 15% by identifying faulty air flow HVAC systems and distribution. Also, assess the probability of mold and water damage and plan a remediation strategy for remediation. Several of public school in Lucas County have been identified for remediation. | Air Innovations Resources LLC | 100 | 0 to 30 days | \$71,700,462 |
| Lucas | Weatherization | Hire 2 people to insulate and air seal, 1 person for office support. Provide necessary weatherization training and any needed certifications. Lease a small building for office, storage, and staging. We have energy auditing tools and certifications. We also have commitments to help a local non-profit provide weatherization manpower as a job contractor. This is expected to last for 20 years, in that time we can weatherize approximately 200-300 homes. On the average this will save each homeowner \$500- \$1,500 per year or more for the 30 year life of the repairs. We need people to help us do the work and we're stretched too thin to do it alone. This program will help 100 homeowners per year to save money and energy. Once established we can add more crews as the business grows. We expect to offer our services in the private sector as well for energy auditing, insulating, and air sealing. A grant would be ideal, a low interest loan - or delayed pay back loan would also be effective. | Energy Performance Partners, LLC | 3 | 0 to 30 days | \$65,000 |
| Lucas | PRAIRIE DITCH #122 WATER QUALITY / DRAINAGE | 3 ACRES OF WETLAND, 33 ACRES OF WATER QUALITY RETENTION POND, 2.5 MILES OF TWO-STAGE DITCH CONSTRUCTION | LUCAS COUNTY ENGINEER | 20 | 181 days or more | \$3,500,000 |
| Lucas | To provide field officer training (FTO) to three R | Send three Ranger Supervisors to the Ohio Peace Officer Training Academy for a 5 day Field Training Officer course. This would provide for improved training for the Rangers. | Metroparks of the Toledo area Ranger department | 0 | 91 to 180 days | \$3,000 |
| Lucas | TEN MILE CREEK LOG JAM REMOVAL | 10 LARGE LOG JAMS IMPEDE FLOW ALONG FOUR MILE STRETCH OF TEN MILE CREEK. PROJECT WOULD REMOVE LOG JAMS. | LUCAS COUNTY ENGINEER | 4 | 91 to 180 days | \$70,000 |
| Lucas | TEN MILE CREEK DRAINAGE IMPROVEMENT | IMPROVE SIX MILES OF TEN MILE CREEK WITH ONE-STAGE DITCH DESIGN FOR WATER QUALITY AND FILTER STRIP FOR MORE WATER QUALITY DAMS AND FORDS WOULD BE REMOVED TO ALLOW FOR FISH TO SPAWN FURTHER UPSTREAM | LUCAS COUNTY ENGINEER | 20 | 181 days or more | \$5,000,000 |
| Lucas | Purchase four new bikes to be used by Rangers assi | Purchase four new bikes to be used by Rangers in their patrol areas. These bikes are used by Rangers assigned to the bike patrol. This provides for personal interaction with park visitors in all Metroparks and provides a deterrent effect to potential criminal activity. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$4,000 |
| Lucas | MAYER DITCH # 311 | BUILD THREE ACRE RETENTION / DETENTION POND TO REDUCE FLOW, SEDIMENT, AND EROSION DURING STORM EVENTS INCLUDING WATER QUALITY FEATURES TO POND. THIS IMPROVEMENT WOULD HELP RELIEVE FLOODING DOWNSTREAM IN CITY OF TOLEDO. THIS SAVES COSTLY IMPROVEMENTS INSIDE CITY LIMITS. THIS ALTERNATIVE WOULD ALSO BE LESS INTRUSIVE TO THE ENVIRONMENT. | LUCAS COUNTY ENGINEER | 12 | 181 days or more | \$280,000 |
| Lucas | Gallery Construction | The Museum is seeking funding for the renovation of gallery space to accommodate the growing collection of modern and contemporary art. In September 2018 the Museum embarked on the two-phase project: the first phase - demolition began in September and concluded in December. The second phase - new construction - remains incomplete pending funding. The planned relocation of the contemporary galleries will trigger significant installations in other areas, allowing augmented spaces and better connections among works of art in the areas of modern and contemporary art, African art, and Asian art. The space will also accommodate larger works of art and allow a greater representation of the Museum's collection to be on view regularly. | Toledo Museum of Art | 40 | 31 to 90 days | \$3,500,000 |
| Lucas | Purchase an electric patrol vehicle | Purchase an electric patrol vehicle for use by Rangers in our Wildwood Metropark. This will allow the Ranger to patrol areas not accessible by gasoline powered patrol vehicles. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$9,000 |
| Lucas | Purchase 13 lap top computers for Ranger patrol ve | This would also require less maintenance and reduced fuel consumption than with our present vehicles. Purchase 13 lap top computers for Rangers to use while in a patrol vehicle. This will expedite the preparation of reports and will reduce time spent in the office allowing them to be out in the field. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$13,000 |
| Lucas | Install closed circuit cameras in all parking lots | Install closed circuit cameras (CCTV) in the parking lots of all eight Metroparks. This will allow Rangers in patrol vehicles to monitor the cameras from the mobile data terminals (MDTs) in their patrol vehicles. These cameras would capture the vehicle description and license plate number of vehicles entering/leaving the parking lots. Our most prevalent crime in the Metroparks is theft from a vehicle. This would be a very good deterrent as well as an excellent investigative tool. | Metroparks of the Toledo area Ranger Department | 1 | 91 to 180 days | \$160,000 |
| Lucas | Purchase 5 new 12 gauge shotguns to replace 5 very | Purchase 5 new 12 gauge shotguns to replace 5 very old shotguns. These shotguns are carried in a rack mounted in patrol vehicles. | Metroparks of the Toledo area Ranger Department | 0 | 91 to 180 days | \$2,500 |
| Lucas | Ottawa River Navigational Dredging Project | The Ottawa River and Maumee Bay has been considered Northwest Ohio gateway to Lake Erie. The effects of sediment and low lake levels cause shallow depths, resulting in reduced boater activity. 1998 studies revealed that over \$4,000,000 in annual sales of which \$6,000,000 was lost, management and property. Dredging the river would add \$5,000,000 additional sales and \$3,000,000 of this would be additional income from new or higher paying jobs. The decline in lake levels has had significant stress on recreational boaters. | Ottawa River Kleanuo Association | 200 | 91 to 180 days | \$5,000,000 |
| Lucas | Zions Rebuild | Seeking to expand small business serving patients with Mental Retardation working out of home now which starts business growth many families look to house family members that have mental retardation in home has settings, dreams goal to be able to create home life settings and meet patients living needs. Which in return will lead to the hiring of three shifts and 24hr service. | Zions Residential Services | 20 | 31 to 90 days | \$25,000 |
| Lucas | An educational program teaching the many proven ad | This is a major financial education project targeting all the citizens in our county and aimed at refinement to permit expansion nationally and beyond. The project is lead by a 36 year veteran financial services industry veteran and author of two books in that genre. Please refer to www.wallstreeteconomics.com, www.indicatoradvisory.com and www.wallcan.org for additional background on our direction. We thank you for your consideration and look forward to your response. My best, Bob Kneisley | INDICATOR ADVISORY CORPORATION | 50 | 0 to 30 days | \$200,000 |
| Lucas | Human Anatomy Instruction & Research Laboratory | The University of Toledo authorizes the proposed project for a 16,000 sq ft Center for Anatomical Science Programs in Education and Research (ASPER) is required. This state-of-the-art facility will have expanded space for anatomy dissection and dissection table, an Anatomy Museum and Health Education Center, and embalming and storage of the UT Anatomical Donation Program. The present facility is inadequate to support anatomy education and training programs for nearly 1,000 students and health care careers. This includes over 2,300 health care students and medical residents, physicians receiving advanced surgical training with medical services, and anatomy outreach education for 3,147 K-12 students from NW Ohio and SE Michigan. The UT Anatomical Donation Program provides cadavers for 600 undergraduate health care students and 182 medical residents at universities in NW Ohio and SE Michigan. | University of Toledo College of Medicine | 6,000 | 181 days or more | \$2,500,000 |

|----------------|---|---|--|----------------|--------------------|---------------------------|
| Lucas | The Unemployed Assistance Program | <p>The Unemployed Assistance Program (UAP)</p> <p>Modified after a comprehensive Employee Assistance Program but with wellness coaching added the UAP will provide up to 5 free, confidential sessions to unemployed persons in Lucas County, OH, counseling with challenges: financial & other stress, relationship conflicts, depression, health and wellness, etc. Licensed and certified professionals will provide the services.</p> <p>Existing partnerships with mental health/substance abuse & health care professionals, financial consultants, vocational & job-seeking specialists, educational institutions, Regional Chamber of Commerce, Jobs and Family Services, and local Human Resource Association to be utilized to ensure continuum of available resources & access to job opportunities for the unemployed who participate.</p> <p>Services will be provided at accessible locations and telephonically. This program will serve 4,000 unemployed persons in Lucas Co work week days and evenings, with 247 crisis availability.</p> <p>Stimulus money to also add financial assistance to clients for transportation to appointments and interviews, child care, advertising and promotion of services.</p> | Harbor Behavioral Healthcare | 75 | 31 to 90 days | \$2,500,000 |
| Lucas | Diversification and Strengthening of the Scientific | A stipend/salary based training program will be put in place to train/train individuals in the chemical and pharmaceutical sciences in state of the art techniques required to support areas of need in the chemical and pharmaceutical sciences. In the chemical sciences these will include alternative energy, advanced materials and biotechnology. In the pharmaceutical sciences these will include advanced technologies in drug design, synthesis, delivery, compounding, toxicology and biomarker discovery. Opportunities will be afforded to those who desire training with a high school diploma, bachelor's degree or master's degree. By targeting individuals at varying degree levels, the existing knowledge base in these fields can be strengthened and a diverse base of individuals can be recruited to ensure continued growth of our nation's human resources in these vital areas of need within the economy. The project will be based at the University of Toledo, an institution that sits within one of the most diverse areas in the state of Ohio. The expertise in the areas of Chemistry and Pharmacy are in place to quickly implement this training program. Staff will be hired for daily operations. | University of Toledo | 100 | 31 to 90 days | \$1,250,000 |

| Lucas | Rocket Hall Parking Structure | ITS plan to construct two green energy transportation depots, one near the intersection of Dorr Street and Secor Road, and one near the Health Science Campus Medical Center. The Depots would each be three levels of structural parking, approximately 200,000 sq ft, and have 1,000 spaces with a 67,000 sq ft solar farm and solar panels. The solar array would be capable of producing 100,000 kWh per year. Multiple fueling/recharging choices will be available: hydrogen fueling, hydrogen fuel cells, ethanol, synthetic natural gas, and other UT research in practice. | University of Toledo | 150 | 181 days or more | \$10,000,000 |
| Lucas | The Ohio Renewable and Alternative Energy Corridor | The Ohio Renewable and Alternative Energy Corridor supports the President's recovery program. The program provides stimulus for jobs, reduction of dependence on petroleum imports and environmental impact strategies. This program utilizes the knowledge, edge renewable and alternative energy research of Ohio's top ranked academic and research institutions with the experienced manufacturing, skilled labor force, vibrant and various levels of government support to establish and carry out a comprehensive strategy for renewable energy projects in the region. This program brings long term economic growth potential to a region that desperately needs it. | Advanced Concepts and Technologies International, | 25 | 0 to 30 days | \$5,000,000 |
| Lucas | Covered Bridge Repair / Restoration | The entrance to our subdivision includes a very nice covered bridge, built around 1964. The bridge surface is being replaced by the City of Sylvania, but the canopy is not. We would like to preserve the covered bridge canopy - it is beautiful, adds much to the community and increases the value of the houses in the neighborhood. It also will create a job for our community. | Sleepy Hollow Homeowners Association | 2 | 91 to 180 days | \$200,000 |
| Lucas | University of Toledo Center for Child Health | comprehensive medical home for children in an environment that is multidisciplinary in scope, educational in setting, evidence based in practice, and compassionate in approach. | The University of Toledo | 15 | 91 to 180 days | \$750,000 |
| Lucas | Reduction of Suspensions and Expulsions for Emotio | Training School Personnel, Parents and Students on utilizing Collaborative Problem Solving by Dr Ross Greene, Harvard University, to defuse crisis, increase positive behavior, decrease the number of suspensions/expulsions for emotionally ill students in the Toledo Public School System. Project a continuation of work in progress by Lucas County Schools for the past 4 years. Project has been funded by the Small Business Association and will continue to be partially funded by the Lucas County Mental Health and Recovery Services Board. Will serve 4 schools, 2 junior high and 2 high school, will train all special education teachers, para professionals and parents. Also will train all staff on Collaborative Problem Solving. Will provide materials and consultation for a school year for all teachers implementing project. Will consult with parents as needed. | NAMI of Greater Toledo | 5 | 31 to 90 days | \$35,000 |
| Lucas | Mobile Car Video Cameras | Purchase of nine (9) in car video systems for marked patrol units to record and document traffic and criminal violations. Documentation would be used to support officer testimony in court proceedings and would also increase officer safety during traffic and criminal contacts. | Village of Waterville, Waterville Police Departmen | 0 | 31 to 90 days | \$40,500 |
| Lucas | OHIO READY TO WORK | The Ohio project combines the strength of two important training programs to reach those seeking workforce training: 1. OETTS with collaboration and input from Ohio Jobs and Family Services, Ohio ABLE, and the Small Business Association proposes to use WORKPLACE ESSENTIALS as a keystone to a package that would include the daily statewide broadcast of the 25 episode series that teach not just the skills but also the attitudes necessary to succeed at work. Reading, writing, math, communication, and problem solving are presented in workplace contexts. Learners see how to prepare résumés and applications and how to prepare interviews and for the workplace. In-depth documentary and scripted footage shows what employers look for in new hires and how to fit in and thrive in a new job. A variety of technology formats are used to present an integrated learning system, with workbooks, an interactive online component, and a teacher's and a student's guide. 2. The project would also include a multi-format distribution of the OED series, in partnership with the ODE ABLE agencies, to assist the nearly 50% of welfare recipients who have less than a high school diploma. | Ohio Educational Television Stations, Inc. | 25 | 31 to 90 days | \$1,750,000 |
| Lucas | OHIO READY TO WORK | The Ohio project combines the strength of two important training programs to reach those seeking workforce training: 1. | Lucas | Take Charge, Live Well | I would love to duplicate the "Take Charge Live Well" program currently being offered to the Ohio state employees. Our goal for this program, in the next year is to improve the overall health of employees and their families and to help manage the cost of healthcare benefits. This program is currently only available to state employees and implementing this program in the private sector could result in eventual healthcare cost savings nationwide both in the public and private sector. The program is voluntary and it's designed to be simple and straightforward, so everyone can participate. Healthcare costs in the US are growing at an astronomical rate. Developing programs to help employees and their employers stem the growth of these costs and develop better health habits is essential to keeping American workers on the job and out of the health care system. | Work-Fit | 1275 | 181 days or more | \$20,000 |
| Lucas | Employee Identification System | Purchase of a Photo Identification System that would meet Federal ID Guidelines for the identification of Municipal Employees. This would enhance safety and security of the citizens, business owners and their employees along with visitors to the community by identifying municipal employees with a tamper proof and picture identification. | Village of Waterville, Waterville Police Departmen | 0 | 0 to 30 days | \$10,000 |
| Lucas | Empowered 2 Run | Empowered 2 Run is a youth obesity prevention program in Lucas County Ohio serving youth and parents for weight loss, physical fitness and the prevention of obesity and promoting healthy life styles. Obesity rates in northwest Ohio are alarming with 40% of 3rd graders being obese as an example. E2Run in collaboration with Toledo Public Schools, Toledo Metro Parks, Toledo Metro Parks, Toledo Human Resources Association, local nutritionists, fitness specialists, and parents will provide an after school training program that encourages exercise, weight loss, and developing a healthy life style. E2Run learn morning activities, wellness and physical education, nutrition seminars, meal and snack demonstrations, and fun and meaningful events including 5K, 1K, 1/2 marathon and full marathon event support will be provided. Parents will be encouraged to participate as two-thirds of adults in northwest Ohio are also considered obese. Outcomes will include connecting with 150 youth and parents to complete a 16 week program from spring through fall. Programs will culminate in successful completion of goals including weight loss, knowledge on healthy styles, and running 1/2, 1K, 1/2 marathon or full marathon race. | E.A. Lewis Consulting | 5 | 91 to 180 days | \$151,200 |
| Lucas | HELDMAN DITCH #442 | HALF TEN AND A HALF ACRE RETENTION / DETENTION POND TO REDUCE FLOW, SEDIMENT AND EROSION DURING DRAINAGE EVENT INCLUDE WATER QUALITY FEATURES TO POND THIS IMPROVEMENT WOULD HELP RELIEVE FLOODING DOWNSTREAM IN CITY OF CLEVELAND, THIS IS A BAYVIEW CITY IMPROVEMENTS INSIDE CITY LIMITS, THE ALTERNATIVE WOULD BE LESS EXPENSIVE TO THE ENVIRONMENT. | LUCAS COUNTY ENGINEER | 12 | 181 days or more | \$950,000 |
| Lucas | SWAN CREEK POND PROJECT | SEVENTY ACRE POND TO HELP CAPTURE POLLUTANTS THAT INCLUDE SEDIMENT, AGRICULTURAL RUNOFF FEES, AND OTHER WASTES MATERIAL 200' OF TWO STAGE DITCH TO ALSO HELP CAPTURE POLLUTANTS POND WILL UTILIZE OTHER WATER QUALITY FEATURES AND COULD BE USED FOR FISHING AND RECREATION THE POND WILL ALSO HELP REDUCE FLOODING THAT OCCURS IN THE WATERSHED | LUCAS COUNTY ENGINEER | 20 | 181 days or more | \$3,000,000 |
| Lucas | Digital Campus Project-Electronic Health Record | Digital campus Completion: This project will complete a multiphase multiyear initiative to serve patients, education and science through a world class clinical information system. We do not want to wait to be able to complete the critical mission of clinical documentation and IT computerized physician order entry (CPOE) to fully operationalize the hub and spoke clinical information system. This is initially a software and technology equipment project and will include training and support opportunities for faculty, graduate students, technologists and support personnel, as well as learning and research opportunities when complete. Further, it will enhance the quality of health care delivery and access while decreasing costs. | university of toledo | 10 | 0 to 30 days | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Lucas | 800 Mgr Mobile Radios | Currently the Waterville Police Department does not have an 800 MHz mobile radio in three of its vehicles and the officers have to use a portable radio for communication. The addition of three mobile 800 MHz radios would result in more efficient communications and increase officer safety. Design and Build a Self contained alarm system used on all construction projects and on RV's & Marine units. System to be sold later via. Proposed Sales 100,000 units. Currently have 58 units of older models in service | Village of Waterville | 0 | 0 to 30 days | \$10,500 |
| Lucas | Self Contained Alarm system | | Seagate Solutions | 10 | 0 to 30 days | \$40,000 |
| Lucas | SWAN CREEK LOG JAM REMOVAL | APPROXIMATELY 16 LARGE LOG JAMS INFEDE FLOW ALONG 9 MILES OF SWAN CREEK PROJECT WOULD REMOVE LOG JAMS. Positioned on Toledo Riverfront within Toledo business district. Promenade Park has long played a vital role as a public gathering space for musical events and festivals. This once very active riverfront space is in great need of reconstruction. The first phase of construction is ready to begin. | LUCAS COUNTY ENGINEER | 4 | 91 to 180 days | \$128,000 |
| Lucas | Promenade Park Reconstruction Project | International Park boat basin is a signature element on Toledo's waterfront landscape. Original construction documents could be utilized to bid and reconstruct the boat basin pedestrian walks immediately. | City of Toledo | 12 | 31 to 90 days | \$1,500,000 |
| Lucas | International Park Riverfront Walk Replacement | | City of Toledo | 6 | 91 to 180 days | \$500,000 |
| Lucas | Mental Health and Substance Abuse Initiative and I | Dr. Cross is licensed in Ohio as both a Psychologist and Licensed Independent Chemical Dependency Counselor. His office currently employs 2 additional psychologists and 2 Social Workers. This proposal will allow the hiring of 10 to 15 additional counselors and social workers to work with and train a variety of agency staff in the Veterans Administration (Northwestern Ohio) and other human service agencies working with at risk populations for mental health and substance abuse problems. The purpose of the training will be to equip other professionals to intervene in the early stages while also encouraging identification and treatment for those with more advanced problems. Additional funds are included in this request for the actual treatment of individuals who are without adequate insurance for either intervention or treatment of early stage through advanced substance abuse or mental health problems. | Comprehensive Counseling Center | 15 | 0 to 30 days | \$1,225,000 |
| Lucas | OHIO READY TO LEARN | OHIO READY TO LEARN IS A STATEWIDE PROJECT TO EDUCATE TYPE A HOME CHILD CARE PROVIDERS IN CHILD DEVELOPMENT, STATE STANDARDS, STATE CONTENT STANDARDS, ADMINISTRATION AND HOME SAFETY. WORKSHOPS ARE STRUCTURED TO PROVIDE PROFESSIONAL DEVELOPMENT CREDITS FOR THE PROVIDERS IN ORDER TO REACH OR MAINTAIN STATE CERTIFICATION IN CHILD CARE AND EARLY CHILD CARE EDUCATION. APPROXIMATELY 9600 PROVIDERS ARE REACHED EACH YEAR AND PROVIDED WITH MATERIALS AND TECHNIQUES TO WORK WITH PRESCHOOL CHILDREN AND THEIR PARENTS. CETS PROVIDES STATE WIDE COVERAGE OF THE PROJECT THROUGHOUT THE STATE. WORKSHOPS ARE SUPPLEMENTED WITH ADDITIONAL TECHNOLOGY FORMATS, PROVIDING INFORMATION ON DVD, THE WEB, STREAMING VIDEO, AND A LENDING LIBRARY. | OHIO EDUCATIONAL TELEVISION STATIONS | 500 | 31 to 90 days | \$1,850,000 |
| Lucas | Wilson Park Walking Path | Construct neighborhood walking path and provide general site improvements. | City of Toledo | 4 | 31 to 90 days | \$165,000 |
| Lucas | Bike Path Program | Construct, repair or replace up to 5 miles of bike path as part of emerging bike path system. | City of Toledo | 8 | 181 days or more | \$1,250,000 |
| Lucas | Playground Equipment Replacement Program | Replace, repair and improve neighborhood playgrounds. | City of Toledo | 5 | 181 days or more | \$450,000 |
| Lucas | High School Math and Science Applied to Environment | Environmental and Occupational Health and Safety focuses on the anticipation, recognition, evaluation and control of factors in the environment that can cause human illness. The hazardous agents are either categorized as physical, chemical, biological, mechanical and psychosocial. Includes indoor and outdoor and workplace and non-workplace settings. The focus is on preventing or at least minimizing the magnitude of human illness and injury associated with exposures to hazardous agents in various settings. The primary goal is to increase awareness and understanding of the applied science of Environmental and Occupational Health and Safety. 1) list and discuss categories of hazardous agents and factors. 2) anticipate, recognize, evaluate and control hazardous agents or factors. 3) apply fundamental science, math, and communication skills via objective and rational investigation, analysis, and reporting. 4) work within a representative organizational structure and management model. | University of Toledo College of Medicine | 3 | 0 to 30 days | \$250,000 |
| Lucas | Telemedicine in Rural Communities | The University of Toledo authorizes the proposed project to establish a telemedicine network to serve rural communities in Northwest Ohio and beyond. The Telemedicine Network will engage in real-time and asynchronous (on-demand) distance delivery of basic and applied clinical aspects of medicine and other health care disciplines between at least two, as well as, among many sites simultaneously. The primary goal is to increase outreach to rural and underserved areas. Accordingly, this will facilitate overcoming the limitations of both time and space due to long distances in order to conduct high-quality collaborative, patient monitoring and consultation from one site to another. | University of Toledo College of Medicine | 4 | 91 to 180 days | \$1,500,000 |
| Lucas | Park Infrastructure Improvements | Replace and repair existing park roads and parking facilities. | City of Toledo | 4 | 181 days or more | \$500,000 |
| Lucas | Adult Day Support Program | The establishment of an adult day support program designed to serve individuals with mental retardation and developmental disabilities. An alternative to sheltered workshops based on social, recreational and leisure pursuits serving individuals who don't choose to pursue day services at a production site. The program will initially serve 8 - 12 individuals and employ 4-5 staff members. The funding would provide start-up costs including rent, furniture and used to purchase a van for program transporting the clients. The program would also purchase wheelchairs and several seated consumers. | Community Residential Services, Inc. | 5 | 31 to 90 days | \$60,000 |
| Lucas | General Park Improvements | Replace picnic tables, benches, signage, miscellaneous pavements, address ADA compliance, vandalism issues, and other site improvements at various City parks. | City of Toledo | 5 | 91 to 180 days | \$400,000 |
| Lucas | Propane Conversion Of Gasoline Engines | The key goal of this proposal is to convert 10,000 Ohio government and non-profit organization gasoline fleet vehicles to operate on propane. Benefits of conversion include: cost reduction of operation, use of USA fuel source, and reduction in environmental emissions. The operator of the fleet vehicle will be provided a \$4000 grant to convert the vehicle to propane. Balance of costs involved will be borne by the operator. There is a credit of \$0.50 per gallon of propane used provided by the Federal government. MedCorp Green will administer the grant and carry out the conversion. Two mechanical shops exist now in Toledo and Cincinnati. Additional shops will be located in Columbus, Cleveland, Dayton and Akron as needed. MedCorp Green will hire and train mechanics to provide the service. Overall cost of program is \$60,000,000. Target of grants provided city and state entities is \$40,000,000. Reduction of gasoline used is estimated at 25,000,000 gallons annually. Savings in gasoline reduction as a minimum is estimated at \$25,000,000 per year. Payback on investment is expected at less than 2 years. If all of vehicles is a years return on investment is projected over \$60,000,000. | MedCorp Green | 180 | 0 to 30 days | \$400,000 |
| Lucas | Reynolds Road Roadside Bio-Swale and Urban Beautif | The Greenhouse Corridor Initiative on Reynolds Road incorporates a bio-swale system, with other improvements directed at improving the overall appearance of the corridor with urban beautification efforts. Further, the project will establish a state-of-the-art of visual quality and environmental sensitivity on a major gateway street in the City of Toledo. The project is also intended to demonstrate that major urban corridors can benefit from a re-look with current green practices. | City of Toledo | 7 | 181 days or more | \$891,000 |
| Lucas | International Park Pedestrian Underpass | This project is designed to continue the International Park Riverfront walkway and create a planned pedestrian connection to the new Marina District. | City of Toledo | 4 | 181 days or more | \$600,000 |
| Lucas | Ottawa Park Ice Rink Cover | Install covering over outdoor public ice skating rink. The cover will be a tensionable fabric which will incorporate soft panel solar into the fabric. The solar panels will lead interior LED lighting and save energy over the high prices currently in use. The cover will add months to the skating season by protecting the ice from sun, rain and snow as well as save on energy used by the refrigeration system. | City of Toledo | 55 | 31 to 90 days | \$625,000 |
| Lucas | Biohazardous Waste Reduction and Energy Recovery | The University of Toledo authorizes the proposed project to treat biohazardous hospital and laboratory wastes and simultaneously recover energy. An existing pyrolysis system on the UT Health Science Campus can efficiently convert coke into energy for the hospital. The proposed project will involve commingling coke with biohazardous wastes (generated from the hospital and research laboratories). The objectives are to pyrolyze and reduce the volume of biohazardous wastes and generate and recover energy to meet needs of the hospital. The initial pilot stage will involve establishing the appropriate measures and measuring the extent of pathogen reduction and characterizing the type of chemical byproducts formed. The ultimate goal is to document effectiveness and implement the technology for commercial purposes. | University of Toledo College of Medicine | 12 | 181 days or more | \$1,000,000 |
| Lucas | Health Science Campus Digital Classroom Completion | The University of Toledo authorizes the project to complete the digital classrooms on the Health Science Campus. This project will entail renovation and expansion of existing classrooms and installation of state-of-the-art computer, audio-visual and video capture and transmission technologies. These classrooms will serve students and faculty from the College of Health Science and Human Service, Medicine, Nursing, and Pharmacy. | University of Toledo | 600 | 31 to 90 days | \$3,500,000 |
| Lucas | Nuclear Imaging Center | The University of Toledo authorizes the proposed project for the Nuclear Imaging Center. This is a continuation of the centralization of clinical imaging services to improve patient service, better integrate care, and leverage the advanced clinical information system investments now fully operational at UTMC in advanced picture archiving. This is predominantly a construction, renovation and equipment project which will produce best standing employment opportunities and better serve patients and learners when complete. | University of Toledo | 25 | 91 to 180 days | \$1,500,000 |
| Lucas | Medical Mall Completion | The University of Toledo authorizes the proposed project for the Medical mall completion. The completion of a final phase of a multimillion dollar project enhancing patient access and service, lowering the cost of health care delivery and improving quality. This will bring together our world class medical student programs with enhanced imaging, physical/occupational therapy, pharmacy and laboratory services. This is physically construction and equipment and will surely create employment opportunities for health care professionals, and support personnel, as well as learning and research opportunities when complete. | University of Toledo | 100 | 181 days or more | \$4,000,000 |
| Lucas | Outpatient Physical Therapy/Occupational Therapy E | The University of Toledo authorizes the proposed project for Out Patient Physical Therapy / Occupational Therapy expansion. The expansion and modernization of space and equipment in the Physical therapy and occupational therapy areas to support increasing needs from musculoskeletal, neurological, and other inpatient geriatric services. This is initially construction and equipment and will surely create employment opportunities for physicians, therapists and support personnel, as well as learning and research opportunities when complete. | University of Toledo | 50 | 91 to 180 days | \$2,700,000 |
| Lucas | Digital Campus | The University of Toledo authorizes the proposed Digital Campus Completion. This project will complete a multiphase multiyear initiative to serve students, education and science through a world class clinical information system. As described, we will now be able to complete the critical phase IV and V Stages to fully operationalize the hub and spoke clinical information system. This is initially a software and technology equipment project and will surely create employment opportunities for faculty, graduate students, technologists and support personnel, as well as learning and research opportunities when complete. Further, it will enhance the quality of health care delivery and access while decreasing costs. | University of Toledo | 200 | 181 days or more | \$8,500,000 |
| Lucas | Block Health Science Modular Laboratories | The University of Toledo authorizes the completion of the Block HS Modular laboratories. This project will support the completion of a health and bioscience modular laboratory transition project, enhancing laboratory space and quality for basic science and bench to bedside medical research. This will support the center for translational research programs, bring scientists together in a modern laboratory setting, and highly productive health and bioscience research. This is initially construction and equipment and will surely create employment opportunities for faculty, graduate students, undergraduates and support personnel, as well as learning and research opportunities when complete. | University of Toledo | 100 | 181 days or more | \$9,500,000 |
| Lucas | Center for Clinical Simulation and Virtual Reality | The University of Toledo authorizes the expansion of the Center for Clinical Simulation and VR Education. The expansion of space, renovation and enhanced simulation equipment in an established center dedicated to interdisciplinary health professions education through the use of team building, high fidelity simulation and virtual reality educational pedagogies. This is initially construction and equipment and will surely create employment opportunities for faculty, graduate students, industry relationships and support personnel, as well as markedly enhanced learning and research opportunities when complete. | University of Toledo | 20 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Lucas | Clinical Pathology Services Facility | The University of Toledo authorizes the expansion and renovation of the Clinical Pathology Services facility. This project will modernize the medical center pathology space and equipment dedicated to clinical pathology services. This will improve patient care as well as enhance our educational and research programs. In particular, it will address much outsourcing of services, producing better, more patient centered care. This is initially construction and equipment and will surely create employment opportunities for technologists, faculty, graduate students, industry relationships and support personnel, as well as markedly enhanced learning and research opportunities when complete. | University of Toledo | 20 | 181 days or more | \$3,500,000 |
| Lucas | Laboratory Renovation | The University of Toledo authorizes Laboratory Renovation. The project is necessary to convert the current Gross Anatomy Teaching labs into functional, basic and preclinical science research wet labs. This renovation is critical to the stated goal to expand neuroscience research and education at the College of Medicine. The Laboratory Renovations will increase the ability and capacity to recruit at least 8 new junior and senior scientists with current grant funding and enhance the potential for future funding through a synergy with new recruits and current scientists at the College of Medicine. | University of Toledo College of Medicine | 40 | 91 to 180 days | \$500,000 |
| Lucas | Science Education on Neuroscience and Drug Abuse | The University of Toledo authorizes the plan which is aligned with the Development of a 21st Century Education System and the goal of Lowering Healthcare Costs. The proposal is to develop an innovative model for enhancing knowledge and understanding of neuroscience with a focus on the biology of drug abuse and addiction among K-12 students, the general public, health care practitioners, and other groups. Partnerships will be formed between scientists and educators, media experts, community leaders, and other interested organizations to develop programs and materials that will enhance knowledge and understanding of science related to drug abuse. The participation of individuals from racial and ethnic groups underrepresented in biomedical and behavioral research, individuals from disadvantaged backgrounds, individuals with disabilities, and women will be encouraged. The long term objective is to fulfill a need to improve efforts in science education in order to maintain U.S. competitiveness and meet future demands in the international technology marketplace. | University of Toledo College of Medicine | 5 | 91 to 180 days | \$200,000 |
| Lucas | Office Conversion to Laboratories | The University of Toledo authorizes the plan to renovate existing office space into laboratory space to accommodate 5 new faculty recruit and their laboratory personal and equipment in the Department of Neurosciences. This renovation will expand and enhance our research capabilities and provide the much needed facilities for new faculty. Consequently, new jobs will be created for laboratory personnel including graduate students, medical students and research technicians that will accompany the funded research programs of the newly recruited faculty. In addition, renovation is needed to improve air handling in the facility (booster) for gross anatomy teaching. | University of Toledo College of Medicine | 25 | 31 to 90 days | \$500,000 |
| Lucas | McKesson Horizon Anatomic Pathology software syst | The University of Toledo authorizes a new software system for the University of Toledo Medical Center Clinical Laboratory to accomplish the following objectives that the present system does not provide: (1) seamless integration with the existing University of Toledo Hospital McKesson-based electronic records. For facilitating transfer and sharing of patient reports and records; (2) marked reduction in potential medical errors because of data, transcription, and patient database as all contained within individual patient accounts, precluding errors in entry or transfer of data; and (3) capability to archive pathology images directly in the patient record, where they are available for clinical review and for resident teaching. | University of Toledo College of Medicine | 15 | 0 to 30 days | \$385,000 |
| Lucas | Annual maintenance of Annual Maintenance Contract | The University of Toledo authorizes the service contract that will allow continued operation of the new McKesson AP software system. | University of Toledo College of Medicine | 20 | 0 to 30 days | \$64,000 |
| Lucas | St. James Project | We are purchasing two adjoining buildings in a targeted development zone, a union hall and an existing historic building. We will clean and restore the exterior and kitchen facilities, clean and modernize the rooms, and add up to 2 restaurants and a cafe. New businesses along the ready vacant street create corridor. All possible Green technologies will be used as much as economically feasible. Historic district rules, such as solar power, geothermal heating, new lighting technologies. Lease purchase arrangements of the properties are nearly final. We are good shoppers, you can be assured that maximum sustainable benefit for the neighborhood will be obtained from each dollar. We have also been talking with neighborhood agencies and will be providing job training and free neighborhood group meeting spaces. A combination of a percentage of the continuing net profits from the hotel will go to the Toledo Historic Foundation to assist them in the restoration of historic neighborhood houses. Our neighborhood thanks you for your consideration. | St James Project | 80 | 0 to 30 days | \$220,000 |
| Lucas | MD Student Pathology Fellowship | The University of Toledo authorizes a postgraduate fellowship program in pathology. This program provides a unique and highly sought-after, year long experience in Pathology for medical students after the first two classroom years and prior to the last two clinical years. In recent years no students have competed for these positions. Graduates include the present Chief of Pathology at MD Anderson Cancer Hospital in Texas and the present Chief of Anatomic Pathology at the University of Connecticut. We are able to accommodate three fellows in this program, but we only have funding for two. This award would allow selection of a third fellow for FY 2010. | University of Toledo College of Medicine | 3 | 0 to 30 days | \$19,225 |
| Lucas | Parent Education in Pediatric Clinics | Low income or limited resources is a pervasive problem in pediatric medicine. While the role of the physician, nurse, case manager or educational focus, in recent studies more than 40% of parents reported significant unmet needs for parenting help from their pediatricians. Parents frequently ask pediatricians about general discipline and children's behavioral problems. They want to raise healthy, nonviolent children, but lack the knowledge or resources to do so. When caregivers are given the skills for effective, nonviolent discipline, the likelihood of child abuse and violent behavior decreases. Pediatricians often report that they lack the time or resources necessary to educate parents effectively on discipline. The ACT program addresses family violence and child maltreatment prevention through basic parent education. Practical benefits include bolstering of family resilience, reducing stress, and lowering health care costs, important goals in a time of economic downturn. UT already hosts the ACT Midwest Regional Center, while the UT Medical Center runs a busy pediatric outpatient office where this program can be offered. | University of Toledo College of Medicine | 2 | 31 to 90 days | \$200,000 |
| Lucas | Tera Recon Upgrade | The University of Toledo authorizes an upgrade to the Tera Recon Server allows unlimited number of physicians to utilize work stations that process images generated from the CT Scanners. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 0 to 30 days | \$108,000 |
| Lucas | Three OEC Mobile digital X-ray Machines | The University of Toledo authorizes addition of three Mobile X-ray machines used to take bedside images of bedside when patients are too ill to be brought to the department. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 0 to 30 days | \$360,000 |
| Lucas | Two OEC Mobile Digital C-ARMS | The University of Toledo authorizes addition of two Mobile Surgical C-Arms equipped with fluoroscopy utilized in Operating Room suites and Endoscopy suites to assist surgeons during surgery and treatment. Lowers healthcare costs while increasing patient safety. Serves a replacement of obsolete Nuclear Medicine Gamma Camera to show molecular imaging and demonstrate physiology in exams such as lung scans and bone scans. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 0 to 30 days | \$480,000 |
| Lucas | Phillips Nuclear Medicine Gamma Camera | The University of Toledo authorizes the replacement of obsolete Nuclear Medicine Gamma Camera to show molecular imaging and demonstrate physiology in exams such as lung scans and bone scans. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 31 to 90 days | \$400,000 |
| Lucas | Two GE Digital X-ray Rooms | The University of Toledo authorizes the proposed replacement of two analog x-ray rooms, to improve department efficiency diagnosis and report turnaround time while preparing imaging department for more of Nuclear Medicine & radiology ICU cases. Expands healthcare access. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 31 to 90 days | \$800,000 |
| Lucas | CR for Digital Mammography Images | The University of Toledo authorizes addition of state of the art digital imaging processing for mammography procedures. Used in conjunction with needle localizations and breast biopsies and breast ultrasound examinations. Assist physician diagnosis. Used in Medical Education, lowers Health-Care costs. | University of Toledo College of Medicine | 15 | 0 to 30 days | \$85,000 |
| Lucas | PACS upgrade | The university of Toledo authorizes the upgrade of the PACS system. The current PACS system will be end of life. Upgrade demonstrates more detailed images and information for surgeons and attending physicians. New version improves productivity due to advances in image compression. Assist in physician diagnosis. Decreases overall healthcare costs. | University of Toledo College of Medicine | 15 | 181 days or more | \$195,000 |
| Lucas | Research Animal Facility Core Laboratories | The University of Toledo authorizes the proposed renovation of the existing ABBS3 facility in the Department of Laboratory Animal resources to permit simultaneous research with multiple pathogens. This research is integral to prevention, treatment and eradication of disease. | University of Toledo | 12 | 181 days or more | \$750,000 |
| Lucas | Upgrade Rodent Housing Lab | The University of Toledo authorizes addition of equipment to upgrade conventional rodent housing in DKAR animal lab to hepa-ventilated systems. | University of Toledo College of Medicine | 12 | 91 to 180 days | \$500,000 |
| Lucas | Development of "Return to Workforce" Pathways for | The University of Toledo authorizes the proposed program Development of "Return to Workforce" Pathways for Healthcare Professionals. This program would focus on re-employment, education and classroom experience to permit physicians and other applicable healthcare professionals to update and/or expand their knowledge, comprehension and skills in general practice and specialty areas. This would contribute to a stronger and expanded health care workforce, especially in underserved regions. | University of Toledo College of Medicine | 1000 | 181 days or more | \$2,000,000 |
| Lucas | Learning to Work in Healthcare Teams to Advance Pa | The University of Toledo authorizes the proposed project "Learning to Work in Healthcare Teams to Advance Patient Safety and Treatment Efficiency". A program will be developed to bring healthcare students together for well-designed classroom and clinical experiences. Student groups will include medical, nursing, physical therapy, occupational therapy, respiratory therapy, paramedic, and pharmacy. The ultimate goal is to improve the dynamics and energy within and among these groups to improve patient safety and health care as a whole. | University of Toledo | 1000 | 91 to 180 days | \$1,600,000 |
| Lucas | Clinical Training program for Rural Emergency Medi | The University of Toledo authorizes the program proposed to involve clinical training in the Emergency Department at small community hospitals within Northwest Ohio. The training physicians will be working with Attending physicians in these facilities on an average of 30 to 40 hours a week. The training physician will be expected to evaluate patients under the direction of the Attending physicians and manage a wide variety of medical/surgical problems that present in these community hospitals. They will become proficient in the clinical management of patients in the emergency setting, understand the expectations and limitations in these facilities and recognize the appropriate disposition of patients based on these limitations. These physicians will become proficient at stabilizing patients in this acute care environment and become knowledgeable in accessing additional resources to assist in patient care when local resources may be limited. Training physicians will be expected to communicate with the medical staff, ancillary personnel, administration and other tertiary-care facilities as necessary to arrange appropriate patient care and management. | University of Toledo College of Medicine | 1000 | 181 days or more | \$1,300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------------------------|---------------------------|
| Lucas | Toledo Prosecutor | If a program is available, funds would be requested to hire two general prosecutors (full-time) for the City of Toledo Prosecutor's Office. Currently the staff has one chief, five assistant prosecutors. There is also one assistant prosecutor who is a crimes against women prosecutor who's case load is limited due to the fact that her positions is funded by VAWA and JAG grants and she can only handle crimes of violence against women. There are seven judges in the Toledo Municipal Court and even with Chief Prosecutor being assigned to a courtroom there is one judge who's courtroom does not have an assigned prosecutor. We need one additional prosecutor just to sufficiently cover all courtrooms. Two prosecutors would be ideal. Due to City of Toledo budget problems it is certain no money will be available to hire an additional prosecutor and, quite likely, that cuts will be made in the current staff of the prosecutor's office. This would assist us greatly. | City of Toledo Prosecutor's Office | 2 | 0 to 30 days | \$140,000 |
| Lucas | Maritime Medicine Education and Training Center | The University of Toledo authorizes the proposed project to establish and staff a Maritime Medicine Education and Training Center. This will involve purchasing a 4yr old building that consists of classrooms, offices, cafeteria and exam rooms. The goal is to provide emergency medical technician and paramedic training for maritime industry personnel, as well as, establish a telemedicine communication network for remote access to medical consults from Great Lakes vessels to the UT Health Science Campus. | University of Toledo | 1000 | 181 days or more | \$3,200,000 |
| Lucas | COVAW Prosecutors | The City of Toledo Prosecutor's Office is severely understaffed. However, one bright spot has been the City's COVAW prosecutor program. Through a combination of JAG and VAWA funding, one prosecutor was retained this year to prosecute domestic violence and other crimes of violence against women. However, her position was not fully funded. Approximately \$5,000 will be requested to fully fund her position. Additional funds will be requested to hire one additional full-time (35-40 hours per week) COVAW prosecutor and two legal interns (15-20 hours per week) from the University of Toledo College of Law. | City of Toledo Prosecutor's Office | 3 | 31 to 90 days | \$100,000 |
| Lucas | Maritime Medicine Education and Training Center | The University of Toledo authorizes the proposed project to establish and staff a Maritime Medicine Education and Training Center. This will involve purchasing a 4yr old building that consists of classrooms, offices, cafeteria and exam rooms. The goal is to provide emergency medical technician and paramedic training for maritime industry personnel, as well as, establish a telemedicine communication network for remote access to medical consults from Great Lakes vessels to the UT Health Science Campus. | University of Toledo | 1000 | 181 days or more | \$3,200,000 |
| Lucas | Byrne-Glendale | The University of Toledo authorizes the proposed Byrne-Glendale Foundation project. This is a critical care enterprise located in the northeast quadrant of the city. This facility provides a wide range of services including medical oncology, radiation oncology, and various other services. The facility is currently operating at a loss and is in need of renovation and modernization. The project would involve the renovation and modernization of the facility to provide a high quality of care for patients and staff. The project would also involve the construction of new buildings to provide additional space for the facility. The project would be a major investment in the city and would provide a significant boost to the local economy. | University of Toledo | 40 | 0 to 30 days | \$1,800,000 |
| Lucas | Sylvania Road Outreach Clinic | The University of Toledo authorizes the development of the Sylvania Road Outreach Clinic of the UTMHC. This is a clinical project. It involves purchase, renovation and ongoing operation of an existing multiplicity medical office building. Strategically located, the project would provide a high quality of care for patients and staff. The project would also involve the construction of new buildings to provide additional space for the facility. The project would be a major investment in the city and would provide a significant boost to the local economy. | University of Toledo | 75 | 0 to 30 days | \$6,700,000 |
| Lucas | Nebraska resurfacing/Westwood to RR tracks | Nebraska Avenue serves as access to the UT Scott Park campus, as well as the Scott Park police station. It is in horrendous condition, nearly impassable at posted speeds. Pavement needs full rehabilitation. | City of Toledo | 16 | 91 to 180 days | \$1,084,000 |
| Lucas | Boys & Girls Clubs at McTigue Middle School, Toled | The new Boys & Girls Club facility will be built implementing maximum green technology as practical as determined by the Ohio School Facilities Commission. The Club will be built in collaboration with Toledo Public Schools adjacent to McTigue Middle School and modernize our successful partnership with another public school in north Toledo. In addition to new construction jobs, the Clubs will permanently employ youth service professionals. The long-term employment gains are matched by the long-term, positive impact on the character and development of the youth we serve with this new Club. Neighborhoods with Boys & Girls Clubs typically see a decline in vandalism, drug use and other crimes. It is estimated that the Clubs will spend \$300,000 annually on programs and services, including salaries and benefits for the additional, permanent youth professionals. To date, we have raised more than \$3 million in private dollars to fund construction of the new Club. The stimulus request that leverages a total \$7 million investment in the community. | Boys & Girls Clubs of Toledo | 45 | 31 to 90 days | \$3,750,000 |
| Lucas | Boys & Girls Clubs at Marshall Elementary School, | The new Boys & Girls Club facility will be built implementing maximum green technology as practical as determined by the Ohio School Facilities Commission. The Club will be built in collaboration with Toledo Public Schools at Marshall Elementary School in the impoverished south Toledo, and modernize our successful partnership with another public school in north Toledo. The collaboration is part of a plan to use school facilities for youth programs after school hours. In addition to new construction jobs, the Clubs will permanently employ youth service professionals. The long-term employment gains are matched by the long-term, positive impact on the character and development of the youth we serve with this new Club. Neighborhoods with Boys & Girls Clubs typically see a decline in vandalism, drug use and other crimes. It is estimated that the Clubs will spend \$300,000 annually on programs and services, including salaries and benefits for the additional, permanent youth professionals. To date, we have raised more than \$3 million in private dollars to improve or construct Boys & Girls Clubs in Toledo, including 7,000 jobs. This request is for a one-fourth of the money requested. | Boys & Girls Clubs of Toledo | 30 | 31 to 90 days | \$750,000 |
| Lucas | EFSP - Lucas County | We received \$430,996.00 for Phase 27 funding. The requested amount from our community partners exceeded the allocated funds from the National Emergency Food and Shelter Program. We need additional funds for food, shelter and utility assistance. | United Way Greater Toledo | 1 | 0 to 30 days | \$430,936 |
| Lucas | ZIGZAG | ZIGZAG (Ziegler In-school Groups extended day and Ziegler Adult & Transition Groups) are youth programs that assist special education students to transition from school to work. ZIGZAG (Ziegler In-school Groups extended day and Ziegler Adult & Transition Groups) are youth programs that assist special education students to transition from school to work. ZIGZAG (Ziegler In-school Groups extended day and Ziegler Adult & Transition Groups) are youth programs that assist special education students to transition from school to work. ZIGZAG (Ziegler In-school Groups extended day and Ziegler Adult & Transition Groups) are youth programs that assist special education students to transition from school to work. | Ziegler Habilitation Homes, Inc. | 50 | 91 to 180 days | \$2,500,000 |
| Lucas | Chilled Water System | Lucas County will complete the construction of its new multipurpose arena late in summer 2009. The new facility is adjacent to Lucas County's Dragage Convention Center. Lucas County can increase the energy efficiency of both structures, save the taxpayers \$400,000 per year for the next 30 years and lower the carbon footprint and consumption by utilizing a chilled water condensation system. This project would allow both facilities to make use of the same chilled water tunnels for cold water by making engineering changes and adding piping. The cost of the project is \$400,000. In addition to dramatically reducing operating costs, this project will create 12 jobs. | Lucas County Improvement Corporation | 12 | 0 to 30 days | \$400,000 |
| Lucas | Short-Term Workforce Development for Healthcare | This is a short-term, job training program (Phlebotomy and Medical Coding are currently offered) that will be enhanced and expanded by adding 6 new programs: Pharmacy Technician, Coding Certificate, Medical Transcription, Dialysis Technician, Eye Care Technician, and Polysomnography. All certificate programs are designed to be "stackable," so a graduate can add this knowledge to a higher degree if desired. These are all healthcare fields that are in demand in the greater Toledo area. It is anticipated that 172 students will complete a certificate program in 2010, 165 in 2011, and 180 in 2012 for a total of 517. In addition, this program will create 8 new jobs at Mercy College needed to carry out the program. Mercy is partnering with ABE (Adult Basic Literacy Education) in this endeavor. ABE will provide any necessary tutoring or remediation that students require, so they can successfully complete the program and be ready to move into an associate or bachelor degree program. Mercy Health Partners (MHP) will also be a partner in this endeavor by providing clinical sites for hands-on, experiential learning. A \$500,000 bond bid of 5 year mill and mill with new pavement markings on U.S. 204, Illinois Avenue between U.S. 20/Clinton Street and Ford Road in the City of Maumee. | Mercy College of Northwest Ohio | 8 | 0 to 30 days | \$743,286 |
| Lucas | U.S. 204/ Illinois Ave. Resurfacing | Storage facility for Homeland Security Response vehicles and equipment. IED response vehicles, Urban Search and Rescue vehicle, equipment trailers to support mass casualty equipment and hazardous material response equipment. | City of Maumee Lucas County EMA | 10 100 | 181 days or more 181 days or more | \$400,000 \$2,500,001 |
| Lucas | Z.E.A.L.T.H. | Z.E.A.L.T.H (Ziegler Empowerment training for Adults with developmental disabilities to Live Typical Healthy lives) will provide access to a program developed by an experienced professional in the field who will facilitate learning experiences, utilize community resources and available curriculum in health education for people with developmental disabilities. The program will be located at Ziegler's adult hub center and will be implemented after hours and/or on Saturdays. It will include weekly class meetings, exercise sessions, and an annual health fair that will feature local agencies providing information, screenings, and assistance in improving prevention and wellness. Participants will learn how to eat properly to maintain a healthy diet, and how to maintain a healthy body, and how to take care of their health. The program will also provide information and resources, as well as specific behavioral issues that threaten health and wellness. The ongoing program will result in healthier dietary habits, reduced weight, increased mobility, and greater knowledge of nutrition and physical fitness in people with developmental disabilities who participate in the program six months or long. | Ziegler Habilitation Homes, Inc. | 5 | 91 to 180 days | \$150,000 |
| Lucas | Boys & Girls Clubs Homer Hanham Club Renovations | The Homer Hanham unit of the Boys & Girls Clubs of Toledo is in need of major renovations. The organization is 117 years old, and the current building that houses a Club facility and administrative offices was purchased 50 years ago. The renovation will allow us to safely and adequately serve more than 100 members a day with after-school education programs and supervised recreation in order to keep kids active and out of trouble. The long-term employment of our youth service professionals is matched by the long-term, positive impact on the character and development of the youth we serve in this Club. Neighborhoods with Boys & Girls Clubs typically see a decline in vandalism, drug use and other crimes. It is estimated that the Clubs will spend \$300,000 annually on programs and services, including salaries and benefits for the additional, permanent youth service professionals. | Boys & Girls Clubs of Toledo | 30 | 31 to 90 days | \$1,000,000 |
| Lucas | Boys & Girls Clubs of Toledo, East Unit | The East unit of the Boys & Girls Clubs of Toledo is in need of major renovations. The organization is 117 years old, and the current building that houses a Club facility is in an aging structure that is not functional for the programs and increased attendance. The renovation will allow us to safely and adequately serve more than 100 members a day with after-school education programs and supervised recreation in order to keep kids active and out of trouble. The long-term employment of our youth service professionals is matched by the long-term, positive impact on the character and development of the youth we serve in this Club. Neighborhoods with Boys & Girls Clubs typically see a decline in vandalism, drug use and other crimes. It is estimated that the Clubs will spend \$300,000 annually on programs and services, including salaries and benefits for the additional, permanent youth service professionals. The Club will be renovated implementing maximum green technology as practical. | Boys & Girls Clubs of Toledo | 30 | 31 to 90 days | \$2,500,000 |
| Lucas | Small Business Incubator | ASSET Toledo is a 13 week entrepreneurial training program will develop a small business incubator that would promote business development, economic revitalization and increase neighborhood employment and wealth for start-up and growing businesses. The incubator will provide office space, formal business training/marketing and financial management assistance, access to critical services, access to business office equipment, high tech communications, payroll, accounting, and human resources, micro loans, technical support thus assisting small businesses in becoming self-sufficient and supporting economic development efforts, reviving the economy, and revitalizing the community. | ASSETS Toledo | 95 | 91 to 180 days | \$800,000 |
| Lucas | The American Dream | The funds would be used to further grow my business and enable the hiring and training of individuals, offset administration costs, insurance costs, and equipment purchases to hire as many people needed to successfully maintain this business for the long term. These jobs would disappear after a project completion as with construction, these people would be employed as long as the business thrives and they want to work. I started this business with a push mower, knocking on doors, one the first year I anticipated a profit, and am the only employee and owner in this industry, with help from the state from my small business which I started myself. This would create a tax base for the state, and help the local economy with purchases and new jobs. | Wolfcreek Gardens & Landscaping | 43615 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Lucas | Inclusive Solutions Vocational Services | Inclusive Solutions is proposing to assist intellectually challenged and economically disadvantaged local find viable employment opportunities. Inclusive Solutions has proven success in business start up and incubation and plans to work with other individuals to develop creative opportunities for employment. Examples include providing a desk space for a local car wash, expanding and working with a large distribution center to provide opportunities for individuals with disabilities. We plan on all of these sites being fully integrated with people from all walks of life that are looking for assistance to get them through the current economic struggles. We are seeking \$200,000.00 to expand our programs and will create 25 new jobs. This funding will be used to offset the start up costs associated with each new project. | Inclusive Solutions | 25 | 0 to 30 days | \$200,000 |
| Lucas | SAAB Summer Academy | The SAAB Summer Academy will provide leadership development and academic enhancement through mentoring and related activities to strengthen the potential for success high school completion and college entrance of inner city elementary and high school students of color who are underrepresented in the national professional arenas in the United States. | SAAB (Student African American Brotherhood) | 10 | 91 to 180 days | \$75,000 |
| Lucas | Online Youth Mentoring | The Online Youth Project will provide national online mentoring opportunities to elementary and high school students, as well as college students across the nation. In addition, careerment and academic development tools will be made accessible to those who wish to excel in their leadership and professional development. | The Each One Reach One Foundation | 20 | 181 days or more | \$150,000 |
| Lucas | The Mentoring Collaborative | We seek to assist underrepresented groups who fall through the cracks of traditional educational systems. The Mentoring Collaborative is designed to work with elementary and high school students to provide tutoring and mentoring relevant to academic development and preparation for college entrance. Leadership and professional development are core focuses for long term retention initiatives pursued on the collegiate level. | The Each One Reach One Foundation | 50 | 181 days or more | \$50,000 |
| Lucas | Rudyard, Rosn and Meade HUD Housing for the Elderly | With the Rudyard, Rosn, Meade sewer project for which we have applied for stimulus money and with the Rudyard, Rosn, Meade stormwater project, this money would permit us to build about 70 new HUD homes for the elderly and would greatly improve one of the poorest neighborhoods in Sylvania Township. | Westfield Gardens, LLC | 200 | 181 days or more | \$14,000,000 |
| Lucas | New small Business | I am a new female business owner trying to make my neighborhood restaurant profitable to both me and the community. If I receive the request, I will do renovations to my brand new business and be able to live staff instead of being unemployed. In the three months we have been open, I have changed a economy friendly menu of both food and spirits to offer to the people of our neighborhood. We need to make changes to the appearance of the building inside to make it more appealing to customers and also, the money would help expand our products to offer more of a variety to build more clientele. This would create more jobs and help the unemployed in the area also. I am just trying to survive in this poor economy and also help the community at the same time. | Zoe's Lounge/Corrins Garden LLC | 3 | 0 to 30 days | \$25,000 |
| Lucas | Toledo Lighthouse Restoration Project | The Toledo Lighthouse Restoration project will use green energy - solar and geothermal - to provide water, wastewater, and electrical infrastructure to the Toledo Lighthouse. The 4000 square foot Toledo Lighthouse is a 1904 historical architectural unique structure with both brick and stone masonry roof. The Toledo Lighthouse is a well above ground structure of Maumee Bay State Park. The Toledo Lighthouse is a well above ground structure of the lighthouse. The restoration project will install historic energy efficient windows and doors along with the green infrastructure. The project will provide a significant opportunity for the restoration of the building to the Toledo Lighthouse. The project will create approximately 100 jobs. The project will have workers that will allow in season public access to the lighthouse. The restoration project is estimated to create approximately 100 equivalent jobs and create approximately 100 jobs with significant impact on tourism and spin off dollars in the Toledo/Port Clinton area. | Toledo Lighthouse Preservation Society | 8 | 91 to 180 days | \$1,000,000 |
| Lucas | Toledo Police Department Package | Need of 50 new police officers. | Toledo Police Department | 50 | 0 to 30 days | \$3,608,509 |
| Lucas | Building Security Enhancement | Installation of building security enhancement systems (systems, lighting, cameras) at 8 different county properties. The projected outcome is improved safety and security of public owned assets. These property locations provide vital services to over 1,500 people with developmental disabilities and employ over 600 public sector county board staff. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 8 | 31 to 90 days | \$400,000 |
| Lucas | Residential Improvements | Installation of replacement flooring and sprinkler system repair in 4 residential locations. The projected outcome is improved living conditions for income individuals. The residential locations are 2000 square foot homes and apartments located throughout Lucas County. Each home is being lived in for two or several individuals. Two of the residential locations are a joint agreement offer between the Lucas County Board MR/DD and Community Residential Services (CRS) regularly purchased with state funds. CRS provides services to individuals with developmental disabilities within a twenty-four hour, "live-in" staffing model. CRS provides residential services to adult people who face additional life challenges because of their personal conditions related to mental retardation, cerebral palsy, epilepsy, autism or other developmental disabilities. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 8 | 31 to 90 days | \$56,230 |
| Lucas | Tractor Road Project | This is a 3-acre fenced in lot that is in need of repair so it can be leased again. There is a chain linked fence around the entire lot that needs repaired and replaced in many places. The ground needs to be paved or stored to stop the erosion on the property. The small office building needs to be demolished as it is unsafe, without lighting, etc. We would like to replace the building with a more energy efficient building. Finally, a new pole barn/workshop type structure needs to be built on the property to accommodate the needs of any future tenants. Once this is all completed a business could move in and who knows how many people could become employed. Thank you. Design and build a solar powered security system which uses solar power for grid. System uses are for at construction sites including large sites and portable models for home construction. Also monitors for RVs and boats. | Stacy Properties, LLC | 10 | 31 to 90 days | \$700,000 |
| Lucas | Solar Powered Alarm System | Design and build a solar powered security system which uses solar power for grid. System uses are for at construction sites including large sites and portable models for home construction. Also monitors for RVs and boats. | Seagate Solutions | 10 | 0 to 30 days | \$50,000 |
| Lucas | Farnsworth Parking Lot and Driveway Rehabilitation | Mill and fill asphalt rehabilitation project for existing driveways and parking lots within Farnsworth Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$300,000 |
| Lucas | Lighting/HVAC Retrofits | Replacement of aged Heating, Cooling, Ventilation, Lighting and Insulation in many other commercial, industrial and institutional facilities located throughout Toledo, and districts of which we have under separate Maintenance Contracts. | Total Solutions-div of CAMPBELL, Inc | 45 | 91 to 180 days | \$5,000,000 |
| Lucas | Early Childhood Family Center Expansion | Showed ready expansion of direct service University of Toledo owned property. The facility supports family centered community based programs and services (educational, medical, social and support) to improve the quality of life for young children. The projected outcome is the 6,240 square foot expansion of the Early Childhood Family Center of family office, 2 classrooms, 1 assistive technology lab, 1 examination room, 1 physician/mechanical director office, storage area, 1 pre-school classroom and 1 parent/professional support room. This expansion will allow opportunities for enhanced secondary education in speech language pathology, school psychology, social work, recreation therapy, clinical psychology and clinical experience in pediatrics, psychiatry, family medicine, neurology and nursing. The facility houses Lucas County MR/DD, Toledo Public Schools, the University of Toledo children center and the Preschool Pediatric Center (children center for medically fragile children) managed and operated by the Arne Gandy Foundation in collaboration with Lucas County MR/DD. Other county agencies also use the facility. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 50 | 91 to 180 days | \$2,556,168 |
| Lucas | Using Renewable Energy to Purify Water | Installation and distribution technology that is highly energy efficient and employs renewable energy resources. It will supply clean water with minimal energy input and reduced generation of greenhouse gases. The system is simple, inexpensive to build and operate, uses a mature equipment infrastructure and is optimized for use with renewable energy sources, including photovoltaics, solar thermal, wind generators and geothermal energy sources. It can also use waste heat from industrial or power plant sources. Once the water is purified and collected, it can be transported from an elevated site allowing easy distribution of the clean water product to the end user. The remaining residue of dry solids is easily collected for simple disposal without moving parts or filters. | Innovative Water Technologies LLC | 100 | 0 to 30 days | \$1,500,000 |
| Lucas | Parking repaving, resealing, expansion and sidewalk | Showed ready infrastructure parking enhancements of repaving, resealing, new parking lot expansion and sidewalk installation (836,813 square foot of surface area) at 5 different county properties. The projected outcome is the improved long term parking and accessibility to public owned properties. These property locations provide vital services to over 2,150 people with developmental disabilities and employ over 555 public sector county board staff. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 24 | 31 to 90 days | \$370,000 |
| Lucas | Roof installation, re-sealing, roof access to HVAC | Showed Ready infrastructure roof installation, re-sealing (306,338 square foot of surface area) and roof HVAC access at 5 different county properties. The projected outcome is improved long term roof and accessibility to HVAC units on public owned properties. These property locations provide vital services to over 2,150 people with developmental disabilities and employ over 300 public sector county board staff. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 27 | 91 to 180 days | \$856,000 |
| Lucas | Administrative Building expansion | Showed ready 1,200 square foot expansion of administrative county owned property increasing energy efficiency. The projected outcome is the physical expansion of the administrative building owned property resulting in enhanced services to people with developmental disabilities. The property location provides administrative, finance, and human resources services for over 600 public sector county board staff. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 25 | 91 to 180 days | \$220,000 |
| Lucas | Installing energy efficient lighting - Hill | Installation of energy efficient lighting at one county maintained property. Replace (363) 400w metal halide light fixtures with (363) EX36E62-350W-HB MR16 Industrial Fluorescent high output, high bay light fixtures. The property location provides vital services to over 500 people with developmental disabilities and employs 157 public sector county board staff. The projected outcome in energy cost savings is expected to be up to 22% per year. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 18 | 31 to 90 days | \$120,000 |
| Lucas | Expansion of Educational Facilities at Mercy Colle | Stimulus funding is being requested to expand the educational facilities at Mercy College of Northwest Ohio as we continue to develop a 21st century education system that will continue to educate students for nursing and other allied health care professions. The project will allow for an additional 200-300 students to be enrolled meeting the growing demand for nurses and other healthcare workers. The current physical plant can accommodate an enrollment of 800 students. Increasing student enrollment will also allow expansion to new state funded facilities. The College will renovate approximately 80,000 square feet of the former Mercy Hospital into additional classrooms, student support services, 350 seat auditorium, science laboratories, and teaching staff offices. | Mercy College of Northwest Ohio | 10 | 31 to 90 days | \$6,423,854 |
| Lucas | Installing energy efficient lighting, ceiling and | Installation of energy efficient lighting, ceiling and HVAC upgrade efficiency units for 2 county properties. Replace (315) 400w metal halide light fixture with (315) EX36E62-MR16-HB MR16 Industrial Fluorescent, high output, high bay light fixtures. HVAC upgrade necessary to accommodate new lighting. The projected outcome in energy cost savings is expected to be up to 22% per year. These property locations provide vital services to over 520 people with developmental disabilities and employ 141 public sector county board staff. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 40 | 31 to 90 days | \$600,000 |
| Lucas | Solar Grid-Tie Inverter | We manufacture, sell and service inverter systems specifically designed for utility-scale, grid-tie applications used in photovoltaic (PV) energy installations. Our inverters are more flexible (installer friendly), have higher efficiency, cost less than competitor units, and allow the entire array to be installed at a lower overall cost. Our inverters, with remote monitoring and a staggered use pattern have higher long-term reliability. Our inverters are designed for design and system methodology harness more light than other inverters, especially under low sunlight conditions. Even the PV installation requires inverters, and we will sell to utility and commercial site PV array owners, integrators, installers, solar panel manufacturers, architects/engineers and entities that invest in PV energy projects. We will create more than 100 jobs in the first year of production, and can grow to more than 200 within three years. We need \$1,500,000 to begin manufacturing. | Nextron Energy Systems LLC | 100 | 0 to 30 days | \$1,500,000 |
| Lucas | Building expansion - Larc Lane | Showed ready expansion of direct service University of Toledo owned property. The projected outcome is the physical expansion of the county owned property by 12,474 square foot resulting in enhanced services to people with developmental disabilities. The property location provides vital services to over 2,150 people with developmental disabilities. This property employs over 140 public service employees. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 50 | 91 to 180 days | \$1,776,040 |
| Lucas | Canopy Installation - Transportation | Showed ready canopy installation (25,000 square foot) over fueling center at county owned property. The projected outcome is a roof cover for fuel pumps and weather/water protection when fueling county owned vehicles. We would consider up to 15% matching funds if necessary. | Lucas County MR/DD | 8 | 91 to 180 days | \$171,000 |
| Lucas | UT3 Science Teacher Preparation | UT3 increases the capacity of the University of Toledo to recruit and prepare science and math teachers, increase numbers of majors in these high need areas, improves the quality of teacher preparation programs to meet high-quality standards, and improves the teaching quality of science and math with the aim of increasing student achievement. The College of Education and Arts and Sciences partnered with Toledo Public Schools. Recruitment strategies target large and qualified pools of candidates majoring in science and math at other colleges. Many of these students have substantial content backgrounds but that interest in pursuing careers as science and math teachers over time. We will recruit post-baccalaureate students and minority students. Recruitment strategies (e.g., early exposure to teaching and financial support systems) are designed to select talented students and create support structures for helping them complete requirements for a teaching license. Clinical experiences will be provided early and modified to provide greater bridge between the professional development (PD) of science teachers, principals, and training of pre-service teachers. | University of Toledo | 50 | 0 to 30 days | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Lucas | New Upper School | In 2008 we contracted with a local architect and environmental designers to develop plans for building an entirely new, green, Upper School designed to educate our students for the 21st century. Our construction budget will enable us to achieve at least a Silver LEED Certification through the use of recycled materials, high insulative building materials, and a design that will maximize the use of natural lighting and passive solar. Not in our budget, but as "add alternates" to our plan, are features such as green roofs, solar collectors, and geothermal heating and cooling systems. These additions would result in our obtaining a Gold LEED Certification. Lower for operating costs, reduced air energy consumption, create additional jobs, and provide our students with an educational model of responsible and sustainable design. | Maumee Valley Country Day School | 60 | 91 to 180 days | \$900,000 |
| Lucas | Jerome Road Bike Trail | Construction of .24 miles of bikeway in Monclova township connecting the Battle of Fallen Timbers Memorial site to the battlefields/nature affiliated National Park site. | Metroparks of the Toledo Area | 1 | 181 days or more | \$188,000 |
| Lucas | Lathrop House Phase 2 | Phase 2 restoration of an underground railroad home. Phase 1 was paid for largely by a transportation enhancement grant. Phase 2 seeks to restore the basement interior - which constitutes the main interpretive space within the home; phase 2 also includes sidewalk work around the home. | Metroparks of the Toledo Area | 1 | 181 days or more | \$299,798 |
| Lucas | Oak Openings Parkway Improvements | Mill and fill asphalt rehabilitation along Oak Openings Parkway within Oak Openings Preserve Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$299,662 |
| Lucas | Fallen Timbers Entrance Drive/Parking Lot Paving | New asphalt construction of entrance drive and parking area for Fallen Timbers Field Office. Demolition/removal of existing paving. | Metroparks of the Toledo Area | 1 | 181 days or more | \$82,340 |
| Lucas | Pearson North Entrance Drive/Parking Lot Paving | Asphalt paving for newly acquired park lands. Includes an entrance drive, drop-off and parking area. | Metroparks of the Toledo Area | 1 | 181 days or more | \$164,345 |
| Lucas | Complete Energy-Efficient Window Replacement in Ma | This project would replace more than 700 outdated windows in a major county facility with new energy-efficient replacements. This building, located at 870 Adams in downtown Toledo, currently houses a number of important county agencies, including Children Services and Child Support Enforcement, among others. This building was built in approximately 1975, and window glass breakage has been a continuing, unresolved problem since the original construction. The plan to replace all of the existing windows with new, energy efficient and reliable units. We expect the replacement of these windows to cause significant thermal efficiencies in the building that will save taxpayers thousands of dollars each year with lower utility costs. | Board of Lucas County Commissioners | 15 | 31 to 90 days | \$1,500,000 |
| Lucas | Bend View Entrance Drive/Parking Lot Paving | Asphalt paving project for park entrance and parking area over an existing stone base. | Metroparks of the Toledo Area | 1 | 181 days or more | \$186,853 |
| Lucas | Secor Tupelo Way Prairie Ditch Bridge Rehabilitation | Replacement of existing box beam bridge deck/railings, waterproofing & repairing over bridge deck. | Metroparks of the Toledo Area | 1 | 91 to 180 days | \$120,000 |
| Lucas | Wildwood Entrance Drive/Parking Lot Paving | Mill and fill asphalt rehabilitation project within Wildwood Preserve Metropark. Includes existing lots and drives. | Metroparks of the Toledo Area | 1 | 181 days or more | \$400,000 |
| Lucas | Oak Openings Mallard Lake/White Oak Parking Lot Re | Mill and fill asphalt rehabilitation project for existing lots within Oak Openings Preserve Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$250,000 |
| Lucas | Side Cut Silver Lake/Riverview/Wayne St. Parking L | Asphalt mill and fill rehabilitation project for existing parking lots within Side Cut Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$350,000 |
| Lucas | Pearson Parking Lot and Entrance Drive Rehabilitation | Mill and fill asphalt rehabilitation project for existing lots and drives within historic Pearson Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$450,000 |
| Lucas | Swan Creek Glendale/Airport Hwy. Parking/Driveaway | Mill and fill asphalt rehabilitation project for existing lots and drives within Swan Creek Preserve Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$350,000 |
| Lucas | Rehabilitation and Improvement of Service Building | These funds will be used to rehabilitate and make improvements to existing service facilities such as the garage storage facility, the maintenance and maintenance facility at the 1127 West Central location. All of the service facilities are in need of improvements to improve safety and productivity. | Toledo Area Regional Transit Authority | 50 | 91 to 180 days | \$500,000 |
| Lucas | Providence Historic/Dam Area Parking Lot & Drivewa | Asphalt mill and fill project of existing drives and lots within Providence Metropark, Grand Rapids, Ohio. | Metroparks of the Toledo Area | 1 | 181 days or more | \$300,000 |
| Lucas | Fix Those Potholes! | Repave all major roads in the City of Toledo, including neighborhoods. The city has been dealing with severe potholes for decades now. | Great Lakes Crew | 100 | 31 to 90 days | \$15,000,000 |
| Lucas | Secor Tupelo Way and Parking Lot Rehabilitation | Asphalt mill and fill rehabilitation project of existing park road and parking lots/drives within Secor Metropark. | Metroparks of the Toledo Area | 1 | 181 days or more | \$450,000 |
| Lucas | Replacements and Improvements of Fareboxes | These funds will be used to replace new and/or upgrade existing fareboxes on all of the two hundred and thirty (230) TARTARPS buses. This will allow the fareboxes to improve real-time technology such as Automated Passenger Counting (APC), 9-1-1, and traffic signaling program to improve efficiency, safety, security, information purposes, and data collecting for staff, research, and general public. It will also vastly improve to provide real-time information for public transit riders via computers, cellphones, electronic message boards, and etc. at all stations and facilities as they require the time schedules and whereabouts of the buses for each route in the TARTARPS network. | Toledo Area Regional Transit Authority | 50 | 91 to 180 days | \$3,000,000 |
| Lucas | University Parks Trail Rehabilitation | Asphalt rehabilitation project for an existing bikeway. Work to include some mill and fill, crack filling, pavement sealing, berm work and striping. | Metroparks of the Toledo Area | 1 | 91 to 180 days | \$250,000 |
| Lucas | Update Sewers | Modern sewer system capable of handling the tonnage of rain in NW Ohio. Flooding has been a problem there lately. | Great Lakes Crew | 50 | 31 to 90 days | \$10,000,000 |
| Lucas | Alternative Energy Source - Solar Panels | These funds will be used to install photovoltaic solar panels to supply electric to all facilities and to help reduce rising energy costs. | Toledo Area Regional Transit Authority | 20 | 91 to 180 days | \$1,000,000 |
| Lucas | Alternative Energy Source - Geothermal System | These funds will be used to install geothermal system to offset the cost of rising energy usage at TARTARPS facilities. | Toledo Area Regional Transit Authority | 100 | 91 to 180 days | \$3,000,000 |
| Lucas | Automated Vehicle Locator (AVL) Network Systems | These funds will be used to purchase and install Automated Vehicle Locator (AVL) network systems on all two hundred and thirty TARTARPS buses. This will allow the system to be integrated with other systems such as Automated Passenger Counting (APC), 9-1-1, and traffic signaling program to improve efficiency, safety, security, information purposes, and data collecting for staff, research, and general public. It will also vastly improve to provide real-time information for public transit riders via computers, cellphones, electronic message boards, and etc. at all stations and facilities as they require the time schedules and whereabouts of the buses for each route in the TARTARPS network. | Toledo Area Regional Transit Authority | 50 | 91 to 180 days | \$2,500,000 |
| Lucas | Replacements and Improvements of Facility Roadway | These funds will be used to replace, repair, and improve existing facility concrete roadway. The current state of the concrete roadway is in shapshot around all sides of the facility at the 1127 West Central location. The shapshot includes the aging of the concrete, cracking of the concrete, potholes, sinking concrete, cemented oil-contaminated pads which are hazardous to the soil, and other maintenance issues. This will provide vast improvements for the two-hundred and thirty (230) TARTARPS buses to ensure safety and maintenance as well as show the buses off as they are for many other purposes at the location. | Toledo Area Regional Transit Authority | 20 | 91 to 180 days | \$1,000,000 |
| Lucas | outdoor hockey rink for organized roller and foot | This project is to build a outdoor safe place to play organized roller and foot hockey for over 200 kids. A place where kids can go instead of hanging in the streets for exercise, sportsmanship, and team building. | Toledo Street Hockey League | 2 | 0 to 30 days | \$5,000 |
| Lucas | Leadership training and development for nonprofits | Plus, we will create one full time job and several part time jobs for reference and maintenance workers. | Learning Excellence | 5 | 0 to 30 days | \$750,000 |
| Lucas | Building a Decision Support Software for Transport | Providing leadership and professional development training programs to regional non-profit agencies, and community service providers, such as schools (in 12), community development corporations, and other community-related organizations. This training will be designed and implemented at the targeted non-profit agencies based upon their current professional development and leadership needs. For example, if a community agency needs to implement a continuous improvement initiative because of reducing resources, then specialized training will be developed looking at assessment through implementation and evaluation to design a multi-stage, training that that methodology and developing action planning for continuous improvement on the initiative. Other professional development topics include computer training skills, communication, team building, problem resolution, customer service, etc. This training is geared for entry level personnel through upper level executives and administrators. | University of Toledo | 7 | 0 to 30 days | \$683,792 |
| Lucas | Transportation, Infrastructure | Municipalities to maximize the benefits of transportation infrastructure spending and to ensure sustainable level of condition. The software development project is a continuation of a series of four major research projects conducted at the University of Toledo in collaboration with the Office of Pavement Engineering, Division of Planning at ODOT. All four projects were funded by the Ohio Department of Transportation Office of Research and Development. Three of the four projects have been completed successfully and the fourth is still ongoing and expected to be completed by early 2010. The overall goal of these projects is to provide decision support tools for ODOT to monitor, manage, and reinvest to maintain the state highway network, condition and ensure their performance based on factual data. | The University of Toledo | 100 | 0 to 30 days | \$1,500,000 |
| Lucas | Salt Storage Building | The proposed software project will be completed within two years and will create six to eight new full-time positions. The State of Ohio will receive a piece of any future licensing revenues as a result of this software. | Monclova Township | 15 | 91 to 180 days | \$250,000 |
| Lucas | Norfolk Southern Grade Crossing Improvements on De | Repave 5 miles & add 5 more miles Roadway to Campus. To participate in ODOT's salt purchasing program we need to build a road salt storage building. Previously the County bought and stored road salt but they directed us to the ODOT program which has a seven day turn around for orders. Our current capacity of 100 tons can be depleted in one snow event so we desperately need a storage facility. We have a plan from an architect and we own the land so we could start the project immediately. | Norfolk Southern Corporation | 40 | 91 to 180 days | \$2,074,100 |
| Lucas | Project Management Resource for EMR Installations | This project is for improvements to grade crossings on Norfolk Southern's Dearborn Division in northern Ohio. This request is made in order to improve the safety of the crossing for the public and extend the life of the crossings. This estimate includes about 12 new full depth rubber, 8 full depth concrete and 1 full depth inter grade crossing surfacing at varying lengths. This may be subject to change and more information may be provided at a later date. I am not exactly sure about naming down the county or zip code as the project will be spread out. Thank you. | Catalyst Laboratory Leadership Consulting | 10 | 91 to 180 days | \$500,000 |
| Lucas | homes for families | Implementation of multiple Electronic Medical Record systems (vendors to be determined) for hospitals and clinical laboratories. Provide newly refurbished, clean, attractive homes for dozens (possibly 100) of Toledo low income and inner city residents... while preserving vacant, derelict houses and/or buildings into flourishing homes. Our city is plagued by empty homes and buildings in despair. In a similar experience with City years experience that includes supporting large (over 70) carpenter and other tradesmen. Please let us know how we can help. Thank You. Bruce R. Ditz | Toledo Life | 20 | 0 to 30 days | \$847,559 |
| Lucas | Capital Endowment Campaign | As the demand for SAFS services grows, limitations on space and facilities prevent the addition of critical new programs. A campaign is underway to raise \$600,000 that will: 1 Tear down and replace the older building 2 Enlarge the social services area by re-modeling the existing garage 3 Reconfigure and build a new parking lot 4 SAFS has demonstrated an extraordinary 40-year track record of service to the Sylvania community. Facility improvements will enhance the quality and quantity of the services already provided. Additionally it will: - Provide a clean, safe environment for kids - Provide space for expanded programming - Enhance the image of the neighborhood - Bring the entire facility up to code and under one roof - Expand community meeting space - Allow for more cost-efficient operations for the future | Sylvania Area Family Services Inc. | 1 | 91 to 180 days | \$100,000 |
| Lucas | Informatics and Health Information Technology Cent | Stimulus funding is being requested to renovate former Mercy Hospital space into a state-of-the-art, high tech student, faculty and staff computer/informatics center. A focal point of this project will be the development of a Health Information Technology Skills Laboratory for students (HIT) to learn valuable skills especially in the area of electronic health records. In addition to the new HIT Skills Lab, a high-tech student computer lab and faculty incubator lab will be developed. Two additional information technology jobs will be created as a part of this project. | Mercy College of Northwest Ohio | 2 | 0 | \$819,000 |
| Lucas | Green Acres | It represents a small business and I am a US Army veteran entering service from Ohio. Purchase and/or lease land that was previously been abandoned strip mining operations or left severely degraded from industrial operations. Anticipated return of 100,000 acres or more ranging from southeastern Ohio counties and extending to NW Ohio along the Ohio Alternative Energy Corridor. The concept is to plant and raise grasses that will be harvested in 18 mos from planting and sold to both municipal and privately owned power plants. The grass bales will support cows. The grass bales will turn at higher ETU, produce zero adverse environmental impact and are previously unusable soil. Current harvesting equipment and technologies are sufficient to support operations. Jobs are immediate. Planting season is spring harvest can be in Feb/March. | ACT I | 15 | 31 to 90 days | \$500,000 |
| Lucas | Fire Fighter Augmentation Grant | The Village is seeking funding to continue a fulltime firefighter/EMT position that is currently funded under the SAFER Grant. This grant obtained in year 2006 and expires in 2011. The Village is requesting funding to pay the village's cost of this positions salary and benefits. This funding will enable the village to continue this position which has improved immediate response capability in the fire and injury incidents. This position incumbent is also assigned all fire prevention inspector and fire prevention training duties. | Village of Whitehouse, OH | 1 | 0 to 30 days | \$79,378 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Lucas | Electronic Health Care Record & Record Retention S | Approximate 100 employees who would use an implementation of an electronic health records a personal information system for communication and... This project would create 17 full time jobs, to include an IT Director/Project Manager position and would cover costs for the IT Director position for one year. This request would also cover salary for an administrative assistant and startup costs of 3 years to implement the electronic health records system. | Sunshine Inc. of Northwest Ohio | 17 | 91 to 180 days | \$522,545 |
| Lucas | Cord Blood Initiative | The Cord Blood Initiative is designed to increase the number of cord blood units that will be available to support patients that need transplants... This initiative will increase the transplant potential for patients that might not have had a chance otherwise. Ultimately, this initiative can help save the Mathews Biogas Capture & Reuse (Operation) project entails the capture and cleaning of 500 cfm of landfill gas and 500 cfm of digester gas to use as fuel in a combined cycle gas turbine and steam turbine system to produce 10 megawatts of electric power for the Waste Water Treatment Plant in Toledo, Ohio. | ProMedica Health System | 2 | 31 to 90 days | \$156,000 |
| Lucas | METHANE BIOGAS CAPTURE AND REUSE | The gas turbine runs a 6-megawatt generator. The exhaust gases will provide sufficient energy for a heat recovery boiler to convert water to steam. The steam would be used in a steam turbine to run a 4-megawatt generator. The total power produced would equal 10 megawatts, enough to operate the entire wastewater treatment plant during certain wet weather. In addition to producing GREEN POWER, this project reduces air pollutants in the atmosphere by not flaring the landfill and digester gases, as is the case right now. This project also helps the City of Toledo in realizing some cost savings that would otherwise be spent on electricity. The additional \$2,250,000 will pay for additional engineering and construction services, including the chemical treatment system, methanation gas system, and electrical support services that will enable operating with the Utility. | CITY OF TOLEDO | 85 | 0 to 30 days | \$2,250,000 |
| Lucas | Whitehouse Storm Sewer Improvement | Replace 1,825 feet of aged 10" and 12" vitrified clay storm water collection system pipe in the Villages Overland Area with modern 12" storm sewer lines. This project will alleviate existing storm water backup problems and improve villages overall storm water collection... This project will also include water from the City of Toledo facility operators, solar heating, wind turbine and dual well water. The dual well technology will use two small ponds for fish stock and chlorophyll programming. The piping and sewer devices will be manufactured locally. All piping will be LED for evening programming. | Village of Whitehouse, Ohio, | 0 | 31 to 90 days | \$300,000 |
| Lucas | Water Playgrounds | Replace existing water play equipment with modern, safe, and inclusive water play equipment. The power source for these facilities will include waste from the City of Toledo facility operators, solar heating, wind turbine and dual well water. The dual well technology will use two small ponds for fish stock and chlorophyll programming. The piping and sewer devices will be manufactured locally. All piping will be LED for evening programming. | City of Toledo | 30 | 31 to 90 days | \$600,000 |
| Lucas | ARCHITECTURAL CONCRETE STRUCTURES | Architectural concrete structures are a type of concrete that is designed to be both functional and aesthetically pleasing. They are often used for... This project will replace 4,450 linear feet of 6" water main in our village downtown area with 8" watermain. This project will replace will aged inadequate lines and provide for increased capacity to meet growing demand and improve water quality through flow enhancement over the villages entire water distribution system. Construct a 10 MW electrical generation facility utilizing landfill methane gas as a fuel source. Will completely supply all the power requirements for the wastewater treatment plant. | ARCHITECTURAL CONCRETE STRUCTURES | 25 | 0 to 30 days | \$5,000,000 |
| Lucas | Whitehouse Water Main Replacement (Providence Stre | Replace 4,450 linear feet of 6" water main in our village downtown area with 8" watermain. This project will replace will aged inadequate lines and provide for increased capacity to meet growing demand and improve water quality through flow enhancement over the villages entire water distribution system. | Village of Whitehouse, Ohio, | 0 | 91 to 180 days | \$585,000 |
| Lucas | Supplemental Loan for Methane Biogas Capture and R | Construct a 10 MW electrical generation facility utilizing landfill methane gas as a fuel source. Will completely supply all the power requirements for the wastewater treatment plant. | City of Toledo, Division of Water Reclamation | 85 | 0 to 30 days | \$2,250,000 |
| Lucas | Small scale sustainable farm project to support ch | Feed Lucas County Children (FLCC) currently serves over 140000 meals annually to at risk children in Lucas County. The food for this program is mostly purchased on the open market. This project would purchase a 4.5 acre parcel of existing land with a greenhouse and an up to 1.2 acre parcel for the purpose of growing some of the food currently purchased by FLCC. Funding would improve existing electric and water service on the farm, purchase and erect a greenhouse and solar materials, and "seed" the program with workers to plant, cultivate, harvest and deliver the food. The expected outcomes are lower food costs, fresher food locally grown and employment of up to five people. | Feed Lucas County Children | 5 | 0 to 30 days | \$35,000 |
| Lucas | Roadway and Drainage Improvements | Replace, repair and improve drainage for roads at the wastewater treatment plant. | City of Toledo, Division of Water Reclamation | 17 | 91 to 180 days | \$450,000 |
| Lucas | Sanitary Pump Station Improvements, Phase III, Ku | Replace existing pump station with a new pump station and provide stand by power. | City of Toledo, Division of Water Reclamation | 9 | 91 to 180 days | \$230,100 |
| Lucas | Sanitary Pump Station Improvements, Phase II, York | Replace existing pump station with a new pump station and provide stand by power. | City of Toledo, Division of Water Reclamation | 14 | 91 to 180 days | \$345,600 |
| Lucas | Sanitary Pump Station Improvements, Phase I, Holla | Replace existing pump station with a new pump station and provide stand by power. | City of Toledo, Division of Water Reclamation | 13 | 91 to 180 days | \$316,800 |
| Lucas | Blower Building Renovation, I-55A | Project will replace existing medium voltage switchgear and 65.5 pump drives, low voltage power distribution and transformers, main PLC and 3 smaller PLC's and the addition of a new electrical control building. This project will connect the new Co-generation process and the new back up power project into the Blower Building. | City of Toledo, Division of Water Reclamation | 245 | 181 days or more | \$6,514,001 |
| Lucas | solar and wind | energy reduction costs to home. | marks construction | 5 | 31 to 90 days | \$40,000 |
| Lucas | City of Toledo Combined Sewer Overflow Pathogen Re | The purpose of this project is to determine the effectiveness of the high rate clarification process to remove pathogens from wastewater flows at the City of Toledo Bay View Wastewater Treatment Plant. This high priority project is part of the \$500 Million Toledo Wastewater Initiative program assigned to improve the water quality of Lake Erie and local rivers and streams. Install the current end of wastewater and sanitary sewer, respectively to Noward Road, generally following State Route 84. Project quantities include 8000 feet of 12-inch waterline, 28 fire hydrant assemblies, 12 gate valves, 6600 feet of 18-inch sanitary sewer, and 20 manholes. The proposed manholes will enhance development along State Route 84. This location is adjacent to the proposed interchange with US Route 24 to be built in 2011. | ARCADIS | 50 | 0 to 30 days | \$1,000,000 |
| Lucas | Waterline and Sanitary Sewer Extensions to Noward | Install the current end of wastewater and sanitary sewer, respectively to Noward Road, generally following State Route 84. Project quantities include 8000 feet of 12-inch waterline, 28 fire hydrant assemblies, 12 gate valves, 6600 feet of 18-inch sanitary sewer, and 20 manholes. The proposed manholes will enhance development along State Route 84. This location is adjacent to the proposed interchange with US Route 24 to be built in 2011. | Village of Waterville | 50 | 181 days or more | \$1,755,000 |
| Lucas | City of Toledo-Combined Sewer Overflow (CSO) Volum | Bio-retention best management practices (BMPs) and rain barrels, to reduce stormwater runoff and improve water quality. The street has 66 lots with 46 lots that have homes constructed on them. Maywood Avenue is a single street in a neighborhood that is located on the near north side of Toledo, Ohio. The neighborhood demographics and physical components are typical of other well-established, older urban neighborhoods in the city. The Street has 66 lots that abut the street and would be included in the project area. The scope of work, project cost, and work plan task has been established for this project. Task include detailed survey, education and outreach, soil testing, design, bio-retention construction, homeowner rate-gener construction, rain barrel installation, construction administration, maintenance, and flow monitoring. For the rain gardens and bio-retention areas, we anticipate excavating 8 inches below existing ground and amending the native soils in place. | City of Toledo, Division of Environmental Services | 50 | 31 to 90 days | \$805,200 |
| Lucas | Wind Turbine Project | This project will continue the Museum's effort to convert energy to alternative sources by installing a 250 kW wind turbine on Museum grounds. The wind turbine will be integrated with our electrical system and will work in concert with our solar installation and micro turbines. When fully installed, wind will provide up to 25% of the Museum's energy needs on a regular basis. Turbine Install a sewer line in 1,000 feet of 8-inch, 1500 feet of 12-inch, and 1400 feet of 15-inch concrete sanitary sewers. Clean and belittle the sanitary sewers prior to lining. Rehabilitate/repair 10 sanitary manholes. Expected outcome is to eliminate ground infiltration of ground water into the sewers and manholes. | Toledo Museum of Art | 20 | 91 to 180 days | \$2,500,000 |
| Lucas | Sanitary Sewer Lining-Phase 3 | Install a sewer line in 1,000 feet of 8-inch, 1500 feet of 12-inch, and 1400 feet of 15-inch concrete sanitary sewers. Clean and belittle the sanitary sewers prior to lining. Rehabilitate/repair 10 sanitary manholes. Expected outcome is to eliminate ground infiltration of ground water into the sewers and manholes. | Village of Waterville | 25 | 91 to 180 days | \$224,800 |
| Lucas | Waterline Looping Project | Install new waterlines at four locations to complete unlooped waterlines or to replace unreticulated waterlines at key locations. Project quantities include 4800 feet of 8-inch waterline, 2000 feet of 12-inch waterline, 16 gate valves, 22 fire hydrant assemblies, and 84 water services. | Village of Waterville | 25 | 91 to 180 days | \$744,000 |
| Lucas | Senior Citizen Center | The Sacred Heart Home for the Aged, run by the Little Sisters of the Poor and located in Oregon, Ohio, runs a daily senior center. Presently we have about 15 senior citizens per day that we transport to and from our center for daily meals and activities. We are in need of a new transport van, which would be used to transport many more seniors to the facility. Also, we need funding to cover the fuel cost and activities associated with this program. We believe that with better funding our senior program could be expanded to reach out to about 50 senior citizen per day. We have the room in our existing facility to accommodate more seniors, but are lacking funding to transport, feed and care programs for these seniors. With more funding we could help many more area senior citizens and enrich their daily lives. The University of Toledo law residency program is part and parcel of a similar service contract to an experiential university or law residency center in the Toledo Community. Current residents from the Pediatric Residency and General Practice Residency will come from the University of Toledo Medical Center to this new facility and provide pediatric dentistry and general practice care. The program will serve low income patients, faculty and students at the University of Toledo. This fund will be used for leasing the space, building the space, new dental equipment, new office equipment and full time secretarial support during the development of the project. As additional dental residencies training programs are established the new facility will be used for the clinical training of the new residents. The size of the new dental facility will be determined by what can be negotiated with the Toledo Community and the University. Once the dental service is built and opened other grants will be sought from both state and federal sources to continue its operation. | The Little Sisters of the Poor - Sacred Heart Home | 5 | 0 to 30 days | \$25,000 |
| Lucas | Community Health Centers Care services | The University of Toledo law residency program is part and parcel of a similar service contract to an experiential university or law residency center in the Toledo Community. Current residents from the Pediatric Residency and General Practice Residency will come from the University of Toledo Medical Center to this new facility and provide pediatric dentistry and general practice care. The program will serve low income patients, faculty and students at the University of Toledo. This fund will be used for leasing the space, building the space, new dental equipment, new office equipment and full time secretarial support during the development of the project. As additional dental residencies training programs are established the new facility will be used for the clinical training of the new residents. The size of the new dental facility will be determined by what can be negotiated with the Toledo Community and the University. Once the dental service is built and opened other grants will be sought from both state and federal sources to continue its operation. | University of Toledo College of Medicine | 6 | 181 days or more | \$2,000,000 |
| Lucas | Implementation of safe driving habits from the wor | The University of Toledo authorizes the proposal for UT investigators to scientific, develop and implement educational tools and policies to encourage safe driving from staff, faculty and students. The impact would be injury reduction and health care savings. | University of Toledo College of Medicine | 15 | 91 to 180 days | \$5,000,000 |
| Lucas | Development of novel anti-obesity agents | The University of Toledo authorizes the proposal for expansion of the project involving a method developed by UT investigators to screen for novel, first in class anti-obesity agents from natural compounds with the aim of developing pharmaceutical and/or nutraceutical treatments for obesity. This could have major impact of wellness, disease prevention, and lower health care costs. | University of Toledo College of Medicine | 6 | 91 to 180 days | \$5,000,000 |
| Lucas | Development of a reproducible method for measuring | The University of Toledo authorizes the proposal regarding the expansion of the invention of a novel method for mRNA measurement called START PCR. This allows for the rapid and reproducible measurement of a molecular phenotype. The research promises tremendous application of clinical practice as well as drug development and commercialization. | University of Toledo College of Medicine | 12 | 31 to 90 days | \$10,000,000 |
| Lucas | Development of an Optimal Commercialization Pathwa | The University of Toledo authorizes the proposal to develop a paradigm for the smooth, efficient and effective transfer of intellectual property developed in the University setting to create thriving technology based businesses in the Northwest Ohio region. | University of Toledo College of Medicine | 200 | 91 to 180 days | \$20,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lucas | Sodium Pump Signaling | The University of Toledo authorizes the proposal to expand development of a novel understanding of how signaling occurs through the Na ⁺ /ATPase (sodium pump). This understanding has therapeutic implications ranging from cancer to cardiovascular medicine to dermatology. Based on this understanding, novel therapeutic agents have been conceptualized. We propose to further evaluate these molecules for ultimate commercial application. In turn, this would have a positive impact on health care. | University of Toledo College of Medicine | 10 | 0 | \$11,000,000 |
| Lucas | Development of PEG-Alb for Resuscitation | The University of Toledo authorizes the proposed proposal to expand development of a way to modify albumin to create a volume expander effective in critical conditions complicated by capillary leak. We request sufficient funding from the State to develop the necessary laboratory and manufacturing methods as well as assistance in performing animal toxicology and human phase I clinical trials to develop this product a critical reality. This would have potential for commercialization and address an important health care need. | University of Toledo College of Medicine | 6 | 31 to 90 days | \$6,700,000 |
| Lucas | Community Resource Center | This project will help revitalize a historic neighborhood in Toledo, Ohio by providing economic development opportunities such as: Providing construction jobs during the construction phase; Renovation and construction of an old warehouse building; eliminate blight in an area key to downtown Toledo; Improving Broadway Street and tie to Toledo's historic district and create a new local job; Renovate and expand current facility to create a community center and retail office space for a small business. The expansion will increase Adeline's capacity to provide additional adult and youth services. 100% of the funds will be used for construction, creating job opportunities for many of Toledo's local contractors. | Adeline, Inc | 8 | 31 to 90 days | \$500,000 |
| Lucas | CARE FOR ALL | We currently provide furnished housing, personal care, medical and transportation services to persons with mental retardation and developmental disabilities. We would like to upgrade as well as expand our program with 2 additional homes to provide services for at least 5 elderly individuals allowing them to remain in the community in safe and supervised environments. The purchase of 2 more vehicles, one being handicapped accessible, will help with transportation needs. A minimum of 5 new jobs will be created. | Gray Family Homes, Inc. | 5 | 31 to 90 days | \$200,000 |
| Lucas | OPERATION & MAINTENANCE SERVICES FOR COGENERATION | The City of Toledo is near completion of the cogeneration facilities at the Bay View Wastewater Treatment Plant and Hoffman Road Landfill. The cogeneration system will burn a mixture of landfill and digester gases in a gas turbine and heat recovery boiler to produce 10 megawatts of electric power. This power will be utilized to run the treatment plant during dry weather as well as wet weather. The cogeneration system will be tested and commissioned in June and July of 2009. The system will be on line in August 2009. The City has received proposals from two companies for operation and maintenance services of the cogeneration facilities. This will involve staffing the facilities 24 hours/day, 365 days/year for the next 5 years. The total cost of such services will be approximately \$9,000,000.00. The City would appreciate approval of the monies to cover the expenses of operating and maintaining the cogeneration facilities at the Plant and the Landfill. This project is a pure GREEN project that will result in the production of 10 megawatts of electricity and a reduction of air pollution at both locations. | CITY OF TOLEDO | 6 | 31 to 90 days | \$9,000,000 |
| Lucas | Security Fencing at Public Works Facility | Install security fencing around the perimeter of the Department of Public Works building and grounds. This 4.2 acre facility houses all the Vehicle Maintenance vehicles, control for the pump station and water towers, various maintenance materials, facility records, and various electrical equipment. Project quantities include removing the existing fence, 1425 feet of 8 foot high chain link fence with 3 strand barb wire, 1000' of concrete, masonry, existing gates, electric service for the gates, and one main gate. | Village of Waterville | 8 | 31 to 90 days | \$59,200 |
| Lucas | Product development and competitiveness | The composite design of the product delivers the lightweight benzoin clay powder or a range of other hard to find materials directly to the bottom of the pond, lake or river. Through the product inventor, John Hill, a well known environmental engineer, the company has established a strong reputation in the environmental industry. Beyond the remediation applications, available programs to remove the product for treatment of potentially harmful cyanobacteria in ponds. | AquaBlok | 25 | 0 to 30 days | \$270,000 |
| Lucas | Toledo - Enviro-safe Landfill Liner Leak - Lake Erie | Discovery plan funding is requested to support R&D efforts of this company which has recently received funding from Rockwell Ventures, a Tier 1 Remediation for an extremely complex chlorinated solvents plume coming from a disused landfill. The company has been successful in the past with a number of projects with waste water treatment plants and landfill liners. The company has been successful in the past with a number of projects with waste water treatment plants and landfill liners. The company has been successful in the past with a number of projects with waste water treatment plants and landfill liners. | Absorbent Materials Company of Wooster Ohio | 18 | 0 to 30 days | \$1,700,000 |
| Lucas | St. Vincent Mercy Medical Center - Parking Garages | St. Vincent Mercy Medical Center is the only remaining central city hospital and the oldest in Toledo, Ohio. With limited available parking space, the hospital is utilizing parking structures for patients and employees. Structural improvements are required of the parking structures for reasons of safety, energy consumption and more efficient lighting. Our proposal is for structural repairs and lighting replacements. | Mercy Health Partners | 12 | 31 to 90 days | \$2,580,000 |
| Lucas | Timothys Trading Post | Reevaluation of 65,000 structure for business development along with the removal of delapidated buildings. Help with job creation for the city of Toledo. Take part in bringing pride back to the city by helping develop "Swan Creek River Walk" on the Swan Creek in Toledo along with Terra Tech Inc., Regional Growth Partners, LLC, City of Toledo, The Port Authority and the private sector. We have 4 acres of buildings and land to offer that sit right next to I-75. This property is well suited to bring a positive change within the city. We will bring job creation along with business opportunity and revenue to federal, state and local governments. We have already invested in private funds and bank funds over \$1,000,000.00. | St. Clair Street Station, LLC | 24 | 0 to 30 days | \$1,500,000 |
| Lucas | St. Vincent Mercy Medical Center - Operating Expen | St. Vincent Mercy Medical Center has invested heavily in cogeneration technology for nearly 20 years. From a single source of energy we produce two outputs, with major energy reductions through the years. We are asking for support on continuing projects for energy management, reducing operating expenses on campus. Building automation equipment replacement, lighting retrofits, and building envelope improvements. | Mercy Health Partners | 18 | 0 to 30 days | \$6,300,000 |
| Lucas | Ash Tree Removal | Remove 20 large Ash trees located within the Village roadway right-of-way. This is an ongoing program to remove the Ash trees throughout the Village. These remaining trees are the largest and most difficult to remove. | Village of Waterville | 7 | 0 to 30 days | \$18,000 |
| Lucas | St. Vincent Mercy Medical Center - Private Room Con | St. Vincent Mercy Medical Center has invested heavily in cogeneration technology for nearly 20 years. From a single source of energy we produce two outputs, with major energy reductions through the years. We are asking for support on continuing projects for energy management, reducing operating expenses on campus. Building automation equipment replacement, lighting retrofits, and building envelope improvements. | Mercy Health Partners | 30 | 0 to 30 days | \$20,000,000 |
| Lucas | Choctaw Drive Underground Electric | Install underground, primary electric service along a recently completed street that will service a proposed business park and other future developments. Project quantities include 7,200 feet of 4-inch electrical conduit, 9,000 feet of electrical cable, and 3 pull boxes. The proposed project will enhance the surrounding undeveloped land for development. | Village of Waterville | 25 | 91 to 180 days | \$69,000 |
| Lucas | Downtown Waterville Street Lighting-Phase 2 | Complete second phase of new street lighting for Downtown District. Project quantities include 98 period style light poles and fixtures, remove 95 existing light poles, 8,000 feet of electric conduit, 28,000 feet of electric cable, 4 power control centers, the ground rods, 25 pull boxes, 198 cable trenches etc. and work by Toledo Edison. The proposed project is part of an ongoing program to improve the Downtown District. Project will improve lighting and enhance the surrounding area. | Village of Waterville | 25 | 91 to 180 days | \$598,400 |
| Lucas | Tobacco Treatment Center | This project works with all schools and businesses to stop or prevent smoking. We selected new funding because most of the funding for this program has been eliminated and we will need to eliminate the program if funds are not found. Currently a large share of all high school students going through the program stop smoking. This program is beneficial for all patients who admit to smoking while in the hospital as it provides continuous support after discharge. The current staff is highly trained in their field with high levels of success. | St. Luke's Hospital | 10 | 0 to 30 days | \$500,000 |
| Lucas | Advanced Offshore Wind Energy System | A utility scale wind turbine system will be acquired, instrumented and installed on the university property to study the application to an advanced offshore wind turbine system concept. Offshore in addition to providing long term renewable energy for campus. Design modification will be evaluated for making the system optimized for offshore use. Business, faculty and local/regional companies will be involved in the project. A specialty facility to provide a broad range of Muscular Skeletal services designed to increase the quality of care and lower the total cost. Physician visits through Rehabilitation will be provided all under one roof. This project will partner physicians, the hospital, rehabilitation providers, Curative Medical Equipment providers and others in a seamless, holistic care setting. The goal is to lower the total cost of care from 10-20% for all services provided. | The University of Toledo | 15 | 0 to 30 days | \$3,000,000 |
| Lucas | Muscular-Skeletal Center | This project will provide a family care home for four individuals with physical and/or mental disabilities. This custom designed home will include A.D.A. specifications, and the structure will be designed and built around the specific special needs of each individual in order to enhance their lives. | St. Luke's Hospital | 500 | 91 to 180 days | \$10,000,000 |
| Lucas | A.D.A. Family Care Home Facility | This project will create construction jobs and construction related jobs to include the protection, plumbers, electricians, brick layers and painters. This family care home will also create direct jobs related to the special needs of the individuals. The construction time will be approximately 181 days or more from start to finish, using green technology, and the latest energy efficient technologies. The project will include the use of products made in the U.S.A. to the extent feasible. Upon completion, the new home will provide loving care to individuals within the community with physical and/or mental disabilities. | Sunshine Inc. of Northwest Ohio | 9 | 181 days or more | \$521,198 |
| Lucas | Electronic Health Record | We are bringing a Community Health Record to the market and need a Regional Health Information Office(RHO). This will also include salaries, overhead, etc. | St. Luke's Hospital | 25 | 31 to 90 days | \$2,500,000 |
| Lucas | 50,000 consumers in NW Ohio get Smart Grid ready | The \$5.00 unit consumer program is designed to demonstrate the benefits of using this new Smart Grid ready web thermostat. Currently the utility provides information once a month to consumers. With this pilot program consumers will receive energy data in near real-time via the web, or cell phone. This use of cell phone technology, while keeping a complete web history, will help consumers manage their energy demand for heating & cooling, saving them money and decreasing the utility load demand, especially at peak demand. Estimated savings with this program is \$5,000,000 with annual energy savings to the benefit of the program is reduced greenhouse emissions, using this Smart Grid ready technology allows the consumer to lessen their impact on the environment. | Bay Controls, LLC | 100 | 31 to 90 days | \$15,000,000 |
| Lucas | North River Road Waterline Replacement | Replacement of existing waterline in poor condition. Project quantities include 4,000 feet of 48 inch waterline, 4 gate valves, 12 fire hydrant assemblies, and replacement of 4" water service. The proposed project will increase water pressure and eliminate frequent maintenance of a waterline in poor condition. | Village of Waterville | 30 | 91 to 180 days | \$352,000 |
| Lucas | Whitehouse Downtown Waterline Replacement Project | The Village will replace 4,480' of aged and undrained, 6" water distribution main in the Village Downtown Area. The Village plans to construct 4,480' feet of 12" water line in the Downtown Area. This will improve overall water quality due to flow improvement. This project will bring in excavation and water line construction jobs to the Village for a two and a half month time frame. | Village of Whitehouse, Ohio, | 10 | 91 to 180 days | \$585,000 |
| Lucas | Park Works Program | Under the current economic conditions, Toledo, Ohio is considerably challenged in maintaining the appearance and basic access to its 145 parks and cemeteries. Budgetary constraints continue to limit and reduce maintenance personnel. A Park Works Program would provide temporary jobs for 6-9 months for local men and women to improve their community, foster a sense of pride and stewardship for the parks, and employ up to 24 individuals in the intensive maintenance of our urban park system. | City of Toledo | 24 | 31 to 90 days | \$200,000 |
| Lucas | Eagle Learning Center | To provide high school drop outs and "at-risk" youth population in Lucas County the opportunity to earn a high school diploma through Eagle Learning Center, an alternative online high school completion program. Project anticipates being able to set up a computer lab for this high school completion program at the local one stop employment center: The Source of Northwest Ohio. | Oregon Career & Technology | 2 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Serenity Community Center | The Serenity community center is a new project with the specific goals to address poverty, community devastation caused by negative environmental factors. The project proposes to employ and train displaced community workers and educate children and family. | Serenity Church | 70 | 181 days or more | \$2,500,000 |
| Lucas | 3D Imaging for Personal Recognition and Database G | Techtol Imaging has patent pending hardware and software which can produce and file three dimensional rotational images of persons, animals or things in a matter of seconds. This technology potentially allows for the verification of individuals quickly and cheaply via facial recognition as well as attribute recognition such as scars, moles and tattoos. The funds would be used to partner with local, state and/or federal agencies and institutions to expand our software and hardware to include personal recognition features for public use. Refer to the web site techtolimaging.com for information regarding the process. | Techtol Imaging, LLC | 100 | 31 to 90 days | \$1,250,000 |
| Lucas | Three Dimensional Images for Educational Use | Techtol has patent pending imaging hardware and software that produces rotational 3D images in a matter of seconds. Techtol plans to partner with a State University and/or an Ohio Public Schools district to develop an instructional program utilizing the 3D imaging system. Such program can be used state wide with either classroom or distance learning and classroom systems. Several of the 12 school systems, the local community college and 3 state universities have seen our technology and expressed an interest to move forward with this concept. We seek financial assistance in the re-training and re-processing of manufacturing that creates efficiencies and competition to ALL offshore products. MMS is a purchase and a re-start of the Ford Machine Designing facility and a employee owned and operated. We are a locally funded, community based group, extremely knowledgeable in manufacturing of metal stamping and assembly as well as plastic stamping and assembly. Our team is primarily from the automotive sector, some second and third generation in the industry. One of our core strengths and ability to be extremely competitive in cost and quality, the requested funding will partially support the re-training of our workforce to develop those skills necessary to become a global competitor in manufacturing. Our long term goal is to minimize our dependence on automotive manufacturing by developing those skills necessary to become flexible in product and processes in multiple markets. | Techtol Imaging | 50 | 91 to 180 days | \$500,000 |
| Lucas | Manufacturing Recovery | This company over the facility, we are located at the junction of I75 and the Ohio Turnpike, we have the skills and the work ethic to reshape manufacturing. The balance of the project (\$3.5m) will be funded by our employeeworkers. Thank you. | Madame Authority Stamping | 750 | 0 to 30 days | \$4,500,000 |
| Lucas | The Garrett B College Fund | Although this project is ostensibly a way for a student who is entering college during a time when the economy is in such a dire state that the financial aid he receives will be less than adequate to fund his education costs, it can be assumed that this student, after earning a degree, will enter the job market and potentially contribute greatly to the nation. There is also a likelihood that this student, some years down the road, will return to Ohio, and with his higher education start a business of some sort. This business, barring any unforeseen unfortunate circumstances, will flourish and grow. As a result, jobs will be created since the amount of labor required to run the business will increase with its success. | The Garrett B College Fund | 1 | 181 days or more | \$200,000 |
| Lucas | New Career Jobs Creation | Thug-Geek.com LLC will be providing new and information to the urban demographic. Also we will be covering different shows and Expos. We will be working with trade schools and colleges to get people into these kind of choices by showing them a urban demographic. In house will be doing web design, print and logo design, also we will be doing consulting to other companies that require a team for certain projects. Also through advertising space and product evaluation we will be getting monthly finance through sponsors and government grants. Plus will be holding local Events to bridge the gap so people who want to learn more about the industry can learn the needed to start their careers. | Thug-Geek.com | 23 | 0 to 30 days | \$250,000 |
| Lucas | Artist in Recovery and Treatment (ART) | We are a community mental health treatment center. I along with my colleagues started this program as part of an internship with the MSW program at the University of Toledo. This program is available to all our communities as well as consumers residing in Lucas county. The program focuses on treatment and recovery. It is an art gallery where clients can portray their artwork for the public. This will aide in reducing stigma and help as well as increase self esteem and aide the individual in the recovery process. The program has been a success and we want to expand our reach to help this program grow. We also want this to be a consumer led program to get other motivated and interested people to help this program grow. We have also developed an art council which is made up of consumer that are willing to take over the project and make it successful. They can be proud of and advocates for themselves as well as others in the mental health system. We need new funding, cost of the program is high. They can be as well as potential art classes to help others with the artwork. This is a needed program in this area. You can visit our website www.zepcenter.org. Thank you for your time. | Zepf Community Mental Health Center | 5 | 0 to 30 days | \$20,000 |
| Lucas | NEW KITCHEN | Background Over the past seven years, Feed Lucas County Children has demonstrated the ability to feed hungry children. By creating a broad-based coalition of parents, schools, faith-based organizations, volunteers, charitable foundations, and corporate sponsors, we have created a self-sustaining program capable of serving 15,000 hot meals per day. As 50 agencies use 70 sites receive more meals, we have become the largest provider of food to impoverished children in the county. But, as proud as we are of these accomplishments, we want to do more. Since 2001, the number of Lucas County children living in poverty has increased from 17,000 to 24,000—marking the Toledo-area as one of the ten poorest in the United States. With significant layoffs already occurring at major employers such as Chrysler/Jeep and Dana Corporation, these numbers will continue to grow. The purpose of this letter is to propose a practical solution to this program. | Feed Lucas County Children, Inc | 28 | 0 to 30 days | \$850,000 |
| Lucas | Self Rehabilitation | To whom it may concern, I am a student at the University of Toledo and about to graduate in the Spring. I tried to start my own business called Amp'd Marketing in Toledo, OH that was a digital marketing firm. From web design to digital signage it was a huge innovative idea that could have brought a lot of jobs, instead, it brought a lot of financial turmoil to my life and now my graduation is in debate. Please help if I am within guidelines. | Amp'd Marketing | 1 | 0 to 30 days | \$10,000 |
| Lucas | St. Vincent Mercy Medical Center - Medical Simulat | Much Appreciated, Alex Rufe St. Vincent's Mercy Medical Center will establish an Integrated Medical Simulation Training Center for physicians, resident physicians, nurses, firefighters, police and allied health professionals. The center will have high fidelity mannequins which will allow hands on training of realistic medical scenarios, including disaster management. Supervisors will have an expanded area to improve surgical skills including minimally invasive and robotic training. Research will be a critical component of the center; this will validate effectiveness of training and new developments in medical education. The ultimate goal of the center is to improve patient safety and outcomes and to reduce the cost of health care. The center will be the focal point of the Greater Toledo area for improvement and continuum of medical education in all health professions. Furthermore, as simulation training becomes a requirement for all health professionals, we will be better equipped to educate the leaders of tomorrow. | Mercy Health Partners | 15 | 31 to 90 days | \$5,000,000 |
| Lucas | Computer Training Lab for Health Care Use | Sunshine Inc. of Northwest Ohio, a non-profit organization in the health care field, provides services to approximately 250 clients with mental or developmental disabilities. In an effort to reduce costs and expand the knowledge of our staff, Sunshine Inc. of Northwest Ohio needs to update our computer training lab by replacing 110 outdated computers with 110 new 19" laptops with docking stations to bring our system up to current standards. This computer lab will serve as a continuing education lab for our current 600 employees and for computer orientation needs for all new hires. Additional hardware needs include installing an LCD projector into computer banks and new chairs to accommodate the training person and eight staff members. By updating our computer lab, current employees and new employees will be more viable to our community and the clients we serve. | Sunshine Inc. of Northwest Ohio | 2 | 181 days or more | \$27,500 |
| Lucas | St. Anne Mercy Hospital - Support Area Expansion | St. Anne Mercy Hospital, a 100 bed community hospital, provides personal, convenient, and accessible healthcare services to the western Toledo area. The continuous growth in our hospital requires additional space to meet the current and expected demand. Essential functions like environmental services, maintenance, and storage can use the added space, but this will also allow for the conversion of present support space to clinical functions for growing patient demand. | Mercy Health Partners | 10 | 91 to 180 days | \$1,500,000 |
| Lucas | Mercy College Campus - Parking Garage | The Mercy Campus is the home of Mercy College with over 800 students providing training to our future healthcare work force. The current parking garage provides the needs of parking to students and staff. The parking garage requires structural upgrades both for safety and energy consumption of lighting and elevators | Mercy Health Partners | 8 | 31 to 90 days | \$3,000,000 |
| Lucas | Addition to Public Works Building | Construct a 2800 square foot addition to the Public Works Building located at 1215 Waterville Monclova Road. The addition, measuring 70 feet by 40 feet would be primarily for the storage of public works' vehicles and equipment, which are currently stored outside. Building construction would be steel columns with metal outward, steel bar joist roof supports and metal roof. Also included would be a safety and operational upgrade to Village's fuel dispensing system, which is located adjacent to the building. | Village of Waterville | 40 | 181 days or more | \$250,000 |
| Lucas | Electrical Upgrades at Village Facilities | Project items include installing an electric transfer switch at the Karyl Street Pump Station and at the Master Water Meter Vault for the purpose of bringing standby power from a portable generator at these facilities. If that is an outage or interruption from Toledo Edison's electric power. Also at the 400,000 gallon and 250,000 gallon Water Towers install battery backup units to provide standby low voltage power to the tower's sensors and transmitters. If that is an outage or interruption from Toledo Edison's electric power. These backup systems will minimize the interruption from power outage for the operation of the Village's water and sanitary facilities. | Village of Waterville | 10 | 91 to 180 days | \$24,000 |
| Lucas | Standby Generator for Village Municipal Building | Provide a standby generator to provide emergency electric power to the Municipal Building, located at 26 North Second Street, during a power failure/interruption from Toledo Edison's facilities. The Municipal Building houses the Police Department, Administrative Offices, and Council Meeting Room. The project items include an outdoor, 45 kilowatt, natural gas generator in a weatherproof, self-contained housing, transfer switch, mounting pad, and cabling and conduit to in-house power control panel. | Village of Waterville | 12 | 91 to 180 days | \$44,000 |
| Lucas | Hi-Remediation | Hi-Genomics has developed technology to produce grasses and other crops capable of extracting environmental contaminant from soil. Environmental remediation costs make reclamation cost prohibitive, preventing development in core industrial areas while vacant green spaces are taken up. Hi-Genomics, through the Hi-Remediation project, will allow property owners and municipalities to create remedial sites also at a fraction of current remediation costs. In addition, contaminants will be actually removed from the project site instead of buried as with current methods. It is our intention to develop a collaboration with a carbon sequestration partner to permanently remove the contaminants once the specialized species are developed. Harvested "contaminant crops" can thus be taken out of the environment. The stimulus dollars will be used to develop species that can be used for specialized contaminants and soil types. Development activities will include beta testing and actual site remediation. | Hi-Genomics | 15 | 0 to 30 days | \$6,000,000 |
| Lucas | Energy Efficiency Upgrades at Public Works Buildin | Undertake energy efficiency upgrades at the Public Works building located at 1215 Waterville Monclova Road. Work items include adding insulation to walls and ceilings, replacing five truck doors with heavy insulated metal overhead doors, replacing four man-doors with energy efficient metal doors, and replacing heated truck bay areas with overhead, natural gas, radiant units. | Village of Waterville | 25 | 91 to 180 days | \$40,000 |
| Lucas | Disher Drive Recycle Station-Phase 2 | Complete the construction of a 1.5 acre Village Recycle Facility, that will accommodate yard waste, paper, plastic, metal, glass, leaves, and brush from residents, and provide mulch and wood chips for pick-up. Project items include completion of drainage facilities, asphalt pavement loop drive access/paved paths for dumpsters, stone areas for storage of materials, concrete containment walls for rain water control, area lighting with four sign standards, landscaping to include shrubs and 12 small trees, fencing of perimeter, and gated drive entrance. | Village of Waterville | 30 | 91 to 180 days | \$181,000 |
| Lucas | Catholic Charities Family Stabilization Program | St. Ann's Charities helps clients achieve family stability through our homeless shelter, life and home management workshops, permanent supportive housing program and our school attendance initiative. These comprehensive, wrap-around services address multiple issues within families, and supports parents as well as children. | Catholic Charities, Diocese of Toledo | 5 | 0 to 30 days | \$100,000 |
| Lucas | Catholic Charities Family Stability Program | Catholic Charities helps clients achieve family stability through our homeless shelter, life and home management workshops, permanent supportive housing program and our school attendance initiative. These comprehensive, wrap-around services address multiple issues within families, and supports parents as well as children. | Catholic Charities, Diocese of Toledo | 10 | 0 to 30 days | \$200,000 |
| Lucas | Enhancing Technology at Mercy College | Funding is being requested to enhance and expand classroom, academic, and administrative technology at Mercy College. While sale charges will be made to the technology infrastructure with administrative and academic data bases. In addition to improving and upgrading the infrastructure, six new positions will be created including a chief information officer position, instructional researcher, webmaster, manager of administrative information services, manager of academic support services, and IT support. Funding will ensure that students, faculty staff, and administration at the College have access and are utilizing the latest technological advances when conducting business, teaching, and learning. | Mercy College of Northwest Ohio | 6 | 0 to 30 days | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lucas | Rehabilitation of 100,00 Gallon Water Tower | Rehabilitate an elevated, steel water storage tank used for water supply for the Village of Waterville. Project quantities include exterior repair of tank and support structure, interior repair of tank, saem sealing, new cathodic clips and couplings, new flap gate, new riser manway, new roof, saem and vent, new roof heat seal, replace exterior light, new sidewalk ladder and platform, new galvanized ladder and platform, new wet riser ladder, new leg ladder, and new gate over riser pipe. The project objective is to extend the tower's life for another 25 years. | Village of Waterville | 25 | 91 to 180 days | \$200,000 |
| Lucas | Annual Sidewalk Program | Replace existing sidewalks throughout Waterville that are in poor condition. This is an annual program that has an objective to provide safe sidewalks in good condition for the pedestrians. The project quantities are replacing or mu-jacking 800 sidewalk slabs. | Village of Waterville | 15 | 91 to 180 days | \$40,000 |
| Lucas | Local Street Resurfacing Program | Resurfacing and repair local streets throughout Waterville, that have been identified for work in the Pavement Inventory and Appraisal Study. The streets are Wilkiss Drive, Overlook Drive, Houshopper Drive, Fourth Street, Fifth Street, Keok Street, Henry Street, Harkness Drive, and South Midway Lane, Water Street, Pennsylvania Avenue, Wilshire Drive, and Public Works Drive. Work items include milling existing pavement, spot full-depth pavement repairs, resurfacing with asphalt, replacing deteriorated curbs, and upgrading storm sewers to ADA requirements. These streets are in poor condition, and their improvement will extend their design life to 15 plus years. | Village of Waterville | 35 | 91 to 180 days | \$873,000 |
| Lucas | Madison Food Service and Community Center | The Madison Food Service and Community Center is a daytime drop-in facility in downtown Toledo for people who are out of work, hungry, stressed, and in need of other services to prevent or end homelessness. The Center is open 12 hours a day, 7 days a week provides 350 people a day with a safe place to get the street, three nutritious meals, medical/dental exams, case management, and referrals. These efforts are hampered by the deterioration of our nearly 50 year old building. The air conditioning system has not worked in years, and the heating system does not work in part of the building. The restroom infrastructure need replaced to be ADA compliant, and the original pipes and drains need replaced because they cause constant problems and unpleasant odors. These upgrades will make the building more energy efficient, put people to work, help meet current guest needs, build capacity to meet future needs, and increase guest satisfaction. We will conduct surveys to assess guests' satisfaction and evaluate projects. Financial, structural, impact) needs. These upgrades will make the building more energy efficient, put people to work, help meet current guest needs, build capacity to meet future needs, and increase guest satisfaction. We will conduct surveys to assess guests' satisfaction and evaluate projects. We will evaluate success by comparing pre-post project data. Guests will be able to access services throughout the capital process. | Cherry Street Mission Ministries | 6 | 0 to 30 days | \$50,000 |
| Lucas | Sparrow's Nest Women's Shelter | Every year in Lucas County, approximately 368 single, adult women seek emergency shelter. Yet local emergency shelter capacity indicates there is a shortage of more than 100 emergency beds. Our goal at Sparrow's Nest is to meet some of this need and provide emergency housing and life transforming programming to help women move from dependency to self-sufficiency. Many of the women we serve left their last "regular housing" because of domestic violence, poor living conditions, or insufficient income. The economic crisis could be part of the reason we have seen a 57% increase in women seeking shelter (average 63 women a night in January and February 2009). To meet emerging needs, funding of \$55,675 will provide facility upgrades including external lock lock pointing, a central air system (currently only inefficient window units), and shelter supplies including mattresses, storage bins, cleaning supplies, toilet paper, hygiene supplies, and towels. This project will make the building more energy efficient, put people to work, help meet current guest needs, and increase guest satisfaction. We will evaluate success by comparing pre to post project data. | Cherry Street Mission Ministries | 10 | 0 to 30 days | \$55,675 |
| Lucas | Transitional Housing | Transitional housing provides a supportive environment where formerly homeless men can learn the life skills required for acceptance back into society. Our region faces a transitional housing shortage despite the research that shows it helps people achieve independence. Lucas County has just 134 transitional housing beds. Most have stay limits that force men prematurely into housing they are ill-equipped to manage or none at all, a major factor in homelessness in 95% of cases. We require \$190,000 to build three energy efficient transitional homes (\$60,000 each) to serve up to 12 men at a time. The goal is to help men successfully re-enter the community through sustainable permanent housing. Residents will be able to graduate to the Ready for Life program and meet referrals to job training, job placement, and other shelters. Case and housing managers will provide referrals, case management, and other supportive services. We will measure success by our ability to complete construction in six months, fill all units three months after opening, obtain funding for one year of occupancy, and receive permanent housing for 75% of residents in 24 months. | Cherry Street Mission Ministries | 10 | 0 to 30 days | \$195,000 |
| Lucas | Men's Shelter | There is a growing need for emergency shelter for men in Lucas County. In Toledo, where unemployment is higher than the rest of the state and wage growth is stagnant, nearly 1,000 men are experiencing homelessness in 2009. A staggering 46% of people who are high school graduates or our men's shelter center live at or below the poverty line. They are in such an economically precarious position that any one unexpected expense can push them into a downward spiral that results in homelessness. In January 2009 we provided shelter to an average 159 men. This is a 25% increase over last year and more than all other shelters for men in Northwest Ohio combined. Our facility needs to grow with the community needs. Funding of \$145,725 will provide new windows, a central air system (currently only inefficient window units), and shelter supplies including mattresses, bunk beds, storage bins, cleaning supplies, toilet paper, hygiene supplies, and towels. These upgrades will make the building more energy efficient, put people to work, help meet current guest needs, build capacity to meet future needs, and increase guest satisfaction. We will evaluate the project's success by comparing pre-post project data. | Cherry Street Mission Ministries | 12 | 0 to 30 days | \$145,725 |
| Lucas | LifeBridge Center | In 2008, we were the gracious recipients of an old furniture factory and warehouse in downtown Toledo. The building is, however, in dire need of repairs, specifically in the kitchen, flooring, and electrical systems. We request funding to rehabilitate the building into a downtown community center for people to obtain clothing, furniture/household items, and case management. Of special note, this will be the region's only Furniture Bank. It is a joint project between FOCUS, Toledo Area Ministries, and Cherry Street. The bank will receive furniture that cannot be sold otherwise from local and national retailers to be distributed to people in need. This project puts people to work rehabilitating the building, and it will provide long term jobs at the community center. The project will also help people in desperate financial need once completed. We believe our project serves to re-ignite the development already underway in downtown Toledo by providing the people of the neighborhood education, training, and job creation. We will measure success by our ability to complete rehabilitation and begin programming in three months and obtain funding for one year of operating expenses. | Cherry Street Mission Ministries | 6 | 0 to 30 days | \$100,000 |
| Lucas | Food Service | Every day, Cherry Street helps people meet their most basic need of eating a balanced meal. We serve free meals to more than 700 people a day at Sparrow's Nest (our women's shelter), Madison Food Service and Community Center (1919 W. Madison Ave.), and Good Samaritan Outreach Center (1108 Broadway St.). In 2008, we served 240,309 free meals to men, women, and children at all sites, a 7% increase over 2007. In January 2009 we served an average of 728 meals a day or 20,644 meals in the month. We also provide food baskets to relieve homelessness. 70 requests a month at Madison and Good Samaritan are we unable to fill. Food pantries across the county are a 20% increase in need last year and many of the new faces are working-class people who have lost their jobs or homes. Funding of \$50,000 will provide all the food and supplies Cherry Street needs to serve more than a quarter of a million meals and hundreds of food baskets this year. We will evaluate our success by comparing pre to post project data. Total number of meals served, average daily meals served, total number of food baskets distributed and total number of people served. | Cherry Street Mission Ministries | 6 | 0 to 30 days | \$50,000 |
| Lucas | Education and Career Center | Since 2001, the Education and Career Center has prepared low-income and homeless adults to achieve a healthy level of autonomy through literacy, education, and career help. The Center helps more than 230 people a year move from welfare to jobs that pay a living wage, breaking the cycle of poor education and helping people build secure futures. There is an immediate need for more intensive educational programming for people who are homeless and low-income, and the existing way of bringing our region out of the economic crisis, funding will provide for three activities: (1) upgrade 10 out of date computers at the Center's computer lab (new hardware with Windows Vista); (2) purchase an unlimited site license for Shock-Vaughn's online DEED resources; and (3) hire a new education specialist position (20 hours a week) to build current staff capacity and meet growing needs. We will measure student improvement through pre- and post-project evaluations to determine trends in knowledge, reading grade level, safety, self-respect, empathy, and problem-solving. For former students, we will conduct six-month retention evaluations. | Cherry Street Mission Ministries | 1 | 0 to 30 days | \$25,576 |
| Lucas | "You're Hired" Youth One Stop Employment and Train | For 6 years Catapult Learning has been the lead agency of the largest Out-of-School WA Youth program in Cuyahoga County. Our program the "You're Hired" Youth One Stop Employment and Training Lab is a collaborative effort of agencies: Catapult Learning and 2 local non-profit agencies and has provided academic remediation, real life skills, relevant preparation for work, pertinent referrals to occupational training, necessary supportive services, sustaining job placements and meaningful follow up to over 700 young adults. Clients success is due to the personal relationship developed between staff and clients and relevant recruitment (IT technicians, steel fabrication welders, client choice programming and relevant follow up. Programs are built on research based positive youth strategies. We propose to open a similar program in Toledo to address the academic, training and employment needs of the young adults in Lucas County. We already have one local non-profit willing to partner in our endeavor. Occupational training opportunities will be sought through local community colleges and trainers. A partnership with local One Stops will be developed. | Catapult Learning | 115 | 31 to 90 days | \$920,000 |
| Lucas | Pioneering Ohio to Champion Business Through Ohio' | A robust, skilled, educated workforce is the driver to create the fertile landscape for Ohio to nationally lead business. Thus, Ohio shall economically lead the Nation. We will create an interactive "single point location" infrastructure for every Ohio high school student to directly network with every college/university, trade school, and/or trade apprenticeship. Thus, every Ohio student shall have limitless opportunities. This forum unlocks countless scholarships & grants, as well as, providing business outreach by linking in-finite trade apprenticeship opportunities for Ohio students. By showing students they have opportunities, even at risk students will see the world from a different perspective. Thus, graduation rates will increase, self-destructive behavior will decrease (crime, drugs, pregnancy...) because all see a desirable future for themselves. In addition, our program provides the conduit for community mentors to connect with students. | Alumni Connection.com | 32 | 31 to 90 days | \$6,505,472 |
| Lucas | C AND D RECYCLING / SALVAGE CENTER | By establishing a highly skilled, educated labor force, Ohio becomes the magnet for business. From manufacturing to high-tech, businesses realize the value of this commodity and will prosper. Thus, Ohio paves the future. | PAXTON DEMOLITION INC | 30 | 0 to 30 days | \$5,000,000 |
| Lucas | City Network Connectivity | We are currently a WBE, military affiliated corporation. We are looking to start the first and only C and D Recycling/Salvage Center in Lucas Co. NW Ohio. This facility will create 30+ new jobs, Laborers, Operators and Truck Drivers. The purpose would be to reduce landfill space and CO2 emissions. We are using the lead in the demolition industry by creating environmentally friendly choices. | City of Toledo | 30 | 91 to 180 days | \$5,912,000 |
| Lucas | Downtown Toledo Broadband Wi-Fi | Provide private network that connectivity to city facilities. | Keoja Wireless Co., Ltd | 22 | 31 to 90 days | \$925,000 |
| Lucas | Three dimensional image capture for missing childr | From network design and implementation to customer support, Keoja Wireless Co., Ltd is a community Wi-Fi network, development company offering residential, low income housing and rural neighborhoods a complete suite of professional wireless internet solutions. Targeting sectors with increased broadband penetration inherently converges the "digital divide" amongst groups that historically been underserved. Keoja Wireless increases community computing capacity by safely designing and deploying wireless internet networks that rates up to half of what residents would pay traditional internet service providers. | Techtol Imaging, LLC | 50 | 31 to 90 days | \$250,000 |
| Lucas | Northwest Ohio Electronic Medical Records | Currently, Lucas County is experiencing unemployment rates well over 13%. Keoja Wireless intends counteract this trend by utilizing federal stimulus funds to train unemployed and/or underemployed residents to become high wage information technology designers, technicians, account executives. Furthermore, Wi-Fi access across downtown Toledo will transform the area into an economic development tool to recruit other high-tech oriented businesses, increase worker productivity and operate as a functional public agency that promotes urban residential growth. | Hospital Council of Northwest Ohio | 200 | 31 to 90 days | \$100,000,000 |
| Lucas | PATHFINDERS | THIS IS A RESUBMISSION TO CORRECT E-MAIL ADDRESS | CAREERS INC, JOBS, TRAINING AND COACHING UNLIMITED | 200 | 31 to 90 days | \$500,000 |
| Lucas | Three dimensional imaging for missing children ver | TRAIN/RETRAIN VETERANS AND OTHER POPULATION WITH BARRIERS TO EMPLOYMENT. BARBERSHOP LOCATION IN DOWNTOWN TOLEDO WILL BE USED TO REPAIR AND REFINISH DONATED BOATS AND SOME AUCTION FOR RELEAS AND AUCTION ACTIVITIES TO HELP FUND PROGRAM. INDIVIDUALS WILL LEARN REPAIRING TECHNIQUES, RESTORATION, SALES, ENGINE REPAIR, GET CERTIFICATIONS FOR OSHA, CPR AND FIRST AID AND OTHER AUTO REPAIR ACES TRAINING, 6 MOS. STIPEND WHILE TRAINING INDIVIDUAL. INCLUDED IS SOFT SKILLS TRAINING IN WORK ETHICS, WORK HANDLING SKILLS, INCREASE IN SELF ESTEEM, GENERAL LIFE SUPPORT GROUP, CERTIFICATIONS FOR AREAS LEARNED. FOLLOWED UP WITH 2 MONTHS POST AND 2ND YEAR DEVELOPMENT. | Techtol Imaging | 50 | 31 to 90 days | \$250,000 |

