| Stark | Learning Supports - AHED | MSAD is a partner agency to the Madison City Schools working closely with all staff to help address the academic and non-academic barriers to learning. Services are targeted to support students as a link between school, home and additional community resources. Coordinating resources from within the community into services within the school buildings, at the middle school such as CARE Team, Mental Health Services and Substance Abuse/Inebriation Prevention programming, this project funding would allow for the successful mental health and prevention services to continue (prosewing jobs) and allow for expansion (creating additional jobs) of access to mental health services and supports at the high school level. This project allows community resources to be fully integrated into the schools more comprehensively and efficiently than a district or community can do alone, increasing access to much needed care (treatment of mental health issues/increased parental involvement) reducing the barriers that keep kids from being successful. The expected outcomes also lead to improved attendance and decreased behavioral referrals, in addition to improved self confidence and development. | AHEAD | 7 | 31 to 90 days | \$260,000 |
| Stark | Online overstock marketing | As a 32 year established business, we can create 2 full and two to 4 part time jobs by creating an internet site to dispose of excess inventory in the brick industry. The site would be a national warehouse or discontinued, overstock and immediately available brick stresses at both wholesale prices. Inventory would be housed in our warehouse and shipped out of our warehouse and another warehouse in CT. We need to hire an IT professional to create the web site and we'd hire a full time IT professional to keep the web site, but the manager and 2 to 4 full or part time employees to pack and ship the merchandise. Money requested would go to hiring the IT programmer to do the website, advertising, modifications to the warehouse and other brick related items would be minimal since we would be getting merchandise on a cost split basis after the sale from manufacturer and other brick related items. Business plan, marketing strategy, marketing studies and inventory are all in place, we need funding which we can't get from the banks. Thanks for your time. | Rosann's Bridal and Formal | 1 | 0 to 30 days | \$32,700 |
| Stark | Educate the public | We are a new heating and cooling company that need assistance in growing our business. Need training to implement and train new employees to make our business grow - but due to the economy we cannot get a loan from any bank to do this. The main focus of our business is to educate the public on the importance of maintaining or replacing air conditioning systems to keep them running efficiently. We also offer indoor air quality systems, that keep the indoor air clean. Since we have no start up money it is hard to achieve any of our goals. We could definitely hire new employees, train them and educate the customers with some assistance from the government. Thank you | Air Solutions Heating & Cooling, LLC | 6 | 0 to 30 days | \$50,000 |
| Stark | Public Library Construction Project | We propose the construction of a new public library for Louisville and Madison Township in rural Stark County. The current facility is forty years old and is only 13,700 square feet to serve a growing population of 17,000. Expansion of the current facility is not feasible at this time and the library is experiencing a sizable increase in circulation figures. We propose a 25,000 square foot facility that will be 100% ADA compliant and will provide for computer instruction rooms, separate Children's Department & story hour room, meeting and architectural rooms, more shelving space for materials. The new library facility will be expandable for a projected community center that has been under consideration for a number of years. The library owns the site and the architect has developed architectural drawings for the center. The library has secured proper zoning for the site from the City Zoning Commission. The library has also obtained soil borings as well as phase I environmental site assessment and topographic/boundary survey. This land parcel is adjacent to the high school, middle school, and YMCA. A new library would be | Louisville Public Library | 75 | 91 to 180 days | \$4,000,000 |
| Stark | Equipment upgrades | We currently process large quantities of steel that are both cut to width and cut to length for many bridges, highway and other construction projects. We have 32 employees and we need to make several major line improvements and purchase material handling equipment to be able to continue in operation. These funds would be used for both equipment upgrades and equipment purchases that will allow us to continue our operations. Our current equipment is over 10 years old and is not operating with efficiency. In the past few years we have experienced safety, maintenance and environmental issues resulting in falling grades, negative behaviors, suspensions, low attendance or expulsion & those who are emotionally challenged, or developmentally delayed. This program is targeted toward academic standards, developmental issues and life skills. The educational enrichment program will keep a staff of 8 or more persons employed and enrich the lives of at least 75 at-risk youth per year. This industry school dropout rate. The curriculum is about the art and the art is an enrichment about learning. Expected outcomes are enhance school performance & grades, increase concentration, decrease expulsions & suspensions, reduce gang participation, develop skills & attitudes toward future employment opportunities, promote self-esteem & confidence, and improve family relationships. This program will also reduce school expenses while providing services to students who are homeless or incarcerated. | Ohio Steel Slitters, Inc. | 32 | 0 to 30 days | \$1,250,000 |
| Stark | Educational Enrichment Program | The educational enrichment program will keep a staff of 8 or more persons employed and enrich the lives of at least 75 at-risk youth per year. This industry school dropout rate. The curriculum is about the art and the art is an enrichment about learning. Expected outcomes are enhance school performance & grades, increase concentration, decrease expulsions & suspensions, reduce gang participation, develop skills & attitudes toward future employment opportunities, promote self-esteem & confidence, and improve family relationships. | Stark | Fuel Cell Services Learning Center | This project represents Phase III of development of a fuel cell campus at Stark State College. In partnership with Rolls-Royce Fuel Cell Systems (US), the college proposes building a Fuel Cell Services Learning Center which will develop technicians and field service engineers who can work on RRFC's fuel cell system and, in the long term, a variety of fuel cell products expected to reach commercialization in the future. The Center will focus on developing transportation, power, heating, and the knowledge base required to install, commission, service, maintain and repair a projected worldwide fleet of megawatt-scale fuel cell systems deployed in stationary power generation applications. It will develop technical personnel capable of working on fuel cell systems in a manufacturing facility, at field installations, and in regional service and maintenance facilities, including manufacturing and testing, periodic field inspections, component repair and replacement, on-site and on-shore subsystem replacement and service shop-based subsystem repair and maintenance. This project will be the successor of RRFC's worldwide development, factory Ohio as the focus of fuel cell development. | Stark State College of Technology | 157 | 31 to 90 days | \$2,000,000 |
| Stark | Legends Program | We are in the fifth season with the Canton Legends Football. We have recently announced the sale of due to economic challenges and return in 2013. Our mission is to assist our start to foundation in a timely manner which helps many school in ours and surrounding counties with plans to take nationwide. With over 70 players, coaches dance team and office staff not working football at this time, we have made time to devote to this project. Our mission is to unify a team effort with schools, colleges, universities, non-profit organizations and community sponsors, allowing students to fulfill their dreams of being involved in extra curricular activities. Communities benefit while educating students on health, fitness, history, and providing scholarship programs, as we promote Higher Education and school involvement through our specialized products. We have spent over \$500K to date and need assistance to make this a reality. Our licensed patented bottle water label is removable and used to sponsor schools with business sponsors and colleges. This is a win-win and request additional funding to make this work or we risk a good chance of losing everything cause we are out of capital. | Canton Legends | 16 | 0 to 30 days | \$665,000 |
| Stark | Wastewater Treatment Equipment | The proposed wastewater treatment equipment will enable the Heinz Mission factory to better meet government discharge requirements for pH, BOD, TSS and Oil & Grease. The proposed system would utilize new technology which is proven to be more effective than conventional methods for such wastewater treatment. Under current economic conditions full internal funding for this improvement is very difficult. | HJ Heinz Frozen Foods | 0 | 91 to 180 days | \$170,000 |
| Stark | Cellular Telephone Recycling | It is anticipated that all government guidelines for the factory wastewater discharge would be consistently met as a result of such an installation. | EnviroCellular | 1 | 181 days or more | \$30,000 |
| Stark | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options. Current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to those areas without grant money. Building a wireless infrastructure to equip rural residents with the Service to be able to access the Internet & Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New VMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Stark | WolfSpirit's No-Kill Shelter | The money would be used to either buy a vacant lot and build a brand new No-Kill Shelter or to purchase and refurbish an existing building into a shelter. Our organization is a 501(c)3 non-profit organization that currently houses its animals in foster homes. We are hoping to be able to build an actual sanctuary where these rescued/punished survivors can live until they are adopted, or if necessary live the rest of their lives. We will use the facility to educate citizens about proper care for dogs, obedience training, grooming, socialization of dogs, etc. Once the shelter is built we will contribute to the community in a number of ways, holding pet food donation drives for low income families, helping with spay/neuter and other pet care. We are also willing to work with the county courts to allow people to complete their community service at the shelter. | WolfSpirit's Toy Breed Puppymill Rescue | 25 | 31 to 90 days | \$100,000 |
| Stark | Gordon Maupin | The Wilderness Center is a nonprofit nature center visited by about 60,000 people per year. Currently, its electricity supplied by the grid (AEP) is very unreliable. Short outages are common. Extended outages lasting a few days happen nearly every year. The proposal is to add photovoltaic panels to the roof of the Interpretive Building and Astronomy Education Building. This project would benefit Ohio citizens in multiple ways. As an educational institution the public would be able to view the project first hand and the educational staff could offer direct hands-on experience to the public. The project would also provide some level of backup electricity for operating key systems, which has a direct application to public safety. Finally, it would help "pay down" The Wilderness Center's electric bill so that more funds could be directed to the mission of education and conservation. | The Wilderness Center | 20 | 91 to 180 days | \$75,000 |

|----------------|---|---|---|----------------|--------------------|---------------------------|
| Stark | Stark County Census Initiative | (COCRC) for the 2010 Census. The mission of the COCRC program is to provide efficient access to Census Bureau data products through a wide dissemination network of organizations. Those organizations effectively process and disseminate Census Bureau data to underserved population groups in easily understandable formats. The goal of the COCRC Program is to provide local access, education, and technical assistance on census data for planning and decision-making by underserved communities. The proposed project is comprised of several different, but related activities: 1. To create a community work site for up to 20 in-field personnel to begin and attend their day 2. Build a space for storage and compiling census material pre- and post-interview 3. To provide a program promotion campaign targeting inner-city residents in urban areas of Stark County including Alliance, Canton and Massillon. Provide weekly personnel oversight 4. To promote awareness of the Census, and to encourage African-American | Greater Stark County Urban League, Inc. | 10 | 0 to 30 days | \$63,756 |
| Stark | Southeast Area Wi-Fi Initiative | The primary goal of the Greater Stark County Urban League (GSCUL) Southeast Area Wi-Fi Initiative is to engage in a private sector/GSCUL Board Wi-Fi partnership that would provide a revenue opportunity to the GSCUL. A potential ISP would be allowed to use GSCUL facilities for the build out of a Wi-Fi infrastructure that would allow the ISP to offer low cost wireless internet access to residents in the Southeast area of Canton. In turn for utilizing the facilities the ISP would pay a royalty to the GSCUL. The business model would make it more sense to use an ISP if the market could be expanded from just residential to also include the inner city, the governmental agencies, i.e. BIRMA, SARTA, ODF's and the business community as a whole, the Library and the School Systems. Under the current City of Canton plan, the use of their facilities can only reach major parks, but not all downtown sectors of the City. Secondly, the availability of a secure, high bandwidth Wi-Fi network would address a number of urgent wireless needs within community and help to close the technology gap. To start as a brickle outlet to make work out towels that are larger than hand towels, yet smaller than bath towels. For health and physical use. | Greater Stark County Urban League, Inc. | 7 | 0 to 30 days | \$27,652 |
| Stark | Work out towels | | Sylvia's needle | 5 | 181 days or more | \$35,000 |
| Stark | Creating Jobs Through Diversity Acceptance | Coming Together Stark County will hire five consultants to advise diversity coordinators to local businesses. By establishing a clearing house of diverse applicants and joining those applicants with local companies, the goal of a more diverse workforce will be achieved across the county. Stark County's county seat, Canton, OH is listed as one of the top ten dying cities in the US. Creating jobs for those most economic impaired and ethnically, socially, and religiously diverse will reverse the above trend. | Coming Together Stark County | 5 | 0 to 30 days | \$175,000 |
| Stark | Septic Upgrade / winterization | Coming Together Stark County has a ten year history of opening avenues for expanding open opportunity and inclusion of all diverse people across the county. Funding will allow us to expand our efforts and continue to open doors for more individuals. Upgrade of old septic system to modern airation system to reduce runoff into drainage ditch. Also to insulate walls and attic of home. This will reduce energy use and pollution. | private | 2 | 91 to 180 days | \$15,000 |
| Stark | GSCUL Revolving Loan Fund | Small businesses are what drive the economy. Small businesses create jobs, expand the tax base, and help communities grow. For many reasons and often many local government programs exist who will also serve as business neighbor however, the revolving loan funds will be designed to fund businesses that cannot get traditional bank loans, either because their owners do not have credit history or because the business has not established credit on its own. More businesses will be able to get the start-up funding they need because they will be administered by the Greater Stark County Urban League program staff who will also serve as business neighbor however. The agency will function using the interest from the loan fund plus a percentage of the overall loan fund. The interest rate for the borrower applicant will vary according to the business financial condition and its ability to maintain sufficient costs. As these loans are repaid, the revolving loan fund will be made available for additional loans. While commercial lenders - banks and brokers - are in the loan business to make money, this program is designed to help the revolving loan funds generate jobs & support the community. | Greater Stark County Urban League, Inc. | 30 | 0 to 30 days | \$250,000 |
| Stark | Canton Local PC Doors and Windows | Replace exterior doors and windows to improve security and energy efficiency and reduce recurring maintenance and ongoing costs. | Canton Local Schools | 11 | 0 to 30 days | \$588,000 |
| Stark | Canton Local PC Electrical Upgrade | Upgrade electrical infrastructure for the entire building, including installing GFI circuits where appropriate, to meet modern electrical and safety codes. | Canton Local Schools | 5 | 0 to 30 days | \$533,040 |

Install 3,000 railroad cross ties in Wheeling and Lake Erie Main Trunk from Mogadore, OH to Canton, OH. Install 3,000 railroad cross ties on Saxon Branch located in Saxon, OH. Install 5,000 railroad cross ties in Mingo rail yard, Mingo, OH. | XCEL MOLD AND MACHINE INC. | 37 | 0 to 30 days | \$3,500,000 |
| Stark | Wheeling and Lake Erie Railway Track and Crossing | Ten (10) at-grade railroad crossing rehabilitations across Wheeling and Lake Erie Railway system throughout Ohio. | Wheeling and Lake Erie Railway | 10 | 0 to 30 days | \$2,000,000 |
| Stark | Incredible Years Parenting Program | Our county are partnered with the county mental health board to provide a positive, researched based program to our students who happen to be parents as well. Part of the program has an incentive component. Students are awarded "Bucks" for completing certain aspects of the class. With these incentive "BUCKS" there are items they can purchase. Previously these items were donated. Much of the donation has dried up. Mostly what our students/parents need are diapers. With some of the stimulus money, diapers could be purchased and in the incentive room for purchase. | Choices Alternative Adult High School | | 0 to 30 days | \$3,000 |
| Stark | Northwest Schools Building Program | Northwest Local Schools has started a building program in association with the Ohio School Facilities Commission. To date Northwest has built one new High School of approximately 120,000 sq ft and one new Elementary School of approximately 65,000 sq ft. We are looking to complete our building project by adding an additional 14,000 to finish off the High School and renovating and adding to the remaining three buildings. Over the increase in building costs from when Northwest Local completed our \$23,000,000.00 portion of the project, which was in time for the 2006-2007 school year, the OSFC has informed us that to complete the project and to receive their \$20,000,000.00 in funds we need to come up with an additional \$1,650,000.00 in local funds. Raising additional funds of this magnitude when our community has depleted nine consecutive levy requests for additional operating revenues is a daunting task. | Northwest Local School District | 10 | 181 days or more | \$1,650,000 |
| Stark | Deer Creek Spillway Bridge 2/19/09 Revision | Build 260-foot prefabricated pedestrian/bicycle bridge over Deer Creek Reservoir Spillway to connect northern southern sections of 3.2-mile off-road Mahoning Valley Trail that links Stark County's third largest city with one of the county's largest lakes. | Stark County Park District | 30 | 0 to 30 days | \$1,020,000 |
| Stark | Ohio & Erie Canalway Aqueduct Bridge | Build a 1.4-mile wide, 250-foot pedestrian/bicycle bridge spanning the former aqueduct of the historic Ohio & Erie Canal over the Tuscarawas River between Stark and Tuscarawas Counties; build an 8-foot wide limestone recreational trail, paved parking lot for at least 50 cars, a canoe launch ramp. Completion of this project is critical for Tuscarawas County to realize the economic development potential of the National Heritage Canalway established by Congress in 1996, and it is an important component for strengthening heritage tourism to Fort Laurens (Revolutionary War) State Memorial and Zane (Village State Memorial). The bridge will connect Tuscarawas County residents to 254 miles of the Towpath Trail seen in Stark and Summit Counties. | Stark County Park District | 30 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Stark | Martin Luther King Viaduct Rehabilitation REVISED | The M.L.K. Viaduct project is a rehabilitation of a 435 foot, five span bridge over Main St., a parking lot, four railroad tracks, and an entrance to a Mill. It is located in downtown Alliance. The request is for Construction and Inspection funding. The project includes waterproofing the concrete bridge deck, placing a new asphalt wearing surface, replacing the concrete railing and safety fence, installing new lighting and existing new Martin Luther King, Jr. statue signage. The project will provide newer and safer lighting for the bridge. We will replace spalling and cracked concrete curbs, curbs, and sidewalks for safer walking surface. The asphalt wearing surface is broken up and needs replaced by a better quality surface. Other items such as waterproofing and paint protect the structural integrity of the bridge. The bridge is one of only three crossings over or under the railroad in the City so it is vital for evaluation if there is a train accident. | City of Alliance | 15 | 31 to 90 days | \$618,400 |
| Stark | Free Clinic - Electronic Medical Records | The Western Stark Free Clinic recorded nearly 2000 patient visits last year. Electronic medical record (EMR) systems have the potential to provide substantial benefits to our volunteer physicians, nurse practitioner, other volunteer health professionals, staff, patients and the organization, as a whole. EMR systems can facilitate workflow and improve the quality of patient care and patient safety, especially in a free clinic setting where patients don't always see the same physician at each visit. These systems also provide a means to improve the way we collect and improve revenue. However, obtaining the funding to implement an EMR system is challenging. An EMR system would have a positive impact on our organization and the patients we serve. | Western Stark Free Clinic, Inc. | 1 | 31 to 90 days | \$30,000 |
| Stark | 1813 historic barn restoration | complete restoration of an existing 60R x 100R historical barn that was built in 1813 in the Stark county, Ohio. This farm was homesteaded in 1813 and has been in the same family or the last one hundred and forty six years (196). work will include: excavation, removal and rebuild of deteriorated sandstone foundation, replacement of roof sheathing and panels, replacement of exterior siding and doors, replacement of two inch thick exterior hardwood flooring and reconstruction of drainage system. This project will preserve an important part of Ohio history for many future generations to enjoy. Local labor and materials will be used. | Progress Landscaping | 6 | 0 to 30 days | \$142,500 |
| Stark | Free Clinic - Nurse Practitioner | Western Stark Free Clinic is seeking funding to hire a Nurse Practitioner. The demand for healthcare services by low-income and uninsured individuals continues to rise. It is an on-going challenge to secure enough volunteer healthcare care professionals to meet the needs of those in our community who need our services. For most, that only option is to go without care, make a visit to the Emergency Department or become a patient at the Free Clinic. Obviously, the Free Clinic is the best choice. It's a low-cost alternative to the Emergency Department, saving the hospital thousands, if not hundreds of thousands of dollars annually. Having a nurse practitioner on staff would decrease the wait for new patients to get in for their first visit, allow for more consistent on-going patient care and help to ease the demand of the current volunteer healthcare professionals. | Western Stark Free Clinic, Inc. | 1 | 31 to 90 days | \$75,000 |
| Stark | Mills Business Park | This is a new Class A 141 acre business park development for the benefit of Canton and the greater Stark County area. Funds would be used for site grading, utility installation, and finishing work to bring the park online. The project has received funding from two local nonprofit foundations, City of Canton, State of Ohio, and from the Federal Housing and Urban Development Department. Current funding sources will not allow us to fully grade and prepare all the sites to a shovel ready state. It's estimated this park, when fully occupied, would result in 1,200 new jobs and another 1,000 indirect jobs. Canton and the immediate area are sorely lacking in available greenfield sites to service both companies moving into the area and local companies expanding. All plans have been completed and required permits have been secured. Work could begin immediately as soon as the western bank of the Mill is cleared. This is a top priority economic development project that has widespread support from throughout the Stark County community and local officials. | Canton Regional Chamber of Commerce Foundation | 2000 | 0 to 30 days | \$700,000 |
| Stark | Healthcare for the Homeless | For years, the only option the homeless had was to use the Emergency Department (ED) as their primary care physician. To generate bills that would likely go unpaid. Their only option was to go without medical and dental care. Other times the homeless would go to a pain or triage, became more than they could bear. Then when they would seek treatment, a simple infection that could have been caught with oral antibiotics, now meant days in the hospital. Major surgery. Thousands of dollars were being spent, whereas a simple treatment in the beginning, most of the complications could have been prevented. Today, our homeless program is unduplicated in Stark County. In a recent survey, 86.5% of the patients reported that had it not been for the Care-A-Van, they would have sought treatment at the local ED. We are the only program that can take them directly to the shelters. | Western Stark Free Clinic, Inc. | 7 | 0 to 30 days | \$30,000 |
| Stark | Free Clinic | This year we expect to see more than 400 unduplicated homeless persons who will make more than 7,500 medical and dental visits to the Care-A-Van. We expect to dispense medications valued at nearly \$200,000. Additional funding is necessary to keep up with the demand for services. For years there was an overwhelming demand for services in western Stark County by low-income individuals who were without health insurance. The clinic was established in 1995 with the intent to help meet the healthcare needs of those less fortunate in our community. For years the only option was to go without care or to use the Emergency Department as their primary care physician and generate bills that would likely go unpaid. Other times the homeless would go to a pain or triage, became more than they could tolerate. When they would seek treatment, simple infections that could have been easily treated with oral antibiotics, now meant days in the hospital or surgery. Thousands of dollars were being spent needlessly. Had seeking treatment at the Free Clinic been an option in the beginning, most of the complications could have been prevented. | Western Stark Free Clinic, Inc. | 10 | 0 to 30 days | \$50,000 |
| Stark | BLS Renovations | The Free Clinic is now open five days a week. Free, holistic medical, dental and pharmaceutical services are offered to the community's low-income and uninsured. Additional funding is required to meet the projected 2,000 visits for this year. We continue to strive to make healthcare accessible. | BLS Renovations | 5 | 0 to 30 days | \$150,000 |
| Stark | Canton Ford property improvement | Due to housing downturn, my home remodeling business has also experienced a decline. My proposal would take the knowledge and experience the company has in woodworking and begin a new or sub-business in creating home interior items, such as, decorative shelving, scones, etc. The proposed business already has creative contracts in place for items described. The funds asked for would be used for additional employee and materials used in these products. I estimate that this greenfield would provide atleast four jobs immediately. | City of Canton | 150 | 181 days or more | \$4,100,000 |
| Stark | "Fasnacht Farm- Park" | 1000 fully improved roadway, rail switch and 2000' of rail line, 200' extension of 69 kv electric transmission service to new substation, 200' of water and sewer line extension. Creating a heavy industrial and rail. | Perry Township Board of Trustees | 7 | 31 to 90 days | \$1,000,000 |
| Stark | Veterans Transition Program - The Cowboy Way | The Perry Township Board of Trustees and the Stark County Parks are working together on a joint project called "Fasnacht Farm-Park". The Board purchased the park in 09/2007, and are currently in the design phase. Fasnacht Farm Park consists of 30+ acres of farm land, but has an original farm house built in 1877, & a barn. The barn will be utilized as a "community gathering" building which will benefit the entire community. This historic farm has unlimited potential for recreational development, and is located on the Southeast corner of Jackson Avenue and 12th Street NW, Massillon, Ohio. Electronic blueprints have been designed & displayed at public meetings to discuss the future plans & revenues. The 12th St. "Connector Trail" will run through the Fasnacht Farm. It is our collective goal to restore the large farmhouse. 50' x 30' 2 floors, 1,500 sq ft. 2 floors x 875 sq ft. \$225,000. Greenfield redevelop \$25,000 barn restoration. 70' x 50' 2 floors, 3,000 sq ft. 2 floors x \$100,000. Exterior walkway & site repairs \$ 50,000. Construction contingencies (5%) = \$50,000. Architectural/ Engineering services = \$75,000 Tot. Projected 1,125,000. Thank you | Reinbows At Serenity Springs | 4 | 0 to 30 days | \$48,075 |
| Stark | Safety Center Parking Lot Expansion | Psychologically injured veterans are faced with many challenges such as PTSD, depression, addictions, grief, anxiety, anger, etc. The techniques offered with Equine Assisted Psychotherapy(EAP) are specific to the relevant psychological injuries of the veterans. Issues identified are recurrent nightmares, great addictions, uncontrolled rage, and inability to get along. In EAP horses are used as tools for emotional growth & learning. It involves a team consisting of licensed mental health professional and an equine specialist. This is not riding. Veterans learn about themselves & others by engaging in activities with horses, then processing the feelings, behaviors, & responses patterns that emerge. Veterans returning from war are experiencing tremendous recovery utilizing EAP. Working with horses helps create confidence & a rich in relationships dealing with all areas of life. Horses are social animals, have distinct personalities & places within the herd. They are very animals aware of their environment & nonverbal communication which encourages veterans to look closely at their nonverbal aspects & how it impacts relationships and movement towards attaining goals. | Jackson Township Board of Trustees | 15 | 181 days or more | \$80,000 |
| Stark | Northwest bus | To expand the parking and vehicle storage areas for the fire and police departments located at the Jackson Township Safety Center. Need to expand parking to accommodate approximately 30 police vehicles and 20 fire vehicles (six ambulances, six fire trucks, one tanker, one tow, a grass truck and a gator, the chief's and two officers' vehicles, six fire prevention bureau vehicles, and a training van. The Safety Center is also used for regional fire and police training requiring additional parking for participants and their equipment. | Northwest Local School District | 10 | 0 to 30 days | \$1,000,000 |
| Stark | Camera Upgrade for Administration Building | Purchase 10 new buses to transport students on a daily basis. New buses would increase student safety and also reduce greenhouse emissions. | Jackson Township Board of Trustees | 4 | 31 to 90 days | \$24,500 |
| Stark | 38th St NW RR grade crossing reconstruction | To upgrade the security camera system and add new cameras to parking lot areas and entrance doors of the Township Administration Building. The building houses Township Administration, Fiscal Office, Legal, Highway, Park, and Zoning Departments, and the 911 Dispatch Center. | Canton City | 5 | 181 days or more | \$665,000 |
| Stark | Modern technology | This project consists of the reconstruction of the crossing at 38th St NW in Canton. This crossing is located just east of the 177 38th St. overpass. The rr project to needed wider out the way to provide better safety for the school children and take that pass the grass daily. This is a joint project between 3 government entities, Canton City, Stark Parks, and Akron Metro (rr owner). These funds would be used to replace outdated technologies in our school district. At the present time we have computers which are 10 years old being used in the classrooms. Many teachers and students are not able to access the current programs they need to use in their classrooms. We also have classrooms without access to projectors, smartboards, and personal response devices. | Northwest Local Schools | 1 | 0 to 30 days | \$1,000,000 |
| Stark | North Park Shelter/Restroom | Our students are not being taught the necessary 21st Century skills they need in today's world. In addition to purchasing new technology we would use the funds to hire a technology integration specialist for 3 years to teach the teachers and staff members on the new technology. | Jackson Township Board of Trustees | 15 | 181 days or more | \$250,000 |
| Stark | Mahoning Rd Economic Development Project (SR153) | A new Shelter/Restroom would provide picnic and restroom facilities for our Tennis, Basketball, and Skate Park area, as well as for participants of organized athletics, walking track, park programs, and other active recreation in our 70-acre North Park. | City of Canton | 25 | 31 to 90 days | \$1,550,000 |
| Stark | Healthy Tomorrows Building Project | This project consists of the reconstruction of approximately 1.6 miles of SR 153 in Canton. The Margaret B. Shipley Child Health Clinic, Inc is a 501(c)3 agency serving the city of Canton, Stark County and the surrounding communities. As a nonprofit healthcare organization we serve within the neighborhoods of most need for 37 years. Our Healthy Tomorrows program provides service coordination and home-based education to high-risk families. We have outgrown our space and need a new location to continue to serve families with medically fragile young children. In collaboration with the City of Canton's Community Improvement Corp and Office of Development, we have the opportunity to acquire an abandoned property located at 1950 East Tuscarawas St. in Canton. The underdeveloped neighborhood would benefit from the revitalization of the building. Job stability would be provided for 25 staff and growth potential for 4 more. The building will require repair for occupancy which includes plumbing, wiring, paint, flooring and security. The estimated cost of \$40,000 for renovations will employ a large labor force of 5. This ready-to-go project addresses multiple objectives: Econ & Community Dev, Employment, Healthcare, Education and Neighborhood Stability. | Margaret B Shipley Child Health Clinic, Inc. | 30 | 31 to 90 days | \$40,000 |
| Stark | New Maintenance Facility | The Perry Township Road Department is in need of energy efficient and cost saving building. our building is over 70 years old. With Demolition and the Construction of a 100 X 100 +/-10,000 sq. ft. new Cost Effective, Energy Saving Green Building with Water Quality drains and the Village Center ready to be installed. In order to help our environment and to save the Township money we are going to use Solar Panels and GEO Thermal Heating for generating our own power and Sky Lighting for lighting purposes. The Road Department is in need of Water Quality for the drainage of the run - off from washing the trucks and rinsing the tires. The Road Department is in need of the Duesel Truck. The garage never being equipped with the proper water Quality Drains and Waste Water Tanks does not comply with the Ohio EPA. Every year repairs are made to the Old Building, it is a waste of Time, and Money. With the help of the Stimulus Funding our Garage will save money for our Local Government, Safety for the Water Quality, and promote jobs. | Perry Township Board of Trustees | 60 | 181 days or more | \$1,540,000 |
| Stark | SR 153 Reconstruction Right-of-Way Acquisition | Following SR 153 (Main St.) a narrow urban collector to the thoroughfares and one center turn lane for improved safety and capacity. Project includes 1.17 miles of road improvement, 500' FT of storm sewer replacement and installation of new sidewalk, curb & gutter. In order to comply with Janel's Law our school needs to purchase about 550 cubic yards of rubberized mulch for our playground. We have the man power to apply the mulch, but are in need of funds to pay for the product. | City of Louisville | 10 | 31 to 90 days | \$330,000 |
| Stark | Playground improvement | | Canton Montessori School | 25 | 31 to 90 days | \$10,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Stark | First National Bank Building | Rehabilitation of a partially vacant historic office building. The project is much needed to improve the building's energy efficiency and help retain existing tenants while attracting additional office space to downtown. | Sandvick Architects, Inc. | 30 | 91 to 180 days | \$850,000 |
| Stark | Landmark Building | Rehabilitation of vacant historic commercial building for housing and retail use. | Sandvick Architects, Inc. | 10 | 181 days or more | \$250,000 |
| Stark | SAMM (Science And Math on the Move) Expansion | to provide STEM materials to 68,000 Stark & Wayne County students, and professional development to elementary, middle & high school teachers. The program, an initiative of the Stark County ESC, has been in existence for 13 years & won a State of Ohio Best Practice Award in 2007. The program provides equitable access to STEM resources to be borrowed by trained teachers for classroom use. Expected Outcomes: 1. Provide 1 math & 1 science teacher coaches to mentor, co-teach and support Stark & Wayne K-12 teachers in the use of SAMM equipment. 2. Provide 250 high quality professional development opportunities in K-12 science, technology, engineering & math. 3. Purchase new STEM equipment. 4. Provide live organism & equipment delivery, science kit refurbishment. 5. Conduct data for evaluation & to provide guidance for program improvement and sustainability. 6. Provide 10 full-time positions (6 coaches, 1 math & 1 science consultant, 2 equipment specialists) & 2 part-time positions (1 administrative assistant, 1 equipment specialist) | Stark County Educational Service Center | 12 | 0 to 30 days | \$390,000 |
| Stark | Canton YMCA | Rehabilitation of a vacant YMCA building in downtown Canton for market rate housing, with retail and office space on the lower levels. The project will also incorporate space for a downtown branch of the YMCA, which was recently closed. This will ensure an important resource for residents and workers in downtown Canton while introducing new housing and contributing to spur economic development in the city. | Sandvick Architects, Inc. | 30 | 181 days or more | \$2,000,000 |
| Stark | Genahol-Canton (Allen Ave. & Trump Rd.) | The Genahol-Canton Allen Ave. (GCCA) project involves taking food products and surplus liquids from the local and district solid waste (MSW) streams and converting such material into alternative energy, i.e. electricity and ethanol. GCCA is a fast track project with the assistance of the State of Ohio will be in production within 12 months of funding. The GCCA project will employ 25-35 workers at full capacity. The projected workforce will include production, supervisory and administrative workers. The GCCA will remove 5-10 million gallons of food and beverage waste per year from the area landfills and will produce approx. 5-7 million gallons of ethanol per year. | Genahol LLC | 125 | 31 to 90 days | \$50,000,000 |
| Stark | Canton Downtown Wi-Fi | New wireless internet for downtown Canton public areas. We already have the contract to do this but have no funding and the cost is going to cause bankruptcy. We need new hardware and more help to get this completed and we are trying to have this done by late spring. | Lightspeed Technologies | 15 | 0 to 30 days | \$250,000 |
| Stark | Thunderbird WWTP Replacement | Thanks for your help. This project will construct a new 15,000 GPD wastewater treatment plant, to replace a 50+ year old 8,000 GPD wastewater treatment plant. The project will serve 51 households, all of which would qualify as LMI. This project is being ordered by Ohio EPA and will be completed prior January 1, 2020. | JBC Enterprises, Inc. | 10 | 31 to 90 days | \$200,000 |
| Stark | Fire Station | New 2 bay fire station | Lexington Township | 35 | 31 to 90 days | \$300,000 |
| Stark | Water Reclamation Facility Plant upgrades | This project consists of upgrading Canton's Water Reclamation Facility to satisfy the new EPA TMDL requirements for phosphorus release as well as various other improvements. While this facility is owned and operated by Canton, it is a regional facility that serves the surrounding communities. | Canton City | 30 | 181 days or more | \$40,000,000 |
| Stark | Harmont Ave Sanitary Sewer Extension | This project consists of the extension of 223 feet of sanitary sewer under US 62 at Harmont Ave. The extension will eliminate an outdated pump station and allow a large tract of land to be opened for development. All plans and permits are complete and the project is ready to start. Will use 8 inch steel wall at Harmont Elementary, including at least 100 feet of 12" drilling, at least 100 backhoes, and at least 100 feet of pressure grouting, at least 88 feet of 8" drilling, a new pump, electricity to the new well, and pipe from the existing well. This will provide clean water for student and staff use and will fill EPA violations. | Canton City | 5 | 31 to 90 days | \$125,000 |
| Stark | Canton Local Walker Well | will need to go to school and pay delinquent | Canton Local Schools | 10 | 0 to 30 days | \$55,000 |
| Stark | school | COT-PURITECH, Inc. provides verification of remediation and related maintenance services based out of our corporate headquarters location in Canton, OH. We have recently started another company: COT-PURITECH, LLC to service the wind turbine market throughout the US. We have built one (1) wind turbine service unit at a cost of ~\$125,000, and we are in the process of building two (2) additional units. These service units are used to charge out the gear oil in the wind turbine gearboxes located at the top of the tower. The service units can also be used to purge and flush the gearboxes. We are working with all of the major OEMs and wind farm owners including GE, Sabin, and/or PPL, MidAmerican, etc. to provide these required services. The benefits of the service include reducing the Total Cost of Ownership (TCO) of the wind farms by reducing oil system related logs and freeing up company personnel for more cost beneficial maintenance activities. If we get the funding, we will hire an additional 6-10 Technicians at an average annual salary of \$79K, build the units locally, and produce additional annual revenue of \$1M with the resultant income being generated. | personal | 0 | 0 to 30 days | \$2,000 |
| Stark | Wind Turbine Services | At-Risk Youth are 11 to 18 years of age dealing with or detained for behaviors such as theft, substance abuse, violence, anger, victimization/abuse, gang activities, etc and from low income, uninvolved or uneducated families. Equine Assisted Psychotherapy is the action of therapy, where people work on their problems with the aid of a licensed psychotherapist, an equine partner and horses. Troubled behaviors and feelings are addressed within the sessions as they occur. The client is supported by the facilitator to confront and identify personal obstacles in order to develop positive, healthy, growth enhancing ways of coping with and moving forward in their lives. The environment enhances the youth's sense of learning and growth necessary for positive change. EAP minimizes a client's time in treatment due to its ability to bring sessions to the surface quickly. Everything done with the horse is related to what's happening at home, in school, or work and in relationships. Activities are designed to create "real life" metaphors. True-selves surface more quickly because it's hard to focus on EAP tasks and "performing" for people at the same time. | COT-PURITECH, Inc. | 10 | 0 to 30 days | \$200,000 |
| Stark | Youth At-Risk Equine Assisted Psychotherapy | Believe if the government can bail the banking industries out and the auto industries out, then why don't the Americans that pay taxes, and work and get bailed out. I have worked since the age of 14 and have never asked for help unless it was my last choice. Now I'm asking for help to bail me and my family out of something that was out of our control. We are going to lose our home, our credit is in trouble, and we can't even afford to buy a car that we have a loan on fixed. I know that I will not receive the money that I'm asking for but me and my family need it. I need someone to tell me what in the world do I pay taxes for, if when Ohio has the money it does go to the people who really need it. I wonder sometimes how the government can charge "high" gas and "higher" oil taxes and rights knowing that another family will be living on the streets with nothing. Everything that I have worked so hard for is almost gone completely. Thank you. | Reinbows at Serenity Springs | 4 | 0 to 30 days | \$158,920 |
| Stark | Help | SR-687, Fulton Road will be widened from 2 to 4 lanes for a distance of 1.2 miles with an additional turning lane if warranted at Foxchase Avenue and Burnettsdale Avenue. The roadway will be reconstructed with new pavement, curbs and gutters and storm sewer. A signal warrant study will be done at Foxchase Avenue and Greenway Avenue warranting a possible new signal installation. Foxchase and Burnettsdale at O'Springs may be lighted. No other lighting or sidewalks are anticipated. The existing signal at Burnettsdale at O'Springs will be redesigned to accommodate the additional lanes at the west leg of the intersection. All signage will be new and conform to MUTCD. "Vest Street" will be redesigned to provide a better intersection angle. | Do not have an organization | 2 | 0 to 30 days | \$15,000 |
| Stark | SR-687, Phase 3 | This project consists of constructing a renewable energy facility to replace the incineration of the solid waste stream at Canton's Water Reclamation Facility. This anaerobic digestion process will produce methane and a soil amendment as end products that can be sold to reduce operating costs. | Stark County Transportation Improvement District | 50 | 181 days or more | \$4,040,000 |
| Stark | Renewable Energy Facility at the Water Reclamation | This project will replace a 50+ year old waste water collection system. This project will serve 51 households, all of which would qualify as LMI. | Canton City | 25 | 181 days or more | \$15,000,000 |
| Stark | Thunderbird WW Collection System Replacement | NPDES Storm water infrastructure mapping. EPA has required that all structures in a storm water system be mapped. This project will map inflow/outflow basins, storm sewer covers, pipes, open ditches, retention basins and outfalls. Expected outcome will be a fully integrated and mapped storm water system of great detail. Emergency services will benefit due to mapping of hazardous spills and flood discharge. As well as a current inventory of all storm water structures in the unincorporated areas of the county. This will allow for a better inventory of what structures are in good shape and what systems need fixed or replaced. By being proactive with this project it will save money on the back end, and 17 FEMA districts in Perry Township is a critical piece of infrastructure worth approximately 30,700 and covering approximately 20 square miles. Current staffing includes 22 full time officers and 4 part time officers. Our Township has 12 schools, as well as multiple retail and service businesses, 2 electrical power companies and Tenken Faircrest Steel Plant. We are also adjacent to an refinery. | JBC Enterprises, Inc. | 8 | 31 to 90 days | \$180,000 |
| Stark | EPA Storm Water Infrastructure Mapping | In 2008 our agency handled 16971 calls for services which included 5 arson's, 4 homicides, 6208 agency assists, 656 automobile accidents, 129 assaults, 94 burglaries, 58 missing persons and 541 thefts. Our budget comes primary through property tax dollars and levy monies. In order to continue using budget dollars to maintain current staffing or increase staffing, stimulus dollars would be used to purchase necessary equipment for the enhancement of law enforcement and public safety in Perry Township. In an effort to maintain current staffing, budget issues will not allow for the purchase of necessary equipment needed by patrol officers or detectors. | Stark County Regional Planning Commission | 7 | 0 to 30 days | \$750,000 |
| Stark | 2009 upgrade | Downtown Canton Office building in need of new roof and exterior painting. IMPLEMENTATION OF COMPUTERIZED REPORTING AND REPORT PROCESSING. WE WILL USE THESE FUNDS TO BRING OUR POLICE DEPARTMENT UP TO ITS AUTHORIZED STRENGTH, THERE WILL BE 24 NEW HIRES | Perry Township Police Department | 0 | 91 to 180 days | \$148,879 |
| Stark | Revitalization | In addition, the Math Coach advises administrators about math programs for intervention, value added, and gifted needs of the students in the Perry District. The Math Coach has created a K-12 District Math Improvement Plan, MP, to increase achievement of all students. Implementation of the Math Improvement Plan will take at least two more years. | Dewalt Properties | 3 | 0 to 30 days | \$30,000 |
| Stark | BYRNE GRANT | In order to continue to serve the Perry teachers and ultimately the students, we request funding to keep this position of Math Teacher Coach/Math Consultant for one more year. Thank you. | CANTON POLICE DEPT | 20 | 91 to 180 days | \$488,000 |
| Stark | THREE YEAR C.O.P.S. GRANT | St. Luke Lutheran Community is a multi-site senior living provider. Our project is to fully implement an electronic health record for our patients. The project will improve outcomes and increase staff efficiency while creating a portable health record. Another aspect of our project is to integrate technology in our facilities and home settings to improve overall quality of life. By integrating technology in the home, the person is able to stay in the community longer, decreasing overall healthcare costs. Install new windows and doors in my parents residence to improve energy usage and effectiveness. A total cost of 15 windows and two doors need to be replaced. I have had estimates and determined that replacing all windows and doors will improve efficiency and reduce overall costs which will also improve the overall condition and appearance of the home. | CANTON POLICE DEPT | 24 | 31 to 90 days | \$2,200,000 |
| Stark | Math Teacher Coach/Math Consultant | | Perry Local School District | 1 | 31 to 90 days | \$100,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Stark | Chapman House & Orchard Restoration Project | There is much wealth in history and a community is significantly strengthened by the knowledge of its history. So it is with the well-known American hero, John "Johnny Appleseed" Chapman, who traveled through the Midwest with an independent spirit and planted green truths, seeding a plethora of apple trees along the way. Despite his popularity, many in this community are unaware that Chapman owned land and lived for a short time on a piece of property on Jackson Ave in Perry Heights, Ohio. While his name is simple and his person saint of American orchards, seeded his first orchard and erected a simple two room school that is still standing. It remains an integral part of an old, rambling farmhouse, which sits on more than five acres. Time has taken its toll and this home stands waiting in great need for restoration. It needs a loving hand not only to recognize the historical value of this property, but also to recognize and honor the impact Chapman had in his community. The farmhouse is surrounded by an orchard of varied berries, nuts & fruit bearing trees and indigenous apple trees. It's a true testament of Johnny "Appleseed" Chapman's spirit of doing good & leaving a lasting legacy. | Chapman House & Orchard Restoration Project | 25 | 181 days or more | \$500,000 |
| Stark | Business recovery and development services | I want to start a business and website that will provide small and medium sized businesses the tools to not only stay in business but grow in the current economic downturn. My company will provide an original model and consulting services to increase revenue, create jobs, and gain critical knowledge. | B.R.D. | 2 | 0 to 30 days | \$75,000 |
| Stark | Collaborative Chinese Language Instruction | All students in Stark County public schools, in Grades 8-12, will have the opportunity to take an online Chinese I and/or II course as well as a face-to-face Chinese II class taught by a Chinese visiting teacher. Presently, the collaborative has been 22 Stark students complete Chinese I, 12 are in the process of completing Chinese II. To expand to more accessibility for more students, the Stark County Educational Service Center will purchase online coursework for beginning courses, but will need to acquire and reimburse a teacher for the two courses, plus continue to pay the visiting Chinese teacher for 4 students to complete Chinese II. The funds will pay for instructor fees, field trips, student and teacher materials. We want to continue our program so that more students can learn this important language, and we may wish to expand to other critical languages in the future. We need to continue to prepare students for the 21st century. | Stark County Educational Service Center | 3 | 0 to 30 days | \$20,000 |
| Stark | Clinic Flooring | The Margaret B. Shipley Child Health Clinic Inc has provided a medical home for children in Stark County from 0-18 yrs for the past 37 years. We provide pediatric primary health care to families with the greatest need. The average income of our families is below US poverty - 20% are uninsured or underinsured, 65% are single parents and 15% are teens. Families with no insurance are placed on sliding scale of which 60% receive free service. Our primary source of revenue is Medicaid, which is not adequate to support our high standard of quality and professional staffing. Additional sources of fundraising are always necessary. We are a member of the National Health Service Corps and a federally approved site within a Health Professional Shortage Area - ideally suited to respond to a plan for healthcare reform. The Clinic was renovated 15 years ago and commercial carpeting was allowed for flooring surfaces. Although constant attention to floor cleaning has been maintained, a recent facility survey identified deficiencies and requires the installation of hard surface flooring that can be properly sanitized. The cost for flooring is \$12,000. This is an expense for which no funds are available. | Margaret B Shipley Child Health Clinic, Inc. | 12 | 0 to 30 days | \$12,000 |
| Stark | Child & Adolescent Training Institute | The furnishing of this room would create a professional site for the art training by Bachelor, Masters, and Doctoral level student training in the area of behavioral health, child development, and diagnosis and treatment of mental health disorders. This training would be in conjunction with area universities and community partners in the fields of social services, psychology, and juvenile justice. Continuing education also available to those in the community who work with children who have emotional and behavioral problems, such as ADHD, anxiety, abuse and neglect, and conduct disorders. This type of project could sustain itself through fees for training and corporate sponsorship. Budget: \$1,000 folding chairs \$2,000 electronics \$290 training tables \$45,000 Training Coordinator (new) Marketing (new) (to be trained). CAA is recognized both locally and nationally as a leader in providing effective treatments that work, with high patient ratings from families and professionals. We would continue to offer world class training to our own staff of direct care providers to not only improve the training of children and families in Stark County with mental health problems. | Child & Adolescent Behavioral Health (C&A) | 2 | 0 to 30 days | \$50,280 |
| Stark | Midwest Plant Project, Phase I, Demolition | Midwest Plant Project, Phase I, Demolition: Demolition of property building 1112 Tusc. Rd to enable the efficient production of manufacturing process, add new building Midwest Plant Project, Phase II, Soil Sammet Manufacturing Improvement. Funds include \$50,000 for demolition, \$20,000 removal and placement of utility, \$30,000 for disposal of building materials. | Midwest Industrial Supply, Inc. | 3 | 31 to 90 days | \$100,000 |
| Stark | Sewage Nuisance Abatement Program | Septic systems are increasingly more difficult to replace, when owners are unable to finance a repair. Under these circumstances, raw sewage continues to discharge, affecting the public health and the environment for an extended period of time. We propose to place money into a revolving fund which can be used to replace systems and assessed to the owner's taxes. We expect that much of the money will be returned to the account to be reused in the future, to sustain the program. This increased work will also create new opportunities to local excavating contractors. We expect that approximately 10 systems per year can be replaced in this manner. | Stark County Health Department | 1 | 0 to 30 days | \$240,000 |
| Stark | Marlington Middle School Wastewater Treatment Plan | Our water treatment plant was installed in 1970 and handles a middle school population of 625 students and staff. The main tank is a combination aeration, settling, and skimmer tank. The main tank is a steel structure. The "rain" tank and several of the cross-members have deteriorated to the point of structural failure. We are attempting to make temporary repairs to finish the school year. We have asked an engineer to help us with the plans for rebuilding/replacing the water treatment plant as soon as possible. | Marlington Local Schools | 54 | 91 to 180 days | \$300,000 |
| Stark | Emergency Weather Warning Alert System | This project would enable the Township to install emergency warning sirens in four of the Township's primary parks with the purpose to warn residents of the approach of inclement weather. The project would also impact the community's high school soccer and football stadiums which are in the immediate vicinity. The existing parks and stadiums have potential occupancy of over 10,000 people being present at any given time. The project would consist of the erection of five pulsating type warning sirens that would be activated by the community's emergency dispatch center. Installation would be based on current FEMA guidelines. | Jackson Township Board of Trustees | 3 | 91 to 180 days | \$153,000 |
| Stark | Mercy Medical Center - Digital Mammography | This proposed initiative is for the purchase of a full field digital mammography system. Mercy Medical Center is a leader in breast cancer diagnosis and treatment. The hospital and off-site locations have utilized film mammography for breast screening. The acquisition of a digital mammography would allow in the selected primary breast centers. Digital mammography has a number of attributes that may help a small breast tumor stand out from surrounding normal tissue - the efficient absorption of incident x-ray photons, a linear response over a broad range of radiation intensity and little system "noise". The purchase and implementation of a digital mammography system would provide another weapon in Mercy's arsenal to fight breast cancer. | Mercy Medical Center | 25 | 0 to 30 days | \$650,000 |
| Stark | Safety Center Second Floor Expansion | The new space would permit the existing Training and Fire Prevention Bureaus to have sufficient office work space as well as meeting and storage space necessary for daily activity thus enabling them to perform their operational tasks in a more concise and efficient manner. The project would enable the Township to expand office space in the Safety Center by adding a second floor. | Jackson Township Board of Trustees | 7 | 181 days or more | \$225,000 |
| Stark | Police Officer Hirings - Part-time | We (8) part time police officers will be hired to supplement the existing full time force. Supplementing the full time police force will allow the city continue to provide police protection by using part time officers to save overtime costs and fill a current vacant costly full time position with a part time officer. | North Canton Police Department | 6 | 31 to 90 days | \$50,000 |
| Stark | Police Indoor Range Rehabilitation | An existing indoor police shooting / training range built in the 1970's needs extensive rehabilitation work. The control system, hardware, and armor needs attention. The air handling system needs updated to meet Ohio Safety and Health Administration (OSHA) requirements. This range is also used by other departments to complete their yearly required firearm qualifications. There is no change made to any police department seeking to use the range. A full analysis report on the needs of the range was conducted in 2006 by an outside company whose expertise is in firing ranges. They produced a report on the required needs of the indoor shooting range. This project has been on hold for lack of funds. | North Canton Police Department | 8 | 91 to 180 days | \$300,000 |
| Stark | Entrepreneurial Job Training Enterprise | We are seeking funds to develop a commercial bakery and job training site. The bakery, which will seek out contracts with local restaurant, grocers, and so on, will be a money making venture that would provide paid job training as well as permanent paid positions. Funds are required to initial build out and initial ramp up operating funds. Through job training, coaching and, where needed, counseling, all program clients will be job ready. The program objective is to secure permanent employment within the training bakery itself, or in a private-sector bakery. Model, program and financial resources will be provided to private sector entities that are a production of the program. This is designed to be an income generating venture we anticipate self-sufficiency after 18 months of operation. This includes income enough to offer the participant incentives to the private sector employers. The program would supply a steady stream of job ready individuals. Additionally, since each trained employee comes with a financial incentive, private sector entities would be encouraged to add jobs. These jobs would be in addition to our anticipated number of 18 positions. Construction of water main extension. Connects three dead end mains of the city's infrastructure providing a looped water system. The looped system will improve water quality in the SE section of the city and in the nearby Township. The area has potential for development of the outer edge of the city. | Community Services of Stark County, Inc. | 18 | 181 days or more | \$1,760,000 |
| Stark | Beech street Main Extension | This project would permit the relocation of operational specialized trailers from the Safety Center to this facility thus freeing up vital storage space for primary fire/EMS operating apparatus. The storage facility would also enable the housing of staff vehicles currently parked outside the facilities. There would be an drive through bay and four people doors. The large bays would permit us to store a reserved fire truck in the building if necessary. Shift current police cruisers and the vehicles with mobile data terminals for cross utilization and interoperability among safety units. This will also prepare the local entity to consolidate the local dispatch center with an already established regional emergency dispatch center to help save flow costs. | City of Alliance Water Treatment Department | 5 | 0 to 30 days | \$313,000 |
| Stark | Fire Garage | This project would permit the relocation of operational specialized trailers from the Safety Center to this facility thus freeing up vital storage space for primary fire/EMS operating apparatus. The storage facility would also enable the housing of staff vehicles currently parked outside the facilities. There would be an drive through bay and four people doors. The large bays would permit us to store a reserved fire truck in the building if necessary. Shift current police cruisers and the vehicles with mobile data terminals for cross utilization and interoperability among safety units. This will also prepare the local entity to consolidate the local dispatch center with an already established regional emergency dispatch center to help save flow costs. | Jackson Township Board of Trustees | 8 | 91 to 180 days | \$573,000 |
| Stark | Police / Fire Mobile Data Terminal Project | This project establishes a fire/EMS station for the northwest section of the township which is the major residential growth area of the community. The construction of the fire station would respond to the immediate regional needs as well as maintaining the insurance rating classification of the entire community. This facility would enable the community to meet the mile and a half running distance expected for an area fire station. | North Canton Police Department | 10 | 91 to 180 days | \$150,000 |
| Stark | Fire Station | A Computerized Physician Order Entry system would provide an electronic medical record and result in more efficient and improved quality of care to patient safety. This system would enable physicians to direct care for a wide range of patient populations through a single, easy-to-use, desktop portal. Doctors will enter and manage orders from the hospital, satellite clinic, home, or away from the hospital locations. The entire system is integrated to ensure coordinated and safe ordering processes. The order management system will be the primary way to instantly compare formulary data against a patient's record during the clinical decision making process. Patient and drug information is presented to the physician at the time of ordering to guarantee safety and improve efficiency. Construction of a new, 12, and fully bonded firehouse, fire job training, and counseling center in Western Stark County. The 15,528 square foot facility would be a source of counseling and job training for both the in-house, shelter residents and at risk members of the general population. This facility will replace one that has taken out of service in less than 24 months due to age and condition of the facility. Without stimulus funds this would result in a permanent loss of facility and the programs provided therein. A new facility would both repair existing jobs and create new ones as well. The various services offered for the homeless clients to be housed in this facility include: job training, counseling, and shelterment residents will be assisted in securing permanent, private housing. The outcome objective for the general at-risk population is to provide job training specific to the various services offered. Counseling services will be housed in this facility to assist in the job training that may be contributing to job loss and/or homelessness. This will be a 'green' facility, super-insulated, heated geothermally with water and electric saving devices. The city is looking into regional dispatch. If it happens the Police and Fire units will need to go on board MDTs. The regional dispatch site has locator and GPS systems. Upgrade of the Treatment Plant's Programmable Logic Controller, upgrade of the SCADA software, and the addition of a backup touch screen SCADA computer. The first stage of the upgrade is near completion. This request is for replacing the other four PLC's in the facility and the replacement of all associated data highway connections with fiber optic cable. | Mercy Medical Center | 10 | 31 to 90 days | \$2,000,000 |
| Stark | Family Living Center Homeless Shelter & Training C | Installation of a new, 12, and fully bonded firehouse, fire job training, and counseling center in Western Stark County. The 15,528 square foot facility would be a source of counseling and job training for both the in-house, shelter residents and at risk members of the general population. This facility will replace one that has taken out of service in less than 24 months due to age and condition of the facility. Without stimulus funds this would result in a permanent loss of facility and the programs provided therein. A new facility would both repair existing jobs and create new ones as well. The various services offered for the homeless clients to be housed in this facility include: job training, counseling, and shelterment residents will be assisted in securing permanent, private housing. The outcome objective for the general at-risk population is to provide job training specific to the various services offered. Counseling services will be housed in this facility to assist in the job training that may be contributing to job loss and/or homelessness. If it happens the Police and Fire units will need to go on board MDTs. The regional dispatch site has locator and GPS systems. Upgrade of the Treatment Plant's Programmable Logic Controller, upgrade of the SCADA software, and the addition of a backup touch screen SCADA computer. The first stage of the upgrade is near completion. This request is for replacing the other four PLC's in the facility and the replacement of all associated data highway connections with fiber optic cable. | Community Services of Stark County, Inc. | 24 | 181 days or more | \$3,700,000 |
| Stark | Fire/Police MDT | The city is looking into regional dispatch. If it happens the Police and Fire units will need to go on board MDTs. The regional dispatch site has locator and GPS systems. Upgrade of the Treatment Plant's Programmable Logic Controller, upgrade of the SCADA software, and the addition of a backup touch screen SCADA computer. The first stage of the upgrade is near completion. This request is for replacing the other four PLC's in the facility and the replacement of all associated data highway connections with fiber optic cable. | City of North Canton Fire/Ems | 10 | 31 to 90 days | \$150,000 |
| Stark | Blatop replacement with concrete around treatment | Replacement of damaged blockwork area and parking facility with concrete. The drive leads into and around the water treatment facility. The Patient Clinical Portal system will give patients a controlled secure web based location to access patient data from a browser anywhere on the internet. The system provides a mechanism for physicians to communicate with their patients and to provide chronic illness education based on their current condition. As patients become more informed and motivated regarding their healthcare, the system will ultimately lowering healthcare costs. | City of Alliance Water Treatment Department | 3 | 91 to 180 days | \$160,000 |
| Stark | Blatop replacement with concrete around treatment | Replacement of damaged blockwork area and parking facility with concrete. The drive leads into and around the water treatment facility. The Patient Clinical Portal system will give patients a controlled secure web based location to access patient data from a browser anywhere on the internet. The system provides a mechanism for physicians to communicate with their patients and to provide chronic illness education based on their current condition. As patients become more informed and motivated regarding their healthcare, the system will ultimately lowering healthcare costs. | City of Alliance Water Treatment Department | 4 | 91 to 180 days | \$280,000 |
| Stark | Mercy Medical Center - Patient Clinical Portal - I | Replacement of damaged blockwork area and parking facility with concrete. The drive leads into and around the water treatment facility. The Patient Clinical Portal system will give patients a controlled secure web based location to access patient data from a browser anywhere on the internet. The system provides a mechanism for physicians to communicate with their patients and to provide chronic illness education based on their current condition. As patients become more informed and motivated regarding their healthcare, the system will ultimately lowering healthcare costs. | Mercy Medical Center | 5 | 0 to 30 days | \$150,000 |
| Stark | SLUDGE dEWATERING FACILITY AND SLUDGE REMOVAL | Installation of an alum sludge dewatering facility at the treatment plant to dewater Alum sludge for removal by a private contractor who would use the material for a prepared soil mixtures for the golf course. The goal of the sludge is a soil amendment would prevent the material from ending up in a land fill. Currently, the treatment plant has 16,000 gallons of alum sludge (at 4% solids) held in two lagoons. They are running out of room for sludge. The sludge has accumulated since the plant was built in 1994. The sludge is not currently a health problem but must be dealt with in the very near future because the lagoons are reaching capacity. | City of Alliance Water Treatment Department | 10 | 31 to 90 days | \$2,345,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Stark | CHLORINE DIOXIDE GENERATOR | Replacement and up sizing of the Chlorine Dioxide generator, the primary oxidant used for the treatment of potable water at the Alliance Water Treatment Facility. The manufacturer of the current generator no longer exists. The generator is outdated, underused, and no longer supported by the industry. Because the current generator is underused it will not operate effectively at higher plant flows which potentially impacts water quality. At risk. Min and facility MCL requirements could be compromised if plant flows are greatly increased. | City of Alliance Water Treatment Department | 4 | 0 to 30 days | \$95,000 |
| Stark | Mercy Medical Center - IT Infrastructure - Final P | Mercy Medical Center information technology department of internal networks and user devices has been in place since 2007. Over the recent years, work has been done to complete the final upgrades. This project will provide the final technical IT components to allow the internal healthcare staff to use multi-function devices (PC, PDA, Tablets, etc) to interact with the internet, remote physician offices, etc in all areas of the medical center. | Mercy Medical Center | 7 | 0 to 30 days | \$800,000 |
| Stark | Drinking water Source aeration program | Purchase and installation of solar operated hydrokinetic aeration structures for Walborn and Deer Creek Reservoirs, a drinking water source. A 2008 Ohio EPA hydrological study of the two lakes found autogenic impairments and dissolved oxygen problems resulting from nutrient enrichment. Both conditions contributed to an important resource at risk to water quality for potable water. A fishery, as a watershed, and for recreational uses. The aeration would reduce Mn, a secondary contaminant and Taste and Odor components of the surface water. The process would reduce chemical use in the treatment plant, reduce costs of water production. | City of Alliance Water Treatment Department | 6 | 0 to 30 days | \$1,270,000 |
| Stark | Security Improvements at Treatment Plant | Installation of security cameras. Cameras would be mounted at four locations around the facility for security surveillance. Historic images would be digitally stored in a central computer and current images would be displayed. The system would also monitor and control traffic entering and leaving all entry doors of the facility. | City of Alliance Water Treatment Department | 4 | 0 to 30 days | \$130,000 |
| Stark | Water Treatment Improvement Project | Construct a new well field consisting of 2 wells, 0.5mgd treatment facility, and 0.2mgd ground storage tank. Present location is in a contaminated area on the property of Marston Properties (garage and pumping facility). | Village of East Sparta | 2 | 91 to 180 days | \$1,500,000 |
| Stark | Biodiesel Manufacturing | Referenced By Mr. Robert Torres, Director - Dept of Development, Bruce Williams Asst. Dir. Department of Development. Complete construction of manufacturing plant and Fire Suppression, 8 Weeks NOT address of 20' x 40'. Begin site selection for second plant in Canton OH. Per Meeting Fri. 03-06-09 @ 1:00 PM | 11 Good Energy | 70 | 0 to 30 days | \$3,000,000 |
| Stark | Mercy Medical Center - Emergency Department Expans | The project involves 118,889 sq ft of the hospital's campus in the following ways: New Construction - 27,082 sq ft; Sagonika Rehabilitation - 38,951 sq ft; Major Renovation - 52,855 sq ft. The outcomes achieved will be superior healthcare to the community by reducing overcrowded conditions and improving wait times and standards of care. Patient health and satisfaction level will be the ultimate benefits. Mercy's Emergency Department is currently ranked as a Level II Regional Trauma Center by the American College of Surgeons. It has the nation's first accredited Emergency Chest Pain Center and a Cardiac Catheterization Lab housed in the ER area. The proposed project will provide | Mercy Medical Center | 575 | 0 to 30 days | \$36,000,000 |
| Stark | New Fire Station at 25th Street and Cleveland Ave. | The demolition of the old fire station at 25th Street and Cleveland Avenue NW, which is 78 years old and in disrepair, and the construction of a new fire station at the same site. | City of Canton, Ohio Fire Department | 20 | 91 to 180 days | \$2,300,000 |
| Stark | Rain Water Collection System | Peititt Garden Center proposes to collect rainwater from existing greenhouse roofs and transfer the water to a central storage tank where the rainwater will be used to water garden plants and trees. The project will promote water conservation by our utilizing the rainwater. The existing groundwater well on-site to water plants and trees and restricts stormwater runoff from the site. The site drainage is defined tributary of the East Branch Nemahitan Creek. | Anthony Peititt Garden Center & Landscaping | 4 | 31 to 90 days | \$25,000 |
| Stark | EcoStar Biodiesel Plant | EcoStar Biodiesel LLC began in 2006 to refine soy products and provide biodiesel fuel to distributors. The plant is a provider of clients with ASTM D675 standard and BIODIESEL certification for the highest quality biodiesel fuel. The plant has a production capacity of 100,000 gallons of fuel per the 1st year, and then ramping up each of the next 5 years with 15% annual growth. ESB will develop a 200 acre market area from Ohio to the NE US and eventually serving the entire nation. | City of Canton | 15 | 181 days or more | \$3,231,000 |
| Stark | Magnolia View Park | This project will protect and restore over 300 acres of Tuscarawas River Watershed lands within the Nemahitan Creek headwaters. It will include the engagement and restoration of an area of oxbow wetlands, which will retain and filter stormwater runoff into Nemahitan creek and it will serve to reforest a large area of barren lands and areas adjacent to riparian corridors. This project will create numerous jobs through the acquisition, stewardship, natural resource restoration and public amenity creation. | The Trust for Public Land | 75 | 31 to 90 days | \$1,500,000 |
| Stark | Magnolia View Park | This project will protect and restore over 300 acres of Tuscarawas River Watershed lands within the Nemahitan Creek headwaters. | Stark | Water Line Extensions | This project includes 3,760 linear feet of 8" ductile iron water line, and nine fire hydrants on the east and west sides of town. The project has the potential to pick up approximately 53 out of town water customers, or approximately 150 people. The system currently serves 1,003 people. | Village of Waynesburg | 15 | 0 to 30 days | \$414,475 |
| Stark | Energy Efficiency Project | New energy efficient lighting in manufacturing plants within Stark County | Tax Department | 0 | 31 to 90 days | \$50,000 |
| Stark | Energy Conservation Plan | Our energy conservation plan would cost an estimated \$1,452,000.00 with a potential 10 year savings of 4,042,598.00 and a 10 year operational savings of \$1,212,750, which would allow a similar payback period of 6.6 years. Included in this plan will be lighting retrofits, lighting controls, building automation/occupancy control at terminal level, heat recovery opportunities, heating plant efficiency improvements, and a centralized cooling plant. This plan also recommends asking two Maintenance HVAC Technicians on the Maintenance staff to support the improvements outlined in this plan. | Stark State College | 20 | 0 to 30 days | \$3,452,000 |
| Stark | WATER AND ENERGY CONSERVATION FOR 300 HOMES | REPLACE ANY WATER CLOSET THAT IS MORE THAN 1.6 GPF. ANY FAUCET OR AERATOR MORE THAN 1.25 GPM. ANY SHOWERHEAD MORE THAN 2.5 GPM. AND ANY 5 YEAR OR NEW WATER HEATER LESS THAN AN ENERGY START RATING. WATER CLOSETS ARE REQUIRED AT 400 INSTALLED APARTMENTS AT 1. | DAN KILLUEA ENGINEERING AND TRADES | 4 | 0 to 30 days | \$600,000 |
| Stark | Go Green | To make the general public aware of the benefits of going green in their home. Setting up a show room within our business and to help with advertising and consulting. New service technician and installers jobs would be created. This will help a small family business grow and make a positive effect, and help serve our community. | White's Heating and Cooling | 5 | 0 to 30 days | \$75,000 |
| Stark | Alternative fuel development for a better tomorrow | On demand Hydrogen generation to replace and/or assist current fuel sources to gain a higher fuel efficiency vehicle for transportation and lower vehicle emissions thus reducing the total global green house gases released into the atmosphere, and freeing us from the pain for foreign oil. This project is designed to find a hydrogen based alternative fuel source, and generate it on demand for the automobile industry and also for possible future use as a alternative fuel source for the home. | DLIS Consulting | 10 | 0 to 30 days | \$750,000 |
| Stark | Serving visually impaired adults in the home to en | hydrogen is the most abundant element in the universe, when we harness it's power we will have forever changed mankind's future, and that time is now. | Private vendor-Executive Director | 0 | 31 to 90 days | \$60,000 |
| Stark | Assistance For My Family | This will be a rehabilitation service project to assist visually impaired adults over the age of 55 to be safe and independent in the home with regard to orientation and mobility, activities of daily living, and functional low vision. It will provide training and adaptive devices to compensate for the vision loss, and allow consumers to remain in their homes setting instead of a skilled care facility. around the Canton and Massillon area recently. Something needs to be done to help families here. So many people are losing their jobs and it's only going to get worse. I'm working at a high school that pays me less than minimum wage as an Admin. Trainer that I need to get college degree for. I just can't find anything else right now. The school says they can't afford to pay me anymore because of school funding from property taxes, which has led me to the government, that it was deemed UNCONSTITUTIONAL over ten years ago. My daughter's seizure medications costs us over \$1000 per month, and at this rate, in 6 months we won't be able to pay our mortgage, bills, etc. The American PEOPLE need a stimulus package, not just governments. What I would like to do with this money I pay off as many debts as possible, start up a new online business, and franchise working in sports training resulting in giving my family a better life. Right now, without some assistance, I don't have any of this can be accomplished. | My Family | 10 | 0 to 30 days | \$50,000 |
| Stark | Aid for Community Center | This request involves a local named space where people of all ages and abilities come together to make and sell art and crafts. The named space is a single room in a large great public and a waiting list. The room is too small and lacks handicapped facilities. The groups that have formed in the last year consist of seniors, moms and dads, and several eighty year olds. I teach the groups, provide supplies and a great deal of care and encouragement. We are requesting an amount for the rental of a larger room and for art and craft supplies to add these very enthusiastic workers and those hoping to join. We look forward to hearing from you. Sincerely, Madeline Lutes | Village Arts | 2 | 31 to 90 days | \$8,500 |
| Stark | Sheetmetal Crafters Expans | We are interested in the expansion of our existing facility which will be approximately 5000 sq ft. Our interest is in highly energy efficient heating, lighting and insulation to reduce our future energy consumption. We would like to have an underfloor hot water radiant boiler system as our primary system. Also, the installation of highly efficient lighting or recessed daylighting into building. We would also like to investigate recycled alternative insulation or high performance insulation with exceptional R-values. Our building will have many garage door openings which will have an exceptional amount of air infiltration. This is a production shop that will manufacture commercial and industrial chemical products for the building industry as well as industrial facilities, we are interested in entering into mass production of metal fabrication. | Sheetmetal Crafters Inc. | 12 | 91 to 180 days | \$80,000 |
| Stark | start a buisness | Interested in starting a local clothing and gift store. Feel we need more hometown business sites that inspire and prosper communities in which we live. I am really dishearted due to a serious accident back in 2004 My family and I have lived in our house for the past 23yrs and never missed a payment I never asked for any help as far as fixing my house and did it the best way I could I tried my best but when I was hurt, my life fell apart and my health deteriorated both of my hands were completely shattered with 11 fractures and blood. My back was broken in 4 places, T-11 and L-1, plus. Small that I've virtually completely collapsed I needed to have total back reconstruction I had it done but I'm not to find out I need to go back for another major surgery in two months. We have very little income coming in I would like to get help asap. My house needs complete renovation so that it is handicapped accessible. Our bathroom needs reform. Our bedrooms will need revamped and having to add two more bedrooms and bathroom. Our kitchen will also need to be done over to make it handicapped accessible. We also need to make our house more energy efficient with windows, doors, metal and asphalt roof, doors, insulation, non-solar water heaters, bonnie stoves and heating, venting and air-conditioning unit. I can we please get help. | none | 3 | 0 to 30 days | \$50,000 |
| Stark | Home Renovation | We are a small business who wanted to buy our own building in order to grow our business and hire a few employees. Unfortunately, the stock market crashed and the available homes we wished and small business loans became non-existent. So, in order to move to the right direction we decided to buy on a "hard contract" on a building. We are hoping to expand and hire employees but the market isn't improving and the lending is small businesses isn't there. Our company has proved to be capable of making money if we can get this building financed into our own names. Our over head is still high with the high interest rate that goes along with "hard contract" and we are unable to hire any employees until it is in our names. We have invested over \$15,000 in the building, never imagining that the money market had been so bad. If we can get financed, we will lose our business, our building, and the money we've invested (over \$50,000 in inventory alone). We are able to repay the bank, we have good income, just aren't getting that right now. We are only interested in a low interest loan or a repayable grant. If we can just this we will be able to hire employees. | Disability | 5 | 91 to 180 days | \$250,000 |
| Stark | Purchase of 121 N. Market St. | We are a small business who wanted to buy our own building in order to grow our business and hire a few employees. Unfortunately, the stock market crashed and the available homes we wished and small business loans became non-existent. So, in order to move to the right direction we decided to buy on a "hard contract" on a building. We are hoping to expand and hire employees but the market isn't improving and the lending is small businesses isn't there. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Stark | Concrete pads for scrap storage | The handling equipment has to drive on dirt areas for picking aluminum scrap to be recycled. After rain, these areas are very muddy and dirt is tracked by the front loaders into the storage area. Later on, this dirt is mixed with the scrap and ends up being charged into the furnace. This adds to increased energy consumption as well as increased metal loss. By pouring concrete in these areas, the problem will be eliminated, with energy and metal loss reduction (not having to heat dirt and dry scrap). | Thakar Aluminum Corp | 22 | 31 to 90 days | \$50,000 |
| Stark | Additional scrap storage building | Currently, one third of the scraps stored outside due to the limited inside storage in Canton. The aluminum scrap is getting wet during rainy time and needs to be preheated before being charged into the melting furnace (water charged in molten aluminum can yield to severe explosion). By building an additional inside storage, scrap will be kept dry and no time or energy will be spent in preheating the scrap before it is melted. | Thakar Aluminum Corp | 22 | 91 to 180 days | \$600,000 |
| Stark | Building roof repair | Currently, roofs are leaking above scrap storage area and melting furnace area. The aluminum scrap is getting during rainy time and needs to be preheated before being charged into the melting furnace (water charged in molten aluminum can yield to severe explosion). By repairing the paint roof, scrap will be kept dry during rainy time and energy will be spent in preheating the scrap before it is melted. | Thakar Aluminum Corp | 22 | 31 to 90 days | \$70,000 |
| Stark | In Line Degasser | The current in-line degasser is a vessel with more than 2,000 lb of aluminum in it. At the end of each cast, the metal has to be drained, solidified and skimmed. This results in a melting loss as well as a loss of aluminum due to oxidation. The project is to install a trough degasser that does not have any aluminum left at the end of the cast. The reduction in melting cost and metal loss is estimated to be between \$150,000 and \$200,000 per year. | Thakar Aluminum Corp | 22 | 91 to 180 days | \$450,000 |
| Stark | SmartFire Homogenization Oven Controls | Currently the homogenization oven combustion system is using old cross track technology, meaning that the optimum air fuel ratio is not achieved. By installing mass flow meters in the air and natural gas lines, the flow for each fluid is monitored by a PLC and optimum air fuel ratio is maintained all the time. This yields to natural gas consumption reduction as well as productivity improvement that will make the company more competitive. | Thakar Aluminum Corp | 22 | 91 to 180 days | \$110,000 |
| Stark | Munson Stadium Rehabilitation | This project will install two additional baseball fields and provide upgrades for the existing stadium and facilities. The energy efficiency upgrades may include solar panels to reduce the costs of lighting and utilities and energy efficient bulbs. | City of Canton | 30 | 181 days or more | \$500,000 |
| Stark | SmartFire Furnace Controls | By installing mass flow meters in the air, natural gas and oxygen lines, the flow for each fluid is monitored by a PLC and optimum air fuel ratio is maintained all the time. This yields to natural gas consumption reduction as well as productivity improvement that will make the company more competitive. | Thakar Aluminum Corp | 22 | 31 to 90 days | \$80,000 |
| Stark | Paint Bake Oven | Currently, only clean aluminum scrap can be recycled at the Canton plant. By installing a paint bake oven at the facility, painted aluminum scrap can be processed in this oven to remove the coating. Then, the preheated aluminum can be charged into the melting furnace. The oven is equipped with an after burner to ensure that no harmful emissions from the paint are released. | Thakar Aluminum Corp | 22 | 91 to 180 days | \$120,000 |
| Stark | Aluminum Sow preheating furnace | By having a way to process painted scrap, Thakar is equipped to handle all the scrap generated by its customers and does not have to pay a business with competitors that have painted scrap. Currently primary aluminum sows are charged in a side well furnace and the melting efficiency is less than 30%. By preheating the sows in a closed furnace to 200F and then charging them to the melting furnace, the melting efficiency will be practically increased from 30% to over 60% and a 20% reduction in the melting cycle time. | Thakar Aluminum Corp | 22 | 91 to 180 days | \$140,000 |
| Stark | Premix burners for aluminum melting furnace | To install premix burners on an aluminum melting furnace that will yield in a 15% reduction in natural gas consumption. This technology has already been implemented in other aluminum processing facilities and the expected energy savings have been realized at those locations. The concept is to better mix natural gas with the oxygen in the combustion air, increasing oxygen components. | Thakar Aluminum Corp | 22 | 31 to 90 days | \$75,000 |
| Stark | Police Department Funding | We are hoping to purchase a new police vehicle along with updated radios and radio equipment. Seeking for grant funding. Possible funding for the hiring of officers along with general equipment (e.g. flashlights, firearms, ammunition, traffic cones, etc.) | Wilmot Police Department | 7 | 0 to 30 days | \$25,000 |
| Stark | High Risk Incidents | This project is designed to obtain equipment for the SWAT team that will assist in the successful handling of high risk incidents. Items to be purchased include protective masks, flares, flashlights, chemical agents, loss lethal munitions, taser, and accessories. Project will enhance the safety of the officers as well as the public. | Massillon Police Department | 5 | 31 to 90 days | \$25,000 |
| Stark | Tactical Video | Project is designed to obtain video equipment to be used during SWAT Team operations. Equipment to be purchased includes individual video cameras, pole cameras, monitors, and accessories. Equipment will ensure greater accountability of law enforcement assets. Increased jurisdiction rates as well as fewer cases going to trial. Will also be used as a training aid to increase officer safety and survivability as well as reducing liability. | Massillon Police Department | 10 | 31 to 90 days | \$100,000 |
| Stark | Communications | Program will ensure that officers will have access to communication while on duty. Items to be purchased will include portable and vehicle radios, charging stations, legal microphones, batteries, antennas, and other accessories. In addition to enhancing the safety of the public and officers, the charging stations will enhance battery quality and lifespan which is more environmentally responsible than our current equipment. | Massillon Police Department | 5 | 0 to 30 days | \$15,000 |
| Stark | SWAT Ballistic Protection | Project will assist with the purchase of ballistic protection for SWAT Team members. Items include ballistic vests, ballistic helmets, and ballistic shields. Vests and helmets are needed to protect against equipment on the scene such as tear gas canisters. The project is required for continued officer safety and will enhance the safety of the public. | Massillon Police Department | 5 | 31 to 90 days | \$30,000 |
| Stark | Training Room | Includes a training room in the existing room inside the police department. The project includes purchasing tables, chairs, carpet, and audiovisual equipment as well as installation. The project will help create a more professional environment as well as creating more competent and confident officers. In addition to equipping the room itself, the project would also include purchasing training material that will increase the professionalism of officers. | Massillon Police Department | 5 | 31 to 90 days | \$15,000 |
| Stark | Officer Retention | Retain a paid officer position within the police department by avoiding fines. This will help relieve the strain on the unemployment system as well as the public feeling safer in these uncertain times. | Massillon Police Department | 4 | 0 to 30 days | \$250,000 |
| Stark | Firearms Range | Build indoor range in existing room in the basement of the Police Department. Besides the jobs created/maintained for the installation, additional jobs may be created/maintained for a number of years. Noise reduction as well as dangerous lead building in the ground and water can be eliminated with this environmentally responsible answer to required firearms requalification. This project will also increase officer competence, safety and survivability by allowing us to increase firearms training beyond the required minimums, thereby reducing liability and increasing the safety of the public. | Massillon Police Department | 30 | 91 to 180 days | \$500,000 |
| Stark | Mobile Video | Digital Video for 15 cruisers, installation, automated data storage, and software. Greater accountability of law enforcement assets. Increased jurisdiction rates as well as fewer cases going to trial. Will also be used as a training aid to increase officer safety and survivability. Safety for the hardware-house helmets that receive Continuum of Care project based Section 8 at \$275 per month per unit, including utilities. Gateway has 36 BRDs, 31 BRs and 12 BR. | Massillon Police Department | 10 | 31 to 90 days | \$150,000 |
| Stark | Gateway Estates Renovations | Driveway completed in 10/15/01 and fully occupied by 12/31/01. Driv residents are proving to be very hard on the facility damaging both curbs and windows to the point that they must be replaced. The project entails replacing all flooring with ceramic tile and replacing all apartment windows. When windows are replaced, window ledges must also be replaced. | YWCA of Canton | 2 | 31 to 90 days | \$65,000 |
| Stark | Student Personal Success Plan | Window damage is the result of residents using windows as doors. Vinyl windows cannot withstand this kind of use. The vinyl windows will be replaced with aluminum as it is expected some level of this activity will continue. Ninety percent of the residents have a HUD housing condition such as a mental illness or substance abuse. The program goal is to keep these residents in housing. Given the population we serve, replacing the windows is a viable alternative to eviction. Project will assist districts with the integration of technology into curricula and instructional practices. Funds will also be used to provide ongoing professional development to teachers. Web-based online learning for K-12 students will increase student engagement/achievement. The Educational Technology Outcomes of the project are: 1. Improve student academic achievement through the use of technology in elementary and secondary schools 2. Ensure every student is technologically literate by the time he/she finishes the eighth grade, regardless of the student's race, ethnicity, gender, family income, geographic location, or disability 3. Encourage the effective integration of technology resources and systems with teacher training and curriculum development to establish research-based instructional methods that can be widely implemented using high quality professional development as defined by the Ohio Department of Education. Cost is generated behind our building to run the servers in our server room. Right now, if we lose power, we have no way to power our servers as that the rest of the city can function with our current computer network system. | Stark County Educational Service Center | 1 | 0 to 30 days | \$123,000 |
| Stark | Power Generator for City of Canton Servers | Cost is generated behind our building to run the servers in our server room. Right now, if we lose power, we have no way to power our servers as that the rest of the city can function with our current computer network system. | City of Canton | 15 | 31 to 90 days | \$30,000 |
| Stark | City Wide Video Conferencing | City Wide Video Conferencing will allow all apartments within the City of Canton to attend meetings at their responsible locations, without having to meet at other various locations. By doing so, will allow the city to be more cost effective as there will be less of a need to use city vehicles, plus saving on gas and wear and tear on these said vehicles. With the numerous amounts of meetings that take place between the departments and now abroad, this technology will produce a savings that will provide for future job growth and will allow additional funds for technological needs. | City of Canton | 5 | 31 to 90 days | \$80,000 |
| Stark | YWCA Elevator | The project is a public facilities improvement to replace the YWCA elevator located in its primary facility at 231 6th Street NE, Canton, OH, 44702. The work will consist of removing the old cab and installing a new cab, components needed to operate the cab, and electronic sensor for the external doors. There will be no alteration of the elevator shaft. The current elevator will be 60 years old at the time of proposed replacement. It will enable the YWCA to upgrade to a door sensor system that will operate from both the internal and external doors. External door sensors must be installed on all seven doors. The YWCA would also wire the new elevator for security cameras. | YWCA of Canton | 0 | 181 days or more | \$100,000 |
| Stark | Family Shelter Relocation | The elevator will serve the homeless shelter's very low and low income residents: YWCA children very low, and low/moderate income families, of which over 80% qualify for subsidized childcare; and two Canton City Schools education programs, Adult Basic Education & Library, and Even Start. and increase the number of bedrooms in two of the units from 2 to 3 to accommodate larger homeless families. All units will meet green standards and be fully handicap accessible. The relocated shelter will be housed within a 4-story PSH housing facility with shared central systems for HVAC, electrical, plumbing, and security, reducing energy use and emissions. Combining the two facilities and using multiple stories also reduces the overall building footprint which has a positive impact on water conservation. The facility will be geothermal which is renewable and energy efficient, providing heating as well as conditioning (AC). | YWCA of Canton | 2.5 | 91 to 180 days | \$175,000 |
| Stark | Replace ISSVR Server | AC is important in the target population as breathing and allergy problems are exacerbated in hot weather, particularly if windows are left open. Approximately 23% of the homeless has a major medical condition. Additional green components include use of the flooring which reduces mold problems. Another benefit is that use of shared central systems reduces overall operating costs for both programs. | City Of Canton | 4 | 31 to 90 days | \$9,000 |
| Stark | KVM Cables | Replace server with an energy efficient server and a backup server for disaster recovery. | City Of Canton | 4 | 31 to 90 days | \$360 |
| Stark | Energy Efficient Laptops | Purchase 6 P12 and 6 USB cables. This will allow us to run more than one server off of one monitor. This will eliminate the energy used for multiple monitors. | City Of Canton | 12 | 31 to 90 days | \$20,000 |
| Stark | Replace CRT Monitors with Energy Efficient LCD Mon | Replace current laptops with energy efficient laptops. | City Of Canton | 300 | 31 to 90 days | \$60,000 |
| Stark | MIDWEST INDUSTRIAL SUPPLY, INC. | Replace approximately 300 CRT monitors that are currently in use throughout the city with more energy efficient monitors to save electricity. This programmatic partner need US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Stark | MIDWEST INDUSTRIAL SUPPLY, INC. | This programmatic partner wishes to help/continuous deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Stark | PGT Trucking , Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. This money will outfit the entire fleet in anti idling technology. | Clean Fuels Ohio | 5 | 31 to 90 days | \$65,000 |
| Stark | The MHR58 Green Stimulus Project | The MHR58 is a 100,000 sq ft building located at 58th Street and Greenway Blvd. It is currently a vacant building and is being used as the broker on behalf of half (10 of 20) of our network orgs in collaboration to make their facilities "green". They have challenges keeping up with the demands of owning old bldgs, let alone being green. Making facilities energy efficient will allow for addl money to help people in need. It will: * Provide 150+ construction jobs for upgrades to lighting, heating and cooling, water usage, roofing, boilers, insulation, eco-landscaping, etc * Lower costs due to collaboration of efforts * Enable them to hire more therapists, etc to help more ppl and families * Provide work for low income ppl * Extend the life repairs due to materials used * Use local resources * Recycle or reuse waste and uses recycled products where possible Our process: * Used input from LEED certified professionals * Aims for 70% usage of waste * Provides cost savings through thoughtful collaboration * Priorit repairs/upkeepments through the most efficient means provided The three nickles bakery plants (navarre, marion tony and lima) and the three largest distribution facilities (columbus and cleveland) include rubber roof areas that total nearly 600,000 square feet. Nickles believes that a considerable amount of this roof could be retained with the implementation of solar panels on one or any of the six facility rooftops. The navarre bakery contains four boilers that were installed in the mid-1950's. The current boilers are inefficient and in constant need of wasting fuel. We would like to purchase four diesel/bio boilers that would save at least 45% of the current heating oil cost (natural gas for \$200/mcf per year). | The Mental Health and Recovery Services Board of 5 | 157 | 0 to 30 days | \$5,286,558 |
| Stark | nickles bakery production plant solar panel exam | Build a restroom facility in the stadium to provide a clean and sanitary facility for spectators. | alfred nickles bakery, inc. | 0 | 181 days or more | \$400,000 |
| Stark | navarre bakery boiler replacement project | Enclose underside of visitors bleachers in the football stadium to increase the safety of the spectators attending events in the stadium. | alfred nickles bakery, inc. | 0 | 31 to 90 days | \$200,000 |
| Stark | Build Restroom Facility in Stadium | Install walls and redo floor in alternative classroom. This will enhance the learning environment for the students participating in this classroom. | Canton Local Schools | 50 | 91 to 180 days | \$150,000 |
| Stark | Enclose underside of bleachers | Repair structural cracks and repair interior of transportation facility. | Canton Local Schools | 16 | 91 to 180 days | \$5,064 |
| Stark | Remodel Alternative Classroom | Install new wash compartments for school cafeteria to help reduce the amount of waste thrown away each day. Reduce the amount of waste transported to landfill. | Canton Local Schools | 23 | 91 to 180 days | \$12,899 |
| Stark | Paint Interior of Transportation Facility | Purchase 2 fuel efficient lawn tractors to maintain school grounds. | Canton Local Schools | 23 | 91 to 180 days | \$67,722 |
| Stark | Purchase Five Trash Compactors for School Cafeteri | Purchase 2 fuel efficient school vans to transport students to school as well as extra curricular activities. | Canton Local Schools | 23 | 91 to 180 days | \$22,500 |
| Stark | Purchase 2 fuel efficient lawn tractors | Purchase 2 new energy efficient trucks to use as service vehicles in our district and also to use in snow removal throughout our school district. | Canton Local Schools | 100 | 91 to 180 days | \$35,440 |
| Stark | Purchase 2 fuel efficient school vans | To install cameras on our school buses to increase safety and security on the buses. | Canton Local Schools | 100 | 91 to 180 days | \$38,789 |
| Stark | Fuel Efficient Trucks | This project requests salary and benefits for two full-time deputies to be assigned as Domestic Violence Officers. These two officers would work closely with the collaboration established in Stark County to address the issue of domestic violence against women. These officers would follow up on all reports taken by the first responders. They would assist the female victims through the entire process and even follow-up with the victims after the cases have been closed. These officers seek out survivors, arrest the violators, seek protection orders, refer victims to services available, assist the victims through the judicial process and follow-up with the victims after the case has been closed. There is an existing collaboration in Stark County and monthly meetings are held. This collaboration is wide spread, and it includes the Municipal Prosecutor's Office, the Domestic Violence Project, Inc., law enforcement agencies, parole and probation agencies, Pre-Trial Release, Legal Aid, Advocates, Department of Job and Family Services, Stark Metropolitan Housing, and SRCC. This collaboration has created a strong bond throughout the community to address the issues of domestic violence. To store all flammable and combustible and corrosive liquids separately in approved and properly labeled cabinets. To have eyewash stations available in industrial and art classrooms for the safety of the students. | Stark County Sheriff's Office | 2 | 0 to 30 days | \$128,702 |
| Stark | Purchase Eyewash Stations/Flammable Cabinets | To test our school buildings and give evidence the schools are radon resistant. | Canton Local Schools | 25 | 91 to 180 days | \$6,858 |
| Stark | Building Radon Inspections | During 2008, the Stark County Prosecutor's Office received and processed 232 felony DV cases with 361 victims (includes children who witness violence). DV cases are now approximately 30% of the total number of felony crimes in this Office, as opposed to 4% in 1996. A FT advocate is desperately needed to work solely in a "team concept" with the DV Prosecutor for case management, support & consistency purposes. Available funding streams/ outlays is prohibiting this from occurring. This FT position would cost \$34,942.00 in salary + \$19,943.00 in benefits for a total of \$54,885.00. If awarded monies we would do our best to provide an in-kind match. | Canton Local Schools | 25 | 91 to 180 days | \$4,950 |
| Stark | VAWA - Domestic Violence Advocate | Install energy efficient furnaces and air conditioners to middle and lower income families. If possible, expand program to encompass multi family units. | Wyles Heating & Air Conditioning, Inc. | 20 | 31 to 90 days | \$500,000 |
| Stark | baillout | Reduce debt to allow us to call two employees back off unemployment, continue to stay in business, employing 7 people and indirectly funding the fees of some 20 people who could possibly lose employment and their livelihood if we cannot stay in business till this county economy passes. This will help to ward off 5 separate home loan foreclosures. Also to help try the costs of training my present employees. | Alliance Water Cond. & Plmg. Inc. | 7 | 0 to 30 days | \$200,000 |
| Stark | Debt | Replace Upper Level Hot Water Heating Loop at Canton South High School. This will allow for increased energy efficiency, improved health and safety factors, and reduced maintenance and ongoing costs. It will also reduce environmental impact for maintaining the building. Install Knox Rapid Entry System boxes as an added security/safety feature to give appropriate Fire Department representative available access to our buildings in the case of an emergency. Jackson Local Schools is a school district in Massillon, OH. We have 4 elementary schools, 1 middle school, and 1 high school. We would like to improve our public safety and security systems with this grant. Our current camera system no longer works in 2 of our buildings, and is obsolete in 3 of the remaining buildings. This has lead to security deficiencies that affect the safety of our staff and students. We will repair and upgrade our broken camera systems. The repaired systems will be network accessible. The upgraded system will be connected to the township fire and safety center via fiber-optics. Funding would also improve our district radio system. Improvements will extend radio coverage within the schools and provide in-building coverage for our local fire, police, and EMS radio systems. Additionally due to upcoming FCC changes our current radios need to be replaced. Wide band radios used by our School buses and administration will be replaced with narrow band radios. This project help the school district prioritize our normal State and Local funding on curriculum and staffing. It will provide significant support for local jobs at our local security and radio vendors. Lower Advocate: Need DTVers in district rooms to save the amount of papers towels added to land fill. | Canton Local Schools | 30 | 91 to 180 days | \$1,000,000 |
| Stark | Canton Local Energy Efficiency - Upper Level Heat | Install new sound system in FMSB and South for use in performing arts hall. | Canton Local Schools | 10 | 91 to 180 days | \$1,875 |
| Stark | Canton Local Schools Knos Rapid Entry master key s | Install new lighting, stage curtains and sound system to enhance the drama/chor presentations for the Arts in the Middle School. Fill cracks, reurface, reline blacktop surface on the districts tennis courts. This will make the playing surface safer for our gym classes as well as our district tennis teams. Purchase 3 new Power Walk Behind Floor Soubbers to increase the efficiency of our custodial staff and to better maintain our school buildings. Tear of existing saturated areas of roof, insulation and damaged deck material and replace. Boiler replacement at Fire Station #1. Replace existing disolves Controls for HVAC units and install energy management System. Lighting Retrofit: change out T-12 lighting to T-8, keeping existing fixtures and replacing ballasts and lamps only. Replace roof including any saturated insulation. Install new electronic, thermostats, CO2 and humidity sensors, converting controls from pneumatic to electronic and linking to a computer front end for better control of HVAC units. Install variable frequency drives on pumps and HVAC units with motors ten horsepower or greater to ramp-up or slow fan speeds according to demand. Install timers, motion detectors, and CO2 detectors to sense a presence in hallways, garages, conference rooms, restrooms, etc to turn off lights when unoccupied. | Jackson Local School District | 12 | 0 to 30 days | \$317,037 |
| Stark | Canton Local Schools Hand Dryers | Replace Upper Level Hot Water Heating Loop at Canton South High School. This will allow for increased energy efficiency, improved health and safety factors, and reduced maintenance and ongoing costs. It will also reduce environmental impact for maintaining the building. Install Knox Rapid Entry System boxes as an added security/safety feature to give appropriate Fire Department representative available access to our buildings in the case of an emergency. Jackson Local Schools is a school district in Massillon, OH. We have 4 elementary schools, 1 middle school, and 1 high school. We would like to improve our public safety and security systems with this grant. Our current camera system no longer works in 2 of our buildings, and is obsolete in 3 of the remaining buildings. Lower Advocate: Need DTVers in district rooms to save the amount of papers towels added to land fill. | City of Canton | 6 | 31 to 90 days | \$40,000 |
| Stark | Coleman Center HVAC controls | Replace Upper Level Hot Water Heating Loop at Canton South High School. This will allow for increased energy efficiency, improved health and safety factors, and reduced maintenance and ongoing costs. It will also reduce environmental impact for maintaining the building. Install Knox Rapid Entry System boxes as an added security/safety feature to give appropriate Fire Department representative available access to our buildings in the case of an emergency. Jackson Local Schools is a school district in Massillon, OH. We have 4 elementary schools, 1 middle school, and 1 high school. We would like to improve our public safety and security systems with this grant. Our current camera system no longer works in 2 of our buildings, and is obsolete in 3 of the remaining buildings. This has lead to security deficiencies that affect the safety of our staff and students. We will repair and upgrade our broken camera systems. The repaired systems will be network accessible. The upgraded system will be connected to the township fire and safety center via fiber-optics. Funding would also improve our district radio system. Improvements will extend radio coverage within the schools and provide in-building coverage for our local fire, police, and EMS radio systems. Additionally due to upcoming FCC changes our current radios need to be replaced. Wide band radios used by our School buses and administration will be replaced with narrow band radios. This project help the school district prioritize our normal State and Local funding on curriculum and staffing. It will provide significant support for local jobs at our local security and radio vendors. Lower Advocate: Need DTVers in district rooms to save the amount of papers towels added to land fill. | City of Canton | 4 | 31 to 90 days | \$95,000 |
| Stark | Coleman Center lighting retrofit | Replace Upper Level Hot Water Heating Loop at Canton South High School. This will allow for increased energy efficiency, improved health and safety factors, and reduced maintenance and ongoing costs. It will also reduce environmental impact for maintaining the building. Install Knox Rapid Entry System boxes as an added security/safety feature to give appropriate Fire Department representative available access to our buildings in the case of an emergency. | Stark | Lake Vocational partnership | This is a brand new Vocational partnership with Lake Local School District to put 24 students into a vocational school located on our facilities. We would provide the instructor and facility for the Welding Vocational program. We are required to remodel our existing facility to add class rooms and welding booths. We currently have our own 3 year NCCER accredited Pipefitting/Welding course that will also be expanded by 24 of our workers in April of 2009. This is an excellent opportunity to put North East Ohio back to work in the Manufacturing Industry. We are a Global Pipe Fabricating facility specializing in the Power industry with our focus being in Nuclear. Kevin Schaeck HR Manager | Scott Process Systems, Inc. | 75 | 0 to 30 days | \$350,000 |
| Stark | Roof and Gym Project | New roof on entire building. New gym floor. New lights in gymnasium. Lynette LLC (Lynette LLC) is currently renovating a vacant building into a recreation facility for adults with various disabilities and accessibility needs. Our staff is supervised by 2 CTRCs (Certified Therapeutic Recreation Specialists). We take adults with disabilities on daytrips & vacations on weekends. We conduct computer training & academic programs on weekdays. We have excellent relationships with the families of our participants. We currently rent space for operations. | Alliance Franklin School | 19 | 0 to 30 days | \$150,000 |
| Stark | Beyond Our Boundaries Recreation Facility | PROJECT DESCRIPTION We have identified a building with a basic catering license that is adjacent to a new area of the walking path, with outdoor recreational potential (This building held a family friendly party center). EXPECTED OUTCOMES Acquiring this building would allow us to: 1) expand our current operations, 2) implement a recreation business open to the public, (boots, horsehoes, etc. and selling light snacks), plus 3) employ individuals with disabilities to operate this business. There is also potential for a year-round business hosting events and parties. | Beyond Our Boundaries | 5 | 0 to 30 days | \$340,000 |
| Stark | Math Lab Program K-8 | To raise student achievement and provide at least one year of growth in mathematics for every child, regardless of economic status, race, disabilities, gifted abilities, and native language. Perry Local School District requests funds to expand services to all students to meet their specific needs in math. Perry serves approximately 5000 students through the district's 330 teachers. All students K-8 will benefit directly through Math Labs, which will be housed in each of their eight school buildings. Students, who need remediation or seek extra guidance in math, will work with their Math Lab Coach, who will meet the individual needs of each student. Four Math Lab Coaches will be needed to adequately serve these students, one each at Edison J H, Pfeiffer M S and two in our six elementary schools. One Math Project Manager will guide the K-8 Math Lab Program and, also, be responsible for revising the current 8-12 math program. Through 21st Century technology, Perry, also, hopes to challenge the best and the brightest with opportunities to interact with technology while at the same time in the work place. With your assistance Perry's math students will become the best that they can be. This project would put two more full time job seekers on duty full time for the Village. One would be performing the other a management position. | Perry Local School District | 5 | 31 to 90 days | \$499,900 |
| Stark | Hiring New Full Time Officer | This project would put two more full time job seekers on duty full time for the Village. One would be performing the other a management position. | East Canton Police Department | 2 | 0 to 30 days | \$88,192 |
| Stark | Customized and focused training Shooting Academy f | This is a customized training program designed to provide training in weaponry (shotguns, shotguns, rifle and handgun) for law enforcement with training assistance or needs. It will act as a shooting range/academy for both female and male. The majority of the training is set to assist females with knowledge, techniques, tactics, and discipline. Courses and opportunities will be provided for both male and female. The training will be provided in a safe, controlled carry course, scenario-based training, partnership with local community college for OSHA training, federal, state and local certifications, certification in air-ventilation training, SWAT tactical training house, competitive and high shooting trap and pistol competitions, indoor/outdoor pistol and long rifle ranges, active non-lethal training, and interactive competitive commercial challenges. | Team Patriot Enterprises, LLC | 14 | 181 days or more | \$600,000 |
| Stark | GREEN PLANT | REPLACE EXISTING LIGHTING WITH HIGH EFFICIENCY, LONGER LASTING LIGHTING. INSULATE BUILDING AND FURNACES AND INSTALL FURNACE EXHAUST HEAT RECOVERY SYSTEM. THIS IS ESTIMATED TO CUT OUR ELECTRIC CONSUMPTION ON LIGHTING BY 30% SAVING UP TO 200,000 KILOWATT HOURS PER YEAR, AND CUT OUR GAS USAGE BY 20% SAVING UP TO 400,000 BCF PER YEAR. | TRILOGY PLASTICS, INC. | 80 | 0 to 30 days | \$125,000 |
| Stark | SVTI (Sandy Valley Technology Initiative) | The Sandy Valley Technology Initiative will allow Sandy Valley Local Schools to purchase 60 new computers and 30 Smartboards for educational instruction in grades K-12. The computers will be housed in two labs-one at the Elementary level and one at the Middle School level. The Smartboards will be permanently housed in individual teacher classrooms. Additional money will be utilized to employ an Integrated Technology Specialist to assist teachers in integrating new technology in their state aligned curriculum. The SVTI will increase student technology competency and knowledge and better prepare them to compete in our global economy. | Sandy Valley Local School District | 1 | 0 to 30 days | \$137,080 |
| Stark | Surveillance cameras in high crime areas | Surveillance cameras installed in senior housing complexes, parks, high crime areas and high traffic crash areas. This project would assist the safety in the city of Massillon. The system would also lead to the Regional Emergency Dispatch. This also would enhance the safety and crime prevention through out the city of Massillon. Also the system could live feed from the schools through out the city. The system also would be able to be live feed to most police stations. The city of Massillon already has their digital cam through out the city. Our mission is to provide ATOD, HIV/AIDS prevention education, to the population not normally seen by traditional agencies. We provide the necessary link to help those persons seeking assistance by providing them information on available services best suited to their personal situation and assist in the navigation of those linkage, by intake and referral. | Massillon Police Department | 2 | 0 to 30 days | \$200,000 |
| Stark | Stark County/UMADADOP | We also provide HIV Testing and Counseling, and Grief Support and Etiquette School. | Stark County Urban Minority Alcoholism and Drug Add | 5 | 0 to 30 days | \$100,000 |
| Stark | GreenEarth | We are an Ohio business established in 1952 We would very much like to expand our daily operations into the retrofit/remodel market. Most of the homes in our area have non-efficient energy wasting heating and air conditioning systems. People would like to help the planet become a better place for our children and grandchildren, but they cannot afford to do so. That's where we would come in. With the proper financial backing, we could lower the costs of installing and maintaining the most up to date energy efficient furnaces and air conditioners and homeowners could take advantage of this - thus helping the environment and the economy. In addition, when the new housing starts improve, we will hopefully install the most energy efficient units possible right at the building of the home. This is an important step to take - one of many that are necessary to improve the future of this country and the planet. Thank you. | Wyles Heating & Air Conditioning | 25 | 31 to 90 days | \$500,000 |
| Stark | Energy Conservation of Public building | Work with a company to do a complete refurbish of the Massillon Police Department. All bathrooms will be retrofitted with all water saving devices. Ex. Low flush toilets, Gravity Urinals, hand dryers, low flow shower heads and tankless water heaters. Also replace all windows with triple pane windows to conserve energy during the summer and winter. Retrofit the current entry way with a double entry to limit energy loss. Retrofit the current emergency electrical generator with a high efficient unit and change the fuel source to natural gas. The department would also have the whole building lightning system changed over to high efficient bulbs to reduce the electrical cost of the police department. This would create a greener building and help reduce the pollution. Work with a company to do a complete refurbish of the Massillon Police Department. All bathrooms will be retrofitted with all water saving devices. Ex. Low flush toilets, Gravity Urinals, hand dryers, low flow shower heads and tankless water heaters. Also replace all windows with triple pane windows to conserve energy during the summer and winter. Retrofit the current entry way. | Massillon Police Department | 2 | 31 to 90 days | \$100,000 |
| Stark | Canton Brownfield Job Training Partnership | Canton is successfully responding to the impact of brownfield sites on the health, economy, and revitalization efforts in the city. A number of brownfield sites have been successfully remediated and developed for industrial or commercial use. Other sites are scheduled for clean up over the next five years. Critical to an ongoing city effort to reuse brownfield sites is the availability of trained employees for contractors. Also needed are employees trained in green technology. In response to these needs Canton has partnered with other organizations to plan and implement an environmental job training program. Other partners include Stark State College, Building Healthy Communities, a community based organization. The Employment Source: Goodwill Industries, Canton City Schools, local contractors and union officials. The curriculum is already developed and the training will be at Stark State College. This project will train 100 students with each student receiving 161 contact hours. Classes will be scheduled to facilitate participation by students who are either unemployed or underemployed. Due to lightning demands and continuing availability I have been unemployed from my current occupation. With the demands of working, my education and training has suffered. In order to obtain another job in my current field of technology, my education and training need to be brought current. I am in Ohio I request the following. 2 years of education from an accredited college. - 50k per year 3 training classes of electronic instrumenting from a certified training provider - 30k Certification assessment exams - 1k | Department of Development | 100 | 31 to 90 days | \$450,000 |
| Stark | Operation Bolster | I would prefer to keep my family business and home in Ohio, rather than move out of state. General Information: Business Name: Maximus Enterprises, LLC dba GreenTec 2371 Chestnut Hill St., N.W., N. Canton, OH 44720 330-494-3302 Fax: 330-494-8624 Email: m_gallen@yahoo.com | DiSpina Consulting | 2 | 0 to 30 days | \$175,000 |
| Stark | GreenTec | Principals: Michael Gatten, Esq. Richard Gattuso - Unitek Brian Boyle - Stark Summit Plumbing Brad Ciolek - Ciolek Electric Michael Miller - Horn Engineering Dennis DeWalt - DeWalt Industries, LLC Edward Wilhelm - Quality Control and Fabrication Christopher Wepp - Sales & Marketing Nature of Business: 1. Organization Structure: The company has applied to the State of Ohio for Economic Stimulus funds for the purpose of commercial building renovation. Consulting and contracting to incorporate wind turbines, LED lighting, geothermal HVAC (heating, venting and cooling) and solar panels will be undertaken. All documentation and legal advice re tax incentives and government grants will also be supplied to the purchasers. | GreenTec a division of Maximus Enterprises, LLC | 40 | 91 to 180 days | \$1,000,000 |

| Stark | Stark Social Workers Network Building Expansi | Funding is needed to add 3 rooms that will be used to house the family services component of Stark Social Workers Network. Currently we have 1 large multi-purpose room. Four days a week this room is utilized for our reentry program, Center-based After-school program, Classroom group meetings and 2 recovery support group meetings. With all programs offered at 8:30 AM we believe that parent/caregivers and family involvement is critical in lifestyle changes that are often needed by our families. This funding will allow us to add a second multi-purpose room that will be family friendly, the other two spaces will be used as office and a room suitable for counseling or other intervention activities. The outcomes will be immediate as more activities can be planned and executed in our building. The added benefit to this that will be construction that will not only needed construction workers but also workers to decrease the inside space. | Stark Social Workers Network | 15 | 31 to 90 days | \$150,000 |
| Stark | Stark Network Reentry Initiative | 25 ex-offenders will receive stipends to be enrolled and complete training for jobs in house remodeling, cosmetic house repair, community landscaping and landscaping in addition to job training. We will continue education, engaging in building trades will also be supported this work will be used to transport tools and material to various jobtraining sites. Female ex-offenders will have access to housing which is a basic but primary obstacle in women with criminal backgrounds and no children in their custody, the expected outcomes is that all successful participants will obtain and maintain employment that earns them a living wage. Another outcome will be that 75% of participants will remain crime-free for at least 120 days and more. | Stark Social Workers Network | 25 | 0 to 30 days | \$114,000 |

| Stark | Local Drug Enforcement Program | Due to a recent increase in drug-related crime and heroin overdose deaths, the Canal Fulton Police Department has increased narcotics enforcement efforts in an attempt to maintain a safe and secure environment for our residents and businesses. However due to competing demands on limited resources across City departments and a severely limited budget, our agency has not been able to keep up with both routine narcotics prevention operations within the same time remaining focused on drug enforcement efforts. A large part of our problem stems from geographical proximity to larger metropolitan areas such as Akron, Canton and Massillon. These communities possess the law enforcement capacity to deal with narcotics-related crime and associated problems. As a result, drug dealers, Metropolitan-area law operators and drug abusers frequently choose to conduct business in our City as opposed to remaining under the scrutiny of a larger law enforcement jurisdiction. Specific assistance needed includes narcotics enforcement equipment/training, community outreach teams and modest facility improvements to improve evidence storage and security. These items have not been funded in our budget. | Canal Fulton Police Department | 1 | 31 to 90 days | \$30,000 |
| Stark | Academic & Physical Excellence Academy Project | Smith Elementary School was built in 1964 and is the proposed site for an Academic and Physical Excellence Academy, a new school of choice that will use emerging research about the link between physical fitness and academic achievement to enhance student learning opportunities. The proposed school (38,844 sq. ft.) proposed school is located in Canton. The building has no HVAC system, and outdated lighting, electrical, seismic and plumbing systems. The District proposes to modernize and renovate the facility, providing improved security and the safety systems, handicapped accessibility, energy-efficient lighting and HVAC systems, modern electrical and teledata systems, as well as structural improvements to the ceilings, walls and flooring. | Canton City School District | 50 | 91 to 180 days | \$4,000,000 |
| Stark | Dueber Elementary School Modernization Project | Dueber Elementary School was built in 1954 and serves approximately 300 students in Canton. The building has no HVAC system, outdated lighting, electrical, seismic and plumbing systems. Because of the small size of the facility (38,325 sq. ft.), two classrooms have been added to the building to provide more classroom space. The District proposes to modernize and renovate the facility, providing improved security and the safety systems, handicapped accessibility, energy-efficient lighting and HVAC systems, modern electrical and teledata systems, as well as structural improvements to the ceilings, walls and flooring. | Canton City School District | 50 | 31 to 90 days | \$3,400,000 |
| Stark | Mason Elementary School Modernization Project | Mason Elementary School was built in 1952 and serves approximately 240 students in Canton. The building has no HVAC system, outdated lighting, electrical, seismic and plumbing systems, and has only two restrooms to serve the entire school population. Because of the small size of the facility (25,614 sq. ft.), two classroom trailers have been added to the building to provide more classroom space. The District proposes to modernize and renovate the facility, providing improved security and the safety systems, handicapped accessibility, energy-efficient lighting and HVAC systems, modern electrical and teledata systems, as well as structural improvements to ceilings, walls and flooring. | Canton City School District | 50 | 31 to 90 days | \$3,000,000 |
| Stark | JLSD Structured Cabling Improvement Project | In order to achieve our technology goals of providing a smartboard, projector, gigabit desktop and wireless connectivity in each classroom, we will need to upgrade our network infrastructure and electrical wiring to support the technology. Wiring in 4 of our buildings is in accordance with grant specifications available in the 90's supporting only 4 devices in each classroom. Upgrades are necessary to support the current technology needs of the district and to achieve our curricular goals of supporting 8 devices per classroom. Improvements to the other 2 buildings will facilitate the installation of multimedia capable projectors and smartboards. This project will support the employment of Ohio based electrical and general construction contractors. We also expect this project to help maintain current staffing levels within the district. | Jackson Local School District | 20 | 31 to 90 days | \$750,000 |
| Stark | Green at Your Library Initiative | Install solar panels to offset the cost of operating the Massillon Public Library. The Massillon Public Library was constructed as an expansion to the 1850s home of James Duncan, Massillon's founder, in 1937. Because of the building's age it is not very energy efficient. The Massillon Public Library has been replacing windows, trying to offset the energy used. However, with the installation of solar panels, more money will be made up for Children's, Young Adult and Adult Programming, books, music and movies for patrons. | Massillon Public Library | 20 | 91 to 180 days | \$200,000 |
| Stark | Massillon Public Library Expansion | A project to renovate and expand the main location of the Massillon Public Library, the architectural gem of the city. A WPA project in 1936 reconstructed an addition to the 1850s home of Massillon founder, James Duncan, to create the city's new public library. With the exception of a 746 square foot space added in the 1920's no building expansion has been undertaken. This renovation and expansion would enlarge spaces for Young Adult collections and programming; adult fiction and audiovisual collections; local history collection and museum; reading room; reproduction of a public meeting room; adult program space; quiet private study areas; reconfiguration of the rotunda to accommodate self-service check-out and check-in stations; additional or enlarged public restrooms; a drive-through window for on-the-go library patrons; restoration of interior dome and original exterior light fixtures. Design will be "green" in all ways possible. Please consider requests for the following: Summitville Park Restroom basketball courts \$9,000 and replace old playground \$140,000, installation 1,000 with three engineered surface & border, Canal Park Restroom basketball courts & stripes \$8,000, new swing set \$3,500, installation \$1,500, Perry Park swing set \$2,800 & install, Meredith Park Pavilion \$15,000, Lynch Park Playground equipment \$35,000, install \$6,500, with three engineered surface & border, new swing set for small children \$2,800, installation \$1,000. All of the above stated equipment would be replaced with new equipment. We struggle with budgets to provide the basic necessities for the township, but we establish more green space outdoors. We have full plans in detail, and are ready to implement this program as soon as funding is available. Our mission is to "Lead our community to improved health" and this project will further our mission for residents for generations. Additional funding is necessary to achieve these major improvements and accomplish the goals. We appreciate your consideration and welcome questions. Partial funding would be accepted if needed. | Massillon Public Library | 25 | 31 to 90 days | \$2,000,000 |
| Stark | Perry Township Parks Recreation | Install \$1,500, Perry Park swing set \$2,800 & install, Meredith Park Pavilion \$15,000, Lynch Park Playground equipment \$35,000, install \$6,500, with three engineered surface & border, new swing set for small children \$2,800, installation \$1,000. All of the above stated equipment would be replaced with new equipment. We struggle with budgets to provide the basic necessities for the township, but we establish more green space outdoors. We have full plans in detail, and are ready to implement this program as soon as funding is available. Our mission is to "Lead our community to improved health" and this project will further our mission for residents for generations. Additional funding is necessary to achieve these major improvements and accomplish the goals. We appreciate your consideration and welcome questions. Partial funding would be accepted if needed. | Perry Township Board of Trustees | 2 | 0 to 30 days | \$100,200 |
| Stark | Vehicle Efficiency Program | This request is to purchase a GEM car for the Aultman Hospital security services department. The purchase of this environmentally friendly vehicle will reduce the fuel costs and maintenance needed to secure the campus during daytime hours. This electric mini-car will replace operating one traditional vehicle, reducing emissions. We have a full plan with vehicle quotes. | Aultman Health Foundation | 1 | 0 to 30 days | \$11,000 |
| Stark | Patient Transportation and vehicle efficiency proj | This project will purchase two vehicles, at least one having a wheelchair ramp, that will serve community members that need assistance with traveling to healthcare visits. Aultman Hospital, Stark County's largest community hospital, currently has vehicles that provide transportation for community members who are elderly, disabled, or face other factors that place them at risk for missing needed hospital appointments. Unfortunately, these vehicles are nearing the end of their useful lives, and are in need of replacement. Compounding the problem is the increasing need for transportation by the community. One example is our dialysis center, which sees patients several times each week. Patients who miss dialysis appointments due to lack of transportation face immediate risks to their health. Because this service is free and offered to those in need who cannot access or afford alternative transportation, continued funding is needed to continue these services to the community. Aultman Hospital and facilities are in the bottom quartile for energy efficiency compared to U.S. acute care hospitals. This project will reduce energy intensity by at least 15% and save \$1 million kilowatt hours per year which equals a "greenhouse gas" reduction of 8,000 tons of CO2 per year (the equivalent of 47,000 gallons of gas per year of cost). We will upgrade all HVAC controls, establish a central utility command center, improve air handlers and water chillers, and retrofit lighting systems for more energy efficiency. We will implement a water conservation project, which will replace inefficient toilets and modify other water systems including moving boiler water levels. We are expanding our energy programs, and will establish more green space outdoors. We have full plans in detail, and are ready to implement this program as soon as funding is available. Our mission is to "Lead our community to improved health" and this project will further our mission for residents for generations. Additional funding is necessary to achieve these major improvements and accomplish the goals. We appreciate your consideration and welcome questions. Partial funding would be accepted if needed. | Aultman Health Foundation | 2 | 0 to 30 days | \$50,000 |
| Stark | Hospital Energy and Environmental Improvement | Aultman Hospital and facilities are in the bottom quartile for energy efficiency compared to U.S. acute care hospitals. This project will reduce energy intensity by at least 15% and save \$1 million kilowatt hours per year which equals a "greenhouse gas" reduction of 8,000 tons of CO2 per year (the equivalent of 47,000 gallons of gas per year of cost). We will upgrade all HVAC controls, establish a central utility command center, improve air handlers and water chillers, and retrofit lighting systems for more energy efficiency. We will implement a water conservation project, which will replace inefficient toilets and modify other water systems including moving boiler water levels. We are expanding our energy programs, and will establish more green space outdoors. We have full plans in detail, and are ready to implement this program as soon as funding is available. Our mission is to "Lead our community to improved health" and this project will further our mission for residents for generations. Additional funding is necessary to achieve these major improvements and accomplish the goals. We appreciate your consideration and welcome questions. Partial funding would be accepted if needed. | Aultman Health Foundation | 3 | 0 to 30 days | \$6,011,840 |
| Stark | North Lawrence Ohio Sewer Project | Stark County Ohio Health Dept has reported possibly approx 100 failed septic tanks and contamination in North Lawrence, Ohio area. The conditions are quickly becoming unsanitary due to untreated sewage flowing to ditches and along other in the air. The project would include construction of a 50,000 gallon package plant and pump station and the acquisition of the land to build upon. This site plan could service 150-175 homes. An alternate plan to connect to current West Massillon, Ohio town sewer line has also been proposed by Stark County Metropolitan Sewer District. The outcome would be to provide a section of Lawrence Twp with updated sewage treatment and a safer environment for others in and around the community with safe future growth. | Lawrence Township, Stark County, Ohio | 30 | 91 to 180 days | \$2,500,000 |
| Stark | Milhaven Avenue Elevation Project | Road shoulder Milhaven Avenue pavement 3' that for approx 500 linear feet to prevent flooding. Flooding of 1000s have been reported from existing street. Also presents emergency service vehicles from providing service during flooding creating very dangerous situations. Residents are without Fire, EMT and police protection until flooding level decreases. Outcome would be to provide wet out from residential neighborhoods and entry of flooding eliminating extremely dangerous, potentially life-or-death situations. | Lawrence Township, Stark County, Ohio | 25 | 91 to 180 days | \$1,000,000 |
| Stark | Energy Efficiency Education Program for K-12 School | This project will allow non-profit Ohio Energy Project to assist Ohio K-12 school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as EB 204 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make our environment a cleaner, safer place to live today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$187,500 |
| Stark | Energy Audits & Energy Efficiency Education for K- | This project will allow non-profit Ohio Energy Project to assist Ohio K-12 school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as EB 204 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make our environment a cleaner, safer place to live today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$187,500 |
| Stark | Plant A Tree for The Environment | Planting tree will emit oxygen in the air and eliminate green house gases, prevent soil erosion, soak up the extra water of trees. | Eye, I Watch Neighborhood Association | 8 | 31 to 90 days | \$500,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Stark | Stark County Anti-gang Initiative | 1. Increase communication between police and prosecutors, increase communication between residents and law enforcement and enhance prosecution of gang-related offenses. 2. Enhance asset forfeiture of gang property, reduce recidivism of gang members and reduce incidence of gang affiliation. | Stark County Prosecutor's Office | 3 | 0 to 30 days | \$303,000.00 |
| Stark | Crime Prevention Specialist | I became apparent that what was needed was a person solely dedicated to coordinating community activities related to crime prevention in three specific ways: 1) identifying gang and high violent crime target areas and populations through crime analysis; 2) working in collaboration with other organizations to address the current problems and concerns; and, 3) taking a proactive role in instilling community outreach programs pertinent to these issues. No one individual or agency could be identified to take on this challenge, so the Stark County Prosecutor's Office applied for and received a 2008 JAG Grant. A Certified Crime Prevention Specialist was hired to be the full-time Crime Prevention Coordinator and a part-time Crime Prevention Assistant hired for volunteer recruitment and training. These two, known as the "Project Staff," are housed in the Victim/Witness Crime Prevention Division of the Prosecutor's Office and supervised by the Director. Due to budget cuts, these dollars would be used to maintain the Crime Prevention Assistant and release the individual to Full Time. | Stark County Prosecutor's Office | 2 | 0 to 30 days | \$40,832.18 |
| Stark | Stark County Ant-Gang Initiative | 1. Increase communication between police and prosecutors, increase communication between residents and law enforcement and enhance prosecution of gang-related offenses. 2. Enhance asset forfeiture of gang property, reduce recidivism of gang members and reduce incidence of gang affiliation. | Stark County Prosecutor's Office | 3 | 0 to 30 days | \$303,000.00 |
| Stark | BYRNE GRANT 488469 | THESE FUNDS WILL BE USED TO PURCHASE NEW EQUIPMENT TO ASSIST WITH LAW ENFORCEMENT FUNCTIONS. FUNDS WILL ALSO BE USED TO ENFORCE LAWS IN HIGH CRIME AREAS | CITY OF CANTON OHIO POLICE | 50 | 31 to 90 days | \$488,697.00 |
| Stark | Prosecution Enhancement Domestic Violence Prosecut | Full time Domestic Violence Prosecutor: (1) prosecutor devoted solely to effectively assisting the victims of domestic violence both by holding the offenders accountable with successful prosecutions and to guide and assist the victim throughout the criminal process. Each year there are approximately 300 cases of domestic violence filed in our municipal court's jurisdiction. We serve (B) separate police jurisdictions from city to suburban neighborhoods, and also very rural areas. This diverse group of victims we see within our court throughout the year, need the support and services of a full-time dedicated Domestic Violence Prosecutor. It is well established that a prosecutor handling every domestic violence case on a day-to-day basis gives the Massillon Law Department a distinct advantage in dealing with victims and batterers. 100,000 light automobile alternatives recycling facility with aluminum smelting and reclaiming equipment, collecting old automotive scope aluminum and recycling it for new uses in today's markets. | Massillon Law Department | 1 | 0 to 30 days | \$60,000.00 |
| Stark | Aluminum Recycling | 100,000 light automobile alternatives recycling facility with aluminum smelting and reclaiming equipment, collecting old automotive scope aluminum and recycling it for new uses in today's markets. | GNW Aluminum Inc. | 65 | 0 to 30 days | \$1,500,000.00 |
| Stark | Employment Retention | Job Placement & Retention skills and programs for up to 350 adult convicted felons sentenced by Courts of Common Pleas from Holmes, Stark & Tuscarawas Counties. Goal is to have a 50% job retention rate, i.e. employed upon release from the correctional facility. | Stark Regional Community Correction Center | 120 | 0 to 30 days | \$120,000.00 |
| Stark | Police department upgrades | Our police department is just what we need but we are looking in funding just the equipment side. We don't have much revenue but we definitely do the best we can. We are hoping to purchase with the said money - 1. A new police vehicle (fully equipped) 2. Ballistic vests for all of the employees 3. Updated radios 4. Computers for our report writing system 5. General updated equipment such as flashlights, medical boxes, vehicle warning lights etc. | Wilmot Police Department | 7 | 0 to 30 days | \$30,000.00 |
| Stark | ADDITION & IMPROVEMENT TO COMMUNITY TREATMENT & COR | Any and all help is greatly appreciated. ... PRIVATE NON PROFIT 501C3 ORGANIZATION THAT OPERATES A HALFWAY HOUSE FOR ADULT MALES FOR OVER 35 YEARS. THE AGENCY IS CURRENTLY FUNDED BY THE OHIO DEPT OF REHABILITATION AND CORRECTION AND IS CERTIFIED BY THE AMERICAN CORRECTIONS ASSOCIATION. FUNDING FOR THIS PROJECT IS NECESSARY IN ORDER TO REMAIN IN PROVIDING THESE SERVICES AND BUSINESS. OUR CURRENT LOCATION IS NOT ADEQUATE FOR THE PROGRAM NEEDS AND THE CURRENT OWNERS PLAN TO CLOSE THE FACILITY THIS PROJECT WILL INCREASE THE AMOUNT OF RESIDENTS WE CAN SERVE IN OUR COMMUNITY AND WILL MAINTAIN THE EMPLOYMENT OF MORE THAN 25 STAFF WITH THE ABILITY TO EMPLOY MORE THE ARCHITECT ESTIMATES THE CONSTRUCTION OF THESE IMPROVED AND NEW FACILITY WILL PROVIDE EMPLOYMENT FOR AT LEAST 22 CONSTRUCTION JOBS NOT COUNTING SUPPLIERS. THE STATE OF OHIO PROVIDED SOME OF THE FUNDS FOR THE ARCHITECTURAL DRAWINGS. CTCDC IS PROVIDING AT LEAST 30% OF THE TOTAL PROJECT COST. YOUR ASSISTANCE IS VITAL TO THIS PROJECT IN SAVING THE 26 EXISTING JOBS & CREATING THE NEW JOBS. THE Aultman College of Nursing and Health Sciences is experiencing an exciting time of growth and expansion. As a health-system-affiliated College, we are able to give students hands-on experience at Aultman Hospital starting their second week in the nursing program. The experience combined with our curriculum makes our graduates more valuable in their field and are employed quickly after graduation. This benefit extends to the patients who will be cared for by our highly trained, competent and compassionate nurses. Currently we partner with Walsh University to offer general education classes, including English and science. We plan to transition these classes to the Aultman College campus by 2013 in order to grow and offer additional benefits to students. This transition will create a more unified college culture, will be more convenient for students, will allow Aultman College to offer more programs and will make the education more cost effective. To achieve this transition, we must build science labs out of existing building shell space. We are completely shored ready with existing plans and equipment lists. All that lacks is a substantial funding. Aultman College is a fully accredited health-system-affiliated institution of higher learning committed to meeting the needs of nursing students by providing a coherent general and professional educational experience to prepare individuals for service and leadership roles. The Learning Resources Center will be a place where academically at-risk students, and those who occasionally need assistance, can get help to achieve success in the classroom. The Center will offer academic advising, tutoring, writing and project help, test and study skills, time management, supplemental learning materials, special accommodations, resume writing and interview help. Our recent Higher Learning Commission review states that Aultman College has "a stellar reputation of producing outstanding nursing practitioners," but also discouraged the center to help students in the future. The majority of Aultman College enrollees are non-traditional students from 14 counties across Ohio, with 81% qualifying for financial aid. The Center will enable more disadvantaged and diverse students to achieve success. This project will particularly benefit at-risk and first generation college students. The Aultman College of Nursing and Health Sciences has more than 100 years of experience educating health care providers to give competent and compassionate care to patients. To provide more students with exceptional education, Aultman College would like to begin a distance learning program using an online learning management system. This system will allow Aultman College to make education more accessible and affordable to students, especially those from rural areas. | COMMUNITY TREATMENT & CORRECTION CENTER | 47 | 31 to 90 days | \$425,500.00 |