| Lucas | Zegler Habilitation Day Services Retro-fit Build | Funds are needed to retro-fit Zegler Habilitation, a non-profit agency, with energy efficient upgrades to the primary structures in its day services complex located at 2000 N. Reynolds Road in Toledo, Ohio. These improvements will include energy-efficient lighting and appliances, new energy efficient windows and doors, new insulation, new electrical wiring, upgrades for floors/walls/ceilings, solar panels on all buildings, and an energy efficient heating/cooling system. | Zegler Habilitation Homes, Inc. | 25 | 181 days or more | \$250,000 |
| Lucas | Ritter Planetarium - Science Education for the 21s | Since 1987, Ritter Planetarium/Books Observatory has been offering programs to nearly 20,000 students in regional elementary, middle, and high schools each year. We present nearly 200 programs and observing sessions annually to undergraduate students (more than 1,500 attend) and to the public. Many of our student assistants have gone on to rewarding careers in formal and informal science education. The planetarium has never received a major equipment upgrade. Many of the technologies that we rely on are disappearing. Maintaining the aging star project is becoming more difficult and expensive. With obsolete tools, production programs that depend on a technologically savvy audience, and a deteriorating facility, this providing jobs. Introduction of digital technology will enable us to envision new tools for teaching in several disciplines and address the diverse learning styles of today's students. Our programming will become more dynamic and inspiring, and it will motivate a generation of students to explore science and technology. | Dept. of Physics & Astronomy, University of Toledo | 20 | 91 to 180 days | \$1,000,000 |
| Lucas | Housing Renovation and Work Training | Housing Renovation and Work Training: Zegler Habilitation Homes would like to purchase and rehab homes in the community surrounding the facility for supportive employment and community based instruction, using local contractors who will provide apprenticeships to adults with developmental disabilities and youth who've dropped out of school. Funds are needed to provide financial support for apprenticeships, including wages for apprentices, salaries for staff, transportation to and from work site, and any training materials that may be needed. The outcome will be independent living through learning vocational skills. | Zegler Habilitation Homes, Inc. | 50 | 181 days or more | \$250,000 |
| Lucas | Housing Renovation and Work Training | Housing Renovation and Work Training: Zegler Habilitation Homes would like to purchase and rehab homes in the community surrounding the base facility for supportive employment and community based instruction, using local contractors who will provide apprenticeships to adults with developmental disabilities and youth who've dropped out of school. Funds are needed to provide financial support for apprenticeships, including wages for apprentices, salaries for staff, transportation to and from work site, and any training materials that may be needed. The outcome will be independent living through learning vocational skills. | Zegler Habilitation Homes, Inc. | 25 | 181 days or more | \$100,000 |

| Lucas | Licensure and Certification for ATADAP | Licensure and Certification of ATADAP (A Typical Adult Day Activities Program), a community based instruction model that is being developed presently and funds are needed to pay legal fees to obtain licensure and certification authority for the program, as well as training and promotional materials, and to pilot the program in a new independent living training program. Zegler Habilitation will include the development of a program that will provide intense training in independent living by placing adults with disabilities in the community either day or for extended periods rather than in a day hab center for the entire day, while in the community, participants will learn how to live independently in the community as workers, consumers, learners, and citizens. | Zegler Habilitation Homes, Inc. | 10 | 181 days or more | \$500,000 |
| Lucas | Licensure and Certification for YADS/YESS | Licensure and Certification of YADS (Young Adult Day Services)/YESS (Young Adults Enrichment Enrichment and Supports) is needed to extend the independent living training provided by these programs across the state to other areas. Funds are needed to obtain legal licensure and certification authorization, to develop training materials, to train staff, and to create training materials. Outcomes will be extending young adult day hab programs across Ohio and improving independent living training for this population. | Zegler Habilitation Homes, Inc. | 5 | 181 days or more | \$250,000 |
| Lucas | CHARLOTTE WEB | CHARLOTTE WEB Center for Habilitation, Activities, Resources, and Learning, Offering Training & Team-building in an Environment of Safety with Weekday/weekend Education & Behavior Support teaches adults with severe disabilities how to live independently using a pilot program that provides community based instruction and the based activities/education. Funds are needed to upgrade existing building purchase materials, pay staff salaries, provide transportation to and from program and within the community around the site, train staff in pilot program, and finance partners with community businesses involved in training/apprenticeship programs. Outcomes will be an increased knowledge of a specific community that will increase the ability of participants to live independently in the community and generalization of these skills to their own residential community. | Zegler Habilitation Homes, Inc. | 25 | 181 days or more | \$1,500,000 |
| Lucas | LIFE | Providing training for participants to function independently in the community by participating in planning to attend events, make use of various community resources, go out to restaurants, and visit sites in and around Toledo, sometimes after hours. Funds are needed to expand the program to extend the after hours involvement and pay staff for extra hours and for additional transportation costs; train adults to host events such as tea parties, dinner in their homes, and parties; include participation in volunteer efforts, clubs, and other organizations; and to include young adults enrolled in other day hab programs in "after hours" activities to learn socially appropriate behaviors. Funds are needed to pay staff for additional work hours. Outcomes will be development of independent living skills for residents in supported living situations, as well as improvement of independent living for peer co-workers in the area of vocational skills. | Zegler Habilitation Homes, Inc. | 5 | 91 to 180 days | \$250,000 |
| Lucas | HOMIES | Homies provides in-home assistance to severely disabled individuals living in supported living settings. Peer Enrichment and Encouragement Partners (PEEPs) will provide two or three hours of assistance each week, helping residents with managing household chores, planning, buying, and preparing food for meals, laundry and clothing care, and personal hygiene as needed. Indirect supervision will be provided by supported living staff who will be there to support the peer partnership, only intervening when asked or if there is a conflict requiring a neutral party for resolution. Funding is needed to provide salaries for peer co-workers, transportation, any training materials that may be needed, and to pay staff for additional work hours. Outcomes will be development of independent living skills for residents in supported living situations, as well as improvement of independent living for peer co-workers in the area of vocational skills. | Zegler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$500,000 |
| Lucas | I-STYLE | I-STYLE (Independent living Support Training for Young adults Learning through Enrichment). Funds needed to purchase materials, pay staff, and obtain labor services for program that trains young adults with developmental disabilities in Zegler's LINKS, YADS, and YESS programs proper hair care, nail care, how to shave/shampoo make-up, grooming, and dressing in a salon setting so that they can perform all of these daily living skills independently. Outcomes will be independent living skills development for participants in the above programs. | Zegler Habilitation Homes, Inc. | 5 | 91 to 180 days | \$100,000 |
| Lucas | GRADS | GRADS (Gaining Responsibility in an Adult Day Hab Setting) is a new program being developed by Zegler Habilitation to provide students with developmental disabilities enrolled in area high schools with a gradual transition into day hab settings while in their junior and senior years to learn independent living skills they will need as adults. Funds are needed to provide transportation to and from program, training and promotional materials, and to pay additional staff. Outcomes will be students entering adult life with more independent living skills and schools being provided with additional training in independent living for their students approaching adulthood. | Zegler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$500,000 |
| Lucas | ZIGZAG Independent Living Training | ZIGZAG (Zegler In-school Groups extended day and Zegler Adult & transition Group) comprise four youth programs that assist with the transition from school to independent living as adults, training students and young adults in independent living skills, an older adult hab that also provides training in independent living, and a supportive employment enclave that teaches independent living through job training. The programs are an after-school program for students enrolled in special ed classes in elementary and junior high school, BOCET (Disabling Learning Opportunities Outside School Time), an after-school program for high school students enrolled in special ed classes, LINKS (Learning Independence, Necessary Knowledge and Supports), a day hab program for young adults, YADS (Young Adult Day Services), a Saturday program for young adults, YESS (Young Adults Enrichment & Support Services), an adult day hab for older adults, ZPS (Zegler Individualized Programs & Supports) and a supportive employment enclave, VIOC (Victims/Innocent Cheaters). Funds will increase the size and scope of all of these programs. Outcomes for these programs include increased services, more opportunities for training in independent living, and development of independent living skills for participants. | Zegler Habilitation Homes, Inc. | 25 | 91 to 180 days | \$1,000,000 |
| Lucas | Homeless Prevention Program | The Society of St. Vincent de Paul (SSVP) has over 1,000 volunteers and staff in a network of 65 conferences, which covers the 19 counties of Northwest Ohio to help the poor and those in need through emergency financial assistance for utilities, rent, mortgage, food, clothing, furniture, household items, and prescriptions. The daily calls, which open in our 65 parishes and 77 with some additional emergency assistance has been steadily rising. Funding received would be used to support the increasing requests for emergency assistance in an effort to prevent homelessness as well as reach out to the community as funds can be used in a proactive manner, i.e. budget education, income expanding resources, which would include enhancing meal options for the family by increasing the purchasing power of their current food stamp allotment, and other resources. | Society of St. Vincent de Paul | 25 | 31 to 90 days | \$1,500,000 |
| Lucas | Economic Stability and Recovery Project | ABLE will target communities in western Ohio hardest hit by the economy and provide holistic legal intervention. Services may include assistance in areas such as access to public benefits, consumer or debt problems, foreclosures or other housing issues, bankruptcy or child support problems and will include: 1. Outreach: ABLE will work with other social service organizations to reach the households who need legal assistance. 2. Legal Analysis and Referral: Families will receive a legal assessment to holistically determine their legal needs. Non-legal needs will be referred to other agencies. 3. Full representation: Those who require it will receive on-going legal assistance to achieve outcomes such as safety from violence or unsafe housing, prevention of home or apartment loss, income maintenance, job readiness, and access to health care. | Advocates for Basic Legal Equality, Inc. (ABLE) | 5 | 0 to 30 days | \$625,000 |
| Lucas | Legal Assistance for Victims | ABLE will provide free legal assistance and education to victims of domestic violence, stalking and sexual assault, and family members, in 32 rural and urban counties in Northwest Ohio, to meet VOCA statutory areas of: 1) responding to the emotional and physical needs of victims, 2) assisting primary and secondary victims of crime to stabilize their lives after victimization. Funds will cover other non-ABLE jobs and increased safety will help clients find or retain jobs. ABLE has long worked closely with a wide network of domestic violence and sexual assault service providers, victim services agencies, task forces and coalitions, with whom we cross-train advocates, cross-refer clients, and work collaboratively on systemic issues impacting victims. By continued collaborations, referrals, outreach, and our Legal Aid Line toll-free and web-based legal information, referral and legal advice service, ABLE will holistically assess victims' legal needs, provide out legal assistance on Protection Orders and/or other legal needs (e.g., eviction, consumer, public benefits, bankruptcy-see VOCA-priority), pursue victim compensation, and connect victims to other services as needed. | Advocates for Basic Legal Equality, Inc. (ABLE) | 3 | 0 to 30 days | \$437,500 |
| Lucas | Homeless Prevention | Legal assistance is vital to prevent homelessness, both for those at risk of homelessness (renters and homeowners facing existing or threatened foreclosures), and for those already in a shelter. ABLE prevents homelessness through eviction and mortgage foreclosure defense work, alternative litigation as it relates to housing conditions issues, and representation in subsidy terminations for both subsidized and public housing. Additionally, ABLE works with tenants to preserve affordable housing and to retain or obtain eligibility for subsidized housing (project-based Section 8 for renters or public housing). Legal assistance on related issues, including housing, removing barriers to employment, income maintenance, consumer debt problems, which impact a tenant's ability to pay rent or mortgage, and thus obtain or retain housing, is also necessary to prevent homelessness. | Advocates for Basic Legal Equality, Inc. (ABLE) | 4 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---------------------------------------|----------------|--------------------|---------------------------|
| Lucas | Oregon City Schools Education Technology Plan | We plan to install 17 miles of fiber to more effectively digitally connect the seven schools, ten buildings in our school district. This project will provide the infrastructure enabling us to fully integrate technology into our classrooms. This fiber network is the bulk of the cost of the project \$400,000 and is a one-time expense for our district. Additionally, the funds would be used to provide professional development for the staff, again, to have the skill set to incorporate technology into the lesson plan. This plan allows for \$25,000 per year for a four year implementation. | Oregon City School District | 10 | 31 to 90 days | \$500,000 |
| Lucas | Northwest Ohio Biorenewable Laboratory (NOBL) | The University of Toledo College of Engineering proposes to establish the Northwest Ohio Biorenewable Laboratory (NOBL). The facility built on a proven track record of research and commercialization based on novel biotechnologies patented and licensed by the University of Toledo is the state of biomass preprocessor, bio-feed production, and bio-material synthesis and serves as a focal point for global efforts in non-food biomass utilization. This central laboratory will serve both the scientific and technical community as well as present and potential commercial producers of renewable chemical and fuels. The NOBL will provide centralized analytical services for new and established bio-products manufacturers. It will also provide affordable mechanical and structural resources for companies to conduct R&D activities needed to expand production of new technologies. NOBL will also attract new green manufacturers to the region. Successful commercialization efforts will lead to significant economic growth by creating green jobs in the manufacturing of bio-based fuels and materials as well as in the production and utilization of biomass. Northwest Ohio is in the heat | University of Toledo | 20 | 31 to 90 days | \$6,000,000 |
| Lucas | Retraining Engineers in Energy Engineering | The University of Toledo authorizes the proposed activities of retraining engineers in the field of energy engineering. With the current status of the automotive and related industries, many engineers working in these fields have lost their jobs due to being laid-off. These individuals are faced with increased challenges to find new jobs in this current economy. There are many job opportunities available and are being developed in areas related to Energy Engineering. The College of Engineering at the University of Toledo proposes to engage 50 displaced engineers residing in the State of Ohio by retraining them in Energy Engineering. Fifty engineers residing in the State of Ohio will be offered tuition scholarships to complete a Masters degree in Engineering with a concentration in Energy Engineering. This program will allow laid off Ohio engineers to get trained and acquire required technical skills to be able to begin employment. Classes will be offered either via distance learning or during weekends to allow wider participation and recruitment from across the State of Ohio. | The University of Toledo | 50 | 31 to 90 days | \$2,400,000 |
| Lucas | George Mance & St. George Manor | George Mance and St. George are 40 year old projects for the elderly and the severely physically disabled. The room doors are badly deteriorated and there is a serious lack of insulation in both projects. We are proposing for these 30 units a cost of \$57,000.00 and the total expense of \$60,000.00. | Vistula Management Company | 3 | 0 to 30 days | \$57,000 |
| Lucas | Catholic Housing of Northwest Ohio/Mareda, Inc. | The Catholic Diocese of Toledo owns approximately 900 units of family and elderly low-income housing in northwest Ohio. Four of these projects (Chalaree Acres, Regina Manor, Moody Manor and Michaelmas Manor) are badly in need of energy retrofits. We are proposing to put vinyl siding on the 4th and Delaware Acres project at a cost of \$105,000.00 and three in relation to insulation to the remaining 300 units at a total cost of \$198,000.00. The projects themselves can not afford this cost but this insulation and siding will greatly improve the energy efficiency of these buildings. | Vistula Management Company | 6 | 0 to 30 days | \$215,000 |
| Lucas | New Town Limited | New Town is a 100 unit Section 8 low income housing project for large families on Dorr Street in Toledo, OH. The exterior siding is 30 year old T-111 which is in an advanced state of deterioration threatening the structural integrity of the building. The reserve fund for this project is inadequate to put aluminum siding and insulation over all of the building. We propose putting aluminum siding and insulation with additional insulation bringing up the energy efficiency of this project. | Vistula Management Company | 2 | 0 to 30 days | \$180,000 |
| Lucas | Vistula Heritage Village I and II | Vistula Heritage Village I & II contains 415 units in 70 buildings over a 20 block area in north Toledo. OH. 235 units are in wood frame built brick over frame and are badly in need of increased insulation. 200 of the units have 25 year old furnaces which are at the end of their useful life and inefficient. 35 units have entry doors that are no longer weather tight. All of these buildings need extensive caulking. The cost of these projects, they are ready to go one week after receipt of grant. | Vistula Management Company | 4 | 0 to 30 days | \$320,000 |
| Lucas | ZOOM (Zeigler's Organic Open Market) | ZOOM (Zeigler's Organic Open Market) is an environmental project that will teach young adults with DD how to grow, harvest, and sell fresh produce and fish, as well as flowers. The vegetables and that food flowers will be planted on the Young Adults Center site. The staff and those interested in working as gardeners will tend to the plants, harvest them when they are ready, and sale them at a market on the center weekly using late summer and early fall. Those who participate will place the money earned from selling the fresh produce and flowers to create the open market stand, signage, promotion and advertising, payment for the inventory, and transportation. The staff will provide supervision and supervision from MRDD staff during all phases of the project. Outcomes will be increased independence for the young adults with DD who will learn how to grow and harvest food, as well as how to sell them they grow for profit and how to transfer these skills to paid work spending in a commercial greenhouse or other setting. | Zeigler Habilitation Homes, Inc. | 35 | 181 days or more | \$1,000,000 |
| Lucas | AOE (Adults Only Education) | AOE (Adults Only Education) is an educational initiative by Zeigler Habilitation to provide adults with developmental disabilities the opportunity to learn needed skills, such as using computers, simple sewing, basic carpentry skills, practical math, functional reading and language, etc. at base facility that will increase their ability to live independently. Funds are needed to pay instructors, purchase materials, and provide administrative and administrative assistant, and provide real-life experiences to utilize information learned in the classroom. The outcome will be greater success living independently for students enrolled in these classes. | Zeigler Habilitation Homes, Inc. | 25 | 91 to 180 days | \$1,000,000 |
| Lucas | IK Walkers | IK Walkers is a volunteer corps of severely disabled adults and students organized by Zeigler Habilitation who support various local charities and causes by ambulating for one or more hours in highly publicized and promoted quarterly events. Funds are needed to contribute fifty percent of the money needed to recruit sponsors, promote the event, purchase tee shirts and other items needed for the events, pay a program coordinator and MRDD staff to provide supervision, and advertise in the local media. The other half of the expenses will be paid by organizations benefiting from the walk/hikes/events. Funds will also be needed to hire a fulltime program coordinator and administrative assistant for a program. The outcome will be an increased sense of independence in the adults with severe disabilities who contribute to a worthy cause and provide a service to their community. | Zeigler Habilitation Homes, Inc. | 15 | 91 to 180 days | \$100,000 |
| Lucas | Bread of Life Bakery and Pizzeria | Bread of Life Bakery and Pizzeria is a program that teaches young adults with developmental disabilities cooking skills and provides a product for them to sell and earn money. Funds are needed to pay a professional baker who will provide training and guidance in the venture, as well as a business manager and assistant manager and MRDD staff who provide supervision, purchase a pizza oven and equip a small area as a kitchen for making pizzas, purchase cooking utensils, food, and other equipment needed, and buy promotional materials and advertising space in local news media. The outcome will be the acquisition of independent living skills as young adults learn cooking skills such as measuring, mixing, and baking, as well as budgeting and shopping, marketing skills, and customer service in a business setting. | Zeigler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$250,000 |
| Lucas | ZEST (Zeigler Entrepreneurial Support Team) | ZEST (Zeigler Entrepreneurial Support Team) is an initiative to provide funds for young adults with developmental disabilities to start entrepreneurial ventures, providing funding for materials and advertising, staff support, and a "trail" for entrepreneurs to set up shops. Funds are needed to secure a location, provide materials and a space for the young adult entrepreneurs to work, advertising money to promote each product or service, hire staff to provide independent support and supervision for the young adults, and pay for the program manager and assistant manager. Outcomes will be increased independent living for adults with severe disabilities who will be empowered to create their own business ventures and who will learn how to market and sell product or service. | Zeigler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$500,000 |
| Lucas | ZEN (Zeigler Environment for Neurosensitivity) | ZEN (Zeigler Environment for Neurosensitivity) will create a sensory environment that will allow severely disabled adults to independently choose their own sensory diet and experience neurosensitivity training that will result in positive changes in behavior and emotional health. Funds are needed to secure a location for the sensory center, provide energy efficient upgrades to the property, purchase equipment to create a sensory environment, pay for staff to be trained by an expert in the field, pay a program coordinator, and hire a certified occupational therapy assistant to work in the center and assist adults and staff. The outcome will be increased independence in severely disabled adults as they increase their neurosensitivity and learn to manage their behavior and emotions. | Zeigler Habilitation Homes, Inc. | 15 | 181 days or more | \$250,000 |
| Lucas | PALS | PALS (Partners for Academic Learning Support) is a new initiative proposed by Zeigler Habilitation. Young adults with DD often have aspirations of attending college after graduation from high school. One young adult enrolled in YADS has made plans to attend Owens College in the fall of 2009; another plans to register as a student at The University of Toledo. The number of high school graduates with DD attending college is expected to increase with the introduction of our GRASD program in Toledo Public Schools. We would like to hire college students pursuing the same courses of study as these young adults to partner with them and provide support in the classroom with note-taking, comprehending lectures and understanding assignments; during study time with completing, comprehending assigned reading and organizing and completing writing assignments; and reviewing notes, memorizing information in preparation for exams. Funds are needed to pay PALS and a program coordinator, provide training, and purchase materials needed to facilitate academic success (e.g. recorders). The outcome will be increased independent living for the young adults who acquire academic and vocational skills. | Zeigler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$250,000 |
| Lucas | Arena Neighborhood Development Initiative | GDSP is undertaking the revitalization of a 9-12 block area around Toledo's new \$105M multi-purpose arena, existing ball park and existing convention center through the creation of an entertainment district. Over 1.2 million spectators per year will attend events at these three public assembly facilities. This market will leverage the public investment through private-sector investment made in the new retail and entertainment businesses which are already beginning to open near. In addition to the \$105M invested by Lucas County solely in the new arena, GDSP has obtained a \$714K OPWC grant plus a \$761K CIP match from the city of Toledo to fund a \$1.462M hardtaps project in the neighborhood adjacent to the arena (Phase 1.) Receipt of the "stimulus money" requested will allow GDSP and the city to construct the balance of the hardtaps improvements (Phases II & III) and all of the necessary pre-engineering amenities in Phases I, II. | Greater Downtown Business Partnership | 850 | 0 to 30 days | \$7,508,000 |
| Lucas | Education and Placement in Food Service Industry | The Toledo Restaurant Training Center has taken on a more specialized approach in providing services that focus on our strengths in the restaurant industry. It is our experience when working with unskilled or low-skilled individuals that may have limited post-secondary development skills, our industry specific occupational skills training program prepares participants to perform well on the job. The restaurant industry has over 543,000 employees and is the second largest private sector employer in Ohio. There will be over 60,800 new restaurant jobs in Ohio by 2014. Skilled, dependable employees are needed to fill these positions. The Ohio Restaurant Association estimates that by 2016 the number of jobs in the restaurant and food service industry is projected to increase by 1.8 million. Of 200,000 of those, 100,000 are already. Employment in the industry that has some knowledge and education as it relates to success on the job. In 2007, Northwest Ohio was home to 100 food-manufacturing and processing plants, with over 1,500 local restaurants and food service establishments, and steadily growing. There is increasing concern for food safety and well-trained staff in our area. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Toledo Restaurant Training Center | 200 | 0 to 30 days | \$500,000 |
| Lucas | Premium Freight Management, LLC, a Clean Fuels Ohio | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Lucas | Northwest Trailer Sales & Service, Inc, a Clean Fu | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Lucas | Glover Trucking, Ltd, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Lucas | Fossil Park Solar-Powered Restroom | The Olander Park System (TOPS) will construct a freestanding solar-powered restroom. The 1-story, 1,000sf, ADA, slab-on-grade structure has Men & Women facilities, utility hallway, & storeroom. The electric load is 28,000 watts with solar water heating & showers uses renewable energy to power thousands of showers (P&W) visitors from Lucas County, Ohio, USA, & world. Photovoltaic (PV) panels collect solar energy & a small battery center stores excess power. PV power energizes low-voltage lighting & converts 110-220v/rph power to energize convenience outlets, HVAC equipment & sewage pumps. A "heat reducing" components like solar tubes for daytime lighting, motion detectors, & stop ventilation fans, motion detectors to turn lights on & off, light sensors to regulate electric lighting to maintain a constant level, & vacuum tube solar collectors. The solar heated water temperature water to domestic water heaters, reducing energy. TOPS has added solar \$200,000 in matching dollars. When the restroom is done, TOPS will expand Fossil Park from seasonal to year-round, introducing thousands more visitors each year to solar power. TOPS IS READY FOR IMMEDIATE CONSTRUCTION! | The Olander Park System | 10 | 0 to 30 days | \$300,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Lucas | Ohio Advanced Manufacturing Commercialization Init | Ohio AMCI will be the Aerospace and Advanced Energy arm of a cross-regional technology development and commercialization program. The purpose of AMCI is to accelerate the commercialization of aerospace, power and propulsion, advanced energy, energy storage products across Ohio, to support the overall development of the Ohio Aerospace and Alternative Energy Industries, and to maximize the economic impact of every advanced manufacturing venture. With funding support through this program we plan to successfully commercialize at least 12 new companies that could impact 12 counties in 9 US Congressional Districts across Ohio that could quickly generate more than 950 near-term, high-paying, direct jobs and thousands more indirect and supply chain jobs throughout Ohio. | Regional Growth Partnership | 4000 | 0 to 30 days | \$4,000,000 |
| Lucas | N-Viro Biosolids-Efficient Renewable Energy | N-Viro International converts organic wastes, sewage sludge and/or animal manure into granular biosolids derived fuel (N-Viro Fuel). The fuel has a BTU equal to some coals with fewer pollutants. N-Viro's patented process regenerates organic matter at the same rate as it is used, making the process a beneficial reuse and the best long term sustainable solution for waste products as opposed to landfilling or incineration. N-Viro can produce renewable energy with 100% renewable energy quality - 120,000 kilowatt-hours (equivalent of saving 10,000 homes/year). Two facilities will be constructed in two counties in Ohio, a plasma gasification process converting biosolids into syngas and used directly for a gas turbine or reformed into liquid biofuel residing alongside the N-Viro Fuel facility will follow. Initial capital cost for each facility will be \$5-6.5 million (total \$10-11.0 million). One facility employs 15 for operation, logistics, and maintenance (total 45 jobs for two plants plus gasification). The revenues for each facility are estimated over \$8-9 million/year/facility. N-Viro initial commercial | N-Viro International Corporation | 45 | 91 to 180 days | \$11,000,000 |
| Lucas | Triangle Leasing Corp., a Clean Fuels Ohio partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Lucas | Sajacks Transport Inc., a Clean Fuels Ohio partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Lucas | Scott High School Clinic | Presently, St. Vincent Mercy Medical Ctr. staffs a clinic at Scott High School for the students attending Scott. The clinic is located in a converted classroom space. The future of the clinic is in jeopardy due to the renovation of Scott HS. Toledo Public Schools has money for renovations, but not for the establishment of a new clinic. Here are the budget projections: 1400 sq. ft. renovation \$165.00 per sq. ft. = \$231,000.00 Equipment needs (examining tables, testing-eqns, supplies, furnishings) = \$250,000.00 Our goals in this project are to keep students in school by offering health care thus improving attendance rates. Facilitate better relationships with parents. Provide collaboration between St. Vincent's and the Scott School of Allied Health by allowing students to have real world experience by practicing what they have learned in class as well as how a clinic functions. | Toledo Public Schools | 25 | 181 days or more | \$500,000 |
| Lucas | LEED Certification | We as a company have made a commitment to becoming a green organization. We are in need of high efficiency windows, doors, skylights, roof eaves, lock pointing, new technology electrical and mechanical systems, exterior lighting systems, exterior and weather proofing. This will help us accomplish or mission of receiving the Energy Star Rating and LEED certification. This will help us to reduce our carbon footprint and make us more energy efficient. Hospitals are a heavy user of utilities and we want to do what we can to reduce the cost of healthcare. | Mercy Health Partners | 60 | 91 to 180 days | \$25,000,000 |
| Lucas | Renovation of North Engineering research building | The University of Toledo authorizes this proposal from the College of Engineering to complete the renovation of the North Engineering Building, fourth engineering service as the research facility for the College of Engineering. More than 50,000 square feet of space is to be renovated immediately adjacent to the college. This space was dedicated to industrial use about 2 decades ago. The University of Toledo, a major contributor to our materials research mission, has not been able to conduct its research. The project funds would provide necessary renovation funds to consolidate the college's renewable energy and materials research in one, state-of-the-art facility. The college and university have already committed over \$8M for partial renovation and upgrade of the facility, and this project would be able to complete it. | University of Toledo | 20 | 91 to 180 days | \$10,000,000 |
| Lucas | Cherry Street legacy Project-Neighborhood investme | Completion of this project will lead to significant economic growth by furthering research and intellectual property development which will help to create jobs in the renewable energy and advanced materials fields. Northwest Ohio is in the heart of the manufacturing belt for the auto industry, and a considerable talented work force. A complete neighborhood housing program around the hospital with components of employee assisted housing, demolition of blighted properties, parks program and rehab housing program is a defined area. | St. Vincent's Hospital | 10 | 31 to 90 days | \$600,000 |
| Lucas | Cherry Street Legacy Project-Crime Reduction | This is a community safety partnership that connects all places to reduce crime in a specified area. This includes anchor institutions, community policing, the Cherry Street substation, weed and seed and private security forces to act as extenders to the Toledo police. | St. Vincent's Hospital | 6 | 31 to 90 days | \$100,000 |
| Lucas | ZILT | ZILTS (Ziegler Independent Living Training Seminar) is a staff training program to equip those serving the severely disabled with the skills to provide independent living training seminars for individuals with disabilities. Participants will cover all phases of independent living, including daily living, community living, social skills and budgeting and money management. Once participants complete the entire course, they will receive a certificate and be equipped with skills and addresses that can be used to teach independent living, as well as information on where to purchase complete curricula in several areas covered during the eight day seminar. Funds are needed to purchase materials for the seminar, including materials to be distributed by the instructors as well as pay two instructors to teach the seminar and a program coordinator to purchase sessions and register participants, as well as secure a location to host the seminar. The outcome will be the dissemination of information about providing instruction in independent living to staff who provide services to assist people with severe disabilities to live independently and avoid institutionalization. | Zeigler Habilitation Homes, Inc. | 3 | 91 to 180 days | \$250,000 |
| Lucas | POPART | OPART (Photography "Ordinary People" Action Research Training) is an arts program for adults with developmental disabilities that will involve learning photography from a professional photographer and taking photographs of their peers doing the things that adults typically do. These photographs will be taken over a period of several weeks to complete a book, calendar and other merchandise and a website to increase awareness in the general community that adults with DD are "ordinary" and not "special." Funds are needed to hire a professional photographer to teach the adults with DD how to take photographs, purchase cameras and other supplies, provide storage for completed work, print and bind the books, calendars, and produce other merchandise at the end of the project, and to hire a web designer to set up the website. Proceeds will be used to raise funds for Zeigler Habilitation, a non-profit agency, to provide more innovative programs after each photographer is paid a share of the profits. Outcomes will be supporting artists (the professional photographer and the participants who exhibit sales in this area) and increased independent living skills for the adults with DD. | Zeigler Habilitation Homes, Inc. | 12 | 91 to 180 days | \$500,000 |
| Lucas | Z36DFP | Z36DFP (Zeigler 363 Days Food Program) is a program to be coordinated by Zeigler Habilitation Homes, Inc. to provide food for homeless people throughout the year. Typically, the general population provides food and other items for the homeless on Thanksgiving Day and around Christmas. Zeigler would like to raise awareness that homeless people need food every day by reaching out to organizations, social service groups, churches, schools, and others to choose one of the other 363 days of the year to provide a meal for one of the homeless shelters. This will hopefully, help a supply of food coming in for the homeless in various places that provide shelter throughout the year. Funding is needed to provide a program coordinator, wages for several adults with developmental disabilities working as paid volunteers to help with answering phones and scheduling calls, and money for promotional materials and advertising. Outcomes will be more food provided for homeless individuals on a daily regular basis and increased independent living skills for adults with developmental disabilities. | Zeigler Habilitation Homes, Inc. | 5 | 91 to 180 days | \$100,000 |
| Lucas | MORE | MORE (Making Over Reuses Estem) is a program to help women who live in shelters for battered women to increase their self-esteem by getting a heavy make-over at a salon that includes make-up, hair, clothing, and shoes for a special occasion, job interview, or other important event. Zeigler will provide coordination of the makeover, obtaining the services of make-up artists, hairdressers, and clothing and shoes. Although some services and products may be donated or purchased at a reduced price, funds will be needed to pay for those that cost, as well as clothing and shoes from discount stores, to pay adults with developmental disabilities who will assist with the makeovers as paid volunteers, and a program coordinator to meet with shelter staff and select women to participate in the program and who will also provide coordination of the salon services and beauty repairs involved in the project. Outcomes will be increased self-esteem in the women from the shelters and increased independent living skills for the paid volunteers. | Zeigler Habilitation Homes, Inc. | 10 | 91 to 180 days | \$250,000 |
| Lucas | ZONES WP&CI | ZONES WP&CI (Zeigler Offering Neighborhood Energy Saving Weatherization & Community Involvement) is a program to be offered by Zeigler's supportive employment services to the residents of low-income housing in the surrounding neighborhood to reduce their energy costs and to foster community involvement among adults with developmental disabilities that will help them to improve their independent living skills. Funds are needed to hire a contractor who will provide apprenticeships to adults with developmental disabilities, to pay the apprentices wages, to purchase the materials needed for weatherization of 25-50 homes in a low-income area, and to provide staff support and a program coordinator who will solicit applications, screen applicants, and supervise the selection process for homes that will receive weatherization based on income and need. Outcomes will be reduced energy costs for the residents and increased independent living for the apprentices. | Zeigler Habilitation Homes, Inc. | 25 | 181 days or more | \$250,000 |
| Lucas | Victims Forum | Phase One is a phase one program aimed at re-empowering young girls 14 to 18 years old. Phase One is a medical trauma power point presentation that shares information on injury and the long debilitation due to the impact of violence. Phase Two utilizes victim speakers who talk to the students about their personal situations and victimization. They discuss the impact crime has had on their life and the lives of their family members and community. Phase three discusses the issue of dating violence with the students. It outlines the types of abuse, power and control issues, teen testimonials and resources available to students. Victims Forum Peacemakers is a 3 part, in-school anti-bullying program targeting children in K-4th grade. Students are provided with the tools to deal with bullying and learn how to resolve conflict peacefully. They learn to develop caring and compassion for others, understand differing points of view and increase their confidence and effectively respond to negative behavior. | Advocates for Victims and Justice, Inc. | 3 | 181 days or more | \$85,000 |
| Lucas | Recreational Program for Individuals with Disabili | The University of Toledo (UT) authorizes the development of a recreational program for individuals with disabilities through assistive technology (AT). The purpose of this program is to provide individuals with disabilities with recreational activities to aid them in becoming more independent, mobile, employable, and integrated with their community. Working towards this goal, and along the guidelines established by section 305 of the Rehabilitation Act of 1973, an amended the College of Engineering at UT and The Ability Center or Greater Toledo will work together with members of the community with a disability to determine the role and impact of AT in expanding or enabling persons with a disability to enjoy recreational, social, educational, and employment opportunities in their local independent living centers. The project funds will be used to AT to adapt and develop exercise equipment and programs and promote recreational activities that will result in health promotion and disease prevention. Current exercise facilities will be assessed in the community, then with the assistance of AT access and adaptation to needed exercise equipment and programs will be ensured. Development disabilities to access the services they need through the creation of a game for young adults transitioning into adulthood. The game would involve participants getting rewards for independently accessing needed services, such as taking clothes to the dry cleaners, making an appointment with a vet for a household pet, etc. Each independent activity will be reinforced throughout the game and each month a winner will be named based on the number of services accessed. ZEBRAS will also be a support group and participants will have regular meetings to discuss how they are doing and to encourage each other with helpful suggestions and other support. Funds are needed for the creation of the computer game board and pieces and to purchase rewards which will be small inexpensive items and special lunches or dinners for winners. The outcome will be the independent living skills the young adults with developmental disabilities will learn while playing the game. | The University of Toledo | 8 | 31 to 90 days | \$1,300,000 |
| Lucas | ZEBRAS | | Zeigler Habilitation Homes, Inc. | 15 | 91 to 180 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Lucas | ZETA | ZETA (Ziegler Electronic Training Activities) is a proposed program to teach independent living skills using interactive computer games and/or training material. Several such programs are available commercially and we would like to purchase them for the program. Others will be created by Ziegler staff to provide instruction in areas not yet covered. Funds are needed to purchase existing programs, provide additional wages to staff that work overtime to create new programs, purchase materials needed, provide additional staff to assist with training in use of the electronic program and to complete activities if needed, and this will be made to create an online space where participants can locate the activities. We would also like to provide incentives for participants to complete the activities in the form of gift certificates, electronic game cards, certificates, T-shirts, etc. Outcomes will be the acquisition of independent living skills for the adults with developmental disabilities through ongoing instruction independent and through learning the information presented. | Ziegler Habilitation Homes, Inc. | 15 | 91 to 180 days | \$1,250,000 |
| Lucas | JAMS@Z! | JAMS @Z! (Just Another Music Session at Ziegler!) is a program that was created for Ziegler's day habits to bring a musician in each week, creating a musical experience on the grounds. A summer camp will be held during warm weather and provided an hour-long presentation that is interactive and instructive. We would like to expand this program to include other musicians, providing instruction for those interested in learning to play musical instruments. Rather than just one hour of music per week, we'd like to have jam sessions one evening a week on our grounds during warm weather to stimulate interest in music and provide entertainment. These sessions will be followed up with instruction from the musicians with those interested in learning to play musical instruments. Funding is needed to pay the musicians for performance/instruction, provide instruments, and to pay a program coordinator to select musicians, schedule performances, provide instruments, purchase instruments, schedule instruction, and oversee the program. Outcomes will be giving musical artists part time employment and providing people with severe disabilities an opportunity to learn and express themselves artistically. | Ziegler Habilitation Homes, Inc. | 15 | 181 days or more | \$1,000,000 |
| Lucas | Retirement Home for the Elderly Poor | Sanford Heart Home for the Elderly has served the elderly poor of Northwest Ohio and Southeast Michigan since 1885. Our facility is home to 72 residents, all of whom meet two requirements for residence: age 65+, and minimum total assets of less than \$40,000. Residents are offered several amenities, including breakfast, lunch and dinner, an individual living unit, daily activities, volunteering opportunities, pastoral services, full nursing units, expansive grounds, and a social worker. Our facility plays an important role in the community by offering a welcoming environment in which the elderly poor can spend their twilight years. Unfortunately, the poor market has seriously curbed the Foundation and Legacy contributors we receive in a time when we need them most. Our concern is that continued losses will necessitate a sale of our facility to a corporation that is more profit oriented, and would not be so accommodating to the population we serve. | Little Sisters of the Poor | 50 | 0 to 30 days | \$50,000 |
| Lucas | Senior Center | The mission of the Little Sisters of the Poor is to aid the elderly of limited financial means. Unfortunately, our facility can only accommodate 100 residents and our waiting list is 3-5 years, meaning many who qualify for and require our assistance are unable to receive the care they need. The creation of the Senior Center is our response to that need, and an attempt to extend aid to non-residents in the community. Visiting seniors are invited to participate in the daily activities available to residents, including: Breakfast, lunch, and dinner Community activities Volunteer opportunities Pastoral Services Objectives Our goals for the Senior Center are to raise the roster from 31 seniors to 50-75 seniors and to increase average daily attendance from 7 to 15. Our objectives are to implement a resident assessment program (RTP) to assist in assessing residents' needs and to increase volunteer services. High quality linkage of all health records, preventive care and wellness programs through the use of the linkage and Healthlink products. With many hospitals, group practices and physician offices have or will implement HIT systems, the ability to link them together across the region to enhance the quality of care, to reduce/reimburse duplication, and to reduce costs has yet to be implemented in our region. This software will empower the patient, the end user, and will act as a "roof" of all existing legacy systems, independent of manufacturer or age. Further, such a project will lower the collaborative barriers while saving the needs of our citizens. Microsoft has offered to participate in a collaborative project aimed at improving care and quality of the investment in our community. Given the disadvantages of that frequently characterizes the delivery of health care, such a project will surely serve to enhance cooperation, quality and efficiency. | Little Sisters of the Poor | 5 | 0 to 30 days | \$10,000 |
| Lucas | Integrating Health Info Technology for NW Ohio | Provide a Combined Heat and Power (CHP) energy solution using microturbines, increasing efficiency by 20%. This program includes a turnkey solution to fuel efficient heating and cooling by installing 2 MicroTurbines in the recently constructed Glass Pavilion. CHP will provide upgraded conditioning to gallery and conservation spaces throughout the building. Youth Advocate Program, Inc. is an international leader in community-based services for children involved in juvenile justice, child welfare and mental health systems. Our mission is to provide individuals who are, have been or may be subject to compulsory care with the opportunity to develop, contribute and be valued as assets so that communities have safe, proven effective and economical alternative to institutional placement. We will partner with Northwest Fatherhood Initiative to provide families and fathers with supportive services to reconnect fathers with their children and empower fathers to take an active role in their child's life. The program will: Recruit, hire and train adult advocates directly from the neighborhoods that we will serve. Provide face-to-face intervention. Link each father and youth to sources of support in the community. Provide appropriate educational and vocational assistance. Provide family support services appropriate to specific needs with ancillary funds available on as needed basis www.yapinc.org Renovation 15 steel windows and bars to historical and environmental standards for main entrance of the Museum. Currently significant leaking and energy inefficient. | University of Toledo | 67 | 31 to 90 days | \$4,350,000 |
| Lucas | Energy Efficiency Upgrade - CHP | Provide a Combined Heat and Power (CHP) energy solution using microturbines, increasing efficiency by 20%. This program includes a turnkey solution to fuel efficient heating and cooling by installing 2 MicroTurbines in the recently constructed Glass Pavilion. CHP will provide upgraded conditioning to gallery and conservation spaces throughout the building. | Lucas | ZAP (Zeigler Arts & Publishing) | ZAP (Zeigler Arts & Publishing) is an artistic endeavor created to develop the artistic and writing skills of adults with developmental disabilities under the guidance of professional artists. Workshops with artists, music with artists, artists will create illustrations for various types of books (children's books, poetry books, etc.) written by those with writing talents. Each writer and illustrator will receive book royalties and the remaining profits will be used for Zeigler programs. Funds are needed for the two professional artists to create the books, purchase materials and develop a gallery to display student art, art supplies, for writing instruction/assistance, purchase computers for writing/layout, hire an editor, pay for layout of each book, and pay for printing the books and marketing them locally and online. The outcomes will be published positions for two artists. | Zeigler Habilitation Homes, Inc. | 25 | 181 days or more | \$500,000 |
| Lucas | MEDICAL FACILITY | Our non-profit organization is seeking funds to build a state-of-the-art, energy efficient, solar powered, medical case facility including pharmacy. This facility will provide an educational wing for medical and nursing students, residents, MAAs, NPAs and pharmacists where they can academically discuss and implement the most effective ways to provide comprehensive care for our ambulatory and homebound patients. We will provide laboratory services, EKGs and primary function tests for our office and homebound patients. Through our collaborative efforts with OCA, UTMSD, MHP, nursing agencies and senior centers, we can effectively decrease healthcare costs, especially in our homebound population, by decreasing the number of emergency room visits, accidental falls, repeat admissions, and days admitted to inpatient and transitional settings. We will grow to service approximately 75 homebound and 300 ambulatory patients weekly, many of which will be low-income and underserved. Our goal is to greatly reduce the complications from diabetes, hypertension, depression and high cholesterol that slash this population by innovative means including the use of the EMR. | FRIENDSHIP NEW VISION | 30 | 91 to 180 days | \$8,000,000 |
| Lucas | MENTORSHIP PROGRAM | Our non-profit organization is expanding our mentorship program. We are seeking funds to employ four facilitators and acquire computers, educational materials and supplies. Our goal is to stimulate emotional, intellectual, personal, social and economic maturity by exposing the youth to a variety of life situations that require them to use critical thinking and problem solving skills. Many professionals volunteer their time to promote career development. Our volunteers have been thoroughly screened and trained. Group activities strengthen team building and leadership skills. We have used the mentoring relationship to target youth 12-19 who are at risk of educational failure, teen pregnancy, truancy and delinquency. We have served over 100 young people and have seen an increase in graduation rates, decrease teen pregnancy rates, increase in extracurricular activities and better grades as compared to their peers. | FRIENDSHIP NEW VISION | 4 | 0 to 30 days | \$60,000 |
| Lucas | AT-RISK YOUTH | Our non-profit organization is expanding our at-risk youth program. The program is dedicated to support healthy youth development and the primary prevention of juvenile crime. We are seeking funds for a case manager, 3 facilitators, an administrative assistant, learning materials, 2 computers and supplies. Our program targeting 15-19 years olds, assist us to assist in navigating them through challenges that arise in adolescence and adulthood by executing a coordinated, progressive series of activities and experiences which help them become morally, socially, emotionally, physically, and cognitively competent. Outcomes will be to further decrease the number of teens arrested, decrease the number of substance abusers, increase the number of those that graduate high school and increase the number of those that gain employment. We are collaborating with local group homes, TPS, Children Services, LCJFS, detention centers, courts, law enforcement agencies and mental health professionals to achieve these outcomes. | FRIENDSHIP NEW VISION | 6 | 0 to 30 days | \$45,000 |
| Lucas | TUTORING PROGRAM | Our non-profit organization is expanding our tutoring program. We are seeking funds to employ six volunteers who will employ our assets and our administrator. The program is for the children attending a Title I elementary, middle or high school and receives free or reduced-price lunch. Academic help is available in reading, math, and the other core subjects. We offer certified teachers to tutor the youth. We have been a successful provider of academic enrichment programs that engages behavior and prevention approaches with academic support. We provide three sets of monthly reports to the parents and the school, which include an initial diagnostic report of student strength and weaknesses, a program progress report and an achievement report. The program uses an evidence-based and cost-effective model that has been used and serviced over 400 students over the last five years. We have been approved by the Department of Education as a Supplemental Educational Provider under the No Child Left Behind act, to assist students, attending Toledo Public Schools. | FRIENDSHIP NEW VISION | 5 | 0 to 30 days | \$60,000 |
| Lucas | TRANSITIONAL PERMANENT SUPPORTIVE PROGRAM | NACM Permanent Supportive Program is to provide safe, stable and supportive housing to homeless women who are affected by co-occurring disorder, or chronic substance abuse disorder. We are seeking funds to rehab a 4-unit house for our women who are unable to be reunited with their children but in a controlled environment. Each unit will allow separate bathrooms for each mother and her children. The program will have a foster care or other living arrangements to now be placed with a biological parent, in a safe and nurturing environment. | FRIENDSHIP NEW VISION | 5 | 0 to 30 days | \$265,000 |
| Lucas | TRANSITIONAL HOUSE | NACM Transitional House is a house for women in recovery from drug and alcohol abuse. We are seeking funds to assist with our 2000 operational budget. We have an executive manager, 5 monitors and a case manager that provide guidance and support for the women of the house. The women are taught life skills while sustaining from all mind altering substances. We serve approximately 13-15 clients per year. | FRIENDSHIP NEW VISION | 7 | 0 to 30 days | \$77,800 |
| Lucas | TRANSITIONAL HOUSE REHAB | NACM Transitional House is a house for women in recovery from drug and alcohol abuse and is in need of repairs. We are seeking funds for a driveway, walkways, front and back porch, and basement. We would also like to obtain transportation for our clients. We are licensed to provide beds for 5 women. We assist with social programs and we strive to help 85% of our women to find permanent housing and employment before leaving our program. | FRIENDSHIP NEW VISION | 7 | 0 to 30 days | \$65,000 |
| Lucas | SENIOR PROGRAM | Our non-profit organization is expanding our senior program. We are seeking funds to employ 12 staff members, an activity director and 2 health care workers. Upon verification of credentials, some of these individuals will be employed from our workforce program. We will start a management program where the clients interact with individuals from our youth and MRDD programs. We are collaborating with the Area Office of Aging, the University of Toledo/MHO, Owens Tech and several nursing agencies. They will receive nutritional lunches with snacks, five days a week. We will provide innovative solutions to decrease the decline of our elderly population that take place as a result of isolation, hearing or vision loss, and decreased mobility and increase the mental and physical well-being of the seniors. We anticipate servicing at least 25 clients per month. | FRIENDSHIP NEW VISION | 15 | 0 to 30 days | \$203,800 |
| Lucas | DAYCARE | Our non-profit organization provides Preschool & Before/After school child care program for the community. Funding is needed to employ 6 teachers, an administrator and an administrative assistant. The facility will also allow us to purchase computers, learning materials and supplies totaling of \$660.00 per mo. We serve children between the ages of 3-12 years, five days a week and we are licensed to service up to 24 children. Breakfast, lunch and snacks are provided. For children approaching school age, we focus predominantly on school readiness skills. OUTCOMES: Children will have the basic skills of fundamental learning to enter and be successful through their school years. | FRIENDSHIP NEW VISION | 10 | 0 to 30 days | \$248,100 |
| Lucas | PERFORMING ARTS/MUSTARD SEED | The Mustard Seed, a technology based Performing Arts School, is a catalyst by which a student experiences strengthening of cognitive development, reaches high levels of achievement and connects to themselves and others within their community. The program needs funding for instruments, computers, books and materials. Funding is also needed to employ two teachers. The program will employ two teachers. We promote critical thinking and problem solving. We direct our students to pursue higher education and ultimately careers in the arts. We want to increase the number of students that graduate high school and increase the number that pursue and complete their higher education in Lucas County. | FRIENDSHIP NEW VISION | 4 | 0 to 30 days | \$60,000 |
| Lucas | RE-ENTRY PROGRAM | Our non-profit organization is expanding our re-entry program to address homelessness, unemployment, mental health threats and substance abuse. We are seeking funds for 18 staff workers, 2 counselors, 3 security officers, and a director. We are identifying individuals that need assistance before they are released. They undergo career planning and their job skills are assessed. Then they are placed in our workforce program. If necessary, they will be housed in our transitional housing facility until they obtain permanent housing and employment. Our collaboration with the City of Toledo, local law enforcement, LCJFS, ODRC, local and state courts, health care professionals, case managers, clergy and local employers will assist us in decreasing the rate individuals that return to prison, increasing the number that remain abstaining free and increase the number who acquire and maintain employment. We will create initially 25 jobs that will grow to over 50 jobs in northwest Ohio. | FRIENDSHIP NEW VISION | 50 | 0 to 30 days | \$650,880 |
| Lucas | RE-ENTRY FACILITY | Our non-profit organization is expanding our re-entry program to include housing. We are seeking funds to acquire and rehab a 6-story brick, building to house 47 individuals when they are released from prison. The goal is to house them while they participate in intensive therapy, social programs and support groups, until they are able to secure permanent housing and employment. We will rehab this structure using green materials and leading-edge power. We will provide training and employment for some of our clients starting in the construction phase of the project. We are collaborating with the City of Toledo, TPO, LCJFS, ODRC, local law enforcement, clergy and health care professionals to assist with the transition and to provide appropriate monitoring. | FRIENDSHIP NEW VISION | 40 | 0 to 30 days | \$14,000,000 |
| Lucas | WORKFORCE | Our non-profit organization has experience finding employment for people in the community. We are seeking funds to employ three job coaches, two counselors, a project manager, and to acquire 12 computers, four wireless printers, learning materials and supplies. Our vocational evaluation process will assess our clients' abilities, transferable skills, education and work experience. Our job coaches and counselors specialize in providing career preparation through interviewing techniques, education and career counseling, conflict resolution, enhancing job skills, resume writing, and networking. These preparatory exercises allow evaluation of interpersonal skills and the ability to understand and follow instructions. Finally, we will employ 8 individuals and give to find employment for over 50 clients. Our program will increase workplace productivity and decrease the number of unemployed people in northwest Ohio. | FRIENDSHIP NEW VISION | 50 | 0 to 30 days | \$244,560 |
| Lucas | COMMUNITY CENTER | Our non-profit organization is seeking funds for a state-of-the-art, energy efficient, 51,000 sq ft, community center to house our existing daycares, youth, mentoring, tutoring, after-school, afterschool, workforce, martial arts, MRDD, and senior programs and unveil our new medical facility, pharmacy and fitness/wellness center. The facility will allow us to service hundreds of individuals and to provide over 100 jobs starting with the construction phase of the project. We are collaborating with the City of Toledo, Toledo Public Schools, University of Toledo, the Ohio State University and a host of other supporters to assist in building our programs to service the masses. | FRIENDSHIP NEW VISION | 100 | 0 to 30 days | \$7,200,000 |
| Lucas | MRDD VOCATIONAL REHAB | Our non-profit organization is extending our services to provide more extensive employment opportunities to our MRDD clients. We are seeking funds to employ two job coaches, two job developers, a counselor, a director, a clerk. We will also acquire three computers and supplies. Each of our clients will be evaluated to determine their occupational goals. Job placement job coaches will be assigned to each client and this number will grow to approximately 25 individuals. We are licensed to provide MRDD Vocational Services through the State of Ohio. We will service at least 30 clients per month. | FRIENDSHIP NEW VISION | 25 | 0 to 30 days | \$344,300 |
| Lucas | ADULT DAY HAB/MRDD | Our non-profit organization is seeking funds for our Adult Day Hab program serving the needs of our MRDD clients. We will use the funds to employ 11 additional staff members and 2 counselors and to acquire 2 computers and necessary supplies. Our new staff members will be trained to assist our clients with daily activities and help them become as independent as possible and prevent institutionalization. We are licensed to provide MRDD Adult Day Hab services through the State of Ohio. We will service at least 20 clients per month. | FRIENDSHIP NEW VISION | 20 | 0 to 30 days | \$405,400 |
| Lucas | MRDD TRANSPORTATION | Our non-profit organization serves adults with mental disabilities and developmental disabilities throughout Lucas County. We are expanding our scope of service and are seeking funds for five accessible vans to transport our clients to their appointments, places of employment, events, etc. In addition, the funds will assist our staff and assist our local transit authority as necessary. We will service at least 50 clients per month. | FRIENDSHIP NEW VISION | 10 | 0 to 30 days | \$394,400 |
| Lucas | UT Center for Assistive Technologies | The U.S. Census Bureau estimates that more than 3 million Americans are visually impaired and over 71,000 Ohio residents have severe vision problems or blindness. There is a growing shortage of teachers who are trained to teach students with visual impairments and additionally many of these students receive their textbooks and learning materials late if they get them at all. Assistive technologies, especially in a digital world, remain a critical need for individuals with visual impairments. This project will establish several state-of-the-art assistive technologies, including the technological competency, educational success, and employability of this specific population. Services will include a state-of-the-art vision lab with the latest assistive technologies available for student and teacher instruction, training program for faculty who serve students with visual impairments, introductory sessions and special projects in assistive technologies for preservice and practicing teachers, and development of a distance learning outreach program to train teachers across the state and nation in the use of assistive technologies. | The University of Toledo | 5000 | 0 to 30 days | \$1,000,000 |
| Lucas | Court Advocacy Program | Salaries for 2 advocates working with victims of domestic violence through criminal and civil matters in the Lucas County Court system. | Independent Advocates | 2 | 0 to 30 days | \$10,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lucas | Professional Development in Community Outreach | Talent Diversified will support the efforts of mentoring and placement in internships with local corporate and business entities for high school and college students in the Toledo, Ohio area. This work will be achieved through collaboration with The Mentoring Collaborative and the Student African-American Brotherhood organizations already active on middle, high school and college campuses in Toledo, Ohio. Project funding will support the programmatic components to train and prepare these students for employment in their chosen fields of study and help them to acquire internships that will hopefully evolve into permanent employment positions. | Talent Diversified | 8 | 91 to 180 days | \$250,000 |
| Lucas | JAZZ (Job trainingApplicationthrough Zeigler) | JAZZ (Job trainingApplicationthrough Zeigler) is designed to assist adults with DD, placing them in "job factories" located in various areas to learn specific skills from local off workers with intelligence. Specific skills areas will be taught in areas: floral/computer training, janitorial/laundry, assembly line/light industrial, stocking shelving/loading inventory, being ordering/trig up sales, and administrative/bussing. A center will provide training in writing resumes, computer applications, and resume building. The center will also provide job shadow to meetings with employers. Each factory will have a foreman (paid off worker), supervisor (Zeigler staff), clerical assistant, and four or more interns/apprentices. The center will have a coordinator, clerical assistant, and trainers. Funds are needed to lease space to renovate/retrofit for training, salaries for the foreman/staff and center coordinator/staff, wages for interns/apprentices, to purchase marketing materials, and to provide transportation. Outcomes will be employment for local off workers and job skills that will foster independent living for people with severe disabilities. | Zeigler Habilitation Homes, Inc. | 40 | 181 days or more | \$5,000,000 |
| Lucas | MUSIC TECHNOLOGY | This Proposal encompasses the use of musical electronic equipment and computer hardware. Currently, the grade range is K-8, however, within the years expectations of adding grades 9-12 will be considered. Because the school has an in-house Technology Coordinator, some services needed, may be performed by the Technology Coordinator. Technology is a powerful and flexible tool which can and should be an accessible means of learning and curriculum in any school. When joined with music, a great enhancement of imaginative and creative uses come along, which can result in a strong music program. When used to develop and carry out other disciplines, music becomes yet another method in which technology can be used to help and integrate the education of our students. It becomes a foundation in which basic life and learning skills are adopted and used outside the classroom. As part of a core curriculum, a Music Technology Program will provide students with an environment for professional level of music training while focusing on creating, music theory, instruments, videos and history. | FRIENDSHIP NEW VISION | 4 | 0 to 30 days | \$15,000 |
| Lucas | AFFORDABLE HOUSING | Friendship New Vision Inc. is a non-profit, state-certified, community housing development organization and community development corporation with experience in providing affordable housing. We have renovated 12 homes and built 3 newly constructed homes in Toledo's inner-urban areas. We are seeking funds to continue our efforts by rehabilitating 11 homes and by newly constructing 3 more using energy efficient appliances and green materials. We have been working with the City of Toledo, HUD, various financial institutions and other community agencies to promote homeownership and provide homebuyer assistance courses covering credit counseling, budgeting, mortgage pre-qualification, down payment and closing cost assistance, home maintenance and foreclosure prevention. We will service 14 families in Toledo that have been pre-approved and have completed our assistance program. With our multiple designs and floor plans, each have gets a chance to offer an urban building the place they will call home. | FRIENDSHIP NEW VISION | 30 | 31 to 90 days | \$1,220,000 |
| Lucas | City of Toledo - VOIP Telephone Conversion project | The City of Toledo has a Cxpress phone system that is over a decade old and has not been kept up to date. As a pilot project a few years ago, City successfully converted one division's phone to VOIP. Then last year the City led the foundation to convert our phone system to VOIP. We need the additional funding to convert VOIP equipment in the data center and converting another division's phones to VOIP. We need the additional funding to complete the conversion. | City of Toledo | 30 | 0 to 30 days | \$900,000 |
| Lucas | TRANSPORTATION | Revising the MRDD community by providing safe and efficient transportation. | ALTERNATIVE TRANSPORTATION, IV LLC | 5 | 31 to 90 days | \$180,000 |
| Lucas | Plant Lighting Project | Revising our entire manufacturing facility from 400watt Metal Halide fixtures to lamp T5 Fluorescent fixtures to decrease energy consumption by approximately 600,000kwh per year. | KUKA Toledo Production Operations, LLC | 0 | 31 to 90 days | \$100,000 |
| Lucas | MRDD LIVING | Our non-profit organization will expand our MRDD services to include housing. We are seeking to acquire and rehab 3 residential properties to house 6 adult MRDD clients each. The properties will be energy efficient, using green materials and solar power. Each will have a fruit and vegetable garden along with 24 hour supervision. We will provide 24 hour supervision, life skills training, vocational rehab, transportation and social activities. The funding will allow us to employ at least 20 staff members. Through our relationships with ODMRDD, LCJFS, UTMJCO, City of Toledo and other community agencies, we will be able to improve the quality of the life and social interaction of our clients to ultimately enhance their confidence and independence. | FRIENDSHIP NEW VISION | 20 | 31 to 90 days | \$1,500,000 |
| Lucas | MENTAL HEALTH LIVING | Our non-profit organization will expand our community efforts to include housing for adult, mental health clients. We are seeking to acquire and rehab 3 residential properties to house 6 mental health clients in each. The properties will be energy efficient, using green materials and solar power. Each will have a fruit and vegetable garden along with a fitness facility. We will provide 24 hour supervision, life skills training, vocational rehab, transportation and social activities. The funding will allow us to employ at least 20 staff members. Through our relationships with LCJFS, UTMJCO, local mental health agencies, local health department and other community agencies, we will be able to provide all the services necessary to ensure they live active and productive lives in a safe and healthy environment. | FRIENDSHIP NEW VISION | 20 | 31 to 90 days | \$1,500,000 |
| Lucas | MRDD LIVING | Our non-profit organization will expand our MRDD services to include housing. We are seeking to acquire and rehab 3 residential properties to house 6 adult MRDD clients each. | Lucas | TREMAINSVILLE MENTAL HEALTH | Our non-profit organization will create a community-based treatment and independent living program for adults that have mental health and ADD treatment needs and are in need of services geared towards independent living. The goals are measured by the degree of independent living, educational/vocational achievements, degree of mental health and ADD treatment, degree of dependence on entitlements, illness, stress management and social connectedness. In order for adults to be released to the program, they or she will need to be under the care of the Lucas County Mental Retardation Services or Department of Health Services AND who have a severe and persistent mental illness. Our non-profit will use the funds to use green products to renovate our 50-unit building and to provide over 20 new employment opportunities. | FRIENDSHIP NEW VISION | 20 | 0 to 30 days | \$1,000,000 |
| Lucas | Victorian Manor -Young Adults | The Victorian Manor 2, Inc. has created a community-based treatment and independent living program for young adults that are aging out of child protective services, have mental health and ADD treatment needs and are in need of services geared towards independent living. The goals are measured by the degree of independent living, educational/vocational achievements, degree of mental health and ADD treatment, degree of dependence on entitlements, illness, stress management and social connectedness. The program will use the funds to use green products to renovate our 32-unit facility. The funds will be used by our non-profit organization for an energy efficient renovation of our 32 unit facility. | WORLD COMMUNITY DEVELOPMENT | 10 | 0 to 30 days | \$600,000 |
| Lucas | DISTRICT WIDE ENERGY CONSERVATION | IMPLEMENT DISTRICT WIDE ENERGY CONSERVATION MEASURES TO REDUCE ENERGY COSTS. | WASHINGTON LOCAL SCHOOL DISTRICT | 100 | 181 days or more | \$2,000,000 |
| Lucas | WASHINGTON JUNIOR HIGH SCHOOL PARTIAL ROOF | REPLACE A PARTIAL ROOF AT OUR WASHINGTON JUNIOR HIGH SCHOOL. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 31 to 90 days | \$80,000 |
| Lucas | CAREER TECHNOLOGY BUILDING WINDOWS | REPLACE THE WINDOWS ARE OUR CAREER TECHNOLOGY BUILDING. THIS WILL INCREASE OUR ENERGY EFFICIENCY. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 91 to 180 days | \$50,000 |
| Lucas | WASHINGTON JUNIOR HIGH SCHOOL ELEVATOR | THIS FUNDING WILL INSTALL AN ELEVATOR AT OUR WASHINGTON JUNIOR HIGH SCHOOL TO ALLOW STUDENTS AND PARENTS ACCESS TO ALL FLOORS. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 91 to 180 days | \$400,000 |
| Lucas | WHITMER STADIUM IMPROVEMENTS | THESE FUNDS WILL BE USED FOR ADDITIONAL LOCKERROOMS, MEETINGROOMS, CONCESSION STAND AND ATHLETIC BOOSTER HUT | WASHINGTON LOCAL SCHOOL DISTRICT | 100 | 181 days or more | \$2,300,000 |
| Lucas | WHITMER HVAC REPAIRS | THIS WILL REPLACE THE WHITMER BOILERS AS WELL AS THE LINES UNDER THE BUILDING. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 181 days or more | \$3,000,000 |
| Lucas | JEFFERSON JUNIOR HIGH SCHOOL BOILERS | THESE FUNDS WILL BE USED TO REPLACE THE BOILERS AT OUR JEFFERSON JUNIOR HIGH SCHOOL. THE WILL THEN LOWER THE ENERGY COSTS. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 91 to 180 days | \$200,000 |
| Lucas | DISTRICT WIDE ENERGY CONSERVATION | LOOK AT ALL FACILITIES AND UPDATE THE CONSERVATION FEATURES OF OUR BUILDINGS | WASHINGTON LOCAL SCHOOL DISTRICT | 100 | 91 to 180 days | \$2,000,000 |
| Lucas | CTC EMERGENCY SHOWERS | WE NEED EMERGENCY SHOWERS FOR OUR CTC CLASSES AS STUDENTS MAY HAVE AN EMERGENCY THAT REQUIRES IMMEDIATE WASH OFF | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 31 to 90 days | \$26,000 |
| Lucas | WHITMER SCIENCE ROOMS | IMPROVEMENTS ARE NEEDED IN OUR SCIENCE ROOMS TO IMPROVE INSTRUCTION AND INCORPORATE MORE TECHNOLOGY INTO THE CLASSROOM. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 31 to 90 days | \$247,000 |
| Lucas | JEFFERSON JUNIOR HIGH ELEVATOR | THIS IS FOR INSTALLING AN ELEVATOR IN OUR JEFFERSON JUNIOR HIGH SCHOOL TO ALLOW HANDICAPPED STUDENTS AS WELL AS PARENTS ACCESS TO ALL ROOMS. | WASHINGTON LOCAL SCHOOL DISTRICT | 20 | 31 to 90 days | \$350,000 |
| Lucas | Electrical Infrastructure and Substation | St. Charles Mercy Hospital, a member of the Mercy Health Partners system, was mandated by capacity restrictions on the electrical distribution system and the utility rate tariffs, to obtain that electrical service from the transmission grid. The project consists of new transmission lines springing approximately one mile, installing the 1200 expressway and down the service road to the St. Charles Mercy property. Additional components include a high voltage transformer and electrical gear, and structure and back-up generators. Completion of this project will allow future electrical distribution capacity for economic development in the Oregon, Ohio community. Capital investments of this magnitude are a financial hardship to health care facilities. | Mercy Health Partners | 50 | 0 to 30 days | \$5,800,000 |
| Lucas | Upgrade Plant Lighting Systems | Replace existing obsolete plant lighting systems with modern energy efficient equipment. Existing plant lighting system in 16 separate buildings needs to be updated to more energy efficient lighting consisting primarily of fluorescent T5 and T8 technology. Existing lighting consists of a number of technologies including Mercury, Metal Halide and T12 Fluorescent. Estimated energy savings of this project projected at 60%. | Kraft Foods Global Inc. | 90 | 31 to 90 days | \$125,000 |
| Lucas | Replace Plant Boilers | Replace four existing Cleaver Brooks Boilers that are 40 years old and fired by #2 Fuel Oil with gas fired modern technology boiler systems to provide heat for process buildings. New system will eliminate consumption of approximately thirty thousand gallons of oil annually and reduce the amount of pollution emissions from this system. Project to include the removal of existing boilers and the installation of new boilers and associated piping and pumps to complete system. | Kraft Foods Global Inc. | 90 | 31 to 90 days | \$400,000 |
| Lucas | Install Power Factor Correction Capacitor System | Install capacitor systems in plant electrical substations to improve the electrical power factor of the facility. Project includes electrical study of existing capacitor systems and load analysis to provide solution to correct existing average power factor of 80%. Project to include the installation of new capacitor systems to provide for appropriate correction and provide increased energy efficiency. | Kraft Foods Global Inc. | 90 | 91 to 180 days | \$300,000 |
| Lucas | Install Power Factor Correction Capacitor System | Install capacitor systems in plant electrical substations to improve the electrical power factor of the facility. Project includes electrical study of existing capacitor systems and load analysis to provide solution to correct existing average power factor of 80%. Project to include the installation of new capacitor systems to provide for appropriate correction and provide increased energy efficiency. | Kraft Foods Global Inc. | 90 | 91 to 180 days | \$300,000 |
| Lucas | Historic Waterville Elementary Renovation | Anthony Wayne Local Schools would like to renovate the historic Waterville Elementary building. This 25,312 square foot building was built in 1923 and used as a school until 1996. It is currently leased to several community groups, but it will be needed to accommodate students once Governor Schickler's proposal to move to day every day kindergarten goes into effect. Currently, Anthony Wayne Local Schools does not use the space to house all day every day kindergarten or the teacher's student relief offices in the governor's proposal. The Waterville building would need a comprehensive renovation, including all major mechanical systems, ADA upgrades, and overall structural and cosmetic improvements. All systems would be energy efficient every effort made to use as much green technology as possible. The Waterville building also serves as a historic landmark. It is located in the historic section of town and will enhance the aesthetics of this beautiful community. Construction jobs will be created/maintained throughout the renovation process followed by administrative, teaching, and custodial jobs to staff the building. These jobs would then become permanent. | Lucas Co. ESC/Anthony Wayne Local Schools | 35 | 91 to 180 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lucas | Family Resource Program | We provide basic assistance, educational, recreational and social service opportunities to residents in ZIP 43006 & 43007. As the need grows, our resources are declining. We offer assistance to families and individuals needing housing self-sufficiency housing, employment and financial stability. Many people need birth certificate and/or picture identification, but do not all qualify by our guidelines. Lack of transportation assistance is a huge barrier. Financial assistance to purchase food/potential is needed to assist clients to access additional services, training opportunities, and employment. Once a person has obtained employment and a home, they have the following needs: the first month's rent, utility deposits, providing basic needs to sufficiently maintain the household, obtaining major appliances and cooking utensils. Our Bridge Program offers emergency food, clothing, and transportation, and in 2008 we served 2,504 people. We want to address these growing issues. We would help with security deposits, speak to landlords and make some arrangement to let people stay in their home by giving one time assistance. We would partner with other agencies. | Monroe Street Neighborhood Center | 30 | 31 to 90 days | \$70,000 |
| Lucas | Domestic Violence Victim Court Advocacy | Provide 1700+ victims of domestic violence in Lucas County with court based victim advocacy services and support. Victim advocates are available in Toledo Municipal Court and Lucas County Domestic Relations Court. To assist victims navigate the court process, provide educational information, assist in obtaining protection orders, help victims with safety planning, and link victims to other helpful community resources. In addition, an evidence based lethality assessment is utilized for each victim served. | Family and Child Abuse Prevention Center | 4 | 0 to 30 days | \$100,000.00 |
| Lucas | Domestic Violence Victim Court Advocacy | Provide 2500+ victims of domestic violence in Lucas, Wood and Ottawa Counties with court based victim advocacy services and support. Victim advocates are available in municipal and domestic relations courts in each county to assist victims through the court process, provide educational information, assist in obtaining protection orders, help victims with safety planning, and link victims to other community resources. In addition, an evidence based lethality assessment is utilized for each victim served. | Family and Child Abuse Prevention Center | 6 | 0 to 30 days | \$100,000.00 |
| Lucas | Removing Barriers to Green Collar Employment | Removing Barriers to Green Collar Employment. Ohio's Lucas County is like the rest of the United States in that it needs to solve two problems with one offer: unemployment and environmental degradation. My proposal seeks to create a research-based project that will inform local and state policymakers, and members of the workforce on how to specifically and more effectively remove barriers so that all citizens can have an opportunity for employment in three green collar areas in the Toledo metropolitan area: (1) brownfield remediation and redevelopment; (2) manufacturing and retrofitting existing buildings; and (3) advanced alternative energy in solar, wind, and biofuels. The Toledo metro area is at the national forefront in alternative energy commercialization. As with the two other green collar areas, we don't want the new green economy to reproduce the existing racial and social inequalities in the economy. Government agencies, NGOs, and members of the workforce will be better informed, through best practices, how all Toledo area residents, including those with lower educational attainment and criminal records, can be part of the green economy immediately. | University of Toledo | 3,500 | 0 to 30 days | \$67,000.00 |
| Lucas | ZEROS | ZEROS (Zigler Education Readiness) is a free store concept to offer donated and clearance items to individuals who are jobless/homeless as a community outreach program run by the Y.A.D.S. (Young Adult Day Services) program that will be located in an adjoining or nearby location to the agency's donor store. Funds are needed to obtain a lease on the building, hire a program coordinator, pay staff, transportation, and provide materials for paid volunteers for the youth adults. Outcomes will be increased independence living with the community for people with severe disabilities and assistance to the homeless and jobless. | Zeigler Habilitation Homes, Inc. | 10 | 181 days or more | \$500,000.00 |
| Lucas | ZEPHYR | ZEPHYR (Zigler Entrepreneurial Program for Habilitating Youth teaching Responsibility) is a business development venture to provide support for young adults in Zeigler's Y.A.D.S. (Young Adult Day Services) program by securing franchise business where they can be trained in the stock room, as well as learn money management skills through planned shopping. Funds are needed to purchase the franchise, lease a suitable building, stock inventory, pay staff to train potential employees in Zeigler's retail job factory, provide salaries for staff, and hire an experienced store manager for the store. Outcomes will be increased independence for persons with severe disabilities through business development in an area hard hit by the financial crisis. | Zeigler Habilitation Homes, Inc. | 50 | 181 days or more | \$5,000,000.00 |
| Lucas | Lucas County Sheriff's Office - Scheduling/Payroll | The Lucas County Sheriff's Office would like to develop a comprehensive timekeeping and scheduling system that will modernize our Office and assist in tracking payroll and duty assignment information for our over 500 employees consisting of Sheriff's Officers, Road Patrol Officers, Dispatchers, and many others. This system would replace our existing labor intensive, manual, Aging and Billing system. The new system will contain the application of many processes. The ultimate benefit to such a system would be in the automated deployment of personnel during emergency situations. This system would also have the capability of tracking cost and personnel needed for specific special projects, such as seasonal training events, riot control, round-ups, Northern Border duties, Marine Patrol duties, Civil Task Force duties, High Visibility Traffic Control duties, and many other real world applications in an organization of our size become very costly. Furthermore, this system would keep track of employee benefits such as sick, vacation, comp, personal time accruals. | Lucas County Sheriff's Office | 1 | 31 to 90 days | \$135,000.00 |
| Lucas | Lucas County Sheriff's Office - Police Vehicle Upg | The Lucas County Sheriff's Office would like to update our fleet of used patrol vehicles. Over a four budget cycle, we have not been able to purchase new vehicles in recent years. These funds (\$4,500,000) along with our required 10% match will allow us to purchase 15 new police vehicles. Without these purchases, our fleet size will effectively diminish as older vehicles continue to be taken out of service. When vehicles are taken out of service without a replacement, we are forced to remove an officer from Road Patrol duties, thereby reducing the force size. We feel this updated equipment would effectively retain 15 Road Patrol positions over the coming months by allowing them to have adequate equipment to perform their duties, not to mention the benefits to the burgeoning automotive industry. | Lucas County Sheriff's Office | 15 | 31 to 90 days | \$405,000.00 |
| Lucas | O.K.G.A.M.E.S. | O.K.G.A.M.E.S. (Ordinary Kids Getting Active, Moving and Exercising for Sports) is a program Zeigler Habilitation Homes, Inc. would like to sponsor through YES!, BOOST!, and LINKS programs for school-age children of all abilities who are non-athletic that gives them the opportunity to train for competition in various sports at quarter games. Funds are needed to hire an athletic coach/coordinator, and coaches, to provide money for part volunteers from the three Zeigler school age programs, lease space for practice and competition, purchase T-shirts, bibs, and promote programs throughout the county, and to pay for other incidentals. Outcomes will be increased independence for adults with severe disabilities through volunteerism. | Zeigler Habilitation Homes, Inc. | 25 | 181 days or more | \$500,000.00 |
| Lucas | Family Promise of Greater Toledo Development | Zeigler Habilitation Homes, Inc. would like to develop a new 11 full-time case manager for our emergency homeless shelter program and one (1) part-time office assistant for a total of three (3) new positions created in Toledo, OH within the next year. | Family Promise of Greater Toledo | 3 | 0 to 30 days | \$50,000.00 |
| Lucas | Job Retention - Lucas Co. TASC | Due to funding cuts by local sources, 1.5 positions providing assessment, case management and Getting Ahead group services will be eliminated by 1/1/2008. Outcomes of this proposal will include retention of these positions and critical services for others with alcohol and drug abuse for a period of 17 months. | Lucas Co. TASC, Inc. | 1.5 | 0 to 30 days | \$114,750.00 |
| Lucas | An Innovative Model for an Advanced Energy Workfor | The University Clean Energy Alliance of Ohio (UCEAO) proposes to create a model for developing courses, certification programs, stackable certificates, and associate degree programs in advanced energy throughout the State of Ohio. As a growing economic sector, advanced energy projects can reduce unemployment rates and target displaced workers with transferable skills. A well-trained workforce is needed to support the manufacture, installation, operation, and maintenance of advanced energy systems. This resource collaboration among educational institutions and private sector entities involved in energy technology research and commercialization, UCEAO member universities will provide guidance for the development of new courses and degree programs, and information on technology moving from the laboratories into the marketplace. Industry participants will provide information on the types of skills they need now and see likely to need in the near future, and will also be a source of integrated training through on-op and internship programs. Community and technical colleges will be instrumental in the design and implementation of new workforce development programs. | University Clean Energy Alliance of Ohio | 10 | 0 to 30 days | \$400,000.00 |
| Lucas | The Development of University/Business Collaborati | The University Clean Energy Alliance of Ohio (UCEAO) requests funding to develop and maintain partnerships that support, attract and retain businesses through the promotion of advanced energy technologies. UCEAO was founded in recognition of the importance of advanced energy development and deployment to the state of Ohio and the nation. As an advocate for research and education, a source of technical expertise and a sponsor of substantial dialogue, UCEAO is committed to developing programs that take alternative energy technologies to the next level through partnerships with government, business, and industry associations. UCEAO's commitment to commercialization moves new technologies out of the research labs and into the private sector where they can be successfully tested and deployed, with a corresponding increase in economic revitalization and job growth. UCEAO is actively engaged with companies of all sizes in the advanced energy field, and recently undertook an initiative to partner with business incubation centers throughout the state. By focusing on the cycle of prototype to production, UCEAO and its business partners can advance the alternative energy agenda of Ohio. | University Clean Energy Alliance of Ohio | 100 | 0 to 30 days | \$500,000.00 |
| Lucas | An Innovative Model for an Advanced Energy Workfor | The University Clean Energy Alliance of Ohio (UCEAO) proposes to create a model for developing courses, certification programs, stackable certificates, and associate degree programs in advanced energy throughout the State of Ohio. Industry participants will provide information on the types of skills they need now and see likely to need in the near future, and will also be a source of integrated training through on-op and internship programs. Community and technical colleges will be instrumental in the design and implementation of new workforce development programs. | University Clean Energy Alliance of Ohio | 10 | 0 to 30 days | \$400,000.00 |
| Lucas | Capacity Building - LC TASC | In an effort to build capacity of Ohio's TASC programs, while emphasizing its local needs, Lucas County TASC Inc. is proposing a multi-level project that will serve as a resource for Ohio's 14 TASC programs. Specifically, Lucas County TASC is seeking funding to: 1) evaluate its Adult TASC Services, 2) create, update and/or create a compendium of all available Ohio TASC Evaluators, 3) purchase the Clinical Analysis and Management System (CLAMS) industry source code, 4) prepare and obtain CARY, ODHR and ODADAS certification through the utilization of new Consulting services and 5) purchase ProCOMP software to improve Lucas County TASC's organizational effectiveness needed to accreditation and licensure status. If approved, Lucas County TASC, Inc. in cooperation with the Ohio TASC Association will improve access to technology and knowledge that will support evaluation and product effectiveness throughout Ohio's TASC programs. | Lucas Co. TASC, Inc. | 2 | 0 to 30 days | \$84,000.00 |
| Lucas | VAWA - Domestic Violence Officer Retention | Toledo Police has a dedicated detective whose duties involve around assisting women who have been victims of domestic violence, and other related offenses. The DV Unit has been in existence for approximately 10 years and has served thousands of female victims. Funds acquired would be used to keep an officer assigned to this critical program. | Toledo Police Department | 1 | 181 days or more | \$85,000.00 |
| Lucas | VIP - Anti-Gang Initiative | Toledo has established an Anti-Gang VIP (Violence Initiative Program) where at-risk youth are worked with in order to avoid a life of crime and gang violence. These funds would be used to continue training the Gang Unit, and help off-set costs of the administration of the program. | Toledo Police Department | 11 | 31 to 90 days | \$1,000,000.00 |
| Lucas | Build Rehabilitation | Compass Corporation for Recovery Services provides residential and outpatient treatment programs for individuals struggling with the disease of addiction and substance abuse. Our treatment facility is housed in a building which is over 50 years old and still has the original heating, plumbing, heating system and other built components like roofs and parking lots which have been repaired or replaced but are currently in need of replacing. We are the only men's and women's residential facility in Northwest Ohio. The maintenance is necessary for us to maintain our mission and serve the people of Northwest Ohio. We are Jointly Certified and ODADAS Certified and will need these upgrades to maintain these accreditations. We will reduce our energy costs and utility repairs and be able to serve more individuals. If these vital facility functions fail we could possibly be forced to close our facility leaving 1000s of individuals to have no place to turn for services. | Compass Corporation for Recovery Services | 100 | 91 to 180 days | \$950,000.00 |
| Lucas | Project Genesis II | These funds will allow Project Genesis, which provided advocacy and support to domestic violence victims, to meet increasing requests for services. In the past three years Project Genesis has grown 400% without adding staff. The program is at capacity at this time. Additionally, Project Genesis II will add services to enhance victim safety and work to provide increased community education and collaboration. | Family Service of Lucas County | 4 | 31 to 90 days | \$104,000.00 |
| Lucas | Comprehensive Court Advocacy for Survivors of Dome | Independent Advocates Comprehensive Court Advocacy Program will employ four trained advocates to provide consistent, professional victim advocacy to victims/survivors of domestic violence in every courthouse in Lucas County, Ohio. Independent Advocates Comprehensive Court Advocacy is an on-going program that has proved essential to the Lucas County community because it provides consistency for victims as well as court personnel when domestic violence cases include criminal and civil matters that take place in different courts. Advocacy includes accompanying survivors to court hearings, safety planning, providing resources and referrals, and maintaining long-term emotionally supportive relationships with survivors of domestic violence. Based on current Independent Advocate statistics, it is expected that this program will serve 20 women who are survivors of domestic violence in Lucas County during the 17 month project period. This project will also provide 4 employees with salaries and healthcare benefits for 17 months in Lucas County. | Independent Advocate | 4 | 0 to 30 days | 100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Madison | WJ Downtown Improvement Project | WJ Downtown Improvement Project designed to create a more attractive, safe, and inviting streetscape. The Village of West Jefferson has been working to create a more beautiful and flourishing downtown that will improve the quality of life and economic opportunities for every worker, visitor, property owner, and resident of West Jefferson. Project will add additional street lighting, decorative traffic signals, more trash enclosures, additional benches, new signage, and trees. Project will also bury existing overhead wires, repairs and repair older sidewalks, and update street corners to be ADA compliant. | Village of West Jefferson | 75 | 181 days or more | \$750,000 |
| Madison | West Side Sewer Treatment Plant | The planned West Side Sewer Treatment Plant would greatly reduce local effects on Little Darby Creek, a State and National Scenic River by taking on sewer treatment from approximately 50 of residential developments in the area. It would also greatly increase the ability to develop areas adjacent to current areas of development along State Route 20, Interstate 75 US Route 40, and State Route 142. Discussion is being held to develop this project as a joint project with surrounding municipalities. | Village of West Jefferson | 150 | 91 to 180 days | \$70,000 |
| Madison | Sanitary Sewer Inflow and Infiltration Study | Sanitary Sewer Inflow and Infiltration Study as part of a disclosed, long-term monitoring and maintenance program to detect known issues with groundwater and stormwater entering into dedicated wastewater or sanitary sewer systems. Study will be done to assess the system and establish the sewer system to determine the quantity of inflow and infiltration, determine their sources, and provide guidance to determine a cost effective corrective action plan. | Village of West Jefferson | 20 | 0 to 30 days | \$160,000 |
| Madison | Replacement of WTP Discharge Lift Station | Replacement of WTP Discharge Lift Station | Village of West Jefferson | 10 | 31 to 90 days | \$160,000 |
| Madison | Elm/High Storm Sewer | Replace 2000 feet of storm sewer. This sewer has been repaired in spots where cave in occurred and restricts flow. This project would reduce flooding in the downtown area and the area of the current school. It was reviewed and estimated @ 1,000,000 in 1993 and the city hasn't been able to fund it. This would create 20-75 construction jobs during the construction phase. | City of London | 50 | 181 days or more | \$3,000,000 |
| Madison | Maintaining Viable Business through 12/31/10 | These funds will allow my business to retain its retail location through 12/31/2009 and not default on the lease or other operating expenses. By making these fixed costs available I can use what little remaining capital and generated income in the business to retain as capital for future growth. These funds will allow me to pay myself a salary and support my wife and 2 children while also doing some advertising and investment in inventory product. At this time I am unable to pay myself a salary. All income and remaining business capital is being used to maintain the retail operating expenses. Any additional funds will also be used to secure a warehouse for the continuation of the business in 2010 when the retail lease expires on 12/31/09. | Walker Enterprises Incorporated | 2 | 0 to 30 days | \$90,000 |
| Madison | New Police Station | New and modern police department relocating from the current building which is shared with Village Hall into a separate Police building. A multi-story, handicapped accessible structure that would could have a parking for police vehicles, a locker and weight room, first floor areas for the public access and meeting rooms, and an upper level for other offices, a small lab for evidence processing and large secure property room and storage area. Also, a modern computer system for with a mail server based system and a communications upgrade to the 911/911cc area possible through Ohio MARC's, which allow for inter agency communications, state wide. | Village of West Jefferson | 35 | 91 to 180 days | \$4,000,000 |
| Madison | Prison Farm Development | Landscape, Office, Lebanon & Garbon. In general, these facilities have been a neglected resource and offer great potential for development of income character and health, under responsible operation. From approximately 1913 until 1990, the Prison Farm program operated a broad range of facilities, including canning and smoke houses for vegetables and meat produced with inmate labor on the prison grounds. Since 1990, the program has become an overlooked resource; seen more as a liability than an opportunity to grow nutritious food for the population. The vast majority of food in the prison system is now processed, packaged & trucked in at a large expense. | London Correctional Institution | 120 | 31 to 90 days | \$2,000,000 |
| Madison | Improve Firefighter Dorm Area and Reduce Safety Ha | The Stimulus Request would construct a new Dormitory at London Correctional Institution approximately \$1,800,000 for the grounds for a transition (\$200,000) away from purchased food stuffs to a return to locally produced vegetables that will help reduce the inmates' skills towards individual responsibility upon release from the correctional facility. | Jefferson Township Firefighters Association | 35 | 0 to 30 days | \$180,000 |
| Madison | Madison County Administrative Building | Remodel current open bay firefighter dorm to give more privacy and allow for co-ed living areas. Also, install emergency notification lighting, ability of radio message delivery, and heating and cooling in dorm area. Increase storage with locker and closet system. Increase size of dorm and number of beds to allow for extra sleeping. Install noise reduction material between dorm and hallway. Seal areas between truck bay and living area to stop exhaust from entering, reducing safety hazard and long term health risk. Add to administrative office space for county offices to better and more conveniently serve the general public. | Madison County Commissioners | 12 | 91 to 180 days | \$6,000,000 |
| Madison | Park Avenue Bridge Replacement | To replace a severely deteriorating bridge over Glade Run in a flood-prone area. The spawling has proceeded to the point that it could be becoming a safety hazard. This bridge is in a heavily traveled area between the City park and the Managing property. | City of London | 10 | 91 to 180 days | \$500,000 |
| Madison | Jones Building Administration Rehabilitation | Rehabilitation of building in a historical district adjacent to our current county courthouse. This would used to house county office to increase our ability to serve the public in a more efficient manner. | Madison County Commissioners | 12 | 181 days or more | \$3,000,000 |
| Madison | Madison County Animal Shelter | Construction of new animal shelter. Our current animal shelter is over utilized at the moment. This would take care of abandoned dog and cats and are oversteering our current facility. | Madison County Commissioners | 12 | 91 to 180 days | \$500,000 |
| Madison | Big PLain Circleville Road Resurfacing and Safety | This project would resurface and strengthen the existing roadway and provide signage and safety improvement along the corridor. This project is not currently programmed for replacement in the next two years due to the lack of funds relative to the infrastructure that I am responsible for maintaining. The use of stimulus funds for this project would be providing an economic impact above what is already planned for this year. | Madison County | 0 | 31 to 90 days | \$950,000 |
| Madison | Old Zenia Road Bridge Replacement | This project would replace a structurally deficient bridge thereby removing posted weight restriction which is hampering agricultural commerce in this local. This projects is not currently programmed for replacement in the next two years due to the lack of funds relative to the infrastructure that I am responsible for maintaining. The use of stimulus funds for this project would be providing an economic impact above what is already planned for this year. | Madison County | 0 | 181 days or more | \$450,000 |
| Madison | Relocate and clean up existing steel foundry site | The EPA has identified iron and steel foundries as a major source of hazardous air pollutant (HAP) emissions. This project would relocate an existing steel foundry out of the downtown of municipality to an area of development with similar features. Project would also expand, subdivide, and reuse a property which may be contaminated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Site would be cleaned up and used as part of downtown revitalization program. Project would add additional green space to our community while reducing air pollutants and revitalizing Village downtown. Cleaning up and reusing in this property saves development businesses off of undeveloped and open land, while both improving and protecting the environment. Project would create immediate job opportunities. Will also improve efficiency of foundry business operations allowing them to expand, hiring 5-10 new high-paying jobs. All of the will drastically improve the community. Project would be done as a public-private partnership. Investing private parties in addition to stimulus funding. | Madison County's Future Community Improvement Corpo | 350 | 31 to 90 days | \$7,000,000 |
| Madison | Village Data, Backup, and IT Security | Immediacy Security and System Operability Concerns. Install firewall that will block attempts to compromise our network. Install new network switch that will greatly speed up network traffic. Trace and label all data cable runs from the server side to their endpoints, helping with troubleshooting in the future. Install a new server. This will bring the network up to date. Install upgraded antivirus software which offers advanced threat prevention to protect all networked equipment from the most sophisticated attacks. Standardize operating systems for desktops. Standardize and update all office software. Prepare Disaster Recovery Plan. This document will contain names and contact information for everyone that the Village will need to recover from a disaster. The plan will define and explain exactly what is considered vital and have criteria for recovery timelines to establish these vital systems/services. The plan will contain a definition of what constitutes a disaster and the execution of this procedure. The plan will provide for stand by computer equipment that is updated and configured for the Village and quickly begin running operations without significant down time. | Village of West Jefferson | 10 | 0 to 30 days | \$25,000 |
| Madison | Group Home Blacktop Project | Madison Community Housing is a non profit board created exclusively to provide housing for MRDD adults in our county. We currently own 13 homes in the area. Most of the homes require staffing and several of the driveways are in need of replacement and/or expansion. We have 20000.00 that could be set aside for this project but that does not get much done. Fairhaven School and MRDD offices are in need of blacktop resurfacing and repair with extensive cracking taking place. Our Capital funds are currently obligated for a new City of London walking project getting water to our campus which is currently on well water. EPA says the well has too much arsenic and we're going to begin a large fine in we tapped into City water. Cost for this project under construction as of this date is \$175,000.00. We therefore are not able to finance the blacktop project. Cost to clean, repair the cracks, back coat and stripe the lot at the school is \$96,000.00 and \$25,000.00 for the office area. | Madison Community Housing | 10 | 31 to 90 days | \$20,000 |
| Madison | Blacktop repair and resurface project | Madison Community Housing is a non profit board created exclusively to provide housing for MRDD adults in our county. We currently own 13 homes in the area. Most of the homes require staffing and several of the driveways are in need of replacement and/or expansion. We have 20000.00 that could be set aside for this project but that does not get much done. Fairhaven School and MRDD offices are in need of blacktop resurfacing and repair with extensive cracking taking place. Our Capital funds are currently obligated for a new City of London walking project getting water to our campus which is currently on well water. EPA says the well has too much arsenic and we're going to begin a large fine in we tapped into City water. Cost for this project under construction as of this date is \$175,000.00. We therefore are not able to finance the blacktop project. Cost to clean, repair the cracks, back coat and stripe the lot at the school is \$96,000.00 and \$25,000.00 for the office area. | Madison County Board of MRDD | 10 | 31 to 90 days | \$135,000 |
| Madison | Central Office relocation and consolidation | NATCO Industries is one of our providers that provide Day-Step services for our adult MRDD Consumers. They at one time were a part of our MRDD operation but split off several years ago to be independent. We built a building for the program several years ago that we currently rent to them to provide services to our kids. They have purchased a larger facility for their purpose. Our plan is to renovate that building for our offices and eliminate the need for multiple rental locations. Architectural drawings are complete and preliminary cost estimates are \$600,000 for the renovation. The project could be started sometime in August if funds were available for us to provide. A wastewater project currently underway has claimed a good portion of our available capital dollars. We have \$150,000.00 we could invest in this project. The consolidation would allow us to become more efficient, housing our entire central office staff under one roof and saving expenses on multiple locations. | Madison County Board of MR/DD | 30 | 91 to 180 days | \$450,000 |
| Madison | Blacktop and Parking Lot Project | Phase 1 of the project would involve grading our gravelled driveway and school bus lot, adding stone and laying down a 2 inch base of asphalt followed by a 2 inch topping of 404 finish blacktop and striping. The lot has been a safety issue because it was originally built in a low area and floods during heavy rainfall and snow melt. We just recently completed and paid for an extensive drainage project for divert water away from or around the lot through our Madison County Engineers office. We do not have the funds to complete the project. The estimated cost for this phase is \$51,000.00. Phase 2: constructing an employee parking area located to the west of our school. Madison County Board of MRDD is the agency designated by the Madison County Commissioners to be the lead agency for the ODOT coordination transportation project for the entire county. The county have employees providing needed services to Senior citizens, Veterans, OAFS scheduled medical appointments as well as our own MRDD Consumers. This employee needed for this program has soared. We would remove 600 yds of dirt, add 8 in. of stone above 1 1/2 in. of base 61 1/2 of top and strike. Estimated \$ 30,000.00. | Madison County Board of MR/DD | 10 | 31 to 90 days | \$81,000 |
| Madison | Wastewater Treatment Plant Upgrades | The improvements are intended to upgrade the existing sewage plant in order to expand its capacity and improve its ability to receive and treat effluent generated liquid wastes, as well as onsite generated solid wastes. An existing sludge holding tank will be converted to a Bacterium-rich Reactor secondary treatment process to expand plant capacity from 0.5 MGD to 1.2 MGD. A proposed Sludge Receiver Station will be added to allow the unloading of sludge waste from septic-holding tank trucks. A proposed Class A Sewage Sludge Screw Press system will be added to stabilize sewage sludge solids and render them safe for agricultural land application. It will be used to produce a high quality sewage sludge from neighboring wastewater treatment plants. Additional improvements are included to upgrade aging influent screening, disinfection and pumping equipment. Additional repair and rehabilitation of the existing pumps, piping and tankage will address some deficiencies that have developed in the plant performance over the years. Design has been completed and the EPA indicates that a permit to install will be issued within a month. | Village of Mt. Sterling | 1,500 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Madison | Arts Empowerment | 11th arts career empowerment program has been a considerable success. The effectiveness of this program is demonstrated by the fact that 100% of the 14-20 incarcerated in Madison and the Ohio Reformatory for Women. Program goals include life and job readiness skills development, character education, restorative justice, and mentorship with professional artists. Each goal is designed to help support healing, provide community service, and facilitate successful reentry into society. Through substantive research in planning and creating individualized group art projects, participants learn to think creatively, solve problems, and work cooperatively with their leaders and each other. Outcomes include: reduced recidivism, measured improvements in behavior and attitude, increased public service, high school English and Fine Arts credit, successful pursuit of post secondary degrees. Award winning Publications include: A Caged Bird, Inside Looking Out, music CD MAMI: Men Acquiring Courage and Intelligence, and the Photobook No Reason to Lie. | Art for a Child's Safe America | 10 | 0 to 30 days | \$160,000 |
| Madison | affordable renewable energy | To make affordable renewable energy available with cost assistance for middle and lower class property owners. This would include training for new employees in the installation and applications of renewable energy and weatherization of homes for the same reasons. This would be a benefit to the owner/ tenant who would like to make it subsidized based on the energy utility of the. This would be a spin up business and at the end would just employ a few and if the business would flourish could eventually employ a possibly unlimited number of Ohioans. To whom it may concern, | JW Energies (new business) | 3-100s | 31 to 90 days | \$500,000 |
| Madison | Community Organizing | As a liberal, I know how to spend taxpayer money better than the taxpayers do. Just give me the money and I swear I will create for save 1,000,000 jobs. Let me know if you can steal enough tax money from future generations to fund my project. Sincerely, Your Messiah and President, The Lord Barack Hussein Obama | USA | 1,000,000 | 0 to 30 days | \$1,000,000,000,000 |
| Madison | Alkire Road grade crossing reconstruction 518937R | Reconstruction of the "rail grade" railroad crossing to include 54' of full depth concrete panels, LED flashers and gates. This will improve the surface of Alkire Road which is a fairly heavily travelled highway, and improve the overall safety through the installation of lights and gates where there are now only crossbucks. 7200 linear feet of water main. 7200 linear feet of sewer main. Sewer lift station. 300,000 gallon water tower. Boring under railroad. | Camp Chase Railroad | 1311 | 91 to 180 days | \$330,000 |
| Madison | Mt. Sterling Industrial Park Utility Extensions | This project will not only serve a new industrial park for which we have a potential 800 employees project, but also may serve a new industrial park. 12" waterline, 12,400 ft 6" forceman, 6200 ft 6" sewer, 6200 ft Direct drill bores at Deer Creek and railroad Diverted water tank, 300,000 gallons Lift station | Madison County's Future Community Improvement Corp | 3200 | 31 to 90 days | \$2,013,000 |
| Madison | Era Water and Sewer Extensions | This project was requested of the Village of Mt. Sterling by the Ohio EPA to provide clean drinking water to the City of Ohio in Franklin Co. This extension will open up access to more residential and commercial land for Mt. Sterling. Funds would go toward the upgrade of our Information Technology Infrastructure that supports our existing Electronic Information System and Electronic Medical Record initiative. The downturn in the economy has begun to hit healthcare making it harder for a small community hospital to keep up with the ever increasing cost of technology. By having these funds we will be able to upgrade our electronic network which will support our software programs that we use to care and treat our patients. It will also help us meet the requirements to obtain and maintain an interoperable Electronic Medical Record. It will also help us become more efficient and able to keep our valuable healthcare employees employed. Madison County Hospital is a very important link for maintaining and meeting the healthcare needs of our community. By making our infrastructure stronger we can then support our computerized programs better and become closer to meeting the National Requirements of an Integrated Medical Record. | Madison County's Future Community Improvement Corp | 100 | 91 to 180 days | \$1,860,000 |
| Madison | Health information System Infrastructure Upgrade | Funds will be for replacing our current Hospital Information System (HIS). Current Vendor is unable to be competitive in today's Healthcare IS Market. In order for Madison County Hospital to move forward, to maintain the quality of care for our patients that is expected and meet the State and Federal needs of the future, an upgrade of our HIS and EMR software is required. Unfortunately the economy has hit healthcare as well making funding this upgrade internally very difficult. A strong HIS will certainly help strengthen the bottom line as well as offering sophisticated software to manage the care of our patients appropriately. Plus it will help us support the State and Federal initiatives of having healthcare bases down by being able to effectively share information between the Physicians and Healthcare agencies locally as well as the healthcare agencies nationally. It will also help keep our Madison County Hospital employees on the job serving the patients of Central Ohio and Madison County. Thank You | Madison County Hospital | 360 | 31 to 90 days | \$975,000 |