| Stark | Putting convicted felons back into the workforce | Felon Force is a program that will reintroduce these people back into the workforce... help them gain employment and get them off of government or state assistance programs such as welfare, food stamps and medical. Felon Force is a program that I want to see put in with The Employment Source or The Ohio Department of Jobs and Family Services... Don't fool yourself... contrary to popular belief there is NO help out there for convicted felons... I know... I am a convicted felon and I have been there... there is nobody out there that cares one bit to help these folks find a good paying meaningful job... A couple Judges in the Stark County area have "programs" to help but they are a joke... Most of the work created through the Recovery Act is down and dirty, sweat and hard work shovel ready jobs... Felons will be the hiring agent... I want Felon Force to be there... This project would restore and retain 1.6 jobs and would reduce PM 2.5 and NOx emissions in the non-attainment county/cities of Stark by re-powering Tier 0 and Tier 1 Caterpillar construction equipment with certified Tier 3 engines. In total, this project would remove 5.9 tons of PM 2.5 and 101.1 tons of NOx in a five year period. | Felon Force | 500 | 0 to 30 days | \$150,000.00 |
| Stark | MIXED FLEET | Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$135,361 and the average per ton of NOx removed from our air will be \$7,915. This work will begin within one week of funding. | OHIO CAT | 1.6 | 0 to 30 days | \$600,000.00 |
| Stark | 21st Century Technology | The Louisville school district would like to up-date every classroom in the district with 21st century learning technology. We currently budget to staff 25 classrooms per year, but still a small fraction of students are reached each year. The stimulus money would enable us to add interactive teaching technology to the remaining 75 classrooms. Important note: Even if current funding levels remain stable, I would like the district at least 15 years to completely outfit our current classrooms. This year's class of preschooler will be in their second year of college before we are able to provide every student with a 21st century education. Preparing our students for the 21st century will benefit Ohio both as a position of leadership in the nation. A prepared workforce will enhance business and commercial development across the state and lead to an enhanced economic prospect for all the citizens. | Louisville City Schools | 100,000 | 0 to 30 days | 500,000 |
| Stark | Trail Paving Project | This project will allow for the asphalt paving of a section of the countywide trail system currently under construction in the Canton Park System. The trail is now being constructed with a gravel surface. The asphalt paving of approximately 8000 linear feet of this trail will allow those who wish to roller blade, roller skate, or skate board to do so on this paved section of the new trail. This paving project will have the added advantage of giving a few areas of the new trail that require no during rain events. | Canton Park System | 8 | 181 days or more | 195,000 |
| Stark | Prosecution Stimulus Project | This project will enhance and support prosecution of property and violent crime and impaired driving offenses. The purpose of the grant request is to retain one (1) attorney position and two (2) legal intern positions, retain one (1) administrative support position, create (1) administrative support position, create (1) attorney position, and create (1) legal intern position. A decrease in the city budget will result in decreased hours and/or layoffs for those currently employed in the Massillon Municipal Court increased from 12,709 in 2007 to 11,406 in 2008. The total number of impaired Driving cases increased from 865 in 2007 to 1,072 in 2008. Current economic conditions have caused an increase in crimes such as theft and traffic offenses which the offender has no insurance. These cases often include victims and require extensive contact with our office in order to comply with victims of crime statutes. This funding will allow us to effectively prosecute offenders and provide strong victim support. Our project goals are to fast-track the prosecution of all crimes with victims, increase conviction rates, and provide community education. | MASSILLON LAW DEPARTMENT | 7 | 0 to 30 days | 211,500 |
| Stark | Gang Interventionist | This project provides a gang interventionist to work with high-risk young people in a high-crime area of Canton, Ohio, in order that they can avoid the temptations to join a gang or participate in the gang lifestyle. This position provides mentor-type services as well as case management activities to assist the young people and their families to better their situation and help the youth avoid involvement with the criminal justice system. This position is currently only half-time and funding will run out this year. We hope to continue this position and staff it at a full-time position. This intervention service will be intensive and will collaborate with the area schools, recreation centers, and agency service providers. | Stark County TASC, Inc. | 1 | 0 to 30 days | 85,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Stark | Sexual Assault Prevention & Education | Provide sexual assault prevention and educational presentation to 6,000 youth residing in Stark County from July 31, 2009 through December 31, 2010. Expected outcome is to reduce the number of sexually violent acts among youth by increasing knowledge defining sexual violence and acts to recognize signs and implement action to prevent sexual violence from occurring. The expected outcomes will be measured through pre and post tests and self reported incidences of youth violence during the reporting period. | American Red Cross Rape Crisis Services | 1 | 0 to 30 days | \$5,328.85 |
| Stark | 1320 | Restoration and modernization of President William McKinley High Secondary School. Built in 1955 by Russell Chubb and headquartered the Front Porch Campaign of 1896. Historic preservation of a rare Second Neo-Classical architectural example published in "Historic Architecture in Canton 1895-1940" by M.J. Albano to be an Art Gallery, education and Art recovery research center to employ the full time employees after renovations. Funds will purchase local materials and hire 28 local craftsmen, HVAC, plumbing trades people and install Internet and server setup from Stark County companies. This will be an immediate job creator with a full time resident and an important historic preservation for future generations. | 1320 Studio Corp | 33 | 0 to 30 days | \$75,000.00 |
| Summit | Green Life Ohio | Organization will provide grassroots education about sustainable lifestyle choices and local companies that engage in sustainable business practices. Green Life Ohio will engage the community by maintaining a vital social network, producing informative video content about local businesses that are working to employ a sustainable business model, and sponsoring community outreach events that will engage and expand community support of sustainable lifestyle choices. | Blueplanetgreenlife.org | 3 | 0 to 30 days | \$100,000 |
| Summit | BARBERTON WASTEWATER TREATMENT PLANT IMPROVEMENTS | Plans have been completed for the city wastewater treatment plant to rehabilitate a deteriorated infrastructure that is 20 years old to bring it up to current standards. The water quality of the Tuscarawas River will be improved with the | City of Barberton - Utilities Department | 50 | 31 to 90 days | \$2,650,000 |
| Summit | Data Center | This project would create a 20,630 sf stand alone "core" data center located on the east side of the existing Akron City Hospital campus immediately to the south of the 23KV Substation. The lower level (8,800 sf) would accommodate the infrastructure program requirements (generators, cooling equipment, and power management) and the upper level would (11,830 sf) would accommodate the Data Center and Support Space program requirements. This data center will be able to accommodate the consolidation of all Summa Health System entity data centers into one location. BENEFITS Not only will this project create new construction jobs in the City of Akron, it will improve the operational uptime of the critical systems (both patient care and administrative) that support Summa | Summa Health System | 55 | 0 to 30 days | \$19,400,000 |
| Summit | SUMMIT ROAD 24" WATERLINE | Planned Project to replace the 70 year old main waterline from water treatment plant to the city proper. This line has had several breaks in the last five years, including one that resulted in severe flooding of a neighborhood. Plans are 50% complete and have been submitted for EPA approval. Engineers Estimated Project Cost is \$2.1 million. Ohio Public Works Funding 50 % Loan for \$1,044,000. Project is planned to bid within 90 days. | City of Barberton - Utilities Department | 30 | 31 to 90 days | \$2,100,000 |
| Summit | FIRE ENGINE (REPLACEMENT) | The Fire Engine to be replaced is a 1989 model and at the end of its useful life cycle with out enough horsepower and a lot of the type that no longer serves our community well as it has a portable Dump Tank used in water shuttles for residential hydrants. We are hoping to get a new one through the state bid process. | City of Twinsburg | 10 | 31 to 90 days | \$500,000 |
| Summit | RESCUE SQUAD: REPLACEMENT | The Rescue Squad is a 1998 model and is 4 years past its expected life cycle. It also a heavy-duty unit and we are desiring to a medium duty unit and hope to obtain one through the state bid. | City of Twinsburg | 10 | 31 to 90 days | \$210,000 |
| Summit | REGIONAL DISPATCH CENTER | Dialogue has begun between neighboring communities concerning a regional dispatch center. A regional dispatch center has many advantages: resource sharing and prioritization, cost sharing, and updating facilities to the latest technologies. The proposed center would contain 10 dispatch positions, training rooms, and administrative offices. Although multi jurisdictional agreements would need to be worked out many communities are showing initial interest. A funding mechanism to construct the facility would provide the stimulus needed to make this joint venture a reality. The non - building costs such as dispatch consoles, 911 equipment, connectivity, ect could run as much as \$2.5 million dollars. The building would need to be designed as a "hardened" building to provide ensure that services remained uninterrupted. Timeline: 2009 Agreements and Hire Consultant Spring 2011 Construction | City of Twinsburg | 80 | 181 days or more | \$4,000,000 |
| Summit | ENERGY EFFICIENCY - SOLAR PANELS | Johnson Controls was hired by the City of Twinsburg in 2008 to perform a study to evaluate City operations and ways to become more energy efficient. Although the study is not in final form some preliminary recommendations have been proposed. The use of Solar panels to heat existing indoor and outdoor pools would provide savings in energy use and provide a Green Alternative to energy use. | City of Twinsburg | 10 | 0 to 30 days | \$50,000 |
| Summit | New Project Management and Electronic Medical Reco | System hospitals. Our vision is that SPI will have a common, standardized Electronic Medical Record and Practice Management system to allow it to operate as an independent multi-specialty group with robust information exchange to other Summa entities including SummaCare and the hospitals. By having a single EMR, we can move the physicians to common clinical behaviors, phased by specialty. SPI will also be offering MID services, including clinical information and administrative functions to independent physicians. BENEFITS SPI and the Summa Health System want to create a seamless experience for patients and physicians. ? How jobs will be created at Summa Health System as a result of this project ? Summa will be able to produce a combined SPI physician and hospital billing statement ? Access to both hospital and physician clinical data will be possible regardless of location. ? Patients would be able to visit any physician practice within the SPI system and not have to re-register or provide information that had previously ? Ability to move to common clinical behaviors throughout SPI | Summa Health System | 6 | 0 to 30 days | \$15,000,000 |
| Summit | Decision Support Dashboard Enhancements | A core component of the Information Technology Strategic Plan and a cornerstone of the BHS Strategic Plan is the development and deployment of system-wide data repositories. We have made great strides in expanding our BHS Decision Support System to include a rich data set. The primary data set also feeds a variety of reporting systems that are used for day to day operations including such systems as CostFlex. In 2009, the system will be expanded to include data from Cuyahoga Falls, Barberton and Wadsworth. As the Health System grows, the need to have normalized business data from across all entities will only increase. Key users of this data are Quality, Operational Improvement and the Service Sales. This project is aimed at enhancing the database by adding a reporting and analysis layer over the database to improve reporting and distribution of the data by using dashboard technology. | Summa Health System | 1 | 0 to 30 days | \$184,000 |
| Summit | IT Infrastructure Investments | This request is a consolidation of capital and expense projects designed to improve our IT processing environment and expand capacity. These items are pure infrastructure investments and are required to ensure that there is a stable and flexible information processing environment for our organization. Without making investments in the data center related projects, we will "hit the wall" in 2009 and not add any more servers to the data center. BENEFITS • Cost avoidance associated with downtime prevented by installation of new equipment • Cost avoidance or revenue improvement associated with improved speed to delivery by ensuring capacity exists for the installation of new equipment in the data center or having capacity in the network for new services | Summa Health System | 0 | 0 to 30 days | \$2,796,400 |
| Summit | Eclipsys Software/Hardware Upgrade | The current Eclipsys CPDE software requires an upgrade in order to stay current with the software and to provide improved patient safety and functional enhancements. The Eclipsys platform requires both hardware and software upgrades. In addition, the existing CPDE servers will require conversion to work with the upgraded database. The current hardware (which is the original hardware) also must be upgraded. This project also includes costs to replace legacy room hardware and some minor Eclipsys consulting if funding is available. BENEFITS • Improved Electronic Medical Record functionality including medication reconciliation • Cost avoidance associated with downtime prevented by installation of new equipment and staying current with the software | Summa Health System | 0 | 0 to 30 days | \$631,500 |
| Summit | Xcelera Upgrade | The Xcelera system software is obsolete and does not meet regulatory compliance. Consequently, the release of this data to users is now on tape and will need to be on disc effective 1/1/09 to meet accreditation body mandates. Additionally, there is only one reading station so staff have to complete for the single reading station resulting in delays and timely processing for patient records. Upgrade software to current 2.5 release version to become compliant. BENEFITS The staff presently record and read on video tapes. This process is obsolete. Beginning Jan 1, 2009, JCAH, our vascular accreditation, requires that all studies sent for reconstruction must be in digital format. This upgrade will allow us to maintain vascular accreditation. We have no process flow to allow this to occur. In addition, the upgrade will allow all vascular measurements to transfer directly to the reading station decreasing potential human error and allowing the reading physician to see exact measurements obtained. | Summa Health System | 0 | 0 to 30 days | \$58,000 |
| Summit | Cisco Switch replacement CFGH | The Cisco switches are old, outdated and near the end of their useful life span. The switches will only be supported until 2012. Expansion is not possible for the network for CFGH. Most networks are not connected redundantly, so if one of the switches fail, some system will be down at CF until replacement parts come in. | Summa Health System | 0 | 0 to 30 days | \$71,200 |
| Summit | Six Bridge Underwater Assessment Project | Underwater assessment of condition of six county bridges: Front Street on Akron-Cuyahoga Falls Boundary (AKR-059-0275), Both Road in Akron (AKR-048-0815), Ice Road in Cuyahoga Falls (CLY-048-0477), Bolz Road in Cuyahoga Falls (CLY-052-0504), Boston Mills Road in Boston Township (BST-052-0294), and Center Road in New Franklin (PKA-220-0048). | Summit County Engineer | 1 | 31 to 90 days | \$30,000 |
| Summit | Grand Boulevard Roadway and Waterline Improvements | As we have the massive job completed for the Grand Boulevard roadway reconstruction project, we are currently being contacted to see how we can improve the existing waterlines in this area have experienced over 20 breaks in the past 15 years. The roadway and storm sewer portion of the project will improve drainage of eastern steep section of area with curbs and storm sewers. Grand Blvd and adjacent Broadview Ave. will be resurfaced. This project will be in conjunction to drainage improvements for Broadview and Elmwood Avenues and the paving of Elmwood Ave. Waterline plans are 95% complete are being submitted for EPA approval. Engineers estimated Waterline Cost is \$480,000. Project can be bid within 90 days. EPA and Stormwater Plans are 95% complete. Project can be bid within 90 days. Engineers estimated Street & Storm Cost is \$400,000. Ohio Public Works Funding 50 % Loan for \$200,000. Project requires waterline construction funding. | City of Barberton | 0 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Summit | Barberton Municipal Building Repairs | The BARBERTON MUNICIPAL BUILDING, constructed in 1952, requires safety and environmental improvements. These improvements include repair and restoration of stone parapet and facings, roof replacement and the removal and replacement of vinyl asbestos tile in stairwells. Total estimated cost is \$420,000. -Specifications are being prepared. -Estimates have been received from contractors. | City of Barberton | 0 | 31 to 90 days | \$315,000 |
| Summit | Three Bridge Deck Waterproofing Project | Bridge deck waterproofing of three county bridges: Martin Road in Bath Township (BAT-195-0086), Christmas Road in the City of Green (GRT-229-0031) and Hametown Road in Bath Township (BAT-253-1411). | Summit County Engineer | 6 | 31 to 90 days | \$38,000 |
| Summit | Richfield Township Improvement Project | Richfield Township: Renovate a deteriorated township road. | Summit County Engineer | 33 | 31 to 90 days | \$480,000 |
| Summit | County Road Resurfacing Program, Springfield Towns | Arlington Road from Wiener Road to Krumpholtz Road in Coventry and Springfield Townships: Replace deteriorated culverts and resurface deteriorated roadway. Waterloo Road from SR 204 to Putzke Lane road resurfacing deteriorated roadway. | Summit County Engineer | 97 | 31 to 90 days | \$1,436,000 |
| Summit | County Roads Resurfacing Program, Northfield Centre | Highland Road from Olds Eight Road to State Route 8 in Northfield Center Township: Replace deteriorated culverts and resurface deteriorated roadway. Olds Eight Road from Walcott Road to State Route 82 in Northfield Center Township: Replace deteriorated culverts and resurface deteriorated roadway. Slope Stabilization along Valley View Road in Sagamore Hills Township. | Summit County Engineer | 113 | 31 to 90 days | \$1,680,000 |
| Summit | Springfield Township Improvement Project | Springfield Township: Renovate eight deteriorated township roads. | Summit County Engineer | 104 | 31 to 90 days | \$1,545,000 |
| Summit | Brice Ditch Stormwater Detention Project (Springfi | Brice Ditch stormwater detention project in Springfield Township. | Summit County Engineer | 27 | 31 to 90 days | \$400,000 |
| Summit | Rothrock Road Resurfacing/Copley Township | Rothrock Road from Cleveland-Massillon Road to State Route 18 in Copley Township: Replace deteriorated culverts and resurface deteriorated roadway. | Summit County Engineer | 51 | 31 to 90 days | \$750,000 |
| Summit | Copley Township Improvement Project | Copley Township: Renovate deteriorated township roads, replace deteriorated culverts, improve ditches and other drainage facilities to correct drainage and stormwater deficiencies in various locations in Copley Township, repair, reconstruct and resurface deteriorated parking areas serving township police and administration facilities, and construct security improvements to the township cemetery. | Summit County Engineer | 102 | 31 to 90 days | \$1,520,000 |
| Summit | County Wide Traffic Signal Project | Upgrade 32 existing traffic signals with new energy efficient LED traffic signal lamps, interconnecting existing adjacent traffic signals, adding pedestrian push button controls, adding pedestrian traffic signal indications, replace loop detectors with video detection units, provide video detection at locations where none currently exists, add battery back-up units for improved safety during power outages. | Summit County Engineer | 18 | 31 to 90 days | \$1,280,000 |
| Summit | Northfield Center Improvement Project | Northfield Center Township: Resurface deteriorated township roads, and restore drainage facilities to control erosion at various locations in Northfield Center Township. | Summit County Engineer | 48 | 31 to 90 days | \$700,000 |
| Summit | Sagamore Hills Township Improvement Project | Sagamore Hills Township: Renovate three deteriorated township roads. | Summit County Engineer | 41 | 31 to 90 days | \$610,000 |
| Summit | South Main culvert/bridge replacement/resurfacing | South Main Street from Portage Lakes Drive to Althea Avenue in Clatsop County/Coventry Township: Replace deteriorated culverts and bridge over the Portage Lakes feeder and trail, and resurface deteriorated roadway. | Summit County Engineer | 123 | 31 to 90 days | \$1,880,000 |
| Summit | Little Cuyahoga River Restoration | The Little Cuyahoga River is a tributary to the Cuyahoga River. The proposed river restoration is located within the Goodyear Redevelopment/condo which is an \$800 Million public-private partnership to keep the Goodyear World Headquarters in Akron, Ohio. The river restoration will be at the center of the development and will showcase how an urban redevelopment can provide environmental benefits as well as economic benefits. This river restoration will restore a highly channelized river by providing a meandering path for floodplain and protection through a riparian easement. | City of Akron | 12 | 91 to 180 days | \$4,000,000 |
| Summit | Brewster Creek Stream Restoration | Brewster Creek is a tributary of the Tuscarawas River. The proposed improvements include construction of a detention basin to help detain flows from the 2-year storm coming from the former street outlet. Natural channel design techniques will be used to reconstruct the channel to its original floodplain. | City of Akron | 12 | 181 days or more | \$3,500,000 |
| Summit | Coventry Township Improvement Project | Coventry Township: Resurface deteriorated township roads, replace deteriorated culverts and construct storm sewers to correct drainage and stormwater deficiencies in various locations in Coventry Township. | Summit County Engineer | 82 | 31 to 90 days | \$1,210,000 |
| Summit | County Roads Resurfacing Program, Bath Township | Hametown Road from Bath Road to Everett Road in Bath Township: Resurface deteriorated roadway. Via Road from Oak Hill Road to Martin Road in Bath Township: Replace deteriorated culverts and resurface deteriorated roadway. Reverse Road from Bath Road to Everett Road in Bath Township: Replace deteriorated culverts and resurface deteriorated roadway. Yellow Creek Road from Vyne Road to Reverse Road in Bath Township: Replace deteriorated culverts and resurface deteriorated roadway. | Summit County Engineer | 108 | 31 to 90 days | \$1,590,000 |
| Summit | Bath Township Improvement Projects | Bath Township: Reconstruct and resurface deteriorated township roads and construct storm sewers to correct drainage and stormwater deficiencies in various locations in Bath Township. | Summit County Engineer | 350 | 31 to 90 days | \$5,140,000 |
| Summit | Two Bridge Restoration Project | Restoration of exterior coating systems of two county bridges: North Main Street high level bridge on the Akron-Cuyahoga Falls boundary (AKR-338-0098) and Pine Street on Akron-Cuyahoga Falls Boundary (AKR-059-0275). | Summit County Engineer | 32 | 31 to 90 days | \$460,000 |
| Summit | Expansion | Facility Expansion (50%) Production Expansion (35%-to-50%) New Jobs Created (5) All money to be spent in Ohio with other Ohio companies. Guaranteed. We will provide documentation to support our expenditures. | Envoy Consumer Products Corporation | 5 | 31 to 90 days | \$100,000 |
| Summit | 9th St. NE Improvements | 9th St. NE ROADWAY IMPROVEMENTS 9th St. NE is a major north-south roadway on the east side of the city. The proposed project includes roadway reconstruction, curbs and sidewalks along with waterline improvements. A stormwater quantity and quality facility is also being planned for this project. Engineering Plans in progress, estimated completion April 2000. | City of Barberton | 0 | 91 to 180 days | \$450,000 |
| Summit | County Roads Resurfacing Program, Boston Township | Boston Mills Road from 3000 feet west of Riverview Road to Riverview Road in Boston Township: Resurface deteriorated roadway. Boston Mills Road from 3000 feet west of Riverview Road to Riverview Road in Boston Township: Resurface deteriorated roadway. Akron-Perinville Road from Bolivar Road to Travel Road in Boston Township: Replace deteriorated culverts and resurface deteriorated roadway. Riverview Road from Everett Road to Major Road in Boston Township: Replace deteriorated culverts and resurface deteriorated roadway. Black Road from State Route 303 to Boston Mills Road in Boston Township: Replace deteriorated culverts and resurface deteriorated roadway. | Summit County Engineer | 197 | 31 to 90 days | \$2,885,000 |
| Summit | Stormwater Drainage Improvements | A stormwater drainage improvement project is planned for four (4) streets in the city. Existing roadside ditches in three (3) residential neighborhoods are in poor condition and deteriorated shallow culverts under drives restrict or prevent good drainage. Two new school buildings will be built. The third facility will be 87,130 square feet. The grade 7'-0" facility will be 113,641 square feet. Four structures will be abated and demolished. | City of Barberton | 0 | 31 to 90 days | \$145,000 |
| Summit | Manchester Building Program | Manchester Local Schools | 100 | 31 to 90 days | \$13,051,025 | |
| Summit | Installation of Summa's eBusiness Framework | Summa Health System Summa Health System currently has two different hospital patient registration and billing systems in place. There are numerous physician office and ambulatory registration and billing systems in place as well. All of these systems are in need of an upgrade. This project is aimed at streamlining the process to local Summa's System. This project will create a single registration and billing system for all entities. This will streamline the patient experience and create a master patient identity environment for Summa Health System. Success is a critical component of this project. Our public website establishes our brand and corporate message and is viewed by hundreds of thousands of visitors annually. A recent competitive analysis of other hospital systems' websites in our region revealed that www.summahealth.org is in need of modernization. While our brand is well represented our information architecture and usability must be improved. Additionally, our current content management system is outdated and inflexible. We need a tool that allows us to push interfaces out to content owners and the flexibility to make change quickly, securely and efficiently. This project will deliver a content management tool with a user interface that will give us the robust flexibility that we need to create websites that support our corporate goals. | Summa Health System | 2 | 0 to 30 days | \$971,061 |
| Summit | Whitefriar Drive Summit County Sanitary Sewer Ext | Assistance in funding the Summit County Sanitary Sewer to Whitefriar Drive on East Reserve! This infrastructure is a necessity because of the failing septic systems and leaching into our lakes and reservoirs in our Portage Lakes State Park. | Coventry Township | 50 | 181 days or more | \$260,000 |
| Summit | Installation of new Enterprise Revenue Cycle Syste | Summa Health System | 12 | 0 to 30 days | \$11,511,960 | |
| Summit | Summahealth.org Website Redesign and Rebuild | Summa Health System | 2 | 0 to 30 days | \$935,786 | |
| Summit | Clinical Portal for Physicians and other Caregiver | Summa Health System | 2 | 0 to 30 days | \$354,153 | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | Clinical Web Viewer | Plan: The primary objective of this project is to create a system-wide clinical information viewer to be used by Caregivers. Currently, SHS Caregivers do not have a single consolidated view of a patient's clinical records across the enterprise. This is due to the fact that there are multiple patient registration and clinical diagnostic systems within SHS. As Summit more fully establishes the "tertiary hub" concept through initiatives like the Regional Call Center, it will be necessary to have a consolidated patient clinical information view to improve the care process. It will also help in managing care across different venues of care from inpatient, to home care, to nursing homes. This technology will also facilitate the consolidation of data between the Summit and non-Summit providers in the Akron Community. BENEFITS • A new job at Summit will be created • Improvements will be made in streamlining transfers between hospitals • Faster and more comprehensive clinical information available to Caregivers • Improved patient outcomes | Summa Health System | 1 | 0 to 30 days | \$980,500 |
| Summit | Vadose R&D Synthetic Crude Oil & Gas | Synthetic crude oil & gas pilot plant operations on waste materials generated in Ohio necessary to complete the design/build of commercial-scale production module. | Vadose Research & Development LLC | 60 | 0 to 30 days | \$325,000 |
| Summit | Mercury Reduction for Emissions from Coal-Fired Po | For the purpose of recovering mercury and other heavy metals from air emissions from coal-fired power plants and other sources, working with the University of Akron advancing carbon recovered from scrubbing lines and efficacy testing to find the most efficient means of activating the carbon on the highest mercury recovery rates per pound of carbon. | Vadose Research & Development LLC | 60 | 0 to 30 days | \$575,000 |
| Summit | Synthetic Crude Oil & Gas Commercial Production Mo | Complete existing draft design, build, install and begin operation of first of a series of commercial-scale synthetic crude oil and gas production modules each capable of producing 90,000 barrels crude oil plus 30,000,000 cubic feet of natural gas annually. | Vadose Research & Development LLC | 90 | 0 to 30 days | \$975,000 |
| Summit | Dist 4, PID 81149, SUM IR 0271 7.56/09.30 Slope | Subsurface Investigation Of Embankment Slope Failure Along Ir-271, Southeast Of Boston Heights In Summit County. | Ohio Department of Transportation | 68.9 | 31 to 90 days | \$2,400,000 |
| Summit | Curtis Avenue Repair | Due to past sanitary sewer work, the Village must remove and repair a portion of the Curtis Avenue pavement that has settled approximately six inches and is creating a hazard to the traveling public. The Summit County Department of Environmental Services has budgeted \$50,000 to the project because the sewer was installed under the direction. | PHD Associates - Consulting Engineer | 12 | 0 to 30 days | \$204,000 |
| Summit | Rock Creek Restoration Project | Metro Parks, Serving Summit County is in the process of restoring 532 feet of Rock Creek (a tributary to Fumace Run and the greater Cuyahoga River) at Fumace Run Metro Park in Summit County, Northeast Township, Ohio. Quantitative habitat and biological data have been collected to document pre-construction conditions and detailed construction drawings have been completed by Ochoa River and Stream Restoration, Inc. Data and plans have been submitted for agency coordination and Section 404/401 permit applications. Ochoa River and Stream Restoration is under a construction contract. Planned construction for this project is summer 2009. Contact Information: Mike Johnson Chief, Natural Resource Management Metro Parks, Serving Summit County 975 Treaty Line Road Akron, Ohio 44313 330-865-8057 | Metro Parks, Serving Summit County | 9 | 0 to 30 days | \$200,000 |
| Summit | North River Water Line Replacement | Project includes installation of 5,000 feet of 12-inch waterline in North River Road extending east from S.R. 91. Installation of a 12-inch waterline will improve the fire flow from 1,500 gpm to 2,700 gpm. Over 2,845 residents will benefit from the proposed project by improved fire response and fire flow to over 500 homes and 1,345 students/teachers at Kingston Middle School and Riverview Elementary School. | City of Munroe Falls | 25 | 0 to 30 days | \$345,000 |
| Summit | Riverpark Water Line Loop | Installation of 1,135 feet of 12-inch waterline along the bike trail extending east towards Gleniside Drive. The proposed 12-inch waterline will increase fire flow from 550-800 gpm to over 3,000 gpm. Over 2,845 residents will benefit from the project by improved fire response and fire flow to over 500 homes and 1,345 students/teachers at Kingston Middle School and Riverview Elementary School. | City of Munroe Falls | 25 | 0 to 30 days | \$74,532 |
| Summit | 36 Unit Housing Rehabilitation | This highest, residential project has not been occupied in over 3 years. Currently, the structures are in disrepair with broken windows, stopped mechanics. All have been removed of appliances, carpet, and most of the cabinetry. The project is currently boarded up. (Pictures available upon request) Noble Property Management, is seeking to revitalize this housing project by completely remodeling and rehabilitating these homes to "like new" condition. This project would also include updating energy efficiencies with energy rated doors and windows, increasing insulation values, energy efficient furnace equipment and appliances. This project would immediately maintain the employment of three full time persons. This project would also add to construction employees and suppliers that would be necessary to complete this project. | Noble Property Management, LLC | 8 | 0 to 30 days | \$1,800,000 |
| Summit | Hybrid battery cooling ducts | Continue to Design, develop and produce ducting systems used for cooling battery power pack systems in new Hybrid vehicles. The Ducting systems offer noise attenuation, no loss of pressure and fail safe features to protect expensive battery power packs in case of an obstruction to the fresh air inlet. Limited production begins spring 2009 for General Motors. Several higher volume applications for GM & Ford are under development and are scheduled to begin production the last quarter of 2010. Commercialization to other Automotive OEM's, both foreign and domestic is underway. The project requires significant up front design and development resources. Future production requires new molding equipment and auxiliary equipment to support production. | Akron Polymer Products, Inc | 15 | 91 to 180 days | \$300,000 |
| Summit | SR 619/Turkeyfoot Road Intersection Realignment | Project involves the realignment of Turkeyfoot Road westerly to align with Point Comfort Drive creating a conventional 4 leg signalized intersection. The improvement will eliminate two back to back T-intersections and improve traffic progression along the main east-west arterial corridor in the City of New Franklin. Project includes widening and resurfacing of SR 619 and Point Comfort Drive for aprrox 650' and 200', respectively. Turkeyfoot Road will be realigned/reconstructed for approx 800'. All work will occur within existing or donated right of way. Project includes drainage improvements, partial reuse of existing traffic signal and sidewalks thru this heavily utilized pedestrian corridor near the Portage sales system. Environmental studies have been completed and the site is clean (no further studies required). Design services are on-going. Proposed project consist of a new bridge over the Cuyahoga River with pedestrian apron on both sides. In addition, the project provides for minimal widening to three lanes, extension of sidewalks, and the burying of utility lines. | GPD Associates | 15 | 31 to 90 days | \$475,000 |
| Summit | State Route 91 Widening Project | The proposed project will reconfigure retail development and green street edge, establish commercial development, renovate existing retail center and add new commercial retail development. In addition, the widening project will alleviate traffic problems over a set of railroad tracks and the Ave. | City of Munroe Falls | 100 | 181 days or more | \$42,000,000 |
| Summit | Charring Cross Storm Sewer Management Phase I | The proposed project includes 500 ft. of ditch to be graded and 150 ft. of pipeline installed in order to eliminate standing water and restore stream flow grade lines. | City of Munroe Falls | 25 | 0 to 30 days | \$100,000 |
| Summit | Metro Parks, Serving Summit County - Summit County | The proposed project will protect 500 homes and Kimpton Middle School from flooding Metro Parks, Serving Summit County owns and manages over 10,000 acres of natural areas. The mission of the Metro Parks, Serving Summit County is to acquire, conserve, and manage natural resources and to provide the public with safe, outdoor recreation and educational opportunities through a system of regional natural area parks. Metro Parks has completed detailed management plans for all of our parks and natural areas. Metro Parks inventory and analysis methodology depends heavily on protocols developed by the United States Army Corps of Engineers and the Ohio Environmental Protection Agency. To date, we have delineated and evaluated over 1,400 acres of wetlands and open water systems within park holdings (124 acres of open water, 54 acres CATT, 225 acres MDCAT2, 352 acres CATE, 161 acres CATTs). In addition, we have delineated approximately 488,000 linear feet of stream corridor that flows through Metro Park holdings. Our analysis indicates that the water quality of all of these resources are threatened by the presence of invasive species of plants and, in some instances, animal life. The goal of the Summit County Water Quality Rehabilitation Project is to control invasive species of plant and animal life that threaten our water. The City of Macedonia has a Cuyahoga Stormwater Study that has identified several areas where a stormwater detention basin will benefit the community through reduced peak flow, reduced erosion and reduced flooding. The Guadalupe Detention Basin is one of the projects that has been identified as providing such benefits. Downstream communities will also benefit from improved water quality and reduced stream habitat impairment. | Metro Parks, Serving Summit County | 75 | 31 to 90 days | \$4,750,000 |
| Summit | Guadalupe Detention Basin | The City of Macedonia has a Cuyahoga Stormwater Study that has identified several areas where a stormwater detention basin will benefit the community through reduced peak flow, reduced erosion and reduced flooding. The Guadalupe Detention Basin is one of the projects that has been identified as providing such benefits. Downstream communities will also benefit from improved water quality and reduced stream habitat impairment. | GPD Associates - Consulting Engineer | 12 | 31 to 90 days | \$300,000 |
| Summit | Ridgewood & Jacoby Road Roundabout | The Ridgewood Valley Roundabout project is located at the intersection of Ridgewood Road and Jacoby Road in the City of Fairlawn and Cuyahoga Township. The project will include the removal of the existing intersection and replacing it with a roundabout type of intersection. This intersection has a history of being problematic during high traffic times. All Utilities will be connected to existing infrastructure located at the project site. There are no environmental concerns at this site. The Engineering design studies are complete. Construction Plans are drawn and approved. Local matches have been promised and local legislation has been passed. | City of Fairlawn | 20 | 31 to 90 days | \$257,000 |
| Summit | Smith Road Storm Sewer Improvement | This intersection is within one quarter mile of the Fairlawn Corporate Park which has the potential to spur the creation of over one million square feet of research and office space. With the potential of the Fairlawn Corporate Park to increase traffic dramatically, this intersection improvement is necessary. This project will help in the possible creation of over 5000 new technical jobs. The Smith Road Storm Sewer Improvement project is located along Smith Road from Calatonia Avenue to approximately 800 feet east of Revere Road in the City of Fairlawn and Bath Township. The project will include the extension of the existing storm sewer to an existing water course to alleviate flooding problems in the city of Fairlawn and Bath Township. A portion of the water main where a high number of breaks have been reported and some pavement replacement will occur as part of this project. All Utilities will be connected to existing infrastructure located at the project site. There are no environmental concerns at this site. The Engineering design studies are complete. Construction Plans are drawn and approved. Local matches have been promised and local legislation has been passed. | City of Fairlawn | 20 | 31 to 90 days | \$1,175,000 |
| Summit | Dist 4, PID 81149, SUM IR 0271 7.56/09.30 Slope | This project is necessary to help to alleviate flooding problems and thus maintaining home values in the City of Fairlawn and Bath Township which leads to a better tax base. Subsurface Investigation Of Embankment Slope Failure Along Ir-271, Southeast Of Boston Heights In Summit County. | Ohio Department of Transportation | 68.9 | 31 to 90 days | \$2,400,000 |
| Summit | Dist 4, PID 84809, SUM SR 0091 07.90 | Asphalt Deck Overlay, Repair Of Existing Sidewalk And Railing. | Ohio Department of Transportation | 25 | 31 to 90 days | \$350,000 |
| Summit | Seasons Road Sanitary Sewer Line | The Seasons Road sanitary sewer line project is a 8.800 linear feet of sewer line that will provide service to a proposed 252 acre Joint Economic Development Zone in northern Summit County involving the sites of Show, Hudson and Cuyahoga Falls. This sewer line is part of the infrastructure necessary to begin construction in the JEZD. The City of Akron will also be a beneficiary in that Show is currently involved in a tax sharing agreement with Akron. The JEZD will be located around a new interchange with Seasons Road and SR 8. A 100 bed hospital is the anchor for the JEZD. Health care and related medical businesses will be the targeted outcomes for the JEZD. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEZD, and by 2012, the retention and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 825 jobs in the health care and supporting fields are projected to build out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Stow | 6,825 | 31 to 90 days | \$1,100,000 |
| Summit | Seasons Road Water Line | The Seasons Road water line project is a 4,800 linear feet of water line that will provide service to 273 of a proposed 252 acre Joint Economic Development Zone in northern Summit County involving the sites of Show, Hudson and Cuyahoga Falls. This water line is part of the infrastructure necessary to begin construction in the JEZD. The City of Akron will also be a beneficiary in that Show is currently involved in a tax sharing agreement with Akron. The JEZD will be located around a new interchange with Seasons Road and SR 8. A 100 bed hospital is the anchor for the JEZD. Health care and related medical businesses will be the targeted outcomes for the JEZD. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEZD, and by 2012, the retention and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 825 jobs in the health care and supporting fields are projected to build out in the entire JEZD. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Stow | 4,550 | 31 to 90 days | \$647,312 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Summit | Seasons Road Improvements | The Seasons Road Improvement project is the complete upgrade of an existing rural roadway that will provide the primary access to a proposed 252 acre Joint Economic Development Zone in northern Summit County involving the cities of Snow, Hudson and Cuyahoga Falls. This roadway project is part of the infrastructure necessary for development to occur in the JEZD. The City of Akron will also be a beneficiary in that Snow is currently involved in a tax-sharing agreement with Akron. This JEZD will be located around a new interchange with Seasons Road and SR 8. A 100 bed hospital is the anchor for this JEZD. Health care and related medical businesses will be the targeted uses for the JEZD. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEZD, and by 2012, the restoration and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 6,825 jobs in the health care and supporting fields are projected to build out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Snow | 6,825 | 31 to 90 days | \$3,174,000 |
| Summit | Chart Road Phase II | Chart Road is an old township road, approximately eighteen feet (18') wide with one lane of traffic in each direction. It is an unimproved, asphalt pavement in poor condition with minimal shoulders. The lane widths and shoulder widths are substandard. This project will resurface the roadway pavement and ditches to meet current design standards for pavement width, sight distance and drainage capacities. Existing utilities will be relocated as needed due to the construction. | The City of Cuyahoga Falls | 20 | 0 to 30 days | \$1,950,000 |
| Summit | City Building Construction | The City of Twinsburg currently owns several buildings throughout the city that it leases to local community organizations. One of those buildings houses the offices of the PVF and the Twins Days Committee. This building was constructed in the early 1900's and expanded thereafter. The building has fallen into disrepair and is not energy efficient. This project would involve the demolition of the existing building and construction of a new building using new green technologies and materials. This building would be constructed at 10,000 sq. ft. Benefits of Project Construction of this building would: § Allow the City to continue to provide office space to small, local organizations. § Employ green technologies for construction along with green materials. § Provide energy efficient office space for the community. § Provide environmental benefits. | City of Twinsburg | 60 | 181 days or more | \$1,500,000 |
| Summit | Fairlawn Corporate Park | The City of Fairlawn is currently in the process of re-evaluating the need for replacement windows due to age, structural integrity and energy efficiency. It appears that all windows in the Government Center should be replaced. The total number of windows in need of replacement is 72. The standby power generator located at the City's Government Center provides back-up power for a portion of the complex as well as the Police Department's 9-1-1 system. The generator and transfer switch are approximately 32 years old and should be replaced. | City of Fairlawn | 2500 | 31 to 90 days | \$4,788,203 |
| Summit | Government Center Window Replacement | The City of Twinsburg Government Center was built in 1977 and given minor expansion thereafter. The City is currently re-evaluating the need for replacement windows due to age, structural integrity and energy efficiency. It appears that all windows in the Government Center should be replaced. The total number of windows in need of replacement is 72. The standby power generator located at the City's Government Center provides back-up power for a portion of the complex as well as the Police Department's 9-1-1 system. The generator and transfer switch are approximately 32 years old and should be replaced. | City of Twinsburg | 20 | 31 to 90 days | \$40,000 |
| Summit | Stand-by Power Generator | This project would not only replace this unit but would also expand the stand-by power distribution. Due to the fact that the use of computers and other electronic equipment has increased significantly since the 1970's it has become necessary to provide power to all areas of the Government Center. This will allow for use of computers, GIS systems, various electronic equipment and the necessary heating, air conditioning and ventilation systems during normal power outages as well as major emergency events. Benefits of Project Replacement of the stand-by generator and expansion of the power distribution system would: Provide dependable stand-by power service to the City's governmental center. Allow for expanded use of the power to all areas of the complex. Enhance emergency response capabilities. | City of Twinsburg | 20 | 91 to 180 days | \$500,000 |
| Summit | Phase II - Pond Brook Stream Restoration | The River Institute, in association with the Metro Parks, serving Summit County, is in the process of restoring nearly 5-miles of Pond Brook. The main stem of Pond Brook has been degraded and channelized over the years and in this degraded state, is incapable of supporting aquatic life and is in non-attainment of its official use designation (Modified Warmwater Habitat). The goal of the project is to return the stream to more natural morphology and restore water quality to full attainment of Warmwater Habitat (WWH) criteria. Quantitative habitat and biological data have been collected to document pre-construction conditions and detailed construction drawings have been completed by Dabow River and Stream Restoration, Inc. The first phase of the project has already been completed with funding from the Ohio Department of Transportation (Ohio DOT) as mitigation for a nearby stream impact. Funds being sought under this proposal will be devoted to Phase II of the project and will restore nearly 2,000 remaining feet of channelized bank. Planned construction for this project is dependent on funding. This project could potentially begin in fall of 2008. | The River Institute (in association with Metro Park) | 20 | 91 to 180 days | \$2,500,000 |
| Summit | Wind Energy Environmental Compliance Preparation P | Tragus Environmental Consulting, Inc. is a small business, minority owned firm that provides environmental consulting services to a variety of industries. We specialize in working for the energy industry. Our services include various studies to determine the potential impacts of projects to the state and federally endangered Indiana bat. Recently, the State of Ohio has issued new guidelines for evaluating the potential impacts of new wind energy projects on both bird and bat species (The On-Shore Bird and Bat Pre- and Post-construction Monitoring Protocol for Commercial Wind Energy Sites in Ohio). These new guidelines require extensive, and highly specialized, equipment and technology (acoustic monitoring devices, nets, and software). These resources are out of reach for most small business and minority owned firms. Tragus Environmental Consulting Services employs 5-10 people throughout the year. With assistance to purchase these additional resources, we could compete for wind energy projects and potentially grow our company to over 25 people. The Federal Stimulus package is the only means through which we could acquire the equipment and technology needed to maintain and grow our business. | Tragus Environmental Consulting, Inc. | 25 | 31 to 90 days | \$250,000 |
| Summit | Ultraviolet Disinfection | Includes the gas feed equipment, storage facility and non-potable water feed system for creation of the aqueous solution delivery system back back detection system. All plant effluent is treated with the chlorine to a level that allows for destruction of pathogenic organisms during the 200 days allowable by the treatment plant's discharge permit. Following this treatment, a dechlorination chemical is fed to the effluent that strips the remaining chlorine from the treated water. As with the gaseous chlorine the dechlorination chemical requires a storage area as well as a feed system. Additionally, this liquid chemical requires spill containment procedures and equipment. The purpose of this project is to convert the current system from chlorine feed to ultraviolet filtration for the purpose of disinfection. Reconfiguration of the existing tanks would be required to allow installation of the ultraviolet disinfection system. | City of Twinsburg | 15 | 91 to 180 days | \$250,000 |
| Summit | Sewer Vector Replacement | The operators include a sewer Vector and closed circuit T.V. inspection system. The program was established, equipment purchased and operations commenced in 1997. All equipment is now 12 years old and should be replaced. Replacement of the Vector will ensure continued performance of the sanitary sewer cleaning operations. This will ultimately protect personal property from damage due to sanitary sewer back-ups. | City of Twinsburg | 2 | 0 to 30 days | \$250,000 |
| Summit | Purdue Street Drainage Improvements | This project will be along Purdue Street, from Hollywood Avenue to Graham Road, in the City of Cuyahoga Falls, Ohio. This project will rebuild the storm sewers to meet current design standards for drainage capacities. This area experienced severe flooding in 2004 due to the excessive rains and subsaturated storm sewers. The storm sewer on Purdue Street varies from 66 inches to 72 inch diameter corrugated metal pipe. Purdue Street is approximately 26 ft. wide with curbs and sidewalks. | The City of Cuyahoga Falls | 20 | 0 to 30 days | \$1,402,000 |
| Summit | Twinsburg Industrial Park Stormwater Improvements | This project will be along Purdue Street, from Hollywood Avenue to Graham Road, in the City of Cuyahoga Falls, Ohio. This project will rebuild the storm sewers to meet current design standards for drainage capacities. This area experienced severe flooding in 2004 due to the excessive rains and subsaturated storm sewers. The storm sewer on Purdue Street varies from 66 inches to 72 inch diameter corrugated metal pipe. Purdue Street is approximately 26 ft. wide with curbs and sidewalks. The Twinsburg Industrial Park, which sits west of Charter Road (SR 81) and south of Aurora Road (SR 82) was developed in the early 1970's and 1980's. At that time, storm water management requirements were not adequate to deal with the amount of impervious surfaces being constructed. Several large industrial users in this area are now experiencing problems with flooding and erosion, particularly in response to larger frequency storm events. For the last several years, Pepsi Cola's plant site has been affected by flooding. Pepsi is one of the City's largest employers and operates a regional office at that Enterprise Drive address. A lack of storage capacity upstream, and a lack of stream capacity is the cause of this problem. This proposal would provide an area stormwater detention pond on vacant property immediately west of the Pepsi site. A detention pond and control structure will be established with sufficient capacity to eliminate the existing problem. | City of Twinsburg | 20 | 91 to 180 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Summit | Cochran Road Reconstruction | Cochran Road in Cuyahoga Falls, Ohio is currently an old, township style road, approximately 1 mile long, and approximately 18 feet in width. The street is not improved, the pavement is of poor quality, lacking proper drainage. The narrow street is not capable to support industrial development or proper service access. At the present time, several homes, some in poor condition are located on lots fronting the street. The lot sizes are mostly in the 2 to 3 acre range, conducive to industrial/commercial development. Reconstruction of the street shall require design engineering of the facility and construction. The road is planned as a 60 ft. right-of-way facility, heavy-duty pavement, and underground utility construction project. Minor right-of-way purchase shall be required. | The City of Cuyahoga Falls | 500 | 31 to 90 days | \$2,600,000 |
| Summit | Micro Turbines | Upon improvement's completion, the area can be fully utilized as the extension of the abutting Bell Industrial and Wygga Industrial Parks. The new sewage shall provide serviceable industrially zoned land for the creation of approximately 200 service/industrial jobs, assuming a very conservative estimate of 5 jobs per acre. The City's wastewater treatment plant's processes include anaerobic digestion for stabilization of residual solids. During the digestion process methane gas is produced, recirculated through the system as a fuel source and the excess flared at two methane burners. This project would add micro-turbines to this process. These units would utilize the excess gas as a fuel source to turn the turbines which would ultimately produce electricity. This electricity will be used throughout the wastewater treatment plant. This will provide utility cost savings for the City of approximately \$40,000.00 per year. Benefits of Project Addition of the micro-turbines would: Provide a cost savings potential for the City. Utilize excess methane gas produced at the treatment plant. Reduce demand on the electric utility. Provide environmental benefits. | City of Twinsburg | 5 | 91 to 180 days | \$500,000 |
| Summit | Stormwater System Maintenance Program | Necessary to provide for cleaning and inspection of the system, maintenance of the mains and to assure proper flow of water during rain events which protect personal property as well as the city's infrastructure. Inspection of the system following cleaning operations will identify areas in need of repair and/or replacement. These areas will be identified, cataloged, prioritized and placed on a construction schedule. Benefits of Project This project would provide significant benefits to the City by solving the following issues: Cleaning of the storm water collection system to allow for proper flow of rainwater from properties, road surfaces etc. to all discharge points. Protection of properties from flood damage. Protection of infrastructure such as roadways from identification of deficient areas of the collection system so that repairs can be quickly achieved. Project Cost \$300,000 equipment purchase for start up. Cost to operate the program \$200,000 annual service in 1988 making them 21 years old. Inspection and analysis of these units performed in 2007 revealed significant corrosion and component wear. The final recommendation was replacement of all three units. The first of the three units will be replaced in 2009 by in-house maintenance personnel. Due to budget issues, replacement of the remaining two units has been placed on hold. A date for resumption of this replacement process has not been established. Benefits of Project Replacement of the remaining two units will: Provide for pumping of peak hydraulic loads to the treatment plant. All the treatment plant to comply with all EPA regulations. Protection of properties served by the City's wastewater treatment plant. | City of Twinsburg | 4 | 91 to 180 days | \$300,000 |
| Summit | Screw Pump Replacement | The first of the three units will be replaced in 2009 by in-house maintenance personnel. Due to budget issues, replacement of the remaining two units has been placed on hold. A date for resumption of this replacement process has not been established. Benefits of Project Replacement of the remaining two units will: Provide for pumping of peak hydraulic loads to the treatment plant. All the treatment plant to comply with all EPA regulations. Protection of properties served by the City's wastewater treatment plant. | City of Twinsburg | 4 | 0 to 30 days | \$150,000 |
| Summit | Dist 4, PID 81149, SUM IR 0271 7.56/09.30 Slope | Subsurface Investigation Of Embankment Slope Failures Along Ir-271, Southeast Of Boston Heights In Summit County. | Ohio Department of Transportation | 68.9 | 31 to 90 days | \$2,400,000 |
| Summit | Highland Road Extension | This project extends Highland Road east of Darrow Road. While the road is extended only 500 feet, the extension has several benefits. The adjacent property to its south is the site of G.E. Energy, a major Twinsburg employer. G.E.'s current main entry is on Darrow Road, approximately 400' south of the existing Highland Road / Darrow Road intersection, where a traffic light exists. G.E.'s employees and clients find it difficult to enter or exit their site, particularly at peak traffic periods. Left turn movements out of the site are particularly dangerous at peak hours as traffic backs up from the intersection, making visual site distances problematic. The proposed improvement would enable the relocation of the entry to the extended Highland Road section. This has the advantage of providing direct access to a signalized intersection for traffic control. The proposed extension will also improve the development potential of industrially zoned land east of Darrow Road. At least three potential industrial lots could be directly served by this short extension. Access management objectives of the City would also be supported by this extension. Expansion of an existing Twinsburg business, enables a new business to locate in Twinsburg and opens existing industrially zoned property for development by providing access, and improves access to nearby vacant developable land. This proposed extension makes it possible for the owners of Mustang Dynamometer, a growing company located at the end of Pinnacle Parkway, to access adjacent property for future expansion. The company's expansion plans involve not only the expansion of the existing business, but also anticipate the establishment of another related business's manufacturing facilities at this site. Growth of the existing business should add more than 20 employees over the next few years, while the potential for the new manufacturing facility (involved in alternate energy supply chain machinery) has the potential to grow more than 100 jobs in the next few years. | City of Twinsburg | 100 | 0 to 30 days | \$290,000 |
| Summit | Pinnacle Parkway Extension | The City of Twinsburg secured the services of consultants to provide preliminary design and analysis of a system that would provide broadband capacity to all of the industrial areas of the City. While the City is provided broadband service by Time Warner Cable and Weststream, not all industrial areas lie within the fiber network of the existing providers. A pilot study indicated the need for system expansion, for redundancy in the event of system failure, and for cost options, particularly for smaller businesses. Preliminary engineering for a broadband system capable of providing service to a defined area was completed last year. A five-tower canopy broadband system was installed using Wavelength Fiber for the period of placement. The proposed system will enhance existing business access to broadband and provide bandwidth sufficient to accommodate existing and new businesses. This project has been put on hold due to declining income tax revenues. | City of Twinsburg | 150 | 181 days or more | \$850,000 |
| Summit | Broadband System Deployment | The City of Twinsburg secured the services of consultants to provide preliminary design and analysis of a system that would provide broadband capacity to all of the industrial areas of the City. While the City is provided broadband service by Time Warner Cable and Weststream, not all industrial areas lie within the fiber network of the existing providers. A pilot study indicated the need for system expansion, for redundancy in the event of system failure, and for cost options, particularly for smaller businesses. Preliminary engineering for a broadband system capable of providing service to a defined area was completed last year. A five-tower canopy broadband system was installed using Wavelength Fiber for the period of placement. The proposed system will enhance existing business access to broadband and provide bandwidth sufficient to accommodate existing and new businesses. This project has been put on hold due to declining income tax revenues. | City of Twinsburg | 10 | 0 to 30 days | \$500,000 |
| Summit | Kent State University Learning Center Parking/Acce | This proposal would install an elevator at the building's west entry. In addition to accessibility improvements, this request would also increase available parking by adding a 35-car parking lot on the adjacent City-owned property and contract that parking area to be bounded by a walkway. Kent State University has operated a learning center in Twinsburg for the last six years. This learning center now has an enrollment of more than 600 students, including students enrolled in evening programs leading to RN and LPN degrees. This learning center is operated in the City's "Old School", a 1920's vintage three-story brick structure built onto in 1957. This property has ADA accessibility limitations. A chair lift is provided on the main stairway, but when it is operating it interferes with normal stairway use. In addition, site parking is not sufficient to provide for the current level of enrollment. | City of Twinsburg | 40 | 91 to 180 days | \$538,000 |
| Summit | Post Road Improvements | This project will improve the surface to 26 feet over a length of 6,155 feet. Proposed improvements would bring standard lane widths to current City standards with curb and gutter to match eastern section of road, recycle pavement base entire length to eliminate seams and resurface entire road. Sanitary sewer on the north side of road would be installed to service homes currently on septic tanks. Other project elements include providing curbside for future wastewater taps of existing main, improving storm water system, providing bike path and/or sidewalks. The Post Road / Darrow Road intersection function would be improved by adding a loop driveway. Eastern Post Road is a narrow roadway with ditches (18-20 ft wide from SR91 to Haggart Dr.). This section is particularly hazardous to pedestrian/bicycle use due to the lack of sidewalks and narrow pavement width. | City of Twinsburg | 50 | 181 days or more | \$2,855,000 |
| Summit | Liberty Road Resurfacing | Proposed improvements will consist of pavement milling, resurfacing, installation of ADA curb ramps, manhole adjustments, pavement marking and loop detection installation. Pavement will be improved over the entire 2.62-mile length of Liberty Road from its intersection with Cannon Road north to the County line (State). This narrow road has not been resurfaced in 10-12 years. Over this period substantial residential development has occurred in the area and the City has acquired and developed a major park in cooperation with the Summit County Metropolitan. As a result, traffic volume has increased substantially and the nature of traffic has changed to include more heavy vehicles. Pavement edges are irregular due to soft shoulders and pavement deterioration. Construction Limits: Summit County, City of Twinsburg, Village of Reminderville, Twinsburg Township | City of Twinsburg | 50 | 91 to 180 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------|----------------|--------------------|---------------------------|
| Summit | Westwood Drive Waterline Replacement | Twinsburg's early residential subdivision development activity occurred in the 1950's. In this time period transite pipe (asbestos cement) products were used in the production of water lines. Pipes of this type are extremely brittle and prone to failure. Because of the exposure of asbestos in the pipe material, when broken the asbestos material may find its way into the water supply. As a result, there is a perceived, and an inherent danger of conveyance of a carcinogenic substance (asbestos) in the water supply after a pipe failure. In recognition of the potential health risks, and in an effort to eliminate the brittle failure-prone pipe from the distribution system, the City of Twinsburg has embarked on a program to eliminate it. This effort has been carried out with pavement improvements and other construction activities so as to limit construction disturbance in neighborhood areas. The proposed project would replace approximately 3070' of asbestos cement 8" waterline with 8" ductile iron pipe, repair and replacement of selected 8 inch clay sanitary sewer PVC sewer pipe and laterals, storm repairs and laterals, milling and roadway reconditioning, and resurfacing. | City of Twinsburg | 50 | 91 to 180 days | \$1,407,000 |
| Summit | Haverhill/Croyden Street Repairs | Twinsburg's early residential subdivision development activity occurred in the 1950's. The neighborhoods at southwestern quadrant of SR9/Darrow intersection include some of the City's oldest subdivisions. Haverhill Road and Croyden Road are two of the neighborhood streets in this area that have not been maintained or resurfaced in over a decade. This proposed project would reconstruct, repave, and reconstruct, repave, stabilize base, curbs, drive aprons and miscellaneous storm and sanitary repairs. The 25 ft wide road surfaces will be reconstructed for 1639 feet of Haverhill Road and 927 feet of Croyden Road. | City of Twinsburg | 50 | 31 to 90 days | \$1,016,000 |
| Summit | EDGEWOOD DRIVE PHASE 1 - SANITARY/WATER | The work included in this project generally includes replacement of existing sanitary sewer and service connections, installation of 8" ductile iron water main (replace transite pipe), new hydrant assemblies and water service connections and restoration of Edgewood Drive, between West Edgewood Drive & East Edgewood Drive. All proposed work should meet all City, EPA and CVD requirements. Bid with 4% OPWC loan/5% cost. Construction to start 2/16/2009. Award of this contract will be up additional City money for alternate projects. | City of Twinsburg | 50 | 0 to 30 days | \$359,000 |
| Summit | Glenwood - Liberty Roundabout - Phase 2 | 2500 linear feet of complete road reconstruction, widening, and addition of bike lane | Village of Reminderville | 25 | 31 to 90 days | \$525,000 |
| Summit | EDGEWOOD DRIVE PHASE 2 -STORM/PAVEMENT | The work included in this project generally storm sewer improvements to minimize potential localized flooding, asphalt pavement repairs and resurfacing, concrete apron on sidewalk repairs, and lawn restoration on Edgewood Drive, between West Edgewood Drive & East Edgewood Drive. The contract has sold and contracts have been executed. Contractor to begin February 16th, 2009. 2100 lin ft., two lane local road | City of Twinsburg | 50 | 0 to 30 days | \$560,000 |
| Summit | Nautilus-Tradewinds-Outrigger Bridge Replacements | Replacement of 3 bridges. One bridge was closed last fall due to potential collapse. A second bridge has load reductions for traffic flow. Third bridge is substandard and needs ADA improvements in a residential area. | Village of Reminderville | 20 | 31 to 90 days | \$500,000 |
| Summit | 2009 ROAD IMPROVEMENT PROGRAM | The work included in this project generally includes asphalt resurfacing, asphalt repairs, concrete curb removal & replacement, resurfacing of driveway asphalt repairs, curb repairs, applying Reflective Resurfacing Agent on designated streets, and miscellaneous ADA improvements. | City of Twinsburg | 50 | 31 to 90 days | \$750,000 |
| Summit | 2009 Manhole IMPROVEMENT | To prevent infiltration and flow Discharges, sanitary and storm manholes are reviewed for an annual contract. The contractor repairs these structures by preventing 1) this limits the amount of storm water entering the system and ending up at the wastewater treatment plant and prevents outflows of untreated wastewater into Twins Creek. This specification shall govern all labor, materials, equipment and supplies necessary for manhole interior rehabilitation for the purpose of elimination infiltration, providing corrosion protection, and repair of cracks and voids. Restoration of the structural integrity of such manholes shall be completed by the application of a monolithic, fiber-reinforced, structural enhanced cementations liner to the wall, ceiling and bench surfaces of concrete, brick and/ or masonry surfaces. | City of Twinsburg | 10 | 31 to 90 days | \$80,000 |
| Summit | ADDITIONAL WATERLINE REPLACEMENT - Design | City of Twinsburg program - replace transite pipe waterline that was installed over 50 years ago due to the brittle characteristics of this pipe and asbestos concerns. Additional projects: Survey/Design Construction Hillsdale Dr. \$25,000 \$ 850,000 Doolidge Dr. \$30,000 \$ 1,025,000 Oakwood Dr. \$20,000 \$ 450,000 By providing funding for survey and design this would provide the City with opportunities to secure other funding for these projects. | City of Twinsburg | 10 | 91 to 180 days | \$75,000 |
| Summit | HIGHLAND ROAD PHASE IV - THIRD LANE WIDENING | This is the final phase, completing improvements of Highland Road from SR8 to SR91. Highland Road is a primary access to numerous industrial sites. The proposed improvements will help to reduce congestion and to move traffic more efficiently and safely to SR8 and SR91, which provide access to I-80, I-271, and I-480. This improvement will provide a system link between previous improvements along Highland Road and improvements at Darrow Road (SR91) that were completed in 2002. This project involves the improvement of approximately 1.65 miles of Highland Road by reconstructing pavement to standard lane widths, providing two-way left turn lane, upgrading traffic signals and applying pavement markings. | City of Twinsburg | 50 | 181 days or more | \$5,790,000 |
| Summit | Storm Sewer Maintenanec | Storm sewers will be cleaned and televised. This project will provide for future projects as problems are detected in the system that may need repair/replacement. Additionally, cleaning these sewers prevents sediment loading on Twins Creek. The City policy is to clean and video sewers with capital improvements that provide paving to catch problems prior to the new surface being installed. A Citywide cleaning and videoing of the sewers would provide information on condition of sewers in order to evaluate and prioritize future projects. After this initial cleaning, the Wastewater Department is attempting to secure funding for the purchase of a sewer vacator. This would allow the Department to maintain the sewers after the initial heavy cleaning that this project would perform. | City of Twinsburg | 10 | 31 to 90 days | \$400,000 |
| Summit | Original Village Drainage & ADA Improvements | Project will provide drainage and flooding improvements, pavement/curb reconstruction, and ADA improvements. A total of \$200K of streets will be improved. | Village of Reminderville | 25 | 31 to 90 days | \$1,104,000 |
| Summit | Sidewalk Program | Due to the Economy, many residents are financially burdened and unable to repair sidewalks in front of properties. As sidewalks fall in disrepair, they become hazardous to end-users. The Citywide sidewalk program is being proposed to repair sidewalks that have the following defects: (a) Any block having multiple cracks or any single crack larger than one-fourth of an inch wide. (b) Adjoining sections of blocks, or a portion thereof, the edges of which differ vertically by one-half of an inch or more. (c) Blocks that hold water of 1/2 inch or more. (d) Blocks that are pitted, with holes or missing areas of concrete or otherwise determined to be hazardous to pedestrian and/or other traffic. The City Engineer and City Council has been working on a solution to address how to finance a citywide sidewalk program. Legislation is being proposed for cost sharing with property owners to resolve sidewalk issues. This program would put the sidewalks in a state of repair and allow for the proposed legislation to be adopted. | City of Twinsburg | 10 | 31 to 90 days | \$600,000 |
| Summit | Sanitary Sewer Improvements - Construction | The wastewater department currently has a high priority watch list of locations that require monthly cleaning to prevent sewer backups. A permanent solution to these issues is replacement of sewer lines to provide proper line and grade. The proposed improvements will consist of sanitary sewer replacement, including manholes and service connections with pavement, sidewalk and apron repair. Locations: Darrow Road (9079-10406), Darrow Road (9033-9225), Balmaceda(91020-10169) | City of Twinsburg | 50 | 91 to 180 days | \$500,000 |
| Summit | Sanitary Sewer Improvements - Design | Funding for Survey and Design of the remaining locations listed on the Wastewater Department's "Hot Spot" list could be found. It would open up opportunities to apply for OPWC funding for grants/loans to construct these projects in subsequent years. Estimate for design services \$100,000. Locations: Laurel Dr Easement (1749-1745),Waywood Dr (11271-1948), Berene Court | City of Twinsburg | 50 | 91 to 180 days | \$100,000 |
| Summit | Liberty Road Resurfacing | Pavement repair and resurfacing for approximately 2.82 miles. This project is for the replacement of 60-year-old transite pipe waterlines. Transite pipe is known for becoming brittle with age and numerous breaks within this subdivision has occurred. Residents also are concerned that asbestos fibers are released into the drinking water system. The City began the undertaking of replacement of transite pipe Chords in 2002. | Village of Reminderville | 15 | 31 to 90 days | \$750,000 |
| Summit | SUNVIEW/GLENWOOD WATERLINE AND SANITARY SEWER REPL | The work included in this project generally includes replacement of existing sanitary sewer and service connections, installation of 8" ductile iron water main (replace transite pipe), new hydrant assemblies and water service connections and restoration. All proposed work to meet all City, EPA and CVD requirements. | City of Twinsburg | 50 | 91 to 180 days | \$1,200,000 |
| Summit | SR91 (DARROW ROAD) | We are currently trying to line up the funding for this project. To date we have performed an Engineering Safety Study to determine the need for additional lanes, intersection and geometric improvements. Design and Environmental documentation is anticipated to be under contract by June 2009. The right of way is anticipated to be acquired in 2012 with construction in 2013. We are fairly confident in the funding scenario presented in the Financial Plan below. As you can see, there is still approximately \$552,000 projected as a shortfall for completing this project that we are requesting. Project Cost \$8,840,000 Anticipated \$8,085,000 through AMATS and ODOT HSP Local Share \$ 1,703,000 Additional Unfunded \$ 952,000 | City of Twinsburg | 80 | 181 days or more | \$552,000 |
| Summit | CHAMBERLIN ROAD IMPROVEMENTS - | The City had advertised for qualifications for the survey and design of Chamberlin Road Improvements. A contract for \$70,000 for survey was awarded in 2005. The City began negotiations with an Engineering firm for the design of this improvement but due to lack of funding and concern over how to fund construction, the project is currently on hold. T | City of Twinsburg | 50 | 181 days or more | \$6,420,000 |
| Summit | SR91/I480 INTERCHANGE IMPROVEMENTS | The design contract could be finalized and awarded if a funding source is available (Design Service Contract Estimate \$425,000). With completed plans this project would soon be bid for future bonds of Ohio Public Works funding. The project includes upgrading a narrow, two lane road to City standards, sanitary sewer, waterline where needed and multipurpose path. (Construction \$0,000,000). If Authorized the timeline would be 2009/2010 for design and permitting. Construction - as funding sources become available, construction contracts can be divided into Phases. and addresses capacity issues at the I480/SR91 intersection. This will in turn support surrounding business and make land more attractive to investment. The Cleveland Corridor Development located on the northeast leg of the intersection has and is available and is ready for construction. Cleveland Clinic site for medical offices and future hospital located on the south east leg of the intersection, and land currently on the south east leg currently in developers hands for a proposed fashion plaza mall. All these activities support job retention and creation. City officials met with CDDOT officials in 2008 to discuss possible solutions for this location. At that time it appeared no funding opportunities existed and a project of this magnitude is outside the fiscal limits of the City to undertake on its own. This is currently on a "watch" list for the City and has in on the AMATE and Transportation Outlook. | City of Twinsburg | 50 | 181 days or more | \$16,000,000 |
| | | This project will help promote economic development in creating safer access and addresses capacity issues at the I-480 | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Summit | TINKERS CREEK STREAM BANK STABILIZATION AND RIPARI | Tinkers Creek Stream Bank Stabilization and Riparian planting. Tinkers Creek flows through Center Valley Park and at many locations has straight vertical banks. The banks could be sloped back from the ordinary high-water mark and the area planted with Riparian vegetation. | City of Twisburg | 20 | 91 to 180 days | \$400,000 |
| Summit | WETLAND DETENTION HEADWATERS OF LAURAL CREEK | Various locations Laurel Creek Wetland Detention - City owned Morius Park could be converted into a wetland detention area to slow and filter water. This would help slow erosion of the bottom (weather shales) of Laurel Creek. Laurel Creek flows through the rear yard of residential neighborhood and the stream valley is well below the homes. The continual erosion of the streambed causes streams in the park which could ultimately affect the stability of the structures above. | City of Twisburg | 20 | 181 days or more | \$400,000 |
| Summit | RAVENNA/BROADWAY/STEPHARD/RICHMOND INTERSECTION REA | In 1997 the four communities (Lawrenceville, Macedonia, Oakwood and Twinsburg) cooperated in a study for intersection improvements, which estimated a final reconstruction in 1999 of realigning the intersection. The design never occurred. In 2004 the Communities again met to discuss the congestive management concerns and operation of this intersection. From 2005 to 2007 Oakwood had a corridor study performed of Richmond Road which includes this intersection. Meeting with in 2008 took place with all four communities and the two County Engineers. Funding of this project was a concern for some of the Municipalities. Funding was successfully secured, the studies were completed and successfully complete this project | City of Twisburg | 50 | 181 days or more | \$830,000 |
| Summit | TWINS INSTITUTE FOR GENETIC EVALUATION AND RESEARC | The Twinsburg Institute for Genetic Evaluation and Research (TIGER) will be a center for scientific research and study. Its focus will be related to the inherent traits and characteristics of multiple birth siblings and the research that benefits from the comparison of the influences of variables on genetically similar control subjects. The Institute benefits from the fact that the City of Twinsburg is the location for the largest annual assembly of multiple birth individuals in the world. Many of these individuals participate in on-site studies and tests. These are conducted in mobile units and mobile unit test centers. The Institute will function as an international repository of information and coordinated research. It will house the Ohio Twins Registry and expand multiple birth databases that will be available, within certain constraints, to researchers worldwide. The Institute will also house a "Twins Museum" and provide a retail outlet for general merchandise appealing to twins and tourists. It will also provide a learning center explaining the multiple birth phenomenon. The improvements: 15,000 sq ft research building, 5,000 sq ft museum and 2,500 sq ft retail and park | City of Twisburg | 120 | 181 days or more | \$4,300,000 |
| Summit | SAFETY SERVICES – FIRE STATION NO. 1 | With the advent of new training requirements by the State of Ohio and the aggressive training program that the TFD employs to meet these requirements, a proper facility for the department instructors to prepare and host training sessions would yield many years of return. The proposed 1300 square-foot, one-story building addition would be in the "void" at the Northeast corner of 91 + (Brown/Charlie) side from Ravenna Road. The proposal will call for architects to develop the best solution in meeting current and future needs of the TFD in regards to office space for the shift commanders and the jobs, as well as location of the classroom/media center within the designated building area. Additional training modifications include, a three story training tower to attach to the rear East corner of station 1. We have no multi story structures to do any effective training involving elevated rescue as you know we have a 6 story High Rise hotel and a soon to be built 5 story Clinic facility. | City of Twisburg | 50 | 181 days or more | \$280,000 |
| Summit | Presidential Subdivision Reconstruction | The project consists of the complete reconstruction of nine residential streets that were originally constructed in 1962 and 1963. The total length of the street work is 16800 feet. The existing streets are 26 feet wide with asphalt pavement, concrete curb and gutter, underground, 4 foot concrete sidewalks and concrete driveway aprons. The existing asphalt pavement base will be recycled and a new surface course of concrete, underdrain, curbs and driveway aprons will be totally replaced. The existing street is falling apart. | Northfield | 50 | 31 to 90 days | \$2,385,000 |
| Summit | Beach Avenue/Houghton Road Outfall Sewer | The project consists of installing 885 feet of a supplemental 48 inch reinforced concrete storm sewer and replacing 30 feet of existing 48 inch storm sewer along with adding four 10'x47" junction chambers, two 6' tall height concrete headwalls and four catch basins. | Northfield Village | 25 | 31 to 90 days | \$433,508 |
| Summit | Major Rd. Sormware/Paving Project | The project will include installing 340 linear ft. of new storm sewer to help alleviate the flooding problems from the flood of July 2003 and on going flooding, repaving of the roadway base 407 ft. long x 22 ft. wide where needed and then paving the entire width and length of the road roadway. At this time the roadway is sinking in some areas and falling apart. This is the main road used to get into the Village of Peninsula Environmental Education Center. It is used year round to school buses, delivery trucks, park employees and workers. The road runs from the east to the west thru the Village of Peninsula. The project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 10 | 91 to 180 days | \$275,000 |
| Summit | Individualized drug interactions analysis and drug | Our aim is to extend the leadership we have established through our publishing efforts in the areas of drug interactions, genomic influences, and adverse drug reactions into the realm of healthcare IT. Through our health care IT development, we are seeking funds which would greatly accelerate our development plans, enabling us to hire personnel and create the data which would benefit healthcare across the country. This funding would be used to establish us as a vital resource. | Lexi-Comp, Inc. | 8 | 31 to 90 days | \$1,000,000 |
| Summit | West Mill St./Stormwater Project | The project will include installing 200 linear ft. of new storm sewer to help alleviate the flooding problems from the flood of July 2003 and on going flooding, repaving of the roadway base 1775 ft. long x 22 ft. wide where needed and then paving the entire width and length of the road roadway. At this time the roadway is falling apart. This road is used to get into the north side of Peninsula and is used to access the Cuyahoga Valley National Park Lock 29 parking lot, the overflow parking lot and the Peninsula Train Depot. The train depot is run by the Cuyahoga Valley Scenic Railroad. The project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 2 | 91 to 180 days | \$55,000 |
| Summit | Stine Rd/Stormwater Project | The project will include installing 300 linear ft. of new concrete stormwater channel to help alleviate the flooding problems from the flood of July 2003, repaving of the roadway base 745 ft. long x 22 ft. wide where needed and then paving the entire width and length of the road roadway. At this time the roadway is falling apart. This road is used to get into the north side of Peninsula and is used to access the Cuyahoga Valley National Park Lock 29 parking lot, the overflow parking lot and the Peninsula Train Depot. The project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 2 | 91 to 180 days | \$255,000 |
| Summit | Northeastern Ohio Regional Technology Transfer Cen | 1) High education, hospitals and other research institutions use a joint collaboration center or innovation center, recruiting its resources to high education, hospitals and other research institutions that seek to establish and commercialization support services. The center will: 1) evaluate the regional concept based on the strengths and current outreach efforts in economic development; 2) provide technology commercialization, innovation and entrepreneurship services; 3) provide established and highly effective IP/technology management Network; 3) build on the core of university-based expertise, community college workforce efforts, and industrial strengths; 4) expand its professional staff to market research with commercial potential at neighboring state universities, participating small private universities and colleges, hospitals, private research institutions and nonmass Ohio companies; 5) track excellence and connect public and private expertise; and 6) create, develop, enhance, and maintain contacts at each participating institution | The University of Akron | 20 | 0 to 30 days | \$900,000 |
| Summit | Riverveiw Road/Stormsewer Project | The project will include installing 500 linear ft. of new storm sewers to help alleviate the flooding problems from the flood of July 2003, repaving of the roadway base 3200 ft. long x 22 ft. wide where needed and then paving the entire width and length of the road roadway. At this time the roadway is falling apart. This road is one of the two main roads that run thru the middle of the Cuyahoga Valley National Park and the Village of Peninsula which is in the center of the park. The road runs from the south to the north. The project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 2 | 91 to 180 days | \$294,000 |
| Summit | Akron Peninsula Road Project | The project will include repaving of the roadway base 838 ft. long x 33 ft. wide where needed then paving the entire width and length of the road roadway. At this time the roadway is falling apart. This road is one of the two main roads that run thru the middle of the Cuyahoga Valley National Park and the Village of Peninsula which is in the center of the park. The road runs from the south to the north. The project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 2 | 91 to 180 days | \$233,400 |
| Summit | Wooster Road Industrial Site Project | a major company had serious interest in this site with 50 jobs, however losts interest after one year of working with us trying to obtain funding to work through the issues | Barberton Community Development Corporation | 50 | 0 to 30 days | \$1,200,000 |
| Summit | Mogadore Water Tower Demolition | The Village water tower was built in 1929. The cost to rehabilitate the tower to provide another 25 years of service is the same as constructing a new tower. Through cooperative projects with the City of Akron, the water distribution system of the tower has been updated and looped. The tower can no longer be taken out of service and demolished without compensating service or flow requirements. The Village will remove the structure, dismantle the aging tank and reduce maintenance efforts for both the Village and the City. The land will be returned to the adjacent home owners. | Village of Mogadore- GPD Associates - Consulting Engineer | 12 | 0 to 30 days | \$100,000 |
| Summit | Village Maintenance Building Sanitary | As a result of the EPA Phase 2 Stormwater Program, the Village recently discovered that the four drains at the Village maintenance building are connected to the sanitary sewage system. The Village plans to install a new sanitary sewer lateral to the public sewer and abandon the existing sanitary system. The project will bring the building into compliance with new regulations and current wastewater disposal practices. | GPD Associates - Consulting Engineer | 12 | 0 | \$115,000 |
| Summit | Lakeside Business Park | 1. 100 acre +/- 70 acres will be shored ready for new construction with plans to subdivide into lots of 2 to 10 acres. Will consider one site user. B. Site Marketing Plan 1. Objective is to attract a small and larger businesses to northeast Ohio, preferably foreign investment, but also to attract suppliers to Goodway, Babcock and Wilcox, and PPG Industries. 2. BCCD as project manager, has considerable experience in land development, commercial lending, deal structuring, and site marketing. 3. Will work with Regional Economic Development groups such as Triad, NEO. 4. Specific companies in the plastics, chemicals, and precision metals industry will be targeted that fit the existing business and industrial cluster in the Summit County region. C. Positive Economic Impact 1. Total private and public project investments could reach as high as \$50 Million depending on the end user. 2. Estimated 500 jobs in a community that has lost 5,000 manufacturing jobs since 1980. A. Unemployment has been approximately 1.0% higher for Barberton than for Summit County. D. Need to Make Improvements 1. Site will be acquired from two primary land owners at Fair Market values. 2. Building demolition, utilities, and land improvements will occur. | Barberton Community Development Corporation | 500 | 0 to 30 days | \$2,000,000 |
| Summit | Marion Avenue Reconstruction | Remove and repair of 2,800 ft of roadway within the Village of Mogadore. The road is 63 years old and has been maintained by a series of chip and seal overlays and pothole repair. The project is a joint project with the Summit County Sewer Department and the City of Akron Water Department. While the Village rehabilitates the roadway, the 63 year old waterlines will be replaced and the 63 year old sanitary sewers will be replaced to reduce infiltration. Even though the city's different entities operate the roads, sewers and water systems, the efforts of the Village coordinate all repairs at the same time greatly increases efficiency for all involved. The waterlines in the area have been breaking at the rate of once per year for the last 11 years. Dated and waterlines will be located to promote replacement and flow. The Village will employ local contractors and utilize materials from local vendors with American made steel. | GPD Associates - Consulting Engineer | 20 | 31 to 90 days | \$1,900,000 |
| Summit | Village Square ADA ramps | Remove a retaining wall, grade and install ADA compliant sidewalks/tramps at the Village Square. The existing wall obstructs the view of drives, prevents wheelchair access and creates a dangerous "youth-pit" as vehicles make the left turn. The project will allow the Village to widen around the wall, widen the radius of the corner and create clear zones for pedestrians. | GPD Associates - Consulting Engineer | 12 | 0 to 30 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | South Freeway Drive Storm and Pavement Improvement | Rehabilitation of a 40 year old roadway that serves a 98 acre commercial/light industrial area. There are 20 businesses and 5 vacant lots along the project. The road is extremely deteriorated due to the large volume of truck traffic over the years. The roadway is becoming unsafe and requires constant maintenance by the City Service Department. The road has a reputation of being rough and consistently under repair which results in lowered traffic counts. Businesses that rely on drive-by customers will benefit from the rehabilitation due to increased usage. The project has been years in development and will result in assistance to the businesses which already struggling to maintain their staff while trying to ride out the slump in the economy. Funding will greatly reduce or eliminate the cost that the businesses must bear during this period of reduced sales. | GPD Associates - Consulting Engineer | 20 | 0 to 30 days | \$1,400,000 |
| Summit | South Bedford Rehabilitation | South Bedford has not been repaired in over 15 years. The asphalt has been maintained by patches, but has reached its useful life. This is a major thorough South Route through the City and will be even more valuable as a detour route for future projects. The project will require a minimum \$600,000 to provide a safe travel surface with localized base repair. To provide a longer term repair and more efficient use of funds, \$750,000 is required to make the anticipated level of base repair. Plans complete, ready to bid. | GPD Associates - Consulting Engineer | 20 | 0 to 30 days | \$750,000 |
| Summit | Stormwater Improvements | Replacement of four (4) corroded or undersized culverts throughout the City. Three culverts are under Valleyview Road and one (1) is under State Route 4 and will be replaced prior to the opening of Rte 4 by the Ohio Department of Transportation. The City will also pay for a portion of the culvert opening. Replacing these culverts is part of the City's effort to comply with the EPA Phase 2 Stormwater Program which requires the City to inventory and maintain the City's stormwater system. | GPD Associates - Consulting Engineer | 12 | 0 to 30 days | \$300,000 |
| Summit | Highland Road Railroad Grade Separation | The project consists of the construction of a bridge over a Railroad crossing. The crossing is within the City of Macedonia and currently has 50-60 trains per day. This number is expected to increase as the efficiency of train transport is restored. The crossing often backs up traffic for a mile in each direction. These back-ups add to pollution due to the idling vehicles and increased travel times. Another major concern is that this crossing is one of the major East-West roads within the City. The frequent back-ups greatly impair the ability of the police, fire and the rescue squad to reach incidents in a timely manner. Lastly is the issue of safety. The bridge will eliminate the at grade crossing where trains and vehicles may impact. There have been deadly accidents at the crossing. There are several funding sources and the City is requesting their local share to reduce City debt and allow other projects to be funded. | GPD Associates - Consulting Engineer | 100 | 181 days or more | \$1,250,000 |
| Summit | Grass Fire Skid Unit | Wild land Skid pump unit. We currently have funding for half of the unit but are unable to come up with the remaining half. If we cannot come up with this funding we will be forced to dip into our operating funds for this purchase. which will impact our staffing funding. | Valley Fire District | 30 | 0 to 30 days | \$6,000 |
| Summit | Development of Commercial Miner Tracking System | This project covers the final development of an internet based tracking system for underground miners, particularly, coal miners. The system has been proven in tests of the prototype system and is patented. Completion of the software by Draper Labs, Cambridge, MA will allow the beta test and the final design of the commercial version of the system by late 2010. An InnovOhio Ohio Loan will fund 70% of this development. The remaining 25% as well as costs not covered by the OLCF need to be secured to allow the completion of the development of the commercial system. The project will create approximately 45 jobs at InSet Systems. Additional jobs will be created or retained at the electronics assembler, ISSB, Wessler, OH. The successful commercialization of the system will provide the income to allow InSet to repay the OLCF loan as well as the investment of \$400,000 by JumpStart, Cleveland, OH. Discussions of the merits of the system, which has a projected accuracy of 10 feet compared to competitors' accuracy of 100-1500 feet, with Ohio mine owners, Ohio DMH Mine Safety personnel, and Federal MSHA, personnel have provided extremely positive feedback. | InSet Systems LLC | 45 | 0 to 30 days | \$1,000,000 |
| Summit | No Pet Left Behind | Provide operating money/salary funding for a veterinary team (Doctor, licensed veterinary technician, veterinary assistant). The team will perform 20-30 day or neuter surgeries a day a low cost to general public. Over 6,000 surgeries will be performed in a year providing a major over 10,000 companion animals. This reducing the burden on low cost bonded animal control facilities. The program will also reduce the threat to Health and Safety by reducing the number of free-roaming cats and dogs in the community. | One of a Kind Pet Rescue | 8 | 31 to 90 days | \$150,000 |
| Summit | Highway Maintenance & Salt Storage Buildings | Springfield Township is the largest Township in Summit County with over 400 tons of salt storage. This project will consist of a new salt storage area as well as provide a cold storage structure. This project will bring us into compliance with Phase II of the clean air act by not allowing any salt water run off. | Springfield Township | 55 | 31 to 90 days | \$640,095 |
| Summit | Adaptive Windows: Path to Zero Energy Building | 30% of energy in a house is lost through the windows. To make the window a source of gain rather than a loss must exhibit variable solar heat gain coefficient. This must be done without relying on the power grid. We have demonstrated a highly crystalline based system to achieve the proposed work. The stimulus funds will be used to develop a roll-to-roll manufacturing line to produce the adaptive window film. It is expected that the program will generate a 2' wide roll-to-roll web coating line and supporting manufacturing line to produce the adaptive window film. It is expected that providing a double glazing and adjustable solar heat gain coefficient. The manufacturing facility will be located in NE Ohio an can save the communities globally. | AlphaMicron, Inc. | 50 | 0 to 30 days | \$7,000,000 |
| Summit | Tire Uniformity Optimizer control system | The control system runs a piece of equipment that is produced by a sister company that is at the same campus location in Summit County. That company employs approximately 45 people in a machine shop to build these pieces of equipment. There are 3 machines in progress and 4 other controllers that will be sent to tire plant as a retrofit package. | Commercial Timesharing Inc. | 13 | 0 to 30 days | \$150,000 |
| Summit | purchase of land to set up a C&D recycling facility | Approximately 400,000 has already been spent by our company on this project. The 150,000 requested is needed to complete the system. | pkcrushing and material | 20 | 181 days or more | \$3,000,000 |
| Summit | BARBERTON SIDEWALK & CURB IMPROVEMENTS | We would like to purchase property to expand a current recycling facility that recycles construction demolition materials. We are crushing asphalt, concrete, brick and block and using this material in new construction projects. We want to expand our recycling efforts to include, rubber, tires, roofing or other demolition materials that can be recycled. We currently crush over 100,000 tons of material on 5 acres we anticipate 4 times that amount with the increase of space and resources. | City of Barberton | 0 | 31 to 90 days | \$565,000 |
| Summit | Terex Road Extension Culvert Project | The City of Barberton has an on-going sidewalk program that assists homeowners with new construction and/or replacement of sidewalks to promote safe walking routes. This program includes installing ADA compliant curb ramps throughout the city and curbing in selected locations to aid in stormwater drainage. Targeted locations include: targeted areas, access to public transportation and commercial district. | City of Hudson | 35 | 31 to 90 days | \$250,000 |
| Summit | General Engineering Services/Maintaining Highway I | Individual agencies are by request safety mandates with standard design criteria. Proposed 3 year funding of \$750,000. | Summit County Engineer | 20 | 31 to 90 days | \$400,000 |
| Summit | Task Order Contracts for General Engineering Servi | Task order contracts for general engineering services including geo technical, test labs, and traffic specialties. | Summit County Engineer | 40 | 31 to 90 days | \$600,000 |
| Summit | BARBERTON WATER SUPPLY & DISTRIBUTION IMPROVEMENTS | BARBERTON WATER SUPPLY AND DISTRIBUTION IMPROVEMENTS An inspection of four city elevated water storage tanks by our consultant has recommended repair and upgrade projects for the each of the tanks. *Plans and procedures are being prepared *Engineers estimated Project Cost is \$900,000 *Project is ready to bid within 120 days. *The Barberton Reservoir is the main water supply for the city and portions of other surrounding communities. An engineering study has recommended repairs and upgrades. *Plans are complete and awaiting funding *Engineers estimated Project Cost is \$900,000 *Project is ready to bid in 90 days. *A plant upgrade is currently in progress at the city's main water treatment facility and is ready for the next phase of the water filtration improvement process. *Engineering complete, ready to bid, awaiting funding. *Engineers estimated Project Cost is \$875,000 | City of Barberton | 0 | 91 to 180 days | \$2,150,000 |
| Summit | Municipal & Environmental Services Handling (MESH) | Expansion of existing Municipal Building to include Public and Service Departments that are currently in separate facilities. This will benefit the local environment by saving fuel for heating and cooling of multiple facilities, into a single, fuel-efficient building. The former Public and Service Department building vacated as part of this process, will be used to reinvest into the old part of the Village, creating opportunities for businesses to create jobs. | Village of Reminderville | 30 | 181 days or more | \$750,000 |
| Summit | Twinsburg Library Branch | Update of the old Village Municipal Building to provide a location for a new branch of the Twinsburg Library. This library will serve the Reminderville / Aurora area, as a local branch to the Twinsburg Library. Improvements will include HVAC, lighting, general interior improvements, and other exterior upgrades. This will provide a local educational opportunity for an area that is currently under-served. | Village of Reminderville | 25 | 91 to 180 days | \$150,000 |
| Summit | 5th St. NE at State St. Traffic Signals | TRAFFIC SIGNALIZATION - 5TH ST. NE at EAST STATE ST. A traffic study was commissioned for the intersection of OH St. NE at East State Street. This is a skewed and blind intersection with a new Five Station adjacent to it. New signals would improve safety for the two major roadways along with increased safety for entry and egress of emergency vehicles. *Plans are 100% complete. *Engineers estimated Project Cost is \$150,000. | City of Barberton | 0 | 31 to 90 days | \$75,000 |
| Summit | Vehicle Replacement Program | Expedite replacement of vehicle fleet, 9 cars, 10 trucks, and 3 heavy machinery. | Summit County Engineer | 60 | 31 to 90 days | \$1,469,500 |
| Summit | Building Weatherization and Efficiency | Replace roof/replace HVAC system with a more energy efficient system. | Summit County Engineer | 5 | 31 to 90 days | \$500,000 |
| Summit | BARBERTON WEIGAND BUILDING RENOVATION | The city-owned Weigand building, a former retail facility constructed in 1920, is planned for a renovation to expand the Barberton-Norton Health District Offices and upgrade the city's record storage facility. An engineering and architectural building analysis has been performed. This study identifies significant safety, energy efficiency and environmental improvements including exterior masonry repair and restoration, roof, window and elevator replacements, water proofing, upgraded plumbing, electrical and HVAC systems. *Architects estimated cost is \$1.1 million. | City of Barberton | 0 | 31 to 90 days | \$750,000 |
| Summit | Sewer System Inflow & Infiltration Improvements | During heavy rainfall events, repetitive sanitary sewer back-ups occur at several locations. The influx of stormwater into the sanitary sewer system often places a heavy burden on the wastewater treatment facilities and this has resulted in sewage overflows into watersheds. Investigation by city personnel has identified areas of concern. Field investigations including dye testing, video inspections and flow observations will be utilized to identify sanitary lines and structures for remedial action. Corrective actions such as grouting, sewer pipe and structure lining along with the diversion of basement sump and sumpwater discharges to the stormwater sewer system will be performed to increase flow into the stormwater system will necessitate new stormwater detention facilities to minimize downstream flood potential. *Proposed 5 year program budget of \$2.5 million. o Many older homes with low income residents cannot afford new sanitary and storm sewer connections. Funding would assist these residents with new connections | City of Barberton | 0 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Summit | Elm Street Road/Sewer Improvement | Replacement of 1600 ft. of sanitary sewer, and drinking water line along Elm Street. This project will involve multiple trades and employ at least 20 personnel. The project will eliminate the inflow and infiltration in the sanitary sewer and improve the drinking water pipeline that has deteriorated over the past 75 years. | City of Hudson | 50 | 0 to 30 days | \$260,000 |
| Summit | Atterbury Blvd. Bridge Replacement Project | Existing Bridge Replacement Project. The bridge spans Branchville Creek in the City of Hudson. Engineering Completed. Review and approval completed. READY TO BID IMMEDIATELY. MARCH 2009 bid date. COOT and Ohio Public Works confirmed participation. | City of Hudson | 100 | 0 to 30 days | \$110,000 |
| Summit | Barlow & Young Intersection Improvement | Improvements to an existing intersection in the City of Hudson. The project includes the realignment of the intersection, new storm sewer work, relocation of water lines, utility poles, gas lines and right-of-way lines. The project will employ numerous trades for a minimum of 1 year. | City of Hudson | 50 | 181 days or more | \$325,000 |
| Summit | Koberna/Willows Retention Pond | Improvement project includes the excavation and embankment in order to construct a regional retention pond that will benefit the City of Hudson, City of Silex and the City of Cuyahoga Falls, Ohio from flooding. The plans are 50% complete and the construction should start in the fall of 2009. The building has fallen into disrepair and is not energy efficient. | City of Hudson | 25 | 91 to 180 days | \$1,100,000 |
| Summit | CITY BUILDING CONSTRUCTION | This project would involve the demolition of the existing building and construction of a new building using new green technologies and materials. This building would be constructed at 10,000 sq. ft. Benefits of Project Construction of this building would: Allow the City to continue to provide office space to small, local organizations. Encourage green technologies for construction along with green materials. Provide energy efficient office space for the community. Provide environmental benefits. Project Cost Engineering of this project has not begun. Therefore, costs would include engineering services and demolition construction costs estimated at \$1,500,000.00. | City of Twinsburg | 30 | 181 days or more | \$1,500,000 |
| Summit | Barlow Retention Pond | Replacement of a dam and outlet structure including the repgrading of the site to increase the storm water management of the pond and decrease overflow flooding. This project is within a 100 year floodplain currently. | City of Hudson | 25 | 0 to 30 days | \$130,000 |
| Summit | Road Reconstruction and Resurfacing Program | Road Reconstruction Projects on 10 streets within the City of Hudson along with the resurfacing of an additional 15 streets. The project is a bid and will be able to begin in March 2009. | City of Hudson | 125 | 0 to 30 days | \$1,300,000 |
| Summit | Atterbury Blvd. Road Reconstruction | Resurfacing 1.1 mile road replacement. Includes new curbs, sidewalks, storm sewers, sanitary sewers, a pump station, removal of infiltration into the sanitary sewer system and some limited waterline work. The engineering is scheduled to be complete in May. The project is a bid and will be able to begin in March 2009. The project has the matching funds budgeted in the 2009 City Capital budget. The project is scheduled to be completed approximately 1.5 to 2.0 years to complete. | City of Hudson | 350 | 91 to 180 days | \$1,515,000 |
| Summit | Seasons Road Infrastructure Improvements | The project includes the road widening of Seasons Road, new sanitary sewer gravity lines, water lines, storm lines, storm water management, and right of way acquisition. The engineering and design is completed and ready to bid. This project will be close to the Seasons Road and BR interchange project which will generate 1000's of new jobs for the area of Silex, Cuyahoga Falls, and Hudson. | City of Hudson | 250 | 91 to 180 days | \$1,700,000 |
| Summit | Dist 4, PID 85533, Akron Metro 20 40-foot CNG buse | Akron Metro 20-40 foot CNG buses | Ohio Department of Transportation | 117 | 31 to 90 days | \$7,000,000 |
| Summit | Dist 4, PID 85567, Akron Metro (20)<30 ft buses | Akron Metro 20 less than 30 foot buses CNG | Ohio Department of Transportation | 50 | 31 to 90 days | \$3,000,000 |
| Summit | Dist 4, PID 85563, Akron Metro security cameras | Akron Metro Security cameras on buses | Ohio Department of Transportation | 42 | 91 to 180 days | \$2,100,000 |
| Summit | Dist 4, PID 85565, Akron Metro CNG compressors | Akron Metro New and expanded CNG compressors | Ohio Department of Transportation | 40 | 91 to 180 days | \$2,000,000 |
| Summit | Dist 4, PID 85566, Akron Metro Back up generator | Akron Metro New Back up Generator | Ohio Department of Transportation | 20 | 31 to 90 days | \$1,000,000 |
| Summit | Dist 4, PID 85570, Akron Metro smart card system | Akron Metro New smart card fare system | Ohio Department of Transportation | 10 | 91 to 180 days | \$500,000 |
| Summit | Dist 4, PID 85571, Akron Metro Next Bus Dest Signs | Akron Metro Next Bus Destination signs | Ohio Department of Transportation | 20 | 91 to 180 days | \$1,000,000 |

| Summit | Dist 4, PID 85572, Akron Metro garage solar panels | Akron Metro Solar Panels for the main bus garage | Ohio Department of Transportation | 40 | 31 to 90 days | \$2,000,000 |
| Summit | Dist 4, PID 85544, Akron Metro Upgrade Radio | Akron Metro Upgrade Radio and safety communications systems | Ohio Department of Transportation | 70 | 91 to 180 days | \$3,500,000 |
| Summit | Dist 4, PID 85573, Akron Metro geothermal facility | Akron Metro Geothermal Heating & Cooling for main facility | Ohio Department of Transportation | 30 | 91 to 180 days | \$1,500,000 |
| Summit | Dist 4, PID 85550, Akron Metro Upgrade scheduling | Akron Metro Upgrade scheduling and routing capability for paramotorist and demand response service | Ohio Department of Transportation | 40 | 91 to 180 days | \$2,000,000 |
| Summit | Dist 4, PID 85533, Akron Metro 20 40-foot CNG buse | Akron Metro 20-40 foot CNG buses | Ohio Department of Transportation | 117 | 31 to 90 days | \$7,000,000 |
| Summit | Dist 4, PID 85542, Akron Metro Expansion Ghent Rd | Akron Metro Expansion of Ghent Road Park and Ride | Ohio Department of Transportation | 20 | 91 to 180 days | \$1,000,000 |
| Summit | Dist 4, PID 85575, Akron Metro north park n ride | Akron Metro North Akron Park and Ride | Ohio Department of Transportation | 30 | 181 days or more | \$1,500,000 |
| Summit | Dist 4, PID 85552, Akron Metro Rehab railroad trac | Akron Metro Rehabilitation of railroad trackage and bridges | Ohio Department of Transportation | 100 | 181 days or more | \$5,000,000 |
| Summit | CGreen | Retrofiting foreclosed distressed properties with high efficient, energy star rated appliances, windows and where feasible solar panels. In current jobs we have targeted homes where we can rehabilitate the home in a neighborhood. This project is one that allows us to bid funding to put the proper technologies in the home and get approvals from different agencies to speed the home for it's efficiencies. It increases the value of the neighborhood and rehabilitates homes that either fall in the wrong hands or were neglected / foreclosed. | CG Property Management | 10 | 31 to 90 days | \$2,500,000 |
| Summit | Dist 4, PID 85560, Akron Metro Rebuild maint facil | Akron Metro Rebuild maintenance facilities and busse garages to LEED standards | Ohio Department of Transportation | 100 | 91 to 180 days | \$5,000,000 |
| Summit | Dist 4, PID 85577, Akron Metro rehab admin build | Rehabilitating 30 year old parking deck in in need repairs. The post tenanted structure has been structurally evaluated and several recommendations have been made, including possible demolition of the structure. | Ohio Department of Transportation | 40 | 91 to 180 days | \$2,000,000 |
| Summit | Repairs to Green Parking Deck | The storm sewers and pavement on Hudson Drive near State Route 8 are in need of repairs. The concrete pavement is badly deteriorated and water remains on the surface causing icing problems in the winter, and traction problems in the summer. | The City of Cuyahoga Falls | 20 | 31 to 90 days | \$375,000 |
| Summit | Howe Avenue Storm Sewer and Pavement Repairs | Several homes in this neighborhood have experienced flooding from severe rains. This flooding is from both the sanitary sewers and the storm sewers. This project will replace the old, deteriorated sewers with new ones that will meet current design standards for design and capacity. | The City of Cuyahoga Falls | 0 | 0 | \$200,000 |
| Summit | 10th/Phelps Sanitary and Storm Sewer Improvements | The Sagamore Hills Loop Trail Project will include hiking/jogging/fitness and nature trail activities and will be available for walking or wheelchair use along exercise stations. (Site map included under separate cover with file application). Sagamore Hills Loop Trail Project trail include the grading, base preparation, asphalt paving and minor drainage improvement of 4500 feet of a 12-foot wide walking and biking loop trail. Included will be parking areas, as well as handicap access to all areas (50 acres). The work will involve completing a totally paved trail and handicap accessible parking around the perimeter of Sagamore Hills Park. There is a paved 1/2 mile connecting trail directly linking Sagamore Hills Park Trail to Summit Metro Park Trail (approximately one (1) mile long). Included in this request will be exercise stations, signage, paved parking, maps and an ADA playground area. Our school and athletic association presently use the park for baseball, soccer, cross country, winter kick football, as well as an annual circus event. | The City of Cuyahoga Falls | 20 | 31 to 90 days | \$400,000 |
| Summit | Township Park Loop Trail Project | Holzhauser Road Widening: This had to be added to State Route 82 from an approximate occupancy of 2,400 residents living in a Planned Unit Development. A traffic light is located at the intersection of State Route 82 and Holzhauser Road. At the end of this road there is a trail (Carriage Hill) connecting to the Township in the Cuyahoga Valley National Park. | Sagamore Hills Township | 16 | 91 to 180 days | \$274,000 |
| Summit | Holzhauser / Springlede Roads | We are asking for the widening of this road to provide a 3' berm on each side for the purpose of walking or biking to the trail. This road is now 22' wide (no berm) with ditches on each side. The township has a 60' right of way. The project will need to be surveyed, engineering accomplished, with possible enclosure of ditches, resurfacing and grading to provide a safe berm for bike and hike travel. Along with the PUD there are several neighborhoods that are connected to Holzhauser for the purpose of shopping or accessing the Township Trail. | Sagamore Hills Township | 35 | 31 to 90 days | \$651,802 |
| Summit | 12th/Chestnut Sanitary and Storm Sewer Improvement | Springlede/Springlede Road Road Project: This is an area of Sagamore Hills that is partially rely with several drainage problems/springs. has developed approximately 45 years ago. The total length of the project is .38 miles. | The City of Cuyahoga Falls | 20 | 31 to 90 days | \$400,000 |
| Summit | Barberton Energy Efficient Vehicles | The homes in this neighborhood have experienced flooding from severe rains. This flooding is from both the sanitary sewers and the storm sewers. This project will replace the old sewers with new sewers that will meet current design and capacity standards. | City of Barberton | 0 | 0 to 30 days | \$38,000 |
| Summit | Long Lake Bog - Wetland Protection and Restoration | Program would replace two former Police Department vehicles (1997 and 1999) used by the Building and Engineering Departments. The primary usage of these vehicles is daily short trips within the nine square mile area of the city with occasional trips to surrounding areas. The present vehicles are inefficient in both fuel and maintenance costs. In 2008, using eight different vehicles, six former police, one former the one and one from the spokeswoman department, the vehicles used 1380 gallons of gasoline for 18,000 miles of travel averaging 13 miles per gallon. The estimate two replacement hybrid vehicles would be used for about 6000 miles at 30 miles per gallon. This would reduce the department's fuel usage by about 500 gallons per year. The vehicles would have messages about saving energy and the city's commitment to energy and the environment. | Western Reserve Land Conservancy | 0 | 91 to 180 days | \$320,000 |
| Summit | Blossom Music Center ADA Contingency Project | Program W/RFCL: OEPA DERFA approved the project for WRRSP funding in 2009, however, sponsorship was not secured and the project had to be removed from the final 2009 WRRSP Project Priority List. W/RFCL currently has the project under contract and will transfer to the Cleveland Museum of Natural History. This is a green infrastructure project located on preservation and restoration of wetlands and help manage for wet weather scenarios. The project will serve the surrounding community by providing floodwater absorption. The Cleveland Orchestra will complete Phase II of the planned ADA enhancements to the Blossom Music Center facility. Project has received partial funding from the State of Ohio. Project details include re-grading the land house left to be ADA compliant (currently, only house right is compliant). Ground installation of the project requires the installation to also rebuild restrooms and concession stands, which will be built using sustainable materials, solar panels and feature roof-top gardens to enhance their ecological status. Pathways from the top of the park to the pavilion will be replaced as well as enable water access to the pavilion for visitors with limited mobility. ADA signage will be installed throughout the center and parking lots to enhance patron experience and safety. Parking lots will be re-paved to smooth entry and exit for vehicles. Additionally, the picnic areas will be re-done to ensure that all patrons, regardless of ability, can enjoy the park setting of Blossom before, during and after concerts and events. | The Cleveland Orchestra | 100 | 31 to 90 days | \$3,500,000 |

|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Summit | ADRC Control Technologies Research and Development | ADRC Technologies Inc. seeks funding to support research and development in applying the novel Active Disturbance Rejection Control (ADRC) concept and techniques to address pressing issues in the field of environment control for coal fired power plants and pneumatic servo positioning systems. Working with parent partner Cleveland State University, ADRC Technologies seeks to address these issues and apply them to industry throughout the state of Ohio. ADRC works with Neundorfer and Sunstream, two Ohio companies, to implement cutting edge technology to address environmental control as well as industrial waste control. The outcome of the research and development will enable ADRC to translate this to a saleable, profit, increase investment in the company and equipment outdated technology with newer more efficient product. This will enable companies to expand and live instead of having to consider such waste. In addition, this technology will assist in environmental emissions and ensure cleaner air so coal is used in the state's industrial park. | ADRC Technologies Inc | 15 | 31 to 90 days | \$1,000,000 |
| Summit | National Gateway | The National Gateway will create a highly efficient rail network to connect Ohio producers with east coast ports and world markets. In Ohio, the total National Gateway investment is \$190 million. CSX Transportation has committed to \$130 million of that total in new intermodal terminal developments, the first of which will be constructed in the spring of 2009. That state of the art terminal, located in Wood County, will generate approximately 2500 Ohio jobs in a variety of transportation and logistics industries. The remaining \$60 million investment in Ohio for the National Gateway will meet the rail network for double stacked intermodal trains between the Pennsylvania state line and the new terminal in Wood County. The \$60 million requirement will address 11 clearance projects across six counties that are detailed in a feasibility study in Northbrook Ohio. These projects, if funded by this request, will go to construction by June 1st and will employ approximately 1075 Ohioans. The economic development potential for Ohio on the National Gateway is limited, but without the double stacked cleared network, the new terminal will not experience their full development potential. | CSX Transportation | 1575 | 31 to 90 days | \$40,000,000 |
| Summit | Summit County Loan Assistance Project | To develop a loan assistance program for homeowners who need to replace or repair a home sewage treatment system in the Summit County General Health District's jurisdiction. Our goal is to offer a program through the county fiscal office which homeowners may secure loans which are in turn paid back through assessments to the property's taxes over a period of 5+ years. We believe this will offer an affordable and accessible option to homeowners who may not qualify for a traditional loan and/or credit services and who need repairs to or replacement of a failed septic system to abate a public health nuisance. Failing septic systems have adverse and detrimental effects on waters of the state, watershed, various aquatic animals, as well as impacts on a community's quality of life and property values. | Summit County General Health District | 6 | 31 to 90 days | \$300,000 |
| Summit | 5th St. NE at State St. Traffic Signals | TRAFFIC SIGNALIZATION - 5TH ST. NE at STATE ST. NE A traffic study was commissioned for the intersection of 5th St. NE at East State Street. This is a skewed and blind intersection with a new Five Station to adjacent to it. New signals would improve safety for the two major roadways along with increased safety for entry and egress of emergency vehicles. Phase are 100% complete. Employment estimated Project Cost is \$146,000. | City of Barberton | 0 | 31 to 90 days | \$75,000 |
| Summit | 15th St. NE Railroad Overpass | The reconstruction of the 15th St. railroad overpass will replace the existing structurally deficient bridge and will increase safety by installing a water structure with bike lanes and providing improved sight distance. Engineering complete, ready to bid. Awaiting funding from a Ohio Dept. of Transportation. | City of Barberton | 0 | 91 to 180 days | \$2,810,000 |
| Summit | Summit County Link Deposit Project | We would like to be able to have the capability to develop a link deposit program with participating lenders for homeowners. A securitization of the Summit County General Health District for the replacement and repair of home sewage treatment systems. Projects that are completed will result in homeowner's reduced rates for loans for such repairs to help defray costs and expedite repairs to and help defray costs of septic systems and also saving a public health nuisance. The process works to first identify the septic systems to be replaced into a link deposit program. The interest rate earned on that money is deducted from the interest rate of the loan being secured for the replacement of the septic system thus saving homeowners another option for funding a replacement septic system as opposed to traditional bank loans or credit cards. The City of Magic Theater building (old Park Theater) was constructed in 1920. It is planned for a major renovation to improve accessibility, the safety and interior spaces along with exterior masonry repair and restoration, water and moisture protection and upgraded restroom facilities. An engineering and architectural building analysis has been performed. | Summit County General Health District | 6 | 31 to 90 days | \$150,000 |
| Summit | BARBERTON MAGIC THEATER BUILDING RENOVATION | | City of Barberton | 0 | 91 to 180 days | \$183,000 |
| Summit | Injection Molding Control - New Product for New Ma | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a new injection molding control platform to penetrate new markets. This is a related market to FACTS' core competence. The development will involve software, electrical, and mechanical engineering work. FACTS will leverage our technical strengths and capabilities to the project is low risk with a high probability of success. Expected results \$ 1,500,000 year in Ohio Exports. | FACTS, Inc. | 4 | 0 to 30 days | \$41,000 |
| Summit | New Market Development to Expand World Wide Export | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a new injection molding control platform to penetrate new markets. This is a related market to FACTS' core competence. The development will involve software, electrical, and mechanical engineering work. FACTS will leverage our technical strengths and capabilities to the project is low risk with a high probability of success. Expected results \$ 2,000,000 year in Ohio Exports. | FACTS, Inc. | 5 | 0 to 30 days | \$50,000 |
| Summit | Next Generation Control System Development | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a new injection molding control platform to penetrate new markets. This is a related market to FACTS' core competence. The development will involve software, electrical, and mechanical engineering work. FACTS will leverage our technical strengths and capabilities to the project is low risk with a high probability of success. Expected results \$ 2,000,000 year in Ohio Exports. | FACTS, Inc. | 15 | 0 to 30 days | \$350,000 |
| Summit | Roofing Roughness Measurement - New Product for Ne | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a roofing roughness measurement system. No such measurement system is commercially available. The development will involve software, electrical, and mechanical engineering work. FACTS will leverage our technical strengths and capabilities so the project is low risk with a high probability of success. Expected results \$1,800,000 year in Ohio Exports. | FACTS, Inc. | 4 | 0 to 30 days | \$50,000 |
| Summit | Advanced Process Control System Development | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop advanced control system capabilities involving software, electrical, and CAD engineering work. This will provide advanced control capability, such as auto-tuning and auto-profile control, for current and new markets. The development will leverage existing technology so the project is low risk with a high probability of success. Expected results \$ 1,000,000 year in Ohio Exports. | FACTS, Inc. | 6 | 31 to 90 days | \$80,000 |
| Summit | Next Generation Measurement System Development | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a new measurement system or products. The development will involve software, electrical, and mechanical engineering work. The basic research for the planned new products is complete and the concepts proven. The projects are therefore low risk with a high probability of success. | FACTS, Inc. | 12 | 0 to 30 days | \$356,000 |
| Summit | Management Information System - Next Generation | FACTS, Inc. a technology company founded in 1991 & based in Cuyahoga Falls, OH, offers advanced measurement and control systems to control a wide variety of industrial processes. We are recognized as leaders in our field. To compete effectively, FACTS needs to adapt to the changing world market economy by developing new products. FACTS, Inc. has systems installed in 12 countries around the world. FACTS, Inc. has historically invested 8% of total sales in product improvements and new product development. Under the current economic conditions this level of investment cannot be supported but without this investment the company will not remain competitive, nor be able to expand into new markets, such as Asia, that are necessary to survive and prosper. The jobs created are for well-paid technical professionals. The proposed project is to develop a next generation Management Information System. The demand is expanding for the next generation Management Information System. The development will involve software, & project engineering work. FACTS will leverage our technical strengths and capabilities so the project is low risk with a high probability of success. Expected results \$ 1,200,000 year in Ohio Exports. | FACTS, Inc. | 4 | 31 to 90 days | \$98,000 |
| Summit | Park Lane Manor | new received LITC, Ohio State Historic and Federal Tax Credit to renovate a 300 unit property in Akron, OH. This would be a subsidy to help with the abatement removal on the exterior and interior of the buildings. | Park Lane Manor LLC | 10 | 0 to 30 days | \$1,000,000 |
| Summit | Domestic Violence Prosecutor | The City of Stow currently employs one full-time prosecutor, who is responsible for all criminal charges filed in the City, regardless of their nature. The prosecutor handles a wide variety of criminal charges, ensuring that the City is able to develop the level of expertise in the area of law required and cannot offer the level of assistance to victims of family violence they need and deserve. The City will have one full-time domestic violence prosecutor, who will focus solely on cases of family violence. All cases of family violence will be coordinated with the prosecutor, who will actively participate in every step of the legal process. The prosecutor will also assist victims of family violence by guiding them to the proper channels to receive assistance and by assisting them in securing financial contributions from the Ohio Crime Victims Compensation Fund, if applicable. This prosecutor will also provide the Stow Police Department with up-to-date information regarding charges and developments in law concerning family violence. In addition, the domestic violence prosecutor will host lectures relevant to family violence for community members and organizations and the unincorporated townships under the jurisdiction of the Stow Municipal Court. These include Boston Township, Sagamore Hills Township, Sandusky Township, and Norfolk Township. Because of time constraints, the current prosecutor is unable to devote the time and attention to each case that it deserves. The City will have one full-time prosecutor who will focus solely on criminal matters arising within the unincorporated townships. This will ensure that every criminal violation receives the attention it deserves. In addition, the prosecutor will work with its law enforcement personnel serving the unincorporated townships to provide them with up-to-date information regarding charges and developments in the criminal law. This prosecutor will also be available to community members and organizations within the unincorporated townships to provide lectures relevant to crime prevention and detection and other related matters. | City of Stow Law Department | 1 | 0 to 30 days | \$80,000 |
| Summit | Unincorporated Township Prosecutor | The City of Stow currently employs one full-time prosecutor, who is responsible for all criminal charges filed in the City, regardless of their nature. The prosecutor handles a wide variety of criminal charges, ensuring that the City is able to develop the level of expertise in the area of law required and cannot offer the level of assistance to victims of family violence they need and deserve. The City will have one full-time domestic violence prosecutor, who will focus solely on cases of family violence. All cases of family violence will be coordinated with the prosecutor, who will actively participate in every step of the legal process. The prosecutor will also assist victims of family violence by guiding them to the proper channels to receive assistance and by assisting them in securing financial contributions from the Ohio Crime Victims Compensation Fund, if applicable. This prosecutor will also provide the Stow Police Department with up-to-date information regarding charges and developments in law concerning family violence. This prosecutor will also be available to community members and organizations within the unincorporated townships to provide lectures relevant to crime prevention and detection and other related matters. | City of Stow Law Department | 1 | 0 to 30 days | \$80,000 |
| Summit | Hudson Drive Reconstruction | The improvements will include widening to four lanes and reconstruction of 0.97 miles of Hudson Drive. The reconstruction also includes agreements to the intersections of Eberhart Drive, Richa Road, and Commins Drive. Eberhart Drive will be widened to improve safety and Commins Drive will have all turn lanes lengthened and widened along with new improved signalization. The project includes new curb and sidewalks, improved sight distance, resurfacing, drainage, storm water management, traffic signals, signing, and pavement marking. This project in our industrial district and is designed to accommodate the many small businesses in order to add new jobs and retain jobs by reducing the travel time to get on the SR 6 expressway by 50%. | City of Stow | 750 | 0 to 30 days | \$1,200,000 |
| Summit | New well and maintaining existing storage tanks | The Village is seeking funding for the installation of well #5, and to telemetry to the water tower. We are currently having an engineer produce plans to replace the existing Auto-con water system controller panel. The current high and low level water tanks are in need of cleaning and painting. The current water lines were installed 70 years ago. The village has 2 inch water lines on many roads. The village is in need of more than 20 miles of water lines updated. | Village of Lakemore | 51 | 31 to 90 days | \$850,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Summit | NEO RHIO - Akron/Canton Pilot | The Northeast Ohio Regional Health Information Organization (NEO RHIO) will build out its Akron-Canton pilot. This project will connect 11 hospitals, 1,200 community physicians, the Federally Qualified Health Centers, and other providers in a health information exchange network that will improve the quality, safety, and efficiency of healthcare in the region. This standards-based exchange will build and manage the shared infrastructure required to link the original participants and be capable to add the region's 200+ pharmacies and 90+ nursing homes, connect to the Ohio Medicaid program, and integrate with regional and state public health programs. The shared infrastructure will have capacity to provide HIE services to other stakeholders in the region and throughout the state. HIE services will include governance, ePHI, eMCR, record locator service, data mapping and standardization, secure transmission, and event logging. The proposal is presented in two parts. The first provides the infrastructure required to connect hospitals and community physicians. The second part focuses on providing community physicians with EHRs and the tools required to implement them in their practices. | Northeast Ohio Regional Health Information Organiz | 40 | 31 to 90 days | \$11,500,000 |
| Summit | Transitions School | Transitions is a residential school providing education, housing, and service coordination to adopted youth at risk for entering the U.S. foster care system due to an adoption dissolution. Parents have limited options when experiencing crisis, which often results in children being placed into the state Ohio foster system. Each child entering the U.S. foster care system will cost upwards of \$8,000 a year. This cost does not include the legal costs associated with custody issues or visits involved in the child's case. Transitions is a parent paid program that provides an alternative to the state entering the public system. Transitions School will accept up to 40 children K-12th grade for the residential program. The day school will accept 40 additional children for education only from the local community, who are unable to be maintained in a traditional school setting. There will be a saving to the child's school system, as there will be no expense for the child's education, transportation and special services. This program will offer a much needed service for a vastly growing population, which will result in the savings of potentially millions of dollars of the state. | Transitions School | 37 | 181 days or more | \$500,000 |
| Summit | Turning Corners | There is an estimated 8000 children and over 50,000 adults are uninsured in Summit County, Ohio alone. Turning Corners hopes to provide mental health services to those low income and uninsured individuals, children and families. This program will be facilitated by Turning Corners Counseling and Support Center which is certified by the Ohio Department of Mental Health. Direct service staff will be licensed Social Workers and Counselors through the Counselor and Social Worker Board of Ohio. Services will target individuals residing in shelters or transitional housing who may be experiencing homelessness, domestic violence or other at-risk activities. Services will include but not be limited to individual, group and family therapy, case management, in-home family preservation, psychoeducation, parenting education, and crisis intervention. Assisting at-risk families with mental health concerns will help stabilize Ohio's at-risk families helping them become more productive citizens and less reliant on public assistance. | Turning Corners Counseling | 10 | 91 to 180 days | \$500,000 |
| Summit | Lakemore Water System Improvements | Community in Summit County with a Median Household Income of \$34,129 and a Low-to-Moderate Income percentage of 58.1%. In October 2008, the Village submitted a WSRLA Pre-Application for inclusion on the PPL for three projects to be funded at once under the same WSRLA bond. The first is a new well installation to address water quantity concerns. A test well has already been approved. That project will also include improvements to the water treatment plant, including a new electrical system, new controls for pumps and the chemical feed system, a new SCADA system, replacing other instrumentation, and a new 42" water main from Well #2, tank level transmitter, and chemical feed pumps. The second project is to rehabilitate and pair one elevated 220,000 tank and one 550,000 stand tank. The third project is to replace 1,600 meters. The total combined cost from all three projects is \$850,000. Detailed design plans are nearly finished. All three projects could go to bid very quickly. | Village of Lakemore | 0 | 31 to 90 days | \$850,000 |
| Summit | Nimisila Spillway Replacement Project \ Camp Y-Noa | The Nimisila Spillway, part of the Lake Noah Dam, was built in 1930 by the State of Ohio for the purpose of diverting water from Lake Noah and Conant Lake to the Nimisila spillway. The spillway, abutments, bridges, and channel in the village of Lakemore, Ohio in a 1930 agreement, the Department of Natural Resources is now denying responsibility for the spillway. The Nimisila Spillway is rapidly deteriorating and maintaining property, wetland, and public safety. The replacement of the spillway could begin tomorrow. The village of Lakemore has a maintenance shop and the necessary clearing of trees. Work on demolishing and replacing the spillway could begin after 181 days. | Akron Area YMCA | 60 | 181 days or more | \$1,500,000 |
| Summit | Lakemore Water System Improvements | The Village of Lakemore with approximately 3,000 people, has 1,361 water customers. It is the poorest community in Summit County with a MHI of \$34,129 and a 58.1% of the population living in poverty. The EPA has advised the Village that all of its old 2-inch waterlines should be replaced. The Village has reported 17 waterline breaks over the past year. The constant breaks have impacted the quality of the water as well as disrupted service to Lakemore's customers each time. This project will benefit all water customers by eliminating service disruptions caused by these breaks, providing better quality water, providing fire flow along these sections, and saving money by reducing emergency repair costs. The Village needs to replace approximately 5,000 linear feet of 2-inch waterlines with 6-inch waterlines. The Village has a maintenance shop and the necessary clearing of trees. The Village originally planned to replace these waterlines as part of a comprehensive Community Revitalization Plan, and paid for all of the design engineering, but later decided not to after having to scale back their project in order to divert those funds to the goodly development in Akron. The county will give Lakemore the detailed design drawings. | Village of Lakemore | 0 | 91 to 180 days | \$575,000 |
| Summit | Carbon dioxide Heat pump. | Heat pumps and refrigerators work with fluorine, several carbon dioxide absorption heat pumps have been developed. All of them suffer from one common defect, namely, the absorption used is either toxic or flammable. In this invention, a non-toxic, non-flammable absorbent is used. Carbon dioxide is the refrigerant. This is an efficient way of making use of heat energy of industrial plants and of the atmosphere for heating and cooling indoors with very little use of electric energy. At least two size heat pumps will be built, one for residential house use and another for industrial building use. This project will employ 10 to 12 employees for at least two years. | United Polymer Technology LLC | 12 | 0 to 30 days | \$800,000 |
| Summit | Park Lane Manor | Certified renovation of 1941 Defense Housing project to include asbestos remediation. | RTI Properties, Inc. | 8 | 181 days or more | \$200,000 |
| Summit | Solar Heat Panel | The existing solar panel is based on ancient technology, nearly 90 years old. The present approach is to convert Solar Heat Radiant Energy directly into Electric energy in a single step. This panel is lighter, twice as efficient and can be made in any size or shape. This works with heat, so it works even on cloudy days. Panels can be made to fit on cars, boats, houses and buildings. The construction is simple; materials are inexpensive; the panel is affordable at a fraction of the cost of existing solar panels. Prototypes can be developed in relatively short period of time; manufacturing and commercialization will follow at an accelerated rate. | United Polymer Technology LLC | 150 | 0 to 30 days | \$1,500,000 |
| Summit | Richard Howe House restoration | As the home of the Resident Engineer of the Ohio & Erie Canal, the 1836 high-style Federal Richard Howe House is being restored to serve as a Visitor Information Center, Community Meeting facility and offices for the Ohio & Erie Canalway Coalition. Located along the Ohio & Erie Canal Towpath Trail, this facility will be used by over 2,500,000 users of the recreational Towpath Trail and visitors to northeast Ohio as a trailhead and to provide educational events and programs about the Ohio & Erie Canal. Developed in partnership with the City of Akron, MetroParks, Seward Summit County, Cuyahoga Valley National Park, Summit County Government, and State of Ohio, the Richard Howe House shall interpret the heritage of the Ohio & Erie Canal, provide essential visitor services to over 2,500,000 users of the Ohio & Erie Canal Towpath Trail and stimulate economic and economic development downtown Akron. Over 20 local and national foundations have generously donated over \$1,350,000 towards the restoration of the Richard Howe House. This is a shovel ready project in which the bid has already been awarded through the CRC bid process. | Ohio & Erie Canalway Coalition | 25 | 0 to 30 days | \$500,000 |
| Summit | Butternut Lane Drainage Improvement Project, Phase | The project consists of installing around 2,000 feet of pipe to alleviate severe and frequent flooding. The storm water will be directed into a pond. Permission and an easement have already been received from the property owner. | Northfield Center Township | 10 | 0 to 30 days | \$147,258 |
| Summit | Kaiser Building - Green ReHAB | Dishes will be re-grated. The Kaiser Building built 187, is a designated historic district downtown Akron, has been vacant for several years and had fallen in disrepair. To rehabilitate for mixed use will further stimulate area development via related new construction for university student housing & educational activities. New, higher factor insulation will be required in all perimeter walls to ensure a net back flow prevention; hydraulic elevator needs major work to improve energy use. New stone front refurbishment, all new glazing for Energy-Star rating will be sought as "nothing recycled better than an old brickwork building." Reconstruction (includes of Storm Sewer & Sidewalks) of a Local Commercial Roadway that services an important Business/Retail/Food Service development. | Pointe View, Ltd. | 23 | 0 to 30 days | \$140,000 |
| Summit | Interstate Business Park Infrastructure Improvemen | Construction of Energy Efficient Restrooms, Concessions, and Pavilion Facilities | City of Green | 400 | 31 to 90 days | \$641,600 |
| Summit | Arliss Park Capital Improvements | Construction of Energy Efficient Restrooms, Concessions, and Pavilion Facilities | City of Green | 55 | 91 to 180 days | \$300,000 |
| Summit | Spring Hill Sports Complex Capital Improvements | Construction of Energy Efficient Restrooms, Concessions, and Pavilion Facilities | City of Green | 55 | 31 to 90 days | \$300,000 |
| Summit | Interstate Business Park Infrastructure Improvemen | Reconstruction (includes of Storm Sewer & Sidewalks) of a Local Commercial Roadway that services an important Business/Retail/Food Service development | City of Green | 400 | 31 to 90 days | \$1,615,680 |
| Summit | Kreighbaum Park Capital Improvements | Construction of Energy Efficient Restrooms, Concessions, and Pavilion Facilities along with Parking Expansion | City of Green | 55 | 91 to 180 days | \$150,000 |
| Summit | Boettler Road Pump Station | Relocation of Existing Pump Station to make way for New Business Park Development. | City of Green | 15 | 31 to 90 days | \$750,000 |
| Summit | Kreighbaum Park Land Acquisition | Acquisition of Adjacent Property to the North and South of Kreighbaum Park | City of Green | 0 | 31 to 90 days | \$125,000 |
| Summit | Summit County Veterans Service Commission building | New 20,000 sq ft Veterans Service Building to replace aging and non-ADA compliant facility | County of Summit | 48 | 0 to 30 days | \$2,120,000 |
| Summit | Massillon Road Sanitary Sewer Improvements | Installation of 4167 LF of new Sanitary Sewer to Support Local Business and Residential Neighborhoods. | City of Green | 90 | 31 to 90 days | \$665,775 |
| Summit | Access Road to Belden Lodge at Southgate Park | Construction of Access Road, Bridge, and Parking Area for Adaptive Re-use of the Belden Lodge | City of Green | 35 | 91 to 180 days | \$425,000 |
| Summit | Animal Control Building | Renovate 16,000 sq ft building for County Animal Control | County of Summit | 41 | 31 to 90 days | \$2,500,000 |
| Summit | Community Water Park | Acquisition of Land and Construction of Water Park | City of Green | 160 | 181 days or more | \$2,625,000 |
| Summit | Mayfair Road Resurfacing | Resurfacing of Major Collector Road 5.88 miles from Wise Road South to the Corporation Lane. | City of Green | 27 | 31 to 90 days | \$1,676,506 |
| Summit | Christman Road Resurfacing | Resurfacing of Residential Collector Road 3.83 miles from Caston Road South to Conant Road | City of Green | 27 | 31 to 90 days | \$1,092,010 |
| Summit | Caston Road Resurfacing & Widening | Resurfacing and Widening of Major Collector Road 2.2 miles beginning at South Main Street and ending at Arlington Road | City of Green | 27 | 91 to 180 days | \$1,080,000 |
| Summit | State Route 619 (Turkeyfoot Lake Road) & Pickle Ro | Reconstruction of Major Arterial Intersection inclusive of Reconstruction of Existing Thru-Lanes, the Addition of Dedicated Turn Bays, and Improvements to Signalization | Administrator | 35 | 91 to 180 days | \$2,000,000 |
| Summit | Franks Farm Business Park | Site Development of and Infrastructure Construction for a Mixed Use Business Park located at the Intersection of SR 241 and Graybill Road | City of Green | 800 | 181 days or more | \$3,243,000 |
| Summit | Central Fire Station Renovations | New Roof & Brick Tuck Work, Energy Efficiency Improvements. | City of Green | 45 | 31 to 90 days | \$200,000 |
| Summit | State Route 619 (Turkeyfoot Lake Road) Resurfacing | Resurfacing of entire Major Arterial 6.10 miles from Corporation Lane to Corporation Lane | City of Green | 27 | 31 to 90 days | \$1,739,232 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------|----------------|--------------------|---------------------------|
| Summit | Akron Canton Corporate Park Expansion | Expansion of the Existing Akron Canton Corporate (north and west) to SR 619 | City of Green | 800 | 181 days or more | \$1,134,903 |
| Summit | Summit County Jail Renovation & Upgrading | Upgrade door controls, locks, and communications systems | County of Summit | 204 | 91 to 180 days | \$3,000,000 |
| Summit | John Torok Senior & Community Center Bldg Addition | Addition to existing building and Energy Efficient Improvements. | City of Green | 35 | 91 to 180 days | \$350,000 |
| Summit | Union Square Mixed Use Development | Construction of Public Roadway (inclusive of utilities) to Spur the Development of a Town Center in the City of Green (100 acres) | City of Green | 600 | 181 days or more | \$1,270,038 |
| Summit | Summit County Jail HVAC upgrades | Replacement of HVAC equipment and controls. | County of Summit | 204 | 31 to 90 days | \$3,000,000 |
| Summit | Steesse Road Reconstruction | Reconstruction of 0.52 miles of a Residential Collector Road including the Addition of Curb & Gutter and Sidewalks (Multi-Phase Project) | City of Green | 35 | 91 to 180 days | \$823,600 |
| Summit | Service Facility Renovations - 5383 Massillon Road | Building Modifications & Renovations, Energy Efficiency Improvements, Construction of Bath Rooms. | City of Green | 65 | 91 to 180 days | \$500,000 |
| Summit | Arlington Road Resurfacing | Resurfacing of Major Arterial Road 1.46 miles from State Route 619 south to Greensburg Road | City of Green | 27 | 31 to 90 days | \$421,980 |
| Summit | Shriver Road Reconstruction | Reconstruction of a Residential Collector Road 1.06 miles inclusive of Storm Sewer and Sidewalks (Greensburg Road north to Steesse Road) | City of Green | 35 | 91 to 180 days | \$1,679,040 |
| Summit | Belden Lodge Renovations at Southgate Park | Adaptive Reuse Modifications, Energy Improvements, Access Roadway/Drive Improvements | City of Green | 85 | 181 days or more | \$1,000,000 |
| Summit | Summit County Parking Deck Skylight Walkway Replac | Skylight replacement over walkway | County of Summit | 6 | 0 to 30 days | \$348,800 |
| Summit | Lauby Road & Greensburg Road Roundabout | Lauby Road Reconstruction and Improvement to the Lauby Road and Greensburg Road Intersection (Roundabout) | City of Green | 35 | 91 to 180 days | \$1,900,000 |
| Summit | Historic Levi J. Hartong Farmhouse Renovations at Arlington Road & State Route 619 (Turkeyfoot Lake | Adaptive Reuse Modifications, Energy Improvements, Access Roadway/Drive Improvements | City of Green | 60 | 91 to 180 days | \$750,000 |
| Summit | Summit County Sheriff Administration Building | Reconstruction and Widening of Arlington Road and Intersection Improvements to SR619 (Left & Right Turn Bays, Signalization Improvements) | City of Green | 70 | 91 to 180 days | \$2,200,000 |
| Summit | Belden Lodge Renovations at Southgate Park | New 70,000 of administration building for the Sheriff's Office | County of Summit | 258 | 31 to 90 days | \$9,600,000 |
| Summit | State Route 241 (Massillon Road) & Steese Road Int | Adaptive Reuse Modifications, Energy Improvements. | City of Green | 85 | 181 days or more | \$1,000,000 |
| Summit | State Route 241 (Massillon Road) Reconstruction No | Reconstruction of the existing Massillon Road and Steese Road Intersection into a Roundabout | City of Green | 35 | 31 to 90 days | \$2,400,000 |
| Summit | Emergency Operations Center at Central Administrat | Reconstruction and Widening of a Major Arterial Road Inclusive of Storm Sewer and Sidewalks (Beginning at I-77 north to State Route 619) | City of Green | 70 | 181 days or more | \$4,000,000 |
| Summit | Ohio Building 3rd Floor Renovation | Multi-Jurisdictional Emergency Operations Center. | County of Summit | 20 | 31 to 90 days | \$100,000 |
| Summit | Summit County Courthouse Window Replacement | Renovation of the 3rd floor in the Ohio Building, Summit County's main administration building. | County of Summit | 264 | 0 to 30 days | \$664,466 |
| Summit | Fire Station #3 | Replace existing windows with new energy efficient windows. | County of Summit | 357 | 31 to 90 days | \$1,100,000 |
| Summit | Safety Building Elevator and Fire Alarm upgrading | Land Acquisition, Design & Engineering and Construction of New Fire Station serving the northeast quadrant of the City of Green | City of Green | 82 | 91 to 180 days | \$750,000 |
| Summit | Boettler Road Pump Station | Pump station elevation and upgrade fire alarm systems. | County of Summit | 343 | 31 to 90 days | \$1,000,000 |
| Summit | CAK International Business Park, Phase III Expansi | Installation of Existing Pump Station to make way for New Business Park Development | City of Green | 15 | 31 to 90 days | \$750,000 |
| Summit | State Route 241 (Massillon Road) Resurfacing | Expansion of the CAK International Business Park (193 acres) thereby creating Shovel Ready Sites for Business | City of Green | 1000 | 91 to 180 days | \$3,500,000 |
| Summit | Greensburg Road Resurfacing | Resurfacing of Major Arterial Road 4.56 miles from North Corporation Line to South Corporation Line. | City of Green | 27 | 91 to 180 days | \$1,297,296 |
| Summit | New Service Facility Construction on Tabs Drive | Resurfacing of Minor Arterial Road 2.26 miles from West Corporation Line to East Corporation Line. | City of Green | 27 | 31 to 90 days | \$644,371 |
| Summit | Summit County Sheriff Training Facility - Indoor R | Construction of New Service Center | City of Green | 125 | 181 days or more | \$8,000,000 |
| Summit | Goodyear - Martha Avenue Parking Deck & Skywalk | Upgrade ventilation system for practice range. | County of Summit | 10 | 31 to 90 days | \$180,000 |
| Summit | Bridgestone Skywalk | Parking deck and skywalk construction to complement Goodyear's new Global Headquarters project in Akron. | County of Summit | 3000 | 31 to 90 days | \$25,000,000 |
| Summit | Clean Coal Technology Made cost competitive | Skywalk to complement construction of Bridgestone's new Technical Center in Akron. This project is to build a model Coal fired power plant in Akron or elsewhere in Ohio to demonstrate the feasibility that coal fired power plant can be 2-5 times more efficient than the existing ones. Capturing and marketing such three waste streams, steam and uranium, from the coal ash, profitability can be increased and pollution can be decreased. At the same time, handling carbon dioxide profitably by using Polysulfonates and Sulfuric acid generates additional revenue. This model plant will be 2 to 5 MW in size and complete in 12 to 18 months. When this is built to a level that it can be shown to investors from China and India, a few orders are expected, since these countries are ready to buy US Clean Coal Technology as evidenced in the recent bid tender. | United Polymer Technology LLC | 200 | 0 to 30 days | \$40,000,000 |
| Summit | Ohio Best Rx PLUS | Increase outreach of Ohio Best Rx to be Ohio Best Rx Plus to allow all without prescription drug coverage to benefit from the state program | Envision Rx | 50 | 31 to 90 days | \$500,000 |
| Summit | Inner City School of Art | The Inner City School of Art Therapy will not only provide the a few jobs but will mostly help youth and adults as well off the street and into a positive environment that will tap into their creativity and give them hope, inspiration and a form of release as they tackle the challenges and adversity of everyday life. Also a teacher with a degree in Commercial Art/Graphic design as well as a Fine Artist. Plan to hire as many capable people as possible in the Art field to teach all the various disciplines of art. But for schools we will begin with a few artists, artists and teachers, pencils and paper that is currently available. We will eventually expand to computers as we know that computer graphics is much in demand, although we will not be an accredited formal school we plan to be a preparatory school that will accommodate 50 students. Northcoast Air services has plans in hand and a contractor selected to construct a 12,000 square foot hangar, 3,000 square foot office, teaching complex and 1,500 square foot storage. | Charity House of God | 10 | 31 to 90 days | \$10,000 |
| Summit | Hangar Development Akron Canton Airport | I have a lease contract in hand with Ultimate Jet charterers to house and maintain their charter jets in this facility. Additionally they will use the classroom for crew training. Short term this should ready project will provide the obvious construction jobs to erect the structure. This is not insignificant as new construction has all but halted in northeastern Ohio. Long term it will provide jobs at Ultimate Jet Charter through mechanics and crew to house and maintain these charter aircraft. Lastly we expect to see a steady rotation of pilots from aviation centers close through. In so doing they will help to spur the local hotel economy. | Northcoast Air Services | 15 | 31 to 90 days | \$150,000 |
| Summit | Radio System Operability Project | Currently this project is waiting on financing. Area leaders are reluctant to contribute in the current economic environment despite my willingness to contribute 20% down. We seek low interest loan guarantees and possible short term (3-5yr) low abatement as the only government assistance. A review will indicate this represents bang for the buck. | Twinsburg Police Department | 2 | 0 to 30 days | \$30,000 |
| Summit | Prospect Avenue Connector | In order to create uniform operability for the officers and dispatchers in our department we will be requesting funds to provide 40 portable radios for our officers and some spare radios to our dispatch center. The radios currently in use by officers will be four years old and in need of repair or replacement. The old radios will be turned into the vendor for repair with the hope of being reused by other public or private agencies. The funds being used will be able to retain positions in that organization as well as subcontract out to other vendors as a way of repairing the existing radios thereby retaining other jobs while doing the repair and replacement. | City of Cuyahoga Falls | 50 | 31 to 90 days | \$330,000 |
| Summit | Twinsburg Police Officer Assistance | Construct a new roadway from Front St. thru to Second St. to allow for a new vista to the Cuyahoga River and Highbridge Glens Park. | Twinsburg Police Department | 6 | 0 to 30 days | \$1,350,000 |
| Summit | Biolsoprene Recovery | The Twinsburg Police Department must increase officer staff that would be in line with population of the city. Currently our department has 33 full time officers with a population of approximately 20,000 residents. Using current accepted standards of one officer per 1,000 residents our department would need 40 officers to adequately address the civilian needs. These additional officers would be laid on staff at the end of the grant period and beyond, creating a net increase of 6 officers and a job stimulus of 6 additional professionals in the public sector. Biolsoprene TM is a bio-based renewable alternative to the petroleum-derived chemical compound isoprene. Biolsoprene can be used for the production of synthetic rubber which in turn is an alternative to natural rubber and other elastomers. Biolsoprene could make the tire and rubber industry less dependent on oil-derived products, such as synthetic rubber made from petroleum-derived isoprene. Further, isoprene may be used as a substitute for other non-oxens commonly used in synthetic materials such as styrene. Key technical and commercial requirements will be the development of advanced techniques to isolate and purify Biolsoprene, which is produced in a fermentation process. Challenges include the identification and removal of polar impurities typical of bioprocesses but not present in petroleum-derived feedstocks. These impurities are poisons for polymerization and their removal is essential. Existing techniques are based on removal of organic impurities typical of petroleum based-processes and, as a consequence, new separation techniques are needed. New fermentation, recovery, and polymerization designs will enable the successful purification and commercialization of Biolsoprene. | The Goodyear Tire & Rubber Co | 100+ | 0 to 30 days | \$5,000,000 |
| Summit | 12th and Chestnut Bv. Sewer Improvements | Replace sewer to abatement facilities | City of Cuyahoga Falls | 20 | 31 to 90 days | \$400,000 |
| Summit | CARBON DIOXIDE HEAT PUMP | This heat pump uses carbon dioxide as the refrigerant. The absorbent is non-toxic, non-flammable liquid mixture. This is highly efficient in transferring from a lower temperature location to another of higher temperature utilizing mechanical energy to achieve that. This supplied energy is small compared to the energy that becomes available. This can be built in small sizes for HEATING AND COOLING homes, AND LARGE ONES FOR INDUSTRIAL BUILDINGS. | UNITED POLYMER TECHNOLOGY LLC | 50 | 0 to 30 days | \$3,000,000 |
| Summit | Solar Heat Panel | The existing Solar Panel is based on ancient technology of the 1930's, involving photovoltaic cells. This is heavy and inefficient. Advanced technology recently developed is used to convert the radiant heat energy of the sun directly into electric energy. No heating of the water is involved. This solar heat panel is of light weight, can be made in any size, for cars, for houses and industry building. Since this panel does not rely on bright sunlight, it works even on cloudy days. Heat radiations from any source also can work for operating Solar Heat Panel. It is very easy to manufacture and the materials needed to manufacture this Solar Heat Panel are inexpensive. The electricity generated is direct current. | UNITED POLYMER TECHNOLOGY LLC | 50 | 0 to 30 days | \$1,500,000 |
| Summit | Respect. Program | Akron Children's Hospital (ACH) in collaboration with the member agencies of the Teen Dating Violence Prevention Task Force, proposes to continue the implementation of the Respect program, a teen dating violence and sexual assault prevention program targeting the adolescents of Summit County. This peer-led, school-based program utilizes dramatic vignettes depicting common teen conflicts/concerns and are conducted by student peer leaders, or "Teen Ambassadors," in Summit and Cuyahoga counties. | Akron Children's Hospital | 3 | 0 to 30 days | \$80,000 |
| Summit | Building Healthy Kids Summit County | The Building Healthy Kids Summit County initiative represents a critical health prevention programming that is a collaborative effort between various Akron Children's Hospital pediatric medical specialties, including the divisions of Adolescent Medicine, Sports Medicine, Endocrinology, Nephrology, and Cardiology, and families, community agencies and schools. Services provided include the Future Fitness Clinic, and the Future Fitness Clubs program implementation at schools and local recreational facilities. | Akron Children's Hospital | 5 | 0 to 30 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Summit | Entrepreneur/Small Business Resource Center | Start an Entrepreneur/Small Business Resource Center that will provide tools for unemployed or underemployed persons who are considering starting their own business, or for present business owners looking to grow their business. Entrepreneurship classes would be provided, along with workshops in such areas as "Writing a Business Plan," "Strategic Planning," "Human Resources," "Marketing," "Building Value in Your Business" and "Growing Your Business". Also included would be one on one coaching, peer to peer discussion groups, and a repository of helpful materials in different media formats, including forms and templates, current helpful internet sites and appropriate sample documentation. | Twinsburg Chamber of Commerce | 25 | 0 to 30 days | \$10,000 |
| Summit | Electronic Health Records Epic System | The Electronic Health Records Epic System will be the basis of Akron Children's Hospital Regional Information System. Epic will replace paper medical documentation throughout the organization and its five sites. The first step in implementation of the Epic software system will be to provide an Electronic Medical Record (EMR). In the Epic EMR there will be one chart for the patient. The chart and all information within it will be available instantly throughout the system for use by physicians, nurses, and other service providers. In addition, the record provides decision support, enabling providers to make better clinical decisions and formulate better treatment plans. Epic will improve patient safety. Legible writing is replaced with typed readable, searchable documentation. Furthermore, all the patient's information in one database can be utilized to prevent dangerous mistakes from occurring. The Epic computer will automatically check for drug allergies, interactions, and instantaneously provides feedback if any incompatibility is found. Another way Epic software improves care of patients is by aggregation of data to identify trends of best practices for this project will be used to accelerate the maturation and best demonstration of adult acute care level (ACC) based generator sets for the DOO. | Akron Children's Hospital | 52 | 31 to 90 days | \$1,000,000 |
| Summit | Development of Fuel-Efficient Fuel Cell Generator | Work in this area is already underway in a cooperative effort between Lockheed Martin MS2 of Akron, Ohio (17th District) and Technology Management Inc. (TMI) of Cleveland, Ohio (14th District), along with support from Stark State College of Technology of North Canton, Ohio (16th District). Development of one fuel cell stack technology and general system development is currently underway, funded by a combination of internal R&D funds and Ohio Third Frontier funds. | Lockheed Martin MS2 | 200 | 0 to 30 days | \$15,000,000 |
| Summit | ICEP After School Programming | Funding of this project will be used to accelerate the maturation of this technology towards readiness for DOO insertion. Specific areas of work will include transferring cell and stack technologies towards manufacturing readiness, development and demonstration of complete general system including but not limited to: balance of plant, control and power electronics, and integration of the overall system to DOO standards. As part of this project, Lockheed Martin and TMI will continue their cooperation with Stark State College of Technology, providing | ASIA, Inc. | 12 | 31 to 90 days | \$125,000 |
| Summit | OPEN M Free Medical, Dental, and Eye Clinic - Oper | ICEP is an after school program that provides homework tutoring, alcohol and other drug (AOD) prevention education, life skills education, health and wellness education, and girls and boys scouts activities to refugee and immigrant youth (8-12). The ICEP program currently has over 70 youth enrolled. With the increase in funding, we would like to serve our current clients and expand to another school to serve another 300+ clients. Ninety percent of our ICEP clients are non-English speakers and have only arrived in the US. This clinic is unique in that it is the only free clinic in Summit County. A total of 145 volunteers including doctors, nurses, lab technicians, and pharmacists provide both primary and secondary health care at no charge. All prescriptions prepared by our pharmacy are also free of charge. In 2008, the clinic scheduled over 3000 patient visits and conducted over 1400 lab tests valued at \$41,157, and the pharmacy filled over 6000 prescriptions valued at \$1,052,844 at no charge to the patient. Governor Boehner endorsed his healthcare plan at the OPEN M program a few years ago. | Opportunity Parish Ecumenical Neighborhood Ministir | 2 | 0 to 30 days | \$50,000 |
| Summit | Economically viable, patent pending approach for a | The new clinic focuses on providing competent basic and secondary health care for persons in Summit County who do not have health insurance or cannot afford health insurance. Many people who may make the choice not to pursue healthcare due to costs receiving healthcare through the OPEN M clinic as shown. The OPEN M clinic as shown. The approach is a patent pending method for the growing of algae, without the need for a complex infrastructure and its cost is shared with existing processes thereby minimizing any expense. This commercialization will revolutionize the biodiesel industry not only in Ohio, but throughout the world and provide a strong foundation for the long term sustainability of the industry. | Creative Fuels, LLC | 7000 | 0 to 30 days | \$1,000,000 |
| Summit | Biodiesel Production | This project consists of the construction of a three million gallon biodiesel facility for the production of biodiesel fuel. It is intended to use waste yellow grease as the feedstock for the facility initially and evolve into using algae oil. | Creative Fuels, LLC | 25 | 0 to 30 days | \$2,700,000 |
| Summit | Tallmadge High Service / Pressure Water Main Impro | This project will install 8,000 linear feet of water service and a water pump station in the northeast quadrant of the City of Tallmadge. This project will increase water pressure to 75psi allowing for increased water pressure and the ability to use more than one water fixture at a time. This project will more importantly increase water flows from 380 gallon per minute to between 650gpm and 2,000 gpm allowing for adequate fire flow and protection. This project will serve 997 households or approximately 2991 individuals. The bid packet is completed and can actually go to bid within a week and be under construction within 30 days. | City of Tallmadge | 110 | 0 to 30 days | \$1,500,000 |
| Summit | Energy Savings Validation Software | To further develop existing software capable of measuring and verifying energy usage and costs related to Energy Efficiency projects, and Carbon/Sustainability Reporting. Our business experience indicates that many EE projects do not measure actual savings after project completion. Actual savings and ROI are often estimated using "projected" or "average" unit costs resulting in under-reporting or over-reporting actual project savings. Our existing proprietary USA Energy Software already is capable of calculating actual savings utilizing our National Rate Library. The additional funding would assist us in program enhancements, including web-based applications, and web-based carbon reporting. | Energen Inc. | 7 | 0 to 30 days | \$225,000 |
| Summit | Norton Interstate Industrial Park | We anticipate that both contractors and end-users of EE projects will welcome a tool for accurate measurement of energy savings. We plan on marketing our software on a subscription basis through a network of sales agents which could cause the total number of new or re-rated jobs to increase from 7 to approx. 100. Energen Inc., established in 1981, is a National Energy Service Company headquartered in Akron, OH | City of Norton | 350 | 0 to 30 days | \$2,000,000 |
| Summit | Oak Street Sanitary Sewer Extension | The project will renovate and upgrade the Norton Interstate Industrial Park which is the home of 11 commercial/industrial businesses including the headquarters of S.A. Comminco, an international fire suppression company. The renovation will help to retain 300 existing jobs at the 11 companies and allow S.A. Comminco to expand and create 50 new jobs. The project includes: construction of new sanitary sewer to replace grinder pumps and a package treatment plant, storm water facilities including bio-retention and flood control, and the reconstruction of Newpark Drive. The bio-retention facilities will clean storm water and the replacement of the package treatment plant with central sanitary sewer will eliminate a sewage discharge point. These infrastructure improvements will upgrade the water quality of Pigeon Creek which is a tributary of the Tuscarawas River. | City of Norton | 200 | 0 to 30 days | \$270,000 |
| Summit | Wadsworth Road and Summit Road Sanitary Sewer Exte | Sanitary sewer extension to accommodate commercial development in the Cleveland-Massillon Road Corridor which is identified in the City of Norton Comprehensive Plan as prime for residential use development that encourages pedestrian traffic to the "center" of Norton. Sanitary sewer extension to a commercial/industrial district identified and zoned as a prime development area in the City of Norton Comprehensive Plan. The land area is vacant and cannot be developed without the extension of sewer. | City of Norton | 110 | 31 to 90 days | \$450,000 |
| Summit | Cleveland-Massillon Road Waterline Extension | Waterline extension to a historic commercial district at the intersection of Cleveland-Massillon Road and Wadsworth Road. This district has several historic structures including a tavern (currently a tavern/restaurant) and a hotel (currently a retail antique store). The waterlines will allow full use of the tavern/restaurant which is hampered by limited fire suppression capabilities. Other retail/commercial uses can locate and/or expand at this location. This area has been identified as a historic preservation district in the City of Norton Comprehensive Plan. | City of Norton | 50 | 31 to 90 days | \$450,000 |
| Summit | Greenwich Road Sanitary Sewer & Waterline Extensio | Repair and resurfacing of the main north-south arterial roadway in the City of Norton as part of the mixed use/commercial development plan for the Cleveland-Massillon Corridor identified in the City of Norton Comprehensive Plan. | City of Norton | 100 | 31 to 90 days | \$360,000 |
| Summit | Easton Road Extension | Extension of sanitary sewer and water lines to the planned new City of Norton central fire and EMS station (to be submitted as a separate project). | City of Norton | 30 | 0 to 30 days | \$180,000 |
| Summit | Norton Central Fire Station | Grading, storm sewer and roadway extension to provide access to the planned new City of Norton central fire and EMS station (submitted as a separate project). | City of Norton | 50 | 31 to 90 days | \$360,000 |
| Summit | Telemedicine | Construction of a new central fire and EMS station at the Norton Municipal complex. The fire station project is tied to the Easton Road extension and the Greenway Road water and sewer extension submitted as separate projects. The central fire station location is identified in the City of Norton Comprehensive Plan. The potential of telemedicine to improve access to quality health care plus such things as: will be demonstrated through this project. In each electronic communications equipment enabling real-time, inter-active patient examination and pediatric specialty consultation. Telemedicine will link hospital patients and physicians in the Mahoning Valley to telemedicine centers at the Akron Children's Hospital main campus, saving lost time and expense of patient and physician travel between the sites to accomplish the same ends. | Children's Hospital Medical Center of Akron | 5 | 91 to 180 days | \$200,000 |
| Summit | rehab restoration | The system would establish telemedicine sender sites for pediatric patient evaluation consisting of a monitor, scanner, digital otoscope, microscope, and high definition camera. Fully equipped telemedicine carts will be based in the Emergency Department, the Hospital Lab, and Outpatient Care Centers. Movable telemedicine provider receiver sites will include a monitor, desktop PC, and digital reception components. Provider receiver sites will be available in the Trauma Center, the Critical Care Unit, and subspecialty areas of pulmonary medicine, nephrology, orthopedics, developmental behavior, endocrinology, and psychiatry for care and consultation. | Greenleaf construction | 16 | 0 to 30 days | \$500,000 |
| Summit | Y-Bridge Rehabilitation | Three 7' wide houses that are bonded and reinforced and involve them to sell at an affordable cost and bring back value to neighbor hoods while giving local trades the ability to bid on the job at hand. | City of Akron | 150 | 31 to 90 days | \$7,500,000 |
| Summit | Barteges Street Bridge Rehabilitation | Project will include rehabilitation of bridge decks on both spans including gusset plate rehab and new fencing on the bridge. Project will extend bridge life 15 years. | City of Akron | 40 | 31 to 90 days | \$2,500,000 |
| Summit | akron-cleveland Road Bridge Replacement | Rehab the bridge deck and extend the towpath north and south under the bridge. Outcome is to extend life of the bridge 15 years. | Village of Boston Heights | 20 | 31 to 90 days | \$800,000 |
| Summit | Allen Rd. & McCauley Rd. Sanitary Sewer | Study and engineering for replacement of the Akron-Cleveland Road Bridge in the Village of Boston Heights. Current bridge status 4P by 2008 report. Bridge crosses Summit County MetroParks B&W Hike Trail and accesses Blossom Music Center in Summit County. Construction funds are available by the Village of Boston Heights needs funding for the study and engineering to learn the lands. Bridge closure will impact centers south of bridge and is the next option after road and locked limit sanctions that have a place for several years. Traffic counts are above 10,000 vehicles daily. Project will consist of 2861 L of 8" sanitary sewer and 4611 L of 12" sanitary sewer to initially service 140 acres of industrial zoned property and 9 residential homes. | City of Stow | 700 | 31 to 90 days | \$1,300,000 |
| Summit | Arndale Road / Ritchie Road Retention Pond | This is a regional retention pond designed to alleviate downstream flooding of residential areas that experienced flooding in 2003 and 2004. Land was purchased by City of Stow in 2007. The proposed pond will contain 4.5 acre-feet sitting on approximately 2.89 acres of land. The project is currently being reviewed by the Army Corp. of Engineer's and the Ohio EPA. | City of Stow | 10 | 31 to 90 days | \$480,000 |
| Summit | tradesmen international | sewage pump station and force main, improve environment. | western reserve consultants inc | 45 | 31 to 90 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Summit | Tallmadge North Thomas Road Waterline | This project will replace a 78 year old waterline along North Thomas Road in the City of Tallmadge. This area has experienced fourteen waterline breaks since 2000. This project will replace 3,447 linear feet of 12 inch waterline as well as the necessary connections. This project would serve 17 households or approximately 633 individuals. This area consists of approximately 150 residential lots. This area also serves the Saxon Village Family Assisted Housing complex. Continual disruptions of service as a result of breaks in this old line makes this a much needed project. The bid packet is prepared and the City can bid this project within one week of notification. | City of Tallmadge | 45 | 0 to 30 days | \$350,000 |
| Summit | Completion of Third Lane Construction | Construction of 12.2 lane miles of third lane on the Ohio Turnpike in Summit County near Hudson, Ohio. Completion of this project will increase capacity and service level to customers traveling the Turnpike between Mileposts 179 - 187. The Project is estimated to create 250 construction jobs. This Project can be bid and scheduled for the start of construction within 90 days. | Ohio Turnpike Commission | 250 | 31 to 90 days | \$32,800,000 |
| Summit | Greenwich Road resurfacing | Repair and resurfacing of the primary east-west arterial roadway in the City of Norton. | City of Norton | 50 | 31 to 90 days | \$540,000 |
| Summit | Frank Boulevard | Project includes installation of a new 12" pipe from the intersection of a residential intersection with West Third Ohio Street to the intersection of Frank Boulevard and West Third Ohio Street. Business is a viable long-term business, but the service area has become over/hauling. Debt relief is needed immediately. Auto wash is a newer facility in a depressed area of Akron, Ohio. | City of Akron | 50 | 31 to 90 days | \$7,000,000 |
| Summit | Auto Wash | Unfortunately, failure of this business will add yet another vacant property in an already under-served urban neighborhood. As most areas within the current economic environment has left it all but impossible to get any relief from banks that have all but shut off the flow of funds for such projects. Let me state again that this business can succeed and be profitable if it can only get out from under the heavy debt burden currently present. Failure of this business will have a substantial negative impact on the surrounding area and for the employees that rely on this business to provide their families. | Philo Two, Inc. | 2 | 31 to 90 days | \$450,000 |
| Summit | Hilbish Avenue | Please let this stimulus money go to those in need - small businesses and American families. Hilbish Ave reconstruction from E. Market Street to Triquet Blvd | City of Akron | 75 | 31 to 90 days | \$6,000,000 |
| Summit | Summit Road resurfacing | Collector roadway repair and resurfacing following replacement of an inadequately sized Barberton waterline. (The waterline project is the final design stage and will be funded separately through a loan to the City of Barberton). The Summit Road area is the home to a number of small businesses/industries and the waterline replacement and road upgrade will help to retain jobs (100) and allow new and/or expanded businesses to locate in this industrial zoned district. Approximately 50 construction jobs will be created by the waterline and road upgrade. | City of Norton | 150 | 91 to 180 days | \$216,000 |
| Summit | Sanitary trunk sewers, pump stations and force main | The top priority identified in the City of Norton Comprehensive Plan is the development of trunk sewers, pump stations, and force mains along the entire west side of the City, which will serve service areas. The long-term economic development potential of Norton depends on these sewer infrastructure projects to the non-served areas of the City. Conservative estimates are 1000 potential jobs could be created by the sewer infrastructure project. In addition, there are approximately 2000 septic systems in the City of Norton. The majority of these septic systems are being replaced due to failing due to inadequate soil conditions and inadequate a working system. Many of the systems are being replaced to open up new business districts. The sewer infrastructure will include sanitary sewer lines, pump stations, and force mains. The project will include 2000 septic systems, 2000 12" force main, 2000 12" sanitary sewer, and 2000 24" sanitary sewer. The project will include 2000 septic systems, 2000 12" force main, 2000 12" sanitary sewer, and 2000 24" sanitary sewer. The project will include 2000 septic systems, 2000 12" force main, 2000 12" sanitary sewer, and 2000 24" sanitary sewer. The project will include 2000 septic systems, 2000 12" force main, 2000 12" sanitary sewer, and 2000 24" sanitary sewer. | City of Norton | 1000 | 91 to 180 days | \$9,000,000 |
| Summit | Transitions Prisoner Re-entry Workforce Development | The Akron Urban League's Transitions program currently assists non-violation sexual offenders through barriers that prevent them from securing employment. Staff assists in job training, job placement, and management, selection, job placement assistance and follow up. Program participants complete an intense job readiness course that prepares them for seeking and maintaining employment. Case management supportive services are also provided to assist with barriers participants may have during the course of the program. In an effort to ensure successful re-entry into our communities, the Transitions program is prepared to expand and provide case management services to inmates prior to their release from incarceration. | Akron Community Service Center & Urban League | 80 | 31 to 90 days | \$150,000 |
| Summit | Tallmadge Avenue | Tallmadge Avenue rehabilitation from Home Ave to Route 8 includes new pavement signals sidewalk and the plans are complete | City of Akron | 55 | 0 to 30 days | \$5,000,000 |
| Summit | Sieberling street relocation-Goodyear | This project includes the design of a relocation of existing Sieberling Street in the 176 corridor area. This project will provide traffic flow in and throughout the area around Goodyear and 176 | City of Akron | 100 | 91 to 180 days | \$950,000 |
| Summit | Market Street-Pershing to Revere | Market Street rehabilitation from Revere to Pershing includes new pavement sidewalks, street lighting, to up grade this section of Market to federal standards | City of Akron | 150 | 91 to 180 days | \$5,000,000 |
| Summit | Debt Assistance | Decrease of outstanding debt. Savings from debt will allow an increase in spending at the Home Depot for housing improvements causing real economic growth. The Akron Urban League's has a full service "Workforce Development Program" that focuses on empowering individuals in becoming self-sufficient. Our program assist with all components of the job search including providing job leads, interviewing techniques, resume preparation, career and skill assessments. | Michael Bujak | 1 | 0 to 30 days | \$22,000 |
| Summit | Workforce Development-General Employment | The Workforce Development Department at the Akron Urban League helps individuals during the job search process. Our clients have traditionally included new, unskilled, semi skilled workers, unemployed, underemployed, and down sized workers, who have limited education, low level job skills, and poor employment histories, many of whom previously relied on TANF (Temporary Assistance to Needy Families). However, due to the current economic downturn, our target audience has changed. We see new graduates with individuals who are self educated professionals, degreed clientele, and executive level managers who have recently become unemployed and are looking for jobs. | Akron Urban League | 150 | 31 to 90 days | \$50,000 |
| Summit | Tallmadge High Service / Pressure Water Main Imp'r | The Akron Urban League (AUL) proposes to expand our Workforce Development Program (1) developing and maintaining an on-line diversity recruitment/employment search engine and (2) creating opportunities for candidates This project will install 8,600 linear feet of water service and a water pump station in the northeast quadrant of the City of Tallmadge. This project will increase water pressure in this neighborhood from 35 psi to 75 psi allowing for increased water pressure and the ability to use more than one water fixture at a time. This project will more importantly increase water flows from 360 gallons per minute to between 600 and 2,000 gpm allowing for adequate fire flow and protection. This project will serve 997 households or approximately 2,991 individuals. The bid packet is prepared for this project and can actually go to bid in a week from notification. | City of Tallmadge | 140 | 0 to 30 days | \$1,500,000 |
| Summit | Wilbeth Road-Dallas to I-77 | This project includes the rehabilitation or removal and replacement of concrete pavement from Dallas Ave to I-77. | City of Akron | 150 | 91 to 180 days | \$3,000,000 |
| Summit | Battle Avenue | Project includes removal and replacement of concrete pavement | City of Akron | 100 | 31 to 90 days | \$1,000,000 |
| Summit | Glenwood-Rt 8 to Tallmadge | Slurwood from Rt 8 to Tallmadge would be a pavement, curb and sidewalk rehabilitation project | City of Akron | 120 | 91 to 180 days | \$2,500,000 |
| Summit | The Schumacher Cascade Mills Site | The Schumacher Cascade Mills Site project will be an expansion of the Cascade Locks Park. The Cascade Locks Park will then become the largest amount of open green space within the City of Akron. There has been a significant amount of investment in this particular area of Akron, as projects such as AMH's housing, Lohs and Tomlinson's, and initial rehabilitation of the Millard Stone. The Cascade Locks Park has been called Akron's Urban Park, and our historic "Musli! Blow" serves as Akron's water center and museum regarding life along the Ohio & Erie Canalway. The Towpath Trail also runs through the park and is now connected to downtown Akron. This park passes over 75,000 visitors per year, and has served as an educational tool for over 1,800 children in 2008. By expanding the park, visitors is expected to increase to 115,000, with 30,000 being youth. The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. | Cascade Locks Park Association | 20 | 0 to 30 days | \$350,000 |
| Summit | City of Hudson Entrepreneurship Center | The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. The Mills Site will outline the historic Schumacher Cascade Mills, owned by Ferdinand Schumacher, once stood. There will be a 13 interpretive panels describing the historic significance of the site and its importance in building the City of Akron into a hub of activity. | Hudson Economic Growth Board | 50 | 181 days or more | \$2,100,000 |
| Summit | I-76 corridor connector-Eagle Street | Table B1 is a new road which will accommodate traffic that flows from Goodyear to and from I-76. This roadway connects Martha Ave and Sieberling Street which are both connectors to I-76 | City of Akron | 115 | 91 to 180 days | \$4,000,000 |
| Summit | Operation Debt Relief | Pay off my student loans. Without the generic burden of the federal governments interest rate on my loans, I could single handily turn the economy around. | Students for Debt Relief | 1 | 0 to 30 days | \$58,000 |
| Summit | State Street Bridge Design | State Street Bridge Design this design is to rehabilitate the State Street bridge deck and approach slabs | City of Akron | 1130 | 31 to 90 days | \$500,000 |
| Summit | I-77/I-277 Corridor Connector PH 1 | I-77/I-277 Corridor Phase 1 is the rehabilitation of Main Street between I-277 and Freestone Blvd. This project will improve traffic flow and benefit the Bridge/Freestone Park Area in which users access this corridor on a daily basis. | City of Akron | 150 | 91 to 180 days | \$8,000,000 |
| Summit | I-77/I-277 Corridor Connector Phase 2 | This project will include the corridor of Main Street from Cole Ave to Crozier Street and include new pavement sidewalk curb drainage. | City of Akron | 120 | 181 days or more | \$8,000,000 |
| Summit | Broadband | This corridor extends and finishes the connection with I-277 and provides a traffic flow improvement. This project will provide wireless broadband service to areas within the city corporation limits. It includes the installation and equipment in order to provide a fully functional system | City of Akron | 112 | 181 days or more | \$4,000,000 |
| Summit | Green Leaf Cleaning | I am an Army Veteran after loosing my job of 10 years and not being able to find second work in ohio. I am starting a commercial cleaning business. I need marketing people and people to help with the cleaning. We will market our cleaning systems and perform these tasks and with the work and good management will continue to grow a strong customer base, continue to add employees and do our part to get America back on track. | Green Leaf Cleaning Co. | 10 | 31 to 90 days | \$10,000 |
| Summit | Energy Saving Home Improvements | Will hire local workers to do home improvements thus keeping the money locally. | Home Owner | 10 | 31 to 90 days | \$15,000 |
| Summit | Reworking Woodworking | To update the Industrial Technology classes at Copley High School. This update will bring new technologies to the school in which students can use traditional technical jobs such as woodworking, carpentry, digital photography. In which students may choose to go to a local school or college. All school programs will also be offered for community members to introduce them to new technologies. This program may not employ lots of people but will introduce students to new avenues of study. What skills taught here will hopefully influence students to follow in engineering or technical fields here in Ohio. | Copley High School | 2 | 31 to 90 days | \$100,000 |
| Summit | Students to Washington | I think it is important for students to see Washington DC | Innes Middle School | 10 | 181 days or more | \$10,500 |
| Summit | getting my life tougher | I work in a school that has all students on free lunch and food stamps it's rare for them. I think it would be a positive impact on their lives and also create work for the school in charge of the program and pump money in the economy of Washington and Akron. I would like to get a car so I can get a job so I can pay my child support. It would be alot easier for me to get my life tougher and be able to stand on my own two feet. | N/A | 1 | 31 to 90 days | \$15,000 |
| Summit | Solar panels & efficient heating & cooling | I would like to improve the efficiency of my older home. Built in the early 1900's the house was not built to handle the OH weather. We need a more efficient furnace with air conditioning. I would like to install solar panels to power our home and give back extra energy generated. The first step would be replacing windows. All of these steps would make heating an cooling our house more efficient and affordable. It would provide some job security for the small businesses doing the installing. Finally with the solar panels we would be able to generate a renewable energy and share our overstock with the community. Thank you for your consideration. | Self | 5 | 31 to 90 days | \$12,000 |
| Summit | New Restaurant | New Restaurant to be located in Twinsburg | Frankiebones Pour House | 20 | 181 days or more | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Summit | Law Enforcement (Officer Safety & Training) | New Police Cars, Education Reimbursement Weapons, Tasers, Protective Vests Training, SWAT Vehicles, SWAT Team Training | Highland Hills Police Department | 20 | 31 to 90 days | \$60,000 |
| Summit | save our home | I have lost my job and my status was closed due to the economy. I was the major money winner for our family and now its gone. We have no way to pay our mortgage and will lose our home making us homeless. We were over late on a payment until all of our savings was gone. We did not buy more houses than what we could afford, we know better. My wife is going to school to be a pm to help our family, but I fear that she will not be able to bring in on top of the financial problems that have becoming to us. | stabilize our family | 2 | 0 to 30 days | \$165,000 |
| Summit | Uniforms for middle schools athletic teams | Teach in an inner city school. Our sports teams need uniforms for their seasons. The teams have not had new uniforms in several seasons and could use this money to outfit all of our programs. | Akron Schools | 15 | 91 to 180 days | \$8,000 |
| Summit | tuition | Each team has about 15-20 athletes and I am estimating the uniform costs to be around \$100 each sport. Need to go back to school to further my education so I can earn a living for my family. I was laid off in October and the store I worked in was closed in December. I was in retail for 15 years and with the current economy, there are no jobs available. I would then focus on family law. I am also interested in donating my time using my law degree to help the community and low income people. | utilize our family | 5 | 31 to 90 days | \$40,000 |
| Summit | Our Family Struggle | This is a request for my 13 month old son and myself. I am a single mother and God blesses me with my little miracle. I know life would be so difficult raising my son by myself but I had to do the right thing and give him a good life. I learned on going back to work after he was born but realized how difficult this was because we are very attached to each other since I still nurse him. I have gotten behind on all my bills as well as my last car that got repossessed because of how bad this economy has been. I am so scared I am not going to be able to catch up and provide for my son the way he deserves. I am asking for some help, not for anyone to feel sorry for us, but to help us get on our feet and be able to move forward. I know I owe this to him but do not know of any other way we will be able to make it. Please accept our request so we can have a better chance of making ends meet. This would also allow me pay someone to stay with him part time so I can go back to work. Thank you and God bless you all! I am so hopeful our world will see a better light now that President Obama is helping us. I have so much respect for him! And God Bless America | Family | 1 | 0 to 30 days | \$10,000 |
| Summit | Home Cleaning Services | Increase better work conditions and employ more workers for stay at home moms who cannot work regular 9-5 jobs. The money would be utilized for more employees (3), fuel efficient/energy vehicles (2), computers (2), advertising, and general cleaning supplies. Moms of school aged children, who want to work and also stay at home for their families would work hours that suit their own families, cleaning houses for the elderly and also for those households in which both parents work and do not have the timeability to provide a clean atmosphere for their families. The hope is to eventually employ 10-15 moms that can work while their children are in school and then be home to pick them up at the bus stop after working. | Mom and Daughter Home Cleaning Service | 5 | 0 to 30 days | \$75,000 |
| Summit | debt relief | Thank You. | individual | 0 | 0 to 30 days | \$900,000 |
| Summit | Commissary expansion | debt relief for government backed loans. The purchase and installation of new food packaging equipment and expansion of the existing food packaging equipment. | Joyce Vending & Food Service | 7 | 31 to 90 days | \$75,000 |
| Summit | Renewable Wind Power Installation | Current wind energy strategy in northeast Ohio is to place wind farms offshore in Lake Erie. An alternate strategy is to place wind turbines on ridges to effectively capture unobstructed wind energy. Summit County is so named because of its high elevations, and Richfield Township and Village to the west. The Fry firm is situated in Richfield Township, Summit County on a 1,205 foot elevation ridge, and can thus effectively capture wind energy. I propose siting a single test wind turbine to determine the practicality of this energy option for similar related locations. Funding for a single, Northwind 100 kW turbine is requested. Power generated to be sold to the grid. Landowner share of revenue to be determined. Remainder to the benefit of the Township and Village of Richfield. Cf: http://enr.conceptslus/page_uk-206 | Richfield Energy Solutions | | 0 to 30 days | \$500,000 |
| Summit | education stimulus paid back to students for the o | Using the money to help all college students who have had to pay for the outrageous cost of books, and supplies needed to attend a university or college. With the economy the way it is, all students have estimatedly spent \$400 for books and supplies this semester alone. This money could have been used towards actual tuition and further an education rather than spending it on books that you cannot use again, or will only receive 1/3 of the cost if traded back in. This money could be set aside in an educational savings account at the university. Many colleges have LD cards that you can use like a debit. If a bill is not due per semester of say \$100 on the card, that \$100 extra a student can keep in their pocket to pay towards credit hours, transportation, ect. | self | 0 | 31 to 90 days | \$4,000,000 |
| Summit | A PLACE TO CALL HOME | BUYING A HOME FOR MY 2 KIDS GIVING THEM A SENSE OF TRUST AND SECURITY, THANK YOU | THE RINEHART FAMILY | 2 | 91 to 180 days | \$100,000 |
| Summit | The Inner city developmental Project | the restoration of isolated youths through various initiatives such as acquiring skills such as construction, community rebuilding reading and writing skills as well as a continued development of people skills and tolerance issues. | Citizens For The Mentoring Of Troubled Youths | 10 | 31 to 90 days | \$75,000 |
| Summit | S.O.S. - Securing Our Students | Installing the SOS - Securing Our Students Patented program in all of the primary, secondary and post-secondary schools & universities in the state either public or private. This system would provide standard colored blueprints plus signage of the facilities. These standard digitized blueprints would be provided in real time responses for response in an emergency situation. The accurate digitized blueprints include all of the critical information that a first responder would need in a crisis situation, an utility shut-offs, AED locations, room numbers, door swings, interior & exterior door locations in addition to complete floor plans. These digitized plans would be put on ONE2GO for use by all first responder groups in the state. This would encompass the original intentions of OH HB422 which requires this info from all schools & provided to local first responders and the Ohio AED but not originally funded. The SOS System is currently active in over 100 schools throughout the state. This program was presented during the First Lady's State School Summit and the U.S. Government's Ohio Campus Safety Summit in 2008 & was determined as a viable need for the state. | Foremost Safety Solutions, Inc. | 100 | 0 to 30 days | \$25,000,000 |
| Summit | hot meal site and money to supply kids with suppli | I am requesting money so that I can provide a hot meal 3 times a day and on weekends. People are hungry all the time 365 days a year. I would also like to be able to provide 1 new pair of shoes at the start of the school year and one pair of boots at the start of winter. I will only pay for 50% with the state but I am looking for the funding to pay for a purchase start as well as I will also be looking for funding from other sources as well as donations. In my area there are many options for the poor. Barberton and Springfield Township in Ohio are very neglected. I have many contacts would like to put a good use to serve the community and this is the best way I know how to serve my fellow citizens. | no name yet but will soon have one | 6 | 0 to 30 days | \$60,000 |
| Summit | Campus Drive Sanitary Sewer Extension | Extension of 1800 LF of new sanitary sewer to service 80 acres of undeveloped industrial and commercial property. This project will be an extension to the Allen Road and McElroy Road Sanitary Sewer Extension previously submitted by the City of Stow. With sewer service, this property will develop and create new jobs. | City of Stow | 500 | 31 to 90 days | \$300,000 |
| Summit | ICT | Shift issues in funding to Crossroads Program that offers Integrated Co-occurring Treatment (ICT) to high-risk youth in the Juvenile justice system who suffer from co-occurring mental and co-occurring mental health issues. | Summit County Juvenile Court | 4 | 0 | \$200,000 |
| Summit | Foreclosure Renovation Initiative | My business serves neighbors in poverty stricken areas like 44307, 44306, 44310, 44302, by re-abilitating foreclosed properties then renting them out to Section 8 recipients. Hiring out of work electricians, plumbers, general contractors, painters and roofers ect. | Portage Line Properties LLC | 50 | 181 days or more | \$250,000 |
| Summit | Misc: Storm Water 2008 | Project is to rehab various storm water sewers and create storm water basin to alleviate flooding throughout Akron | City of Akron | 34 | 0 | \$503,000 |
| Summit | Technology & Education Initiative | Funding will be used to pay for research to contact all at-risk students from grades 9-12 and provide tutors and counseling. This decreasing the drop-out rate and increasing high school graduation rate. The funding for this project will be used to install or upgrade computers in community centers where tutoring and counseling will be available. Also fundraising scholarship events will be held for further education for participants. Funding will also be used to develop educational video games to peak and keep interest of target age group. If funded, this project will create jobs that will be a definite investment in our future. | Alpha & Omega Productions | 1000 | 0 to 30 days | \$3,000,000 |
| Summit | Starting a new business | To start up a new business with individuals who have worked in the landscaping business for over 10 years. I currently work in the healthcare insurance business and I am worried that the changes the President will make to the industry will eliminate my job. I have a business degree and my goal is to have my destiny in my own hands. I want to have my own business. I have a great idea for a business in the area of home care. As a homeowner of a house built in 1996, my septic and well are approx. over 50 years old. A new more environmentally safe septic would clean my neighborhood and the watershed it drains into. My wastewater is an area of old car miles, with a good fair level of solid figure of iron. The filter is closer to 20ppm. | King Landscaping and Snow Removal | 8 | 91 to 180 days | \$500,000 |
| Summit | Operation replace well and septic | With the installation of these new services the quality of life for my family, and my community would improve, as would the value of my home, which would increase the taxbase for my local school district, Police and Fire protection. My family is made up of 4 members, and we use approx. 700 gallons of water per day. Our current septic tanks hold 1000 gallons of solid, and 1000 gallons of waste water, which leaches to a gravel field. No chlorinator to destroy bacteria is installed on our system. Thank you and look forward to installing these improved systems for my home. | IAFF Member | 10 | 31 to 90 days | \$20,000 |
| Summit | expand business | Funds to be used for immediate higher and certification training of 5 new employees, advertising, the purchase of equipment which includes 2 - HSCPM compressors, 1 - Maxi Breaker C series, and 2 work trucks. The immediate expected outcomes would include a larger/tranger company work force, a larger area of exposure from advertising with immediate results expected. Immediate bottom line savings with purchase of equipment vs rental of this, allowing for further growth various hands on classroom materials ranging from grades k-6. | AquaPro Plus, Inc. | 5 | 0 to 30 days | \$200,000 |
| Summit | Materials for Testing | Various teacher manuals and text books for grades k-6. Paper to copy on. 4 book Binders and Bindings. Classroom book based games. Teacher Trainings in best practices. The library would like to buy new laptop computers for its portable computer lab. Currently, the library provides 10 laptops @ 10 years old. Newer ones are greatly needed. These computers are used to train new computer users on the basic computer applications. Staff could add additional classes with newer applications. | Summit Academy Akron Elementary | 40 | 0 to 30 days | \$55,000 |
| Summit | Computers and Jobs | These computers will be housed in the library's meeting room. Currently, the staff offers classes every month on Tuesdays. | Barberton Public Library | 100? | 31 to 90 days | \$10,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | Health At Its Best | Purchase land and build/maintain a facility to provide Health and Fitness Education as well as offer personal training/group training to clients at reduced rates. The goal is to instruct clients on activities that they can do in their own home without the need of an expensive expensive fitness equipment. | Visions Health and Fitness | 25 | 31 to 90 days | \$1,500,000 |
| Summit | Project Garden Share | Project Garden Share PGS is a non-profit organization helping connect those in need of food with individuals who own land and allow nearby individuals to farm their land to cultivate fresh vegetables and herbs. The land is tended to by the needy in order to grow their own food. Seeds and plants are donated through the website and drop shipped to the individual. A local volunteer gardener provides the education to teach the participants how to plant and care for the harvest as well as how to can vegetables and dry herbs for use throughout winter. A sign up sheet for landowners will be located on the website homepage. Local churches will ask parsonages for land usage. This information will then be passed on to the local food bank or church. Connecting people in need with people with land. A partnership ensuring that no man, woman or child ever go hungry. We will provide education in farming and canning of food. | Project Graden Share | 40 | 31 to 90 days | \$250,000 |
| Summit | Special Angels Ranch | Start and set up a facility for special needs children. We plan on fostering special needs children. We also plan on having a respite/hotell facility for families with special needs children. | Special Angels | 4 | 31 to 90 days | \$1,500,000 |
| Summit | CENTRAL GRAPHICS | Central Graphics is a corporation founded in 1995 that would like to purchase more equipment-printers, routers, cutters, etc to bring more jobs to the Akron area. We will retain 10 jobs and hope to hire an additional 10 jobs with the new equipment. Funding request is for additional equipment. Changing over commercial government offices and residential Homes to Energy saving devices. And to make some of the projects produce their own energy and feed back to the grid. Also energy Whole Building Clean Water to save plumbing and appliance repairs and to reduce the amount of Cleaning supplies needed. Clean Water will also reduce hot water costs. And also reduce Hot water boiling costs for boilers. | Central Graphics, Inc. | 20 | 91 to 180 days | \$500,000 |
| Summit | Energy saving | 1st project should be the Governors Home, we will be using to buy supplies from the largest electrical company in the world which is headquartered in Ohio. We are team partners with EATON. Then the Government can testify to the american people that it works. www.cleanresources.net | Clean Resources Inc. | 350 | 0 to 30 days | \$750,000 |
| Summit | Service-Save | Whole Facility: Clean Water, Clean Air, Clean Power, Back up Emergency Power, Wind Power, Solar Power, Gas Power, etc. for the next 5 years Shore up the dying appliance service industry by giving up to 200 service shops \$100,000.00 each. 70% have a waiting list for the last 5 years SIT COME Bring 200+ jobs and reduce the number of appliance's going to land fill. Reducing toxic waste to ground water. And reducing the dependence on imported electronics Help the state of Ohio promote green and Renewable Energy jobs for the state of Ohio. I am currently looking for green jobs partners called Hirejam.com and my sole purpose is help Ohio's first jobs and rebuild our state's economy. | Lightning tv & Electronics | 200 | 0 to 30 days | \$200,000 |
| Summit | Green jobs for a Green State | The \$25,000 request covers your job listings, which will be unlimited for the rest of 2009. (I will create a special code which you will be able to use) Hirejam.com partnered with the search engine SimplyHired, where Ohio green jobs will be posted on Myspace and many other job boards. My partnership allows me to negotiate a lower price than simplyHired posting prices. As a social media professional, I have am using LinkedIn, Twitter and Facebook to promote Hirejam.com, so the possibility of filling 500+ jobs are greatly improved. I currently sit on the Greenprint Committee for The City of Akron. I am very active in the African American community and I have relationships with the University of Akron. I am the long resident of this state. I have seen many friends and family lose their jobs and I want to do my part to help my, my family and my state. | Hirejam.com | 500 | 181 days or more | \$25,000 |
| Summit | Computer training for the unemployed and poor. | Provide computer training, networking, and skills not otherwise available to the unemployed and poor. Costs will be contained utilizing existing institutions, recycled equipment, vendor donation, and certified trainers. Applicants will be referred from non-profits, OBEs, etc. Candidates would be assessed and given curricula based on interest, employer demand and ROI. A vacant church to be transformed into something to the effect of the Green Community Theater. The city of Green is one of the fastest growing communities in all of Ohio. | GADDCO | 450 | 31 to 90 days | \$240,000 |
| Summit | COMMUNITY THEATRE | There are no less than 4 dance centers within the city of Green, and many dance centers in the surrounding communities. Currently, there is no where for these local performers to showcase their talents and skills, but for one small, century-old, 75-seat run-down facility that no organization utilizes except for one not-for-profit dance company. The church is currently for sale, and has been so for well over a year. The century-old church has a unique architectural presence. However, it would need to be purchased, renovated and brought to local building codes and standards... specifically fire, water, sewer, and a sprinkler system, so as well as the actual transformation from a church to a community theatre. | Green Community Theatre? | 3 | 0 to 30 days | \$650,000 |
| Summit | firm expansion and growth | Richfield Associates is a small business involved with recruitment and search work for the commercial truck and equipment industry. We provide talent at the salary professional level to companies in the truck and equipment manufacturing industries. These individuals fill positions in laboratories, engineering and sales/marketing. We are looking to grow our business over the next several months as the economic stimulus begins to take effect and the need for people to work in the truck and truck equipment manufacturing sector increases in volume. These manufacturing companies build trucks, truck bodies, and related equipment to support construction of roads, bridges and other major construction projects. Our intent is to purchase new computers and other office equipment along with adding contract staff to assist in the recruiting support needs expected. My goal is to help my business here in Ohio for the long term. I would like to request financial support and assistance to stay in Ohio and grow the business as well as support the tax base here in the state. Thank you for your consideration in this matter. FOR 3 YEARS MY HUSBAND AND I RAN A SMALL ORDER BUSINESS, WITH THE HELP OF AMAZON.COM. DUE TO UNDER-CAPITALIZATION, WE HAD TO CLOSE. WE NEED A GRANT TO REORGANIZE, REMODEL, AND RESTOCK OUR LIBRARY. TO BELL OVER THE NET. | Richfield Associates | 4 | 31 to 90 days | \$50,000 |
| Summit | Cottage Industry Grant for Home Based Business | | ESHOP FABLES | 2 | 0 to 30 days | \$5,000 |
| Summit | Northeast Avenue Roundabout Project | This project will replace the six legged intersection of Howe Road / Northeast Avenue / Munroe Road with a modern roundabout. The roundabout will be approximately 200 feet in diameter with construction ranging from 400 to 700 feet along the six roads leading into the roundabout. There are presently 17,000 cars using this intersection daily. This project will improve safety and reduce congestion at this intersection. There have been 25 accidents at this intersection during the last three years. Studies have shown that the construction of roundabouts reduce the number of accidents especially fatalities at intersections. This project is also green as movement into the roundabout is continuous as opposed to the existing traffic signalization which causes cars to sit and idle while waiting on the signal. | City of Tallmadge | 55 | 91 to 180 days | \$479,000 |
| Summit | Home Improvement | Home repairs for energy efficiency, replace older model central air system, replace garage and opener, replace bathroom fixtures | Home owner | 10 | 31 to 90 days | \$20,000 |
| Summit | Laptops for Teachers | Purchase 20 laptops to be used as instructional technology for students with disabilities. Local children services and churches of each county to provide kids a week there they are treated like royalty. Each camp is responsible for their own fundraising and set up of camps. Project Description: The money would be used for three purposes. 1. The first to hire a full time director and a part time assistant that would be responsible for assisting the current camps in Ohio with fundraising and setting up new camps in Ohio. 2. The purchase of a suitable campground that could be used by several of the camps rather than each individual camp renting every year. The camp could also be used for other opportunities as they arise. 3. To Expedited Outcome: To have a Director for the State of Ohio, an assistant for the Director, a campground for the camps to use and to double the number of camps in the State of Ohio over the next four years from 11 to 22 camps. Each camp spends in the State of Ohio roughly \$40,000 each year. It takes roughly 30 months for a camp to come online. Documenting the diverse ethnic and racial composition of all of Ohio's 88 counties while preserving the recipes, foods, and traditions unique to each culture. Once the completion and documentation of these recipes and traditions are completed, energies will be devoted to publishing the results. See advertisement/marketing plan for local business on 4/67 marked and hand out in the community via the local schools. The schools would receive 10% of the money collected. | Norton City School District | 0 | 181 days or more | \$20,000 |
| Summit | RFKC Ohio | | Royal Family Kids Camps - Ohio | 2 | 0 to 30 days | \$1,000,000 |
| Summit | Heritage Preservation Group | | Trident Technologies, Inc. | 100 | 91 to 180 days | \$625,000 |
| Summit | advertising-start up company | | information only marketing | 3 | 0 to 30 days | \$10,000 |
| Summit | Medical Equipment Repair Facility | Launch new medical equipment repair/furbishing operation for specialty medical beds, chairs, and related equipment. Funds will secure 20,000 sq. ft. facility, tools, training for (6) technicians, warehouse equipment and materials. Eleven (11) jobs created within 90 days of launch, with an additional 30 jobs created as operations/distributor will be continuous and self funding after launch, with expansion into surplus equipment resale. A letter of intent from manufacturer/distributor may be obtained prior to funds being released by State. | Diversified Technology Solutions LLC | 11 | 31 to 90 days | \$550,000 |
| Summit | Smith/Ghent Detention Pond | This project will rehabilitate an existing drainage basin and create wetlands, relieve flooding and provide a park | City of Akron | 48 | 91 to 180 days | \$1,500,000 |
| Summit | Lake of the Woods Pump Station | This pump station will replace an aging facility and provide new upgraded equipment that will conserve energy | City of Akron | 60 | 91 to 180 days | \$805,000 |
| Summit | Sanitary Sewer Reconstruction | This project is a repair and lining of various sections of sanitary sewer in the City | City of Akron | 67 | 91 to 180 days | \$3,200,000 |
| Summit | North Hill Rehab | To re-stabilize a community, which has been depressed and hit hard by the current unemployment rates and foreclosures. This project would seek to hire local business to perform the rehabilitation of dilapidated buildings and then promote the repair of the finished product to bring business and jobs back into the community. This would create both immediate jobs and then long term employment while revitalizing the community. I would like to start an organically grown farm. It would be no more than 40 acres. I feel it would be an asset to the community and the environment. Small family farms such as contained in this plan bring character and tradition to a community while serving and working with that community. My business model is for a CSA, as I have had one year of experience operating one. CSA is known as Community Supported Agriculture which brings people to the farm to see how and where their food is grown. CSA members pay by purchasing a share of the harvest and receive their share weekly throughout the growing season. I envision having about 25 to 50 members. All farming practices would be done in an environmentally friendly way. This money would be used to purchase land and equipment. The type of farming is different from conventional farms as the costs would be much less compared to conventional practices. It would also educate others about farming and caring for the environment which is becoming more important each year. In conclusion, I think this is a worthy project as it shows that the government is willing to help individuals with their dreams and those of commu- | Temple Square Properties | 500 | 91 to 180 days | \$5,000,000 |