| Madison | Equipment Purchase and Upgrades for New School Con | Purchase grading equipment and update existing equipment to complete ground work on new school build in Madison, Franklin and Union townships. Each school is approximately 5-10 acres and will require excavation, dirt removal, gravel hauls, grade work, and seeding. Work will be in conjunction with other companies. | Fulharty Enterprises Inc. | 5 | 31 to 90 days | \$50,000 |
| Madison | New fire station | Our current station is a converted gas station that does not meet today's demands. We cover the Village of Mt. Sterling and four surrounding townships. | Tri-County Joint Fire District | 0 | 181 days or more | \$2,000,000 |
| Madison | Steve Allen | The London City Schools is building a new middle school on State Route 38, across from our elementary school (1,000 students) and our high school (500 students). The road is only two lanes with no turning lanes. The congestion at dismissal time is significant. We are concerned for when we build an additional school, the congestion will only increase. We are conducting a traffic study to determine the best solution, but this, at a minimum, we will need two turning lanes coming from each direction to keep the flow of traffic going and safe. We are VERY concerned about the safety of children and their parents at this location. Neil Building, 27 S. London St., Mt. Sterling, OH 43143 | London City Schools | 50 | 181 days or more | \$350,000 |
| Madison | Neff Building Historic Preservation | Interior and exterior renovations to save building from demolition | Madison County's Future Community Improvement Corp | 12 | 0 to 30 days | \$250,000 |
| Madison | Emergency Generator | Install generator to supply emergency power to fire station/community center to provide an emergency shelter for area residents. | Range Township | 2 | 0 to 30 days | \$22,000 |
| Madison | Jillian's Bridal Historic Renovation | Historic building facade renovation. Addition of restroom to retail area. | Madison County's Future Community Improvement Corp | 2 | 31 to 90 days | \$10,000 |
| Madison | Dwyer Bros. Hardware and Radio Shack Historic Reno | Replace brickwork and windows to return building to historic look. Replacing 6" water main with 12" water main. Adding new curbs and gutters. Replacing all of roadway. This project has already been approved by the Planning Commission and has been approved by ODEP. This project is truly shovel ready. | Madison County's Future Community Improvement Corp | 5 | 31 to 90 days | \$25,000 |
| Madison | High Street Project | At the Madison Correctional Institution, replace the 1987 boilers that range in BTUs from 75,000 to 1.1 million. The boilers at the Madison Correctional Institution are 21 years old. They are not energy efficient and are breaking down regularly. 1) Mill and fit of North St. from Washington St. to High St. 350 linear feet by 30 ft. width. 2) Mill and fit of Cleveland St. 800 linear feet by 40 ft. width. 3) Total reclamation of Railroad St. 750 linear feet by 25 ft. width. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$1,072,750 |
| Madison | MaCl Boiler Replacement | 1) Mill and fit of North St. from Washington St. to High St. 350 linear feet by 30 ft. width. 2) Mill and fit of Cleveland St. 800 linear feet by 40 ft. width. 3) Total reclamation of Railroad St. 750 linear feet by 25 ft. width. | Village of South Solon | 20 | 91 to 180 days | \$250,000 |
| Madison | Street Upgrades | 4) New curbs and gutters to Railroad St. 1500 linear feet. Construction traffic for a new sanitary sewer project did heavy damage to the above named streets. Since they were not excavated to install sewer lines, they were not repaired as part of the project. Phittick Farms Corp. has also purchased the grain elevator in the Village and put it back into operation. The continued use of Railroad St. by the grain trucks is causing it to deteriorate very rapidly. Thus the need for total reclamation. | Western Reserve Transit Authority | 105 | 181 days or more | \$1,406,077 |
| Madison | Capitalized Maintenance | Capital Maintenance Costs to add about 30 jobs and train about 75 existing jobs | Madison County | 15 | 31 to 90 days | \$200,000 |
| Madison | Old Columbus Road/Lake Choctaw Bike Lanes | This highway enhancement project would construct full width bicycle lanes on an existing county road adjacent to the existing travel lanes for 2000 feet thereby connecting two sides of an existing community of 3500 people. The new lanes would be designed, constructed, signed and striped to all current bicycle facility standards. | City of London | 100 | 91 to 180 days | \$4,000,000 |
| Madison | Kerby Blvd extension 42-38 | 1.2 mile of new roadway with curbs, gutters, storm sewer and a signalized intersection at the intersection of SR38. We would also extend water and other utilities along the right of way. | Madison County | 25 | 31 to 90 days | \$300,000 |
| Madison | Paint & Range Townships Bridge Deck Replacements (| This project would immediately replace three failed bridge superstructures thereby removing posted weight restrictions which are hampering agricultural commerce in this local. | Camp Chase Railroad | 1100 | 91 to 180 days | \$300,000 |
| Madison | Darby Creek Bridge Br. # 151.39 | Bridge # 151.39 in need of masonry repairs to its piers and abutments in order to insure continued safe operation of the rail line to Lily Chapel where we service Peavy Grain. | Village of Mount Sterling | 50 | 91 to 180 days | \$1,500,000 |
| Madison | Family revitalization and rejuvenation | In partner with local community center, township leaders and county hospital to provide all citizens a safe indoor health and wellness facility. This facility will include the benefit of adding an urgent care center. This facility will help the quality of life for all segments of residents from safe dependable education and wellness for youngsters to safe and easily accessible wellness programs for our senior citizens. | Village of Mount Sterling | 100 | 91 to 180 days | \$2,220,000 |
| Madison | Era Water Extension | The Village of Mount Sterling is consolidating waterlines in the community of Era / Pauckway County. This community has a Mobile Home Park that is experiencing leaking problems. There is approximately 12,400 feet of 12" water main direct bores under Deer Creek and a railroad. In addition a request for a approximately 100 foot tall water tower. This would cost 300,000 gallons. We would like to rededicate a closed nursery house in town that closed a few years ago. We would like to buy this property and remodel it and have rental units outside here in town. | London lawns | 20 | 91 to 180 days | \$250,000 |
| Madison | london lawns | This project will create jobs and will allow a current agri business and farm to run more efficiently. The business would utilize agri by products by using both distiller grains from ethanol plants), and soybean hulls for livestock feed. Many farmers who own livestock do not know that they can use these products in their feeds. The grains are reusable and are an effective and efficient way to feed livestock at a lower cost than other business would store, process, and distribute these grains to farmers. Our business would also promote and educate the agri world about these products so that these grains that are a by product of corn and soybeans, can be used in some ways, like the environment, and make agri business head into the right direction. | AJ Hamps/Ramd and Ewe Farm/Ralco Feeds | 50 | 31 to 90 days | \$250,000 |
| Madison | By product Agri Business | The following facilities and energy saving product would create the jobs: 1 80 x 100 facility barn to store by product 2 grain fans for storage of by product 1 wind turbine to run farm more environmentally friendly Farm equipment (tractor/equipment) for farm and business use Fuel efficient vehicle and trailer to deliver product | The Brick LLC, DBA The Red Brick Tavern | 2 | 31 to 90 days | \$74,000 |
| Madison | Historic Red Brick Tavern | Preserve the Historic Red Brick Tavern. It was built in 1837 and is the 2nd oldest Stage Coach stop in Ohio on the Cumberland Road. It is also on the historic registry. We are trying to keep the tavern open to the public, but with the down economy, we don't have the money to do the repairs it needs to be preserved. It needs a roof replaced, the windows replaced in a way well the structure reinforced. It needs more than that but these are things that need done now. I have an estimate on the roof at \$24,000.00. The rest is an estimate. We haven't had anyone quote on the job, because we don't have the money to do it. | City of London | 2 | 0 to 30 days | \$200,000 |
| Madison | Street Sweeper | Street Sweeper: This city's sweeper is inadequate and therefore many things are getting the storm sewers which cause pollution in the discharge to the streams. By having an environmentally friendly sweeper it could reduce pollution in the streams through the city. Cleaner waterways would be the outcome. | City of London | 75 | 181 days or more | \$3,000,000 |
| Madison | Elin/High stormwater project | Replace 2000 feet of storm sewer. This sewer has had cave in and been repaired with smaller pipe and restrict flow and creates backups, this sewer is a tied up brick sewer that is continually having problems | City of London | 10 | 0 to 30 days | \$250,000 |
| Madison | Jacqueline Avenue Flood | 150 feet of storm sewer pipe. This would reduce the volume to water going downstream at a given time thereby reducing flooding in the immediate area and also through a large part of the downtown area. | City of London | 10 | 0 to 30 days | \$250,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Madison | Era Sanitary Sewer Extension | The Village is anticipating partnering with OCHA to help the community of Era with potable water, due to arsenic problems. The Village believes it should be prudent to extend wastewater services to the community of Era at the same time. This would provide the aforementioned community with proper sanitary sewer remediation. Installation of state-of-the-art sanitary sewer collection system, including new distribution lines and manholes, an emergency generator and new alarm system necessary for safe and efficient operation of the facility. This is one of six waterlines operated by OCHA that support the state's sport fishing industry. Design work is approximately 90% complete at the present time and the project could go to construction this fall if funds were made available. | Village of Mount Sterling | 100 | 91 to 180 days | \$980,000 |
| Madison | London State Fish Hatchery Electrical System Impro | | Ohio Department of Natural Resources | 25 | 91 to 180 days | \$1,500,000 |
| Madison | Water Plant upgrade | The Village has interest to provide safe potable water to a neighboring community. The Village has already requested funds to provide the transmission main to accomplish this. The Village believes it is prudent to upgrade the existing filters with proper controls. As present the Village only utilizes approximately 25% of capacity and is able to work around the associated problems with antiquated equipment. With the addition of the neighboring community the filters should be upgraded. Thus providing a more consistent operation. | Village of Mount Sterling | 10 | 31 to 90 days | \$750,000 |
| Madison | Mount Sterling Meter System | Replacing existing meters with modern meters with the ability to assist residents to conserve resources. | Village of Mount Sterling | 10 | 31 to 90 days | \$131,600 |
| Madison | Meals-on-Wheels of Madison County | In order to improve the physical and mental status of the population who are at great risk for malnutrition and malnutrition due to their declining health and isolation, LifeCare Alliance will provide nutritious home-delivered or congregate meals to clients 365 days a year who are chronically ill, home-bound and disabled senior citizens for whom little or no family exists, as a result of health-related homebound services provided by LifeCare Alliance, the health, wellness and life satisfaction of clients will improve. LifeCare Alliance also operates Community Dining Centers provide meals for older and chronically ill adults at congregate dining centers in twenty locations across central Ohio, specifically at the Mount Sterling dining center in Madison County. The participants in these programs are at high risk for malnutrition. The object is to prevent malnutrition and promote delayed malnutrition in the case of illness or injury, rehabilitation or in the case of management of a chronic condition. LifeCare Alliance provides the high quality, least costly means to address nutrition-related health issues and concerns. Replacement of malfunctioning bleach pump station, rehabilitation of 4 wells, and additional high service pump. Project will improve reliability and adequacy of water source and pumping. | LifeCare Alliance | 250 | 0 to 30 days | \$200,000 |
| Madison | WTP and Well Improvements | Replacement of about 1,000 feet of 4" and 6" water main which have been subject to frequent breaks and cause poor fire flow. Ohio EPA has issued a noncompliance of water in sanitary sewer. Project will improve the reliability of the distribution system and provide of biological contamination due to breaks. | Village of West Jefferson | 10 | 0 to 30 days | \$165,000 |
| Madison | West Jefferson Water Main Replacement Projects | Design and construction of preliminary treatment facilities at the WWTP consisting of grit removal and screening. The purpose is to remove sand and other particulate matter which has caused premature wear on the existing mechanical equipment and pumps (grit) and to remove rags and other trash that have caused sewage equipment (blowers) and pumps. | Village of West Jefferson | 10 | 0 to 30 days | \$700,000 |
| Madison | West Jefferson WWTP Preliminary Treatment Facility | Development of a new well field and construction of a 1,000,000 gallon water treatment plant. This will enable the city to increase their industrial base. Provides for adequate water supply to protect health and safety. Also provides sufficient supply for fire protection. | Village of West Jefferson | 25 | 31 to 90 days | \$1,000,000 |
| Madison | Water treatment plant well field development | | City of London | 20 | 91 to 180 days | \$6,500,000 |
| Madison | West Jefferson Sanitary Sewer System Evaluation | Evaluation of sanitary sewer system for sources of infiltration/inflow consisting of flow monitoring, smoke and dye testing, internal inspection, sewer modeling and preparation of a report recommending sewer rehabilitation. The purpose is to reduce excess flows through the wastewater collection system, eliminating basement flooding, and flows to the wastewater treatment in excess of plant capacity. | Village of West Jefferson | 10 | 31 to 90 days | \$200,000 |
| Madison | CLINICIAN Community | The CLINICIAN community project will place Ohio in a leading role in electronic healthcare information integration creating the first and largest community electronic medical records currently available technology. Hospital, physicians, pharmacists, dentists, physical therapists, EMTs, home health, hospice, nursing homes, Emergency Management Association (Homeland Security), health departments, school nurses, and local citizens - all accessing and sharing medical information in a complete community approach with a system designed for small community needs. Approximately 70% of the U.S. healthcare market is served within small communities and their associated community hospitals. Virtually no one is targeting this market as all are focused upon big centers, big institutions. Ohio can help the U.S. attain 70% of the national health information network (HIN) integration. We will incorporate green technology to offset power grid strain as we advance digital growth. This project will create at least ten new jobs for each small community while enabling the viability of treasured small community hospitals and the retention of current healthcare workers. | CLINICIAN Community, Inc. | 4,000 | 0 to 30 days | \$1,200,000 |
| Madison | CLINICIAN Community | The CLINICIAN Community project will place Ohio in a leading role in electronic healthcare information integration creating the first ever, total community electronic medical records currently available technology. Hospital, physicians, pharmacists, dentists, physical therapists, EMTs, home health, hospice, nursing homes, Emergency Management Association (Homeland Security), health departments, school nurses, and local citizens - all accessing and sharing medical information in a complete community approach with a system designed for small community needs. Approximately 70% of the U.S. healthcare market is served within small communities and their associated community hospitals. Virtually no one is targeting this market as all are focused upon big centers, big institutions. Ohio can help the U.S. attain 70% of the national health information network (HIN) integration. We will incorporate green technology to offset power grid strain as we advance digital growth. This project will create at least ten new jobs for each small community while enabling the viability of treasured small community hospitals and the retention of current healthcare workers. | CLINICIAN Community, Inc. | 4,000 | 0 to 30 days | \$1,200,000 |
| Madison | Township Hall Addition | Addition to Township Hall for community center and public meeting and voting purposes. | Deercreek Township | 50 | 31 to 90 days | \$150,000 |
| Madison | Recreation Center Upgrades | Replacing roof, windows, doors, and HVAC system of recreation center. | Deercreek Township | 50 | 91 to 180 days | \$250,000 |
| Madison | Victim Services | The Victim Services Project was created to improve and expand the services offered to victims of domestic violence in Madison County. The primary of the Recovery and Reassignment and help to continue the mission. The proposed project is to increase funding for one Victim Services Coordinator (VSC) position. The VSC assesses incoming clients and provides information and referrals. VSC develops and updates a case plan for each individual to help the individual achieve self-sufficiency and stabilize the program and update the progress of each client. Salary plans will be developed and implemented if necessary. The VSC will facilitate a support group for each client. The second aspect of this project is to increase services by offering classes in the shelter. This is a creation of one or two new positions within the shelter. One class is a life skills class. This class will prepare victims in the shelter to be able to live life on their own away from that abuse. The other class offered will be geared toward children who are staying in the shelter. This is to help children cope with their emotions and help them adjust to a shelter environment. | A Friend's House | 3 | 0 to 30 days | \$15,000.00 |
| Madison | Volunteer Services Coordinator | Providing a full time Volunteer Coordinator/Court Advocate (VC). This project plans to minimize the trauma experienced by victims of domestic violence and their children through court advocacy and available volunteers. The VC will recruit and train volunteers to provide court advocacy and accompany to victims filing for crime victims compensation. Additionally, the VC will provide information to domestic violence victims through the local legal office that is offered in Madison County, Ohio on a monthly basis. | A Friend's House | 3 | 0 to 30 days | \$4,000.00 |
| Mahoning | Waste Water Treatment Plant Roof Repairs | The project will involve the repair and replacement of the roof materials of various structures at the City of Youngstown Waste Water Treatment Plant. The current roof systems are deteriorated and failure to repair will result in damage to a wide array of electronic monitoring and pumping equipment. The Youngstown Waste Water Treatment Plant currently has an approximate 120,000,000 cubic feet of roof area. The roof is in Mahoning and Trumbull County as well. The project is currently under design and could be ready for construction as early as spring of 2008. | City of Youngstown Department of Public Works | 20 | 31 to 90 days | \$1,750,000 |
| Mahoning | Kirkmere Area Sewer Replacement | The Kirkmere neighborhood is located in one of the most economically stable areas of the City. The existing sanitary sewer is deteriorated to a point that residents are beginning to experience a significant number of sanitary backups and flooding. Due to the system being 50 to 60 years old, there are areas of the existing system that contain "sewer bellies" in the conduit that inhibit flow. Furthermore, throughout various sections of the system, large sections of the existing conduit are broken and missing. The existing verified dry conduit will be replaced with elevated stainless steel and all existing manholes will also be replaced. In addition to the sewer replacement, the roadway will be resurfaced within the project limits. Curbing and sidewalk, including barrier free access ramps will also be replaced as needed. | City of Youngstown | 30 | 0 to 30 days | \$1,000,000 |
| Mahoning | Road Upgrade / Drainage / Sanitary Sewer Extension | 5480 ft of new sewer line to alleviate over a dozen potentially failing septic systems with fourteen other homes that would benefit. We would also reconstruct five miles of needed upgrades in existing roads which would include upgrading drainage, roadbed structure & paving. We would also replace 14 catch basins and repair several manholes to alleviate safety issues in the Damascus area. This would help several area businesses to survive this downturn in our economy. It would also give us the assistance to help our road department fully staffed without the possible layoffs that could be seen in the future. Final engineering has been completed so we could start on all projects as soon as weather permits. | Goshen Township, Mahoning County | 20 | 31 to 90 days | \$980,000 |
| Mahoning | Meadowbrook Avenue Detention Basin | Detention Basin to prevent sewage backup or the discharge of raw to a creek in times of heavy rains at the Meadowbrook Avenue Pump station. | City Of Youngstown WWTP | 20 | 91 to 180 days | \$4,500,000 |
| Mahoning | Incinerator Repair @ WWTP | Repair Incinerators @ WWTP to allow for the continued disposal of sludge. | City Of Youngstown WWTP | 20 | 0 to 30 days | \$100,000 |
| Mahoning | City Of Youngstown Camera Truck Replacement | Replace Existing Diesel Camera Truck with one that has a diesel particulate filter. | City Of Youngstown WWTP | 20 | 0 to 30 days | \$200,000 |
| Mahoning | City Of Youngstown WWTP Re-Roof Project | Replace roofs on various buildings at the WWTP. | City Of Youngstown WWTP | 100 | 31 to 90 days | \$1,750,000 |
| Mahoning | Marshall Street Sewer Separation | Separate the combined sewers on a couple of streets, to decrease the amount of a combined sewer overflow, by installing a storm line to the Mahoning River. | City Of Youngstown WWTP | 10 | 31 to 90 days | \$689,300 |
| Mahoning | Woodland Avenue Sewer Separation | Separate the sewers and install new catch basins on a section of Woodland Avenue to reduce a combined sewer overflow, improve drainage area floods, and full depth replacement of roadbed as well as new sidewalks. | City Of Youngstown WWTP | 20 | 91 to 180 days | \$230,244 |
| Mahoning | Woodland Avenue Sewer Separation Phase 2 | This is the second phase of a sewer separation project. This will separate the sewers on Woodland Avenue by installing a new storm line, and catch basins to relieve alleviate flooding, and as well the road will have full depth replacement along with new sidewalks and curbs. | City Of Youngstown WWTP | 20 | 91 to 180 days | \$1,000,000 |
| Mahoning | Kirkmere Area Sewer Rehabilitation | Replace sewer sections (about 3000 feet) and associated manholes that are suffering from pipe failure and damage to homes and roadways. Engineering work and plans are complete. | City Of Youngstown WWTP | 20 | 31 to 90 days | \$1,000,000 |
| Mahoning | Andrews Avenue Sewer Separation | Separate the sewers at Andrews, and provide a storm sewer for the redevelopment of the area named Wick Oval. This to eliminate flooding on the street which affects the businesses on the street. | City Of Youngstown WWTP | 200 | 91 to 180 days | \$414,000 |
| Mahoning | Floating Sludge Cover Replacement @ WWTP | Replace existing floating covers on sludge tanks @ WWTP. Engineering will be paid separately. | City Of Youngstown WWTP | 20 | 31 to 90 days | \$600,000 |
| Mahoning | City Of Youngstown Catch Basin Cleaner Replacement | Replace an old diesel powered Catch Basin Cleaner with a new one with a diesel particulate filter. | City Of Youngstown WWTP | 20 | 0 to 30 days | \$250,000 |
| Mahoning | City Of Youngstown Dragging Machine Replacement | Replace some old dragging machines with new ones that have diesel particulate filters. | City Of Youngstown WWTP | 20 | 0 to 30 days | \$125,000 |
| Mahoning | Tech-Belt Region Poverty to IT Jobs | Training individuals in poverty for high-growth high-demand occupations is the focus of this project. Although NewLife is a technical training organization, the approach to training is holistic. The incorporation of the Bridges out of Poverty, Getting Ahead, and Circles programs, designed by aha!Processes into the NewLife training programs will address the barriers of those from generational poverty living in the economically distressed areas of the Pittsburgh/Cleveland corridor. The programs also contain character/values training which addresses problems of work ethic thereby Completion of an 8' asphalt walking path and a gazebo located at Welker Park. This would complete area park projects that started several years ago, but due to lack of funds was not completed. The Village has just completed a renovation of its Police Dept. to meet Federal standards and did not have sufficient funds to complete the same year. The Sally port will connect to the building for the safe transportation of detainees. | NewLife Technical Institute | 20 | 0 to 30 days | \$1,200,000 |
| Mahoning | Welker Park | | Village of New Middletown | 4 | 31 to 90 days | \$60,000 |
| Mahoning | Police Sally Port | | Village of New Middletown | 4 | 31 to 90 days | \$120,000 |
| Mahoning | Village Building Rehabilitation | The Village Administration Building was constructed in 1972 and houses the Administration offices, Police, and Fire Dept. The building is a historic building and the intent is to restore it to the past of houses being visible from the river and sector of the village. | Village of New Middletown | 4 | 31 to 90 days | \$40,000 |
| Mahoning | East Middletown Road Safety Upgrade | Middleview Rd. is a main East-West road that runs in the village. Almost all East-West emergency calls for the Village and Township Office #1 use this road. The road would be milled and resurfacing 2" of asphalt, consists of two ten foot lanes, pavement marking, and go from the East Corporation line to the West Corporation line, approx. 1.5 miles. The required surface of the existing asphalt has been assessed. | Village of New Middletown | 10 | 31 to 90 days | \$160,000 |
| Mahoning | Sycamore Dr. | Granville Dr. is the main street going from the Township #1 (which has no housing projects being developed) and a new nursing home being constructed to the Village Plaza. The road was several years ago with storm sewers and curbs. The surface has surpassed its usefulness and would be milled 2" and new asphalt put down. | Village of New Middletown | 4 | 31 to 90 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Mahoning | Mahoning County Planning Commission's Floodplain P | The Mahoning County Planning Commission has created this initiative to study and map Mahoning County's floodplains in unincorporated areas for the purpose of preservation, protection and regulation of sensitive floodplain areas. The aim of this initiative is to recognize the changes in our community, understand the impact of these changes, and be better prepared for the future. Many of the high-risk flood areas are in parts of the community with rapid growth in the recent past or probable rapid growth in the near future. However, decision-making for floodplain areas is based on studies that date from the 1970s. While local officials are keenly aware of the inadequate mapping and information, statutory constraints prevent any changes to FEMA's Flood Hazard Boundary Maps. | Mahoning County Planning Commission | 3 | 0 to 30 days | \$1,500,000 |
| Mahoning | Patriot Seating Going Green | We are an office seating manufacturer that would like to take advantage of the technology available to produce a more environmentally friendly GREEN product. We would like to become GreenQuest Certified. We are a relatively new company that hires U.S. Armed Forces Service Veterans exclusively to upholster and assemble quality office seating. | Patriot Seating, Inc. | 11 | 31 to 90 days | \$15,000 |
| Mahoning | Smith Township Resurfacing Program | Smith Township roadway resurfacing would not only benefit approximately 10 roadway construction employees, but also help cement the satisfaction for a proposed waste-to-energy facility in Smith Township which will create 5040 jobs, each paying \$50,000 per year plus benefits. It will also mean approximately \$56,000,000 in construction savings over the next several years. The severely weathered local roadways are not in the condition needed to support the safe and efficient movement of the vast amount of traffic that will be generated by the completion of the \$250,000,000 project proposed by Jefferson Renewable Energy. This project, upon completion, would generate significant funds via host fees which would allow the Township to better maintain these roadways on an ongoing basis. Thank you for your consideration. | Smith Township | 70 | 31 to 90 days | \$1,000,000 |
| Mahoning | North Benton Sidewalk Project | North Benton is an economically depressed part of Mahoning County which has received very little infrastructure funding over the years. Most of the sidewalks are broken and uneven, making for an unsafe condition for the local residents, who in turn use the roadways for walking and biking. Please consider this area for improvements. | Smith Township | 6 | 31 to 90 days | \$500,000 |
| Mahoning | Calla Road Safety Upgrade Phases I & II | This is a shovel ready project that can begin at the first sign of compliant weather. Calla Road is a narrow and damaged roadway that accesses State Route 14. It has been identified as our top priority for Township roadways. Thank you for your consideration. | Smith Township | 6 | 31 to 90 days | \$236,000 |
| Mahoning | Maple Ridge Waterline Phase VI | The Maple Ridge Waterline Project has brought safe drinking water to hundreds of local residents. This Phase would basically "close the loop" and reconnect the waterline sections to the Sabling lines. The Maple Ridge District has been identified as low income by Mahoning County and would be a great place to provide a quality of life improvement. | Smith Township | 8 | 31 to 90 days | \$125,000 |
| Mahoning | California & Tennessee Avenue Waterline Upgrades | The existing waterlines servicing both California and Tennessee Avenues have been in need of replacement for some time. Inadequate pressure makes water service unreliable in these two reaches of our Township. | Smith Township | 4 | 91 to 180 days | \$125,000 |
| Mahoning | Ohio Avenue Sanitary Sewer Project | This project would extend sanitary sewer service approximately eight tenths of one mile west of existing sewer lines in Sabling. This would serve the Maple Ridge area and bring sewer service to the newly developed Township Park. | Smith Township | 8 | 31 to 90 days | \$850,000 |
| Mahoning | Dist 4, PID 85535, WRTA 20 Light Vehicle Purchase | WRTA - 20 Light Transit Vehicles, accessible, gasoline/electric hybrid | Ohio Department of Transportation | 25 | 31 to 90 days | \$1,500,000 |
| Mahoning | Dist 4, PID 85538, WRTA 10 Modified Minivans | WRTA - 10 Modified Minivans, accessible, gasoline/electric hybrid | Ohio Department of Transportation | 8 | 31 to 90 days | \$500,000 |
| Mahoning | Dist 4, PID 85539, WRTA 10 Transit Buses | WRTA - 10 Transit Buses, 30 foot, diesel / electric hybrid | Ohio Department of Transportation | 83 | 31 to 90 days | \$5,000,000 |
| Mahoning | Wellness Collaborative | New Construction for a Wellness Center. Copeland Oaks is a nonprofit retirement community and home to approximately 700 residents. Copeland Oaks is part of a collaborative wellness initiative with Mount Union College and Youngstown State University. Students from YSU assist and educate our aging population and employees on wellness and learning how to live a healthy lifestyle. In 2008 we introduced a health and wellness program to all of our 700 residents and 500 employees. A health and wellness expert was hired to oversee the program. The program has proved to be a success which has caused us to out-grow our current wellness room. Funds will permit the construction of a new fitness center, allowing us to continue our current programming, expanding it, and implement new programming. Funding will also permit us to continue our work with MUC and YSU. Students from YSU monitor and measure the success of the residents participating in the program while MUC students educate and train participants. The new wellness center will save jobs, allow up to 50 students per semester to acquire hands on training, and generate new construction jobs. | Copeland Oaks | 53 | 91 to 180 days | \$2,500,000 |
| Mahoning | Assisted Living Expansion Program | Funding for the expansion of our nonprofit assisted living facility. As part of the Medicaid Waiver Assisted Living program the State of Ohio needs the benefits of saving money. It is less expensive to house Medicaid individuals in assisted living rather than the costs of full skilled nursing care. With the construction of 84 four new assisted living units, hundreds of healthcare jobs will be created and new ones created. New construction jobs will also be generated. Future layoffs of our current 650 employees can be prevented by expanding our assisted living facility. Most individuals waiting to be on our campus are in need of assisted living. A large portion of our current 700 residents are also waiting on an assisted living unit to become available. The cost of the project includes 84 four new assisted living units, two dining facilities, two nursing areas, and two visiting areas. Assisted living offers residents more opportunities to make their own personal choices. With the increase in life expectancy, more assisted living units currently are needed. | Copeland Oaks | 500 | 91 to 180 days | \$1,600,000 |
| Mahoning | Gang Prevention | Heart Reach is committed to providing quality education to the at-risk, inner city children and youth (ages 6 weeks to 18 years) of Youngstown, Ohio to lift them out of poverty and despair. The high unemployment and crime rates of Youngstown, Ohio, translate into impoverishment for the city's children. The statistics appear bleak and daunting, however the board, staff, and volunteers believe in the community's ability to overcome their circumstances and break free from the bonds of the problems plaguing disadvantaged youth and families in the city of Youngstown. Heart Reach remains faithful to providing gang violence and prevention education to the 800 children and youth that are served these each week. | Heart Reach Ministries, Inc. | 10 | 91 to 180 days | \$250,000 |
| Mahoning | East Federal Resurfacing and Safety Upgrades | The project encompasses resurfacing and safety upgrades of on the City of Youngstown's primary arterial entrances from the east. In 2004, a rehabilitation of Federal Street from Walnut Street west to the city limit was completed and this past year a rehabilitation of West Federal Street from Phelps Street to FRIH Avenue was performed. Rehabilitation of East Federal Street from Walnut Street to the Crab Creek Bridge would complete a comprehensive improvement to the primary east-west corridor through the central business district. The project would include full width 2" pavement planning and a 2" asphalt overlay within the abovementioned limits. Further improvements would include new pavement markings as well as improving pedestrian access to the central business district through ADA compliant handicap ramps. The improvements would cost an estimated \$550,000.00. Plans were ready for advertisement by July, 2009. | City of Youngstown | 25 | 91 to 180 days | \$550,000 |
| Mahoning | Wick Ave. Resurfacing and Safety Upgrades | The project includes resurfacing, safety upgrades of 1.05 miles of Wick Avenue between McCurtay Road and Wood Street. This section of Wick Avenue currently acts as the primary connecting corridor between Youngstown State University and the heart of the Youngstown central business district. Rehabilitation of this section of roadway will also aid in the future development of the Ursuline High School Campus at the northern limits of the project. | City of Youngstown | 50 | 181 days or more | \$1,100,000 |
| Mahoning | Commerce Street Parking Deck | The installation will include full width 2" pavement planning and a 2" asphalt pavement overlay within the project limits. The project will include substation upgrades, such as, ADA compliant barrier-free ramp replacements. | City of Youngstown | 600 | 181 days or more | \$12,000,000 |
| Mahoning | Federal Street and Vindicator Square Parking Deck | Construction of a 1000 space parking deck at the intersection of Commerce Street and Wick Avenue in Downtown Youngstown. The need for accessible parking is critical for the continued growth of Youngstown's downtown area to be fully realized. The project would include the construction of the deck as improvements to the adjacent sidewalks, curbing, and roadway surfaces. In addition to the total jobs created by construction, the structure would be a catalyst in attracting business to the National City Bank Building and the 20 Federal Plaza office building, both of which contain viable office space available to potential tenants. In addition to the above mentioned office building the structure would provide overflow parking to the US Bankruptcy Court at the adjacent intersection, as well as several other downtown businesses. | City of Youngstown | 300 | 181 days or more | \$6,000,000 |
| Mahoning | Youngstown Municipal Court Facilities Improvements | Construction of a 500 space parking deck at the intersection of Vindicator Square and Federal Street in Downtown Youngstown. The need for accessible parking is critical for the continued growth of Youngstown's downtown area to be fully realized. In addition to the total jobs created by construction, the structure would be a catalyst in attracting business to meet and the downtown area. Recent development of Powers Auditorium as well as the Western Reserve Transit Authority Park and Ride Program, have exhibited a need for a significant increase in parking capacity for this section of downtown. The facility will provide parking for the 7th District Court of Appeals, Home Staging and Loan Corporate Offices, and the recently expanded Tatt Technology Center. | City of Youngstown | 400 | 181 days or more | \$8,000,000 |
| Mahoning | Meander Creek -- Watershed Coordinator and Impleme | Program WPCFL - The Mahoning Valley Sanitary District (MVSJ) and Western Reserve Land Conservancy would like to secure a Watershed Coordinator for 3-years to implement a Meander Creek Watershed Protection Plan. This is a green infrastructure project that will focus on establishing riparian buffers to Meander Reservoir through conservation easement purchases in floodplains and will protect water quality for 260,000 residents of Youngstown, Niles, McDonald, and 10 townships in Mahoning and Trumbull Counties. | Western Reserve Land Conservancy | 1 | 91 to 180 days | \$1,300,000 |
| Mahoning | Assisted Living Expansion Program | Phase I Planning and Design Completed - needs coordinator to facilitate implementation of plan. | Copeland Oaks | 500 | 91 to 180 days | \$1,600,000 |
| Mahoning | New Construction - Prevention and Wellness Facility | Funding for the expansion of our nonprofit assisted living facility. As part of the Medicaid Waiver Assisted Living program the State of Ohio needs the benefits of saving money. It is less expensive to house Medicaid individuals in assisted living rather than the costs of full skilled nursing care. With the construction of 84 four new assisted living units, hundreds of healthcare jobs will be created and new ones created. New construction jobs will also be generated. Future layoffs of our current 500 employees can be prevented by expanding our assisted living facility. Most individuals waiting to be on our campus are in need of assisted living. A large portion of our current 700 residents are also waiting on an assisted living unit to become available. The cost of the project includes 84 four new assisted living units, two dining facilities, two nursing areas, and two visiting areas. Assisted living offers residents more opportunities to make their own personal choices. With the increase in life expectancy, more assisted living units are needed. | Copeland Oaks | 53 | 91 to 180 days | \$1,500,000 |
| Mahoning | hiring full time police officers | Program WPCFL - The Mahoning Valley Sanitary District (MVSJ) and Western Reserve Land Conservancy would like to secure a Watershed Coordinator for 3-years to implement a Meander Creek Watershed Protection Plan. This is a green infrastructure project that will focus on establishing riparian buffers to Meander Reservoir through conservation easement purchases in floodplains and will protect water quality for 260,000 residents of Youngstown, Niles, McDonald, and 10 townships in Mahoning and Trumbull Counties. | New Middletown Police Dept | 2 | 0 to 30 days | \$70,000 |
| Mahoning | Bailey Court East Extension | Hiring of two full time police officers to allow for 24 hour police patrol. Currently we have 16hrs per day covered and wish to provide coverage around the clock. | Leonard Interstate, LLC | 400 | 31 to 90 days | \$1,400,000 |
| Mahoning | Modernization of STEM laboratories | 100 acre Industrial / Commercial Development which has 1300' of Road & Full Utilities and currently in need of funding to add 2350' of Road & Utilities (gas, water, electric) to meet demand for large buildings, utilities and full services. Flood is currently one of the businesses located in the Development, but larger parcels are needed to accommodate current projects like Knart Lane Truck Center & Warehouse, which have employment numbers well above 500. Lack of funding for vocational equipment has resulted in many of the STEM instructional laboratories at YSU using 20 - 30 year old equipment. While the educational experience takes advantage of the age of the equipment by training students on the use of manually controlled systems, it would be less to increase the use of modern engineering and science equipment available for their use. Acceleration of our engineering program also requires lab modernization. The low level of funding currently available limits the purchase of new equipment typical of what is now used in industrial laboratories. Without having seen or used this equipment, program graduates are limited in their ability to compete in the job market and support the economy of the region. The requested funds will support new equipment such as a modern electrical circuits laboratory, modernization of our MTS bridge and test reactors, the business incubator for our WPCFL, modern laboratory equipment, a networking laboratory, energy transmission analysis systems, semiconductor characterization system, and similar components in support of our undergraduate laboratory needs. | Youngstown State University | 500 | 0 to 30 days | \$3,000,000 |
| Mahoning | Playground improvements at Leonard Kirtz School | Remove old & unsafe swing sets from playground at the Leonard Kirtz School and replace with newer swing sets and are handicapped accessible and safer for students with developmental disabilities. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$13,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Mahoning | Quaker City Industrial Park | Project would be a new industrial park constructed on 177 acres of the former Quaker City Raceway located north of Salem, Ohio. Project would have easy access to SR 166, SR 45 and US 62. Project would include 7,250 linear feet of street, 6,500 linear feet of gravelly sewer, 6,300 linear feet of three main sewer, 11,000 linear feet of water line and 21.8R stations. Project would be served by the City of Salem and would be located only 7 miles from the City of Canfield, Ohio. Project would provide approximately 250 industrial jobs to an economically depressed area. This project would install digital in-car video systems in five of Smith Township's police offices. After installation, officers would be capable of separating much needed audio and video evidence to utilize during the prosecution of criminal cases. | City of Salem | 250 | 181 days or more | \$4,000,000 |
| Mahoning | In Car Video System | | Smith Township Police Department | 0 | 0 to 30 days | \$28,000 |
| Mahoning | Lowellville Village Wood Street Safety Upgrade Pro | This project is located on Wood Street from Watson Street east to Third Street in the Village of Lowellville. This road is a major east-west connector within the Village and is also SR 289. Project components consist of the removal and replacement of approximately 2,000 feet of existing, removal and replacement of 25' driveway approaches, and repair of 16 catch basins and associated storm sewers. | Village of Lowellville | 10 | 0 to 30 days | \$20,000 |
| Mahoning | Portable Radio Upgrade | This project would provide Smith Township Police Officers with new portable radios. The new radios would replace radios that are currently fifteen (15) years old and are proven to be unreliable. This project would enhance officers safety and provide the capabilities of communications with other jurisdictions. | Smith Township Police Department | 0 | 0 to 30 days | \$16,805 |
| Mahoning | Lowellville Village Street Resurfacing Program | This project would consist of conducting pavement planning, applying tack coat, and the installation of 1 1/2 inches of asphalt concrete in accordance with ODOT Standards on all streets in the Village. | Village of Lowellville | 8 | 0 to 30 days | \$500,000 |
| Mahoning | Police Department Video Surveillance | This project would install a much needed video surveillance system in and on the Smith Township Police Department Headquarters. This system would enhance officer safety by monitoring activities on Smith Township property, including police stations that are not in use. This system would capture and record any criminal activity, acts of retaliation, or acts of terrorism towards our police officers and office. This system would also act as a deterrent to such activity. | Smith Township Police Department | 0 | 31 to 90 days | \$12,500 |
| Mahoning | Norfolk Southern Line Relocation | The Norfolk Southern Line relocation entails the relocation of approximately feet of rail line in conjunction with the \$900,000 V&M steel mill separation. The relocation is necessary for construction of the building and roadway to service the proposed expansion. In addition the newly relocated rail line will provide for more efficient freight movements through the site. | City of Youngstown | 485 | 31 to 90 days | \$20,000,000 |
| Mahoning | V&M Star Roadway Extension | This project consists of the full-depth construction of a new roadway to accommodate the potential expansion of V&M Star at their Division Street Extension location. The potential \$7 million investment by V&M would require a new public road in order to be accessible from the Division Street Extension. The estimated cost of the project would be \$7 million. The project would include full-depth construction of just less than two miles of concrete roadway, curbing and a dedicated storm system for the right-of-way. | City of Youngstown | 450 | 31 to 90 days | \$7,000,000 |
| Mahoning | Purchase of Clean Diesel Pavement Marking Vehicle | Purchase of a 'Clean Diesel' pavement marking vehicle. The current vehicle used for pavement marking is a 1974 model that is very inefficient and with full diesel emissions. | City of Youngstown | 6 | 0 to 30 days | \$250,000 |
| Mahoning | Backup Power Generator | This would install a backup power source for our police headquarters in case of an emergency power outage or natural disaster. At this time, the Smith Township Police Department has no backup power source in place. | Smith Township Police Department | 0 | 181 days or more | \$20,099 |
| Mahoning | Ohio Green Technology Supply Chain Mapping | Companies in the state of Ohio are increasingly providing, or could provide, supply chain services to green technology manufacturers contemplating setting up or building green tech manufacturing facilities. The program would hire local Ohioans to undertake the research and with support services provided by Revere. The goal of this program would be the creation of new high quality, career oriented jobs in the Youngstown area that benefit the city, the region and the state. This economic development / job creation program would assist the state of Ohio in attracting more manufacturing and green technology based companies to the state by showcasing the vast array of existing suppliers, infrastructure, and skilled labor resources that would build out a national green technology industry. Once complete, this new made in Ohio information product could be expanded to cover other sectors, essential industries, with all the research work being undertaken in a Revere/Youngstown office. | Revere Data, LLC. | 15 | 0 to 30 days | \$450,000 |
| Mahoning | Growing the Social/Emotional/Behavioral Developme | Providing training and education to early child care providers/caregivers/schoolteachers/gardeners and others in the growing and nurturing of age appropriate social, emotional and behavioral growth in 2 to 8 year olds. Training to be provided by certified mental health specialist in evidence based methods for early child development. Outcomes will include: 1. Increases in 40 teachers and 200 parents in their skills in fostering child social emotional and behavioral growth. 2. Development of age appropriate emotional vocabulary in 300 children. 3. Development of age appropriate peer and adult social relationships in 300 children. 4. Development of school readiness skills in 300 children. | D and E Counseling Center | 4 | 91 to 180 days | \$255,000 |
| Mahoning | Development of Sebring Mansion Inn & Spa | The Sebring Mansion Inn & Spa represents an economic development project that will restore approximately 13,000 sq. ft. of the historic F.A. Sebring Mansion and add approximately 25,000 sq. ft. of additional period appropriate / high-tech / environmentally friendly space, and 15,000 sq. ft. of parking space. In support of this project, initial impacts of the project include jobs for approximately 275 construction, HVAC, electrical and other building/restoration artisans and will generate local building supply sales of approximately \$3,000,000 annually. Once complete, the inn will provide new job opportunities in the Sebring/Ti County area across a broad range of skillsets, and generate tourist dollars, tax, and vendor revenue. Additionally, the inn will generate full and part time employment opportunities for approximately 30-40 area residents whose households are predominantly single female with related children. The inn will also serve as a catalyst for major economic revitalization for the Sebring, OH area. | Sebring Mansion LLC | 300 | 31 to 90 days | \$2,500,000 |
| Mahoning | Linkages Youth Suicide Prevention Project | Provision of mental health education, screening and treatment linkages services within middle and high schools for children at risk for self-harming behavior due to pre-existing emotional disorders. Outcomes: 1. On site education and screening services to 40 middle and high schools. 2. Screening of 3000 twelve to eighteen year old students for mental health problems placing them at risk for self-harming behavior. 3. Linkages 100 % of youth screened true positive for emotional disorders to treatment. | D and E Counseling Center | 3 | 31 to 90 days | \$190,000 |
| Mahoning | SR 46 sanitary sewer extension | Project is needed to eliminate a failed commercial package plant at the Austintown Fire station on SR 46 and connect additional single family units along the routing of the sanitary sewer along SR 46 in Austintown Township Mahoning County Ohio. | Mahoning County | 18 | 31 to 90 days | \$175,000 |
| Mahoning | Post Home Renovation | The Post Home of American Legion Mahoning Valley Post 15 in Poland, Ohio was built in 1936 through the Works Progress Administration. Since its inception, a new kitchen and storage facility was added to the lower level of the building. Post 15 plays an important role in Poland. It is the host and sponsor of the annual Memorial Day Parade, and is used for various functions including the annual Fireworks Display and the adjacent Barr-Mitchell Field, has hosted U.S. Representatives for Veterans' Rallies and International Meetings, as well as being a topic of many historical discussions in our local schools. Through an award, the Post Home would see a new roof installed over the kitchen/storage portion of the building. This will not only help correct existing problems but will make the building more energy efficient, thus saving the post money and helping to conserve our energy. | Sons of The American Legion Mahoning Valley Squad | 3 | 31 to 90 days | \$75,000 |
| Mahoning | Daybreak Youth Crisis Shelter Expansion | The proposed project is a 600 sq ft expansion to the Daybreak Youth Crisis Shelter located in Youngstown Ohio. The new addition will provide additional indoor recreation spaces, offices and meeting area for staff, and a new driving room. After the expansion is complete, staff and children will have a space that is more conducive to their needs and allow the children to have enough space for recreation and dining together. Currently, if the shelter is at maximum capacity the space is not large enough for everyone to eat at the same time. The addition includes offices, observation windows into the common dining and living area, allowing the staff to better supervise children that are there. Daybreak is a 10-bed residential facility that offers temporary shelter and crisis counseling to abused, neglected, runaway and otherwise homeless children. Since its opening in 2003, Daybreak has provided shelter to more than 7,000 children from Trumbull, Mahoning and Columbiana counties. | Family Service Agency | 13 | 0 to 30 days | \$100,000 |
| Mahoning | 2009 Resurfacing Project | Resurface 12 Linear miles of township roads with the average width of roadway of 24 feet. Total township linear road miles is 114. Expected outcome is to remove all roads or sections of roads from critical status. | Austintown Township | 10 | 91 to 180 days | \$1,000,000 |
| Mahoning | 2009 Resurfacing Project | Resurface 12 Linear miles of township roads with the average width of roadway of 24 feet. Total township linear road miles is 114. Expected outcome is to remove all roads or sections of roads from critical status. | Austintown Township | 10 | 91 to 180 days | \$1,000,000 |
| Mahoning | Biomass Heated Greenhouse | Using biomass (pelletized switchgrass) to heat an advanced greenhouse this project will be a major step in revitalizing and promoting the greenhouse business in Ohio. The significant lower costs of energy as a result of using biomass in the form of on-site green switchgrass will make the greenhouse financially viable. Additional energy savings will result from the lower use of energy to transport crops to local market rather than transporting crops from California to markets. The Center for Innovative Food Technology (CIFT) at the Ohio State University is the Edson Center for their greenhouse expertise and the Ohio Agricultural Research and Development Center of the Ohio State University for switchgrass expertise. Several such greenhouses could easily be supported near each of the major metropolitan areas in Ohio and will be built as soon as entrepreneurs see the success of this project. The additional greenhouses would significantly add to both the energy savings and the number of jobs created in Ohio. | New Company TBA | 30 | 0 to 30 days | \$10,000,000 |
| Mahoning | ODMRDD Developmental Center Generator Replacement | Replace two obsolete backup generators at one ODMRDD Developmental Center. | Ohio Department of MRDD | 20 | 91 to 180 days | \$400,000 |
| Mahoning | ODMRDD Developmental Center HVAC Replacement | Replace HVAC units at three ODMRDD Developmental Centers. | Ohio Department of MRDD | 70 | 91 to 180 days | \$925,000 |
| Mahoning | LIFE RECOVERY HOUSE | Proposed is for a drug and alcohol facility treating veterans and their families would offer in house treatment and education with hopes of opening a detox center area, but only needs the help the men and women it treats be addiction it would have an overviewing impact on the community and surrounding areas, by lessening the burden of drugs and crime on our streets. | LIFE RECOVERY HOUSE | 15 | 31 to 90 days | \$850,000 |
| Mahoning | Nurse's Aide Training Program | A Nurse's Aide training program that prepares the trainee to receive a State of Ohio certificate after completing 76 hours (80 hours lecture/16 hours on the job nurse's aide training). The trainee will be eligible to take the State Tested Nurse's Aide examination. There are so many opportunities for the nurse's aide and job market, Long Term Care, Assisted Living, Home Health Care, Hospital, Independent Provider, Adult Daycare, MRDD, Hospice, and Respite etc. The expected outcome based on 200 trainee's passing rate 90%, job placement 95%, and 80% will leave the State of Ohio certificate. KenCare will provide training in the following: tutoring services to trainee's literacy, such as work ethics, resume application preparation, interview process, career letter, First Aid/CPR training, research with healthcare providers for trainee preparation placement. MI and 16 existing 2-3 lane road with 2" asphalt. Includes pavement markings and base repair. Total length is 1.17 miles. Mathews Road to Wolfington Blvd. | KenCare Education Training Center, LLC | 200 | 0 to 30 days | \$250,000 |
| Mahoning | CR 151 (South Ave) Mill and Fill Phase 2 | Mill and fill existing 2-3 lane road with 2" asphalt. Includes pavement markings and base repair. Total length is 1.17 miles. Mathews Road to Wolfington Blvd. | Mahoning County Engineer's Office | 35 | 31 to 90 days | \$850,000 |
| Mahoning | Youngstown Film Education Through Cinema Project | Existing start-up organization, Youngstown Film, Inc. plans on entering local school systems and providing a separate site at which local secondary schools and community education programs could share screenings of influential political films spanning the 20th century in order to demonstrate political climate, the use of propaganda and other ways that film has influenced or has identified cultural ideas, political ideologies with regard to modern cultures and nations. Would include the formation of the first ever Youngstown International Film Festival in cooperation with local business and government to further expand Youngstown's growth in the technology sector. | Youngstown Film, Inc. | 3 | 0 to 30 days | \$20,000 |
| Mahoning | Construction of Fire Station No. 9 | The project will include the construction of a new Youngstown fire station. The new station will replace Station No. 9, an 86 year old station, currently located at 1900 E. Midwestern Avenue. Station No. 9 is one of two fire suppression stations that are located in Youngstown's South Side and is currently in each poor condition that the construction of a new station is imperative. | City of Youngstown | 50 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Mahoning | Construction of Fire Station No. 7 | The project will include the construction of a new Youngstown fire station. The new station will replace Station No. 7 a 104 year old station, currently located at 141 Madison Avenue. Station No. 7 is the oldest operating station within the City as well as the busiest. This is due in large part to the station's close proximity and the Central Business District. | City of Youngstown | 50 | 31 to 90 days | \$1,000,000 |
| Mahoning | Construction of Fire Station No. 12 | The project will include the construction of a new Youngstown fire station. The new station will replace Station No. 12 a 177 year old station, currently located at 2251 McGuffey Road. Station No. 12 is one of two stations located on the City's East Side. | City of Youngstown | 50 | 31 to 90 days | \$1,000,000 |
| Mahoning | Upgrade HVAC ductwork at Leonard Kirtz School | Upgrade the ductwork at Leonard Kirtz School to comply with new fire code regulations. The new system will automatically shut down air flow in other duct lines in the event of fire so as not to propagate other areas of the school with smoke. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$14,000 |
| Mahoning | RLF Tap-in Fund (revolving loan fund for septic se | Signage the ductwork at Leonard Kirtz School to comply with new fire code regulations. The new system will automatically shut down air flow in other duct lines in the event of fire so as not to propagate other areas of the school with smoke. The situation is summarized in the recent email below: From: DeAconetti, Anna [mailto:adaconetti@mahoningcountyohio.gov] Sent: Friday, February 06, 2009 11:00 AM To: Viki West Cc: Barry Nick, Barabette, Dave, Walno, Joseph, Genek, Ryan; Tablack, George J; Stefanak, Matthew, Coleman, William Subject: RLF Tap-in Program Hi Viki, In the last week, there have been a large number of requests from Mahoning County residents for tap-in assistance. I did send some applications to these homeowners with very low expectations of the fund being renewed/grants available. I ended my conversation with these individuals by referring them to the local banks or USDA information that already exists. Remove and replace the exterior window sealant at the concrete joints above the window line on the concrete facade for the entire perimeter of the school. Install new catch basin on the upper tier of the parking lot at the Rev. Rd. Adult Services facility and remove and replace approximately 2,000 square feet of surface waterways, seal and restripe the entire parking lot. Replace parking lot lighting poles and lights at the Community Serv Mahoning County Services facility to increase energy efficiency and maintenance free characteristics. Construction of a fuel island shelter in the bus compound to enclose gasoline fuel pumps and provide protection from adverse weather conditions. Upgrade to the security and fire monitoring systems at the Board Office, Leonard Kirtz School, Rev. Rd. Adult Services facility and the Transportation Garage. Construction of a gasoline fuel pump island dispensing shelter in the bus compound for protection to provide protection from weather. Sealcoat and restripe the parking lots at the Leonard Kirtz School and Javik Court Adult Services facility. A heated police/maintenance garage 98' x 28'W-2576SF. Wood frame structure, masonry foundation and concrete slab. This is a shovel ready project. It is needed for police cars that have computers and cameras that need to be housed within winter months. This project will enhance the life of the vehicles, computers and cameras saving taxpayer dollars. We are in desperate need of funding for this project and our tax base is eroding. We can find no other means of funding or assistance for our garage. We feel this is an excellent stimulus package because it will employ approximately 20 individuals from the various trades. Using biomass (pelletized sawdust) to heat an advanced greenhouse this project will be a major step in realizing and promoting the greenhouse business in Ohio. The significantly lower costs of energy as a result of using biomass in the form of on-site grown sawdust will make the greenhouse financially viable. Additional energy savings will result from the lower use of energy to transport crops to local market rather than transporting crops from California or Mexico. The project is planned to include: The Center for Innovative Food Technology (CFT) (an Ohio Edison Center) for their greenhouse expertise and the Ohio Agricultural Research and Development Center of the Ohio State University for technology expertise. Several such greenhouses could easily be supported near each of the major metropolitan areas in Ohio and will be built as soon as entrepreneurs see the success of this project. The additional greenhouses would significantly add to both the energy savings and the number of jobs created in Ohio. Rehabilitate existing bridge. Work includes new railing, lighting, drainage improvements, substructure repairs and structural steel painting. Also include approach sidewalk construction. Mill and fill existing 3.5 lane roadway. From Presidential Office to Mathews Road. Total length 1.53 miles. Project includes signage and pavement markings. Mill and fill existing 2 lane road. From Lipky Road to SR 45. Total project length 1.8 miles. Project includes redneck existing single slab concrete culvert, pavement markings and signage. Mill and fill existing 2 lane road. From SR45 to culvert 23. Project length 0.55 miles. Project includes redneck existing single slab concrete culvert, reconstruct existing closed drainage system, pavement markings and signage. Mill and fill existing 2 lane road. From culvert 23 to Postage County Line. Project length 7.06 miles. Project includes repair and waterproof existing 108' long steel beam bridge, pavement markings and signage. Paint and structural steel on seven county bridges using OCE2J painting system. Bridges are: CR21 #7, CR16 #18, CR26 #6, CR 100 #13, CR196 #7, CR196 #15, CR45 #8. Widen existing 2 lane road to 4 lanes using concrete approximately 1 mile south of Mahoning Ave to decommission new specialty metal rolling mill. Work includes drainage, pavement markings and signage. Total project length is 800'. Replace existing 190' steel truss bridge over Mahoning River in City of Youngstown. Project will be approximately. Division Street is primary access to Ohio Industrial Park and secondary access to V&M Star Steel. Engineering only. Replace existing 190' steel truss bridge over Mahoning River in City of Youngstown. Division Street is primary access to Ohio Industrial Park and secondary access to V&M Star Steel. In lieu of Design-Build project not funded. Design/build project using silver or higher LEEDS certified design. Regional training and operation facility to be used for highway workers and environmental education. Replacing existing outdated structures. Engineering and construction for widening CR 32 to 2-24' wide lanes, adding turning lanes at BRT and Glenwood Ave. Work includes right of way acquisition, drainage upgrades, pavement markings, signal upgrades, signage, and replace three small bridge structures. Project length is 1 mile. Stream restoration project in urban area. Tributary of Mill Creek. Work includes reestablishing flood plain and upgrading habitat. Replace an older, too small outdated diesel residual truck with a new larger one with clean diesel technology. Work includes building a roundabout at the intersection of Mathews Road and Sheridan Road to increase level of service. Work includes widening and constructing a turning lane at Mahoning Ave on Willow Road using concrete section to the Walkhart Drive. On Fairview Road work includes widening to the deadend and installing a cul de sac. Major drainage upgrade to mitigate substantial urban flooding. Retrofit existing Ohio career technical center with geothermal heating - approximately 175,000 square feet. Building Bridges to Destiny, Inc. Years Experience with program: 5 years Program to be provided: State Work Community Based Training Program with offices located at: 25 Market Street, Suite 1001 Youngstown, Ohio 44503 160 East Market Street/Suite 200 Warren, Ohio 44481 Number of clients to be referred is a minimum of 100, with 60 attending class, 45 being successfully placed and 23 in their jobs after 90 days. Clients referred 100 60% attend class 60 64% placed CBT 45 23% retention 90 days 23 The State Work Community Based Training Program goal as addressed by this program is to develop comprehensive strategies in assisting qualified recipients returning to the job market to secure and maintain permanent employment and reducing the high probability for the need for public assistance. Our goal for this program is also to offer a support system to help remove the barriers that are faced by this population, and to assist them in obtaining training and finding a job. Preserving Energy and Renewable Energy. Copeland Oaks is a nonprofit retirement community with approximately 700 residents and 500 employees on a 250-acre campus. We are seeking funding for the purchase and installation of a thermal solar heating system for our 48,000 gallon in-floor aquatic swimming pool. The system is used by the community of our residents for therapy and by our staff to maintain healthy lives. We are also seeking funding for renovations to some of our 48-year old buildings. The renovations are crucial to our existence and future. Renovators quote to our facility will be made with "Green" products. The construction review recently completed by the Zumbroff Agency indicates many onsite renovations that need to take place. The following items are in addition to the solar thermal heating system: 308 Green double hung windows, 5,810 sq. yds. of Green low VOC carpet, and 4,550 sq. ft. of Green insul steel metal roofs at 272 Green low flow shower heads. We are committed to reducing and eventually eliminating our global warming emissions and accelerating our efforts to sustainability. We have adopted green standards and hope to reverse the effects of global warming. Mahoning County Engineer is responsible for approximately 483 miles of road of which 50% need to be resurfaced. This project will enable our office to resurface 25 miles throughout the urban area. Mahoning County Engineer is responsible for approximately 483 miles of road of which 50% need to be resurfaced. This project will enable our office to resurface 25 miles throughout the rural area. Twenty-two aging signals need to be upgraded or replaced. Project included new signal heads, strain poles, LED lighting, back plates, controllers. Project will increase energy efficiency, meet current specifications and enhance safety for the traveling public. Mahoning County Engineer has a fleet of 150 pieces of rolling stock that have to cover 674.46 miles of heavily performing maintenance on over 483 miles of county roads. The GPS will be used on our office to monitor our fleet in an effort to perform our duties more efficiently and to be more responsive to the public needs. The project consists of re-paving 1 mile x 24' of existing road in Commerce Park. The existing road is 20 years old and is in bad need of resurfacing due to the heavy traffic from these local businesses. The resurfacing of this project will upgrade the safety of the road, improve the travel in and out of the park and make it more appealing for potential new businesses. The township is in desperate need of funding for this project due to our existing tax base. Install or replace approximately 3 three miles of curb throughout the township. Township has never had a curb replacement program so the proposed outcome is to install curb where none now is in place and replace the most critically damaged existing curb. Install enclosed storm sewer system and full depth removal of the existing asphalt pavement and replace with reinforced concrete pavement. Additionally, curb and gutter and underdrains are to be installed. Approximately 1,400 LF. Necessary because the 2006 resurfacing only lasted less than two years because of the heavy commercial truck traffic, most recent average daily traffic count was 1,480. Replace existing flat 1959 original roof with gable roof on Fire & Ambulance station. New 2nd floor would allow 724 sq/ft by emergency services and thereby provide quicker EMS response time to south end of township. | Mahoning County District Board of Health | 25 | 0 to 30 days | \$90,000 |
| Mahoning | Remove and replace window sealant at Leonard Kirtz | Remove and replace the exterior window sealant at the concrete joints above the window line on the concrete facade for the entire perimeter of the school. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$18,200 |
| Mahoning | Installation of new catch basin and replacement of | Install new catch basin on the upper tier of the parking lot at the Rev. Rd. Adult Services facility and remove and replace approximately 2,000 square feet of surface waterways, seal and restripe the entire parking lot. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$21,800 |
| Mahoning | Replace parking lot lighting at the Community Serv | Replace parking lot lighting poles and lights at the Community Serv Mahoning County Services facility to increase energy efficiency and maintenance free characteristics. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$16,000 |
| Mahoning | Construction of fuel island shelter in bus compoun | Construction of a fuel island shelter in the bus compound to enclose gasoline fuel pumps and provide protection from adverse weather conditions. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$26,500 |
| Mahoning | Upgrade security and fire monitoring systems | Upgrade to the security and fire monitoring systems at the Board Office, Leonard Kirtz School, Rev. Rd. Adult Services facility and the Transportation Garage. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$32,100 |
| Mahoning | Construction of a fuel island dispensing shelter | Construction of a gasoline fuel pump island dispensing shelter in the bus compound for protection to provide protection from weather. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$26,500 |
| Mahoning | Sealcoat and restripe parking lots at the Leonard | Sealcoat and restripe the parking lots at the Leonard Kirtz School and Javik Court Adult Services facility. | Mahoning County Board of MRDD | 5 | 31 to 90 days | \$16,300 |
| Mahoning | Jackson Township-Mahoning County-Police and Mainte | A heated police/maintenance garage 98' x 28'W-2576SF. Wood frame structure, masonry foundation and concrete slab. This is a shovel ready project. It is needed for police cars that have computers and cameras that need to be housed within winter months. The GPS will be used on our office to monitor our fleet in an effort to perform our duties more efficiently and to be more responsive to the public needs. | Mahoning County Engineer's Office | 100 | 31 to 90 days | \$1,000,000 |
| Mahoning | Jackson Township, Mahoning County-Commerce Park Pa | The project consists of re-paving 1 mile x 24' of existing road in Commerce Park. The existing road is 20 years old and is in bad need of resurfacing due to the heavy traffic from these local businesses. The resurfacing of this project will upgrade the safety of the road, improve the travel in and out of the park and make it more appealing for potential new businesses. The township is in desperate need of funding for this project due to our existing tax base. | Jackson Township | 12 | 0 to 30 days | \$105,000 |
| Mahoning | 2009 Curb Project | Install or replace approximately 3 three miles of curb throughout the township. Township has never had a curb replacement program so the proposed outcome is to install curb where none now is in place and replace the most critically damaged existing curb. | Austintown Township | 5 | 91 to 180 days | \$320,000 |
| Mahoning | LeHarpis upgrade | Install enclosed storm sewer system and full depth removal of the existing asphalt pavement and replace with reinforced concrete pavement. Additionally, curb and gutter and underdrains are to be installed. Approximately 1,400 LF. Necessary because the 2006 resurfacing only lasted less than two years because of the heavy commercial truck traffic, most recent average daily traffic count was 1,480. | Austintown Township | 20 | 91 to 180 days | \$640,000 |
| Mahoning | Fire Roof replacement | Replace existing flat 1959 original roof with gable roof on Fire & Ambulance station. New 2nd floor would allow 724 sq/ft by emergency services and thereby provide quicker EMS response time to south end of township. | Austintown Township | 10 | 91 to 180 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|-------------------------------|---------------------------|
| Mahoning | Administration Building and Salt Dome | Build 10,000 sq. ft. administration building and EPA mandated Salt Dome with capacity for 5,000 tons. Present township building was built when the township was a rural township. Existing building does not meet the needs required to house a 38,000 urban township. No offices exist for the 4 elected officials. Some storage of records occurs in garages because of lack of office or proper storage space. Present 5-sided 900-ton salt storage facility does not meet EPA requirements for salt storage. 800-ton capacity is too small for township's needs for 114 miles of roads requiring maintenance to constantly repair required activities of salt during winter season. New salt dome would not only comply with EPA requirements but would make for safer streets during the winter season because would alleviate salt shortages. | Austintown Township | 30 | 181 days or more | \$1,200,000 |
| Mahoning | Enhanced Broadband for Schools and Businesses | Expand nearly 250 miles of private dark fiber optic network for enhanced use by schools and tiny businesses for local economic development. Project funds would be used to expand fiber network, not class center operations, and pay salaries to local fiber contractors to complete the network infrastructure. Regional activities between Mahoning and Columbiana counties. Our project is for storage for salt and for our Road Department. The salt bin is 2014 x 21' x 400' x 4'. The bin consists of a concrete slab with 6 inch high concrete walls and a 12' foot high treated wood frame with roof. The exterior will be vinyl sided to match existing government building. The building previously housed our salt at the Mahoning County Engineer's facility which will be no longer available for 2026. To remain in compliance with EPA rules we are mandated to have a covered salt storage facility. Because of our size and existing bin lease we do not have the funds to provide such a facility. | ACCESS Jackson Township | 5 6 | 0 to 30 days 31 to 90 days | \$1,000,000 \$36,900 |
| Mahoning | Jackson Township-Mahoning County-Salt Retention Bl | The purpose of this project is to provide a safe and secure storage facility for salt. The project will include the construction of a new salt storage facility and the relocation of existing salt storage facilities. The project will also include the construction of a new salt storage facility and the relocation of existing salt storage facilities. | Childs Hospital Medical Center of Akron | 5 | 91 to 180 days | \$200,000 |
| Mahoning | Electronic Communications | The project is to upgrade and expand computer technology in grades preK-12 to enhance learning opportunities and enable all students to have computer skills comparable with other educational institutions and to enable students to graduate with advanced computer technology skills to enter the workforce and tomorrow's job market with other students from nations around the globe. | Poland Local School District | 12 | 31 to 90 days | \$700,000 |
| Mahoning | Technology for Learning | The Mahoning Valley Historical Society recently purchased the Burt Building in downtown Youngstown to create the Mahoning Valley History Center. This four-story structure is on the National Register of Historic Places because of its connection to Youngstown confederate Henry Barr, first first mass-produced, marketed and distributed the famous Hunter oat cream bar on a stick at the location in 1922. The building will undergo a major renovation and adaptive reuse to develop the History Center, which will draw 24,000 visitors down Youngstown on an annual basis. | Mahoning Valley Historical Society | 10 | 31 to 90 days | \$355,000 |
| Mahoning | Mahoning Valley History Center | The project submitted for annual funding consists of the exterior rehabilitation phase of the overall building renovation plan, and includes complete roof and historic skylights replacement, historic north elevation window rehabilitation, south elevation window rehabilitation, replacement, new first floor entryway from the street, terra cotta facade rehabilitation, and masonry painting and cleaning. | Public Library of Youngstown and Mahoning County | 1 | 91 to 180 days | \$22,500 |
| Mahoning | Struthers Library Replacement Windows | This project will result in the installation of 21 energy efficient windows, replacing 21 windows in a 52 year old building. The existing windows are in poor condition and need to be replaced. The project will also include the installation of a new security intrusion detection system for safety in phys ed bldg, new public address system for community center, new public address system for community center and school activities, safety cutting, new parking lot, roof replacement over physical education building, and athletic center. | Poland Local School District | 50 | 31 to 90 days | \$500,000 |
| Mahoning | School & Community Physical Fitness, Wellness & At | Replace 20 year old air conditioning unit in a 52 year old, 6,700 sq ft public library. | Public Library of Youngstown and Mahoning County | 1 | 31 to 90 days | \$5,400 |
| Mahoning | Struthers Library Replacement AC Unit | Replace existing ballasts and bulbs to more energy efficient fixtures in a 52 year old, 6,700 sq ft building. | Public Library of Youngstown and Mahoning Co | 1 | 31 to 90 days | \$2,250 |
| Mahoning | Struthers Library Energy Efficient Lighting | Replace 30 year old HVAC unit that serves a 44 year old, 3,750 sq ft public library. | Public Library of Youngstown and Mahoning Co | 1 | 91 to 180 days | \$15,600 |
| Mahoning | Sebring Library HVAC Replacement | Replace two boilers one of which is 60 years old and the second of which is 30 years old. Both serve an 81 year old, 8900 sq ft public library. | Public Library of Youngstown and Mahoning Co | 2 | 91 to 180 days | \$40,500 |
| Mahoning | West Branch Boiler Replacement | Replace the roof on an 81 year old, 8900 sq ft public library with a new more energy efficient roof system. | Public Library of Youngstown and Mahoning Co | 2 | 91 to 180 days | \$83,000 |
| Mahoning | West Branch Library Roof Replacement | Replace older style bulbs and ballasts with more energy efficient ballasts and bulbs in an 81 year old, 8900 sq ft public library. | Public Library of Youngstown and Mahoning Co | 1 | 31 to 90 days | \$2,700 |
| Mahoning | West Branch Library Energy Efficient Lighting | Replace a 30 year old HVAC system serving a 4,100 sq ft building that is 41 years old. | Public Library of Youngstown and Mahoning Co | 1 | 91 to 180 days | \$22,500 |
| Mahoning | Brownlee Woods Library HVAC Replacement | Replace older style ballasts and bulbs with new high energy efficient ballasts and bulbs in a 41 year old, 1040 sq ft public library. | Public Library of Youngstown and Mahoning Co | 1 | 91 to 180 days | \$2,250 |
| Mahoning | Brownlee Woods Library Energy Efficient Lighting | The Boardman Township Police Department consists of twelve police officers with an estimated population of 42,518. Because of a large amount of retail the service population jumps to over 100,000 daily. Our Department currently has 48 sworn officers. We are down 15 officers due to reduction in retail and the impact of the recession. The Bureau of Justice Statistics shows approximately 75 sworn officers. By adding the additional 15 we can bring back our DARE program, bring our Narcotics Enforcement Unit and US Marshal's Fugitive Task Force unit back up to full staffing and also continue our School Resource Officer Program. In addition we will be able to have a greater presence in the community with more officers on the road to respond to the large volume of calls our department receives. The community that is ranked 15th on the most dangerous cities list. This combined with our decrease in officers leaves our community and citizens an increased risk for victimization. Without additional funding and officers our department and community will suffer due to economic hardship and the increase in crime rates. | Boardman Township Police Department | 15 | 31 to 90 days | \$1,300,000 |
| Mahoning | Filling Police Vacancies | Replace older style lighting fixtures with new energy efficient ballasts and bulbs in a 44 year old, 3750 sq ft public library. | Public Library of Youngstown and Mahoning Co | 1 | 31 to 90 days | \$2,700 |
| Mahoning | Campbell Library Energy Efficiency Lighting | The Mahoning County High School is an alternative educational school and is the result of the cooperative efforts of the Mahoning County Juvenile Court, the City of Youngstown Board of Education, the Mahoning County Educational Services Center and Youngstown State University. The Mahoning County High School will target individual needs of at-risk students or of students likely to drop out of school. Additionally, the Mahoning County High School will serve those students already expelled or being expelled from their home schools. The Mahoning County High School will provide an estimated 100 to 150 students (one hundred twenty (120) educational programs with an 80% success rate) to each student to graduate from high school. | Mahoning County Court of Common Pleas-Juvenile Div | 30 | 0 to 30 days | \$1,500,000 |
| Mahoning | Mahoning County High School | Students will be referred to the school from any school located in Mahoning County. Each student must have a pending charge or must have been convicted of a delinquency violation and must be in probation to the Mahoning County Juvenile Court. Attendance at the school will be a part of the student's terms and conditions of probation. There is the possibility that the student will return to their "home" school or they may attend the Mahoning County Juvenile Court need to retain its current staffing as well as re-hire laid off employees to provide the best programs and services available to youth and families in Mahoning County. | Mahoning County Court of Common Pleas-Juvenile Div | 30 | 0 to 30 days | \$2,000,000 |
| Mahoning | Retain and re-hire staff to capacity | The proposed program will provide support services and training to diverse individuals. These individuals who otherwise would not be successful about this type of program support. The target population for this program would have individual characteristics that consist of borderline intellectual functioning, disabilities, lack of social skills, displaced homemakers, homeless and people who suffer from mental illness. Most existing programs have criteria in many mental health clients don't qualify for. This program, with appropriate support, will help anyone. The outcome of the program would be the diverse individual maintaining a full or part-time employment opportunity. The diverse client will also improve with mental health issues such as depression, anxiety, feelings of worthlessness and shamefulness. A possible side effect would be a decrease in crime in the local community. Overall, the community will become enriched and provided services which will increase the employment and decrease government funding. | Solutions Counseling Center LLC | 8 | 31 to 90 days | \$100,000 |
| Mahoning | Transitions of Diverse Populations into the Workfo | This proposed program will provide training and support to persons suffering from Autism Spectrum Disorders (ASD). Currently, 40 % of our clientele are suffering from an ASD. Insurance companies don't cover Asperger's syndrome and a program to build social skills for this population is greatly underserved. Since maladaptive social interaction is a core symptom of ASD, we want to do it to suppress behavior. Our goal or outcome is to provide education to families and individuals who suffer from ASD. A concrete action that can be taken by therapists and medical doctors is educating people on alternative methods to teaching ASD. From the research, alternative methods have a higher percentage of positive side effects, such as normal appetite and sleep patterns. The local school only has, on average, 75 students per grade level (Solving School District, 2009). Of the 25 elementary students, 90% of them like medication. Side effects from the medication can create such severe side effects that social interactions can be affected (Ehlers, 2007). Alternative treatments can decrease or eliminate severe side effects created by medication. | Solutions Counseling Center LLC | 8 | 31 to 90 days | \$50,000 |
| Mahoning | Autistic Spectrum Disorder Developmental Program | This proposed program will allow for extended services to mentally ill individuals who are currently having difficulty receiving case management. County facilities are non-existent and have extensive waitlists. The community in which the counseling center is located has a 40% unemployment rate. Early to 50% of residents are currently on government funded insurance. Teaching, living, advocating and providing a service coordinator is essential for our community and the communities in the surrounding area. In research conducted by Atlas 2000, case management saves money and encourages functional behaviors. When an organization begins case management and a case manager begins working with a client, 70% of the time the client's identified problems are resolved. Currently, case management services in our area are severely limited. We're funding to provide case management we begin and provide our community's well being and prevent deinstitutionalization of mentally ill clients. | Solutions Counseling Center LLC | 8 | 31 to 90 days | \$150,000 |
| Mahoning | Extended Advocacy for the Mentally Ill | This project is a renovation and expansion of our headquarter's station. With the renovation, we would be upgrading the existing facility with the installation of a backup generator, heat buy and address drainage issues. While we will be adding offices, meeting rooms, regional training base and facilities for fire and police personnel for two counties, a day room and dorm room for future staffing (within 5 years) and a community center support room with a kitchen. This project is created with the potential of reaching thousands of people and create many jobs. This project would not be able to be completed without the available funds. | Damascus Fire Dept, Inc. | 100 | 91 to 180 days | \$2,100,000 |
| Mahoning | Damascus Fire Dept. Station 1 Renovation | Resurfacing and rehabilitation of Ohio Turnpike mainline roadway, Milepost 223.3 to Milepost 230.6 | Ohio Turnpike Commission | 100 | 31 to 90 days | \$6,500,000 |
| Mahoning | Roadway Resurfacing and Rehabilitation | Hiring of 20 COPPS officers to supplement existing force of 181 officers. Funding will allow more officers assigned to patrol streets of Youngstown to combat crime and improve public safety. | Youngstown, OH Police Department | 20 | 91 to 180 days | \$3,487,000 |
| Mahoning | Police Recovery Program | Purchase badly needed from line crates (15) and computers (25) for those vehicles to replace damaged or broken. | Youngstown, OH Police Department | 0 | 31 to 90 days | \$280,000 |
| Mahoning | Youngstown Equipment Recovery Program | Salary of drug court prosecutor for Mahoning County and equipment, such as computers and vehicles for Youngstown Police Department | Youngstown, OH Police Department | 1 | 181 days or more | \$150,000 |
| Mahoning | Youngtown/Mahoning JAG | This project will employ patient advocates to help low-income and uninsured individuals access primary care. The advocates will be stationed in Hospital Emergency Departments that have a high number of patients who inappropriately use the emergency room for primary care, because they have no alternative. As the story varies and most people have their health insurance, when it is not significant insurance, when it is inappropriate use of emergency rooms. Projects that help to reduce this situation will make important contributions to controlling overall health care costs and the use of health care resources. HHRP will be providing patient advocates every year as an access mechanism to reduce resources used to ensure a safe environment for patients. The HHRP will be providing patient advocates every year as an access mechanism to reduce resources used to ensure a safe environment for patients. The HHRP will be providing patient advocates every year as an access mechanism to reduce resources used to ensure a safe environment for patients. | Humility of Mary Health Partners | 4 | 0 to 30 days | \$200,000 |
| Mahoning | Medical Homes for Low-Income and Uninsured | Physicians entering medication orders electronically and allows nurses to electronically scan the patient's arm band and medication to verify the "right" patient, medication, route, dose and time) and produces an electronic audit trail of medication administration that becomes part of the medical record. In 2008 investments were made in hardware to prepare for this project. Over the next few years we will be purchasing additional hardware, software, and implementation. HHRP is requesting \$750,000 in to help pay for the additional hardware, software, and implementation costs for this important project. | Humility of Mary Health Partners | 5 | 31 to 90 days | \$750,000 |
| Mahoning | Electronic Medical Records | When fully implemented, this project will improve patient care quality and safety for thousands of patients each year. | City of Youngstown | 25 | 0 to 30 days | \$501,870 |
| Mahoning | Webb Rd. Emergency Power Generator Project | This project, which is located in Austintown Township, will provide emergency stand by power for the Webb Road Pumping Station. The Webb Road Pumping Station provides water service to the City's largest service area. This is the next priority of projects identified in the 2003 Facility Condition Vulnerability Assessment. Currently, the Webb Road Pumping Facility is supplied electrical power from First Energy. There is no backup supply of electrical power currently available to the facility. The project has been bid and a contract has been awarded to B&J Electric of Poland, OH. | City of Youngstown | 25 | 0 to 30 days | \$501,870 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Mahoning | Mobile Intensive Care Unit | St. Elizabeth Health Center (SEHC) is a large tertiary care center caring for acute trauma, cardiac, stroke, obstetrics, and neonates. To provide safe transport of these patients from the community hospitals in the 4 counties in NE Ohio and 2 counties in NW Pennsylvania, SEHC operates a Mobile Intensive Care Service. These ambulances are specially designed to carry equipment that a patient in an intensive care environment would need. In 2008, 4755 patients were transported by this service. Currently, SEHC operates 4 units, 2 are 1994 models and 2 are 2001 models. The population of the SEHC County is increasing in age and complexity. This increase in high-risk patients will require additional medical and staff pay. There are many cases where veterans are accepted in the VA hospital and cannot afford the transportation cost. | Humility of Mary Health Partners | 4 | 0 to 30 days | \$250,000 |
| Mahoning | Boardman Water Tank Construction | The funds requested will be spent on the purchase of a new Mobile Intensive Care ambulance. Operational costs of \$1,088,000 will be absorbed by St. Elizabeth Health Center. | City of Youngstown | 100 | 31 to 90 days | \$3,500,000 |
| Mahoning | West Ave. Large Valve Replacement Project | The project, which is located in Boardman Township, will provide a new 1,500,000 gallon elevated water storage tank to replace two older existing tanks. Water service from this well serves all Boardman Township customers and is south side of Youngstown customers between Boardman Road and Millikan Blvd. | City of Youngstown | 100 | 91 to 180 days | \$2,550,000 |
| Mahoning | West Avenue Maintenance Facility | This project involves replacing large valves (16 inch or greater) on West Avenue in the City of Youngstown. The City owned valves control the main water supply between the two 42" transmission lines from Maumee Water. These valves are dated between 1920-1950 and do not work making it impossible to control or isolate water flow. | City of Youngstown | 200 | 91 to 180 days | \$4,500,000 |
| Mahoning | WICK DISTRICT-SMOKY HOLLOW DEVELOPMENT | This project involves replacing the 1910's era building which currently houses all of the Youngstown Water Department's equipment. This building also serves as a vehicle maintenance facility. WICK DISTRICT-SMOKY HOLLOW PUBLIC IMPROVEMENTS Vacated Streets: 802 ft. x \$180.11 = \$128,320 New Public Streets: 51' row site preparation, storm sewers, underground utilities, paving, sidewalks, curbing lighting 1978 ft. x \$890.11 = \$1,760,420 New Public Streets site preparation, sewers, limited utilities, paving, curbing and lighting. 2744 ft. x \$387.11 = \$1,061,928 Easing Streets: 6,510 ft. x \$916 ft. = \$5,938,590 TOTAL \$8,889,258 \$3 MILLION COMMITTED | Wick Neighbors, Inc. | 260 | 91 to 180 days | \$5,889,258 |
| Mahoning | North Jackson - Lake Milton Public Library | Construction of a new public library located on 2.07 acres of land donated by the Jackson Milton School District. This new public library in northern Mahoning County will merge two smaller libraries in the area neither of which is of a size necessary to meet the needs of the community. Merging the existing small libraries into one larger facility allows for increased access to technology. An architect has already selected through the qualification based selection process and the project is ready to commence with design development. | Public Library of Youngstown and Mahoning County | 15 | 181 days or more | \$1,630,044 |
| Mahoning | KEEPING PEOPLE SAFE | I AM MY BROTHERS KEEPER PEOPLE WHO LIVE WITH IN A NEIGHBORHOOD PROTECTING CHILDREN, ELDERLY, PROPERTY AND THOSE WHO CAN NOT PROTECT THEMSELVES EACH NEIGHBORHOOD WILL HAVE A SAFE HOME WHERE EVERYBODY WOULD MEET TO ORGANIZE COMMUNITY ACTIVITY PLAN AND ORGANIZE IDEAS TO SOLVE A PROBLEM AND GET A CHANCE TO MEET EACH OTHER EXAMINE PROBLEMS TOGETHER ASK ALL TO GET TO SCHOOL SAFE AND ON TIME CHECK ON ELDERLY DURING WINTER OR ON HOT DAYS CHECK ON ANY STRANGE ACTIVITY AND HELP THOSE WHO MIGHT NEED HELP WITH DAILY TASKS. THREE TIMES A DAY THE NEIGHBORHOOD WILL BE WALKED WHO EVER CHOOSE MY WALK FOR EXERCISE AND LOOK OVER NEIGHBORHOOD | KEEPING PEOPLE SAFE | 10 | 0 to 30 days | \$990,990 |
| Mahoning | new building | Most fire alarm by my own building because it would not have a high internet rate or require a lot of money in this area want as a down payment which is 25 to 35 percent. Also it would employ between 4 and 6 employees | American Wire And Shapes LLC. | 5 | 31 to 90 days | \$75,000 |
| Mahoning | Solar Panel Rack System | A typical commercial solar panel installation consists of a number of individual solar panels converting sunlight into electricity. These solar panels are mounted to a rack system with each individual rack carrying a number of solar panels. The rack is affixed to the ground in one of many possible ways depending on local ground conditions and anticipated wind loads. Among the many variables associated with a commercial solar panel installation are: the solar panels themselves, the rack they are mounted to, the number of panels attached to each rack, the panels angle of inclination relative to the earth's surface, the wind load the installation is designed to survive and the ground mount method. Northern States Metals' project scope includes the design, engineering, patent application, prototyping, testing, certification, marketing and production of a solar panel rack system with a number of features unique to the market for commercial, ground mounted solar panel installers. Specifically, our rack system will accommodate multiple numbers of solar panels from 15 panels per rack to 24 panels per rack. The system allows for multiple angles of inclination, various ground | Northern States Metals | 65 | 0 to 30 days | \$500,000 |
| Mahoning | College Park Detention | Approximately 200 by 80 detention basin that would both empty the upstream residential subdivision storm sewer system and further would retain storm water from the downstream residential subdivision to prevent flooding in both subdivisions. | Austintown Township | 8 | 91 to 180 days | \$160,000 |
| Mahoning | Boardman Fire Station 71 | The main fire station was built in 1926. The basement has water running through it all year long and has mold remediation performed. We can no longer use the basement. The kitchen and restrooms are antiquated and in deteriorated condition. Our auxiliary vehicle garage roof leaks onto the vehicles that are parked within. We cannot afford to make our building ADA compliant and we do not have the funds for a new building. If funds were made available for a new station, we could build a new station that is safe for the fire fighters. A new building would be free of mold and mildew which is a health hazard to all who work in this building. Each division who works in this new building would have improved work space which would improve efficiency. Vehicles could be parked in a weather tight location. This project would provide jobs for the duration of the project for the local trades people. | Boardman Fire Department | 75 | 91 to 180 days | \$3,500,000 |
| Mahoning | US 422 Sanitary Sewer Extension | Project would extend sanitary sewers and waterlines along the stretch of US 422 to service existing failed onsite treatment systems and provide for the creation of business along the routing, zoned light industry. The waterline would provide the needed protection for existing and proposed new development. | Mahoning County | 200 | 91 to 180 days | \$1,872,000 |
| Mahoning | Boardman Ambulance Project | Boardman Fire Department responds to our community's emergency medical needs with firefighters at the First Responder level and do not transport patients to local hospitals. Stimulus funds would enable us to purchase two fully equipped ambulances. Implementation of an ambulance service would improve our level of services to our community. Most importantly, the funds generated would save the jobs of one of our firefighters. We also believe that the revenues collected would enable us to add an additional four firefighters to our department. | Boardman Fire Department | 6 | 31 to 90 days | \$400,000 |
| Mahoning | Boardman Fire Station 71 | The main fire station was built in 1926. The basement has water running through it all year long and has had mold remediation performed. We can no longer use this basement. The kitchen and restrooms are antiquated and in deteriorated condition. Our auxiliary vehicle garage roof leaks onto the vehicles that are parked within. | Mahoning | Student Security | Building Security Add 60 additional security camera systems in 6 of 7 school buildings. Buildings are 50-100 years old. Need to change 300 classroom door locks for lockdown procedures. Add 20 phones or intercom systems in classroom in 5 of 7 buildings so teacher can contact office in an emergency. | Boardman Local Schools | 20 | 31 to 90 days | \$780,000 |
| Mahoning | Body Shop | To build new body shop on business site along with frame machine and front end alignment machine. | West Gate Ford Truck Sales, Inc. | 12 | 0 to 30 days | \$1,800,000,000 |
| Mahoning | building improvement | Upgrade heating and windows along with new roof and air improvement Due to effects of Title IX and the expansion of athletic teams an additional gymnasium is needed. Also, additional locker rooms, office, and storage are needed. | West Gate Ford Truck Sales, Inc. | 8 | 0 to 30 days | \$250,000 |
| Mahoning | School Building construction | Boardman was 50% in line to receive money from the state. We would receive only 14% from ODFC and community could not support 86% of money needed. ODFC recommended building 5 new schools in early 2000. We have the oldest buildings in Mahoning County. We are currently using our permanent improvement money to add classrooms to 2 buildings over 50 years old. One building is over 100 years old. We do not come close to complying with ADA requirements. We tried to pass bond issue for 3.5 mills to renovate all schools two years ago. It failed. Due to lost revenue to charter schools, open enrollment and smart's law where we are required to spend thousands of dollars to pay to last air quality, inspect and repair outdated classrooms, equipment, lockers, bleachers, etc. we find that we cannot afford to provide the community with quality facilities that most other districts have. | Boardman Local Schools | 250 | 181 days or more | \$80,000,000 |
| Mahoning | Tuffster | Over the last 5 years GRC Inc. has developed a proprietary stamping die manufacturing system. When it becomes fully operational it will produce three dimensional stamped parts at a fraction of the cost of currently used production techniques. This will allow GRC Inc. to hire a staff of approximately 20 immediately following the infrastructure completion. These jobs will be full time and good paying. Furthermore, this technology can be licensed to other US companies engaged in metal forming such as alternative energy equipment, automotive and defense contractors. The infrastructure needed is: Approx 1400 feet of road, truck turn around, loading dock and erection of a 3200 sq. ft. building. The parts for which are already here. 3 phase power will have to be brought in or generated to power a die-casting line and blanking press. A multi axis CNC outer welder, grinders and presses will have to be acquired and installed, also the abrading material handling equipment. Should the state decide to back this project it will benefit us all. | GRC Inc. | 20 | 0 to 30 days | \$5,000,000 |
| Mahoning | Disaster Preparedness | Recent public safety risk assessments have identified Mahoning County as very vulnerable for exposure to hazardous materials. Currently, health's hospitals do not have sufficient patient decontamination equipment to safely and efficiently treat patients and protect hospital staff that be called upon to complete patient decontamination treatment. This project includes 90 protective suits at \$1500 each for employee protection (\$80,000), and one portable patient decontamination tent at a cost of \$40,000. | Humility of Mary Health Partners | 2 | 0 to 30 days | \$100,000 |
| Mahoning | Energy Savings to save taxpayers dollars | Installation of new energy efficient heating and cooling equipment on the rooftop of the high school. This includes new automated controls. The present equipment is 1970's old inefficient and very costly to maintain and operate. The failure of the equipment last week even closed the school, causing disruption to the community and no school for 800 pupils that day. The savings in taxpayers' dollars according to the energy audit can be documented at \$14,000 per year resulting in a payback for taxpayers' dollars in less energy costs in 12 years. Thus, the investment of \$1,750,000 would be return in 12 years in lower energy costs. | Poland Local School District | 50 | 0 to 30 days | \$1,750,000 |
| Mahoning | Upgrade Communications Center | The Boardman Township Dispatch Center is an E911 Public Service Answering Point, answering calls for emergencies and dispatching safety services as well as emergency medical services. The Dispatch Center is the second largest based on call volume in Mahoning County and cost in excess of \$600,000 per year to operate. By upgrading our existing system to digital it allows us to be in compliance with mandatory federal FCC regulations. The digital system will also allow for the expansion of the Dispatch Center. The Digital Base Infrastructure that will be installed will allow the department to add additional channels thus allowing for potential contracts with other agencies to provide dispatch services for each of these departments. To provide this additional service it would allow for the installation and use of the next generation 3.000 MHz dispatch center averaged over 17,000 calls for service per month. The Dispatch Center answers calls for the Boardman Police, Fire and Road Departments. The current analog radio system is extremely costly to repair and the police mobile and car radios have been discontinued by their manufacturer. Once they run out of parts the radios will no longer be able to be repaired. The digital radio system will provide better com-mu- | Boardman Township Police Department | 6 | 31 to 90 days | \$1,077,157 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Mahoning | Police Cruisers | The Boardman Police Department serves over 100,000 people on a daily basis while covering only 25 square miles. Due to a decrease in revenue the Police Cruisers used for regular patrol shifts are aging and require constant maintenance. Each cruiser is used for two eight hour shifts each day which causes high mileage for each of the cars. By purchasing an additional 10 Police Cruisers on state contract it would not only save money for the township it would also support our automobile industry. The purchase of the cruisers would cut down the amount of money that goes into the upkeep and maintenance of the other cruisers. Police Cruisers are considered an extremely important piece of equipment utilized by police officers. Having adequate and safe equipment is an important factor in keeping the community, citizens and officers safe while also supporting our economy. | Boardman Township Police Department | 1 | 31 to 90 days | \$250,000 |
| Mahoning | Expanding Nursing Education in a Medically Underse | HRNP will collaborate with Henry Columbus of Northwest Ohio health education students to become HRNPs trained to renovate the first floor of the former St. Elizabeth Health Center's Cardiac Health Building into additional classroom and clinical lab space, doubling the capacity of the Associates of Science Degree Program in Nursing at St. Elizabeth Hospital in Youngstown. Currently, classes are overcrowded, hundreds are on waiting lists, and the hospital is unable to meet the needs of the community. The project will create new jobs during the construction stage and enable the organization to employ 3 additional faculty members upon completion. Also, this project will train individuals for jobs in nursing, a field where the current demand exceeds the number of qualified applicants. | Humility of Mary Health Partners | 5 | 31 to 90 days | \$800,000 |
| Mahoning | Main Street Storm Sewer Improvements | The current roadsides of Main Street lacks adequate drainage facilities and therefore a current service capacity cannot be determined. Roadside ditches have been filled and roadway drainage flows into adjacent yards. Existing storm sewers are of various small sizes and existing catch basins are poorly situated and capture very little drainage. Proposed drainage facilities will be designed to a 10 year storm re-occurrence interval. Project includes installation of storm sewers and catch basins along the west side of Main Street to service 13 residences in the project area. Storm sewers will range in size from 12" to 24". Project will be placed on the west side of Main Street with connections to the east side of Main Street to service an additional 10 residences and the West Branch School Complex. Project will eliminate potential flooding problems for 13 residences, provide adequate service to an additional 10 residences and the West Branch School Complex. Project will also provide adequate drainage of the roadway surface and improve driving conditions on Main Street during rain events. | Village of Beloit | 0 | 31 to 90 days | \$177,675 |
| Mahoning | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, covering a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds. Establishing wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to packages with a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will allow for commercial expansion that will create countless jobs statewide. We will offer military personnel and their families' education and coping skills in transitioning from living apart to living together as a whole family unit once again. During war times roles of family members are often changed. Affected service members do not have the usual mental health services in most cases, and they frequently report stigma and significant structural barriers to mental health services. Primary care may help address these issues, and evidence supports the effectiveness of a systems-level collaborative care approach (Engel, 2008). Brief standardized primary care diagnostic assessment for those who screen positive and use of a nurse care manager (Engel, 2008). Brief standardized primary care depression and PTSD treatment need. Case manager will assist in educating, advocating and provide resources to military families. Outcomes will be the military family learning to live normally again as a family unit, understanding new roles of family members and the soldier adapting to the workforce again. Our grant will subsidize the insurance we currently accept to ensure that no family in our community will be turned away. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Mahoning | Transitioning Military Families into Normal Family | The Mahoning County Sheriff's Office budget is being cut \$3,000,000 dollars this year and they are calling for 100-150 job cuts. If major concessions are not made, Sheriff's deputies will have less than three years only make \$25,000 dollars a year and make up about 1500 deputies out of 200. If we take these concessions our salaries figure to be in the 18,000 dollar range. Many have bought homes in the area and started families but cannot live on this amount. This will result in many homes being foreclosed. If we do not take these concessions they will lay off up to 150 deputies. Please help us through these tough times. Thank you for your time. Might can be used to supplement therapy for autistic people. Therapists working with individual autistic children work their objectives and goals for therapy into children's interactions with animals. For example, animals may be incorporated into sensory integration activities featuring tactile, vestibular and proprioceptive stimulation. Working with animals during therapy has been found to be calming and motivating for autistic individuals. Animals also hold autistic children's attention more readily well. The proposed program will assist with costs of training the animals and educating families and children in the proper care of these animals. One in 81 children suffers from an Autism Spectrum Disorder (Autism, 2007). By federal law (Americans with Disabilities Act - ADA), the service dog is allowed access to any environment your disabled child is allowed access, i.e., school, park, doctor's office, etc. (ADA, 2009). The proposed program will place dogs with families who have a member who suffers from autism. An outcome will be that the case manager working with the autistic individual will teach the autistic person responsibilities through the care of the animal obtained. | Solutions Counseling Center LLC | 8 | 31 to 90 days | \$150,000 |

| Mahoning | Administration Building | New Administration building would include a combination meeting room / community center to accommodate Township meetings, local community organization meeting, public events, and private event rentals. It would also include offices for administration, zoning and police departments. The building would be constructed to minimum LEED certification. This would replace two (2) existing aging structures that are not handicap accessible, not energy efficient, and is experiencing chronic drainage problems affecting the foundations of the structures. This facility would also give the Township a much needed community center in which it has never had. | Coltsville Township | 30 | 91 to 180 days | \$950,000 |
| Mahoning | Memorial Park Rehabilitation | Park Project would include pavilion improvements, utility upgrades, landscaping, buffer zone construction, parking facility improvements and construction of recreational amenities. This is the Township's only Park and was founded on lands by the Coltsville Historic Society as a means of preserving the history of our Township, which was the boyhood home of William Holmes McGuffey. | Coltsville Township | 20 | 91 to 180 days | \$75,000 |
| Mahoning | Expand Business | Buy property and erect a building to expand trucking business. Add truck and/or trailer in expansion of business. This would be adding employees to our payroll. | K & A Trucking | 5 | 0 to 30 days | \$200,000 |
| Mahoning | options for TTHM's and HAA's reduction | To provide us with 3 options at our water plant to reduce the TTHM's and HAA's in our finished water. To satisfy the epa director's final findings. | village of sebring | 4 | 31 to 90 days | \$25,000 |
| Mahoning | water plant modifications to reduce TTHM's and HAA | To add another treatment process to our plant to remove TTHM's and HAA's. To comply with epa director's orders To bring information technology to the health care market in Mahoning, Trumbull and Columbiana counties. Specific target: Medical Practices in those counties to deliver Electronic Medical Records, Practice Management, Document management, electronic prescribing, eligibility checks, electronic remittance advice, and revenue cycle management tools like in house prescriptions, e statements, collectors tools and credit card processing. | village of sebring | 4 | 181 days or more | \$500,000 |
| Mahoning | Healthcare IT in Youngstown | I do this currently for a company out of Rhode Island, and work with medical practices around the country, from coast to coast. All practices that I work with go to Rhode Island for support, training, and software. Only a small % of BS earned makes back the Ohio. Northeast Ohio desperately needs help in this area, especially in the rural areas. We can help meet President Obama's initiative to get Electronic Medical Records to every medical practice in the country by 2014. I have expertise in these areas, and am ready to open my own business to help achieve this. In order to do this, I need funding. I will have to pay many upfront costs - hardware, licensing, office and staff expenses, certifications etc. Please give me this chance. To add a second backwash pump to meet epa director's findings that have been asked for since around 2000. We will need engineering drawings and all the equipment. Goodwill will provide vocational rehabilitation services to people who are disabled or have other barriers to employment. Vocational evaluation, work adjustment and placement are all components that lead to employment. Goodwill also employs over 250 people. Some funding could be used to expand our retail and personal operations that employ people from our programs. We are reviewing the possibility of additional stores and an on-line retail program as a way of expansion. Local funding for such programs has been cancelled in the last few months. Last year our programs served over 600 people. | Canfield Data Strategies | 3 | 0 to 30 days | \$125,000 |

| Mahoning | Boardman Community Recreation and Senior Center | The Building will be divided into 4 quadrants, a community center, field house, natatorium, and senior center. The project includes the purchase of 20 acres of land where the building and parking lots will be constructed. The building will incorporate as much "green technology" as possible. There will be five structure implemented to support the building and it is anticipated that the project will create over 40 new jobs. This facility includes one high school sized basketball court that could also be used as two middle school size courts, community meeting room with small kitchen facilities, exercise and fitness activity room, swimming pool, indoor track, locker rooms, natatorium, senior center and office space. Also on the property there will be a skate park, two sand volleyball courts and walking trail. This is a "ready-to-go" project and could be bid early in 10/2009. | Boardman Township | 40 | 181 days or more | \$26,000,000 |
| Mahoning | Curbing Project | Installation of replace approximately 25,000 LF of curb and gutter throughout the township damaged over the years by the weather, snow and ice street salt application and from contact with snow plows. | Austintown Township | 10 | 31 to 90 days | \$320,000 |
| Mahoning | N. Broad Street Improvements - General Plan | This project is to land the North Broad Street Improvement General Plan. This project is to include a cost analysis to relocate existing utilities, extend existing culverts, purchase right of way, construct a two-way left turn lane and improve other geometric issues along North Broad Street between the Village Green north to the City limits. | City of Canfield | 10 | 0 to 30 days | \$40,000 |
| Mahoning | Boardman Lake Detention Basin Project- Phase I | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Ewing/Brookfield Avenue area and eliminate sanitary sewer backups and flooding of streets and homes. A total of 47 homes have been documented to have sanitary sewer backups. The design of this project is complete and this project is shovel-ready. This project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25-100 people will be working on township culverts and catch basins for 3-6 months from the spring to late summer of 2009. | Boardman Township | 25 | 31 to 90 days | \$45,000 |
| Mahoning | beard rd culvert replacement | Replace 1050' of the culvert on beard rd. This pipe has been in place for around 60 years and shows extreme rot on bottom of pipe where the pipe has rusted away possible culvert in not out of the question. This pipe is traveled by many heavy trucks because of the type of farms on this roads Project cost is high for township to fund plans have been drawn up by a certified engineer. Any help would be greatly appreciated. | springfield township | 5 | 91 to 180 days | \$200,000 |
| Mahoning | Boardman Lake Detention Basin Project - Phase II | This Project will continue to improve the storm water management for the Township. This detention basin improvements will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Ewing Street / Brookfield Avenue and homes in the Oakley and Aylesboro area and eliminate sanitary sewer backups and flooding of streets and homes. A total of 47 homes have been documented to have sanitary sewer backups. The design of this project is complete and this project is shovel-ready. This project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25 - 100 people will be working on Township culverts and catch basins for 3 - 6 months from the spring to late summer of 2009. | Boardman Township | 25 | 31 to 90 days | \$1,000,000 |
| Mahoning | North Broad St / Callahan Geometric Modifications | This project will include the reconstruction of the intersection of North Broad Street and Callahan Drive in the City of Canfield. The project will consist of the removal and lowering of a vertical curve to allow for better sight distance and improve the safety of the roadway for the traveling public. The average daily traffic for this roadway at this intersection is 11,180 vehicles per day. | City of Canfield | 15 | 0 to 30 days | \$500,000 |
| Mahoning | Boardman Park Detention Basin Project | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Yellow Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Quail Hollow area and eliminate sanitary sewer backups and flooding of streets and homes. The design of this project is complete and this project is shovel-ready. This project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25-100 people will be working on Township culverts and catch basins for 3-6 months from the spring to late summer of 2009. | Boardman Township | 25 | 31 to 90 days | \$600,000 |
| Mahoning | Austintown Community Center | 36,000 SF Community Center to host community events, such as educational, cultural, athletic, entertainment, and social events. Senior Citizens and Youth needs and preferences will be emphasized to give a priority on use of the center. Existing facilities to be provided to services activities that are not provided by the Public or private sector. | Austintown Township | 50 | 181 days or more | \$1,600,000 |
| Mahoning | Township-Wide Culvert/Catch Basin Rehabilitation P | This Project will rehabilitate the Township culverts and catch basins. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. Culverts and catch basins along storm water lines flow from homes and businesses. The project will immediately impact the Township. This project is shovel-ready and will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25-100 people will be working on township culverts and catch basins for 3-6 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$500,000 |
| Mahoning | Filling Police Vacancies-Revised | The Boardman Township Police Department consists of twenty-five square miles with an estimated population of 42,518. Because of a large amount of retail the service population jumps to over 100,000 daily. Our department currently has 48 sworn officers. We are down 15 officers due to reduction in revenue and through attrition. Our department according to the Bureau of Justice Statistics should have approximately 79 sworn officers. By adding the additional 15 officers we can bring back our DARE program, bring our Narcotics Enforcement Unit and U.S. Marshall's unit up to full staffing and also allow our School Resource Officer program. In addition we will be able to have a greater connection with the community with more officers on the road to respond to the large volume of calls our department receives. Our community boarders Youngstown such as around 15th on the west side of the city limits. This area has seen a decrease in officers based on budget cuts and citizens are at an increased risk for victimization. Without additional funding and officers our department and community will suffer due to economic hardship and the increase in crime rates. | Boardman Township Police Department | 15 | 31 to 90 days | \$3,900,000 |
| Mahoning | Township-Wide Curb Replacement Project | This Project impacts all township curbs that have over time been wore down. The curb will help direct storm water runoff away from homes and businesses within the township. An engineering is needed for this project. The Project is "ready to go" and will be contracted out to the private sector to help stimulate the economy. Depending on the nature of damaged curbs and the contracts that are awarded, 25 -100 people will be working on Township curbs for 3 - 6 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$500,000 |
| Mahoning | North Broad Street Safety Upgrade Project | This project includes the construction of a two way left turn lane on North Broad Street between the Village Green and the north city limits. The roadway will be expanded from four lanes to three lanes. The project length is approximately 5,100 feet. The project also includes the relocation of existing utilities, the timely acquisition of right of way, the extension of 2 major culverts, removal and replacement of sidewalk, decorative lighting, installation of curbside and new storm sewer and roadway signs, and the geometric improvement of each of the 10 local streets that intersect with North Broad Street throughout its length. | City of Canfield | 50 | 31 to 90 days | \$6,500,000 |
| Mahoning | Preparing for Healthcare Jobs through Apprenticesh | The need for patient caregivers in healthcare continues to grow. Many healthcare jobs lend themselves to an apprenticeship training model. Furthermore, the apprenticeship employment enabling low-income individuals to gain and train at the same time. Humility of Mary Health Partners is currently working on a "Jobs to Careers" project in partnership with Jobs for the Future, Robert Wood Johnson Foundation, and the Ohio State Apprenticeship Council and is Youngstown Technical Representative to develop apprenticeship training programs for entry level patient care positions. These positions provide great apprenticeship training opportunities. Furthermore, there are jobs where the need for employees continues to outpace the current supply of trained candidates ensuring that jobs will be available for apprentices. This funding will enable HRMFP to expand our healthcare apprenticeship training programs. The project will create jobs for a faculty and provide job training to hundreds of candidates. | Humility of Mary Health Partners | 4 | 0 to 30 days | \$300,000 |
| Mahoning | East and West Parkside Drive Storm Water Management | This Project will help improve the storm water management for the Township. This stream restoration project will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This Project will help improve the watershed and keep homes and businesses safe from storm water runoff damage. The project will immediately eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this project is complete and this project is basically "shovel-ready". This project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25-100 people will be working on township culverts and catch basins for 3-6 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$350,000 |
| Mahoning | Goshen Police Advanced Officer Training & Educatio | Advanced training for officers to better serve the public and specific jurisdiction demographics. Due to budget constraints there are currently no parole courses financially available for officers to advance in training to serve the needs of our residents. Courses would include: Defensive Tactics, How to Instruct Female Self-Protection Clinic, Weapon Retention/Shot Avoidance, Combat Marksmanship, Bulleproof Mind, Dealing with Suicidal, Death Notification, Evident Weapon Detention, Conducting Background Investigations, Writing Reports, Active Response to Active Shooter Incidents, Survival Spanish, Barriers, Restraint, Suicide Survivors, Investigating Unprovoked Equipment & Abuse Cases, Vehicle Incidents, Pursuit Termination, etc. Officers will be better trained to deal with the public and help the public in everyday situations. Changing may need updated training and without financial assistance our officers may fall through the cracks. | Goshen Police District | 0 | 0 to 30 days | \$23,450 |
| Mahoning | Glen-Bridge Improvement Project | This Project is to make repairs to the bridge structure and decking on Glenwood Avenue that spans a roadway into Mill Creek Park. This project also includes the construction of approximately 3,000 feet of sidewalk to enhance the area and encourage walkers on the bridge and into Mill Creek Park. This Project is a multidisciplinary project with the Mahoning County Engineers. Engineering design for this project is complete and is "ready to go" and will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25 people will be working on this project for 3 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$60,000 |
| Mahoning | Jaronte Detention Basin Project | This Project is a continued effort by Boardman Township to correct storm water issues that have impacted the Township for over 40 years. This project will correct street flooding and sanitary backups in the homes in the Jaronte Avenue area. The watershed that includes this area is a highly residential area and the project will maintain the safety and integrity of one of the Township's premier areas. This Project will stimulate the local economy by putting money into construction companies and create approximately 25 jobs. This project is shovel-ready and can be seen by all tax-payers of the Township. This Project benefits the public and private sector and provides safer roadways for the traveling public. This Project is "ready-to-go" and will be able to commence immediately in the spring of 2009. | Boardman Township | 25 | 91 to 180 days | \$350,000 |
| Mahoning | Lynn Avenue Storm Water Management Project | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Yellow Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Lynn Avenue area, the City of Youngstown, and the City of Struthers and eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this project is complete and would take minimal effort to make this project complete for bidding. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25 people could be employed 6 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$100,000 |
| Mahoning | Mathews Road Detention Basin Project | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Yellow Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Mathews Road area, the City of Youngstown, and the City of Struthers and eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this project is complete and would minimal effort to make this project complete for bidding. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 10 people could be employed for 3 months from the spring to summer of 2009. | Boardman Township | 10 | 91 to 180 days | \$250,000 |
| Mahoning | Replace 12 School Buses | Replace 12 School Buses that are in need of body work repairs and have odometer readings that exceed 200,000 and 300,000 miles. The age of the vehicles range from 11 to 18 years old. The School Buses will be replaced with new diesel powered units. | Mahoning County Board of MRDD | 5 | 181 days or more | \$1,400,000 |
| Mahoning | Midwood Drive Detention Basin and Storm Sewer Proj | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The project will immediately impact the Midwood Avenue area and eliminate sanitary sewer backups and flooding of streets and homes. The design of this project is complete and this project is shovel-ready. This project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 10 people will be working on township culverts and catch basins for 3 months from the spring to late summer of 2009. | Boardman Township | 10 | 31 to 90 days | \$300,000 |
| Mahoning | Replace 12 School Buses | Replace 12 School Buses that are in need of body work repairs and have odometer readings that exceed 200,000 and 300,000 miles. The age of the vehicles range from 11 to 18 years old. The School Buses will be replaced with new diesel powered units. | Mahoning County Board of MRDD | 5 | 181 days or more | \$1,400,000 |
| Mahoning | Replace 12 School Buses | Replace 12 School Buses that are in need of body work repairs and have odometer readings that exceed 200,000 and 300,000 miles. The age of the vehicles range from 11 to 18 years old. The School Buses will be replaced with new diesel powered units. | Mahoning County Board of MRDD | 5 | 181 days or more | \$1,400,000 |
| Mahoning | Replace 12 School Buses | Replace 12 School Buses that are in need of body work repairs and have odometer readings that exceed 200,000 and 300,000 miles. The age of the vehicles range from 11 to 18 years old. The School Buses will be replaced with new diesel powered units. | Mahoning County Board of MRDD | 5 | 181 days or more | \$1,400,000 |
| Mahoning | North Trail - Community Multi-Purpose Recreational | This Project will include the reconstruction of the intersection of North Broad Street and Callahan Drive in the City of Canfield. The project will consist of the removal and lowering of a vertical curve to allow for better sight distance and improve the safety of the roadway for the traveling public. The average daily traffic for this roadway at this intersection is 11,180 vehicles per day. | Boardman Township | 10 | 31 to 90 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Mahoning | Township - Wide Resurfacing Program | This Project impacts over 285.139 linear feet or 54 miles of improvement. Over 252 roads will be improved with this project in the Township. The engineering needed for this project is "ready to go" and will be completed as to the price and time to help stimulate the economy. Depending on the size of the Streets and whether one or multiple contracts are awarded 25-100 people will be working on township roads for 3-6 months from the spring to late summer of 2009. | Boardman Township | 25 | 31 to 90 days | \$2,000,000 |
| Mahoning | Replace 12 School Buses | Replace 12 School Buses that are in need of body work repairs and have odometer readings that exceed 200,000 and 300,000 miles. The age of the vehicles range from 11 to 16 years old. The School Buses will be replaced with diesel powered units. | Mahoning County Board of MRDD | 5 | 181 days or more | \$1,400,000 |
| Mahoning | South Shore Drive Storm Water Management Project | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The Project will immediately impact the South Shore Drive area and eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this Project is complete and would take minimal effort to make this project complete for bidding. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 25 people could be employed for 3 months from the spring to late summer of 2009. | Boardman Township | 25 | 91 to 180 days | \$750,000 |
| Mahoning | City-wide Curb and Sidewalk Replacement Project | This project includes the removal and replacement of broken or damaged curb, gutter, driveway approaches and sidewalk throughout the City. This project will create a more safer roadway and walkways for the traveling and walking public within the City limits. The City would concentrate on areas that connect to existing recreation facilities including schools, City Parks (2), the Village Green, and the Mill Creek Metro Park Bike Trail. | City of Canfield | 25 | 0 to 30 days | \$1,320,000 |
| Mahoning | Squirrel Hill Detention Basin Project | This project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The Project will immediately impact the Squirrel Hill area and eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this Project is complete and would take minimal effort to make this project complete for bidding. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 10 people could be employed 3 months from the spring to late summer of 2009. | Boardman Township | 10 | 91 to 180 days | \$850,000 |
| Mahoning | City-wide Traffic Signal Upgrade Project | This project would consist of the removal and replacement of the existing traffic signals within the City at various intersections and replace them with energy efficient LED signals, including all pedestrian heads. The traffic signal heads are located on roadways included in the Federal Aid System. This will also include the necessary wiring changes and electrical hookups to convert to the LED system. | City of Canfield | 10 | 0 to 30 days | \$1,230,000 |
| Mahoning | Tara Drive / Alverne Drive Detention Basin Project | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Yellow Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The Project will immediately impact the Tara Drive and Alverne Drive area and eliminate sanitary sewer backups and flooding of streets and homes. A total of 21 homes have been documented to have sanitary sewer backups. The design of this project is complete and this project is shovel ready. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 15 people will be working on this project for 3 months from the spring to late summer of 2009. | Boardman Township | 15 | 31 to 90 days | \$500,000 |
| Mahoning | Transportation Infrastructure, Intelligent Transpo | Initiation is to address research, technical assistance, and workforce education and development focusing on increasing mobility, sustainably and long-term across the diverse, multi-disciplinary nature of transportation. As well as utilizing the expertise of faculty and staff at the University are also partnering with area transportation and related industries. For instance, the projects was to currently funding are: "Ohio's Environmental Composite for Light Rail Vehicle Braking System", "Electromagnetic Compatibility (EMC) Assessment of Automated Guided Vehicle Transportation System for Vehicle Transportation System", "On Reducing Burden on Pavement-Brake Interference", "Transportation System Workforce Development and Outreach Services" and "Technological Characteristics of Light Rail Engineering for Project Development". However, additional funding to address issues raised by the above projects (and other projects on the waiting list) is needed. This is also true to ensure technology and workforce development. | Center for Transportation and Materials Engineering | 950 | 181 days or more | \$2,000,000 |
| Mahoning | Washington Blvd / Market Street Detention Basin Pr | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The Project will immediately impact the Washington Street area and eliminate sanitary sewer backups and flooding of streets and homes. Preliminary design of this project is complete and would take minimal effort to make this project complete for bidding. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 10 people could be employed 3 months from the spring to late summer of 2009. | Boardman Township | 10 | 91 to 180 days | \$350,000 |
| Mahoning | Westview Drive Detention Basin and Storm Sewer Pro | This Project will help improve the storm water management for the Township. This detention basin will control excess storm water run-off in the Mill Creek Watershed. In 2003 the Township's storm water collection system failed in various locations during a 100-year storm. This detention basin will help improve the watershed and keep homes and businesses safe from storm water damage. The Project will immediately impact the Westview Drive area and eliminate sanitary sewer backups and flooding of streets and homes. A total of 8 homes have been documented to have sanitary sewer backups. The design of this project is complete and this project is shovel ready. This Project will be contracted out to the private sector to help stimulate the economy. Depending on how the contract is awarded 10 people will be working on this project for 3 months from the spring to late summer of 2009. | Boardman Township | 10 | 31 to 90 days | \$400,000 |
| Mahoning | City-wide Waterline Repair and Replacement Project | This project is to repair and replace abandoned waterlines within the City limits that have a history of leaks and / or have reached their useful life. The City will concentrate on areas where leaks and breaks occur most often. This project should help the City provide quality water to its residents, meet the required fire demand for the system, and reduce the amount of untreated water lost throughout the system. | City of Canfield | 12 | 0 to 30 days | \$600,000 |
| Mahoning | WWTTP Standby Power Generator and Methane Gas Conve | This Project is to provide two 500 KW generators and methane conversion equipment at the City's WWTTP that would run on the methane generated in the process of sludge digestion. The goal for the methane to be converted into electricity to operate the entire WWTTP. This would completely eliminate the need to purchase electricity from First Energy and the WWTTP would be self sufficient. This project would be the first of its kind in the Mahoning Valley. | City of Struthers | 10 | 91 to 180 days | \$2,000,000 |
| Mahoning | Low Level Bridge Lighting Project | The funds will be used to install lighting on the proposed MRDD Low Level Connector Bridge in the City of Struthers. The bridge will be constructed in FY2010. The lighting planned for this project is to install LED lights that would save energy. | City of Struthers | 10 | 91 to 180 days | \$100,000 |
| Mahoning | Bob Cene Way Extension Project | This project includes the design and construction of roadway improvements to Bob Cene Way within the Mahoning River Corridor of Opportunity. This Project will improve an existing aggregate roadway and convert it to a two-lane, paved roadway that would connect to the proposed Lower Bridge Connector across the Mahoning River into the City of Canfield. The roadway is approximately 1,500 feet in length and 28 feet wide. | City of Struthers | 10 | 31 to 90 days | \$66,000 |
| Mahoning | Water Storage Tank Painting Project | This project is to reconstruct the exterior and interior of the two water storage tanks in the City of Canfield. The project includes sand blasting the exterior and repainting both the interior and exterior of each tank with a millable paint. The project will also include the repair and repainting as needed the interior of each of the above tanks. | City of Canfield | 10 | 0 to 30 days | \$850,000 |
| Mahoning | Arrel-Smith Road Upgrade Project | This Project will be a cooperative effort between the City of Struthers, Village of Lowellville, and Poland Township to improve the existing roadway surface to support truck traffic. The Project will provide an industrial roadway from Struthers Road in Poland Township north approximately 4,000 feet to Lowellville Road in the City of Struthers to provide access for trucks to the CASTLO development and industrial property in the Village of Lowellville. | City of Struthers | 10 | 91 to 180 days | \$4,000,000 |
| Mahoning | Salt Barn Rehab and Cold Storage Building | This project will help to rehab the roof of our 20 year old Salt Barn allowing us to keep it in compliance with EPA regulations under the Phase II requirements. Building a new cold storage building will give us the ability to house our seasonal equipment next to our existing garage and the convenience of not having to find alternate storage sites, along with the possibility of offering space to store sized vehicles by the Boardman Police Department freeing up needed room in their employee parking lot. | Boardman Township | 10 | 91 to 180 days | \$250,000 |
| Mahoning | Bob Cene Way/MRCC Utility Extension Project | This Project is for the extension of the City's sanitary sewer system into the MRCC from the Bridge Street Retention Basin west on property intended for industrial development. This project will provide a needed utility to the property along Bob Cene Way. | City of Struthers | 10 | 91 to 180 days | \$500,000 |
| Mahoning | Water Storage Tank Controls Renovation Project | This project is designed to relocate antiquated controls on both of the City's water storage tanks including the atrialic valves, pumps, and automatic water level controls and alarm systems. The City would install state of the art systems and controls to provide a better water system for all users of the system. | City of Canfield | 10 | 0 to 30 days | \$220,000 |
| Mahoning | Storm Sewer Camera Truck | This project will give us the ability to visually check all one million linear feet of existing storm lines within the Township in our continuing effort to maintain the under ground infrastructure. To help us find where trouble and problems may exist and prevent the same from happening to storm lines that are in good working order. | Boardman Township | 2 | 31 to 90 days | \$200,000 |
| Mahoning | Railroad Grade Crossing Upgrade Maple Ave Boardman | Reconstruct and upgrade a railroad grade crossing. Maple Ave has increased vehicular traffic and busy intersection with another road as it crosses the railroad tracks. Maple Ave will be widened to include a turn lane to reduce traffic backing up onto the railroad tracks. New automatic flashers and gates will be installed on the railroad to improve safety of motorists. | Youngstown & Southeastern Railroad | 6 | 31 to 90 days | \$900,000 |
| Mahoning | City-wide Water Meter Replacement Project | This project is to remove and replace all water meters for each user of the City's water system, approximately 3,200 users. This project will improve the operation and efficiency of the City's water department and provide a way to account for all released water. | City of Canfield | 8 | 0 to 30 days | \$1,000,000 |
| Mahoning | Palmyra Road Waterline Extension Project | This project will include the installation of approximately 6,000 feet of 12-inch waterline on Palmyra Road to service approximately 25 existing residents and provide a water source to approximately 275 acres of City owned property for future economic development. | City of Canfield | 12 | 0 to 30 days | \$800,000 |
| Mahoning | Southeast Interceptor Sewer Renovation Project | This project will include the renovation of approximately 5,000 feet of 27 inch main sanitary interceptor sewer in the City of Canfield. The project will consist of the installation of cured in place polyethylene pipe as a liner in the interceptor sewer. This will eliminate infiltration and inflow problems as required by the Ohio EPA and reduce the amount of flow into the Mahoning County system for final wastewater treatment. | City of Canfield | 15 | 0 to 30 days | \$400,000 |
| Mahoning | Palmyra Road Sanitary Sewer Extension Project | This project will include the installation of approximately 6,000 feet of 12-inch sanitary sewer on Palmyra Road to service approximately 25 existing residents and provide a sanitary utility to approximately 275 acres of City owned property for future economic development. | City of Canfield | 15 | 0 to 30 days | \$1,300,000 |
| Mahoning | Northeast Storm Water Management Phases II and III | The City is requesting the Local Share of funding for this project. The City received two grants totaling approximately \$700,000.00 from the Ohio Public Works Commission to assist in the completion of this project. The project consists of the replacement of an existing storm water collection system to meet design storm requirements. The project design is complete and construction can begin immediately. Approximately 900 feet of 42 inch storm sewer will be replaced with 3 feet by 13 feet aluminum culvert. | City of Canfield | 15 | 0 to 30 days | \$310,000 |
| Mahoning | Northeast Storm Water Management Phase IV | The City is requesting the Local Share of funding for this project. The City received a grant totaling approximately \$350,000.00 from the Ohio Public Works Commission to assist in the completion of this project. The project consists of the replacement of an existing storm water collection system to meet design storm requirements. The project design is complete and is bid ready. Approximately 400 feet of 42 inch culvert will be replaced with 3 feet by 13 feet aluminum culvert. | City of Canfield | 15 | 0 to 30 days | \$150,000 |
| Mahoning | Railroad Grade Crossing Realignment, Maple Ave., B | Railroad crossing to be realigned for safety at Maple Ave., AAR DOT # 873462B. Crossing tracks in the top 10 most hazardous crossings in the state. | Ohio Rail Development Commission | 40 | 91 to 180 days | \$3,000,000 |
| Mahoning | Northeast Storm Water Management Phase V | This project includes the replacement of approximately 400 feet of 42 inch storm water collection system with a 3 feet by 13 feet aluminum culvert. The project design is complete and bid ready. | City of Canfield | 12 | 0 to 30 days | \$500,000 |
| Mahoning | Capitalized Maintenance | Capital Maintenance Costs to add about 30 jobs and retain about 75 existing jobs. | Western Reserve Transit Authority | 30 | 31 to 90 days | \$1,636,512 |
| Mahoning | Purchase up to 12 Light Transit Vehicles | Purchase up to 12 Light Transit Vehicles to expand service county wide. | Western Reserve Transit Authority | 15 | 91 to 180 days | \$900,000 |
| Mahoning | Purchase up to 5 Modified Mini Vans | Purchase up to 5 Modified Mini Vans to expand service county wide. | Western Reserve Transit Authority | 10 | 91 to 180 days | \$178,000 |
| Mahoning | Railroad Grade Crossing and Signals Western Reserv | Replace the deteriorated railroad grade crossing on Western Reserve Road in Boardman. The crossing sees heavy vehicle traffic and is at a road intersection. The flashers and gates are to be moved to improve turning radius for truck traffic. The flashers and gates have repeatedly been struck by turning trucks. This will improve motorist safety with a new surface and safer automatic warning system. | Youngstown & Southeastern Railroad | 6 | 31 to 90 days | \$85,000 |
| Mahoning | Youngstown YWCA Building Exterior Restoration | The YWCA of Youngstown is seeking funds through the economic stimulus to assist in the historic preservation of the exterior of the nearly 100 year old building. The YWCA of Youngstown, constructed in 1911, has never had the exterior fabric of the building brought back to its historical condition. The building was affected over the last 25 years of a non-historic window replacement in 1984, stone cornice removed, deteriorating masonry corials and deteriorating masonry parapets. All work will be performed within the Secretary of Interior's "Secretary of Rehabilitation". Other funds have been secured for the interior of the building, but the YWCA lacks funding for the exterior which is the historical face to the community. Expected Outcomes include an new restored roof, new energy efficient windows and an upgraded appearance of the masonry and brick. | YWCA of Youngstown | 33 | 0 to 30 days | \$1,070,000 |
| Mahoning | Railroad Grade Crossing Avondale Ave | Replace and extend the deteriorated railroad grade crossing at Avondale Ave. in Youngstown. The existing grade crossing is too short to permit trucks to turn into local businesses, forcing the trucks to drive onto the railroad tracks to turn. The project will reconstruct and extend the crossing with new timbers and extend the crossing length by another 20 feet to permit trucks to turn safely. The result will be improved safety for motorists. | Youngstown & Southeastern Railroad | 6 | 31 to 90 days | \$67,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Mahoning | Andrews Avenue Sewer Separation | Separate the storm sewers on Andrews, and provide a storm sewer for the redevelopment for the area named Wick Oval. This is to eliminate flooding on the street which affects the businesses on the street. | CITY OF YOUNGSTOWN WWTP | 200 | 91 to 180 days | \$414,000 |
| Mahoning | Meadowbrook Avenue Detention Basin | Detention Basin to prevent sewage backup on the discharge of raw sewage to a creek in times of heavy rains at the Meadowbrook Avenue Pump Station. Engineering for this project will be paid separately. | WWTP | 20 | 91 to 180 days | \$4,500,000 |
| Mahoning | Incinerator Repair @ WWTP | Repair Incinerators @ WWTP to allow for the continued disposal of sludge. Engineering will be paid separately. | City Of Youngstown WWTP | 20 | 0 to 30 days | \$100,000 |
| Mahoning | Floating Sludge Cover Replacement | Replace existing floating covers on sludge tanks @WWTP. Engineering will be paid separately. | City Of Youngstown WWTP | 80 | 31 to 90 days | \$600,000 |
| Mahoning | Loe Level dam Removal on Mahoning river in struth | Removal of dam will restore natural habitat of river and allow for recreational use canoeing, fishing and restore water quality of river. Numerous studies of dam removal are available and a current Army Corps project is underway, but because of lack of local funding is stalled. | City of Struthers | 15 | 0 to 30 days | \$318,000 |
| Mahoning | WATTS and Wick Park University/Community Recreatio | WATTS facility will house indoor recreational community, and high school athletic and recreational facility. Wick Park facility will include two football/soccer playing fields on an historic park site. The two sites constitute two elements of an interrelated project that will accommodate both university and regional community needs. | Youngstown State University | 60 | 91 to 180 days | \$10,000,000 |
| Mahoning | Cleveland-Youngstown-Pittsburg Passenger Rail | Revision and restoration of major passenger rail service linking Cleveland, Ravenna, Youngstown, and Pittsburg. Outcomes are to reduce travel expenses by residents, businesses, and visitors by more than 10%, when compared to existing travel choices. Additionally, the rail service will link up complementary assets in the emerging tech sector, to promote the expansion of high technology manufacturing, health care, biotechnology, and higher education. | City of Youngstown | 720 | 181 days or more | \$30,000,000 |
| Mahoning | Mahoning Renewable Energy | Conversion of 2,200 tons of municipal solid waste per day to approx. 62 megawatts of electricity using an advanced stoker technology, which has been approved advanced energy under the state's energy bill. Located at the Central Waste Landfill in Alliance, Ohio the plant (approx 50000 sq ft) will be disposed of the landfill. The 60 jobs will pay an avg. of \$50,000 per year with as many as 200 jobs during the construction phase. The state of Ohio has issued our permit and will issue the solid waste permit by the end of the current year. | Mahoning Renewable Energy | 60 | 31 to 90 days | \$250,000,000 |
| Mahoning | Ballistic Protection Replacement Program - MCVRT | Increasing community awareness of critical incidents occurring in our nation's educational systems and changing social and economic conditions have increased occurrences of violent crimes and drug trafficking in and around our community and key areas involving Homeland Security have combined to demonstrate the need for an increased level of training and response by our team. In an effort to replace out-dated personal ballistic protection, the Mahoning Valley Crisis Response Team needs to purchase heavy-duty ballistic vests, twelve ballistic helmets, and ballistic eye and face plates. This equipment will be issued to members of the tactical team and will remain in the officer's possession while they are members of the team. All equipment that will be collected meets current N.J. Standards for Level IIIA protection. | Mahoning Valley Crisis Response Team | 25 | 31 to 90 days | \$45,000 |
| Mahoning | Sebring Mansion Economic Development Project Expan | The mission of Sebring Mansion LLC is to address and promote economic development opportunities and education in the Sebring, Ohio / Tri-County area through historic restoration and preservation projects. | Sebring Mansion LLC | 85 | 91 to 180 days | \$650,000 |
| Mahoning | Bob Cene Way / Ohio Central Rail Crossing Construc | The Sebring Mansion Economic Development Project identified six properties, valued at approximately \$1,041 million, that meet the mission of the project and that could serve as components of the project design to supplement the economic revitalization and community impact that the project brings to Sebring, Ohio and the surrounding area. To date, the project has acquired five of the six properties at a cost of \$44,000 and incorporated them into the project design. | City of Struthers | 12 | 0 to 30 days | \$200,000 |
| Mahoning | MRCO Low Level Bridge Contingency Funding | This request would support acquisition of additional three adjacent properties (including 2.702 acres of property and three houses) which are being brought to the project to scale. The acquired land will be used to house additional commercial, support services, and administrative offices for the project - which will be a self-sustaining environmentally friendly economic revitalization mechanism in Sebring, OH. | City of Struthers | 25 | 181 days or more | \$200,000 |
| Mahoning | Fifth Street Culvert Replacement Project | This project is to construct a new rail crossing at the intersection of the Ohio Central active line across Red Core Valley Road. This project will be an upgrade to the existing crossing to modernize the signalization of the crossing. | City of Struthers | 10 | 0 to 30 days | \$150,000 |
| Mahoning | Haz Mat / Interstate 80 | This project will be an upgrade to the existing crossing to modernize the signalization of the crossing. | Austintown Fire Department | 5 | 0 to 30 days | \$125,000 |
| Mahoning | Passenger Shelters | We have one of the busiest interchanges in the County in Austintown Ohio. It is where interstates 89 and 76 come together. We are constantly dealing with hazardous materials and spills on the road. We are hoping to replace our existing ventilation booths. We are experiencing failures on these booths in a monthly basis. Funding this project will greatly decrease firefighter and civilian injuries and deaths. | Western Reserve Transit Authority | 20 | 181 days or more | \$145,000 |
| Mahoning | Establish up to 6 Park and Ride Lots | Construct and erect Passenger shelters along transit routes. Shelters will include the installation of summer pads. | Western Reserve Transit Authority | 20 | 181 days or more | \$500,000 |
| Mahoning | Expand Storage Building | Construct up to 4 Park and Ride lots including lighting and shelters in select areas throughout Mahoning County. | Western Reserve Transit Authority | 35 | 181 days or more | \$1,100,000 |
| Mahoning | Traffic Signal Upgrade - Federal Aid Streets | Expand existing Storage facility to accommodate additional transit vehicles being added to the fleet. | City of Struthers | 10 | 0 to 30 days | \$500,000 |
| Mahoning | Retention of Nursing Students at the Youngstown Ca | This project would consist of the removal and replacement of the existing traffic signals within the City at various intersections and replace them with energy efficient LED signals, including all pedestrian heads. The traffic signal heads are located on roadways included on the Federal Aid System. This will also include the necessary wiring changes and electrical hookups to convert to the LED system. | Mercy College of Northwest Ohio | 3 | 0 to 30 days | \$784,358 |
| Mahoning | Mahoning County Railroad Crossing Upgrade | The Mercy College Nursing Division at the Youngstown campus has noticed a pattern of high attrition especially between Year 1 and Year 2 of students. Mercy College is seeking funding to provide a comprehensive array of student support services that can enhance academic ability and support nursing students from disadvantaged backgrounds all the way through to graduation and NCLEET passage. With the support of stimulus funding, it is anticipated that over the next two years 150 first-year nursing students will graduate and NCLEET passage. The loss of students is being experienced in the greater Mahoning Valley. This area has a critical shortage of registered nurses. Historically well over 50% of graduates at the Youngstown campus of Mercy College are employed in the Youngstown and Mahoning Valley area upon graduation. This program will also create jobs. | Ohio Central Railroad | 50 | 31 to 90 days | \$478,000 |
| Mahoning | Minimum Firefighter Staffing Levels | This project is for railroad crossing upgrade on the Youngstown and Austintown Rail Road. This project will allow for the rehabilitation of crossing surfaces and 11 existing bridge upgrade. This will increase the public safety of these crossings and the safe passage of trains. These crossings are in the Youngstown area. | Austintown Fire Department | 6 | 31 to 90 days | \$1,200,000 |
| Mahoning | Firefighter Health and Safety 5 Year Plan | To Hire 6 full time firefighters to increase staffing levels to an acceptable level to help insure firefighter safety. These firefighters would allow us to keep minimum numbers of firefighters on scene to respond to calls with the greatest safety for the fire by the National Fire Protection Agency. | Austintown Fire Department | 48 | 31 to 90 days | \$2,600,000 |
| Mahoning | Wetlands Restoration Project | Reconstruction of an existing fire station. Our current fire station has experienced ceiling and roof collapse, underground water leaks, toxic mold, and asbestos concerns in the living quarters. This station not only houses our firefighters but also our local ambulance district. Our Township does not have the financial resources to temporarily repair this station let alone the ability to replace it. I will further explain the dire condition of this station in a formal request. | Austintown Township - Parks Department | 4 | 0 to 30 days | \$38,000 |
| Mahoning | Minority Business Transfer Programs | This project will encompass the restoration and enlargement of a 2 acre pond with a 200 linear foot shallow wetlands located in the community park of Austintown Township Park. The restoration of this wetland in partnership with the Ohio Department of Natural Resources Div. of Wildlife will provide a greatly improved aquatic habitat for the large variety of wildlife that inhabit Township Park. The shallow wetlands and pond will provide for the increased health of wildlife populations while offering additional habitat needs to re-establish declining species populations. CDMR Div. of Wildlife is working with the park in a master plan for habitat restoration for a variety of state threatened grassland and aquatic species. This habitat restoration project would greatly benefit this collaborative effort. In addition to wildlife benefits, the restoration of the pond would provide the opportunity for new recreational activities such as catch and release fishing, wildlife observation and photography. | Treemen Industries | 25 | 0 to 30 days | \$60,000 |
| Mahoning | Lowellville Village South Curb and Walk Replacemen | Our largest customer recently transferred business to us due to our minority business status. In order to fund this program we must purchase inventory, packaging, loading and pay all the freight costs associated with this project. Facilitating these new programs will enable us to continue employment of 25 people. | Village of Lowellville | 10 | 0 to 30 days | \$230,000 |
| Mahoning | West McGaffney Street Extension Project | This project includes the removal and replacement of broken or damaged curb, gutter, driveway approaches, and sidewalk on the southside of the Village. This project will create a safer roadway and walkways for the traveling and walking public within the Village limits. The Village would concentrate on areas that connect to existing recreation facilities including the school campus, baseball fields and Village Parks. | Village of Lowellville | 10 | 0 to 30 days | \$1,161,000 |
| Mahoning | Third Street Slope Repair Project | This project will consist of a road extension from the west end of McGaffney Street approximately 1,400 feet. The roadway will be 2 lanes, 28 ft. wide with curb and gutter, storm sewer and sanitary sewer. The roadway will be constructed as part of an effort by the Village to enhance an Industrial Park in the area. The roadway will also have a rail crossing and connect to River Road. The Village has had several inquiries from businesses interested in development of this roadway. Preliminary engineering for the project is complete. | Village of Lowellville | 10 | 0 to 30 days | \$100,000 |
| Mahoning | Resurfacing Program - Federal Aid Roadways | This Project will construct a barrier wall on the Third Street 50' to keep the existing slope from sliding onto the road surface creating a hazard to the traveling public. The wall will be 4 feet in height and 100 feet in length, 12 inches thick, poured in place concrete. | City of Struthers | 10 | 0 to 30 days | \$1,500,000 |
| Mahoning | Curb & Gutter project | This project consists of the milling and paving of State Street in the City of Struthers that is on the Federal Aid System. The project will include paving of 2 inches of existing asphalt surface and the installation of 2 inches of asphalt concrete surface course. The project will also include the adjustment of manholes and water valve boxes along with pavement striping. | Austintown Township | 10 | 31 to 90 days | \$700,000 |
| Mahoning | Lowellville Village Curb Replacement Project | 3 linear miles of new curb and gutter. | Village of Lowellville | 10 | 0 to 30 days | \$1,000,000 |
| Mahoning | Resurfacing Project | This Project would consist of the removal and replacement of curbing and driveway approaches on all streets in the Village as required. This will improve all aspects of storm water collection in areas that experience street flooding. | Austintown Township | 15 | 31 to 90 days | \$1,000,000 |
| Mahoning | East Middletown Rd. Safety Upgrade | Resurface 12 Linear miles of township roads with the average width of roadway of 24 feet. Expected outcome is to remove all potholes or sections of roads from critical status. | Village Of New Middletown | 10 | 91 to 180 days | \$160,000 |
| Mahoning | LeHarpis Upgrade | Middletown Rd. is the main East-West road way in the village. Almost all east-west emergency runs for the Village and Township Station #1 use this road way, the road would be milled and resurfaced with 2" of asphalt, consisting of two foot lanes, pavement marking, and go from the East Cooperation line to the West Line 475'. 1.01 miles. The required curbside file of the existing asphalt has been exceeded. | Austintown Township | 10 | 91 to 180 days | \$720,000 |
| Mahoning | Sycamore Dr | 1400 LF of reinforced concrete pavement plus enclosed storm sewer to replace asphalt pavement and open ditch. | Village Of New Middletown | 10 | 91 to 180 days | \$80,000 |
| Mahoning | Patient Navigator Program | Sycamore Dr. is the main street going from the township (which has two housing projects being developed and a new nursing home being constructed) to the village plaza. The surface has surpassed its usability and would be milled 2" and new asphalt put down. Other needs in the area include: 1. The village has exceeded its capacity for parking in the village plaza. 2. The village needs to improve its appearance, prevention and cleaning services, etc. The programs have documented success with reducing barriers to care for underserved populations and increasing the quality of care provided. This program will employ two Patient Navigators who will be stationed at H&MHP various outpatient care centers. The patient navigators will work under the oversight of the Social Services Department. This project will help reduce overall healthcare costs by assisting patients with accessing healthcare at the primary care level when possible, and providing transportation use of emergency room services. H&MHP currently employs a Patient Navigator in the Breast Care Center. This program has had significant success with improving access for low income and minority women and helping all women regulate breast cancer treatment. Federal stimulus funding will assist with expansion of this model in other cancer areas. | Humility of Mary Health Partners | 2 | 0 to 30 days | \$110,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Mahoning | Water and wastewater tap-in assistance | Funding would provide financial assistance for the connection to public water and sanitary sewer service for low and moderate households throughout Mahoning County. The average connection cost is approximately \$6,500. This program would also assist in the abandonment of failed on-lot septic systems. | Mahoning County | 25 | 0 to 30 days | \$250,000 |
| Mahoning | Purchase up to 5 Modified Mini Vans | Purchase up to 4 Modified Mini Vans to expand service county wide | Western Reserve Transit Authority | 10 | 91 to 180 days | \$180,000 |
| Mahoning | Renovation/Modernization/Expansion of Adm Bldg | Renovate/Modernize 5700 square feet of existing administration building and expand area by 1550 square feet to accommodate the addition of approximately 25 employees in the transit operations moves county wide | Western Reserve Transit Authority | 35 | 91 to 180 days | \$2,200,000 |
| Mahoning | Norfolk Southern Grade Crossing Improvements on PI | This project is for improvements to grade crossings on Norfolk Southern's Central Division in southern Ohio. This request is made in order to improve the safety of the crossing for the public and extend the life of 27 new full depth concrete grade crossing surfaces at varying lengths. I am not exactly sure about narrowing down the county or zip code as the project will be spread out. Thank you. | Norfolk Southern Corporation | 20 | 91 to 180 days | \$1,512,800 |
| Mahoning | Sewage Lines | Tap into closest sewer line and run 750 linear feet of new sewer line to our Little League Baseball fields. Build a bathroom facility at the baseball field. | Poland Community Baseball Association | 10 | 0 to 30 days | \$30,000 |
| Mahoning | Solutions Wellness Center | We are asking for funding to obtain a building and exercise equipment. The exercise facility will be an addition to my existing mental health practice. The clients will be guided by a licensed trainer and counselor to assist them in the proper exercise that will decrease depressive and anxious symptoms. Regular exercise can be an effective way to treat some forms of depression. Physical activity alters brain chemistry and leads to feelings of well-being. Exercise can also be an effective treatment for anxiety. Some research studies indicate that regular exercise may be as effective as other treatments like medication to relieve mild to moderate depression. Depressed people who exercise about four to six times a week who aren't depressed. Depression and exercise influence each other. One research study compared the effects of exercise and drug therapy in treating depression in older people. The 156 depressed men and women were divided into three groups. Over 16 weeks selected results yielded that 68.8% of participants in the combination group were no longer classified as clinically depressed after treatment. 60.4% exercise only participants had a decrease in depressive symptoms. | Solutions Counseling Center LLC | 8 | 91 to 180 days | \$150,000 |
| Mahoning | Vision Casting for Children at Risk | This is a Summer Youth Recreation program for Children in foster care, and children at risk in our community. We will provide activities that will strengthen their minds, their bodies, and their self esteem, through camping, canoeing, rock climbing, exploring nature, sociology, and craft making. Our focus is on team building, learning to work well with others for a common good. Our goal are to develop higher self esteem through the process of earning horses, and merit badges for successful completing group and individual challenges. We will need to employ people from the community to provide camp, supervision, transportation, and to help us focus and our goals. | Allegheny West Conf. of Seventh-Day Adventist | 15 | 31 to 90 days | \$55,000 |
| Mahoning | Comprehensive Breast Care Center | Screening many do not have access to the most advanced technology and use experience screening facilities to one stop in an anatomy to cancer. Sometimes the only choice is to seek treatment in Pittsburgh or Cleveland. This makes screening more complicated and costly for the patient. Federal stimulus funding will support equipment for a Comprehensive Breast Care Center (CBCCC). The CBCCC will be located at St. Elizabeth Hospital in Youngstown. It will provide the latest diagnostic and treatment options through a multidisciplinary team approach. The facility will have digital mammography available and the mammograms will be read immediately. It is likely that women will receive a diagnosis same day. It could be more strongly stated...the facility will save lives. Federal stimulus funding is requested for two digital mammography units (\$800,000). This project will create and retain healthcare jobs in a medically underserved area where the January '09 unemployment rate was the highest of any city in Ohio (14.4%). | HMHDP Development Foundation | 12 | 91 to 180 days | \$800,000 |
| Mahoning | Victim-Witness Program Durable Goods Request | Office furnishings and training for Victim-Witness Program that is primarily primarily through the Victims of Crime Act. | Mahoning County Prosecutor's Office | 0 | 31 to 90 days | \$15,024 |
| Mahoning | Woodland Avenue Sewer Separation Phase II | We will separate the sewers on Woodland Avenue by installing a new storm line, and catch basins to alleviate flooding, and as well the road will have full depth replacement along with new sidewalks and curbs. | City Of Youngstown WWTP | 20 | 91 to 180 days | \$1,000,000 |
| Mahoning | Woodland Avenue Sewer Separation | Separate the sewers and install new catch basins on a section of Woodland | City Of Youngstown WWTP | 20 | 91 to 180 days | \$230,244 |
| Mahoning | Generation Turbine | We would like to install 10 windmills that would generate a portion of the electricity that we need for our seven school buildings. The cost of each windmill is \$300,000. There would be an approximate savings of \$20,000 per year for each windmill with a total savings of \$200,000 in our utility bills. We are currently drilling gas wells on our property which will save the school district (tax payers) about \$20,000 per well each year. | Boardman Local Schools | 30 | 91 to 180 days | \$3,000,000 |
| Mahoning | Marshall Street Sewer Separation Project | Separate the combination sewers on a couple of streets, to decrease the amount of a combined sewer overflow, and eliminate street flooding by installing a storm line in the Mahoning River. | City Of Youngstown WWTP | 20 | 31 to 90 days | \$689,300 |
| Mahoning | Energy Savings Plan | In order to save money on our utilities our mechanical systems in our buildings need to be renovated/replace. We have already had Roth Brothers do a study and have been able to do a portion of the work, but have now resources to complete the project. Examples of items would be but not limited to: install high efficiency hot water heating systems, high efficiency windows, new air ventilators, high efficiency lighting, toilets, low thermostats, retrofit HVAC units, setback controls, etc. Much of this work would have to be done in all seven of our school buildings. | Boardman Local Schools | 50 | 181 days or more | \$4,817,991 |
| Mahoning | City Of Youngstown WWTP Reroof Project | Replace roofs on various buildings at the WWTP. Engineering will be paid separately. | City Of Youngstown WWTP | 100 | 31 to 90 days | \$1,750,000 |
| Mahoning | Kirkmere Area Sewer Rehabilitation | Replace several sections about 2000 feet of sanitary sewer and associated manholes that are falling in the Kirkmere Area to prevent failure and damage to roadways and homes. Engineering work is complete, and will be paid separately. | City Of Youngstown WWTP | 20 | 31 to 90 days | \$1,000,000 |
| Mahoning | S.Raccoon Sidewalk Phase I | 3,140 linear feet of sidewalk | Austintown Township | 10 | 91 to 180 days | \$125,000 |
| Mahoning | Austintown Public Safety Interoperable Radio System | We have a 20+ year old 800 MHz trunking radio system that is beyond its useful life (average is 10-12 years) & can no longer be repaired. Our desire is to replace this system with a fully digital 800 MHz trunking that would make us interoperable with the State of Ohio's 800 MHz trunking system as well as having a radio system that is capable of allowing other agencies to join. The expected outcome of this is to allow any agency (police, fire, EMA, etc.) that would be part of this system to have communications interoperability with all other agencies on the system. This would also accomplish, for all agencies on the system, a communications interoperability with State level agencies for routine as well as emergency situations. Other benefits of a digital 800 system include transmission security, data exchange, compliance with FCC regulations, compliance with open standards, and greater efficiency than better use of taxpayer's money. | Austintown Township Police District | 12 | 31 to 90 days | \$2,000,000 |
| Mahoning | M&C Newton Falls Waste Water Trtment Plant Improve | M&C proposes to upgrade its waste water treatment plant by installation of a new equalization tank, a modified clarifier, dosing tank, sludge holding tank and new sand filters. The project has been approved by the Ohio EPA and is ready to begin construction. Upon completion of the upgrading project, the plant will be in compliance with current EPA regulations. Monthly operating reports show that samples exceeded 30 day and 1 day concentration limits for CBOD5, TSS and NH3 were exceeded. The installation of an equalization tank to dampen flow through the treatment plant during precipitation events will prevent the tanks from becoming hydraulically overloaded, and also prevent the discharge of sludge to the sand filters. M&C proposes to make the necessary upgrades and modifications to comply with the recommendations of the OhioEPA so that the plant will operate within permit concentration limits for its effluent. | M&C Mobile Village and Sales, Inc. | 2 | 0 to 30 days | \$45,000 |
| Mahoning | 211 center 24 hour crisis/suicide line/inform | A 211 center. The 247 hotline is a safe net for the community to connect needed services to people in need. Many times people are not aware of what services are available to agency. | Help Hotline Crisis Center, Inc. | 25 | 0 to 30 days | \$50,000 |
| Mahoning | Emergency Service Training Facility | Hardwick University, Inc. is an Emergency service training facility that will employ 17 persons during the completion of the first year of operation and adding an additional 87 employees the second year (phase 2) and the remaining during the final phase (31 employees) full-time positions as well as 20-30 part-time positions. | Hardwork University Inc. | 49 | 181 days or more | \$2,000,000 |
| Mahoning | Operating Room | Akron Children's Hospital Marjorie Valley opened a 32 bed hospital in Boardman on the Beatty Cannon. Missing the need for pediatric medical services formerly provided by Tod Children's Hospital. The new full service hospital includes a 24-hour Emergency Department, 32 private rooms with space for parents to stay overnight, diagnostic testing and outpatient services. The facility is also equipped with a rooftop helicopter landing pad to transport young patients requiring intensive care. Lacking an an Operating Room. Surgical services are planned for the Boardman facility. Currently, surgical needs are referred to the Akron campus. Operating room space is available, but lacks the necessary equipment to provide surgery (table, lighting, anesthesia equipment, etc.) at a cost of \$7,448,000 to acquire and install. Once installed, a staff of 105 would be hired in Boardman, plus 6 support staff between Boardman and Akron. A projected outcome of 2,425 inpatient surgeries and 11,075 outpatient surgeries are expected in 2009 upon opening the Operating Room. | Akron Children's Hospital | 34 | 0 to 30 days | \$3,724,000 |
| Mahoning | Village Wide Culvert and Catch Basin Rehabilitation | This Project is to construct a system to effectively transport storm water design flows and eliminate flooding in various areas in the Village of Jewettville. | Village of Lowellville | 10 | 31 to 90 days | \$300,000 |
| Mahoning | Village of Lowellville City Hall Roof Repair | This Project is for the City Hall Roof Project to repair leakage problems that are occurring. | Village of Lowellville | 10 | 31 to 90 days | \$100,000 |
| Mahoning | Sanitary Sewer Extension Project | This Project is to construct 800 feet of 8 inch sanitary to unsewered areas in the Village's west end along SR 289. | Village of Lowellville | 10 | 31 to 90 days | \$1,000,000 |
| Mahoning | The Village of Lowellville Sanitary Sewer Rehabili | This Project is to repair deficient sanitary sewers at various locations in the Village of Lowellville. | Village of Lowellville | 10 | 31 to 90 days | \$500,000 |
| Mahoning | WWTP Flooding Abatement Project | This Project is for the elimination of WWTP flooding during heavy rain events by the Mahoning River. | Village of Lowellville | 10 | 31 to 90 days | \$750,000 |
| Mahoning | City of Struthers Road Waste Recycle Center Projec | This Project is to construct a new Road Waste Recycle Center including a street sweeper for the City of Struthers. | City of Struthers | 10 | 31 to 90 days | \$2,000,000 |
| Mahoning | Spring Street Culvert Project | This Project will replace failing retaining walls for the Spring Street Culvert in the City of Struthers. | City of Struthers | 10 | 31 to 90 days | \$275,000 |
| Mahoning | Walton Street Sanitary Sewer Extension Project | This Project will construct 2,000' of 8 inch wastewater in the City of Struthers including all appurtenances. | City of Struthers | 10 | 31 to 90 days | \$200,000 |
| Mahoning | State Street Sanitary Lift Station Improvement Pro | This Project will construct a new Sanitary Lift Station for the City of Struthers. The current lift station is inadequate. | City of Struthers | 10 | 31 to 90 days | \$500,000 |
| Mahoning | City of Struthers Fire Station Construction Projec | This Project will construct a new Fire Station including a Storage Room in the City of Struthers. The current station is beyond useful life. | City of Struthers | 10 | 31 to 90 days | \$5,000,000 |
| Mahoning | State Street / Walton Avenue Waterline Extension P | This project will construct 5000 feet of 8 inch waterline including all appurtenances in the City of Struthers. | City of Struthers | 10 | 31 to 90 days | \$500,000 |
| Mahoning | WWTP Grit Collector and Septage Receiving Station | This Project is to replace the grit collector and septage receiving station at the WWTP in the City of Struthers. | City of Struthers | 10 | 31 to 90 days | \$1,312,000 |
| Mahoning | WWTP Primary Clarifier Replacement Project | This Project is to replace the Primary Clarifier at the WWTP. | City of Struthers | 10 | 31 to 90 days | \$370,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|-----------------|--------------------|---------------------------|
| Mahoning | WWTP Bar Screen Replacement Project | This Project is replace the Bar Screen at the WWTP in the City of Struthers. | City of Struthers | 10 | 31 to 90 days | \$213,500 |
| Mahoning | City of Campbell Water Treatment Plant Renovations | The existing water treatment plant has several areas that require structural evaluation and renovation. The structure appears to be sound and the plant is in general compliance with current Ohio Environmental Protection Agency Regulations. However, several areas appear to have structural issues that will need to be addressed as part of a renovation project. This project will extend the useful life of the plant and allow the City to continue to serve its citizens as a water provider as well as generate income to fund the water distribution system located within the municipality. | City of Campbell | 20 | 31 to 90 days | \$900,000 |
| Mahoning | City Hall Renovations & Repairs | The existing City of Campbell Administration Building requires upgrades to the windows, doors and mechanical system to help reduce the energy consumption to heat and cool the structure. The existing building windows and doors do not appear to be energy efficient and could be upgraded to improve the efficiency of the structure. The project will evaluate the most efficient method of upgrading the existing building's performance and mechanical systems and provide the appropriate improvements designed to reduce the cost to operate the structure. This will benefit the City through the reduction in facility expenditures thus making more funds available for other City programs. | City of Campbell | 20 | 31 to 90 days | \$600,000 |
| Mahoning | Catch Basin Improvement & Replacement Project | The project involves the evaluation, clearing and reconstruction of various catch basins throughout the City of Campbell. The program will evaluate any cross connectors to gray water or sanitary sewer flows and remove illicit connectors as necessary. In addition, the structures will be cleaned and evaluated for structural integrity and compliance with applicable regulatory and industry standards. Based on the structure to be determined by the City will then reconstruct or replace the basin with an appropriate structure. The intent is to improve safety for the public and remove pollutants from the storm sewer discharge points where possible. | City of Campbell | 10 | 31 to 90 days | \$500,000 |
| Mahoning | Traffic Signal Upgrade Project | The project involves the removal and upgrading of the eight signals within the City of Campbell. These signals are not on a federal aid route nor do they fall under the jurisdiction of any other agency. The signals are beyond their design life and need to be replaced. The new signals will be brought into compliance with current Ohio Department of Transportation, Federal Highway and ADA requirements and will have an anticipated useful life of 20 years. In addition the new signals will be constructed using LED technology in addition to other currently available energy efficient components to reduce the operating cost and impact to the environment while operating more efficiently. | City of Campbell | 10 | 31 to 90 days | \$400,000 |
| Mahoning | Youngstown Metropolitan Housing Authority Demoliti | Through the demolition of the existing structures it is anticipated that the surrounding neighborhoods will benefit from the removal of vacant, dilapidated housing units that are beyond their useful life and represent a hazard. These units have not been rented with any particular frequency and have subsequently become deteriorated. There are 150 units with approximately 100 vacancies. The complex has become a location where criminal activity and vagrancy has become an issue. The city police forces are under increasing pressure to patrol and control undesirable activity in the area. This city and other neighborhood residents feel that the removal of the properties will benefit the adjacent property owners and possibly reduce the criminal activities within the area. The city will coordinate efforts with the City of Youngstown in the relocation of the residents and demolition of the structures. | City of Campbell | 20 | 31 to 90 days | \$1,500,000 |
| Mahoning | Tenney Avenue Water Storage Tank Painting Project | The project involves the interior and exterior painting of an elevated, steel water storage tank. The existing structure is believed to be in satisfactory structural condition. The project will include a structural evaluation and design of an interior and exterior coating system to extend the useful life of the tank for an anticipated 20 to 30 year span. The structure will be evaluated for possible contaminants and appropriate mitigation will be included as necessary. | City of Campbell | 10 | 31 to 90 days | \$300,000 |
| Mahoning | Roadway Resurfacing Program | The project encompasses the resurfacing and repair of 14 individual roadway sections within the City of Campbell. The total length of pavement to be resurfaced is approximately 1.5 miles. The resurfacing will improve these sections and extend their useful life for another 10 to 20 years of service. Each of the sections was selected based on a review of the City's entire roadway inventory and to meet the needs of the community. Each of the sections was selected based on a review of the City's entire roadway inventory and to meet the needs of the community. If the sections are engaged through resurfacing that service life should be extended based on previous experience in resurfacing projects. The project will require newly educated professionals in many different fields of aging to save their retirement, pension, social, and economic needs. | City of Campbell | 10 | 31 to 90 days | \$2,550,000 |
| Mahoning | Ohio Gerontological Needs and Job Outlook Assesme | This proposal outlines a statewide study comprised of key informant interviews and surveys, which will assess the educational needs of current professionals working with older adults. Employers will be surveyed regarding the types of knowledge, skills, and competencies desired from new graduates. The proposed survey will examine the current educational background of professionals working with older adults. The needs of adult, rural employers will be compared and contrasted using a rurality index. The findings will improve educational opportunities for current and future professionals in aging within the state of Ohio. The data will be used to develop a workforce development strategy to serve Ohio's growing aging population. | Youngstown State University Department of Sociolog | 100 | 31 to 90 days | \$180,410 |
| Mahoning | FSA Technology Upgrade | Funding is requested to update computer system to begin the transition to a secure, web based electronic patient medical record. Electronic medical records will be of substantial benefit to medical health services and will help improve the quality of care our patient receive at our facility. Family Service Agency will also benefit from such upgrades by saving reduced costs and will be able to improve revenue. For over 100 years, Family Service Agency has been serving the families of Youngstown and the Mahoning Valley community. Currently, our programs include family counseling, rape information and counseling, guardianship, Daybreak, family financial education services, and the Ryan Child program. | Family Service Agency | 5 | 0 to 30 days | \$50,000 |
| Mahoning | Un-Insured behavioral health services | Project will increase availability of licensed counselors to provide mental health services to individuals with behavioral health needs. During these difficult economic times requests for services has risen sharply and individuals are being placed on waiting lists. The Board will match the 150,000 request which will provide for \$3,000 units of services. This will include individual counseling, psychiatric and case management treatment services. These services will also benefit individuals by providing assistance in securing needed medications and help in accessing other community programs that can assist behavioral health needs. Costs to the behavioral health network in the State have placed individuals who are dealing with many losses at great risk. We need to step up the safety network of care. Thank you for your consideration. | Mahoning County Mental Health Board | 6 | 0 to 30 days | \$100,000 |
| Mahoning | administration facilities | This request is for funding to build and furnish a administration building and meeting facility for Milton Township. This is a project that is needed, we presently meet in an old towship building that is not energy efficient and in poor condition due to the fact this is a 1 room structure approx. 100 years old with these new facilities we would be able to store all of the needed township records in a facility to meet the second session periodic set by Ohio. This will also give us facilities to hold our township meetings and also give other township groups a facility to have community meetings and we will be able to meet with the residents with Disabilities. This will also provide a location for the residents of Milton Township that have to obtain permits and records request can be met. Milton township is a residential rural community with no industrial base which limit our budget and/or ability to raise funds for a project of this type. | Milton Township | 30to 50 created | 181 days or more | \$750,000 |
| Mahoning | Wastewater Plant Influent Screen and Tertiary Filtr | The requirement for reducing the concentration of total phosphorus in the wastewater plant effluent discharge will be included in the DEP's 2010 NPDES permit with a compliance schedule for completion by 2013. The project includes the construction of a automated bar screen system for the headworks of the plant as well as the construction of a tertiary filter for phosphorus removal. This project will supplement OWDA loan No. 4831, DEP's Account No. C520308091-02-02. The primary separated sludge of this project will be managed with DEP's regulations, a cleaner receiving stream, and degradable treatment of wastewater flows for all 2,343 sewer customers of Sebring. | Village of Sebring | 40 | 91 to 180 days | \$1,953,256 |
| Mahoning | WRSD Emergency Generator System | This will be the upgrade of a new emergency generator to serve a new K-12 educational facility being constructed in 2010. Provisions for the upgrade is that the building serve as an emergency shelter for two townships encompassing 64 square miles. This will allow the ability to maintain building functions in an emergency situation. | Western Reserve School District K-12 | 5 | 181 days or more | \$100,000 |
| Mahoning | WRSD Wind Electric System | Design/construction of a wind generator tower and power producing turbine. This project will offset some of the power consumed by a new K-12 school being constructed on the property. | Western Reserve School District K12 | 10 | 91 to 180 days | \$150,000 |
| Mahoning | Gibson Road Sanitary Sewer | Special note that this school building serves as an emergency shelter for two townships encompassing 64 square miles. | Mahoning County | 35 | 91 to 180 days | \$750,000 |
| Mahoning | St. Mary's Alzheimer Care Center new sewer line | Project extends sanitary sewer service across the right-of-way of the Ohio Turnpike in Carleton Township to provide public sanitary sewer service to an area of Carleton Township experiencing a large number of existing building on-lot septic systems. | Windsor House Inc. c/o Omni Manor Inc. dba St. Mar | 100 | 91 to 180 days | \$360,000 |
| Mahoning | WRSD Wastewater Treatment Plant | Project extends sanitary sewer service across the right-of-way of the Ohio Turnpike in Carleton Township to provide public sanitary sewer service to an area of Carleton Township experiencing a large number of existing building on-lot septic systems. Plans to take place at St. Mary's Alzheimer Care Center, 1899 Carleton Rd., Columbiana, Ohio. The building is part of the City of Columbiana Sanitary Sewer System, climate and close existing water treatment plant. A new pump station will be provided along with piping, engineering, excavation, permits, land acquisitions and fees to perform work. | Western Reserve School District K-12 | 10 | 181 days or more | \$150,000 |
| Mahoning | New Springfield Sanitary Sewer | Design/construction of a new wastewater treatment plant to serve a new K-12 educational building being constructed in 2010. The building also serves as an emergency shelter for two townships in the county. Serving a population of over 4,500 and the townships encompass 54 square miles. | Mahoning County | 65 | 181 days or more | \$3,700,000 |
| Mahoning | New Middletown WWTP upgrade | Project is needed to continue to meet the EPA's NPDES issued permit. Plans an underway and should be completed by Jan. 2010 | Mahoning County | 35 | 181 days or more | \$4,100,000 |
| Mahoning | Lake Milton water and sewer | Project is needed to obtain an area of failed on-lot waste septic systems, the local Board of Health has declared this area a public health nuisance. No waste discharged from the failed septic flows into Lake Milton, a recreational lake, and further downstream in the Mahoning river, the source of drinking water for neighboring Newton Falls, Ohio. | Moning County | 65 | 181 days or more | \$4,600,000 |
| Mahoning | YBI Main Facility | YBI is an Edison Incubator and provides entrepreneurial assistance, facilities and resources to entrepreneur, emerging businesses and established industries that are developing and integrating business-to-business software applications. Since focusing on information technologies in 2000, YBI has assisted approximately 20 ventures, facilitated the creation of over 250 jobs at average salary exceeding \$50K. Its clients have created at least 25 unique software applications and secured approx. 20 patents. YBI needs to renovate its 25,000 sq. ft. facility to accommodate new tenants and enhance its resources by investing in new equipment and fixtures. YBI has a balance and could accommodate if it is additional revenue if currently vacant space were renovated. This office to estimate, it is reasonable to project that up to 200 jobs could be created within 3 to 5 years as incubating ventures "mature" into new space, giving way to new incubating ventures. | Youngstown Business Incubator | 200 | 0 to 30 days | \$150,000 |