| Summit | Sandrun Parkway Sanitary Lining | Lining of an existing sanitary sewer in order to protect it life by 15 years | City of Akron | 24 | 31 to 90 days | \$2,700,000 |
| Summit | Albrecht JEDD Water line | This would construct two additional tanks down a WPCS to expand the treatment facility | City of Akron | 30 | 31 to 90 days | \$740,000 |
| Summit | CSO WPCS Secondary Expansion | This project would replace an aging steel pipe that carries sanitary flow over the rear | City of Akron | 35 | 91 to 180 days | \$7,500,000 |
| Summit | Northside Interceptor Rehab | Project Description: This is a project that "is work in progress" and has been for a few years now. The project funds are nearly zero and need some additional funding to carry the dream of all involved. All of the hard work the long hours the ups and downs that go along with all dreams to hopefully develop into future reality. This is the real life version we have two children that are college age and have been accepted into colleges in the great state of Ohio. We did have some money saved for college but in 2007 my wife had two major back surgeries that took goodness took care of her back pain. She has recently gotten back to work after having surgery for that in the mean time her job had for 20 years left before Christmas she (she) worked for closed its doors for good. At this time I am still unemployed. As luck would have it we also had to file bankruptcy. We had some money saved also. Our children have wanted very hard to get to where they are now. I am hoping that someone will be able to help us in some way to get our boys into college. Any information, guidance or monies would be greatly appreciated. Thanks again, Jim and Lisa | City of Akron | 45 | 31 to 90 days | \$1,200,000 |
| Summit | Help send our kids to college | This project would replace aging pumps and consists in an existing sanitary pump station | Educating Young Americans | 2 | 0 to 30 days | \$50,000 |
| Summit | 2nd Street Pump Station rehab | This project is to make repairs on the main outfall sewer | City of Akron | 24 | 31 to 90 days | \$275,000 |
| Summit | Main Outfall Rehabilitation | The storm water plan would be able to provide funding for various storm water projects in Akron | City of Akron | 34 | 31 to 90 days | \$550,000 |
| Summit | Storm Water utility Plan Development | Install new sanitary sewer | City of Akron | 10 | 91 to 180 days | \$350,000 |
| Summit | Cleveland Massillon Road Sanitary Sewer | Construction of a sewer or pump station to replace Barntown pump station | City of Akron | 10 | 91 to 180 days | \$300,000 |
| Summit | Waterloo Rd Wright Road sewer JEDD | Lead in to the additional new instructors to expand programming availability to additional schools within the Akron Public School System. In addition, the hiring of new instructors will allow Imaginarium to offer programs to other school districts in Northeast Ohio, hire an office manager, hire an equipment manager, utilize advertising opportunities. Funding would also allow Imaginarium to acquire more adequately sized office space and set-up programming at that site. | Imaginarium Enterprises LLC | 23 | 91 to 180 days | \$1,500,000 |
| Summit | History themed enrichment programming for children | To construct and stabilize banks on Bath Road to prevent erosion | City of Akron | 7 | 181 days or more | \$250,000 |
| Summit | Bath Road Erosion Control | The New Franklin Police Department wants to hire one additional police officer under the CHPF grant. | City of New Franklin | 10 | 31 to 90 days | \$740,000 |
| Summit | Hiring of Additional Police Officers | Various projects throughout the city to separate cars. | City of Akron | 1 | 0 to 30 days | \$150,000 |
| Summit | CSO Separation Projects | Project would construct various new waterlines in the JEDD areas per the agreements | City of Akron | 10 | 91 to 180 days | \$15,000,000 |
| Summit | JEDD Water Service Extensions | This would repair a slope and a storm sewer | City of Akron | 7 | 91 to 180 days | \$2,000,000 |
| Summit | Fairhill Slope/Storm Outlet Repair | Projects includes stormwater rehab on various areas in the city | City of Akron | 4 | 91 to 180 days | \$300,000 |
| Summit | Misc. Storm Water 2009 | This project would create a detention area to relieve flooding to local residents | City of Akron | 13 | 31 to 90 days | \$1,000,000 |
| Summit | First Energy Detention Pond | This would provide the design of a CSO tunnel for the city | City of Akron | 4 | 31 to 90 days | \$120,000 |
| Summit | CSO Ohio Canal Tunnel Design | This project would install a storm sewer to Pigeon Creek and dredging of the creek to alleviate flooding | City of Akron | 100 | 181 days or more | \$14,000,000 |
| Summit | Pigeon Creek Storm sewer and dredging | This project would design the CSO tunnel off | City of Akron | 40 | 91 to 180 days | \$5,000,000 |
| Summit | CSO Northside Tunnel | Project includes construction of additional storage tanks for CSO effluent | City of Akron | 40 | 181 days or more | \$4,600,000 |
| Summit | CSO WPCS Storage | Projects includes street and storm sewer installation to prevent flooding | City of Akron | 15 | 181 days or more | \$34,000,000 |
| Summit | Cuyahoga Street Storm sewer | WPCS additional treatment | City of Akron | 15 | 91 to 180 days | \$2,000,000 |
| Summit | CSO WPCS Additional Treatment | This project will repair existing storm outlets on eroded slopes | City of Akron | 12 | 91 to 180 days | \$16,000,000 |
| Summit | Northwest Storm Outlets | This project is to replace the existing control system with a new upgrade | City of Akron | 23 | 91 to 180 days | \$1,000,000 |

| Summit | Watermain replacement | This project replaces old equipment with new substitution equipment at the water plant | City of Akron | 35 | 31 to 90 days | \$5,000,000 |
| Summit | Substation Equipment replacement | To provide standby power for the water pumps | City of Akron | 18 | 181 days or more | \$1,000,000 |
| Summit | Stand by power at water pump station | Influent screen rebuilding at WPCS | City of Akron | 12 | 91 to 180 days | \$300,000 |
| Summit | Waste water effluent screen rebuilding | Water filter media replacement | City of Akron | 12 | 91 to 180 days | \$200,000 |
| Summit | Filter Media Replacement | 2700 feet of water main replacement. | City of Akron | 6 | 31 to 90 days | \$125,000 |
| Summit | Lee Rd | We are in need of two new police cars. Our current vehicles have 142000 or more miles on them and are requiring constant repairs. We are a small Village with a very limited tax base. Rebounded by the National park we get over two million visitors a year that heavily strain our resources. We had to buy off one full time police officer already and do not have the money to purchase new cars. | Village of Silver Lake | 10 | 91 to 180 days | \$385,000 |
| Summit | Patrol Division | Water plant filter building control upgrade | City of Akron | 6 | 91 to 180 days | \$650,000 |
| Summit | Filter Building Control upgrade | The project will replace a 17 year old dump/truck that the Village uses used to keep the roads open in the winter. It's the only large truck the Village has. The truck is falling apart from all the plowing and hauling of salt. It was also under water up to the steering wheel in the flood of July 2003. It is getting harder to find parts and is constantly breaking down. It is necessary for keeping all the roadsides in the Village of Peninsula and some in the Cuyahoga Valley National Park mowed. By Ohio law we have to mow the roadsides at least twice a year. Because of being in the middle of the National park we have the roadsides every month and also the ditches to keep the storm water flowing hopefully to eliminate flooding. This project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Peninsula Police Department | 1 | 91 to 180 days | \$50,000 |
| Summit | Plow/Dump Truck Replacement Project | 3800 feet of new water main replacement. | City of Akron | 6 | 91 to 180 days | \$650,000 |
| Summit | Vincent Rd | The project will replace a 28 year old roadside tractor/mower that the Village uses to keep the roadsides and ditches mowed 8 to 9 month out of the year. It's the only full size mower the village owns. The tractor is falling apart from age and use. It sits outside in the winter months. It was also under water up to the steering wheel in the flood of July 2003. It is getting harder to find parts and is constantly breaking down. It is necessary for keeping all the roadsides in the Village of Peninsula and some in the Cuyahoga Valley National Park mowed. By Ohio law we have to mow the roadsides at least twice a year. Because of being in the middle of the National park we have the roadsides every month and also the ditches to keep the storm water flowing hopefully to eliminate flooding. This project will make the roadway safer for the Village of Peninsula population of 804 but, also for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 700 | 0 to 30 days | \$100,000 |
| Summit | Kent Rd | 3700 feet of water main replacement. | Village of Silver Lake | 10 | 91 to 180 days | \$330,000 |
| Summit | Pumhouse control upgrades | Pumhouse control upgrades. | Village of Silver Lake | 10 | 91 to 180 days | \$18,000 |
| Summit | Loop-Crystal Lake | Install 2000 feet of ductile iron water main from Lakeland Pkwy to Graham Rd to eliminate dead ends. | Village of Silver Lake | 10 | 91 to 180 days | \$275,000 |
| Summit | Roadside Mower Replacement Project 1 | Currently, we have few laptops to use for instruction. In order for teachers to integrate technology into the classroom, it needs to be readily available along with just in time professional development. I can provide the professional development with the expertise, but need the tools and resources (including mounted data projector, laptop, and funds for substitutes to do training to be available top bring technology into the classroom. Our teachers are eager to use technology, but there's not enough to go around. Sharing is difficult to do when you see planning/technology-rich lessons. If awarded, at least 10 teachers would receive the equipment as well as at least 3 days of training on using the equipment and more importantly integrating it into teaching with current software and free online resources. In effect, our students would be prepared with 21st Century Skills and perform well on the state achievement tests. | Village of Peninsula | 2 | 0 to 30 days | \$33,000 |
| Summit | Technology Integration for Student Achievement | My company, TPS began in 2006. We have grown! Our revenue in 2008 was over \$133,000. We are located in a home office, and we currently contract out work when required. The work involves market research and technical software operations for the plastics industry including production and FEAs analysis. We have reached the point where we would like to move into a new office space and hire a office person and 1 to 1.5 new professional persons. We would like to offer benefits to those people. The money requested is: 1. Help us obtain and set up office space. 2. Help in funding the new Ohio jobs. 3. Help set up benefits for employees. The project would result in 2.5 new Ohio jobs almost immediately. | Norton City Schools | 10 | 0 to 30 days | \$25,000 |
| Summit | Business Expansion | Install 2000 feet of ductile iron water main from Church St. to Kent Rd to eliminate dead ends. | ThermoPlastic Solutions, LLC | 3.5 | 31 to 90 days | \$140,000 |
| Summit | Loop-Service Dept | Replace pumphouse built in 1967. | Village of Silver Lake | 10 | 91 to 180 days | \$165,000 |
| Summit | Replace pumphouse | This project will replace the roof on the primary tanks at the water pollution control station | Village of Silver Lake | 10 | 91 to 180 days | \$440,000 |
| Summit | Waste Water Primary Roof Replacement | This project will upgrade the DCS supervisory monitoring and control system | City of Akron | 6 | 91 to 180 days | \$175,000 |
| Summit | Upgrade of DCS monitoring and control system | Painting of several water storage tanks throughout Akron. | City of Akron | 6 | 181 days or more | \$600,000 |
| Summit | Tank Painting | Change out existing fixtures with new LED to save energy | City of Akron | 6 | 91 to 180 days | \$1,000,000 |
| Summit | Cascade Parking deck LED light replacement | | City of Akron | 18 | 91 to 180 days | \$1,000,000 |
| Summit | | | City of Akron | 60 | 31 to 90 days | \$3,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------|----------------|--------------------|---------------------------|
| Summit | Roadside Boom Mower Replacement Project | The project will replace a 21 year old roadside tractor/mower that the Village uses to keep the roadsides/ditches mowed and trim trees all year round. The tree trimming attachment will fit on the new mower saving the village \$12,000. It's the only boom type mower the village owns. The tractor is falling apart from age and use. It was also under water up to the steering wheel in the flood of July 2013. It is getting harder to find parts and is constantly breaking down. It is a necessity for keeping all the roadsides in the Village of Peninsula and some in the Cuyahoga Valley National Park mowed. By July we have to mow the roadsides at least twice a year. Because of being in the middle of the national park we mow the roadside every month and also the ditches to keep the storm water flowing hopefully to eliminate flooding. We trim trees in the winter months to keep good sight distances because wildlife from the national park (33,000 acres) runs into the roadsides. The project will make the roadway safer for the Village of Peninsula population of 65k but also for the 2.7 million visitors that come to the park every year. This project will reinforce the City's water supply line to the City of Tainsburg through the City of Hudson. The water supply line supplies water to the Chrysler Steering Plant in Tainsburg. | Village of Peninsula | 2 | 0 to 30 days | \$68,000 |
| Summit | Hudson Water System Reinforcement | | City of Akron | 18 | 181 days or more | \$2,000,000 |
| Summit | SCADA Improvements | This project will make improvements to the SCADA. | City of Akron | 15 | 91 to 180 days | \$1,500,000 |
| Summit | Watermain Cleaning and Lining | This project will allow the cleaning and lining of several water mains within the city of Akron. | City of Akron | 12 | 31 to 90 days | \$1,500,000 |
| Summit | Firestation 2 Replacement | Replace a firestation with a new facility. | City of Akron | 80 | 91 to 180 days | \$2,800,000 |
| Summit | Vertical Pushwall Extension | This project allows for the vertical pushwall extension. | City of Akron | 10 | 181 days or more | \$1,942,000 |
| Summit | Energy Efficiency Education in 6th grades | Project includes giving 6th grade teachers a curriculum teaching home energy audits and giving products to students to take home. | City of Akron | 10 | 0 to 30 days | \$150,000 |
| Summit | County Wide Data System | Create a county wide data system. | City of Akron | 10 | 31 to 90 days | \$100,000 |
| Summit | Justice Center Electric Upgrade | Upgrade at Justice Center. | City of Akron | 40 | 181 days or more | \$800,000 |
| Summit | Misc Large Diameter Water Main Repairs and Valve R | This project will allow for the repair and replacement of several large diameter watermain, valves and foreman valves. | City of Akron | 16 | 91 to 180 days | \$1,000,000 |
| Summit | LED Light replacement | Replace existing lighting with LED lights to provide energy and cost savings. | City of Akron | 25 | 91 to 180 days | \$25,000,000 |
| Summit | Hiring | This grant will allow for the hiring of 40 additional police officers. | City of Akron | 40 | 0 to 30 days | \$9,000,000 |
| Summit | Phase III Radio System Akron | This is to complete the radio system for the county and city. | City of Akron | 5 | 91 to 180 days | \$425,000 |
| Summit | law enforcement programs | Enhance LE program capabilities and response. | City of Akron | 1 | 0 to 30 days | \$100,000 |
| Summit | Enhance LE Programs Capabilities and Response | This funding will allow the City of Akron LE programs capabilities and response through law enforcement programs, prevention and education programs, planning evaluation and technology improvement programs, and Hot Spot overtime. | City of Akron | 4 | 0 to 30 days | \$400,000 |
| Summit | Educating the public on the importance of maintain | We are a local struggling HVAC company. We have tried to work our programs for customers to purchase EBAs (Energy Savings Agreements) from us to lower their energy bills or to have them replace their existing units with high efficiency units. We also offer Indoor Air Quality services to the homeowner that they are breathing in clean air. They years ago we spent thousands of dollars on training classes to become better at offering these programs to customers. One of the items that was brought to our attention was that when you purchase a car you get every 3000 miles to get better gas mileage, so why would you not spend a little money twice a year and get a tune up on your HVAC system? They run efficiently? This makes sense and fair. But due to the economy status our company cannot afford to train or hire new employees. We have articles, videos and proper tools. If we can get some government assistance, we can hire more workers, advertise and offer more training. Thank you for offering a program that could help us! | MAP Heating & Cooling LLC | 5 | 0 to 30 days | \$100,000 |
| Summit | Combined Police/Sheriff's training facility | This project will add an addition to the existing facility in green which serves both agencies. Classrooms, offices, and other things are proposed. | City of Akron | 40 | 91 to 180 days | \$3,500,000 |
| Summit | Combined Akron/Sheriff's property room | A new property room to serve both the city of Akron police department and the summit county sheriff. Proposed in both agencies processing and storage of evidence and found properties. Location would be near the Summit County Courthouse. | City of Akron | 40 | 181 days or more | \$2,500,000 |
| Summit | Demolish Rubber Bowl | Demolish rubber bowl and reuse property. | City of Akron | 21 | 31 to 90 days | \$3,000,000 |
| Summit | New access to Miami Center | Construct a new roadway to maintain an access way from Kelly Ave into the facility. | City of Akron | 23 | 91 to 180 days | \$1,000,000 |
| Summit | 999 S. Main Street UST Remediation | This project will remove contamination and clean BUSTB to further action status. This site is not funded under the states UST release compensation fund. | City of Akron | 5 | 0 to 30 days | \$120,000 |
| Summit | Master Plan Update | Update to Airport layout plan. | City of Akron | 5 | 0 to 30 days | \$170,000 |
| Summit | Runway 7-25 Rehab Design | Design to rehab existing runway. | City of Akron | 23 | 31 to 90 days | \$303,000 |
| Summit | Akron Bio Solids to Energy Project | This project will expand the existing bio solids to energy project and will generate more electric. | City of Akron | 50 | 91 to 180 days | \$12,000,000 |
| Summit | Airport Taxiway Extension | The airport taxiway needs to be lengthened to accommodate larger aircraft. | City of Akron | 12 | 31 to 90 days | \$385,000 |
| Summit | Municipal Building Green Project | This project will allow the City of Akron municipal building to become more energy efficient. New windows, lighting, HVAC, and HVAC control system as well as solar panels are proposed. | City of Akron | 150 | 91 to 180 days | \$8,000,000 |
| Summit | Rehab Parallel Taxiway P | This project will repair bad pavement and drainage. Design is complete. | City of Akron | 12 | 91 to 180 days | \$950,000 |
| Summit | Solar Panels and Municipal Service Center | This project will provide solar panels on the municipal service center to reduce electric consumption. | City of Akron | 30 | 91 to 180 days | \$1,000,000 |
| Summit | LED Traffic Signals | This project will install LED signals in the traffic lights throughout the city for energy reduction. | City of Akron | 100 | 91 to 180 days | \$5,000,000 |
| Summit | Relocate Electric vaults Airport | Relocate existing vault with a larger one in new location to accommodate taxi way loads. | City of Akron | 5 | 0 to 30 days | \$15,000 |
| Summit | Morley Building Green Project | This project will allow energy efficiency improvements to be made to the municipal owned Morley Health Department building. New windows, HVAC Controls and solar panels are proposed. | City of Akron | 160 | 91 to 180 days | \$4,000,000 |
| Summit | LED Lighting for Parking Decks | This project will allow for the replacement of existing light fixtures in 2 city owned parking decks with more energy efficient LED lights. This will be a long term energy savings project. Both decks are over 10 to 15 year old. | City of Akron | 25 | 91 to 180 days | \$2,000,000 |
| Summit | Parallel Taxiway design | This is for the design to add a new parallel taxiway requested by FAA. | City of Akron | 20 | 31 to 90 days | \$130,000 |
| Summit | Landmark Building Roof | This historic building located in downtown Akron has a significant amount of asbestos located in the building and roofing materials. The building is currently vacant but is planned for redevelopment. | City of Akron | 15 | 31 to 90 days | \$300,000 |
| Summit | CNG Fueling Station | The roof is currently leaking into the 12th floor. This proposed project will ensure this historic building, located in a historic district, will stand the test of time. | City of Akron | 10 | 91 to 180 days | \$1,500,000 |
| Summit | CNG Capable Trucks | Build a CNG fueling station to be used by City of Akron and as a backup to Metro. | City of Akron | 10 | 91 to 180 days | \$2,000,000 |
| Summit | Green Fleet Vehicle Replacement | Purchase replacement equipment for 3 1-ton chassis that are CNG capable. Examples could be sweepers, bucket trucks, flat bed trucks, dump trucks. | City of Akron | 10 | 91 to 180 days | \$2,000,000 |
| Summit | Retro Fit Class 7 and 8 truck fleet | This project would replace the city's fleet with extended range, plug in hybrid, battery electric BEV hybrid. Also to build the infrastructure to plug in the vehicles. | City of Akron | 500 | 0 to 30 days | \$12,500,000 |
| Summit | Waste Oil Furnace Installation | Install new particulate mufflers or other technology to improve tailpipe emissions. | City of Akron | 5 | 0 to 30 days | \$500,000 |
| Summit | Class 7 and 8 Truck Replacement | This project will purchase a green of burning furnace to burn motor equipments waste oil. | City of Akron | 5 | 31 to 90 days | \$100,000 |
| Summit | New Trash/Recycle Transfer Station | Replace 46 class 7 and 8 diesel powered trucks, that are all over 10 years old. Lower greenhouse gas and particulate emissions while improving city's carbon footprint. | City of Akron | 5 | 0 to 30 days | \$5,000,000 |
| Summit | Trash service for medical exemption customers | Construct a new eco-friendly trash/recycle transfer station to accommodate and obscure the transfer of trash from the residents. This will be a lead certified building. | City of Akron | 75 | 91 to 180 days | \$20,000,000 |
| Summit | Parks Recycle Program | Combine a current 2 packer truck operation to a 1 CNG split body truck for the trash servicing of 600 special needs customers. | City of Akron | 1 | 91 to 180 days | \$300,000 |
| Summit | Alternative Fuel Hybrid Equipment | Initiate a recycling program in the City of Akron parks system including 750 waste containers and 750 recycle containers. | City of Akron | 4 | 91 to 180 days | \$375,000 |
| Summit | Lock 3 Landscaping | This project will be the purchase of 2 forestry hybrid trucks, 3 2-ton dump trucks, 1 side arm mowing tractor, 4 plug in trucks and 3 hybrid mowers. This project will place landscaping in the Lock 1, Lock 2 and Lock 3 parks area to reduce mowing and maintenance requirements and therefore saving energy. | City of Akron | 10 | 181 days or more | \$1,000,000 |
| Summit | Freedom Home Solutions | Have a small business plan that needs funding to start up. I am a certified home inspector that wants to do home inspection, mold testing, and radon. I already have an LLC that is named Freedom Home Solutions. I am going to put 100% of the money I make back into the business for 2 to 3 years. I will still maintain my full time job and benefits during this duration. From there I am going to make investments in buying property and refurbishing old homes our company will employ multiple businesses in construction and other areas fields. The money that is received will be used to purchase everything that is needed for this start up. Tools, equipment, advertising etc. I have a detailed list of how all the money will be reinvested. The outcome will be a well run and profitable organized business that will bring work to companies in summit county. Rehab senior over 65 apartments, over 400 units. | Freedom Home Solutions | 5 | 0 to 30 days | \$35,000 |
| Summit | Chapel Hill Towers | The HVAC needs redone for efficiency, elevators need redone, roofs need to be redone to become more energy efficient. Occupancy is in the 90% range and the demand for senior housing continues to go up. | Summit Management Services Inc. | 10 | 91 to 180 days | \$4,500,000 |
| Summit | East Crown Apartments | We want to create needed housing for Akron University students to live off campus next to the university. The project includes rehab of existing 50 year old site and adding a new four story high rise. This will generate 502 new bedrooms for the university. This project will stabilize a neighborhood that is on the decline. | Summit Management Services Inc. | 25 | 181 days or more | \$21,500,000 |
| Summit | Hot in place asphalt recycling | This machine will reuse existing asphalt and place it back down on the surface. | City of Akron | 25 | 91 to 180 days | \$4,200,000 |
| Summit | Concrete street slab replacement | Concrete slab replacement in city street various. | City of Akron | 40 | 91 to 180 days | \$8,000,000 |
| Summit | Concrete bridge deck replacement | This will repair deteriorated concrete bridge decks in the City. | City of Akron | 24 | 91 to 180 days | \$2,000,000 |
| Summit | Various Road Resurfacing | This will provide for street resurfacing through out Akron. | City of Akron | 56 | 31 to 90 days | \$15,000,000 |
| Summit | Brittain Woods | Rehab existing section 8 project based housing. HVAC and roofs need redone to make the buildings energy efficient. This units are for low income and disabled residents. | Summit Management Services Inc. | 20 | 91 to 180 days | \$4,500,000 |
| Summit | Rehab taxiway | Rehab taxiway. | City of Akron | 16 | 31 to 90 days | \$950,000 |
| Summit | Springfield Lake Park Wetlands | Springfield Lake Park & Wetlands. | City of Akron | 4 | 91 to 180 days | \$1,000,000 |
| Summit | De-icing Pavement | Install safe lane deicing on various areas through out the city. | City of Akron | 25 | 91 to 180 days | \$11,000,000 |
| Summit | Brone Making and Road salt storage | Reine mixing station and salt storage facility at Copley rd and Evernia Ave. | City of Akron | 4 | 31 to 90 days | \$865,000 |
| Summit | Ontario Apartments | Rehab of existing section 8 housing project. Ontario has 46 low income units that are located in an urban area. The HVAC needs updated along with the roofs for energy efficiency. The balconies need redone along with the units. This property is located on Market Street near downtown Akron. It would revivie the neighborhood. | Summit Management Services Inc. | 25 | 91 to 180 days | \$3,750,000 |
| Summit | Haley's Ditch | Haley's Ditch cleanup and restoration. | City of Akron | 12 | 181 days or more | \$5,000,000 |
| Summit | Developmentally Disabled/Delayed Docket | Provide special programming to 30 court-involved youth per year who suffer from Developmental delays/disabilities to ensure their safety and the safety of those around them, to link these youth and their families to all necessary support services and case management through these systems so that they may avoid further court contact and find paths to productive, satisfying adult lives in the community. | Summit County Juvenile Court | 2 | 0 to 30 days | \$125,000 |
| Summit | Brookledge | This was a 150 unit apartment project that was converting to ownership as condos. 68 out of 150 were sold. The remaining 82 had to be reworked back to rentals. We lost \$800,000 last year alone. We need money for new leases for purchasers of condos. Many of our buyers are first time buyers. This project is poised to be a person renting afford the benefits of ownership. We were doing well until the banks stopped banking money. | Summit Management Services Inc. | 10 | 31 to 90 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Summit | Implementing Modeling Instruction in Physics | <p>Project Description: Modeling instruction in physics is a research-based method of teaching and learning physics that has been proven to increase student achievement in physics. This project will allow full implementation of a modeling physics curriculum at Springfield High School. Funds will be used to supply a physics laboratory with the scientific equipment needed to implement the modeling physics curriculum.</p> <p>Expected Outcomes: 1. Students will show significant gains in their understanding of physics as demonstrated by performance on nationally-accepted standardized tests given at the start and completion of the course. 2. Students will have a greater likelihood of success in post-secondary science coursework. 3. Students will be more likely to consider careers in the Science, Technology, Engineering, and Mathematics fields. Outcomes to provide cost effective housing and to help rebuild communities. Also to help neighboring towns and communities to hold or increase their home values by building and not tearing down communities. Animal day care center to assist owners with taking care of their pets while away from home. Daycare is consist of grooming, training & socializing animals. Also to house, care for and find homes for abandoned animals. All abandoned animals would be spayed or neutered to help control the ongoing pet population problems. Business start up to produce, market and sell beef jerky products locally to start and to eventually expand globally. Outcome to produce local jobs with no outsourcing and assist to help stimulate the economy and create jobs.</p> | Springfield Local School District | 0 | 0 to 30 days | \$15,000 |
| Summit | House Rehabilitation and Family Placement | <p>Substone Retaining Walls along Stone Street constructed in 1984 during roadway improvements are experiencing significant deterioration. Safety issues include sections of wall falling, falling onto sidewalks and right of way and vision obstructions for traffic at intersections. These walls, that are constructed of large sandstone blocks, can exceed six feet in height at some locations. A program for replacing these retaining walls with engineered aggregate block wall is planned. For summer recreation programs, city parks had wading pools for the children. The infrastructure of these pools has deteriorated over time and the increased cost of personnel, maintenance and chemicals have placed a burden upon the Parks Department that has resulted in closing of the wading pools. New spray parks are planned for Tuscarora, Avilee Webb and Clisman park. Spray Parks use regular city water on a timeshared basis based operating system.</p> | City of Akron | 2 | 91 to 180 days | \$2,250,000 |
| Summit | Animal Day Care | Animal day care center to assist owners with taking care of their pets while away from home. Daycare is consist of grooming, training & socializing animals. Also to house, care for and find homes for abandoned animals. All abandoned animals would be spayed or neutered to help control the ongoing pet population problems. | Self Employed | 6 | 91 to 180 days | \$2,250,000 |
| Summit | Food Service Industry | Business start up to produce, market and sell beef jerky products locally to start and to eventually expand globally. Outcome to produce local jobs with no outsourcing and assist to help stimulate the economy and create jobs. | Self Employed | 6 | 181 days or more | \$2,250,000 |
| Summit | Main Street Crosswalk rehab | Substone Retaining Walls along Stone Street constructed in 1984 during roadway improvements are experiencing significant deterioration. Safety issues include sections of wall falling, falling onto sidewalks and right of way and vision obstructions for traffic at intersections. These walls, that are constructed of large sandstone blocks, can exceed six feet in height at some locations. A program for replacing these retaining walls with engineered aggregate block wall is planned. | City of Akron | 34 | 31 to 90 days | \$1,000,000 |
| Summit | NORTHSIDE RETAINING WALL REPLACEMENT | Substone Retaining Walls along Stone Street constructed in 1984 during roadway improvements are experiencing significant deterioration. Safety issues include sections of wall falling, falling onto sidewalks and right of way and vision obstructions for traffic at intersections. These walls, that are constructed of large sandstone blocks, can exceed six feet in height at some locations. A program for replacing these retaining walls with engineered aggregate block wall is planned. | City of Barberton | 0 | 91 to 180 days | \$600,000 |
| Summit | City Parks Spray Playgrounds | For summer recreation programs, city parks had wading pools for the children. The infrastructure of these pools has deteriorated over time and the increased cost of personnel, maintenance and chemicals have placed a burden upon the Parks Department that has resulted in closing of the wading pools. New spray parks are planned for Tuscarora, Avilee Webb and Clisman park. Spray Parks use regular city water on a timeshared basis based operating system. | City of Barberton Parks Department | 0 | 91 to 180 days | \$450,000 |
| Summit | Bavaria Road A | This project area is on Bavaria Road, between Enterprise Parkway and the western Township boundary. This project includes partial road reconstruction of approximately 2.67 miles or 3,550 linear feet, including milling and resurfacing the asphalt pavement, repairing and replacing pavement base, curbs, and inlets; installing new 5-foot sidewalks and street lighting on the south and east sides of the road. This project will result in 3,550 linear feet of new road, 2,711 linear feet of new sidewalks, and 25 new street lights. | Twinsburg Township | 10 | 0 to 30 days | \$672,300 |
| Summit | Bavaria Road B | This project area is on Bavaria Road, between Enterprise Parkway and the western Township boundary. This project includes partial road reconstruction of approximately 5.67 miles or 3,550 linear feet, including milling and resurfacing the asphalt pavement, repairing and replacing pavement base, curbs, and inlets; installing new 5-foot sidewalks and street lighting on the south and east sides of the road. This project will result in 3,550 linear feet of new road, 2,711 linear feet of new sidewalks, and 25 new street lights. | Twinsburg Township | 10 | 91 to 180 days | \$465,232 |
| Summit | New Small Business Working with Universities and A | <p>1. Works with the local universities, Kent State and Akron, to promote the textile industry. Kent has a world class apparel program that could be merged in the store. This could bring together younger and older generations. Paid student internship program could be created where the students teach sewing, quilting, and design skills. 2. Besides quilts and sewing machines, the store would carry university design students' clothing items in store. This gives opportunity to the students as well as shows them how to run a business. 3. Sells as much product from Ohio and U.S. textile industries 4. Sewing machines would be sold at the store in conjunction with other Akron-area stores that are currently feeling the crunch of the economy. This could keep stores in business by sharing the costs. 5. Besides quilts and sewing machines, the store would carry university design students' clothing in the store. This gives opportunity to the students as well as shows them how to run a business.</p> | A New Small Business | 12 | 91 to 180 days | \$125,000 |
| Summit | Heights Road 7 A | This project area is on Cambridge Street, from Yale Street to Hudson Road, and Yale Street between Eton Street and Cambridge Street, west of Hudson Road, between Highland Road and SR 82. This project includes complete roadway reconstruction of approximately 1.267 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and dual 4' sidewalks throughout the entire project area. The project will result in 1,267 linear feet of new road, 2,058 linear feet of new sidewalks, replacing 892 feet of 16" water line, and 29 feet of 6" water line. | Twinsburg Township | 20 | 0 to 30 days | \$1,007,600 |
| Summit | Barberton - Wastewater treatment plan improvements | Planned improvements will increase water quality discharges to the Tuscarawas River and includes bio-phosphorus removal. | County of Summit | 38 | 0 to 30 days | \$3,900,000 |
| Summit | Heights Road 7 B | This project area is on Cambridge Street, from Yale Street to Hudson Road, and Yale Street between Eton Street and Cambridge Street, west of Hudson Road, between Highland Road and SR 82. This project includes complete roadway reconstruction of approximately 1.267 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and dual 4' sidewalks throughout the entire project area. The project will result in 1,267 linear feet of new road, 2,058 linear feet of new sidewalks, replacing 892 feet of 16" water line, and 29 feet of 6" water line. | Twinsburg Township | 20 | 91 to 180 days | \$752,601 |
| Summit | Hines Hill Trunk Line Replacement and Upsizing | Replace flange and undersized sewers in an area poised for economic growth. | County of Summit | 14 | 181 days or more | \$1,000,000 |
| Summit | Hines Hill Rd Resurfacing | Resurfacing of 1.7 miles of Township Rd. Hines Hill Rd is an entrance to Cuyahoga Valley National Park which attracts 3 million visitors per year. | Boston Township | 12 | 91 to 180 days | \$237,005 |
| Summit | Heights Road 8 A | This project area is on Cambridge Street, from Yale Street to Hudson Road, and Yale Street between Eton Street and Cambridge Street, west of Hudson Road, between Highland Road and SR 82. This project includes complete roadway reconstruction of approximately 1.214 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and dual 4' sidewalks throughout the entire project area. The project will result in 1,214 linear feet of new road, 1,933 linear feet of new sidewalks, and replacing 732 feet of 16" water line. | Twinsburg Township | 20 | 0 to 30 days | \$1,007,100 |
| Summit | State Road Sewer Extension - Summit County | Extension of sewer service and abandon flange package treatment plant and HSTB; provide for economic development along the sewer corridor. For a sewing salon. I've been in business for 10 years. Due to the slow Economy, my business has slowed. I need to replace my sewing salon and services which is State Board of health request. Also, by replacing these items I will be able to retain my current customers and, in fact, bring in more business. I am also in need of money for other operating costs. | County of Summit | 14 | 181 days or more | \$1,000,000 |
| Summit | Small business grant to maintain my business | This project area is on Cambridge Street, from Yale Street to Hudson Road, and Yale Street between Eton Street and Cambridge Street, west of Hudson Road, between Highland Road and SR 82. This project includes complete roadway reconstruction of approximately 1.214 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and dual 4' sidewalks throughout the entire project area. The project will result in 1,214 linear feet of new road, 1,933 linear feet of new sidewalks, and replacing 732 feet of 16" water line. | Studio 82 Inc. | 2 | 0 to 30 days | \$20,000 |
| Summit | Heights Road 7 B | This project area is on Cambridge Street, from Yale Street to Hudson Road, and Yale Street between Eton Street and Cambridge Street, west of Hudson Road, between Highland Road and SR 82. This project includes complete roadway reconstruction of approximately 1.214 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and dual 4' sidewalks throughout the entire project area. The project will result in 1,214 linear feet of new road, 1,933 linear feet of new sidewalks, and replacing 732 feet of 16" water line. | Twinsburg Township | 20 | 91 to 180 days | \$636,576 |
| Summit | Stine Rd Resurfacing | Resurfacing of 0.8 miles of Township Rd. Stine Rd is an entrance to Cuyahoga Valley National Park which attract 3 million visitors per year. | Boston Township | 12 | 91 to 180 days | \$90,775 |
| Summit | Fire Station | This project would construct and equip a 6,000 SF fire station on Township property in the Township's industrial park, which would decrease response time and increase fire protection to valuable businesses employing in excess of 5,000 people. | Twinsburg Township | 30 | 181 days or more | \$1,374,612 |
| Summit | 12 Roads Paving/Chip & Sealing Project | The project will include Paving/Chip & Sealing of 12 streets Akron-Parsons Rd., Bronson Ave, Bronson Ext., Center St., Church St., Dell St., East Hill St., Emerson St., North Canal St., Cochran St., Ridgeway Ave, and South Canal St. All the time the roadway are cracking, falling apart and need paving/Chip & sealed. All of these roads are located in the middle of the Cuyahoga Valley National Park and the Village of Peninsula which is in the center of the park. This project will make the roadway safer for the Village of Peninsula population of 604 but, also, for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 2 | 31 to 90 days | \$45,000 |
| Summit | Cleveland Akron Columbus Lines | Public Transportation Railroad that frequently travels from Cleveland to Parma to Richfield to Akron all the way to Columbus. Traveling in both directions from North to South. | www.facesandfaces.com | 5000 | 31 to 90 days | \$0 |
| Summit | Major Rd Resurfacing | Resurface 2 miles of Township Rd. Major Rd is an entrance to Cuyahoga Valley National Park which attracts 3 million visitors per year. | Boston Township | 12 | 91 to 180 days | \$302,869 |
| Summit | Service Building | This project would construct and equip a new 8,000 SF building to house the Township Service Department on Township property in the Township's industrial park. The Service Department has outgrown its current facility and is currently operating out of a leased facility. A new and expanded facility would meet community needs for many years to come. | Twinsburg Township | 30 | 181 days or more | \$1,220,725 |
| Summit | Warner Road Foremain & Sewer Repair - Summit Coun | Repair failing formations and gravity sewers. | County of Summit | 2 | 31 to 90 days | \$300,000 |
| Summit | Oak Hill Rd Resurfacing | Resurfacing of 2 miles of Township Rd. Oak Hill Rd is an entrance to facilities of Cuyahoga Valley National Park attracting 3 million visitors per year. | Boston Township | 12 | 91 to 180 days | \$241,749 |
| Summit | Sidewalk/Wall Project | The project will include Sidewalk/Wall repair on 6 streets Akron-Parsons Rd., Bronson Ave, Center St., Dell St., North Locust St. and South Canal St. At this time the old sandstone/concrete sidewalks are cracking and falling apart. I mending wall will need rebuilt. The base underneath the walls will need redone and most need to be replaced the walls. These sidewalks lead to the Cuyahoga Valley National Park Train Depot which is located in the middle of the Cuyahoga Valley National Park and the Village of Peninsula which is in the center of the park. This project will make the roadway safe for the Village of Peninsula population of 604 but, also, for the 2.7 million visitors that come to the park every year. | Village of Peninsula | 50 | 0 to 30 days | \$85,000 |
| Summit | Wetmore Rd Resurfacing | Resurface 1.9 miles of Township Rd. Wetmore Rd is an entrance to facilities of Cuyahoga Valley National Park which attracts 3 million visitors per year. | Boston Township | 12 | 91 to 180 days | \$186,279 |
| Summit | Township Hall | This project would construct and equip a new 4,000 SF Township Hall to replace a 50+ year old converted the space out of which the Township is currently operating. A new facility would meet community needs for many years to come. | Twinsburg Township | 30 | 181 days or more | \$1,124,268 |
| Summit | Community Center | This project would construct and equip a new 8,700 SF building to replace an outdated 50+ year old 8 1/2 SF building that is in danger of abandonment and demolition. The building houses social services and community service functions in the heart of an L.M.U. area of the Township with great need for such services. Services provided in the facility also include a social branch library and after-school activities for local youth. Provision of an updated and upgraded facility would enable service providers to sign long-term service agreements. | Twinsburg Township | 50 | 181 days or more | \$2,109,387 |
| Summit | Town Hall Parking Lot | Repe town hall parking lot which serves the township hall and service facility. | Boston Township | 12 | 91 to 180 days | \$50,000 |
| Summit | WWTP #36 equipment replacements - Summit County | Repe town hall parking lot which serves the township hall and service facility. | County of Summit | 0 | 91 to 180 days | \$60,000 |
| Summit | Hudson Dr/Inverness Sewer Replacement - Summit Cou | Repe town hall parking lot which serves the township hall and service facility. | County of Summit | 2 | 181 days or more | \$250,000 |
| Summit | Multi-County Regional Dispatch Center (Stow, Ohio) | Funding necessary for completion of a multi-county regional dispatching center and to solve problems, as they pertain to communication responsibility issues with police officers in the field. The City of Stow currently provides Police, Fire, and EMS dispatch service to Stow, Tallmadge, Mogadore, and Randolph. Additional communities requesting our services are awaiting our completion of the center. Funds would be used to hire 5-10 additional personnel, and a portable dispatching terminal, purchase 45 portable and mobile radio units, upgrade software, replace mobile data terminals, and allow for field report writing. Reimburse funding would significantly benefit current and future communities. | Stow Police Department | 4 | 0 to 30 days | \$1,250,000 |
| Summit | Herrick Road | This project is on Herrick Road, from Riverside Road to Aurora Road (SR 83). This project includes complete roadway reconstruction of approximately 2.150 linear feet, by improving the existing profile and constructing new and wider pavement, underdrains, and re-graded ditches. | Twinsburg Township | 20 | 91 to 180 days | \$500,000 |
| Summit | Anthony Lane | This project is on Anthony Lane, from Liberty Road to its terminus. The project includes complete roadway construction of approximately 1.750 linear feet, by improving the existing profile and constructing new and wider pavement, underdrains, and re-graded ditches. | Twinsburg Township | 20 | 91 to 180 days | \$400,000 |
| Summit | Warner Road Foremain & Sewer Repairs (Part 2) - S | Repair force main and gravity sewers - second of two part repair. | County of Summit | 2 | 181 days or more | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Summit | Whitefriars Dr Sewer - Summit County | New sewer system to replace home septic systems and provide sewers for commercial industrial growth. | County of Summit | 4 | 31 to 90 days | \$532,000 |
| Summit | Mudbrook Sewer Repairs at Bath Road - Summit County | Repair failing gravity trunk sewer | County of Summit | 3 | 31 to 90 days | \$400,000 |
| Summit | Heights Road 9 - 14 | This project is on Buchel, Cambridge, Case, Eon, Harvard, Oxbot, Rugby, Starbort, and Yale Streets, west of Haddon Road. This project includes complete roadway reconstruction of approximately 10.715 linear feet, by improving the existing profile and constructing new and wider pavement, a new storm sewer system, curbs, gutters, and 4' sidewalks throughout the entire project area. This project will result in 10.715 linear feet of new road, 17.465 linear feet of new sidewalks, and replacing 236 feet of 6" water line. | Twinsburg Township | 120 | 181 days or more | \$6,261,042 |
| Summit | Stonewater Restoration | This project is on Old Mill Road, east of Ravenna Road. This project includes acquisition and habitat restoration on a 160+/- acre site of an abandoned housing development. This project involves infrastructure removal, property regrading, reforestation, and wetland habitat restoration, all on a key site that includes Trinker's Creek, riparian corridors, floodplains, wetlands, and other environmental assets. | Twinsburg Township | 25 | 181 days or more | \$2,500,000 |
| Summit | Cochran Road Sewer - County of Summit | Install new sewer system to replace residential septic systems and provide sewers for commercial/industrial growth. | County of Summit | 503 | 181 days or more | \$375,000 |
| Summit | Cleveland Cord Blood Center | Investing in the Cleveland Cord Blood Center is investing in bio-science and technology to advance Ohio's economy. Funding is requested to support the creation of 12 new jobs by expanding the collection sites for blood from umbilical cords after full-term births. Umbilical cord blood is a non-controversial source of adult stem cells. Units are processed, stored, and distributed throughout the world to persons requiring bone cell transplants and for research purposes. Funding will create 12 new high paying positions by adding two new hospital collection sites in Summit County. This program has already created 20 new positions in less than two years. With this expansion, the program will have directly created 30 positions in Ohio. This does not include additional positions created for suppliers, vendors and consultants supporting the project. The majority of the funding (27%) will be used for salaries with the remainder used for supplies. | Cleveland Cord Blood Center | 12 | 0 to 30 days | \$2,000,000 |
| Summit | Massillon/Steeze Road | Rehabilitate failing gravity trunk sewer | County of Summit | 3 | 31 to 90 days | \$410,000 |
| Summit | Massillon Road Sanitary Sewer Improvements - Green | Joint project with Summit County DOEB. Project will save and create jobs by replacing a failing treatment system with a trunk sewer aimed at eliminating a failing HSTS. | County of Summit | 7 | 31 to 90 days | \$1,004,315 |
| Summit | Manholes Rehabilitation - Summit County | To rehabilitation for 45 manholes. Since project location is spread throughout the county, zip code is office of Summit County DOEB. | County of Summit | 2 | 31 to 90 days | \$325,000 |
| Summit | Resurfacing of Boston Road | Mill and resurface Boston Road, Summit County through Cuyahoga County border - 16.893 square yards. This is a joint project between Summit County, Summit County, Ohio, and the cities of Brockwood Heights and Brockwood in Cuyahoga County, Ohio. | Richfield Township | 50 | 0 to 30 days | \$140,000 |
| Summit | Mull Avenue | Mull Avenue is a rehab project to reconstruct a section of roadway from Hawkins to White Pond Drive. | City of Akron | 56 | 31 to 90 days | \$5,000,000 |
| Summit | Information Technology Training | Staffed and capable candidates. As alumni of the local university, WaveRight believes in the core curriculum, but also feels that there are various aspects of information technology that does not fit well in a university setting, and therefore leaves students somewhat unprepared for their professional careers. Project Description: With Federal Stimulus initiative funds, WaveRight will create a department that works with local education and business institutions to provide and train university and advanced high school level students in the process of end-to-end information technology services. Instruction will include tables, scheduling, implementation, and maintenance of information technology based systems including but not limited to, e-commerce, customer relationship management, and paper to digital systems. Outcomes: * Income for local suppliers during equipment purchase * New source of talent for business * Lower barrier of entry for business needing IT services | WaveRight Information Technology, LLC | 10 | 0 to 30 days | \$350,000 |
| Summit | Pump Station #026 Abandonment - Summit County | Eliminating an aging pump station in order to reduce operation and maintenance cost. | County of Summit | 4 | 181 days or more | \$535,000 |
| Summit | Home upgrade | Install new insulation, windows, entry door and solar heat system at my home. | Home owner | 3 | 31 to 90 days | \$35,000 |
| Summit | SRI Second Stage | Funds are requested for expansion of SRI's current web based software programs that have grown the business to its current recurring income state. Our company has the opportunity to expand so as to meet the requirements of several of our clients. One example includes a client who serves many bank customers and will, as a result of our projected expansion, be able to serve many more. The bank, as a result of our ability to use our product to assist them in meeting the federal HFCV compliance requirements that will be mandated for completion by May 1, 2009. We strongly feel that this project will generate the need for up to 10 new employees in our company, the outcome of directly assisting those employees in both training and long term employment. It will also provide targeted banks the ability to function under the new governmental mandates. | Strategic Resources, Inc. | 12 | 31 to 90 days | \$350,000 |
| Summit | Pump Station #30 & Foremain #51 Abandonment - Sum | Replace two sanitary force mains | County of Summit | 1 | 0 | \$200,000 |
| Summit | WINTERIZE HOME WITH NEW ENERGY WINDOWS | WINTERIZE HOME WITH NEW ENERGY EFFICIENT WINDOWS.THIS PROJECT WILL CUT DOWN ON MY HOME HEATING COST. THE WINDOWS THAT ARE CURRENTLY IN THE HOME ARE VERY DRAFTY. | HOMEOWNER | 20 | 0 to 30 days | \$15,675 |
| Summit | Police Personnel Request | The City of Elow has 44 police officers that serve a community of 35,000 people while also staffing a municipal court that serves 16 communities. In 2008, The Center for Emergency Management and Homeland Security Policy Research conducted a staffing study of the Elow Police Department. The study reported that the police staffing in Elow is dangerously low, to the point where the safety of officers and citizens are at risk. The study recommended the hiring of 28 additional police officers. The City has been able to hire 8 officers to date. Funds needed would be for lowest the minimum hiring of at least 8 officers for the first three years of the officer's employment. Based upon the expansion of the City's small business infrastructure, a plan reviewed today, most of the immigrants are within 30 years from ready to launch a business than non-immigrants. According to the study, roughly 18.2 percent of all new business centers in this country are immigrants, yet immigrants make up only 12.2 percent of the workforce in the U.S. It also found that immigrant-owned businesses contributed roughly \$97 billion to the country's business income, out of a total of \$577 billion in 2005. Over 50 percent of Silicon Valley engineering and technology startups were founded by immigrants (as were 25 percent of such startups nationwide). I concluded that immigrants were more likely to be entrepreneurs. This program will train and assist immigrants in overcoming obstacles to fast track to having successful businesses. This will include language training, American business systems and regulations, Good business ethical practices, and culminate in the provision of financing of up to \$50,000 per business. | Stow Police Department | 5 | 0 to 30 days | \$1,200,000 |
| Summit | Immigrant Entrepreneurship Job Creation Program | Over 50 percent of Silicon Valley engineering and technology startups were founded by immigrants (as were 25 percent of such startups nationwide). I concluded that immigrants were more likely to be entrepreneurs. This program will train and assist immigrants in overcoming obstacles to fast track to having successful businesses. This will include language training, American business systems and regulations, Good business ethical practices, and culminate in the provision of financing of up to \$50,000 per business. | Mercy Economic Development International Corporati | 500 | 0 to 30 days | \$1,500,000 |
| Summit | Olde Eight Road Reconstruction | Olde Eight Road was constructed in 1939. It has been widened in the past with improvement to the shoulders. Traffic volumes have increased and the roadway has deteriorated. Lane widths and shoulders must be increased to satisfy current design standards along with drainage improvements to protect the roadway. The project will reconstruct approximately 3.3 miles of roadway and will enclose roadway ditches. Olde Eight Road is the main north-south thoroughfare of the Village of Boston Heights and provides access to the Cuyahoga Valley National Recreation Area. The AOT seeks 13,000. The improvement will increase the safety of the Village residents and motorist alike. The Summit Metro Crash Response Team reports 247 throughout Summit County to investigate severe and fatal traffic collisions. The group cooperatively assembles its investigation from thirteen police agencies throughout Summit County and includes police officers from: Bath Twp., Boston Heights, Copley, Fairview, Hudson, Marion, Massillon, Northfield, Summit County Metro Parks, Silver Lake, Stone, Tallmadge and Twinsburg, with more agencies planning on joining in the near future. The SMART Operational Readiness project hopes to outfit 13 police agencies with investigative equipment that can be towed to the scene of a traffic collision to provide lighting, scene command and other resources. | Boston Heights | 105 | 181 days or more | \$3,960,000 |
| Summit | SMcRT Operational Readiness Project | The funding will purchase 2 trailers, 2 Total Station laser mapping units, 2 laptop computers with updated mapping software, 2 small generators, lighting towers and 2 packaged traffic investigation tool boxes and traffic control signs and cones. This will equip the SMcRT with desperately needed equipment that will benefit a minimum of thirteen police agencies across the county and assure timely investigation of severe and fatal traffic crashes. | Summit Metro Crash Response Team | 30 | 0 to 30 days | \$80,000 |
| Summit | Pump Station #48 replacement - Summit County | Replace aging pump station. | County of Summit | 4 | 181 days or more | \$500,000 |
| Summit | Pump Station #30 Replacement - Summit County | New pumps would reduce energy costs by 35%. | County of Summit | 1 | 91 to 180 days | \$120,000 |
| Summit | Pump Station #51 Replacement - Summit County | New pumps would reduce energy costs by 25%. | County of Summit | 1 | 91 to 180 days | \$90,000 |
| Summit | Elm Street Sewer Improvement - Hudson | Replacing sewers to eliminate I/I; project includes replacing undersized (4") manholes. | County of Summit | 5 | 0 to 30 days | \$750,000 |
| Summit | Pump Station #001 Rehabilitation | Rehabilitation of sewers to eliminate infiltration and inflow to reduce operating and maintenance costs. | County of Summit | 1 | 31 to 90 days | \$80,000 |
| Summit | Pump Station #11 District Sewer Rehabilitation | Rehabilitation of sewers to eliminate infiltration and inflow to reduce operating and maintenance costs. | County of Summit | 10 | 91 to 180 days | \$1,362,500 |
| Summit | Pump Station #56 Abandonment - Summit County | Reduce operation and maintenance costs by elimination of pump station. | County of Summit | 1 | 91 to 180 days | \$120,000 |
| Summit | Long Term Plan - Marion - Summit County | Joint effort with Village of Mogadore to eliminate I/I to reduce operation and maintenance costs and potential for basement flooding. | County of Summit | 1 | 91 to 180 days | \$200,000 |
| Summit | Rt 619 and Portage Lake Sewer System | New sewer system to replace aging HSTS, ineffective commercial sewage systems and provide for economic development along the Portage Lakes shoreline. | County of Summit | 11 | 181 days or more | \$1,500,000 |
| Summit | WWTP #36 equipment replacements - Summit County | For clarifier belt modification. | County of Summit | 1 | 31 to 90 days | \$80,000 |
| Summit | WWTP #36 equipment replacements - Summit County | To replace belt press components | County of Summit | 0 | 31 to 90 days | \$30,000 |
| Summit | WWTP #23 UV disinfection replacement | Implementation would reduce power costs by 15%. | County of Summit | 0 | 91 to 180 days | \$8,000 |
| Summit | WWTP #48 Blower Replacement | Implementation would reduce power costs by 25%. | County of Summit | 0 | 91 to 180 days | \$10,000 |
| Summit | WWTP #48 UV disinfection replacement | Implementation would reduce power costs by 15%. | County of Summit | 0 | 91 to 180 days | \$12,000 |
| Summit | WWTP #13 Abandonment - Summit County | Eliminate WWTP to reduce operating and maintenance costs and provide trunk sewers to serve areas of failing septic systems. Project will allow for an expansion of user base. | County of Summit | 7 | 91 to 180 days | \$1,000,000 |
| Summit | Little Cuyahoga Trunk Rehabilitation - Summit Coun | Trunk sewer requiring rehabilitation. | County of Summit | 14 | 31 to 90 days | \$75,000 |
| Summit | WWTP #26 equipment replacements - Summit County | For facility roof replacement. | County of Summit | 0 | 91 to 180 days | \$40,000 |
| Summit | WWTP #24 UV disinfection replacement - Summit Coun | Implementation would reduce power costs by 15%. | County of Summit | 0 | 91 to 180 days | \$10,000 |
| Summit | WWTP #46 Abandonment - Summit County | Eliminate WWTP to reduce operating and maintenance costs and to provide trunk sewers to areas of failing HSTS and to serve additional residential and commercial areas. | County of Summit | 7 | 91 to 180 days | \$1,000,000 |
| Summit | Easton Road sewer line extensions - Summit County | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 4 | 91 to 180 days | \$600,000 |
| Summit | Greenwich Road Sewer and Force main - Norton | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 6 | 91 to 180 days | \$800,000 |
| Summit | Greenwich Road Sewer Extension - Norton | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 1 | 31 to 90 days | \$150,000 |
| Summit | Newpark sewer improvements - Norton | Paving, storm, and sanitary sewers to eliminate local grinder pump stations and a package WWTP. Implementation will eliminate localized flooding and maintain jobs as well as encourage growth. | County of Summit | 19 | 31 to 90 days | \$2,700,000 |
| Summit | Oak Street sewer extensions - Norton | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 1 | 31 to 90 days | \$150,000 |
| Summit | New Pump Stations and Force mains - Norton | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 36 | 181 days or more | \$5,000,000 |
| Summit | Wadsworth Road Sanitary Sewer extension - Norton | Sewer extension to eliminate failing HSTS and to serve additional residential and commercial areas. | County of Summit | 1 | 31 to 90 days | \$200,000 |
| Summit | Everett Road Phase II Sewer installation - Richfie | Replace leaking and undersized sanitary main. | County of Summit | 11 | 0 to 30 days | \$1,600,000 |
| Summit | Silver Lake Trunk Sewer Upsizing - Summit County | Replace leaking and undersized sanitary main. | County of Summit | 3 | 91 to 180 days | \$350,000 |
| Summit | Mogadore Sewage Master Meter | The installation of a permanent meter will allow recording of flow history for better system performance evaluation. | County of Summit | 1 | 31 to 90 days | \$75,000 |
| Summit | WWTP #36 equipment replacements - Summit County | Power capacitors would reduce total plant electric costs by 5-7%. | County of Summit | 0 | 91 to 180 days | \$20,000 |
| Summit | WWTP #36 equipment replacements - Summit County | To replace two RBCs for secondary treatment. | County of Summit | 2 | 31 to 90 days | \$240,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Summit | Kenneth/Samira Sewer Rehabilitation | EPA mandated sewer rehabilitation to eliminate it | County of Summit | 12 | 0 to 30 days | \$1,625,000 |
| Summit | Pump Station #13 and 59 Abandonment - Summit Count | Abandoning the stations to reduce energy needs and for more efficient system operation. | County of Summit | 5 | 181 days or more | \$750,000 |
| Summit | Pump Station #13 outfall sewer improvement - Summit | Replace force main outlet sewers which are undersized for pump station discharge. | County of Summit | 3 | 181 days or more | \$400,000 |
| Summit | Pump Station #19 replacement - Summit County | Replace pump station to improve efficiency and operation. | County of Summit | 2 | 181 days or more | \$300,000 |
| Summit | Pump Station #53 Transfer Switch | Improve reliability of power supply to major WWTP | County of Summit | 0 | 181 days or more | \$30,000 |
| Summit | State Road Improvements | The State Road project is intended to address a portion of State Road from approx. 175 feet north of Graham Road from approx. 700 feet north of Duck Road to allow for the construction of a turn lane. An approx. seven foot wide bicycle path will be constructed along the entire length of the project on both the west and east side of the road. Improvements also will be made to both Road and State Corners. These items approx. 160 feet of each road's junction with State Road to the west and approximately 700 feet of east road's junction with State Road to the east. State Rd. is a north-south arterial through the City. The intersections at both Road and Baileys Corners Road are both signalized. Left-turn lanes are provided on all approaches to both locations, and there is a south-bound right turn lane on State Road. Baileys Corners Road at the Baileys Corners Road intersection there is a leading protected and permitted left-turn phase for north-south traffic. Until very recently, the intersection at Baileys Corners Road operated with a leading protected, but free-section heads were installed on all approaches in Fall 2007, providing leading protected and permitted left turn phases for all approaches. The northern portion of the Village is experiencing falling private residential water wells. As the wells age, low production and poor water quality are affecting the residents. The Village has prepared bid documents to extend water mains into this area and improve water supply and provide fire protection. Approximately 5000 feet of 18", 5000 feet of 12" and 6300 feet of 8" water lines will be installed along with connections, fire hydrants and related appurtenances. The streets that are involved in the project are Sholle Drive, Wilcox Road, Brandywine Road, Beverly Road, Richard Road, Grandview Drive and Ohio Eight Road. Public improvement in neighborhood for Aghada and Bridding, Balist and Kipling, Balcher and Fawler, Grant, Markle, Miskew and Stanton, South and Nestor Ave. | City of Cuyahoga Falls | 100 | 181 days or more | \$4,058,440 |
| Summit | Water Main Extensions Phase 1 and 2 | Approximately 5000 feet of 18", 5000 feet of 12" and 6300 feet of 8" water lines will be installed along with connections, fire hydrants and related appurtenances. The streets that are involved in the project are Sholle Drive, Wilcox Road, Brandywine Road, Beverly Road, Richard Road, Grandview Drive and Ohio Eight Road. | Boston Heights | 40 | 91 to 180 days | \$2,650,000 |
| Summit | Public Improvement in Neighborhoods | Public improvement in neighborhood for Aghada and Bridding, Balist and Kipling, Balcher and Fawler, Grant, Markle, Miskew and Stanton, South and Nestor Ave. | City of Akron | 50 | 181 days or more | \$4,000,000 |
| Summit | Dollar Home project | Rebuild homes to go green and recycle existing building materials | City of Akron | 15 | 91 to 180 days | \$700,000 |
| Summit | Urban Neighborhood Development | Install high efficiency furnaces and ceiling fans | City of Akron | 10 | 31 to 90 days | \$750,000 |
| Summit | Hickory Street | Construct 15 Vistable homes | City of Akron | 10 | 31 to 90 days | \$500,000 |
| Summit | Hickory St. | Inst; high efficiency furnaces and windows | City of Akron | 10 | 31 to 90 days | \$300,000 |
| Summit | Howe Ave./Main Street Intersection Improvements | The project proposes to lengthen certain turn lanes of Howe Ave. (CR602) and Main Street. Additionally, horizontal alignment of Howe is proposed to be slightly shifted to address a hazardous intersection and provide a smooth curve to improve the geometry of the intersection. Left turn lanes are also proposed to be widened to 12 feet to meet current design standards. Westbound Howe left turn lane is to go to 105 ft, add curb and right turn lane to 220 ft, westbound Howe right turn lane is to be extended and southbound Main left turn lane is to go to 184 feet in length. Modification of existing traffic signals are included, as well as additional equipment with ADA compliant curb ramps throughout. New curb and gutter stock warning wells are proposed to be located to minimize RW impact. New pavement markings and signage, along with new lighting, are proposed. All lighting poles and underground electric utility lines are necessary as well. The proposed improvement work length is 0.28 miles along Howe Avenue and 0.12 miles along Main Street. | City of Cuyahoga Falls | 20 | 91 to 180 days | \$810,000 |
| Summit | Blinn Street | Install high efficiency ceiling fans and furnaces | City of Akron | 10 | 91 to 180 days | \$100,000 |
| Summit | Small Business in the Healthcare Field | This small business has been continually growing for the past 8 years. With our newly expanded studio, business is booming in mid-2008. With the economy in a not-so-positive state, business has decreased tremendously (approximately 75%) in the last 6 months. In a time where utility and healthcare costs are high, it is difficult for people to health care services and improve their health and wellness. Unfortunately, personal training seems to be one of the areas in which people feel is optional. My heart and soul have been put in my business. I have not taken a paycheck since being in business and I have grown into a larger facility where I employ more and more people. Unfortunately, I am now faced with the possibility of losing my business as well as my employees. We do not spend frivolously and we work every penny. Really do we entertain non-necessaries such as eating out, occasional prizes through the business at the expense. We save costs by hand-delivering flyers to local businesses and sending emails. Please help me save my position - my business. Thank you for your consideration. | Build A Body Personal Training, LLC | 15 | 0 to 30 days | \$15,000 |
| Summit | Seasons Road Water Line | The Seasons Road water line project is a 4,800 linear feet of water line that will provide service to 2/3 of a proposed 252 acre Joint Economic Development Zone (JEDZ) in northern Summit County involving the cities of Stow, Hudson and Cuyahoga Falls. This water line is part of infrastructure necessary to begin construction in the JEDZ. The City of Akron will also be a beneficiary in that Stow is currently involved in a tax sharing agreement with Akron. The JEDZ will be located around a new interchange with Seasons Rd and SR 8. A 100 bed hospital is the anchor for this JEDZ. Health care and related medical businesses will be the targeted uses for the JEDZ. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEDZ, and by 2012, the retention and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 6,825 jobs in the health care and supporting fields are projected to build out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Cuyahoga Falls | 4,550 | 31 to 90 days | \$647,312 |
| Summit | SR 303 Slope Failure | The project is comprised of the stabilization of an embankment supporting a portion of SR 303 in Boston Heights. The original drainage system, constructed with the roadway, failed allowing storm water to saturate the embankment and subsequently cause a slope failure. The slope failure has impacted the driveway and will affect the roadway surface, thus effectively closing one lane of traffic. Approximately 200 cubic yards of excavation and embankment are required to stabilize the slope along with the installation of 100 feet of storm sewer and an outlet structure. The Village is responsible for the maintenance of the storm sewer and embankment. The CRODT has made temporary repairs that have failed. | Boston Heights | 30 | 31 to 90 days | \$175,000 |
| Summit | Seasons Road Sanitary Sewer Line | The Seasons Road sanitary sewer line project is a 4,800 linear feet of sewer line that will provide service to a proposed 252 acre Joint Economic Development Zone (JEDZ) in northern Summit County involving the cities of Stow, Hudson and Cuyahoga Falls. This sewer line is part of infrastructure necessary to begin construction in the JEDZ. The City of Akron will also be a beneficiary in that Stow is currently involved in a tax sharing agreement with Akron. The JEDZ will be located around a new interchange with Seasons Rd and SR 8. A 100 bed hospital is the anchor for this JEDZ. Health care and related medical businesses will be the targeted uses for the JEDZ. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEDZ, and by 2012, the retention and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 6,825 jobs in the health care and supporting fields are projected to build out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Cuyahoga Falls | 6,825 | 31 to 90 days | \$1,100,000 |
| Summit | Barberton Bio Mass Power Genation Facility | Barbock and Wilcox Corporation, the City of Barberton, and the Barberton Community Development Corporation propose to partner in the creation of a sustainable, state of the art 25,000 MW renewable fuels bio mass power generation facility. This facility would be designed based on patents and engineering owned by Barbock and Wilcox, and already utilized, and in service in some sites in Europe. This facility would reduce the costs of electric to 40,000 consumers and business owners, and help to meet the needs for electrical power generation in the City of Barberton and some parts of Southwest Summit County. The planned renewable energy plant is sited at 20MW which would produce enough power for about 40,000 homes by burning recycled wood scraps like willow and elephant grass. It will also avoid around 80,000 tonnes of carbon dioxide emissions every year which would be the same as removing 20,000 cars from the road. 700 Construction jobs would also be created for 18 months, and improve the competitiveness of the region. | Barberton Community Development Corporation | 2,400 | 91 to 180 days | \$60,000,000 |
| Summit | Seasons Road Improvements | The Seasons Road Improvement project is the complete upgrade of an existing main roadway that will provide primary access to a proposed 252 acre Joint Economic Development Zone (JEDZ) in northern Summit County involving the cities of Stow, Hudson and Cuyahoga Falls. This project is part of infrastructure necessary for development to occur in the JEDZ. The City of Akron will also be a beneficiary in that Stow is currently involved in a tax sharing agreement with Akron. The JEDZ will be located around a new interchange with Seasons Rd and SR 8. A 100 bed hospital is the anchor for this JEDZ. Health care and related medical businesses will be the targeted uses for the JEDZ. The expected outcome is the creation of over 250 acres of shovel ready development sites in the JEDZ, and by 2012, the retention and creation of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 6,825 jobs in the health care and supporting fields are projected to build out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | City of Cuyahoga Falls | 6,825 | 31 to 90 days | \$3,174,000 |
| Summit | White Pond Smart Office Park | Leading, utility extension and road construction to house up to seven office buildings at the White Pond Smart Office Park. | City of Akron Engineering Bureau | 1500 | 31 to 90 days | \$2,500,000 |
| Summit | White Pond Smart Office Park | Leading, utility extension and road construction to house up to seven office buildings at the White Pond Smart Office Park. | City of Akron Engineering Bureau | 90 | 31 to 90 days | \$2,500,000 |
| Summit | Scattered Small Business Jump Startars | Acquire and restore blighted buildings for the purpose of supporting small inner-city businesses by housing start-up businesses that are now struggling to live in a foodless while waiting out of their homes and garages. Large buildings would be renovated to be brought up to code, reduce energy costs and create a positive breeding ground for small business to prosper. | City of Akron Engineering Bureau | 500 | 0 to 30 days | \$5,000,000 |
| Summit | Diagonal Road Homes | Create a viable community of 30 homes | City of Akron | 45 | 31 to 90 days | \$750,000 |
| Summit | Street Re-Alignment - Hill/East Buchtel/University | Street Realignment - Wolf Ledges at Carroll This project includes roadway realignment to reduce traffic congestion and complements traffic improvements proposed by re-aligning Hill / East Buchtel / University streets in the southeast quadrant of The University of Akron campus. Improved traffic flow is critical to ongoing growing enrollment at the University of Akron. Construction is contingent on replacement of the existing School of Law at the University of Akron. The project leverages valuable downtown property configurations for university growth. The alignment of these roadways improves traffic flow, reduces vehicle emissions, and increases pedestrian safety on and around campus. | The University of Akron | 45 | 91 to 180 days | \$2,224,300 |
| Summit | Lead Paint Program | Address lead hazards in approx. 220 homes | City of Akron | 10 | 0 to 30 days | \$4,000,000 |
| Summit | Opportunity Park South Parking Deck | Construction of a public parking deck to complement the Multimodal Metro Transit Transfer facility. | City of Akron Engineering Bureau | 550 | 31 to 90 days | \$18,000,000 |
| Summit | Energy Efficiency Rehab Program | To replace existing equipment with energy star rated equipment to provide savings and cost reductions | City of Akron | 45 | 31 to 90 days | \$2,500,000 |
| Summit | Opportunity Park South Parking Deck | Construction of a public parking deck to complement the Multimodal Metro Transit Transfer facility | City of Akron Engineering Bureau | 550 | 31 to 90 days | \$18,000,000 |
| Summit | Reconstruction of Steels Corners Rd. to State rd. | Roadway reconstruction, utilities, bike lanes, sidewalks. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$11,500,000 |
| Summit | LED Signals | City to upgrade to LED traffic signals in various locations to reduce maintenance and save energy | City of Akron | 100 | 91 to 180 days | \$10,000,000 |
| Summit | Middlebury Neighborhood Business Development | Environmental clean up, grading, extension of utilities to create shovel ready site for expansion of the Middlebury complex. | City of Akron Engineering Bureau | 22 | 31 to 90 days | \$750,000 |
| Summit | Middlebury Neighborhood Business Development | Environmental clean up, grading, extension of utilities to create shovel ready site for expansion of the Middlebury complex. | City of Akron Engineering Bureau | 90 | 31 to 90 days | \$750,000 |
| Summit | Morley HVAC Replacement | Morley HVAC replacement to produce energy savings | City of Akron | 14 | 31 to 90 days | \$425,000 |
| Summit | Landmark Building Housing | Clean up and restoration of the Landmark Building into a mixed-use project housing diverse retail. Remove contamination, improve energy efficiency. | City of Akron Engineering Bureau | 110 | 31 to 90 days | \$4,000,000 |
| Summit | Bike Lanes to Arterials and Collector Streets | Bike lanes for 20 miles of arterials and 30 miles of collector streets. | City of Cuyahoga Falls | 0 | 91 to 180 days | \$3,500,000 |
| Summit | Landmark Building Housing | Clean up and restoration of the Landmark Building into a mixed-use project housing diverse retail. Remove contamination, improve energy efficiency. | City of Akron Engineering Bureau | 110 | 31 to 90 days | \$4,000,000 |
| Summit | Lock 3 Canal Improvements | Lock 3 Redevelopment reconstruction of Ohio Canal (storm sewer) from Civic Theatre South to Lock 2 | City of Akron Engineering Bureau | 60 | 91 to 180 days | \$3,000,000 |
| Summit | Stub Center Facade Repair | Facade renovation to make the building more energy efficient | City of Akron | 30 | 31 to 90 days | \$2,787,000 |
| Summit | Neighborhood Stabilization Program | Acquisition, Renovation and/or Demolition of 50 homes. | City of Cuyahoga Falls | 0 | 0 to 30 days | \$3,500,000 |
| Summit | Lock 3 Canal Improvements | Lock 3 Redevelopment reconstruction of Ohio Canal (storm sewer) from Civic Theatre South to Lock 2. | City of Akron Engineering Bureau | 60 | 181 days or more | \$3,000,000 |
| Summit | Hamlin Building Rehab | Cleaning and renovation of historic building in downtown Akron to LEED standards. | City of Akron Engineering Bureau | 80 | 91 to 180 days | \$5,000,000 |
| Summit | Fire Station 12 | Construction of a new fire station | City of Akron | 30 | 0 | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|----------------------------------|----------------|--------------------|---------------------------|
| Summit | Hamilin Building Rehab | Cleanup and renovation of Historic building in downtown Akron to LEED standards. | City of Akron Engineering Bureau | 80 | 91 to 180 days | \$5,000,000 |
| Summit | Fire Station 12 reconstruct | Construct a new green fire station | City of Akron | 30 | 31 to 90 days | \$3,000,000 |
| Summit | Wyoga Lake Research & Industrial Park | Creation of a new industrial parkoff of Wyoga Lake Road in cooperation with the City of Stow. | City of Cuyahoga Falls | 300 | 91 to 180 days | \$3,000,000 |
| Summit | Hamilin Building Rehab | Cleanup and renovation of Historic building in downtown Akron to LEED Standards. | City of Akron Engineering Bureau | 80 | 91 to 180 days | \$5,000,000 |
| Summit | Parking Deck - Martin Center over adjacent property | This initiative seeks to provide concentrated parking for the vehicles of 260 students, faculty, staff, and visitors to events on the University of Akron main campus. Concentrated parking in elevated decks is an essential component of meeting increased enrollment while preserving eco-friendly green space in metropolitan education settings. The 34 acres of campus greenspace added in the last 4 years has largely emerged from demolition of roadways and surface parking lots. These greenspaces reduce the urban heat island effect in downtown Akron, Ohio and have made possible the planting of 2,800 trees which absorb more than 4 tons of CO2 annually. Construction is slated to be completed by January 1, 2011. This project represents a collaborative partnership of public institutions with private not-for-profit entities to jointly address safety and other urgent needs in their metropolitan setting. | The University of Akron | 78 | 31 to 90 days | \$3,900,000 |
| Summit | Green Tech Incubator | Restore and build out 655 South Broadway as an expansion of Akron Global Business Accelerator for the emerging green technologies | City of Akron Engineering Bureau | 120 | 0 to 30 days | \$2,000,000 |
| Summit | Acquisition & Demolition of Portage Trail Property | Acquisition, remediation, & Demolition of 111-113 Portage Trail for development. | City of Cuyahoga Falls | 30 | 0 to 30 days | \$300,000 |
| Summit | Green Tech Incubator | Restore and build out 655 South Broadway as an expansion of Akron Global Business Accelerator for the emerging green technologies | City of Akron Engineering Bureau | 120 | 0 to 30 days | \$2,000,000 |
| Summit | Parking Deck - Admissions Building/Greek Church St | This initiative seeks to provide concentrated parking for the vehicles of 437 students, faculty, visitors, and staff near the University of Akron main campus. Concentrated parking in elevated decks is an essential component of meeting increased enrollment while preserving eco-friendly green space in metropolitan education settings. The 34 acres of campus greenspace added in the last 4 years has largely emerged from demolition of roadways and surface parking lots. These greenspaces reduce the urban heat island effect in downtown Akron, Ohio and have made possible the planting of 2,800 trees which absorb more than 4 tons of CO2 annually. Construction is projected for August 1, 2010. This project represents a collaborative partnership of public institutions with private not-for-profit entities to jointly address safety and other urgent needs in their metropolitan setting. | The University of Akron | 157 | 31 to 90 days | \$7,866,000 |
| Summit | Parking Deck - Field House over Lot 10 (1,164 spac | This initiative seeks to provide concentrated parking for the vehicles of 1,164 students, faculty, staff, and visitors on the University of Akron main campus. Concentrated parking in elevated decks is an essential component of meeting increased enrollment while preserving eco-friendly green space in metropolitan education settings. The 34 acres of campus greenspace added in the last 4 years has largely emerged from demolition of roadways and surface parking lots. These greenspaces reduce the urban heat island effect in downtown Akron, Ohio and have made possible the planting of 2,800 trees which absorb more than 4 tons of CO2 annually. Construction is slated to be completed by January 1, 2011. Funding for this initiative prioritizes campus safety, sustainable practices in dense urban settings and ecologically balanced urban communities. | The University of Akron | 210 | 31 to 90 days | \$20,952,000 |
| Summit | Goodyear Power House Clean up and demolition | Goodyear Tire and Rubber Co. Project: Environmental cleanup and demolition of former Power House. Project will leverage the construction of \$100M Goodyear Tire and Rubber new corporate HQ. | City of Akron Engineering Bureau | 2915 | 91 to 180 days | \$3,000,000 |
| Summit | Downtown Redevelopment Project | Acquisition of properties for redevelopment of a new mixed use center. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$20,000,000 |
| Summit | Street Re-alignment - Wolf Ledges at Carroll | This project includes roadway re-alignment to reduce traffic congestion and complements traffic improvements proposed at the existing Hill East Street. University seeks to improve the safety of the University of Akron campus. Improved traffic flow is critical for growing enrollment at the University of Akron. Construction is contingent on replacement of the existing School of Law at the University of Akron. The project leverages valuable downtown configurations for university growth. Re-alignment of the roadway will improve traffic flow, reduce vehicle emissions, and increase pedestrian safety on and around campus. | The University of Akron | 45 | 91 to 180 days | \$2,224,300 |
| Summit | Confluence Park/Environmental Cleanup | Confluence Park - to acquire environmentally clean upgrade a blighted area along the canal and towpath for wetlands and parks in southwest Akron. Removal of contaminated commercial and demolition dump site to complement construction of new \$64 million technical center for Bridgeway International. Site will be used for a regional park to attract new businesses to the area. | City of Akron Engineering Bureau | 1030 | 31 to 90 days | \$3,000,000 |
| Summit | Pedestrian Bridge - Guzzetta Hall to Robertson Hal | Pedestrian Bridge to Robertson Dring Hall This initiative seeks to provide a 120-foot span pedestrian bridge to the University of Akron's main campus, providing a safe passage for students, faculty, and staff to reach the dining hall on campus. Construction completion by August 1, 2010 is projected. Funding for this initiative prioritizes student safety and walkable communities in dense urban settings. | The University of Akron | 37 | 31 to 90 days | \$1,840,800 |
| Summit | Union/Buchtel Intersection Improvements | This project improves pedestrian safety of an existing intersection at the north end of The University of Akron main campus. Numerous students cross this intersection from surrounding parking areas in order to get to their classes. Construction completion by March 1, 2010 is projected. The intersection improvements enhance pedestrian safety, improve traffic control, and beautify local streets. | The University of Akron | 3 | 31 to 90 days | \$138,060 |
| Summit | Confluence Park/Environmental Cleanup | Confluence Park - to acquire, environmentally clean upgrade a blighted area along the canal and towpath for wetlands and parks in southwest Akron. Removal of contaminated commercial and demolition dump site to complement construction of new \$64 million technical center for Bridgeway International. Site will be used for a regional park to attract new businesses to the area. | City of Akron Engineering Bureau | 1030 | 31 to 90 days | \$3,000,000 |
| Summit | Cuyahoga Falls/Boston Twp. JEDD Roadway project | New street, sidewalk, bike lane, underground utilities (7,500 ft) | City of Cuyahoga Falls | 5025 | 91 to 180 days | \$5,250,000 |
| Summit | Pedestrian Bridge Guzzetta Hall to EJ Thomas (repa | Pedestrian Bridge to EJ Thomas This initiative seeks to provide an 80-foot span pedestrian bridge over heavily trafficked campus streets for safe passage of students, faculty, visitors, and staff to the University of Akron's EJ Thomas Performing Arts Hall. Currently, students and audience members compete with motor vehicles to reach the performance hall from parking areas located on campus. Construction completion by August 1, 2010 is projected. Funding for this initiative promotes student safety and walkable communities in dense urban settings. | The University of Akron | 15 | 31 to 90 days | \$750,000 |
| Summit | Concrete patterned crosswalk for pedestrian safety | This initiative seeks to improve pedestrian safety on streets surrounding the University of Akron campus. Some intersections near student housing record the County of Summit's highest pedestrian traffic crossing and present real concerns for student safety from motor vehicles. Construction completed by January 1, 2010 is projected. Funding for this initiative will promote campus safety, and use of alternative transportation methods to and from the University of Akron and University Park neighborhoods. | The University of Akron | 3 | 31 to 90 days | \$119,652 |
| Summit | Confluence Park/Environmental Cleanup | Confluence park - to acquire, environmentally clean upgrade a blighted area along the canal and towpath for wetlands and parks in southwest Akron. Removal of contaminated commercial and demolition dump site to complement construction of new \$64 million technical center for Bridgeway International. Site will be used for a regional park to attract new businesses to the area. | City of Akron Engineering Bureau | 1030 | 31 to 90 days | \$3,000,000 |
| Summit | Pedestrian Bridge Fieldhouse to Stadium | Pedestrian Bridge - Fieldhouse to Stadium This initiative seeks to provide a 30-foot span pedestrian bridge over existing roadways for safe passage of students, faculty, visitors, and staff at the University of Akron's on-campus academic facilities. The pedestrian bridge offers safe passage during late evenings and inclement weather. Construction completion by August 1, 2011 is projected. Funding for this initiative promotes student safety and walkable communities in dense urban settings. | The University of Akron | 31 | 31 to 90 days | \$1,560,000 |
| Summit | Sumner Street Cul de Sac Repair | This project replaces 250 linear feet of severely deteriorated roadway in the heart of the University campus. This roadway provides critical access to emergency services at the heart of The University of Akron. Construction completion is expected by June, 2009. The Sumner Street cul-de-sac repair improves pedestrian safety at a primary library entrance to The University of Akron. | The University of Akron | 18 | 31 to 90 days | \$287,625 |
| Summit | Cascade Deck Roof and Plaza improvements | Cascade Deck Improvements (LED light fixtures and railing paint for energy saving, sprinkler system replacement) | City of Akron Engineering Bureau | 450 | 31 to 90 days | \$12,000,000 |
| Summit | Creation of bike lanes to connect Front Street wit | 1,700 bike lanes from Front St. via Hillcrest, Hogbridge & Francis to State St. | City of Cuyahoga Falls | 0 | 31 to 90 days | \$1,700,000 |
| Summit | Pedestrian Bridge - Exchange Street at Grant Street | Pedestrian Bridge - Exchange at Grant Street This initiative seeks to provide a 160-foot span pedestrian bridge over heavily trafficked downtown streets for safe passage of residence hall students to the University of Akron campus. Currently, students compete with motor vehicles to reach their classes on campus. This crossing records the highest pedestrian counts of any intersection in the City of Akron and County of Summit. Construction completion by August 1, 2011 is projected. Funding for this initiative promotes student safety and walkable communities in dense urban settings. | The University of Akron | 48 | 31 to 90 days | \$2,400,000 |
| Summit | Canal Place Parking | Creation of additional parking solution with the Canal Place complex to increase access to parking for incubator tenants, guests and other users of this densely occupied complex. | City of Akron Engineering Bureau | 5500 | 0 to 30 days | \$3,000,000 |
| Summit | Patriot Energy - Mun. Solid Waste to Energy | Patriot Energy LLC will take conventional household waste (MSW), dry, crush, and remove all recyclables. The remaining material (RDF) is then conveyed to the gasifier and converted to power of ethanol. The building will be approximately 500,000sf and will process 2,000 tpd of municipal solid waste. This is a totally GREEN process and cutting edge technology. | Patriot Energy LLC | 150 | 91 to 180 days | \$150,000,000 |
| Summit | Pedestrian Bridge-Quaker to Olson (including eleva | Pedestrian Bridge - Quaker to Olson This initiative seeks to provide a safe 500-foot span pedestrian walkway over CSX railroad tracks from downtown residence halls to the University of Akron campus. Interest has been expressed to focus this project as a design competition for use of titanium as a building construction material to reduce material costs in the dense and industrial. Currently, students must use walkways adjacent to heavily-travelled roads or shuttle buses to reach their classes on campus. Some students jump fencing along the railroad tracks as a shortcut. Construction completion by January 1, 2012 is projected. Funding for this initiative promotes safety, homeland security, and walkable communities. To ensure accessibility, the project includes construction of an elevator at the downtown end of the pedestrian bridge. | The University of Akron | 98 | 31 to 90 days | \$4,900,000 |
| Summit | Northwest Parking Deck - between Mill Street and E | This initiative seeks to provide concentrated parking for the vehicles of 1,135 students, faculty, visitors, and staff at the University of Akron main campus. Concentrated parking in elevated decks is an essential component of meeting increased enrollment while preserving eco-friendly green space in metropolitan education settings. This project uses an unconventionally shaped edge of land adjoining railroad tracks to beautify the face of campus from downtown while meeting parking demand. The 34 acres of campus greenspace added in the last 4 years has largely emerged from demolition of roadways and surface parking lots. These greenspaces reduce the urban heat island effect in downtown Akron, Ohio and have made possible the planting of 2,800 trees which absorb more than 4 tons of CO2 annually. Construction is slated to be completed by January 1, 2011. Funding for this initiative prioritizes campus safety, sustainable practices in dense urban settings and ecologically balanced urban communities. | The University of Akron | 1,855 | 31 to 90 days | \$18,480,000 |
| Summit | College Street Streetscape (Mill Street to Market | College Street Streetscape This project replaces 1,400 linear feet of aging sidewalks and improves infrastructure reliability from adverse weather outages by locating utilities underground. Construction completion by January 1, 2011 is projected. The College Street Streetscape enhances pedestrian safety, improves utility distribution, protects infrastructure reliability, and beautifies local streets at the convergence of University, Akron City Schools, and Medical Corridor developments. | The University of Akron | 17 | 31 to 90 days | \$828,360 |
| Summit | Reconfiguration of 2nd Street to 2-way traffic | Improve access to downtown and Route R Expressway | City of Cuyahoga Falls | 0 | 0 to 30 days | \$200,000 |
| Summit | Canal Place Parking | Creation of additional parking solution within the Canal Place complex to increase access to parking for incubator tenants, guests and other users of this densely occupied complex. | City of Akron Engineering Bureau | 5500 | 0 to 30 days | \$3,000,000 |
| Summit | Carroll Street West Pavement Repair | This project includes repair of 750 linear feet of deteriorated roadway, installing new surface course asphalt, walks, drainage structures and curbs at the west gateway to The University of Akron campus. Construction completion by September, 2008 is projected. Funding will allow completion of these improvements by June 17, 2009. Carroll Street West Pavement improves the safety of roadways and sidewalks for motorists and pedestrians in the heart of athletic areas and student recreation areas. | The University of Akron | 14 | 31 to 90 days | \$180,000 |
| Summit | Reconstruction of Barney's Busy Corner | Improving a dangerous 5 leg intersection. | City of Cuyahoga Falls | 300 | 91 to 180 days | \$11,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | Underground Utilities | Underground Utilities This project replaces 6,002 linear feet of aging sidewalks and improves infrastructure reliability from adverse weather outages by locating utilities underground along 6 streets in and around the University of Akron. Construction completed by January 1, 2010 is projected. Locating overhead utilities underground enhances pedestrian safety, reduces motorist distraction, protects infrastructure reliability, and beautifies local streets in and around of University, Akron City Schools, and Medical Center developments. | The University of Akron | 70 | 31 to 90 days | \$6,002,000 |
| Summit | Brown-Graves Infrastructure | Extension of utilities and grading needed to prepare 23 acres of urban industrial park with shovel ready land. | City of Akron Engineering Bureau | 20 | 0 to 30 days | \$1,000,000 |
| Summit | Carroll Street East Pavement Repair | This project includes repair of 800 linear feet of severely deteriorated roadway, installing new surface course asphalt at the east gateway to The University of Akron campus. Funding will allow completion of these improvements by June 17, 2008. Carroll Street East Pavement improves the safety of roadways and sidewalks for motorists and pedestrians in an high-traffic central campus area. | The University of Akron | 12 | 31 to 90 days | \$150,000 |
| Summit | Vine Streetscape Lighting and Walks | This project replaces 700 linear feet of poorly lit, deteriorated roadway with environmentally friendly walkways, biking paths, new lighting, trees, and planting adjacent to the new H&C/Baker. Construction is slated to be completed by June 2009. All funds will be obligated by June 1, 2009. Improvements made by this project enhance pedestrian safety, reduces urban heat islands, and transform the northern edge of the stadium into pedestrian and bicycle paths at The University of Akron. This project expands the university's efforts for campus safety and eco-friendly urban green spaces. | The University of Akron | 28 | 0 to 30 days | \$350,000 |
| Summit | Brown-Graves Infrastructure | Extension of utilities and grading needed to prepare 23 acres of urban industrial park with shovel ready land. | City of Akron Engineering Bureau | 20 | 0 to 30 days | \$1,000,000 |
| Summit | College Street Oval paving repair | This project replaces 600 linear feet of paved road surfaces in the heart of the University campus. Construction completion is expected by June, 2009. The College Street Oval paving repair provides safe, attractive roadways for residents of Akron, Ohio. | The University of Akron | 12 | 31 to 90 days | \$98,000 |
| Summit | Union Streetscape - Vine to Exchange Str | Union Streetscape - Vine to Exchange This project replaces 1,000 linear feet of deteriorated roadway that presents pedestrian hazards with environmentally friendly walkways, biking paths, trees, and planting in the heart of The University of Akron campus. Construction completion by October, 2009 is anticipated. All funds will be obligated by June 1, 2009. The Union Streetscape enhances pedestrian safety, reduces urban heat islands, and completes transformation of urban streets into pedestrian and bicycle paths at The University of Akron. A gateway location for bicyclists and pedestrians living in the community surrounding the university, the project leverages prior investments to expand its benefit of creating eco-friendly urban green space. | The University of Akron | 41 | 91 to 180 days | \$2,031,016 |
| Summit | Main Street Reconstruction | Acquisition, assembly, and preparation of property for shovel ready business development | City of Cuyahoga Falls | 325 | 31 to 90 days | \$3,500,000 |
| Summit | Wilbeth and Main Neighborhood Business Development | This initiative seeks to improve pedestrian safety on university walkways from motor vehicles throughout University of Akron campus. A metropolitan setting, safe use of bicycles, walking, and other transportation alternatives is essential for many of our students, faculty, and staff. Construction completed by January 1, 2010 is projected. Engineering, material supplies, and related employment studies will be funded for this initiative promotes safety, homeland security, walking and the use of transportation alternatives to, from and around the University of Akron and its University Park neighborhoods. | City of Akron Engineering Bureau | 1100 | 91 to 180 days | \$8,000,000 |
| Summit | Bollards for Traffic Control | Installing a underground utility removal at the 20.5 acre Market Forge Renewal Area. | The University of Akron | 16 | 91 to 180 days | \$409,578 |
| Summit | Biomedical Smart Office Park | This project replaces 1,150 linear feet of deteriorated roadway through the heart of The University of Akron campus. Construction completion is projected by August, 2010. The Biomedical Commons Streetscape enhances pedestrian safety, reduces urban heat islands, and improves walking as a transportation alternative, and transforms its central pedestrian spine at The University of Akron. The primary goal of this initiative is to improve visibility for visitors as an eco-friendly urban alternative to traditional paving solutions. | City of Akron Engineering Bureau | 1035 | 0 to 30 days | \$12,000,000 |
| Summit | Buchtel Common Streetscape (Brown/Union to Polymer | Extend 1,840 LF of sewer between Fossmeadow and Chart Road | The University of Akron | 74 | 91 to 180 days | \$3,681,600 |
| Summit | Chart Rd. Sewer Extension | This project includes roadway re-alignment to alleviate traffic bottlenecks at the heart of The University of Akron campus adjacent to downtown Akron. Improved traffic flow encourages central campus parking structures and E2 Thruway performing arts, with targeted support growing enrollment and the university's role as an economic catalyst in Akron, Ohio. Construction completion by December 31, 2010 is projected. The project represents continuing partnerships with the City of Akron for mutual economic stimulation. Re-alignment of these roadways improves traffic flow, reduces vehicle emissions, and increases pedestrian safety. | City of Cuyahoga Falls | 0 | 0 to 30 days | \$276,000 |
| Summit | Street Re-Alignment - Hill/East Buchtel/University | Reconstruct 1,524 LF of Wyoga Lake Rd to Seasons Road to Graham Road, including the extension of the multi-purpose trail. | The University of Akron | 89 | 91 to 180 days | \$4,448,600 |
| Summit | Wyoga Lake Rd. Reconstruction | This initiative seeks to provide concentrated parking for the vehicles of 522 students, faculty, visitors, and staff at the University of Akron main campus. Concentrated parking is a essential component of meeting increased enrollment while providing eco-friendly green space in metropolitan reduction settings. The 34 acres of green space landscaping added to campus has largely emerged from demolition of parking and surface parking lots. These green spaces reduce the urban heat island effect in downtown Akron, Ohio and will make possible the planting of 2,800 trees which absorb more than 4 tons of CO2 annually. Construction can be complete by January 1, 2010. Funding for this initiative promotes campus safety, sustainable practices in dense urban settings and ecologically-balanced urban communities. | City of Cuyahoga Falls | 0 | 91 to 180 days | \$3,803,380 |
| Summit | South Campus Parking Deck (base bid only 522 space | This project includes replacement of 1,300 linear feet of existing roadway with a 500 foot long overpass bridge over CSX railroad tracks and construction of a new elevated parking deck in downtown Akron. The parking deck project provides will support downtown conversions, attract new downtown development, and student housing on the University of Akron campus. Construction completion by January 1, 2012 is projected. The project represents collaborative partnership of city government and state institutions for local community development and county seat. Mill Street road, bridge & parking replaces severely deteriorated bridges at a downtown gateway location with improved sightlines for enhanced safety of motorists and pedestrians. | The University of Akron | 150 | 0 to 30 days | \$10,560,752 |
| Summit | Mill Street Bridge Road Parking @ OS North Parcel (| Playground and basketball court for our property children. They currently do not have anything to do here to they tend to get bored and do things they shouldn't do. We would like a half court basketball area, and then a jungle gym, climbing, slides, swings, with targeted support growing made from recycled tires for soft landings surrounded and a small retaining wall around the entire area. The location of LEED certified incubator to house startup biomedical companies. Location to be within the Akron Biomedical Center to ensure easy access to researchers and clinical opportunities. | The University of Akron | 125 | 91 to 180 days | \$17,424,000 |
| Summit | Pleasant Meadow Village a Playful place to live | Funding for use in our revolving loan program to assist small start-up high tech companies and other negatively impacted by the economy. | Tax Credit Apartments for low income | 10 | 0 to 30 days | \$15,000 |
| Summit | Biomedical Incubator | Research would be expanded into life preserving therapies and clinical interventions at the Robert T. Stone, M.D. Respiratory Center at Akron Children's Hospital. The center provides complete services for patients with all types of respiratory illnesses, including allergies, asthma, cystic fibrosis, bronchopulmonary dysplasia, chronic respiratory failure, and more. An experienced team of doctors, nurse practitioners, nurse clinicians, respiratory therapists, dietitians, physical therapists, and a social worker provide direct and consultative medical diagnosis and treatment, education, case management, and research. Stimulus Funding would enable expansion of research efforts - comparative effectiveness research - and clinical studies related to sensitive chronic diseases, severe respiratory infections, and survival for a significant pediatric patient population in northeast Ohio. The research center would add 2 pulmonologists, 2 research nurses, 2 respiratory therapists, 2 medical assistants, and a data analyst to expand the research program. | City of Akron Engineering Bureau | 1013 | 31 to 90 days | \$1,000,000 |
| Summit | Biomedical Incubator | Research would be expanded into life preserving therapies and clinical interventions at the Robert T. Stone, M.D. Respiratory Center at Akron Children's Hospital. The center provides complete services for patients with all types of respiratory illnesses, including allergies, asthma, cystic fibrosis, bronchopulmonary dysplasia, chronic respiratory failure, and more. An experienced team of doctors, nurse practitioners, nurse clinicians, respiratory therapists, dietitians, physical therapists, and a social worker provide direct and consultative medical diagnosis and treatment, education, case management, and research. Stimulus Funding would enable expansion of research efforts - comparative effectiveness research - and clinical studies related to sensitive chronic diseases, severe respiratory infections, and survival for a significant pediatric patient population in northeast Ohio. The research center would add 2 pulmonologists, 2 research nurses, 2 respiratory therapists, 2 medical assistants, and a data analyst to expand the research program. | City of Akron Bureau of Engineering | 1013 | 31 to 90 days | \$1,100,000 |
| Summit | Akron Small Business Revolving Loan Fund | Funding for use in our revolving loan program to assist small start-up high tech companies and other negatively impacted by the economy. | City of Akron Engineering Bureau | 100 | 0 to 30 days | \$500,000 |
| Summit | Akron Small Business Revolving Loan Fund | Funding for use in our revolving loan program to assist small start-up high tech companies and other negatively impacted by the economy. | City of Akron Bureau of Engineering | 100 | 0 to 30 days | \$500,000 |
| Summit | Urinary Incontinence Cure Consortium | According to a 2008 Johnson & Johnson management meeting with analysts, there are currently 60 million patients with urinary incontinence (UI) in USA. Our project targets the most severe (i.e. most expensive and disabling) UI patient population which numbers ~8.5 million patients or ~15% of the overall UI patient population due to anatomical and neurologic dysfunction or failed conservative treatment. According to David Greenberg, T&J Strategist in Chic, 2009 press release the references "An Economic Study of Long-Term Care Costs in Ohio" conducted in 2008 by Columbus, OH based Levin, Discoll & Pitzer concludes: 1. Ohio can save as much as \$1.4 BILLION a year just by increasing the number of future clients receiving home care rather than nursing home care. 2. Other studies have shown that when other considerations are equal, the vast majority of Ohioans prefer to receive care in their homes. Our technology empowers UI patients to move home from expensive nursing home care; the care of patients should improve and become more efficient as UI is the #1 disruptive event. Our consortium has 200-pat, prototypes and is ready to enter animal trials. Potential pilot is 2000 | Temarex Corporation | 8 | 0 to 30 days | \$800,000 |
| Summit | 99 Seiberling clean UP | Stoolbar River and Rubber Company Project 2: Environmental cleanup and demolition of former 99 Seiberling St. General Tire Plant to prepare site for new \$40 million mixed use retail and entertainment complex with phase 1 being a new Wyndam Conference Center | City of Akron Engineering Bureau | 2908 | 31 to 90 days | \$650,000 |
| Summit | Multi-Jurisdictional Indoor Firing Range Clean Air | The indoor firing range at the Stow Police Department is used by several jurisdictions spanning all layers of government. Since opening in 1996, the range has been utilized by area police departments, Kent State University, federal marshals and a multidisciplinary SWAT unit which operates 20 agencies. The high volume of use has caused degradation to the backstop. Present fire practice and training center for the in-door range due to the inability of the current backstop to withstand this type of use. It is only meant for hand-pump. Present fire training and practice is done outside where the lead remains in the ground. An upgraded backstop/ret target would not only reduce the safe operation of the range, but would allow us to use flexible rounds indoors. Doing so would reduce the environmental impact at an outdoor range. Lead contamination would also be reduced indoors as "backspalls" would be eliminated when a round strikes the upgraded bullet trap. | Stow Police Department | 5 | 91 to 180 days | \$45,000 |
| Summit | job and business development | 2 newer embroidery machines and training program for 2 new employees. Our current machines are nearly 25 years old. Newer machines increase speed and would provide 1 new job for each machine. The first job would be the prep and finishing process. Each new machine operates at nearly double the speed of my current machines. Faster machines would also allow me to pull in more business. This would help keep business in Ohio. I have an Akron-based potential customer who currently sends his large embroidery needs out of the state. (lost of jobs) | Action Sports Apparel | 3 or more | 0 to 30 days | \$35,000 |
| Summit | West Bath Road Sewer Extension | Construct 1,440 LF sewer line between Northampton Road and Kuyser Pkwy. for existing and planned residential development. | City of Cuyahoga Falls | 0 | 31 to 90 days | \$216,000 |
| Summit | West Bath Road Waterline Extension | Extend waterline to an area not currently served by the City. | City of Cuyahoga Falls | 0 | 31 to 90 days | \$700,000 |
| Summit | Respiratory Research Center | Research would be expanded into life preserving therapies and clinical interventions at the Robert T. Stone, M.D. Respiratory Center at Akron Children's Hospital. The center provides complete services for patients with all types of respiratory illnesses, including allergies, asthma, cystic fibrosis, bronchopulmonary dysplasia, chronic respiratory failure, and more. An experienced team of doctors, nurse practitioners, nurse clinicians, respiratory therapists, dietitians, physical therapists, and a social worker provide direct and consultative medical diagnosis and treatment, education, case management, and research. Stimulus Funding would enable expansion of research efforts - comparative effectiveness research - and clinical studies related to sensitive chronic diseases, severe respiratory infections, and survival for a significant pediatric patient population in northeast Ohio. The research center would add 2 pulmonologists, 2 research nurses, 2 respiratory therapists, 2 medical assistants, and a data analyst to expand the research program. | Akron Children's Hospital | 9 | 91 to 180 days | \$1,800,000 |
| Summit | Silver Lake Ave. Connector | Creation of a new 685 LF Street to access State Rt. 164 and local development. | City of Cuyahoga Falls | 626 | 91 to 180 days | \$479,500 |
| Summit | Connector Street for downtown redevelopment | Construct 400 ft. of a new street segment to improve traffic circulation and promote existing and planned developments downtown. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$189,000 |
| Summit | furnace replacement | NEW FURNACE TO REPLACE INEFFICIENT OLDER FURNACE | Private | 1 | 0 to 30 days | \$1,000 |
| Summit | Reopening of Front Street Downtown | Construct a 800 ft. street section to reconstruct existing downtown street to improve circulation and promote additional economic activity. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$626,500 |
| Summit | Reopening of Third St. | Construct a 500 ft. street segment connector to improve circulation at the Civic Campus. | City of Cuyahoga Falls | 0 | 91 to 180 days | \$57,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Summit | Jail Security Upgrade/Replacement | Minimum Jail Standards of Ohio require we maintain equipment necessary to ensure the safety and security of persons within and outside the confines of the Stow City Jail (SCJ). Security equipment installed in the SCJ in 1995 has become obsolete and obsolete. Malfunctions of door opening and closure, intrusion failure and limited video/audio surveillance endangers confined persons, police officers and others if an emergency occurs. Public safety is compromised if the SCJ is unsecured and a prisoner escapes. The CCTV system used to monitor activities within the SCJ is inadequate and outdated. There is limited coverage and no audio for the current system. It does not adequately cover areas within the jail, prisoner areas and entrances/exits. The jail is not staffed and must rely on CCTV to augment periodic surveillance checks by patrol officers. A replacement system is a critical need mandated by the safety and security of the prisoners, police officers and the safety of the general public. | Stow Police Department | 4 | 91 to 180 days | \$220,000 |
| Summit | South Front Street Reconstruction | Upgrade an old urban street with new utilities, pavement, drainage for planned new housing/retail development. | City of Cuyahoga Falls | 200 | 91 to 180 days | \$1,837,500 |
| Summit | Training | To send all officers to at least 40 hours a year in service training. The lack of tax revenues from 600 hundred residents does not allow for much needed training in my department. I would set up a regular schedule of training geared towards the needs of my department not just general issues. | Peninsula Police Department | 14 | 181 days or more | \$25,000 |
| Summit | Chart Rd. Phase II | Reconstruction of an unimproved rural street to an improved, urban collector facility to support newly constructed residential development. | City of Cuyahoga Falls | 20 | 0 to 30 days | \$1,950,000 |
| Summit | Cochran Rd. Reconstruction | Reconstruction of an unimproved residential rural street to an improved, urban, industrial street. | City of Cuyahoga Falls | 500 | 31 to 90 days | \$2,600,000 |
| Summit | Reducing Lung Disease in Infants | Early identification, clinical intervention, and reduction of lung disease in infants age 0 to 3 years would be accomplished with infant pulmonary function testing equipment (at a cost of \$100,000) managed by a pediatric pulmonologist and two respiratory therapists. Measures of lung function and volumes in vulnerable infants will determine the level of abnormal lung function. Early detection and clinical intervention in cases of abnormal lung function as associated with such disorders as cystic fibrosis, asthma, etc. will result in reduced hospitalizations and early initiation of the ongoing therapies. | Akron Children's Hospital | 3 | 91 to 180 days | \$180,000 |
| Summit | Silver Lake Avenue Corridor | Construct a street extension to serve the newly developing State St. Shopping Center site which is planned for housing retail. | City of Cuyahoga Falls | 626 | 91 to 180 days | \$479,500 |
| Summit | EVIDENCE COLLECTION | Four digital evidence cameras. We need to update all our equipment. Due to our serious lack of tax base and ever increasing tourist population I need 2 million a year. Our department is unable to keep up with the demands of the influx of people and incidents. With just 600 residents and a couple of small businesses we are constantly scrambling for funds. This equipment will help in evidence collection and successful prosecution of suspects. | Peninsula Police Department | 12 | 181 days or more | \$2,000 |
| Summit | Creation of Connector Street for downtown redevelop | Construct a new street segment to improve traffic circulation and promote economic activity downtown. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$189,000 |
| Summit | Reopening of Front St. Downtown | Construct a street section to connect existing interrupted downtown street to improve circulation and promote additional economic activity. | City of Cuyahoga Falls | 1,000 | 91 to 180 days | \$626,500 |
| Summit | Reopening of Third Street | Construct a street section connector to improve traffic circulation at the Civic Campus. | City of Cuyahoga Falls | 0 | 91 to 180 days | \$57,500 |
| Summit | South Front Street Reconstruction | Upgrade an old, downtown street with new utilities, pavement, drainage for planned new housing/retail development. Equipment, generate significantly more hydraulic horsepower than automobiles. Metropolitan areas around the country are having the same difficulties meeting EPA requirements due in part to high density of OPE usage by residential and commercial users. In 2003, the OPE equipment industry estimated that over 8 million OPE (our target area) were produced and the EPA 2000 report, close to 10 million. It is estimated 60 million are in use. | City of Cuyahoga Falls | 200 | 91 to 180 days | \$1,837,500 |
| Summit | Green Engine Technology for Outdoor Power Equipmen | Our consortium is developing the next generation small spark ignition engine that will keep fuel current technology (i.e. catalytic technology, improved engine calibration, direct fuel injection, scavenging, ...) With our low cost to manufacture, new green engine technology, the benefits are hydrocarbon emissions that are reduced by up to 75%, fuel economy improved by up to 300%, and engine of consumption (i.e. burned in engine and disposed of, eliminated, yes, ZERO oil required). | Temarex Corporation | 20 | 0 to 30 days | \$2,000,000 |
| Summit | Chart Road Phase II | Reconstruction of an unimproved rural street to an improved urban collector facility. | City of Cuyahoga Falls | 20 | 0 to 30 days | \$1,950,000 |
| Summit | Cochran Rd Reconstruction | Reconstruction of an unimproved residential street to an improved, industrial street. | City of Cuyahoga Falls | 500 | 31 to 90 days | \$2,600,000 |
| Summit | Akron Civic Theatre Block | Rehabilitation of 7 contiguous vacant commercial buildings in downtown Akron, all of which share the block with the existing Akron Civic Theatre. The project will introduce significant amounts of retail, office and housing to the block, both to help off the success of the Theatre and provide improved amenities for its patrons, as well as all visitors and residents of downtown Akron. It is expected to generate substantial economic development in the city. | Sandvick Architects, Inc. | 50 | 181 days or more | \$4,000,000 |
| Summit | Creation of New Learning Campus | Construction of a new High School, Community Center, offices, administration. | City of Cuyahoga Falls | 50 | 91 to 180 days | \$30,000,000 |
| Summit | Redevelopment of Cuyahoga Falls General Hospital S | Redevelop an old hospital for health, nursing, other offices. | City of Cuyahoga Falls | 500 | 91 to 180 days | \$5,000,000 |
| Summit | State Rd. Shopping Center Substation | New Substation for the redevelopment of the old shopping center. | City of Cuyahoga Falls | 626 | 91 to 180 days | \$1,500,000 |
| Summit | Northern Hospital Medical Research Campus Substati | New Substation for Medical Campus. | City of Cuyahoga Falls | 5250 | 91 to 180 days | \$1,000,000 |
| Summit | South Front Street Redevelopment | Demolish old industrial sites and construct new housing and retail. | City of Cuyahoga Falls | 200 | 31 to 90 days | \$1,000,000 |
| Summit | State Rd. Shopin Center Redevelopment | Demolition of old shopping center, construction of new housing, office and retail. | City of Cuyahoga Falls | 626 | 0 to 30 days | \$3,500,000 |
| Summit | CITY PARKS RECREATIONAL SPRAY AREAS | The City of Barberton Parks and Recreation Department previously operated wading pools as part of the summer program. The pools along with associated pumps and filters deteriorated incurring high maintenance and chemical supply costs. Staff reductions also contributed to non-operation at some locations. It is an alternative, spray play parks are replacing the wading pools. These are dry water on a one-time use basis along with timers to reduce staffing and wastage. These facilities are safer and more user friendly to younger children, and eliminate pool chemicals and the hazards associated with them. Spray parks are planned for Tuscora, Avilla Webb and Cramton Parks. | City of Barberton | 0 | 91 to 180 days | \$450,000 |
| Summit | Alternative Fuel Vehicle | Replace a gas vehicle with and hybrid | City of Akron | 1 | 0 to 30 days | \$28,000 |
| Summit | Refinance clean water loan | Refinance existing loan | City of Akron | 2 | 0 to 30 days | \$3,000,000 |
| Summit | Green Up My House | The project will green up 20 to 40 homes in the City of Tallmadge to make them energy efficient, and convert them to alternative sources of energy like solar & wind. | Robert Hajdak Green Way Company | 6 | 31 to 90 days | \$1,000,000 |
| Summit | Police Rescue Unit | Funds needed to purchase search and rescue equipment for the police department. We are a small Village with 600 residents and a very limited tax base. We sit in the middle of the Cuyahoga Valley National park and have a tourist count of 2.7 million visitors a year. This is mostly bike and hike or canoe participants. We have a passenger railroad running right thru downtown. We are surrounded by heavily wooded and hilly rocky terrain which makes it difficult to execute rescue operations. There is a desperate need for law enforcement for the emergency need and many times we have. I would purchase air and trailers along with a small zodiac boat and trailer to expedite rescue operations. This will save lives and prevent deadly delays in reaching and transporting victims. | Peninsula Police Department | 12 | 91 to 180 days | \$50,000 |
| Summit | Buy foreclosed home And to make it a lead(green) h | I buy a foreclosed home and to make it a lead(green) home. I will give the city the tax from a home that would not otherwise be. (Doing green will reduce carbon footprint 3 safer | self | 0 | 31 to 90 days | \$100,000 |
| Summit | Pump Station #248 Abandonment | Reduce operation and maintenance cost while eliminating an aging pump station. | County of Summit | 1 | 31 to 90 days | \$90,000 |
| Summit | Howe Road Sewer Rehabilitation | Repair failing main trunk sewer. | County of Summit | 4 | 0 to 30 days | \$565,000 |
| Summit | Pump Station Master Meter Telemetry System | Equipment would improve operations and minimize travel, overflows, and sewer back-ups. | County of Summit | 1 | 31 to 90 days | \$150,000 |
| Summit | Flow Meters and Rain Gauges - Summit County | Equipment to better locate areas of excessive flow to better program resources to correct system deficiencies. Since program would be throughout county, zip code is location of Summit County DOES office. | County of Summit | 0 | 31 to 90 days | \$68,700 |
| Summit | Pump Station #06 Force main repair - Summit County | Repair force main that has suffered numerous failures. | County of Summit | 5 | 181 days or more | \$750,000 |
| Summit | Seasons Road Sanitary Sewer extension - Stow | Extend sewers to an area of pending economic development. | County of Summit | 6833 | 31 to 90 days | \$1,100,000 |
| Summit | Wygga Lake Trunk Repair | To replace failing and overloaded sewer trunk line. | County of Summit | 5 | 91 to 180 days | \$700,000 |
| Summit | WWTP #25 equipment replacement | To replace failing filter components. | County of Summit | 1 | 181 days or more | \$80,000 |
| Summit | WWTP #25 equipment replacement | To replace failing filter components. | County of Summit | 0 | 181 days or more | \$30,000 |
| Summit | Biodiesel Production Facility | The construction of a biodiesel production facility that would use yellow waste grease as a feedstock. This would prevent waste grease from being processed through waste water treatment and/or adding to municipal landfill sites. This will directly contribute to water quality improvement and indirectly contribute to air quality improvement from the displacement of petro diesel for diesel burning biodiesel. | Creative Fuels, LLC | 25 | 0 to 30 days | \$3,000,000 |
| Summit | TNT Youth Rescue Initiative | Tutoring Nurture Talent, Inc. proposes to develop employment initiatives for high school drop-outs, while assisting enrolled participants in completing math and preparation for occupational, technical and 2 - 4 year college degrees. These programs will be designed to assist individuals with a negative history in relation to education and employment. The program will include: Educational and Employment Counseling, Positive Attitudinal Development, Ethics and Values, Job Training, Resume writing and Interviewing Skills and Positive Work Ethics. | Tutoring Nurture Talent, Inc. | 100 | 181 days or more | \$750,000 |
| Summit | Economically viable Algae Oil for Biodiesel Producc | This project is designed to assist individuals between the ages of 17 and 25 develop skills to become productive citizens. This project involves a pilot to demonstrate the commercial viability of a patent pending technology that involves an economically viable approach for producing algae oil to be used for biodiesel production. This technology can be applied throughout Ohio and the country, without any new infrastructure investment or energy costs. | Creative Fuels, LLC | 7000 | 0 to 30 days | \$1,000,000 |
| Summit | TNT Balanced Literacy Centers | This project will contribute to the improvement of water quality throughout the state of Ohio and also reduce the infrastructure requirements of states needed to assure water quality. The City of Akron has also submitted a request for this project. | Tutoring Nurture Talent, Inc. | 150 | 91 to 180 days | \$500,000 |
| Summit | Child Development Degree | Tutoring Nurture Talent, Inc. proposes to develop 20 TNT Balanced Literacy Centers in the State Ohio. The Centers will assist students in grades K - 8 in increasing current reading and math scores in addition to enhancing computer literacy skills. This project is designed to assist students in meeting Ohio standards in reading and math to ensure academic success in future grades. | Child Day Care | 1 | 181 days or more | \$20,000 |
| Summit | Business Upgrade Project | Finish Bachelor Degree for Child Development from The University of Akron | Child Day-Care | 20 | 31 to 90 days | \$80,000 |
| Summit | Home Weatherization Upgrade | Upgrade of business including new bathrooms, play area, driveway for parking, patio upgrade, and other items. | Child Day Care | 15 | 31 to 90 days | \$10,000 |
| Summit | Small Business Upgrade | Upgrade Home Weatherization including insulation, Windows, and Doors. | Child Day-care | 10 | 31 to 90 days | \$6,000 |
| Summit | Twinsburg Rd Quiet Zone | Upgrade to Energy Efficient Appliances | Communities of Macedonia, Hudson and Northfield Ce | 5 | 31 to 90 days | \$168,323 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Summit | E-Waste Recycle Job Creation | Expansion of Business and Community electronic recycling (Computers, monitors, printers, televisions). Currently only 15% of IT waste gets recycled. We are EPA certified and have a Zero Land Fill policy. We want to reduce the 85% of electronic waste that currently ends in land fill. EPA estimates there are currently 235 million electronic products in storage that will require disposal. | e-Waste, LLC | 16 | 0 to 30 days | \$700,000 |
| Summit | Blow Molding Equipment Purchase | The project is to purchase blow molding equipment to expand company capabilities and improve energy efficiencies. The purchase of the equipment will train the current jobs not purchased the jobs will be laid off and create new manufacturing jobs in the area. The improvement of energy efficiencies will help reduce the carbon foot print. | Alpha-Omega Assembly & Packaging, INC. | 8 | 0 to 30 days | \$190,000 |
| Summit | Summer Enrichment Day Camp | The Akron Urban League has provided youth after-school programs and summer camps for more than 50 years. Traditionally this program served as a recreational opportunity for children to remain active during off-school hours. However, over the last several years the program has turned its focus to the educational enrichment of participants outside of school time in order for students to maintain academic levels. | Summit Akron Urban League | 30 | 31 to 90 days | \$47,000 |
| Summit | Private Equity Investments in green technologies | On average, students lose approximately 2.6 months of grade level equivalency in mathematical computation and reading comprehension skills over the summer months. The Akron Urban League Summer Enrichment Day Camp program, with its huge focus on education, tutoring, and efficiency test preparation addresses this concern. Children attend the program Monday through Friday 9:00 am to 3:00 pm. Program activities include tutoring and enrichment, homework assistance, academic enrichment classes for math, reading, African American History, and American History. Cultural activities include music, dance, and arts/crafts. Recreational classes include outdoor play and organized gym activities. In addition, children attend a computer class to enhance learning. The Akron Skillset Skills Enrichment Training (ASSET) program is a 90-day, comprehensive business education and computer skills training program. Skill development areas and courses include business math and English, accounting, human resources, career development, jobseeking employment testing, Microsoft Windows, and various computer software packages including Word, Excel, PowerPoint, and Access. The program also assigns each student a mentor from the corporate community to help each student in the areas of professional development. The target population for the ASSET Program includes economically disadvantaged adults already possessing a high school diploma or GED. ASSET graduates receive starting salaries between \$21,000 and \$27,000 as computer operators, accounting clerks, customer service representatives, data entry operators, retail sales associates, and clerical workers. Since 1984 over 85% of ASSET graduates have become employed. The Akron Urban League has a proven track record with local area businesses and corporations and a history of success in the job placement assistance. The ASSET program has proven to be effective for more than two decades. Unoccupied buildings located on the campus of the University of Akron are restored and upgraded facilities used for job training, economic development and broadband infrastructure deployment. | Summit Akron Urban League | 40 | 31 to 90 days | \$35,000 |
| Summit | 1C RCA UofA Historic Property Revitalization Proj | Rubber City Archives plans to relocate its headquarters and job training center into one of the buildings once renovation is complete. Occupying the second site is OneCommunity, a non-profit dedicated to helping communities build and improve broadband. OneCommunity has headquarter several programs at this site including the Knight Center of Digital Excellence and the NEO RHO. All programs are located on the site proximity to our partner, the University of Akron, allowing faculty and students to be led into research, innovation, and entrepreneurship programs. This \$2,300,000 project will leverage the services of local, Northeast Ohio-based architects, artisans, contractors, and other professionals. This is a "shovel-ready" project with approvals and support already secured from the State of Ohio and University of Akron. | OneCommunity | 50 | 0 to 30 days | \$1,725,000 |
| Summit | Foreclosure Prevention Program | We would like to buy local homes in danger of foreclosure at reduced rates from mortgage companies and lease them back to the homeowner. We would fix them up before leasing them back. The homeowners would pay rent and have the option to buy back the properties after three years. The goal is to keep people in their homes. This could be expanded to other counties if successful. | Go Green Today, LLC | 1000 | 0 to 30 days | \$10,000,000 |
| Summit | Middletown Rd Bolt Replacement | This project will upgrade the watermain on Middletown Rd | City of Akron | 6 | 91 to 180 days | \$1,000,000 |
| Summit | Large Valve Replacement program | This project will replace misc large valve throughout the city's water system. | City of Akron | 4 | 181 days or more | \$350,000 |
| Summit | Force Main Valve Replacement | This project will replace valves on the force main. | City of Akron | 4 | 181 days or more | \$250,000 |
| Summit | Repair of Main valve on 54 inch force main | This project will repair the main valve on the 54 inch force main. | City of Akron | 5 | 91 to 180 days | \$100,000 |
| Summit | Barberton Business Accelerator | Due to the limited available land, this industrial park will enable us to accommodate the businesses who wish to relocate here. Grant money will be used for property acquisition, demolition, infrastructure and office renovations, making the project as green as possible. The incubator will allow cost and resource sharing among several smaller companies. Aside from the construction jobs that will be created, a minimum of 300 additional jobs will be created through this project. | Barberton Community Development Corporation | 300 | 181 days or more | \$2,970,000 |
| Summit | Water Main Repairs of 48 inch pipe | This project will repair sections of 48 inch watermain pipe. | City of Akron | 6 | 91 to 180 days | \$300,000 |
| Summit | Tank Farm Security Fencing and Gates | This project will place security fence at Tank Farm. Acquire 15th St. property and demo a portion of the building. Will be used as an office incubator and industrial park. | City of Akron | 6 | 91 to 180 days | \$350,000 |
| Summit | Seiberling Business Park | Due to the limited available land, this industrial park will enable us to accommodate the businesses who wish to relocate here. Grant money will be used for property acquisition, demolition, infrastructure and office renovations, making the project as green as possible. The incubator will allow cost and resource sharing among several smaller companies. Aside from the construction jobs that will be created, a minimum of 300 additional jobs will be created through this project. | Barberton Community Development Corporation | 300 | 181 days or more | \$2,970,000 |
| Summit | Vehicle Replacement | Replace vehicles with over 150,000 miles and/or records of frequent and costly repair. NEEDS: two police K9 cruisers, two patrol cruisers, two SUV police cruisers. Officer safety and the safety of the general public are at risk when police vehicles dedicated to emergency response are no longer reliable. Funds would be used to purchase new vehicles and fully equip each vehicle. | Stow Police Department | 10 | 31 to 90 days | \$209,000 |
| Summit | Camp Ledgewood Waste Water Treatment Facility Cons | Construction of a ODEPA mandated waste water treatment facility at Camp Ledgewood. Camp Ledgewood is owned and maintained by the Girl Scouts of North East Ohio, a 18 county Council, serving 40,000 girls and 15,000 adult members. Camp Ledgewood is a year round camp facility. Without this construction the WWTFT Camp Ledgewood would be in violation of EPA standards. Camp Ledgewood is a premier Girl Scout Camp accredited by the American Camping Association and hosts thousands of visitors every year in Peninsula, Ohio. Preliminary engineering reports have been completed and are available for review. | Girl Scouts of North East Ohio | 20 | 31 to 90 days | \$300,000 |
| Summit | Camp Crowell Dam Restoration/Removal | The dam at Camp Crowell is located in the Rocky River Watershed in Richfield, Ohio. By lowering the dam ~4.5 feet, we will reduce the flood potential and risk of loss of life and property damage caused by failure of the dam. The dam currently sits on property owned and maintained by the Girl Scouts of North East Ohio, a 18 county Council, serving 40,000 girls and 15,000 adults in NE Ohio. The preliminary engineering reports have been completed and are available for review. | Girl Scouts of North East Ohio | 20 | 31 to 90 days | \$300,000 |
| Summit | Summit Akron Police Department Crime & Public Safety grant | Through general Crime and Public Safety funding, the Akron Police Department will be able to allocate funds where they are needed most in order to better assist first responders and protect the citizens of Akron. Funding will be used towards upgrading equipment and software to increase productivity and interoperability, towards training and other various law enforcement necessities. | Summit Akron Police Department | 1 | 181 days or more | \$125,000 |
| Summit | Summit Akron Police Department COPS Hiring Grant | State of Ohio COPS Hiring Grant funding will be used to retain and hire officers within the Akron Police Department. | Summit Akron Police Department | 40 | 181 days or more | \$3,000,000 |
| Summit | Summit Akron Police Department VAWA grant | VAWA funds would be used towards interdiction and prevention of high-risk domestic violence victims. | Summit Akron Police Department | 2 | 181 days or more | \$120,000 |
| Summit | Barberton Technical Campus | Renovation of an existing building along with a 10,000 sq addition for a branch campus for a post secondary technical college with Stark Tech and the University of Akron. This campus will serve a ten high school district in Summit, Wayne and Medina Counties. The original building and addition will be green buildings. Our goal is to make the campus as energy efficient as possible, maintain good indoor air quality for students, water conservation efforts and waste reduction through utilizing recyclable products. A variety of course offerings will be available that are designed to meet the high demand and skills desired by industries in its region. This campus will bring our workforce development program to the forefront. | Barberton Community Development Corporation | 2000 | 181 days or more | \$810,000 |
| Summit | City of Akron Homeland Security Initiative | State of Ohio, Homeland Security funding will be used by the Akron Police Department to better protect its citizens from both domestic and international terrorism attacks. Funding will be used to purchase equipment and procure necessary training to better protect our local first responders. | Summit Akron Police Department | 0 | 181 days or more | \$500,000 |
| Summit | Practice Based Research Network | The prospective expansion of the Practice Based Research Network (PBRN) through the 15 northeast Ohio locations of the Akron Children's Hospital Physician (ACHP) group offers a unique opportunity geographically to participate in cutting edge, innovative, investigative clinical research studies and comparative effectiveness research. Outcomes of this research could potentially lead to dramatic decreases in childhood obesity and establish safe and effective dosing in a vulnerable population such as infants and children. A dedicated PBRN staff can provide research oversight and ease the administrative burden for practicing physicians and clinical investigators, producing quality data for the sponsors of clinical studies and increasing the depth of knowledge of PBRN and ACHP community physicians. Furthermore, to expand the scope, quantity and quality of research, a significant investment of resources - physical space, technology, and expertise at an estimated cost of \$350,000 - must be dedicated to the infrastructure, i.e., webinars, sufficient office space, creation of a scientific incubator for new ideas, project development, up-to-date technology, and training. | Children's Hospital Medical Center of Akron | 32 | 31 to 90 days | \$1,815,435 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------|----------------|--------------------|---------------------------|
| Summit | OCJS Justice Assistance Grant | OCJS Justice Assistance Grant funds will be used to help fight crime and protect the citizens within the City of Akron. Funds will be used to purchase much needed law enforcement equipment and for travel and training costs used to better prepare our officers as first responders. Acquisition and installation and clean-up of the properties in order to promote economic development. | Akron Police Department | 0 | 181 days or more | \$75,000 |
| Summit | 1110 - 1130 Portage Trail | Anticipate construction of an office/housing project on this site. | City of Cuyahoga Falls | 10 | 91 to 180 days | \$300,000 |
| Summit | FINDING AND RETURNING PEOPLE | EACH AND EVERY YEAR THOUSANDS OF PEOPLE, KIDS AND PETS ARE LOST NEEDLESSLY BECAUSE THEY ARE LOST AND WE CANNOT FIND THEM SOMETIMES WE DO FIND THEM BUT IT IS TOO LATE THIS APPLIES TO CAMPERS, PEAKERS, BOATERS, FISHERMEN, SHOW DRIVERS, HUNTERS, ADVENTURERS, DIVERS, OUTDOOR PERSONS, ETC. THIS SYSTEM WOULD ALLOW US TO TRACK AND FIND PERSONS, KIDS OR PETS THIS SYSTEM WOULD SAVE THOUSANDS OF LIVES EACH AND EVERY YEAR | TRINITY INFORMATION SYSTEMS | 100 | 31 to 90 days | \$1,000,000 |
| Summit | Manufacture of residential 3-Phase DER grid interconnect | For use in a residential setting an electronic power inverter or regulator that converts the AC, 120V, 60 Hz, three phase system into the residential equipment that is relatively inexpensive (less than \$300) is not currently available. This limits the practicality of installing small residential electronics. Photovoltaic units that conform to IEEE 1547 exist, but need further development to be commercialized. This project will evolve prototype designs into a practical, inexpensive residential unit and establish manufacturing capacity for 1,000 units per month for initial marketing through mail stores. | OPM, Inc | 30 | 0 to 30 days | \$1,500,000 |
| Summit | Marwell Drainage B | This project is on Marwell Boulevard and Twinsburg Road, as well as Estate, Myra, and Timber Avenues, west of Darrow Road (SR 91). This project includes replacement of approximately 100 driveway culverts and replacing 7,500 linear feet of open ditches with a system of storm sewers, and will construct a detention basin with a capacity of 50,000 cubic feet to serve this new drainage system. This project will eliminate recurring flooding problems and update aging infrastructure, thereby reducing long-term maintenance costs. | Twinsburg Township | 20 | 91 to 180 days | \$342,982 |
| Summit | Marwell Drainage A | This project is on Marwell Boulevard and Twinsburg Road, as well as Estate, Myra, and Timber Avenues, west of Darrow Road (SR 91). This project includes replacement of approximately 100 driveway culverts and replacing 7,500 linear feet of open ditches with a system of storm sewers, and will construct a detention basin with a capacity of 50,000 cubic feet to serve this new drainage system. This project will eliminate recurring flooding problems and update aging infrastructure, thereby reducing long-term maintenance costs. | Twinsburg Township | 20 | 91 to 180 days | \$868,594 |
| Summit | Applications For Asphalt Produced From Pollution C | MTI is evaluating applications for a unique asphalt made from pig manure. Under review are pavement binders, roofing products and strategic procurement contracts. We are requesting funding for additional test equipment and the outsourcing of specialized testing and analysis of various products. If successful, we will be able to offer an economically competitive alternative to fossil fuel based asphalt. In addition, we will help resolve the odor issues and serious pollution problem associated with the effluent run off from pig farms in Ohio and across the country. This project will demonstrate commercial uses for the asphalt product and establish a demonstration unit to show the economic viability of the manufacturing process. As the technology and infrastructure, we are conducting further employment opportunities to be created as additional processing units are constructed. We will also be creating an additional source of revenue for pig farmers and provide a low cost source of energy. Identify source of asphalt for highway projects. | Momentum Technologies, Inc. | 125 | 0 to 30 days | \$3,000,000 |
| Summit | Regional Storm Water Management Project | Project Description: Construct water retention basins and replace roadway culverts in a comprehensive storm water management project. This project will alleviate flooding along Indian Creek, the primary watercourse through Macedonia. Flooding from this area is particularly costly (\$1.45M) comprising safety for citizens because City emergency vehicles are delayed as they answer calls in the flooded area. Businesses are affected and motorists are inconvenienced. | City of Macedonia | 100 | 181 days or more | \$1,027,200 |
| Summit | Biodegradable Drinking Straws | The Expected Outcome: Flooding will be alleviated, resolving the safety and economic issues noted above. Note: Info provided by Dave Kooze, CTI Engineers, Akron, city's storm water consultant. | Cell-O-Core | 25 | 0 to 30 days | \$250,000 |
| Summit | Visual Surveillance Project | Cell-O-Core has been manufacturing straws in Ohio since 1945. We recently have been working on a biodegradable drinking straw made from a renewable corn based resin, that when disposed of in a compost facility will degrade completely in 60 to 180 days. We need to invest in new types of equipment that will process the bio resin and have people to run the machines and package the product. Cell-O-Core ships will be shipping this product all over the country and would eventually need to establish manufacturing sites in other parts of the country. This will create and help sustain manufacturing jobs in Ohio as well as increasing the revenue stream coming into Ohio. | The University of Akron | 1 | 31 to 90 days | \$1,000,000 |
| Summit | Post Road Waterline - Purchase | This project is for the purchase of equipment to provide video surveillance to the campus of The University of Akron. Surveillance cameras are to be installed in public areas such as libraries, athletic facilities and residences. An estimated 100 cameras would be installed with storage and conversion (analog to IP) of over 500 cameras already installed, to a central storage location. Monitoring locations would also be upgraded. | City of Twinsburg | 0 | 0 to 30 days | \$150,000 |
| Summit | Storm Sewer Maintenance | In 1998 Twinsburg Land Company installed Waterline on Post Road and requested City request tap until the benefiting adjoining property owners for benefit. Costshare 100/1000 set rate at \$34,000 plus 7% annual interest beginning July 1, 1998. Based on interest this would be over \$65K. The City has discussed the option of purchasing the line at a reduced interest rate from the developer thus allowing adjoining residents to tap-in. | City of Twinsburg | 10 | 31 to 90 days | \$400,000 |
| Summit | Twinsburg Industrial Park Stormwater Improvements | Re-Entering Originally listed as Infrastructure - Watershed Infrastructure Storm sewers will be cleaned and televised. This project will provide for future projects as problems are detected in the system that may need replacement. Additionally, cleaning these sewers prevents sediment loading on Trivans Creek. The City policy is to clean and video sewers with capital improvements that provide ongoing cost problems prior to the new surface being installed. A Citywide cleaning and video taping of the sewers would provide information on condition of sewers in order to evaluate and prioritize future projects. After this initial cleaning the Watershed Department is attempting to secure funding for the purchase of a sewer vacuor. This would allow the Department to maintain the sewers after the initial heavy cleaning that this project would perform. | City of Twinsburg | 20 | 181 days or more | \$350,000 |
| Summit | Post Road Improvements | The Twinsburg Industrial Park, which lies west of Darrow Road (SR91) and south of Aurora Road (SR 82) was developed in the early 1970 and 1980's. At that time, storm water management requirements were not adequate to deal with the amount of impervious surfaces being constructed. Several large industrial users in this area are now experiencing problems with flooding and erosion, particularly in response to larger frequency storm events. For the last several years, Pepsi Cola's plant site has been affected by flooding. Pepsi is one of the City's largest employers and operates a regional facility at the Enterprise Drive address. A lack of storage capacity upstream, and a lack of stream capacity in the reach of this problem. This proposal would provide an area stormwater detention pond on vacant property immediately west of the Pepsi site. A detention pond and control structure will be established with sufficient capacity to eliminate the existing problem. | City of Twinsburg | 50 | 181 days or more | \$245,000 |
| Summit | SUNVIEW WATERLINE AND SANITARY SEWER REPLACEMENT | The Sanitary portion is for approx 2500 lin ft of sanitary sewer. Replace aging Septic systems - Sewer project could be stand alone project. The Entire Project This project will improve the surface to 26 feet over a length of 6,155 feet. Proposed improvements would bring standard lane widths to current City standards with curb and gutter to match eastern section of road, recycle pavement base entire length to eliminate seams and reinforce entire road. Sanitary sewer on the north side of road would be installed to service homes currently on septic tanks. Other project elements include providing crossing for future waterline taps of existing main, improving storm water system, providing bike path and/or sidewalks. The Post Road / Darrow Road intersection north would be improved by adding a stop sign. Eastern Post Road is a narrow roadway with ditches (18-20 ft wide from SR91 to Haggard Dr.). This section is particularly hazardous to pedestrian/bicycle use due to the lack of sidewalks and narrow pavement width. | City of Twinsburg | 20 | 91 to 180 days | \$528,000 |
| Summit | SUNVIEW WATERLINE AND SANITARY SEWER REPLACEMENT | Re-Entering Originally listed as Infrastructure General/Other this is for Clean Water State Revolving Fund (also will enter for WPCLP for Sanitary Sewer). The separate could be a stand alone project \$208,000. This project is for the replacement of 50-year-old transite pipe waterlines. Transite pipe is known for becoming brittle with age and numerous breaks within this subdivision has occurred. Residents also are concerned that asbestos fibers are released into the drinking water system. The City began the undertaking of replacement of transite pipe Citywide in 2002. The work included in this project generally includes replacement of existing sanitary sewer and service connections, installation of 8" ductile iron water main (replace transite pipe), new hydrant assemblies and water service connections and restoration. All proposed work to meet all City, EPA and CWD requirements. Entire Project \$1,200,000 | City of Twinsburg | 20 | 91 to 180 days | \$528,000 |
| Summit | Indian Creek Basin #2 | Re-Entering Originally listed as Infrastructure General/Other this is for Clean Water State Revolving Fund (also will enter for WPCLP for Sanitary Sewer). The separate could be a stand alone project \$208,000. This project is for the replacement of 50-year-old transite pipe waterlines. Transite pipe is known for becoming brittle with age and numerous breaks within this subdivision has occurred. Residents also are concerned that asbestos fibers are released into the drinking water system. The City began the undertaking of replacement of transite pipe Citywide in 2002. The work included in this project generally includes replacement of existing sanitary sewer and service connections, installation of 8" ductile iron water main (replace transite pipe), new hydrant assemblies and water service connections and restoration. All proposed work to meet all City, EPA and CWD requirements. Entire Project \$1,200,000 | City of Macedonia | 12 | 31 to 90 days | \$800,000 |
| Summit | The Job Center Energy Efficiency Upgrades | The City of Macedonia has a Citywide stormwater study that has identified several areas where a stormwater detention basin will benefit the community through reduced peak runoff, reduced erosion and reduced flooding. Indian Creek detention basin is a stormwater project with a regional benefit. Benefits to Macedonia and downstream communities will include peak flow reduction, improved water quality and reduced erosion and sedimentation. Upgrade lighting, electric, and utility service to an existing 35-year old community employment & training service center to improve energy efficiency. | Summit Workforce Solutions | 20 | 31 to 90 days | \$150,000 |
| Summit | The Job Center HVAC Replacement | Outcomes: Will directly create/retain construction jobs and supplier/manufacturing jobs, and reduce utilities and maintenance costs for publicly supported occupants thereby freeing up more operational resources to help customers of the center address their employment and training needs. Replace 20-year old HVAC system on an existing 100,000 sq ft community employment & training service center with a sustainable, modern energy efficient system. | Summit Workforce Solutions | 15 | 0 to 30 days | \$135,000 |
| Summit | Home Building Rehabilitation | Outcomes: Will directly create/retain construction jobs and system supplier/manufacturing jobs, and reduce utilities and maintenance costs for publicly supported occupants thereby freeing up more operational resources to help customers of the center address their employment and training needs. | S&S REMODELING | 15 | 91 to 180 days | \$250,000 |
| Summit | The Job Center Parking Lot Improvements | To make it possible for low income housing available for those in need with low income and their family's Improve parking lot on an 8 acre site containing a community employment & training service center that receives 100,000 visitors annually. Improvements include addressing safety considerations through rework of traffic flow, use path, ADA accessibility, curbing, and lighting upgrades, drainage system improvements; and repaving. Outcomes: Will directly create/retain construction jobs in the short-term, enhance safety and service to customers of the center, and reduce future financial burden on publicly supported occupants thereby freeing up more operational resources to help workers address their employment and training needs. | Summit Workforce Solutions | 20 | 31 to 90 days | \$650,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | Refinance Drinking water loan | This project will refinance the existing loan. | City of Akron | 2 | 0 to 30 days | \$3,000,000 |
| Summit | Mud Run Pump Station | This project will upgrade the Mud Run Sewer Pump Station | City of Akron | 5 | 31 to 90 days | \$250,000 |
| Summit | Energy Audit | This project would provide an energy audit of the water and wastewater systems to determine places for energy savings. | City of Akron | 5 | 31 to 90 days | \$180,000 |
| Summit | Akron Biosolids to Energy Project | This project will expand the use of wastewater sludge to create biogas to generate 1.3 megawatts of sustainable green energy. | City of Akron | 50 | 91 to 180 days | \$12,000,000 |
| Summit | Upgrade of DCS Monitoring and control system | This project will upgrade the DCS supervisory monitoring and control system at the WPCS. | City of Akron | 6 | 181 days or more | \$800,000 |
| Summit | CSO WPCS Additional Treatment | Additional treatment for the secondary system. | City of Akron | 12 | 181 days or more | \$16,000,000 |
| Summit | JEDO Water Service Extensions | This project would construct various new waterlines in the JEDO area per the agreements | City of Akron | 7 | 91 to 180 days | \$2,000,000 |
| Summit | Green and expand | Renovate our existing location, increase inventory and increase our internet presence with an updated/rebranded website so we can increase sales save our existing jobs and create a few more. I would also like to green our business by mounting solar panels and horizontal wind turbines in our roof to become a green roof for local businesses. | House Of Plants Florist Inc. | 13 | 0 to 30 days | \$75,000 |
| Summit | Watermain replacement - B | This project will replace aging watermain throughout the city | City of Akron | 35 | 31 to 90 days | \$3,000,000 |
| Summit | Watermain replacement - A | This project will replace aging watermain throughout the city | City of Akron | 35 | 31 to 90 days | \$3,000,000 |
| Summit | The Job Center Roof Replacement | Replace 100,000 sq. ft. 20-year old roof on existing community employment & training facility using sustainable, modern, energy efficient roofing system. Outcomes: Will directly create/retain construction jobs in the short term, and reduce utilities costs for publicly supported occupants thereby saving up more operational resources to help workers address their employment and training needs. | Summit Workforce Solutions | 10 | 31 to 90 days | \$800,000 |
| Summit | Mill Street Sewer Rehabilitation | This project will replace the existing mill street sewer which has aged and needs replacement. | City of Akron | 10 | 91 to 180 days | \$2,500,000 |
| Summit | Sanitary Sewer Reconstruction | This project is repair and lining of various sections of sanitary sewer in the City | City of Akron | 10 | 31 to 90 days | \$1,720,000 |
| Summit | Ohio Home Hydro Alternative Research Project | A research project to study ways in which Ohio's remarkable precipitation can be harvested by average home home owners then converted to hydro electric power using existing water collection and storage kits already in use in 45 western states and turning it to already existing home hydro kits already in use in remote, off the grid homes, towns, and villages around the world. Basically, this is an effort to combine two 3rd world technologies for use in every backyard. Research data will be used to advance 4 environmental factors: 1) reduce energy local, state, and national energy needs by using energy homes of the grid or at least drastically reducing their consumption 2) reduce carbon outputs by reducing those energy needs 3) reduce freshwater consumption and 4) drastically minimize state, local, and Federal water treatment and processing. Add 45,000 of its existing community Employment & Training facility to expand the workforce services available to connect workers and employers. Location is ready and design is currently underway. Planned opening - Nov 2024. | Ohio Home Hydro Alternative Research | 2 | 0 to 30 days | \$85,000 |
| Summit | Summit Workforce Campus Expansion | Outcomes: Will directly create/retain construction and operational staff jobs in the short term, and invest in the long term creation of thousands of other jobs. | Summit Workforce Solutions | 5,000 | 0 to 30 days | \$3,500,000 |
| Summit | Infrastructure Replacement (Antiquated Mechanical) | Replacing our aging and antiquated mechanical systems (>20 years) in the hospital will allow the hospital to operate more efficiently, improve patient care, but also save the hospital expenses on increasing maintenance costs. | Summa Barberton Hospital | 3 | 181 days or more | \$1,500,000 |
| Summit | Converting used cars to plug in electric and donat | This project will take commercially available kits used to convert standard combustion engine cars to plug in electric vehicles by combining commercially available kits with used cars, the cost of making a plug-in electric vehicle (along w parts and install) can be lowered to the \$10-15,000 per vehicle range. These used cars that are sold for local car sales locations on a contract basis requiring that the cars only be sold to buyers who are in financial need equally for welfare or economic assistance programs using the grants from those programs as the source for car sales). These buyers would then qualify for Ohio and Federal alternative energy subsidies that the cars attach like to those in need. It will provide a cleaner environment and remove the burden of gasoline costs on the buyers. If the cars could be sold to local car sales businesses would renew and sustain the program indefinitely once start up capital were provided and the cars are sold earlier. | Plug-In Electric Cars for The Needy | 1 | 0 to 30 days | \$249,000 |
| Summit | Ohio Bluebird recovery Project | Funding for three year program designed to increase the declining population of Ohio Bluebirds by: 1) finding nesting box manufacture and installation in all Ohio counties 2) associated web-access information 3) a micro program to breed in captivity then train and release Ohio Bluebirds using the same methods as that of other rare grass finches based on established methods. | Ohio Bluebird Recovery | 75 | 0 to 30 days | \$1,850,000 |
| Summit | "TRAFFIC EDUCATION BETWEEN THE EARS" | IN AMERICA WE DRIVE WORSE THAN MOST "THIRD WORLD COUNTRIES- THEY HAVE EXCUSES - WHAT IS OUR EXCUSE? BECAUSE OF THE BAD DRIVING HABITS AND ATTITUDES OUR HIGHWAY SAFETY IS COMPROMISED RESULTING IN DEATH, INJURY, PROPERTY DAMAGE OR DELAYED ROAD RAGE, TALKING TEXT, MIMING USE OF SIGNALS, DRIVING ATTENTION SPAN VERY LOW, AND THE PERPETUATION OF THE BAD ATTITUDE "I WILL DRIVE THE WAY I WANT TO DRIVE". MY PROGRAM WILL IMPROVE OVERALL DRIVING ATTITUDE BY 10-15% PER YEAR RESULTING IN THE FOLLOWING SAVINGS: SAVED LIVES - UNPRECEDENTED, REDUCED PROPERTY DAMAGE OR DESTRUCTION, REDUCED ECONOMIC DELAYS, REDUCED ROAD RAGE, IMPROVED "DRIVING ATTITUDE" AND REDUCED CHAIN REACTION ACCIDENTS. ALSO REDUCES STRESS AND PRESSURE FROM DRIVING RETURN TO "ENJOYING YOUR TRIP" AGAIN! LET US NOT FORGET THE LATEST ELECTRONIC WONDER - THE "CELL PHONE" - ADD USAGE ON OUR HIGHWAYS AND YOU HAVE THE FORMULA FOR DISASTER! Inexpensive education trail improvement project along an existing roadway and a current wetland mitigation project within a land conservancy and the City of Hudson property. | TRINITY INFORMATION SYSTEMS | 100 | 31 to 90 days | \$1,000,000 |
| Summit | Hudson Land Conservancy Trail Improvement | Donate bioswales in the medians of this State Route to improve the water pollution along this tributary to Mudrock Watershed. | Hudson | 8 | 181 days or more | \$50,000 |
| Summit | Terex & SR 91 Bioswale | To rehabilitation for 45 manholes. Since project location is spread throughout the county, zip code is office of Summit County DOES. Project is a resubmittal under a different program category. | City of Hudson | 15 | 91 to 180 days | \$70,000 |
| Summit | Manholes Rehabilitation - Summit County | To rehabilitation for 45 manholes. Since project location is spread throughout the county, zip code is office of Summit County DOES. Project is a resubmittal under a different program category. | County of Summit | 2 | 31 to 90 days | \$325,000 |
| Summit | WWTP #36 equipment replacements - Summit County | Project is a resubmittal under a different program category. | County of Summit | 0 | 91 to 180 days | \$60,000 |
| Summit | Hudson High School Land Lab | This is a ecological land lab project proposed in cooperation with the Cuyahoga County Health Dept., Hudson School System, City of Hudson and other environmentalists to help reduce the discharge of pollutants into the Titans Creek Watershed. The project will be located on the Hudson High School property. Landfill has been received through a governmental grant and the City is looking for help on the local portion that will be needed to complete the project. Hudson High School will use this project as a outdoor learning center for their high school students. No property acquisition is required and no new entities oppose the project. | City of Hudson | 15 | 181 days or more | \$250,000 |
| Summit | Marion Long Term Plan - Summit County | Joint effort with Village of Magadore to eliminate 91 to reduce operating and maintenance costs and potential for basement flooding. Project is a resubmittal under a different program category. | County of Summit | 1 | 91 to 180 days | \$200,000 |
| Summit | State Road Sewer Extension - Summit County | Extension of sewer service and abandon failing package treatment plant and HST; provide for economic development along the sewer corridor. Project is a resubmittal under a different program category. | County of Summit | 14 | 181 days or more | \$2,000,000 |
| Summit | Purdue Street Drainage Improvements | Sewer replacement to alleviate flooding. This project will replace the storm sewer on Purdue Street, from Hollywood Avenue to Graham Road. Approximately 1,200 linear feet of the existing 72-inch storm sewer will be replaced with a 78-inch storm sewer, thereby increasing capacity by approximately 24%. Work will also include the replacement of some sanitary sewer, curbs, and roadway pavement. | City of Cuyahoga Falls | 20 | 0 to 30 days | \$1,402,000 |
| Summit | Warner Road Force Main & Sewer Repair - Summit Cou | Project is a resubmittal under a different program category. | County of Summit | 2 | 31 to 90 days | \$300,000 |
| Summit | Hines Hill Trunk Line Replacement and Upsizing | Replace failing forcemains and gravity sewers. This project is a resubmittal under a different program category. | County of Summit | 14 | 181 days or more | \$2,000,000 |
| Summit | Watershed & Water Quality Improvements Project | 10,000 LF of stream restoration, bank stabilization, and water quality improvements. This project will provide flood protection, while improving the riparian corridors, providing microhabitats for aquatic plants and animals, and an associated water quality benefits. The estimated \$4.7 million investment is required to provide sufficient capacity of the water system to continue to maintain compliance with requirements set by the FDA and EPA for this manufacturing facility. In addition, these projects will replace the current clearing and sanitation system resulting in the elimination of chemicals as clearing and sanitation agents. These funds would be used as follows: - Process water system \$ 1,000,000 - Soft Water System distribution \$ 350,000 - Hot Water System \$ 1,500,000 - Waste water pre-treatment \$ 1,500,000 - Contingency \$ 350,000 | Village of Reminderville | 15 | 181 days or more | \$500,000 |
| Summit | Water Quality | - Process water system \$ 1,000,000 - Soft Water System distribution \$ 350,000 - Hot Water System \$ 1,500,000 - Waste water pre-treatment \$ 1,500,000 - Contingency \$ 350,000 | GOJO Industries, Inc. | 40 | 91 to 180 days | \$4,700,000 |
| Summit | Vertical Axis Wind Turbine Manufacturing | Vertical axis wind turbines (VAWTs) are an emerging energy generation technology that is an alternative to conventional horizontal axis gas turbine-based turbines. - The footprint/environmental impacts of VAWTs are less. - VAWTs can be mounted lower to the ground. This minimizes aesthetic impacts in residential areas, zoning issues and reduces installation costs. - VAWTs are virtually no hazard to birds or ground based wildlife or humans. - The power grid interconnect and permit process for residential owners has already been approved by the Ohio legislature. - Manufacturing requires conventional materials, methods and tooling, all of which are abundantly available in Ohio. - VAWT units are very scalable. Units are expected to retail for as low as \$500. - VAWTs operate from any wind direction. Variable wind direction is a barrier to conventional horizontal units even where there is adequate average wind speed. - Small manufacturers exist in CA, Canada and Europe, none are dominant. Ohio can become a national leader. - Local university engineering talent will be used. | QPM, Inc | 45 | 0 to 30 days | \$2,100,000 |
| Summit | PTAC to PTHP Conversion | Retire 522 PTACs at 7 properties in Ohio with heat pump PTAC (PTHP). Savings is expected to be ~\$100,000 annually and will reduce carbon emissions by 1.3 million lbs annually. | National Church Residences | 1 | 31 to 90 days | \$650,000 |
| Summit | Community Drinking Water Improvement Project at Mo | Our campus at Mount Augustine in Richfield Township is in need of improvements to our drinking water delivery system. Our site hosts Regina Health Center, an elder care facility in a rural setting. The elder care services offered are rehabilitation, assisted living and skilled nursing. Residents number 155. Caregivers and ancillary staff are about 200. As a health care center, Regina Health Center requires an adequate amount of water. The current water system was installed in 1995. The campus has changed from an educational center to a health care facility. Three wells are the source of water for drinking etc. and the required fire suppression system for the building operations. The intent of this project is to provide the infrastructure to connect to a Cleveland water line that is within 200 feet north of our property. A 16 inch water main extension across 800 linear feet north to south and an additional 2000 linear feet east to west are needed to supply water to the health center. | Regina Health Center | 30 | 181 days or more | \$610,500 |
| Summit | Pond Brook Hillview Stream Restoration | Project will acquire and restore 67 acres of land in the Pond Brook tributary of the Titans Creek watershed. Wetland and Stream restoration on prioritized sections of Pond Brook will be completed to enhance the headwaters protection of the critical groundwater recharge and headwaters area. | The Trust for Public Land | 75 | 181 days or more | \$1,900,000 |
| Summit | Springfield Facility Plan Update | This is an update of an older facility plan for Springfield Twp. and Green in SE Summit County. The existing POTW (#36) is approaching its design capacity and the surrounding area continues to grow and also contain a very large number of failing septic tank systems that will need to be connected to a central WWTW. This study will determine the most cost effective way to serve these additional customers. | County of Summit | 7 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Summit | County-Wide Septic Tank Abandonment | This project consists of establishing a Septic Tank Elimination Program similar to the "Linked Deposit System" that is funded by the Ohio EPA through DEPA. Summit County would act as the banking agency to loan money at an affordable interest rate based on income to assist people in abandoning their septic tank systems and connecting to the sanitary sewer system. This loan would specifically cover the cost of installing the lateral and abandoning the septic system. This program would be available to any potential customer of the Summit County Metropolitan Sewer District. The potential connections would be to existing sanitary sewer that have already been installed as a developer or public improvement. Some areas have already been designated as health risk due to failing septic tanks by the Ohio EPA and the Summit County Health Department. The initial funding would be used to develop and establish the program and to fund the initial low interest loans. This project has the potential to significantly reduce illicit septic tank discharges to the Cuyahoga and Tuscarawas watersheds. | County of Summit | 5 | 31 to 90 days | \$500,000 |
| Summit | Water & Wastewater Project | This project will serve the Village of Peninsula, Boston Township government offices, road facilities, and visitors center at 1775 Main Street, Route 303, the Cuyahoga Valley National Park and over 3 million tourists per year visiting and using Peninsula. Water and sewer will be provided to almost all residents, all businesses, government facilities, police, Cuyahoga Valley National Park, Cuyahoga Valley Scenic Railroad, Peninsula Hill Academy, and schools. This project is endorsed by the Cuyahoga Valley National Park. This project will greatly improve the quality of the Cuyahoga River which flows through the entire Village. At the present time over 70% of the local septic systems are in default thus polluting the river. | Village of Peninsula | 100 | 31 to 90 days | \$10,700,000 |
| Summit | Briarwood, et al Wastewater System | An area at the fringe of the Cuyahoga Valley National Park (CVNP) is currently has approximately 80 homes served by a semi-public WWTWP. This plant is located on the side of Parkside Road in the CVNP and is currently in danger of being washed out by the surrounding creek. The WWTWP needs to be moved to prevent this future and to improve the park views along the creek. Additionally, the area has plans for additional 200 or more home sites. This will be accomplished by building a new publicly owned WWTWP on a site well away from the stream or by building a series of pump stations to convey it to an existing regional WWTWP. Preliminary studies are underway. | County of Summit | 13 | 31 to 90 days | \$750,000 |
| Summit | portage Lakes state Park East Reservoir Dam Tree R | The project consists of tree removal, grading and revegetation along approximately 1,600 linear feet of earthen dam embankment at East Reservoir in the Portage Lakes system. Work is being performed to eliminate potential hazards to dam stability and to improve access for maintenance and/or future repair projects. Design documents are currently 90% complete and with funding the project could go to construction later this summer. | Ohio Department of Natural Resources | 10 | 91 to 180 days | \$250,000 |
| Summit | Police Academy | To construct an 8,000 sq. ft. facility to operate a Police Academy and provide fire training. Early in 2009, the City of Munroe Falls in cooperation with Kent State University began operating the training program with much success. The proposed facility would include a firing range for awards safety personnel. Outcomes include economic benefits to the City, KSU, and the area. Upon completion of the 600 hours of training, an Ohio Peace Officer Training Commission Certificate is issued. | City of Munroe Falls | 50 | 0 to 30 days | \$2,800,000 |
| Summit | Auto 101 | This program is designed to help maintain vehicles for those that would not normally be able to do so. With this program we hope to improve the proper way to maintain their vehicles while at the same time creating an opportunity for those individuals to drive and maintain their own automobiles. We will be offering clinics for the everyday person when they get off work that will instruct them on how to take care of their cars. The only expense will be parts, which can be purchased at or below discounted prices for that are available. We will not charge for the instruction. In order to fix the problems but will have trained mechanics available to assist with each vehicle. The basic idea of this is to train people on how to take care of all vehicles on the road are not producing poor emissions and it is always at possible equally the worst of all vehicles on the road are not producing proper maintenance for their automobiles. Our final goal is to ultimately put safer vehicles on the road. | Shaw Auto Care, Inc. | 10 | 181 days or more | \$2,000,000 |
| Summit | Expressway Landscaping | This project consists of planting landscaping and installing porous pavement at 4 interchanges with the following conditions for the workers. Planting of trees and shrubs also reduces carbon in atmosphere and installation of porous pavement decreases runoff and allows groundwater to recharge. | City of Akron | 15 | 91 to 180 days | \$4,000,000 |
| Summit | Tallmadge North Thomas Road Waterline | This project will replace a 100 year old waterline along North Thomas Road in the City of Tallmadge. The area has experienced fourteen waterline breaks since 2000. This project will replace 3,447 linear feet of 12 inch waterline as well as the necessary connections. This project will serve 211 households or approximately 433 individuals. This area consists of approximately 41 percent low to moderate income households. This project also serves the Saxon Village Family Assisted Living Complex. Continual disruptions of service as a result of breaks in this old line make this a much needed project. The bid packet is prepared and the City can bid this project within one week of notification. | City of Tallmadge | 45 | 0 to 30 days | \$350,000 |
| Summit | Middlebury East Clean up Phase II | This project will pump and treat groundwater to remove Phase Separated Hydrocarbon from the area, a highly volatile, non-impacted soil, issue an MFA, and obtain a Covenant Not to Sue for the property. | City of Akron | 5 | 31 to 90 days | \$350,000 |
| Summit | Blossom Music Center | Land acquisition of approximately 600 acres surrounding the Blossom Music Center. The Blossom property holds the key to significant water quality protection in a national park whose hydrological resources increasingly have been compromised and threatened by development of privately owned lands. These significant watersheds drain the Blossom land, all of which remain healthy and intact due to the relative absence of stream corridor development. They include many high-quality collobarator stream habitats that support diverse fish populations and a broad spectrum of other sensitive species. Acquisition will have significant water quality and riparian erosion, flooding, water quality impairment, and other threats to the Cuyahoga Valley National Park riparian resources. The Blossom watersheds feed into present perhaps the best watershed protection available in the Cuyahoga River drainage basin. | The Trust for Public Land | 30 | 91 to 180 days | \$3,000,000 |
| Summit | Community Medical Hub | By the end of 2009, Western Reserve Hospital Partners plans to implement the first community medical hub in Ohio connecting medical information for a patient base approximately 180,000. While physicians have disparate practice management and electronic health records (EHR) systems, the community medical hub would allow all systems and thus physicians to communicate patient medical information in order to provide more efficient and effective healthcare services, eliminating the need to spend revenues on replacing current practice management and EHR systems. The system would also interface to hospital systems, providing relevant data to participating physicians and increasing the quality of care provided to the community. A centralized data repository will lead to the ability to compare effectiveness of medical treatments across practices and cost reductions from duplication of tests, benefiting community members, healthcare providers, employers and insurers. | Western Reserve Hospital Partners | 150 | 31 to 90 days | \$3,000,000 |
| Summit | Tallmadge High Service / Pressure Water Main Impro | This project will install 8,600 linear feet of water service and a water pump station in the northeast quadrant of the City of Tallmadge. This project will increase water pressure in this neighborhood from 35 psi to 75 psi allowing for increased water pressure and the ability to use more than one water fixture. This project will more importantly increase water flow from 380 gallons per minute to between 650 gpm to 2,000 gpm allowing for adequate fire flow and protection. This project will serve 997 households or approximately 2,081 individuals. The bid packet is prepared for this project and can actually go to bid in a week from notification. | City of Tallmadge | 140 | 0 to 30 days | \$1,500,000 |
| Summit | Englewood Road Sewer | This project would construct new 3000 foot long 48 inch diameter sanitary sewer in Englewood. Sewers in the area have been determined to have high amounts of H and some sewers also have structural issues. This sewer will serve as a new trunk sewer in the area and will open up land for development for the Goodstar World Headquarters, who has committed to keeping their world headquarters in Akron Ohio, benefiting Akron, Summit County and the entire State of Ohio. | City of Akron | 15 | 91 to 180 days | \$4,500,000 |
| Summit | Massillon Road Sewer | Project would construct new 42 inch sewer for 3400 LF, and a new 48 inch sewer for 2200 LF in both Ashwood Ave and Massillon Rd. Sewers in the area have been determined to have high amounts of H and some sewers also have structural issues. This sewer will serve as a new trunk sewer in the area and will open up land for redevelopment for the Goodstar World Headquarters, who has committed to keeping their world headquarters in Akron Ohio, benefiting Akron, Summit County and the entire State of Ohio. | City of Akron | 15 | 91 to 180 days | \$4,500,000 |
| Summit | Norton School Complex | The purchase of land and commencement of planning, engineering and site development preparation activities for the construction of a new high school, middle school, elementary school, sports complex and administrative offices for the Norton City School system. | The Trust for Public Land | 100 | 91 to 180 days | \$3,000,000 |
| Summit | Cambridge and Yale Street Watermain Replacement | Removal and replacement of approximately 1,400 linear feet of 8" watermain, 10 service connections, 4 water valves, 5 hydrants and other appurtenances related to the replacement of the existing waterline. The Seasons Road sanitary sewer project is a 4,800 linear feet of sewer line that will provide service to a proposed 252 acre Akron Economic Development Zone (EDZ) in northern Summit County involving the cities of Stow, Hudson and Cuyahoga Falls. This sewer line is part of the infrastructure necessary to begin construction in the EDZ. The City of Akron will also be awarded a bid to build a new 8" watermain currently involved in a tax sharing agreement with Akron. The EDZ will be located around a new interchange at Seasons Road and SR 8. A 100 bed hospital is another anchor for the EDZ. Health care and related medical businesses will be targeted users for the EDZ. The expected outcome is the creation of over 200 acres of shovel ready development sites in the EDZ, and by 2012, the creation and retention of 650 jobs associated with the hospital and medical office building being constructed in Phase I. Approximately 1,625 jobs in the health care and supporting fields are projected at bid out. Another expected outcome is a new model for economic development where three communities cooperate to share the costs and benefits of regional economic development. | Twin Keystone Water District | 10 | 31 to 90 days | \$198,700 |
| Summit | Seasons Road Sanitary Sewer Line | This project will reduce and improve stormwater input into the Upper Tuscarawas River, Springfield Lake and the Little Cuyahoga River watersheds by acquiring and restoring over 100 acres of wetlands and creating a new public park area. This area was likely once one of the largest kettle hole bogs in the State of Ohio. Restoration of approximately 100 acres of Modified Category 2 wetlands into bog-type habitat will create habitat for numerous State-listed species known to exist in this area and will result in numerous construction/restoration jobs. This project will also cause for the demolition of vacant structures and the construction of a park, parking area and trailhead. | City of Cuyahoga Falls | 6,825 | 31 to 90 days | \$1,100,000 |
| Summit | West Bath Road Waterline Extension | Extend waterline to an area not currently served by the City. | City of Cuyahoga Falls | 0 | 31 to 90 days | \$700,000 |
| Summit | West Bath Rd. Sewer Extension | Construct 1,440 ft sewer line between Northampton Rd and Keyser Pkwy. for existing and planned residential development. | City of Cuyahoga Falls | 0 | 31 to 90 days | \$216,000 |
| Summit | Rondy Farm Restoration Project | This project will acquire and restore 300 acres of property within the City of Norton including revegetation of riparian corridors, wetlands restoration, revegetation of agricultural lands, and invasive species management. In addition to construction of jobs relating from the restoration activities, this project will allow for the construction of a new high school, middle school, elementary school and sports complex on adjacent land. It will also result in the creation of numerous planning and engineering positions. | The Trust for Public Land | 125 | 91 to 180 days | \$2,000,000 |
| Summit | Springfield Bog Restoration | This project will reduce and improve stormwater input into the Upper Tuscarawas River, Springfield Lake and the Little Cuyahoga River watersheds by acquiring and restoring over 100 acres of wetlands and creating a new public park area. This area was likely once one of the largest kettle hole bogs in the State of Ohio. Restoration of approximately 100 acres of Modified Category 2 wetlands into bog-type habitat will create habitat for numerous State-listed species known to exist in this area and will result in numerous construction/restoration jobs. This project will also cause for the demolition of vacant structures and the construction of a park, parking area and trailhead. | The Trust for Public Land | 80 | 0 | \$1,750,000 |
| Summit | Springfield Bog Restoration Project | This project will reduce and improve stormwater input into the Upper Tuscarawas River, Springfield Lake and the Little Cuyahoga River watersheds by acquiring and restoring over 100 acres of wetlands and creating a new public park area. This area was likely once one of the largest kettle hole bogs in the State of Ohio. Restoration of approximately 100 acres of Modified Category 2 wetlands into bog-type habitat will create habitat for numerous State-listed species known to exist in this area and will result in numerous construction/restoration jobs. This project will also cause for the demolition of vacant structures and the construction of a park, parking area and trailhead. | The Trust for Public Land | 90 | 31 to 90 days | \$1,750,000 |
| Summit | Springfield Bog Acquisition Project | The Springfield Bog Acquisition Project will permanently protect critical and rare water resources within the Upper Tuscarawas and Little Cuyahoga River watersheds. The property contains over 100 acres of high-quality wetlands habitat, however, the highlights are two Category 3 bogs totaling 17 acres in total. The Springfield Bog project encompasses the acquisition of two properties and a portion of the property between Meru Parks Serving Summit County (MPS/CSC), The Trust for Public Land (TPL), and Springfield Township. The acquired lands will then be further restored for water quality improvement purposes and the site will be improved as a public park. | The Trust for Public Land | 30 | 31 to 90 days | \$1,400,000 |
| Summit | Pumphouse emergency generator | Install emergency generator in case of a power interruption. | Village of Silver Lake | 10 | 91 to 180 days | \$55,000 |
| Summit | Village of Silver Lake | Replace pumphouse built in 1967. | Village of Silver Lake | 10 | 91 to 180 days | \$440,000 |
| Summit | Service Department - loop | Install ductile iron water main from Church Street to Kent Road to eliminate dead ends. | Village of Silver Lake | 10 | 91 to 180 days | \$165,000 |
| Summit | Crystal Lake-loop | Install ductile iron water main from Lakeland Pkwy to Graham Road to eliminate dead ends. | Village of Silver Lake | 10 | 91 to 180 days | \$275,000 |
| Summit | Pumphouse Control Upgrades | Upgrade pump controls installed in 1957. | Village of Silver Lake | 10 | 91 to 180 days | \$18,000 |
| Summit | Kent Road | Replacing 6493 feet of ductile water main. | Village of Silver Lake | 10 | 91 to 180 days | \$330,000 |
| Summit | Lee Road | Replacing 2722 feet of ductile water main. | Village of Silver Lake | 10 | 91 to 180 days | \$385,000 |
| Summit | Vincent Road | Replacing 3204 feet of ductile water main. | Village of Silver Lake | 10 | 91 to 180 days | \$330,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Summit | Court Education Program | A two step court and classroom education program. The program is aimed at middle school aged children in the county of Summit. There is currently no domestic violence programs that work with the "silent victims" of those who witness abuse. We want to target this group to educate them on abuse, cycle of abuse, legal ramifications, a judge-friendly system and let them know that the violence is not their fault. The court will educate them about the legal system and how to help it's victims. Two other children and teens deal with a parent rearing with their perpetrator and then observe the couple blaming the judicial system instead of taking responsibility for their actions. Our program will educate the children at the time that they are beginning to develop meaningful relationships outside the family circle and will educate them on how cycles of abuse and control are passed down to younger generations and will prevent future perpetrators. This program will also help teens cope as we would have meetings with school counselors about children who come forward and want to talk more about their home lives. | Stow Municipal Court | 4 | 31 to 90 days | \$375,000 |
| Summit | Tree survey and Canaopy Density Program | Measure tree canopies in Akron | City of Akron | 3 | 91 to 180 days | \$700,000 |
| Summit | Emerald Ash Borer Program | Project would include tree removals and replacements to combat the Emerald Ash borer | City of Akron | 3 | 0 to 30 days | \$761,911 |
| Summit | Court House Annex Building | This will provide a new building annex to house new court rooms and expand the existing space that Summit County and the City share now | City of Akron | 150 | 91 to 180 days | \$20,000,000 |
| Summit | Springfield lake community center | Rehab of old school building to community recreation center | Springfield lake community center | 10 | 0 to 30 days | \$1,000,000 |
| Summit | Smocks Automotive Service Excellence | To be a full service auto center serving summit and stark counties with affordable auto and truck repairs and being able to help others with finding jobs | profit business | 4 | 31 to 90 days | \$60,000 |
| Summit | Bath Road Water Line Extension | Watermain Extension, approx. 4250 linear feet of watermain. Twenty-five residents to benefit from waterline extension that are all served by storm. The residents have petitioned the city for the waterline to be extended. However, the cost of extending | Rockwell Enterprises Inc. | 7 | 31 to 90 days | \$875,000 |
| Summit | Economic and Professional Development | KUJJI is not-for-profit that was created in 2008. The company's goal and objective is educating and mentoring to youth and young adults in at risk communities and teaching them professional development skills. The courses that are currently being taught | KUJJI Corporation | 0 | 31 to 90 days | \$4,500 |
| Summit | College Readiness | Project GRAD Akron is seeking \$250,000 to implement the College Readiness Program for our secondary students in Akron, Ohio. The program will have a language arts, mathematics, financial literacy, ACT and SAT preparation, OGT preparation, career explorer My plan is to convert approximately 1000 Commercial grade mowers (both riding and walk behind type) owned by local municipalities in Summit and surrounding counties to use Propane gas. This would greatly improve the emissions output (up to 60% reduction in smog forming emissions, compared to gasoline and diesel. Up to 80% reduction in toxic emissions compared to gasoline and diesel. Also: The cost of propane fuel averages about 35-40¢ less per gallon than gasoline and diesel. There is also a safety factor gained from less possibility of spills from filling fuel tanks. This estimated cost is based on parts needed for conversions and labor I would also include a mobile workshop to perform the conversions. Cost will be affected by the availability of parts needed for conversions. | Project GRAD Akron | 200 | 0 to 30 days | \$250,000 |
| Summit | Clean Air Green Lawns | Development and implementation of SENSIBLE Green building ideas on construction of model building home for sale to public at sustainable prices. Education of consumers and homeowners on the values of sensible home design and eco friendly homes that create lasting value. NO MORE MCMANDRONS Need new roof on house, don't have job currently on unemployment, going to college can't pay for tuition, books, etc. My younger brother lives with the currently in high school 10th grade. Good student no trouble new money to send him to college. He is a motivated people will try to make this world a better place. What I would like to do is develop some empty lots around the city and build new homes on them and rent them. The large luxury homes, but just some simple open copts or similar designs. I would like a home builder and the people to do some of the interior work and electrical, HVAC, plumbing, concrete, roofing, exterior, and trim carpentry. I am currently having dental problems and I don't have health insurance. I work approximately 20-26 hours a week at minimum wage. There is no possible way for me to afford private health and dental insurance when I can barely pay for the room and board for my rental apartment every (chance/veryday) but the jobs just aren't out there. Give me a full time job at a decent wage and I wouldn't be asking for a handout(s). | Earth Sentry Services | 10 | 0 to 30 days | \$450,000 |
| Summit | The Sensible Building Initiative | Development and implementation of SENSIBLE Green building ideas on construction of model building home for sale to public at sustainable prices. Education of consumers and homeowners on the values of sensible home design and eco friendly homes that create lasting value. NO MORE MCMANDRONS Need new roof on house, don't have job currently on unemployment, going to college can't pay for tuition, books, etc. My younger brother lives with the currently in high school 10th grade. Give me a full time job at a decent wage and I wouldn't be asking for a handout(s). | Sinopoli Co. | 50 | 91 to 180 days | \$400,000 |
| Summit | Higher Education For Poor | Need new roof on house, don't have job currently on unemployment, going to college can't pay for tuition, books, etc. My younger brother lives with the currently in high school 10th grade. Good student no trouble new money to send him to college. He is a motivated people will try to make this world a better place. What I would like to do is develop some empty lots around the city and build new homes on them and rent them. The large luxury homes, but just some simple open copts or similar designs. I would like a home builder and the people to do some of the interior work and electrical, HVAC, plumbing, concrete, roofing, exterior, and trim carpentry. I am currently having dental problems and I don't have health insurance. I work approximately 20-26 hours a week at minimum wage. There is no possible way for me to afford private health and dental insurance when I can barely pay for the room and board for my rental apartment every (chance/veryday) but the jobs just aren't out there. Give me a full time job at a decent wage and I wouldn't be asking for a handout(s). | Viraj Sharma | 2 | 31 to 90 days | \$100,000 |