The old ice rink building would be renovated into a rental ball space, public restrooms, changing rooms for water playgrounds, and kitchen/concessions. The renovated structure is expected to incorporate various energy efficient design components, such as geothermal heat pump panels, solar panels, natural lighting and wind power. The renovated structure and surrounding site would be designed to achieve LEED certification. | Mill Creek MetroParks | 250 | 31 to 90 days | \$1,850,000 |
| Mahoning | Mahoning Valley Law Enforcement Task Force | Youngstown, Ohio is a community experiencing an exceptional level of drug related violence. With a population of less than 85,000, there were 37 murders in 2007, and 28 murders in 2008. The Mahoning Valley Law Enforcement Task Force, located in Youngstown, is a regional law enforcement unit responsible for drug enforcement and tactical response (SWAT) to the 24 member agencies spread over a two (Mahoning & Trumbull) county area. The funding requested would provide for job retention and job creation. The job retention would be realized for three positions, two deputy sheriffs, and one police officer that will be laid off or reassigned due to lay off. Job creation would occur as part-time officers would be advanced to full-time positions. The Task Force is a regional law enforcement asset that provides costly, specialized services that no one agency or department could perform individually. | Mahoning Valley Law Enforcement Task Force | 5 | 0 to 30 days | \$254,160 |
| Mahoning | Gregoryfilms Recovery | These funds will provide for the financial recovery of Gregoryfilms and allow the company to not only stay in operation and retain the business as a benefit, but to hire an additional 4 employees for various production projects. Positions will be Marketing Director, Secretary, Graphic Artist, and from 1-3 part-time production assistants. Economic downturn has forced the company to downsize, and these funds would be used to place the company on a solid financial foundation. | Gregoryfilms Inc. | 6 | 0 to 30 days | \$120,000 |
| Mahoning | Salt Bin | New salt bin 34'x12' to hold approximately 200 tons, currently do not have one at all. | Goshen Township Road Department | 4 | 91 to 180 days | \$30,000 |
| Mahoning | Mahoning Valley Law Enforcement Task Force | Youngstown, Ohio is a community experiencing an exceptional amount of drug related violence. With a population of less than 85,000, there were 37 murders in 2007, and 28 murders in 2008. The Mahoning Valley Law Enforcement Task Force, located in Youngstown is a regional law enforcement unit responsible for drug enforcement and tactical response (SWAT) to the 24 member agencies spread over a two (Mahoning & Trumbull) county area. The funding requested would cover Task Force operating expenses to include two full-time and two part-time administrative positions. The Task Force is a regional law enforcement asset that provides costly specialized services that no one agency or department could perform individually. | Mahoning Valley Law Enforcement Task Force | 4 | 91 to 180 days | \$505,500 |
| Mahoning | MetroParks Farm -- Wind Power | Assessment of existing inoperative sluice gate controls for Lake Newport Dam in Mill Creek Park by professional consultants using certified divers. | Mahoning | Recovery COPS program | The Jackson-Milton Local School District seeks to establish a school business partnership with a local business and those center for the heads of the students and community. The District proposes to lease school property to a developer to rebuild the facilities. The developer will design, construct, manage, use and operate facilities for profit. | Youngstown, Ohio Police Department | 30 | 91 to 180 days | \$6,500,000 |
| Mahoning | SPORTS COMPLEX | We currently handle the recycling contract in Geauga and Trumbull Counties in Ohio. Using the money to pay off existing equipment and purchase new recycling equipment we plan to greatly expand the recycling efforts in these counties. We will target all local business throughout the counties. Money would be used to pickoff recycling vehicles as well as purchase new recycling bins. | JACKSON-MILTON LOCAL SCHOOL DISTRICT | 10 | 181 days or more | \$12,000,000 |
| Mahoning | Mahoning / Trumbull County Recycling Expansion | The Potter's Wheel is a career and education preparation program that helps women become emotionally and economically self-sufficient. Through basic skills classes, resume writing, mock-interviews, personal, education, and career counseling women find the means to transform their lives better. | Custom Recycling Solutions LLC | 4 | 0 to 30 days | \$800,000 |
| Mahoning | The Potter's Wheel | 275 total low income women and children will be served 117 women will be served 149 children 50 women will move on to attend post-secondary education for the first time over 15 women will obtain their GED 20 will obtain new employment All who come to The Potter's Wheel will receive the services they need to break the cycle of poverty for themselves and their families. | Beatitude House | 3 | 0 to 30 days | \$60,000 |
| Mahoning | Ohio waterway to bail out millions... | Ohio River: There was a time when Ohio had a canal to transport goods and services from Canada to the Gulf of Mexico, but was abandoned for speedier methods like rail, highway and dependence on foreign oil while Europe has advanced their canal systems... This is a request to perform a preliminary study for a high-tech canal to run along Ohio's impoverished eastern border and includes 4 counties (many zipcodes): Ashtabula, Trumbull, Mahoning and Columbiana. This canal is less than 100 miles long, but benefits many other states down stream, including western PA which can share in the construction cost... This canal will be sustainable and provide: commerce, transportation, jobs, recreation and tourism... This project covers many bases, revives the economy of many communities and puts Ohio back on the map of recovery so please forward to the appropriate agency or department, thank you... | IDEAS | 7,500 | 0 to 30 days | \$20,000 |
| Mahoning | Greenhouse Replacement | Mahoning County Career & Technical Center was damaged by fire in May 2007. Construction on the fire-damaged wing is underway with an addition planned. Funding does not permit us at this time to replace the greenhouse, which is now 37 years old, with a more up-to-date, energy-efficient greenhouse. Specs and drawings have been completed with a cost of approximately \$1,050,000. The district is not eligible for Ohio School Facilities dollars at this time and expected participation is not feasible. | Mahoning County Career & Technical Center | 10 | 0 to 30 days | \$1,050,000 |
| Mahoning | Mahoning County Senior Center Expansion | Physically increase the Mahoning County Senior Center by 4,500 square feet. The expanded facility would include a space for Adult Day Services, creating four new full-time positions, in addition to staff currently employed by the senior center. We estimate this facility could accommodate services for an additional 150-200 seniors annually, increasing the number served by approximately 15,000 each year. The target population for the Mahoning County Senior Center expansion includes low- to moderate-income and minority older adults age 60 and over, living in Mahoning County. Programs offered through the senior center will also serve caregivers of these clients by allowing them to remain in the workplace. Finally and most importantly, programs offered through the senior center keep older adults independent in their own homes, rather than institutional facilities, which are not only undesirable, but also exceedingly expensive to the healthcare system. | Ohio Presbyterian Retirement Services dba Senior I | 4 | 91 to 180 days | \$280,000 |
| Mahoning | SAVE ELECTRICITY | We would replace all of our present appliances with more energy efficient models which would cut down on our overall use of electricity and gas. Replace the following Washer/dryer Dishwasher Refrigerator Overmicrowave Furnace Sump pump Hot water heater Would provide work for heating / plumbing professional plus delivery and set up. | Homeowner | 5 | 0 to 30 days | \$20,000 |
| Mahoning | Home efficiency project | The updating of our house to be more energy efficient and thus more environmentally friendly. Installation of new energy efficient windows throughout the house. New roof with additional insulation and new siding with insulation underneath. Addition of a new energy efficient heating system to cut down on emissions and provide more efficient heat. Additional money would allow us to retrofit a Geothermal system which I would prefer. This project will provide work in the construction industry of at least 10 jobs, cut our energy usage and provide a much more energy efficient home. | Homeowner | 10 | 31 to 90 days | \$30,000 |
| Mahoning | Goshen Police Officer Retention Program | Goshen Police District patrols over 66 square miles with only two officers on shift. With increased budget constraints the agency is unable to add officers on the road. With assistance we would be able to add an additional officer for better call-response, increased officer safety and public protection. By obtaining funding for five full-time officers the department would be able to retain current officers that leave by attrition in the next years and add an additional officer for each shift. An entry-level police officer with all benefits included would cost \$40,346.70 per year. Preserving the police officers jobs would increase our community policing capacity and crime-prevention efforts. | Goshen Police District | 5 | 0 to 30 days | \$201,229 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Mahoning | Removal of old fuel tank | Removal of an old underground fuel oil tank from my front yard and repair and replacement of damage that will be done to yard and driveway in the process. The tank is not known to be leaking but I would like to have it removed as soon as possible. 3 to 5 jobs in removal 3 to 5 jobs to replace damaged yard 5 jobs to repair anticipated driveway damage | Homeowner | 5 | 0 to 30 days | \$20,000 |
| Mahoning | Small Business expansion | I look forward to working with you in using this federal stimulus money to get our economy moving and grow our environment. We increase in revenue, volume, reduce 30 percent environmental waste, energy, and produce and in doing energy we have increasing use of new energy efficient windows, heating and appliances. The project would produce at least 3 new party hosting jobs, support at least 30 construction jobs at a time when they are needed and result in an increase in payroll taxes, county sales taxes and the taxes that I pay as a business owner. Summary Building of a multi-purpose structure Installation of an in-ground pool Paving of 500ft long access drive and parking area Upgrading septic system (P-CSSSBLTY) Use of solar power for heat Use of energy efficient windows, heat and appliances I look forward to working with you to make my expansion become a reality and helping the State of Ohio, Mahoning County and our great country in our recovery efforts. | Party Parlour | 35 | 31 to 90 days | \$105,000 |
| Mahoning | Goshen Police Response to Violence Against Women | Goshen Police District, patrolling over 66 square miles, encompasses a mostly rural area with a population base that ranges from homeless to owning multi-million dollar residences. Domestic Violence and violence against women are two significant problems within our jurisdiction. Goshen PD would send four officers to multiple courses that will enhance our ability to best the public, as well as all of our officers, how to properly respond to, handle and prevent these crimes from occurring. By sending officers to courses such as How to Instruct Female Self-Protection Clinics, Defensive Tactics, Civil Crime Investigations, Interview and Interrogation, Crisis Victim Rights and Responsibilities and Domestic Violence Instructor and many more, patrol officers would be able to enhance the preparedness and reaction to crimes against women. Officers would teach self-defense classes to the public on a regular basis, providing the leaving resources for women in our community. Providing enhanced training to protect our residents and with increased budget constraints, additional training would be the only way our officers can achieve our mission and goals. Updated fitness equipment and interior building renovation. This will allow the gym to remain competitive. The plan had been to renovate and the work done at my office was out-sourced and my job was eliminated. | Goshen Police District | 0 | 31 to 90 days | \$40,000 |
| Mahoning | Update | | BodyShop Total Fitness | 4 | 0 to 30 days | \$40,000 |
| Mahoning | Goshen Police Cruiser Assistance | Goshen Police District provides police protection in Goshen Township, Green Township and Baker Village. With 66 square miles with only 2 officers on shift. The police department currently has 10 police cruisers that are in use for full-time patrol. An average of 100 miles on cruisers per shift, 6 times a day. In just one week we put 700 miles on a cruiser. Recently, due to budget constraints, the police department was unable to purchase a new cruiser, leaving us behind on replacement. Due to high mileage, we must support the expectancy of the officers, our cruisers are having increased upkeep and maintenance fees. By adding 3 cruisers to our fleet, we will be able to replace older, high mileage cruisers and protect the safety of our officers and residents. New cruisers could save the township and support our local automobile industry. | Goshen Police District | 0 | 31 to 90 days | \$88,290 |
| Mahoning | Police Department Sally Port and Holding Area | The police department moved into an old school building in 2005. Although most renovation has been completed by the police department and township, we still need a sally port and holding area for our officers. With only two officers on shift patrolling over 66 square miles of jurisdiction, there is a safety concern for the officers once they bring suspects back to the station for processing. If another call comes in during the time period that an individual is in custody, only one officer is left to process emergencies. The safety of our officers is crucial and is currently not at the standards we feel are necessary to safely handle multiple arrests or combative arrest situations. A sally port would assist officers in containing arrested individuals to a secure location. The police department occupies the same building as the administration office and a gym used by the public on a frequent basis. The sally port would allow officers to safely and discreetly bring individuals into our facility. | Goshen Police District | 0 | 31 to 90 days | \$140,000 |
| Mahoning | Build and office and warehouse for our industrial | We are a bridge painting company. We own commercial property on which we would like to build an office and warehouse. Expansion would allow us to process more work and our more people to work. We would be holding on public projects. We could also buy some new recycling equipment which protects the environment. If we had a warehouse, we could buy more equipment and put more people to work. | Adelphi, Inc., dba G-Force Contracting | 25 | 181 days or more | \$500,000 |
| Mahoning | Lipkey Road sanitary sewer extension | Project would extend public sanitary sewer service into an unsewered area of Jackson Township, Mahoning County Ohio to eliminate failing septic systems, leachate from existing septic flows into Mansard reservoir, a drinking water reservoir for Mahoning and Tumbull County. We would like to get Auxiliary Power Units in all our Sump-Trucks so they do not die at the incinerator site would save Fuel burning, the environmental and be fuel efficient. | Mahoning County | 25 | 31 to 90 days | \$200,000 |
| Mahoning | Update to more fuel efficient equipment to Auxilla | | Truck Industry | 10 | 91 to 180 days | \$300,000 |
| Mahoning | Home Investment projects | Remove existing multi-unit apartments which have had water leaks (damage and have mold growth). I also need a new water heater/boiler at apartment building and a new water heater. The other building needs 1 apartment refurbished as the prior tenants left in a deplorable condition. Also, get caught up on mortgage which has fallen behind and is currently on and interest only restructuring because of past tenant defaults on leases and evictions. I want to hold on to the apartments but they are going to fall into foreclosure soon if I can't get financing. This would force the eviction of 12 families who currently reside at these multi-unit apartments. | Q Enterprizes | 5 | 0 to 30 days | \$299,000 |
| Mahoning | Prevention and Treatment of Bullying | Students have a right to feel safe. In a community with the majority of the population being low-income there is a higher rate of bullying. A recent study indicates a statistically significant increase in reported bullying by low-income students on higher-income students at p <.001. The local police department reports that a high percentage of bullying occurs based on statistical analysis of alterations in the outcome investigation led that the action against the assailant were facilitated by negative emotional response (i.e. bullying (Heavily, 2009). The funding asked for will help create a program of assessment and implementation of programs that will identify, evaluate and treat potential moderate to high violent behaviors. The objective is to provide higher awareness and prevention of bullying. Sebring Police Department currently serves a population of 5000 with limited officers. The community has a 60% unemployment rate with 70% of those unemployed receiving medical benefits through the state. With community mental health services dwindling within our community the police are doing crisis intervention without assistance from any mental health professionals (Avey, James and Wilder, 2002). The program we are asking to establish will allow Sebring's Counseling Center LLC to provide education to the local police department regarding the mentally ill. A first-response unit will be formed to accommodate children, adolescents and adult populations. New Orleans currently has a similar first-response unit. Officers report that the education received and mental health professionals at the unit helped them feel more confident and comfortable dealing with the mentally ill population (Burum and Randy, 1998). A perspective outcome would be a relief to the prison system by diverting the patients away to appropriate mental health facilities, and saves the city a substantial amount of money. This program will guide law enforcement in how to treat hallucinating suspects. | Sebring Police Department/Solutions Counseling Cen | 8 | 91 to 180 days | \$150,000 |
| Mahoning | Police Perspectives on Responding to the Mentally | | Sebring Police Department/Solutions Counseling Cen | 8 | 91 to 180 days | \$150,000 |
| Mahoning | Medical Education Building | It is anticipated by 2025, as well as a critical shortage of other health care workers. These shortages will be exacerbated in the Mahoning Valley. The ratio of population to physicians and nurses in our region lags behind that of urban Ohio areas. To address this need, we propose a coordinated "Grow your own" strategy for physician and nurses in the Mahoning Valley. Investment in an education building on the clinical campus of St. Elizabeth will allow for shared educational resources between the Henry Nursing School and the Graduate Medical Education programs. In addition, the Education building can meet the needs of the community by providing quality patient care. This learning facility will house faculty in graduate medical education and nursing, physician residency programs and outpatient community clinics which also serves as training sites), as well as classroom space, a health sciences library, a clinical skills lab, a simulation lab, technologically equipped classrooms, and a teaching auditorium. This grocery store has extremely high energy costs and repair and maintenance costs. It has a 43 year old compressor system that is not energy efficient or dependable. It has exceeded its life expectancy. 10th in age there are many expensive repairs to it. The profitability of the store is marginal. With the replacement there could be a 30% reduction in energy cost and 25% reduction in repairs and maintenance. This would add to the profitability of the store and help retain the current workforce. | Humility of Mary Health Partners | 100 | 31 to 90 days | \$6,000,000 |
| Mahoning | Lincoln Knolls IGA energy efficient compressor sys | | Nemex Food Stores | 80 | 91 to 180 days | \$150,000 |
| Mahoning | Mahoning Valley N Vivo | Southside Environmental Group, LLC, of Niles, Ohio and N-Vivo International Corporation of Toledo, Ohio, have entered into a Joint Venture Agreement to open a manufacturing operation in the Mahoning Valley that is named Mahoning Valley N-Vivo, LLC. The joint venture will manufacture N-Vivo Fuel. N-Vivo Fuel is a renewable solid fuel that can be used in commercial coal-burning power generating facilities. N-Vivo's fuel process converts waste products (human and animal waste) into a safe, clean and carbon-reducing fuel that can substitute in part for the burning of coal. The fuel offers a sustainable solution to a growing problem dealing with such wastes while producing needed electricity in a cleaner fashion. | Schimley's Excavating Inc. | 25 | 31 to 90 days | \$3,250,000 |

This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$60,000 |
| Mahoning | Ashtabula MRDD, Cummins Bridgeway, Clean Fuels Ohi | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 20 school buses. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$60,000 |
| Mahoning | Boardman Schools, Cummins Bridgeway, Clean Fuels O | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 45 school buses. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 6 | 0 to 30 days | \$135,000 |
| Mahoning | Community Bus, Cummins Bridgeway, Clean Fuels Ohio | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 40 school buses. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$120,000 |
| Mahoning | Poland Schools, Cummins Bridgeway, Clean Fuels Ohi | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 25 school buses. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$75,000 |
| Mahoning | Youngstown City Schools, Cummins Bridgeway, Clean | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 40 school buses. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$120,000 |
| Mahoning | Walk through metal detector | The Administration Building has the Inmate Court, Juvenile Training Court and Council chambers. To ensure the safety of judges, staff, associated court personnel, defendants the implementation of a walk through metal detector would increase safety and security of personal and facility. Administration Building currently has no back up generator system. Installation would allow the Administration Building to function as an emergency operation center. The Administration Building houses the Police, Fire and Administrative offices. The Village has experienced three outages recently resulting in outages from 2-4 days making daily police, fire and administrative function nearly impossible and the ability to house residents in the event of a natural or manmade disaster. | New Middletown Police Dept | 0 | 91 to 180 days | \$6,000 |
| Mahoning | Backup generator | | New Middletown Police Dept | 0 | 181 days or more | \$36,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Mahoning | replacement of ppolice Cruisers | Replacement of worn out aged cruisers. Two cruisers now have in excess of 160,000 miles and are continually in need of repair. Funding would allow for officer safety, provide efficient fuel savings on newer cars and provide officer safety for our community through the availability of newer vehicles. | New Middletown Police Dept | 3 | 91 to 180 days | \$50,000 |
| Mahoning | Portable radio upgrades | Replacement of portable police radios. Current radios are older than ten years old and no replacement parts are available. Newer radios will allow better reliability and officer safety and interoperability. | New Middletown Police | 1 | 91 to 180 days | \$10,000 |
| Mahoning | Emergency Medical Transport Service | The private ambulance that has provided emergency medical transport service to EMSW (emergency medical services). Our fire department could provide an EMS that would provide full and part time work to up to 25 individuals, job training that could lead to full time jobs for part time employees, and adequate services to encourage private employees to maintain or create local jobs. By providing EMS through our fire department we will be able to provide services at a lower operational cost than the previous private services since the fire department is already licensed facilities to house services, has an established communications system, and we already have facilities to provide services. By not providing this service we have had calls that required employees of local industries who have had to be transported to emergency medical facilities, in some cases these employees have had to wait for an ambulance. If we can not provide this service these employees will have to commutes that will be long and the other is a state of emergency, we are poised to take over a large share of the market. There will be a large void when from our heart's W&MCO's business bankruptcy. At the point they are cutting back on facilities and staff leaving a substantial share of the market vulnerable. We have heard multiple complaints due to the lack of services, which we would be able to fill quite easily. We would be in a good position to provide multiple services, such as, drug screens, pre-employment physicals, ODOT physicals and laboratory services to the employees of the Valley. | Ellsworth Fire Department | 10 | 0 to 30 days | \$481,240 |
| Mahoning | A start up occupational medicine and injured worker | OccupMed's fee schedule is dictated by the Ohio BWC and is one of the highest forms of reimbursement in healthcare today. Our advantage in pricing will be our ability to discuss this fee schedule to the employer based on the volume of patients referred to our clinic and use of our selected team of health care providers. The discounted fees will be an incentive to keep employees in Ohio. | OccMed 1 | 50 | 91 to 180 days | \$500,000 |
| Mahoning | V&M Star Energy Project | There are two primary aspects of this project (1) provide for the gasification of coal, tires, and wood fuel to produce a manufactured gas to be used in the V&M Star's (tires) related furnace, electric arc furnace, waste preheat, and tandem preheat stations and (2) deliver energy to a 20MW electric cogeneration system with the steam hydroplant being sent to nearby hospitals, the Youngstown State University Campus and other customers. The project will implement the best available gasification technology to ensure clean gas for pollution control and the gasification emissions will be near zero demonstrating our clean stack technology. A waste heat boiler system will be installed to recover waste heat from the exhaust flumes steels used in the production of steel. This heat recovery system will supply electric to V&M Star and steam to the district heating network. The net effect of this project will be to reduce energy use among energy users by 50% and emissions by over 50%. This project will also focus on upgrading technology and installing a new computer system to assist in management of more efficient steel production. | Youngstown Energy, LLC | 1,310 | 0 to 30 days | \$22,500,000 |
| Mahoning | Wireless Community | We plan to create a wireless school campus and surrounding community by installing a wireless internet tower on school grounds. It would be necessary to hire eight new staff members to act as technology coaches and teachers throughout the district. The wireless community would support the purchase of 5,000 laptops in the district. This would allow our students several and control their own learning. Plus (online supplemental curriculum) in all core areas as well as standard based research for classroom application. Another goal is to build student motivation and engagement through student response systems, on a global scale that supports 21st century outcomes. Encouraging their self-directional abilities. Subsequent impact on our community would be providing free wireless internet to all, encouraging their self-directional abilities and innovation in business and citizens. We will collaborate with Austintown township to have the greatest impact on our community. We will purchase 4 trucks and 4 cell towers to go and 4 cell towers to low income homes around surrounding sources. | Austintown Local SD | 8 | 91 to 180 days | \$4,500,000 |
| Mahoning | Winterizing Homes | Mahoning Valley Schools enroll many impoverished students with little idea how to get to college. In order to increase retention, assisting college students, and providing necessary advising if they are to matriculate to higher education after graduation. Supplemental funding is needed to provide financial services to Valley students via online advising. The economic hardship money to pay for in-person advising throughout area schools had become difficult for the nonprofit Mahoning Valley College Access Program (MVCAAP) to acquire via charitable contributors and local foundation grants. | Animal Control Services | 4 | 31 to 90 days | \$275,000 |
| Mahoning | Online College Advising | Our target audience will be all interested students enrolled in the Mahoning Valley (Sh-12th) schools. This college database to be served will be those in Columbiana, Mahoning, and Trumbull Counties. The objective of our providing online financial aid advising is to have as many graduating seniors as possible pursue postsecondary education opportunities. | Mahoning Valley College Access Program (MVCAAP) | 5 | 0 to 30 days | \$100,000 |
| Mahoning | Curbside Recycling Expansion | Our outcomes will be at least 70% of 12th grade online admissions from the Mahoning Valley for the 2009-2010 school year will have taken the ACT, had a college application submitted, and will matriculate. To greatly expand limited, existing curbside recycling program by replacing small 18-gallon bins with 65-gallon totes on wheels which will triple tonnage in the year creating the impetus for private companies to relocate to Mahoning County to erect material processing plants, end-user manufacturers, and prevent thousands of tons of curbside recycling ending up in China as is current practice. Private companies in PA, already set to build plant in Mahoning County can vastly increase recycling tonnage. This limits greenhouse gases and saves valuable landfill space - and preserves scarce natural resources. Aired Waste Industries purchased near serving truck for curbside recycling for 80,000 residents - but Mahoning County must demonstrate increased tonnage by having more volume in curbside containment. Curbside residents want ease to wheel their recyclables, and want to be able to get cardboard, #1 - 7 plastics, glass bottles, cans, and especially all paper and publications - in one tier and wheel it to the curb for convenient pick-up. This will create Green Jobs in the private sector for both hauling and processing companies, and increase the manufacturing base in Ohio. | Mahoning County Solid Waste District- County Gover | 100 | 91 to 180 days | \$3,200,000 |
| Mahoning | Graphics Training | After owning a sign shop for over 18 years, I would like to teach & train the youth in this area, how to design, manufacture, & install signage, as well as many other aspects of the sign industry. I am eligible for these funds, I can create a or more job positions in this area and provide training. | Calligraphy & Graphics Sign Co., Inc. | 4 | 0 to 30 days | \$200,000 |
| Mahoning | Landscaping ESA Park Apartments | ESA Park Apartments is a 176-unit low-income apartment complex located on the East side of Youngstown. 74 units have very low income Section 8 residents. We are remodeling the project, and would like to apply for a grant to rehabilitate the landscaping around the property. This would enhance the property for the low-income residents, and promote more of a family living environment. | Rosewood ESA Park Apartments | 10 | 31 to 90 days | \$100,000 |
| Mahoning | Radio Communications System Replacement | The City of Youngstown Ohio Police Department is requesting funds to upgrade the radio communications system of the largest 911 call center in Mahoning County. The City of Youngstown was ranked 15th in the nation for homicides in 2008. The Youngstown 911 center answered 310,453 telephone calls for police services during 2008. This total includes 65,728 emergency 911 calls. In 2008 a total of 97,372 calls were dispatched to Police, Fire and EMS field units. The Youngstown 911 center has an annual operating budget of approximately one million dollars. | City Of Youngstown - Police Department | 25 | 31 to 90 days | \$6,500,000 |
| Mahoning | WOODCASE | The upgrade will convert the existing analog radio system to the new federally mandated digital format. The new digital system will ensure compliance with mandated FCC regulations and improve officer safety and efficiency by improving the quality of communications between the 911 emergency call center and field units. Radio system infrastructure improvements will enhance interoperability and provide the foundation to support a regional approach to emergency communications. The new digital radio system will enhance the availability of wireless emergency services to our community. The new digital radio system will enhance the availability of wireless emergency services to our community. The new digital radio system will enhance the availability of wireless emergency services to our community. The new digital radio system will enhance the availability of wireless emergency services to our community. | Fred Scarsella | 400 | 0 to 30 days | \$500,000.00 |
| Mahoning | MILITARY HOUSING PROJECT | Primary scope of project is to develop housing for retired/disabled military persons and a community/social hall. The program will produce a project return within two years of project at a rate \$169,000.00 per year to be used for education/transportation benefits for seniors. This project is opened throughout the state and benefits military veterans of all ages, who hope to have all units completed within two years and hope to hear from your office shortly. | CAP DEVELOPMENT | 60 | 0 to 30 days | \$26,000,000.00 |
| Mahoning | Sojourner Domestic Violence Services - CM | Sojourner House Domestic Violence Program, the only Emergency Shelter in Mahoning County, is in great need to provide victims of domestic violence the ultimate case management (advocacy) services that the victims need to remain in a violence-free environment. The services include but are not limited to those that assist domestic victims with managing practical problems created by the victimization such as acting on behalf of the victim with other service providers, creditors, or employers as well as assisting the victims to recover property that is retained as evidence, assisting in filing for compensation benefits, and helping to apply for public assistance. | Burdman Group Inc. | 2 | 31 to 90 days | \$59,000.00 |
| Mahoning | MCSO OCSJ Byrne Jag | The Mahoning County Sheriff's Office will be applying for the Edward Byrne Memorial Justice Assistance Grant (JAG). The program areas of interest will be A. Law Enforcement Programs and C. Corrections and Community Corrections Programs. We recently have reduced our department by 25 Deputy Sheriffs due to budget constraints. Due to this reduction we have removed Deputies from multi-jurisdictional collaborative efforts to reduce drug and firearm traffickers, as well as gang investigations. As well as an innovative alternative sentencing program where non-violent offenders in lieu of serving jail sentences would report to a day reporting program, Monday through Friday to perform community service throughout the county. If allocated funding through this grant we would be able to retain and create new employment at the Sheriff's Office. | Mahoning County Sheriff's Office | 10 | 0 to 30 days | \$380,000.00 |
| Mahoning | Canfield Police Department | The City of Canfield Police Department is attempting to fill one vacant position and retain one full time police officer. The city requires one new cruiser with equipment. | Canfield Police Department | 2 | 31 to 90 days | \$583,000.00 |
| Mahoning | DMC Juvenile Diversion Officer | The DMC Diversion Program Officers will be assigned to the City of Youngstown. Juveniles will be referred from the Youngstown Police Department and will be assigned a diversion officer for a period of four months. A case plan will be created for each juvenile and each juvenile is subject to the rules and regulations of the case plan to prevent them from further entering the juvenile criminal justice system. The Mahoning Valley Crisis Response Team responds to a three county area for critical incidents. This funding will purchase equipment to be used for training and during call outs. The funding will purchase range training equipment to be placed at a regional training center that is available to all law enforcement agencies in Ohio and a crisis communication device used by negotiators to talk to negotiators to talk to negotiators to talk to negotiators. Both items will enhance officer safety and allow the team to provide a higher level of service to our communities. The goods purchased will help to stimulate our nation's economy. | Mahoning County Juvenile Court | 2 | 0 to 30 days | \$100,000.00 |
| Mahoning | Increasing Officer Safety Through Technology | Funding to attend advanced training for a Crisis Response Team that responds to three counties covering over 500,000 citizens. This project will send twenty five operators to advanced tactical training, purchase training equipment and operational equipment to be used by the team. It will stimulate the economy in various ways, from additional goods and services purchased to reducing the monetary demand on the participating agency's budget and allow them to use these funds to operate their departments. Purchased through this funding will be a camera system, less lethal munitions, transportation costs, room and board, training fees, and sixty hours for a project coordinators wage. | Mahoning Valley Crisis Response Team | 1 | 31 to 90 days | 22,000.00 |
| Mahoning | Highway Safety Through Traffic Enforcement | Purchase of four radar units to enforce this speed limit in our community for the motoring public that travel through our community. The purchase of these radar units and three portable radars for the safety and communication of officers to other officers, motorists, and the spectators as well as dispatcher relaying information from observers of the community. | Milton Police District | 1 | 31 to 90 days | 6,000.00 |
| Mahoning | Inneroperable Communication | The purchase of one CISA II (portable video assist) and software. The first unit will be used to assist in the investigation and prosecution of suspect of crimes. Also for the training of two officers and their transportation and lodging of the two officers. | Milton Police District | 1 | 31 to 90 days | 15,000.00 |
| Mahoning | Technology Improving Crime Detection | Replacement of two patrol units over 100,000 miles, to provide safer emergency response vehicles for our officers and community. | Milton Police District | 1 | 91 to 180 days | 17,000.00 |
| Mahoning | Police Cruiser Upgrade | Electronic fingerprinting equipment. This equipment will help keep officers from driving approx. 30 miles to the county sheriff's office to fingerprint motorists, thus leaving our village with police protection for approximately 1-1.5 hrs at a time. It will also help facilitate the change from hand-rolled fingerprint cards to biometric fingerprint submission to the Bureau of Criminal Investigation & Identification. | Milton Police District | 1 | 31 to 90 days | 60,000.00 |
| Mahoning | Fingerprinting | Take a new prosecutor to represent an existing prosecutor to make up for having to lay off a prosecutor due to the state of the economy. This prosecutor would prosecute violent adult felony offense. | Sebring Police Dept. | 6 | 91 to 180 days | 11,500.00 |
| Mahoning | Mahoning Valley Justice Unit II | A new prosecutor to replace prosecutors that had to be laid off, or retain a prosecutor, because of the state of the economy, that prosecutor would handle violence against women crimes, including sexual assault, stalking and domestic violence. | Mahoning County Prosecutor's Office | 1 | 31 to 90 days | 73,800.00 |
| Mahoning | Mahoning Valley Justice Unit | | Mahoning County Prosecutor's Office | 1 | 31 to 90 days | 73,800.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Marion | Dist 6, PID 85762, MAR Purchase 4 LTVs | Purchase 4 light transit vehicles for the City of Marion | Ohio Department of Transportation | 1 | 31 to 90 days | \$280,000 |
| Marion | Dist 6, PID 85766, MAR Purchase 2 support vehicles | Purchase 2 support vehicles for the City of Marion | Ohio Department of Transportation | 2 | 31 to 90 days | \$30,000 |
| Marion | Dist 6, PID 85763, MAR Computers, dispatch & GPS | Purchase 2 computers, dispatch/scheduling software, and GPS software | Ohio Department of Transportation | 2 | 31 to 90 days | \$78,000 |
| Marion | Dist 6, PID 85764, MAR Purchases 1 copier | Purchase 1 copier for the City of Marion | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,000 |
| Marion | Dist 6, PID 85765, MAR Communication equipment | Purchase communication equipment for the City of Marion | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,000 |
| Marion | Dist 6, PID 85767, MAR Auto transfer token system | Purchase automated transfer token system for the City of Marion | Ohio Department of Transportation | 1 | 31 to 90 days | \$25,000 |
| Marion | Dist 6, PID 85760, MAR Design/eng for renovation | Design/Engineering for renovation for the City of Marion | Ohio Department of Transportation | 1 | 31 to 90 days | \$50,000 |
| Marion | Dist 6, PID 85761, MAR Transit center renov/expans | Transit center renovation/expansion for the City of Marion | Ohio Department of Transportation | 7 | 31 to 90 days | \$350,000 |
| Marion | CSO/SSO Abatement | The City has a Long Term Control Plan in effect and many tasks have been included in our National Pollution Discharge Elimination permit. This mandated by the Environmental Protection Agency and the City currently has approximately 12 years remaining to comply with the Plan. The City has been making progress with separate projects but needs construction to expedite. This will provide the City with the means to get back on track and eliminate illegal sanitary sewer overflows that endanger the well-being of the citizens of Marion. The Dual Rail Industrial Park is adjacent to the \$77 million Northwest Industrial Connector Roadway. There is currently no sanitary sewer service available in the northwest section of the industrial park and as new businesses align themselves along the Northwest Industrial Connector roadway corridor, this will provide the necessary sanitary service to eliminate the need for onsite treatment facilities that could impact the surrounding ground water resources. | City of Marion | 50 | 91 to 180 days | \$2,000,000 |
| Marion | Liftstation for Dual Rail Industrial Park | | City of Marion | 10 | 181 days or more | \$2,000,000 |
| Marion | S.S.T.P. (Sanitary Septage Treatment Plant) for Se | Proposed 70,000 GPD Treatment Plant for septage is intended to service a 2 or 3 County area in Ohio. The construction of each facility is estimated to create 130 jobs. | McGhee's Technical Water Services, Inc. | 139 | 181 days or more | \$3,000,000 |
| Marion | Airport Terminal Building | This terminal is in excess of 50 years old, and the lone structure that houses all the electrical and communication equipment for the airport. Marion Municipal Airport is one of the few in the state that is currently not landlocked and services local businesses as well as UPS, FedEx, and other carriers. This replacement would be with a modern and energy efficient facility. | City of Marion | 50 | 91 to 180 days | \$2,500,000 |
| Marion | 1,100' W. Center sewer lining | Rehabilitation of main sanitary trunk sewer line servicing the City of Marion. This "No-Dig" alternative would provide an environmentally friendly solution to a system that is approaching 100 years old and is in need of repair. This method will virtually eliminate the congestion of the several thousand daily vehicles that would be detoured or stopped for extended periods of time, thus reducing the impact on the environment by emissions, noise, and byproducts of vehicles. | City of Marion | 10 | 181 days or more | \$1,100,000 |
| Marion | 2,300' W. Center Sewer Lining | Rehabilitation of main sanitary trunk sewer line servicing the City of Marion. This "No-Dig" alternative would provide an environmentally friendly solution to a system that is approaching 100 years old and is in need of repair. This method will virtually eliminate the congestion of the several thousand daily vehicles that would be detoured or stopped for extended periods of time, thus reducing the impact on the environment by emissions, noise, and byproducts of vehicles. | City of Marion | 10 | 181 days or more | \$2,300,000 |
| Marion | 3,400' Columbia Sewer Lining | This project directly impacts a regulated combined sewer overflow that is part of our NPDES permit. Rehabilitation of main sanitary trunk sewer line servicing the City of Marion. This "No-Dig" alternative would provide an environmentally friendly solution to a system that is approaching 100 years old and is in need of repair. This method will virtually eliminate the congestion of the several thousand daily vehicles that would be detoured or stopped for extended periods of time, thus reducing the impact on the environment by emissions, noise, and byproducts of vehicles. | City of Marion | 20 | 181 days or more | \$3,400,000 |
| Marion | Reopen metal casting facility to cast large steel | A large European manufacturer of a new medical device for Proton Therapy for cancer treatment has need for approximately \$100,000,000 of large steel castings per year for the manufacture of Proton Therapy treatment machines that will be placed at hospitals and treatment centers throughout the US. Currently the initial manufacturing is done in Europe but the demand for the product is here in the US. The manufacturer's infrastructure is capable of supplying the demand needed for future product. A modular metalcasting facility in Marion Ohio has the size and capacity needed to manufacture these products. To upgrade and reestablish the facility will take somewhere between \$1M and \$20M but create 200 jobs starting in 30 days. | buyCASTINGS.com | 200 | 31 to 90 days | \$10,000,000 |
| Marion | 1,300' Normandy/Virginia Sewer Replacement | This project directly impacts a regulated combined sewer overflow that is part of our NPDES permit. Replacement of this 1,300 foot sub-system critical to eliminating Sanitary Sewer Overflows as the result of failing sanitary and storm lines in this area. This not only offers sewer quality but also affects the quality of life for the residents in this neighborhood. | City of Marion | 10 | 91 to 180 days | \$1,300,000 |
| Marion | Airport Ditch Enclosure | The Marion Municipal Airport is one of the few airports in the state of Ohio that is not landlocked. This ditch enclosure will permit better access to property currently owned by the City. This ditch is also a safety concern because it runs parallel to a hangar and roadway. Every year, erosion of the ditch banks causes the roadway to fail and has caused significant damage to the docks outside the hangar. Eventually this erosion will prohibit the use of the hangar and will affect the structural integrity of the building itself. | City of Marion | 8 | 31 to 90 days | \$750,000 |
| Marion | Generator at City Hall/Recreation Dept | The current generator is diesel powered and is over 30 years old. Repair parts are no longer available for this piece of equipment. City Hall houses the Dispatch Unit for Police and Fire Units. The current generator is unreliable, inefficient, and wastes the power. A new generator will be more efficient and environmentally friendly. It would also provide power to the Recreation Center adjacent to the Municipal Building and would be used as an emergency shelter for disasters. | City of Marion | 10 | 31 to 90 days | \$200,000 |
| Marion | Replacement Roof on City Hall | The municipal building for the City is over 30 years old and the roof is in dire need of replacement. Repairs have been made but are no longer a viable option. The top floor of this building houses the Health Department, Auditing, Council Records, and Engineering. All of these departments have and store sensitive documents that must not be damaged. The roof currently leaks into these departments. | City of Marion | 8 | 31 to 90 days | \$100,000 |
| Marion | Transit Bus Terminal Building | The municipal bus terminal is the hub for local transit as well as a hub for Greyhound. This structure is a retrofit and is severely deteriorated. The replacement of this structure will provide for the necessary technology improvements as well as a secure and safe location for users of both transit operators. | City of Marion | 15 | 91 to 180 days | \$300,000 |
| Marion | Center/Church Street Relignment | These two major corridors for Marion are predominantly one way streets due to the increase in vehicular traffic over the past 50 years. This realignment will allow for these two streets to be improved to two directional travel. This will not only promote more efficient movement of vehicles but the downtown core district, but will allow passengers better access to the downtown. It will also better promote the growth of business uses for the core of the City. | City of Marion | 75 | 181 days or more | \$10,000,000 |
| Marion | State/Prospect Street Relignment | These two major corridors for Marion are predominantly one way streets due to the increase in vehicular traffic over the past 50 years. This realignment will allow for these two streets to be improved to two directional travel. This will not only promote the more efficient movement of vehicles but the downtown core district, but allows passengers better access to the downtown. It will also better promote the growth of business uses for the core of the City. | City of Marion | 75 | 181 days or more | \$10,000,000 |
| Marion | Pumper Truck Replacement | The current pumper truck is over 30 years old. The maintenance costs continue to escalate and parts are difficult to find. This vehicle should be replaced with a more fuel efficient and technologically improved unit. | City of Marion | 2 | 31 to 90 days | \$350,000 |
| Marion | Solar panels for city buildings | This will provide for the municipal building to reduce energy costs, reduce harmful emissions, and promote the GREEN initiative. | City of Marion | 30 | 91 to 180 days | \$2,000,000 |
| Marion | Senior Center Improvements | The facility provides a safe and healthy environment for the aging public of the City and County. This facility has reached its useful life and is in need of major improvements along with plumbing, electrical, and heating needs. A new facility will be designed to be LEED certified. | City of Marion | 20 | 91 to 180 days | \$1,500,000 |
| Marion | Bike path loop from CBD to Rec Centers | The recreational centers in the city are located in such a fashion that these routes will not only improve the healthy aspect of the quality of life but will also provide a safe travel corridor for pedestrians. Having this option will reduce traffic congestion and the release of green house gases. | City of Marion | 40 | 181 days or more | \$3,500,000 |
| Marion | Rehab of CBD parking lots | The central business district is the core of the City of Marion. These parking lots will require new pavement and handicap accessible facilities. Some facilities have become a hazard to the general public. Providing these parking areas allow business district users to park and walk to the downtown area, thus reducing the noise and air pollution caused by traveling automobiles. | City of Marion | 10 | 31 to 90 days | \$750,000 |
| Marion | Replacement roofs/aprons at fire stations | Replacement of failing infrastructure at municipal fire stations. The maintenance of these structures continues to grow. The roofs continue to leak and have passed the point of repair and have to be replaced. The drive aprons have failed and allow water to enter into the foundations of these structures and will cause significant damage in the near future. | City of Marion | 6 | 31 to 90 days | \$300,000 |
| Marion | Caledonia Stormwater Project | Repair and Replacement of existing and non-existent storm water system to prevent constant flooding issues | ADR and Associates | 45 | 31 to 90 days | \$425,000 |
| Marion | Caledonia- Asphalt Repair | Pavement and repair of all village streets | ADR and Associates | 35 | 0 to 30 days | \$350,000 |
| Marion | South Prospect Street Fire Station Replacement | Replace 100 year old fire station that houses EMS services and a ladder truck. Houses 40 fire fighters. Ideally, LEED design building. | City of Marion | 30 | 91 to 180 days | \$3,500,000 |
| Marion | Marion South I/I Reduction | The removal of excess I/I from the sanitary sewer by repair of lateral sewer main joint problems. | Marion County | 4 | 181 days or more | \$125,000 |
| Marion | Eastlawn Manor Sanitary Sewer | 1168 LF of sanitary sewer to serve a 60 ac commercial development | Marion County | 4 | 0 to 30 days | \$100,000 |
| Marion | WWTP Sludge Mngt Improvements | The water pollution control plant processes biosolids for land application. With very high wet weather flows, this equipment, handling, and processing facility undergoes extreme use. These improvements will allow to replace worn out equipment and improve the facility to handle the additional biosolids produced. These improvements will positively impact the water quality of the surrounding environment. | City of Marion | 60 | 181 days or more | \$3,750,000 |
| Marion | Presidential Neighborhood Sewer Replacement | These neighborhood improvements will replace 6,000 feet sanitary sewers in 5 residential streets. These sanitary lines directly impact one of the City's NPDES permitted combined sewer overflows. It will also allow the installation of new storm drain lines in this area. Storm lines are currently non-existent in this area which leads to severe inflow into the sanitary sewers and health concerns with standing water and mosquitoes. | City of Marion | 20 | 91 to 180 days | \$2,250,000 |
| Marion | SD#7 Phosphorus Removal | Installation of a chemical feed system at the WWTP to meet the new phosphorus limits | Marion County | 6 | 31 to 90 days | \$100,000 |
| Marion | Wilson Drive Sanitary Sewer | 2850 LF of sanitary sewer to serve an area with failing septic tanks for 19 residences | Marion County | 7 | 181 days or more | \$275,000 |
| Marion | Grandview I/I Reduction | Removal of 11 sources from the sanitary sewer as follows: 108 footer drains 38 downspouts 20 area drains 52 sump pump removals | Marion County | 10 | 91 to 180 days | \$575,000 |
| Marion | Forest Street Replacement | This project will replace 2,000 feet of sanitary sewers. These sanitary lines directly impact one of the City's NPDES permitted combined sewer overflows. It will also allow the replacement of the storm system in this street. Residents in this area experience sanitary back ups and this poses a health risk for them. | City of Marion | 12 | 91 to 180 days | \$1,000,000 |
| Marion | Landfill Leachate Collection Improvements | The municipal landfill has been closed for over 10 years. The original landfill cell is in need of improvements to its leachate collection system. The City has submitted application to the Ohio EPA for approval to dig the landfill under a Rule 13 authorization. This project will reduce the elevated readings near the old landfill cell that we have been seeing as a rising trend in our sampling and monitoring events and reporting. | City of Marion | 20 | 91 to 180 days | \$750,000 |
| Marion | Fairpark Additional Street Replacement | This neighborhood has shallow bedrock and is prone to flooding problems. The flooding causes standing water which contributes to health concerns of residents. This contributes to excess storm water standing along the sanitary sewer. This area has experienced sanitary sewer overflows due to this excess water. This project will replace 2,500 feet of sanitary and storm lines. It also provide for new curbs to help channel the water in the storm lines and not into the yards. | City of Marion | 15 | 91 to 180 days | \$1,600,000 |
| Marion | Likens Chapel Rd Sewer Replacement | This area is currently serviced by an old force main line that was taken out of service and allowed to flow by gravity. This old line has reached its useful life and does not have adequate slope or size to continue to service this area. This is also one of the areas being explored to be developed into a residential neighborhood. | City of Marion | 12 | 181 days or more | \$875,000 |
| Marion | Replacement Swimming Pool | There is only one community pool owned/operated by the City. The pool is in desperate need of repair and is currently subsidized by the City's general fund. This would replace the pool and facilities with a new and more efficient facility. This facility is a safe haven for many youths throughout the summer. | City of Marion | 50 | 31 to 90 days | \$3,000,000 |
| Marion | Recreation Storage Building | The Recreation Department has many pieces of equipment that are currently stored outside. This structure would allow this equipment to be stored inside and would prevent unnecessary damage caused by the weather. | City of Marion | 30 | 31 to 90 days | \$500,000 |
| Marion | Kenton Ave Grade Separation | Kenton Avenue (State Route 309) crosses Norfolk and Southern and C&N rail lines on the western edge of Marion. At this grade crossing, numerous delays occur on a daily basis. These rail lines enter a switch yard at this crossing. It is also the entrance to Union Tank Car (UTX) which cleans and services rail tank cars daily. This grade separation would eliminate long delays that cause traffic congestion to State Route 309 and 95. This would also minimize the release of green house gases caused by vehicles that are stopped at this crossing. | City of Marion | 40 | 181 days or more | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Marion | Silver Street Reconstruction | This project will replace 8,000 feet of 100 year old storm lines and 5,500 feet of sanitary lines. These lines flow directly to a NPDES permitted Combined Sewer Overflow. Replacement of these lines is part of the City's Long Term Control Plan. Silver Street has not been replaced to avoid the need and is in need of replacement. During the replacement of the storm and sanitary lines, the roadway and curbs will be replaced along with new service laterals to each residential home. These residential laterals are a significant source of cross contamination and excess inflow and infiltration. | City of Marion | 20 | 181 days or more | \$2,500,000 |
| Marion | Reconstruction of State/Prospect Service Rd | These two sections currently have overpasses parallel to these sections. These service roads receive heavy amounts of traffic for deliveries and the traveling public. Maintenance of the street and sidewalks are no longer an option and thus they have to be replaced. Replacement of the access road will improve vehicular safety as well as for pedestrians using the sidewalks. This will provide for proper handicap accessibility along this route. | City of Marion | 20 | 91 to 180 days | \$1,750,000 |
| Marion | S. State St. Reconstruction | South State Street is the one way corridor for State Routes 4 and 423 north thru the City. Heavy vehicles have deteriorated this section to a point where reconstruction is the only option. Signage has been used in the past to notify vehicular traffic that the road is in poor condition. This project will also replace the curbs along this section that has deteriorated past the point of spot repair. | City of Marion | 40 | 91 to 180 days | \$1,250,000 |
| Marion | Delaware Ave Reconstruction | Delaware Avenue is State Route 423 as it enters in the corporation. This route is used heavily by north and southbound vehicles traveling thru the city. This reconstruction would improve the serviceability of the roadway along with promoting the safety of the many businesses along this route. This project has exceeded the normal routine maintenance methods. | City of Marion | 60 | 91 to 180 days | \$2,000,000 |
| Marion | Bellefontaine Ave Reconstruction | The condition and serviceability of Bellefontaine Avenue (State Route 739) has declined dramatically in the past few years. This corridor also has a large culvert that has deteriorated significantly. Bellefontaine Avenue is a two lane roadway with narrow shoulders. The volume of traffic and the need for increased pedestrian safety would dictate the need for the roadway to be widened slightly and rebuilt to 2000 Dept of Transportation guidelines to promote pedestrian and vehicular safety, as well as a reduction in traffic congestion. | City of Marion | 60 | 181 days or more | \$2,200,000 |
| Marion | Bellefontaine Ave Ditch Enclosure | This 2,500 foot open ditch travels thru a dry wooded park and toward the Fairpark neighborhood in the City of Marion. A section of this was cleaned by the Environmental Protection Agency a couple of years ago. Now that the pollutants have been removed, maintenance of the remaining ditch section is a priority. This ditch travels thru a heavily wooded area and access is limited. This project would provide the City with a storm water conduit that is able to be maintained. | City of Marion | 10 | 31 to 90 days | \$1,250,000 |
| Marion | QuQua Ditch Enclosure | This 4,800 foot open ditch travels thru a residential neighborhood and many complaints are logged each year about nuisances with weeds, mosquitoes, erosion, and the safety of children in the neighborhood. Access is limited by structures and there are many complaints and provide the City with a storm water conduit that is able to be maintained. | City of Marion | 10 | 31 to 90 days | \$1,250,000 |
| Marion | Columbia Ditch Enclosure | This 2,000 foot open ditch travels through a residential neighborhood (bordering a school) and many complaints are logged each year about nuisances with weeds, mosquitoes, trash, and the safety of children in the neighborhood. Access is limited and there is currently no maintenance agreement. This ditch is also the direct discharge of an NPDES permitted Combined Sewer Overflow as part of the City's Long Term Control Plan. This project would eliminate these complaints and provide the City with a storm water conduit that is able to be maintained. | City of Marion | 10 | 31 to 90 days | \$1,500,000 |
| Marion | Blaine/Columbia Storm Relief Pipe | This project would install a storm relief pipe to prevent storm water from overflowing into the sanitary sewers. This would reduce the amount of surface flooding that is seen in this area and the occasional sanitary sewer overflow which poses a health risk to the public associated with this area. This project would involve 5,200 feet of new storm line. | City of Marion | 15 | 181 days or more | \$2,000,000 |
| Marion | Fairpark Ditch Enclosure | Current economic conditions have had a negative effect on the crime area of municipalities across the state. Many businesses will be closed to promote the safety and well being of the downtown patron, business owners and residents. | City of Marion | 10 | 31 to 90 days | \$1,000,000 |
| Marion | Mt. Vernon Ave Storm Relief Pipe | This project would install a storm relief pipe to prevent storm water from overflowing into the sanitary sewers. This would reduce the amount of surface flooding that is seen in this area and the occasional sanitary sewer overflow which poses a health risk to the public associated with this area. This project would involve 5,200 feet of new storm line. | City of Marion | 5 | 181 days or more | \$250,000 |
| Marion | Security Camera in CBD | Approximately 7,200 feet of "overwide floodplain" ditch channel constructed, with another 10,500 feet of traditional ditch excavation to complete the main channel. | City of Marion | 3 | 91 to 180 days | \$1,000,000 |
| Marion | McKibben Ditch | Approximately 3,100 feet of traditional ditch channel excavation for Lateral A. Approximately 2,500 feet of traditional ditch channel excavation for Lateral B. | Marion Soil and Water Conservation District | 25 | 181 days or more | \$350,000 |
| Marion | Transit Updates | The expectation for this project is to create a sedimentation point upstream of the Cletangy River; dissipate flood flows; increase structural while remaining channelized flow; all to improve water quality. | City of Marion | 3 | 181 days or more | \$423,000 |
| Marion | Franconia Avenue Sanitary Sewer Replacement | Replacement of four buses and miscellaneous hardware and software to improve the efficiency of the transit system that serves mostly low to medium income citizens. | City of Marion | 30 | 91 to 180 days | \$800,000 |
| Marion | Oakgrove/Barks/Waterloo Sanitary Sewer Replacement | This project will replace 3,900 feet of failing sanitary sewers. These sanitary lines directly impact one of the City's NPDES permitted combined sewer overflows. It will also allow the replacement of the storm system in this street. Residents in this area experience sanitary back ups and this poses a health risk for them. The roadway is also higher than the sewers, which prohibits proper drainage of the area. This standing water is a breeding ground for mosquitoes. | City of Marion | 30 | 91 to 180 days | \$900,000 |
| Marion | Woodrow Ave/Henry St Sanitary Sewer Replacement | This project will replace 3,900 feet of failing sanitary sewers. These sanitary lines directly impact one of the City's NPDES permitted combined sewer overflows. It will also allow the replacement of the storm system in this street. Residents in this area experience sanitary back ups and this poses a health risk for them. The roadway is also higher than the sewers, which prohibits proper drainage of the area. This standing water is a breeding ground for mosquitoes. | City of Marion | 30 | 91 to 180 days | \$950,000 |
| Marion | Pennsylvania Ave/Forest Lawn Blvd Sanitary Sewer R | This project will install new 3,000 feet of sanitary sewers. These sanitary lines directly impact one of the City's NPDES permitted combined sewer overflows. It will also allow the replacement of the storm system in this street. Residents in this area experience sanitary back ups and this poses a health risk for them. | City of Marion | 25 | 91 to 180 days | \$750,000 |
| Marion | Elk Avenue Sanitary Sewer Replacement | This project involves replacing the storm and sanitary sewers in 600' feet of Elk Avenue. Both the storm and sanitary are undersized and do not have the adequate slope to convey to service this area. This will also install culverts to direct the water into the storm system to help eliminate pond flooding and stagnant water pools. | City of Marion | 10 | 91 to 180 days | \$125,000 |
| Marion | Milburn Avenue Sanitary Sewer Replacement | The project involves replacing the storm and sanitary sewers in 1,500 feet of Milburn Avenue. Both the storm and sanitary are undersized and do not have the adequate slope to convey to service this area. This will also install culverts to direct the water into the storm system to help eliminate pond flooding and stagnant water pools. Weekly routine cleaning and jetting are performed on this section of public sewer to prevent backups. | City of Marion | 20 | 91 to 180 days | \$300,000 |
| Marion | Royal Oaks Sanitary Sewer Grouting | This neighborhood is serviced by city sanitary sewer but is not incorporated. The storm system has failed in this area and the sanitary receives large volumes of storm water. This is a leading cause of a Sanitary Sewer Overflow when we experience 2 or more inches of rain. Without the storm system being replaced, the 4,000 feet of sanitary sewers need to be installed. This "no dig" clean method will help eliminate the sanitary sewer overflow and will not cause undue hardship to residents in this area or to the environment from vehicle emissions. | City of Marion | 10 | 91 to 180 days | \$100,000 |
| Marion | Marion Plaza Area Sanitary Sewer Rehabilitation | This neighborhood is serviced by city sanitary sewer but is not incorporated. The storm system is failing in this area and the sanitary receives large volumes of storm water. This is a leading cause of a Sanitary Sewer Overflow when we experience 2 or more inches of rain. Without the storm system being replaced, the 2,000 feet of sanitary sewers need to be installed. This rehabilitation will focus on "no dig" clean methods (such as grouting or pipe trench) and will help alleviate the sanitary sewer overflow and will not cause undue hardship to residents in this area or to the environment from vehicle emissions. | City of Marion | 10 | 91 to 180 days | \$100,000 |
| Marion | paving township roads | saving township roads 9.54 miles This is the highest traveled roads in our township. | Pleasant Township, Marion County | 30 | 0 to 30 days | \$250,000 |
| Marion | New Fire Dept | The Station to house a full time fire department. We are serving the 2nd largest township in Marion County. | Pleasant Township Fire Dept. | 200 | 91 to 180 days | \$1,700,000 |
| Marion | Marion PD Cops Grant | Five 5 police officers to move closer to authorized strength and increase public safety in Marion, Ohio utilizing the COPPS hiring grant. Currently there are 62 officers but the authorized strength of MPD is 69 officers. The economy has prevented us from maintaining the appropriate number of sworn law enforcement personnel. | Marion, Ohio Police Department | 5 | 31 to 90 days | \$900,000 |
| Marion | Rehab storm drainage system | An active civil service list exists and will not need rehabilitation airport storm sewer system. | City of Marion | 7 | 31 to 90 days | \$400,000 |
| Marion | Well Water and upgrade energy efficiency | This project will include drilling a new 8" well for new water supply for both high school and elementary buildings. It will include approximately 300 linear feet of new water line, 2 each 275 gallon water retention tanks, 270 gallon pressure tanks and water softener tanks. It will also include all new plumbing in the elementary building. It will also include retrofitting all lights and fixtures, upgrade mechanical systems, new boilers and boilers and occupancy sensors for all rooms in both the high school and elementary buildings. | Ridgedale Local Schools | 75 | 31 to 90 days | \$2,500,000 |
| Marion | Marion Mental Health Infrastructure and Technology | These projects: The first covers renovation and repair to alcohol and drug residential treatment facility which serves up to 14 individuals with alcohol and drug treatment. Repair of restrooms, replacement of windows to increase energy efficiency, replacement of porch and handicap ramps, purchase of energy efficient appliances. The second is for annunciation to a supervised apartment complex for persons with serious mental illness. This would cover the demolition, installation of appliances and landscaping. The project provides much needed renovation to a critical housing project for persons with serious mental illness. The first part of the project allows for an upgrade to technology and electronic records. Funds requested will help provide three new data servers for records, 5 laptop computers, three printers and networking for Foundations Recovery. MCHC will also help significantly increase technology to better serve mental health and substance treatment clients. Outcome: to increase communication between case managers and clinical staff; to increase energy efficiency in both facilities; to provide secure, safe housing for the mentally ill. | Crawford-Marion Board of Alcohol, Drug Addiction a | 4 | 0 to 30 days | \$648,600 |
| Marion | FY08060 Marion County Telephone Company | The requested amount would fund the removal of asbestos and abate the lead based paint in the proposed renovation of historic building. removal 32,600 square feet of any asbestos site. 480 square feet of asbestos pipe insulation. abatement: 9,476 square feet of lead based paint. Proper disposal of resulting material of above processes in qualified disposal sites. | Schwab Ventures LLC | 2 | 91 to 180 days | \$30,000 |
| Marion | ODMRDD County Board Projects | Various infrastructure projects at 34 ODMRDD County Board Facilities. | Ohio Department of MRDD | 170 | 91 to 180 days | \$27,869,000 |
| Marion | Well and Water Plant Project | The Village of La Rue can no longer use 1 of their current wells. They are going to have to relocate because they do not have the 300 foot station (radius required) at the current site. They are looking to obtain ground to drill 2 new wells and possible a new treatment plant since the current plant is over 60 yrs old and beyond repair. | Village of La Rue | 0 | 181 days or more | \$2,000,000 |
| Marion | Sewage Treatment Plant | Adding additional filter tanks to meet EPA requirements. | Elgin Local Schools | 8 | 181 days or more | \$100,000 |
| Marion | Northwest Industrial Connector | The Northwest Industrial Connector (NIC) is a very exciting and important project for the Marion community and central Ohio. NIC is the number one priority project for Marion County and City of Marion. We have been working on this project since 2004. Following is a brief outline of project description and development. The NIC will include the construction of a 2.163 mile, two lane connector road between BR 96 and Marion-Williamson Road, northwest of the City of Marion. The project will also include a 321 foot bridge overpass, intersection construction, turn lanes at BR 96 and BR and two new bridge structures will also be a part of the project. The Whitpool Corporation, Marion's largest employer, had announced a major expansion. In a request to the Ohio Department of Development they asked for a roadway to improve the congested local roads traveled through downtown Marion. As currently stands, the Marion County Commissioners, Marion City Mayor and council, Marion County Engineer embraced this request (Agreement signed with OODD in June 2005). It has been a long standing problem with the major route (U.S. 29) being located on the east side and our industrial area located on the west side of | Marion County | 3000 | 31 to 90 days | \$5,100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Marion | University Drive | University Drive The project will involve the construction of approximately 2200 Lin. Ft. of new 3 lane roadway that will complete a connection between two state routes in our growing commercial district. Through Local Investment and conditions of the sale of county property, half of this roadway was constructed in 2007. This roadway begins at SR 62 in front of our OSU campus and Marion Technical college campus and runs north towards SR 300 and the west entrance of the new Marion City High School (constructed in 2004). With the location of the intersection, the roadway will be taking three of our largest education complexes, the OSU / Marion Technical campus and the Harding High School campus (Marion City). Students taking college level courses during their high school years will be able to walk from one to the other on public sidewalks after completion of this project. This roadway will also provide traffic flow patterns to alleviate peak congestion from the High School. The major benefit of completing this project is to spur more economic growth in the area. The roadway is part of a master plan to link our growing commercial areas. This will allow more development while reducing the impacts on the main state route, already having congestion problems. Our | Marion County | 150 | 91 to 180 days | \$1,300,000 |
| Marion | 1st Consolidated Fire District Building Project | The building requested is in direct line with our plans of consolidating three fire departments and becoming a joint district. In this rural area the need is cost effective due to current overpricing of equipment, services, and maintenance of three buildings. The current Fire Chiefs have been in discussion early on concerning the services but also having the building officially designated as an Emergency Operations Center including the capabilities of dispatching. The current buildings are extremely aged and not energy efficient. Upgrading the individual buildings is a cost effective. Each department utilizes their annual budgets just to keep the doors open and be able to respond to the public needs. The proposal is a well developed cost effect project. However without assistance will not come to fruition. The building would be designed to meet the needs of the future growth and enhance the capabilities of all three departments who already current work together. | 1st Consolidated Fire Department | 175 | 31 to 90 days | \$2,968,200 |
| Marion | Village of Morral Wastewater Study | Study to determine feasibility of constructing a wastewater treatment facility within the Village of Morral. Marion County 66-G: Bridge over Little Scioto River | Village of Morral | 10 | 31 to 90 days | \$30,000 |
| Marion | Marion County 66-G: Bridge over Little Scioto | The structure involved is a 3-span pre-stressed box beam bridge with a total length of 141 feet. The bridge was constructed in 1959. At the present time, the structure has severe deterioration of the color pre-stressed box beams along with deterioration of other beams. The structure originally did not have any waterproofing techniques involved. The structure is located on a main road that is the primary roadway to one of our local school districts. The roadway has approximately 2852 vehicles per day. The work proposed includes minor abutment and pier seat repair. The superstructure will be completely removed including all beams. Minor roadway work will be involved with items like new guardrail and approach pavement and pavement markings. Project costs are estimated at \$400,000.00. | Marion County | 30 | 31 to 90 days | \$400,000 |
| Marion | Marion County 195-G: Bridge over Olentangy River | Marion County 195-G: Bridge over Olentangy River The structure being rehabilitated is a single span welded truss bridge that was built in 1954. The structure has a total span of 30 in. Ft. The steel structure has severe rust and section loss to members in the structure. The route that this structure is located is a vital crossing for the farming community and emergency responders. The proposed work involves a total rehab of the structure. All hanger beams and floor beams will be replaced with new floor system. Minor abutment repair and approach pavement and guardrail will also be included. The proposed work can be bid almost immediately and construct very quickly. Project costs are estimated at \$450,000.00. | Marion County | 30 | 31 to 90 days | \$450,000 |
| Marion | Marion County 126-C: Bridge over Battle Run | Marion County 126-C: Bridge over Battle Run The structure being rehabilitated is a single span pre-stressed concrete box beam bridge that was built in 1967. The structure has a total span of 30 in. Ft. At the present time, the structure has severe deterioration of the color pre-stressed box beams along with deterioration of other beams. The structure originally did not have any waterproofing techniques involved. The route that this structure is located is a vital crossing for the farming community and emergency responders. The work proposed includes minor abutment repair. The superstructure will be completely removed including all beams. Minor roadway work will be involved with items like new guardrail and approach pavement and pavement markings. Project costs are estimated at \$150,000.00. | Marion County | 30 | 31 to 90 days | \$150,000 |
| Marion | Asphalt Repaving | Roads and parking areas need to be ressealed on our MRDD compound which have not been ressealed since 2004 and 2001. | Marion County Board MRDD | 2 | 31 to 90 days | \$150,000 |
| Marion | Roofing Repairs | Two buildings on our main MRDD compound are due need of repair. | Marion County Board MRDD | 2 | 31 to 90 days | \$70,000 |
| Marion | School Renovations | Renovation of a school building built in 1988 to include roof replacement, plumbing upgrades, HVAC upgrades and electrical upgrades. This project will employ several contractors within the county of Marion, Ohio. | Marion County Board MRDD | 8 | 181 days or more | \$1,500,000 |
| Marion | Fire Station | Construction of a new Fire Station and Community Building to serve the Greater Marion County Area | Green Camp Township Fire Dept. | 36 | 91 to 180 days | \$4,800,000 |
| Marion | Barks Road Infrastructure Improvements | This project includes the complete reconstruction of a 2000' section of the most heavily traveled roadway on the Marion County Road system. Average daily traffic for this stretch of road is 10,000 plus cars per day. The section of road proposed for this project is the most heavily traveled section of the roadway and is in need of repair and improved safety provisions. The last major reconstruction of this roadway was in 1972. This seven year span of constant day with minor resurfacing has left a roadway that is badly in need of rehabilitation. The proposed work will include milling of the current asphalt pavement and adding a new wearing surface composed of Super Pave asphalt, installation of all new curbs and gutters, replacement and upgrading of all storm water structure inlets, and the installation of a right turn lane. This project will improve this section of Barks Road and match the improvements made to the adjoining section of Barks Road that was improved through a substantial investment by the City of Marion area. | Marion County Engineers Office | 30 | 31 to 90 days | \$500,000 |
| Marion | Marion County Garage Facility Restoration | Project will include the following improvements to County Garage: two new roofs (silt barn, office), new security fence & gate, new generator, generator, drainage improvements, furnace, and repair bay for large equipment. Current facility was built in early 1900's to 1940'. Only one building was built since, silt barn 1976. County has continuously repaired existing items but all have reached the end of repair work. Facility needs modernized to properly deal with County needs. Department works closely with Sheriff in all disasters (natural and manmade). The improvements are vital in allowing, steps to quickly and continuously respond and support Sheriff in disasters to make the circumstances or situations. | Marion County Engineer's Department | 60.00 | 0 to 30 days | \$650,000 |
| Marion | Waldo Sanitary Sewer Collection and Treatment Syst | Currently the Village is served by relying on site septic systems. Ohio EPA has mandated construction of a centralized wastewater collection system for the Village. | URS Corporation | 12 | 181 days or more | \$3,500,000 |
| Marion | company/employee revitalization project | The purchase of equipment that would help the employe more people like to do larger jobs. These funds would be used to purchase a compactor, a skidder and a truck. This would increase sales 5 to 30%. | jones blacktop & excavating inc. | 6 | 31 to 90 days | \$68,000 |
| Marion | Marion County Courthouse Renovation | This project will encompass the replacement of windows, landscaping and refurbishing loose or broken sandstone | Marion County Commissioners | 150 | 0 to 30 days | \$1,800,000 |
| Marion | Marion County Courthouse Renovation | This project will renovate the interior of the Marion County Courthouse. The improvements will eliminate some 30 fire code violations, provide needed space and reduce office space lost to deterioration. | Marion County Commissioners | 150 | 0 to 30 days | \$7,000,000 |
| Marion | street resurfacing | resurface approx. 1.5 mi. of village streets. | village of prospect | 15 | 0 to 30 days | \$160,000 |
| Marion | construct new municipal building | construct new 60x100 town hall. | village of prospect | 40 | 91 to 180 days | \$1,950,000 |
| Marion | wastewater system I&I study and repair. | locate and repair leaks in aging sanitary sewer system. | village of prospect | 10 | 31 to 90 days | \$175,000 |
| Marion | New Vision Fire and Rescue Fire Department Complet | Funds to be used to complete construction of a 18,560 sq. ft. facility housing a volunteer fire department and community center. The money will be used to complete construction of the department portion of facility as well as finish preparing the building to function as an emergency shelter and training facility. Money will also be used to purchase and install a power generator, purchase and install a water pump to provide water to fill the trucks, and the hiring of personnel to manage and maintain the facility. | James H. Johnson - Charles Rudd Community Complex, | 15 | 0 to 30 days | \$500,000 |
| Marion | School Support Training Program | With school districts desiring to develop data driven decision makers at all levels of staff, Tri-Rivers Educational Computer Association (TREC-A) in association with Marion Technical Institute are partnering to develop a DCOM training program for the displaced workers of Marion County. The school districts that make up the TREC-A consortium desire highly skilled data experts that can manage their Data Reporting needs as well as their Student Information System, eSIS. By developing a program geared towards their data needs the TREC-A districts will have staff that are highly skilled in the areas of eSIS, DIA2, EMS-R and Schools Interoperability Framework (SIF). As the fastest growing eSIS Information Technology Center (ITC) in Ohio, TREC-A's skill and expertise sets us apart in Ohio and the logical choice to lead such an initiative. The schools of TREC-A sincerely appreciate your considering this request. The Joshie B Project is designed to give three individuals the opportunity to gain work experience through efforts as a support staff for The Joshie B. | Tri-River's Educational Computer Association | 50 | 0 to 30 days | \$250,000 |
| Marion | The Joshie B Project | It will create three Positions that will assist in day-to-day activities and operations surrounding The Joshie B including but not limited to: scheduling, cooking, food, phone operation, and cleaning. heavy pier walls, rebar and rebar lower stone steps, remove and replace 6 railings with ADA approved ones, remove and replace existing concrete walks. | The Joshie B | 3 | 91 to 180 days | \$100,000 |
| Marion | Heritage Hall ADA Improvements and waterproofing | West Side Steps: remove concrete landings, remove upper stone steps, excavate soil to footer level along the west side of building to first basement door opening and waterproof, add drainage board, insulation, 4" PVC drain line and that fabric, backfill with #617 gravel, tamp and re-install steps and install new concrete landings. The Marion County Historical Society museum, Heritage Hall is housed in a 1910 Federal Post Office which is on the National Register of Historic Places. We are visited by approximately 3,000 people per year, many of them physically handicapped in some way. This project will make the building and its collection more accessible to all by helping to better preserve our collection by providing much needed | Marion County Historical society | 6 | 0 to 30 days | \$76,650 |

| Marion | Data Warehouse Initiative | The school districts that make up the Tri-Rivers Educational Computer Association (TRECA) consortium are in the pilot stage of a project to implement a Data Warehouse system. The Data Warehouse, Verifi, will give the districts unseen access to the data that they manage thus empowering them to become better guardians of their Student, Fiscal and Testing information. The TRECA consortium is excited to be the 1st Information Technology Center (ITC) in Ohio to utilize a data warehouse. By utilizing a data warehouse our district's Administrators (School and Central Office), Support Staff and Teachers will have instant access to student information as never before. Unlike other initiatives, that have been implemented in Ohio in the past the data warehouse gives the power to the user to ask the questions necessary to make informed decisions regarding students, schools and curricular issues. TRECA supports 82,000 students across 47 school districts across the State of Ohio. The schools of TRECA sincerely appreciate your considering this request. | Tri-River's Educational Computer Association | 3 | 0 to 30 days | \$300,000 |
| Marion | Restoring one of Ohio's rivers back to a "GREEN" e | Drugging the river beds and banks. Clearing and cutting up trash from the banks. Re-erecting dams. Allowing unobstructed habitat and wild animals to be safer and healthier. Allowing nature to once again regain her beauty. This would give an estimated 500 unemployed people jobs, with pay checks to maintain their households. Yet give the unemployed back some jobs of worthiness. Being apart of a "GREEN" project like this would be conversations for years to come. Not to mention this river, The Scioto... is screaming to show its beauty again. P.S. I am emailing this request forward hoping for a "YES" consideration of a grant-aid action. The information above is not yet a commitment. Yet is a dream, not only my dream. A dream from the people of Ohio who can see what this river can be again. The unemployed will come. The unemployed will give the State of Ohio good work on this project. Needing the State of Ohio and to contacts to organize the committee and I include myself. Another Ohio unemployed worker. | Scum Crawls In Our Towns Outrageously Resulting In | 250 | 181 days or more | \$10,500,000 |
| Marion | School Resource Officer | Provide resources to expand school resource officer program in the City of Marion. This officer will provide all criminal justice services at Tolt Middle School, including crime prevention, security and education. | Marion, Ohio Police Department | 1 | 31 to 90 days | \$75,000 |
| Marion | Business Expansion | This would be an increase in employees of 67% and also add my business in establishing a more environmentally friendly footprint. As a small business in Ohio, we would be employing local people, and stimulating our local economy as well with additional goods in services. This would also benefit the state through increased payroll taxes, sales tax, and jobs - not to mention the environmental benefits. I am more than willing to discuss any questions which would aid being eligible for funds. | R & T Cook Enterprises, LLC | 2 | 0 to 30 days | \$85,000 |
| Marion | Sidewalks to Survival | Marion is a city of approx 65000.00 people. A large percentage of these people are morbidly obese and have many health related problems. Almost every agency, hospital facility, shopping area is built with parking lots and no sidewalks. We are at fault in the lack of sidewalks, especially in the surfing neighborhoods. Many times I've witnessed veterans with their shopping bags on the busy roadside or children walking to school across muddy areas. We can help to encourage the people of Marion to walk, decrease the need for vehicles, exercise, save themselves and save the environment so well if we can provide a "Ten Foot Wide" sidewalk. I'm raising for money to build the necessary sidewalks and will quickly volunteer to start a walking program with the other groups/providers in our community. Connecting Cancer patients and families with appropriate services and established support while sharing information where there are gaps in funding allows. We will empower and support local families while not duplicating current available services. Provide sustainability, housing, legal and educational information. Develop a resource book for the county as a CVENR agency at every county meeting request. Create a health family to family/leisure/health group and website where families volunteer to help other area families including webinars trainings and more. A fatherhood group (education prevention also) promoting fathers involvement in family and community. A searchable website listing available Ohio resources updated often. Develop technical training for teens and a beer/wine/cannabis club. Hold a Community meeting on identifying all available area agencies, co-ops, charities and business utilizing ideas from research to develop jobs and enhance community relations. Establish a club for citizens to learn about local legal and political issues and how to be involved in government. Salaries and the cost to establish and maintain the organization to the amount estimated here. Thank you! | Marion Independent Physicians Association | 100 | 31 to 90 days | \$5,000,000 |
| Marion | Community Enrichment, Families with Cancer Support | Marion County HUGS | 7 | 0 to 30 days | \$720,000 | |
| Marion | MCSO requesting funds for five new deputy sheriffs | The Marion County Sheriff's Office in need of 5 new deputies. In today's world of law enforcement, officers are expected to do more each day in the performance of their duties. In rural settings, where there are many miles separating citizens and communities, law enforcement is technologically enhanced to issues that may remain in the community and still be able to complete their assign duties and paperwork. However, there is a need for Ohio Sheriffs to take on many new duties in the area of civil process and law enforcement and verification. Additionally there are an increasing number of property foreclosures through sheriff's sales of which must be processed, appraised and sold through the sheriff's office. With these added duties and increased demand for services, officers are forced to divide their time between the traditional serving and protecting the public and also completing the more administrative and highly mandated duties. By hiring five new officers the workload of the current officers and the new ones will be more evenly distributed thus ensuring that we are completing all required tasks and duties. | Marion County Sheriff's Office | 5 | 0 to 30 days | \$300,000 |
| Marion | Elgin High School Wastewater Treatment Plant | Elgin Local School District has been issued Findings and Orders from the Ohio EPA to replace the existing wastewater treatment plant at the high school. This WWTP would serve 350 students and faculty members and would bring the school into EPA compliance. | ADR nd Associates, Ltd. | 30 | 0 to 30 days | \$350,000 |
| Marion | purchase new garbage truck | purchase new 20 cu. yd. garbage truck | village of prospect | 5 | 31 to 90 days | \$165,000 |
| Marion | James Way Road Extension | The engineering for the project, including traffic studies, has been completed and accepted by the Marion County Engineer. The project is approved by the Marion County Regional Planning Commission as a Collector Street. The Water Supply Submittal and the P-1 for the project have been obtained. The project has received final permits from applicable construction companies. James Way Extension project will help link the South half of Marion with the main retail area along State Route 95. Currently there is no direct link from Marion-Edison (County Road 168A) to SR 95. The only current access winds through a residential neighborhood. The proposed Extension of James Way would extend James Way from SR 95 South until it intersects with Marion-Edison Road. The project has received final permits from applicable construction companies. The construction costs are estimated at \$425,000. The sponsor has already spent \$310,000 for the engineering and construction costs to bring James Way to its current termination point and would spend approximately an additional \$100,000 in soft cost for completion. James Way Extension will have 1,125 of 36' pavement width, curbs, and sidewalks. The gas side area is currently in the middle of a property that is owed back taxes and registered. The goal is to take possession of the property has down the sides. Sell the property to the abutting land owner to recoup the back taxes. That in turn will help the land located business add on to its building and hire more staff. By doing this project it will employ a company to take down the gas side and clear up the lot. The city will get 60 property taxes paid with the sale of the lot to the abutting property owner, the business will expand the size of the building (bring another building), and lastly, it will allow the business to hire more staff. This one project would lead to several jobs covering several different fields. | Albany Residential Development, LLC | 10 | 0 to 30 days | \$425,000 |
| Marion | Grain Silos | I would like to start a local, non-profit AM Radio station to service Marion and its surrounding counties. The station will feature talk shows with local/regional hosts from all political views - from liberal to conservative, even from blue-state to socialist. It would also feature local sports and events not deemed worthy of coverage by the Clear Channel Network station in town. This would create at least 10 full-time jobs for staff including production, news, personalities, sales, and accounting. I would like to appeal for the grant to help up the cost of the staff's salaries for supplies and the wood used to rebuild the project. | Marion City | 30 | 0 to 30 days | \$359,000 |
| Marion | Phelps AM Radio Project | Background: Marion Industrial Center, Inc. (MIC) opened an Intermodal Facility in Marion, Ohio in June, 2006 and is currently handling a yearly volume of 20,000 containers from a national base of 250 Ohio companies. This facility opened with 6,500 feet of Rail under covers at a cost of \$ 3,000,000. This compares favorably to other facilities normally costing over \$ 6,000,000. Request: MIC now needs to expand adding an additional 10,000' of rail under covers to accommodate the additional volume, longer trains, receiving international traffic. Our yearly capacity would expand to a needed 250,000 containers. This expansion will cost \$ 3,000,000 which would reduce the cost of the rail, crane runways and handling equipment. Benefits: A) Addition of 1,000 jobs + from additional truck drivers, yard workers and employees of new businesses locating in the area. B) Lower logistic costs for existing and new businesses C) Elimination of trucks on the highways. D) Elimination of the pollution by the removal of trucks from the highways. At MIC's current volumes we are eliminated 20,000 truck miles per day. | Phelps AM Radio Project | 10 | 31 to 90 days | \$500,000 |
| Marion | Building and refacing Cabinets | Gerfen's Working | 1 | 31 to 90 days | \$60,000 | |
| Marion | Intermodal Transportation Logistics Project | Background: Marion Industrial Center, Inc. | Marion | Home Rehab | My business buys and rehabs old homes in distressed areas for resale to lower income families providing decent housing that is affordable while reclaiming neighborhoods that are in distress. Bank funding is unavailable now so our operations have been stopped. If I were able to secure a start up loan of significant amount and I would need to hire at least ten to fifteen employees. If I get more I'd get to work rehabbing them. This would create badly needed jobs in my area while also rehabbing some of the many distressed homes in and around Marion and provide people with affordable housing options. Municipal Court Processes 20,000 cases per year, many are criminal violations and/or drug and alcohol related violations. Project is to rebuild transaction counter with a security transaction window and replace swinging door with a ceiling to floor door. This will reduce the risk from potential violent offenders. The current vehicle is over 11 years old and maintenance costs continue to escalate. This would replace the existing vehicle with a flex-haul or kind vehicle to reduce air emissions, improve fuel efficiency, and conserve resources. Install 10,000 feet of 12" water main to reinforce fire flows to the Village of Prospect. Construct new 0.5MG elevated storage water tower; provide fire protection storage | Navigator Homes | 15 | 0 to 30 days | \$200,000 |

| Marion | Marion Tallgrass Prairie Trail Nature Center | The Marion County Park District is seeking to construct a nature center that will be at the trailhead of our county's first recreation trail. We already have \$80,000 from a D&G grant and \$10,000 donation from a local pro-life judge to use towards its construction. However we need more funding to complete the project. This nature center will be located just 1 mile east of the Big Island Wildlife Area in Marion County. This section of the county is home to bald eagles, hundreds of waterfowl, endangered prairie plants and is a transmission zone to ODN for the humpback whale. ODNR Division of Wildlife is also going to partner with us to build a bird observation deck for the center. I am currently the only employee, I can part time and am seeking assistance because our county has been hit very hard by the economic crisis. This nature center will enhance greatly the recreation trail and draw visitors to the area as well as new residents and businesses. We have the support of many businesses in the area. Construction on the trail should begin in September. The blueprints for the building are at the architect's. We would appreciate your help. | Marion County Park District | 2 | 181 days or more | \$250,000 |
| Marion | E2-Controls | To utilize existing highly technical experience and expertise in applying engineering of controls systems to improve the efficiency and control of energy, alternative energy and process reg applications. This project is to continue to produce jobs from conception and forward as a permanent and continuous benefit to the people employed and to the energy and environment. The project is to design & engineer, implement controls systems for the Di & Gas, Wind Power and Solar power applications. | Synergy Control Solutions | 20 | 31 to 90 days | \$750,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Marion | Grand Township Road 67-A Complete Road Reconstruct | This project includes the complete reconstruction of Marion County Grand Township road 67-A. The section of road is 7200' feet long and approximately 16 feet wide. This is the main roadway used by all trucks entering and leaving the Ohio Fresh Egg production facility. The truck traffic generated by this facility is substantially more than the current township roadway was ever designed to handle. Concrete truck traffic combined with a narrow road width has made for a roadway that is virtually unmanageable and dangerous to travel on. We propose to perform full depth pavement reconstruction on the current roadway and use a 16' wide base for a new 18' wide roadway with proper structural support and safety provisions. This project will be good for not only the public that has to travel this broken down roadway but also the Ohio Fresh Egg facility can have a safe and accessible route to their facility. | Marion County Engineer's Office on behalf of Grand | 300 | 31 to 90 days | \$1,200,000 |
| Marion | MCI Windows Upgrade Phase 3 | At the Marion Correctional Institution, replace windows in the main stockade living areas and the MCC living areas that were not replaced in two previous window projects phases. MCI was built in the 1970s and all remaining windows are original and single pane and not energy efficient. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$1,447,500 |
| Marion | Rural Delivery of STEM Education | Entrepreneurs of the Future - Providing Opportunities for Students to Turn their Passion into their Career The goal of the TRECA program is to create a school-within-a-school model focused on the STEM initiative. Collaborating with business and education partners, students will design solutions to real world problems. Our intended outcome is to develop and nurture the new Bill Gates and Steve Jobs in Marion, Ohio and bring back the entrepreneurial spirit that made Marion, Ohio a world educational leader in the early twentieth century. We will create a replicable model of rural delivery of STEM education in Central Ohio. Outcomes may include, but not be limited to, graduating students proficient in 21st Century skills; students who will pursue higher education with local institutions, local school, college, and business collaboration; meeting the personal needs of local businesses; retaining our best teachers, and retaining our best and brightest students by creating relationships with area businesses through internships. The ultimate goal is to strengthen the economy of Ohio by strengthening the economy of the Marion community. | Tri-Rivers Educational Computer Association | 100 | 31 to 90 days | \$50,000 |
| Marion | Railroad Highway Grade Crossing Signal Improvement | CSX Transportation would like to partner with the ORDC to upgrade various Traffic Control devices at Highway/Rail Grade Crossings across the entire state of Ohio. A spreadsheet submitted to the ORDC shows 57 potential locations where upgrades can be considered. The upgrades will vary from upgrading from incandescent flashing lights to LED's to replacement of entire signals and train detection equipment. | CSX Transportation | 180 | 91 to 180 days | \$4,275,000 |
| Marion | Water Tile Project 4400 Black Benzler Rd. | Our properties flood out everytime we get a hard rain. The current tile that supports our properties is only a 4" tile. What I would like to do is run a large tile down the ditch in front of the houses and down an adjacent road and continue the water on down to a drainage ditch put in several years ago. I am just guessing at the amount, because I will have to done with county labor and equipment. However, it will keep these people employed. Thank you for your consideration on our needs. Jack A. Dorn | individual | 5 | 31 to 90 days | \$300,000 |
| Marion | MAR Capitalized Maintenance ; PID 86093 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through COOD. To keep pace with community needs, Marion Technical College plans to build a Health Technologies Center that will house nursing and allied health educational programs. | Ohio Department of Transportation | 3 | 0 to 30 days | \$144,302 |
| Marion | Health Technologies Center | Through the Building for the Future... Together campaign, MTC will realize its goal of providing state-of-the-art learning facilities to train the new workers to desperately needed communities. The new building, which is slated to open in the fall of 2010, will house laboratories, classrooms, offices, and a 150-seat auditorium to support MTC health programs. Our health care programs seek to serve all at risk, we have a waiting list for admission. Our students, on average, are non-traditional, single parents, older, and first generation college students. Due to being in a rural area, the College is designated as an "Eligible Institution" by the U.S. Department of Education. Our graduates stay in the Marion area. | Marion Technical College | 1,000 | 181 days or more | \$500,000 |
| Marion | Well field development and new Water Treatment Pla | Well Field Development - Construction of Water Line to Water Treatment Plant and Rehabilitation of the Water Treatment Plant or Construction of new Water Treatment Plant. | Village of La Rue , Ohio | 8 | 91 to 180 days | \$2,200,000 |
| Marion | Marion County Children Services School Social Work | The Marion County Children Services School Social Work Program (SSW) serves Marion area schools supporting children & families in an effort to remove barriers to learning. Currently, the program consists of three SSWs and one Coordinator. SSWs bring professional knowledge and skills to the school system which helps the school enhance the academic mission by creating and strengthening home, school, & community partnerships. Staff often make home visits and work with families to access community resources. During the 07-08 school year the program provided 226 families. Services were provided to a total of 648 area schools and resulted in 107 referrals to other supports in the community. During that school year the SSWs made 548 home visits. Until the 07-08 school year the agency had realized approximately \$150,000 of revenue from an agreement with Marion SES. This funding is no longer available. It is our request to receive funding from other supports in the amount of \$373,190.80 in order to cover the salary costs incurred by 3 full-time SSWs and 50% of the salary cost incurred by the program coordinator. This will extend the program over the next 2 years. | Marion County Children Services | 4 | 91 to 180 days | \$373,191 |
| Marion | Caledonia Resurfacing Project | Asphalt and Resurface all village streets. 3,100 Units will receive shelter at our local Homeless Shelter (unit = one person per day) | ADR | 35 | 0 to 30 days | \$350,000 |
| Marion | Emergency Food and Shelter | 50 Local residents will receive assistance with one month's rent or mortgage payments. 180 Local residents will receive assistance with utility costs. 26,000 Meals will be provided. 16 families will receive one night's lodging at a local hotel. | United Way of Marion County, Ohio | | 0 to 30 days | \$50,000 |
| Marion | Wind Energy | We are dedicated to conserving our natural resources. We would like to add Wind Turbines (Wind Mills) to the grounds of our facility for energy conservation and cost reductions. | ArccelorMittal - Marion | 0 | 91 to 180 days | \$3,000,000 |
| Marion | DOM Facility | We purchased land across the street from our current Manufacturing Facility to build an additional factory slating in 2010. The economic downturn has prevented our parent corporation from financing this build. There is a railroad spur that runs through this property and needs to be modified as well. We have business for this facility, and it would create 30 NEW jobs! | ArccelorMittal - Marion | 30 | 181 days or more | \$40,000,000 |
| Marion | McKibben Joint County Ditch Project | The proposal is to establish 7,200 feet of "overwide floodplain" channel on the lower end of the project. This area would act as a sediment basin upstream of the Chantary River, as well as helping to dissipate flood flows, and will increase stability while decreasing channelization. These improvements will continue in working toward improved water quality. The upper end of the project will consist of approximately 10,500 feet of the replacement and traditional ditch excavation. There are also two laterals on the proposed project totaling 5,600 feet of channel excavation. | Marion Soil and Water Conservation District | 8 | 91 to 180 days | \$751,000 |
| Marion | Personal Security for Marion County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time on-line tracking of individuals and property while protecting hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security funds are inaccessible when to report suspicious activity. Criminal control, child care, senior citizens, travel, remote operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$139,440 |

| Marion | N State Street Water Main | Replace 550 feet of water main to improve fire flows | Ohio American Water Company | 15 | 91 to 180 days | \$87,450 |
| Marion | Bryant Street Water Main | Replace 1,250 feet of water main to improve fire flows | Ohio American Water Company | 10 | 91 to 180 days | \$148,661 |
| Marion | Prospect Street Water Main | Fix 6-inch water main with 12-inch water main to improve fire flows | Ohio American Water Company | 10 | 91 to 180 days | \$21,200 |
| Marion | Arlington Loop Water Main | Install 875 feet of water main to improve fire flows | Ohio American Water Company | 10 | 91 to 180 days | \$139,125 |
| Marion | business expansion | We would like to grow our business, we are wanting to increase volume. We would like to be able to hire employees for our business. I am a certified podiatrist and started my business in 2006 I am wanting to expand and ensure the growth of my business. Any amount of stimulus funding would help in making sure I can continue to do business and grow the business. | Feet First Orthotic Lab | 6 | 0 to 30 days | \$50,000 |
| Marion | MAPP property upgrade | Construction of abandoned house on property and grading and paving of lot for car and clients of the Marion Adolescent Pregnancy Program. | Marion Adolescent Pregnancy Program, Inc. | 5 | 31 to 90 days | \$100,000 |
| Marion | Drop-out Prevention & Recovery | Jobs for Ohio's Graduates (JOG) of North Central Ohio proposes to serve 200 Marion County at-risk youth, ages 14-21, who have an in-need of assisting and/or have been in the education system prior to attending a high school diploma. The program will provide instruction of employability skills, self-development skills, internship opportunities and postsecondary education opportunities. Instruction will focus upon skills including career exploration, job attainment, job retention, basic math and reading, communication skills, leadership skills, independent living, handwriting. Additionally, program will partner with Marion County JFS, Marion Elgin, River Valley, Rogades, Pleasant, Tri-Rivers and Marion Harding High Schools. Five program specialists will be responsible for success of participants, including job development and placement, high school graduation, postsecondary education enrollment. Expected outcome includes a graduation rate of 50% for in-school youth and 50% among drop-outs, a full-time employment rate of 60% and a positive outcome rate of 60%. JOG has been recognized as a best practice to keep youth in school and become successful by ODFPE. | Jobs for Ohio's Graduates - North Central | 80 | 0 to 30 days | \$200,000 |
| Marion | Cell Dogs - Inmates training service dogs for chll | We will house dogs in prison with select inmates who will participate in their care and training. WAGES staff will hold weekly training sessions in prison, based on a written training protocol, to keep inmates on task and facilitate and monitor the progress of the animals. Once trained, the animals will be given the charge to children in need of mobility assistance and/or shelter construction animals. The organization accepts applications from all over Northeast Ohio and approximately twelve dogs will be placed each year. Additionally, for the inmates, this is a real life skills, rehabilitative opportunity. Once mastered, the skills of animal training could translate into a new work opportunity in any location, without the scrutiny or judgement of potential employers. This is a self-renewed career opportunity. WAGES is a dog place these animals free of charge and will work with families as early in a child's life as there is a need and an interest. Our web address is www.wagesdogs.org | Working Animals Giving Service for Kids | 2 | 0 to 30 days | \$60,000 |
| Marion | BUILDING TRADES & JOBS | The Building Trades Institute (BTI) is a nationally accredited and hands-on training school for persons wanting to learn the construction trades. Currently, BTI is a 4-year program. BTI is currently an approved provider of continuing education for the National Center for Construction Education & Research (NCCER). Once students successfully meet the requirements & standards as established by NCCER, accreditation is provided. Also, the BTI partnerships with 100+ businesses, customized instruction in the areas of flooring installation, GREEN environmental technologies & other training can also be provided. Employment placement is assisted through BTI's consortium of companies union & non-union in Marion JFS. Resume writing, job referrals, job matching assistance are all employed to assist graduates in construction technology that averages \$12,149 upon hire. Students enrolled can be either youth, adults, and/or veterans, organized workers, persons wanting to change vocation, incumbent workers and new hires. BTI is positioned to provide demand construction training and employment in most areas of the state. BTI averages a 90% placement rate. | Building Trades Institute | 100 | 0 to 30 days | \$300,000 |
| Marion | CO2 Emissions Capture Program | We currently operate an ethanol manufacturing facility. Currently, we discharge CO2 emissions. This project would allow us to capture these emissions for re-use. The scope of the project is approximately 250 - 300 tons/day. | POET Biorefining - Marion | 38 | 31 to 90 days | \$5,000,000 |
| Marion | Wind Energy Program Development | Further, the net operating income from the operation will significantly impact the financial performance of the plant. The project will continue operation of the facility, thus job preservation. | Marion Technical College | 250 | 31 to 90 days | \$200,000 |
| Marion | Training Teachers for the 21st Century World | This project would develop a Wind Energy Technology program leading to an Associate Degree. This program is designed to meet the growing need for Wind Energy Technicians in our service area. Current estimates by a prospective company indicate the need for up to 300 technicians during their first year of operation. As part of the state incentive package, we have agreed to develop a program to meet their employment needs. The project will also provide a full certificate program for 15 individuals to complete the associate certificate program. With one-third of Ohio's teachers leaving the profession within the first three years, there is a critical need to prepare our teachers for the 21st century. Nationwide, more than 80% of our universities offer and expect completion in online learning experiences. In this global economy, business may be done as a distance as well. As K-12 educators, we must prepare our students to succeed in a technological world. | TRECA (Tri-Rivers Educational Computer Association) | 500 | 0 to 30 days | \$400,000 |
| Marion | Lunch Room Modernization for 21st Century Schools | TRECA is in a unique position to serve Ohio school districts by providing training for educators to learn to facilitate online courses and to use 21st century tools. Our Teacher Development Center will incorporate an online training course blended with onsite support from TRECA consultants who are highly trained in K-12 learning. In today's economy, many school districts are forced to cut their budgets, reducing staff and eliminating course offerings. E-learning technologies will allow them flexibility to counteract these issues. Through the support of these professional development dollars, the outcome of the project will be Ohio teachers trained to educate students anywhere in the state, the country, and around the world. The focus of this project is to provide a blended learning model to students in schools where the use of time and resources is more efficient and equal to and greater than 50 percent. By providing a robust point of sale system that meets and exceeds local, state, and federal requirements. | Tri-Rivers Educational Computer Association | 43 | 91 to 180 days | \$16,640,450 |
| Marion | SAFE-Learning Support Services Project | It would be the goal of this project that school districts would be able to more efficiently track and monitor the delivery of meals to children in financial need through a technologically enriched system thereby, many additional students could receive the benefits of the federal school meal program. Thus, Title I eligible students that are currently observing these nutritional benefits because of poor or limited point of sale systems could be served. Ultimately, research has demonstrated, that if students are able to obtain a nutritionally balanced meal as a result of the Lunch Room Modernization for 21st Century Schools, their educational experience will be enhanced. Thereby, we will provide opportunities for children that would have not received the full benefits provided through our current educational infrastructure. | TRECA Digital Academy | 5 | 31 to 90 days | \$303,712 |
| Marion | Alternative Energy Consortium | In 2007, the Ohio Department of Education issued its Guidance for developing & implementing Student Learning Support Service Programs for school districts across Ohio. We have a selected program that does not begin to cover all of our students across all of Ohio. The SAFE Program is a LEAD Learning Support Component developed by TRECA and integrated into its academic programming to assist in preventing or reducing barriers to student learning. The program model focuses around three main components: 1. online resources, 2. face-to-face home contacts, & 3. most important local community resources for information, referral and services. SAFE Learning Support Spec's assist students, families, teachers and staff by identifying and reducing "barriers to learning", by identifying, assessing, and referring students and families to needed services and agencies, we increase the likelihood of positive participation, retention, and academic achievement outcomes. The request would enable us to hire 5 additional Learning Support Spec's (Social Workers) to work with Economically Disadvantaged children & families in all 77 counties keeping them SAFE & promoting their academic success (CLAS Model) | Hoffman Analytic Services, Inc. dba Alloway | 100 | 31 to 90 days | \$3,000,000 |
| Marion | Crime Scene Investigation Equipment | Our vision relates to the expansion of existing energy efficiency programs, including energy efficiency retrofits of buildings and industrial facilities. Follow-up projects to establish a consortium of businesses comprised of solar, wind, geothermal, battery, construction, and others who can implement alternative energy technologies. This consortium will provide products to industrial and residential customers. The enterprise will be established in our existing facilities. The funds requested would be distributed to Ohioans in the form of energy rebates or credits on products purchased. Minimal funds would be used for organization, management, or operation of the enterprise. Armpit facilities and power management in place and start up costs involve the creation of a "warehouse" for the goods offered. Having this money available for rebates or credits will help bring the best businesses into the consortium and help them stay in Ohioans, making alternative energy more attractive. The plan promotes conversion to alternative energy, helps multiple businesses in Ohio, and provides equitable opportunities to all Ohioans. The plan indirectly supports production of goods made in this country. | Marion County Sheriff's Office | 2 | 0 to 30 days | \$25,000.00 |
| Marion | MARMET Drug Task Force Civilian Hiring Program | Purchase 30 digital video cameras and hard cases to properly and more accurately document crime scenes involving violence to women and personal interests of victims. Proposal will also include training for prosecutors and domestic violence policy review. A collaboration board will monitor grant and performance objectives to insure all goals are met. Hire a civilian administrative assistant to allow the officers of the county wide drug task force to focus on law enforcement duties and allow the administration of the operation to be done by a civilian. | Marion, Ohio Police Department | 1 | 31 to 90 days | 100,000 |
| Marion | Project-Employment | The project will assist the Prosecutor's Office in the investigation and prosecution of an increasing criminal caseload specifically in the area of drug enforcement, but also violent crime. The funding will allow for continued and increasing work in these areas. While the overall budget of the Prosecutor's Office is decreasing, the caseload is increasing. This grant award would enable the office to keep up with continued and increasing demand by retaining or increasing office staff. | Marion County Prosecuting Attorney | 3 | 0 to 30 days | 60,000.00 |
| Medina | Habitat Restoration Dredging North Park Lake | North Park, Brantwick's nature-oriented park and site of a four-acre lake, is the most visited of all our local parks due to the natural resources and recreational opportunities. The management plan for this lake calls for keeping it open for recreational fishing, which requires a minimum of 8' to 10' least six acres of the lake to produce a thriving population of fish. Due to storm water runoff and the lack of funds for dredging, the lake currently has an average depth of 8'. It is in need of dredging to maintain the water level in the winter and summer months due to the low oxygen content of the water. We are seeking funds to dredge about 2 acres of this lake as well as install a siltation pool to collect silt before it gets into the lake. The project will cost approximately \$90,000. | The City of Brunswick | 100 | 0 to 30 days | \$60,000 |
| Medina | Habitat Restoration Hopkins Park | The City of Brunswick adopted a 3-acre junkyard adjacent to a city park which is home to our soccer field complex which provides recreational opportunities for thousands of children and adults. Our current plan is to clean up the junkyard and turn this area into new parking lots for the park. Moving the parking to this area would free up other areas of the park to build new soccer fields. The city has been cleaning up the junkyard through voluntary county projects and the funds issued by the Adopt-A-Tree Program. To date, about \$5,000 have been removed and we have about 5,000 more to go. Several piles of misc debris will also need to be hauled out at which point the EPA will need to test the soils. The clean-up will cost about \$6,000 for the trees and about \$50,000 to collect and haul out the remainder of the debris. This does not include the costs associated with soil removal if required. | The City of Brunswick | 100 | 0 to 30 days | \$56,000 |
| Medina | Taxiway Medina Municipal Airport | Rebuild of the taxiway for the Medina Municipal Airport. The total length is 2,200 feet. | City of Medina | 6 | 31 to 90 days | \$250,000 |
| Medina | Ballistic Vest Replacement | Purchase and replace vend of useful life/warranty expiration of thirty five (35) ballistic vests for law enforcement officers. | City of Wadsworth | 5 | 91 to 180 days | \$30,000 |
| Medina | Fire Station Construction | Acquire land and construct LEED FIVE/MS Station #3 for expanding commercial, industrial and residential growth in southwest quadrant of the district. | City of Wadsworth | 200 | 181 days or more | \$2,000,000 |
| Medina | Dist 3, PID 85768, MED 5 LTVs and 2 fareboxes | Purchase 5 light transit vehicles and 2 fareboxes for the Medina County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$305,000 |
| Medina | Dist 3, PID 85908, MED Facility design | Administration/storage facility design for the Medina County Commissioners | Ohio Department of Transportation | 3 | 31 to 90 days | \$150,000 |
| Medina | Dist 3, PID 85909, MED Facility construction | Administration/storage facility construction for the Medina County Commissioners | Ohio Department of Transportation | 40 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Medina | A Green, Print On Demand Technology-Based Workflow | <p>A Green, Print On Demand Technology-Based Workflow Enhancement</p> <p>For more than 38 years, TMR, Inc., has been helping organizations communicate, motivate, and measure the distribution of information. Located in Medina, Ohio, we provide technology-based vendor-managed inventory, document management, digital printing, variable data printing, fulfillment, and warehousing services.</p> <p>We hope to revolutionize the traditional printing industry by reducing the largely unused materials produced resulting in the utilization of valuable resources.</p> <p>We currently have the equipment to produce the materials environmental friendly. We are requesting the funds to create a technology-based system to manage the workflow more efficiently and effectively. The current economic environment has paralyzed our hopes of creating a system that supports our green efforts of printing what you need, when you need it. Jobs are at risk.</p> | TMR, Inc. | 75 | 91 to 180 days | \$1,000,000 |
| Medina | Regional Public Safety Training Complex | Regional Public Safety Training Facility for Police, Fire, EMS, EMA and HLS exercises, training and certification. Facility to include Hogane Alley tactical facility, indoor range, self defense/physical conditioning gymnasium, EVOG, Burn Building, Class A building, Water Tower, Pump, Transcending Facility, Eviction/Rest, SCBA maze, Indoor/outdoor classroom bldg, semi prop, electrical/power pole prop, initial prop, confined space/hazmat prop, Haz-Mat spill prop, gas meter/pipeline prop, roof prop, small aircraft simulator, sprinker/stand pipe prop, safety vehicle maintenance facility, storage building and fire bay station simulator. | City of Wadsworth | 200 | 181 days or more | \$14,750,000 |
| Medina | School Resource Officer | Create school resource officer to provide DARE and other education and detainer programs at all public and private elementary, intermediate and high school facilities. | City of Wadsworth | 1 | 181 days or more | \$160,000 |
| Medina | Job retention and expansion | Expand our area of home health service into Medina County by opening a branch personnel office. This would provide employment and health care services to more people in Medina and Lorain County. We need assistance with funding advertising, promotion, initial overhead expenses and living costs on a wage level. By expanding we will be able to maintain some existing jobs within our organization that we are struggling to currently. | E.J.Q Home Health Care, Inc. | 100 | 31 to 90 days | \$30,000 |
| Medina | License Plate Readers | Purchase and installation of twelve (12) license plate readers/cameras in patrol cruisers and associated software installations. | City of Wadsworth | 10 | 31 to 90 days | \$324,000 |
| Medina | Job retention and expansion | Expand our home health care organization into Medina County to provide employment and health care services to a larger area. We need assistance with funding advertising, initial overhead and expansion costs. This would provide employment to local citizens in an area with little health care service currently available because of its rural location. This would also create new jobs to maintain some existing jobs that we are currently struggling to maintain because of the economy. | E.J.Q. Home Health Care, Inc. | 100 | 31 to 90 days | \$30,000 |
| Medina | Reverse 911 System | Purchase and installation of a citywide reverse 911 notification system to enhance early warning emergency notification to citizens during public safety and service events including evacuations, severe weather alerts, natural disasters, hot weather/cooling crises, fire and EMS incidents, hazardous material incidents, essential staff recalls and EMA/EOC notifications. | City of Wadsworth | 20 | 31 to 90 days | \$750,000 |
| Medina | Law Enforcement Staffing | Create, hire and equip eight (8) new patrol positions to address inadequate and insufficient shift coverage and enable long term cost savings by alternative shift scheduling. | City of Wadsworth | 8 | 31 to 90 days | \$1,000,000 |
| Medina | Firefighter/Paramedic Staffing | Create, hire and equip nine (9) new firefighter/paramedic positions to address combination station inefficiencies and improve NFPA compliance. | City of Wadsworth | 6 | 31 to 90 days | \$1,000,000 |
| Medina | CAD/RMS Upgrade | Upgrade outdated and inefficient AS400 green screen technology with fully integrated Microsoft based Computer Aided Dispatch, Records Management, Mobile and Queue Based Reporting Software. | City of Wadsworth | 10 | 31 to 90 days | \$500,000 |
| Medina | SCBA | Replace and upgrade twenty-four (24) Fire/EMS Self Contained Breathing Apparatus and mobile cascade servicing system. | City of Wadsworth | 10 | 31 to 90 days | \$250,000 |
| Medina | Direct Conversion of Biowaste to Energy | <p>Complete prototype demonstrator of Proe Afterburning(tm) engine and combustor as described at www.proepowersystems.com/. (This project was funded with angel money until the market downturn and is now on hold pending additional funding.)</p> <p>The Proe Afterburning(tm) engine is unique in being able to directly integrate a low pressure, continuous, combustor into a low-cost engine that can be used in to provide power from direct combustion of agricultural waste, wood waste, and similar biowaste combustibles. The integrated combustion/engine process provides a clean and efficient means for direct conversion of these waste products without additional gasifiers or converters. It will allow farms, lumberyards, and fruit processing plants to power their equipment with what would otherwise be waste products.</p> <p>Completion of the prototype demonstrator will involve researchers in Medina County, fabricators in the Cleveland-Akron-Canton area, and academic institutions such as Case Western Reserve and Akron University.</p> | Proe Power Systems, LLC | 25 | 0 to 30 days | \$300,000 |
| Medina | Addition to Township Firestation/Administration Of | <p>Addition to existing firestation which will serve as administrative offices and extra parking for vehicles.</p> <p>Entirement for parking lot to enable the truck entrance and exiting onto State Highway and to permit residential parking for a new township park planned for the near future. This will enhance the township to provide facilities for the 2000 residents which have never had a park/parklike facilities in the township. Provide restroom facilities for park usage.</p> <p>We would like to provide sewer to the middle of this township because of falling septic systems. Our Medina County Engineer has the plans designed but the project was cost prohibitive.</p> <p>Firestation/Administration Offices & parking \$175,000 Park/Restroom \$100,000 Sewer extension of 2.6 miles \$1,200,000 (would be Medina County owned)</p> | York Township - Medina County | 15 | 31 to 90 days | \$1,475,000 |
| Medina | Dist 3, PID 16592, MED SR 0301 15 885 | Replace deficient 6' Structure | Ohio Department of Transportation | 16.5 | 31 to 90 days | \$575,282 |
| Medina | Replace window blinds in 3 classrooms | Replace Levelor style blinds in 3 classrooms and re-used salvaged vanes to repair additional classroom blinds. | Medina Board of MRDD | 1 | 0 to 30 days | \$3,200 |
| Medina | Heat Pump rm 122 | Replace old unit with modern energy efficient unit | Medina Board of MRDD | 1 | 0 to 30 days | \$4,000 |
| Medina | Heat pump room 125 | Replace old unit with new energy efficient unit | Medina Board of MRDD | 1 | 0 to 30 days | \$3,700 |
| Medina | Dist 3, PID 18232, LOR SR 0083 10 32 | Replace deficient 36' Structure | Ohio Department of Transportation | 25 | 31 to 90 days | \$474,296 |
| Medina | Wadsworth Traffic Signal Improvements | Traffic Signal upgrades and new installations to improve the Safety at several intersections in the City including Downtown. Plans are completed for most, and can be ready to bid quickly. Intersections include: High & Main, State & Main, Mill & Main, Boyer, Prospect & High, Hartman & SR261, West & College, High & Good, Akron & High, SR57 & Seville at I-76 interchange. | City of Wadsworth | 13 | 31 to 90 days | \$730,000 |
| Medina | High Street Corridor Safety Improvements | Overall project includes significant safety improvements to the corridor along SR 94 and I-76 interchange. Driven by high accident rates, the improvements include Design, Right of Way Acquisition, Road Widening, Intersection redesign, Access Management, Traffic Signal coordination, and interchange reconstruction. Elements of this project (design and right of way acquisition) are ready. Project consists of resurfacing Broad and College Streets and various others by milling the existing asphalt surface, making minor pavement repairs, raising the curbs, and resurfacing with asphalt concrete. The project can be ready to bid quickly and will provide a great benefit to the City in maintaining and extending the life of the pavement infrastructure. | City of Wadsworth | 367 | 0 to 30 days | \$6,213,000 |
| Medina | 2009 Asphalt Road Resurfacing | Replace 18 year old manual unit with new ADA compliant automated unit | Medina Board of MRDD | 1 | 0 to 30 days | \$1,100,000 |
| Medina | School lighting upgrade | Upgrade 18 year old manual unit with new ADA compliant automated unit | Medina Board of MRDD | 1 | 0 to 30 days | \$50,000 |
| Medina | Heat pump replacement | Replace aging heat pumps with new energy efficient units. | Medina Board of MRDD | 1 | 0 to 30 days | \$50,000 |
| Medina | Parking Lot expansion | Commuter needed, additional parking area. | Medina County Board of MRDD | 1 | 0 to 30 days | \$60,000 |
| Medina | Wadsworth Municipal Airport Improvements | Project consists of implementation of Airport Master Plan by performing an Environmental Site Assessment and then purchasing the Land required to build the runway and make other necessary short term improvements that are integral to the overall Plan. Request for Stimulus should cover the Environmental Assessment and Permitting phase. | City of Wadsworth | 465 | 91 to 180 days | \$1,231,000 |
| Medina | Front Main Door Replacement | Replace 18 year old manual unit with new ADA compliant automated unit | Medina County Board of MRDD | 1 | 0 to 30 days | \$10,500 |
| Medina | Durling Drive Reconstruction | Reconstruct Durling Drive from Broad Street to School Drive and replace the existing pavement Durling Drive from School Drive to Cincinnati Drive. The City has \$700,000 of the project funded by CTRP and is looking for the balance to complete the entire job. This project can be broken into smaller sections if necessary. | City of Wadsworth | 33 | 91 to 180 days | \$1,100,000 |
| Medina | 2009 Concrete Pavement Resurfacing | Project consists of performing minor rehabilitation to the concrete pavement at various locations in the City by milling the existing slabs, making minor pavement side repairs, and resurfacing with asphalt concrete as needed to level surface. The project can be ready to bid quickly and will provide a great benefit to the City in maintaining and extending the life of the pavement infrastructure. | City of Wadsworth | 11 | 91 to 180 days | \$600,000 |
| Medina | Quadral Drive Corporate Parkway Extension | Complete the construction of Quadral Drive by extending the existing roadway and utilities south to Seville Road opening up approximately 200 acres of additional industrial development. Application is for design and environmental assessment, permitting and construction. Roadway project length is approximately 3,000'. The City has obtained a 2008 federal earmark for this project in the amount of \$862,000. | City of Wadsworth | 68 | 91 to 180 days | \$2,868,000 |
| Medina | Regional Fiber Optic Project | The lack of critical infrastructure hampers the ability to attract emerging companies or companies desiring leading edge advancements in energy and technology. There are over one hundred manufacturing, chemical, energy and medical facilities in existence in this area that are desperate for dependable broadband access. This industrial park is the economic engine of the city, providing 66% of the tax revenue collected from the city's location, and the industrial park is a major interstate highway. The workforce comes from the surrounding county region. The park was built before the need of broadband access was considered and now essential to business survival. It is not now economical feasible for the broadband provider to ask the capital investment in connecting the industrial park to the high speed broadband community. Resurfacing these companies has become increasingly more difficult. Enhancing the IT infrastructure will enable businesses to be nationally and internationally competitive. Studies show that this area will, with updated IT infrastructure, attract twice as many companies and double the workforce. The estimated construction cost for the regional project is \$4.9M. | The City of Brunswick | 1,000 | 0 to 30 days | \$4,900,000 |
| Medina | Replacement of Two Fire Stations | The City of Brunswick is requesting grant funding for the purpose of replacing two fire stations. In making this request the Fire Chief offers the following justifications for new fire stations. We are currently housed in two fire stations whose conditions are significantly deteriorated and whose designs are woefully outdated. Both stations were built under antiquated code standards for a volunteer department. As such, neither station has the required living, training or fire fighter safety health facilities required of a full time fire department. The total cost of the project is \$11.4 Million. We are asking for funding in the amount of \$9.9 Million. The construction would be on land already owned by the City. | The City of Brunswick | 50 | 0 to 30 days | \$9,900,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Medina | Stream and Pond Restoration | Restoration of 350 feet of existing stream and enhancement of existing pond | City of Wadsworth | 5 | 91 to 180 days | \$77,000 |
| Medina | Wetland Trail Enhancement | Construction of 500 feet of boardwalk trail and wetland enhancements in a wetland park | City of Wadsworth | 5 | 91 to 180 days | \$90,000 |
| Medina | Dist 3, PID 13364, MED SR 0421 03.073 | Structure Replacement | Ohio Department of Transportation | 40.2 | 31 to 90 days | \$1,400,000 |
| Medina | Heat pumps (3) room 113 | Replace old units (3) with new energy efficient units | Medina Board of MRDD | 1 | 0 to 30 days | \$11,100 |
| Medina | Overhaul Exterior Automated Doors | Overhaul eight (8) 18 year old automatic doors to extend / maximize service life | Medina Board of MRDD | 1 | 0 to 30 days | \$9,000 |
| Medina | Install Ramp at Main Entrance | Remove curb and construct ADA compliant ramp to increase accessibility | Medina Board of MRDD | 1 | 0 to 30 days | \$2,000 |
| Medina | Replace Concrete Walk at Main Entrance | Replace damaged concrete walk to increase accessibility | Medina Board of MRDD | 1 | 0 to 30 days | \$3,000 |
| Medina | Dist 3, PID 16592, MED SR 0301 15.885 | Replace deficient SR Structure | Ohio Department of Transportation | 16.5 | 31 to 90 days | \$575,282 |
| Medina | Dist 3, PID 16592, MED SR 0301 15.885 | Replace deficient SR Structure | Ohio Department of Transportation | 16.5 | 31 to 90 days | \$575,282 |
| Medina | Wadsworth Community Collaboration Project | The Wadsworth Community Collaboration project was started due to recognized need from the community for a new High School and Rec. Center. A survey and several public meetings were conducted to get input. The project scope grew to include a wide range of necessary community services being offered at this unique facility. Planned funding for the estimated \$104 million, 470,000 square foot facility is in place. The ODF&C is supporting up to 36% of the approved school use area of this project. A local levy passed in November 2008 for a portion of the school facility. This project leverages local, state and private funding. With federal assistance support, all components can be constructed at the same time. Reducing the construction period will result in an increased savings to residents. The project design phase is nearly complete with construction scheduled to start this year. All of the needed land is currently owned by the project partners. Areas of the project still needing final funding are the recreation center, senior center, multi-media study and local funded school components. Additional information www.wadsworthcommunitypartners.com | City of Wadsworth, Wadsworth City Schools, WRH Hos | 2,118 | 91 to 180 days | \$20,000,000 |
| Medina | Dist 3, PID 16592, MED SR 0301 15.885 | Replace deficient SR Structure | Ohio Department of Transportation | 16.5 | 31 to 90 days | \$575,282 |
| Medina | State Road Water Line | Installation of a new water line on State Road from West Smith to West Reagan. The installation will complete a water line loop which will provide additional capacity, system redundancy and improve fire fighting capability. This line both replaces deteriorated lines as well as adding additional service. Total length of the line is 900 feet. | City of Medina | 10 | 31 to 90 days | \$300,000 |
| Medina | Extension of Lodi Water and Sewer to points S of t | This project will promote growth in a low-medium income area in the 1-715-R, 83 region along the E and W corridors of SR 83. S of 1-71 from Medina County to Wayne County and into an area where water and sewer availability has been difficult to accomplish for a number of reasons and has directly resulted in the loss of business activity and at least one e-coll breakout. | Village of Lodi | 500 | 91 to 180 days | \$1,500,000 |
| Medina | Koons Road Booster Pump Station | Booster pump station upgrade which will improve/expand the BPS to increase capacity to the City's southwest quadrant. Vital project to provide drinking water and increase the pressure to this portion of the City of Medina. | City of Medina | 12 | 31 to 90 days | \$200,000 |
| Medina | East Smith - Smokestack Water Main | E Smith road - Lancaster - Smokestack water main installation to complete a major loop which will provide additional capacity, system redundancy and improve fire fighting capability to this portion of the City. Total length is 1,200 feet of new water main. | City of Medina | 8 | 31 to 90 days | \$200,000 |
| Medina | North Commerce Drive Extension | Installation of new pavement to extend North Commerce Drive from Abbeyville Road to SR 18 (W. Liberty Street, Toledo, Ohio). This project will permit the heavy volume of truck traffic to move more efficiently to the north and east (Toledo, Detroit and Chicago). The project will address the wear and tear on passenger vehicles, decrease fuel consumption and be a boost to the economy of an industrial park that has had difficulty reaching needed access highways and better serving with the deterioration of the roads within the industrial park. The extension will include 3,000 feet of roadway, sewer and water. | City of Medina | 20 | 31 to 90 days | \$1,000,000 |
| Medina | Parking Deck for County Courthouse | The parking for the County Courthouse is vital for the expansion of the Courthouse which serves a growing population. The City of Medina has taken on the majority of the cost of the project in order to keep the Courthouse expansion in the Medina Courthouse district. This is a critical project for the sustainability of the district. Without this parking deck the expansion and the court offices and visitors would be outside the district. This would be the catalyst for the decline of retail and service, especially legal, industries to leave the downtown area. The possibility of the deck has already assisted in the decision of one legal firm to move downtown. The deck will have 351 stalls and provide wheelchair court and reduced event parking for the county seat of Medina. The building of the deck will keep 85 jobs downtown, and another 43 to the courts, attract some new businesses that have stayed away due to parking limitations and bring an additional 181 visitors per day to our newly recognized Main Street community. Without the expansion the City would lose an average of 400 employees or visitors in downtown Medina, from the stores and restaurants that are just making it work. | City of Medina | 150 | 0 to 30 days | \$1,500,000 |
| Medina | Rufener Street Culvert Project | City of Rittman in Wayne and Medina Co. This project is in Medina Co. Rufener Street is a main thru street that is heavily traveled. It is a main thru street for residents living in the Highway system in the Medina area as well as an entrance for residents coming in from the North. A small stream culvert has collapsed and we have temporarily patched it, but it needs to be replaced as soon as possible for traffic safety. If we have to close this roadway to wait for available funds, it would cut the city operations apart for public safety. Currently, we do not have the funding to complete the project. We do have basic engineering completed and are ready to go on this project. | City of Rittman | 5 | 0 to 30 days | \$110,000 |
| Medina | Regional Training Center | The Regional Training Center revitalizes an existing lighted structure. The base structure is now available, construction would begin in 30 days employing select tradesmen to convert the structurally sound building in a fast tracked construction project which would have lines to be completed within 180 days. The project will have immediate impact in construction jobs and after the construction project the reimagined building would serve the needs of a training facility. By creating a multipurpose regional public and safety training center that focuses on IT needs, it will serve the needs of displaced worker job retraining, on the job training and allow for advanced training in IT and technical forensics. The facility would support police officers a technical investigation of crimes against children and financial crimes. It will create specialty classrooms for local governments and school systems and will advance our existing partnerships with local universities by providing space for information technology, public safety, apprenticeship programs and forensics. The public will be served by creating the skilled workers that are desperately needed in the region state. | The City of Brunswick | 200 | 0 to 30 days | \$4,250,000 |
| Medina | Senior Citizens Health & Wellness Center | The goal of the Senior Citizens Health & Wellness Center is to provide Brunswick and Medina, Summit & Cuyahoga County residents that are age 60 or older a place to gather and enjoy social activities, enhance skills, and participate in health-themed programs. Such a facility will provide a variety of social, educational and recreational services to meet the wide ranging needs of older adults regionally. In 2006 a committee of senior citizens was established to explore the needs of the senior population and make recommendations on what they would like in a health & wellness center. To place this center on land currently owned by the City near the existing rec center will encourage interaction through the use of existing gymnasium, dance studio, swimming pool and strength training areas, and provide seniors a place to interact with other age groups in a common setting. The facility would provide for nutritionally balanced meals to be available as well as volunteer health maintenance screenings, legal aid, Medicare assistance, providing partnerships with medical facilities, area HEAP and Homebased experts, county health and human services, and other community groups and organizations. | The City of Brunswick | 100 | 0 to 30 days | \$4,300,000 |
| Medina | Oak Street Water Line | Replacement of 2,400 feet of deteriorated water lines on Oak Street. This project will provide integrity to the drinking water and provide for a less costly means of repairing the lines in the future. | City of Medina | 8 | 31 to 90 days | \$150,000 |
| Medina | Widening of State Route 3 | Improvement to the intersection of State Route 3 and E. Reagan Parkway. The project calls for the widening of SR 3 in order to add left hand turn lanes to address the safety and capacity issues. Note: a new elementary school is being completed for the 2009-2010 school year just north on E. Reagan. This project will add to the safety and navigating of the intersection. The total distance of the turning lanes is 1600 feet. | City of Medina | 10 | 91 to 180 days | \$500,000 |
| Medina | West Bergey Lift Station | Construction of 300 feet of new sewer line and elimination of a sanitary sewer lift station | City of Wadsworth | 5 | 0 to 30 days | \$80,000 |
| Medina | US Route 42 Pearl Rd Improvements | The City of Brunswick, Ohio on behalf of its 38,000 residents and 1,100 businesses requests funding the U.S. Route 42/Pearl Road Pavement Resurfacing Project. The Pearl Road project represents a solution to a pressing need that Brunswick cannot address. The Pearl Road project job employ 100 local workers, use local materials and be under contract within 30 days. Pearl Road is 4.2 miles in length, traverses the City of Brunswick and connects residential areas to the central business district. The average daily traffic volume is approx. 4,800 vehicles per day. Pearl Road is functionally classified as "FOOT" as an urban principal arterial. Pearl Road is heavily used by emergency vehicles due to the several multi-alld accidents with adjacent communities and the locations of area hospitals. This area is a challenge for redevelopment and struggling business owners. This improved US route could have the potential for creating nearly 1,000 new jobs. The roadway is exhibiting significant cracking, base damage and rutting. The project intends to remove the existing asphalt surface, perform base repairs, apply new asphalt surface and reconstruct all necessary drainage and stormwater infrastructure to correct and prevent future problems, particularly tree in a community where the police department is heavily understaffed when compared to surrounding police agencies and widely accepted staffing models. The Brunswick Division of Police provides public safety to a city of 38,000 residents with a department staffed with 45 police officers. With local and national increases in violent crime indexes, it is important to understand the importance of adequate staffing of police agencies to protect the citizens who will become the victims of senseless crimes. The Brunswick Division of Police has always prided itself as a highly visible, community-oriented police agency. The Division is a leader in policing strategies in Medina County, housing a multi-jurisdictional dispatch operation and being the lead agency of several task teams, crime prevention efforts, citizen engagement projects and quality policing initiatives. This need to address adequate police staffing is imperative. The economic crisis will result in an increase in crime that will put our citizens and communities at risk. Agencies such as the Brunswick Division of Police by officers should consider this request for a staffing increase grant from the federal stimulus package. The City of Brunswick has a current population of approx 38,000 residents. The NFPA recommended firefighter count for a population of this size is 36 front line fire fighters. Our current staffing level is 24 full time fire fighters. According to NFPA standards we are 33% understaffed. It is our fervent desire to increase this staffing level by six fire fighters. This would help to alleviate our serious understaffing problem. | The City of Brunswick | 100 | 0 to 30 days | \$3,529,662 |
| Medina | Addition of Police Officers | The Brunswick Division of Police has always prided itself as a highly visible, community-oriented police agency. The Division is a leader in policing strategies in Medina County, housing a multi-jurisdictional dispatch operation and being the lead agency of several task teams, crime prevention efforts, citizen engagement projects and quality policing initiatives. This need to address adequate police staffing is imperative. The economic crisis will result in an increase in crime that will put our citizens and communities at risk. Agencies such as the Brunswick Division of Police by officers should consider this request for a staffing increase grant from the federal stimulus package. The City of Brunswick has a current population of approx 38,000 residents. The NFPA recommended firefighter count for a population of this size is 36 front line fire fighters. Our current staffing level is 24 full time fire fighters. According to NFPA standards we are 33% understaffed. It is our fervent desire to increase this staffing level by six fire fighters. This would help to alleviate our serious understaffing problem. | The City of Brunswick | 6 | 0 to 30 days | \$1,740,247 |
| Medina | Addition of Firefighters | The Brunswick Division of Police has always prided itself as a highly visible, community-oriented police agency. The Division is a leader in policing strategies in Medina County, housing a multi-jurisdictional dispatch operation and being the lead agency of several task teams, crime prevention efforts, citizen engagement projects and quality policing initiatives. This need to address adequate police staffing is imperative. The economic crisis will result in an increase in crime that will put our citizens and communities at risk. Agencies such as the Brunswick Division of Police by officers should consider this request for a staffing increase grant from the federal stimulus package. The City of Brunswick has a current population of approx 38,000 residents. The NFPA recommended firefighter count for a population of this size is 36 front line fire fighters. Our current staffing level is 24 full time fire fighters. According to NFPA standards we are 33% understaffed. It is our fervent desire to increase this staffing level by six fire fighters. This would help to alleviate our serious understaffing problem. | The City of Brunswick | 6 | 0 to 30 days | \$1,626,033 |
| Medina | Destination Economic Development Project | The project involves the construction of a new 150,000 sq ft facility into our community. This facility would provide over 200 Ohio prevailing wage jobs in design and construction, job create 250 management and 500 FTE staff positions in retail sales. This 154k site located by the Erie entrance at the city would be a destination retail business with over 3.5 million patrons annually. Of that more than half will be coming from out of state spending their money in the State of Ohio. Brunswick is requesting \$2.1M for land acquisition and an additional \$1.8M to assist in the development of the facility. The facility attracts visitors statewide and would help our local economy by utilizing hotels, restaurants, fuel stations and financial institutions. The facility will include energy efficient green technology creating additional job opportunities in this new and innovative field. Design could begin within 30 days of award and construction start within 30 days. | The City of Brunswick | 1,000 | 0 to 30 days | \$12,000,000 |
| Medina | Roof Replacement for Museum | Replace the slate roof on the 123 yr old Victorian Home that is known as the "John Smart House". It is the museum and home of the Medina County Historical Society, a 501(c)3 organization. The original slate roof is beyond useful life and needs replacement. This grant would pay for a 51yr asphalt shingle roof that will be historically correct and protect the museum from water damage. The museum is used by the general public, researchers, and school children. It serves an important educational role and also protects the artifacts collected throughout the county from all eras of our history. The project segregates a 1970 sanitary lift station through construction of 2800 linear feet of new 8 inch sanitary sewer. This lift station does not meet current standards. | Medina County Historical Society | 3 | 31 to 90 days | \$32,500 |
| Medina | Brookwood Avenue Lift Station | This project eliminates an older lift station and replaces it with 1500 linear feet of 27 inch trunk sewer, increasing the capacity and area available for sanitary sewer service in an residential area. | City of Wadsworth | 5 | 91 to 180 days | \$400,000 |
| Medina | Weber Drive Pump Station Abandonment | This project eliminates an older lift station and replaces it with 1500 linear feet of 27 inch trunk sewer, increasing the capacity and area available for sanitary sewer service in an residential area. | City of Wadsworth | 5 | 31 to 90 days | \$220,000 |
| Medina | I-76 Holmsbrook Interceptor Sewer | Construction of 5000 linear feet of 18 inch sanitary trunk sewer to enable the elimination of pumping stations and allow development of additional commercial and residential properties that is able to have sewer service at the time. | City of Wadsworth | 36 | 91 to 180 days | \$2,000,000 |
| Medina | Hartman Road Sanitary Sewer | Construction of 300 linear feet of 8 inch sanitary sewer to enable access to sanitary sewer for properties which do not currently have access to sanitary sewer. | City of Wadsworth | 5 | 0 to 30 days | \$15,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------|----------------|--------------------|---------------------------|
| Medina | Sanitary Sewer Rehabilitation Program | Improvements will reduce the total amount of stormwater entering the sanitary sewer system and reduce the spikes of influent flow observed at the wastewater treatment plant. The reduced total flow will increase the performance of the wastewater treatment plant and increase the total stormwater loading to the river. These improvements will increase overall regional water quality and value of this river for the general public, increase public health and reduce flooding. The River Styx flows into the Chippewa Creek, which flows into the Tuscarawas River, which is tributary to the Muskingum River, all of which are within the Ohio River basin. According to the Ohio EPA, the River Styx is designated for the following uses under Ohio's Water Quality Standards (OAC 3745-1-24): Modified Warmwater Habitat (MWH), Agricultural Water Supply (AWS), Industrial Water Supply (IWS), and Primary Contact Recreation (PCR). | City of Wadsworth | 21 | 91 to 180 days | \$1,160,000 |
| Medina | College Street Culvert Replacement | The project is the construction of 170 linear feet of 12 x 4 box culvert to reduce flooding damage to businesses and residents in the watershed. | City of Wadsworth | 8 | 91 to 180 days | \$450,000 |
| Medina | Plum Creek Detention Basin | Plum creek detention basin reconstruction involves reconstruction of a 2 acre stormwater detention basin that is not functional and currently has a negative impact on water quality. This project would reconstruct the basin and improve water quality. The stormwater treatment unit has a detention capacity to treat one rain growing precipitation for one service area and one modern security and programming needs of a court. The court system covers multiple jurisdictions with a total population of 120,000 residents. A preferred site has been selected within the historic core of the city. The site is serviced by existing public transportation, adjacent governmental facilities, and state routes. The surrounding properties contain significant opportunities for rehabilitation of historic structures owned by the significant public investment of the court facility. A local developer has committed to constructing a \$15.2million private investment adjacent to the site if the courthouse proceeds. The facility will contain 30,000 square feet within a LEED certified building. The expansion will allow for the growth of 5 to 10 additional staff. Multiple planning and development studies have been completed in the past two years to finalize the size, scope, and functionality of the facility. This will be a major job creation project with full time court, retail and office personnel. | City of Wadsworth | 5 | 0 to 30 days | \$60,000 |
| Medina | Municipal Court Building | The project involves the installation of 20,000 electric and water meters, automated reading, load management and communications systems for the City of Wadsworth. The project would provide opportunity for energy conservation, load management and significant utility operating and while reducing consumer energy demand and consumption. The City of Wadsworth currently has in place the necessary communication infrastructure for meter communications, allowing ease of project implementation. | City of Medina | 175 | 91 to 180 days | \$3,000,000 |
| Medina | Holmsbrook Upstream Forebay Detention Basin | The project provides water quality improvement for the Holmsbrook watershed through construction of a 1 acre detention basin. | City of Wadsworth | 5 | 91 to 180 days | \$110,000 |
| Medina | Main Street Culvert Extension | This project reconstructs 370 linear feet of 78 inch storm sewer that is in very poor condition in an area that has had street collapses recently due to storm sewer failures. | City of Wadsworth | 6 | 91 to 180 days | \$320,000 |
| Medina | Weatherstone ACDE Channel | This project improves water quality through reconstruction of a wetland channel that is 800 linear feet in length. | City of Wadsworth | 5 | 91 to 180 days | \$65,000 |
| Medina | Smart Grid Automated Meter Infrastructure System | The project involves the installation of 20,000 electric and water meters, automated reading, load management and communications systems for the City of Wadsworth. The project would provide opportunity for energy conservation, load management and significant utility operating and while reducing consumer energy demand and consumption. The City of Wadsworth currently has in place the necessary communication infrastructure for meter communications, allowing ease of project implementation. | City of Wadsworth | 92 | 91 to 180 days | \$3,000,000 |
| Medina | Well Field Scada Program | This project would allow remote communication access to 4 drinking water wells for the City of Wadsworth, enabling better water management and water production and consumption, allowing ease of project implementation. | City of Wadsworth | 7 | 31 to 90 days | \$400,000 |
| Medina | Water Treatment Aerator Replacement | This project replaces an 1975 Water Treatment Plant aeration equipment which removes the iron from the raw water supply. | City of Wadsworth | 5 | 0 to 30 days | \$125,000 |
| Medina | Hartman Road Water Main | This project includes the construction of 2500 linear feet of 18 inch water main, including a bore under an intersection. The project will provide better drinking water service to the northern portion of Wadsworth. | City of Wadsworth | 9 | 91 to 180 days | \$500,000 |
| Medina | Chippewa Creek Water Well and Main | The project involves construction of a water well and 6.5 mile 20 inch water line to provide raw water supply to the City of Wadsworth. The project is needed to provide long term water resources for the City of Wadsworth. Project information can be found at: http://www.wadsworthcity.com/watermain | City of Wadsworth | 128 | 181 days or more | \$4,000,000 |
| Medina | New Waterline Projects | The City of Wadsworth recently completed an analysis of capital needs for waterline replacement. Several significant waterline replacement projects due to age, deterioration, water breaks and other needs. This project would replace various waterlines used by businesses and residents throughout the community. | City of Wadsworth | 92 | 91 to 180 days | \$5,000,000 |
| Medina | Northeast Water Tower | This project includes the construction of a one million gallon water storage tank for residents and businesses of Wadsworth. The tank need and location were determined using modeled system improvement needs and the project engineering is 80% complete. | City of Wadsworth | 45 | 91 to 180 days | \$2,500,000 |
| Medina | Broad Street Water Tower Painting | This project is the painting of a 150,000 gallon water tank that is in poor condition. The City of Brunswick identified the need to combine our safety forces into one building. The police, fire and administrative facilities are outdated, inefficient, non-accessible and in separate locations, thus demonstrating the importance of constructing a code compliant municipal safety center. This center would house the department of City Management/Police Director, Police, Fire, Council, Mayor's Court, Tax, Finance, Permits and Inspections, and Community/Economic Development including a multi-jurisdictional, regional police/fire training center. This will provide opportunities for training in homeland security, emergency preparedness and disaster response and recovery. The proposed 75,000 sq ft Municipal safety center will create over 200 prevailing wage jobs in Ohio. The facility will include energy efficient green technology creating additional job opportunities in this innovative field. | City of Wadsworth | 5 | 0 to 30 days | \$250,000 |
| Medina | Public Safety Building | Efficient, non-accessible and in separate locations, thus demonstrating the importance of constructing a code compliant municipal safety center. This center would house the department of City Management/Police Director, Police, Fire, Council, Mayor's Court, Tax, Finance, Permits and Inspections, and Community/Economic Development including a multi-jurisdictional, regional police/fire training center. This will provide opportunities for training in homeland security, emergency preparedness and disaster response and recovery. The proposed 75,000 sq ft Municipal safety center will create over 200 prevailing wage jobs in Ohio. The facility will include energy efficient green technology creating additional job opportunities in this innovative field. | The City of Brunswick | 200 | 0 to 30 days | \$9,000,000 |
| Medina | 24 Hour Emergency Department | This project will give preference to Ohio businesses and stimulate the local economy while building local and regional partnerships. Land acquisition for this project has already occurred and construction will begin within 30 days. The City of Brunswick and Medina General Hospital identified the need to provide a 24 hour emergency department at their existing medical center. The existing urgent care center currently treats over 18,000 patients annually. The construction of a new 25,000 sq ft emergency center is estimated to increase emergency services to 30,000 patients. Currently Brunswick EMS units are forced to take emergency patients to facilities located 30 minutes away which ties up units from remaining close to home providing emergency services to Brunswick residents. The project will provide essential emergency medical needs while creating and retaining over 200 prevailing wage jobs both during design and construction, as well as providing 50 additional medical staff. This project will give preference to Ohio businesses to stimulate the local economy while building local and regional partnerships. Medina General Hospital recently acquired adjacent property to the west of the existing site and completed preliminary drawings for this proposed 24-hour emergency center. The construction documents could begin immediately upon receipt of a grant and be under construction within 30 days. | The City of Brunswick | 250 | 0 | \$8,100,000 |
| Medina | Extension of Water and Sewer from existing termina | Extension of Water lines by 1 mile and Sewer by 1 mile from existing termination points to areas that will serve the 70 acre Lodi Industrial Park as well as the contiguous 80 acres that are for sale for development in Hartsville Township including electric and communication services, and concrete "bboxes". | Village of Lodi | 800 | 31 to 90 days | \$1,000,000 |
| Medina | Highway interchange at S.R. 224 (contiguous extends | Purchase of property at fair compensation to land owners and subsequent construction of a highway interchange at S.R. 224 (contiguous extension of 176 and S.R. 83 that would promote the access of emergency vehicles from the area to Lodi Community Hospital, create a truck traffic by-pass around the Village of Lodi, promote pedestrian traffic shopping areas in the Village of Lodi, and reduce fuel consumption by vehicles using the by-pass by allowing them to maintain steady speeds, avoiding starts and stops, and allowing continuous speed while achieving their destination. This project would open the areas around the interchange to development and promote the growth of the Village of Lodi downtown shopping, historical tourism and business districts by eliminating the thru traffic that currently exists. | Village of Lodi | 100 | 181 days or more | \$5,000,000 |
| Medina | Extension of Water and Sewer behind Lodi Library a | Extension of Water and Sewer 2,000 LF from existing Termination points to areas that will serve 76 undeveloped acres behind Lodi Library and Knowledge Place (veterans care facility), including electric and communication services, and concrete "bboxes". This improvement will aid the growth of the healthcare industry in the area, and promote the training and hiring of healthcare providers. | Village of Lodi | 50 | 181 days or more | \$800,000 |
| Medina | Extension of Lodi Water and Sewer to 1-71/S.R. 83 | Extension of Lodi Water and Sewer to 2 miles to points S of the Village of Lodi that will promote growth in the 1-71/S.R. 83 region along the E and W corridors of S.R. 83. S of 1-71 and into an area where water and sewer availability have been unavailable and have resulted directly in the loss of business activity and at least one e-cold breakout. | Village of Lodi | 30 | 91 to 180 days | \$2,000,000 |
| Medina | Lodi Industrial Park as well as the contiguous 90 | Extension of Water lines by 1 mile and Sewer by 1 mile from existing termination points to areas that will serve the 70 acre Lodi Industrial Park as well as the contiguous 80 acres that are for sale for development in Hartsville Township including electric and communication services, and concrete "bboxes". | Village of Lodi | 800 | 31 to 90 days | \$1,000,000 |
| Medina | Fiord replacement | Replace fiord with bridge to improve river flow and aid in accessibility to the Lodi community park. | Village of Lodi | 5 | 91 to 180 days | \$50,000 |
| Medina | Airport Administrative Building | New Airport Administrative Building for the Medina Municipal Airport. The current building is inadequate and the facility is in need of a building that can provide the needed services for an Airport that handles a significant amount of corporate and personal air traffic. The building will be 2,600 sq feet. | City of Medina | 7 | 31 to 90 days | \$200,000 |
| Medina | Municipal Runway Extension | Extension of Municipal Runway to 4,000 ft will permit the use of additional aircraft to service the facility which is an enabler for Cleveland Hopkins Airport (CLE) and services an extensive industrial park of west Akron, Medina and Brunswick. The extension would be 440 X 75 additional linear feet and width. | City of Medina | 12 | 91 to 180 days | \$800,000 |
| Medina | Rebuild the East to West Runway Medina Municipal | Rebuild the east-west runway at Medina Municipal Airport. The total runway length to be rebuilt is 2,700 feet X 75 feet wide. | City of Medina | 7 | 91 to 180 days | \$400,000 |
| Medina | Chippewa Lake level stormwater filtration and floo | The Project involves the restoration of 300 acres of floodplain along the Chippewa Lake to forested, scrub-shrub, and emergent wetland to lessen the flood levels in Chippewa Lake, improve water quality, remove sediments, treat pollutants, increase ground water infiltration, and increase habitat and species diversity. We would be affecting in excess of 12,000 acres of agricultural and urban runoff. | Medina County Park District | 25 | 31 to 90 days | \$1,650,000 |
| Medina | Property for future hanger expansion | purchase property north and east of airport for the purpose of expanding the hangers and future taxi and runways. The increased demand for the hangers and taxiway is demanding the purchase of the property and construction of the hangers and taxiway. | City of Medina | 4 | 31 to 90 days | \$300,000 |
| Medina | Snow Plow - Debris Removal | Procure for the removal of snow and other debris for runway and taxiway. Current plow is in need of replacement. This is an important piece of the equipment needed due to the facility being an overflow for Cleveland Hopkins. | City of Medina | 1 | 0 to 30 days | \$70,000 |
| Medina | Alternative Fueled Safety Vehicles | We are requesting grant funding for the purpose of replacing two staff vehicles. In making this request the fire chief offers the following justifications for new vehicles. Two of our current vehicles are eight years old or older and are standard fuel vehicles. The warranties are now expired and the vehicles are cost ineffective to repair. In addition we are in need of command type vehicles for our officer corp. If granted, we will replace those vehicles with alternative fuel vehicles which will suffice as staff cars and command vehicles. The estimated cost of this project is \$70,000 per vehicle. We are therefore requesting \$140,000 total to complete this project. | The City of Brunswick | 50 | 0 to 30 days | \$140,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Medina | Nonprofit website automation | We would like to expand our existing software technologies to be able to reach out to Ohio nonprofit organizations in an effort to assist them with promoting and sustaining their organizations. This software would make it cost effective to both build and maintain a web presence and sale of communication tools for their organizations. In addition to reach help them with their fundraising efforts as a state wide reach need more. | Chad Allan Consulting, LLC | 2 | 0 to 30 days | \$25,000 |
| Medina | Community Calendars | We have launched this in 7 Ohio counties and would like to expand to include many more within Ohio. In Medina County for example, over 200 nonprofits post their events and over 4000 residents subscribe to our weekly email newsletter. | Community Calendar Solutions, LLC | 2 | 0 to 30 days | \$30,000 |
| Medina | Youth Safe Haven Amusement Facility | We seek funding to roll this out in 10-15 other counties with the appropriate demographics for such an effort. | LZR, LLC | 15 | 0 to 30 days | \$1,300,000 |
| Medina | Janice Street Reconstruction | The region is in need of facilities to get kids off the streets and into a Safe, Clean, Family oriented facilities. If successful in obtaining funding LZR would construct an 8,400sf facility to house a drug-free, high intensity, healthy and safe environment for the young as well as the young at heart. This facility will serve as safe haven for many youths throughout the year, providing an environment that houses a state of the art teen pop area. The entire region gains to benefit from this project by providing youths with safe, sheltered program activities, evening and after-school activities, and an alternative to being on the street. By providing such an environment helps youth gain self confidence, learn building skills and self respect while promoting a healthy drug-free mentality. This project will be constructed in an area that is a heavily located within minutes of at least 4 schools and 2 major churches, and is estimated to keep some 65,000 youths participating in a healthy, safe, high intensity and sport activities yearly. This project is shovel ready and will create about 10-15 jobs after the project is constructed. | Village of Lodi, Ohio | 45 | 181 days or more | \$1,275,000 |
| Medina | Automated Fingerprint Identification System | Project involves the reconstruction of a badly deteriorated street consisting of installation of curbs, catch basins and storm sewers to replace existing ditches, deteriorated curbs, deteriorated catch basins and underlaid storm sewer; replacement of the existing underlaid and of approximately 50 year old water line; replacement of the existing approximately 50 year old sanitary sewer; replacement of the existing approximately 50 year old overhead electric distribution with a safer underground system; and replacement of the deteriorated concrete and chip and seal pavement with new asphalt pavement. The road improvement project is approximately 2.630 feet in length by 24 feet wide and includes approximately 2,150 feet of water line, 2,800 feet of sanitary sewer and 2,700 feet of electric distribution. | City of Wadsworth | 5 | 31 to 90 days | \$100,000 |
| Medina | MCSO Citizens Law Enforcement Academy | Buyer Justice Assistance Grants: Purchase and install automated AFIS terminal and software to enable ten point criminal and civil fingerprint search capabilities, latent search capability, electronic exchange of fingerprints and responses, 24 hour, 365 days a year. | Medina County Sheriff's Office Citizens Law Enforc | 1 | 31 to 90 days | \$10,500 |
| Medina | Water Treatment Plant Control Replacement | The Medina County Sheriff's Office offers a Citizens Law Enforcement Academy to County residents at no cost to them. This covers all aspects of the operations of the Sheriff's Office. The course is taught by law enforcement officials, court employees, and others, and is co-ordinated by an officer of the Sheriff's Office. Graduates are invited to join the Alumni Association, which does public service work, child safety education, and other work as directed by the Sheriff's Office. Due to lower tax revenues in those times, the Sheriff's Office is no longer able to fund this program in the future are trying to obtain the program. | Village of Lodi, Ohio | 8 | 31 to 90 days | \$81,000 |
| Medina | Howe Street Sanitary Sewer Replacement | Replacement of municipal water treatment plant supervisory control and data acquisition system which is approximately 29 years old with modern computer controlled system. Project will better protect the public health and safety and decrease plant operational costs and associated system downtime due to age malfunctions routinely. | Village of Lodi, Ohio | 20 | 91 to 180 days | \$50,000 |
| Medina | Ohio Street Sanitary Sewer Replacement | Project involves replacement of approximately 1100 feet of existing sanitary sewer which is over 50 years old with a new sanitary sewer. Project is expected to reduce WWTTP plant flows by eliminating extraneous water from entering the sewer system and reduce maintenance costs. | Village of Lodi, Ohio | 20 | 91 to 180 days | \$42,000 |
| Medina | Bank Street Sanitary Sewer Replacement | Project involves the replacement of approximately 1100 feet of existing sanitary sewer which is over 50 years old with a new sanitary sewer. Project is expected to reduce WWTTP plant flows by eliminating extraneous water from entering the sewer system and reduce maintenance costs. | Village of Lodi, Ohio | 20 | 91 to 180 days | \$320,000 |
| Medina | Grove Street Reconstruction | Project involves the reconstruction of a badly deteriorated street consisting of installation of curbs, catch basins and storm sewers to replace existing ditches, replacement of the approximately 50 year old deteriorated pavement, water lines and sanitary sewers, and replacement of the approximately 50 year old overhead electric distribution with a safer underground system. The project is approximately 2,000 feet in length. | Village of Lodi, Ohio | 40 | 91 to 180 days | \$1,035,000 |
| Medina | Vandemark and Kennard Road Water Line Loop | Project involves the installation of approximately 4,100 feet of 8 inch water line to connect a new constant pressure water booster pumping station to the existing high level system. The interconnection will eliminate a segment of the system currently provided with pressure by running the new booster station pumps continuously and will allow the elimination of an old booster station currently saving the high level system. The project is expected to eliminate the need for the old pump station and eliminate energy costs associated with running the new pump station continuously to provide pressure for the constant pressure system. | Village of Lodi, Ohio | 15 | 91 to 180 days | \$460,000 |
| Medina | SR 83 South Water Tower | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Village of Lodi, Ohio | 20 | 91 to 180 days | \$1,200,000 |
| Medina | Roof | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | My house | 2 | 0 to 30 days | \$8,000 |
| Medina | Photovoltaic and/or small wind energy systems | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Resident looking to contract out work | 3 | 91 to 180 days | \$45,000 |
| Medina | My Future | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | The Shugarts Aim For a Better Future | 1 | 31 to 90 days | \$4,000 |
| Medina | need to make it to live | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | tax payer | 3 | 0 to 30 days | \$80,000 |
| Medina | River Styx Spa by Q | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Whole Earth Massage by Q Inc | 20 | 31 to 90 days | \$150,000 |
| Medina | Visilert Production Assistance | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Visilert, LLC | 20 | 0 to 30 days | \$395,000 |
| Medina | Windmill to save energy | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Kelli Construction | 1 | 0 to 30 days | \$8,000 |
| Medina | Open a Diner | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Kelli Construction | 8 | 0 to 30 days | \$80,000 |
| Medina | Medina County Emergency Food Distribution | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | United Way of Medina County | 10 | 0 to 30 days | \$360,000 |
| Medina | Teen Sexual Education Program | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Catholic Charities Community Services | 4 | 0 to 30 days | \$50,000 |
| Medina | purchase new garbage truck | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | village of prospect | 5 | 31 to 90 days | \$165,000 |
| Medina | Storm Sewer Lining | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | The City of Brunswick | 50 | 0 to 30 days | \$1,900,000 |
| Medina | DSPW-Deep Surface Penetrating Weapons | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | KAT LLC | 2,000 | 181 days or more | \$500,000,000 |
| Medina | Small Business Recovery | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Erie Mechanical & Boiler, LLC | 4 | 0 to 30 days | \$50,000 |
| Medina | RETAINING JOBS /SUPPORTING COMMUNITY | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | country kitchen | 24 | 0 to 30 days | \$200,000 |
| Medina | Office Expansion | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | RE/MAX Omega | 20 | 31 to 90 days | \$500,000 |
| Medina | Infrastructure Improvements | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Granger Lake Condominium Association | 30 | 91 to 180 days | \$350,000 |
| Medina | Police/Fire station | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | Montville Township | 20 | 91 to 180 days | \$3,500,000 |
| Medina | Environmental Upgrades | Project involves the construction of a 500,000 gallon water tower near the developing intersection of SR 83 with I-71. Currently this area is served by a about 12 inch in length which if damaged or required repair at any point is said length would necessitate shutting down water service to the commercial establishments at this busy intersection. The project would also replace two existing water towers in the Village which are 75 years old and in need of replacement. The benefits expected include providing reliable water service and adequate fire protection to the commercial establishments in the referenced intersection as well as provide adequate storage for the protection throughout the Village's service area. | self | 5 | 31 to 90 days | \$15,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Medina | Solar and Wind Power | Construction on agricultural property of a solar panel system and wind energy system with excess power being sold back to the local cooperative (AREC). 14 acres available to open wind site construction of wind turbines (approximately 60 feet in height and installation of solar panels for agricultural business and property. All funds would be used for equipment, salaries and installation of same. It is estimated at this time that at least two jobs would be created for this project. | SissCoKids | 2 | 91 to 180 days | \$200,000 |
| Medina | Rewards of Hiring Differently Abled | Funds will be used to immediately employ at least three severely disabled individuals in community work that will start with a partial volunteerism and the goal will be to encourage employment. Government will find abilities from those differently abled individuals and continue to provide work and subsidies for these individuals, along with a living wage and benefits. Individuals initially selected would be from the Deaf, Deaf Blind, Hard of Hearing and Mentally and Physically challenged communities. Funds will, also, be used for supervision of same and expense to manage program. | SissCoKids | 3 | 0 to 30 days | \$200,000 |
| Medina | business expansion | We would like to add an additional warehouse retail outlet at our current facility at 1546 Medina Rd. Medina, OH 42026. This will allow us to keep or current employees (plus extra hires) closer construction jobs while the building is built. This will in addition also create proper taxes as well as other state and local taxes paid. | Balkan Co. | 50 | 91 to 180 days | \$200,000 |
| Medina | Going to Green Printing | This will be used to create a green print shop, by reducing and eliminating chemicals used in film developing as well as ink (which are already on hand). Using more efficient machines that use less energy. Building a new fully energy efficient bank in 1986. Example, heating building (12,000 sq. ft.) for approx. \$180.00 per month. Develop & manufacture affordable small footprint solar concentration device for solar energy capture for sale around the globe. Develop increased efficiency & operational performance, needed because of unique regional solar radiation, pollution output, & precipitation patterns. Machines will be designed for use in urban, suburban & remote areas on private & public properties. Solar energy will be converted to thermal or electrical energy as customer dictates. Basic technologies are well proven but need further development in our region. While these compact systems will not produce 100% of household energy needs, they have the potential to produce 30% of individual household needs on an annualized basis. These concentrators will have small 12"x12" footprints, are noiseless, & have little to no negative environmental impact. This Ohio for-profit business will design & sell units globally using Ohio employees, approximately 10 to start, & will use exclusively, where possible, Ohio sub-contractors to support its outsourcing needs. Under no circumstances will foreign imports be used. Monies will be used to secure manufacturing space, design, test, manufacture, & installation units. | Sharon Printing Co., Inc. | 3 | 31 to 90 days | \$125,000 |
| Medina | Solar Concentrator Manufacturing | York Twp., Medina Twp. Resurfacing Marks Rd from Fern Rd to Hamilton Rd. PID No. 82710 Lafayette Township Resurfacing Lake Road from Chrypsaw Road to SR-162 (Widgenwood Road) PID No. 82708 | BIG, Inc | 150 | 91 to 180 days | \$15,000,000 |
| Medina | Marks Rd | | Northeast Ohio Areawide Coordinating Agency (NOACA) | 20 | 31 to 90 days | \$900,900 |
| Medina | Lake Road | | NOACA | 16 | 31 to 90 days | \$721,875 |
| Medina | Power Distribution Upgrade and Replacement | Brunswick's primary electrical distribution is 12,477/200 V. During peak times the primary distribution system is overloaded resulting in sagging/dimming lights. Businesses and residents have experienced backlogs and brownouts, affecting businesses, as well as safety issues concerning traffic signals during these times. The City's south end area is primary concern being the oldest part. Many residential and commercial primary and secondary electrical distribution should be upgraded due to the age of the lines and outdated distribution transformers. The primary system is not enough to supply the number of homes connected to them in the surrounding communities that are serviced through this area. The City of Brunswick has the secondary service drops which supply the homes are sagging from having electric poles which are approx 30 years old. The industrial parks and abandoned primary cables, some which are still energized and mistaken as dead, almost caused a serious injury to the workman. This proposed electrical system upgrade will create over 100 new well-paid jobs/construction cost \$5M, will create 30 jobs for the workman to stimulate the local economy, with construction in 30 days | The City of Brunswick | 100 | 0 to 30 days | \$5,000,000 |
| Medina | Greenwich Rd. | Smithville, Guilford Twp., Wadsworth Twp. Wadsworth, Resurfacing Greenwch Rd. from SR-3 (Woosee Pike Rd.) to Wadsworth Rd. SR-57 (Wadsworth Rd.) PID No. 82709 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 49 | 31 to 90 days | \$2,182,950 |
| Medina | Smith Road | Smithfield Township, Chatham Township, York Township, Lafayette Township: Resurfacing on Smith Road from SR-83 (Avon Lake Road) to Columbia Road) PID No. 82696 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 31 | 181 days or more | \$1,963,500 |
| Medina | Ann Tubbs | Tubbs is a 40 unit subsidized apartment property for the disabled. The property needs a rehab for HVAC and roofs. The units need updated. | Summit Management Services Inc. | 15 | 91 to 180 days | \$1,750,000 |
| Medina | Cabon Fiber Production | Primary focus is the manufacturing of Carbon Fiber material to be used in a wide variety of industries. A growing market for lighter and stronger material can be found from from aircraft, to automotive, to construction. | NEW COMPANY | 20 | 0 to 30 days | \$500,000 |
| Medina | Infrastructure Engineering Education | Will provide for educational funding to send one Professional Engineer to Case Western Reserve University (Cleveland, Ohio) to pursue and obtain a Master Degree in Infrastructure Performance and Reliability (Civil Engineering). The educational training received will then be used to implement and future infrastructure rehabilitation construction projects. Project will include water, sanitary sewer and pump station rehabilitation projects. Training will then benefit local government agencies' infrastructure networks and future training of new civil engineers in current methods and procedures. Applicant expects to study and research new research technologies methods at the university which provide for more cost effective public works projects for the community. Applicant will apply education for service in public service area (government) applying training and performing research to benefit infrastructure rehabilitation of underground utilities. | Iron Pin Surveying & Engineering, Inc | 2 | 91 to 180 days | \$45,000 |
| Medina | Hospital Campus Expansion Project | The Summa Wadsworth Rittman Hospital is seeking funds to implement our Campus Expansion Project. The 300,000 sq ft project will be executed in 4 phases to include an expanded Emergency department and patient tower with each phase adding more jobs and lowering the cost of healthcare for the residents of Medina County. The initial impact of the project will be felt through the creation of over 75 new construction related jobs (55 direct construction jobs & 33 indirect construction jobs). An estimated 20% of these jobs will be secured by workers from the economically depressed Lorain and Cuyahoga counties. In addition to the jobs the construction industry will create, the project will create additional jobs in the facility ranging from housekeeping and food service, to social workers, doctors and nurses will be created. The upgrades to our electronic medical records and laboratory equipment will require the expansion of our IT department. The direct cost of healthcare for our patients will be lowered due to more efficient systems. Another goal of the project is to adhere to LEED standards enhancing the economic impact in the region by acquiring its materials in a 100 mile radius of the project. | Wadsworth Rittman Hospital Foundation | 100 | 31 to 90 days | \$55,000,000 |
| Medina | schooling | I need to be re-trained in a new job field so I can find work. Going back to school to work in a field that has jobs. I do not have the financial backing at this time since I am unemployed. Need to pay for schooling for me and another member for help with my education. I would like to have an engineering degree along with my other employee. One would be in systems & industrial engineering. The other would be in engineering. Thank you for your time, my family is really struggling here and would like to succeed. | private | 2 | 181 days or more | \$175,000 |
| Medina | Hospital Renewable Energy Program | The Summa Wadsworth Rittman Hospital is seeking funds to implement a renewable energy program. Our goal is the help reduce energy costs through the use of the WindCube technologies, which is the latest technology in power generation systems that amplifies the natural wind speed using a "wind turbine" effect, by increasing the velocity of natural wind. The urban friendly, versatile rooftop design will allow our Hospital to be one of the first healthcare organizations in the state to take advantage of local technologies that help reduce our carbon footprint and reduce our dependence on non-renewable energy sources. We are proposing a dual cube system that is rated at 120kW of generation capacity, which would be fed directly into our current system, reducing our electric expenses, allowing these resources to be allocated toward direct patient care. The implementation of the system will produce an estimated 3-5 jobs locally. The Windcube System is produced in Akron, Ohio, creating important manufacturing jobs and economic stability in our state and region. The project is for the fifth phase of the Art Wright Football Stadium Renovation. The field is used for all the district's soccer and football sporting events. This fifth phase will include new 2500 seat visitor stands. The existing visitor stands are a public works project from the Rosevelt era. The second part of this phase is to improve field drainage, level the field and to install sports turf. The renovations completed to date and new 4000 capacity home stands, lighting, and field houses north and south of the field. The field houses contain locker rooms, restrooms, and concession stands. This priority facility owned by the district is used for many a community facility and is used for festivals, fireworks, and state tournament events. | Wadsworth Rittman Hospital Foundation | 5 | 0 to 30 days | \$579,000 |
| Medina | Art Wright Stadium Renovations | The project is for the fifth phase of the Art Wright Football Stadium Renovation. The field is used for all the district's soccer and football sporting events. This fifth phase will include new 2500 seat visitor stands. The existing visitor stands are a public works project from the Rosevelt era. The second part of this phase is to improve field drainage, level the field and to install sports turf. The renovations completed to date and new 4000 capacity home stands, lighting, and field houses north and south of the field. The field houses contain locker rooms, restrooms, and concession stands. This priority facility owned by the district is used for many a community facility and is used for festivals, fireworks, and state tournament events. | Wadsworth City Schools | 50 | 91 to 180 days | \$1,000,000 |
| Medina | Education of Students on Viability of Solar Concen | Would like to research, build, test Solar experimental results on the efficiency, usefulness, costs, and environmental impact of home based solar concentrators. The results of this study will be presented at middle school science fairs around Ohio, other venues, and other competitors and where available and appropriate. The project will involve building a concentrator, recording energy collection, and operational cost data over 18 months, and reporting the results and conclusions to the public. This data can be used by the public to ascertain commercial viability of solar concentrators in the Ohio region. It is my hypothesis that in our region, while not as efficient as other sunnier regions in the US, sufficient energy will be gathered to offset air conditioning and water tank heating in the warmer months and home heating and water heating in the colder months. I expect 20% of the days per year will provide sufficient sunlight to completely satisfy residential heating and/or cooling needs. Further I wish to learn and report the cost of production, cost to operate, energy payback, limitations and benefits of the system, suggested improvements for commercial systems. | Middle Schools | 1 | 31 to 90 days | \$3,000 |
| Medina | Housing Pathway for Older Adults | Access to services and housing issues are the first and second most identified county need for older adults. Older adults are impacted with concerns for affordable housing, home repairs, emergency assistance, visitors and even home care. In an attempt to improve the housing web, improve mental health, reduce nursing home placements, decrease complexity and ensure clinical efficiency, we are requesting financial support to create and coordinate a housing pathway. Working with the County's Office of Aging, Adult, Job and Family Services, and other community resources, we are projecting to provide this service to 100 older adults as well as another 20 caregivers. The increased housing placement will help nursing home placement in approximately 20% of the individuals served. It is intended to stabilize and restore the 1854 Chatham Town Hall for use as an Historic Site. The building was used to hold Trustee meetings, Township Board of Education meetings, party caucuses, and numerous other private and public meetings and was the township polling place until 60 years ago. Once restored the building will be used as an Historical Museum and community meeting room. The stabilizing and restoration of the building will be completed within 9 months. | Catholic Charities Community Services | 1 | 0 to 30 days | \$47,100 |
| Medina | Town Hall Restoration | It is intended to stabilize and restore the 1854 Chatham Town Hall for use as an Historic Site. The building was used to hold Trustee meetings, Township Board of Education meetings, party caucuses, and numerous other private and public meetings and was the township polling place until 60 years ago. Once restored the building will be used as an Historical Museum and community meeting room. The stabilizing and restoration of the building will be completed within 9 months. | Chatham Historical Society | 20 | 0 to 30 days | \$55,000 |
| Medina | Laborers at Work | To go from a bookkeeping business to being able to have employees to lease to other companies there by finding unemployed people work. They are going to need training in the engineering field and in marketing area. To hire the minority population. To hire the people who have needed a new start. Medina county needs people that can fill the jobs and I would like to help the community find qualified employees other being trained. | Private | 2 | 181 days or more | \$185,000 |
| Medina | Railroad Crossing Safety Project, Litchfield | A railroad crossing on Avon Lake Rd., AR DOT # 473653C, will receive lights and gates. Emergency vehicle accessible pathways - 108 - 108 - 108 building with accessible area and accommodations for male and female handicapped accessible restrooms. The female restroom to include three stalls and two sinks. The male restroom to include two stalls, three urinals and two sinks. These necessities will make the park user friendly for the community members, including those with disabilities. | Ohio Rail Development Commission | 6 | 31 to 90 days | \$190,000 |
| Medina | Handicapped access addition for Blakeslee | Yes, beyond the concrete benefits of this capital outlay is the immeasurable investment a community that this park represents. This inclusive project is sure to be a civic cornerstone for our residents, not only as a family entertainment but also as a family environment that is open to all on the promise that all are welcome. This shared sense of accomplishment and enhancement is crucial to maintaining a safe, healthy and attractive place to live for all of our citizens. | Medina Township | 28 | 181 days or more | \$250,000 |
| Medina | Handicapped access addition for Blakeslee | Double Drive is a feeder street that over the years has deteriorated due to poor drainage and runoff. This condition has caused the road conditions to become a serious hazard. The engineering drawings and design work are complete. This project would be ready to begin immediately if funds were available. The scope of the project is to install storm inlet manhole in existing drainage, reconstruct drive aprons to prevent water from overflowing causing further erosion, replace existing inlet casings and rebar/raft. 41 miles x 25ft wide road. | Medina Township | 45 | 181 days or more | \$188,736 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Medina | Police Department Modernization | Medina Township has seen the population grow from 7783 to 9400 in the last 10 years. The calls for police service have grown from 5319 in 2004 to 12,152 in 2008. The police department operates out of a converted garage that also houses the fire department. The plans have been developed to add on to the existing main hall structure to create a functional, open-plan police facility. This will have numerous "green" features. The departments' sole source of revenue is from property taxes. Since the economic downturn in the foreseeable future, no funds will be available for this shovel ready, environmentally friendly facility. | Medina Township | 30 | 181 days or more | \$500,000 |
| Medina | Additional Police Officers | Our only revenue stream is property taxes. Since the downturn in the economy, revenue has decreased both in the amount collected and the value of the property on which the taxes are based. The department operates on a one mill levy which is supplemented by the general fund. We are in desperate need of additional officers. Since 2007 we have seen the calls for service increase by 70.9%. In spite of this increased in service, we have reduced our personnel by 5.9% due to specific crime prevention programs. We have no investigative division but still have a clearance rate of approximately 67%. Many cases do not receive needed follow-up work due to time constraints. With these additional officers we could maintain our current level of service and increase the follow-up to solve more cases. If I had stimulus money I would add two additional officers. This funding would last for three years as I believe the economy will begin to turn around within that time period at which point we will see growth in the tax base. With the economic conditions, I don't think any type of tax increase is possible. Even if it were, the revenue generated would be in deflated dollars. | Medina Township | 2 | 181 days or more | \$405,540 |
| Medina | Citywide Signalization Project | The City of Brunswick, Ohio respectfully requests funding for the project described and detailed herein. This project can employ 100 workers, use local materials and be under contract within 18 months. The Brunswick Citywide Signalization Project includes the removal and replacement of traffic signals and control systems at 25 locations throughout the city. This project will greatly improve public safety, ease traffic congestion and reduce on-going maintenance costs. The project includes upgrading traffic signals at 24 intersections, installation of a new signal at 1 intersection, emergency signals at three fire/pole stations, emergency vehicle preemption at 23 locations, detection for the right-of-way at 3 locations, an interconnect system and a central monitoring and control station. The project will also address ADA access issues at each intersection. Construction of this project will be administered by ODOT. Has a PID number and Stage 3 plans are currently under development. | The City of Brunswick | 100 | 181 days or more | \$4,944,555 |
| Medina | Heavy Road Mechanic | Need to get back to work and can employ 2 more people. Will be on call and go and repair heavy equipment and trucks as they are working on our roads and bridges or serve a's are traveling. Need funds to purchase truck and equipment or truck to repair on the road or in medians or in the past. Also will employ a woman to answer telephones and schedule workers out on the road and be a convenient voice when the phone when customers are calling in. Also when business picks up would like to hire an employee to fill in for me on the road. Thank you. | private | 3 | 31 to 90 days | \$410,000 |
| Medina | save our home | Need to make the house at 1746 Ryan in Medina Ohio energy efficient. Need energy saving windows, and change roof from a 20 year old asphalt roof. Also a energy furnace and water heater in natural gas from last fall. Need to get rid of the old water heater. Also need to get rid of the old water heater. Medina county instead of well water. This will make two unemployed workers back to work and find a couple more workers. Need to get rid of a garage instead of a carport that would break the wind and also keep the house warmer. | private | 2 | 0 to 30 days | \$184,000 |
| Medina | Weymouth and Reagan Widening | Improvement to the intersection of State Route 3 and E. Reagan Parkway. The project calls for the widening of SR 3 from 24' to 36' and the left hand turn lanes to address the safety and capacity issues. Note: a new elementary school is being completed for the 2009-2010 school year just north on E. Reagan. | City of Medina | 10 | 31 to 90 days | \$350,000 |
| Medina | Medina Rail System | Medina Rail System - Replacement of rail, ballast, crossing surfaces and other system improvements along the City's 3.6 mile rail line. This project will improve the integrity of the line, provide safer crossings and assist the businesses of Medina by reducing the more expensive truck usage and convert a portion of their and freight goods to be transported by rail at a substantial reduction in cost. The increased rail traffic will reduce our need for fossil fuel and assist in reducing the wear on current highway infrastructure. | City of Medina | 15 | 91 to 180 days | \$950,000 |
| Medina | North Commerce Drive Extension | N. Commerce Drive Extension - Installation of new pavement to extend North Commerce Drive from Abbeville Road to SR 16 (W. Liberty Street). This project is vital for the movement of goods and products from the north and west (Chicago and Detroit). The extension will alleviate the traffic burden and wear and tear on the historic neighborhoods of Medina. The ease of access will reduce costs to the business by reducing fuel usage and carbon discharge. | City of Medina | 10 | 181 days or more | \$1,000,000 |
| Medina | West Smith Road Phase 2 | W Smith Road Phase 2 - Removal and replacement of falling concrete pavement between Lake Road and the Wheeling & Lake Erie Railroad tracks. Project includes widening at intersection of Lake Road. Project to be completed in conjunction with Phase 1 which will replace pavement between the RR tracks and State Road. By completing these projects together we will bring business restoration and maintain the use of dollars. | City of Medina | 10 | 181 days or more | \$1,000,000 |
| Medina | Medina Sports Campus | Development of vacant land in an economically distressed area of The City of Medina. Provide 400 parking spaces for public & private use and construction of indoor athletic facility will spur re-development throughout the area. | Medina Fieldhouse LLC | 100 | 31 to 90 days | \$500,000 |
| Medina | Medina County University Center Street and Site De | Medina County University Center - Street and Site Development This project will provide a 1200 foot long main entrance drive to this recently constructed facility over a stream for direct access by emergency vehicles and clients. Site development includes a vehicular bridge and will comply with regulations for riparian setbacks and erosion control. Site improvements include additional parking, security lighting and emergency telephones. | The University of Akron | 50 | 31 to 90 days | \$2,500,000 |
| Medina | MED Capitalized Maintenance; PID 86095 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 4 | 0 to 30 days | \$185,000 |
| Medina | Debbie Drive Restoration | Debbie Drive is a feeder street that over the years has deteriorated due to poor drainage and runoff. This condition has caused the road shoulders to become a serious hazard. The engineering drawings and design work are complete. This project would be ready to begin immediately if funds were available. The scope of the project is to install storm inlet manholes in existing drainage, reconstruct drive adjacent to prevent water from overflowing causing further erosion, replace existing inlet castings and resurface .41 miles x 25ft. wide road. | Medina Township | 45 | 181 days or more | \$188,736 |
| Medina | J & W COMPANY | 850 TO 800 FEET OF WATER LINES INTO HOUSE. REPLACE GRAVEL IN DRIVE THAT WILL NEED TAKEN UP FOR WATER LINES. REPLACE DECK ON HOUSE AND REPLACE FENCING AROUND SEVEN ACRES OF PROPERTY TO MAKE IT SAFER DUE TO THE RIVER AND POND ON THE PREMISES. REPLACE WINDOWS. THIS LOOKS TO NEED ABOUT 4 PEOPLE TO HANDLE THIS PROJECT. LIZDY | PRIVATE | 3 | 0 to 30 days | \$50,000 |
| Medina | J C FARM | Purchase cattle, to raise for beef sales. Bring a water line 500 to 800 feet into the property and up grade existing barn. Replace fencing on the property. Build small bridge to access additional property. I will need a farm manager and construction employees. | private | 2 | 0 to 30 days | \$75,000 |
| Medina | Promoting General Aviation and Increasing Local AI | Development of a web portal to promote general aviation utility. Increasing number of pilots and the flights taken will benefit local economies, local airports, and increase safety due to increased flight hours. It will also have side impacts effects of promoting all businesses related to general aviation such as aircraft manufacturers, FBO services, training, fuel sales etc. | na | 10,000 | 0 to 30 days | \$300,000 |
| Medina | Power Plant Supplier Manufacturer | We are in the process of RAD to manufacture a proprietary product in Medina, Ohio that is currently being made in China and imported to Medina, Ohio. This product is a disposable maintenance item used monthly by EVERT power generating plant (UTILITY PLANTS) in the world to include nuclear, Gas and Coal fired plants and these items are used by the thousands monthly. Our company is one (1) of only three (3) companies manufacturing these items worldwide and would be the ONLY plant manufacturing them in the USA. At present we distribute over 5 million items annually and growing monthly. Our current customer list is growing weekly and a present contains over 250 customers. The Stimulus money would be used for a building and equipment with 20% investment of our own funds | Woman owned small business | 12 | 31 to 90 days | \$800,000 |
| Medina | Farm Hands Needed | Update farm equipment and build a new equine training center for those in the community to use and have horse shows to draw more people into the community. Will need a newer tractor, manure spreader, sled loader, and office. Would employ Manager/Maintenance, Barn Driver to haul horses, and local sales personnel. Need regular farm hands to keep up on regular jobs and landscape. | Geana Farms Inc | 5 | 0 to 30 days | \$275,000 |
| Medina | Farm Upgrade | Build new building to house a new equine training center and equine stalls already here. Will be able to offer new facility to area so we can have shows that bring business into the community. Would like to add a horse manager, maintenance personnel, Barn Driver to haul horse to and from arena and regular farm hands. Would like to purchase equipment to be able keep up on maintenance of building and landscape. | Appaloosa Hill Inc | 5 | 0 to 30 days | \$275,000 |
| Medina | Wind Energy Supply Chain | Build new building to house a new equine training center and equine stalls already here. Will be able to offer new facility to area so we can have shows that bring business into the community. Would like to add a horse manager, maintenance personnel, Barn Driver to haul horse to and from arena and regular farm hands. Would like to purchase equipment to be able keep up on maintenance of building and landscape. | American Metal Treating Company | 15 | 31 to 90 days | \$1,200,000 |
| Medina | RMTC Energy | Build a 2000hp manufacturing plant in Wadsworth to create a regional hub for 15 states. RMTC will manufacture our energy efficient product which will require power (variable energy grid) to cost to them while saving 8-20% guaranteed on consumer electric bills. KVAR unit optimizes the power factor of motors & reduces reactive power therefore less draw on power grid from consumer side of meter. KVAR is patented ILL. Has been tested, approved, and approved. Estimated costs: Building - 5M, Equipment/Setup - 1.5M, Start-up/Marketing - 1.5M. Estimated Output: 1.5M. Estimated Public-1m. Expected Outcome: If a consumer pays \$20M monthly on electric bills saves 10% on usage by using the KVAR Unit annual savings is \$240. Within our first 60 days in OH, if we sold 10,000 units, annual savings is 2.4m. RMTC will employ individuals from our local community to create a quality product, a product which will reduce the stress in electric companies by reducing the potential for brown-outs, buying from another companies gridless reliance on fossil fuels, plus give Ohio & US government time & money to research alternative renewable energy projects. | RMTC Energy Salea | 200 | 0 to 30 days | \$5,000,000 |
| Medina | Employ Leasing People | Need to update computer system to handle more leasing of employees. Will need more office space and equipment, and telephone updates. Looking to employ one more in the office and 4 more in jobs for customers. | Gean Farms Inc | 5 | 0 to 30 days | \$100,000 |
| Medina | Warehousing | Need a warehouse building for materials that we bring in on our flat bed truck that we not full loads and store the material if we have full loads to deliver. This will be more efficient in trucks and miles driven. Will need a manager to handle the paperwork and disbursement of bills. Will need a person to load and unload material and put it in storage, also looking at a yard driver. That will be a possibility of 3 jobs. | DDL Inc | 2 | 0 to 30 days | \$125,000 |
| Medina | Transportation | Repair Barn trucks that need major work done or purchase used semi's that are more energy efficient. Will send them out to top repair shop so that will make them more work able. Need replacement trailers for semi's. Also need to license these trucks on the road and insure them. When all these are handled will be able to hire 7 more drivers. This should be accomplished in a couple weeks and have drivers on the road after that. | DDL Inc | 7 | 0 to 30 days | \$100,001 |
| Medina | Oakleigh, Ashleigh, Briarleigh Storm Sewer Project | The City of Brunswick, Ohio respectfully requests funding for the project described and detailed herein. This project can employ 50 workers, use local materials and be under contract within 30 days. The project area is located in a residential section south of Boston Road that was largely constructed in the 1950s and 1960s. The local drainage system is largely comprised of roadside ditches and driveway culverts that do not meet modern standards. During large rain events the roadway ditches become overwhelmed and impede the flow of water from sump pumps resulting in basement flooding. The project involves the installation of storm sewers and appurtenant structures throughout the area. Brunswick has also worked closely with the City of Sturgis to add features to the proposed project that will help alleviate flooding issues downstream. The proposed project includes the installation of storm sewers to collect and convey storm water into the city and then discharging the peak rate of runoff. Restoration of the pavement and grass areas disturbed during the course of the work will be completed as well. | The City of Brunswick | 50 | 0 to 30 days | \$1,756,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------|----------------|--------------------|---------------------------|
| Medina | ARAN Biocide Application to Food Preparation & Sto | ARAN is a polymeric oxygen molecule of 6 to 12 atoms of oxygen. This highly energized oxygen will react with hydrocarbons in the air immediately and sustain vigorous oxidation of finely divided materials. ARAN releases extra electrons and nascent oxygen when it encounters any material it can react with. ARAN has no residual but CO2, water and CO2. ARAN is generated with equipment that has been under development for 15 years with a Patent Pending. The technology is fully developed. We need to develop distribution systems and fusion techniques to distribute the ARAN product to protect food products in storage, processing and packages. We also have equipment to infuse ARAN into water producing water with an ORP of over 1000mv. This water would kill mold, bacteria and virus on fruits and vegetables being prepared for storage or processing. ARAN prevents mold and fermentation in grain storage silos. We need to develop our generation equipment distribution systems. ARAN can also reduce the stack gasses from coal burning power plants. There is a great potential here. | PIE International, Inc. | 25 | 91 to 180 days | \$1,250,000 |
| Medina | Village Hall Replacemtn | Our Village hall is very old, unstable and needs many repairs. We would like to demolish it and replace it with a new Village hall. The new hall would also serve as an emergency shelter for tornadoes, natural disasters and civil emergencies | Village of Gloria Glens Park | 1 | 31 to 90 days | \$250,000 |
| Medina | Project Big Rig | We need to replace our existing medical equipment and highly sensitive electronics within the USA. This will also help subcontractors that we have to hire. | Lafayette Transport Inc. | 2 | 0 to 30 days | \$370,000 |
| Medina | Bagdad Road - Bridge Number 05 | This proposal is submitted for the rehabilitation of a 75 foot length bridge on Bagdad Road in Medina Township of Medina County. The width of the existing bridge is 24 feet and current traffic volume is 845 vehicles per day. This bridge is inventoried on the Ohio Department of Transportation Bridge Management System as Structure File Number 520527. It is currently rated with a General Appraisal of 'S' on the ODOT bridge inspection rating scale. This General Appraisal of the existing bridge, built in 1984, indicates a structure which is in fair condition. The bridge will be rehabilitated by removing and replacing the existing wooden floor, applying a protective coating to the existing bridge steel superstructure, waterproofing and resurfacing the rehabilitated structure. | Medina County Engineer's Office | 38 | 91 to 180 days | \$200,000 |
| Medina | Village Of Chippewa Lake, Phase 4 - Street Improv | This project consists of removing the existing roadway and repaving the roadway with an inverted crown to channel stormwater away from residential housing. This will also require new catch basins and storm conduit. Approximately 1,450 linear feet of street will be removed and replaced with an inverted crown roadway. Also, approximately 1,450 linear feet of conduit will be placed between 6 proposed catch basins. | Engineering Associates, Inc. | 10 | 91 to 180 days | \$361,900 |
| Medina | River Styx Road - Bridge No. 51 | This proposal is submitted for the replacement of a 55 foot length bridge on River Styx Road in Mantle Township of Medina County. The width of the existing bridge is 22 feet and current traffic volume is 9772 vehicles per day. This bridge is inventoried on the Ohio Department of Transportation Bridge Management System as Structure File Number 520493. It is currently rated with a General Appraisal of "OR" on the ODOT bridge inspection rating scale. This General Appraisal of the existing bridge, built in 1954, indicates a structure which is in poor condition and is posted for a reduction in legal loads. A new bridge will be designed and constructed which will meet current legal load requirements. The new bridge will be widened to 32 feet and lengthened to approximately 65 feet. | Medina County Engineer's Office | 57 | 91 to 180 days | \$432,500 |
| Medina | trying to take care of my family | I am trying to take care of my family. I have two beautiful children that I would love to keep warm and happy and to be able to help them keep a roof over their head and food in their belly. I can't do it if me and my boyfriend are out of a job and have no money to pay my bills. I really hope you can see that I really need the help to support my family. I am about to be just out on the street with my children and I can't pay my bills, they are threatening to even shut are electric off. I have no money to pay my bills please help me. Thank you for your kind words and help. | my home | 2 | 0 to 30 days | \$20,000 |
| Medina | BKV Stimulus | First step: With the current economic climate, manufacturing is not buying material handling supplies, we are trying to find ways to efficient energy heaters and boilers that run on recycled fuel oil. This would help the environment by finding a productive use for used oil (any kind of oil). These old heaters could be used to heat bus garages for cities and school systems. It can initiate recycle programs thus cutting heating costs for cities and schools. We would initiate collection drives for used oil, raising the awareness of recycling. We would also seek local businesses who need to heat large areas more efficiently. Second step: Wind power to generate electricity for residential and commercial properties. Using wind power to supplement power from electric companies will lower home heating/electrical costs for consumers. | BKV Industrial Products Inc | 20 | 0 to 30 days | \$175,000 |
| Medina | Schuergar Recovery Plan | ARAN is a polymeric oxygen molecule of 6 to 12 atoms of oxygen. This highly energized oxygen will react with hydrocarbons in the air immediately and sustain vigorous oxidation of finely divided materials. ARAN releases extra electrons and nascent oxygen when it encounters any material it can react with. ARAN has no residual but CO2, water and CO2. ARAN is generated with equipment that has been under development for 15 years with a Patent Pending. The technology is fully developed. We have developed a system for household application. We propose to develop a process for industrial, agricultural and municipal water purification. Industrial and agricultural waste effluent streams can be cleaned up with an infusion of ARAN high ORP water. This process may require some filtration and settling ponds to remove solids. ARAN kills bacteria and virus in seconds at 1000mv ORP. The process uses the invisible oxidation power of nascent oxygen released from a heating high molecular weight polyatomic oxygen chains. Nascent oxygen is second only to Fluorine in ORP. | | | 0 to 30 days | \$10,000 |
| Medina | Water Purification and Pollution Remediation with | ARAN is a polymeric oxygen molecule of 6 to 12 atoms of oxygen. | Medina | Septic System | Replace outdated septic system. Rural Location | Hhome Owner | 5 | 0 to 30 days | \$20,000 |
| Medina | EQUALIZATION BASIN | WASTEWATER TREATMENT AND EQ BASIN TO PREVENT SEWAGE BACK UPS AND DISCHARGES OF UNTREATED SEWAGE TO STREAM. | VILLAGE OF SEVILLE | 30 | 91 to 180 days | \$2,000,000 |
| Medina | Oakleigh, Ashleigh, Briarleigh Storm Sewer Project | The City of Brunswick, Ohio respectfully requests funding for the project described and detailed herein. This project can employ 55 workers, use local materials and be under contract within 30 days. The project area is located in a residential section south of Brown Road that was largely constructed in the 1950s and 1960s. The local drainage system is largely comprised of roadside ditches and stormwater culverts that do not meet modern standards. During large rain events the roadside ditches become overwhelmed and impede the flow of water from large pumps resulting in basement flooding. The project involves the installation of storm sewers and appurtenant structures within the project area. Brunswick has also worked closely with the City of Strongsville to add features to the proposed project that will help alleviate flooding issues downstream. The proposed project includes the installation of Rain Gardens to promote the absorption of rain water into the soil and thus lessening the peak rate of runoff. Restoration of all pavement and grass areas disturbed during the course of the work will be completed as well. Total project cost is \$1,980,950, with a funding request of \$1,756,000. | The City of Brunswick | 50 | 0 to 30 days | \$1,756,000 |
| Medina | WEST MAIN ST WATERSHED | 712 FEET OF NEW SEWER LINE AND DETENTION BASIN CONSTRUCTION. | VILLAGE OF SEVILLE | 10 | 31 to 90 days | \$125,000 |
| Medina | Village of Spencer Water Tower Replacement | Project includes the replacement of the Village of Spencer's existing 150,000 gallon water tower with a 200,000 gallon water tower. The existing water tower was constructed in the 1940s, and due to aging of the existing tower and planned future development in the village a larger water tower is recommended. | Engineering Associates, Inc. | 20 | 91 to 180 days | \$1,050,000 |
| Medina | Employment Enclave for Disabled | Medina Creative Housing's mission is to provide housing and services to the mentally ill, developmentally and physically disabled population. Funds will be used to develop a Property Management Employment Enclave to assess, train and expand employment opportunities to this disabled population. An Employment Enclave consists of individuals with disabilities capable of working in the community but must work in a group, supervised setting. Participants will learn skills which will open new and exciting employment opportunities which are traditionally closed to them due to their need for accommodations in the workplace. Participants will develop marketable skills and obtain gainful employment to supplement their low incomes, increase self-esteem and encourage assimilation in the community. Medina Creative Housing will employ these individuals to maintain our 38 housing units and they will have additional opportunities for employment in the community. This project is unique in that individuals with disabilities will be assisting their peers with disabilities in maintenance of their independent housing. | Medina Creative Housing | 12 | 0 to 30 days | \$125,000 |
| Medina | ARAN Applications for Mold Remediation & Preventio | ARAN is a polymeric oxygen molecule of 6 to 12 atoms of oxygen. This highly energized oxygen will kill bacteria and virus within a few minutes or in seconds if the concentration is high. ARAN releases extra electrons and nascent oxygen when it encounters a virus or bacterial cell wall and restores it killing the organism. ARAN has no residuals but CO2, water and CO2. ARAN is generated with equipment that has been under development for 15 years with a Patent Pending. | PIE International, Inc. | 50 | 91 to 180 days | \$1,500,000 |
| Medina | Purchase Business | The same ARAN that is devastating against bacteria and virus is also a powerful agent against mold. We have developed ARAN systems for mold remediation. We have a unit that can kill 99% of the mold in a (2000 sqft) house in three days by sealing the exterior doors and windows and sending the ARAN to a warmer door opening and flooding the house with ARAN. The mold is removed as maintained by an HVAC ARAN unit installed in the HVAC system set to run only when the air is blowing through the system. ARAN kills the mold and its spores and maintains the roof in good condition. Any conditions that breed mold (dampness & water leaks or high humidity) must be corrected. Clean dead mold from exposed surfaces. | Yorktowne Heating & A/C, Inc | 8 | 0 to 30 days | \$250,000 |
| Medina | SOCIAL NETWORKING SERVICE TECHNOLOGY EDUCATION PRO | I would like to purchase this company from the current owner that plans to retire in two years. I am a white female with 10 years of background in managing and running Yorktowne High A/C, Inc. I would like to keep the two employees that currently work there in order to help them and service Biochemical systems, high efficiency furnaces, air conditioners, and heat pumps in new homes, existing homes and small businesses while working with governmental and utility companies making things better for all involved. I would like to acquire my private, local and provide training for my employees and myself for providing the best solutions for the highest energy efficient equipment that is available to bring comfort. | hype llc | 10 | 0 to 30 days | \$250,000 |
| Medina | Education Facility for Preschool Children | PROJECT PROMOTES TECHNOLOGY EDUCATION AND COMMUNITY SERVICE. SOCIAL NETWORKING PROGRAM WITH PARENTAL CONTROLS FOR STUDENTS. PROGRAM WILL FOCUS ON TEACHING HOW TO USE INTERNET NETWORK. CURRENT PROJECT FOR GIRLS ONLY. GIRLS WILL BUILD OWN IDEAS, UPDATE WITH BAKES AND SERVICE PROJECTS. TOYS AND SUPPLIES USED TO BRING ALUMNI BACK TO SERVICE PROGRAM TO VOLUNTEER. FOCUS ON EDUCATION OF STUDENTS AND PROMOTING COMMUNITY VOLUNTEER VIA INTERNET TOOLS. | Early Childhood Academy | 15 | 91 to 180 days | \$250,000 |
| Medina | keeping a small business from closing | Year round child care facility that will educate approx.200 preschool children, employ 15 staff members, and serve as a community center where interested parties can network to promote the health and welfare of children and families. Business activities to include school wide garden produce to be distributed and donated, book sales, toy exchanges, clothing exchanges, and service projects. Facility to be determined (either leased, rented, or built). Space requirements and facility layout determined by OOD/PS. | Hearing Health Centers Inc. | 06 | 0 to 30 days | \$250,000 |

| Medina | MOTORSPORTS YOUTH PROGRAM | A motorsports program, specifically the American Legends Series (ALMS), which involves endurance road racing venues at motorsports track locations across the U.S. The program would provide an educational and healthy activity environment for young people interested in pursuing a career in motorsports. The program would focus on involving young people ages 18-28 from underrepresented environments (economically challenged, broken homes, troubled youth, etc.), providing them with exposure to a challenging and healthy activity and allowing them to experience a wholesome work environment that may lead them to a career in engineering or in a motorsports career. Educational experiences would include travel, training in race car design and preparation, and elevating the participant's level of self-worth through involvement in a realm of responsibility and teamwork. To build the only surgical glove maker in the U.S.A. This is a National Security Issue!! what will happen to our hospital and emergency rooms when the foreign companies stop producing surgical gloves either by choice or outside forces such as a terrorist blowing up one or all of the glove plants at the same time. No more gloves. Development, manufacture, and testing of bracket to lower 1800cc gold wing motorcycle. Expect to sell nationwide as well as exporting to countries that sell 1800 Goldwings. (This "has not" been offered for the 1800 Honda by any other company. This type of product "is" available for most brands of motorcycles.) Prototype "has been" tested and proven. It helps "grow" for shorter class. It is more comfortable and safer for handling in showups and at airports, etc. After serving 19 years in the military, a veteran of Desert Storm, I was diagnosed with Multiple Sclerosis shortly after my discharge. My treatment includes Chemotherapy and steroids on a 3 month interval. Unable to work. I am living with my elderly parents who both have diabetes PLUS, mom has heart problems and COPD (we almost lost her 12/06/08) and dad has a severe case of hardening of the arteries. My request for funds would help pay for my recent ER visit (I'm badly bruised from a recent fall on the ice). It would help to repay my parents for giving me room and board since my diagnosis. I would pay for waterproofing their basement as well as creating a 1st floor laundry and a 1st floor shower making it more accessible for them. As you can tell we are each 'caregivers' of the other two. Yvonne Hamilton extended college or trade school after graduating Our client for the months would be to expand our business, by adding over 800 square feet to our building, remodeling, upgrading electrical, plumbing, and HVAC systems, and installing a new 12,000 square foot office and classroom complex on property owned by the Career Center. The complex will house the offices of the Educational Service Center and classrooms that provide county-wide programs for preschool handicapped students, alternative education (at-risk) high school students, adult education courses, medical services, nursing services, technology support, and professional development courses. A student would be manager making decisions on how the business would run. The manager would make work, pricing, and financial decisions, pricing decisions, deal with vendors and customers, and how to handle employee issues. All employees would be trained. The financial impact of decisions when results are shared each quarter. Students earn points for grades in the classroom, extra curricular activities, community service, and participation in the business. This is an opportunity to teach students to become better leaders and citizens. | Birchwood Automotive | 12 | 181 days or more | \$500,000 |

| Medina | TEC 2010 Diesel Emissions Control | Under DERA funding State plans can use Emerging Technologies or Validated Technologies. It is up to the state. These are non competitive bids. Tinnerman proposes that the State opt some of its State DERA funds to an Ohio company that produces a full Diesel Compliant system for the TEC 2010. The TEC 2010 is already patented by Emerging Technologies along with the US EPA. Only Ohio Technologies were approved, several hundred technologies applied for Emerging Technology status with the EPA. This product can be made in the Tinnerman facilities in Brunswick, Ohio. This project could lead to high product utilization with the US EPA and make the TEC 2010 the best available Catalyst Technology and eligible for over \$280M in State and Federal Funding to abate diesel emissions nation wide. Green Technologies like Diesel Emission Abatement are growing at an accelerated rate, and Tinnerman would like to produce these products in Ohio. | Tinnerman | 50 | 0 to 30 days | \$350,000 |
| Medina | TEC 2010 Diesel Emissions Control | To apply for Emerging Technologies funding through the ARRA fund of DERA for Tinnerman's Emissions Control diesel retrofit. Tinnerman is one of only 6 approved Emerging Technologies in the US EPA Emerging Technologies Approved List. \$280M in Emerging Technologies is available to those states who agree to identify fleets of Diesel Engines in DOT, School Bus, Private, or Municipal sectors that are preferably in non attainment areas for Ozone, Particulate Matter, and NOx, and use it to identify and determine the benefit and stability of the Tinnerman system. Tinnerman is based in Brunswick, Ohio and has facilities and customers throughout the world. To hire 2 installers of home insulators, 3 installers and window installers, 1 furnace installer materials and storage space..... we will make older homes better and energy efficient. | Tinnerman | 53 | 0 to 30 days | \$2,000,000 |