| Summit | Grandma's Place CCC Expansion | I WANT THE HOUSE FIXED SO I CAN HAVE MY 95 YEAR OLD MOTHER COME TO LIVE WITH ME We would like to purchase and renovate a larger building to expand our business due to the increase in need of childcare. We have nontraditional hours which makes us in high demand by parents. By increasing our space we can increase our capacity to 30 children a day. Our staff will need to grow to an estimated 26 children staff members to accommodate these children. We currently have only one class per each of our age groups (infants, toddlers, preschool, school-age). Expanding staff will allow us to add an additional class to each age group. The expansion will also give us the space needed to participate in the Early Learning Initiative. We are already involved in the Step Up To Quality Program as an Emerging Star. With all the projects going on in Akron (The new Goodyear HQ, Firestone HQ, growth of UJ of Akron, etc), quality childcare is a must. We feel we are a strong childcare facility with a quality program. We received many referrals for care, and currently have a waiting list. Being a recipient of funds will allow us to assist more of parents working and attending college in Akron during hours that most centers are closed (Mon-Sun, from 8-5). | Grandma's Place Child Care Center | 26 | 31 to 90 days | \$1,200,000 |
| Summit | Neighborhood stabilization | Pay foreclosed and abandoned properties in summit county and rehab them and sell them as affordable housing to put people back in a home. The stimulus money received would help offset in the selling price of the homes. This program would help families have affordable housing of there own. The stimulus money would be used for the purchase of these homes which could be passed on to the consumer when we sell the properties. Expanding business in the community. | P&K Restorations LLC | 2 | 0 to 30 days | \$250,000 |
| Summit | Business Expansion | Pay foreclosed and abandoned properties in summit county and rehab them and sell them as affordable housing to put people back in a home. The stimulus money received would help offset in the selling price of the homes. This program would help families have affordable housing of there own. The stimulus money would be used for the purchase of these homes which could be passed on to the consumer when we sell the properties. Expanding business in the community. | TNT cleaning service | 2 | 91 to 180 days | \$150,000 |
| Summit | Debt relief and Small business startup costs | Due to pending job loss, I would like to request funding to eliminate personal debt and start a small business. The personal debts include, but are not limited to, mortgage, vehicle loans and credit card debts incurred as a result of said income. The small business would be a combination of manufacturing and retail related to Akros/Pantball gaming and sales as well as manufacturing a company product line of gear and equipment. | Not Applicable | 6 | 31 to 90 days | \$500,000 |
| Summit | childcare/daycare | To open up a childcare center. Rent space from a local church building. Serve children ages twks-12yrs old. We'll need to purchase cribs, tables, chairs, toys, hygiene, basic case supplies. Also other possible items. We will offer 10:30 and private pay. Certified trained daycare teachers. We are capable of caring for 177 children with the space we have. We will be open Monday thru Friday 5:45am-6:15pm. We believe we can serve our community by offering professional childcare. The church will benefit also in many ways. Purchase bucket trucks to be put to work installing internet and telecom wires in areas that do not have them. | childcare center | 15 | 31 to 90 days | \$50,000 |
| Summit | Bucket Truck | Repair and replacement of current aging internet and telecom wires. | CRS Bucket Truck | 8 | 0 to 30 days | \$250,000 |
| Summit | AARP error on 2007 Tax Report | When AARP filed my taxes for the year 2007, he made a LARGE error. The IRS says I owe them \$11,978.00. I will have to take a loan out to pay this. I will have a son who was supposed to start college in the fall, buy due to AARPs error. I don't know if that is possible. Any help you can give would be greatly appreciated. | Family | 0 | 0 to 30 days | \$11,978 |

| Summit | A.C.F. | This project is to help with the cost of schooling. It will help Erica Layton to succeed with the goal of therapy for the disabled and add business training to help manage the family business. | akron chapter of college funding . | 2 | 181 days or more | \$26,000 |
| Summit | energy efficient house | Make an existing home more energy efficient. New Furnace, new Hot water heater, siding, insulation, new roof, building a garage | Hull Household | 7 | 0 to 30 days | \$30,000 |
| Summit | Helping pay for my children's special food | I would like funds to help me be able to pay for my children's food. They are both diabetic and my daughter has celiac. The special food required for this can be very expensive and I would like some sort of program to help supplement what I have to pay. Community based wellness workshops featuring QiGong. QiGong is the ancient Chinese method for radiant health and stress free living. The Chinese government chose QiGong as The Chi Chuan, the most well know QiGong exercise, to solve their national health crisis. China is a long tradition of preventive health care. The Chinese system of health care includes teaching people how to care for themselves. Rising health care costs underscore the need for methods that reduce symptoms while supporting total mind/body wellness. The study and practice of these ancient health maintenance systems can help prevent, alleviate, or recover from the serious physical and mental problems of our fast paced culture. The workshops will include: demonstration, audience participation, video, lecture and Q&A. Participants will learn easy methods of classical QiGong, 8 Brocades, Yang BiJes Form, Tai Chi Chuan or Animal Forms. The goal of ELITE FITNESS is to help decrease personal and national medical costs thru the wellness and self-empowerment techniques of QiGong. These anti-aging or longevity exercises are joint friendly easy-to-do and can be performed at any fitness level. | My Family | 0 | 0 to 30 days | \$10,000 |

| Summit | Wine Store | Wine Store in Green Ohio where we can create jobs, and a place to go after a hard days work to unwind in a soft cozy setting where adults can converse and pass new ideas for more jobs or just relax. Some wine bar where we serve wine and beer and small bites, light entertainment. Also might sell wine accessories. | Wine Store | 25 | 91 to 180 days | \$50,000 |
| Summit | Kane Family | Energy efficient roof, energy efficient windows, insulation, greenhouse Installation of solar panels, etc. to supply electricity for residence. Also any electrical upgrades if needed. This will provide for or reduce current usage, with excess returned to the grid | Judith Kane | 1 | 31 to 90 days | \$20,000 |
| Summit | Solar conversion | Energy efficient roof, energy efficient windows, insulation, greenhouse Installation of solar panels, etc. to supply electricity for residence. Also any electrical upgrades if needed. This will provide for or reduce current usage, with excess returned to the grid | Kimmy Household Project | 0 | 31 to 90 days | \$20,000 |
| Summit | Senior Medicare Decision Assistance | During the 2007 census it was reported that there are approximately 71,000 Senior Citizens within Summit County. Currently there is an estimated 40-50 thousand Seniors ages 64-65. These Seniors are in the decision making window for which Medicare program they will select. Currently there are very few organizations that are dedicated to helping a Medicare program unique to the Senior's needs, without turning the customer towards one of their insurance sponsors. If approved for funding I would create a general partnership corporation with a licensed medical professional designed to create a program that takes the unique approach of providing Seniors with their educational options designed to serve their desires. My organization would be devoid of corporate sponsors and would eventually lead to the development of a Medicare decision pathway program. I would promote, teach out and advertise this service and charge a nominal fee. My organization would employ the Simplified process of selection. My intent would be to provide an unbiased recommendation for the Senior on available Medicare programs. | Informed Decision | 4 | 181 days or more | \$1,500,000 |
| Summit | Goin' Green | Replace twenty-two year old roof with a state of the art, energy efficient one. | Homeowner | 5 | 31 to 90 days | \$12,000 |
| Summit | home selling and buying | I have been trying to sell my home since early september 2008. I was using a local realtor that only listed my home on the mls and was charging a flat rate. My home did not sell, now I had to get a well known realty company that is charging a percentage rate for selling my home and for my buying a new one. I can not return home prior to sell if I can not afford the new home and all the associated realtor costs involved. | myself | 5 | 31 to 90 days | \$12,000 |
| Summit | Automated Wall Coating System | To research and develop an effect means to deliver an environmentally friendly/recycled compound onto existing or newly constructed interior walls that smooths, finishes and insulates the interior walls of any residential or commercial property in one or two steps. Once developed, the system would be patented, manufactured, and wholesaled to existing or new contractors, along with training and supervising being given by trained company employees to those purchasing the system. | New Hope Renovations and Restorations | 20 | 0 to 30 days | \$2,485,782 |
| Summit | Green and expand | Improve our existing location, increase inventory and increase our internet presence with an updated/reformatted website so we can increase sales score our existing jobs and create a few more. I would also like to green our business by mountin solar panels and horizontal wind turbines in our roof to become a green model for local businesses. | House Of Plants Florist Inc. | 13 | 0 to 30 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Summit | aid for family | business to rehab foreclosed homes help with personal finances to clear way for easier borrowing to finance start of new business | home owner renewal | 6 | 181 days or more | \$1,000,000 |
| Summit | housing reclamation | To stop the decline of our neighborhoods by purchasing abandoned and foreclosed homes, remodel and make them energy efficient, as green as possible. To resell or rent these homes and move on to the next one, continuing the process of revitalizing our neighborhoods. | forcedclosed and abandon homes recovery program | 12 | 31 to 90 days | \$1,500,000 |
| Summit | Stevens Green Power | To create a retail sales Stevens Green Power, an alternative energy store that will sell and install where needed alternative energy devices. An outlet where residential and commercial customers can view and purchase alternative energy appliances, fixtures, solar panels, solar powered services, wind turbines for roof top applications, with installation and other similar products. To develop the registered website www.stevensgreenpower.com, that will offer similar products and services. | Stevens Green Power | 10 | 0 to 30 days | \$550,000 |
| Summit | Transitional Housing | Transitional housing facility to house all individuals in need housing for approximately 6 to 18 months. To include 24 hour staff assistance, meals, transportation to appointments, assist with children, exercise and educational opportunities. | none | 14 | 31 to 90 days | \$1,000,000 |
| Summit | New Safe Defense | Currently installing security cameras. Wanting to expand in the sales of Security alarms and self defense products as well as uniformed security patrol and executive protection. Expanding my business would create jobs in the area where crime has risen. My business would help reduce property crimes and protect law abiding citizen's making Summit county a safer place to live and work. | Safe Defense | 10 | 31 to 90 days | \$175,000 |
| Summit | Renovation of exiting home and an addition for a d | Thank you To add an addition to my home to start a day-care facility for children of low income families and an after school program for school age children. Also to renovate my existing home so that it is safe, energy efficient and has enough room for rental and my children. | Prorum Day-Care | 10 | 0 to 30 days | \$120,000 |
| Summit | g/ knife federal stimulus job creation project | After taking industrial knife co. a 28 year old shop manufacturing facility would like to purchase automated states of the art capital equipment to be used to create jobs in the private manufacturing sector focusing on government contracts as well as corporate contracts. | Great Lakes industrial knife co., inc. | 25 | 0 to 30 days | \$2,500,000 |
| Summit | My Dream | In the My Dream program through his and games children will learn from qualified experts such as dieticians, good eating habits and what food their bodies and minds require to grow strong and healthy. Qualified fitness instructors to teach the children how to exercise properly for strong healthy bodies which will give them the stamina to achieve more out of life and professional counselors/therapists to help them work out any problems or stresses that they might have from home, school or play. Highly trained professionals who will listen to our children's hopes and dreams and to advise them on how best to achieve them. The My Dream program will help give our children the tools to build a stable foundation on which to grow. It will help give them more self confidence and poise. The program will help our children to grow into happier, healthier and more productive young adults. It will help build families and communities that we as Americans can be proud of. | (I want to start this) Childrens welfare | 20 | 0 to 30 days | \$500,000 |
| Summit | home energy efficient | new furnace, walls and attic insulated | -----NA----- | 0 | 0 to 30 days | \$5,000 |
| Summit | DESPERATE NEED OF NEW ROOF | New roof on our house we pay our mortgage but cannot afford to get this taken care of. | HOME OWNERS | 5 | 31 to 90 days | \$5,000 |
| Summit | Project Educate | \$50,000 a year to support my wife and four children while both my wife and I finish college on a full-time basis (completion time: two years for me, Ashley is missing in Maraca (PH) and I am planning to major in Engineering. Both of us are at the end of our sophomore year. The current state of the economy, I lost my recently paying automotive industry job (\$45,000 per year). Without the income from my employment, and while I am on unemployment I am unable to enroll full-time because they view this as not having sufficient job searching. I am in the need of other funds to complete my education. The quicker my wife and I finish college, the sooner we can return to middle-class citizenship and return your investment through taxes. Also, you will have two college graduates in high demand who will not move from the Great State of Ohio and whose four children will each attend college because both of their parents have completed college. \$50,000 a year for two years is a modest investment for a lifetime of taxes. Thank you for your time. Sincerely, Mark Gove Mark Gove and Ashley Gove and Ashley Gove | Gove Family | 2 | 31 to 90 days | \$60,000 |
| Summit | Fragile X Conference | Internationally known Maria Braden and various local Speakers will be employed. Topics like, "Creative Learning Environment: Strategies and Adaptations for Students with Fragile X Syndrome" Approximately 8 - 10 speakers will be employed to cover education, transitioning, health and trust funding for disabilities. Marketing and printing will be employed to advertise event. Caterers for luncheon will be contracted. | The Fragile X Alliance of Ohio | 10 | 31 to 90 days | \$5,000 |
| Summit | Project help | Boys with Fragile X Syndrome are typically more severely affected than girls. While most boys have mental retardation, one-half to two-thirds of girls have normal IQ or learning disabilities. Emotional and behavioral problems are common in both sexes. It is estimated that 1 in 2,000 boys and 1 in 4,000 girls have Fragile X Syndrome. Fragile X is one of the most common inherited diseases. It affects all races and ethnic groups. I am seeking the above funds to pay off credit card, and personal loan debts. I am in a financial hardship situation now and is seeking help from my government. | Individual | Retain | 0 to 30 days | \$75,000 |
| Summit | Grandma Lena's Pies | Purchase of the building we are currently leasing and the landlord wishes for us to purchase the property. The building we are leasing had been empty and very poorly maintained for over 1 year or so so when we moved in and did some minor repairs to the building in order to open our business. The entrance to the business are in very poor condition and the parking area for the customers needs to be concerned. We also need to get a new roof for the building. The heating and cooling which is located on the roof of the building also needs to be replaced with energy efficient equipment. We are also using some older equipment which we would very much like to update to newer equipment to keep the cost of energy down for us. The electrical bill could also be updated. I would very much like you to consider this proposal and take our business into serious consideration, for what we are asking for help with. Thank you for your time and I look forward to hearing from you soon. Mark Zarbach To reach children and young adults age 5-18 concepts in music through private and group instruction. | Grandma Lena's Pies | 6 | 31 to 90 days | \$250,000 |
| Summit | Keep Arts Alive | To encourage students to use their gifts to outreach into the community through various playing venues (hospitals, nursing homes, churches, etc) This will not only help those who are suffering but also encourage arts awareness. | Musical Concepts and Expression | 4 | 31 to 90 days | \$100,000 |
| Summit | Commerical Property Neighborhood Rehab & Energy Ef | Community Retail & Office Center in Coventry Twp. Upgrade & Update building to rehab and revitalize the downtown community. Retrofit & upgrade HVAC, Lighting, and energy consumption in common & existing suites. Sunshine Ventures LLC has spent approx \$300,000 in the past few years to upgrade this building, which has gone from a high occupancy to some vacancies/abandoned and leaving suites to go all day long. Uses of funds to revitalize the downtown & upgrade energy consuming building/mechanical equipment including: HVAC, Lighting, Water consumption, Solar. General Contractors to do building upgrades. | Sunshine Ventures LLC | 10 | 0 to 30 days | \$185,000 |
| Summit | HETRICK HOME RENOVATING | BUY HOMES, REHAB THEM, BELL THEM, GIVE FAMILYS THAT HAVE LOST THEIR HOMES THE CHANCE TO START OVER, CREATE JOBS OUT OF WORK MEN AND WOMEN AND HELP ECONOMY WITH THE PURCHASE OF BUILDING MATERIALS. | HETRICK HOME REMODELERS | 50 | 31 to 90 days | \$750,000 |
| Summit | Silverview Sewer Project | Replace approx 50 ft of existing storm sewer that has failed. The sewer provides relief for approx 300 homes in the Village of Silver Lake. Also a construct a new residential lot. | Sweitzer Sewer Systems | 0 | 31 to 90 days | \$80,000 |
| Summit | Helping Communities and Citizens by rehabbing run | Goal is to help communities and citizens by rehabbing run down properties and then selling the property. This would help the communities by increasing home values and would help citizens by helping them purchase a home that is in ready to move in condition. It would also help the economy by putting at least 3 Owners back to work, once business is more established has potential of more employees. We would start with 3-4 homes then use profits to purchase more homes. | Roth Enterprises | 3 | 0 to 30 days | \$200,000 |
| Summit | housing reclamation | To stop the decline of our neighborhoods by purchasing abandoned and foreclosed homes, remodel and make them energy efficient, as green as possible. To resell or rent these homes and or rent them and move on to the next one, continuing the process of revitalizing our neighborhoods. | forcedclosed and abandon homes recovery program | 12 | 31 to 90 days | \$1,500,000 |
| Summit | Property modernization | 2 new energy efficient windows for home. | Myself | 3 | 31 to 90 days | \$2,500 |
| Summit | X-Manager IT Educational Project | This program is for laid off managers over 40 years old and older. We will train these people to become certified Microsoft IT people. These will be Microsoft skills in IT technical, professional, and networking administration. WE will roll to classes to train approximately 200 people. One in Akron and one in Southern Ohio. These will be intensive speed trained programs lasting a total of 2-3 months with both lecture and home assignments. This will enable 200 people to add skills to their current resume and also give them another career choice. Each person will receive their own laptop computer for future use with their new trade. | Ron Buccì | 100 | 31 to 90 days | \$500,000 |
| Summit | grandmother in need | This is a great purpose to train professional people who were previously in managerial positions to regain managerial and/or IT jobs. to pay of house mortgage and bill that have gotten to high with the cost of raising a grandchild | grandmother raising grandson | 0 | 0 to 30 days | \$100,000 |
| Summit | Adult to Student Transition Program | For higher education and provide support to maintain registration in a higher education program to ensure graduation. We will provide services of charge to the community which will include, but not limited to, assistance to discover & fit college and financial applications, advising, PC broadband internet and Microsoft Office usage, some transportation, and homework/class class help throughout the student's first year. We have found that continued guidance throughout the first year will increase the chance of successful graduation and expect an outcome of an increase in the amount of college educated adults in the Summit County area. The following lines are an estimated projection of the project's start up needs. 1 500-3000 ft. Office Space Lease & Utilities 4 Personal Computers for Clients 2 Personal Computers for Employees 1 Fax/Printer, 4 phone lines, 4 phones 2 Part-time employees (Wages, etc.) 1 Student Transportation Van & Costs | The Valentine Foundation for Community Advancement | 150 | 31 to 90 days | \$186,988 |
| Summit | The Farm (Ballfields and Indoor Training Faciltie | add a state-of-the-art complex containing 18 youth and adult softball and baseball fields, batting cage, picnic areas, playgrounds, parking lots, and an indoor training facility with mats, batting cages, weight rooms, and exercise equipment. This complex will be used as the focus of a community based recreational center to get kids out from behind their video games and into physical activities year-round. It will be run more like a school than a sports organization, where teamwork, respect, responsibility, education, and morality will be the focus. It's not about winning and being - it's about how one plays the game. To create a retail outlet, Stevens Green Power, an alternative energy store that will promote and sell alternative energy devices. An outlet where residential and commercial customers can view and purchase alternative energy appliances, fixtures, solar panels, solar powered devices, wind turbines for roof top applications, with installation and other similar products. To develop the registered website www.stevensgreenpower.com, that will offer similar products and services. | The Sandlot Society, Inc. | 220 | 181 days or more | \$9,879,785 |