| Medina | Schemrich Bros. LLC, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin continuous deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Medina | Town and Country Co-op, a Clean Fuels Ohio Partner | This programmatic partner wishes to upgrade their on site fuel storage capacity so they can continue to use B20 Biodiesel in their vehicles. These upgrades will decrease their fleet's petroleum use and reduce vehicle emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$25,000 |
| Medina | Special Service Transportation Inc., a Clean Fuels | This programmatic partner wishes to begin continuous deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing and existing technologies. A look for on site Bio-based Blending. | Clean Fuels Ohio | 5 | 0 to 30 days | \$98,000 |
| Medina | Brunswick High School Green Roof Demonstration | Brunswick City Schools is seeking federal support to put "green roofs" on Brunswick High School's East House. This project will consist of the installation of photovoltaic (solar) roofs and vegetative roofs on 4-6 roofs on East House. Green roofs have become popular because they are friendly to the environment. A photovoltaic (PV) roof can generate power for a building from the sun's energy, lowering the building's need for fossil fuel-based power. A vegetative roof is friendly because the plants on the roof convert carbon dioxide into oxygen, lowering the carbon on the ozone layer. The vegetation also absorbs rainwater, reducing storm water run-off and flooding. Vegetative roofs increase insulation, making buildings more energy efficient. Earmark funds will be spent by Brunswick Schools to hire Bealwood, Ohio-based Terno, Inc. (a subsidiary of Brunswick-based BFM International, Inc.) and related subcontractors, including Toledo-based Kurlight, among others to undertake the green roof work described above. Terno is the leading roofing contractor in Ohio, and Kurlight is an emerging company in Toledo that has developed industry-leading flexible solar cells that have the potential to dramatically reduce the cost and increase the efficiency of photovoltaic roof. Brunswick City Schools is seeking federal support to put "green roofs" on Brunswick High School's East House. | Medina | Buckeye Local Schools Performing Arts Center | This proposal would be to create jobs and create construction opportunities with local companies at the same time create opportunities that would not be available to our district otherwise without raising additional funds for such construction. Having several construction firms in our area, this would create jobs and opportunities while providing York Township, Litchfield Township and Valley City a Fine Arts Performance Auditorium. It would also stimulate the economy in the Medina County area by creating construction jobs, taxable, and educational opportunities. Performance groups can be brought in to perform at a regular basis creating income and economic opportunities to our community and Medina County. The facility would include offices, ticket office, restrooms, auditorium, stage, woodworking shop, dressing rooms, rehearsal spaces, storage space, theater, proper lighting equipment, sound equipment, acoustical treatment design, data parts, and structural job. Both community and school district would be able to use this Performing Arts Center. | Buckeye Local Fine Arts Department | 150 | 91 to 180 days | \$7,500,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Medina | Cloverleaf Schools technology initiative | In order to prepare our students to compete for jobs in a technologically advanced global job market, we want to give our students greater access to technology as well as technologically informed instruction. First, we want every student to have access to school computers five years old or less in all of our school district's buildings—a goal we have been unable to obtain. Secondly, we want our teachers to have available to them technology with the capacity to transform instruction so that curriculum can be presented in a way that makes it most comprehensible for all learners. Thirdly, we would like a technology integration specialist to work with our teachers on an on-going basis by providing them with professional development they need to transform instruction and student learning through technology. All of this would give us the ability to follow through with the initiatives as set forth in the district's strategic plan. | Cloverleaf Local Schools | 1 | 0 to 30 days | \$1,450,000 |
| Medina | Chippewa Landing Resort | Chippewa Landing will redevelop a 100-acre site in Lafayette/Wheatfield Township as a 193-room Hilton Hotel and Conference Center. Including an Akron General Medical Center Health & Wellness Center. This Phase will invest \$65 million. Future phases will include the Chippewa Cultural Institute in association with the University of Akron, a second boutique hotel, a members club with cottages, employee and student housing. The project is zoned and fully approved. Phase One start will create 554 construction jobs, 272 new permanent jobs at site and 84 community jobs from indirect related activities. Phase One start will create 554 construction jobs, 272 new permanent jobs at site and 84 community jobs from indirect related activities. Phase One start will create 554 construction jobs, 272 new permanent jobs at site and 84 community jobs from indirect related activities. The developers are partnering with the Lafayette Township Trustees, the Lafayette Township Fire Department (which also serves neighboring Chippewa Lake Village), the Medina County Highway & Sanitary Engineers, the Medina County Park District and Akron General Medical Center. Besides revitalizing a struggling local economy, the redevelopment of this defunct and deteriorating amusement park will enable greatly improved flood and erosion controls and improved county infrastructure. | Chippewa Partners LLC | 910 | 91 to 180 days | \$12,650,000 |
| Medina | Hvac & Heirloom Plant Farm | Relocation of hq. & art. sheet metal shop -Grow and sell native heirloom plants. Cost saving for our company and to reintroduce native heirloom plants. We are going to use alternative heating sources for the shop & greenhouse.Thank you for your consideration. | The Hearing & Air Cond. Inc. | 10 | 0 to 30 days | \$125,000 |
| Medina | Recovery from the Psychological Impact of Job Loss | Robert & Katha Engler This project involves providing a series of six week counselling/psychoeducational groups for dislocated workers. The focus will be on recovery from the psychological impact of job loss, including skills to deal with anxiety, depression and self-reliant thoughts that often accompany job loss. It will also educate participants on development of personal assets and communication skills, as well as practical techniques, to assist in the job search process. The groups will be led by a licensed mental health professional, but peer support, shown by research to be effective in helping dislocated workers deal and recover from job loss, will be an important component. Expected outcomes: Improved mood and decreased anxiety as measured by prepost test scores on the Burns Anxiety Inventory and Burns Depression Checklist; participants will be able to report three techniques to increase positive self-worth and three techniques to improve communication skills. | Catholic Charities Community Services | 1 | 31 to 90 days | \$12,000 |
| Medina | SUPERVISED VISITATION AND EXCHANGE CENTER | This proposal will permit Domestic Relations Court to hire at least two part-time Parenting Time Monitors and one full-time Domestic Violence Case Manager to assist families using the court's Visitation and Safe Exchange Center. | MEDINA COUNTY DOMESTIC RELATIONS COURT | 3 | 0 to 30 days | \$50,000 |
| Medina | SUPERVISED VISITATION AND EXCHANGE CENTER | This proposal will allow Domestic Relations Court to recruit two part-time Parenting Time Monitors at approximately twenty hours per week each and recruit one part-time contracted security guard at approximately twenty-hours per week. These positions were set off at the beginning of the year due to reduced funding. | MEDINA COUNTY DOMESTIC RELATIONS COURT | 3 | 0 to 30 days | \$30,000 |
| Medina | Montville-SRO | The goal of this program is to develop a position of a School Resource Officer within the Medina School District. Currently our schools do not have a dedicated position and with three schools in our jurisdiction we feel there is great opportunity to expand our COP presence to the three schools within Montville Township, we have students that attend four other schools within the school district. We would like to have a representative within these schools to provide direct contact with township residents. | Montville Police Department | 1 | 181 days or more | \$45,000.00 |
| Medina | Wind Turbine | To build a wind turbine to run local printing company. Also to sell the extra back to the county. | Sharon Printing Co., Inc. | 5 | 91 to 180 days | 150,000 |
| Medina | COMPUTER TECHNOLOGY | BRUNSWICK HILLS POLICE HAS A FLEET OF FIVE VEHICLES OPERATING WITHOUT VEHICLE IDENTIFICATION TAGS. IN MANY CASES TIME IS OF THE ESSENCE AND WITHOUT PROPER INFORMATION BEING RELAYED TO THE OFFICER, A VEHICLE IN A MANNER, THIS SEVERELY REDUCES AN OFFICER'S INVESTIGATIVE ABILITIES WHILE IN THE FIELD. MANY OF THESE VEHICLES ARE OUTPOSTED TO THE VILLAGE OF BRUNSWICK HILLS. DUE TO THE LACK OF TECHNOLOGY, THIS CREATES OFFICER SAFETY ISSUES WHEN INFORMATION IS NOT READILY ACCESSIBLE. WITH THE EQUIPMENT IT WILL IMPROVE OUR ABILITY TO COMPLETE INFORMATION AND COMPLETE REPORTS. THE TIME SAVED WITH WRITING REPORTS IN THE CAR WILL ALLOW THE OFFICERS TO SPEND MORE TIME IN THE FIELD CONDUCTING ACTIVE PATROLES AND INVESTIGATIONS. REPORTS WILL BE MORE READILY AVAILABLE FOR REVIEW AND COMPARISONS WITH OTHER AREAS IN THE JURISDICTION AND WILL ACCUMULATE ANALYSIS FOR REPORTS WITHIN THE DEPARTMENT AND ALSO AT THE STATE AND NATIONAL LEVEL. | BRUNSWICK HILLS P.D. | 8 | 31 to 90 days | 7,500.00 |
| Meigs | Racine Water Line Replacement Project Phase II | racine moderate income level (62.20%). The Village just completed a large project to replace their water treatment plant, water storage tank and two new wells. The village incurred significant debt to complete the previous project. Racine requests Stimulus Package funding to permit replacement of an old and deteriorating water distribution system. The distribution system currently loses 54% of all water treated and pumped into the system. Project Outcomes: 9,300 lf of 8" PVC pipe 130 lf of steel casings 15 gate valves 13 fire hydrants 75 connect or re-connection of services to the distrib lines 1,800 ton of asphalt to repair streets The Village of Racine welcomes the opportunity to provide additional information to support their request for Stimulus Package funds. | Racine, Village of | 25 | 31 to 90 days | \$631,900 |
| Meigs | Sycamore Street Commercial Development Project | The Village of Racine has a vacant parcel of land exceeding 6-acres in the village corporate limits. The land is above the flood plain and is located at the center of the village. The village currently has no grocery stores and limited other commercial establishments. A Dollar Store has agreed to locate on the property and several other inquiries have been received from commercial establishments wanting to locate on the property. The property needs an access road and catch basins to channel storm water from the site to nearby storm sewers. Funding for this project will permit the village to attract more commercial establishments to serve the village, the new road will ease under construction on the outskirts of Racine and ease traffic from the new AMP Ohio Power Plant being constructed outside of Racine. Project Outcomes: 2 Manholes 6 Catch Basins 1,678 lf of curb & gutter 600 ton of asphalt 3,740 lf of concrete for 4" sidewalk 300 lf of C900 water line 4 Gate valves 1 Fire Hydrant Grading Seeding and mulching | Racine, Village of | 30 | 31 to 90 days | \$208,150 |
| Meigs | Racine Street Paving | The Village of Racine, Meigs County Ohio incurred significant expenses when completing a recent water project. The Village of Racine has a low Median Household Income of \$22,460 and a high Low-to-Moderate-income population of 62.20%. The Village requests funds to permit upgrading deteriorating roads within the village. The Village anticipates increased traffic flow as the new mine under construction on the outskirts of Racine opens and the new AMP Ohio Power Plant begins construction. The roads have deteriorated due to lack of funding to maintain the roads. Racine will provide any additional information needed to strengthen this funding request. Project Outcomes: 3.454 miles of 20-foot wide roads repaired | Racine, Village of | 15 | 0 to 30 days | \$455,422 |
| Meigs | 5th Street and Elm Street Widening Project | Power Plant being constructed outside the Village of Racine. The intersection of 5th Street and Elm Street is narrow and does not handle truck and heavy vehicle traffic due to the tight turning radius at the intersection. The Village has met with ODOT to determine the cost to widen the streets at the intersection and install a turning lane to accommodate the truck traffic. The project is also impacting the move of the local bank from an area in the floodplain in Racine to an area that adjoins the intersection. The local bank does not want to start construction on their new facility without first knowing what portion to their proposed parking area will be impacted by the street widening project. Project Outcomes: 142 CY of Subbase & Intermediate Material 2,400 LF of Sidewalk 750 LF of Drainage pipe 600 LF of curb & gutter 1,400 CY of Seeding 750 LF of Curbside 1 Traffic Light | Racine, Village of | 20 | 31 to 90 days | \$506,420 |
| Meigs | Racine Municipal Building Rehabilitation | The Village of Racine, Meigs County Ohio's Municipal Building was previously a school building. The Village has made improvements to the building to permit a meeting room for public meetings and Village Council meetings. In addition the building houses the Racine Regional Sewer District offices and the local food bank. The building needs additional work to reduce energy costs and to maintain the facility. The Village requests funds for Municipal Building improvements. Project Outcomes: 30 Windows replaced 5,156 SF of Roofing replaced 1 Elevator to make the facility handicapped accessible from the ground floor to the upper floor. 1 Records storage system at the Municipal Building | Racine, Village of | 30 | 0 to 30 days | \$210,970 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Meigs | Raciner Storm Sewer Project | The Village of Racine, Meigs County Ohio is located in an Appalachian Regional Commission "Distressed County". The Village must rehab and upgrade the Storm Sewer within the village to permit channeling of storm water away from existing and new development in the village. The village also completed a storm water project located in the village (amounting added debt). The sewer district that serves the village of Syracuse and Racine is undertaking a large rehabilitation project, which will result in the Village of Racine residents having increased sewer charges. The Village has a low Median Household Income of \$22,450 and a High Low-to-Moderate-Income level (62.20%). Racine requests Stimulus Package funding to rehabilitate and upgrade the village's storm water sewer system. Project Outcomes: 8,000 LF of Storm Sewer | Racine, Village of | 20 | 31 to 90 days | \$315,000 |
| Meigs | Fire Truck Replacement | The Village of Racine, Meigs County Ohio supports and assists in the staffing of a Volunteer Fire Department. The Volunteer Fire Department provides fire protection services to the Village of Racine and unincorporated areas of Meigs County near and around Racine. In addition, the Volunteer Fire Department has a mutual aid agreement in place to provide assistance to the Villages of Syracuse, Pomeroy and Rutland should assistance be requested of the Racine Volunteer Fire Department. The Village of Racine requests Stimulus Package funds to purchase a new fire truck that will replace an older fire truck currently in service that reached the end of its useful life. The new fire truck will have high capacity pumps and a water tank that will better prepare volunteer fire department members to combat fires in Meigs County and surrounding areas. Please advise if the village may provide any additional information needed to support this funding request. Project Outcomes: 1 new fire truck with high capacity pumps and water tank | Racine, Village of | 15 | 0 to 30 days | \$300,000 |
| Meigs | Racine Walking Path and Lighting | Mill Park. The Village of Racine proposes to construct a new walking path with lighting to connect Star Mill Park and the new Ohio Department of Natural Resources boat ramp and parking facility. The project would benefit boaters and other using the boat ramp by providing walking access to Racine. The project also benefits residents of Racine with a walking path to utilize for health and recreation purposes. Due to the low Median Household Income level in Racine (\$22,450) and high Low-to-Moderate-Income level (62.20%), the project would provide a facility for low income population to exercise and use for recreation purposes. The Village of Racine will gladly provide additional information to support this request for Stimulus Package funds. Project Outcomes: 1 Walking path approximately 0.5-miles in length with an 8-foot wide paved walking path 44 Lights and poles | Racine, Village of | 20 | 31 to 90 days | \$185,000 |
| Meigs | Meigs County Emergency Room Project | This project will build a stand alone emergency room in a rural community without a hospital. The project will benefit citizens, two major economic development projects, and provide employment in the county. This is a long planned project that may serve as a model for other rural communities that lack emergency health care access. | Meigs County Commission | 40 | 91 to 180 days | \$6,000,000 |
| Meigs | Wellness Center Expansion | The project will expand the capacity of the wellness center program, increase attendance by 30% to 9155, and increase health program attendance by 2112 persons. | Meigs County Commission | 0 | 31 to 90 days | \$101,036 |
| Meigs | Ebenezer Road Relocation/Retail Enhancement Project | The relocation and upgrade of Ebenezer Street in downtown Pomeroy will allow for retail development to occur near the new Pomeroy Mason Bridge and add jobs and tax base to Pomeroy and Meigs County. | Meigs County Economic Development Office | 30 | 31 to 90 days | \$350,000 |
| Meigs | Pomeroy Water Meter Replacement Project | This project will serve 1000 households, many low income, by replacing 1000 antiquated water meters, adding 1 data collector and software, and 50 meter setting components. | Village of Pomeroy | 0 | 31 to 90 days | \$258,100 |
| Meigs | Pomeroy Water/Sewer Extensions for Gattling Housing | Install water and sewer lines from the terminus of the existing Pomeroy lines to the proposed area of new housing to support the 100 jobs at the Gattling court project. This led to the reinterioration of 100 new head of household jobs and to 100 new homes in the community. | Village of Pomeroy | 100 | 31 to 90 days | \$2,271,100 |
| Meigs | Racine Village Street Resurfacing Project | Resurfacing of 2,208 miles of Village streets COUNTY OHIO. THE MEIGS COUNTY OHIO HAS A VERY LOW MEDIAN HOUSEHOLD INCOME AND HIGH LOW TO MODERATE INCOME LEVEL. THE SEWER DISTRICT IS WELL MAINTAINED BUT SYSTEM ASSETS HAVE REACHED THE END OF THEIR USEFUL LIFE. SIGNIFICANT REHABILITATION OF THE WASTEWATER TREATMENT PLANT, MANHOLES, AND LIFT STATIONS WILL BE INCLUDED IN THE PROJECT. THE PROJECT WILL ALSO PROVIDE SEWER SERVICE TO THE TACKERVILLE AREA OF MEIGS COUNTY. THE TACKERVILLE AREA IS NOW UNDER ONSITE TREATMENT. THERE IS NO PROOING LIP-DOWN OR PARTIALLY TREATED WASTEWATER IN DITCHES AND YARDS IN THE TACKERVILLE AREA. THE SYRACUSE RACINE REGIONAL SEWER DISTRICT REQUESTS STIMULUS PACKAGE FUNDING FOR THIS MUCH NEEDED PROJECT. PROJECT OUTCOMES: sewer rehab distribution rehab total manhole rehab sewer collection system in Tackerville area | Village of Racine | 0 | 31 to 90 days | \$240,264 |
| Meigs | SYRACUSE RACINE REGIONAL SEWER DISTRICT REHAB AND | Resurfacing of 2,208 miles of Village streets COUNTY OHIO. THE MEIGS COUNTY OHIO HAS A VERY LOW MEDIAN HOUSEHOLD INCOME AND HIGH LOW TO MODERATE INCOME LEVEL. THE SEWER DISTRICT IS WELL MAINTAINED BUT SYSTEM ASSETS HAVE REACHED THE END OF THEIR USEFUL LIFE. SIGNIFICANT REHABILITATION OF THE WASTEWATER TREATMENT PLANT, MANHOLES, AND LIFT STATIONS WILL BE INCLUDED IN THE PROJECT. THE PROJECT WILL ALSO PROVIDE SEWER SERVICE TO THE TACKERVILLE AREA OF MEIGS COUNTY. THE TACKERVILLE AREA IS NOW UNDER ONSITE TREATMENT. THERE IS NO PROOING LIP-DOWN OR PARTIALLY TREATED WASTEWATER IN DITCHES AND YARDS IN THE TACKERVILLE AREA. THE SYRACUSE RACINE REGIONAL SEWER DISTRICT REQUESTS STIMULUS PACKAGE FUNDING FOR THIS MUCH NEEDED PROJECT. PROJECT OUTCOMES: sewer rehab distribution rehab total manhole rehab sewer collection system in Tackerville area | SYRACUSE RACINE REGIONAL SEWER DISTRICT | 35 | 31 to 90 days | \$500,000 |
| Meigs | Racine River Bank Stabilization Project | The river bank between the Village of Racine and the Ohio River is eroding and causing unstable areas along the bank leading to the Ohio River. The Village of Racine has been working with the Huntington Office of the U.S. Army Corps of Engineers to determine a solution for the erosion. The U.S. Army Corps of Engineers suggests the placement of rip rap along the bank to stabilize the bank and minimize erosion. The Village of Racine requests Stimulus Package funds to supplement previously allocated funds for the project. Project Outcomes: 1,200 LF of rip rap along the Ohio River | Racine, Village of | 25 | 31 to 90 days | \$168,000 |
| Meigs | Middleport Water Well Project | The Village of Middleport, Meigs County Ohio requests Stimulus Package funds to install a new water well and necessary appurtenances to make the well functional. The Village of Middleport has a low Median Household Income (\$22,532) and a high Low-to-Moderate-Income level (60.50%). The village only has two wells, when one well needs to be serviced the village needs to curtail water usage. Extended curtailment of water usage could and most likely would result in loss of jobs within Middleport that are large water consumers. The Village of Middleport will provide additional information to support this Stimulus Package fund request. Project Outcomes: 1-Water well 1-400 gallon per minute pump Necessary piping Well controls Tower to service the pitless adapter and well Valve vault Electric service | Middleport, Village of | 85 | 91 to 180 days | \$570,000 |
| Meigs | Syracuse Fire Dept. and Police Dept. Expansion and | This project would include the construction of one additional bay for the fire department plus addition of much needed storage space. The project would also request rehab and provide for much needed spaces for the police department and other departments. | Village of Syracuse | 1 | 31 to 90 days | \$200,000 |
| Meigs | Syracuse Street Improvements | The project would result in the paving and improving of approximately 4 miles of village streets. We have \$178,000 that we can use as match for this project. | Village of Syracuse | 0 | 31 to 90 days | \$250,000 |
| Meigs | Syracuse 09 Water Line Improvements | Replacement of deteriorated water lines in the rural village of Syracuse which services neighborhoods with low/moderate income residents. Project is very much needed and cannot be paid for by the village. We are at present using an ARC grant to replace other deteriorated waterlines. | Village of Syracuse | 2 | 31 to 90 days | \$200,000 |
| Meigs | Dental Office Rehab | Dr. Harold Brown would like to install an elevator for use of his patients since his office is on the second floor. He would like to enlarge his office and bring in another dentist or two to use his place as he retires. He presently employs 11 people and could possibly add 2-3 more. Without this project as he retires all the jobs will be lost | Dr. Harold Brown | 11 | 31 to 90 days | \$150,000 |
| Meigs | Dist 10, PID 82837, MEG SR 7 11.350 | Two Lane Resurfacing Project Using A Double-Microsurfing Treatment. Meg 7 11.24-18.64. | Ohio Department of Transportation | 23.4 | 31 to 90 days | \$815,000 |
| Meigs | Racine Phase 1 Water Line Replacement | Replacement of deteriorating water distribution lines in the Village of Racine Ohio. The Village has 54% water loss due to frequently breaking water distribution lines. Replacement of lines and meters will permit a reduction in operator costs and more importantly eliminate health and safety hazards associated with leaking water lines that are not paid their useful life expectancy. 6500-8" PVC pipe, 45-gate valves, 15 fire hydrants, road repair and 360 water meters | Racine, Village | 5 | 0 to 30 days | \$780,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Meigs | WWTP | WWTP Erosion project. The earthen embankments around the lagoons and irrigation fields could easily be compromised without erosion control measures, causing environmental pollution to the wastewater treatment system. WWTP Pump House Building of masonry insulated heated building to cover pumps and piping at the irrigation center. The district must close down the irrigation system in the winter months and are unable to irrigate if good weather permits and the district passed capacity limits. The district paid \$48K for all future customers until the district gets a building with heat and electric to secure the lagoon capacity. The system was not constructed to block down or drain the pipes without any guarantee the pipes are completed. WWTP Utility truck with crane built and built WWTP valves for irrigation pump. To allow one motor to run if the other motor is out for repairs. Level Gauge WWTP Equipment Tractor with blades and end loader WWTP Irrigation trailer. Pumps constructed higher than the outlet pipe installation of an automatic vacuum-prime apparatus to remove air from the strainer and piping. | Tuppers Plains Regional Sewer District | 2 | 0 to 30 days | \$200,000 |
| Meigs | WWTP Debt Retirement | WWTP Retire Debt with USDA Rural Development and OPWV loans. The district can only survive if the debt is retired. The system with over 75% low to moderate elderly needed a sewer system but it would have been nice if it were affordable and all materials and items used during construction were new. Without community involvement the system will fail and bills will most likely be much higher. Without neighborhood support the system will fail and most likely destroy this great community. The Board or the General Manager receive no wages because there's not enough money to pay for those salaries. Retire the debt because this community has the best potential growth for Meigs County and should produce much needed jobs. | Tuppers Plains Regional Sewer District | 100 | 0 to 30 days | \$850,000 |
| Meigs | Middleport Water Line Replacement and Well Abandon | The Village of Middleport would like to use the "Stimulus Grant Money" to properly abandon eleven (11) test wells drilled in the flood plain. The test wells in the flood plain pose a potential threat to the ground water supply and need to be abandoned properly. The Village of Middleport would like to use the "Stimulus Grant Money" to replace most of our aging two (2) inch water lines. As part of this project, we would like to abandon some 2" water lines that run parallel to larger water mains and switch the water taps to the newer larger water mains. We would like to loop the water mains together and install isolation valves to eliminate most of our dead and water mains. We would like to install some new and replace any defective fire hydrants and do all restoration required after this project. | Middleport, Village of | 60 | 91 to 180 days | \$3,670,906 |
| Meigs | Communications and Safety Trailer | Project Outcomes: 11 Test wells abandoned 21,000 LF of 2" water line isolation valves Replace defective fire hydrants Restoration of streets, sidewalks and easements as necessary. | Syracuse Police Department | 1,000 | 31 to 90 days | \$40,000 |
| Meigs | Syracuse Law Enforcement | To obtain funding to purchase a communication / Incident Command Vehicle. With this vehicle it will not only serve the Police Department but also used throughout the county and surrounding communities. No Law Enforcement agency, Fire Department, EMS agency or even the county Emergency Management Agency has one of these vehicles to utilize in the event of incidents. Our county's infrastructure is growing rapidly and we need a way to get out there. We need a new fire truck and the River police that we currently have is out of date. We need a new fire truck and the Village of Syracuse can only afford a police office for 40 hours a week. We need protection on a 24-hour basis. This project will provide for the addition of two part-time officers to provide better police protection for our community. | Village of Syracuse | 2 | 0 to 30 days | \$40,000 |
| Meigs | Meigs County Dog Shelter | The project will construct a new 10,000 square foot animal facility to replace a dilapidated building. The project will allow us to provide more humane conditions, and the removal of disease and other pests a much more attractive to visit with our animals. | Meigs County Animal Control | 3 | 91 to 180 days | \$500,000 |
| Meigs | Meigs County 911 Operations Center | Meigs County is the last Ohio community to implement 911 emergency services, but does not have a suitable facility for the operations. This would allow this Ohio River county to build a functional and efficient facility to effectively operate this 911 emergency service. | Meigs County Development Office | 10 | 31 to 90 days | \$600,000 |
| Meigs | Fire Department expansion with regional training c | Our project is for the construction and equipping of 3 new fire stations in an area currently unprotected by a fire department. Also, the construction of a regional firefighter/paramedic/police officer training facility to provide state law required training in an area of Southeast Ohio without such facilities. The training center will be a mainstay for post secondary education in the public safety sector for Southeast Ohio being located adjacent to an existing middle and high school and University of Rio Grande outreach facility. The strategic location of the fire stations will present a dramatic increase in fire station premises thus providing the potential for hundreds of home businesses as well as support the development of a community hospital on the same site. Additionally, the average response time will be reduced from 20+ minutes to 8-8 minutes, more in line with national guidelines for fire and EMS response. The training facility created will sustain a minimum of 10 full time jobs immediately with an increase expected with growth that is present in similar facilities in Columbus. Several dozen jobs will be created during the construction phase of the project. | Pomeroy Volunteer Fire Department | 30 | 91 to 180 days | \$2,000,000 |
| Meigs | Fire station and regional training center construc | Our project is for the construction and equipping of 3 new fire stations in an area currently unprotected by a fire department. Also, the construction of a regional firefighter/paramedic/police officer training facility to provide state law required training in an area of Southeast Ohio without such facilities. The training center will be a mainstay for post secondary education in the public safety sector for Southeast Ohio being located adjacent to an existing middle and high school and University of Rio Grande outreach facility. The training facility created will sustain a minimum of 10 full time jobs immediately with an increase expected with growth that is present in similar facilities in Columbus. Several dozen jobs will be created during the construction phase of the project. | Pomeroy Volunteer Fire Department | 30 | 91 to 180 days | \$2,000,000 |
| Meigs | Building improvement and stock | Building building, repairing parking area, improving handicapped ramp, new floor inside building, new meat slicer and grinder | B&R Market | 3 | 0 to 30 days | \$25,000 |
| Meigs | TPCWD - Power Plant Water Service Tanks | The project will be located in Meigs County and consist of two new water storage tanks needed to provide potable water to two proposed electric power plants. The tanks will be located at the Marston Ridge and Mill Hill Tank sites. The project will provide the additional storage capacity required to meet the hydraulic needs of the proposed AMP Ohio and AEP power plants and maintain the EPA required minimum pressure in the distribution system. | Tuppers Plains-Chester Water- ME Companies, Inc. | 30 | 91 to 180 days | \$1,000,000 |
| Meigs | TPCWD - Phase 7 Waterline Extensions | The waterline project will be located along Township Road 119 in Athens County, Tanners Run Road, Peach Fork Road, Riblet Road, Goose Creek Road, and Shady Lane Road in Meigs County. The waterline will include 23,360 feet of 4" PVC SDR 21, 5,700 feet of 4" PVC C900 DR 15, 3,300 feet of 2" PVC SDR 21, and 4,000 feet of 2" PVC SDR 21. The project will also include 200 service tees, 100 2" x 2" gate valves, hydrants, and 20 service tees. The project will eliminate potential health risks associated with water quality/quality issues in the area. | Tuppers Plains-Chester Water- ME Companies, Inc. | 30 | 91 to 180 days | \$724,000 |
| Meigs | Racine River Bank Stabilization (Revised) | The river bank between the Village of Racine and the Ohio River is eroding and causing unstable areas along the bank leading to the Ohio River. The Village of Racine has been working with the Huntington Office of the U.S. Army Corps of Engineers to determine a solution for the erosion. The U.S. Army Corps of Engineers suggests the placement of rip rap along the bank to stabilize the bank and minimize erosion. | Racine, Village of | 25 | 31 to 90 days | \$350,000 |
| Meigs | Pomeroy Combined Sewer Overflow Elimination & Exte | The Village of Racine requests Stimulus Package funds to supplement previously allocated funds for the project. The Village submitted a previous request for Stimulus Funds and later received an updated costs estimate from the USACE which increased the total project cost. Project Outcomes: 1,200 LF of rip rap along the Ohio River Install 5100 feet of PVC sewer line in various diameters. 3 lift stations, 12 manholes. Rip rap on ramp. | Village of Pomeroy | 20 | 31 to 90 days | \$1,200,000 |
| Meigs | A Taste of Italy | The restaurant will be in Meigs County known to the world as Appalachia. It's a part of the United States that, to some eyes, might look like another country. Appalachia has been called the forgotten America. But this is a different Appalachia than the one President Lyndon Johnson targeted 45 years ago in a war on poverty that sought to uplift the region's economic and social plight with an unparalleled infusion of tax dollars. It's generally considered the war was lost. The approach now is self-reliance. People like me need help sustain their community and finally realize salvation for Appalachia is not coming from the outside. I feel the 1st step in revitalizing Meigs County are more homegrown entrepreneurs like myself. I realize opening my restaurant is only a small step... but it's a start to self-reliance for myself and others. More importantly, we would like to rebuild our community one small business at a time. | Restaurant | 8 | 0 to 30 days | \$250,000 |
| Meigs | Restaurant "A taste of Italy" | The restaurant will be in Meigs County known to the world as Appalachia. It's a part of the United States that, to some eyes, might look like another country. Appalachia has been called the forgotten America. But this is a different Appalachia than the one President Lyndon Johnson targeted 45 years ago in a war on poverty that sought to uplift the region's economic and social plight with an unparalleled infusion of tax dollars. | Meigs | Adult Services Addition | This project has partial funding from the Ohio Department of MR/DD. The project has architectural drawings and was out for bid 2 years ago but bids came in higher than we could manage. The project is to add additional space to our Adult Services Center where we provide habilitation and vocational services to adults with developmental disabilities. Our building was built in the early 1980's and is well maintained, but too small for our evergrowing group of aging adults. It's additional additional space, we plan to renovate and update some of the existing space - updating the restroom, adding changing areas, and zoning our lockers off of our workshop floor to allow for additional vocational/work space for our adults. | Meigs County Board of MR/DD | 20 | 91 to 180 days | \$282,000 |
| Meigs | Mulberry Pond Restoration Project | Clean-up on the pond dredging, debris removal. Small wild life breeding. Some where for the classes to take fieldtrips. Picnic area rest stop for the residents of Meigs Co. Also for the people who are just passing through Meigs Co. It will be a none pay fishing pond. Everyone will be welcome to enjoy this pond this is a good project for the Village of Meigs Co. It's Our desire to enhance this area greatly. Thank You This shovel ready project has architectural plans and has been out for bids 2 years ago, but came in over budget. We have \$800,000 committed to this project, but need an additional \$100,000 to complete it. | Mulberry Pond Restoration Project | 20,000 | 181 days or more | \$5,000 |
| Meigs | Meigs MRDD Early Childhood Project | We are planning for an addition and for renovation of Early Childhood space for preschoolers with developmental disabilities and their age appropriate peers. We wish to add a speech therapy office, a sensory integration area, and another classroom with a room for our existing school. We also want to renovate 3 of our small classrooms into 2 more appropriately spaced classrooms, including the addition of a restroom to accommodate the second classroom. We appreciate your consideration of our request. | Meigs County Board of MR/DD | 20 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Meigs | Energy upgrades | The project is designed to replace all the single pane windows in the high school (100), and upgrade the cooling system to be more energy efficient. The request also covers upgrades and repairs to the elementary school such as roof replacement, and energy efficient changes to the heating and cooling system. The project also includes identified repairs to school by ODFW to bring the elementary building up to code. The project would also use ODFW funds to make these repairs to the existing elementary. These projects would bring about 50 temporary jobs to a previously economically depressed area and provide for a more energy efficient atmosphere. We have a detailed report of the project's scope and what materials it needs. The repairs would take around one year to complete. | Southern Local Schools | 50 | 31 to 90 days | \$1,200,000 |
| Meigs | Middleport Sewer System Improvements | Construction of a 36" interceptor sewer, pump station improvements to the Park Street and Mill Street stations, and capacity improvements to the wastewater treatment plant in order to reduce the Village's current 13 Combined Sewer Overflows. | URS Corporation | 10 | 181 days or more | \$4,500,000 |
| Meigs | building maintenance | Painting building. Replacing parking area, new flooring inside building, upgrading equipment, restoring shelves. The grant technology to renovate office space and training facilities at Bradley Learning Ctr., Eastern, Meigs and Southern Local Schools. The renovations will accommodate AMES personnel who provide critical direct, supervisory and technical support services to school districts and public governmental agencies throughout Region 16. | B&R Market | 3 | 0 to 30 days | \$25,000 |
| Meigs | Region 16 Educational Service Delivery Improvement | The proposed project will significantly improve the effectiveness and efficiency of the educational service system in our region by: <ul style="list-style-type: none"> • Improving the ability of all stakeholders to access services • Reducing operational and service delivery costs for schools and other service agencies • Enhancing the ability of all stakeholders to collaborate to plan, deliver and evaluate services • Offering on-site, job-embedded professional development opportunities for educators • Upgrading existing facilities to allow the use of state of the art technology to provide learning opportunities for unserved and underserved populations of children and adults • Maximizing the ability of local agencies to use existing resources to meet local and regional needs • Retain and create jobs and personnel required to deliver critical services to schools and communities | Athens-Meigs Educational Service Center | 187 | 0 to 30 days | \$1,500,000 |
| Meigs | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data plans those areas to be mostly suburban and urban Ohio, covering a 340 into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds. Establishing a wireless service is much more cost effective than trying cable to such homes, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create an expansion that will create countless jobs statewide. The project would result in the paving and improving of approximately 4 miles of village streets. We have \$178,000 that we would like to match for this project and we can begin as soon as weather permits. The project would result in the paving and improving of approximately 4 miles of village streets. We have \$178,000 that we would like to match for this project and the project can be started as soon as weather permits. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Meigs | Syracuse Street Improvements | | Village of Syracuse | 10 | 31 to 90 days | \$250,000 |
| Meigs | Syracuse Street Improvements | | Village of Syracuse | 10 | 31 to 90 days | \$250,000 |
| Meigs | Meigs County Law Enforcement Targeted Services | Addition of eight full-time law enforcement officers (deputy sheriff) to existing staff of the Meigs County Sheriff's Office in a particular area of jurisdiction as part of an offensive investigation and prosecution strategy. The project will include 20 more generalized patrol duties. Officers to be recruited and integrated into an assignment to facilitate long and short-term investigations. The procedures involving illegal drug activity and other criminal activity involving drug crimes. The recruitment and integration of officers will be based on high-risk situations. Personnel to be recruited to create computerized files. Due to nature of tasks, officers will be required to work in high-risk situations. Forfeiture of assets obtained through the commission of felony offenses will be aggressively pursued, with proceeds from such forfeitures being used to fund further additional investigations and prosecutions. Project would seek to effectively increase by 25% the number of significant felony drug arrests and convictions and measurably reduce, within the first year of operation, the flow of illegal drugs in Meigs County. Personnel who provide critical direct, supervisory and technical support services to school districts and public governmental agencies throughout Region 16. | Office of Colleen S. Williams, Meigs County Prosec | 8 | 31 to 90 days | \$300,000 |
| Meigs | Athens-Meigs ESC Learning Center | The proposed project will significantly improve the effectiveness and efficiency of the educational service system in our region by: <ul style="list-style-type: none"> • Strengthening partnerships with University of Rio Grande, school districts, and public/governmental agencies. • Establishing a collaborative, professional and continuous learning environment with effective linkages between educators, families and members of the community that will support the success of all students. • Reducing operational costs with an energy efficient, well-designed facility. • Offering on-site, job-embedded professional development opportunities for educators • Offering of state of the art technology to provide learning opportunities for unserved and underserved populations of children and adults • Retaining, attracting and creating jobs and personnel required to deliver critical services to schools and communities | Athens-Meigs Educational Service Center | 200 | 181 days or more | \$2,500,000 |
| Meigs | MEG-CR82-4.00 | Replacement of a structurally deficient and functionally obsolete bridge with a new bridge on new abutments. | Meigs County Highway Department | 18 | 91 to 180 days | \$464,000 |
| Meigs | MEG-CR52-2.13 | Replacement of an existing structurally deficient functionally obsolete bridge with a new bridge on new abutments | Meigs County Highway Department | 15 | 91 to 180 days | \$327,000 |
| Meigs | MEG-CR11-13.22 | Replacement of a structurally deficient an functionally obsolete bridge with a new bridge on new abutment. | Meigs County Highway Department | 15 | 91 to 180 days | \$371,000 |
| Meigs | MEG-CR14-4.32 | Construction of a new bridge on new abutment on Meigs County Road 14 | Meigs County Highway Department | 15 | 0 to 30 days | \$63,000 |
| Meigs | MEG-CR33A-0.00 | Pavement, berm and slope 3.997 miles of Federal Aid Secondary major collector on the county highway system | Meigs County Highway Department | 20 | 31 to 90 days | \$722,736 |
| Meigs | MEG-CR28-7.40,CR31-0.00,CR35-0.00 | Pavement, berm and slope 14.67 miles of minor collector routes on the county highway system | Meigs County Highway Department | 25 | 31 to 90 days | \$2,477,547 |
| Meigs | MEG-CR46-0.00,CR36-0.00 | Pavement, berm and slope 1.75 miles of minor collector routes on the county highway system | Meigs County Highway Department | 25 | 31 to 90 days | \$1,687,559 |
| Meigs | MEG-CR18-0.00,CR20-3.36,CR26-0.00 | Pavement, berm and slope 15.21 miles of Federal Aid Secondary roadway on the county highway system. | Meigs County Highway Department | 25 | 31 to 90 days | \$2,110,708 |
| Meigs | MEG-CR1-0.00 | Pavement, berm and slope 15.01 miles of Federal Aid Secondary roadway on the county highway system. | Meigs County Highway Department | 25 | 31 to 90 days | \$2,447,183 |
| Meigs | MEG-CR7A-0.00 | Pavement, berm and slope 1.972 miles of Federal Secondary Major Collector Route | Meigs County Highway Department | 20 | 31 to 90 days | \$926,000 |
| Meigs | Parent and Child Divorce Education Program | The goal is to expand the current Meigs County Parent Education Program to assist parents in coping with the effects of divorce, dissolution and separation on parents and children and to provide the resources for the children affected by divorce. The program currently is provided to the parents of divorce with very minimal funds and has no resources to provide any additional services or upgrades with a high probability that the program will lose the current funds. There is an extensive need for the program to be upgraded and expanded to provide services not only to the parents but to the children affected by divorce. Meigs County is a rural county with a divorce rate as high as 77%, compared to national averages of approximately 50-52% with very limited resources available to provide needed services to parents and children. Children are affected by divorce, dissolution and child custody litigation have no resources to assist them in dealing with the effects of the actions. There is a strong need for programs to be expanded to include the children of all ages and has been requested by parents for their children. | Meigs County Parent Education Program for Divorcin | 5 | 31 to 90 days | \$250,000 |
| Meigs | Water Meter Project | Replace approximately 1000 water meters and fittings and associated reading equipment and software to reduce losses and restore financial capability to the Department of Public Works. | Village of Pomeroy Dept. of Public Works | 1 | 31 to 90 days | \$288,000 |
| Meigs | Middleport LTCP | The project involves the rehabilitation of the Middleport wastewater collection system and the Middleport wastewater treatment plant. The project is being completed at the insistence of Ohio EPA. The project will reduce/eliminate raw sewage overflows. Stimulus Package funds are required to make this project affordable for residents of Middleport. The Median Household Income of Middleport is \$22,532. The project includes removal of mine drainage from the collection system. | Middleport, Village of | 30 | 181 days or more | \$4,000,000 |
| Meigs | Emergency Backup Generator | Middleport will provide additional documents to support this request. | Tuppers Plains-Chester Water District | 10 | 31 to 90 days | \$315,000 |
| Meigs | Power Plant Water Service | Emergency Backup Generators - The proposed project will provide seven fixed in place generators to provide emergency backup power for the district office and six booster stations in the existing distribution system. These generators will provide backup power to the sole source of water for many portions of the system and will insure they can maintain potable water service during power outages. The addition of emergency backup power is critical to Tupper Plains-Chester Water District being able to provide continuous service. The Power Plant Service Project consists of upgrades and alterations to the existing TPWWD distribution system required for potable water service to two (2) new power plants proposed in Meigs County. The project is for the broad based purpose of promoting economic growth and development to a very distressed area. Two new Electric Power Plants are currently proposed by AEP and AMP Ohio in Meigs County. This project will provide potable water service to these facilities. Hundreds of jobs will be created if these power plants are constructed and the economic boost to the area will be substantial. Availability of a public water supply is critical to the development of these power plants as well as the numerous new commercial and residential customers that will develop as a direct result of the power plant construction. | Tuppers Plains-Chester Water District | 20 | 91 to 180 days | \$3,670,000 |
| Meigs | Community Center | Building of a 3000 sq ft community wellness facility. Purchase of cardiorespirator and strength training equipment. | Eastern Local School District | 18 | 0 to 30 days | \$500,000 |
| Meigs | High School Renovation | Repair and replacement of school parking lot. Upgrade the fire and safety system to current code regulations. Upgrade electrical and HVAC systems to more energy efficient equipment. Renovate building entrance to include more secure entrance and building access control. Replace current building access control with new system that allows for greater control and monitoring of access. | Eastern Local School District | 15 | 31 to 90 days | \$225,000 |
| Meigs | Eastern Elementary School Expansion and Renovation | Expansion of facility due to increased enrollment by the addition of six classrooms. Upgrade in fire and safety system to meet current code requirements. Install energy efficient electrical upgrades. Renovate building entrance for additional safety and security of students and staff. Install surveillance security system for school safety. Install new door control system to monitor facility access. Renovations to enhance the efficiency of the operations of the building that houses pre-school education. Replacement of windows. Upgrade/renovation of classroom space and energy efficient lighting. | Eastern Local School District | 25 | 181 days or more | \$500,000 |
| Meigs | Admin & Head Start Renovations | Upgrade/renovation of classroom space and energy efficient lighting. | Eastern Local School District | 10 | 91 to 180 days | \$175,000 |
| Meigs | Building Revitalization | Our building is a very solid, very old, historic two story brick structure in the main part of town and is in bad need of some major repair. As with all small towns throughout the country a shrinking population and decreasing tax base have limited the resources of up-keep on this building. Our building currently needs a new front facing to replace the current one, repair and repainting of the upper facade, recovering of 24 windows on the first and second floors and replacement of the existing sidewalk on the east side of the building. This much needed repair would not only dramatically improve the appearance of this historic building but also insure that further damage to the structure would not occur. It would also help to improve the appearance of the entire business district. Also it would employ approximately 30-40 local workers that desperately need employment in our severely depressed area. Paint, building supplies and various other amenities could and would be purchased locally which would further help to stimulate our local economy in this time of hardship. In closing, the Middleport Masonic Lodge is an entirely volunteer fraternity on a very limited budget with several high priority needs. The needs as a corporation of a new building to house the Health Department, including dentists and the EPCMC medical center. This project allow the construction of a "one-stop" wellness center for the County that does not currently have a hospital. Currently the Health Department employs 20 persons and the EPCMC employs 10 persons and combined they have 15000 client contacts per year. Given the current economy this figure is expected to grow by 10% per year. | Middleport Masonic Lodge 363 | 45 | 0 to 30 days | \$85,000 |
| Meigs | Health Services Building Project | A community facility to house the Health Department and other vital and necessary community services and activities. This new addition will bring the available and needed space to 15,000 sq ft and provide new safety and community advantages. | Meigs County General Health District | 20 | 31 to 90 days | \$2,500,000 |
| Meigs | Community Fire Department Building | Replace approx. 300 water meters for existing customers, current water meters are approx. 30yrs old, to cut down on water loss from leakage. | Tuppers Plains Fire Incorporated | 3 | 0 to 30 days | \$100,000 |
| Meigs | water meter replacement | | rutland village | 2 | 31 to 90 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Meigs | Meigs Animal/Equine Science & Veterinary Technolog | Technology, & environment technology. Partial curriculum: Animal anatomy, reproductive physiology, nutrition, genetics, disease/treatment/prevention, farm mgmt, ultrasound, vet x-ray, mud math, IT, database devlpmt, small business web design, internet marketing, etc. Outcomes – 5 yr plan 2 yr associate in animal/equine science & technology 2+1 veterinary technology degree 6 certificate programs Internationally recognized faculty recruited will bring Ohio's Veterinary CE program to Meigs County(14.9%unemplnt), making it a regional hub for veterinary CE, training for vet techs, animal/equine science & IT. Combining physical sciences, technology, hands on experience, & work ethic, grads enjoy recession proof jobs in animal/equine science, vet tech, Homeland Security Tech-Ag, cancer research tech, reproductive mgr, environmental consult, ag sales mgr w/ IT skills, farm mgr w/ science, computer, business/marketing skills, etc. | S.E. Ohio Animal/Equine Science & Technology Schoo | 75 | 0 to 30 days | \$3,384,600 |
| Meigs | Rutland Fire Department Building | Project will build a new 12,000 square foot fire station that is large enough to provide services to a new 1000 student K-8 school in the community. The current fire house is small for the needed equipment and is located in the flood zone, which impacts our ability to assist our citizens in a flood emergency. | Rutland Fire Department | 2 | 91 to 180 days | \$400,000 |
| Meigs | expansion and updating | I have a small restaurant and people are constantly having to leave due to lack of seating. I have room to expand and would like to use the money to build on to our building. I also have outdated equipment and would like to use the money to update my equipment. I would like to make some minor and major repairs to the restaurant. This money would help so much for me and my employees. I would be able to give more jobs to the community as well. Thank you so much for your consideration. Stephanie Sikorski | Riverway Cafe | 8 | 31 to 90 days | \$20,000 |
| Meigs | Meigs Addiction Treatment Program | The pressures of increasing State funding and increased demand for Medicaid match have rendered drug and alcohol counseling unavailable to many in need in rural Appalachian counties. Whereas, at one time, approximately 150 counseling sessions per year could be secured at HRS Meigs County office, now fewer than fifty can be secured. This occurs at a time when demand for services is increasing due to substantial increases in the use of heroin and other drugs. Funding is requested to restore a full range of outpatient services available to all persons seeking such services. HRS request \$100,000 of funding to provide assessment and treatment services to approximately 100 clients over the course of one year. Of these, 25-35 may receive intensive outpatient services, which is several counseling sessions per week and the remainder conventional outpatient services, with appointments once per week. It is anticipated 75% of clients will be returned by the county, Courthouse and Common Pleas Court. | Health Recovery Services, Inc | 3 | 0 to 30 days | \$100,000 |
| Mercer | Rockford Waste Water Treatment Plant | Change existing wastewater lagoon treatment plant into a activated sludge wastewater treatment plant. Our current plant is the oldest in the county. A leachate produced in our village is under orders from CEPA to shut discharge lines to our plant. By receiving this money we can meet village demands for wastewater treatment as well as the production company. The company will give a \$350,000 unsecured bond. Additional \$50,000 per year for this project. The problem being our small village has borrowed money for a new sewer system. It is currently building a new water treatment plant so we have too much of a debt load to borrow anymore. If we can get this money the company they will be forced to leave our community, and state, with their jobs. | Village of Rockford | 65 | 91 to 180 days | \$2,500,000 |
| Mercer | Rockford Water Treatment Plant | Construction of new water treatment plant and the installation of water meters for all customers. The existing system of this project is able to supply an adequate amount of safe drinking water to our customers. We have recently seen an additional 1000+ new students in our community through the building of a one site school for three communities. Maturing customers for the first time. This is a conservation benefit. | Village of Rockford | 65 | 0 to 30 days | \$1,000,000 |
| Mercer | Mercer County MCI Lagoon #4 | The installation of a fourth lagoon cell for additional capacity at the Montezuma Club Island WWTP. This new cell will prevent any uncontrolled release of waste water to Grand Lake St. Marys. | Fanning/Howey Associates, Inc. | 4 | 31 to 90 days | \$700,000 |
| Mercer | MER CR180-(12.16-16.08) Oregon Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Oregon Road from US 127 extending to US 33. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$1,000,000 |
| Mercer | MER CR 240A-(5.32-8.33) Shelley Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Shelley Road from SR 707 extending to Mercer/Van Wert County Line Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$900,000 |
| Mercer | Helping families with at-risk children in our comm | Working with High Risk children to help families be able to receive services to help prevent family breaking apart due to services not be available to them. The children are referred to FCFC from the education system, court system and family referrals. With parents being hard economic times they may require assistance beyond their means. This is a collaboration of everyone involved with the families to help prevent them being removed from homes and helps give them hope for a desirable outcome in the future life. It looks like the money we were able to access in the past years serious cuts and we face greater challenges with our families. We would be able to provide respite, assessments needed to prevent more serious problems. Support for mental as well as the children and additional family members involved. We must do our best to be there for those families facing situations with High-Risk children where there seems to be no answers. Treatment teams come together after gathering outside information with the family to examine what needs to happen on their part and what is able to be provided by our county. | Mercer County Family & Children First | 10 | 0 to 30 days | \$50,000 |
| Mercer | MER CR 175C-(0.00-1.51) Gallman Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Gallman Road from Menard Road extending to Mercer County Line Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$450,000 |
| Mercer | Direct Services for Clients | O.U.R. Home would be able to provide direct services to those families and individuals that require assistance with clothing, food. We would also be able to provide assistance with medications, doctor/dental appointments. Housing needs and utilities payments necessary to prevent shut-off for families. So many people in our county may fall through the cracks because they just lost jobs... sometimes all individuals working within the family have been laid off. Food pantry gives help to feeding the family. Needs that are presented are looked at and verified as well as income. During hard times being able to easily clothing as well as food, school supplies, transportation to medical appointments, basic needs that people who have never been in this situation before - helps our county. We serve as an information and referral system and that means people make their way to our agency to find help. We are seeing new faces, more faces, more families finding themselves in desperate situations. The money requested would enable us to offer direct services that are needed to help families survive during these hard times. | O.U.R. Home Family Resource Center | 5 | 0 to 30 days | \$75,000 |
| Mercer | Water Tower Replacement | Replacing old existing water tower with new 350,000 gal tower to meet growing needs of business and community growth. | Village of St. Henry | 500 | 181 days or more | \$750,000 |
| Mercer | MER CR 161C-(0.00-3.75) Neptune-Mendon Road Improv | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Neptune-Mendon Road from US 33 extending to 1.4 mile north of Mercer Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$1,125,000 |
| Mercer | MER CR110-(4.25-8.17) | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on St. Anthony Road from 1/4 mile east of Burnetts Road extending to Burnettsville St. Henry Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$1,200,000 |
| Mercer | MER CR 130-(0.96-2.73) Schroeder Road Improvement | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Schroeder Road from SR 48 extending to Washburn Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 0 to 30 days | \$500,000 |
| Mercer | MER CR 126-(0.50-2.00) Monroe Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Schroeder Road from Knack Road extending to SR 118. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$450,000 |
| Mercer | MER CR171-(3.03-5.05) St. Johns Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on St. Johns Road from SR 118 extending to SR 274. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$500,000 |
| Mercer | MER CR 181-(4.61-5.62) Mercer-Auglaize Co. Line Ro | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Mercer-Auglaize County Line Road from SR 274 extending to Brodman Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$300,000 |
| Mercer | MER CR 70B-(2.19-4.03) Brockman Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Brockman Road from Chickasaw Road extending to Mercer-Auglaize County Line Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$500,000 |
| Mercer | MER CR 163-(0.00-1.98) Chickasaw Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Chickasaw Road from SR 274 extending to Clover Four Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$550,000 |
| Mercer | MER CR 153A-(0.00-2.08) Harrison Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Harrison Road from SR 274 extending to Clover Four Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$600,000 |
| Mercer | MER CR 145A-(0.00-1.97) CR 716-A Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on CR 716-A Road from SR 274 Road extending to Clover Four Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$600,000 |
| Mercer | Sewer Separation Project - Phase I | Separation of sanitary and storm sewers as part of the requirements of our NPDES permit with CEPA. This will include total reconstruction of two main mains in our Village, replacement of an infiltrator storm culvert under SR 84, along with separation of each home within the project area includes 11,000' of sanitary sewer, 4,651' of storm sewer, 3,000' linear ft of road reconstruction, new storm and sanitary lagoons for each home in the project area. Environmental assessment on project area completed and approved by USDA. Phase II will follow which will complete the remaining portion of the village to be separated at a cost of \$1.7 million. Our final goal will be to have a sanitary sewer system with maintaining a separated sewer system to benefit the overall quality of the Washburn Watershed. While not a finding or order by CEPA, it is a requirement of our NPDES permit to complete the separation within 12 year period, with our goal being to complete it in 5-7 years. | Village of Fort Recovery | 30 | 91 to 180 days | \$750,000 |
| Mercer | MER CR 196-(1.99-5.02) Tama Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Tama Road from Washburn Road extending to Township Line Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$900,000 |
| Mercer | MER CR 70A-(1.91-3.75) Depweg Road Improvements | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Depweg Road from US 127 extending to Brodman Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$550,000 |
| Mercer | Stream Restoration | 3000 Linear feet of stream restoration to be installed and will allow for bank protection and silt removal areas. This project will not only improve the water quality but will promote a "green area" for wildlife and flora. | Village of Coldwater | 10 | 31 to 90 days | \$400,000 |
| Mercer | MER CR 72-(1.11-3.57) | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Sebastian Road from Cassata-Montezuma Road extending to Harrison Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$700,000 |
| Mercer | Fort Recovery WWTP Improvement Project | This project would upgrade our current WWTP, which currently consists of two totally facultative shallow lagoons. This upgrade would be to install an Air Diffusion System in our primary lagoons to help treat our CSOD, DO & other required limits as imposed by CEPA. We currently have a company (egg processing facility) that has an indirect discharge permit that is struggling to meet the requirements and has looked at various options to prevent the outfall. Upgrading is so costly that they likely would like the company to help pay for the outfall, thus making the job with it. We also have a second company looking to upgrade and expand by adding adapting process. While they will be installing the required treatment equipment, this Air Diffusion System will help control the sludge buildup and help us control our limits on the various requirements from CEPA. This project will correct existing 14,850' of 30" sanitation lagoon, 1,200' of 60" under lagoon, two 20' by 20' by 6' storm & stormwater source of power. This will keep us in compliance with our NPDES permit requirements for many years to come. | Village of Fort Recovery | 70 | 91 to 180 days | \$200,000 |
| Mercer | MER CR 117-(0.00-0.67) | Widen pavement to 24' and widen shoulder to 6' 6". Improve roadway clear zones and correct geometric deficiencies. Project is on Johnston Road from US 127 extending to Coldwater Creek Road. Project will greatly improve the safety of the roadway for the traveling public and will improve the ability of agriculture and commerce to use the roadway. | Mercer County Engineer | 10 | 31 to 90 days | \$200,000 |
| Mercer | Dist 7, PID 80888, MER SR 29/SR 707 0.00/13.39 | Resurfacing | Ohio Department of Transportation | 83 | 31 to 90 days | \$2,892,516 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Mercer | Marion Township Sanitary Sewer Collection | The construction of approximately 3 miles of new 12-inch sanitary sewer collection pipe and 1 mile of 8-inch sanitary sewer collection pipe. Two 40-hp grinder pump stations, one main lift station to convey the wastewater to the Chickasaw treatment lagoons which flows to the Grand Lake St. Marys. The new sewer system would provide a centralized system for an additional 300 homes in the Marion County area. The plans for this project are to be submitted to the Ohio EPA for the permit to install by March 15, 2009. | Fanning Howey Associates, Inc. | 5 | 91 to 180 days | \$1,500,000 |
| Mercer | City waste water geothermal heating and cooling | Heat and cool entire city of 5,000 using treated waste water from sewage treatment ponds. Combined with wind power the potential is there for zero carbon emissions. City could eventually be self-sustaining without the use of any fossil fuels. Technology to do this project is available now and MADE IN THE USA. Project only requires 2 water lines to be run through the city. A feed and return line. Waste heat could be transferred to home or business hot water storage. A system of this type or with a few modifications could be used in thousands of communities through the county. This will have extreme long term benefits. Cleaner air, eliminate need for import of fossil fuels, money collected for service would stay in community. Life spans of 25 to 30 years for homes, 50 years or more for infrastructure. Long term health benefits of cleaner air, which could result in lower insurance, medicine and medicare costs. | Mercer Color Corporation | 150 | 31 to 90 days | \$18,000,000 |
| Mercer | Bleacher Seating/handicapped upgrade | We have a pressing need to upgrade our existing bleacher system for safety reasons and to meet the needs of the handicapped. The project call for 991 seats and 10 handicapped seats on the one side of our stadium. We currently have 0 handicapped seats. The jobs retained would be through the demand for the steel used in the manufacturing of the seats. The actual installation of the seats would be completed by local volunteers, a practice that is often used as a cost saving measure in our district. The system we look to replace has been in place since 1965. It is a wooden system, and clearly provides a safety hazard in its present condition. This seating is an area of high traffic, and to be able to complete it would meet the needs of many, and in particular the handicapped who attend these events. | Marion Local Schools | 0 | 0 to 30 days | \$70,000 |
| Mercer | Group Home for people with developmental disability | This project would be a new community based group home and respite care facility for people with developmental disabilities. | Mercer Residential Services, Inc | 8 | 31 to 90 days | \$85,161 |
| Mercer | Chickasaw - WWTP Improvements | Currently we have 8 best CEFMIR facility with clients doubled up in four small bedrooms. This project would enable us to provide each client their own bedroom, in a smaller setting, and also permit us to provide short term respite care to additional clients. Improvements at the village's lagoon type wastewater treatment plant. Improvements would include the installation of solar powered aerators in lagoon cells #2 and #3 of their 3 cell lagoon treatment plant. The first cell already has a solar powered aerator unit in operation. In addition to the two (2) solar powered aerator units, the project would include the installation of a wastewater flow influent meter and a wastewater flow discharge meter. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$175,000 |
| Mercer | Chickasaw - Waterline Improvements | Upgrading of the village's water distribution system by replacing existing undersized and deteriorating water distribution lines. The project will improve the water pressure and fire flow throughout the village and also allow for future expansion to a town square area of approximately 1000 sq. ft. on State Route 716. The project would involve the upgrading and replacement of approximately 8500' of 4" waterline. | Village of Chickasaw- Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$500,000 |
| Mercer | Chickasaw - Water Meters | The purchase of approximately 150 remote read residential water meters and the associated software for billing purposes. The village/homeowner would be installing the water meters and the billing would be used to purchase the water meters. This village would like to complete this project so they could begin billing the water and sewer systems on a usage basis and not a flat rate. This should promote water conservation in the village and also limit the amount of treated wastewater discharged by the wastewater treatment plant. | Fanning/Howey Civil Engineering Division | 1 | 31 to 90 days | \$40,000 |
| Mercer | Home Improvement | 35 square feet of new roofing installed 100 yards of new septic installed | homeowner | 0 | 31 to 90 days | \$35,000 |
| Mercer | Fire Station Expansion and Renovation | The project is the expansion and renovation of the existing fire station which services all of Celina and Mercer County for fire protection, ambulance service, and EMS services. Total renovated and new square footage is planned to be 15,000 sq. ft. | City of Celina | 100 | 91 to 180 days | \$1,875,000 |
| Mercer | Buckeye Street Waterline | Replacement and updating of an existing waterline in Buckeye Street as a part of a Federal Aid Highway Project scheduled for start of construction in May of 2009. The updating of this line is critical to the City's over lying system of the water distribution system. | City of Celina | 100 | 31 to 90 days | \$350,000 |
| Mercer | North Main Street | 4.252 linear feet of water main and all valves, hydrants, and fittings. | City of Celina | 100 | 31 to 90 days | \$379,500 |
| Mercer | Fairground Lift Station Replacement | North Main Street is also US 127 through the City of Celina. It is in need of new curbs, gutters, sidewalks, and re-surfacing through the north section of the community. | City of Celina | 100 | 91 to 180 days | \$450,000 |
| Mercer | Washington Street Revitalization | This sewage lift station is over 50 years old and in need of replacement. The re-construction of Washington Street is part of an overall plan of neighbor hood revitalization for this distressed area of the community. A national and state project will assist in constructing the street and in upgrading the neighborhood. Washington Street is approximately 1000 feet in length. | City of Celina | 100 | 31 to 90 days | \$235,000 |
| Mercer | Algae to Energy Project | The City of Celina is in the process of removing algae from Grand Lake St. Marys for the purpose of extracting oil from the algae to produce biofuels and to produce electricity for the City's electrical distribution system from a bioreactor. | City of Celina | 100 | 91 to 180 days | \$4,250,000 |
| Mercer | Drinking Water Source Protection Project | The City of Celina Surface Water Treatment Plant services customers both within the city and county. The source of the drinking water is Grand Lake which is in need of constant dredging to insure a quality of the source water. This project will establish a permanent and perpetual sediment removal system for the lake which will help to insure long term viable source of drinking water. | City of Celina | 100 | 91 to 180 days | \$3,500,000 |
| Mercer | WWTP Improvements | The current WWTP is in need of additional upgrades to the pumping station, sludge digestion system, chemical feed systems, and laboratory. These systems date back to the 1950s and are in need of replacement. | City of Celina | 100 | 91 to 180 days | \$1,350,000 |
| Mercer | Mini Mart | A pump/ tanks in ground to sell gas/handled at mini mart | none | 3 | 91 to 180 days | \$250,000 |
| Mercer | Chickasaw - WWTP Improvements | Improvements at the village's lagoon type wastewater treatment plant. Improvements would include the installation of solar powered aerator units in lagoon cells #2 and #3 of the village's three cell lagoon treatment plant. The first cell already has a solar powered aerator unit in operation. In addition to the two solar powered aerator units, the project would include the installation of a wastewater flow influent meter and a wastewater flow discharge meter. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$175,000 |
| Mercer | Chickasaw - Water Meters | The purchase of approximately 150 remote read residential water meters and the associated software for water billing purposes. The village/homeowner would be installing the water meters and the billing would be used to purchase the water meters. The village would like to complete this project so they could begin billing the water and sewer systems on a usage basis and not a flat rate. This should promote water conservation in the village and also limit the amount of treated wastewater discharged by the wastewater treatment plant. | Village of Chickasaw- Fanning/Howey Civil Engineering Division | 1 | 181 days or more | \$40,000 |
| Mercer | Franklin/Market Street Reconstruction Project | 20 tree stumps removed 7,400 l.f. curb/gutter removed 40,000 s.f. walk removed 4,600 s.y. subgrade compaction 15,000 s.y. pavement paving 1,200 aggregate base 5,000 gal tank coat 1,400 s.y. asphalt 1,950 s.y. non-reinforced concrete pavement 65,000 s.f. concrete walk 14,600 l.f. concrete curb & gutter | Village of Rockford | 20 | 91 to 180 days | \$675,000 |
| Mercer | Bestchem+Supply College and University Green Prin | The expected outcome of this project is to repair poor streets and enhance the development of the area around our new school. This would open the possibility of development where it is most needed. It would allow school children to walk to school without using the us highway as the school bus on the outside edge of town. Teach green printing practices in schools,colleges and universities. Included will be digital front end,presentation,press,green consumable products,how to read and interpret an MSDS sheet, accompanied by industry veterans with years of experience and insight as to how the whole systems works in a live industrial environment. Long term effects will be students that go into industry will have practical knowledge and methodologies to increase energy use and an in depth knowledge of renewable consumables. This will lower the carbon footprint of offset printing manufacturing process. Improve air quality. Visually eliminate the need for hazardous waste disposal. Provide another market for farmers crops. Provide another choice for products using waste from the paper industry. | Bestchem+Supply | 15 | 0 to 30 days | \$350,000 |
| Mercer | BUSINESS EXPANSION | WILL NEED TO REDO PART OF A BUILDING FOR EXPANSION AND DO THE DRIVE AND PARKING. AS WELL AS HAVE MONEY FOR THE INVENTORY AND WORKING CAPITAL TO CREATE JOBS. | THE SALTBOX HOME FURNISHINGS | 2 | 0 to 30 days | \$75,000 |
| Mercer | Yaneys Home Improvement | replace original windows in my home built in 1975 will increase my home energy efficiency and lower my monthly utility bills resulting in money I can save for my families future education bill for my 3 children also will be helping a local company keep employes working to remove and install new energy efficient windows. | Kings Construction Company | 3 | 0 to 30 days | \$10,323 |
| Mercer | New Industrial Park Water Tower | The City's major industrial corridor is in need of a water tower to sustain both pressure and volume for fighting fires. The City intends to construct a new 1.5 million gallon elevated composite storage tower. | City of Celina | 1000 | 91 to 180 days | \$1,612,500 |
| Mercer | Main Street Waterline Replacement | The City needs to replace approximately 5400 linear feet of 12-inch water main on Main Street. This is a major looping line for the City's overall system and is needed to be replaced prior to an ODOT funded Main Street Reconstruction Project. | City of Celina | 100 | 91 to 180 days | \$475,000 |
| Mercer | East Market Street Waterline Replacement | The City needs to replace the existing waterline in Market Street with a 12-inch main. The existing line is only 4-inches in size and badly deteriorated. The new line would create a need top of the water system and provide adequate fire protection for the commercial businesses along this section of street. | City of Celina | 250 | 91 to 180 days | \$712,500 |
| Mercer | Grand Lake Trail Extension | Project consists of 5000 linear feet of 10 foot wide asphalt trail and the purchase of 2 acres of land. | Franklin Township Trustees-Mercer County | 0 | 31 to 90 days | \$250,000 |
| Mercer | MER CR250-3.93 Winkler Road Bridge Rehabilitation | Rehabilitate the existing 57' span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 36' wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#4823 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$255,200 |
| Mercer | MER CR 226-4.55 Wilson Road Bridge Rehabilitation | Rehabilitate the existing 45' span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 36' wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#4821 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$255,200 |
| Mercer | MER TR131A-0.19 | Replace the existing 35' span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and substitute a 36' wide prestressed reinforced concrete deck or a 4-sided reinforced concrete box. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#4819 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$232,000 |
| Mercer | MER TR100B-0.94 Younger Road Bridge Rehabilitation | Rehabilitate the existing 45' span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 36' wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#5115 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$232,000 |
| Mercer | MER CR10-11.30 | Replace the existing 46' span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and substitute placing a 36' wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#4818 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$278,400 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Mercer | LOWELLVILLE SAFETY FORCES FACILITIES EXPANSION | UPDATE THE POLICE AND FIRE DEPARTMENTS BY EXPANDING CURRENT STRUCTURE. POLICE DEPARTMENT IS CURRENTLY IN DEE NEED OF UPDATES FOR SAFETY REASONS. POLICE DEPARTMENT DOES NOT HAVE SAFE HOLDING FACILITIES FOR THE SAFETY OF THE PRISONERS OR THE POLICE. THE DEPARTMENT NEEDS TO BE UPDATED. PLEASE TAKE THIS TO CONSIDERATION. THANK YOU. SGT. ROBERT VANCE | VILLAGE OF LOWELLVILLE | 20 | 31 to 90 days | \$404,000 |
| Mercer | MER CR161C-1.59 Neptune-Mendon Road Bridge Rehabil | Rehabilitate the existing 3F span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 3F wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#B117 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$348,000 |
| Mercer | MER CR130-2.66 Schroeder Road Bridge Rehabilitation | Rehabilitate the existing 3F span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 3F wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#B116 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$232,000 |
| Mercer | MER CR 30B-0.94 Bridge Rehabilitation PID#83313 | Rehabilitate the existing 2F span bridge by removing the existing structurally deficient and functionally obsolete bridge superstructure and placing a 3F wide prestressed reinforced concrete deck. Roadway approach reconstruction will be completed as part of the project. The project has a PDR#B113 is programmed through FHWA, ODOT and CEAD. | Mercer County Engineer | 10 | 181 days or more | \$311,250 |
| Mercer | family help | Need the money to pay off mortgage and do repairs on home. Bought one home and haven't been able to sell the old one. Bad timing. The mortgage payments are a real struggle, going on for over a year now. Couple of the children have lost their jobs, can't find work. Others have had their work hours drastically cut. Can't help them. Getting the point of what to pay. His kept the past, but having to cut our portion made it do it. This is the worst time we have seen, we both will be 72 this year. I can't believe the last 10 years have caused such a struggle. We need help, and need it now to survive. | family | 0 | 0 to 30 days | \$165,000 |
| Mercer | Rockford Police Department COPS Program | Three year support of one additional sworn staff member for the Rockford Police Department. Will be COPS member of the total team. Very badly needed for our small community in rural NW Ohio. | Rockford Police Department | 1 | 31 to 90 days | \$112,000 |
| Mercer | Village of Mendon Sanitary Sewer Improvements | The Village is currently operating 8 sewer lifts & 8 lift stations within their sanitary sewer collection system. There are several lines within the Village that need to be replaced and/or slip-lined to reduce the amount of lift from entering their Waste Water Treatment Plant. The total linear feet of pipe to be improved is approximately 2,500 linear feet. | Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$150,000 |
| Mercer | Village of Mendon Source Water System Improvements | The Village's water supply comes from two aging wells. The Ohio EPA has been in contact with the village for some time to drill a third well to ensure supply is adequate to the Waste Treatment Plant. The existing wells are constantly in need of maintenance and have shown signs of iron bacteria forming. To ensure a proper water supply to the village, it is imperative that the source water improvements be made to ensure that there is not a disruption of service to the residents or businesses within the village of Mendon. | Village of Mendon- Fanning/Howey Civil Engineering Division | 30 | 91 to 180 days | \$100,000 |
| Mercer | Village of Mendon Water Tower Improvements | The Village's lone water tower is quickly approaching its useful life. To ensure proper storage and pressure within the village, it is imperative that the water tower improvements be made to ensure that there is not a disruption of service to the residents or businesses within the village of Mendon. | Village of Mendon- Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$350,000 |
| Mercer | Village of Mendon Water Meter Installation | As required by the EPA, the village of Mendon needs to incorporate a metering program for their water service. To limit waste and unaccountable fees, the village proposes to install water meters at every household & business connection to that water bill will be based on usage rather than the flat rate currently invoiced. | Village of Mendon- Fanning/Howey Civil Engineering Division | 91 | 91 to 180 days | \$220,000 |
| Mercer | Village of Mendon Market Street Improvments | As a main arterial street through the village, Market Street is major need of improvements that would include a new base and asphalt surface, streetlight replacement, and storm sewer improvements. The total linear footage of the street improvement project is 1,350 LF. | Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$250,000 |
| Mercer | Village of Mendon Source Water System Improvements | The Village's water supply comes from two aging wells. The Ohio EPA has been in contact with the village for some time to drill a third well to ensure supply is adequate to the Waste Treatment Plant. The existing wells are constantly in need of maintenance and have shown signs of iron bacteria forming. To ensure a proper water supply to the village, it is imperative that the source water improvements be made to ensure that there is not a disruption of service to the residents or businesses within the village of Mendon. | Fanning/Howey Civil Engineering Division | 30 | 91 to 180 days | \$100,000 |
| Mercer | Village of Mendon Water Tower Improvements | The Village's lone water tower is quickly approaching its useful life. To ensure proper storage and pressure within the village, it is imperative that the water tower improvements be made to ensure that there is not a disruption of service to the residents or businesses within the village of Mendon. | Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$350,000 |
| Mercer | Grand Lake Trail Extension | The project consists of the construction of 5,000 linear feet of 10 foot wide paved trail and the purchase of 100 acres of land. | Franklin Township Trustees-Mercer County | 5 | 91 to 180 days | \$250,000 |
| Mercer | Psychiatric Residence Funding | Request to replace a previously selected resident upon completion of the program will agree to purchase the house. The three county contracted system of behavioral healthcare for a period of ten years. | Tri County Alcohol Drug Mental Health Services Bo | 1 | 181 days or more | \$200,000 |
| Mercer | Water Treatment Plant Improvement Project | The Village of Fort Recovery currently owns and operates a 369 MGID ground water plant that employs time soda softening followed by filtration and disinfection. A Water Quality and Treatment Study has been completed and will be completed soon. The study has identified a number of treatment improvements that will be necessary for improved operations and water quality. The proposed improvements include the installation of a new aeration system, post aeration tank, and chemical feed. Also, the recarbonation system will be replaced and the solids contact settling tank will be completely modified for improved settling. Other improvements will include valve and control replacement along with some electrical upgrades at an estimated construction cost of \$1,363,300. | Village of Fort Recovery | 200 | 181 days or more | \$1,363,300 |
| Mercer | Construction of the proposed Northwood Sanitary Se | Already funded via WPCFLF for Design Funds, the existing Northwood Sewer System Phase II is ready to proceed to the Construction of the project. The Project Consists of the sewer lines in the Northwood Subdivision within East Jefferson Township east of the City of Celina along Grand Lake St. Marys within Mercer County. The construction of the project would entail a new collection system to prevent the large lift from flooding into the County's existing plant. This project would tie into the East Jefferson Sewer System Phase II transport project by divert flow from the County to the City. Before this change can occur that if problem must be solved. | Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$900,000 |
| Mercer | Constructin of the proposed East Jefferson Sanitar | Already funded via WPCFLF for Design Funds, the East Jefferson Sewer System Phase II is ready to proceed to the Construction of the Project. The Project Consists of the sewer lines in the East Jefferson Township east of the City of Celina along Grand Lake St. Marys within Mercer County. The construction of the project would entail a new transport system to divert flow from the County aging (and overflowing) package WWTFF. This diversion of flow from the County's WWTFF will provide relief for their facility, that not allowing for any expansion at Grand Lake St. Marys. | Fanning/Howey Civil Engineering Division | 60 | 91 to 180 days | \$1,800,000 |
| Mercer | Engineering Design for the proposed Northeast Indu | Already funded via WPCFLF for Planning Funds, the Northeast Sewer System is ready to immediately proceed to the Engineering Design of the project. The Project Consists of the sewer lines in the Northeast Subdivision east and northeast of the City of Celina within an existing industrial corridor within Mercer County. The design of the project would entail a new wastewater treatment plant in which untreated, pulp and paper mill effluent would be received. In addition, a new wastewater treatment plant would allow for flow from the existing sewer lines within the City of Celina to be redirected to a new facility. This diversion of flow from the City of Celina's existing WWTFF provides for relief as their facility rapidly nears its capacity, thus not allowing for any additional growth within the City. | Fanning/Howey Civil Engineering Division | 60 | 31 to 90 days | \$360,000 |
| Mercer | Washington Street Reconstruction | The project is part of an overall neighborhood revitalization program in an area of the community that meets the CDBGI distressed criteria. The improvements will consist of replacing existing curbs, gutters, sidewalks, pavement, waterline, and storm sewers. All of these items are deteriorated beyond a repair and need to be replaced. The total length of street is approximately 1,200 linear feet with 2400' total of curbs and sidewalks. | City of Celina | 100 | 31 to 90 days | \$235,000 |
| Mercer | East Jefferson Township Waterline Replacement ~ Me | The County's Water Transmission line to their Industrial Corridor is rapidly deteriorating. The un-lined ductile iron pipe is breaking down and causing quality issues for not only the residents in East Jefferson Township that are supplied by this line, but also the existing industry at Wright State University - Lake Campus in region. The 12" waterline (approximately 3,400 linear feet) needs to be replaced with new C900 PVC waterline material to improve the quality of water being served to this area. | Fanning/Howey Civil Engineering Division | 10 | 91 to 180 days | \$900,000 |
| Mercer | Automation of the IEP & MFE forms for Special Educ | Taking the new IEP & MFE forms that was developed by ODE and attaching them to a database via Cold Fusion. After a teacher selects a student, the IEP form will be populated with demographic and pre-existing data. When finished, the data will be stored to a database and can be accessed from another location or by another teacher or administrator on a remote machine. Also, will allow classroom teachers to view updated IEP information in real time if they have access. This can be easily implemented in any Ohio school district that uses DASL as their Student Information System. | John I Butler | 10 | 0 to 30 days | \$750,000 |
| Mercer | Water Supply improvements | Replace failing waterlines and restore existing Water Tower. | Village of Coldwater | 4 | 31 to 90 days | \$750,000 |
| Mercer | College Education | hello, | Wright State University | 1 | 181 days or more | \$2,500 |
| Mercer | Keeping ohio roadways safe, and saving lives | My name is Eric Nabeirec and I am currently an employed student and a freshman at Wright State Lake Campus in Celina, Ohio. Although I am employed and am paying for college on my own, it would be of great help to me if I were able to receive a 10 new buses fully retro fitted for paraty transportation keeping drunk drivers off the road and severely reducing alcohol related accidents. Our main priority is reducing the need for overtime in county rescue services and keeping our public citizens safe by getting them a safe way to travel and have a good time. We would also like to purchase several units for fair service in the mercer county and surrounding areas for people to utilize for transportation to and from airports, groceryshopping, and other travel needs to reduce the amount of traffic on the road ways and try to do our part in reducing emissions in the air by providing public car pools. | Bandit Transportation LLC | 25 | 0 to 30 days | \$200,000 |
| Mercer | Automotive Customizing and Electronics | To provide local and outlying community with a 1 stop place to go for automotive purposes ranging from a basic oil change to a complete overhaul and customizing possibility. Basic concepts are general automotive maintenance, custom body and paint work, and audio/video applications, factory or custom interior overhauling, fiberglass work, engine rebuilds, body repair and customizing. However due to physical restraints (my approximately 1'10" of height) the collection can be displayed or made available to the visiting students for their educational purposes. There is also a need for a formal and more equipped facility to house the students during the programs. The project would allow for the completion of a significant and expensive addition to the present facility. Additionally extensive reworking of the present HVAC and heating plant would see significant changes to the current heating and cooling systems to utilize more of the "green power" initiatives to heat, cool and light the new and old facilities. I would pay off the mortgage by installing and I have made it. We were able to all the overtime, now working in the auto industry isn't going good for us. All the money the government is spending doesn't benefit any of us. All of the billions of dollars going to companies that need billions more, we will be coming back in a couple months asking for more money. Why give it to companies that continue to fail, give it to the people like us in need of help. | Mad Surplus | 10 | 0 to 30 days | \$50,000 |
| Mercer | Veterans Helping Veterans Help Themselves | I have about 1000 sq ft of vinyl timber donated by a local contractor. We'll need equipment, tools, stumps, a backhoe, trucks, etc. The building I've been looking at for this is the old Stock Building Supply, a closed down lumber yard, perfect for this, it's better to rent or buy. It would also provide the additional space needed for the other areas in this plan. Not all veterans will be able to do the physical labor, but with computers to run the website, and a CRM Dept. to find work for all the veterans, we can do it. We need help with advertising, accounting, maintenance, legal and sales people. We'll need capital to start buying used wood. We have a scale to pay for usable both depending on wood type and age. Just like a furnace and nonresidential metal recycling yard, but we turn the material into marketable products, thank you, Michael Peany. | Infinite Carpentry & Custom Woodworking | 33 | 0 to 30 days | \$3,333,000 |
| Mercer | Mercer County Library Teaching Addition and Energy | Expansion of the current Mercer County Library (Celina) facility to house the mineral and rock collection now held by the library. It is an extremely extensive collection of worldwide rock and minerals that has been generously donated to the library for display and to be used in the education of students. It is currently being used extensively by colleges and universities in these states to teach geology. However due to physical restraints (my approximately 1'10" of height) the collection can be displayed or made available to the visiting students for their educational purposes. There is also a need for a formal and more equipped facility to house the students during the programs. The project would allow for the completion of a significant and expensive addition to the present facility. Additionally extensive reworking of the present HVAC and heating plant would see significant changes to the current heating and cooling systems to utilize more of the "green power" initiatives to heat, cool and light the new and old facilities. I would pay off the mortgage by installing and I have made it. We were able to all the overtime, now working in the auto industry isn't going good for us. All the money the government is spending doesn't benefit any of us. All of the billions of dollars going to companies that need billions more, we will be coming back in a couple months asking for more money. Why give it to companies that continue to fail, give it to the people like us in need of help. | Mercer County Library | 25 | 31 to 90 days | \$675,000 |
| Mercer | Ballout for Families in need of help | My name is Eric Nabeirec and I am currently an employed student and a freshman at Wright State Lake Campus in Celina, Ohio. Although I am employed and am paying for college on my own, it would be of great help to me if I were able to receive a 10 new buses fully retro fitted for paraty transportation keeping drunk drivers off the road and severely reducing alcohol related accidents. Our main priority is reducing the need for overtime in county rescue services and keeping our public citizens safe by getting them a safe way to travel and have a good time. We would also like to purchase several units for fair service in the mercer county and surrounding areas for people to utilize for transportation to and from airports, groceryshopping, and other travel needs to reduce the amount of traffic on the road ways and try to do our part in reducing emissions in the air by providing public car pools. | Families in need of help | 2 | 31 to 90 days | \$170,000 |
| Mercer | Piper Welding Manufacturing | This money would be used to pay off what owed on the property and then the one building that is at the property would be torn down. This building we want to tear down is worthless and is no use to us. We can not tear down the building until we pay off what we own on it. And we would expand the current building we manufacture cars out of. This would give us more room to have more employees and more work orders. We would also buy more machine to be able to do more work that we have had to decline in the past. This money would help us with the current contract we have and also help us win the current contract that we are bidding on. | Piper Welding | 5 | 0 to 30 days | \$250,000 |
| Mercer | plumbing | my a business, create new site, buy more tools | plumber | 2 | 0 to 30 days | \$10,000 |
| Mercer | Coordinated Transportation | This project is to provide coordinated transportation services to assist residents of Augusta, Mercer, and Van Wert Counties access and maintain employment, access needed medical services, and access educational and social services programs. | SOURCES Community Network Services | 50 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Mercer | WINDOW REPLACEMENT PROJECT | The Colwater EYBD has identified 39 of 43 windows at the elementary building as leaking and needing replaced. The leaking windows have cost the district money to replace books & instructional items that have been ruined due to leaking windows, and the leaking windows are very inefficient for energy efficiency. The school is under an Ohio School Facilities Renewal Grant and would like to be replaced in more program windows were not identified by the architects at the time the plan assessment was done (in 1999) for replacement. We now have a nice facility with new finishes and windows that leak during every winter, with an blowing against the edges on windy days. The new windows would provide better energy efficiency as well as prevent further damage to the building's interior during rainstorms. | COLDWATER EXEMPTED VILLAGE SCHOOLS | 10 | 91 to 180 days | \$200,000 |
| Mercer | Camelot | The ability to purchase steel and equipment to keep my existing business operating, also the ability to keep my current work force employed and housed. | FBB, Inc dba Camelot Mfg. | 15 | 0 to 30 days | \$100,000 |
| Mercer | Affordable House reinvestment | Purchase minimum of 10 homes from banks, held as toxic assets now. Hire contractors that agree to use unemployed to refurbish homes. Minimum of 10 contractors and 50 retail employees would be employed on each property. Homes then sold, with 20% of profits donated to school district, adult education and college scholarship program and food banks in same area. Remaining funds would be re-invested in more program homes employing more unemployed or under employed individuals. Family members positively impacted by this stimulus would exceed 2300. Stimulus with an indirect impact reaching 115,000. Refurbished homes would be sold on a first option to families that had been through possession of personal belongings. This project touches banks, financing, retail trade, contractor and small businesses, schools and education, food banks, young people scholarship, and provides a self funding continuation of profits and more stimulus impact. Sold and average 15 to 20 wind turbines that generate electricity at a low, and high winds to customers like schools, towns, businesses, farms, hospitals and residence with a payback of 6 yrs. | Affordable House Providers | 11500 | 0 to 30 days | \$2,100,000 |
| Mercer | Harvest wind to make electricity | | Whitaker Wind LLC | 30 | 31 to 90 days | \$1,500,000 |
| Mercer | Develop a center to preserve and celebrate the her | To develop a center to preserve, explore, and celebrate the rich agricultural and industrial heritage of the West Central Ohio region. The center will house artifacts and displays that illustrate why this region produced products of worldwide acclaim and will enable present and future generations to study the methods of operation and employee innovation and work ethic that contributed to the success of these enterprises. Funding opportunities exist in the area of rural and small business development. | Agricultural and Industrial Heritage Center | 6 | 0 to 30 days | \$50,000 |
| Mercer | Buying into a small business | EBI is a family-owned business based in Maria Stein that was started in 1984 and has been built from the ground up by two brothers. The business consists of a poultry farm, 7 farms, 8 refrigerated 40' trailers and a 3 bay shop with a shipping dock. They have grown over the years and altogether have 6 full-time employees, 5 part-time employees and 4 h.s. students. Both owners are approaching 60 years of age and have physical handicaps that limit their abilities. The past few years they have been asking me to buy into the business. However, the value of this business is currently more than I feel that I can afford. It could receive some stimulus money to help me buy into this small business, I feel I can keep this successful business running for years to come. Not only would I maintain the jobs, there is a potential to expand and adapt. I am not asking for a lot of money, just an amount that would help me be the ground running. | BW Enterprises, LLC | 15 | 91 to 180 days | \$50,000 |
| Mercer | Infusing Technology in Classrooms | Upgraded technology will be acquired through this project. The funds will allow us to integrate the latest high quality teaching methods with the advancements in current technological opportunities for students. Our students are not presently taught through some of the latest trends in electronic education. Many of our students have exposure or teaching staff in terms of knowledge about technology. With these funds we will purchase SMART boards, Promethean ActivClassroom technologies, as well as ensure that all classrooms grade 7 through 12 have the capability to internet, a projector, an interactive white board, and an interactive media white board. Professional development funds will be allocated to make sure our staff is adequately trained. Students and staff will work collaboratively on a technology plan to infuse the technologies in our classrooms. The goal is to provide our students with the electronic tools they need to be successful in the 21st century classrooms and in the work force. | Celina City Schools | 4 | 91 to 180 days | \$350,000 |
| Mercer | Grand Lake St. Marys Dredging Program | The shallow depth of GLSM severely impacts the water quality of the lake. With a well funded dredging program that would be increasing the depth throughout the lake, the water quality will increase significantly. An increase to the depth would also have a positive impact on the quality of the fishing, hunting and boating that is enjoyed done on the lake. These factors would result in a dramatic increase in tourism, which also raises property values in the watershed and brings substantial economic growth and jobs to the area. Business would clean up, repair, and/or restore rental properties and properties owned by local residents. Many landlords and banks have to clean up these types of properties on their own or hire someone to do for them. Businesses would repair, and ready properties for lease or re-rental for banks and owners. | Ohio House of Representatives | 25 | 31 to 90 days | \$20,000,000 |
| Mercer | Refinish and Repair rental and or seized propertie | Business would clean up, repair, and/or restore rental properties and properties owned by local residents. Many landlords and banks have to clean up these types of properties on their own or hire someone to do for them. Businesses would repair, and ready properties for lease or re-rental for banks and owners. | Rental Refinishing | 10 | 0 to 30 days | \$100,000 |
| Mercer | Area Security for Local and surrounding functions | Business would provide security officers for other businesses and local and surrounding functions staffed temporary or permanent surveillance. Business would also clean drive through bus and surrounding courtyards. Then bus would check out and passenger would be screened. Business would also assist in hiring the proper forms for citizenship, green cards, visas, and passports. Illegal immigration and hiring illegal immigrants is a BIG problem in this area and has yet to be properly addressed by the school and the city. This stimulus would lower the amount of illegal immigrants by finding them and either assist in deportation or assist them in becoming a legal citizen. For 2700 students, a K-12 integrated STEM (science, technology, engineering and math) curriculum that will provide them with a cutting edge education preparing them to compete successfully in the global world of the future. | Security and Immigration Application Center | 50 | 0 to 30 days | \$1,000,000 |
| Mercer | STEM Project of Excellence | For 240 Educators, staff development that will enable all educators from each district and across the districts to provide the methods, strategies and content needed for students to succeed in college and in the work force. For over 20 local and regional business and manufacturing entities to continue as full partners with the consortium in making decisions that will benefit students, staff, and the local communities and businesses. For those businesses to provide STEM speakers, consultants, STEM fair judges and to open their places of business for students to experience the work and careers for which they are preparing. | New Bremen, FortRecovery, St. Henry Local School D | 7 | 0 to 30 days | \$300,000 |
| Mercer | Summer Youth Work Program | For the state of Ohio and the country as a whole to produce a work force that can compete with any in the world, and to create the thinkers and problem solvers that the United States has long been recognized as the leader. We plan to hire high school students to work at Parkway Local School and the city of Rockford. The students will be trained to use small equipment to help clean the school. Students will be used to clean and update the school's computers. Students will work outside, mowing lawn, cleaning trees and bushes, cleaning and painting outside facilities at the school and the city. | Parkway Local Schools and City of Rockford | 10 | 31 to 90 days | \$15,000 |
| Mercer | Brickyard Development | This is a Brownfield site located in the middle of a residential area. There was a 100 year old industrial building on the site which has been demolished and removed. The site went through the VAP process and contaminated areas have been identified. The required funds will be used to clean the site so it can be developed and utilized. Costs: Remove and dispose of the bad dirt per code, \$200,000 Level the site to proper elevation and add \$35,000 The site then can and will be utilized for affordable housing. | RCS Inc. | 3 | 91 to 180 days | \$235,000 |
| Mercer | Teacher - Student Inter-Active Technology Plan | Our three Technology Teachers / Coordinators have completed Teacher Interest Surveys and training opportunities for our teachers to observe teachers using interactive white boards and classroom response systems. Several teachers were very impressed with both systems. Since then, we are starting the one interactive whiteboard and classroom response system that we have in our district. As a result district in-service to make improvement for the next school year, several teachers indicated that both systems would increase student interaction with the learning activity and increase student learning. Our project would entail buying several of the interactive whiteboards and classroom response systems for our teachers who requested each system and provide professional development activities. | Parkway Local Schools | 3 | 0 to 30 days | \$35,000 |
| Mercer | Parkway Local Schools and the City of Rockford Adu | The Parkway Local Schools and the City of Rockford are joining forces to hire Adult Workers during the summer to assist with cleaning the school, to build a handicapped bleacher at the football field for people in wheelchairs, trim and plant trees and bushes at the school and throughout the city of Rockford, especially the park. The workers will paint several structures including the locker booths at the football field, the restrooms at the swimming pool and park, and fix hydrants throughout the city. The workers would also clean the school's fleet of buses. The workers will also perform other small projects. | Parkway Local Schools | 10 | 31 to 90 days | \$20,000.00 |
| Mercer | Keeping All Teachers | Due to the fact that Parkway Local Schools is collecting approximately \$100,000 less money this year from our 1% local income tax due to district community members being laid off from their jobs, it was decided to decrease the number of teachers employed at Parkway Local Schools. We currently have two teachers who have retired, Parkway has two elementary grades that have a small student count, Second Grade - 72 students and Third Grade - 73 students. We plan to reduce the number of teachers for these grades to three teachers, instead of the current four teachers. We would continue to reduce the number of teachers to three as these two grade levels move up grades until they reach our Middle School. If we receive the grant money, we could keep each grade level of four teachers per grade and hire two teachers to replace the teachers that are retiring. | Parkway Local Schools | 2 | 31 to 90 days | \$200,000.00 |
| Mercer | Parkway Local Schools Energy Conservation Project | Parkway Local School District is located in Mercer County, Ohio. We have developed an energy conservation project that is "shovel ready". Our project will not only reduce the dependency to operate our facilities on natural gas and electricity, but include large scale renewable energy applications. This project also includes educating our students, staff and community in the area of energy conservation and renewable energy. This project will reduce our natural gas and electricity costs from \$302,145 per year to \$223,987. We will also utilize state and local utility rebates and grant programs to reduce the cost of the project. We are requesting federal stimulus money in order to implement this project as we have engineered and potentially re-invested additional renewable energy projects, such as wind turbines that we have omitted due to financial constraints. | Parkway Local School District | 1 | 0 to 30 days | 363,745 |
| Miami | JEB Property Development | The project consists of the construction of approximately 700 linear feet of new roadway in the Sherry Industrial Park off of Fox Drive. The new roadway construction will include new curb, gutter, asphalt, water main, sanitary and storm sewer to service future industrial development in the area. The project will open additional property for development in the industrial area south of Piqua. The construction of the new roadway is critical to the attraction of new businesses to allow the City to market this development as a shovel ready site. This property is a prime location due to its close proximity to the Interstate 75/County Road 25-A interchange south of Piqua. | City of Piqua | 300 | 181 days or more | \$450,000 |
| Miami | New Membrane Filtration Water Treatment Plant | The project would involve the construction of a new membrane filtration water treatment plant utilizing a new ground water source. The City of Piqua currently operates a fine sand filtering plant with a surface water supply. The new screening regulations placed upon surface water plants by the DEP in addition to the size and condition of the existing plant (constructed in 1925) not only make it infeasible option to continue treatment of water in the same manner. The construction of a new plant is necessary to be able to provide safe, quality drinking water to the citizens of Piqua. | City of Piqua | 18 | 0 to 30 days | \$24,000,000 |
| Miami | New Well Field Development | This project would involve the acquisition of land and monitoring well installation to determine the potential for the water supply to meet current and future water demands and the construction of six production wells with the necessary pumping equipment and raw water line upgrades to convey the water to either the current treatment plant location or to the proposed membrane filtration treatment plant location. | City of Piqua | 0 | 91 to 180 days | \$2,000,000 |
| Miami | R. M. Davis Parkway Extension | The City of Piqua's existing raw water supply is currently obtained from three surface water sources: Great Miami River, a gravel pit and the City's Hydraulic System that is comprised of a series of small lakes (Swift Run Lake, Echo Lake and Frantz Pond) and connecting canals. This project consists of the extension of R. M. Davis Parkway, south from U. S. Rte. 36 to Brown Road. The roadway construction will include the installation of new curb, gutter, asphalt, water main, sanitary sewer and storm sewer. This project is part of the Miami Valley Regional Planning Commission's 2030 Long Range Transportation Plan Update. This project will allow for future growth in the west end of Piqua by creating new commercial and industrial sites. The proximity of this project in relation to U. S. Rte. 36 makes this site an ideal piece of property for new development. The construction of this project is critical to allow the City to market this area as a shovel-ready site. | City of Piqua | 300 | 181 days or more | \$4,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Miami | Sherry Industrial Park Water Main Extension | The project will include looping approximately 1/2 mile of 12" diameter water main to connect the western side of the Sherry Industrial Park to Gordon Street. The project will serve the southern portion of the City of Piqua with special emphasis on the Sherry Industrial Park. Currently, the water main dead-ends at the end of Fox Drive in the Sherry Industrial Park. This situation creates numerous issues for those industries located along Fox Drive due to low water pressures and lack of adequate water supply for fire suppression. More specifically, the project supports the retention and expansion of current industries, including A. M. Leonard, as they have currently finished a 55,000 square foot expansion within the industrial park. The water loop will allow for adequate water pressure for the new development, the loop will also assist with an additional 100 acres being opened up for new industrial development | City of Piqua | 300 | 181 days or more | \$250,000 |
| Miami | Sanitary Sewer Interception and Siphon Repair and | This City of Piqua will need to either repair or replace the existing 36" sanitary sewer interceptor that connects the west side of the Great Miami River to the Wastewater Treatment Plant. This line has been repaired multiple times to try and keep the river water from entering into the wastewater system and in turn, overloading the plant. The 36" west interceptor sewer was built in the late 1930s and was tied to the old treatment plant on the west side of the river. In the mid 1950s, a siphon system was constructed to connect the 36" west interceptor sewer to the new wastewater treatment plant on the east side of the river. The issue the City of Piqua currently is facing is the deterioration of the interceptor sewer and the associated manholes and siphon. The pipes, manholes, and siphon will need to be rehabilitated or replaced based upon the recommendation by the Engineer while keeping in mind the rules and regulations imposed on the City by the Ohio EPA. The City is currently out for proposals for a study and subsequent design for the best alternatives for this sanitary sewer main | City of Piqua | 0 | 91 to 180 days | \$1,000,000 |
| Miami | Piqua Storm Sewer Mapping | This project would involve mapping the entire storm sewer system within the City of Piqua utilizing Geographic Information System (GIS) applications and field data collection technologies to map the catch basins, storm water manholes and connecting pipes within the City of Piqua. This project will also include an inventory of each catch basin and manhole to obtain flow direction, material and size of pipe. This project is necessary to help the City of Piqua meet the requirements of the Ohio EPA Phase I Storm Water Program. The City has received proposals for this project and it is ready to move forward with it as soon as the funding becomes available. | City of Piqua | 0 | 0 to 30 days | \$100,000 |
| Miami | Equalization Basin Pump Station Construction | The City of Piqua is in the process of constructing a three million gallon equalization basin at the Wastewater Treatment Plant to allow for peak flow weather flows over the treatment plant has reached its treatment capacity. The basin system is designed for gravity flow. The flow which will utilize approximately one million gallons of storage. To utilize the additional three million gallons of storage, a pump station will need to be constructed along with the associated piping. The current construction project is incorporation features to allow for the flow of a pump station in the future. | City of Piqua | 0 | 181 days or more | \$5,500,000 |
| Miami | Piqua Arts Council | The Piqua Arts Council has been hit hard by the economic downturn. We are having trouble finding resources to pay for operating funds. Although we are currently applying for grants and sponsorships to promote our programs to the community, we have had public sources for operating funds on becoming more difficult. At the present time, we have been able to raise the amount of our operating funds through our work. However we can estimate that this position will only exist for approximately 6 more months. Without the ability to fund the Piqua Arts Council will no longer be able to offer an employment opportunity. | Piqua Arts Council | 1 | 91 to 180 days | \$9,000 |
| Miami | Infrastructure program | These funds will assist in growing our business this creating new high paying jobs. We are primarily in foundation systems, but have the knowledge and experience in highway construction as well as water and sewer. Our growth will be an asset to the county and state. Thank You for your considerations. | Foundation Excavating Systems LLC. | 10 | 31 to 90 days | \$2,000,000 |
| Miami | Seal Extrusions / Body Side Extrusions | We are launching a new business, for Kia's home and automotive sealing units. We are in the start up timeframe and we are guaranteeing the number of employees to be 35 over the first 2 years. We have taken on service jobs for the Automotive Industry to allow us the income to move into the Energy Efficiency arena. We need to expand our plant by 14,000 sq. ft. plus 800 sq. ft. power plant, (Chiller System, Compressor, Air and Electricity). Our mission is to bring our customers the developing capabilities to move to a totally Green Environment. | Precision Plastic Technology | 35 | 31 to 90 days | \$2,000,000 |
| Miami | Milton-Potsdam Reconstruction | This is a collaborative project involving Milton-Union School District, Village of West Milton, Union Township, and Miami County Engineer. Reconstruct and widen 40.00 ft of roadway, install 8.00 ft of 12" sewer pipe, and 3.00 ft of 48" dia. iron water pipe. Reconstruct 1.500 ft of roadway, 3.00 ft of curb & gutter, 12.000 ft of sidewalk, 1.000 ft of storm sewer and 1.500 ft of 48" dia. iron water pipe, 6 manholes, and 30 valves | Village of West Milton | 20 | 181 days or more | \$900,000 |
| Miami | Market Street Project | Installation of raised pavement markers from the City of Troy to the City of Piqua. County Road 25-A is a Rural Major Collector, Urban Collector & Minor Arterial | Village of West Milton | 10 | 91 to 180 days | \$600,000 |
| Miami | County Road 25-A Raised Pavement Markers | Design/Build project to replace Milton-Potsdam Road Bridge #1.82 | Miami County Engineer's Office | 10 | 31 to 90 days | \$30,000 |
| Miami | Milton-Potsdam Rd. Bridge #1.82 Replacement | Design/Build project for the replacement of Piqua-Clayton Rd. Bridge #0.36 | Miami County Engineer's Office | 20 | 31 to 90 days | \$714,300 |
| Miami | Piqua-Clayton Road Bridge #0.36 Replacement | Design/Build project for the replacement of Piqua-Clayton Rd. Bridge #0.36 | Miami County Engineer's Office | 20 | 31 to 90 days | \$714,300 |
| Miami | Peters Road Bridge #4.15 | Design/Build project for the replacement of Peters Road Bridge #4.15 | Miami County Engineer's Office | 20 | 31 to 90 days | \$679,600 |
| Miami | Miami County Highway Garage Road Replacement | Replacement of existing 40 year old roof of the County Highway garage which covers slightly over 1 acre. | Miami County Engineer's Office | 10 | 31 to 90 days | \$450,000 |
| Miami | Rangeline Road Bridge #13.52 Deck Rehab. | Installation of Rangeline Road Bridge #13.52 deck using hydrodemolition with a microsilica overlay. | Miami County Engineer's Office | 10 | 31 to 90 days | \$120,000 |
| Miami | Dist 7, PID 76698, MIA IR 75 0.00 | Phase A and Resurfacing The Existing Roadway With Asphalt Concrete And Other Roadway Related Items. | Ohio Department of Transportation | 125 | 31 to 90 days | \$4,356,391 |
| Miami | Power Plant Demolition | The project seeks to demolish a retired coal fired power plant including removal and disposal of a large quantity of asbestos. A decommissioning study including asbestos survey has been completed. The demolition project is ready to bid. | City of Piqua | 15 | 91 to 180 days | \$2,750,000 |
| Miami | Piqua Power Service Center | The power system operators are currently based in an abandoned nuclear power facility owned by the Department of Energy. This facility was decommissioned in the early 1980's. The current facility is transitional both in energy operations as well as the electrical system. In addition, the power system is running out of space. A building site for the new power service center has been identified. The project is designed to meet the current and future water needs for the City of Piqua by tying into the City of Troy's water system. The city's current water system is old and most of the plant is at the end of its useful life. The current source water will make a difficult to meet future EPA standards. | City of Piqua | 15 | 181 days or more | \$2,000,000 |
| Miami | Piqua Water System Improvements | Looking to locate or expand in the City of Piqua. Over the past few months, the city has seen many once strong companies and industries having an increasingly difficult time in securing credit in private markets. | City of Piqua | 100 | 31 to 90 days | \$5,936,750 |
| Miami | Economic Development Rapid Outreach Revolving Loan | The City of Piqua's Rapid Outreach Revolving Loan Fund will require that applicants provide up to 50% equity for projects and that one job be created for each \$10,000 that is borrowed from the fund. The loans will be structured to be low interest and the loan proceeds will capitalize the fund in the future. Loans will be secured by liens and/or mortgages for those projects involving capital equipment, land purchase or building projects. The City of Piqua believes the establishment of this program will not only put the community in a strong position to retain and attract industries, but will also provide much needed assistance to our business community to stimulate the larger economy | City of Piqua | 25 | 31 to 90 days | \$250,000 |
| Miami | Bridge Load Rating | Load Rating of approximately 100 bridges. | Miami County Engineer's Office | 10 | 31 to 90 days | \$150,000 |
| Miami | Fairview-Snodgrass Road Bridge #0.92 Bridge Replac | Move up the replacement of Fairview-Snodgrass Road Bridge #0.92 to this year. The project is known as MIA-T919-0.92, PID #19351. | Miami County Engineer's Office | 20 | 31 to 90 days | \$142,240 |
| Miami | Peters Rd. Bridge #6.58 Replacement | Replacement of single span concrete beam bridge over Peters Creek located in Sections 32 and 33 of Concord Township north of Swales Road. The proposed structure will be a single span non-composite prestressed box beam bridge design with an overall length of 71 feet and a width of 24 feet. Approximately 500 feet of approach work is included in the project. The project is designated as MIA-CR14-6.58 with a PID number of 76914. | Miami County Engineer's Office | 10 | 0 to 30 days | \$130,007 |
| Miami | Piqua-Lockington Rd. Bridge #2.56 Rehab. | The rehabilitation of Piqua-Lockington Road Bridge #2.56 by removing the outside prestressed concrete box beams and replacing with new prestressed concrete box beams with minor abutment and pier repairs. Also, resurfacing and widening the entire bridge deck. | Miami County Engineer's Office | 20 | 31 to 90 days | \$364,200 |
| Miami | Covington-Gettysburg Rd. Bridge #2.21 Engineering | Engineering for the plan preparation for the replacement of an existing single span pony truss built in 1958 spanning Greenville Creek located in Sections 28 and 29 of Henry Township. The proposed structure will be a single span composite prestressed concrete box beam design with an overall length of approximately 110 feet and a width of 32 feet. Approximately 400 feet of approach work is included in the project. The project is designated as MIA-CR12-2.21 with a PID number of 83544. | Miami County Engineer's Office | 10 | 0 to 30 days | \$100,000 |
| Miami | Bradford-Bloomer Rd. Bridge #3.36 Engineering | Engineering for plan development for the replacement of a single span overhead truss spanning the Stillwater River with some road re-alignment work. | Miami County Engineer's Office | 10 | 31 to 90 days | \$230,000 |
| Miami | Garmsay Street Bridge Painting | Sandblast and paint the Garmsay Street Bridge spanning the Great Miami River located in the City of Piqua. | Miami County Engineer's Office | 10 | 31 to 90 days | \$1,010,000 |
| Miami | Eldan Railroad Overpass | Conceptual Alternatives Study for the Eldan Railroad Overpass (MIA-CR33-3.29). The existing railroad overpass has vertical clearance of 9' 6". The proposed study would evaluate a vertical clearance of 14' 0" for the bridge. | Miami County Engineer's Office | 10 | 31 to 90 days | \$220,000 |
| Miami | Wilson Road Resurfacing | The resurfacing of Wilson Road between State Routes 55 and State Route 55 in Concord Township, Wilson Road is an Urban Collector. | Miami County Engineer's Office | 20 | 31 to 90 days | \$219,900 |
| Miami | County Road 25-A Resurfacing | The resurfacing of County Road 25-A in Monroe Township from Interstate 75 to Twp-Cooksville road. County Road 25-A is an Urban Minor Arterial. | Miami County Engineer's Office | 20 | 31 to 90 days | \$208,500 |
| Miami | Eldan Road Resurfacing | The resurfacing of Eldan Road in Concord Township from Washington Road to Experiment Farm Road. Eldan Road is a Rural Major Collector. | Miami County Engineer's Office | 20 | 31 to 90 days | \$108,400 |
| Miami | Washington Road Resurfacing | The resurfacing of Washington Road in Concord and Washington Townships from 1200 feet north of State Route 41 to Drake Road. Washington Road is a Rural Major Collector. | Miami County Engineer's Office | 20 | 31 to 90 days | \$396,700 |
| Miami | Troy-Urbana Rd. Bridge #4.71 Bridge Rehab. | The rehabilitation of Troy-Urbana Rd. Bridge #4.71 by removing all of the prestressed concrete box beams and replace with new prestressed concrete box beam members. Also minor abutment and pier repairs. | Miami County Engineer's Office | 20 | 31 to 90 days | \$240,000 |
| Miami | West Milton WWTP | This is a collaborative effort between the Villages of Ludlow Falls and West Milton, Union Township, and the Miami County Sanitary Engineer. The project will be to upgrade an existing WWTP to ensure the ability to meet current and anticipated ODFW and DNR to expand capacity with the intent to replace 100-200 failing home septicage systems with treatment by the municipal WWTP. | Village of West Milton | 20 | 181 days or more | \$3,000,000 |
| Miami | Piqua Promenade Hollow Park Bridge | The Piqua Promenade Hollow Park Bridge will employ hundreds in the construction of public infrastructure that will open access to nearly one hundred acres of developable land adjacent to the Interstate 75/I-75, S. Route 36 Interchange. The resulting development and anticipated use of this land will create 400 to 500 retail sales, service and information technology, office, transportation and manufacturing employment opportunities. | City of Piqua | 400 | 181 days or more | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Miami | I-75/U.S. Rte. 36 Commerce Development Initiative | The I-75/U.S. Rte. 36 Commerce Development Initiative will employ hundreds of skilled laborers and design professionals in the construction of public infrastructure that will open access to nearly 1,000 acres of developable land adjacent to the I-75/U.S. Rte. 36 interchange. The resulting development and anticipated use of this land will create thousands of retail sales and service, information technology, office, transportation and manufacturing/employment opportunities. | City of Piqua | 1000 | 181 days or more | \$3,250,000 |
| Miami | Great Miami River Recreational Trail Bridge | The construction of the proposed bridge will connect the twelve plus miles of Piqua multi-use trails to the Great Miami River Trail. Upon completion, the Great Miami River Trail will extend over ninety miles, and connect northern Miami Valley communities such as Sidney, Piqua, Troy and Tipp City to Dayton, Cincinnati and nearly every other city, town and village along the river corridor by way of a multi-use trail facility. | City of Piqua | 0 | 181 days or more | \$1,095,140 |
| Miami | Piqua Geographic Information System | The proposed Piqua GIS project will allow public information datasets to be more easily accessed by public and private entities, businesses, government agencies, and citizens, and will enhance the ability of the end user to complete projects vital to the health of the community's neighborhoods in a more timely and effective manner. | City of Piqua | 1 | 181 days or more | \$350,000 |
| Miami | Art in the Park | The project is a summer program that is designed for children to attend in a workshop format during the summer. The workshop is geared toward 13-18 year old students that will teach them to make puppets, masks and how to use their creations for stage performances. Once the children have finished their creations and learned how to perform, a presentation is then scheduled for the general public so that children can showcase their efforts. This program will be designed to provide self-confidence, coordination, and team building among young adults. | The Piqua Arts Council | 2 | 91 to 180 days | \$10,000 |
| Miami | 911 Interoperable Communications Infrastructure | The County has demonstrated exemplary stewardship through its management of the current public safety infrastructure for almost twenty years. This infrastructure has never been out of service. Miami County plans to build in redundancy, better coverage, and more robust service to these first responders with the installation of a 5 site simulcast system. This is a system that looks forward and backward. This system will work with the existing radios that the first responders presently use, thereby saving taxpayer dollars. It will also be compatible with 2nd generation P25 radios. BUDGET Engineering Services \$1,256,399 Troy Site \$1,880,308 Piqua Site \$ 569,037 Tipp City Site \$ 580,760 Brandt Site \$ 671,570 | Miami County Board of Commissioners | 9 | 0 to 30 days | \$2,122,520 |
| Miami | Fiber Optic Infrastructure Loop for 911 | Miami County. This is the only completely consolidated communication/dispatch center in the State of Ohio. The center is staffed and wireless 911 calls are handled by MCCC. The County plans to build redundant service to MCCC. Presently, though, the consolidated 911 center and it was built from only one direction into the center. MCCC is unable to get redundant service into the center from another direction from any vendor. The County plans to build fiber to the MCCC from a different direction than the present service. Miami County plans to create a loop into the MCCC. The benefit is the increased secure access in an emergency and eliminating \$1,599 of monthly recurring service charges from the operating budget. The MCCC also serves as a public service educational facility, the base of operations for the EMA, and the Miami County Emergency Operations Center (EOC). | Miami County Board of Commissioners | 6 | 0 to 30 days | \$202,500 |
| Miami | Community | This is a program works through the local schools to get more kids active with after school Karate programs. In addition it provides hot meals for kids and a tutoring program. | Freedom Life Church | 10 | 0 to 30 days | \$25,000 |
| Miami | Hobart Arena Expansion | The multipurpose arena is looking to expand and add space to meet the demands of hosting concerts, trade shows, and a wide variety of events. These improvements are necessary to attract additional business and increase tourism to the area. The desire is to add an additional 30,000 square feet to the facility. The additional space would allow for additional locker rooms, conference space, and a hospitality area. The Hobart Arena has been a center for a wide variety of activities since its opening in 1960. Over the last few years roughly 1.5 million dollars have been invested in improvements to the facility. Due to the challenges of the current economy, additional funds are not available for further needed upgrades. | City of Troy, Ohio 45373 | 37 | 181 days or more | \$1,900,000 |
| Miami | Vortex Manhole at City Salt Storage Yard | Vortex manhole will be installed in the existing storm sewer to remove storm sewer debris from truck cleaning and maintenance operations. | Tipp City | 1 | 31 to 90 days | \$23,000 |
| Miami | Improved Stormwater Drainage at Utility Yard | Utilize site stormwater drainage problems and implement a correction plan. This project will result in stormwater BMPs being installed at this facility in conformance with CEQA recommendations. | Tipp City | 2 | 31 to 90 days | \$35,565 |
| Miami | Upgrade MCD storm Ditch to pocket park | Reduce maintenance of steep banks in this one-block long open storm ditch with very steep sides by installing aesthetic retaining walls, walkway plantings. This ditch is actually owned by Miami Conservancy District, but due to its relatively isolated location it get only sparse maintenance. It is something of an orphan regarding funding. | Tipp City | 3 | 31 to 90 days | \$63,000 |
| Miami | Stabilization of Miami River Bank | Riverbank erosion control is needed to prevent loss of part of our new city bike path and an existing historic old pan building. | Tipp City | 3 | 91 to 180 days | \$80,000 |
| Miami | Dist 7, PID 85928, MIA 6 LTNS | Purchase 8 light transit vehicles with a sensor body for the Miami County Transit System | Ohio Department of Transportation | 5 | 31 to 90 days | \$288,000 |
| Miami | Dist 7, PID 85929, MIA Scheduling/dispatch software | Purchase scheduling/dispatch software for the Miami County Transit System | Ohio Department of Transportation | 1 | 91 to 180 days | \$50,000 |
| Miami | Dist 7, PID 85930, MIA Purchase/renovate facility | Purchase/renovate facility for vehicle storage for the Miami County Transit System | Ohio Department of Transportation | 2 | 181 days or more | \$100,000 |
| Miami | Street Resurfacing Program | This program consists of the resurfacing of various streets within the City of Piqua. The City of Piqua currently has a street resurfacing program in place where anywhere from 1 to 2 miles of streets is resurfaced each year. Due to the rising costs of asphalt over the past year, this number is much smaller than what was being paved five years ago. Unfortunately, this amount of resurfacing is not allowing us to keep up with our program; therefore, there are a higher number of streets that are in need of resurfacing each year that the community can simply not resurface. This program will allow for us to catch up on the overall street resurfacing program. This project will also include the installation of ADA approved handicapped ramps at all of the intersections that will be paved. | City of Piqua | 0 | 0 to 30 days | \$1,000,000 |
| Miami | Streetscape Improvements | This project will include streetscape features at various downtown streets. The City of Piqua began a streetscape program in 2000 and was able to complete improvements on a number of streets in the downtown, however, due to rising construction costs over the past few years, the money that the City has allocated for streetscape improvements had to do to other reconstruction/resurfacing projects. The City of Piqua would like to finish the streetscape project to complement the areas already completed in the downtown. The city has received many positive comments about the improvements and the community feels that this is a real motivating factor for individuals to visit the downtown area. One area in particular that needs attention is the area adjacent to the Fort Piqua Plaza. The renovation of the plaza was completed in October 2008 and is the new home of the Piqua Public Library and other small retail stores. Including within the building is a bank and a convention center. | City of Piqua | 0 | 181 days or more | \$750,000 |
| Miami | County Road 25-A Reconstruction, Phase II | The project consists of the reconstruction of County Road 25-A between County Club Road and Looney Road on the north end of Piqua. The roadway will be widened from its current two lane capacity to four lanes. The cross section will be modified from a rural cross-section to an urban cross-section with new curb, gutter and sidewalk the entire length of the project. A portion of the project is located within the corporation limits of the City of Piqua and a portion of the project is located in unincorporated Miami County; therefore, this project is a joint venture with the Miami County Engineer. Phase I of this project was completed in August 2008. | City of Piqua | 0 | 181 days or more | \$3,700,000 |
| Miami | Excavation/Dredging of Franz Pond and Echo Lake | The City believes that this project will help stabilize the economic well being of the community and the entire Miami Valley region. The road creates a major industrial park and commercial area. It is the largest automobile dealership in the vicinity and is the only access to a significant industrial park to Industry Park Drive. The road also provides direct access to Interstate 75. The road reconstruction is necessary to facilitate the movement of people and goods through the community to construct the necessary streets on the project base which will allow the streets to hold up better over time. This project consists of the excavation and/or dredging of approximately 125,000 cubic yards of sediment from Franz Pond and Echo Lake. The project will also incorporate building the necessary haul/access roads to the site and also transportation costs to dispose of the excavated materials off-site. | City of Piqua | 0 | 181 days or more | \$5,000,000 |
| Miami | Street Reconstruction Program | The basis of this project is to remove the excess sediment buildup that has occurred over the years, to help alleviate the elevated concentrations of green algae, and to restore lake storage lost due to erosion of the banks. The project will be a collaborative effort between the City of Piqua and all of the affected property owners with the final goal being to reclaim the hydrologically pleasing lakes that the City of Piqua was once proud of. This project is intended to help promote recreational opportunities afforded to the community by having this wonderful asset located within the City. | City of Piqua | 0 | 181 days or more | \$1,000,000 |
| Miami | TCA EQ Offline storage tank and pump station | The project consists of the reconstruction of various streets within the City of Piqua. Currently, the City of Piqua reconstructs one street per year. However, there is such a great need for a large number of streets within the city to be reconstructed, that at this rate, we will have streets completely falling apart before we can get to them. A large majority of the streets in Piqua were constructed directly on the existing brick roadway. While the resurfacing of streets can be a short term fix, we do not feel that short term fixes are the best strategy for preserving tax dollars. The reconstruction option would allow the community to construct the necessary streets on the proper base which will allow the streets to hold up better over time. Project involves construction of 6 MGD pump station, 2 MG EQ storage tank and 3,000 feet of underground piping for installation of sewer system (SSO) on regional interceptor sewer line. | Tri-Cities North Regional Wastewater Authority | 15 | 91 to 180 days | \$3,750,000 |
| Miami | Forrest Hill Cemetery Bridge Replacements | The north bridge was constructed in 1920 and the south bridge was constructed in 1941. Both bridges are in need of replacement. The canal essentially cuts the cemetery in half, therefore, these bridges are the only way to access the western portions of the cemetery making them critical to the operation of the cemetery. The construction will be similar for both bridges and will include removing the existing concrete deck and removing the deteriorated concrete from the existing abutments. The abutments will then be faced with new concrete along with the least cost base. A one-third beam deck will be placed, waterproofed and paved. Pedestrian style guardrail will be used with tubular backup. Engineering design of both bridges will also be included as part of this project. Both the City of Piqua and the Forrest Hill Cemetery Board recognize the urgency of getting these structures replaced before something catastrophic happens to one or both of these structures. | City of Piqua | 0 | 181 days or more | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Miami | Telephone System Upgrade/Replacement | The project proposes to upgrade the telephone system in all City of Piqua facilities to include voice mail and unified message by integrating voice with current e-mail system. The system will make use of existing network connections and the upgrade will be to a Voice over IP (VOIP), or hybrid VOIP system. The new upgraded system will increase productivity and efficiency of city employees, improve customer service to citizens and save valuable tax dollars for taxpayers. | City of Piqua | 0 | 181 days or more | \$150,000 |
| Miami | Information Systems Replacement Project | This project includes the replacement of a 1998 AS/400 computer and all applications on the system. This includes a new financial system software package, utility billing system, income tax processing system, accounting and budgeting systems and all city computer application including Fire and Police. The new system and applications will allow for increased productivity within all city departments. The new equipment will also be more energy efficient. | City of Piqua | 3 | 0 to 30 days | \$500,000 |
| Miami | Project Student | Training of 4 students in the management field. By training students from our vocational school, we will be equipping them to step into the working world upon graduation. Jobs will have been established and waiting for them in management positions. | Susie's Big Dipper | 4 | 31 to 90 days | \$6,000 |
| Miami | Road Resurfacing | The resurfacing of existing roadways at two Park District facilities located at Stillwater Prairie Reserve near Bradford, Ohio and Big Woods Reserve located near Fairbairn, Ohio. Each facility has paved roadways and parking areas that are in need of resurfacing with inadequate load bearing available to accomplish the needed resurfacing. There is approximately 208,000 square footage needing paving. Construction drawings and bidding can be accomplished within 90 days. | Miami County Park District | 4 | 31 to 90 days | \$400,000 |
| Miami | 3 Phase Distribution circuit to pump station & dis | Project involves construction of approx 12,000 foot 3 phase distribution circuit to allow on site standby generation of approx 1 MW to be grid tied and not installed. Project also improves electric service reliability to 16 MGD regional sewage pumping station. | Tri-Ed North Regional Wastewater Authority | 12 | 31 to 90 days | \$400,000 |
| Miami | Stillwater Sanitary Facility | The resurfacing of existing roadways at two Park District facilities located at Stillwater Prairie Reserve near Bradford, Ohio and Big Woods Reserve located near Fairbairn, Ohio. Each facility has paved roadways and parking areas that are in need of resurfacing with inadequate load bearing available to accomplish the needed resurfacing. There is approximately 208,000 square footage needing paving. Construction drawings and bidding can be accomplished within 90 days. | Miami County Park District | 5 | 31 to 90 days | \$180,000 |
| Miami | Rural Law Enforcement Grant? | Build a 7000 Square Foot Police facility | Village of West Milton Division of Police | 150 | 181 days or more | \$500,000 |
| Miami | Church Street Reconstruction | 800 linear feet of full depth reconstruction of the very deteriorated street to include drainage, curbs, sidewalks, sanitary sewers, water service laterals. Resurfacing the entire length of project. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$621,000 |
| Miami | Main Street Reconstruction | 800 linear feet of full depth reconstruction of the very deteriorated street to include drainage, 8000 linear feet of curbs and sidewalks, sanitary sewers, 4000 linear feet of water and service laterals. Repavement of the entire street. Main Street is in poor condition. Main Street would include improved for safety reasons. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$1,850,000 |
| Miami | Expand Local Business and Create New Jobs | Midwest Industrial Equipment is interested in adding four skilled labor jobs in the tri-county area. Midwest Industrial Equipment would include laborer and lift truck technicians. The expected outcome is to create jobs which in turn will generate revenue for the community and state. At the same time, this would enable and create new jobs. We are interested in green building materials for the construction of lift trucks. All assets are reduced through recycling efforts. | Midwest Industrial Equipment | 4 | 31 to 90 days | \$300,000 |
| Miami | Piqua PD - Handheld FLIR | Thermal imaging for tactical advantages in both search and rescue operations. This equipment would make our system available to surrounding agencies for immediate deployment in emergency situations. | City of Piqua | 0 | 91 to 180 days | \$80,000 |
| Miami | Piqua PD - Interviewer | This is a multiple year project that would fund hiring trained and experienced interviewers for various offices at the police department. The position would be filled by providing training that would demonstrate efficiency. It would also assist in conducting interviews with individuals with this skill that would not have other enforcement responsibilities, but would lead and assist current officers during interviews that require special skills, such as special vehicle accidents. This position would also be trained in truth verification techniques, to include use of specialized instruments, if funding for the purchase of the instrument is approved. | City of Piqua | 1 | 91 to 180 days | \$120,000 |
| Miami | Piqua PD - Ballistic Helmets | Former tactics related on tactical team members for approaching situations so risky that ballistic helmets were needed. Our current approach to shoot through and other active shooter situations calls on the first responders to aggressively interact with the shooter. Officers should have access to as much protection as possible. This project would allow the purchase of ballistic helmets for all officers, even if they are not part of the tactical team. | City of Piqua | 0 | 31 to 90 days | \$18,000 |
| Miami | Piqua PD - Personal Tasers | This project would increase the number of Tasers to allow each patrol officer to be assigned their own, rather than our current system requiring officers to share tasers. This decreases handling due to eliminating the need for officers to transfer from one to another, which will allow the tasers to last longer and decrease the possibilities for accidental discharges during transfers. | City of Piqua | 0 | 91 to 180 days | \$13,000 |
| Miami | Piqua PD - Indoor Vehicle Storage | Over the years, our department has lost the ability to store vehicles in a way that keeps them out of the weather. The community would build a very simple structure, that would protect the vehicles, that was expected to last for more miles than previous vehicles. The community could provide a match in consideration of decreased costs for off-site storage currently incurred by the department. | City of Piqua | 10 | 91 to 180 days | \$150,000 |
| Miami | Piqua PD - Volunteer Coordination | This is a multiple year project that would fund a part-time employee throughout those years to coordinate the use of volunteers. As our revenue sources shrink, the department is finding more and more ways to allow volunteers to provide services. However, as the number of volunteers, it is becoming difficult to manage those individuals effectively. The coordinator would ensure that we make the best use of volunteers possible. | City of Piqua | 1 | 31 to 90 days | \$120,000 |
| Miami | Piqua PD - Personally Work Digital Video Recorder | When undercover officers and confidential informants are used in covert operations, all efforts must be made to document the activities for future prosecution. Besides audio recordings, capturing video images of the transactions helps to identify suspects when it otherwise difficult to do. The city would purchase a video recording device to be used during these covert operations. | City of Piqua | 0 | 0 to 30 days | \$5,100 |
| Miami | Piqua PD - Armored Tactical Vehicle | This project would allow for the replacement of the armored vehicle used by our multi-jurisdictional tactical response team. It would also be made available as a state resource upon request through mutual aid agreements. The city currently uses a used armored truck that has been abandoned, repairs are costly and sometime difficult to perform due to lack of parts. | City of Piqua | 0 | 91 to 180 days | \$148,500 |
| Miami | Green / Sustainable Energy course development | The magnitude and complexity of environmental issues and growing interest in "green" buildings and operations are creating a growing need for specialists in the energy and environmental fields. A wide variety of job opportunities in these areas is anticipated during the next ten years based on information from the National Bureau of Labor Statistics and the State of Ohio. This course provides value added, market and industry specific training in the fields of "green energy" including wind, solar and alternative fuels, energy conservation and management, soil and water conservation, pollution control, and general environmental health that fits the needs of local business and industry clients. | Upper Valley joint Vocational School, Adult Divisi | 10,000 | 0 to 30 days | \$250,000 |
| Miami | Laptop Computers for Sheriff Patrol Cars | The Miami County Sheriff's Office is currently attempting to find funding to replace laptop computers in 21 marked patrol cars. The laptops are worn out and their operating systems are too slow to work with the new computer aided dispatch (C.A.D.) system Miami County is in the process of purchasing. Miami County is unique in that it is the only dispatch center dispatcher that enters entries to include law enforcement, fire, and EMS. This regional and interoperable approach has proved cost effective and also improved on data sharing amongst agencies. If the funding were approved, dispatches would have access to critical data that would also save near hours as dispatches would be able to compare reports from patrol cars and access jail and incident records. The 21 laptop computers will need to be replaced by the end of 2009 which is when the new C.A.D. system is supposed to be operational. Without the laptops we will be experiencing and falling behind in crime prevention and solvability of crimes. View funding to be approved the laptops would be ordered and operational in patrol cars within 60 days. | Miami County Sheriff's Office | 1 | 31 to 90 days | \$85,000 |
| Miami | Integrated Computer Aided Dispatch/Mobile/Records | MIAMI COUNTY'S current computer aided dispatch (C.A.D.), mobile application, and law enforcement records management system will need replaced this year due to age and obsolete equipment that can no longer be supported. As such, our research has indicated that it would be most cost effective and also allow for seamless transmission of data were to go with one vendor for full integration of C.A.D., Mobile and records systems. The outcome would be seamless transmission of shared data amongst all Miami County first responder along with the cost benefits of bundling the systems. This team would have major benefits in safety, crime prevention, and higher solvability of crime to mention savings in man hours by dispatch/first responders. | Miami County Sheriff's Office | 3 | 181 days or more | \$800,000 |
| Miami | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to assist in creating measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Development Program is a model industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve disadvantaged populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of low credit. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Miami | Piqua PD - Covert Drug Operations | This would be a multiple year project and funds would be used for multiple purposes to support covert drug operations. This would provide "buy money" for these transactions. It would also support being on a confidential basis, versus individuals who are open to the public. The city is currently relies heavily on confidential informants, who can be very unreliable at critical times, thereby jeopardizing important critical cases. | City of Piqua | 1 | 91 to 180 days | \$130,000 |
| Miami | Piqua PD - Hard Armor and Carriers for Cruisers | Patrol officers at the street level are being called upon to handle more and more risk, especially in the area of engaging with offenders with high-powered firearms. The community needs to provide the ability to handle these confrontations as safely as possible. This project would provide hard armor for those increased breaks in each cruiser, allowing for increased protection for the officers ready-at-hand in these quick-response situations. | City of Piqua | 0 | 91 to 180 days | \$12,000 |
| Miami | Piqua PD - Indoor Shooting Range and Shooting Faci | A recent city improvement project forced our department out of an indoor shooting facility which had been used for decades. Our department now uses a city range facility as a shooting range. Within the next ten years, the range facility will close on the area now used for shooting and another location will need to be found. Other nearby communities are in a similar situation, we would consider a regional approach to a new indoor training facility to keep our officers well trained in marksmanship. | City of Piqua | 1 | 181 days or more | \$450,000 |
| Miami | Piqua PD - Drug Enforcement Investigator | This project would add another drug investigator to our investigation section. The department is currently staffed with one investigator who is also called upon to assist with major cases. The investigator routinely has more opportunities for enforcement activities than time allows. Adding an investigator would free other detectives from the time needed to assist with drug enforcement and also provide another officer to complete tasks that can be readily and safely identified as opportunities, even with our currently limited resources. The city would need funding to continue for several years as there are no projected revenues to support this position currently available within the community. | City of Piqua | 1 | 91 to 180 days | \$95,000 |
| Miami | Piqua PD - Drug Enforcement Investigator | This project would add another drug investigator to our investigation section. The department is currently staffed with one investigator who is also called upon to assist with major cases. The investigator routinely has more opportunities for enforcement activities than time allows. Adding an investigator would free other detectives from the time needed to assist with drug enforcement and also provide another officer to complete tasks that can be readily and safely identified as opportunities, even with our currently limited resources. The city would need funding to continue for several years as there are no projected revenues to support this position currently available within the community. | City of Piqua | 1 | 91 to 180 days | \$95,000 |
| Miami | Piqua PD - Night Vision | This project will purchase night vision goggles for the department. Officers have requested need to conduct searches and surveillance in low-light conditions. Proper equipment provided increases capabilities, efficiency, and methods for safer operations. | City of Piqua | 0 | 0 to 30 days | \$6,000 |
| Miami | Piqua PD - Portable Breath Testers | Officers need to be prepared to conduct reliable field tests of alcohol consumption. The city currently keeps PBT's on station for officers to take them on patrol, as needed. This project would provide enough PBT's to place one in each cruiser, ensuring they are readily available when needed. | City of Piqua | 0 | 0 to 30 days | \$4,300 |
| Miami | School Resource Officer | Establish Cooperative school resource program with the Milton-Union School District | Village of West Milton Division of Police | 1 | 91 to 180 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------|----------------|--------------------|---------------------------|
| Miami | Piqua PD - Interoperability | This department has interoperability with other agencies within the county, however, we are close to a county line and work very closely with agencies in another county. We have a joint tactical response team with one such agency. When we are assisting each other in emergency situations, we have communication difficulties, as is possible on one interoperability system would allow us in those situations that are too small to call out state-wide interoperability capabilities, but so large for one of our agencies to handle on its own. | City of Piqua | 0 | 181 days or more | \$18,500 |
| Miami | Piqua PD - Sniper Rifle | Our tactical team includes a sniper element. Based on the training of the team commanders and the snipers, a .308 sniper rifle, scope, case, sling and tripod is necessary to bring this element to its full functionality. This project would provide this weapon for the tactical team. | City of Piqua | 0 | 0 to 30 days | \$2,400 |
| Miami | Piqua PD - Tactical Team Vests | This project would provide tactical vests to include hard armor inserts, for our tactical team members to increase the protection available for their safety when are charged with resolving dangerous situations. | City of Piqua | 0 | 31 to 90 days | \$8,200 |
| Miami | Piqua PD - Tactical Team Vests | This project would provide tactical vests to include hard armor inserts, for our tactical team members to increase the protection available for their safety when are charged with resolving dangerous situations. | City of Piqua | 0 | 31 to 90 days | \$8,200 |
| Miami | Piqua PD - Crisis Communication System | This department has trained crisis/ hostage negotiators in a unit with a history that spans twenty years. There has been considerable success within this unit when ever they are able to establish communication with the suspect or person in crisis. The department does not have all of the technology available that would allow us to establish this contact. We would purchase a "throw away" phone to be able to establish crisis communicators in situations where it currently is not possible. | City of Piqua | 0 | 31 to 90 days | \$5,500 |
| Miami | Piqua PD - Crisis Communication System | This department has trained crisis/ hostage negotiators in a unit with a history that spans twenty years. There has been considerable success within this unit when ever they are able to establish communication with the suspect or person in crisis. The department does not have all of the technology available that would allow us to establish this contact. We would purchase a "throw away" phone to be able to establish crisis communicators in situations where it currently is not possible. | City of Piqua | 0 | 31 to 90 days | \$5,500 |
| Miami | Piqua PD - Crisis Communication System | This department has trained crisis/ hostage negotiators in a unit with a history that spans twenty years. There has been considerable success within this unit when ever they are able to establish communication with the suspect or person in crisis. The department does not have all of the technology available that would allow us to establish this contact. We would purchase a "throw away" phone to be able to establish crisis communicators in situations where it currently is not possible. | City of Piqua | 0 | 31 to 90 days | \$5,500 |
| Miami | Piqua PD - Truth Verification Equipment | This project would purchase equipment and provide training for conducting our own in-house truth verification examinations. We currently must transport suspects and victims out of town and pay an outside resource to conduct these examinations in serious criminal cases. | City of Piqua | 0 | 31 to 90 days | \$20,000 |
| Miami | Piqua PD - Truth Verification Equipment | This project would purchase equipment and provide training for conducting our own in-house truth verification examinations. We currently must transport suspects and victims out of town and pay an outside resource to conduct these examinations in serious criminal cases. | City of Piqua | 0 | 31 to 90 days | \$20,000 |
| Miami | Development Program Manager | This project would start a new position that would need to be funded for multiple years at the cost estimated above. While we have various agencies to whom we refer victims of domestic violence and other crimes, these are points-of-contact outside of our agency. Victims would benefit from an in-house advocate who would have quick access to police officers, records and other city resources. | City of Piqua | 1 | 91 to 180 days | \$75,000 |
| Miami | Piqua PD - Victim Advocate | This project would start a new position that would need to be funded for multiple years at the cost estimated above. While we have various agencies to whom we refer victims of domestic violence and other crimes, these are points-of-contact outside of our agency. Victims would benefit from an in-house advocate who would have quick access to police officers, records and other city resources. | City of Piqua | 1 | 91 to 180 days | \$75,000 |
| Miami | Piqua PD - Victim Advocate | This project would start a new position that would need to be funded for multiple years at the cost estimated above. While we have various agencies to whom we refer victims of domestic violence and other crimes, these are points-of-contact outside of our agency. Victims would benefit from an in-house advocate who would have quick access to police officers, records and other city resources. | City of Piqua | 1 | 91 to 180 days | \$75,000 |

Minimus are aware that our low staffing levels make it unlikely for the department to perform the surveillance that is sometimes necessary to detect illegal activity. The department would purchase a system to allow for remote video surveillance of locations on an as needed basis based on information received from members of the community. | City of Piqua | 0 | 91 to 180 days | \$12,500 |
| Miami | Piqua PD - Cruiser Replacements | The department has operated under a cruiser replacement plan for several years which allows the department to replace cruisers in our fleet on a rotational basis. The department changed the plan from four cruisers a year to three cruisers a year a few years ago. Most recently, the capital funds have not been available to replace or cruiser. The department projects the ability to continue fleet operations as is throughout the calendar year due to the exceptional maintenance program that is currently in place. However, as more and more cruisers extend beyond the 20,000 mile mark, reliability decreases. The department's officers need reliable cruisers in order to effectively and safely perform for the community. There is a need to replace six cruisers over the next two years. | City of Piqua | 0 | 91 to 180 days | \$180,000 |
| Miami | SafeHaven Transportation | We provide free transportation to 387 members across 12 counties, we operate on 3 vans that have over 150,000 miles on all of them, we are looking at repairs monthly that value over \$500 dollars at a time. We are looking to upgrade these vans so our members have a safer way of transportation to and from our centers. | SafeHaven Inc. | 4 | 0 to 30 days | \$5,000 |
| Miami | Piqua PD - Digital In-Car Patrol Cameras | This department has equipped every patrol vehicle with an in-car camera system due to a multiple year implementation program. Unfortunately, since the beginning of the program, the technology has always changed making the quality of the recordings inferior to community standards and difficult to manage. The department has developed a system based on VHS recordings and now that equipment can not be replaced, and is sometimes not reliable, and so a medium will be available. The department's recordings are currently stored on equipment taken. The community expects there to be in-car camera recordings available when they file complaints or are sitting on juries. The department would replace all the units in the fleet with a digital system that would include "back-end" management to produce recordings when required. | City of Piqua | 0 | 91 to 180 days | \$81,000 |
| Miami | Piqua PD - Police Canine Unit | The department currently has frequent need for a police canine unit and rely on assistance from other police agencies to provide this service. There are considerable delays due to the wait. The department would hire an officer to replace a veteran officer who would be trained as a dog handler. The department would need to purchase the dog and train the handler and the dog together. There would be costs for up-fitting a cruiser as a canine vehicle. | City of Piqua | 1 | 91 to 180 days | \$95,000 |
| Miami | Piqua PD - Police Canine Unit | The department currently has frequent need for a police canine unit and rely on assistance from other police agencies to provide this service. There are considerable delays due to the wait. The department would hire an officer to replace a veteran officer who would be trained as a dog handler. The department would need to purchase the dog and train the handler and the dog together. There would be costs for up-fitting a cruiser as a canine vehicle. | City of Piqua | 1 | 91 to 180 days | \$95,000 |
| Miami | Roadside Park Restroom Facilities | Roadside park is a primarily passive park where two sections of the community's recreational trails meet. This park hosts the Parks and Recreation Annual Car Show as well as our Fall Festival. Currently the nearest restroom along the path is 1.12 miles to the West and 1.12 miles to the East. This project will build a permanent restroom that will serve the users of the recreational trail as well as the attendees of Annual Fall and Recreation events. | City of Piqua | 1 | 181 days or more | \$100,000 |
| Miami | Piqua Skate Park | The City of Piqua parks include a swimming pool, baseball and softball diamonds, soccer fields, a football field, a pavilion for cultural arts, but no suitable facility for the youth of our community who skateboard. Currently skateboarders must skate on private property which results in many of them getting citations from our police department. This concrete, skate-style park will provide them a place where they are encouraged to practice their sport without negatively impacting the community. | City of Piqua | 1 | 181 days or more | \$350,000 |

Currently skateboarders must skate on private property which results in many of them getting citations from our police department. This concrete, skate-style park will provide them a place where they are encouraged to practice their sport without negatively impacting the community. | City of Piqua | 1 | 181 days or more | \$350,000 |
| Miami | Municipal Pool Rehabilitation | The City of Piqua's Municipal Pool was built in 1988 and is outdated. The pool consists of a large 2-shaped pool with a 150' side and diving boards with a separate baby pool that is only 6' deep. The proposed project will add a spray park to appeal to a wider age range, update the locker rooms, update the concession and first aid area to current standards, and replace pool circulation and filtration systems. Without these repairs, the pool will likely close in 2012. | City of Piqua | 35 | 181 days or more | \$250,000 |
| Miami | Municipal Pool Rehabilitation | The City of Piqua's Municipal Pool was built in 1988 and is outdated. The pool consists of a large 2-shaped pool with a 150' side and diving boards with a separate baby pool that is only 6' deep. The proposed project will add a spray park to appeal to a wider age range, update the locker rooms, update the concession and first aid area to current standards, and replace pool circulation and filtration systems. Without these repairs, the pool will likely close in 2012. | City of Piqua | 35 | 181 days or more | \$250,000 |
| Miami | Mote Park Community Center Rehabilitation | Mote Park Community Center was built in the 1980's with the primary purpose of housing our local theater group, the Piqua Players. With the group no longer utilizing the facility, it has become a space for recreation programs as well as rental space available to the community. This project will replace all windows and doors, replace an outdated heating system, add air conditioning to facilitate year round use and alter the room layout of the facility to better facilitate multiple uses. Programs offered in this facility cover all age groups and range from recreation to educational. | City of Piqua | 5 | 181 days or more | \$75,000 |
| Miami | Hance Pavilion Rehabilitation | Hance Pavilion is an open air pavilion built in 1920. It hosts the City of Piqua Civic Band, Music Warehouse, Piqua Arts Council concerts as well as several other community events. The facility is a prominent part of the City's history and plays a pivotal role in the cultural education of the community. Rehabilitation of this facility will enable the community to continue these programs resulting in a positive impact on economic and community development. | City of Piqua | 30 | 91 to 180 days | \$150,000 |
| Miami | Hance Pavilion Rehabilitation | Hance Pavilion is an open air pavilion built in 1920. The facility is a prominent part of the City's history and plays a pivotal role in the cultural education of the community. Rehabilitation of this facility will enable the community to continue these programs resulting in a positive impact on economic and community development. | City of Piqua | 30 | 91 to 180 days | \$150,000 |
| Miami | Fountain Park Restroom Facilities | Fountain Park boasts Hance Pavilion, a 1000 seat open air performance venue and Hardman Field, a high school baseball field. Other amenities include basketball, tennis and volleyball courts, along with playground equipment. In addition these features, the park hosts the annual Independence Day celebration. The restrooms and concession facility that serves the park is in disrepair. This project will replace the restroom and concession facility at the north end of the park that services Hance Pavilion and Hardman Field and the concession facility at the south end of the park to serve the youth that use the playground equipment at that end of the park. Due to the age of the children using this equipment, it is too far for them to walk to use the other restroom facilities in the park. | City of Piqua | 1 | 181 days or more | \$75,000 |
| Miami | Obesity and Diabetes Prevention and Management | Obesity and diabetes is highly prevalent in Ohio and Miami County. We propose to expand an existing physician supervised program that targets obesity and prediabetes. Based on the Look Ahead Program, we use lifestyle, behavior and medical interventions to decrease the onset of diabetes and promote weight loss. This program has been demonstrated to improve blood pressure, BMI, lipids, HbA1C and overall health. We propose increasing our hours of operations from 10 hours per week to 40 hours per week and the hiring of 4 additional FTEs. Dr. Chazum chazum@mac.com | Roundtable Wellness | 4 | 91 to 180 days | \$70,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Miami | Primary Health Care for the Uninsured | Many citizens of Ohio and Miami county no longer have health insurance. We proposed a low cost, low charge primary care practice that provides primary health care to those patients that no longer have health insurance. Using the micropractice model, we would hire nurse practitioners and physician assistants to provide affordable healthcare. Dr. Chazum chazum@miac.com | RTW | 5 | 91 to 180 days | \$75,000 |
| Miami | Obesity Electronic Health Care Records | Currently no obesity oriented electronic healthcare software exists for the medical management of obesity. We propose the continued development of an obesity database that will be deployed in the clinical setting. This database would track and manage key biomarkers not currently recorded in the standard medical practice. This database would use CHH standards such that obesity related medical information can be easily communicated to area physicians and clinicians in a HIPAA compliant manner. Dr. Chazum | Roundtable Wellness | 3 | 181 days or more | \$20,000 |
| Miami | Village of Rockford Wastewater Treatment Plant | The village of Rockford's wastewater treatment plant is out of capacity and also outdated in order for their largest employer to remain there and expand. This system needs upgrading. The Parsons Company has committed \$50,000,000 to this project since they are a major user and may need to pretest. The project has been engineered and could start very soon. This project will retain 60 jobs and help create 10 more in the short term it will keep a very good company in Rockford. | Mercer County Community Development Department | 70 | 91 to 180 days | \$2,500,000 |
| Miami | Crack seal runway, overlay runway, install approach | Crack seal runway, overlay runway, install approach lighting. | City of Piqua | 6 | 91 to 180 days | \$395,000 |
| Miami | Recovery Education | Requesting funding for supplementing continuing mental health psychological rehabilitation education at consumer operated peer center for Addictive & Emotion Disorders. Funding will assist agency to continue courses, offering approximately 1700 classes per year at Piqua, Ohio. Approximately 12 adults with mental illness per class. Our current membership of over 400 individuals would receive increased coping skills, multiple skills, increased knowledge and understanding of their mental illness, increased ability to self-advocate and be self-empowered, increased hope. This would be evidenced by our continued quarterly impact surveys and tracking based on self-report of recovery. Classes also all assist members in vocational ability and skills. Staffed by a certified counselor, this program has been recognized by the National Life Reintegration Award in 2008 and partners with many other agencies, colleges, and volunteers in the community. SafeHaven is a member of the local United Way and funded through the local approved Addictive Board as well as United Way. We provide a Computer Lab where unemployed adults can use self-paced technology training programs to improve their skills and qualifications for re-employment. These software and hardware training programs are already developed - but unknown to many. The programs include testing and certification. The certification and education gained enhances the skillset of the unemployed and provides a pathway to the adult to pursue better or different employment. This same (or similar) program could be used in the "academic" environment, especially for the students in grades 5 - 8 so that high schools no longer need to spend time teaching basic software & hardware skills. The program is currently required projects assigned to students. | SafeHaven, Inc. | 10 | 0 to 30 days | \$15,000 |
| Miami | Technology training for Students and Adults | This program is to help support the cost of modernizing the communication system of a county and its municipalities. The integration of a broadband networked VoIP Telephony system will connect 40 separate locations (81 classrooms) that are spread over 4025 sq miles. The system will serve to eliminate an average of \$800,000 of toll costs annually, reduce the cost of classroom professional support by \$130,000 through software application, reduce the cost of files, space and paper, reduce the cost of electronic message a savings in over \$100,000 annually in paper, and reduce classroom, parent, and staff traveling through webcasting by \$24,000 annually. This system will bring distance learning into the alternative school program which will serve 60 at-risk students. With an overall program cost savings of over \$300,000 annually, teachers will keep their jobs and 100 low-income children and youth will continue to receive services. Savings will be on going equating more service and staff expansion in subsequent years. This system will include the purchase of 321 phones, PDAs for field staff, 52 laptops for field staff, and software for all the applications. income rental property tenants and offer immediate cash savings from weatherization. | Wise Provisions | 1000 | 31 to 90 days | \$100,000 |
| Miami | Modernizing Communications Capability | This program is to help support the cost of modernizing the communication system of a county and its municipalities. The integration of a broadband networked VoIP Telephony system will connect 40 separate locations (81 classrooms) that are spread over 4025 sq miles. The system will serve to eliminate an average of \$800,000 of toll costs annually, reduce the cost of classroom professional support by \$130,000 through software application, reduce the cost of files, space and paper, reduce the cost of electronic message a savings in over \$100,000 annually in paper, and reduce classroom, parent, and staff traveling through webcasting by \$24,000 annually. This system will bring distance learning into the alternative school program which will serve 60 at-risk students. With an overall program cost savings of over \$300,000 annually, teachers will keep their jobs and 100 low-income children and youth will continue to receive services. Savings will be on going equating more service and staff expansion in subsequent years. This system will include the purchase of 321 phones, PDAs for field staff, 52 laptops for field staff, and software for all the applications. Using proven automation and structured processes, dozens of homes would receive quick energy triage and computerized recommendations for fastest energy savings payback. A coalition of contractors and material suppliers have agreed to perform services, with local labor and newly trained labor from OJFS pool to perform work within days of energy audit. Tenants would get immediate utility savings over and above small monthly charge to be repaid. Funds would be repaid using cooperative billing through utility companies to return money to pool and allow next round of homes to be insulated. Benefits: 1- Immediate weatherization of 5000 homes, within 12 months 2- Immediate cash savings will help low income renters reduce utility payments 3- Immediate and ongoing employment of 250 people, avg wage \$12.00/hr. 4- Immediate reduction in carbon footprint and carbon fuel generation 5- Immediate stimulus of \$1 million in locally produced materials and supplies | Council on Rural Services | 10 | 0 to 30 days | \$250,000 |
| Miami | Miami County tenant weatherization and employment | Using proven automation and structured processes, dozens of homes would receive quick energy triage and computerized recommendations for fastest energy savings payback. A coalition of contractors and material suppliers have agreed to perform services, with local labor and newly trained labor from OJFS pool to perform work within days of energy audit. Tenants would get immediate utility savings over and above small monthly charge to be repaid. | Miami | Development of Improved Flux Cored Arc Welding Wir | This project will create a \$25Myr annual product revenue business in Ohio for RevWires, create 3 new jobs initially and grow to 25 plus permanent jobs in Ohio. This project is to expand the wind turbine supply chain in Ohio for our U.S. and Ohio wind turbine tower manufacturer, the project allows RevWires to develop and manufacture a very high hydrogen weld metal that creates an welding area for new high strength steel used in wind turbine tower structures. This will enable a decrease in cost for the wind turbine tower structure and improve the reliability and longevity of the wind turbine towers. This project will create 3 new jobs in the previous State of Ohio towns and expand to RevWires in 2008. | RevWires LLC | 25 | 0 to 30 days | \$2,500,000 |
| Miami | Brownfield Assessment Program | The Brownfield Assessment Program will identify up to three properties in the City of Piqua which are currently abandoned and since used in a commercial or industrial concern. Under the program, these properties will have the appropriate ASTM Phase I and/or Phase II environmental assessment completed to determine the amount of environmental remediation and clean up needed to bring properties into a reusable condition. Participating locations will be marketed aggressively to promote redevelopment. | City of Piqua | 50 | 31 to 90 days | \$250,000 |
| Miami | Village of Fletcher Sewers | Sewer the unsewered Village of Fletcher which is currently under a building ban enforced by the local Health District since no public sewers exist. Project partners of Miami County and Piqua will also install sewers to open further development along U.S. 36. This project will construct approximately 6 miles of new sewer lines. | Miami County | 200 | 91 to 180 days | \$3,100,000 |
| Miami | Hilltop Sewers | Construct new sanitary sewers and storm sewers to replace existing broken down drain line that is functioning as a combined sewer that discharges to Tri-Ohio WWTP. Approximately 2000 feet of sewers will be installed. | Miami County | 20 | 91 to 180 days | \$200,000 |
| Miami | North County Road 25-A Sewers - Phase III | Provide Public Sewers to part of County that is currently occupied by many Small businesses that have failed septic systems. Area is not built out to full potential because without public sewers businesses are very limited to number of employees and types of business. | Miami County | 50 | 181 days or more | \$750,000 |
| Miami | Brandt Sewers | Sewer the unincorporated Hamlet of Brandt which is currently under a building ban enforced by the local Health District since no public sewers exist. Project Partner Clark County will also install sewers to open further development along S.R. 236. Install approximately 5 miles of new sewer lines. | Miami County | 50 | 181 days or more | \$3,000,000 |
| Miami | Pleasant Hill Wastewater Treatment Plant Improve | The wastewater treatment plant was built in 1975 and requires an upgrade in order to meet current EPA standards as well as replace all of the aging mechanical equipment and expand the bottle neck I/O system as part of the project. The project also includes adding a mechanical screen to remove suspended solids, reworking the existing aerators in the oxidation ditch to provide additional oxygen during the biological treatment, adding a chemical system to remove the phosphorus in the wastewater, adding a secondary clarifier, replacing the RAS/WAS pump station and adding a post aeration system to ensure sufficient oxygen is in the water when it meets Sfishwater River. | Fanning Howey Associates, Inc. | 5 | 91 to 180 days | \$680,000 |
| Miami | Statler Farm Improvements | Extension of water and sewer to serve 610 Acres of vacant land surrounding the I-75 Interchange #78 | Miami County | 600 | 181 days or more | \$1,500,000 |
| Miami | Phoneton Sewers | Provide Public Sewers to part of County that is currently occupied by many Small businesses and residents that have failed septic systems. Area is not built out to full potential because without public sewers businesses are very limited to number of employees and type of business. | Miami County | 200 | 181 days or more | \$2,500,000 |
| Miami | Statler Farm | Extension of water to serve 610 Acres of vacant land surrounding the I-75 Interchange #78 | Miami County | 600 | 181 days or more | \$2,000,000 |
| Miami | South County Road 25-A | Provide Public water to a part of County that is currently 75% built out with Commercial and light Industrial Development. Businesses are currently only 75% occupied partly because of unsafe drinking water from private wells. Approximately 2000 of new waterline will be installed. | Miami County | 600 | 181 days or more | \$2,000,000 |
| Miami | Casstown Water | Provide Public water to Village of Casstown which has many contaminated wells and Miami East School District. District is currently designing new High School and has approached County about obtaining public water. | Miami County | 50 | 91 to 180 days | \$250,000 |
| Miami | The Clean Waters Program | This project is comprised of a separate system to manage impound system upgrades, a upgrades that ensure sewer lines in the area, upgrades of antiquated sewage disposal systems with a better on site system. Either action would only be performed on septic systems that discharge their sewage off lot or are in a state of failure or have outlived their usefulness meaning systems that don't meet current standards that are greater than 40 yrs. old. Our focus would be to eliminate discharging sewage disposal systems thereby removing improperly treated sewage from entering into the four watersheds that make up our county. The added benefit of this activity would be a better educated public at many levels since we do have an ongoing program (est. in 1972) that follows up on all of our on site installers. The impact of this can be felt in surrounding counties as well. We've had many discussions with our colleagues across the state inquiring about our program. I.E. I'm presenting our program in Columbus in April. | Miami County Health District | 30 | 31 to 90 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------|----------------|--------------------|---------------------------|
| Miami | Bradford Wastewater Plant Upgrade | Best Project Description: Wastewater plant upgrade as a result of EPA requirements and increase hydraulic loading as a result of effluent flow and expansion of distribution system. Plant design flow is 240, average flow is 200. Plant is currently 20 years old and is in need of renovation. Phosphorus discharge limits added by CEQA to NPDES, current plant processes can not remove phosphorus to meet new standards. Sewer duct has been consistently and deteriorated improvements to current plant will cost approximately 2 million dollars. | Village of Bradford | 5 | 91 to 180 days | \$1,200,000 |
| Miami | Bradford Storm Sewer Separation | Sewer Separation: Bradford currently has 25% of community still connected to combined sewers. CEQA mandated Village to connect and remove all active CSOs by 2012. Separation of storm and sewage on remaining combined lines will reduce the need for CSOs and will eliminate direct discharge of sewage to local streams. | Village of Bradford | 5 | 91 to 180 days | \$1,700,000 |
| Miami | Bradford Water Treatment Plant Discharge | Water plant currently is issued a NPDES permit for backwash and brine discharge. Current filtering system (Gravity Sand Beds) are in need of replacement to continue meeting discharge limits. It was determined most cost efficient to eliminate sand beds and connect discharge from water plant to sewer system. This will void the need for the NPDES permit. Will reduce the amount of pollutants entering the local stream. Water Plant was constructed in 1980. Brine Solenoid tanks are 50 years old and need replaced. Also Multimedia filtration tanks are old and need replaced. | Village of Bradford | 5 | 91 to 180 days | \$150,000 |
| Miami | Bradford School Street Reconstruction | Reconstruct four blocks of School Street. Street has deteriorated to the point of major repair. | Village of Bradford | 5 | 31 to 90 days | \$550,000 |
| Miami | Bradford North High Street Reconstruction | Reconstruct North High Street. Street has deteriorated to the point of major repair. | Village of Bradford | 5 | 91 to 180 days | \$600,000 |
| Miami | Bradford Oakwood Street Reconstruction | Reconstruct Oakwood Street. Street has deteriorated to the point of major repair. | Village of Bradford | 5 | 91 to 180 days | \$400,000 |
| Miami | Tip City - Repaving Program | This project will repave County Road 25A (CR25A) and Evanston Roads in Tip City. CR25A runs parallel to I-75 and varies from a 5-lane to 2-lane design and is a vital roadway for numerous business and industries. Both roadways need repaving to facilitate commerce (economic development) and assist the motoring public. The City of Tip City can have this project ready to bid within 30-days. A checkbook-friendly trolley bag is a wheeled bag that allows the traveler to leave their laptop computer in the bag during TSA security screening thereby making it faster and easier to inspect the contents of a bag for bombs hidden inside the carriage of laptop computers. TSA screeners want to see inside the laptop computer housing. This bag gives the screener a clear and unobstructed view of the contents of a laptop computer while leaving it in the bag. | City of Tip City | 10 | 31 to 90 days | \$650,000 |
| Miami | Checkpoint Friendly Laptop Bags | The Aviation CPFB Trolley Bag has a compartment on the front of the bag that holds the laptop computer and only the laptop computer. This compartment swings up so the whole trolley bag can lay flat on the belt for X-ray scanning. After the bag leaves the X-ray tunnel the user simply grabs the handle and picks it up. As many as 1200 laptop computers are lost or left behind at these checkpoints every day because they are removed from their cases for inspection. This costs TSA millions of dollars in claims. Laptop computers can remain in their cases they are less likely to be lost or checkpoints, thereby reducing the number of claims against TSA and saving the taxpayers millions of dollars in claims. Make Park Community Center was built in the 1960s with the primary purpose of housing the local theater group, the Piqua Players. With the group no longer utilizing the facility, it has become a space for recreation programs as well as rental space available to the community. This project will replace all windows and doors, replace an outdated heating system, add air conditioning to facilitate year-round operation after the room layout of the facility to better facilitate multiple uses. Programs offered in this facility cover all age groups and range from recreational to recreational. | Aerovation Products LLC | 4 | 0 to 30 days | \$100,000 |
| Miami | Mote Park Community Center Rehabilitation | AFS designs systems to enable cement plants to burn tires (which would otherwise go to landfills) and other waste products such as trash, oil fuel. We would like to develop the same product to enable Electrical Power company's boilers to be able to burn waste products in a new incineration burning (also burning) technology that reduces harmful NOx emissions while using renewable waste fuels to generate power. Our customers have been proven in the cement industry to reduce costs by using less renewable waste fuels to generate power - reducing emissions up to 20%. This burned at higher temperature burn completely and are cleaner - they DO NOT emit black smoke. Requested Stimulus funds would enable us to complete our design and build a test prototype for an electrical power plant, enabling them to use trash as a fuel to generate electricity. Jobs created would be not only for AFS engineers but for local, Ohio fabricators who would build the equipment for the test burn. | City of Piqua | 5 | 181 days or more | \$150,000 |
| Miami | Enable Electrical Power Plants to use Waste Product | The Streetscape Project will improve sidewalks, ADA accessibility, drainage, lighting, traffic control, and landscaping in the downtown area. Currently, areas in Troy which have been improved with previous streetscape programs, have 100% accessibility. While areas which have not experienced streetscape improvements have vacancies, and a high rate of turn-over. The City recognizes a strong and vibrant downtown area increases local revenues through fiscalization, shopping, dining, and as a destination. | AFS Technology | 18 | 0 to 30 days | \$250,000 |
| Miami | Streetscape | This is a 900' linear feet of 8 inch sanitary sewer and replace with 12 inch SDR pipe, backfill, and repair to saw cut areas. | City of Troy | 15 | 0 to 30 days | \$2,750,000 |
| Miami | Yount Road Sewer Project | Remove and replace 400' 8" sewer pipe. Approx 50' linear feet of horizontal boring required. | Village of West Milton | 0 | 91 to 180 days | \$120,000 |
| Miami | Williams Street Reconstruction | This project replaces water main infrastructure in the downtown area and SE section of Troy, OH. Much of this water main is past its useful service life, as documented by on-going water main breaks in these areas. Pipe age approaches 100 years in much of the system, with a mix of cast iron and galvanized pipe. | Village of West Milton | 0 | 91 to 180 days | \$60,000 |
| Miami | High Street Sewer Replacement | The project will provide for upgrades to the Lincoln Community Center. These upgrades include improvements to restroom facilities, electrical, plumbing and HVAC. The front part of the building was constructed in the 1890's to provide a school for the black community. In the 1930's, as the need for the school was no longer needed, the building was enhanced, with a ball court gym which also served as a social gathering location for members of the black community. Over the decades the building has become a gathering area for the entire community, particularly for athletic sponsorship and just having fun together. For some families, as so four generations. | Village of West Milton | 0 | 91 to 180 days | \$18,000 |
| Miami | Cast Iron and Galvanized Water Main Replacement | The project is an extension of a public water main along Washington Road from State Route 41 to State Route 718. It includes approximately 9,300 feet of 16" main and associated valves and fire hydrants. The project will connect existing mains and open over 1,000 additional acres for future development. | City of Troy, Ohio | 7 | 0 to 30 days | \$3,400,000 |
| Miami | LICOLN CENTER | This project will provide public water and fire protection to the West edge of Troy. It also will improve water quality at Concord Elementary School through looping of the two existing extreme ends of the water system. This project also will increase employment in the adjacent land area is developed for mixed commercial and industrial uses. Depending on the industries, employment could exceed 1,500 persons. | CITY OF TROY OHIO | 31 | 181 days or more | \$1,300,000 |
| Miami | Washington Road Water Main Extension | The proposed project is the installation of public utility mains and road improvements in the first phase of the Experiment Farm Industrial Park, opening an additional 150 acres of shovel-ready sites. Earlier phases prepared over 400 acres which are fully occupied. | City of Troy, Ohio | 1,500 | 181 days or more | \$1,235,000 |
| Miami | Experiment Farm Industrial Park | Experiment Farm Road is located in the northwest part of Troy, north of State Route 41 and adjacent to I-75. The project includes widening and improvement of an existing road and installation of public water and sanitary sewers. | City of Troy | 415 | 181 days or more | \$2,300,000 |
| Miami | Water Street Sewer Project | Replace 400 linear feet of 8 inch sewer pipe and repair street surface. | Village of West Milton | 2 | 31 to 90 days | \$20,000 |
| Miami | SEWER RELIGNING PROJECT | The Sewer Alignment Program is intended to upgrade the City's sewer infrastructure system in the Westbrook neighborhood. The program will begin by evaluating the current infrastructure and inspect sewers in the area to monitor flow volumes and transport sewage to the waste water treatment plant. Troy's sewer maintenance division is responsible for maintaining and repairing over one hundred miles of sanitary sewer (6 inches to 42 inches), over 60 miles of storm sewer (8 inches to 60 inches), and all manholes and storm water catch basins. | CITY OF TROY, OHIO | 3 | 0 to 30 days | \$1,500,000 |
| Miami | Troy Sanitary Lift Station SCADA Upgrades | A conditional evaluation process has already begun in the Westbrook neighborhood. The evaluation process build the sewer infrastructure is necessitating a re-align program. Through the sewer alignment program, the City will be able to replace underperforming infrastructure by connecting the underground system to create an even work load throughout the neighborhood. | City of Troy | 5 | 31 to 90 days | \$75,000 |
| Miami | Stanfield Industrial Park | This project has many benefits to the City of Troy and the residents in and around the Westbrook neighborhood. This program will allow the City to provide an improved sewer system by expanding and replacing outdated infrastructure. | City of Troy | 515 | 31 to 90 days | \$3,200,000 |
| Miami | Wilson Road Improvements & Water Line | The proposed project is the installation of public utility mains and road improvements in the first phase of the Stanfield Industrial Park, opening an additional 250 acres of shovel-ready sites. Earlier phases prepared the first 160 acres, of which only 40 acres remain available for development. | City of Troy | 6 | 0 to 30 days | \$500,000 |
| Miami | Northern Trunk Line | West Stanfield Road is located in the west central part of Troy. The project includes widening and improvement of an existing road, installation of public water and sanitary mains, and improvements to the intersection at Washington Road. | City of Troy | 462 | 181 days or more | \$15,000,000 |
| Miami | BRIDGE REHABILITATION PROJECT | The Wilson Road Improvements & Water Line Project entails a complete upgrade including the addition of underground infrastructure, located between Washington Road and Wilson Road. The outcome of this project will connect and expand our main, large diameter water line to the outer edges of the city limits on the west side of the community. A community's existence and ability to grow is contingent upon the supply of adequate quantities of safe drinking water and having a water system capable of supporting the protection needs. This project is ideal as it allows for this type of operation, but also improves storm water management, which plays an important role in controlling discharge to minimize flooding within drainage areas. | CITY OF TROY OHIO | 8 | 31 to 90 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Miami | Treasure Island River Corridor Improvement Project | <p>Back to work generating recreational activities, tourism, and creating other area investments for the future. The Marina will be restored as a regional "Northern Hub" of active outdoor recreation. The establishment of a Northern Hub is in harmony with the Miami Conservancy District's regional river revitalization plan, and the Miami Valley Regional Planning Commission's developing recreational trails master plan. This is a project which has established both short and long term goals.</p> <p>To date the City has invested \$360,000 in the facility. The request of \$2,000,000 completes the project and places the local and regional plan into motion. The City has prepared at its own expense, the blueprints for the next two phases of construction.</p> <p>The Treasure Island Marina will be established as a tourism destination, offering a restaurant, rental center for bicycling, canoeing, kayaking, and other associated items. Other land based recreational additions are also being reviewed at this time.</p> | City of Troy, Ohio | 50 | 0 to 30 days | \$2,000,000 |
| Miami | S. Stanfield Road Repaving | Repaving S. Stanfield Road from SR 41 (W. Main Street) to West Stanfield, a total of about 2000 linear feet | City of Troy | 25 | 31 to 90 days | \$155,923 |
| Miami | N. Elm Street Repaving | Repaving of N. Elm Street from SR 41 (W. Main Street north to the city limits for approximately 2100 feet | City of Troy | 25 | 0 to 30 days | \$255,740 |
| Miami | Municipal Wireless Broadband and Networking Improv | <p>Improve network availability and increase encouraging such development. A wireless mesh within the community would greatly extend capabilities for first responders, police and fire, by providing immediate access to City data resources, streaming video & audio in emergency situations & facilitate responses to citizen calls for service.</p> <p>Limited local financial resources prevent the City from moving ahead with this project. The City would rely on federal or state funding to provide for the development and implementation of these services.</p> <p>Initial consultation and estimates of cost include the following:</p> <ol style="list-style-type: none"> 1. \$3,800,000: hardware & labor to install a City-wide high-speed wireless network 2. \$300,000: hardware & labor to install a dedicated, secure point-to-point network for municipal communications 3. \$75,000: implement services such as tower climbs, tower mounting of hardware, additional engineering services, etc. 4. \$14,000: internal hardware upgrades | City of Troy, Ohio | 162 | 0 to 30 days | \$4,222,000 |
| Miami | Old Troy Pike, Phase VIII | This project consists of widening 4,450 ft. of roadway from 600' north of Shull Road to the north corporation line at Carriage Trails Parkway. The width to match the previous seven phases and to meet the City standards for a minor arterial roadway having 82' right-of-way and a 62' back to back curb width. The improvements also include sidewalks, handicap ramps, storm sewer, street lighting, and traffic signalization. The roadway widening will provide the additional lane widths needed to correct a capacity deficiency in the roadway. | City of Huber Heights | 80 | 181 days or more | \$1,741,094 |
| Miami | Energy Advisor Educational Campaign | Provide additional \$60K for energy efficiency educational brochures to be distributed by electric cooperatives to consumer members. Brochures include: Renewable Energy, Small Wind Systems, Home Energy Audits, CFLs, Heat Pumps, Peak Management, Water Heaters, 202 Low-Cost/No-Cost Home Energy Saving Measures, Do-it-yourself Guide to Energy Star Home Sealing, Counties (77) included in this program could include Adams, Allen, Ashland, Athens, Auglaize, Belmont, Brown, Butler, Carroll, Champaign, Clark, Clermont, Clinton, Columbiana, Coshocton, Crawford, Darke, Delaware, DeWitt, Fairfield, Fayette, Franklin, Fulton, Galia, Guernsey, Hancock, Hamilton, Harlan, Harrison, Highland, Hocking, Holmes, Huron, Jackson, Jefferson, Knox, Lawrence, Licking, Logan, Lorain, Lucas, Madison, Marion, Mercer, Meigs, Miami, Monroe, Montgomery, Morgan, Morrow, Noble, Paulding, Perry, Pickaway, Pike, Preble, Putnam, Richland, Ross, Scioto, Seneca, Shelby, Stark, Tuscarawas, Union, Van Wert, Vinton, Washington, Wayne, Williams, Wood, Wyandot. | Buckeye Power, Inc. | 0 | 31 to 90 days | \$60,000 |
| Miami | Plant re-start | Re-start a viable manufacturing facility. | Deltech Polymers Corporation | 12 | 0 to 30 days | \$350,000 |
| Miami | Wireless Broadband for Rural Application | <p>Our service will be provided to rural areas where there are currently no high speed options, current data projects that appear to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies are able to these areas without grant monies.</p> <p>Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality.</p> <p>Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WIMAX technology will be able to push a strong signal to provide all those services.</p> <p>Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand.</p> <p>The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide.</p> | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Miami | Parking Lot Paving | Re-pave parking lot at main building. Lot has been patched numerous times but needs to be totally repaved. | Miami County Board of MRDD | 5 | 31 to 90 days | \$15,000 |
| Miami | Energy conversion of Schools to solar power | <p>Convert Tipp City High school and middle schools to run on solar power and utilize existing technology to take advantage of daylight.</p> <ul style="list-style-type: none"> - More energy efficient windows to provide natural light in larger rooms. - Solar panels to power lighting and basic power needs. - Design changes to deflect heat from seasonal heat and keep the building cool and less dependent on A/C systems. - Energy efficient heating and cooling systems that can run on bi-fuel or electrical based on power demand. - Use Ohio businesses in Miami County and surrounding counties to provide equipment and labor to keep dollars in Ohio. <p>Provide a frame work for future phase design for savings.</p> <ul style="list-style-type: none"> - Savings will keep from having to submit loans to local home owners, thus keeping more disposable cash for residents and parents to save or spend in further benefit the State of Ohio. | Tipp City School Board | 75 | 31 to 90 days | \$4,785,550 |
| Miami | replacing 40 year old floor furnace with no vents | A new and efficient furnace with vents going to 4 rooms, also a fan to move the heated air and a filter for the heated air. | My Home | 10 | 0 to 30 days | \$7,000 |
| Miami | Energy conversion of 4 buses to run on alternative | <p>Convert four current school buses to use alternative fuel technology that currently exists today.</p> <ul style="list-style-type: none"> - Conversion will decrease costs for sports teams traveling in the local counties. - Conversion will decrease the cost for transporting school band members to perform at local event and competitions. - Conversion will train jobs for drivers in the school district. - Conversion will use Ohio technology to perform the work. - Ohio jobs will be retained and created by expanding this technology. <p>Create a blue print for other Ohio schools to convert buses to alternative fuels.</p> | Tipp City School Board | 5 | 31 to 90 days | \$689,585 |
| Miami | Band Stand & Park Improvements for the Citizens | New Band Stand, Lighting, Trees & Shelter Repair for the citizens of Bradford, Ohio. | Village of Bradford, Ohio | 10 | 91 to 180 days | \$50,000 |
| Miami | Government Bureauacracy | <p>submitted papers saying he cannot work again ever, as he has Pagets Disease, and when you look at what is covered, it is specifically covered.</p> <p>Who at Social Security can say he can work when the Doctors and Specialists say he cannot. They are not EXPERTS, just government do nothing who think they know everything.</p> <p>This has been going on now for over 24 months, they have been rejected twice by the so called EXPERTS from Social Security who have probably never been in the field, just some desk jockey taking a job that someone out here could use.</p> <p>It is now been over 19 months since the last one and they are waiting for a Court date they are told it could be another year.</p> <p>I have been deplating my Retirement plus our daughter and husband have put them in their Rental for the last 18 months. Plus the rest of our family is helping when they can when we have people who do have this disability and I know at least 3 of them and they drive around in new cars Douglas and Katy Springfield, 31 Stevens st. Springfield, oh.</p> | K Kazmaier and Associatees | | 0 to 30 days | \$50,000 |
| Miami | Startup for a home products company in dayton area | I am an entrepreneur. I hold one U.S. Patent and I intend to apply for more for several home products I have invented. I have a great credit score but because of the "credit crisis start-up capital. This business would create at least 3 jobs at first, but due to the potential to grow much larger. I would be willing to start up my business in Dayton rather than Tipp City if it will help my start-up receive funding. I would need to purchase two plastic injection molding machines, lease a work area, buy several computers and software programs, and have a small amount of capital left to get products flowing through the business. My potential retailers would be home shopping networks such as QVC and HDH. Then I would work to get my products in larger retailers such as Target and Meijers. I have all the necessary skills to start the business, just can't receive funding. Thank you for your time. | Currently None | 3 | 31 to 90 days | \$30,000 |
| Miami | Efficiency upgrade | upgrade new energy efficient appliances, lighting, insulation and wind power. | Spurgeons | 20 | 0 to 30 days | \$30,000 |
| Miami | Miami Valley Cultural Center Restoration | The Newberry Theater Foundation, an Ohio non-profit, has been formed to build community awareness, raise restoration funds and conduct programming. The NTF has completed a \$4M restoration plan, secured \$1M in historic tax credits, conducted Phase I renovations and reopened the theater for the first time in 60 years. The facility will serve as a regional resource for educational and cultural activities and a variety of programming is planned. The commercial space will provide the economic self-sufficiency most theaters lack, including ice cream/coffee shop, meeting facilities and a youth center. The project will create 50+ full-time jobs, attract thousands of visitors per month and drive over \$10M in local economic development annually. | Newberry Theater Foundation | 50 | 0 to 30 days | \$3,000,000 |
| Miami | Improving Health of the Skiles Family | Improving the health of the Skiles Family aims to employ local Miami County general contractors and sub-contractors, plumbers, electricians, and perhaps several construction specialists to build in addition to an already existing house and enclosing a large Endless Pool (TM). Not only will infrastructure contractors receive the benefit of these local economic times, but the Skiles Family will receive the health benefits from high blood pressure, obesity, damage from infection and surgery, Rheumatoid and low-exercise office jobs. | Individual | 7 | 31 to 90 days | \$80,000 |
| Miami | Village Sanition System | Installation of suction sewers for existing 150 homes. This will replace existing individual septic systems that are old and outdated that are contaminating storm water system and creek running thru village. | Village of Fletcher | 20 | 91 to 180 days | \$1,500,000 |
| Miami | Energy efficient | New windows, insulation, and siding for a 1500 square ft. home plus the attached garage. | Jenny Schwartz | 10 | 0 to 30 days | \$25,000 |
| Miami | Home and student | Pay off current student loans, have money to initiate further education beyond current status. Home projects to regain lost home value. | Personal | 0 | 181 days or more | \$100,000 |
| Miami | Geo Thermal House | <p>Outcome: Decreased personal debt to allow increased spending to stimulate economy. Further education to increase value to society and further ourselves economically. Increase value of home so value exceeds mortgage.</p> <p>My wife and I are both teachers and would like reduce or use of fossil fuels. By upgrading and installing a Geo thermal heating system we could dramatically reduce our propane use. The Geo thermal heating system would also reduce the amount of electricity we would use as well. In Ohio, most of our electricity is made using coal. This would be a shovel ready project that would reduce our fossil fuel use and employ people very easily.</p> | Personal Property | 3 | 0 to 30 days | \$10,000 |
| Miami | Competative Solar Heating | The project is to verify the feasibility of using solar energy as the primary heat source for winter heating in the Dayton area. This senior design group has a design plan that would practically eliminate energy demands for heating a home in winter and a very realistic method of cooling of a residence in summer. | Wright State University Senior Design Project | 0 | 0 to 30 days | \$35,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Miami | Morvatz's kids college/school fund | I am assuming that due to irresponsible government spending, my government retirement, my wife's state retirement and social security will be exhausted when we need them. Therefore, this stimulus money will offset some of our children's educational expenses because we will be unable to assist them with these costs. | VA Medical Center | 0 | 0 to 30 days | \$100,000 |
| Miami | Traditional Bow Manufacturing | Facility, equipment, material, labor, training, and startup capital to begin manufacture of laminated wood and fiberglass bows for children | BowRilla Bows | 3 | 31 to 90 days | \$120,000 |
| Miami | ALPACA FARMING BUSINESS | This is a small family owned business in the livestock market. 18 Alpacas are on the farm at the current time and newborns on the way and space is very limited. I was laid off from General Motors and was denied unemployment. I am currently a full time student. We need the stimulus money to continue to keep the green space available for the animals by creating additional pasture space and cross fencing. The money would be used for additional fencing and pasture area. Also a compost pile would be created. | FREEDOM STAR ALPACAS | 2 | 0 to 30 days | \$15,000 |
| Miami | ALPACA FARMING BUSINESS | This is a small family owned business in the livestock market. 18 Alpacas are on the farm at the current time and newborns on the way and space is very limited. I was laid off from General Motors and was denied unemployment. I am currently a full time student. We need the stimulus money to continue to keep the green space available for the animals by creating additional pasture space and cross fencing. The money would be used for additional fencing and pasture area. Also a compost pile would be created. | FREEDOM STAR ALPACAS | 2 | 0 to 30 days | \$15,000 |
| Miami | remodel of an upstairs bedroom and making my home | My house was built in 1908 and is now surrounded by a newer home development. With the housing difficulties most of the lots are empty and some of the homes that are built are either abandoned or for sale. The money would help make my home more comfortable, which would help with our energy costs. The bathroom remodel would help my home maintain/improve its market value. The problems with the real estate market and the new homes surrounding my property have hurt my home's value. This is the only way for me to maintain the fair market value of my home. | city of Miami Homeowners association | 5 | 31 to 90 days | \$20,000 |
| Miami | home down payment | I took early retirement from delphi cauda plant was closing. Had to sell home cause i couldn't afford payments.Sold house for little over balance to get it sold. just asking for help with down payment for smaller and cheaper home. | self | 0 | 0 to 30 days | \$13,000 |
| Miami | education | I'm writing to you in regards to my education. I am 47 years of age with a pacemaker and kidney disease. I live on very little income each month. I have gone through many hardships in my life and would like to have the means to go back to school. I need this money to further my education, and to be my daughter's education. I have been a victim of sexual abuse and I want others to know that there are other choices one can and should take in life. I made a choice long ago to be a good citizen, friend, sister, daughter, and most important mother. My dream is to go back to school for victim advocates. To study Law and to help others. I don't know what good luck is so therefore I don't believe in it. I do believe that if I was given the opportunity to further my education I could and would do all in my power to help others. To be a positive outlet for young people. To let others know that just because you are a victim of unspeakable crime doesn't mean you have to stay one. I believe there are many things that define us. One of those things is how well we all get along with each other. GOD gives us the power to overcome the others. All I need is the chance. | n/a | 100 | 0 to 30 days | \$10,000 |
| Miami | Public Safety / Crop Dusting | Create helicopter business utilizing most current and environmentally friendly resources to spray crops to aid the maximum yield possible on acre. Would also use helicopter to aid local law enforcement with search and rescue and drug eradication to facilitate a better local environment for all people. We would also use helicopter to fly donor organs to people in need of the saving organ transplants. | Public Safety / Crop Dusting | 3 | 0 to 30 days | \$250,000 |
| Miami | Auto Towing/Recovery Business | To build a profitable towing/recovery business in Miami county, we will attract 4 drivers to start and will add on more as business grows. | auto towing/recovery business | 5 | 0 to 30 days | \$65,000 |
| Miami | SuppliesArtStore, LLC Distribution Expansion | Expansion of existing minority owned distribution business, expected to hire at least 10 new employees if growth model is met. Growth of business to expand in the area of product selection, product on hand, employee base and market penetration to other parts of the state. | SuppliesArtStore, LLC | 10 | 0 to 30 days | \$475,250 |
| Miami | Increasing jobs in ohio | This money will help seed the expanding company of Kristyreds Inc. Of the 10 people working for this company, 5 have been laid off. We want two of the employees and help with expansion. The money that will be given will be broken down as follows: 60% building inventory 15% marketing 15% emergency funding 5% supplies 5% operating costs | Kristyreds Inc. | 2 | 0 to 30 days | \$5,000 |
| Miami | Buy and Referbish homes for Low income people | Buy old homes, fix them up and use them for low income people to rent or purchase. Will create jobs for contractors and homes for families | Rent-a-Pro | 10 | 91 to 180 days | \$600,000 |
| Miami | Home Repairs | New roof, replace cracked and almost falling roof and front porch, gutters, face board, back door. | Home owner | 5 | 91 to 180 days | \$7,000 |
| Miami | self employment | Office to support transcription and billing for the medical field, i.e. doctors, hospitals, clinics, etc. | none | 1 | 31 to 90 days | \$30,000 |
| Miami | Rum River Blend Food Arts | Tip City Ohio does not have a local bakery. We propose opening an artisan bread bakery in the historic section of downtown. This will over time provide new local employment for 3-4 people directly, as well as temporary jobs for the upgrade and opening of an unused building in the historic district. It will add to the local economy and vitality of the downtown district, providing high quality breads and other "home made" artisan foods. | Rum River Blend | 4 | 31 to 90 days | \$90,000 |
| Miami | Equine Therapy for Handicapped People | The result would be increased stabilization of the commercial neighborhood, employment and increased trade and tax revenue. Hoping that this money will make some scholarships available to those kids that do not have the funds to afford this very needed therapy. Also to assist with the care and feeding of the horses. | Eagles Wings Equine Therapy | 3 | 31 to 90 days | \$50,000 |
| Miami | Home Improvement | I would like to update my home with some improvements that will make my home more efficient, that I haven't been able to do due to the economy and rising of bills and would like for my house to keep its value because a lot of home are going up for foreclosure and are getting run down due to lack of funds to make home improvements. | City OF Piqua Community Development Department | 7 | 31 to 90 days | \$60,000 |
| Miami | Geothermal Home Heating | I would like to add on to my home and add a new Furnace and electric to make my home more energy efficient and to keep the value of an up due to all the foreclosures in are city. | | | | |
| Miami | Geothermal Home Heating | Installation of a Geothermal Heating & Air Conditioning System to this private residence, which the existing furnace needs replaced & is not getting out heat, and the house does have electric baseboard heat, which only half the units work, which is the primary heat source. Outside temp today is 18 degrees, inside temp is 65. We had inspections done with the purchase of this property, but these defects were missed. I am cordill! I've have experienced many hardships including job losses, lay offs, student loan payments, medical disabilities, death of a child, relocation, pay cuts, bankruptcy. We are both still working, but can not afford to make this needed improvement & could not get a loan to do so. Expected Outcome: Green, energy efficient heating & cooling system. | Koehl Residential Repairs | 4 | 31 to 90 days | \$15,000 |
| Miami | Retail Stores | Goodwill operates retail stores as a means of carrying out our mission. Currently, 40% of our retail employees have a disability of some kind. We will construct 3 additional retail stores, employing 80 people. These buildings will meet standards of either USGBC's Energy Star for Buildings program or LEED certification. Because many of these will be entry-level jobs, often filled with people who have a severe disability and/or poor work history, we will provide the following services to assist employees to increase their job skills, financial stability and health: *connection with training in financial management & budgeting *connection with assistance in resolving legal issues *wellness services *assistance with continuing education jobs created: 80 Free services provided: \$200K/year Families leaving poverty: 10 | Goodwill Easter Seals Miami Valley | 60 | 91 to 180 days | \$6,000,000 |
| Miami | Installation of Geothermal Heating & Cooling syst | Installation of a Geothermal Heating & Cooling System for our home. WE bought our Home in 2005, after a whole house inspection. Later to find out that our furnace does not put out heat. Only the fan works. We also have electric baseboard heat, which only half the units work. This is what made our home. Today it's 18 degrees outside. I am cordill! WE are both working. WE can not afford to do this. We can not get a loan. We have been through job losses, lay offs, death of a child, relocation, health disabilities, & bankruptcies. Expected Outcome: Installation of a Green, Geothermal Heating & Cooling System, for heat, economy, & to do my part to stimulate the working economy. | Koehl's | 6 | 91 to 180 days | \$15,000 |
| Miami | 6 New LTVs | Purchase of 6 new light transit vehicles to replace those beyond their useful life in Miami County's aging fleet. | Miami County Transit | 0 | 91 to 180 days | \$288,000 |
| Miami | New Software | Also, there was no transportation or general/other choice in the drop down box above, which is why we chose energy and environment, which is not the proper category. Purchase of new software for scheduling, client management, route building, report creation, etc. | Miami County Transit | 0 | 91 to 180 days | \$50,000 |
| Miami | Building Renovation | There was not a transit choice available in the drop down menu, which is why we chose energy and environment. Renovate existing county building and parking lot to accommodate transit fleet and provider offices. | Miami County Transit | 0 | 91 to 180 days | \$468,580 |
| Miami | Broadway Improvements | There was no transportation option on the drop down, which is why we chose energy and environment. The Broadway Improvement project will extend the Broadway corridor to connect to the busy collector street from the existing commercial developed intersection at High Street south to the US Route 36 corridor; the new connecting point will create a signalized intersection in the middle of an up and coming renaissance neighborhood that has recently seen a number of new commercial and revitalization projects. The proposed project will include widening and resurfacing small parcels of land, currently occupied by improvements nearing the end of their life cycle, and will provide the space necessary for the proposed roadway improvements and make available developable tracts of land that will be very attractive to neighborhood scale mixed use commercial development type projects. The anticipated project will create jobs, potentially create sixty or more new jobs. In addition, the improvements will eliminate the disconnect that currently exists between two well traveled local streets and establish a vehicular and pedestrian route into the surrounding neighborhoods to the businesses located on this stretch of the US 36 corridor. | City of Piqua | 60 | 181 days or more | \$1,000,000 |
| Miami | Sanitary Sewer Extension on West Stanfield Road | Extending sanitary sewer along West Stanfield Road for service to the Stanfield Industrial Park. | City of Troy | 30 | 31 to 90 days | \$550,000 |
| Miami | EExperiment Farm Sanitary Sewer Extension | Extension of Sanitary Sewers along Experiment Farm Road to serve the Experiment Farm Industrial Park. | City of Troy | 30 | 31 to 90 days | \$475,000 |
| Miami | elderly and handicap home improvements | I am going to use the funds to operate a business that will sell at a reduced price stairlifts in the homes of elderly and handicapped individuals as well as performing other home modifications to make homes handicap friendly (plans to do so to many as 10 people as business grows). I shoulder stabilization and the 2' overlay of Westinghouse Road from 1200 feet north of State Route 41 to Dixie Road. This project has been submitted to the Miami Valley Regional Planning Commission. | helping hands stairlift co | 10 | 31 to 90 days | \$50,000 |
| Miami | Wasingington Rd. Shoulder Stabilization and Thin O | | Miami County Engineer's Office | 20 | 181 days or more | \$1,340,713 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Miami | Food Warehouse Purchase | Currently operate from rented storage space attempting to support needy families who are out of work or in low (below poverty level) paying jobs. Over 500 families served last year. Demand continues to rise. Storage space steadily increasing. Current barely adequate space costs in excess of \$11,000 per year in rent. Much more money would be applied to purchase of more food and refrigeration/storage equipment. An opportunity exists which could accomplish this goal through use of a land contract purchase. Requested support added to cash available and grants would allow purchase without need for loans and would meet space requirements. | Needy Basket of Southern Miami County, Inc | 30 | 31 to 90 days | \$30,000 |
| Miami | Library Outreach Building Project | This project would turn an unused freestanding building for outreach and extension services for Troy/Miami County Public Library. The building housed the library's bookmobile, a collection of books, as well as office space for staff. Approximately 15-20 construction people would be used on the project, which encompasses about 2,000 square feet of space. The building would need to be totally renovated for this project. | Troy-Miami County Public Library | 4 | 31 to 90 days | \$200,000 |
| Miami | Warehouse Purchase | Organization operates food pantry to provide food, toys, clothing etc. to needy families in 3 township areas. Over 500 families provided service 2008. Number expected to rise to 2009. Operations require storage and distribution in excess of 75000 lbs of food each year. This requires about 3000 sq ft of floor space, shelving, freezers, refrigerators, receiving, and distribution, etc. Increasing demand will require more space than currently available. Current space has had to be rented at cost of over \$70,000 per year which consumes funds that should be used for food. Opportunity exists to acquire needed space to operate at lower cost. Funds requested would be for land development, other expenses. Will be added to current cash available so more than half of cost can be met and remainder paid by use of land contract type of purchase so no loan is required. | Needy Basket of Southern Miami County, Inc. | 30 | 31 to 90 days | \$30,000 |
| Miami | Officer and Citizen Safety | Provide free training to municipal, county, and state probation/juvenile departments as well as small underfunded law enforcement agencies across the state in the areas of officer safety, victim interviewing, transportation and arrest, defensive tactics and other areas where training has been reduced or eliminated as the result of shrinking budgets. Also provide free training to women's and citizen's groups about situational awareness, defensive strategies and tactics, victim issues, rape prevention, and other safety issues. The training for probation/law enforcement will be 16 hours in length. We expect to train in excess of 1200 probation/juvenile and law enforcement officers. This training will be on materials/subjects not covered by most probation department standard training, but is usually only covered in seminars and conferences not available to most officers unless they pay for the training out of their own pockets. The primary instructors each have over 20 years of experience in criminal justice and training. Citizen training is available 4 hours and we hope to reach 50-60 citizen groups throughout the state. | Tactical by Design | 8 | 31 to 90 days | \$125,000 |
| Miami | Zeigler Road Pump Station Stand-By Power Station | The project proposes to install a standby generator at the Zeigler Road pump station. | City of Piqua | 0 | 91 to 180 days | \$37,500 |
| Miami | Grant Street Water Main Improvement | The project proposes to install 612 linear feet of 8" water main with the hydrants and new services. | City of Piqua | 0 | 91 to 180 days | \$25,000 |
| Miami | New Transmission Main - South/Clark | The project proposes to install 5,800 linear feet of 16" water main and hydrants. | City of Piqua | 0 | 181 days or more | \$271,000 |
| Miami | New Transmission Main | Installation of 8,200 linear feet of 16" water main and hydrants. | City of Piqua | 0 | 181 days or more | \$406,500 |
| Miami | Nwe Ground Water Membrane Plant | The project proposes to undertake exploratory boring to locate aquifer, land acquisition, well field development, membrane pilot study, engineering for design and construction of a new 1.7 million gallons per day membrane water treatment plant. | City of Piqua | 4 | 181 days or more | \$11,788,844 |
| Miami | New Elevated Water Storage Facility | The project seeks to acquire property, design and construct a new one million gallon elevated water storage facility for the central water zone of the city. | City of Piqua | 0 | 181 days or more | \$1,000,000 |
| Miami | Hetzler Road Pump Station Stand-By Power Station | The project proposes to install a stand-by power generation unit at the pump station. | City of Piqua | 0 | 91 to 180 days | \$37,500 |
| Miami | Water Meter Automated Meter Reading System | The project proposes to install automatic water meter reading machines for users of the city's water system. | City of Piqua | 0 | 181 days or more | \$1,000,000 |
| Miami | Water Towers | 1 mg water was built in 1987 and is in need of maintenance. 1 mg tower is up for maintenance this year. | Village of Covington - Board of Public Affairs | 5 | 31 to 90 days | \$315,000 |
| Miami | Covington Ohio-Sewer Treatment plant updates | Update existing Sewer Treatment plant. Last major update 1982. Updates are needed to stay in compliance with state regulations to reduce operating cost and improve effluent quality. Update grit removal system, repair concrete aeration basin tanks, improve diffusers and aeration, repair existing clarifiers, replace aging pumps with more efficient models to reduce maintenance costs. | Village Of Covington Board of Public Affairs | 5 | 91 to 180 days | \$2,225,000 |
| Miami | Covington Ohio-Sewer Collection system updates | Replace 3.3, 3.6 linear ft. of sanitary sewer, repair and replace 200 manholes, to prevent stormwater intrusion, reduce treatment cost and improve effluent quality. Upgrade water quality from existing wells that are susceptible to contamination from the Stillwater River. Locate and develop new wells. | Village Of Covington Board of Public Affairs | 5 | 91 to 180 days | \$450,000 |
| Miami | Covington Ohio -Watermain Replacement | Replace 2600 linear feet of existing 4" cast iron water main with 8" ductile iron for improved protection and improve water quality by eliminating dead end mains. Replace 65 old hydrants with new pump up style hydrants. Replace 25 main valves for maintenance purposes. Replace 250 galvanized service lines with copper service. | Village Of Covington Board of Public Affairs | 5 | 91 to 180 days | \$1,665,000 |
| Miami | Construction? Energy | To update are home with the latest heat and energy and also to weatherize are home to save on fuel usage and and to keep the heat in to lower home cost. To keep Piqua looking beautiful. I believe we are one of the people who get a bad loan and are trying to get out of it (are you still here we don't effort to do it) this is what we need for this business. Thank you for this opportunity!! | City Of Piqua Community Development Department | 7 | 91 to 180 days | \$75,000 |
| Miami | Self-Defense and Stranger Danger Classes | We have a team of martial artists (male and female) who are committed to providing self-defense training to women and children facing domestic violence situations. In addition, we can provide classes on stranger danger for kids in schools or at camp. | Tae Ryu Do International | 5 | 0 to 30 days | \$222,000 |
| Miami | location expansion for G.O.L.F. Enterprises | This funding would allow 10-15 new arms to be added in Anglin, Greene, Mercer, Miami, and Montgomery counties. Two new positions would be added to monitor, service, and install arms. This small business has been successfully and profitably operating for a 58 year old, single woman for ten and a half years. Expansion is needed at this point to add employees and to avoid stagnation. This solely operated business has out grown the center. This entity owns 20 arms which is more than one person can handle. With the addition of 10-15 new locations, I could hire 2 people to maintain 18-20 arms each leaving me free to handle the volumes of paperwork necessary for this business as well as general bookkeeping and office duties. This appears to be an opportunity to assist and encourage a woman owned business to grow and prosper even in today's poor economic climate. | G.O.L.F. Enterprises of East Central Ohio | 3 | 91 to 180 days | \$76,967 |
| Miami | Wind Resistors | Remove current glass and replace with current high efficiency wind resistors | The Dorset | 1 | 31 to 90 days | \$60,090 |
| Miami | Technology in classrooms | I am a 7th grade Reading teacher. This money would also go with my co-teacher that is a 7th grade Writing teacher. I would like to purchase a Smart Board and all the technology to go with it to use in my classroom. That way I can get my students more involved in the learning, and I don't have to wait for a Smart Board to become available. If I have one installed, it will always be available for me to use. For my classroom and my team teacher's classroom, I would also like an updated set of lab top computers to share between us. We do have computer labs, but the entire school has to use them. So, many times they are not available. When they are available, some don't work. This makes it difficult for our English classes. Between the two classes we use computers often for assessment, research, and publishing. We would also like two Elm projectors so that we can show student work instantly instead of making overheads every time we want to share. There are also items that go with the Elm such as a cart, projector. Along with that we would love to have two heavy duty pencil sharpeners. The ones we have now break constantly. It is a chore to try to sharpen a pencil. | Piqua City Schools | 50 | 31 to 90 days | \$50,000 |
| Miami | Haney's revitalizing project | 1. Replace at least 19 windows in the house with energy efficient windows. 2. Replace an additional 10 windows on front porch with energy efficient windows 3. Put heat in front porch. 4. Put heat in the back family room. 5. Put gas doors on both the places (one wood - one is gas). 6. Put new roofs on house and garage. 7. Put in new entry door in garage. 8. Put in a new energy efficient furnace to replace the old hot water boiler system. There are no ducts just old water lines and standing registers that don't work, despite having them cleaned and blown out. 9. Put in a new hot water tank. 10. Completely replace kitchen including stove, dishwasher, refrigerator, washer and dryer with new more efficient appliances. 11. Put in updated efficient toilets in both bathrooms. 12. Completely replace old 2nd floor bathroom. 13. Put in french doors between front room and dining room. The outcome of updating our house hopefully will make it warmer, more environment friendly, and more efficient so that we can save on our utilities by using less water and gas in the future. I would like to rehab historical homes in surrounding counties and turn them back into affordable housing. This project could employ many sub contractors in the construction trade which is at an all time low in this area. | Haney family | 6 | 31 to 90 days | \$150,000 |
| Miami | rehab for humanity | link custom homes | link custom homes | 40 | 31 to 90 days | \$1,500,000 |
| Miami | Piqua Parents as Teachers | Thank you for your consideration Piqua PAT is a parent education & support program for anyone with children birth to K&gn. entry. Goal - give children best possible start in life. Vision - parents are their children's first & best teachers. We help parents by offering home visits with personalized developmental info, programs, parent screenings & resource information. We are free, volunteer, universal access & strength based. We serve 80-100 families yearly. Due to the economy our funding has been decreased by over \$13,000 & fear not being able to serve as many families. We help to assure that children are prepared to enter K&gn. Not always a result in obtaining early intervention for children, decrease child abuse as parents are more knowledgeable in their parenting skills & better able to cope with their child's development. assure that children finish high school. As parents get involved early in a positive way in the education of their children, they tend to stay involved. Studies show that children who have parents involved in their education are more likely to graduate. All of these benefits are a cost savings to our community & district, & a positive factor in lives of young families. | Piqua Parents as Teachers | 3 | 91 to 180 days | \$13,000 |
| Miami | Pioneer Copper Weld Replacement Program | Upgrade approximately 68 miles of aging, unreliable, copperweld wire, for increased reliability and reduction of line loss. Pioneer Electric Cooperative is a not for profit electric distribution cooperative formed in 1936 and is currently serving 16,000 rural members residing in Miami, Shelby, Champaign and 8 other rural counties in western Ohio. Pioneer has constructed and maintains over 2000 miles of distribution line. Pioneer operates and sets its electric rates to recover costs of service in keeping with its not for profit mission to provide high quality and responsive service at competitive rates consistent with sound business practices. This project will reduce operating costs and line loss resulting in less energy generation and lower costs for Pioneer members. | Pioneer Rural Electric Cooperative | 12 | 0 to 30 days | \$5,760,100 |
| Miami | Retirement of Legacy Costs | This request is for a "no interest" loan to fund defined benefit pension plan debt. Our pension plan has been frozen since the late 1990's. However, the stock market crash is taking its toll. We can no longer fund new equipment purchases, health insurance or 401 benefits without some relief. We recognized ten years ago that there was a risk, and now we are realizing a worst case scenario. We will ask our jobs without some assistance. To get caught up on back utilities. (due to be shut off) | Piqua Paper Box Company | 35 | 0 to 30 days | \$1,200,000 |
| Miami | Downtown Historic area Market | Roof repairs Aestric repairs Maintain employment To get caught up on back utilities. (due to be shut off) | Town & Country Mkt. | 5 | 0 to 30 days | \$25,000 |
| Miami | Downtown Historic area Market | Roof repairs Aestric repairs Maintain employment | Town & Country Mkt. | 5 | 0 to 30 days | \$50,000 |
| Miami | Employee Retention / Equipment Upgrades | TGM Designs is a local web design & developer company based in Tipp City, Ohio. We have a tremendous potential for growth but do not possess the resources to do so. We are looking for ways to retain current employees, add in bringing back lost employees and hire several new ones as well as bring several interns onboard from area colleges such as Edson State Community College and Sinclair Community College to further the education and work experience of students looking to gain real-world knowledge of their chosen profession. To remain competitive in this industry requires us to stay on the cutting edge of technology and to ensure our employees have the resources available to them to perform above the customer's expectations thereby adding a job retention and potential for new job creation. This will help our ability to create jobs and upgrade outdated equipment and software as well as maintain a stable work environment for many years to come. | TGM Designs | 3 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Miami | Weatherization and Energy Audits for Small Businesses | The Manufacturing and Technology SBDC would design and coordinate/implement an initiative under the direction of Ohio Business Connection to reduce energy costs at small business sites throughout Ohio. The initiative will include onsite and internet-based assessments, on-site technical assistance and documentation for various types of businesses. The initiative will broaden the geographic number of businesses served by the Industrial Efficiency Lead of the Ohio Energy Office. Historically, such weatherization and energy audit have reduced cost dramatically and the savings are ongoing. The effort will reach 850 businesses. | Manufacturing & Technology SBDC | 1200 | 181 days or more | \$450,000.00 |
| Miami | energy auditing and weatherization | Business goal is to offer complete home energy audits utilizing blower door and thermal imaging technology to detect problem areas. After we complete the reports and upgrades, a second visit will be done to verify work. This will allow these homes to be viable candidates for installation alternative energy products, on which we will provide information. Would like to partner with local community action and government agencies, financial institutions and utility providers to share resources with front costs of weatherization, (usually costs of weatherization could be billed on regular electric bill). Would work with landlords to set up a way for tenants to partially pay for upgrades. Over 60% of present homes will still be standing 20 years from now. Therefore it makes sense for these buildings to be made as efficient as possible. Funds would be utilized to purchase equipment, train employees, payroll, and consumer education. | property enhancement services | 5 | 0 to 30 days | \$450,000.00 |
| Miami | energy auditing and alternative energy resources | Our business goal is to offer energy saving goods and services to residential and commercial clients. Over 95% of present buildings will still be standing in 20 years, and most will still be home much longer than that. It makes sense for these buildings to be made as efficient as possible. Our company would first perform a complete building energy audit to pinpoint existing energy wasting deficiencies and remedy those problems, (insulation, air leaks, etc.) and then offer guidance in choosing the types of energy saving products or methods that will best suit the customer's needs. Alternative energy products offered would include solar PV, solar thermal, geothermal and wind, natural lighting, green roofs and water gardens. Target areas would include low-income areas, businesses, properties, etc. to help develop green neighborhoods. Business would work in partnership with local community action and government agencies, technical schools, financial institutions and utility providers. Present financial needs are for payroll, training, equipment and consumer education. | energy enhancement services | 10 | 0 to 30 days | \$450,000.00 |
| Miami | open a green energy retail store | Where can Ohioans go to purchase or get information on green energy solutions for everyday living? The main option is the internet. There is a need for a place where people can go to actually look at a solar panel, to see firsthand the variety of items available and to learn how to live green. My business goal is to open a retail/wholesale green products outlet. The store would sell, service and install a variety of green energy products for home heating and cooling, (solar, geothermal, renewables), electric generating, (solar wind), and fuel production (bio diesel, methanol, hydrogen). Companion items for the total green living concept would also be offered including digital thermostats, smart systems, natural lighting, renewable products, air water and grey water systems and green roof systems, etc. To further serve the public, seminars on green living would be offered. Scholarships would be available for high school grads going into green energy fields. A meeting room would be available for local groups. Funds would be used for corporate business startup, inventory, etc. Possible for Ohio would be reached through public education, workshops, and less energy waste. | property enhancement services | 30 | 0 to 30 days | \$3,500,000.00 |
| Miami | S & W Concrete - Help with | S & W Concrete has been in business since April 1998. Currently with the economy situation the way it is, we are struggling to survive. The construction industry in our area has fell off dramatically, and any work in our area, is bidding so cheap that we can not even do work unless we take a loss on it. We are asking for any kind of help to keep our business a float until the economy picks up again. We own and operate several companies, and other operations, and for both I'm willing to work with you on any kind of loan or line of credit. We would appreciate any help at this time. | S & W Concrete Ltd. | 25 | 0 to 30 days | 75000.00 |
| Monroe | Dist 10, PID 85773, MOE Purchase 1 LTV | Purchase 1 light transit vehicle for the Monroe County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Monroe | Wind Tower Manufacturing Equipment | The manufacturing of wind towers is an endeavor that not only would create well paid jobs, but would also be permitted to reduce our dependence on foreign oil. The market is strong and would offer many benefits to Ohio employees. We have an existing facility which is uniquely suited to the production of wind towers, and relationships with experts in the field. We need an initial investment in the equipment necessary for production. There is a critical shortage of domestic supply of wind tower components, which we can address with our Ohio facility. | Artco Group International | 40 | 31 to 90 days | \$15,000,000 |
| Monroe | Barge Transloading Center | There is a shortage of barge loading and unloading capacity in Monroe County and much of the business goes to West Virginia. We receive the waterfront space available to add a barge unloading facility. Adding this capacity to our existing infrastructure is a fully functional transfer station, providing more efficient options for local Ohio businesses for domestic and international transportation of goods. This project would add at least 10 full time jobs once operational, but would require the equivalent of 25 full time positions during the period of construction, which would begin in 30 days or less. | Artco Group International | 25 | 0 to 30 days | \$8,000,000 |
| Monroe | Infrastructure Improvements | Improvements to this space should allow us to bring in several additional tenants for short and long term projects. In the short run, 10-15 jobs would be created as the improvements are made. Once the improvements are made, we can estimate that a minimum of 15-30 jobs would be created by tenants in the first year. | Artco Group International | 10 | 0 to 30 days | \$600,000 |
| Monroe | Employee Training | In order to further diversify and expand, we would train current employees on metallurgy, lab testing procedures, and heat treating. The employees would move into higher paid positions and new employees would be needed as their replacements. | Artco Group International | 4 | 0 to 30 days | \$20,000 |
| Monroe | Roof Replacement | We operate a 1.2 million square foot facility, which formerly employed 600 people. We employ 50 people currently, and are expanding. The roof was not maintained by the previous owner, and is seriously deficient in large areas. We have received quotes to repair the roof, and have several local companies that would like to begin work immediately. | Artco Group International | 10 | 0 to 30 days | \$6,000,000 |
| Monroe | Heat Treat Furnace | In the short run, a minimum of 10 workers would be required to repair the roof. Repairs would then allow us to use additional sections of the building for expansion, or leasing to potential tenants who want to expand their manufacturing operations. We would like to install an additional Heat Treat Furnace. There is a nationwide shortage in metal heat treat capacity. An additional furnace would allow us to handle in-house in Ohio much of the work that we currently outsource to Illinois, Pennsylvania and Michigan, and to expand processing operations. | Artco Group International | 3 | 0 to 30 days | \$800,000 |
| Monroe | Dist 10, PID 85772, MOE 3 converted vans | Construction could begin immediately, with completion in 30-60 days. From that point on, we would need a minimum of 3 full-time workers to operate the machines 3 shifts per day | Ohio Department of Transportation | 1 | 31 to 90 days | \$126,000 |
| Monroe | Security System | Purchase 3 converted vans for the Monroe County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$126,000 |
| Monroe | Security System | Our facility in Hannibal, OH has 92 points of entry, and no security system. We have had numerous cases of trespassers being found on our property. In most cases this involved suspected attempts at stealing metal, such as copper wiring or piping. However we produce components used for military and nuclear power applications at this facility, and want to take steps to prevent security issues related to the manufacturing process. We are requesting funds to install a comprehensive security system including locks, cameras and motion detectors. Jobs would be created immediately during the installation of this system. The security system will also prevent problems related to theft of metal. A single theft of wiring could idle our plant, putting 40 people out of work during repairs. | Artco Group International | 2 | 0 to 30 days | \$90,000 |
| Monroe | REFURBISH ROLLING MILL/ROLLER LEVELER | We are requesting funds to install a comprehensive security system including locks, cameras and motion detectors. Jobs would be created immediately during the installation of this system. The security system will also prevent problems related to theft of metal. A single theft of wiring could idle our plant, putting 40 people out of work during repairs. We also have expansion of existing Service Center business which will not only add progressively 80 full time jobs, but would also create jobs in the area to support the ongoing mill operation. Machine shops, engineering firms and local business would benefit. We are seeking a total of 60,000 to 100,000 tons of plates per year, with a corresponding increase in the processing of these plates in our existing production center. | Artco Group International | 80 | 0 to 30 days | \$25,000,000 |
| Monroe | Dist 10, PID 77971, MOE SR 7 2.210 | Two-Lane Resurfacing Project Using A Chipseal Binder/Sealer And An Asphalt Overlay. Max 7 2.21-2.22 73, Max 7 37.31-38.12, 48.53-51.43 And Max 26 20.89-21.99. | Ohio Department of Transportation | 50.2 | 31 to 90 days | \$1,748,000 |
| Monroe | Dist 10, PID 84511, MOE SR 379 0.000 | Two-Lane resurfacing project using an asphalt overlay treatment. MOE 379 0.00-0.18. | Ohio Department of Transportation | 33.5 | 31 to 90 days | \$1,167,000 |
| Monroe | Monroe CB Paving Project | Monroe County board of MRDD serves approximately 130 individuals with disabilities and their families with a limited budget. This agency employs and contracts with over 50 individuals. The building is available to a community of 15,000.00 people for use of the gymnasium and ball fields. Current parking lots and sidewalks were built in 1987 and are in need of repair. The parking lot needs to be re-paved measuring 14,823 sq. ft. The agency is in need of new sidewalks measuring 975 sq. ft. A new paved lot is needed for additional parking of buses measuring 25,082 sq. ft. A General Contractor has prepared an estimate for the project and we are shovel ready. | Monroe County Board of MRDD | 15 | 91 to 180 days | \$254,000 |
| Monroe | Lee Township Paving | Paving portions of TR 486, TR 485 and TR 2783. Tack coat and then place 1.5" of 48-2 asphalt intermediate and 1" of 48-1 asphalt surface. TR 486 - 1.144 tons of asphalt material TR 485 - 958 tons of asphalt material TR 2783 - 147 tons of asphalt material | Lee Township | 10 | 31 to 90 days | \$255,475 |
| Monroe | Hannibal Pool | Current service capacity is normal traffic of the township, including school buses and emergency vehicles. After project is complete, service capacity will remain the same. Renovate the entire facility that was constructed in 1976. The mechanical, electrical systems of the pool equipment along with the architectural elements are in poor condition. Replace all the plumbing, concrete deck, sand filter, renovate or replace bathroom to make it handicap accessible, as well as the pool access. Would be glad to forward a copy of the 2004 Burgess & Niple Evaluation for your review. We are currently waiting for a new evaluation from another consultant firm. | Monroe County Park District | 35 | 31 to 90 days | \$510,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Monroe | Veteran's Memorial Park | The project would include replacing the playground and safety surface underneath to meet the safety standards for fall height. In addition, we would like to install 800 sq. ft. of covered bleachers in the park. The village of Beallsville would benefit as well as surrounding communities. The general public is free to use this facility at their convenience. | Monroe County Park District | 20 | 31 to 90 days | \$80,000 |
| Monroe | 2008 Township Road & Slip Repairs | TR 1327 s&e #1 - 36x6' TR 1327 s&e #2 - 48x6' TR 420 s&e #3 #4 - 152x4' TR 561 - 36x11' TR 485 s&e #1 - 110' TR 476 s&e #1 - 12x7x6' TR 476 s&e #2 - 8x16x6' TR 476 s&e #3 - 50x20x6' TR 488 - 15' TR 485 s&e #2 - 150' | Lee Township | 10 | 31 to 90 days | \$178,248 |
| Monroe | Access road, parking lot & retaining wall at Marin | The resurfacing of the access road, lower parking lot and the retaining wall at the Marina. The Satis area and the surrounding communities will benefit from this project. If access across the Ohio River the local business will prosper from increased use and access of the river. The lower parking lot is approximately 2 1/2 acres. The retaining wall is 3/4 of an acre. The access road is approximately 1/4 of a mile long. | Monroe County Park District | 20 | 31 to 90 days | \$350,000 |
| Monroe | Rebuilding store | Rebuilding of retail store recently destroyed by fire. Funds will be used for fixtures, supplies, inventory and expansion. Store is currently open but struggling to stay afloat. Insurance has not covered any losses. Approx. 2-3 jobs will be created/destroyed. | Sweet n' Salty Snacks | 2 | 0 to 30 days | \$10,000 |
| Monroe | Monroe Water System Upgrade of Water Treatment Pla | The present water treatment plant is located 3 miles South of Sardin, Ohio approximately 500 feet west of the Ohio River. This project will install pressure filters, upgrade the existing clarifier, and modify the present building which will reduce the Manganese and iron content and increase the capacity of the present plant. This project is needed to insure that the quality of water produced by the plant meets the requirements of Ormet Corporation, a large aluminum producer, which is a major user of water utilizing an average of 750,000 gallons per day. Ormet Corporation is the largest employer in Monroe County employing approximately 1000 jobs. The project will also provide service to other existing and potential industries along the Ohio River. In addition this project will also provide Monroe Water Systems the ability to expand their residential service to the many areas of the region currently not being served by any public water system due to a lack of infrastructure. | Street Engineering & Surveying | 1030 | 31 to 90 days | \$3,586,924 |
| Monroe | Ohio & Lee Water & Sewer Auth- Wastewater Collect | 1. Collection system and treatment for the community of Sardin, OH 2. Collection system and treatment for the community of Hannibal, OH 3. Collection system for the community of Duffy, OH. Wastewater from the Duffy area would be pumped to the Hannibal treatment facility. Gravity flow collection will serve the majority of the customers with occasional lift stations to deliver the waste water to the treatment stations. The best green strategies achieve multiple objectives with a single solution. Early planning results in more opportunities to reduce the environmental impacts in a project's design and performance. Label factors are some of the energy conservation measures that are used to meet the requirements of building "Green" and the LEEDS program. Aerial photography of the area has already been obtained. Preliminary design and Facility Plans have been completed and approved by the OhioEPA SEDD. | Swiss Valley Associates, Inc. | 30 | 91 to 180 days | \$17,740,000 |
| Monroe | Mote Park Community Center Rehabilitation | Completion of this project will eliminate a documented source of pollution to the Ohio River and improve the appearance of the area. Mote Park Community Center was built in the 1950's with the primary purpose of housing the local fishing group, the Piqua Flyers. With the group no longer utilizing the facility, it has become a space for recreational programs as well as rental space available to the community. This project will replace an outdated building system, add an outdoor seating system, add an outdoor seating system, add an outdoor seating system, and alter the room layout of the facility to better facilitate multiple uses. Programs offered in this facility cover all age groups and range from recreational to educational. | City of Piqua | 5 | 181 days or more | \$75,000 |
| Monroe | Monroe Water Systems Upgrade of Water Treatment PI | Reduce Manganese concentration and increase capacity by installing pressure filters, upgrading clarifier and modifying present building. Provide higher quality of water. Provide additional capacity to permit extending service throughout the region while continuing to meet Ormet Corporation's needs. | Monroe Water System- Street Engineering & Surveying | 1000 | 31 to 90 days | \$3,586,924 |
| Monroe | Rehab tailway and apron | Rehab tailway and apron | Monroe County Airport Authority | 2 | 91 to 180 days | \$156,529 |
| Monroe | BWWTP Ultraviolet Disinfection | Change out chemical chlorine disinfection for ultraviolet light disinfection to lower the annual disinfection cost for our wastewater treatment plant process. | Roxby Engineering | 7 | 31 to 90 days | \$41,000 |
| Monroe | Village of Beallsville Sewer Relining | Reline approx. 8000 ft of 8-inch average collection pipe that is 46 years old and allowing high levels of infiltration and effluent of rainfall runoff. | Roxby Engineering Consulting | 15 | 91 to 180 days | \$475,000 |
| Monroe | Sunbury Township Paving | Re-paving of Anderson Road and Harbor Addition off SR 145 consisting of 1158 tons of 301 asphalt base and 1158 tons of 404 asphalt wearing surface to pave 4,000 feet of roadway with an average width of 14 feet. | Roxby Engineering Consulting | 12 | 31 to 90 days | \$172,000 |
| Monroe | Village of Beallsville Sidewalk Program | Replace broken and missing sidewalk within the Village of Beallsville. Sidewalk replaced would be 5,300 feet x 5 ft wide. | Roxby Engineering Consulting | 10 | 31 to 90 days | \$150,000 |
| Monroe | Village of Beallsville Street Resurfacing | Re-pave/resurface Main Street, Washington Street, Monroe Avenue, Spica, Aox, and Second Streets within the corporate limits of the Village of Beallsville. This resurfacing would replace 15-year-old wearing surfaces covering approx. 4400 ft of 20' wide. | Roxby Engineering Consulting | 15 | 31 to 90 days | \$225,000 |
| Monroe | New Hire | This agency currently operates with minimal manpower, often leaving one patrol officer per shift for a population of approx 15,000 residents. We currently operate 24 hours a day with four patrol shifts per week. This obviously lacks full potential to carry out the duties of this office. With additional funding for hiring new patrol officers, we would be able to provide faster and more efficient protective services as well as provide a backup unit available for patrol officer's safety. | Monroe County Sheriff's Office | 4 | 0 to 30 days | \$224,000 |
| Monroe | Mobile Reporting and Dispatch Program | Monroe County Sheriff's Office is currently implementing a 911 system. We have also incorporated a new central dispatch and reporting program. We are currently seeking funds to equip our patrol units with the capability to be 100% mobile. We are in the process of utilizing an electronic fleet that enabled us to purchase laptop computers for our patrol units. Additional funding would permit us to maximize patrol time and further provide services to our residents. Equipment would allow officers to submit offense reports, check for outstanding warrants, communicate to other patrol units as well as dispatch and be dispatched electronically. Real information to officers and public safety would be readily available. This funding would allow us to equip 5 patrol units with this capability. | Monroe County Sheriff's Office | 1 | 91 to 180 days | \$80,000 |
| Monroe | Log Home Manufacturer | We are in the process of purchasing a log home manufacturer company that I have been a distributor for since 1988. The company is filing bankruptcy. We are not sure if this manufacturer still exists. There are 4 investors who have used their money to keep the plant open. Many jobs were lost due to this. We have brought back as many workers that we can afford. The plant needs new equipment, the main office needs repairs, all of the equipment needs updated, we also need money to keep the plant open until it gets back on its feet. | Jim Barna Log and Timber Homes | 200 | 91 to 180 days | \$3,000,000 |
| Monroe | Keep doors open | I have had to just try to stay in business on hold due to purchasing the log home manufacturer I have dealt with since 1988. I have had to put up for whatever everything I have worked for, in order to get a \$500,000 loan, for the past 25 years to help bailout the manufacturer. Now my company is failing due to me not being there. I usually have a full crew construction crew working with each having a five man crew. That is 50 people that I have not been able to give them work. | Cox Log Homes | 50 | 181 days or more | \$500,000 |
| Monroe | Shot Blasting Equipment | Installation of Shot Blasting Equipment would allow us to service a wider range of industries including ship building. Once installed, the equipment would be operated 3 shifts per day, for at least 5 days per week. The installation would require several electricians, machine operators and construction workers for the duration of the installation, which could being in as little as 2 weeks. | Artco Group International | 5 | 0 to 30 days | \$850,000 |
| Monroe | Plasma Burning Equipment | We currently only provide Flame Cutting services at our Hannibal, OH facility. Adding Plasma cutting capacity would allow expansion of our existing business, and allow us to carry a wider range of products. The machine would operate 3 shifts per day, throughout the week, resulting in at least 5 fulltime staff members being hired. | Artco Group International | 5 | 0 to 30 days | \$400,000 |
| Monroe | Grizzle and Moore Ridges and Switzerland Lake Area | Construction can begin in as little as 3-4 weeks, with completion in 8-8 weeks. | Switzerland of Ohio Water District | 7 | 91 to 180 days | \$900,000 |
| Monroe | Monroe County Board of MRDD Adult Services Renovat | Install 36,500 ft of 4" PVC new waterline, 5,200 ft of 2" PVC new waterline, twelve 4" gate valves, five 2" curb valves, service lines, curb stops, 43 outside meter setting with meters, ditchline improvements, asphalt, concrete, and aggregate replacement and eight 2" manholes. This would provide quality water to service 43 residences in rural Monroe County that currently have no public water and use inadequate wells or cisterns. | Monroe County Board of MRDD | 0 | 31 to 90 days | \$240,000 |
| Monroe | Switzerland of Ohio Local Schools New Schools Proj | This project will increase capacity and handicapped accessibility needs for adults with disabilities served/employed by the county handicapped workshop. Existing restrooms will be renovated by adding additional showers that provide greater handicapped accessibility, and a handicapped accessible classroom will be constructed to meet the needs of vocational training and habilitation. Outputs: *100 citizens with disabilities will receive improved vocational/rehabilitation services *25 new clients will be enrolled in the programs This project will build 4 new elementary/middle schools, one new high school, one new elementary/middle/high school, renovate River Local High School in a "green" manner | Switzerland of Ohio Local School System | 344 | 31 to 90 days | \$35,000,000 |
| Monroe | Monroe County Bridge Replacement CR 16 | Replacement of one bridge in Monroe County. Outputs: 1 Bridge Replaced 7 Construction Jobs Created | Monroe County Engineering Dept. | 0 | 91 to 180 days | \$208,961 |
| Monroe | Culvert Replacements | Replace 1360 linear feet of culvert pipe along Wayne Township roads. | Wayne Township Monroe County | 1 | 0 to 30 days | \$15,000 |
| Monroe | Wayne Community Center Renovations | Renovate the Wayne Community Center in Wayne Township, Monroe County. Replace roof, windows, electric, heating system to make energy efficient. | Wayne Township Monroe County | 0 | 31 to 90 days | \$200,000 |
| Monroe | 4-H and Agriculture Center | Construct a new, energy efficient 4-H and Agriculture Center in Monroe County utilizing "green" technology. The center would house the office of OSU Extension, Monroe County youth club & 4-H water conservation service and would be utilized for educational purposes to 4-H youth and agriculture producers in the county. | OSU Extension, Monroe County | 0 | 91 to 180 days | \$1,500,000 |
| Monroe | Sardin Volunteer Fire Department and Community Cen | The engineering and construction of a 2380 SF building that will house the dept.'s fire fighting apparatus and equipment. It would include an attached 4000 SF area that would be used as a community building. This community building would be equipped to serve as a disaster relief & emergency shelter. It would also include a training/gymnasium room, full service kitchen and bathroom facilities. The new building would replace a 5 year old energy inefficient building. The Sardin VFD provides the protection for over 61 to miles of Lee, Ohio, Jackson and Green townships in Monroe County. | Sardin Volunteer Fire Dept. | 20 | 91 to 180 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Monroe | New Shelter | Plans for new shelter and installation of all utilities. Building up to code current one is inefficient in all areas. Due to increase of animals on the rise we house two counties of dogs, Monroe and Noble County. | Monroe County Dog Pound | 3 | 181 days or more | \$100,000 |
| Monroe | BOSTON HILL ROAD PROJECT | REPAIRS AND RESURFACING OF TOWNSHIP ROAD#28 BOSTON HILL RD. APPLYING BASE AND WEAR COAT TO APPROXIMATELY 1/2 MILE OF ROAD. | OHIO TOWNSHIP | 5 | 0 to 30 days | \$61,000 |
| Monroe | Dispatch | Monroe County Sheriff is currently seeking funds to employ 3 civilian dispatchers to staff the current 911 office that is in the final stages of completion. This office currently staffs that office with certified peace officers leaving one officer short per shift to cover dispatching services. With the requested funds, these officers would be utilized for patrol duties where they would prove more beneficial to crime prevention. Hiring civilian dispatchers would lighten the financial situation compared to hiring certified officers to staff these positions. | Monroe County Sheriff's Office | 3 | 0 to 30 days | \$350,000.00 |
| Monroe | Jail Code Compliance | Building and fire code violations prohibit the Monroe County Sheriff's Office from housing prisoners in the upper dorm area of the jail. The jail was constructed in the mid 1800's and was used as a full service facility until January 1998. Since then the county has been forced to house prisoners in a county jail at a cost of nearly 2 million dollars since 1998. Jobs have been eliminated due to the closure. Funding would allow for renovations to bring the facility into compliance, retaining jobs for corrections officers and possibly creating new jobs as result of additional prisoners being housed. | Monroe County Sheriff's Office | 5 | 31 to 90 days | 250,000 |
| Montgomery | Project recovery | To provide 72 beds with benefits, and to increase sales 50% to include a option for cancer patients to receive a medical hair prosthesis (Wig) free when NO MEDICAL INSURANCE. | Lady C Salon & Spa Inc. | 9 | 91 to 180 days | \$100,000 |
| Montgomery | North Dixie SA | Rebuild county rd North Dixie Dr. from Barley rd in Harrison Township to Benchmark rd in city of Vandalia. from a lane to 5 lane and add sidewalks, curb and gutter and street lights. | Harrison Township | 25 | 181 days or more | \$500,000 |
| Montgomery | Great Miami River Recreation Trail - Miamisburg Co | Rebuild 4.527 of existing trail from the river bottom to the levee top, remove the old trail in the river bottom and restore the land. This section of trail floods frequently causing trail closure and high maintenance costs. | Miami Conservancy District, River Corridor Improve | 20 | 91 to 180 days | \$150,000 |
| Montgomery | Resurfacing Roadways | Resurface 15.62 miles of Township roads, 1 1/2 inch mill and fill. | Harrison Township | 25 | 31 to 90 days | \$1,228,976 |
| Montgomery | Great Miami River Recreation Trail Reconstruction | Reopen 8 miles of recreation trail. | Miami Conservancy District, River Corridor Improve | 10 | 31 to 90 days | \$210,000 |
| Montgomery | Germantown Dam Concrete Rehabilitation | Rehabilitation of deteriorated concrete in the walls, spillway, and conduits of Class I flood protection dam | Miami Conservancy District | 10 | 181 days or more | \$195,000 |
| Montgomery | Great Miami River Recreation Trail Construction | Extend the Great Miami River Recreation Trail 4.500 from Stewart Street south to the University of Dayton Arena and Courtyard by Mariott Hotel. The trail will be entirely separated from Edwin Moses Boulevard. The trail will be 10' wide asphalt and follow the levee top. | Miami Conservancy District, River Corridor Improve | 20 | 31 to 90 days | \$285,000 |
| Montgomery | Faremersville - Northeast Sewer Lining Phase 2 | Installation of 1200 Linear Feet of Cured in Place Pipe (CIPP) lining the sanitary sewer, 1200 linear feet of CIPP lining the storm sewer, repairing or replacing 15 structures. The expected outcome is to reduce inflow and infiltration into the sanitary sewer system to alleviate overflow throughout at the sewage treatment plant. | Kramer & Associates, LLC | 15 | 0 to 30 days | \$100,000 |
| Montgomery | Ome gardens/Embury Plat Storm Sewer and Street Imp | This shovel ready project will rebuild existing streets with new curbs and gutters to facilitate the collection of storm water. 5600 linear feet on new asphalt pavement, 5200 feet of various sized conduits. This project will remove many dry ditches that continue to have a negative impact on the Dayton Ohio buried aquifer that delivers fresh drinking water to over 400,000 residents, regularly. | Harrison Township | 25 | 91 to 180 days | \$1,243,718 |
| Montgomery | Public Cameras on Corners | IT Infrastructure and deployment of commodity based computing devices. The devices would be put in the public domain - at the location of the residence of home owners in and around the Dayton, OH area. The computing devices would operate video surveillance in the public domain. Unlike the cameras owned and operated by municipalities, these would be operated and maintained by the public. Each house or business that operated one would have the right to submit video for review to public officials based on their civic right to do so. In the case of an Amber Alert, or Homeland security incident - operators would receive requests for submission of their data collected. The operators would have the public right to submit the information, and would hold it as they choose. The idea here is to empower the people to use the technology as the collective public chooses to do so. But not empower a small group such as law enforcement to use the video in a selective way. By using a network of the public, no individual or group would have control and the ability to hide or misuse public information. Imagine a world being monitored by each other, instead of big-brother. T | Data Warehouse Consulting LLC | 100 | 91 to 180 days | \$9,000,000 |
| Montgomery | Construction of new Fire Station | Construction of a new 14,000 square foot fire station for the City of Vandalia. This new station will replace the existing Fire Station 1 that is currently in service. The new fire station will be jointly staffed by the City of Vandalia and adjacent Butler Township firefighters. Design of the new fire station is nearly complete with site preparation to begin within 90 days and full construction of the fire station to begin in May or June of 2009 | City of Vandalia | 2 | 31 to 90 days | \$3,500,000 |
| Montgomery | School Flasher Installations | Install school zone flashers for school zones without any flashers for additional safety | Montgomery County Engineers | 1 | 31 to 90 days | \$100,000 |
| Montgomery | Guard Rail Construction | Install guardrail at new locations identified as needing guard rail. Install guardrail at locations requiring the replacement of damaged guardrail | Montgomery County Engineers | 3 | 31 to 90 days | \$100,000 |
| Montgomery | Traffic Signal LED Upgrade | Replace incandescent traffic signal bulbs with energy saving LED Bulbs | Montgomery County Engineer | 1 | 31 to 90 days | \$130,000 |
| Montgomery | Traffic Sign Upgrade-Clay Township | Upgrade existing traffic signs to meet new federal reliability requirements. | Montgomery County Engineers | 1 | 31 to 90 days | \$125,000 |
| Montgomery | Watermain extension- Lightner Rd | Extend existing watermain approximately 2880 feet east along Lightner Rd from N Dixie Dr. The project cost will be split with Tipp City. The project will be initially funded by NHA and reimbursed by Vandalia and Tipp City. | City of vandalia | 0 | 91 to 180 days | \$165,000 |
| Montgomery | North Sanitary Extension-- Deer Run to Lightner | Extend sanitary sewer approximately 10675 feet from Deer Run Rd to a point along Lightner Rd about 2675 feet west of N Dixie Dr. The project will relieve existing septic systems now in use. | City of vandalia | 0 | 181 days or more | \$2,100,000 |
| Montgomery | Rehab Sanitary Sewer using slip line tecnology | Approximately 5000 ft of existing 60 year old sanitary sewer will be slip lined to abate infiltration problems which presently contribute to sanitary sewer overflows experienced with large rainfall events. | City of vandalia | 0 | 181 days or more | \$225,000 |
| Montgomery | S Dixie Dr widening phase 2 | The City of Vandalia will participate with ODOT in a traditional project which includes widening the roadway to a 5 lane section. The plans are complete, environmental is cleared, and right-of-way has been purchased in accord with Federal standards. The sale date for the project is May 20, 2009. The length of the project is about 2200 feet. | City of vandalia | 0 | 91 to 180 days | \$700,000 |
| Montgomery | Peters Pk widening project | Peters Pk will be widened to achieve a 3 lane section from Stonequarry Rd to a point approximately 350 feet south of Worlwide Place. The project length is approximately 4800 feet. | City of vandalia | 0 | 181 days or more | \$900,000 |
| Montgomery | National Road Redevelopment Project | The City of Vandalia would like to purchase the former Crossroads Motel site as well as some additional property nearby to facilitate the redevelopment of a part of the downtown area. The overall project is 6-10 acres in size and would redevelop an old motel and retail center into a new mixed-use office and retail development that will improve the overall appearance of our downtown area. The property is located on National Road (SR 40) at the northeast corner of the intersection of I-75. We need more police, or some kind of system, or program to eliminate the crime and shootings, and killings in Dayton. What good will it do to have all these proposed projects if no-one wants to live or visit, or work in the City of Dayton? I want the news every night to hear about killings, drug deals gone bad, crime, and innocent people getting killed in Dayton Ohio. This has got to stop. We need to clean up the City of Dayton now before it's too late. I'm not sure on how to go about this, but I know someone out there can maybe take the lead and run with it. If not sure either about the cost, but that too can be worked out. Dayton Ohio is a great city, lets take it back! Thank you for your time in advance. Serrano Sewer | City of Vandalia | 15 | 0 to 30 days | \$3,500,000 |
| Montgomery | Safety & Security In Dayton | The FBI's National Information Automation Project (NIAP) will combine automation tools along with data encryption to allow for quicker access to a patient's medical records which will also help minimize the error rate which often occurs when capturing patient information. Benefits to using this system are efficiency, faster processing of paperwork, prescriptions can be filled quicker and with less error as electronically transmitting to pharmacy, online access to patient information by each patient, using encryption tools. This technology should become a standard in all states, once fully implemented in the target area. | For the People | 200 | 91 to 180 days | \$150,000 |
| Montgomery | Patient Information Automation Project (PIAP) | Requirements: 100 Laptops - for staff Microsoft Office (100 User Licenses) Scanner Software (100 User Licenses) 100 Portable Scanners Virus Software (100 User License) 50 Encryption Readers (for each medical office) 150 Encryption Software Licenses 5 Laser Printers 1 Fax/Scanner Security Clearance updates for all employees | J Styles Consulting Group, LLC. | 100 | 31 to 90 days | \$6,000,000 |
| Montgomery | Exit 47 | 150 Encryption Certificates for each medical office & staff The project is being spearheaded by the City of West Moraine, and the City of Moraine who I represent is partnering on the project. The project is to complete Exit 47 on Interstate 75 and make it a full access interchange. To date, WC has secured roughly \$14 million toward the project. Engineering has been initiated. | City of Moraine | 3,000 | 31 to 90 days | \$14,000,000 |
| Montgomery | GM Moraine Assembly Plant Redevelopment | The GM Moraine Assembly Plant closed at the end of December 2008, leaving thousands unemployed. The requested funds would go toward a complete redevelopment and site selection effort, that includes possible purchase, demolition, and redevelopment construction. Other alternatives to consider include the re-utilization of the facility in subdivisions with some demolition to allow for possible reuse of the site. This project would not stand on its own and rely on the recommendations from the partially Federally funded Comprehensive Economic Development Strategy (CEDSS) process which will begin in March 2009 - Led by the Regional GM Taskforce currently Chaired by the LL Gov. The facility is approximately 4 million square feet and encompasses 300+ acres | City of Moraine | 1500 | 91 to 180 days | \$50,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Integratred Material Supplier | The purpose is to identify commodities from which schools construction can generate cost and productivity savings and provide on the job training and skill sets that student workers can take with them after graduation. Goal: This program is implemented to reduce the Total Cost of Acquisition that is beneficial to Public Schools, The Student Body, the parents, and community that we serve through cost saving and job creation. **7% to 25% Cost Reduction in material cost opportunities in the PPV and HVAC commodities * Significant opportunities to expand other indirect commodities purchased by public school system such as janitorial supplies, lighting, electrical, plumbing, etc. * Provide customer with a total solution for Supplier Diversity * Share risks and rewards * Just in Time site delivery * Share risks and rewards * Point of Use Sites throughout system * Inventory Ownership- additional savings * Maximize and/or manage warehouse operations * Single point of acquisition for parts * Onsite Savings * Electronic Inventory Management * Provider Managed Inventory | R.PHILLIPS Industries, LLC | 25 | 31 to 90 days | \$100,000 |
| Montgomery | Center for Aircraft Development (UAV) as a Sensor | To establish a UAV industry in Dayton for military and industrial applications, ranging from predator-class to nano platforms. The primary future goal (within 5 years) is to grow a prime UAV contractor in the Dayton Region, to identify and build industrial supply-chain partners, a true aerospace manufacturing cluster near AFRL. Key material requirements for such a cluster include advanced composites, carbon nanotubes, graphite fiber, low cost titanium, advanced sensors, photovoltaic, stealth materials, noise abatement technologies and advanced energy storage devices. Leverage considerable resources already present in NCC, DCAST, USRI, FortFiber, Starburst and AFRL for a powerful economic engine for the region. Relocate NCC headquarters to the new growing Tech Town complex near DCAST and add full aerospace design capabilities: CAD/CAM and rapid prototyping, rapid manufacturing software. NCC becomes the "Developer of and contractor to the 3rd S 3rd for suppliers of advanced materials components for AFRL". The goal would be to create a contracting capability to NCC for IDIQ contracts where the fighter problems in advanced materials could be rapidly developed and tested. To provide educational opportunities for special educational services for two weeks during the summer. Opportunities include: instruction in reading, writing, and mathematics; physical education; and art. | National Composite Center | 2500 | 0 to 30 days | \$28,240,000 |
| Montgomery | Extended Educational Opportunities for Special Nee | Students will receive breakfast and lunch and will be provided transportation. | About Academic Achievement | 50 | 31 to 90 days | \$1,250,000 |
| Montgomery | Wildland Fire-Fighting Situational Awareness and D | Due to lack of tools, between the present approach to combating wildland fires and our desired goal of being more effective. The development and deployment of the proposed strategies will lead to an augmented situational awareness, improved utilization of resources, a more efficient and less damage to our environment. With the overall objective of developing tools to facilitate situational awareness and decision making, this project will develop products and services aimed at achieving the following specific aims: (i) Generation of accurate situational awareness, (ii) Development of decision-making tools for complex, uncertain environment, and (iii) Education and training of fire-fighters. Team includes Edaptive Computing, Inc., University of Cincinnati and National Interagency Fire Center, Glendale Fire Department. Initial market estimate to sell our software, services and training worldwide is \$100 million. | Edaptive Computing, Inc. | 75 | 31 to 90 days | \$4,000,000 |
| Montgomery | Western Ohio Region Green Data Centers and Broadba | Build a network of regional data centers in each Western Ohio county starting with Montgomery, Greene, Clark, and Butler to connect to the Broadband Ohio Network (NetXtreme). Data centers would be LEEDS certified and employ alternative energy sources. Markets include healthcare (storage and access of electronic medical records), department of defense (flight controller or force bases), state and local agencies, higher education and K-12, and attracting global content providers (Google, Yahoo, Amazon, eBay). Interconnected with regional fiber assets. Employ skilled managers and 24/7 engineers. Would grow state-wide. Data centers would use solar and wind power and cooperate with higher ed in research of alternative energy and advanced materials. Each data center would centralize broadband for counties and regions to enable high speed applications like video and disaster recovery. Interconnection of facilities would reduce communications costs and increase survivability of public safety in times of disaster. Infrastructure development from information technology. Would employ students and serve to retrain displaced workers through workforce development. | Donet Communications | 90 | 0 to 30 days | \$25,000,000 |
| Montgomery | Mobil Water Treatment systems | Provide FEMA, and other state governments with a method to provide clean water to locals that were hit by natural disasters. This would allow fast access to drinking water or mobil units to connect to disaster sites like the Super dome in time of need with waste water treatment systems. | Crown Solutions | 25 | 91 to 180 days | \$8,000,000 |
| Montgomery | Dist 7, PID 83716, MOT Guide Sign Replacement, Ph | JUSTIFICATION FOR REQUEST: United States must reduce dependence on foreign oil for its primary source of energy. The President has made it a high priority to develop and deploy advanced technologies for nurturing sources of alternative energy. Most States support this including Ohio. The Governor has targeted that 25% of the electricity be produced by alternative sources, including 12.5% by solar and wind by 2022. Photovoltaic or solar cells offer an enormous potential for generation of clean energy on-site where the power is needed. The cost of PVs is still too high and is limited by the cost of raw material, the metallurgical grade silicon, which is currently very expensive to manufacture in high purity. The PureSi technology offers the potential to reduce manufacturing cost of producing PVs dramatically. The documented success of the modern seeding and metal purification technologies substantiates the merits of a manufacturing resource like PureSi and the Governor has made it an urgent priority to deploy such advanced technological assets. BENEFITS: A 10X improvement in cost of high purity PV grade Si, creating 47 jobs immediately and 400 more in the next 18 months. Replace existing noise wall panels on existing noise wall, investigate salvaging existing steel posts, replace steel posts where warranted (Design/Build Project) | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Montgomery | PureSi | Rehabilitation of a one million gallon water storage tank including wet interior, dry interior & exterior - blasting, cleaning and coating and various structural repairs. This tank was built in 1972 and serves approximately 14 of the Miamisburg population of 20,000. | buyCASTINGS.com, Inc. | 457 | 0 to 30 days | \$5,500,000 |
| Montgomery | Dist 8, PID 85364, MOT GRE IR 675 2.00 2.70 | Replace existing noise wall panels on existing noise wall, investigate salvaging existing steel posts, replace steel posts where warranted (Design/Build Project) | Ohio Department of Transportation | 174.3 | 31 to 90 days | \$6,072,000 |
| Montgomery | Central Avenue Water Tank Rehabilitation | Rehabilitation of a one million gallon water storage tank including wet interior, dry interior & exterior - blasting, cleaning and coating and various structural repairs. This tank was built in 1972 and serves approximately 14 of the Miamisburg population of 20,000. | City of Miamisburg | 15 | 31 to 90 days | \$750,000 |
| Montgomery | Dist 7, PID 84391, MOT SR 741 7.00 | Install Traffic Signal Head Backups And Battery Backups At Intersection To Improve Visibility Of The Signal Heads And Minimize Visibility/Safety Concerns During Power Outage. | Ohio Department of Transportation | 12 | 31 to 90 days | \$28,500 |
| Montgomery | Dist 7, PID 84429, MOT SR 235 0.22 L | Bridge Rehabilitation Of Structure Mox-235-0222 L Along With Minimal Approach Work. | Ohio Department of Transportation | 25 | 31 to 90 days | \$100,000 |
| Montgomery | Dist 8, PID 85364, MOT GRE IR 675 2.00 2.70 | Replace existing noise wall panels on existing noise wall, investigate salvaging existing steel posts, replace steel posts where warranted (Design/Build Project) | Ohio Department of Transportation | 174.3 | 31 to 90 days | \$6,072,000 |
| Montgomery | Overwhelming Change In Our Children | Paramount Development has an after school tutoring program which services approximately 100 students throughout Montgomery County. We are in the process of expanding this site to become a preschool specializing in technology programs. We are also expanding this site to include students from levels pre-K to eighth grade. We will be offering the latest technology, a reading center, a math corner lab and a science intervention center, all of which are geared towards building self-assurance and self-confidence. The MCCC and its member cities have been moving through the stages of a regional gigabit broadband project for some time. The economic development project will require approximately \$5 million to bring to full completion. * Approximately \$2 million of this for completion of the fiber backbone which involves: o full interconnection of existing government-owned fiber optic cables, o extension of those fiber cables to the boundaries of our agricultural areas, and o the purchase and installation of telecommunications switching and routing equipment. * Approximately \$1.5 million will be for wireless overlays and extensions of the fiber backbone. * Approximately \$1.5 million will be for interconnection of the backbone to critical customers and enterprise zones. | Paramount Development Association | 50 | 31 to 90 days | \$150,000 |
| Montgomery | Regionall Gigabit Fiber Project | This is a critically needed jobs creation opportunity for our region. The general economic downturn has had an especially negative effect on our local economy. The total closure of the GM Moraine assembly plant has been devastating. It is resulting in the direct loss of 5,000 jobs, a varying negative effect on over 100 GM suppliers, the potential closure of many local GM suppliers, and a devastating ripple effect. Roadway repair and rehabilitation of Central Avenue (SR725) which is the principle arterial and main gateway in the heart of the City of Miamisburg. The existing narrow three lane street will be rehabilitated, repaired and widened and then milled and overlaid with asphalt. The project includes replacement of broken sidewalks, curb and gutter, drive approaches, storm sewer with installation of street trees and approved decorative lighting, the project limits are approximately 2000 feet in length and accommodate over 20,000 vehicles per day. Business people who depend upon the network for their day to day, wireless broadband services. For Dayton, the benefits of a municipal-wide, multi-wireless, broadband network are abundant and the City regards the broadband accessibility throughout its jurisdictional boundaries to be a critical public issue. Additionally, the ability to link the Dayton wireless network to leverage its network capabilities with other communities, educational networks, medical facilities, and other regional fiber networks, is a crucial element of the City of Dayton's Economic Development forward plan. Cost estimates to achieve and maintain and expand the wireless broadband mesh across the corporate boundaries of the City indicate a capital outlay of approximately \$3,000,000. Included in the costs are the following: all wireless access points, fiber backhaul to key connection points, last mile connections labor, materials, and engineering. Included in the costs for engineering, labor, site selection, and the equipment to construct and operate a data center. | Miami Valley Communications Council | 1,500 | 31 to 90 days | \$5,000,000 |
| Montgomery | Central Avenue Roadway Improvements | Roadway repair and rehabilitation of Central Avenue (SR725) which is the principle arterial and main gateway in the heart of the City of Miamisburg. The existing narrow three lane street will be rehabilitated, repaired and widened and then milled and overlaid with asphalt. | City of Miamisburg | 20 | 181 days or more | \$2,000,000 |
| Montgomery | Dayton Wireless Broadband Mesh | The project includes replacement of broken sidewalks, curb and gutter, drive approaches, storm sewer with installation of street trees and approved decorative lighting, the project limits are approximately 2000 feet in length and accommodate over 20,000 vehicles per day. Business people who depend upon the network for their day to day, wireless broadband services. For Dayton, the benefits of a municipal-wide, multi-wireless, broadband network are abundant and the City regards the broadband accessibility throughout its jurisdictional boundaries to be a critical public issue. | Montgomery | City Wide Asphalt Resurfacing and Sidewalk Rehabil | Infrastructure rehabilitation and reconstruction of broken concrete sidewalks, curb and gutter and asphalt resurfacing where needed throughout the City. Work includes repair and replacement of damaged sidewalks, curbs, gutters, and installation of missing curb sidewalks, ADA curb ramps, drive approaches. Asphalt pavement resurfacing will be done City wide on streets identified in the City's Capital Improvement plan. The street and sidewalk infrastructure included would be prioritized based on a backlog of areas in the City created due to the decline of available funding and the dramatic increase in pricing over the past 5 years. The project would benefit the entire Miamisburg vehicle community and enhance an already established sidewalk and paving program. Asphalt resurfacing of this backlog a portion of the City's 100 cent community and ultimately will ensure future maintainability and good road conditions for the motoring public. | City of Miamisburg | 20 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | City Storm Drainage Culvert Rehabilitation | The infrastructure project would benefit the entire Miamisburg community and significantly improve the environmental protection at the drainage channel outfall. The entire structure is located underneath six residential city blocks and handles stormwater runoff from over 480 acres throughout the community. | City of Miamisburg | 5 | 0 to 30 days | \$300,000 |
| Montgomery | Clearwell Rehabilitation | This is a one million gallon partially below grade water storage tank located at the Water Treatment Facility. This project includes interior and exterior coating of the tank. It was constructed in 1981. | City of Miamisburg | 5 | 31 to 90 days | \$45,000 |
| Montgomery | Water Distribution Improvements Phase I | This project involves design and construction of various segments of transmission main: 1) 10,400 feet of 16 inch; 2) 1,600 feet of 24 inch; 3) 3,800 feet of 12 inch in our low service area. | City of Miamisburg | 15 | 181 days or more | \$3,182,650 |
| Montgomery | Sewer Collection & Treatment Phase B | This project includes: 1) sewer system evaluation and hydraulic model; 2) water sewer construction; 3) miscellaneous IM repairs; 4) new Eastside pumpstation with screens; 5) new equalization tank; 6) primary rehab; 7) ball filter press replacement; 8) anaerobic digester rehab; and 9) miscellaneous equipment replacement at the Water Reclamation Facility. | City of Miamisburg | 30 | 181 days or more | \$17,300,000 |
| Montgomery | Dist 8, PID 85364, MOT GRE IR 675 2.00 2.70 | Replace existing noise wall panels on existing noise wall, investigate salvaging existing steel posts, replace steel posts where warranted (Design/Build Project) | Ohio Department of Transportation | 174.3 | 31 to 90 days | \$6,072,000 |
| Montgomery | City of Union Wastewater Treatment Plant Upgrade a | City of Union Wastewater Treatment Plant Expansion and Upgrade including new grit, SBR (sequencing batch reactor) treatment, effluent storage and pumping, phosphorus treatment, sludge dewatering and supervisory controls and data management. Improved treatment with reduced effluent discharge. | City of Union | 40 | 0 to 30 days | \$3,600,000 |
| Montgomery | Dist 7, PID 83716, MOT Guide Sign Replacement, Ph | Signing | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Montgomery | Dist 7, PID 83716, MOT Guide Sign Replacement, Ph | Signing | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Montgomery | Farmersville WC Road Water and Sewer Extension | Extend water and sewer lines into the western region of West Carrollton. This will open up 427 acres of land for industrial and mixed use. Project includes 10,800 feet of sanitary main and 4,400 feet of water main. This project will alleviate 200 homes from on-site sewage disposal. | City of West Carrollton | 999 | 31 to 90 days | \$2,470,000 |
| Montgomery | Employer Training Funds | Provide Ohio employees additional incentives to hire people with disabilities by paying training cost reimbursement at wages at 100% for the first week, 50% for the second week, and 25% for the third week. Ohio employers are unable to fund training employees because of very low profit margins. This incentive will allow Ohio employers to help keep their costs for training at a minimum, thereby stimulating hiring. Capabilities, Inc. currently works with 200 people with disabilities to help them find employment in a 22 county area. The unemployment rate for people with disabilities is far lower than the national rate. Outcome - 200 people with disabilities placed in competitive employment. 200 people becoming tax payers rather than taxpayers. 200 people the first to be chosen for employment rather than the last to be chosen. | Capabilities, Inc. | 200 | 0 to 30 days | \$90,000 |
| Montgomery | Health Care and Agri-Technology Training Expansion | This would be a two-part expansion of our educational offerings. The first is the expansion of Allied Health programming offerings for high school and adult students. We would like to expand our training offerings for our Licensed Practical Nursing adult education course which provides the educational opportunities for the students who live from our 27 local districts by adding an additional classroom when our existing building. The second part would be an expansion of our alternative fuel and food science education programs through our Agri-Science in Agriculture. We currently have a bio-fuel manufacturing unit for educational use. We are looking to expand by including a food turbine and creating a food science program for our students. We are going to team with Ohio State University ATI to expand existing food science research opportunities for high school and adult learners in the five county area we serve. | Miami Valley Career Technology Center | 3 | 31 to 90 days | \$940,000 |
| Montgomery | Clearwell Construction and Water Tank Repairs | Construct 500,000 gallon clearwell at water treatment plant as ordered by the OEPA. Make repairs to existing 1,000,000 gallon water tank. The clearwell construction is mandated by the OEPA to provide improved service and functionality to the water treatment plant. The repairs to the existing water tank are necessary to ensure continued water service to 3400 residences and businesses. The repairs to the water tank will allow for major projects to bring work to these companies. | City of West Carrollton | 10 | 31 to 90 days | \$2,325,000 |
| Montgomery | Buy America Act- For Ohio Companies | Van Hoose Associates has 25 years experience in this sector and 10 years experiencing in automating the Contracting Business Process (CBP). This technology is currently in production for the AF for all major weapon systems inside the firewall. This automated CBP for local Ohio companies has successfully completed the commercial demonstration phase. It is ready to pilot for full production deployment. This has been initially funded by the Third Frontier's ESP via Dayton Development Coalition. The next phase will deploy a pilot to local companies in Ohio with the requested funding. The pilot would involve setting up 100 companies with an automated approach to receiving and tracking results from contracted funding for fuel cell and provide an estimated minimum of 5 jobs per company through these resulting awards to the Ohio region. | Van Hoose Associates | 500 | 31 to 90 days | \$200,000 |
| Montgomery | Clothing Ohio's People with Disabilities to Get a | In today's world, appearance is everything. When you go to an interview, you have to look the part to make the employer want to hire you. If people with disabilities cannot afford nice clothes, they will not get the job. Capabilities, Inc. works with the Ohio RISC to get people with disabilities working. We offer a service to the RISC called Dress for Success, which provides the following to the client: creating with client, assessing, advising, and purchasing clothing, services, or supplies for a job seeker. The RISC used to pay this service through vendors like Capabilities, Inc. but now with the budget constraints they cannot afford this service. Capabilities will assist their clients and provide this service with the monies that we receive. Outcome - 100 people with disabilities employed and becoming tax payers faster than they would without this service. 4 current Capabilities Employees can increase their hours that were cut due to budget constraints. | Capabilities, Inc. | 100 | 0 to 30 days | \$33,000 |
| Montgomery | Building material recycling | Pumpster rental, labor and other costs involved to reclaim and recycle drywall, metal studs, acoustical ceiling tile and acoustical ceiling grid on commercial construction sites in the Dayton, Ohio and surrounding areas. | Dayton Acoustics | 20 | 0 to 30 days | \$250,000 |
| Montgomery | Intelligent Chemical Sensor System | This system would monitor 24/7 chemical vapors for specific chemical contamination in the Miami River and aquifers. The industrial contamination in the Dayton area is extremely high. A real-time monitor system is needed for the protection of the people and to help with the high medical expenses to insurance and state funds. These sites having industrial waste cause millions of dollars of damage and requiring sophisticated cleanup. The insurance companies and the state funds could be greatly reduced if contamination could be monitored on city wide basis to help doctors better serve the community and help the state acquire more opportunities for clean air. | Micro Systems Technologies | 50 | 31 to 90 days | \$3,000,000 |
| Montgomery | Exit 47 on I-75 at South Dixie/Central Ave Interch | This project will construct the four missing movements at existing Exit 47 on I-75. The added movements will ignite redevelopment in the West Carrollton, Moraine, Kettering and Miamisburg areas. The full interchange is vital to redeveloping the General Motors Moraine plant which was closed in 2008. This project will create 1040 jobs during a 2 year construction period, and support the development of 443 acres of land and 735,000 sq. ft. of office space to create or retain 7500 jobs in the area. It will reduce energy use and pollution and improve congestion and safety by eliminating the 2.8 mile backup that result from not having a full interchange. This project will save over 31,000 vehicles that use the interchange each day, and improve conditions for over 95,000 vehicles that travel I-75 each day. | City of West Carrollton | 999 | 31 to 90 days | \$25,000,000 |
| Montgomery | Owl Creek Flood Protection Project, Phase 1 | There are 400 residential and commercial properties located within the 100 year FEMA flood zone along Owl Creek. This project would widen Owl Creek to remove the properties from the flood zone. Phase 1 includes FEMA Approval, Easements, Property acquisition, Utility Relocation, Construction Plans, Engineering, Allow Bridge widening and Maroon Bridge widening. | City of West Carrollton | 81 | 91 to 180 days | \$3,000,000 |
| Montgomery | Miamisburg Riverfront Park | Plan will serve as a vision statement outlining regular events and a wide research plan pertaining to a new riverfront park/amenity expansion. Phase I of the plan will be to remove existing parking and existing utilities, add a bio-swale and develop green space for events. Phase II includes finishing elements along the new road for consolidating each collection services and business connectivity. The park has been reviewed with and supported by federal, state and county elected officials, as it serves economic development, environmental and recreational interests of the Miami Valley region. The project provides job creation directly and indirectly as the park is a key element in downtown business district revitalization. The park will provide maintenance and recreation programming employment opportunities. The business district will allow opportunities for business growth in many retail and service based companies. | City of Miamisburg | 5 | 181 days or more | \$5,430,000 |
| Montgomery | IT OnShoring | Standup of an IT Onshoring organization to be located in the Greater Dayton Area. Pricing model will be cost-competitive with off-shore IT development models. Funding required to initiate training and cross training infrastructure and other associated costs to leverage 42 year graduates, high school graduates and second career individuals with aptitude to be successful in this environment. Overall model will be to offer education to the inherent problems with the process and model of off-shore and near-shore development. This model will allow to the off-shoring of IT development jobs, bring IT spending to Ohio from outside the region, combat the shrinking of the local professional labor pool as resources have migrated to competing cities as high-tech jobs have left the area, construction of young professionals in the local region by creating entry and mid-level opportunities. To this end, we are proposing an execution model for onshore application development and support services that will allow us to compete in a global economy. This start-up costs include the licensing agreement with an Israeli military research company (Rafael) to manufacture body armor by Lifeflex/Composite Armor Services (owned by JPMorgan). Costs of training is 2.5 million, manufacturing start-up 7.5 million, job creation 175 jobs in Dayton Ohio targeting the recently closed Dupont facility (Lifeflex owns and has received 200,000 sq. ft. on this site). Recently Celerity reported "YIP (The) News" Castroline, Inc. said Monday that it has received a contract worth about \$2.7 billion for its ISAP and ESAP personal armor panels from the U.S. Army. Castroline, a manufacturer of technical ceramics products and components, also received the first delivery order...both ISAP and ESAP armor plates are scheduled for shipment by November 2008. The new pressureless isosil process is superior to current pressing methods. Much less energy is used, and much less waste is generated. New Army National Composite Center, Lifeflex/Composite Armor Services and Lion Apparel are uniquely qualified to bring this highly valuable business to Ohio. Lion Apparel has asked to participate as the non-resilient first product in this market company. | Illumination Works | 100 | 91 to 180 days | \$5,000,000 |
| Montgomery | State of the art body armor, known and proven tech | This start-up costs include the licensing agreement with an Israeli military research company (Rafael) to manufacture body armor by Lifeflex/Composite Armor Services (owned by JPMorgan). Costs of training is 2.5 million, manufacturing start-up 7.5 million, job creation 175 jobs in Dayton Ohio targeting the recently closed Dupont facility (Lifeflex owns and has received 200,000 sq. ft. on this site). Recently Celerity reported "YIP (The) News" Castroline, Inc. said Monday that it has received a contract worth about \$2.7 billion for its ISAP and ESAP personal armor panels from the U.S. Army. | Montgomery | Ome gardens/Embury Plat Storm Sewer and Street Imp | Rebuild existing streets with new curb and gutter to facilitate the collection of storm water. 5600 linear feet of new asphalt pavement. 5200 linear feet of various sized conduit. This project will remove many ditches that continue to have a negative impact on the Dayton Ohio buried aquifer and deliver fresh water to over 400,000 regional residents daily. | Harrison Township | 100 | 91 to 180 days | \$1,243,718 |
| Montgomery | Street Resurfacing | Asphalt resurfacing and milling of 250,536 linear feet of Township roads of various locations and widths. | Harrison Township | 50 | 31 to 90 days | \$3,949,162 |
| Montgomery | Ohio Human Capital Inventory Project | OHCP has developed a model and formulated a foundation to assess and facilitate the skills inventory, skill development and eventual placement of the available workforce in sector specific jobs in the State of Ohio. The basis for the system is the use of unique database structure to manage Ohio's Human Capital Inventory (HIC) workforce available workers looking for sector specific employment. Employers will be able to search for employees based on their needs. This will be a powerful training and economic development tool. Besides grants and tax abatements, perspective relocating companies and current Ohio employers need proof that we have a workforce that can meet their need. It's simply a matter of time that it will be in our work. We can show prospective business and economic development that we have a workforce that can meet their need. We now have a way to prove it and OHCI is the proof. Precise workforce data on our available workforce along with validated and inventoried skill sets is the KEY to solving our competitive economic development problems. Envision a statewide workforce skills inventory system that is real-time and web-based. Let's put the data we have to use. | Human Capital Inventory Project, LLC. | 2,000 | 0 to 30 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Ada Curb Ramp Program | Install 264 ADA curb ramps with truncated domes at various locations throughout the Township on roads to be resurfaced. All the locations do not meet current standards for disability requirements. | Harrison Township | 20 | 91 to 180 days | \$356,400 |
| Montgomery | Allaman Banking and Office Complex | The Allaman Banking and Office Complex envisions the completion of the historic Allaman Building located at 1000-1004 West Third Street into a complex housing a local lending center with employee training offices with professional office spaces on upper floors and in the adjacent carriage house. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 22 including the highest concentration of employees on the first floor of the 3,300 square foot complex, and the remaining employees sited throughout the second and third floors as well as the adjacent carriage house. Indirect and induced employment created as a result of this project is estimated at 14 for a total employment benefit to the Dayton community of 36 jobs. The estimated annual tax base for employees of the Allaman Banking and Office Complex is projected at a minimum of \$960,000 based on a median salary of \$30,000 annually per employee. The indirect tax base for related building trades and related industries and suppliers is approximately \$275,000. | Wright Dunbar, Inc. | 36 | 0 to 30 days | \$570,000 |
| Montgomery | Cannell Graphics Commercial Printing | The Cannell Graphics Commercial Printing Project entails the completion of the expansion and relocation of Cannell Graphics to the Dayton area due to the continued growth of this Columbus, Ohio-based business. Cannell Graphics will complete the renovation of the historic Midget Theatre located at 1021-1025 West Third Street into a full-service commercial printer primarily serving the construction trade. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 20 employees with salary ranges up to \$90,000 annually who will perform digital blueprint and document imaging services for the commercial, primarily construction sector. The estimated annual tax base for employees of Cannell Graphics is \$790,000. Indirect and induced employment created as a result of this project is estimated at 12 for a total employment benefit to the Dayton community of 32 jobs. The indirect tax base for related building trades and related industries and suppliers is \$400,000. | Wright Dunbar, Inc. | 32 | 0 to 30 days | \$425,000 |
| Montgomery | Baseball and Soccer Tournament and Training Facility | We took over Action Sports Center (ASC) in May of 2008. ASC is a 40 Acre multipurpose baseball, softball and soccer, indoor and outdoor tournament and training facility in need of significant upgrade and improvement located in the heart of downtown. Project includes parking lot expansion, baseball diamond upgrades, outdoor soccer field upgrades, irrigation, facility expansion (air dome and storage facility), facility improvements to improve energy efficiency, indoor field resurfacing and staffing to manage the expanded premises. These improvements will allow us to grow and attract regional sporting events. Many of these projects can be released immediately. Projects would provide a ripple effect including, at least 2200 hotel nights in Dayton in the first year, 20 full time equivalent jobs in the first year, general contractor projects, increase in supplier sales (beverage, equipment, food, etc). Implementation of programs for youth of dayton (camp, clinic, wellness). We are a well run expanding facility in need of financial support to take the facility to the next level. Many of these projects are defined and quoted, in need of funding. | Action Sports Center LLC | 20 | 0 to 30 days | \$2,100,000 |
| Montgomery | Innervest Entrepreneur Complex | The Innervest Entrepreneur Complex envisions the completion of the complex of historic buildings located at the northeast corner of West Third and Williams Streets in the Wright Dunbar Business Village. The complex of 6 adjoining buildings consists of approximately 25,000 square feet and is currently known as the Bucher-Woodson Complex. The complex, which is slated for redevelopment, consists of 10 storefronts which currently supports five entrepreneur businesses and could support an additional five businesses once renovations are completed to the additional spaces. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 10 independent businesses operating within the complex. Based on an average of \$30,000 annually per employee, the projected annual tax base would be \$1.5 million. The estimated employment created is 17 employees with the projected creation of 20 new jobs. Indirect and induced employment created as a result of this project is estimated at 24 for a total employment benefit to the Dayton community of 73 jobs. The indirect tax base for related building trades and related industries and suppliers is \$1 million. | Wright Dunbar, Inc. | 73 | 0 to 30 days | \$3,000,000 |
| Montgomery | Marietta Flats Medical Arts Building | The Marietta Flats Medical Arts Building is located at 1146-1148 West Third Street in the Wright Dunbar Business Village. The building consists of approximately 11,000 square feet on three floors. The building is well suited as a medical arts complex due to its proximity to the Dayton Veterans Affairs Medical Center and the Dayton Children's Hospital. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 42. Based on an average of \$45,000 annually per employee, the projected annual tax base would be \$1.9 million. Indirect and induced employment created as a result of this project is estimated at 24 for a total employment benefit to the Dayton community of 66 jobs. The indirect tax base for related building trades and related industries and suppliers is \$1.75 million. | Wright Dunbar, Inc. | 96 | 0 to 30 days | \$2,000,000 |
| Montgomery | Pekin Culinary Institute | The Pekin Culinary Institute envisions the completion of the historic Pekin Theatre located at 1038-1040 West Third Street into a culinary institute on the second and third floors with a restaurant on the first floor supporting the institute and its students. The project consists of approximately 15,000 square feet. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 60 for both the Culinary Institute and the partnered restaurant. Based on an average of \$30,000 annually per employee, the projected annual tax base would be \$1.8 million. Indirect and induced employment created as a result of this project is estimated at 27 for a total employment benefit to the Dayton community of 87 jobs. The indirect tax base for related building trades and related industries and suppliers is \$2.5 million. | Wright Dunbar, Inc. | 88 | 31 to 90 days | \$2,750,000 |
| Montgomery | Pryor Physical Therapy Building | The Pryor Physical Therapy Building envisions the completion of the complex of historic buildings known as the Mory's Block and Pryor Building located at the northeast corner of West Third and Williams Streets in the Wright Dunbar Business Village. The complex of 2 adjoining buildings consists of approximately 15,300 square feet and is currently known as the Fratelli buildings. The large single wing complex of storefronts is currently vacant and has been envisioned as a physical therapy complex supplying much needed medical therapeutic services to the western portion of the City of Dayton. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 60 within the complex. Based on an average of \$30,000 annually per employee, the projected annual tax base would be \$1.8 million. Indirect and induced employment created as a result of this project is estimated at 27 for a total employment benefit to the Dayton community of 107 jobs. The indirect tax base for related building trades and related industries and suppliers is over \$2 million. | Wright Dunbar, Inc. | 107 | 91 to 180 days | \$2,100,000 |
| Montgomery | Rubenstein Arts Complex | The Rubenstein Arts Complex envisions the completion of the historic Rubenstein Building located at 1112 West Third Street into a complex featuring performing arts spaces for organizations such as a dance company on the third floor of the facility, artist residences on the second floor of the facility, with two restaurants providing services to the innermost community on the first floor. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment of 194 employees is projected at the following: Dance Company - 44 (Dance/Performing Arts/Arts) Independent Restaurants - 160 (employees/managers) | Wright Dunbar, Inc. | 265 | 0 to 30 days | \$3,500,000 |
| Montgomery | The Village Market | The Village Market project envisions the acquisition and fresh baked bread, dairy products and an abundance of fruits and vegetables. The Village Market would also provide educational support for healthy living habits and by partnering with community stakeholders. Examples of stakeholders suited for such a partnership would be the Sinclair Community College Hospitality Management Program aka Sinclair Culinary Institute as well Sinclair's Entrepreneurship program, Wright State School of Medicine, Charles R. Drew Health Institute, and the local chapter of the Ohio Farm Bureau Federation located in Farmerville at the western edge of Montgomery County. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 20. Indirect employment is provided to those employed in the building trades and related local industries and suppliers. Indirect and induced employment created as a result of this project is estimated at 69 for a total employment benefit to the Dayton community of 89 jobs. The estimated annual tax base for employees of The Village Market is projected at \$2.5 million. | Wright Dunbar, Inc. | 89 | 91 to 180 days | \$3,500,000 |
| Montgomery | Expansion of Facilities for All Day Kindergarten | The addition of eight new classrooms to accommodate all day kindergarten | Huber Heights City School District | 100 | 91 to 180 days | \$2,500,000 |
| Montgomery | Wright Dunbar Lifestyle Center | The Wright Dunbar Lifestyle Center envisions the completion of the historic Hoerster-Holman Building located at 1137-1139 West Third Street into a community fitness complex offering a variety of services for employees as well as members. Cardiovascular area, general fitness area, free weights, aerobic/multi purpose area, meeting room and locker rooms for men and women. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 13 for the complex. The complex will provide employment opportunities for area residents as well as provide health and fitness opportunities for residents seeking health and fitness. The center also fulfills a priority objective of Wright Dunbar, Inc. to create a medical and healthcare delivery cluster to attract and retain primary care, diagnostic services, medical support services and wellness products that provides access to healthcare for residents, job exposure and employment for youth, at within the Wright Dunbar Business Village. Indirect and induced employment created as a result of this project is estimated at 41 for a total employment benefit to the Dayton community of 54 jobs. The estimated annual tax base for employees of the Wright Dunbar Lifestyle Center is \$250,000. | Wright Dunbar, Inc. | 54 | 0 to 30 days | \$2,013,131 |
| Montgomery | Zik's Health Services Complex | The Zik's Health Services Complex project envisions the completion of 1150 West Third Street into a health services complex housing a pharmacy and durable medical product sales to residents of the innermost community in Dayton who currently lack such services. The project provides economic stimulation through direct and indirect employment. The estimated direct permanent employment is projected at 30 over a ten-year time period. Indirect employment is provided by those employed in the building trades and related local industries and suppliers. The estimated annual tax base for employees of the Zik's Health Services Complex is projected at a minimum of \$375,000 an opening based on a median salary of \$60,000 annually per employee. Indirect and induced employment created as a result of this project is estimated at 12 for a total employment benefit to the Dayton community of 42 jobs. The indirect tax base for related building trades and related industries and suppliers is \$250,000. | Wright Dunbar, Inc. | 42 | 0 to 30 days | \$250,000 |
| Montgomery | Insulation Project for my Home | My home | American taxpayer | 1 | 31 to 90 days | \$25,000 |
| Montgomery | Compressed Natural Gas Compressor shovel ready pro | This project has been engineered and is ready to begin building the tooling to make a home sized vacuum compressed natural gas (cng) compressor. There is only one home cng compressor made in the Americas. We have designed a home unit based upon a proven Swiss design that has been in volume use (15,000 units) over 20 years. The basic design is perfect and only needed to be brought up to modern methods and standards. The design has been simplified to allow inexpensive manufacturing in Dayton, Ohio. Currently we just laid out four (4) engines and one compressor that we were working on the project was the economic times. These people are available and can be put immediately back on the job. Liteflex LLC has the facilities, equipment and machinery. All that is needed are the tools and fixtures to put the compressor into production. Natural gas is a plentiful, safe, pollution free American fuel. Filling a vehicle takes no more time to fill than filling with gasoline. Electric vehicles take overnight to recharge. Also, 38% of our Nations electrical energy is generated with natural gas. Hydrogen is produced currently using natural gas...so why not fuel cars with cng? | Liteflex LLC | 150 | 0 to 30 days | \$3,500,000 |
| Montgomery | Compressed Natural Gas Vehicle Conversion Systems | There is a need for a DEMONSTRATION PROGRAM to convert poor mileage GAS HOG vehicles to run on safe, non-polluting, low cost, compressed natural gas (cng). There is sufficient natural gas in America to run 60 million cars for 60 years. Our system converts the vehicle to run on dual fuel (gasoline and natural gas). Natural gas systems have been in the US since the mid 80's and have proven to be safe, non-polluting and efficient (saves money lower cost per gas gallon equivalent). World wide 9 million vehicles run on cng. We are proposing a DEMONSTRATION program to subsidize the conversion of 100 GAS HOG vehicles. This would include the conversion to dual fuel and a home compression system. Liteflex LLC will convert and service the fuel injected vehicle and pumping system. Service would be cost free for 5 years. The cng compressor has been designed by Liteflex LLC and will be made in Dayton, Ohio. The program will 'kick start' an awareness of and an interest in using cng fuel. Conversions will then be sold by a marketing firm at a price commensurate with the value generated by the cost saving program to either continue to improve the gas to cng conversion or progressing to manufacturing. This will allow our company and make us most cost effective for our customers in delivering products in the water solutions business. We are proposing a DEMONSTRATION program to subsidize the conversion of 100 GAS HOG vehicles. This would include the conversion to dual fuel and a home compression system. | Montgomery | Engineer to order software for manufacturing effc | My home | Crown Solutions | 10 | 0 to 30 days | \$250,000 |
| Montgomery | Self employment - assistance for training | My home | Personal employment | 1 | 0 to 30 days | \$2,750 |
| Montgomery | Expanding manufacturing capability. | My home | Crown Solutions | 25 | 91 to 180 days | \$6,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Montgomery | National Composite Center (NCC) Green Conversion | NCC occupies two WW II vintage structures in Kettering and Dayton where technologies and companies are incubated. Escalating energy costs make the value proposition for NCC meet companies increasingly difficult. Target Companies (NCC Building include: UORV, SCANTE, NeoSensore, Lion Apparel, Inertia Advantage, Veni Disaster Associates and Laffrae LLC. Tenants in AMT Building include: Quickstop, Vector Companies, Fusion Graphics and NCC capital projects. All tenants bear a percentage of the energy costs. The project will make the NCC and AMT facilities, green energy efficient and allow the tenants to learn from the green energy conversion. VWSU, UDRI and SCC are active partners with NCC and the Alternative and Green Energy initiative will send master student interns to the facility for hands on experience. Once completed, the process and the operating solar and geothermal systems will become a valuable educational attraction. NCC invites schools, service clubs and community groups in the region to tour the facility to learn more about alternative energy solutions, and to see them in action. Thinking with the VWSU Master's Degree Program interns will gain real experience. | National Composite Center | 296 | 0 to 30 days | \$18,346,000 |
| Montgomery | Dormitory Razing | Dayton Christian Schools occupies several former NCR Corporation building on this site. However, as this was many years ago and NCR training location, there are old dormitories that cannot be used for any purpose. The maintenance costs are high (energy usage) and they are filled with asbestos. Although enclosed and contained at this time, it makes sense for the school and other reasons to raze the building. Construction cost is estimated \$5,000 to create playing fields if the dormitories can be razed. | Dayton Christian School | 5 | 0 to 30 days | \$165,000 |
| Montgomery | Pediatric Trauma and Emergency Center | Dayton Children's Pediatric Trauma and Emergency center is the region's pediatric trauma center, and annually cares for 68,000 children. Occupies 510,000 square feet. 600 trauma cases, and transported 1000 sick and injured children to the Children's from other community hospitals - putting Dayton Children's in the top ten percent of children's hospitals emergency programs nationally. To accommodate an anticipated 50% volume increase, the project would add 13,274 square feet of new space and additional trauma capabilities, and create staffing and one efficiencies. The new area will provide maximum protection from infection through new ventilation; adds Resident, student and parent education spaces; incorporates 17 LEED green standards; improves emergency vehicle traffic flow and air transport patient delivery system, and adds hazmat and decontamination areas for disaster preparedness as well as an Incident Command Center for disaster management. The performance standards include reduction in wait times and patients who leave without treatment due to wait; improved patient flow; improved patient confidentiality and a fully integrated clinical information system. | The Children's Medical Center of Dayton | 322 | 31 to 90 days | \$7,800,000 |
| Montgomery | Northview School Window Replacement | Replace all exterior windows at Northview School. These are the original windows and are over 35 years of age. These windows will also reduce the amount of energy needed to regulate the temperature of the building. | Montgomery County Board of MRDD | 6 | 91 to 180 days | \$135,000 |
| Montgomery | Southview School Window Replacement | This would replace the existing windows at the Southview School which are over 35 years old. This would also assist in the reduction of heating AC costs to maintain the cost of the building. Please also note that this building also houses a remote location of the county health district and a day care center. | Montgomery County Board of MRDD | 6 | 91 to 180 days | \$75,000 |
| Montgomery | Blacktop and Seal Coating of seven (7) facilities | The Montgomery County Board of MRDD maintains three (3) Adult Habilitation facilities, two (2) Schools, an administration/transportation center and an emergency shelter serving disabled children and adults. All of the parking areas and entrances are in need of repair, sealcoating and patching. With the over 1,000,000 miles our transportation fleet travels each year our parking lots and entrances receive a considerable amount of wear and tear each year. | Montgomery County Board of MRDD | 12 | 31 to 90 days | \$150,000 |
| Montgomery | Southview School Curb and Sidewalk Repairs | Replace curb & sidewalk at school facility which serves a disabled population including a number who have the need of wheelchairs. This facility provides day services for adults with Mental Retardation. The current walking path has numerous cracks and breaks creating many hazards for individuals who in many instances have no experience in a situation. This is to improve accessibility where the path is uneven and create a wheelchair accessible | Montgomery County Board of MRDD | 5 | 31 to 90 days | \$20,000 |
| Montgomery | Calumet Walking Path | Replace the gymnasium floor in a thirty five year old facility. The floor is used by adult individuals with mental retardation for their leisure/recreation functions. It is also the location for large multiple building activities. This is the original floor, is cracked in many locations and become a hazard to the individuals we serve. | Montgomery County Board of MRDD | 8 | 31 to 90 days | \$17,500 |
| Montgomery | Calumet Gymnasium Floor Replacement | The hiring of new employees, and the ability to retain current employees, we want to be able to hire new employees and get them trained back to work. | J&J Plumbing | 4 | 0 to 30 days | \$50,000 |
| Montgomery | employee retention/hiring | | | | | |
| Montgomery | Boonshoft Museum of Discovery STEM Renovation Proj | To enhance Science, Technology, Engineering and Math (STEM) learning in the Dayton region, the Board of Discovery is planning installation of interactive exhibits devoted to space science, including one of the only public solar telescopes in the world (located in the county and the nation of ROCKAW Science on a Sphere, Reinforcement of the City of Dayton, Museum of Science, The Ohio State University, Columbus - Southwest Ohio, includes the addition of a Digistar 4 planetarium instrument, with full-dome video projection capability. | Dayton Society of Natural History D/B/A Boonshoft | 80 | 0 to 30 days | \$3,000,000 |
| Montgomery | Southview School Classroom Flooring | As the location of the only planetarium and solar telescope in the Central - Southwest Ohio Region (there are no public planetariums in Columbus or Cincinnati), and the only Science on a Sphere in the state, thousands of visitors from the Dayton Region and from throughout the state, will come in school and family groups to utilize these unique attractions. | Montgomery County Board of MRDD | 3 | 31 to 90 days | \$65,000 |
| Montgomery | Traffic sign upgrade | A primary outcome of this project will be enhancement of STEM learning opportunities for students on field trips, who will utilize these unique educational resources. Pre- and post-visit of visiting classes will include an increase in STEM knowledge, as an outcome of the fieldtrips. Our Southview school has received the praise where it is necessary to replace flooring in most of our classrooms | Montgomery County Engineers | 1 | 31 to 90 days | \$145,000 |
| Montgomery | Philipsburg Road Storm Drainage Safety Project | Upgrade existing traffic signs to meet new federal reflectivity requirements. | City of Union | 4 | 31 to 90 days | \$330,800 |
| Montgomery | Traffic Signal Upgrade - Jackson Township | Install a new 4 ft x 8 ft flow culvert along the edge of a road where there is an old guard rail protecting traffic from a sharp drop into the existing open storm ditch, to remove this safety hazard and reduce potential for river pollution in the event of an accident. | Montgomery County Engineers | 1 | 31 to 90 days | \$145,000 |
| Montgomery | Concord Farm West Park Storm Drainage Project | Upgrade existing traffic signs to meet new federal reflectivity requirements. | City of Union | 1 | 31 to 90 days | \$18,000 |
| Montgomery | Traffic Signal Upgrades - Jefferson Township | Upgrade existing traffic signs to meet new federal reflectivity requirements. | Montgomery County Engineers | 1 | 91 to 180 days | \$150,000 |
| Montgomery | Dist 8, PID 85586, GDRTA 10 hybrid options | GDRTA to Hybrid Options on 40' Diesel Buses. | Ohio Department of Transportation | 33 | 31 to 90 days | \$2,000,000 |
| Montgomery | Traffic Signal Upgrades - Jefferson Township | Upgrade existing traffic signs to meet new federal reflectivity requirements. | Montgomery County Engineers | 1 | 91 to 180 days | \$150,000 |
| Montgomery | Bus Garage Underground Fuel Tank | Our current 10,000 gallon diesel underground fuel tank is quite old and has reached the point that it requires repairs for leaks and/or water storage every year. In order to reduce this repair as well as better protect the environment, we are requesting replacement of this tank. | Montgomery County Board of MRDD | 5 | 91 to 180 days | \$100,000 |
| Montgomery | Traffic Sign Upgrade - Perry Township | Upgrade existing traffic signs to meet new federal reflectivity requirements. | Montgomery County Engineers | 1 | 31 to 90 days | \$170,000 |
| Montgomery | Dist 8, PID 85588, GDRTA injection systems | GDRTA Injection Systems for our Maintenance Department. | Ohio Department of Transportation | 5 | 91 to 180 days | \$225,000 |
| Montgomery | Dist 8, PID 85589, GDRTA AV screens for hub network | GDRTA Audio/Visual Screens to be installed throughout our "Hub" network. | Ohio Department of Transportation | 2 | 31 to 90 days | \$120,000 |
| Montgomery | Traffic Signal - Rahn Rd & Marshall Rd | Reconstruct existing traffic signal in poor condition. | Montgomery County Engineers | 1 | 91 to 180 days | \$150,000 |
| Montgomery | Traffic Signal Rehabilitation-John Hole School on | Rehabilitate traffic signal in poor condition. | Montgomery County Engineers | 1 | 31 to 90 days | \$25,000 |
| Montgomery | Energy Efficiency Roadway Lighting | DPL Energy (Dayton OH) owns, operates and maintains 60,000 street and area light fixtures and install on average five-hundred new lights per year, and has offered to collaborate with Cycloptics to design and test an IESNA (Illumination Engineering Society of North America) Type III Illuminex™ RSL system. Cycloptics primary ability is precisely shape beams with uniform distribution and sharp cut-offs apply quite well to residential street lighting. Illuminex™ reflector design capability provides the opportunity for Cycloptics to pole-mount their RSL systems with off-axis beam patterns, rather than have them hang over the roadway at the end of fan to threaten foot extension arms. The uniform beams with sharp cut-offs generated by Illuminex™ off-axis RSL reflectors can meet all IESNA roadway lighting classifications. | Cycloptics Technologies, LLC | 10 | 181 days or more | \$175,000 |
| Montgomery | Traffic Sign Upgrade - Jefferson Township | DPL Energy believes Illuminex™ RSL can generate the following benefits for the company and its customers: • 30-40% energy savings • Lower maintenance • Reduced light spill • Improved customer satisfaction | Montgomery County Engineers | 1 | 91 to 180 days | \$150,000 |
| Montgomery | Kuntz Facility Exterior Window Replacement | Upgrade existing traffic signs to meet new federal reflectivity requirements. | Montgomery County Board of MRDD | 6 | 91 to 180 days | \$50,000 |
| Montgomery | County Wide Asphalt Resurfacing Program | This is our main facility for providing a workshop in which the individuals with disabilities who we serve with work. They workers are over 30 years old and are in need of replacement. | Montgomery County Engineers | 6 | 91 to 180 days | \$2,000,000 |
| Montgomery | Englewood Dam Underseepage Control | Design or milling and overlay 1/3 miles of two-lane roadway throughout Montgomery County. This would add thirty miles to the annual resurfacing program. | Miami Conservancy District | 20 | 91 to 180 days | \$2,400,000 |
| Montgomery | Dist 8, PID 85587, GDRTA trolley wire extension | Construction of weighted beam and drainage system at the downstream toe of a Class I flood protection dam to control foundation underseepage and increase the factor of safety of the dam. | Ohio Department of Transportation | 30 | 31 to 90 days | \$1,500,000 |
| Montgomery | Englewood Dam Concrete Rehabilitation | GDRTA Overhead Trolley Wire Extension to Routes #3 and #4 | Miami Conservancy District | 10 | 181 days or more | \$420,000 |
| Montgomery | Taylorville Dam Concrete Rehabilitation | Rehabilitation of deteriorated concrete in the walls, spillway, and conduits of a Class I flood protection dam. | Miami Conservancy District | 10 | 181 days or more | \$585,000 |
| Montgomery | Sprinkler installation | Rehabilitation of deteriorated concrete in the walls, spillway and conduits of a Class I flood protection dam. | Montgomery County Board of MRDD | 12 | 91 to 180 days | \$1,030,000 |
| Montgomery | Dist 8, PID 85590, GDRTA security system upgrade | Our Not-for-profit housing corporation (MWD) maintains and manages 28 single family, 14 duplex family homes as well as six unit apartment buildings in which some of the individuals we serve maintain residence. In order to better insure the health & safety of these individuals we would like to install sprinkler systems in each of the homes. We have estimates \$20,000 per single family, \$30,000 per duplex and \$25,000 for each of the apartment buildings. | Ohio Department of Transportation | 10 | 31 to 90 days | \$500,000 |
| Montgomery | Holes Creek Local Flood Protection Project | GDRTA A Security System Upgrade allowing real-time monitoring at all RTA hub locations. | Miami Conservancy District | 15 | 181 days or more | \$2,600,000 |
| Montgomery | project recovery | The Holes Creek Local Flood Protection Project was authorized by Congress in 1989 (PL99-662) to provide flood protection to more than 800 properties in West Carroll, Monroe and Miami Townships Montgomery County. The Corps completed most of the construction in 2000, and needs the final construction funds to complete the remaining portion. 100 percent of the non-federal funds have been provided. | Lady Unisex Hair Salon Inc./dba Lady C Salon & Spa | 12 | 0 to 30 days | \$200,000 |
| Montgomery | TCA WWTP Recirculation project | To give greater employment to 12 people on a full time basis with benefits. This will include working capital and advertisement, salaries, etc. we will have a set up for career related that will give insurance a medical hair prosthetics for free. We will also have a salon and hair care and hair care, nail care, skin care for the entire family. AND WE SELL WIGS AND HAIR PIECES. Our Target market is ages 6 and up. | Tri-Cities North Regional Wastewater Authority | 30 | 91 to 180 days | \$2,755,400 |
| Montgomery | Wagner Ford Rd Culvert - WAG-79-1.50 | Project involves construction of 15 MDD pump station, flow splitter box, underground piping, SCADA interface and control station. System will incorporate secondary effluent as needed to the WWTP headworks for maintaining proper wetting rate of feed line biofilters necessary for enhanced nutrient removal. | Montgomery County Engineers | 5 | 31 to 90 days | \$280,000 |
| Montgomery | Vocational Outreach for Deaf and Hard of Hearing | Replace corrugated metal culvert. Multiple pipes out of alignment with gaps in seams and the bottom of the pipes are perforated. Both lines top and bottom are existing. Channel eroding downstream with steep shore hole. Overall rating is poor. Sufficiently strong to structurally deficient. | Deaf Community Resource Center | 50 | 0 to 30 days | \$325,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Mile Road Culvert - JAC-140-5.79 | Replace culvert - hooters exposed by scour, abutments cracked, erosion. Fair condition. Approach in poor condition. Sufficiency is Functionally Obsolete. | Montgomery County Engineer | 5 | 31 to 90 days | \$220,000 |
| Montgomery | Dayton-Farmersville Road Culvert - JEF-44-2.77L | Bottom of deck spalled. SW wingwall deteriorating. Longitudinal crack below top of west abutment. Fair condition | Montgomery County Engineer | 5 | 31 to 90 days | \$300,000 |
| Montgomery | Mile Road Culvert - JAC-140-5.79 | Replace culvert. Scour has exposed the hooters. Vertical cracks in both abutments. Concrete deterioration. Erosion. Overall rating is fair. Approach rating is poor. Sufficiency rating is functionally obsolete. | Montgomery County Engineers | 5 | 31 to 90 days | \$220,000 |
| Montgomery | Hemple Road culvert - 46-1.30 | Replace culvert. Abutments below beam seat deteriorating. Corners of abutments deteriorating. Overall rating is fair condition. Sufficiency rating is structurally deficient. | Montgomery County Engineer | 5 | 31 to 90 days | \$200,000 |
| Montgomery | Main Pump Building generator, pump and engine repl | Project includes replacement of new sewage pumps with high efficiency pumps, replace electric generators (and fuel/gas) and one engine generators on (fuel) diesel driven by internal combustion engines fueled with methanol gas produced on site by anaerobic digestion of municipal sewage. Local electric generation to be grid tied and not metered for distributed generation and grid enhancement. | Tri-Cities North Regional Wastewater Authority | 20 | 91 to 180 days | \$1,900,000 |
| Montgomery | BioDiesel Plant completion and wastewater treatmen | Crown Solutions of Ohio would gain from a project with American Energy Producers, Inc. States that would benefit from this are - Ohio, Mo, Pa, Ill. This project has been in the hold and has been stalled jobs and work has been stalled. This will impact fuel for the mid-west areas, reduce green houses gases, it is a re-nervable energy. This is a proven process everything is in place to move fast and make this project benefit many. Our company has invested and developed a breakthrough material for lithium ion batteries that will make electric vehicles practical. It is a silicon-coated version of our carbon nanotube paper that stores OVER 4 TIMES the energy of today's lithium ion anodes. In 2006, the Ohio TPAEP funded our Next Generation Anode to develop it. Its manufacture consists of two steps- making the paper and then coating it. A manufacturing process for the papermaking step has been built for us by Southern Newcarbons, using support provided by BRITEC. We seek the resources to build the coating system to complete our manufacturing process. Completing the manufacturing system will expand this business and represent the beginning of a new industry in Ohio with hundreds of associated jobs. Lithium ion batteries are a growing multi-billion dollar business. There is high commercial interest in this product- we have NDA agreements with 4 battery developers. An analysis by GM shows that this product, by itself, can double the range of an electric vehicle. It will also provide high-capacity storage for energy derived from solar, wind, and other renewable sources, and impact global warming. | Crown Solutions & American Energy Producers, Inc | 25 | 91 to 180 days | \$32,000,000 |
| Montgomery | Breakthrough Battery Material | | Inorganic Specialists | 20 | 0 to 30 days | \$750,000 |
| Montgomery | Repair Bridge MOR-99-9.17 | Repair arson damage to a bridge consisting of two large diameter pipes located in Moraine, Ohio under South Dixie Drive. A 72 inch diameter pipe constructed of High Density Polyethylene (HDPE) damaged by a fire which also damaged the concrete headwall. | Montgomery County Engineers | 5 | 31 to 90 days | \$250,000 |
| Montgomery | Kettering Business Park Redevelopment - Site Prepa | Description of Project This project involves demolition of a former warehouse building to develop "brown road" building sites and reconstruction of Monroe Street. The demolition of the building has already been accomplished with local money. The proposed reconstruction of Monroe Street, a 1.125 foot long street, will include pavement with curbs, sidewalks, street lighting, and water, and storm. The project will also include approximately 400 feet of new 8" sanitary sewer. Gas and electricity are already installed. The proposed reconstruction of Monroe Street will provide improved traffic access and utility service to approximately 22 acres in the northeast corner of KBP that has direct street exposure from "Village" Plaza. The building site created by demolition of the former warehouse in the 22 acre area. Proposed Budget, Income Sources and how monies will be spent The proposed budget for this work is \$636,000 and is for the construction of the roadway. We request the \$636,000 as an incentive monies for this project. | City of Kettering | 200 | 91 to 180 days | \$636,000 |
| Montgomery | ERP solution for the big 8 Public School Districts | Driven by the need to modernize legacy financial, human resource, payroll and procurement systems, as well as lower operational costs, school districts are reviewing how to modernize their current legacy or disjoint enterprise resource planning (ERP) systems. Tight fiscal environments are also driving many districts to pursue cooperative ERP strategies that facilitate greater transparency of their costs and enable better decision making across their organizations. In this model, the concept of total cost of ownership of the software, hardware information systems and data through direct strategic department investment and that of the total cost of ownership of the business interest supported through an infrastructure delivery model to achieve the mission of the district. Benefits of a cloud managed IT Portfolio: improved decision making, strategic alignment, business integration, business flexibility, reduced IT cost base, enhanced management of academic and operational spending, funding, improved quality. | Columbus City Schools | 100 | 91 to 180 days | \$2,500,000 |
| Montgomery | Screening Center for Osteoporosis/CPET Testing | Centralized location offering mobile to fixed screening for Osteoporosis and pre-clinical assessment for coronary and related lung conditions. | Allied Health, Inc. | 30 | 0 to 30 days | \$500,000 |
| Montgomery | City of Dayton Wi-Fi Mesh Network Project | Wellness program for the prevention and control for cardiac and bone related abnormalities. Municipal Wi-Fi Mesh system for the City of Dayton, OH. This is an existing 10 year contract recently awarded to HarborLink Network to own, operate and maintain such an infrastructure. The build-out and support of city-wide wireless mesh / smart grid systems. The network consists of both licensed and unlicensed radio frequency - Unlicensed 2.4GHz for consumer, 5.4GHz for industrial and commercial applications. - Licensed 4.9GHz for Public Safety and First Responders A city-wide system will support such business and government applications as: - Free Wi-Fi access for citizens, Web browsing and next generation phone support. A step toward total digital inclusion. - AMR (Automated Meter Reading) for Water, Electric, Gas, and other "Smart Grid" automated metering systems. - Public Safety Mobile Access. - Last mile access where traditional bandwidth is limited/unavailable. - Homeland Defense/Public Safety Monitoring and location tracking. - Mobile Permitting. - Future location based "convergence type" services. - Economic Development infrastructure for the future - Entice "Creative Class" to live and stay in the region. Family medicine urgent care centers an "Family Practice Residency" services in the Dayton area also in urgent care, we envision including pre-medical, medical, residency, fellowship, and post-graduate levels. Efficiency of academic operation will be realized by placing all resources under one roof. 30 Family Practice residents will be in training at this site. | HarborLink Network, Ltd. | 20 | 0 to 30 days | \$5,000,000 |
| Montgomery | Family Medicine Dayton Initiative | As part of our training program, approximately 20,000 patients will receive their primary healthcare in this center. A broad range of services will include patient care by a primary care physician, counseling, lab and x-ray, pharmacy, nutrition, and patient education with an emphasis on wellness and chronic disease management. All education and patient care will be based on the Patient-Centered Medical Home Model. An advanced electronic health record will be utilized, team care will be practiced, same day access to care and enhanced coordination of healthcare decision-making with patients will be integrated into the design and operation of this center. | Family Medicine Dayton | 150 | 181 days or more | \$35,681,415 |
| Montgomery | Village of Farmersville-East Center Street Improve | Reconstruct Approx. 830' of depleted roadway, add 1660' curbs and 4430 ± l.s. sidewalk, replace 850' underseal waterlines, remove hazardous hill causing sight distance issues within the residential area. Provide handicap accessible ramps and install 1100' storm sewers | Beals-Moore & Assoc. | 10 | 31 to 90 days | \$270,000 |
| Montgomery | Kettering Business Park Redevelopment - Site Prepa | Description of Project This project involves the demolition of Building #2, a former warehouse of approximately 200,000 square feet, and the proposed reconstruction of Constitution Road, a 1.275' long street, which will include pavement with curbs, sidewalks, street lighting, street trees, water, and storm. Gas and electricity are already installed. The work will also include extending an 8" sanitary sewer approximately 800 feet. The proposed reconstruction of Constitution Road will provide improved traffic access and utility service to approximately 22 acres in the northeast corner of KBP. Proposed Budget, Income Sources and how monies will be spent The proposed budget for this work is \$1.9 Million, which includes \$790,000 for building demolition and \$1.12 Million for road and utility construction. The City is requesting \$1.9 Million in incentive monies. The incentive monies are needed for this project to come to fruition. All incentive monies will be spent on the project building, the roadway and associated utility construction. If a viable user for Building #2 is found before . | City of Kettering | 300 | 181 days or more | \$1,949,000 |
| Montgomery | College Drive entry to Founders Drive (Located in | Description of Project This project will involve the construction of a 37' lsb roadway with curb, sidewalk, street-lighting, bridges and landscaping at the Miami Valley Research Park. This construction will complete the northern loop road, which will open approximately fifty acres within the Research Park for future development. Proposed Budget, Income Sources and how monies will be spent The proposed budget for this work is \$1,100,000 and is for the construction of the roadway. At this time the incentive monies are needed to allow this project to come to fruition. All monies will be spent on the roadway construction. Project partners, sponsors, and supporters This project would be done in close cooperation with the Miami Valley Research Foundation, the Ohio Department of Development (who has previously made investment in the Park), Montgomery County and the City of Kettering. | City of Kettering | 400 | 181 days or more | \$1,100,000 |
| Montgomery | Kettering Business Park - Smart Office Building Re | How jobs will be created as well as other community benefits Approximately 700 jobs would be created for a year as a result of the construction. This figure comes from the estimates from the Governor's Council on Economic Recovery (CER) Report. Description of Project The goal is to move Building #2 successfully into the private sector. To do so we propose to upgrade the 200,000 square foot structure to make it a viable contender in the real estate market. The renovation will include upgrading the exterior, insulating the roof membrane, upgrading the protection, and getting the interior ready for "move-in" status. Exterior improvements include site upgrades to the access street including curbs and sidewalk, street trees and streetlights. Proposed Budget, Income Sources and how monies will be spent The estimated budget is \$5,000,000. To do the project in a timely manner we request the \$5 Million in incentive monies. All monies will be spent on renovation with emphasis on energy efficiency. Project partners, sponsors, and supporters The sponsors are the City of Kettering and the Kettering Development Corporation How jobs will be created as well as other community benefits The full use of the building could generate 700 new jobs | City of Kettering | 700 | 181 days or more | \$5,000,000 |

|----------------|--|---|-------------------|----------------|--------------------|---------------------------|
| Montgomery | Wilmington Pike Resurfacing - Beavertown to South | The Wilmington Pike Resurfacing - Beavertown to South Corp. Line project begins at Beaverton Drive (just south of East Dorothy Lane) and extends southward to the City corporation line at Brown Road. Improvements to Wilmington Pike will include the following items: 1 A 3-inch mill and overlay of the existing asphalt surface course. Once the underlying concrete has been exposed, a large quantity of deteriorated concrete panels and joints will be replaced. Before resurfacing the road, a Stress Absorbing Membrane Interlayer (SAM) will be applied over the existing concrete base to help prevent reflective cracking. The new asphalt surface course will have new thermoplastic pavement markings and raised pavement markers. 2 Replacement of deteriorated concrete curbs, sidewalks, and drive approaches along Wilmington Pike. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$2,470,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. New jobs will be created as well as other community benefits. | City of Kettering | 116 | 181 days or more | \$2,470,000 |
| Montgomery | Wilmington Pike Resurfacing - Smithville to North | The Wilmington Pike Resurfacing - Smithville to North Corp. Line project begins at the intersection of Smithville Road and Wilmington Pike and extends northward to the City corporation line with the City of Dayton. Improvements to Wilmington Pike will include the following items: 1 A 3-inch mill and overlay of the existing asphalt surface course. Once the underlying concrete has been exposed, a large quantity of deteriorated concrete panels and joints will be replaced. Before resurfacing the road, a Stress Absorbing Membrane Interlayer (SAM) will be applied over the existing concrete base to help prevent reflective cracking. The new asphalt surface course will have new thermoplastic pavement markings and raised pavement markers. 2 Replacement of deteriorated concrete curbs, sidewalks, and drive approaches along Wilmington Pike. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$380,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. | City of Kettering | 18 | 31 to 90 days | \$380,000 |
| Montgomery | Dorothy lane & Wilmington Pike Intersection Improv | The Dorothy Lane & Wilmington Pike Intersection Improvements Project involves the complete reconstruction of the intersection, with new pavement curb, sidewalks, storm sewer, street lighting, and traffic signals. Along East Dorothy Lane, the project extends from Hag Ave. to Hubert St., a distance of approximately 1,400 feet. Along Wilmington Pike, the project extends from Beaverton Drive to Jaybee Court, a distance of approximately 1,300 feet. A loop road on the northeast quadrant of the intersection will be constructed to connect Wilmington Pike to Hag Ave., to allow traffic southbound from the westbound Dorothy traffic bypass the intersection. On Wilmington Pike, a third through lane will be added for several hundred feet north and south of the Dorothy intersection to increase traffic capacity of the intersection. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$5,850,000 2 Federal (SAFETEA-LU): \$3,152,000 3 Ohio Public Works Commission: \$1,236,000 4 City of Kettering: \$262,000 | City of Kettering | 273 | 181 days or more | \$1,200,000 |
| Montgomery | West Avenue - Delta to Gaylord | This project will involve the reconstruction of West Avenue, from Gaylord Avenue to Delta Avenue, in the Wilkes Creek neighborhood of Kettering. This project is desirable because it would open up a portion of the city-owned former Gentile Air Force Station to redevelopment into single-family home construction and the development of a new city park, as well as improve the traffic circulation within the Wilkes Creek neighborhood. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$660,000 (Kettering-funded) Project partners, sponsors, and supporters No outside partners or sponsors are anticipated for this project, however the City has been in negotiations with a developer to purchase land inside the former Gentile Air Force Station to develop single-family homes, and this project would support the adjacent development. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 32 jobs. | City of Kettering | 32 | 181 days or more | \$680,000 |
| Montgomery | Wiles Drive Extension | This project will involve the extension of Wiles Drive, from its intersection with West Avenue to the intersection of Peach Orchard Drive and Aspen Drive. This project is desirable because it would open up a portion of the city-owned former Gentile Air Force Station to redevelopment into single-family home construction and the development of a new city park, as well as improve the traffic circulation between the Wilkes Creek neighborhood and the Oak Park neighborhood. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$1,000,000 (Kettering-funded) Project partners, sponsors, and supporters No outside partners or sponsors are anticipated for this project, however the City has been in negotiations with a developer to purchase land inside the former Gentile Air Force Station to develop single-family homes, and this project would support the adjacent development. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 47 jobs. | City of Kettering | 47 | 181 days or more | \$1,000,000 |
| Montgomery | Kettering Blvd. - Hoyle to South Corp. Line | Description of Project This project will involve the resurfacing of Kettering Blvd., from Hoyle to the South Corporation Line at Brown Road, with new asphalt pavement. The existing curb on the west side of the road will be completely replaced, and spot repairs will be made to the existing curb and drive approaches on the east side of the road. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$140,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 7 jobs. | City of Kettering | 7 | 181 days or more | \$140,000 |
| Montgomery | South Dixie Reconstruction - Phase III | Description of Project This project will involve the complete reconstruction of South Dixie Highway, from the intersection with Dorothy Lane to approximately 400 feet north of Cardington Road. New pavement curb, sidewalks, storm sewer, and street lighting will be constructed. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$1,717,000 2 Federal (SAFETEA-LU): \$1,366,000 3 Proposed Federal Stimulus Request: \$357,000 Project partners, sponsors, and supporters The City of Kettering is partnering with the Miami Valley Regional Planning Commission and the Ohio Department of Transportation on this project. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 81 jobs. | City of Kettering | 81 | 181 days or more | \$357,000 |
| Montgomery | Farrer Blvd. Repair | Description of Project The Farrer Blvd. Repair project begins at Whitlock Place and extends eastward to Woodman Drive. Improvements to Farrer Blvd. will include a 2-inch mill and overlay of the existing asphalt surface course, and repairs to deteriorated concrete pavement panels and joints. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$450,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 21 jobs. | City of Kettering | 21 | 181 days or more | \$450,000 |
| Montgomery | Glenary Drive Repair | Description of Project The Glenary Drive Repair project begins at East Strony Road and extends westward to the entrance to the Kettering Recreation Complex. Improvements to Glenary Drive will include a 2-inch mill and overlay of the existing asphalt surface course, and repairs to deteriorated concrete curb and drive approaches, and safety enhancements for pedestrians and school-aged children attending the adjacent elementary and middle schools. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$220,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 10 jobs. | City of Kettering | 10 | 181 days or more | \$220,000 |
| Montgomery | Woodman Drive Resurfacing - Danube to Rainbow | Description of Project The Woodman Drive Resurfacing project begins at Danube Ct. and extends northward to Rainbow Drive. Improvements to Woodman Drive will include a 2-inch mill and overlay of the existing asphalt surface course, and repairs to deteriorated concrete panels and joints. Proposed Budget, Income Sources and how monies will be spent 1 Construction: \$700,000 (Kettering-funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. New jobs will be created as well as other community benefits. Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 33 jobs. | City of Kettering | 33 | 181 days or more | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Traffic Signal Rebuild - Bigger & Rahn | <p>Description of Project This project will involve the replacement of the existing span-wire traffic signal with a new mast-arm signal at the intersection of Bigger Road and Rahn Road. The new signal will have state-of-the-art LED vehicle and pedestrian fixtures, new controller equipment, and will be interconnected to the City's fiber optic communication system. Proposed Budget, Income Sources and how monies will be spent Construction: \$125,000 (Kettering Funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 6 jobs</p> | City of Kettering | 6 | 181 days or more | \$125,000 |
| Montgomery | Traffic Signal Rebuild - Whipp & Bigger | <p>Description of Project This project will involve the replacement of the existing span-wire traffic signal with a new mast-arm signal at the intersection of Bigger Road and Whipp Road. The new signal will have state-of-the-art LED vehicle and pedestrian fixtures, new controller equipment, and will be interconnected to the City's fiber optic communication system. Proposed Budget, Income Sources and how monies will be spent Construction: \$125,000 (Kettering Funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 6 jobs</p> | City of Kettering | 6 | 181 days or more | \$125,000 |
| Montgomery | Vale Bridge Replacement | <p>Description of Project This project will involve the replacement of the existing bridge that carries Vale Drive over the Little Beaver Creek. The existing bridge is a 3-span steel truss that is a debris trap due during high water events that impedes the flow of water, and occasionally causes minor flooding. The new bridge will be a single span concrete box beam bridge, which will eliminate the debris problem. The existing bridge is rated as structurally deficient. Proposed Budget, Income Sources and how monies will be spent Construction: \$600,000 (Kettering Funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 28 jobs.</p> | City of Kettering | 28 | 181 days or more | \$600,000 |
| Montgomery | Burchdale Bridge Replacement | <p>Description of Project This project will involve the replacement of the existing bridge that carries Burchdale Street over the Little Sugar Creek. The existing bridge is a metal arch culvert that is rated as structurally deficient. The new bridge will be a single span concrete arch culvert. Proposed Budget, Income Sources and how monies will be spent Construction: \$250,000 (Kettering Funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 12 jobs.</p> | City of Kettering | 12 | 181 days or more | \$250,000 |
| Montgomery | Prugh Woods Drive | <p>Description of Project This project will involve the construction of a new road, Prugh Woods Drive, from East Dorothy Lane to the Kettering Recreation Complex. The road will become the primary access point to the Recreation Complex, thus removing a large amount of traffic from the existing residential streets that are currently used to access the Complex. The road will also open up approximately 5 acres of land for redevelopment into residential housing. Proposed Budget, Income Sources and how monies will be spent Construction: \$1,000,000 (Kettering Funded) Project partners, sponsors, and supporters The project has no proposed partners, sponsors, or supporters besides the City of Kettering. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 47 jobs.</p> | City of Kettering | 47 | 181 days or more | \$1,000,000 |
| Montgomery | West David Road - Overland Trail to Far Hills Ave | <p>Description of Project This project will involve the reconstruction of West David Road, from Overland Trail to Far Hills Ave. The portion of this project between Overland Trail to Twilight Hill Drive will include complete reconstruction of the existing roadway, with new curbs, pavement, sidewalks, and storm sewers. The portion of this project between Twilight Hill Drive and the Hills Ave. will include a 2-inch mill and overlay of the existing roadway. The portion of this road that is slated for reconstruction as a part of this project is of substandard width and condition to carry the existing vehicular and pedestrian traffic volumes in as safe a manner as possible. This project proposes to increase the width of the roadway to accommodate existing traffic volumes and anticipated future traffic volumes in order to maintain the roadway's current Level of Service in the future and provide a safe means of travel for vehicles and pedestrians using the roadway. Proposed Budget, Income Sources and how monies will be spent Construction: \$900,000 (Kettering Funded)</p> | City of Kettering | 42 | 181 days or more | \$900,000 |
| Montgomery | Research Park (Light) Pole Replacement (Miami Vall | <p>Description of Project This project will involve the installation of new street light poles to replace poles that are near end of useful service. Street Poles will be replaced with aluminum poles. Proposed Budget, Income Sources and how monies will be spent The proposed budget is \$220,000, which we need to be Incentive Monies. The Bid documents and project management would be by Kettering Engineering Department. Project partners, sponsors, and supporters The project is proposed to be managed by City of Kettering in support of the Miami Research Park. To do the project in a timely manner outside funds are needed. All of the outside incentive monies would be used for the lighting. How jobs will be created as well as other community benefits Based on Federal job creation estimate methodology of 47,000 jobs created per \$1 billion investment, it is estimated that this project will create approximately 10 jobs. The presence of lighted streets contributes to success of the Miami Valley Research Park to maintain existing Milare Electronic Supply Station</p> | City of Kettering | 10 | 181 days or more | \$220,000 |
| Montgomery | Gentle Park Construction - 13 acer neighborhood p | <p>Description of Project This project will involve the construction of a 13-acre neighborhood park. The site is part of the southern tip of the former DFAS military supply depot that was closed with ownership transferred to the City of Kettering. The City will contract for the park design with the City to manage actual bidding and construction. Proposed Budget, Income Sources and how monies will be spent The proposed budget is \$220,000, which we need to be Incentive Monies. The Bid documents and project management would be by Kettering Engineering Department. Project partners, sponsors, and supporters The project is proposed to be designed, installed and managed by City of Kettering in support of the community. The continued upkeep of the facility will be taken on by the City of Kettering with potential of neighborhood partners. To do the project in a timely manner outside funds are needed. All of the outside incentive monies would be used for actual park construction. Milare Electronic Supply Station</p> | City of Kettering | 62 | 181 days or more | \$220,000 |
| Montgomery | Wiles (Creek) Greenway Construction | <p>Description of Project This project will involve making a former everson creek channel into a public park greenway. The greenway will include playground areas, picnic shelters, and regrading of the channel to make it accessible to pedestrians and bike traffic. The Greenway will provide both a visual and a walking link between the neighborhood and the new 13-acre Gentle Park to be constructed at the west end of the Greenway. Ownership, management and care of the Greenway will be by the City of Kettering. This project will make a disintegrated facility a City entity and give City direct management over it. Proposed Budget, Income Sources and how monies will be spent The proposed budget is \$400,000, which we need to be Incentive Monies. The Bid documents and project management would be by Kettering Engineering Department with management and care to be by the Kettering Parks and Recreation Department. Project partners, sponsors, and supporters To 1 year contract (Monthly awarded) 50 HarbortLink network to own, operate and maintain such an infrastructure. This contract allows for HarbortLink to utilize any and all City owned assets and fiber to enable all services.</p> | City of Kettering | 18 | 181 days or more | \$400,000 |
| Montgomery | City of Dayton Municipal Wi-Fi Mesh / Smart-Grid P | <p>There currently is a AMR (Automated Meter Reading) Water Meter project approved by the City of Dayton to leverage the both coming wireless network. Numerous other energy applications can take advantage of this infrastructure as well i.e. Partnership with DP&L, etc. This system would require approximately 35 nodes per square mile for complete coverage of area. HarbortLink also has contracts with the following cities for the same infrastructure: Camarillo, OH Oakwood, OH Vandalia, OH Springfield, OH Wilmington, OH Grove City, OH Springboro, OH Other cities pending Ohio Universities and Colleges - Sinclair, Wright State, Clark State, Youngstown State, Wittenberg & The Ohio State University</p> | HarbortLink Network, Ltd. | 20 | 0 to 30 days | \$5,000,000 |
| Montgomery | Triage Database | <p>Utilizing the IBM Dynamic Object Oriented Requirements Systems (DOORS) to create a triage database that will be available at no cost to emergency rooms and walk in clinics. Data can be entered during transportation to the health care facility to reduce waiting time and improve accurate treatment options.</p> | Multi-Modal Diagnostics, LLC | 1 | 0 to 30 days | \$25,000 |
| Montgomery | Restoration of Historic Chapel on Dayton VA Campus | <p>This project restores for adaptive reuse the National Home for Disabled Volunteer Soldiers Campus Home Chapel. Once this facility and the three other (Platt Library, Headquarters & Veterans Club) are restored they will comprise the National Veterans Museum, Education Center and Conference Facility. We believe these projects when completed will provide the western underpinning for a historic corridor running from the Dayton VA Medical Campus in the west to the Huffman Prairie in the east. This historic corridor should dramatically expand historic tourism in this region.</p> | American Veterans Heritage Center | 470 | 31 to 90 days | \$3,222,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|----------------------------------|----------------|--------------------|---------------------------|
| Montgomery | County Administration Bldg Extend 3 elevators to M | Extend 3 elevators to Mezz and lower level and remove escalators. Elevator access is necessary for Board of Elections, Coroner Crime Lab, Jail, Mainroom, Loading Dock and other tenants on these levels. Currently only one elevator accesses these floors and the escalators are high maintenance and a safety issue. | Montgomery County Public Works | 25 | 91 to 180 days | \$900,000 |
| Montgomery | Annual Road Rehabilitation, ST-2 | Rehabilitation of 21 centerline miles of existing City streets/roads. Removal and replacement of existing pavement; curb, gutter and sidewalk. Inspection and painting of the interior and exterior of a 2 MG elevated water storage tank erected in 1959. Any required maintenance identified when the tank is out of service for painting will be addressed at that time. | City of Trotwood | 9 | 31 to 90 days | \$1,000,000 |
| Montgomery | Centerville Tank Painting | Rehabilitation of 21 centerline miles of existing City streets/roads. Removal and replacement of existing pavement; curb, gutter and sidewalk. Inspection and painting of the interior and exterior of a 2 MG elevated water storage tank erected in 1959. Any required maintenance identified when the tank is out of service for painting will be addressed at that time. | Montgomery County Water Services | 15 | 181 days or more | \$275,500 |
| Montgomery | Olive Road, ST-1 | Olive Road from Salem Avenue to Main Street. Approx. 4 lanes, including curb/gutter/sidewalk. Approx. 10,400 linear feet (centerline). Improvements of an existing avenue in the City of Trotwood. Improvements include approx. 4 lanes with curb/gutter/sidewalk and raised median. Total length is approx. 8,100 linear feet. | City of Trotwood | 35 | 31 to 90 days | \$3,995,000 |
| Montgomery | Wolf Creek Pike, Phase I, ST-1 | Olive Road from Salem Avenue to Main Street. Approx. 4 lanes, including curb/gutter/sidewalk. Approx. 10,400 linear feet (centerline). Improvements of an existing avenue in the City of Trotwood. Improvements include approx. 4 lanes with curb/gutter/sidewalk and raised median. Total length is approx. 8,100 linear feet. | City of Trotwood | 26 | 31 to 90 days | \$2,861,000 |
| Montgomery | Administrative Building Public Parking Garage | Existing garage to be extended vertically 2 levels adding 400 additional cars to the current capacity of 800. Additional parking is necessary to accommodate visitors and employees at the Montgomery County Downtown Campus which includes a new Juvenile Justice Center and a renovation of a building to consolidate Adult Probation into a secure central facility. Design complete, project is ready to bid in two months. | Montgomery County Public Works | 150 | 91 to 180 days | \$6,000,000 |
| Montgomery | Administration Building Security Improvements Publ | To provide for cameras, DVR's, card access, gate control, door control, emergency stations in the above ground parking garage. | Montgomery County Public Works | 3 | 31 to 90 days | \$450,000 |
| Montgomery | Administration Building Security Improvements Bul | To provide new or replacement cameras, DVR, card access and emergency stations in the County Admin Building. This will include the Child Care Center, the green space and renovating the Security Office. | Montgomery County Public Works | 1 | 31 to 90 days | \$300,000 |
| Montgomery | Administration Building Security Improvements Empl | To provide for cameras, DVR's, card access, gate control, door control, emergency stations in the underground parking garage. | Montgomery County Public Works | 1 | 31 to 90 days | \$330,000 |
| Montgomery | Administration Building Penthouse/Mechanical Room | Replacing 7,000 sf of roof. Current roof is over 10 years old and coating is deteriorating. Parts of insulation are wet. | Montgomery County Public Works | 20 | 0 to 30 days | \$110,000 |
| Montgomery | Administration Building Employee Parking Garage | 40 year-old 400 car parking garage requires concrete patching of delaminated concrete and sealing of concrete decks to prevent further penetration. | Montgomery County Public Works | 15 | 91 to 180 days | \$230,000 |
| Montgomery | Center for Adolescent Services Build Maintenance B | Build a 1,000 of free-standing structure to house bi-lab, operation including storage and a workshop. | Montgomery County Public Works | 10 | 91 to 180 days | \$75,000 |
| Montgomery | Development of an Integrated Fuel Cell Forklift Tr | Prototype driven by the patented fuel cycle to optimize the energy. This will assess the selection of components, current fuel cell components suppliers, create a system model of the truck to validate the model, create a test bench to evaluate components. The product deliverable is a roadmap to create an integrated fuel cell truck. | Crown Energy Corporation | 11 | 91 to 180 days | \$1,152,559 |
| Montgomery | County Child Care Renovation | Replace a total of 30 deteriorating windows and doors with new. | Montgomery County Public Works | 15 | 91 to 180 days | \$100,000 |
| Montgomery | Common Pleas Court Electrical Gear Replacement | To remove and replace the electrical switchgear in the Common Pleas Court Building. The existing switchgear is obsolete and when a repair is required, finding replacement parts is next to impossible. | Montgomery County Public Works | 10 | 91 to 180 days | \$250,000 |
| Montgomery | Coroner Crime Lab Expand Autopsy Suite | The facility needs to expand its autopsy suite to match operational needs. Every corner of the facility is being utilized and there is no room to grow without proceeding with an expansion. | Montgomery County Public Works | 250 | 181 days or more | \$4,000,000 |
| Montgomery | Benchwood Road 12" Water Main | Construction of approximately 2,800 LF of 12" water main. This will provide a needed loop in the County's northern system to increase fire flow and pressure to the Miller Lane area. Currently, main breaks in this pressure zone result in significant flow and pressure problems due to the limited looping. | Montgomery County Water Services | 39 | 181 days or more | \$290,000 |
| Montgomery | Court Services Building Demolish Interior Walls | Remove approx 56,000 of block walls previously used to divide holding cells to open up the vacant space and reuse as office space. | Montgomery County Public Works | 30 | 91 to 180 days | \$220,000 |
| Montgomery | Admin Bldg Air Handler energy retrofits | Retrofit air handling units, add fan controls and heat recovery to air handlers to increase operating efficiency. | Montgomery County Public Works | 8 | 91 to 180 days | \$300,000 |
| Montgomery | Court Services Building Renovation for Adult Proba | Renovates 26,000 sf of office space to consolidate Adult Probation from various locations. | Montgomery County Public Works | 200 | 91 to 180 days | \$2,000,000 |
| Montgomery | Main Street (Centerville) Water Main Replacement | Replacement of approximately 2,100 LF of 8" cast iron water main with 8" ductile iron pipe. The existing main is aging and deteriorating to the point where it experiences numerous main breaks each year. It is located in a highly populated area. | Montgomery County Water Services | 39 | 181 days or more | \$400,000 |
| Montgomery | Admin Bldg Lighting/fan controls for employee park | Add lighting and fan controls to reduce energy use. | Montgomery County Public Works | 3 | 91 to 180 days | \$50,000 |
| Montgomery | Courthouse Square Concrete Paving Repairs | Replace approx. 70,000 sf of deteriorating brick & concrete paving in central business districts most used public space. To include upgrades for lighting, sound system, public restrooms, and shaded gathering areas. | Montgomery County Public Works | 100 | 181 days or more | \$1,500,000 |
| Montgomery | Dayton Montgomery County Court Building Fire Alarm | To replace the obsolete and failing the alarm system with a new addressable alarm system with mass notification, severe weather alerts and integration into the building security system. | Montgomery County Public Works | 5 | 91 to 180 days | \$250,000 |
| Montgomery | Admin Building Public Garage lighting and energy m | Add lighting controls to garage to limit electricity use and conserve energy. | Montgomery County Public Works | 3 | 91 to 180 days | \$50,000 |
| Montgomery | County Fairgrounds Repairs & Maintenance | Replacing 3,500 sf of deteriorating roads. 24 structures require various levels of residing, caulking, painting and sealing. Pathways and roadways need paving, landscaping to improve appearance. | Montgomery County Public Works | 45 | 31 to 90 days | \$630,000 |
| Montgomery | Animal Resource Center Energy Management Improve | Add energy management controls to fans, diffusers, and boilers to reduce energy use. | Montgomery County Public Works | 5 | 91 to 180 days | \$75,000 |
| Montgomery | Haines Center Site Master Plan | Construction of five nuisance structures and the excavation to turn the campus to a park like setting to include an area for outdoor supervised and non-supervised visitations. | Montgomery County Public Works | 30 | 91 to 180 days | \$1,500,000 |
| Montgomery | Historic Courthouse Renovation | Phase II would complete the second floor to include restoration of 6 upstairs rooms, new plaster, paint, flooring and interior details. Exterior would include new stone steps & retaining wall restoration. | Montgomery County Public Works | 20 | 181 days or more | \$700,000 |
| Montgomery | Child Care Central Chiller water hook up | Connect cooling coils to central chilled water plant. | Montgomery County Public Works | 5 | 31 to 90 days | \$65,000 |
| Montgomery | Jail Roof Replacements | Replacing 24,000 sf of EPDM roof. Roof is over 18 years old and needs new flashing. Many areas currently leak. Project is ready to begin. | Montgomery County Public Works | 10 | 0 to 30 days | \$350,000 |
| Montgomery | Western Regional Biosolids Process Improvements | Modify existing sludge thickener tanks at the Western Regional Water Reclamation Facility to improve sludge thickening. Upgrade the process water system, install a new steam collector and concentrator. These modifications will increase the sludge solids volume by 50%. | Montgomery County Water Services | 20 | 181 days or more | \$1,700,000 |
| Montgomery | Child Care Boiler replacement | Replace boilers with energy efficient models. | Montgomery County Public Works | 3 | 91 to 180 days | \$50,000 |
| Montgomery | Common Pleas Court Air Handler energy retrofits an | Retrofit air handling units with fan controls and heat recovery to increase operating efficiency. | Montgomery County Public Works | 8 | 91 to 180 days | \$200,000 |
| Montgomery | Common Pleas Court Building Caulk and Seal exterie | Remove and replace weather-protection caulk and seal limestone facades. | Montgomery County Public Works | 3 | 91 to 180 days | \$250,000 |
| Montgomery | Coroner Crime Lab Exhaust Fan replacement and Heat | Replace exhaust fans with new models and implement heat recovery options to increase operating efficiency. | Montgomery County Public Works | 8 | 91 to 180 days | \$200,000 |
| Montgomery | Coroner Crime Lab Boiler Replacement | Replace existing boilers with energy-efficient models. | Montgomery County Public Works | 8 | 91 to 180 days | \$100,000 |
| Montgomery | Arthur O Fisher Park Repairs | The existing 200 acre park needs infrastructure repairs. Permanent overlays for roadway and parking lots, repairs and attention to the three existing ponds and repairs to the barn, and headquarters building. | Montgomery County Public Works | 20 | 91 to 180 days | \$325,000 |
| Montgomery | Court Services Building Caulk & Seal Exterior and R | Weatherstrip/Remove and replace caulking and seal exterior limestone facades. replace 180 aluminum 50 year old single-paned windows. Construction of a 14" diameter bypass sewer to direct effluent flow at the Western Regional Water Reclamation Facility to the upgraded 2nd stage effluent. Convert the bypassed 1st stage facilities to a storm water holding facility. Wet weather flows will be equalized in the converted 1st stage tanks, then allowed to flow through the treatment process in a controlled manner, without the loss of bacterial matter that was previously experienced due to flooding. | Montgomery County Public Works | 15 | 31 to 90 days | \$415,000 |
| Montgomery | Western Regional Influent Sewer to Second Stage. | Replacing 1,000 sf of T-shingled roof. This type of shingle is obsolete and they are deteriorating. The roof is approx. 18 years old. Add 1,200 of storage facility for equipment and vehicles. | Montgomery County Water Services | 32 | 181 days or more | \$1,500,000 |
| Montgomery | Nicholas Treatment Center Roof, Garage/Storage Str | Replacing 1,000 sf of T-shingled roof. This type of shingle is obsolete and they are deteriorating. The roof is approx. 18 years old. Add 1,200 of storage facility for equipment and vehicles. | Montgomery County Public Works | 5 | 31 to 90 days | \$50,000 |
| Montgomery | Court Services Building HVAC controls/control to D | Replace Energy Management system controls from pneumatic to direct digital control. Commission HVAC system for operational change from reception center to Office use. | Montgomery County Public Works | 5 | 91 to 180 days | \$100,000 |
| Montgomery | Madison Lakes Park Repairs | The existing 60 acre park needs infrastructure upgrades, paving overlays, new parking lot lights and building repairs. | Montgomery County Public Works | 15 | 91 to 180 days | \$200,000 |
| Montgomery | Western Regional Tertiary Filter Rehabilitation | Replace existing valves and rehabilitate 24 existing battery filters at the Western Regional Water Reclamation Facility. The existing valves are failing. 6 locations not easily accessed, and 6 of the end of their useful life. | Montgomery County Water Services | 15 | 91 to 180 days | \$2,400,000 |
| Montgomery | Art Van Atta Park Repairs | The existing 150 acre park is in need of infrastructure repair. Paving overlays, playground equipment replacement, building repairs, and pond repairs and aeration. | Montgomery County Public Works | 15 | 91 to 180 days | \$200,000 |
| Montgomery | High Sulfur Fuel (Natural Gas & JP8) for Fuel Cell | EMTEC proposes to conduct a multi-project program to invest in natural gas desulfurization technologies that have near term commercialization and job creation potential. EMTEC is currently managing a targeted aviation hydrogen infrastructure development program with DOE funding. Implementing desulfurization technology would leverage this program and would allow fuel cell use of Ohio's high sulfur content natural gas. Several projects will reduce the cost of sulfur removal for low temperature fuel cells (PEM) and provide Proton Exchange Membrane (PEM) fuel cells. The "near zero" sulfur hydrogen for fuel to prevent contamination of the fuel cell stack. Other projects will increase sulfur tolerance for high temperature fuel cells (SOFC). Several EMTEC collaborators have demonstrated promising technology for increasing fuel flexibility and sulfur tolerance of Solid Oxide Fuel Cells (SOFC). | EMTEC | 140 | 31 to 90 days | \$5,000,000 |
| Montgomery | County Engineer Traffic Light upgrade to LED | Convert traffic control signals to LED lighting for maintenance and energy savings. | Montgomery County Public Works | 6 | 91 to 180 days | \$130,000 |
| Montgomery | Purchasing Warehouse | 10,000 of warehouse structure having secure equipment and furniture will be replaced as part of a renovation or dispositioned through auction requires immediate improvements to the siding, roofing, HVAC and site. | Montgomery County Public Works | 20 | 91 to 180 days | \$500,000 |
| Montgomery | County Engineer HVAC Upgrade operations Center | Retrofit the HVAC system with energy controls for energy savings. | Montgomery County Public Works | 12 | 91 to 180 days | \$600,000 |
| Montgomery | Madison Lakes Expansion & Improvements Phase I | To open an additional 100+ acres adjacent land can be developed. Phase I - road and parking facilities and pathways, site utilities, restrooms, site access, picnic ground and amenities. | Montgomery County Public Works | 70 | 181 days or more | \$1,500,000 |
| Montgomery | Madison Lakes Expansion & Improvements Phase II | Phase II - overall lake improvement including additional dock, fishing piers, habitat improvement, etc. | Montgomery County Public Works | 20 | 181 days or more | \$300,000 |
| Montgomery | County Jail Computer Room Cooling unit replacement | Replace Computer Room AC with more efficient model to reduce electricity use. | Montgomery County Public Works | 6 | 31 to 90 days | \$120,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Western Regional Clarification Facilities Rehabil | Upgrade the existing clarifier sludge removal system at the Western Regional Water Reclamation Facility. This upgrade will result in better control of the return activated sludge flow and a more effective treatment process. | Montgomery County Water Services | 22 | 181 days or more | \$2,910,000 |
| Montgomery | Madison Lakes Expansion & Improvements Phase III | Phase II - add a second access and picnic area from Holler Road | Montgomery County Public Works | 20 | 181 days or more | \$400,000 |
| Montgomery | Developing Energy Storage Materials for Alternativ | This effort will create twenty Ohio-based leading-edge technology projects @ \$300k per project with an additional 1 to 1 match - Total \$12 million plus initiative. EMTEC will administer the effort using its expertise in awarding competitively vetted projects which target near-term commercialization for energy storage technologies focusing on three areas: Electrolytic capacitor advancements - \$4 million (incl. one to one match); Advanced flow battery technologies - \$4 million (incl. one to one match); Hybrid ultracapacitor applications - \$4 million (incl. one to one match). Proposals will be evaluated using the technical review process established for EMTEC's core technology programs. Initial projects will start within 1 month and will have a duration of at least one month. Economic Impact: This effort will generate over 150 jobs with substantial hours spend commensurate potential and builds Ohio know-how in key transformative technologies. Energy storage technologies will diversify the power requirements for transportation & will generate high-wage job growth in Ohio. These are key technologies that will help diversify and decentralize America's energy mix. | Edison Materials Technology Center | 150 | 0 to 30 days | \$6,000,000 |
| Montgomery | DMCC Energy Efficient Boiler | Replace boilers with energy-efficient models to reduce energy use. | Montgomery County Public Works | 5 | 91 to 180 days | \$100,000 |
| Montgomery | Reibold Building Roofs & Facade Restoration | Re-roofed roofs need replacement and terra cotta ligature requires caulking & restoration. | Montgomery County Public Works | 10 | 91 to 180 days | \$155,000 |
| Montgomery | Reibold Building Fire Alarm System Upgrade & Secur | Remove the obsolete, broken fire alarm system and replace it with a new addressable fire alarm system with mass notification, separate weather alarm and integration to the building security system. Security system to provide a new access system complete with cameras, DVR's, card access, panic buttons, etc. This system will be compatible with and integrated with the County Administration Building access system. | Montgomery County Public Works | 7 | 91 to 180 days | \$180,000 |
| Montgomery | Madison Lakes Park Replace Parkinglot lights and i | Add control system and new parking lot lights for energy efficiency. Install lake-coupled geothermal HVAC system for energy savings. | Montgomery County Public Works | 8 | 0 | \$120,000 |
| Montgomery | Reibold Building Employee Parking Garage | 11 level, 800 car parking garage located in the heart of Downtown Dayton requires sealing of concrete decks, concrete repairs and caulking to properly maintain the property and curb life. | Montgomery County Public Works | 15 | 91 to 180 days | \$250,000 |
| Montgomery | Reibold Building Perimeter Leak Repairs | Replace 4,000 of old buried waterproofing. Offices occupy the lower level and leaks have occurred for several years. The sidewalk is also in bad condition. | Montgomery County Public Works | 10 | 31 to 90 days | \$250,000 |
| Montgomery | Public Health energy retrofits to Drew health Cent | Install HVAC and lighting retrofits for energy savings. | Montgomery County Public Works | 10 | 91 to 180 days | \$527,000 |
| Montgomery | Reibold Building Stairwell | The Reibold Building houses Public Health, Job and Family Services, Public Records, among other tenants which has many public visitors. Escalators from the main lobby are very old, unreliable and have been non-operational for several years. This project will remove the escalators at this level and remove the escalators for three levels above, replacing the escalators with permanent open stairs. Provide safe and maintenance free access for the tenants and visitors. | Montgomery County Public Works | 40 | 181 days or more | \$900,000 |
| Montgomery | Solid Waste South Transfer Station Stormwater Proj | The South Transfer Station is experiencing flooding from its neighbors and other site conditions. The storm detention pond is undersized/modifier to allow for the additional water flow. Re-design a certain 90' section of storm pipe to eliminate the pond. Install Moraine for storm water system and the backing up of the drainage system. This plan will also help with future site development and storm water management for these corporations. | Montgomery County Public Works | 50 | 91 to 180 days | \$600,000 |
| Montgomery | Solid Waste Transfer Stations Camera Improvements | This project has 2 purposes. The first is to provide a point of sale transaction system that will record the financial transaction and the sales stream. This data will be related to be stored on a database for a minimum of 1 year. The second is to provide the same security of the property, occupants, employees and to document activities. | Montgomery County Public Works | 6 | 91 to 180 days | \$200,000 |
| Montgomery | Solid Waste South Transfer Station Depot Replace C | This project will lower the ceiling resulting in improved lighting and less heat loss. | Montgomery County Public Works | 5 | 91 to 180 days | \$80,000 |
| Montgomery | Solid Waste North Transfer Station Culvert/Firing | Sheiff's firing range is separated in half by a drainage ditch which periodically floods causing operational difficulties. This project will complete the box culvert through the site increasing operational effectiveness. | Montgomery County Public Works | 12 | 91 to 180 days | \$325,000 |
| Montgomery | Reibold - Replace air handler units 7,9,16 | Replace units for maintenance and energy savings. | Montgomery County Public Works | 6 | 31 to 90 days | \$115,000 |
| Montgomery | Secure Transitional Offender Program Rec Area | Build a new 4,000 of outdoor recreational area. The current facility does not have a rec area and to maintain or exceed certification a separate rec area is needed. | Montgomery County Public Works | 7 | 91 to 180 days | \$150,000 |
| Montgomery | Reibold - Energy Management and air quality improv | To clean, sanitize, fumigate the ducts, air handler, diffusers, and air distribution. | Montgomery County Public Works | 8 | 31 to 90 days | \$153,000 |
| Montgomery | Reibold - Window Replacement | Replace over 300 aged and deteriorated windows for energy savings and safety. | Montgomery County Public Works | 20 | 91 to 180 days | \$1,100,000 |
| Montgomery | Electric Demand Response Program Setup | Install new meters and metering software to control electric demand in county buildings. | Montgomery County Public Works | 4 | 31 to 90 days | \$150,000 |
| Montgomery | Energy Management Control System Upgrades | Upgrade energy mgmt systems and add control software for greater energy savings. | Montgomery County Public Works | 4 | 31 to 90 days | \$100,000 |
| Montgomery | Building HVAC/Electrical Recommissioning | Recommission the building HVAC & electrical systems for proper operations and energy savings. | Montgomery County Public Works | 4 | 31 to 90 days | \$200,000 |
| Montgomery | Misc HVAC & Metering Improvements | Dora Tai, Nicholas & Parks HG - replace HVAC and add utility meters for energy savings better cost allocation. | Montgomery County Public Works | 5 | 91 to 180 days | \$63,000 |
| Montgomery | S.T.O.P. - Door and window replacement | Facility serves as a half-way house. The doors and windows need replacement for energy savings. | Montgomery County Public Works | 5 | 31 to 90 days | \$50,000 |
| Montgomery | STS - Convert fuel dispenser to natural gas | Build a compressed natural gas dispensing facility to complement the existing County Fuel Depot and convert transfer fleet of over-the-road tractor from diesel to compressed natural gas. | Montgomery County Public Works | 12 | 91 to 180 days | \$340,000 |
| Montgomery | Continuous Web Based Manufacturing of Graetzelt Sty | Web based manufacturing system utilizing the low cost Graetzelt Style solar cells has a substantial market niche where the lower efficiency is tolerated. This cell would incorporate a number of improvements including: 1. A transparent electrically conducting coating layer based on spray coating of dispersed carbon nanofibers/nanotubes onto a transparent polymer into a rolled product. 2. Bonding/laminating the electrolyte and catalyst to an aluminum foil roll. 3. Using a coating TiO2 coated electrode onto the generated in CO and producing an electrode/electrolyte rolled film. 4. Assemble and bond the transparent electrically conducting coating layer to the electrode/electrolyte rolled film. Producing a high quality, high volume product is guaranteed to making a commercially viable product at an acceptable market price. With some improvements in the installation design in the areas of connectivity and support, costs for both product and installation can be significantly reduced. | EMTEC | 48 | 0 to 30 days | \$1,000,000 |
| Montgomery | SAO - HVAC Improv. & Relocate condensing Units | Relocate A/C condensing units to better location and add energy savings. | Montgomery County Public Works | 6 | 31 to 90 days | \$96,000 |
| Montgomery | SAO - Window Replacement | Replace 120, 30 year old windows for energy savings. | Montgomery County Public Works | 14 | 91 to 180 days | \$504,000 |
| Montgomery | Stillwater - Energy Mngt & Variable speed drive im | Add variable speed drives to air handler fans for better control and energy savings. | Montgomery County Public Works | 5 | 91 to 180 days | \$71,260 |
| Montgomery | Low-cost PV manufacturing technology | Fareway Technology, Inc. proposes to provide an enabling component of Ohio's Supply Chain in Photovoltaics, by developing an innovative, low-cost manufacturing technology set for photovoltaic components, such as interconnectors, for photovoltaic cells, arrays and modules. Fareway's technology will utilize the principles of electrically-mediated processing to electrodeposit electrically conductive connectors as required on the photovoltaic layers of a photovoltaic cell or module. For deposition of non-platable materials, such as carbon nanotubes or nanoparticles, electrophoretic techniques would be utilized. In both cases, development of the deposition technology would be configured around a roll-based process for continuous manufacturing. The project would be staged with an initial demonstration phase, followed by a development phase that EMTEC would lead a commercialization phase. EMTEC would coordinate this collaborative project to partner with institutions within Ohio that specialize in photovoltaics to assist with materials selection and measurement of performance as required. | EMTEC | 28 | 0 to 30 days | \$1,000,000 |
| Montgomery | Sunrise - Chiller Replacement | Replace existing rooftop chiller with new energy efficient model. | Montgomery County Public Works | 4 | 31 to 90 days | \$80,000 |
| Montgomery | Market Street Extension Project | The Market Street Extension Project is designed to extend Market Street from the existing downtown business district to Upper Leaveling Salem Road in the City of Brookville. The project will consist of extension of water, sewer, and storm sewer utilities and street construction. The new sewer will provide city services to approximately 25 acres of undeveloped land that will be used for sites for new small businesses that will create and retain jobs. The project will also serve the proposed site for a new City of Brookville Fire Station, which is currently being designed. The street will also provide better access to the existing downtown business community and will assist economic development in that area. The total linear feet of the Market Street Extension, which includes the utility installation is 2,000 linear feet. | City of Brookville | 75 | 31 to 90 days | \$500,000 |
| Montgomery | getting back into work ethics. | This Project will hire 5 clerical staff and 2 instructors to teach the public who have been out the work force retraining, and workforce specification process. A background and credit check counseling session will be included, but my project can be explained more by my application process. | Lady C Unixex Hair Inc. | 6 | 0 to 30 days | \$350,000 |
| Montgomery | Dayton Regional Logistics and Distribution - Rail | The project will rehabilitate an existing industrial side track off of the CSX mainline and extend that sidetrack to provide rail access to the Dayton International Airport in northern Montgomery County. Approximately 1.5 miles of existing side track will be rehabilitated including the installation of new switches, construction of a run-around track and car storage siding from the CSX mainline to the rail bridge crossing I-75. An additional 1.5 mile extension will be constructed from the rail bridge crossing I-75 to the Dayton International Airport. | Montgomery County | 250 | 91 to 180 days | \$3,000,000 |
| Montgomery | Austin Center Development Infrastructure | The project will construct up to 20,000 sq ft of public roadway, water, sanitary sewer and telecom infrastructure necessary to create "shovel ready" conditions on a 142 acre parcel in the northeast corner of the Austin Center Interchange in southern Montgomery County. The project developer will construct a 120,000 SF high tech office building on the site as the first phase of the Innovation Point development. The total development is projected to encompass over 1.0 million SF when built out. The project will create 200-250 construction jobs and the office building will house between 750-1000 jobs. | Montgomery County | 1,000 | 91 to 180 days | \$6,700,000 |
| Montgomery | Phillipsburg Sanitary Sewer Construction | The project will construct approximately 15,700 feet of sanitary sewer force main and a lift station to provide sanitary sewer service to the village of Phillipsburg. The village has approximately 700 residences, and does not have any access to public sanitary sewer. The septic systems of many of the residences are experiencing difficulties, and the EPA has raised concerns regarding the lack of sanitary sewer and the potential impact the village water system. The situation has contributed to the closure of the local elementary school. | Montgomery County | 150 | 181 days or more | \$2,000,000 |
| Montgomery | Jacks Lane Sewer Plant | The package treatment plant that serves this small rural industrial park is failing. It is currently privately owned and the center is very old and unable to invest in the facility. The plant serves a small community of employees that employ 100 people and are currently unable to expand due to the inability to get permits for any additional sewer discharge. The funding would enable the Joint Economic Development District that this project is in to obtain control of the package treatment plant and upgrade the system so that the businesses would remain viable and able to expand. | Montgomery County | 100 | 91 to 180 days | \$150,000 |
| Montgomery | Public Safety & Emergency Services Facility | This project will be to replace the current 40 year old fire station that we are currently occupying. This station was originally built as a trustee meeting hall in 1950 and intended as a small volunteer fire house. Since 1999 it has been "rented" to house personnel 24 hours a day but still does not meet ADA, fire or electrical codes. This funding will be used to build a new Public Safety and Emergency services facility that will be used by both the Fire and Police Department personnel. This will increase the space from 5400 to a 20,000 sq ft facility. This building will meet all codes and provide the space needed for storage, separated shower & locker room facilities for men and women, public restrooms, training center, wellness center as well as separate sleeping quarters, just to name a few of the our current problems. I should also mention that the original apparatus bays were not originally built for the larger fire apparatus that we currently use. The clearances are measured in inches in relation to the space available when backing or pulling out of the fire station. | City of Clayton Fire Department | 30 | 181 days or more | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Alternative Energy - BioFuel - Supply Chain Databa | EMTEC will develop a comprehensive BioFuel Supply Chain database. This new database will become a compilation of Ohio companies, organizations, and contacts capable of providing materials, components, services, or expertise in BioFuel energy technologies. In developing the Fuel Cell Supply Chain Database, the Fuel Cell Institute, and utilizing our "Connect and Oversee" approach of actively engaging Ohio companies involved in and/or which could be involved in fuel cell technologies (Grants 04-48, 05-16, 06-19), EMTEC has gained extensive knowledge, expertise and a stable framework and set from which to build and expand into other alternative energies. In particular, the lessons learned from developing the existing Fuel Cell Supply Chain Database, can be used as the foundation for expanding into a similar database for BioFuel without having to completely "reinvest the wheel." Additionally, EMTEC will maintain and grow the database for five years. | EMTEC | 1 | 0 to 30 days | \$100,000 |
| Montgomery | Dayton River Corridor Handrail Replacement Project | Replace 2.8K' of steel handrail atop concrete footings in the Dayton River Corridor at various locations from Heales Street south to Tail Station Low Dam along the Great Miami River. | Miami Conservancy District, River Corridor Improve | 20 | 0 to 30 days | \$393,101 |
| Montgomery | Alternative Energy - Wind - Supply Chain Database | The existing handrail is badly rusted and no longer meets current building codes. | | | | |
| Montgomery | University of Dayton - An Urban Renewable Energy D | EMTEC will develop a comprehensive Wind Supply Chain database. This new database will become a compilation of Ohio companies, organizations, and contacts capable of providing materials, components, services, or expertise in wind energy technologies. In developing the Fuel Cell Supply Chain Database, the Fuel Cell Institute, and utilizing our "Connect and Oversee" approach of actively engaging Ohio companies involved in and/or which could be involved in fuel cell technologies (Grants 04-48, 05-16, 06-19), EMTEC has gained extensive knowledge, expertise and a stable framework and set from which to build and expand into other alternative energies. In particular, the lessons learned from developing the existing Fuel Cell Supply Chain Database, can be used as the foundation for expanding into a similar database for Wind without having to completely "reinvest the wheel." Additionally, EMTEC will maintain and grow the database for five years. | EMTEC | 1 | 0 to 30 days | \$100,000 |
| Montgomery | University of Dayton - An Urban Renewable Energy D | The University of Dayton proposes to create an urban renewable energy and sustainable center, which will include a variety of services and programs to educate the regional population, K-12 students, and university students about about renewable energy and environmental sustainability. The study to install renewable technologies will be purchased from Dayton and Ohio based companies, thereby helping to spur these industries on. | University of Dayton | 30 | 181 days or more | \$3,000,000 |
| Montgomery | Reconstruct T/W's and Apron | This project will enable the University of Dayton to achieve this mission but in a way that informs future generation of sustainable practices and renewable energy into the Miami Valley by relying upon regional strengths and renewable energy opportunities. For example, the close proximity to the Great Miami River and the underlying aquifer offers an untapped geothermal energy source. As such, it will serve as the exemplar of sustainability for the SW Ohio region. | James M. Cox Dayton International Airport | 150 | 31 to 90 days | \$8,833,615 |
| Montgomery | Fuel Cell Test Instrumentation | Reconstruct Tailways W, P, M, Z and Apron C1-A | | | | |
| Montgomery | Automotive Fuel Cell Improvement | MoundTech has a suite of fuel cell test cells with various modules and accessories for testing of PEM, SOFC, DM, and PA fuel cells and stacks. The products were introduced to the market in 2008 and we continue to develop new products. Our need for funding is to augment our marketing through additional employees of various positions: marketing, sales, advertising, and field representatives. Funding would directly and immediately produce job creation (positions are ready to be filled) and improve our market share. In turn, the increased market share will necessitate additional employment for manufacturing, support, and distribution. Market testing of the products has proven that there is a market pull technology enabling manufacturers, researchers, integrators, and educators to advance their fuel cell endeavors. MoundTech has already sold products from this line and currently has more than \$1M of high confidence proposals for the second quarter of 2009. We continue to grow our fuel cell business through multiple outlets. Building our marketing and development capabilities is a critical requirement to greater market penetration of our fuel cell technology. The funding will be used to hire a salesperson and a support person to increase our sales and support capabilities. This revenue provides new product development and customer service to permit rapid and systematic alteration of the surface energetics of the component interfaces without introducing mechanical resistance which will impact overall fuel cell efficiency. It integrates novel sensor technology and materials innovations that will improve sensor response which permits real-time control of water distribution and dynamic operation under cyclic load conditions. | Mound Technical Solutions, Inc | 45 | 0 to 30 days | \$750,000 |
| Montgomery | Putting Science to Work! | General Motors has funded the development of this technology thus far. The intellectual property is held by the University of Cincinnati, our partner in this endeavor. The Fuel Cell Chief Scientist of General Motors has issued a letter of appreciation to General Motors for the interest and assistance in the development of these technologies such that the collaboration can become a long-term endeavor. Additionally, MoundTech has a suite of fuel cell test cells with various modules and accessories for testing of PEM, SOFC, DM, and PA fuel cells and stacks. The products were introduced to the market in 2008 and we continue to develop new products. Our need for funding is to augment our marketing through additional employees of various positions: marketing, sales, advertising, and field representatives. Funding would directly and immediately produce job creation (positions are ready to be filled) and improve our market share. In turn, the increased market share will necessitate additional employment for manufacturing, support, and distribution. Market testing of the products has proven that there is a market pull technology enabling manufacturers, researchers, integrators, and educators to advance their fuel cell endeavors. MoundTech has already sold products from this line and currently has more than \$1M of high confidence proposals for the second quarter of 2009. We continue to grow our fuel cell business through multiple outlets. Building our marketing and development capabilities is a critical requirement to greater market penetration of our fuel cell technology. The funding will be used to hire a salesperson and a support person to increase our sales and support capabilities. This revenue provides new product development and customer service to permit rapid and systematic alteration of the surface energetics of the component interfaces without introducing mechanical resistance which will impact overall fuel cell efficiency. It integrates novel sensor technology and materials innovations that will improve sensor response which permits real-time control of water distribution and dynamic operation under cyclic load conditions. | Mound Technical Solutions, Inc | 50 | 0 to 30 days | \$1,000,000 |
| Montgomery | Expand infrastructure for commercial building ener | Probes are used upon new research facilities and in high schools in Montgomery County. In cooperation with the Ohio Center for Science, Education, and the Wright Patterson Air Force Base Research Labs, the Southwestern Ohio Instructional Technology Association will coordinate the interactive videoconferencing for science teachers and students. Scientists and engineers will provide assistance on that campus to students, STEM lessons will be demonstrated to teachers, and STEM fellows, university faculty and scientists will present hands-on science lessons with the students. This project will last the entire 2009-10 school year with bi-weekly presentations. The project will excite male and female students about careers in science, help develop 21st century thinking and problem-solving skills, direct students towards enrollment in Ohio's colleges and universities, and encourage them to remain in Ohio due to the many career opportunities in the Montgomery county area. | Southwestern Ohio Instructional Technology Associa | 350 | 31 to 90 days | \$650,000 |
| Montgomery | Expand Infrastructure for Industrial Energy Effci | Videoconferencing equipment would be purchased for the 37 schools along with a classroom set of probes and instruments for each school to complete the hands-on science experiments. | | | | |
| Montgomery | Educational Fuel Cell Kit | Much of the commercial office space in Ohio was constructed when energy prices were low and concerns about energy costs, environmental emissions and sustainability were not considered. Today building owners and operators face increasing pressure to reduce costs and limit environmental impact. Leadership in Energy and Environmental Design (LEED) Certification is a valuable achievement for building owners. Unfortunately, there is a lack of suitably trained engineers and technicians capable of assessing these facilities and providing recommendations as to the most cost effective and expedient corrective measures. EMTEC and the University of Dayton propose to increase the training program to increase the capacity for performing energy and environmental assessments of commercial properties and increase the number of LEED accredited professionals in Ohio. This program will be designed similar to one of LEED that conducts on-site audits of industrial facilities while concurrently training engineering students in energy and environmental technologies. This program will create up to 10 jobs in several of Ohio's engineering institutions and annually produce LEED accredited professionals. | EMTEC | 10 | 0 to 30 days | \$500,000 |
| Montgomery | Alternative Energy Technology Incubation | The University of Dayton Industrial Assessment Center (UD-IAC) is one of 28 IACs funded by the US DOE. Since 1981, the UD-IAC has helped over 750 small and medium-size Ohio manufacturers reduce costs and stay competitive. Assessments - conducted by a team consisting of quality professionals and industrial engineers - provide recommendations for reducing energy, waste and production costs. Over the last five years, clients report saving an average of about \$100,000 per year. While demonstrating significant success, the program is constrained by a lack of infrastructure and capacity to perform assessments, currently limited to 10-12/year. EMTEC and the University of Dayton propose to expand capacity by training additional faculty at 8 selected Ohio colleges and universities, enabling assessments to be conducted at over 100 Ohio manufacturing facilities annually. In addition to the financial savings, engineering and technical student participants, 15-20 graduates per year, will have a greater understanding of energy efficiency and waste reduction, making them more valuable in the job market. This project will create 10 new positions at participating institutions. | EMTEC | 10 | 0 to 30 days | \$500,000 |
| Montgomery | Center for Lasers, Advanced Manufacturing, and Edu | One of the fastest growing technology fields today is Energy. The development of sustainable, renewable energy technologies - solar, wind and biomass - and reducing the environmental impact of conventional technologies, such as coal and nuclear power, are generating increased activity and employment of scientists and engineers. Growing concerns about energy security and our aging energy infrastructure will cause the need for highly skilled individuals to grow for many years to come. There is a need to create awareness and stimulate pursuit of careers in these technologies at the earliest possible, including Ohio's high schools and technical institutions. MTEC and Princeton Energy and Technology propose to develop and deploy an Educational Fuel Cell Kit to some 250 Ohio high schools, vocational schools and community colleges to supplement the current science and technical curriculum to increase the understanding of the scientific principles of these next generation energy technologies and stimulate interest in pursuing promising careers. The kit will include a hydrogen generator, fuel cell, and other basic and appropriate instructor support materials. | EMTEC | 15 | 0 to 30 days | \$1,000,000 |
| Montgomery | Butter Street Sanitary Sewer Project | Many of the today's most promising alternative energy technologies are at very early stages of development. These technologies have not reached the technical or commercial maturity necessary to compete against other technologies in Ohio's annual competitive solicitation programs within the Third Frontier Program. Many are under development at small private companies which do not have access to the high-risk, early stage issue funding that is typically reserved for university research. These technologies require smaller tranches of funding and additional assistance, beyond which can be provided by existing state programs, to be commercially successful. EMTEC proposes a program that has been proven in other technologies to select, screen and identify high potential projects, provide developmental funding, and support commercialization planning to make these technologies ready for existing state financial support mechanisms. EMTEC will support 5-10 projects annually to develop and prove the technology and prepare for continued financial support. By expanding these young, early stage companies, EMTEC will assist in the creation of up to 200 new sustainable jobs. | EMTEC | 200 | 31 to 90 days | \$5,000,000 |
| Montgomery | 750,000 Gallon Water Tower | Hire, train and deploy 10 additional Firehouse Trainers to work with 500 low income fathers in the nine-county West Central Ohio region to help them become responsible, committed parents. Role participants to existing programs for employability skills enhancement. Hire, train and deploy instructor/trainer to work with program participants. Provide case management support to include assistance with employment, housing, and other life and career goals. Organize father-child activities to promote healthy bonding. Promote responsible fatherhood in the region. | Urban Light Ministries, Inc. | 10 | 0 to 30 days | \$750,000 |
| Montgomery | City of Brookville Fire Station Project | Complete a sanitary sewer project from the Village level to the outlet on Butter Street. Work includes construction of a 12" sanitary sewer & will eliminate 2 existing pump stations in very poor condition. | Village of Germantown | 20 | 31 to 90 days | \$2,626,000 |
| Montgomery | Dayton Regional STEM School | Construction of new 750,000 gallon elevated water tower, existing in unsteady, poor condition, & inadequate in height. The new tower will be designed to provide proper system pressures and adequate reserves for fire protection services, accounting for recent growth in the high pressure zone of the Village. | Village of Germantown | 25 | 91 to 180 days | \$2,121,300 |
| Montgomery | Carbon Nanotube Membrane for Aerospace Shielding | The City of Brookville is currently in the design process for construction of a new Fire Station. The Station will replace two current facilities that do not meet ADA, CPR, and Life Safety standards. The current main Fire Station was built in the 1970s and does not meet the current needs of the Fire Department. The City of Brookville has acquired land for the proposed new Fire Station, and would like to begin construction within 180 days. The City of Brookville Fire Department serves the City of Brookville and portions of Clay and Perry Townships in Montgomery County, Ohio and upon completion of the project, the new Station will replace the Brookville Fire Department's best service area of approximately 10,000 people. | City of Brookville | 50 | 91 to 180 days | \$2,500,000 |
| Montgomery | M21 Boiler replacement | Development of a grade 1-12 STEM high school with a strong focus on science, technology, engineering and mathematics curriculum. With a solid understanding of STEM subjects, as well as others (English, history, art) and how they relate to one another, students will be able to succeed in the workforce and they will ultimately help the state of Ohio and the Dayton region progress, grow, and retain its talented young people. Phase I of the project is the replacement of Mound Laser & Photonics Center's MLPC. mlpc.com (laser-based manufacturing capability and STEM education) and can begin immediately. Phase II is the construction of a building for advanced manufacturing (high-temperature laser-based microfabrication technology). MLPC will undergo substantial growth under this project and will need to construct the building to accommodate both the increase in personnel and the environmental requirements of the company's precision laser-based manufacturing. The building will demonstrate the face of advanced manufacturing in the Dayton Region, and include an educational component to promote STEM education. It will incorporate green technology and demonstrate how the company's production facilities can be more environmentally friendly. The building will be completed in March 2009. Building construction can begin as early as the end of 2009. Total employment at MLPC is expected to reach approximately 100 persons by the conclusion of this program. These are high-tech, high-paying jobs that will generate substantial tax revenue at the federal and state level. | Dayton Regional STEM School | 50 | 31 to 90 days | \$5,000,000 |
| Montgomery | West Carrollton Communications/Mesh Project | Carbon materials offer structural performance at significant weight savings compared to metal solutions; however, shielding against electromagnetic interference, lightning strike protection, ground plane solution, thermal management and energy storage must be incorporated into the material to maximize functionality. Carbon nanotube membranes, or "buckypaper" can be incorporated as the outer layer of a composite structure in established one-step manufacturing processes. Membrane production is currently being tested in a 12" wide continuous process to meet market entry pilot production requirements. The proposed program facilitates further scaling to a 52" wide continuous process with equipment demonstration and application-based testing programs to accelerate market transition from laboratory applications to Raytheon Missile Systems. Core competency skills of the Greater Dayton region including manufacturing, nanotechnology and composites will be tapped to scale and commercialize carbon nanotube membranes for military, aerospace, commercial and energy products. NTL's carbon nanotube membrane development stems from 2 Phase II Small Business Innovation Research Programs. | NanoTechLabs, Inc. | 206 | 0 to 30 days | \$3,000,000 |
| Montgomery | | Replace 40 year old boilers with newer, more efficient ones. | M21 Industries | 10 | 31 to 90 days | \$120,000 |
| Montgomery | | Expand current wireless mesh network to cover entire city, provide digital radios for police personnel and provide updated Computer Aided Dispatch (CAD) program. | West Carrollton Police Department | 0 | 0 to 30 days | \$725,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Ohio Fuel Cell Production Initiative | To hire 20 new employees immediately at UltraCell to bridge the company to their next federal contract. UltraCell is an inventor and manufacturer of Micro Fuel Cells for DOD and related man-portable, on-grid applications. UltraCell is the only U.S. manufacturer of reformer methanol fuel cells for portable power applications. UltraCell has established a manufacturing facility in Ohio and has been the unreasonable beneficiary of economic uncertainty. These funds will be used to further streamline its production line as well as train the anticipated new employees needed to fulfill future demand. This "essential bridge" is critical to their survival and to transition UltraCell to its next commercialization phase. Project also includes support for ETEC's hydrogen program (\$300k) to support key scientists developing the fuel cell supply chain in Ohio, and STPA to assist the Ohio Fuel Cell Coalition to support the state's fuel cell industry through helping ETEC with its fuel cell supply chain development efforts, and STPA to the Ohio Energy Project to educate Ohio schoolchildren as to the range of Ohio's alternative energy initiatives and how the students can play important roles in meeting FWHV and local Accelerated Construction goals to reduce road closure time. The primary project objective is to provide Ohio counties with additional funding to support their existing funds for bridge rehabilitation to their own procure these long lasting, fast installation bridges. The second focus will be workforce development and education by involving engineering companies, contractors and diversities across the state of Ohio in the design and installation as they become knowledgeable in this new technology. Education and training modules will be created. Since most of the supply chain are Ohio companies, this makes composite bridge a sustainable industry for Ohio. | Edison Materials Technology Center | 98 | 0 to 30 days | \$2,500,000 |
| Montgomery | Fiber Reinforced Composite Bridges for Accelerated | The task and funding plan is: - \$5.5 Million for bridge procurement to subsidize the cost of composite bridges so Ohio counties can gain the benefits of this technology: fast installation, long life, low maintenance - \$1.2 Million in workforce development and education - \$1.2 Million for design and testing to reduce costs | Composite Advantage | 25 | 0 to 30 days | \$7,900,000 |
| Montgomery | EMTEC Commercial Technology Program | This request focuses on 15 commercial technology projects @ \$200k each across a range of promising alternative energy technologies. Projects are linked to target job creation in Ohio's automotive manufacturing and testing sectors. This program will maximize immediate job creation & will help establish Ohio at the forefront of alternative energy technologies. CT projects foster innovative/advanced materials, processing technologies and products to the market. This program fosters early commercialization of innovative, novel, and/or cost-effective technologies or products by improving materials and manufacturing processes. In a broad context, this type of development will lead to a rich base and develop additional energy generation capacity throughout Ohio. Projects are currently defined and are ready to go - will be matched 1 to 1 or better. These projects will commercialize technologies/products to enhance and grow economic value in Ohio. Founded in 1987, EMTEC an Ohio Edison Center, has been supporting CT projects for over 20 years. These projects have had a considerable impact on the region's technology base. EMTEC is currently managing over 25 projects throughout Ohio. | EMTEC | 105 | 0 to 30 days | \$3,000,000 |
| Montgomery | Motorola Mobile Data Terminal (MDT) | Class and be pulled in a less desirous direction. By enabling a technologically proactive public safety department atmosphere, our safety forces can continue to deter crime from our campus. Should we fail, students can fall victim, causing a cascading effect on the college in whole. A less safe campus scores away good prospects which in turn makes it a more desirous campus, the downward spiral perpetuates itself. Also need to reference the Clergy Act. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$24,716 |
| Montgomery | Motorola Mobile Police Radios | The units we have today are beyond their life expectancy and should be replaced. We have mutual aid agreements with the surrounding jurisdictions which will continue to be streamlined by utilizing the types of technologies currently in use within their jurisdictions. We can bolster the interoperability capabilities as recommended by the National Institute of Justice in their publication "Why Can't We Talk: Working Together to Bridge the Communications Gap To Save Lives-A Guide for Public Officials" (see: http://www.ojp.usdoj.gov/publications/pubsum2014348.html). Mobile radios have a much longer range than portable radios and can be utilized for communication with the appropriate police agencies at regional campuses in the event of an emergency. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$8,800 |
| Montgomery | TREK | Our location and affordable pricing attracts the at risk and under served. Many of our student life are challenging and are in a class or able class and be pulled in a less desirous direction. By enabling a technologically proactive public safety department atmosphere, our safety forces can continue to deter crime from our campus. The perception of safety is greatly enhanced by the presence of uniformed police officers on patrol. The acquisition of the requested bicycles will allow the officers to spend more time in the view of the public, as opposed to spend their valuable time making repairs to aging equipment. The increase in on-site presence will result in the overall perception of bicycling being a safe and secure mode of higher education thereby increasing our availability to the region. The Sinclair Community College is a participant of a county-wide mutual aid agreement and the use of reliable equipment allows for a harmonious relationship between other law enforcement agencies. Disapproval will necessitate officers operating marked police bicycles beyond their useful life which may result in a liability to the Sinclair Community College in that police personnel were provided with equipment which may be deemed as unsafe. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$14,750 |
| Montgomery | Departmental Tasers | Sinclair is requesting funding for 18 Tasers and associated necessary equipment. This safety equipment is a necessary priority to improve the overall campus security and to enhance the effectiveness of the Sinclair Community College's Department of Public Safety, as they protect against a wide variety of adversities. The requested equipment will decrease the vulnerability to sworn officers and provide a tactical advantage while responding to a myriad of stressful situations, yet allow for the option of a less lethal police response, when possible. The equipment will permit for a more effective merger when called upon to respond during situations of mutual aid. The 18 Tasers and associated necessary equipment will permit all for all sworn members of the Sinclair Community College's Department of Public Safety to be issued a unit for their use during their tour of duty and will further provide up to six spares for use during periods of repair. | Sinclair Community College Public Safety Departmen | 24 | 0 to 30 days | \$1,000 |
| Montgomery | MOTMESH | In an effort to further interoperability throughout our region, we have partnered to utilize the combined voice and data radio systems of the City of Dayton Police and Montgomery County Sheriff's Office. We have an enrollment of 26,000 students and a Public Library open to over 500,000 city and county residents. During the recent Presidential campaign, we hosted Barack Obama, Colin Gooding Jr., Cheriela Clinton and John McCain. We frequently have dignitary visits and based on the information from the Ohio Homeland Security division, would be a likely target for terrorism within this region. Recently we have been testing the Motorola Motomesh product to allow video transmission from our cameras installed throughout the campus to patrol vehicles. This technology allows our officers to see what our dispatcher is viewing while responding to a call for service. Other features that we would like utilize on this system would allow us to monitor the safety activities of our officers and to implement an Automated License Plate Reading (ALPR) of vehicles that travel on our campus daily. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$150,000 |
| Montgomery | Bi-Directional Amplication | In an effort to support interoperability throughout our region, we have partnered to utilize the combined radio systems of the City of Dayton and Montgomery County Sheriff's Office. Most communication systems are designed to have coverage out of doors and above ground level. Since the adoption of the regional system we have noticed very poor reception in the lower classroom levels of our complex, the Cafeteria and the Library/Learning Resources Center. We have an enrollment of 26,000 students and a Public Library open to over 500,000 county residents. In a recent joint all-day training scenario with the Hostage Negotiation Team (HNT) and the Regional Special Weapons and Tactics Team (SWAT) we were unable to effectively communicate. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$109,666 |
| Montgomery | Computer Aided Dispatcher (CAD) | We can bolster the interoperability capabilities as recommended by the National Institute of Justice in their publication, "Why Can't We Talk: Working Together to Bridge the Communications Gap To Save Lives - A Guide for Public Officials" (see http://www.ojp.usdoj.gov/publications/pubsum2014348.html), by installing a Bi-Directional Amplification system. In order to provide most efficient and effective public safety services, we need to implement a new computer aided dispatch (CAD) system. The system we have in place today was actually a revamped warehouse security personnel system that was heavily modified for dispatching purposes. It is inadequate and does not have even the most rudimentary functionality found in the basic CAD software packages available today. Tracking calls, personnel and trends are all but impossible with this archaic technology. We have an enrollment of 26,000 students and a Public Library open to over 500,000 city and county residents. During the recent Presidential campaign, we hosted Barack Obama, Colin Gooding Jr., Cheriela Clinton and John McCain. We frequently have dignitary visits and based on the information from the Ohio Homeland Security division, would be a likely target for terrorism within this region. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$220,000 |
| Montgomery | Montgomery County Ohio South Dixie Phase 2 - PID# | An effective CAD package could assist us in our assignments and our ability to staff for, and deter likely terrorist attacks. It would also give us the ability to mine the data that seems to be all but lost with our existing technology. | MVRPC (On behalf of City of Vandalia) | 59 | 91 to 180 days | \$101,000 |
| Montgomery | Education Through Utilization of Technology (Urban | Montgomery County Road 99 (Dixie Drive) from Stoneriquary Road to Chestnut Drive in Vandalia/Roadway reconstruction to 4 lanes. Project Description: Provide economically disadvantaged urban students (grades 2-6) with instructor led educational programs through the use of technology. Expected Outcomes: 1. Expose children to technology (and hands-on) experiences in Environmental Awareness (Solar, Water, Wind, and Air, Energy), Sciences, Math, Technology, Social Studies, Language Arts & Reading. 2. Provide students the ability to obtain substantial growth and compete with their peers on Ohio (OATS) and National (NWEA) Achievement Tests. 3. Develop skills and knowledge which enables the students ability to competitively compete on a global level. 4. Provide society with well educated citizens that can lift themselves out of poverty and into a world of endless possibilities. The program would initially be open to students in the Dayton, Ohio area with the expectation of expansion into other counties. State of Ohio Certified Teachers will be utilized to implement the program. | PB Sponsors | 10 | 0 to 30 days | \$1,500,000 |
| Montgomery | MOT048-13.64 (SR48 (Main Street) - I-75 to Fairv | Note: I searched for the disclaimer within the site options listed on this page, which doesn't appear to be available. I would be interested in reviewing the disclaimer, which I am sure I will support and abide by the terms. SR48 (Main Street) - I-75 to Fairview - Enhancements and reconstruction of SR48 at Helena Main and SR48 at Fairview by adding turn lanes. Enhancements include sidewalks, trees, and shrubs, benches and decorative masonry piers. | MVRPC (on behalf of the City of Dayton) | 45 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Miami Valley Communications Council Regional Crime | We have two recommendations for improved law enforcement in our region: 1) Expand our prototype successful wireless mesh telecommunications network to eight municipalities of 100,000 residents 2) Convert remaining analog police radios to digital radios meeting Homeland Defense standards. Our prototype dramatically improved security around high threat terrorist targets and resulted in improved operational effectiveness of first responders. We recommend that this pilot program be extended to all eight member municipalities. New Homeland Security standards require that we convert all of our analog police radios to digital. We have a strong desire, but limited funding, to meet this requirement which we know would improve our ability to control crime and improve homeland defense. Our offices have strong mutual aid agreements and an integrated alerting system. Each police station is collocated with a city hall with full backup power. Through this new network any station could run emergency services for all municipalities and provide a cohesive regional response to disaster and terrorist situations. The system is separate and survivable but integrates fully with other networks. | Tactical Crime Suppression Unit | 20 | 0 to 30 days | \$24,000,000 |
| Montgomery | Montgomery County - Great Miami Blvd. - PID# 77860 | Great Miami Boulevard (Renaissance Project) from Riverview Avenue to Main Street-Widening from 4 to 6 lanes and extension. | MVRPC (on behalf of the City of Dayton) | 177 | 181 days or more | \$762,000 |
| Montgomery | Montgomery County - Dorothy Lane / Wilmington Pike | Dorothy Lane/Wilmington Pike Intersection/Pavement replacement, install tree lawns & sidewalks, reconstruct traffic signals, construct loop road on NW quadrant of intersection and add third through lane in each direction on Wilmington at Dorothy. To help stimulate the economy by having workers sufficiently trained in computer technology for the workplace. | MVRPC (on behalf of the City of Kettering) | 148 | 181 days or more | \$1,220,000 |
| Montgomery | WSJET (Workplace Stimulation Through Enhanced Trai | The expected outcomes are (1) increased productivity by 7.5% in the workplace, which will help to stimulate employees' bottomline and decrease job layoffs, and (2) foster greater employability of workers due to increased computer skills. Program, many types of file from single calls, through the types of animals and the lower plant types. The parts are color coded for function. Use proper from working the puzzles to tracing the parts and labeling their function to taking real parts and working through the structure identifying the parts. These were first used at the Aquinas School, A Montessori School for ages 3 - 12. Sets have been in all levels: 3-4, 6-9 and 9-12. They were introduced in 1989 when DuBrock was on the teaching staff as a science teacher. After 40 years, these same puzzles are still in use. We will also submit them at all levels who will show how they have used these items and then bring back a set and its manual and key sheets for reproducing. | Dunson & Associates, Inc. | 250 | 0 to 30 days | \$250,000 |
| Montgomery | Life Cycle Puzzles | Merity's Metalworking's water cutter cuts the parts and the knoth holes. A coordinator will see to the painting of parts. The Greene County student group will knit the parts, assemble the puzzles, and package the items with manual and key sheets using through internet. Merity's Metalworking's water cutter cuts the parts and the knoth holes. A coordinator will see to the painting of parts. The Greene County student group will knit the parts, assemble the puzzles, and package the items with manual and key sheets using through internet. Merity's Metalworking's water cutter cuts the parts and the knoth holes. A coordinator will see to the painting of parts. The Greene County student group will knit the parts, assemble the puzzles, and package the items with manual and key sheets using through internet. Merity's Metalworking's water cutter cuts the parts and the knoth holes. A coordinator will see to the painting of parts. The Greene County student group will knit the parts, assemble the puzzles, and package the items with manual and key sheets using through internet. | Educational Innovations | 12 | 0 to 30 days | \$50,000 |
| Montgomery | Electronic Ink development for web offset presses | DuBrock's method of making electronics on the web offset presses requires substituting the colored inks with electronic ink. This function as components of circuitry. Most important tasks a power storage that includes battery material and its circuitry. The printer in Ohio is to develop various electronic functions/ material in ink form for these presses. 4 x 8 x 10" webboard can be printed in one minute with "pages" closed completing the circuitry. It will be used for 24 hours, or back up displays, or mold to auto bodies and interior structure or be flexible for medical and safety devices, or lighting, tents. | e3 Enterprises Ip | 15 | 31 to 90 days | \$300,000 |
| Montgomery | Police cruisers | The officer Community League is a participant in a county-wide increase in agreements which include the Department's motto: always must respond when duly requested by another signatory member. Our request will permit such a response by utilizing actual police cruisers, designed and constructed to be police vehicles. Presently, vehicles designed to function as a family sedan are being pressed into police service, resulting in an extremely high rate of down time and repair, as they are stressed beyond their capabilities. Actual police vehicles will permit the Department of Public Safety to respond promptly and safely to most situations taking place on the college campus. Furthermore, police personnel will be able to effectively respond to any request for service and to participate in events requiring interoperability between agencies, as described in NIMS. Our current fleet is unreliable and negatively impacts upon our ability to provide the high level of police service our college and surrounding community has come to expect. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$87,987 |
| Montgomery | Montgomery County - Kettering Bikepath - PID# 8102 | From the southern terminus of Hempstead Station Drive, north along Hempstead Station Drive to Stroop Road then east along Stroop to the southwest corner of the Stroop/Wilmington Pike Intersection-Construct a multi-use path (Hempstead Station Drive south of David Road will be a signed "Shared Roadway") | MVRPC (on behalf of the City of Kettering) | 12 | 31 to 90 days | \$99,000 |
| Montgomery | Montgomery County - Dorothy Lane Bridge - PID# 815 | On East Dorothy Lane in Kettering, Remove and replace the existing bridge with a single span with composite pre-stressed concrete box beams and cast-in-place concrete abutments. The new structure will have approach slabs and raised sidewalks with raised sidewalks with raised sidewalks and side railings. | MVRPC (on behalf of the City of Kettering) | 40 | 181 days or more | \$383,000 |
| Montgomery | Montgomery County State Route 835-01.64 -at the In | SR835 at its intersection of Woodman Drive and Patterson Road/Research Blvd. Reconstruct and realign the intersection, add turn lanes, curb and sidewalk, landscaping, includes signal reconstruction and street lighting | MVRPC (on behalf of the City of Kettering) | 55 | 181 days or more | \$197,000 |
| Montgomery | Montgomery County - Kettering Boulevard - PID# 802 | Kettering Boulevard from the Marine HCL to the Moraine SCL-Reconstruct right turn drop lanes, replace existing bridge, install sidewalk, resurface the existing roadway. Installation of a Backup Generator for the existing Water Treatment Plant. | MVRPC (on behalf of the City of Moraine) | 35 | 181 days or more | \$318,000 |
| Montgomery | Backup Generator for Water Treatment Facility | This generator will provide power in the event of a power outage. We now only have water available for approximately 14 hours in the event of a power outage. The City of West Carrollton's water facility provides water to 3400 residences and businesses. | City of West Carrollton | 10 | 31 to 90 days | \$750,000 |
| Montgomery | Food Allergy | Expanding food production capabilities to better serve Ohio residents suffering from food allergies as covered under the American Disability Act- Section 504 of the Rehabilitation Act of 1973. Funding will be utilized to purchase equipment, hire new employees, and service Ohio retailers. Use of scarce, non-renewable energy sources, but more importantly, lower the total housing costs to low-income home owners, possibly allowing them to maintain their homes as energy costs rise. | AGS Foods, LLC | 4 | 31 to 90 days | \$250,000 |
| Montgomery | ISUS Weatherization Program | The ISUS model is a multi-faceted approach that combines comprehensive neighborhood revitalization, workforce development and training for "at-risk" youth. ISUS is currently utilizing "green-bull" techniques and renewable energy systems in the new construction of single-family homes and are sold to low- and moderate-income households. This program will complement ISUS' ongoing programs by assisting owners of existing homes in these neighborhoods. ISUS will use the funding to purchase equipment, supplies and materials that will lower the energy consumption of over 200 very low income homeowners. Energy audits will be provided on other homes and ISUS will also offer these services to other homeowners that are can pay for the costs of the program, thereby increasing the desired impact of the program and the number of jobs created. | Improved Solutions for Urban Systems Inc. (ISUS) | 12 | 0 to 30 days | \$500,000 |
| Montgomery | ISUS High Tech Homes | ISUS will utilize funding to promote and incorporate energy efficiency and renewable energy technologies in both new and current housing as well as commercial buildings in targeted Dayton neighborhoods. Through its many projects and programs, ISUS has successfully established partnerships and leveraged resources which have greatly increased the positive impact on the neighborhoods it works in as well as the training and education it provides "at-risk" youth. ISUS is utilizing "green-bull" techniques and renewable energy systems in the new construction and renovation of single-family homes. ISUS is paying construction staff in professional installation and certification classes to begin home energy audits for weatherization and energy audits. ISUS uses these projects to train "at-risk" and other low-income residents of Dayton in relevant, emerging, high-growth job fields. ISUS plans to incorporate energy efficiency and renewable energy systems in over fifty "projects" (new construction and renovation) that will create sustainable jobs, lower the cost and use of standard, scarce resources, and contribute to the exposure and growth of the energy industry in Dayton. | Improved Solutions for Urban Systems | 15 | 0 to 30 days | \$1,000,000 |
| Montgomery | Dayton Resource Industrial Park | The Dayton Resource Industrial Park is a proposed urban industrial park to be located within the City of Dayton corporate boundaries, adjacent to Huber Heights and the City of Riverside, on the north side of Neandore Road between State Routes 201 and 202. This 50 acre industrial park will consist of more than a dozen new industrial sites ranging in size from 1 to 20 acres. Each will have all the modern city services: water, sanitary and storm sewers, power, natural gas, and communications. While close to the City of Dayton Wild Field it is not in, nor is the well field protection area. The park will be landscaped with a rural flavor. Natural looking drainage basins will be used to infiltrate much of the stormwater on the site. Walking paths, ponds, and picnic areas will be available to the industrial employees on the site, and their residential neighbors. A sign and fence surrounding the site will intermix with berms, basins, and plantings, setting the park off from residential neighbors, and tying to the nearby Ton Choud Park with its recreational areas. The landscaping will also utilize use of low maintenance native plants. | Norton Engineering, LLC | 500 | 91 to 180 days | \$550,000 |
| Montgomery | COPS | Sinclair is requesting funding to hire 3 new police officers under the COPS Grant. The officers will be utilized to provide a safe and secure learning environment to the students, faculty, and staff at Sinclair Community College which has an enrollment of approximately 26,000.00 students, 114 faculty, and 1918 staff members. Sinclair maintains open campuses with the main campus located in downtown Dayton. Regional campuses are located in Englewood, Huber Heights, Kettering, and Moraine (Warren County) with a new campus being constructed in Eaton (Public County). The Sinclair library is open to the public and serves over 50,000 city and county residents. The new officers will provide police services to the Dayton campus and the regional campuses. | Sinclair Community College Department of Public Sa | 24 | 31 to 90 days | \$458,013 |
| Montgomery | Pallet Automation | The pallet automation project is aimed at increasing the efficiency and production of pallets for the building industry. A pallet is a steel rectangular plate with rails corners used in the manufacturing of concrete blocks and pavers. This project reduces time and handling costs in producing pallets by using a series of rail corners, self-correcting, laser measuring equipment, and a battery in order to speed up production and improve the quality/fitness of pallets for building blocks. This project will benefit 2 companies in the Dayton area, Benjamin Steel and ODM Welding work in partnership to produce and market these pallets. Pallets are distributed on a national/international basis. Jobs will be created as demand for this product increases. Employment, taxes, purchasing of goods and services by both companies, training, and education are benefits of this project. The project is currently on hold due to weak economic conditions in the construction industry. Financial assistance could lead to moving forward with this project earlier and it could be ready to go in 12 months. | Benjamin Steel Co. | 10 | 181 days or more | \$1,200,000 |
| Montgomery | Camera-Digital | Sinclair has a large footprint in the City of Dayton. Our downtown campus includes over twenty multi-story buildings and parking garages. We have an enrollment of 26,000 students in Public Library open to over 100,000 county residents. During the recent Presidential campaign, we hosted Barack Obama, Cuba Gooding Jr., Chelsea Clinton and John McCain. We frequently have dignitary visits and, based on the information from the Ohio Homeland Security Division, would be a likely target for terrorism within this region. Today we have 120 analog cameras that monitor key congregation points on campus. The numbers of people visiting our campus daily has exploded. We can no longer effectively monitor our assets. We need to migrate to a digital system and expand the number of cameras to at least 200. Additionally, we could use smart software that would allow for recording movement and suspicious activity only, saving precious drive space. We would also like to implement an automated facial recognition software package to allow us to keep up with our gang-members and known criminal elements. | Sinclair Community College Department of Public Sa | 24 | 31 to 90 days | \$850,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Montgomery | Police Segways | Binlar is requesting funding for 6 Segways. This equipment will be utilized by the department to protect our students and ensure their academic success by providing a safe and secure learning environment. The perception of safety is greatly enhanced by the presence of uniformed police officers on patrol. The acquisition of the requested Segways will allow the officers to spend more time in the view of the public providing visibility in areas that are difficult to patrol in cruisers and will reduce response times. The Segways will also allow officers to effectively and quickly deal with traffic issues on the surrounding streets and college during busy times of traffic. The Sinclair Community College Department of Public Safety is a participant of a county-wide mutual aid agreement and the use of reliable equipment allows for a harmonious relationship between law enforcement agencies. | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$6,705 |
| Montgomery | High Speed Laser Welding of Bipolar Plates for Fuel | Mound Laser & Photonics Center Inc. (MLPC) has developed a high speed laser welding process for use in bipolar plates on fuel cell assemblies. This technology has increased the ability to join resistant fuel cell components by a factor of 20. This dramatic increase in processing speed will reduce the overall cost of producing fuel cells and make mass production a reality. MLPC has demonstrated this technology in a laboratory and will use the stimulus money to build a 20 commercial manufacturing. The project will be marketed to local, state, and national fuel cell manufacturers. This project will be an extension of funding granted under a State of Ohio Third Frontier Advanced Energy Program. | Mound Laser & Photonics Center Inc | 20 | 0 to 30 days | \$500,000 |
| Montgomery | Motorola Portable Radios | Our mutual aid agreements with the surrounding jurisdictions would be streamlined by utilizing the types of technologies currently in use within their jurisdictions. We can bolster the interoperability capabilities as recommended by the National Institute of Justice in their publication "Why Can't We Talk: Working Together To Bridge the Communications Gap To Save Lives A Guide for Public Officers" (see http://www.op.usdoj.gov/pub/justice/20042438.htm). | Sinclair Community College Department of Public Sa | 24 | 0 to 30 days | \$17,346 |
| Montgomery | Camera-Digital | Today we have 120 analog cameras that monitor key congregation points on campus. The numbers of people visiting our campus daily has exploded. We can no longer effectively monitor our assets. We need to migrate to a digital system and expand the number of cameras to at least 300. Additionally, we could use smart software that would allow for recording movement and suspicious activity only, saving precious drive space. We would also like to implement an automated facial recognition software package to allow us to keep up with our gang-members and known criminal elements. | Sinclair Community College Department of Public Sa | 24 | 31 to 90 days | \$850,000 |
| Montgomery | Skyview Reservoir (water storage tank) | This project would provide an additional 500,000 gallon storage tank on Skyview Drive in West Carrollton. The tank would be an additional storage tank that was built in the 1980s and would be for additional storage. The additional tank would allow improved water supply to the other tank. | City of West Carrollton | 10 | 91 to 180 days | \$1,000,000 |
| Montgomery | Imperial Reservoir Storage Tank Project | This project would provide an additional 500,000 gallon storage tank in the West Carrollton water system. The storage tank would be in addition to a tank that was built in the early 1970s. The addition of the tank would allow the inspection and repair of the existing tank. The project is being managed by AgriCoop Associates, LLC. AgriCoop Associates, LLC has invented a laser materials synthesis to fabricate a light emitting material. LightEmit is a disruptive advancement over light emitting diode (LED) device technology. It costs less, is cheaper to operate, and is 100% more efficient and creates a new lighting market. The AgriCoop Associates, LLC team will establish a pilot operation for the export of the LightEmit product for initial sales. | City of West Carrollton | 10 | 91 to 180 days | \$1,000,000 |
| Montgomery | Light Emitting Glass Pilot Plant | The pilot operation will be used to complete product development contracts with the LightEmit product for initial sales. Engineering trials will be conducted over a 12-18 month period to increase substrate size, optimize process parameters, and improve product uniformity. Information processes, design substrate handling equipment and design process control systems. The project is being managed by Mound Laser & Photonics Center, Inc. (MLPC). MLPC is a leading manufacturer of laser processing equipment and is a major supplier of laser processing equipment. A product that converts light and heat (all electromagnetic energy) to electricity is also fabricated by the technology and represents a major advance in solar technology. | Mound Laser & Photonics Center, Inc. | 43 | 0 to 30 days | \$2,000,000 |
| Montgomery | State Route 741 Utility Relocation Project | Relocation of main power lines along State Route 741 and Spring Valley Pike to accommodate planned and future roadway construction. Project will immediately impact adjacent commercial development leading to the relocation and future creation of a significant number of jobs compared to the project cost. Project will permit construction of roadway improvements providing immediate benefits to a significant number of offices and other commercial businesses. This is immediately across from the headquarters of Leavitts and serves a significant number of employees both within and outside of the surrounding office developments. | Miami Township | 940 | 31 to 90 days | \$271,719 |
| Montgomery | Waldruhe Park Recreation Enhancement Project | Construction of community water feature at existing public park and associated shelter and playground. Park is located along State Route 741 and would provide direct construction jobs and ongoing maintenance and supervisory jobs. Project would create significant activity for area residents and employees within a growing commercial corridor bounded by Interstate 75. | Miami Township | 15 | 181 days or more | \$954,000 |
| Montgomery | Owl Creek Flood Protection Project | Channel widening, bridge and culvert replacement to restore more natural flow capacity within urbanized stream channel including 2000 ft of channel excavation, 2000 ft of drainage easement acquisition, 600 ft of 2 ft high berm, 100 ft of bank retaining wall removed, 300 ft of new retaining wall, 60x300 ft bridge replacement, and 24x300 ft culvert replacement. | Miami Township | 25 | 181 days or more | \$1,297,200 |
| Montgomery | Empower Our City | Project will reduce flood incidences in adjacent neighborhood, will significantly reduce damages in the adjacent neighborhood by containing the 100 year flood event, restore a more natural channel allowing for greater flood storage area and will immediately benefit adjacent property owners by removing floodplated retaining wall structures. | Lessie Lee Floyd Empowerment Center | 100 | 31 to 90 days | \$500,000 |
| Montgomery | Educational Economic Development | The program is targeted to empower, educate, and embrace inner city 14-30, especially ex-offenders and under achievers. The center will create jobs because we will work with workforce training, interviewing, resume and job placement skills. We will also work with education, volunteering and community service. The business plan and goals are awesome. The leadership is young and dynamic. Furthermore, we are backed by many major league NFL players and we have a host of contacts and resources of influential people who are in this project. The guidance and opportunity that this program can provide is limitless. I look forward to submitting a full business plan for your review. | School Scholars Consulting, LLC | 5 | 91 to 180 days | \$550,000 |
| Montgomery | Young People Center for Learning and Care | Helping low wealth school districts obtain further economic educational opportunities for economic development in the urban cities of Ashland, Toledo and Dayton Ohio. Staff will be hired to retain employment through the assistance of laborer. Rates to help services development and career development programs based on need for employees in health care, technology, and construction. The staff seek diversity in the schools in poverty based areas to give educational opportunities to poverty based students helping them pursue higher educational opportunities at the college level. Funds will be used to train already employed staff as well as the new staff for economic development in the inner setting. | Building Blocks of Success | 30 | 0 to 30 days | \$150,000 |
| Montgomery | Transition Hotel | This will provide childcare, banking, after school programs, and child development for children ranging in ages from 6 weeks to 16 years of age. Providing jobs for our community, subcontracting opportunities, as well as child care for working parents. Backed by a bond of certified teachers and concerned parents. This will serve as Ohio's economy, culture, and attractions for working parents. | J&R BLAME LLC | 50 | 91 to 180 days | \$3,500,000 |
| Montgomery | project care | Facility to house, feed, educate and provide daycare for approximately 400 homeless persons and/or families, per year in a 253 room former hotel. Using donations and already available funds from state and federal programs such as HUD and food stamp programs for annual operating costs. To work with local educational facilities such as Sinclair, MVCC and other adult education schools to educate the persons residing in the hotel. | med-care conv. | 2 | 0 to 30 days | \$50,000 |
| Montgomery | Sustainable Job Creation Through Integrated Techno | Provides health care for medicare and medicare clients, filling and home health care providers. | EMTEC | 250 | 0 to 30 days | \$2,000,000 |
| Montgomery | Interstate 675/State Route 48 Bridge Repainting | Advanced Energy is a high growth market with immediate high wage job creation opportunities. EMTEC & Davenport with extensive experience in technology development and business training propose \$2M initiative that will: 1) develop/commercialize Ohio advanced energy products/technologies, 2) create 5 new companies, 3) invest 20 small/medium sized Ohio companies in new products & job creation, and 4) provide ongoing training/services to assure sustainability for jobs beyond initial stimulus period. This will yield 40 - 50 new direct jobs in first 15 months with additional 200 new jobs within 1 year. | City of Centerville | 50 | 181 days or more | \$500,000 |
| Montgomery | Interstate 675/Loop Road Bridge Repainting | This project proposes to repaint the Loop Road bridge superstructure over IR-675 in the City of Centerville Ohio. The bridge is within the IR-675 right-of-way and Loop Road is classified as an urban principal street. | City of Centerville | 50 | 31 to 90 days | \$500,000 |
| Montgomery | Interstate 675/Bigger Road Bridge Repainting | This project proposes to repaint the Bigger Road bridge superstructure over IR-675 in the City of Centerville Ohio. The bridge is within the IR-675 right-of-way and Bigger Road is classified as an urban principal street. | City of Centerville | 50 | 31 to 90 days | \$500,000 |
| Montgomery | Interstate 675/Wilmington Pike Bridge Repainting | This project proposes to repaint the IR-675 bridge superstructure over Wilmington Pike in the City of Centerville Ohio. The bridge is within the IR-675 right-of-way and Wilmington Pike is classified as an urban principal street. | City of Centerville | 50 | 31 to 90 days | \$500,000 |
| Montgomery | I-675, SR 48 and SR 725 Enhancement | This project proposes to finish the IR-675 and State Route 48 transportation enhancement project in the City of Centerville by providing landscaping within the existing IR-675, State Route 48 and State Route 725 public right-of-ways and on property owned by the City of Centerville at the southeast corner. | City of Centerville | 10 | 31 to 90 days | \$55,000 |
| Montgomery | Sheehan Road Repair and Resurfacing | Sheehan Road resurfacing from Bonnie Anne Road to the southern City Corporation Line. The project calls for the resurfacing of approximately 4,000 linear feet of roadway. | City of Centerville | 30 | 31 to 90 days | \$300,000 |
| Montgomery | Bigger Road Resurfacing and Related Maintenance | Sheehan Road resurfacing from Bonnie Anne Road to the southern City Corporation Line. The project calls for the resurfacing of approximately 4,000 linear feet of roadway. | City of Centerville | 77 | 181 days or more | \$769,698 |
| Montgomery | Clyo Road Resurfacing and Related Maintenance | Clyo Road repair and asphalt resurfacing from the Bigger Road to Wilmington Pike. This project resurfaces 5,000 linear feet of roadway, including repair and replacement of deteriorated curb and storm sewer. | City of Centerville | 74 | 181 days or more | \$740,788 |
| Montgomery | West Spring Valley Road Resurfacing and Related Ma | West Spring Valley Road repair and asphalt resurfacing from State Route 48 to the City's west corporation line. This project resurfaces 2,700 linear feet of roadway, including repair and replacement of deteriorated curb and storm sewer. | City of Centerville | 46 | 31 to 90 days | \$460,000 |
| Montgomery | East Spring Valley Road Widening and Resurfacing | East Spring Valley Road repair and asphalt resurfacing from State Route 48 to the City's west corporation line. This project resurfaces 2,700 linear feet of roadway, including repair and replacement of deteriorated curb and storm sewer. | City of Centerville | 93 | 91 to 180 days | \$835,000 |
| Montgomery | Centerville Station Road Resurfacing and Related M | Centerville Station Road repair and asphalt resurfacing from Bearwood Woods Drive to the City's east corporation line. This project resurfaces 4,500 linear feet of roadway, including repair and replacement of deteriorated curb and storm sewer. | City of Centerville | 25 | 31 to 90 days | \$250,000 |
| Montgomery | Black Oak South Roadway Improvements | Black Oak South roadway improvements, Phase 1 SR 48 & 14. The project calls for the reconstruction of 3,550 linear feet of public streets within the Black Oak South Neighborhood, including sidewalks, stormwater, and curb and gutter. | City of Centerville | 93 | 0 to 30 days | \$925,000 |
| Montgomery | Concept East Neighborhood Sidewalks | This project completes the City's public sidewalk network through the Concept East neighborhood. This project proposes to install missing sections of public sidewalk, having a width of 4 feet, along Susan Drive and Claveridge Lane. The total length of sidewalk to be constructed is 2,400 linear feet. Both Claveridge Lane and Susan Drive are local streets providing a direct link to Centerville High School. | City of Centerville | 11 | 31 to 90 days | \$108,000 |
| Montgomery | Red Coach Neighborhood Sidewalks | This project completes the City's public sidewalk network through the Red Coach neighborhood. This project proposes to install missing sections of public sidewalk, having a width of 4 feet, along Red Coach Drive and Royalwood Drive. The total length of sidewalk to be constructed is 3,800 linear feet. The project will provide link-connectivity to the Red Coach Trail Regional Bikeway. | City of Centerville | 18 | 31 to 90 days | \$175,000 |
| Montgomery | Multi-use Trail Resurfacing, Centerville Station R | This project resurfaces the Centerville Station Road Multi-Use Trail in the City of Centerville. This trail is 2,300 feet in length with an asphalt surface. | City of Centerville | 10 | 31 to 90 days | \$17,500 |
| Montgomery | Bigger Road Bikeway Resurfacing | This project resurfaces the Bigger Road Multi-Use Trail within the City of Centerville. This trail is 4,400 feet in length with an asphalt surface. | City of Centerville | 10 | 31 to 90 days | \$41,000 |
| Montgomery | Bikeway Signage Upgrade Program | This project provides bikeway signage in accordance with the regional approved MVRPC Regional Bikeway Plan. | City of Centerville | 10 | 0 to 30 days | \$15,000 |
| Montgomery | ADA Access Upgrades | Upgrade of specified intersections through the City of Centerville to meet ADA compliance. | City of Centerville | 10 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Mental Health Transport company | Provide secure transport of mental health patients to State Mental Health Facilities from counties that were affected by the closures of the Dayton and Cambridge Mental Health Hospitals. Service would provide 24/7 service to affected counties to pick-up and transport emergency admission patients from mental health services inpatient to State facilities and return the responsibility from local county Sheriff's Departments that have limited resources to provide transport and have to decide to answer 911 calls or do transport. Transports can also be done for court appearances or discharges as needed and would be billed per transport by contract. Transports would be done in coordinated fashion by CIT trained actors or trained Police Officers / Troopers. Transport services would be direct billed to county or ADAMH boards and they would be responsible to seek reimbursement from BSJ or Insurance. Rates would be lower than private ambulance and be more cost effective for all agencies involved. Funds would provide for start-up w/ personnel, vehicles, radios, insurance, operating expenses, billing and associated expenses. | N/A | 10 | 31 to 90 days | \$500,000 |
| Montgomery | West Franklin Street Lighting | Installation of new street lighting in the West Franklin Street portion of the City's downtown business district. | City of Centerville | 15 | 31 to 90 days | \$150,000 |
| Montgomery | North Main Street Lighting | Installation of new street lighting in the North Main Street portion of the City's downtown business district. | City of Centerville | 15 | 31 to 90 days | \$150,000 |
| Montgomery | Centerville Station Road Realignment | Realignment of Centerville Station Road from 400 feet east of Park East Ct. to the eastern Coop line. This project will reconstruct 1,900 linear feet of Centerville Station Road which will improve sight distance, safety and abate an erosion problem where it is adjacent to the Sugar Creek tributary to the Little Miami River. | City of Centerville | 278 | 91 to 180 days | \$2,610,000 |
| Montgomery | Wilmington Pike Improvements | Lane widening of 1,300 linear feet of Wilmington Pike to accommodate three through lanes and dual left turn lanes from Brown Road in the north to City Road in the south. This project also includes the reconstruction of the RR-475 bridge over Wilmington Pike to accommodate this widening. | City of Centerville | 368 | 31 to 90 days | \$3,680,000 |
| Montgomery | Sheehan Road Improvements | Major roadway enhancement of Sheehan Road, an urban collector, from SR 48 to Bonnie Ave Road. Project includes widening of 1,300 linear feet of this roadway to its through-fare standard including public sidewalks, curb and gutter, and storm sewer system. | City of Centerville | 120 | 31 to 90 days | \$1,075,000 |
| Montgomery | renovate ohio | Purchase vacant and dilapidated homes, renovate and update all homes to city and state codes and sell to low income families. This will create property values in surrounding areas to rise or stay current, and will also create many new construction jobs. | Renovations property investments | 30 | 0 to 30 days | \$2,000,000 |
| Montgomery | Sustainability Center | Establish Sustainability Center for the MC-C3 Task Force to oversee local Green Projects. The Center will accelerate our ability to set benchmarks and promote energy efficient and environmentally responsible businesses, institutions, and industry. These efforts will directly result in the formation of healthy communities, improving the quality of life for citizens throughout the region and creating a region inherently attractive to the Creative Class. Green efforts, in turn will spur development of Green Collar Jobs and expansion of the existing employment base. | Montgomery County | 200 | 31 to 90 days | \$375,000 |
| Montgomery | Ohio Aviation Fuel | Utilizing existing clean coal technology, this project proposes to convert Ohio coal to an aviation jet fuel. The Project's emphasis is that it will design and construct multiple "small scale" refineries versus the large "mega" refineries inherent in the current approach. Our advantages are consistent refinery-to-refinery design, mass production of the "small scale" refineries' components at a single Ohio location followed by assembly or near the sources of coal, consistency of the quality of the final product, less initial cost of construction, and potentially less production cost. Our intent is to create an entire new industry for Ohio. Our partners will include Battelle Memorial Institute, the University of Dayton Research Institute, and others. This request is to begin the design and initial site selection process that will lead to the eventual creation of a new industry based in Ohio that supports national transportation and national defense. The project will significantly reduce the United States' reliance on foreign oil. Some of the ideas expressed herein are proprietary to Huber American Energy. An initial business case study has been completed for the production of 20 jobs, manufacturing facility, with 60% of product produced being exported to France, Brazil, Mexico, Canada, and other countries to U.S. companies for further export. | Huber Development Corp., AKA Huber American Energy | 4,000 | 31 to 90 days | \$50,000,000 |
| Montgomery | Economic Recovery Plan | Streetscape on National Rd from 175 to Brown School Rd spanning about 1750 feet. The project will include trees, streetlights, sidewalk, and curbs. | Suppermet, Inc. | 26 | 0 to 30 days | \$750,000 |
| Montgomery | National Rd Streetscape project, phase 4 | Streetscape on National Rd from Maple Br to Dixie Dr spanning about 950 feet. The project will include trees, streetlights, sidewalk, and curbs. | City of Vandalia | 0 | 181 days or more | \$1,163,268 |
| Montgomery | National Rd Streetscape project, phase 3 | Streetscape on National Rd from Maple Br to Dixie Dr spanning about 950 feet. The project will include trees, streetlights, sidewalk, and curbs. | City of Vandalia | 0 | 181 days or more | \$1,163,268 |
| Montgomery | Stonequarry Road resurfacing project | Stonequarry Rd will be resurfaced from the west city limits to the east line of the Ashbury Farms subdivisions for about 5900 feet. | City of Vandalia | 0 | 181 days or more | \$272,278 |
| Montgomery | Helde Road resurfacing project | Helde Rd will be resurfaced from Stonequarry Road to National Rd spanning about 6650 feet. | City of Vandalia | 0 | 181 days or more | \$334,000 |
| Montgomery | WolfCreek Street Mill and Resurfacing Project | The project, "WolfCreek Street Mill and Resurfacing Project" will consist of 3,380 linear feet of mill and overlay of WolfCreek Street, a Urban Collector street here in the City of Brookville. The Pavement Condition and Asphalt Rating by 25' City Engineer has been completed with a recommendation of milling and overlay on the 2000 calendar year. When the sidewalks are milled and replaced on the WolfCreek Street within the City, it will meet the guidelines and conditions of the Ohio Department of Transportation. | City of Brookville | 20 | 31 to 90 days | \$250,000 |
| Montgomery | Dunbar House Restore Exterior Trim and Windows | Paul Laurence Dunbar State Memorial is a part of the National Parks Service Dayton Aviation Heritage National Historical Park, and the Dayton Aviation Heritage Trail, and is a key element in the revitalization efforts occurring in the historic Wright Center neighborhood. A new visitor's center was completed in 2003, the Dunbar carriage house was restored to its original appearance, and new historically correct state roofs were installed on all three original structures. Scope of exterior work on all houses: Restore and repair original exterior wood trim Repair and replace original windows Repair and install original shutters on the Dunbar House Repair and refinish original exterior doors Community Job Opportunities through Arts Education Program is a project that will take Residence In Praise Fine Arts community Center to the next level in helping to create more jobs in the Montgomery county, Toddwood community. Residence In Praise Fine Arts Center has been in existence for 12 years and has out grown the current arts building. We will need to acquire a facility that has more classroom space, multipurpose space, seating area, offices, and lobby in order to accommodate the growing need for arts instructors during the day, after school, all day summer arts camps, and on going weekend performances throughout the Montgomery County and surrounding counties. Jobs will include additional arts instructors, office staff, transportation drivers, maintenance staff, marketing and accounting staff, collection staff, sewing arts instructors to nursing homes, special needs organizations, and veteran facilities. We will also need additional updated technology equipment, tools and materials to stay abreast with current trends of arts education. We desire to stimulate student achievement, family unity, character building jobs, revitalize communities through the arts. | Ohio Historical Society | 10 | 31 to 90 days | \$175,000 |
| Montgomery | Wastewater Treatment De-chlorination Replacement | This Wastewater Treatment Project would replace an existing disinfection process. The current process adds chlorine to the final discharge effluent. Then another chemical, sulfur dioxide, is injected to neutralize the chlorine. The proposed project simply replaces the required disinfection by using ultra-violet light. Ultra-violet bulbs would replace the chemical system. | City of Englewood | 0 | 91 to 180 days | \$386,800 |
| Montgomery | Health and Quality of Life for People with Develop | Engineering is completed and the project is ready to go. Outcomes for this project is the purchase of 10 accessible vans to provide community-based transportation for adults with developmental disabilities served by two nonprofit agencies that provide homes and other services. The project also includes the purchase of two homes (one for each agency) to expand housing opportunities for new residents and enhance quality of housing for current residents. In addition, the project calls for safety and health modifications to existing homes in such areas as sprinkler systems (as required by the state), in-home generators, weatherizing homes and other energy efficiencies and environmental upgrades for safety and health of residents and for cost savings and effectiveness for the agencies to help maintain current service levels as revenues are decreasing. All of these are areas where NO OTHER FUNDING SOURCES ARE AVAILABLE. | Partners For Community Living | 200 | 0 to 30 days | \$800,000 |
| Montgomery | Reibold Bldg Fire Alarm - Backbone | The two agencies are Choices In Community Living, which began services in 1985, and The Resident Home Association, which began services in 1989. Our homes are located by the Ohio Department of Mental Retardation and Developmental Disabilities and serve adults with autism, mental retardation and other disabilities. | Montgomery County Public Works | 6 | 91 to 180 days | \$242,000 |
| Montgomery | Memorial Hall Exterior, Protection, and Repairs | To provide the equipment and network backbone for the replacement the alarm system and mass notification system. Protection of the historic structure until such a time that it can be re-opened. Work to include exterior cleaning, sealing & caulking sidewalk repairs, and repairs to building HVAC and other equipment. | Montgomery County Public Works | 30 | 181 days or more | \$525,000 |
| Montgomery | Memorial Hall Restoration | Restore the Veterans Memorial to a functional condition, including office space, meeting rooms, and a programmable performance venue. | Montgomery County Public Works | 100 | 181 days or more | \$2,500,000 |
| Montgomery | Traffic signal at Salem Avenue and Wheeler Avenue | Add a traffic signal and cross-walk at Wheeler Avenue and Salem Avenue. This application is presented on behalf of the Wheeler Neighborhood Association who feel that there is a safety issue for people crossing Salem Avenue at this location. The installation of a traffic signal at this location does not meet sight triangle requirements and will require the acquisition of right-of-way for the support poles. | Montgomery County Engineers | 2 | 181 days or more | \$200,000 |
| Montgomery | Civic Education Expansion | Increase the quality and effectiveness of the Kids Voting program in the Dayton Region and expand the service area to cover the Cincinnati area. Currently there is not a Kids Voting affiliate in Cincinnati. The Kids Voting program promotes civic education by teaching the power of democracy through participatory citizenship to students K-12. The program includes Youth @ the Booth where high school seniors are recruited to be county poll workers on Election Day, classroom curriculum free of charge, mock election, carbon and essay contests, a youth council, etc. These programs will be offered to the over 250,000 students in the Cincinnati area. | Kids Voting Dayton Region | 7 | 0 to 30 days | \$200,000 |
| Montgomery | Lower cost senior and recuperative care | Kids Voting Dayton currently serves 150,000 students in 37 school districts across six counties. Providing in-home care to senior and disabled persons allowing them to remain in their homes and decreasing the need to live in a full care nursing home. | Helping Hearts Care Connection | 25 | 0 to 30 days | \$100,000 |
| Montgomery | New Business Expansion | Start or organization that has begun to grow, but cannot afford to grow as there is not enough capital to bring on the staff necessary to sustain growth. Once staff is in place we will be able to reach a larger customer base. | Elite Concierge | 150 | 0 to 30 days | \$50,000 |
| Montgomery | Main Street Resurfacing Project | The project will include the smooth sealing of Main Street, State Route 48, through the City of Englewood. This road is currently identified as a "Principal Arterial Other Urban and Rural" by the MVRPC Highway Functional Classification map. Main Street currently has average daily traffic counts around 25,700 within Englewood and is the gateway to northern communities such as Union and Xenia. The project includes approximately 3 miles of 5 lane roadway, a major arterial road for northern Montgomery county. | City of Englewood | 10 | 0 to 30 days | \$620,658 |
| Montgomery | Union Boulevard Resurfacing | The project will include the smooth sealing of Union Boulevard through the City of Englewood. This road is currently identified as a "Minor Arterial" by the MVRPC Highway Functional Classification map. The road carries an average daily traffic count of over 10,000 vehicles per day. Due to the nature of this project, resurfacing, the city could expedite it and bid by June 2009 if approval is awarded by ODOT. In terms of phasing this project, the city would be willing to resurface less than the entire Union Boulevard Corridor if less funding is awarded. Therefore, the amount of funding awarded would equal to the amount of resurfacing performed. | City of Englewood | 10 | 0 to 30 days | \$370,700 |
| Montgomery | 2009 Street Resurfacing Program | The project will include the smooth sealing of residential and arterial streets within the City of Englewood. These streets have been identified by the attached maps. Due to the nature of this project, resurfacing, the city could expedite it and bid by June 2009 if approval is awarded by ODOT. In terms of phasing this project, the city would be willing to resurface less than the entire amount identified if less funding is awarded. Therefore, the amount of funding awarded would equal to the amount of resurfacing performed. | City of Englewood | 0 | 0 to 30 days | \$434,343 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Ward Field Parking Lot | The project will include the paving of the Ward Field Parking Lot, located at the northeast corner of Hoke Road and Smith Drive. The construction will include the installation of 175,000 square feet of new pavement and 2,400 linear feet of barrier curb. The parking facility is utilized by the Northmont SAU's soccer and serves as a Greater Dayton RTA park-and-ride location. | City of Englewood | 0 | 0 to 30 days | \$192,835 |
| Montgomery | Drainage Channel Improvements | The installation of 9400 feet of 18" concrete channel including excavation, clearing and restoration of an open channel located at Curt Drive adjacent to Englewood Hills Elementary School. The channel collects approximately 12% of the City's water runoff, draining approximately 459 acres. Built in 1960, the channel has collected to silt/fill; it is in poor condition and a continuous maintenance problem. The new channel will provide 50 years of new life. | City of Englewood | 0 | 0 to 30 days | \$349,500 |
| Montgomery | Ohio Hydrogen Highway | Project Description: This is a complete system delivered to several homes with a 3,660 watt solar array and a 10,000 watt wind tower for electricity and a fully automated hydrogen generator located to produce enough hydrogen from water to run cars and recharge electricity with a standby generator powered by hydrogen, or a fuel cell. This electricity could then be used to fill down lines of the wind and solar power when the wind is not blowing or the sun is not shining in place of batteries. The hydrogen generator co-generates heat to heat the home and hot water. Also a conversion kit for cars is included so that it will run on both gasoline and hydrogen. In this way when you get far from home and can't refill with hydrogen you can still use gasoline to get where you're going and back home again. This idea is not hypothetical, after five years we have developed the key to make this all work which is called the AutoRRM or an automated residential hydrogen generator. Using this system will allow the hydrogen economy to grow one home at a time and expand globally. By installing at least 12 of these systems along the interstate of Ohio on private farms and linking them together via the internet we will establish a Hydrogen Highway across Ohio. The availability of hydrogen is a primary obstacle to attracting hydrogen based companies to Ohio and the new results the existing two lane roadway, implementing ODOT and Montgomery County standards. Results would be a three lane roadway with curb and gutter along with storm sewer system. | Residential Hydrogen Power LLC | 31 | 0 to 30 days | \$2,000,000 |
| Montgomery | Nutt Road Phase II | Resurfacing deteriorating roadways within Washington Township, including curb, gutter and storm sewer system repairs. | Washington Township Public Works Department | 20 | 0 to 30 days | \$1,500,000 |
| Montgomery | Washington Township Street Improvement Project | The City of Clayton will install or upgrade up to 170 handicap ramps in residential area. The area is zoned Single Family Residential and was built beginning in the early 1960's and completed in the mid 1970's. Both of these development areas were constructed without wheel chair accessible curbs. | Washington Township Public Works Department | 20 | 0 to 30 days | \$5,000,000 |
| Montgomery | Handicap Ramp Improvements | The residential plan streets have a 50' right-of-way and the roads that are listed on the Official Thoroughfare Plan have a much larger right-of-way (Old Salem, Union, Taywood, Westbrook and Carter). All ramp improvements can be accommodated within the existing right-of-way. The project will also include upgrading numerous existing wheel chair ramps in the City with non-skid surfaces. | City of Clayton | 5 | 91 to 180 days | \$293,485 |
| Montgomery | Southway Road Resurfacing | Southway Road is an urban collector street that is in need of resurfacing. The City of Clayton is requesting assistance to resurface approximately 4000 linear feet between SR 49 and Crestway Road. The project will remove 2 inches of asphalt from the existing surface and replace it with new asphalt. Southway Road has a 22 foot wide paved surface. Southway Road serves as a collector route for residents who want to avoid congestion along Hoke Road between St. Rt. 49 and Winger Road. Bus service is available at Hoke Road. Additionally, Salem Christian Academy is located on Southway Road. The school has 115 students in grades K through 8th grade. The Salem Christian Academy also works with Northmont City School District to provide transportation for their students. Resurfacing will improve road conditions for families and school buses who utilize the facility. The resurfacing project conforms with the City's prior resurfacing projects and will be competitively bid. | City of Clayton | 5 | 91 to 180 days | \$295,091 |
| Montgomery | Crestway Road Resurfacing | Crestway Road is an urban collector street that is in need of resurfacing. The City of Clayton is requesting assistance to resurface approximately 2600 linear feet for the section running north from the 170 overpass bridge to W. Winger Road. The project will remove 2 inches of asphalt from the existing roadway and replace it with new asphalt. Crestway Road has a 20 foot wide paved surface. Crestway Road serves as a collector route for residents who want to avoid congestion along Hoke Road between St. Rt. 49 and Winger Road. Bus service is available at Hoke Road. The resurfacing project conforms with the City's prior resurfacing projects and will be competitively bid. | City of Clayton | 5 | 91 to 180 days | \$186,331 |
| Montgomery | Wellbaum-US 40 to Brookville Water Main Extension | Extend a 12" water main line from US 40 to Brookville (13,000 ft) which will finish a service loop. The project is currently in the design phase. When complete, water service will enhance the development potential for this site. Clay Township/Clayton/BCDC is exploring opportunities for lease developments. | City of Clayton | 65 | 181 days or more | \$1,300,000 |
| Montgomery | Casting Supply Chain for Clean Coal | Ohio has the largest number of landfills of any state (340) despite the growing global competition and the sagging economy. buyCASTINGS.com, Inc. (BCI), the world's largest manufacturer for the metal casting industry and one of 100,000 fastest growing private companies, plans to support the casting industry by developing an online collaborative system for Ohio companies needing castings to make the metal casting technology successful in Ohio. Current methods are expensive, time-consuming, and not environmentally friendly. BCI has over 1100 members and gets over 100,000 hits online monthly. BCI bought, used castings to reduce cost and speed up delivery. BCI will deploy this successful model to provide an online system, managed by those who have expertise in clean coal technology, the casting industry, and web based sales. The Casting Supply Chain for Clean Coal will enable greater technology transfer, greater collaboration, and 60% cost reduction in alternative energy areas that has a large untapped potential - clean coal. The proposed infrastructure for Clean Coal will save and create thousands of jobs and accelerate technology commercialization. A \$700k funding over an eighteen month period will provide a 100% return on the investment. | buyCASTINGS.com, Inc. | 150 | 31 to 90 days | \$750,000 |
| Montgomery | Austin Pike Industrial/Commercial Park | Project to construct 4,100 linear feet of 3 lane roadway and grade building pads on a 63 acre planned industrial/commercial park owned by Miami Township. Project has nearby access to Dayton freight. Blosser Airport and Interstate 75. Project will supplement nearly 960 million in other local, state, and federal funds being utilized in immediate area to construct a new interchange on I-75 and redesign other local roads to decrease traffic congestion and provide direct access to nearby industrial and office developments. Project has the ability to significantly enhance the availability of ready to build industrial and commercial sites within the heavily traveled Interstate 75 corridor. Project will also facilitate relocation and expansion of the Miami Township Public Works facility, permitting improved operational efficiency in delivering public services in a growing area of the community. | Miami Township | 200 | 91 to 180 days | \$2,000,000 |
| Montgomery | Jacks Lane Sanitary Sewer Extension | Jacks Lane is home to 75 jobs and includes a variety of companies in the machining, contracting and service industries. These businesses are continuing to grow and could add 50 new jobs in the next three years. This project will provide sanitary sewer service to existing business park and include 2000 linear feet of 12" diameter sewer line. New line will replace a failing wastewater treatment plant. | City of Clayton | 145 | 91 to 180 days | \$2,000,000 |
| Montgomery | Brant Pike, Phase VII | This project is located on Brant Pike on the north side of the City of Huber Heights and extends from Gruesmeyer Way to north Montgomery County line. The project is the last phase I widening for this roadway and will complete the road from the north end of the City to the south end of the City. The project is 1900 ft. in length and consists of widening the roadway from 2 lanes to 4 lanes with a center turn lane. The project is needed to help carry the increasing traffic volumes that this roadway is experiencing. | City of Huber Heights | 50 | 91 to 180 days | \$1,205,830 |
| Montgomery | Business growth | To get together a marketing plan to secure contracts and cover payroll for employees until the business gets cash flow from our clients. Currently using a lending company for payroll which takes away money to put into the marketing that is needed to help business grow. This will produce hundreds of jobs. | Healthcare staffing | 150 | 0 to 30 days | \$150,000 |
| Montgomery | West Carrollton Health Clinic Renovation | Renovate approx 2,000 sq ft of clinic space for child health care center for needy children. Including interior renovation, asbestos removal, and replace existing windows. | Montgomery County Public Works | 60 | 181 days or more | \$350,000 |
| Montgomery | Bellefontaine Road Culvert Replacement | This project consists of replacing a deteriorated box culvert and retaining wall on Bellefontaine Road. The new culvert will replace an existing 26' culvert under the roadway and fit in with the box culvert for a total length of 110 feet. The new culvert will be designed long enough to provide safety to the northbound drivers to eliminate the retaining wall structure from the edge of the pavement. | City of Huber Heights | 10 | 31 to 90 days | \$222,354 |
| Montgomery | W. Central Ave / Miami Ave Paving Project | West Central Avenue is a Principal Arterial roadway within West Carrollton with an ADT of 18,400. Miami Avenue is an Urban Collector, with an ADT of 7200 and serves the industrial and manufacturing section of West Carrollton. These roads serve as a main link between western communities and I-75. The Carroll/Miami corridor is a main truck route through West Carrollton. Heavily loaded trucks have caused severe rutting and pavement failures. The Pavement Condition Ratings (PCR) for these roadways are 36 and 32. See attached photos and PCR's. This project will include pavement planning and repaving with ODOT Item 442 Superpave Asphalt to eliminate the rutting and support heavy loads. Pavement failures will be corrected prior to paving. A SMII interlayer will be used to prevent cracks from resurfacing. Sections of curb and gutter that are deteriorated will be repaired. Curb ramps will be brought up to ODOT standards. All curb ramp work will be within existing Right-of-Ways. | City of West Carrollton | 6 | 0 to 30 days | \$307,120 |
| Montgomery | Bellefontaine Road Widening and Realignment | This project consists of widening approximately 600' of Bellefontaine Road located 500' south of Chamberlaine Road from 20' to 40' and replacing a large CMP culvert with a new Box Culvert. Also, the road contains a large depression which needs to be raised in order to obtain the proper sight distance requirements. The new roadway will include sidewalk, curb, and gutter, and storm sewer. The roadway needs to be widened to provide safety to vehicles traveling southbound on Bellefontaine Road. | City of Huber Heights | 20 | 91 to 180 days | \$429,354 |
| Montgomery | E. Dixie Dr / Central Ave Bridge Painting and Repa | This bridge was last painted 30 years ago. The paint is peeling, oxidizing, and the beams are rusting. The concrete sidewalks have 6" square pieces of concrete slabs which need replaced. See attached photos. This project includes surface preparation of the structural steel, painting of the structural steel, and repairs to the concrete sidewalk and abutments. | City of West Carrollton | 13 | 0 to 30 days | \$718,586 |
| Montgomery | Taylorville Road Widening Improvements Northside | This project consists of widening Taylorville Road on portions of the north side of the roadway that have gaps in the full widening of the road. Also, the widening on the north side will be set up to achieve a half width of 20' from centerline to back of curb to match existing portions of the roadway and the City standard width to a single collector roadway. The total length of the project is 2,930 ft. and will include installing sidewalk, curb and gutter, catch basins, and storm sewer. | City of Huber Heights | 10 | 91 to 180 days | \$233,589 |
| Montgomery | Farmersville WC Road Paving Project | The location of the project is per the attached map. The work includes approximately 2000 feet of Farmersville West Carrollton Road from Farmers Road to Upper River Road. The Broadway bridge has a span of 660 feet and it was built in 1976. | City of West Carrollton | 2 | 0 to 30 days | \$94,600 |
| Montgomery | Broadway Street Bridge Rehabilitation | Repair backwalls that are in poor condition. Steel girders are weathering and in need of painting. The deck is experiencing cracking and is in need of replacement. The bridge serves as a major connector to I-75. | Montgomery County Engineers | 20 | 91 to 180 days | \$6,116,000 |
| Montgomery | North-South leg of the Continuous Flow Intersectio | Initial phase of Ohio's 1st continuous flow intersection (CFI) on SR 741. ODOT decided to build the CFI in phases due to TRAC funding constraints. The 2nd phase of the CFI, to be constructed on SR 741, remains unfunded. The 2nd phase of the CFI on SR 741 is an ideal stimulus project. Stage 1 design of the entire CFI is complete and a NEPA release has been obtained. Right-of-way (ROW) acquisition requirements have been completed by the Montgomery County TID and ODOT supervision. Having only appropriation of the affected parcels to secure control. Stage 2 & 3 design can be completed in 3 months + review. Right of way acquisition can be completed by appropriation by the TID in 60 days. This project can clearly be bid & under construction within 6 months and be completed 2015. The estimated cost of the project is \$6,000,000. The TID is willing to assist ODOT with the project by initiating Stage 2 & 3 design & ROW appropriation with local funds available as a result of excellent bids for construction of the Austin Interchange. | Montgomery County Transportation Improvement Distr | 24 | 91 to 180 days | \$6,000,000 |
| Montgomery | Chambersburg Road Water Tower Painting | This project involves the painting of the Chambersburg Road Water Storage Tower to extend the life of the tank and avoid costly replacement. Presently, the paint on the tower is in poor condition and has created an aesthetically unpleasing sight in and around the neighborhood. The tank may require surface preparation consisting of sandblasting or metal parts replacement due to corrosion. | City of Huber Heights | 14 | 31 to 90 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|----------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Water Main Replacement | This project consists of replacing approximately 12,355.11' of existing water main on various streets located in the southern portions of the City. The water main in this area is extremely old and in need of replacement. The mains are corroded, underlaid and are experiencing constant water main breaks. This project is needed in order to keep the water system updated and to reduce maintenance. | City of Huber Heights | 80 | 91 to 180 days | \$1,850,250 |
| Montgomery | Salem Avenue 1 | Resurfacing of Salem Avenue from Covenant House Drive to Denlinger Road, approx. 1,200.11'. | City of Trotwood | 18 | 31 to 90 days | \$814,000 |
| Montgomery | Salem Avenue 2 | Resurfacing of Salem Avenue from north of Maria Joseph Living Care Center entrance to Turner Road, approx. 1,500.11'. | City of Trotwood | 22 | 31 to 90 days | \$990,000 |
| Montgomery | Little York Road Bridge Rehabilitation | The Little York Bridge is a five span prestressed concrete beam bridge. The beams are deteriorating due to strand failure. Several beam brackets have been removed to assist in the repair of the bridge. The bridge is in need of repair. The project will include the replacement of the bridge. No environmental clearance or property acquisition is anticipated. | Montgomery County Engineers | 15 | 181 days or more | \$1,716,000 |
| Montgomery | Olive Road 1 | Resurfacing of Olive Road from Salem Avenue to Main Street, approx. 10,560.11', to include curb, gutter, pavement marking, and full-depth repair. | City of Trotwood | 22 | 31 to 90 days | \$995,000 |
| Montgomery | Fire Hydrant Replacement | This project involves removal and replacement of the oldest fire hydrants within the City to insure compatibility with current fire equipment and continue fire protection. This project will help to replace approximately 100 existing hydrants. Many of these hydrants are in excess of 50 years old and the elimination of these old hydrants will insure timely fire response. | City of Huber Heights | 20 | 91 to 180 days | \$500,000 |
| Montgomery | Olive Road 2 | Resurfacing of Olive Road from Little Richmond Road to W. Third Street, approx. 10,560.11', to include pavement marking, full depth repair, and air distance correction. | City of Trotwood | 18 | 31 to 90 days | \$792,000 |
| Montgomery | Shiloh Springs Road | Resurfacing of Shiloh Springs Road from Olive Road to W. Third Street, approx. 11,100.11', to include curb and gutter, pavement marking, and full-depth repair. | City of Trotwood | 22 | 31 to 90 days | \$980,000 |
| Montgomery | Denlinger Road | Resurfacing Denlinger Road from Westbrook Road to the south terminus of Denlinger, approx. 14,410.11', to include curb/gutter, pavement marking, and full-depth repair. | City of Trotwood | 22 | 31 to 90 days | \$997,000 |
| Montgomery | North Dixie Health Clinic | Existing clinic is too small and has outlived its operational usefulness. This project will provide the surrounding neighborhoods with a modern clinic to serve their needs. Project entails purchasing and renovating space (approx 4000 sq ft), providing ADA accessibility, exam rooms with sinks, restrooms, offices and security. | Montgomery County Public Works | 80 | 181 days or more | \$700,000 |
| Montgomery | Sanitary Sewer Lining | This project involves the rehabilitation of damaged sanitary sewers within the City. Sewer lining is typically completed on sewers that show damage in the form of crumbling sections of pipe, cracks or loose joints. These deficiencies can result in significant groundwater infiltration and flow (IGI) and obstruction of sewerage flow. Lining the pipe will increase the strength, seal cracks, and improve flow characteristics of the pipe. Lining is a more cost effective than excavation and replacement. This project will help to maintain and improve the existing infrastructure of the City, reduce sewage treatment costs, and maintain the capacity of the wastewater treatment plant. | City of Huber Heights | 20 | 91 to 180 days | \$500,000 |
| Montgomery | Shoup Mill Road Bridge Repainting | Shoup Mill Road is a major east-west connector between the City of Dayton, Hamilton Township and the City of Trotwood. If this critical bridge maintenance is not completed, it is likely to lead to corrosion of the steel framing resulting in more expensive repairs or complete replacement of the superstructure. | Montgomery County Engineers | 4 | 91 to 180 days | \$750,000 |
| Montgomery | Patterson Blvd/Riverside Dr Bridge Rehabilitation | This project involves the rehabilitation of a multiple bridge crossing the Great Miami River in the City of Dayton. The proposed work includes rehabilitating the back walls, installing new expansion and bearing the structural steel adjacent to the back wall, and repainting the bridge deck. Traffic count is 13,170 vehicles. | Montgomery County Engineers | 4 | 181 days or more | \$460,800 |
| Montgomery | Street Rehabilitation and Resurfacing | This project consists of resurfacing deteriorated streets throughout the City of Huber Heights. Streets that have an inadequate structural capacity will require extensive rehabilitation and possible reconstruction. Given the rising cost of construction materials and labor, the City has not been able to keep pace with the maintenance needs of our transportation infrastructure. This project will be in support of the annual resurfacing of approximately 512-8 million. Funded by an income tax. This project will restore our streets to an acceptable level of service. The existing road pavement on Lyons Road is showing significant signs of distress. The existing asphalt pavement on the east side is showing failure at several locations. | City of Huber Heights | 40 | 31 to 90 days | \$1,000,000 |
| Montgomery | Lyons Road and Asphalt Trail Resurfacing | No right-of-way or environmental clearance is required. Traffic counts indicate 22,771 vehicles per day west of SR741 and 18,864 vehicles per day east of SR741. | Montgomery County Engineers | 4 | 91 to 180 days | \$501,621 |
| Montgomery | SE Bikeway Corridor | The project consists of constructing a multi use trail along the City of Dayton and City of Oakwood cooperation line from Irving Avenue to Shoyer Road. The area is an existing sewer access road. The trail will be asphalt pavement, ten feet wide with two foot shoulders. There is an existing drainage ditch along the entire west side of the trail and along portions of the east side. Rock channel protection will be placed in the drainage ditch to stabilize and define the channel. The trail will cross through a congested metal culvert under Patterson Road. Concrete steps will be constructed at the entrance to the culvert from Patterson Road. | City of Dayton | 35 | 181 days or more | \$1,199,000 |
| Montgomery | Downtown Gateway Improvements | Reimaging on West Third Street between 175 and St. Mary's Street, and on South Main Street from Sixth Street to Washington Street. The primary feature along East Third Street includes widening the sidewalk and creating a tree lawn with screening from State Street to Webster Street. The improvement along Patterson Boulevard from Third Street to Fourth Street will remove the right turn lane and construct a water sidewalk and a tree lawn with landscaping. This project also includes removing and repairing all of the damaged curb and walk throughout the downtown, and resurfacing of the following streets: • Third Street from 175 to Webster Street • Sixth Street from Main Street to Wilkinson Street • First Street from 175 to Jefferson Street • Monument Avenue from Wilkinson to 175 and from Jefferson Street to Patterson Boulevard • Perry Street from Robert Drive to Monument Avenue | City of Dayton | 140 | 91 to 180 days | \$3,625,000 |
| Montgomery | ADA Ramp Installation | This project consists of installing ramps that are in compliance with the Americans with Disabilities Act (ADA). There are numerous intersections on thoroughfare and residential streets throughout the City of Huber Heights that require ADA ramps. Ramp installation will improve accessibility for our citizens with disabilities as well as for our elderly population. | City of Huber Heights | 40 | 31 to 90 days | \$1,000,000 |
| Montgomery | Manhole Rehabilitation | This project consists of rehabilitation of sanitary sewer manholes to eliminate infiltration and inflow (I&I). Recent metering and modeling of the sanitary sewer system has identified a problem with I&I throughout the City of Huber Heights. This I&I results in increased costs for citizens to treat "clean" water and reduced treatment capacity at the waste water treatment plant. Reduced treatment capacity could jeopardize future residential and economic development opportunities. Repair methods include reconstruction, as well as internal and external rehabilitation. | City of Huber Heights | 20 | 31 to 90 days | \$500,000 |
| Montgomery | 2009 Thoroughfare Resurfacing Citywide | Asphalt resurfacing on Cornell Drive, North Main Street, Stanley Avenue, East First Street, and Germantown Street | City of Dayton | 50 | 91 to 180 days | \$1,485,000 |
| Montgomery | Backflow Prevention and Water Meter Installation | This project consists of installing backflow preventers and water meters at approximately 50 services that are currently charged a flat rate. These locations were unmet when the water system was purchased by the City of Huber Heights. Backflow prevention is required to protect the water distribution system from siphoning or cross-contamination. Metering will allow the City to determine production losses and leakage in the water distribution system. Loss and leakage directly impact customer costs. | City of Huber Heights | 20 | 31 to 90 days | \$500,000 |
| Montgomery | KROC Center Infrastructure Improvements | Replacement of curbs and sidewalks, and asphalt resurfacing on Kowese Street from Chapel Street to Hillside Avenue and on Webster Street from Kowese Street to Leonard Avenue. | City of Dayton | 12 | 181 days or more | \$388,300 |
| Montgomery | James H. McGee Boulevard Rehabilitation | Replacement of concrete pavement joints, and asphalt resurfacing, on James H. McGee Boulevard from U.S. Route 35 to Kammer Avenue. | City of Dayton | 40 | 181 days or more | \$1,122,000 |
| Montgomery | Harshman Road/Valley Pike Improvements | The project consists of infrastructure repairs along Harshman Road from the north corporation limit with Dayton to the south corporation limit with Dayton (just south of SR 4), approximately 7,000 feet (1.35 miles) long by 73 feet wide and Valley Pike from Brookwood Avenue to the east corporation limit with Dayton, approximately 9,480 feet (1.80 miles) long by 40 feet wide. The Harshman Road improvements will include 3.5 inch pavement planning and asphalt overlay with full depth concrete joint and base repair, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. The Valley Pike improvements will include 2 inch pavement planning and asphalt overlay with full depth base repair, full depth concrete pavement replacement through the Harshman Road intersection, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. | City of Riverside | 50 | 181 days or more | \$6,457,143 |
| Montgomery | Woodman Drive/Linden Avenue Improvements | The project consists of infrastructure repairs along Woodman Drive from north of US 35 to the south corporation limit with Dayton, approximately 3,560 feet (0.67 miles) long by 81 feet wide and Linden Avenue from the west corporation limit with Dayton to the east corporation limit with Beavercreek, approximately 8,200 feet (1.55 miles) long by 48 feet wide. The Woodman Drive improvements will include 3.5 inch pavement planning and asphalt overlay with full depth concrete joint and base repair, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. The Linden Avenue improvements will include 3.5 inch pavement planning and asphalt overlay with full depth base repair, full depth concrete pavement replacement through the Woodman Drive intersection, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. | City of Riverside | 50 | 181 days or more | \$2,643,080 |
| Montgomery | Spaulding Road/Spinning Road Improvements | The project consists of infrastructure repairs along Spaulding Road from Linden Avenue to the south corporation limit with Dayton, approximately 1,860 feet (0.36 miles) long by 32 feet wide and Spinning Road from Airway Road to Linden Avenue, approximately 10,600 feet (2.01 miles) long by 36 feet wide. The Spaulding Road improvements will include 2 inch pavement planning and asphalt overlay with full depth base repair, utility manhole and valve adjustments, thermoplastic striping and raised pavement marker installation. The Spinning Road improvements will include 2 inch pavement planning and asphalt overlay with full depth base repair, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. | City of Riverside | 50 | 181 days or more | \$1,710,830 |
| Montgomery | Airway Road Improvements | The project consists of infrastructure repairs along Airway Road from the west corporation limit with Dayton to the east corporation limit with Fairborn, approximately 10,780 feet (2.05 miles) long by 61 feet wide. The Airway improvements will include 2 inch pavement planning and asphalt overlay with full depth base repair, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. | City of Riverside | 50 | 181 days or more | \$2,156,440 |
| Montgomery | Springfield Pike Improvements | The project consists of infrastructure repairs along Springfield Pike from the west corporation limit with Dayton to the east corporation limit with Greene County, approximately 11,200 feet (2.12 miles) long by 52 feet wide. The Springfield Pike improvements will include 2 inch pavement planning and asphalt overlay with full depth base repair, utility manhole and valve adjustments, thermoplastic striping, raised pavement marker installation, and loop detector replacements. | City of Riverside | 50 | 181 days or more | \$2,111,725 |
| Montgomery | Small Vending Machine Projects | HSV has been in business through successors for 20 yrs. Under new ownership 3 yrs. HSV places snack boxes in businesses who pay on the honor basis. During the recession, the theft rate has increased to 30%. HSV needs to buy 1000 sm vending machines for 20% of its 5000 accounts to return to profitability. HSV has talked to its bank and is not willing to loan on such equipment. If HSV is not able to purchase the vending machines, it will be forced to close the market. All employees will take their share. The machines will serve five key business purposes: eliminate theft, increase gross profit margins, stabilize pricing of new accounts and enable HSV to retain accounts and become profitable. That is the biggest concern for HSV not only because of the loss but accounts that file the service or are good paying accounts will cancel eventually because they get tired of always collecting. HSV has had to improve and control the theft by charging product mix (use higher margin items), using an employee at an account to collect money, and offering commissions with very little success. Placement of machines is the only business way to change to a successful business model. | Honor Snack Vending, LLC ("HSV") | 17 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Montgomery | energy saving | 10 new windows two new doors front and back porches on the house. my husband went to work 4 years ago and was told the company filed bankruptcy. Being over 50, he could not get a job for at least 6 months by then, we had to live on the bankruptcy chapter 11, which was paid back in 20 months. Our credit is not good enough now to get a loan to fix the house falling down around us. I am medically disabled with two total knee replacements. Can't help my husband financially to keep the cold air out and the heat in the home. We just want to survive the DP&L, Verizon rate hikes and make our home more energy efficient. This would help us keep our home in the long run. Thank-you for at least listening. | homeowner | 1 | 31 to 90 days | \$6,000 |
| Montgomery | rogers home improvements | 18 new windows old is broken and worth about 120 linear feet of gutters and down spouts. mortar repair on house hood. a 3rd needs repair water leaking into home, drive way repair forcing water into back of home causing it to leak into basement and back mold/damage occupied and would allow for quality leasing and future upgrades as needed. | the rogers family | 4 | 0 to 30 days | \$18,000 |
| Montgomery | Building Purchase & Renovation | Opportunity for other current tenants to expand and be retained as a long term tenant adding jobs into the facility as well as allow for owner occupied tenant (PEQ Consulting Inc) to expand technology assistance area in support of our on line education assistance division as well as our administrative support division. Cost for the project in total include 5.6 million to purchase the building from current ownership group, 1.6 million to renovate 38,500 SF of the building immediately for additional occupancy, and 2.5 million dollar in infrastructure spending on electrical, power doubling needs more electricity to meet capacity demands and a new generator system that will allow the building to run during power outages, and parking improvements. parking lots resurfaced, fencing installed to accommodate the government tenant needs and to reduce wind and blowing snow) in order to accommodate the additional jobs and tenants that would use the facility home. | PEQ Consulting Inc | 150 | 31 to 90 days | \$3,500,000 |
| Montgomery | Balloon Mortgage Help | Appraisal of home valued at \$100,000 with ARM lender. New home is appraised at \$65,000.00. Need assistance to stop loan to value so mortgage lender can help to remove ARM to a fixed. | Home | 1 | 0 to 30 days | \$20,000 |
| Montgomery | Youth Flight Project | Aviation related training project geared toward underprivileged kids. Project would provide opportunities for high school, and possibly younger, kids to become involved with, work at, and learn from an aviation related business environment. The money would go toward providing the aircraft (very good used ones to start), instructors, facilities and equipment needed to start a program leading to an aviation career, or at least to open the eyes of some of these underprivileged kids to what is available in the world outside of what can be a very narrow window due to a limited environmental experience. The goal is to start the project with a couple of light aircraft, staffed by volunteer instructors (myself being one), and, necessarily, a paid staffer or two. But, as the project develops most of those positions would eventually be taken by students who have worked their way up through the system. This is designed to be eventually run by the students themselves, although with adult guidance. We would begin immediately with a normal flight training business with profits going to support the non-profit project for the kids, while offering free training to the kids. | Open Skies | 10 | 91 to 180 days | \$750,000 |
| Montgomery | home repairs | I would like to put a new green roof on our home to help cut down on heating bills.3 new windows to help cut down on the heating bills and new water pipe from our house to the back yard which 150 feet and to be under ground not just on top and repair the roof in the spare bedroom which leaks from the roof has been repaired two times still leaks and then we could use this room and then I could rebuild the dock to it and work for my family. I would also put solar panels on my home 4000.00 per year my property value went down and the taxes went up. I would like to pay part then in 16.100 the 1183.00 that were due I have been making monthly payments to the bank not an installment loan so I can't go back to the bank for home repairs. I do look around at my neighbors and it seems like they could use a little help to get started on home repairs so I would like to help them out without making effort to help myself and my home for my family because I cannot afford to move and take my daughter out of school and school which is only mine from our home for my needs for this year energy. | home owner | 2 | 0 to 30 days | \$22,000 |
| Montgomery | Cyber-Cafe | Money is needed to open a cyber cafe shop in southern Montgomery County or downtown Dayton area near University campus. The services would be used to purchase all equipment needed and pay for initial rent, utilities and payroll to get the business started. | Mac's Wifi Bistro | 20 | 91 to 180 days | \$400,000 |
| Montgomery | Home Energy Improvements | Reinsulate the attic of the house and replace old windows. | Individual Home Owner - Tax Payer | 3 | 91 to 180 days | \$5,000 |
| Montgomery | Bell Household Energy Efficiency Update | Update energy efficiency of brick home built in 1946. Replace original 1945 windows with energy efficient windows. Cost is approx. \$10,000. Add additional insulation to attic space. Add beam insulation to exterior walls which currently only have sheetrock. Add one third coverage inside them, the rest is open air space. The insulation has settled and decomposed since 1945. Approx. cost is \$2,000. Replace 15 year old water heater with a gas high efficiency on demand hot water module. Approx. cost is \$1,500. Replace wooden exterior doors with insulated metal doors, and modern storm doors. Approx. cost is \$1,500. All items needing replaced are 15 to 40 years old. | Bell Household | 8 | 0 to 30 days | \$16,000 |
| Montgomery | PERSONAL | OHIO TAXPAYER WHO FEELS SHOULD GET SHARE TO PAY OFF AUTO LOAN IN AMT OF \$11,430.46 IN ORDER TO BUY FIRST HOME FOR MY FAMILY. WANT TO BE ABLE TO SAVE MONEY TO BUY HOME AND POSSIBLY SOMEBODY GO BACK TO COLLEGE TO FURTHER EDUCATION. ALSO TO SAVE MONEY FOR MY CHILDREN IN ACTS OR 529 PLANS SO THEY MAY FURTHER THEIR EDUCATION IN THE FUTURE TO GET A GOOD JOB. AND FOR THE COUNTRY'S FUTURE. ALSO TO BE ABLE TO PUT AHEAD MY IRAs AND ACTS FOR ME TO RETIRE SAFELY AND COMFORTABLY IN MY FUTURE. HARD TO BE ABLE TO DO ANY OF THESE WITH AUTO LOAN PMT NEEDED TO FINANCE SO I HAD TO BUY 1 VEHICLE I HAD DONE BEFORE HAD KIDS. NOW I HAVE KIDS AND MY TAXES ARE 2.3 YRS TO HAVE JUST WHAT I HAVE IN THE BANK WHICH ISN'T A LOT. I MAKE DECENT MONEY BUT WITH RENT AND BILLS TO PAY, AND KIDS, NOT MUCH LEFT TO SAVE UP TO BUY A HOUSE. HAVE ALWAYS BEEN RESPONSIBLE AND HAVE GREAT CREDIT. JUST NEED MONEY TO SAVE FOR KIDS FUTURE, RETIREMENT, AND BUY 1ST HOME. I FEEL LIKE MANY OTHERS DO, WE HAVE HELPED THOSE WHO NEED AND THOSE WHO HAVE BEEN IRRESPONSIBLE WITH THEIR MONEY AND LIVES NOW IT'S TIME TO HELP THE RESPONSIBLE ONES. I JUST NEED A JUMP START TO STOP THROWING MONEY AWAY RENTING A HOME. THANK YOU VERY MUCH. | INDIVIDUAL/PERSONAL | 0 | 0 to 30 days | \$11,430 |
| Montgomery | Project Home Renovation | New roofs, new furnace, new air conditioning and an updated kitchen. New fencing, new landscaping as well as new windows and new exterior exterior doors. | Fowlc Home Improvement | 3 | 181 days or more | \$45,687 |
| Montgomery | Retraining | I have been unemployed since Jan 21 2009 and would like to go to school to obtain a degree as a Paralegal. | None | 1 | 31 to 90 days | \$28,000 |
| Montgomery | Housing Relief | Need assistance to create a more energy and weather efficient home. We find ourselves the victim of cutbacks at work and are struggling to do the things to our home that would make it more energy efficient and safe. We are looking for help with new siding, insulation in our attic, a new energy door that is insulated. As well as the removal of a tree that could cause damage to our house as well as the neighbors. | Adkins Family | 6 | 0 to 30 days | \$12,000 |
| Montgomery | tax penalty | My request is for 4000.00 to pay taxes due that I was penalized for using from my 401k after losing my employment. I needed the money from my retirement money to pay bills for said section. | self | 0 | 0 to 30 days | \$3,500 |
| Montgomery | Engery Efficient Improvements | We are seeking funds from the Federal Stimulus Initiative to improve the energy efficiency of our home. This would consist of replacing our windows which are over 20 years old. Additional funds would be used to replace our entrance door which is also the same age. Our current heating system (heat pump) still uses the older type of coolant which is dangerous to the O zone. This unit needs to be replaced with a high efficiency unit which would save on our energy costs. My wife is retired and I will be retiring later this year. With our income being limited, these improvements will surely help our angry costs. | Personal Home | 3 | 91 to 180 days | \$6,800 |
| Montgomery | Hospital Mold Removal | We are a national company with our corp. office in Ohio. We remove mold from hospital HVAC systems all over the USA. We take our own Ohio employees to accomplish the work. We recently had 22 Ohio employees in Seattle for six weeks. We have worked in 36 different states, in addition to other states. We are known to many in the hospital industry as the "go to company" for mold in HVAC systems. Our current business has been slowed from word of mouth with very little advertising or marketing. We believe that with national marketing we can create at least 20 additional Ohio jobs and possibly more. In addition to the direct jobs, the money will also be used to purchase more equipment from Ohio companies to do the projects. We will hire an Ohio marketing firm, using Ohio printing services, and an Ohio telemarketing company. We will be able to add additional office space in our 11,000 sq. ft. shop in a distressed residential neighborhood. We hire six convicts (persons from our neighborhood on a regular basis because we know it is tough for them to find work. That helps to keep them from returning to prison, saving Ohio more money and adding to the tax base. This money will help our neighborhood. | Meier Indoor Environmental Services llc | 28 | 0 to 30 days | \$225,000 |
| Montgomery | rejuvenation project | This project is need to update my mother's(Anna C. Turpin) home. She is a 68 year old retired legal secretary. She lost my father(courts) upon 11 years ago. Now she is worried about the pension plan from GM where my father worked for 34 years being discontinued. The home she is in needs a new roof/gutters/furnace and a bathroom overhaul. I would love to pay for this project myself but I was laid off from her. from my job and am now living on unemployment. It would be a dream of mine to be able to see this come to pass. Thank you for your time. | Turpin Rehab project | 2 | 0 to 30 days | \$30,000 |
| Montgomery | Fix-Up | Anthony Turpin | NA | 2 | 0 to 30 days | \$15,000 |
| Montgomery | Home Maintenance | Payoff loan and buy new furnace and air conditioner for my home. | NA | 0 | 0 to 30 days | \$14,000 |
| Montgomery | Furnace | Roof leaking, furnace near the end of its 20+ year life. I pay my mortgage but cannot afford maintenance. Need new furnace to replace our gravity furnace. | N/A | 1 | 0 to 30 days | \$2,500 |
| Montgomery | Historical Home Renovation | Historical home located in St. Anne's Hill Historical District needs updates and repairs to be restored: gutters & downspouts repair wood floors throughout house repair plaster in entrance update electrical update water pipes, install low-flow flush toilets repair seating, original enough iron fence repair plaster ceilings insulate walls and attic repair cracked and/or uneven concrete repair cracked steps update kitchen with energy efficient appliances repair discolored garage update landscaping | NA | 4 | 91 to 180 days | \$100,000 |
| Montgomery | home business-self employment | Updates will help to restore this historical home. helps get off of unemployment and be self-employed as well as my two single parent daughters who are unemployed and need financial assistance to get started, so they can get off of public assistance which involves childcare and accountable transportation, thank you, we want to be independent helping ourselves and helping others! | want to be self-employed | 3 | 0 to 30 days | \$5,000 |
| Montgomery | automobile waste heat utilization/electrical gene | The design and manufacture aftermarket steam turbine electrical generation systems that can be retrofitted on automotive internal combustion engines. There is an excessive amount of heat energy that currently goes to waste in car vehicles, and a system that this could recover and utilize some of that. The system would also include an in a vehicle battery charging dock, and a utilization power module (UPM), with an array of 10-20 fans attached at its core. These UPM's, located in residences and businesses alike, can be used to power up many of the power needs that our society currently utilizes. The general idea involves car engines carrying a battery pack or two out to that vehicle, to be charged whenever they use their vehicle. The battery packs would be innovatively fast-charge. When you arrive at your destination, (home or workplace) you plug them into your UPM's. Enough power could definitely be generated to power up most of our small rechargeable household devices, cell phones, camera batteries, etc. The larger the battery array in the UPM, the more (and larger) the devices you could provide power for. Significant power savings can be realized nationwide with this... | newspice alternative energy | 100 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Vietnamese culture expansion | Aspire to build a Vietnamese restaurant, salon, as well as other opportunities as they present themselves as introduction to Vietnamese culture and a background for those who are currently of the descent. The Dayton, Cincinnati and Columbus area holds a very substantial population of Asians and may this project stem into a chance to increase awareness. If these not being granted an immediate reward to build a Vietnamese restaurant would be made and with the language immersion, goods offered and promise of a realistic and different product, restaurant economy around the area would increase and the equipment of a new but uncommon for these locations concept may be established. | Vietnamese Culture Expandability | 25 | 181 days or more | \$150,000 |
| Montgomery | SELF | MONEY NEEDED TO GET BILLS CAUGHT UP, HELP WITH MY DAUGHTERS EDUCATION, POSSIBLE HELP FOR SPOUSE TO GO TO COLLEGE | SELF | 1 | 91 to 180 days | \$2,500 |
| Montgomery | Medical Debt Reduction | Payment of debts directly resulting from medical expenses not covered by health insurance. | Woolson Family | 1 | 0 to 30 days | \$5,000 |
| Montgomery | home improvement | add 500 sq ft to home and 200 sq ft to garage update heating and cooling of home including insulating of home to make home more livable also to employ 1 to 5 people during construction which will reap the whole amount of money requested into the economy | home owners | 3to 5 | 0 to 30 days | \$30,000 |
| Montgomery | Home Repair & Update | updates needed to our 1938 built home's electrical, install new furnace and central air, remodel kitchen, paint, and install new carpeting and replacement windows. We have owned home since 1990 and have paid mortgage payments on time. We need a break. too. Our personal problem is we need to get 40% interest payment on home we live in we live like thousands of people especially in Ohio who need to be shown how to exist on raised credit. It's almost impossible because of no good jobs here or anywhere else. We even have a VA loan but cannot get over this we have paid off 4 properties in our lifetime by trading up or down. Also we are elderly 64 wife 74 husband Small business voluntary center. I could train people how to reinvent themselves. If had money for project training Advertising Program, as restaurants possible and singing shows promotion have done in passed sickness has hindered our passed 7 yrs. diabetic Mr Myers HELP HELP PLEASE is 150,000.00 was worth for age 215,000.00, 207 BREWER 937-536-8410 I have a friend who has a church and singing center we could give that meals away and train people to start over with some hope if steps could be wiped off. credit cards have ruined this nation Usually elderly family members such as happened to me with my fathers problems being his house he moved in with us we could not get him on welfare until he died he medicare I have daughters who sing. A hot food center training fellowship | Home Repair & Update | 2 | 91 to 180 days | \$50,000 |
| Montgomery | for people who have ruined there credit because of | | coming together Dayton christian union church Rev. | 10 | 0 to 30 days | \$250,000 |
| Montgomery | In-n-Out Java | We are a very small business who would like to remain in business and continue to provide jobs for our staff. We have a large customer base who relies on our products to help them start their days and be productive for their employees. We are concerned that without assistance we will no longer be able to operate like so many other small businesses. The impact of the economy and changes in tax laws are going to greatly affect business owners. These funds would allow us to pay off our commercial loan in full and greatly reduce our expenses. | In-n-Out Java | 6 | 0 to 30 days | \$275,000 |
| Montgomery | Household Insulation Program | add additional attic insulation, install outside wall insulation (none currently exists) and replace siding which is falling off. install energy efficient windows to eliminate drafts. | Woolson Family | 3 | 0 to 30 days | \$22,500 |
| Montgomery | Help the Disabled | The nature of this project is to alleviate the debt incurred by the subject disabled individual. Essentially, the money will be used to retire unsecured debt for the subject disabled individual and to forestall the violation of or forbearance of formal collection proceedings. | Help the Disabled Individual | 5 | 0 to 30 days | \$150,000 |
| Montgomery | continuing education to benefit my community | I am in default on my student loans. I have paid back approx. \$3,500 of the initial loan amount of \$6,700 and owe over \$6,000 in late fees, penalties and interest. I was released from my job on Dec. 30, 2009. I went back to school and used what little educational stipend I earned while an AmeriCorps volunteer. I want to go back to my teachers in Social Work but have no way of obtaining this goal without some help. Small investment in myself and people like me is a better investment than bailing out big businesses who have been using a large percentage of tax monies to fund executive bonuses and hand out bonuses to those who are underperforming. I don't want to be a slave. I would like to see jobs went to pay back but I feel the unnecessary fees and penalties are exorbitant. I would just like some help getting back on the track by contributing to my community and those in need. In the big picture of this whole economic mess, this is a small amount of money. I live in someone who is going to retain the investment at a rate that can't be measured in money. It is a kind of volunteering type of thing but need a degree to do more. Please help me. | Self and community | 1 | 31 to 90 days | \$6,000 |
| Montgomery | Autism Educational and Lifeskills Transistion | Provide my autistic son with the transitional education that the local school district failed to provide as directed by the court. Provide him with the secondary educational needs he requires due to his disability. The money will be used to provide funds for the following programs, transportation, and education tools and related expenses. | Woolson Family | 1 | 31 to 90 days | \$52,750 |
| Montgomery | Female owned small business | I am a first time business owner and purchased a small pizza business in 4/2008. All my operating costs have increased dramatically. Sales are down 20% from last year due to the economy. I have lost my employees from 6 to 2 and don't have other employees. I work at the business but do not take a salary. The money would pay my lease for a year which will allow me to hold on until the economy improves, plus possibly hire back some employees. I am over 60 and have put everything I saved into this business. Right now I have no other income. This business has been in the same location for 50 years. I don't want to close it, but, without some help that may be my only solution. Thank you for considering my request. | Rick's Pizza | 3 | 0 to 30 days | \$10,000 |
| Montgomery | to make a living and college education | I am a grandmother raising two grandchildren. My job was lost Nov. 7, 2008. I am 71 yrs. of age and was working to make a living, raise them, and send them to college. One is attending Wright State, the other one is attending Sinclair. They are 22 and 18. My real estate taxes just went sky high, which is unbearable at this time. I would very much like some of the stimulus money. | | 5 | 31 to 90 days | \$35,000 |
| Montgomery | Art Gallery / Photography | This 30,000.00 would help me to take care of debts that I have built up over the last couple of years due to the recession and the declining sales in the art and framing fields. I am a retired Law Enforcement Officer who supplements my income with my Art Gallery and Photography business and I have operated over the last 15 years. It would also help me expand my photography business which will build my income and expand my work to help cover our American veterans and their battle to regain a normal life that I do as a volunteer at the Dayton VA Medical Center. I use my photography to also cover our public servants such as judges and firefighters. If I can keep my gallery and photography business going, my business will help my suppliers in business as well as possibly adding up to two more employees in my gallery. I will be able to do more advertising and reach out to more customers. You can see my photography at www.famakey.com but you can only view the pages with MS Internet Explorer. | R. A. Makley Photographic Images / TK Limited Art | 50 | 0 to 30 days | \$30,000 |
| Montgomery | Small Machinery Repair | Purchase tools equipment to repair, upgrade, improve small machinery such as small excavators, trenchers, dump trucks. Some money will be used to build a small workshop 30' X 40' and a computer truck. | Andrew Bosron | 3 | 0 to 30 days | \$75,000 |
| Montgomery | overcoming lay offs | I have lost my job and since GM has closed here in Moraine my husband has had to travel to different cities across the US. (He wasn't employed by GM but his company closed down because with no plant there was no business for his company) I have a part time job right now with 5-10 per week. This is not enough to pay my bills much less pay groceries. We have always paid bills on time and some bills paid early. I would like this money to pay our credit cards off. That way my 7:00 and to job will help to pay groceries. I am applying for 3-6 jobs daily trying to get more frs, but there are not a lot of jobs. My husband sees the same local farm in a tax break on my pay check just going to help if I don't see the pay check. I wish that I could start a new business and on some help in any way we my only option. Thank you for considering my request and I will do all I can. | Weaver Household | 1 | 0 to 30 days | \$15,000 |
| Montgomery | Newly Patented High Tech Music Products | I need more capital to help manufacture products from Ohio. I need more capital to help manufacture other successful products. Perfect and manufacture other successful products. Brief Description Dramatic new & patented Music Technology needs a small investment to help deploy a "shovel ready" technology that will immediately generate important manufacturing jobs in Ohio. Private matching funds are available. Many competing products are now being imported from China, Korea, and Japan because there are no in-force patents on old style products. A successful startup will allow additional manufacturing and marketing of several more innovative and patentable music products, all to be manufactured in Ohio when possible. Several more successful working prototypes have been produced. Partnership with Baines-owned King Musical Instruments of Cleveland would help retain and add jobs. A pending Ohio grant proposal will probably fail only because its not "energy-related" as is the stated preference from EMTEC, an Edison Technology Center in Southwest Ohio. | Love Music Services - a startup manufacturer in Oh | 50 | 0 to 30 days | \$59,000 |
| Montgomery | to make a living and college education | I am a grandmother raising two grandchildren. My job was lost Nov. 7, 2008. I am 71 yrs. of age and was working to make a living, raise them, and send them to college. One is attending Wright State, the other one is attending Sinclair. They are 22 and 18. My real estate taxes just went sky high, which is unbearable at this time. I would very much like some of the stimulus money. | Family | 5 | 31 to 90 days | \$35,000 |
| Montgomery | I need help with insurance | My wife had her job and with that our insurance and my wife is a diabetic, we are both in school at this time but we are with out insurance and we need the help | self | 0 | 181 days or more | \$2,500 |
| Montgomery | Balaguer Home Repairs | We are trying to make our house more energy efficient. With this money, we would purchase a new furnace, water heater, and windows. We would also insulate our attic to lower energy costs during the summer and winter months. Other appliances, such as light bulbs and refrigerator, will be purchased to cut down on energy use. | Balaguer Home Repairs | 9 | 31 to 90 days | \$15,000 |