|----------------|---|--|---|----------------|--------------------|---------------------------|
| Summit | Removing Barriers To Self Sufficiency Clinics | their knowledge in areas of Consumer Rights, Credit Repair, Tenant Rights and Responsibilities, Foreclosure prevention, Budgeting and Money Management. Objective of program improve self-sufficiency skills. Identify barriers that prevent participants from being financial strong and maintain households. Target population: consumers experiencing recent job loss, decreased wages, households with no minor children in the home, older adults, women experiencing financial crisis due to domestic violence, unemployed consumers. Expected outcomes: Recount chance banking and engage consumer to enter into the banking mainstream. Increased financial acumen to address financial crises, avoid wage garnishment, deal with credit collections, encourage establishment of emergency fund account to address crises etc. Improve ability to secure employment, understand the relationship of how credit can serve as a barrier to securing housing/employment opportunities. Health: House with solar panels, for alternative, renewable energy. Saving the home owner money to stimulate the economy at the same time as reducing fossil fuel consumption. | The Pride Through Empowerment Foundation | 7 | 31 to 90 days | \$215,500 |
| Summit | Solar power | This project would require a drainage system (this would be approx. 200 ft. to hook up to the street sewer line, land landscaping to prevent further flooding of the property in the last 3 years the property has exceeded 1.7". Every time it rains I get a small lake in my back yard and every year the lake is getting bigger. This project would not only help the flooding problem at 2151 Liberty St. it would also help the neighboring properties. With the funding I would be able to eliminate the flooding problem and make it an environmentally friendly area. I would be able to plant an organic vegetable garden, a compost area and rain water collection to use in the summer months, cutting down on water usage. I then plan to show the flooding problems and the differences in the last 2 years. This needs to be fixed and I do not have the funds to fix it. The project would take 4 weeks to complete and would create income for a landscaping company. I would take bids on the work to be done and get a signed contract with the winning bidder I would like to put in energy panel up until the flooding is corrected, there is nothing I can do. PLEASE consider my proposal | none | 5 | 91 to 180 days | \$30,000 |
| Summit | 2151 Liberty St. Flooding | I got hurt at work 15 years ago and been on disability for a long time my wife left me on a court of my disability and I have tried every where to get money to go back to school and start my own little biz, and make my wife boss proud of me again and I cant do nothing on the 975 amount of disability I get half the time all I get is shut off rotors of my gas and elec. I just want to feel whole again and going back to school would help. In the postage lakes area there is no bicycle shops for sales or service. There are a lot of empty buildings that would work and help bring life back to the postage lake area | Blakes Bikes | 5 | 0 to 30 days | \$75,000 |
| Summit | To make me feel whole again | I would like to hire unemployed tradesman to purchase foreclosed homes in stressed neighborhoods. Make all necessary repairs to make the house into a home. Not just bare minimum for rental codes but into a place where a person can raise a family with pride. Instead of renting the homes to these people I would sell the homes to land contract terms. With the changes in the housing market, I believe most people will be able to get a mortgage needed to purchase their home the conventional way. I believe the land contract may be some peoples only hope of home ownership. Once we had several homes fixed, we would continue to purchase more homes with the same plan. This way we can create job ownership for countless numbers of families. Not only would this help those families with a place to live, it would also create a person with the equity in their own home. | Blakes Bikes | 1 | 31 to 90 days | \$10,000 |
| Summit | Open Bicycle shop | Thank you for everything. | Blakes Bikes | 5 | 0 to 30 days | \$75,000 |
| Summit | Home ReSellers | Replace windows to reduce energy needed for heating and cooling. | Scolaro Family | 4 | 31 to 90 days | \$200,000 |
| Summit | Energy Efficent Windows | OPEN NEW UNION MECHANICAL CONTRACTOR IN AKRON TO REPLACE 2 FAILED CONTRACTORS WHO WERE AVAILABLE IN THE AREA ON NUMEROUS PROJECTS. I WAS THE OPERATIONS MANAGER FOR ONE OF THE FAILED CONTRACTORS. AFTER THE INITIAL INVESTMENT FOR START UP AND YEAR OPERATIONS EXPENSES THE COMPANY WOULD BE SUPPORTED BY MY WIFE AS A UNION PREFITTER AND THE NEW COMPANY WOULD PERFORM MINORITY WORK. THE JOBS WOULD BE UNION SCALE PLUMBER AND PREFITTERS IN THE AKRON AREA. PAYING INTO TAXES AND PENSION PROGRAMS. THE WORK IS SUSTAINABLE. THE WHOLE COMMUNITY WILL BENEFIT. | MEMBER UA LOCAL 219 | 20 | 0 to 30 days | \$1,000,000 |
| Summit | Business Improvements | We would like 20,000 for business improvements. We have a small store in a neighborhood that is getting run down. We want to improve our store and make people more aware of our business so they will want to come to our community in Goodyear Heights. | The GameRack | 4 | 0 to 30 days | \$20,000 |
| Summit | Home improvements | I would like 10,000 for home improvements. I do not want to live in a home that is not safe. I would like 10,000 for home improvements. I do not want to live in a home that is not safe. I would like 10,000 for home improvements. I do not want to live in a home that is not safe. | individual | 0 | 31 to 90 days | \$20,000 |
| Summit | Foreclosure/home Methamphetamine Testing | We have been in business for about a year now and I can fill hours with stories regarding health issues of tenants and home owners who unknowingly moved into the past life. What our company does is tests homes for methamphetamine residue. We have worked with the Akron Metropolitan Housing Authority and many Home Inspectors to test homes for the dangerous residue. In fact the EPA has identified a meth lab as a "toxic waste dump". We would like to secure the funding to work with those interested in low cost homes and/or foreclosures to test for the residue from the production of drugs. Many times the property can be cleaned, but not always. There are many techniques to removed the contaminant, which may cost tens of thousands of dollars. | safety elements, ltd. | 2 | 0 to 30 days | \$100,000 |
| Summit | Company Expansion | I need this fund to expand my business to hire approximately 2 technicians and get them certified to run tech calls. Marketing and another tech vehicle as well as day to day operating expenses. Remodel present garage on my property to house my computer repair business. | Dominion Computer Solutions Inc | 4 | 0 to 30 days | \$50,000 |
| Summit | My Son | I am a single father who has been raising my son on my own since he was 4. He is now 15. I am in need of a better vehicle. I am in need of health insurance for myself. There have been health issues. I need surgery, and could have that at the VA, but can not afford to make any work. I will have no income at all during time. I have past bills I am unable to pay, and have NO spare money at all. My sons Mother does not pay her support on a regular basis, so when I do get some payments from her, I buy my son clothes and shoes and other things he needs. | Family | 0 | 31 to 90 days | \$30,000 |
| Summit | Stem Cell and Genetic Research Funding | We are the Global Medical Research Fund. We have put together a group to raise funds for stem cell and genetic research. Our board is made up of 5 people from Ohio, and we need funding to do the following: (1) Submit our paperwork to the Federal Government for \$010 (3 states). (2) 1 down payment for office space in Ohio. (3) Malware (4) Money to begin conducting forensics. (5) Teachers. (6) \$7,500 for educational grants. (7) Three computers with internet access, along with a single printer system. (8) Money to help us contact with potential foster donors. With the need for further research in stem cell genetics we feel that the time is right for the state of Ohio to be developed in this state. Arguably Ohio has the best medical research infrastructure in the country's world and we want to take part in realizing Ohio's potential. | Global Medical Research Fund (The) | 12 | 0 to 30 days | \$50,000 |
| Summit | RESTRUCTURING MY COMPANY | We are ideally positioned to fulfill fundings in this area-Aaron is working on a bio-medical research center which will help create even more jobs in this area-with the Global Medical Research Fund in full operation we will be contributing to make Akron a major player in research. WANT TO RESTRUCTURE MY COMPANY. NEW EQUIPMENT, COMPUTER AND GET EDUCATED. MY GREENEY. LEARN HOW TO INSTALL SOLAR PANELS. WIND TOWERS AND ENERGY PREVENTION AND RETENTION. I ALSO NEED THE MONEY TO KEEP MY BUSINESS RUNNING. THANK YOU. | A. J. H.CONSTRUCTION | 10 | 0 to 30 days | \$20,000 |
| Summit | Family | Request for red debt relief keep home out of foreclosures. Keeping hard working police officers in their homes and living close to one another keeps neighborhoods safer and creates a better area for children to live in. Wife has had her hours cut to two days a week and with people not spending what they used to, side jobs are really starting to dry up. Thank you for your time in reading this. | family | 0 | 0 to 30 days | \$5,000 |
| Summit | Saladworks | use of existing building in disrepair to open a franchise business that would employ and create healthcare for individuals that is non-existent now | Family Business | 20 | 91 to 180 days | \$583,000 |
| Summit | Kids Summer Day Care | Just want to be able to send my kids to a summer program so I can work. | Personal | 0 | 0 | \$750 |
| Summit | FutureNet Consultants | The project will build a framework for the next generation of intelligent sound services based on three strong research communities within the fields of signal processing, wireless databases, and machine learning. Our central hypothesis is that this combination can open new scientific frontiers in the important field of multimedia search. | FutureNet Consultants | 10 | 0 to 30 days | \$250,000 |
| Summit | Small Business Bailout | Funding for equipment, advertising and existing debt. To do future concrete work and create jobs. | Kandes Concrete | 3 | 31 to 90 days | \$20,000 |
| Summit | Bettering America and my Family | I'm looking for funding for my wife to finish college for her RN, her tuition reimbursement has been cancelled from her current employer. I also would like to further my education and go to school to become a teacher. I also would like to make my house energy efficient. My wife and I are both 28 and have two kids, when I would like to give a better life and show them that it is never to late to go to school to better yourself. | the Fetterman Family | 2 | 31 to 90 days | \$125,000 |
| Summit | Business Startup/ Home weatherization | Start up to buy a franchise Home Inspection co. and weatherize my home, new windows, doors, siding, new high efficiency furnace and insulation | N/A | 10 | 0 to 30 days | \$25,000 |
| Summit | Assisted Living support | Bridge funds through to continue to provide quality deficiency free assisted living with commendations from the Ohio Department of Health) care for seniors. I currently employ 20 staff members the majority of which are over 65 years of age. Admissions have slowed secondary to the housing/employment crisis. I need funds to maintain operations, provide senior care, and jobs. | Haven Homes Assisted Living of Stow, Inc. | 21 | 0 to 30 days | \$300,000 |
| Summit | Akron rehab and refund | I Adam Greenleaf have been remodeling houses for the past 10 years and will head the project to purchase 10 houses in the akron area that are foreclosed, rundown community eyesores. I will restore and update those houses and sell them at cost effective prices to help boost the local community housing values back up. With the sale of each house I will give 30% of the profit back to local non-profit organizations. After the ten houses I hope to have enough funds to continue the same process on my own but if not I will request more funding until I can stand alone and support the community. Thank you | Greenleaf construction | 16 | 0 to 30 days | \$750,000 |
| Summit | New company to paint buildings | Start a new company painting houses and apartment buildings. | owner to be? | 4 | 31 to 90 days | \$45,000 |
| Summit | PROJECT HELPING HAND | PURCHASE OF SEVERAL FARMS GROWING VEGETABLES, FRUIT, RAISING CHICKENS/CATTLE AND DISTRIBUTING THESE PRODUCTS. ONCE PRODUCED, TO DISTRIBUTION CENTERS FOR RE-DISTRIBUTION TO OHIO FAMILIES SUFFERING FROM THE ECONOMY. AS GOVERNOR TED STRICKLAND SAID, PROVIDING ASSISTANCE TO OHIO WORKERS HURT BY THE ECONOMIC RECOVERY. RIGHT NOW, THOSE WHO USED TO SUPPLEMENT CANT DO IT TO LACK OF FUNDS PERSONALLY IN ABOUT FIVE YEARS. ONCE THE ECONOMY TURNS AROUND, THOSE INDIVIDUALS AND COMPANIES WHO USUALLY CONTRIBUTE MAY BE ABLE TO DO SO. NATIONALLY OHIO WILL BE KNOWN AS THE STATE WHO CARES FOR THEIR OWN. | n/a yet | 10 | 31 to 90 days | \$6,000,000 |
| Summit | Peninsula Library Renovation | We are seeking to renovate the Peninsula Library. Built in 1964, the building has had address in 1979 & 1988. Plans had been developed to renovate the building and possibly construct an addition as early as 2001. However, funding from the state began to decline after that year. Because of the decrease in revenue, plans for renovation were put on hold resulting in major building deficiencies. The building needs asbestos abatement floor tile and asbestos, ADA compliance issues, & infrastructure improvements (including, but not limited to electrical, plumbing, energy efficiency, technology, parking & drainage issues, & spatial & organizational issues). Original plans from 2001 included the construction of new community rooms complete with new restrooms & a reading kitchen. The Peninsula Library has received over \$50,000 towards this renovation project & is once again in the final stages of soliciting requests for qualifications of firms capable of handling a building assessment & planning for the library's future. The Peninsula Library is the central community organization for Peninsula, Boston Twp., Boston Hts. and the entire Cuyahoga Valley. | Peninsula Library | 25 | 181 days or more | \$450,000 |

| Summit | Employment after College | I am a full time (disabled) student at the University of Akron. I will be graduating this year with a B.A. in Secondary Education. Being disabled and a full time student has limited my chances to get a loan to buy a car that would enable me to get to a job after graduation. If I owned a car I could travel anywhere I was employed. I have no other chance to get a vehicle due to the fact I will have to pay my student loans six months after school. A car would provide me with the opportunity to work in after school community programs as well. If there is any other solution that help me or give me the hope I would appreciate it. I am a former United States Marine and a former business owner an auto accident that I was involved in the losing everything, so I want back to college and have worked very hard to be a contributor for our nation both in the classroom and in our community. I voted for President Obama and believe that with this possible opportunity would create great promise for me and the future. Thank You. Don Smith | University of Akron | 100 | 0 to 30 days | \$15,000 |
| Summit | Cabins and Trails to see Nature at its best | To develop ridge top scenic overlook with cabins and trails. Improvement of trails with hiking with environment study of vegetation and trees, wildlife. Also a building for rangers, crafts, sports, equipment etc. To make jobs, work with USDA, DNR as acceptable. Dollar amount per research and improvement. | Williams Family and Wildlife Refuge | two | 31 to 90 days | \$75,000 |

| Summit | Pay off debts | I was forced to retire from the Stow City School district, due to being bumped if I stayed, I would lose my health benefits and a pension. I work two jobs to make ends meet and am not able to keep up the never ending home insurance, taxes on property, car insurance, phone bills, house payments gas bills to heat the house, and other debts incurred to be able to pay the above bills mentioned. I can only get part time jobs and this is not helping. My age is against me to find good jobs. Both my jobs are part time. I worked 14 years previously and got laid off in 1998 from state work. Therefore my social security will be small an only part time jobs paid so HELP. Just got out to 4 days at work. My car is nine years old. Need a new car. This would help the auto companies. | Myself | one | 0 to 30 days | \$35,000 |
| Summit | Main Street | Opening a new ice cream business within an established retail gift shop. Increase business as well hiring new employees while keeping the current staff of 7 people. By adding at least 5 employees to the new business I will be able to contribute to the tax base of Summit County and the local city of Copley. I will be paying more in State sales tax to the State of Ohio. An ice cream business is recession proof! This would be the best situation for all. | Home River City Gift Shoppe | 2 12 | 0 to 30 days 0 to 30 days | \$20,000 \$30,000 |
| Summit | T12 Fluorescent Lighting Replacement | This funding will allow for the replacement of approximately 1,000 (4) lamp T12 fluorescent light fixtures in the office areas of the Babcock Energy Billing Dept. manufacturing plant facility. Replacing this from the fluorescent lighting will be used to convert the existing business to LED lamp fixtures, thereby generating approximately 50 percent savings in fluorescent lighting costs at this location. Expected annual savings is estimated at \$340,000 per year. By the use fiber optic or lines of unequal diameters, the the horizontality of chassis can be altered to a predetermined level. Analysis showed an angle of 3 to 7 degrees inclination of the chassis with the horizontal has a gas saving of 5%. Road tests need to be done. Several cars and trucks with the designed fittings will be test run for over 500 miles each. Results will be compared with that for the control vehicles. The device can be attached to new vehicles or old ones for an affordable cost. | Babcock & Wilcox - Nuclear Operations Group | 0 | 0 to 30 days | \$120,000 |
| Summit | Chassis Adjustment for better gas mileage. | By the use fiber optic or lines of unequal diameters, the the horizontality of chassis can be altered to a predetermined level. Analysis showed an angle of 3 to 7 degrees inclination of the chassis with the horizontal has a gas saving of 5%. Road tests need to be done. Several cars and trucks with the designed fittings will be test run for over 500 miles each. Results will be compared with that for the control vehicles. The device can be attached to new vehicles or old ones for an affordable cost. | United Polymer Technology LLC | 4 | 0 to 30 days | \$250,000 |
| Summit | S.A.M.2009 | S.A.M. proposes that American Pride be restored and jobs in the metals industry be saved or enhanced by the manufacture of cast American Eagles purchased by the Federal and State Government. We believe that the private sector also would benefit. The American Eagle was once a powerful display of American willpower and should be again. Estimates show that there are 400-500K federal buildings in the US. Several Eagles for each at a cost of \$100.00 could put \$1 Billion back into the economy while supporting the American worker. We see no Eagles on our local Post Offices, City Buildings or Schools. We propose that this program could be for reaching. We firmly promote a project about American Pride and a product made in America. Our workers don't need handouts. They want opportunity. Every job we can save or restore counts. The project would help tool makers, smelters, trucking, bounty workers and support staff. We estimate the project using 10 million pounds of Aluminum alloy cast by several methods. | Summit OEM Products Inc. | 25 | 31 to 90 days | \$100,000 |
| Summit | Artificial Intervertebral Disc | Damaged intervertebral disc need to be replaced. The artificial disc we have developed is unique in that it is resilient, absorbs body fluid to fit in the cavity left by the removal of damaged disc. Need to be tested in the vertebrae of pigs first. Initial work was done in collaboration with spinal surgeons. We are requesting the following funds for home improvements for energy efficiency to our 1925 home. Our home will become a century home in 10 years. Home Improvements - Energy Efficiency 28 Windows 4 Doors Roofing Siding Furnace & Central Air Insulation Fencing Maintenance/Beautification of vacant home lots on our block If we are granted this money, it will almost immediately be put back into the local economy through purchases and contractors of local businesses. We thank you for your consideration and any assistance would be greatly appreciated. We have developed anticancer prophylactics for a preventative approach. These need to be tested on two additional test mammals in order to get approval for human trials. These compounds have been tested in several labs worldwide and they are found to be effective on various types of cancer. The approach is immune restoration; so, it is expected to be AIDS preventative as well. | United Biotechnology Inc. | 2 | 0 to 30 days | \$550,000 |
| Summit | Prisk Family Home | 28 Windows 4 Doors Roofing Siding Furnace & Central Air Insulation Fencing Maintenance/Beautification of vacant home lots on our block If we are granted this money, it will almost immediately be put back into the local economy through purchases and contractors of local businesses. We thank you for your consideration and any assistance would be greatly appreciated. We have developed anticancer prophylactics for a preventative approach. | Summit | American Made Toner Cartridges | We 3 Salespeople, 2 office people 2 laser printer repairmen, 3 toner cartridge technicians to make American made toner cartridges. Only 5% of toner cartridges in the US are recycled. Each one is 4-8 quarts of crude oil to make in Asia and transport and distribute here. The supplies we buy are 95% made in America. This would produce many American jobs from here. Our business has been established 20 years and now is the time to get Ohio to recycle. This is a GREEN JOB! As a fairly new, small business, Creekside Home Treasures has struggled in today's economy. I have been working with 35 local artists, selling their artwork. Creekside also sells repurposed artwork in other nations, but the focus is primarily on local artists. Like many other businesses, I am having great difficulty paying rent, business credit, and all other operating expenses. As Creekside is the one business in Summit that deals with various local artists, the artists and customers of Creekside want the money to remain local. I am currently an "investigator" with the property owner, however, he is demanding money that does not exist. There are educational / video projects in the works which will be low budget. Another project to bring more sales for Creekside and the local artists involve art shows, auctions, & fundations. Both of these projects along with the current works of Creekside will enable more artists to sell more of their work, and at the same time, not have to compete with artists from outside Ohio. In addition to more artists being able to sell more of their works, it will provide jobs at Creekside. This will only be possible with assistance. | Lazer Action Inc. | 10 | 0 to 30 days | \$750,000 |

| Summit | Insulate my home, repair front porch, garage needs | Home insulation. Front porch needs repaired, garage needs a new roof. I can not afford to do these things on my own, and would appreciate any help the government may provide. I am not behind on my mortgage payments, but I have depleted my savings trying to stay afloat. Please help! | Homeowner | 3 | 31 to 90 days | \$5,000 |
| Summit | Dream 4 Tina | To purchase roughly 60 acres of land and equipment and to hire labor and commence operations to create a plant nursery, landscape company, and small farm in or near the Summit area. Roughly 60 acres would be utilized for nursery growing, 5-10 acres for office operations, storage, and a house, and the remaining 5-10 acres for growing food, at least 85% of which would be donated to local food banks, with the balance given to employees or sold, with the proceeds donated to the same food banks. | 4Tina | 10 | 31 to 90 days | \$800,000 |
| Summit | Home Safe Home | I am on 551 have a mortgage on a house I bought in 2008. It has been flooded about 6 times since I have moved here. I need the money to rebuild porches they are in bad shape from floods, rob focus on first floor where basement flood with water from previous years. To have basement floor need water that washed some of the dirt out from under basement floor need some beams replaced and I am disabled only have one bathroom it explains hard for me to go up and down stairs would like to add a bathroom downstairs I would also like to get house insulated to save on heating costs and other repairs needed. | personal | 10 | 0 to 30 days | \$45,000 |
| Summit | Windows | My 1948 home needs new windows. Not only would this improve the value of the home but increase the house efficiency. | Home Repair | 3 | 181 days or more | \$10,000 |
| Summit | JW Cheers | Project would include remodeling building where business is operated, updating equipment and repairing parking lot. Money would also be used to employ and train more employees. | JW Cheers | 12 | 0 to 30 days | \$20,000 |
| Summit | Lannon home care | 1st month salary for new employees. Hope to expand as business grow | home care | 5 | 91 to 180 days | \$5,000 |
| Summit | My Family | I returned to my hometown of Akron just over a year ago with nothing. I obtained a job at the local CircleK and an apartment. I have a disabled third living with me. I have no transportation, and I need funds to pay to have my license reinstated and get a decent sized automobile. That could get my friend to all his doctors appointments, and disability appointments and also to seek better employment for myself. Also, I need dental care that I just cannot afford on my meager pay. I know I am qualified for so much more and could help others so much more if I could just get my driving situation taken care of. If I could get even a portion of my requested funds, it would help me to better my living situation and I would be so very grateful. Sincerely, Julie B. Blue | My Family | 1 | 0 to 30 days | \$10,000 |

| Summit | Save small business and Jobs | This request would directly translate into putting back to employment of approx. 4 people. This will also save approx. 4-6 more people from getting laid off. This will also give our small business M&J Machine Shop Inc. the chance to survive the economic downturn. M&J has been around for 35 years in the favor area manufacturing for large and small business across the county keeping manufacturing jobs in Akron and in the United States. M&J would take any help that could be given to surpass the economic fall including low interest loans grants or what ever may be available to keep manufacturing jobs locally in Akron Ohio and/or in the United States. Please let us know if there is anything we can be done at any amount. Thank you Vice President of M&J Machine Shop Inc. Jon Kutas | M&J Machine Shop Inc. | 4-10 | 0 to 30 days | \$150,000 |
| Summit | Portage Lakes State Park Dam Rehabilitation | Funds will be used to rehabilitate two of the earthen embankment dams that make up the Portage Lakes system. Work will include lake drain replacement, slopeway improvements, and concrete armoring of the downstream face of both The Tawcress Dam and the West Reservoir dam. The work is needed to bring both Class I (high hazard) dams into compliance with current dam safety regulations. Design is currently 75% complete for both sites. | Ohio Department of Natural Resources | 75 | 91 to 180 days | \$5,000,000 |
| Summit | Phase Two Improvements&Storage Units | 300' new water line, gas line, some new sewer lines, with 1-60x210' with office with climate control—2-30x180'—1-30x150'—1-30x107 storage buildings with lift trucks and offices. Buildings made of 5x4 Galvalume. Paved parking. Paved asphalt drive and parking, with a fence around whole property for security. | AMM Properties LLC | 10 | 0 to 30 days | \$900,000 |
| Summit | Repopulate honeybees with hobby beekeepers | Project would set up not for profit company to provide local jobs and re-populate the state with honeybees maintained in mini hobby colonies by suburban homeowners. Project would create a start-up kit for suburban homeowners. All funds would go to hiring new employees, buying materials/foods locally and subsidizing the cost of the kit during project startup phase. Two year plan would be to run the company without any assistance as a viable business. Bees range up to seven miles, but practical distance is two miles. Project would track all homeowners in the project with tool like Google earth to identify coverage areas and target uncovered areas. Google and/or Microsoft might assist with this project by providing free IT support. Set up website for retail needs of the project. Also setup forum for GSA. Solicit assistance/support from The Ohio State Univ's honey bee lab. Especially in the design of the startup kit and help with web forum. | Lynndale Farms | 5 | 31 to 90 days | \$450,000 |
| Summit | Coroner case information hybrid web project | The Coroner's (apis mellifera carnica) bees as they are gentler off all honeybees and perform well in Ohio. Generally these bees will not sting an engineer existing Coroner case management application to create a seamless interface between locally installed case database and the state database. The function will provide anyone access to Coroner's, judges, inspectors, investigators and state association. The system is both locally deployed in addition to internet access using a standard web browser. | Douglas & Associates, Inc. | 4 | 0 to 30 days | \$115,000 |
| Summit | BUCKBARN FINDS | To enable me to expand my part time hobby into a full time career. With companies downsizing and the outlook for securing a new job in my field of expertise near non-existent (body shop / collision estimator) I would much prefer to expand and run my own business than to be laid off. I feel that with folks looking to save money whenever they can, the near future looks very promising for a specialty, high quality retail store. I very much enjoy this business, looking for classic, exotic, one of a kind items and the like, their customers are very discerning. I'm hoping the hobby for display and watching as folks stumble upon something they have been looking for for a long time. To have the feeling of self worth and importance again would be so much to me and my family. I truly hope that this application will be reviewed and considered seriously. I wouldn't take the time to waste filling it out if I weren't serious about it. Thank you for your time. Respectfully, Allan Newberry | BUCKBARN FINDS | 2 | 0 to 30 days | \$45,000 |
| Summit | an affordable mortgage | we were scammed into an adjustable mortgage refinance. I was laid off my job in November and I was turned down for unemployment. We cannot afford to send my daughter to college, so she can find a career for her future. Our water well collapsed in the same year the City of Green told us we had to get a new septic system. This borrowing from our decreasing 401k we need for our retirement. We opened for a lender to refinance our mortgage and lower our payment and we are dangerously close to losing our home. We have lived here for 18 years and we are hard working citizens. Please help hold our heads above our ship is sinking. We need a life preserver to help get our feet on stable ground again. Thank you for your time. I have had no experience in the property or realty or years, it is a heavy state because we've been paying on it every day or two week. | my family | 2 | 0 to 30 days | \$100,000 |
| Summit | Small improvements to Lower Park | The field needs to be reseeded and weed and feed put on it. There are ugly cheery trees that adorn my property and are ready to fall on my house. They need to be taken down. There are about 10 of them. We need to have pine trees planted on the edge instead. The fences need to be repaired, preferably replaced with a taller fence giving us some privacy from the soccer field. The entrance to the field needs to have an entry fence taken down as it's an eyesore and no longer needed. I'd like to see this made out of a rock ledge where the rocks come from a strip mine around the corner. The parking lot and entry road need more rocks. We have a storage shed which was vandalized. It needs to be fixed or removed. | The Satellite Shop | 1 | 0 to 30 days | \$20,000 |
| Summit | Continue Open Door of Willard Church | Willard United Church of Christ wants to keep the doors open and continue the missions of the Church, we need to pay off our building loan and be able to support our missions. The Church like some many others has fallen on hard times with the increase of utilities and insurance it is difficult each month to keep expenses below income. The Church has been in the neighborhood for over 100 years and wants to continue many more years with its doors open and not have an empty building in this neighborhood. The Church serves individuals with its food pantry being open three times a month, meetings of AA, Celebrate Recovery, Kids Night Our also use the building. We also do mission work with our local grade school. The Church is in one of the poorest neighborhoods of Akron and to increase our membership has been hard. Willard Church might be small in weekly attendance but is one of the greatest by serving others with its missions. | Willard United Church of Christ | 0 | 0 to 30 days | \$65,000 |
| Summit | Phase two: property improvements& new storage buil | 300' new water line & gas line & 200' new electric lines with 1-60x210' partial climate control—2-30x180'—1-30x150'—1-30x107 storage units, all galvalume with lift trucks and offices. Buildings made of 5x4 Galvalume. Paved parking. Paved asphalt drive and parking, fencing around whole property, with office. | Berkley Builders Inc. | 10 | 0 to 30 days | \$900,000 |
| Summit | Personal Touch Car Wash Expansion/Renovation | "Expansion of a new high velocity in bay automatic with 2 self serve bays, vacuums and vending. Renovation of existing touch free tunnel". \$230,000 for the equipment and setup of the new in bay automatic. 2 self serve bays, vacuums and vending. \$220,000 for the new building. In bay automatic(14x28'). 2 self serve bays(14x20' each bay). Equipment room(14x20'). Office and waiting room(14x20'). Refacing the front of the existing(47x95') car wash, new doors, windows and walls of the inside of the tunnel. If we received the \$115,000 from the stimulus we would have the money for a 25% down payment to go forward with the project. Our business has been down in the past 2 years about 30% and with the widening of Arlington Rd. coming in the next year or so we fear our numbers could drop even more if we don't do something. Our car wash is looking old and with car washes an outside image is everything and we feel this would help our business tremendously. This project would give us a new image, help keep the jobs of our 12 employees and create about 5 new jobs. It would also help our community by having car wash handrubs for local schools and other organizations. This is a product idea that I had come up with, I will be back. It is a replacement headlight assembly for scooters and other utility vehicles. I paid a company a \$885.00 startup fee, and to complete the finished product for presentation, the company, Davison Invention/ RDCD Park 696 Alpha Dr. Pittsburgh PA 15289-2911, 1-800-544-3037 ext 500959 Mr. Gary Hummel. Needs an additional 14,485.00. I am asking 25,000.00 to cover all expenses such as transportation, additional costs in the product, phone billing and proper attire. I am pretty sure the additional costs have been eliminated, which makes my request negotiable. I have contacted Joe Campman ward 13 Cleveland Ohio and submitted Davison's business proposal. A company has been targeted for production, which may or may not have this product built here in Ohio. I feel this is best because many companies nationwide have received government assistance that can maintain or produce jobs outside the state which they have their headquarters (eg. Ford, Chevy, and Chrysler corporations) Please contact me as soon as this type of request can be accommodated. Sincerely, Robert J. Paoc, P.S. Be sure to contact Mr. Campman to view proposal. | Personal Touch Car Wash | 17 | 91 to 180 days | \$115,000 |
| Summit | Utility / Plog Light | This is a product idea that I had come up with, I will be back. It is a replacement headlight assembly for scooters and other utility vehicles. I paid a company a \$885.00 startup fee, and to complete the finished product for presentation, the company, Davison Invention/ RDCD Park 696 Alpha Dr. Pittsburgh PA 15289-2911, 1-800-544-3037 ext 500959 Mr. Gary Hummel. Needs an additional 14,485.00. I am asking 25,000.00 to cover all expenses such as transportation, additional costs in the product, phone billing and proper attire. I am pretty sure the additional costs have been eliminated, which makes my request negotiable. I have contacted Joe Campman ward 13 Cleveland Ohio and submitted Davison's business proposal. Ford, Chevy, and Chrysler corporations) Please contact me as soon as this type of request can be accommodated. Sincerely, Robert J. Paoc, P.S. Be sure to contact Mr. Campman to view proposal. | N/A | 100 | 0 to 30 days | \$25,000 |
| Summit | Energy Conservation/ Energy Efficient Windows, doo | 30' solar home with 35 new energy efficient windows and doors. Also to totally water proof entire basement, and do any other energy proofing in caulking, weatherstripping etc. | University of Akron | 24 | 0 to 30 days | \$30,000 |
| Summit | New Septic System | We are retired and honestly can't afford to do it on our own. I hope you can help with this it sure would help us . Thank you Eddie Duffine | | dont know | 31 to 90 days | \$25,000 |
| Summit | Financial Literacy Program | Our organization will have two programs: A financial literacy course spanning 13 weeks and a counseling program helping families one on one. The financial literacy course will be held at area non-for-profits, community centers and churches. It will help people understand how personal finance works. The other program will be a counseling program helping families one on one. This program is strictly for educational purposes as we will not offer loans or any other services that will be paid by the consumer. | Family Financial Transformation of Ohio | 2 | 31 to 90 days | \$150,000 |
| Summit | Expansion | Building expansion, additional capital equipment purchased to supply current and new customers. We have secured a new Plastics Processing Machine Bulstar that has the potential to supply up to \$2.5M in annual sales. Funds would be used to add additional manufacturing space, purchase machine tools and support equipment, recruit 3 employees currently on staff, and hire up to 12 additional employees over the next 1-12 months. This project would allow us to increase the availability of solar power to the community. Respective would help reduce the amount of demand on fossil fuels. We plan on putting together a local company that would employ approximately employee ten people to help manufacturer and install solar panels to help reduce the dependency of fossil fuels. | D.E.S. Machine Services, Inc. | 15 | 91 to 180 days | \$850,000 |
| Summit | solar power to the masses | | | 10 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Summit | Affordable Housing Program | Purchase and rehabilitate abandoned or foreclosed properties in the summit county area to provide affordable housing for the economic oppressed. This proposal will assist in providing quality housing for people unable to afford housing. The project will reclaim abandoned housing in the Summit county area and develop it for re-sale at affordable prices or make the property available as subside rental units. It will also help improve neighborhood appearance by maintaining property that has been neglected and Not kept in good condition. The project will initially employ 10 - 15 persons for temporary construction work and employ 2 to 5 persons permanently. | Home | 10 | 0 to 30 days | \$500,000 |
| Summit | Education Assistance | This project will assist a 12 Educator to pay off student loans estimating \$30,000.00. The amount includes bachelor and master degree programs that have been completed. However, loans are still outstanding. Loan amount is high due to adoption of state requirement for a Masters degree after the first five years of teaching in the state of Ohio. Educators Masters degree is complete and now position in local school district is being eliminated due to falling property values and a direct result all because of a falling economy. Educator will return to the classroom. However, the masters degree will not be utilized as its intended use is for Media Specialist position. Therefore, the capabilities of educator are not able to be maximized by the district. | Country Local Schools | 1 | 0 to 30 days | \$36,000 |
| Summit | Urban Renewal | Redevelop urban and rural properties to improve real estate market and overall infrastructure in Summit County. The first phase of the project will focus on Akron area properties for rental purposes. This will establish a stream of revenue to support further investment. The second phase will bring in additional real properties to renovate and resell to the public. Third on my house. It is out of code, falling apart, possible mold. I do not qualify for this summit county rehab program do to not enough equity in my home. I have small children please help! I am looking for an additional building for soccer, lacrosse, baseball, and other sports for kid 4-17 years old. building to be steel and 100' w by 22' h long with height of 25' with an artificial grass surface. | Summit Urban Renewal | 5 | 91 to 180 days | \$2,350,000 |
| Summit | Housing Rehab | | Self | 1 | 31 to 90 days | \$30,000 |
| Summit | building addition | | NC Soccer Club | 10 | 31 to 90 days | \$1,000,000 |
| Summit | Waterproof buildings | Water in basement at three buildings. Will have to dig to foundation and redo drainage system. Just as the proliferation of websites in the 1990s required a phone directory, will almost every business having a website, it is time for a standardized website directory. | Waiko Properties | 8 | 31 to 90 days | \$57,500 |
| Summit | Website Directory for Greater Akron area | The creation of such a directory would lower emission levels, due to reduced need for Yellow Page distribution, frequently done by low-income drivers with older, polluting vans, reduced advertising costs to businesses, since they would no longer have to pay for multiple listings in multiple directories, reduced environmental waste, due to fewer trees being destroyed for phone directories that are thrown away, without even being used. AT&T is no longer distributing White pages in this area, for those same reasons, and businesses and the public, are tired of seeing Yellow page Directories. | Akronpages | 1 | 31 to 90 days | \$250,000 |
| Summit | Kuts family | \$30,000 to pay my student loans for my associate's degree I received in December 2008. Also, \$67,000 to pay off the mortgage for the house we live in. We have had for sale but more looked at the house in the time. It is a starter home and we cannot get loans at this time for starter homes. Or they're afraid to try. We have another house that we live in, we are not getting the money to pay off the house we live in, but the one we haven't lived in 2 years and cannot afford a whole second set of utilities and bills. My payments are anywhere. | Kuts Family | 1 | 0 to 30 days | \$97,000 |
| Summit | matthew | Facing a small business, business to help with my bills he is autistic and has epilepsy. I need help to support my life savings on medical bills and speech therapy and medical. I can be laid on all my bills and my wife has had lymphoma. From medical problems I would like to employ my son to work with me and ensure his future he is in my world and needs so much help. I would like to provide for his future I would use this money to buy equipment supplies and employ some other people help us God bless your wife. | elick | 10 | 0 to 30 days | \$25,000 |
| Summit | Hydrogen Cell Research | Research applicable to Hydrogen Fuel Cell improvements. Advances in improved efficiency, reduced size and weight, and new design anticipated. | WJWM Consulting LLC | 2 | 31 to 90 days | \$750,000 |
| Summit | SCHOOLS - " A NEW LEARNING ENVIRONMENT" | IN OUR EDUCATION SYSTEM TODAY WE BLAME THE STUDENTS, TEACHERS, PRINCIPAL, PARENTS, BUDGET, BOOKS, FOOD, PEER PRESSURE, SUPERINTENDENT, ETC. AND RIGHTFULLY SO FROM PRODUCING OR NOT PRODUCING GOOD STUDENTS THERE IS STILL ONE KEY INGREDIENT MISSING FROM THIS FORMULAR FOR PRODUCING GOOD STUDENTS. "YOU HAVE YOUR TROUBLE MAKERS WHOSE MAIN JOB IS TO WASTE ALL OF THE LIMITED VALUABLE TEACHING TIME. THEN YOU HAVE THOSE THAT DON'T CARE THEN YOU HAVE THOSE THAT SHOW UP FOR THE SOCIAL HOURS AND PARTIES. AND THEN YOU HAVE THOSE THAT SHOW UP TO LEARN BUT ARE HELD HOSTAGE BY OUR OUR 'AMERICAN SCHOOL, FERGUSON' (BULLY, THE BURNING IS DUMB AND NOT COOL, 'SNOWY' AND 'THE' I AM NOT GOING TO LET THE BRIGHT SHINE SO DO EVERYTHING IN MY POWER TO KEEP THERE LIGHT VERY DIM." MY SYSTEM HAS A LEARNIN PLAN FOR ALL KIDS AND THE "WANT TO LEARN ARE GIVEN PRIORITY AND A "CODE RED" WE CANNOT AS A NATION, STATE, CITY OR SCHOOL DISTRICT CONTINUE TO FAIL THESE "FUTURE LEADERS". | TRINITY INFORMATION SYSTEMS | 100 | 31 to 90 days | \$1,000,000 |
| Summit | he Technology Outreach Initiative | This program provides employment and training opportunities in information technology for college students. The program creates programs that allow participants to get on the job training and to work with mentors, business, and information technology professionals, performing the daily job functions for their respective role in developing and maintaining web-based software. Through consistent feedback from social, academic, and information technology professionals, participants learn to apply problem-solving and communication skills, and to transfer the project requirements to business objectives. A team of professionals will work with mild to moderate disabled students to create a customized plan that includes career counseling, mentoring, on the job training, and self awareness. At the end of the program, participants gain the confidence, social, communication and, problem solving skills required to maintain employment in information technology environment. Additional Benefits: Creating a new society of information workers, tapping into an untapped market, can increase the earning potential of a disabled citizen through self-awareness, education, and job training. | The Gift of IT | 10 | 91 to 180 days | \$100,000 |
| Summit | prevention and wellness health drink | Would like to move all bottling and packaging to Ohio, Summit county, this would also allow for a new product line and increased growth. The growth potential is mainly with different disease processes such as Alzheimer's, digestive problems, cancer, and preventative health maintenance, age 20 and have moved over 35 times since the age of 7 when my dad shot my brother. In the last 6 months alone I have moved 8 times. Just want a place to call home. please help my dream come true. | Haldi LLC | 15 | 0 to 30 days | \$100,000 |
| Summit | ny dream is to own a brick house | | home | 0 | 0 to 30 days | \$50,000 |
| Summit | Expansion | Our project is to purchase a new truck and some much needed equipment upgrades to assist us in expanding our business. This will give us the ability to take on significantly more new customers and give us the opportunity to pursue much larger contracts as well. By having a new truck and equipment, we can better focus our current capital on efforts to grow rather than trying to maintain the equipment that we are currently running. It will also give us the opportunity to potentially hire an another crew to assist. This program will allow us to purchase abandoned property to be renovated or demold for new construction. This program will allow us provide at least 4 units for low income residents in Akron. The program will last for 12-18 months. | Loyalty Lawn Care | 3 | 0 to 30 days | \$30,000 |
| Summit | Construct Akron | | Lab Ventures | 1 | 31 to 90 days | \$100,000 |
| Summit | Community square foot gardens | Working with the local government to find acceptable small areas, such as vacant lots, we would construct 4' X4' square foot gardens in which various vegetables and/or flowers will be grown. These would be maintained by community members, who would then receive access to fresh, organic vegetables at time of harvest. Surplus produce could also be sold at farmers market, which would in turn generate funds to increase the number of gardens. MOM AND GRANDMOTHER AND WOULD LIKE TO OWN MY OWN NURSING DEGREE. THE PROGRAM IS FULL TIME ON A YEAR. I CAN GET FINANCIAL AID FOR THE COURSE. BUT I NEED MONEY TO LIVE ON FOR THE YEAR. FOR 13,000 THAT INCLUDES RENT AND CAR PAYMENT FUNDS FOR THE YEAR. ONCE I ACHIEVE MY LPN CERTIFICATE, I WILL HAVE NO PROBLEM FINDING A JOB, AND SUPPORTING MY FAMILY. | Gardens of Giving | 10 | 0 to 30 days | \$50,000 |
| Summit | GETTING MY NURSING DEGREE | | INDIVIDUAL | 1 | 181 days or more | \$13,000 |
| Summit | Lowering the Risk for Falls in Older Adults | Our mission is to use smart tech to help older adults age in place. See our web site: www.boomercaretech.com. Our flagship product the Akon Pad is a generalist internet (Summa Health Akron OH) unique transfer device. It allows for self assisting by allowing the user to mimic the biomechanics of getting out of bed using the patented pivot push pull sequence of movements. Our device allows for lowering and controlling movements, fits with FDA safety guidelines for entertainment and has been safety tested. Nurses and caregivers love our product because it allows nurses to "spot" the patient instead of being their transfer device. Nurses and caregivers are not mechanically made to be a transfer device. We are currently supporting Area Agency on Aging programs that allow older adults with supports to live at home, to provide Continuing Education Programs that help case managers better utilize resources. We would love to be a part of a state wide initiative to support caregiver backs, help older clients self assist, and lower the risk of falls. Our product is marketed in Lodi, Ohio. We are all about doing the right thing in health care and the right thing in Ohio. Thanks. | BoomerCare Technologies | 30 | 0 to 30 days | \$500,000 |
| Summit | Akron Transit, Clean Fuels Ohio Partner | Existing Station in place, need funding for 5 new CNG buses, incremental cost of \$30,000 each less net tax credit. rehab homes, new homes, employment for those who are unemployed, skilled training for individuals without skills or who may be going into another employment field, senior citizen employment programs, youth mentoring and activities, family and individual counseling, financial education, homebuyers education, and support with food and clothing all right here in this community. | Clean Fuels Ohio | 7 | 0 to 30 days | \$150,000 |
| Summit | 2009 - 2013 Renew, Rebuild Upson Street Community | We have formulated a plan for current businesses in the community to receive substantial benefits from these programs and events. One of the ideas that we have put together, is bringing local businesses to the doors of each resident and letting them know that they have join forces with us to support the 2009 - 2013 Renew, Rebuild Upson Street Community Project and to turn individual and families will patronize the local businesses. The projected outcome of the Renew, Rebuild the Upson St. Community is to affect one community at a time working from the inside of the community out. Families that where impoverished would be self-sufficient and possible homeowners. | LINKS Community & Family Services | 15 | 0 to 30 days | \$70,000 |
| Summit | Advanced Patented Rubber Technology | Zee Dynamics Inc. has opened the door to a \$300 Billion Dollar Market potential. We are an entry stage green technology rich company founded in California in 2007. Our patented green technology has the market capability to impact the Tire Rubber Industry, Non-Tire Rubber sector, and the existing Zeolite market and will lead to US LPN NURSING DEGREE. THE PROGRAM IS FULL TIME ON A YEAR. I CAN GET FINANCIAL AID FOR THE COURSE. BUT I NEED MONEY TO LIVE ON FOR THE YEAR. FOR 13,000 THAT INCLUDES RENT AND CAR PAYMENT FUNDS FOR THE YEAR. ONCE I ACHIEVE MY LPN CERTIFICATE, I WILL HAVE NO PROBLEM FINDING A JOB, AND SUPPORTING MY FAMILY. Our mission is to use smart tech to help older adults age in place. DEVELOPMENT OF A PROTOTYPE FUEL CELL USING HIGH HEAT PLASTIC SCRAP GENERATED BY OHIO COMPANIES. 5. DEVELOPMENT OF VALVE SOLAR PANELS ON 50,000 SQ. FT. CORPORATE HEADQUARTERS FOR GENERATION OF ELECTRICITY. 6. FURTHER DEVELOPMENT OF SPECIALIZED MATERIALS FOR SPORTS WEAR, THE LASER-MARKING ADDITIVES, HIGH HEAT PLASTIC, CUSTOM COMPOUNDS. 7. PROVIDING ADDITIONAL JOB TRAINING OPPORTUNITIES FOR POLYMER TECHNOLOGY. 8. WE ARE CURRENTLY SEARCHING FOR A MANUFACTURING PARTNER TO MANUFACTURE OUR PRODUCTS TO INCREASE OUR PRODUCTION AND TO BE SUCCESSFUL IN THE MARKET. | ARTEMIS POLYMER PROCESSING, INC. | 15 | 0 to 30 days | \$1,000,000 |
| Summit | Successful Passage of School Districts Tax Levies | Save Money-The levy process is expensive, it is financially responsible to evoke a levy if a district has confidence of passage. Credibility-Districts that repeatedly campaign for schools loses its credibility, thus making their challenge harder the next year. Timing-Countless external factors influence voter behavior, other levies, economic conditions, employment rate, interest rate, basic employment, and countless other factors. Close-Has the district sold their community why the levy is needed, how specifically will it be used, how well has the district informed the community that they have been responsible with their current tax dollars, has the district communicated this to their entire community on an ongoing basis. This MCSB will support hundreds of adjustable factors to measure various degrees of confidence for levy passage, including adjustable taxes. The MCSB will be extremely complex, however, it will be very easy to use with many charts, graphics, and other tools for easy decision making. | Alumni Connection.com | 27 | 31 to 90 days | \$5,356,274 |
| Summit | Property Rehabilitation | To rehabilitate affordable housing. The repairs include new roof, new siding, tear out and replace driveway, new energy efficient heat pump, insulation (to keep costs to a minimum for tenants), replace basement windows with glass block windows, replace exterior and exterior lighting, replace plumbing that was stolen, update kitchen and bath areas, replace carpeting throughout, replace drywall in certain areas, replace energy efficient appliances. | Property Rentals | 6 | 0 to 30 days | \$70,000 |
| Summit | Dream Program | The Dream program is designed to provide decent affordable housing in Summit and Cuyahoga County for those who do not receive 80% of the median income guidelines. The program will consist of 2 HOME program Homeownership and Rental. The Homeownership program will allow us to purchase and renovate at least 3 units for resale or do a land contract up to 24 months. The Rental program will allow us to purchase and renovate 1-2 units for rental housing. Each of the programs will require each participant to do at least 20 hours of CHD counseling, first time homebuyer seminar, and a home maintenance seminar. The program will assist at least 2 persons in the Cuyahoga County. We would like to use the funds for acquisition of property, soft cost, affordability subsidy, and other eligible CHD program. The County will assist with a current contract and provide an affordability subsidy in County. The program will also allow us to help 200 persons for the Dream program. I have been diagnosed with multiple medical conditions, including degenerative joint disease, degenerative disk disease, arthritis, cystitis, hepatitis and depression. I am unable to work due to these illnesses and have been trying to get accepted to the medical program for a year and a half. It is imperative that I receive interferon treatments for at least one year at \$1500.00 per month for at least one year. I need these treatments in order to stop the progression on one disease, and in order to move forward with any other medical procedures. I need to have knee replacement surgery but cannot have that unless I can get my hepatitis C virus removed with these interferon treatments. We will assist in service coordinating and am only 44 years old. I feel like I am 64 and am in the most of the time. I need this financial help in order to pursue these medical treatments and hopefully have a better quality of life. I am sick of feeling sick all the time. Thank you for your consideration. You can even make the check payable to Dr. Verbeck at the MC at Summit healthcare. Again, thank you for considering my request. Sincerely, Robert A. Way | P.R.A.C., Inc | 2 | 0 to 30 days | \$200,000 |
| Summit | My medical treatment | I have been diagnosed with multiple medical conditions, including degenerative joint disease, degenerative disk disease, arthritis, cystitis, hepatitis and depression. I am unable to work due to these illnesses and have been trying to get accepted to the medical program for a year and a half. It is imperative that I receive interferon treatments for at least one year at \$1500.00 per month for at least one year. I need these treatments in order to stop the progression on one disease, and in order to move forward with any other medical procedures. I need to have knee replacement surgery but cannot have that unless I can get my hepatitis C virus removed with these interferon treatments. We will assist in service coordinating and am only 44 years old. I feel like I am 64 and am in the most of the time. I need this financial help in order to pursue these medical treatments and hopefully have a better quality of life. I am sick of feeling sick all the time. Thank you for your consideration. You can even make the check payable to Dr. Verbeck at the MC at Summit healthcare. Again, thank you for considering my request. Sincerely, Robert A. Way | My Health | 0 | 0 to 30 days | \$20,000 |
| Summit | Re-Hire and Maintain | Due to the current and expected decrease of federal and state funds, local foundations, and individual donors, BWS was forced to reexamine and produce a realistic adjusted budget. BWS was forced to layoff six employees from different direct service programs within Summit and Medina County. These positions are crucial to keeping up with the demand of services requested from the victims who enter our doors. As the only agency within Summit and Medina counties who are providing shelter and direct services to victims of domestic violence, it is imperative we have enough staff to accommodate their needs. Increased staff responsibilities are being done without compensation, actually with less money than before. In addition to the layoffs, the entire staff took a 7% pay cut effective March 1, 2009. Retaining and asking employees will increase staff retention and enhance individual victim service. To reorganize business that was devastated by recession. To retain workers in the field of office equipment repair and sales. Long term 12-18 months create 25-50 jobs. | Battered Women's Shelter | 8 | 0 to 30 days | \$204,680 |
| Summit | USA Office Solutions Retraining | Increased staff responsibilities are being done without compensation, actually with less money than before. | Summit | Lot acquisition and renovation | We are looking to acquire the property @ 1750 E Waterloo Rd and renovate it to help the development in our Akron Neighborhood. We need renovations to the buildings and major renovations to the lot. These renovations will improve my workers in the construction business and the excavating field. This will also improve the property value and appearance of the surrounding area. The lot will need drainage and backing to the lot. We will update all the furnace and hot water tanks to be more energy efficient and environmentally friendly. | Mickunas properties | 10 | 181 days or more | \$1,900,000 |
| Summit | Employment growth Plan | We are a trailer sales and service dealership who is looking to stabilize current operations as well as creating an expansion. This expansion will allow us to retain several workers as well as hire new employees that will work on site and offsite helping other businesses across the products and services that are viable to their success. We will be able to go to various businesses and service their equipment on site, allowing them to be more efficient as well. We will also be able to offer more competitive new equipment to these businesses saving money for them. They will then have more capital to hire workers. This project will be based in Akron, with a satellite base in Canton. We will assist in service coordinating and am only 44 years old. I feel like I am 64 and am in the most of the time. I need this financial help in order to pursue these medical treatments and hopefully have a better quality of life. I am sick of feeling sick all the time. Thank you for your consideration. You can even make the check payable to Dr. Verbeck at the MC at Summit healthcare. Again, thank you for considering my request. Sincerely, Robert A. Way | Mickunas LLC dba Majestic Trailer & Hitch | 12 | 31 to 90 days | \$1,300,000 |
| Summit | manicured lawns and hedges of pride | I have been in the landscape business for 15 years in need of new equipment and can hire 15 people to assist me in this field. I am a 57 year old woman and have done business since I was 15 with a grant I could have a real business with the ability to hire others if I could have 1 yr to prove myself a success while employing others I can and will expand from contracted. I will be able to explain most already have those other people whom I can count on to employ, and am sure I can find several others. I have done more to say and if contacted I can explain better my intentions. Thanks none. | lawncare specialist- | 15 | 0 to 30 days | \$25,000 |
| Summit | Tutoring | Tutoring for High School students. First teaching how to study and developing good study habits. Tutoring in math and reading and homework help. Students grade will increase atleast one letter grade. This will build self confidence. Partnering with coaches to mandate athletes to attend these sessions. Coaches will not have to sit down half of their team when games come out due to helpfully. 60-90 school year high school seniors lost players because of grades a couple school credit have a team after grades posted. Coaches wouldn't lose players to the grades. Individual and group sessions, communication between teachers and tutors. This will help on each student along with test given to see progress of each student. All information will be kept on file and documented. Transportation will be given to students who do not have a way to and from tutoring. Healthy snack given during weekly session, healthy breakfast on Saturday morning for those who do not make weekly session. Help with all state testing required for high school students. | POY-(Preparing Our Youth) | 35 | 0 to 30 days | \$75,000 |
| Summit | Business expansion to provide 5 jobs to local seam | Expanded display workroom and addition of 8 industrial sewing machines. Education and training on these machines, designed to make employees qualified to work on supervised projects for clients. I am a single mother of four children and have been able to provide for my family for 18 years through my skills as a seamstress and designer. I would like to expand my business and train others to sew and install commercial and residential window treatments. Sewing is a dying art and I can train others with the skills they need to provide a living for themselves. | Curtain connection | 7 | 0 to 30 days | \$100,000 |
| Summit | Investment Partnerships-Neighborhood Stability Ini | This is a modification of two earlier projects I submitted. My proposal now includes two programs the second is the Federal backed ENERGY EFFICIENCY HOLDINGS RETROFIT. About a year ago and I can train others with the skills they need to provide a living for themselves. This is a modification of two earlier projects I submitted. My proposal now includes two programs the second is the Federal backed ENERGY EFFICIENCY HOLDINGS RETROFIT. About a year ago and I can train others with the skills they need to provide a living for themselves. The additional money requested for solar energy or wind turbine installation training and certification for 4 to 5 students of employees only to take advantage of another program making government buildings in my area more energy efficient. Transportation, libraries, schools etc. as a minority business owner is a priority and difficult community (I extremely delighted with the chance to help so many carpenters, electricians, painters, general contractors & plumbers go back to work in the areas I grew up in and still love, zip codes 44307, 44302, 44300, 44306, 44310. Thank you and hope and pray to hear from you soon. Respect D Eggleston | Portage Line Properties LLC | 50 | 181 days or more | \$500,000 |
| Summit | A Home off Our Own | We are requesting for the 25,000 grant to do the major repairs to our home and to pay down some of our bills. The repairs which are severely needed have been affecting our health. Our children have been getting sick more since we moved here. The basement floods when it rains or snows. The basement needs extra grading from the front side to the stairs. It also needs to be sealed like the stairs and side. The second also comes up for the floor in the back room. The electricity setup also needs to be up dated. It could become a fire hazard if not addressed soon. This winter our heat was up as high as it could go and we still need coats, hats, gloves, and blankets to stay warm. I was hurt! The house also needs to be insulated. As well as new windows put in. The siding on the house is falling off because it is so old. There are other repairs like wall being moldy, dry walling and painting to be done. | A Home Off Our Own | 5 | 0 to 30 days | \$25,000 |
| Summit | Reclaim The Neighborhood | Willard United Church of Christ has been located at 742 Jefferson Street, Akron Ohio since 1914. The Church depends on street parking for all activities and at times have some use of a business across the street when they are not working. If the weather is hot and a parking lot is being used by the city we have no parking area. The Church runs a food pantry three times a month and on those days parking is a high problem. Next to the Church is numerous boarded up vacant condemned buildings. The Church would like to have the funds to purchase the buildings to have their own parking lot and use some of this land for a community park and picnic area. If possible we would like the funds to purchase some of the boarded homes near the Church fix them up to rent. This project will remove and replace approximately 7,000 square feet of roofing membrane. The existing roof is currently leaking and has inadequate insulation. A new membrane and insulation with a R-22 insulating factor is to be placed. | Willard United Church of Christ | 0 | 31 to 90 days | \$400,000 |
| Summit | Building 56 roof replacement | This project will remove and replace approximately 7,000 square feet of roofing membrane. The existing roof is currently leaking and has inadequate insulation. A new membrane and insulation with a R-22 insulating factor is to be placed. | The Babcock and Wilcox Company | 0 | 31 to 90 days | \$65,000 |
| Summit | Home Energy Management Demonstration Project with | Juice Technologies LLC would like to undertake a demonstration project with First Energy to prove the concept of smart grid and home energy management in and around the Akron area. This project would encompass 10,000 homes and enable the various owners to monitor and control the energy usage through Plug Smart Home energy management devices. Juice Technologies LLC is requesting that funding be provided to manufacture and install the Plug Smart Home energy management systems and Plug Smart Programmable Communicating Thermostats into the homes of the consumers that sign up for the First Energy pilot project. The Plug Smart Home can be manufactured in Ohio and provide for additional skilled labor jobs at the contract manufacturing location. This demonstration project will be a proving ground for mass roll out of home energy management in Akron and will help address the need to reduce peak energy loads on the power grid. | Juice Technologies | 8 | 91 to 180 days | \$250,000 |

| Summit | community development | My project will include rehabilitation of my home. Due to the housing crisis, my home has plummeted in value and makes home improvements for me required money at times. My neighborhood, which I have lived in for nearly 20 years is in a downward spiral but I will stay and hope that my efforts and the efforts of others will help our community come again be a place that we are proud to live in. I cannot afford repairs and updates that my home needs and request these funds to improve not only my family home, but also the community. | n/a | 1 | 31 to 90 days | \$20,000 |
| Summit | Computer Replacement | We propose to replace 12,000 obsolete computers in student classrooms, and computer labs, where the average age is 9 years old. Computer technology affects all aspects of the educational process, from the exponential growth of knowledge to be stored and accessed, to the use of distance learning, streaming video, multimedia, and other social networking applications. The reliance on technology requires that the district continue to address the rapid development and obsolescence of computer hardware. The district has developed a "shovel ready" plan to replace student computing equipment. The goal of the plan is to ensure that the appropriate computing resources are available in classrooms and computer labs, promote uniformity of technology levels within school buildings, and expedite the disposal of outdated equipment. This project will require up to \$70,000,000 to complete. The infusion of funds from the American Recovery and Reinvestment Act of 2009 will allow us to immediately replace obsolete equipment and assist the district in implementing 21st Century Learning. We propose to increase the network bandwidth of our school buildings. In 2009, the district established a network that would provide access to schools in the district, linking classrooms to each other and the Internet, while providing access to data, video conferencing, email and other educational resources for students, teachers, and administrators. The network also serves as the principal communications mechanism to request responses to report instructional and administrative information. Utilization of the network continues to increase as general user demand grows and the district implements new software applications that require more network bandwidth. This increased usage has exhausted the capacity of the 9 year old network. Although some upgrades have been implemented, what is clear is that the bandwidth needs of the district are rapidly increasing far beyond what was originally envisioned. In order to address the need for additional bandwidth, the recommendation is to connect school buildings network to 10Gbps fiber service. This is a "shovel ready" project that is ready to be implemented. Utilization of the network continues to increase as general user demand grows and the district implements new software applications that require more network bandwidth. This increased usage has exhausted the capacity of the 9 year old network. Although some upgrades have been implemented, what is clear is that the bandwidth needs of the district are rapidly increasing far beyond what was originally envisioned. In order to address the need for additional bandwidth, the recommendation is to connect school buildings network to 10Gbps fiber service. This is a "shovel ready" project that is ready to be implemented. Implementation of a data management system that uses a cadre of programmers for data management, extraction, and analysis. This necessity limits access to the data and increases the time to conduct analysis and dissemination of critical student and financial data. The goal of the system also means more maintenance requirements that impact the availability of data. The implementation of a Data Management System is a "shovel ready" project already underway. We will have proposals from vendors by the end of March 2009. This project will require up to \$3,500,000 of scarce district funds. An infusion of funds from the American Recovery and Reinvestment Act of 2009 will allow us to complete this replacement project without negatively impacting the financial status of classrooms. Districts. A modern management system will dramatically increase the responsiveness of the district to student requirements, and allow us to respond to state-mandated EMS reporting requirements. The implementation of a videoconferencing program that has a very positive impact on student achievement. The district has documentation to show the increase in student performance attributed to distance learning and videoconferencing. This program was closed because funding was not available to maintain content provider support, technical support of the videoconferencing units in classrooms, and the district infrastructure needed to support videoconferencing. This is a "shovel ready" project that is already in process of being reconstructed, although on a much smaller scale. We have already identified equipment and vendors that will provide most advanced equipment to a very limited number of classrooms. The infusion of funds from the American Recovery and Reinvestment Act of 2009 will allow us to immediately and dramatically increase the scale of the program and impact many more school buildings and students. | Akron Public Schools | 86 | 0 to 30 days | \$8,000,000 |
| Summit | Increase Network Bandwidth | Utilization of the network continues to increase as general user demand grows and the district implements new software applications that require more network bandwidth. This increased usage has exhausted the capacity of the 9 year old network. Although some upgrades have been implemented, what is clear is that the bandwidth needs of the district are rapidly increasing far beyond what was originally envisioned. In order to address the need for additional bandwidth, the recommendation is to connect school buildings network to 10Gbps fiber service. The infusion of funds from the American Recovery and Reinvestment Act of 2009 will allow us to immediately and dramatically increase the scale of the program and impact many more school buildings and students. | Akron Public Schools | 28 | 0 to 30 days | \$400,000 |
| Summit | Timken Engineering Center | Timken Engineering Center - 35,000 of building. To support job training in aerospace, automotive, and energy industries, the Timken Fab of Canton will reach Univ. of Akron (UA) money towards the cost of a new building, thus creating a model partnership that enhances the capacity of UA to train for high growth industry defined competencies. Timken - a current leader in automotive mfg. has strategically identified new revenue growth areas as materials science, aerospace, and power transmission (e.g. wind energy). Current UA programs, as well as new degrees in aerospace systems and in computer engineering, being launched in 2009, will train the pipeline of youth for advanced industry with internships for developing career leaders. The UA College of Engineering has 1925 undergrads due to 40% enrollment growth 2004-2008 (4th fastest growing engineering college in USA). More campus capacity is critically needed. The new space will enable the College to meet enrollment demands, per Workforce Investment Act training goals. 90% of students come from OH and 80% of graduates stay in OH. Located on UA campus, the planned three story glass and brick structure next to the Gas Turbine 1. "Learning anytime anywhere" is a phrase that educators hear over and over. However, what does that really mean for those school systems who do not have the funding or personnel to implement such exciting opportunities for students? The Recovery Plan can make those words mean something to the students of Coventry Township. Coventry is currently facing a real state of affairs. Recently, we have been greatly impacted by an over-night funding crisis. As a result, our district is in the process of reducing positions and eliminating programs. One of the hardest hit areas will be our district's technology programs. The CULP will allow us to develop ongoing technology programs for our twenty-first century learners. The project will accomplish: hire and maintain teachers to develop and deliver online courses that meet the needs of our students and prepare them for a global economy; offer our brightest students access to learning that is cutting-edge and cannot be maintained and barrier with different technology systems to host the program. In addition, provide each needy child and family who takes advantage of CULP a laptop to access the course anytime, anywhere. Outcome would produce better and faster yield of reclaimed oil. This will help manufacturers to reclaim oil instead of buying new oil. New oil is made from re-refined crude oil. Oil reclamation helps cut back on the amount of dependency by Ohio manufacturers on crude oil. This plan will help eliminate the need to burn oil for fuel which will cut back on emissions of the atmosphere by manufacturing facilities. This plan will be maintained by the development of this project: technology support personnel, a facilities, maintenance team, construction workers, electricians, architects and educators. The economy will be positively impacted through the following: the need to purchase the technology including infrastructure devices and equipment, renovation materials and supplies, and classroom resources from digital devices to furniture. | The University of Akron | 1,000 | 31 to 90 days | \$5,000,000 |
| Summit | Online Learning Project | "Learning anytime anywhere" is a phrase that educators hear over and over. | Summit | Green Housing | Approximately 5,000 feet of new sewer trunk line. Needs to replace septic systems that are either failing or will soon fail. Installation of new energy efficient windows and insulate exterior walls in a 18 year old house. These improvements will save to 50% off the total amount of gas and electric energy that is currently being consumed. | RG53 | 31 | 0 to 30 days | \$600,914 |
| Summit | Sewer Line | Approximately 5,000 feet of new sewer trunk line. Needs to replace septic systems that are either failing or will soon fail. Installation of new energy efficient windows and insulate exterior walls in a 18 year old house. These improvements will save to 50% off the total amount of gas and electric energy that is currently being consumed. | Boston Township | 10 | 91 to 180 days | \$5,000,000 |
| Summit | To make my residence more energy efficient | Installation of new energy efficient windows and insulate exterior walls in a 18 year old house. These improvements will save to 50% off the total amount of gas and electric energy that is currently being consumed. | Home Improvement | 5 | 91 to 180 days | \$30,000 |
| Summit | Felons Employment Opportunity | Train inmates and anyone needing employment to become proficient in residential lead and mold abatement. Work toward becoming union members. Pay for classes to become registered in lead and mold abatement. Purchase necessary equipment to perform abatement, employees protection equipment, etc. | Felons for Hire | 100 | 0 to 30 days | \$1,500,000 |
| Summit | Principles of Computer Application Development - O | This project is a statewide initiative to educate middle school students on the development of computer applications, web sites, electronic devices and other digital systems. In order for Ohio to have a globally competitive workforce, students need to learn about OCE/IT/HD computer systems, not just USING computer systems. College enrollment in computer science continues to decline. Students must be exposed to and become active about computer science before high school. The program is designed to teach the fundamental principles with interactive activities that DO NOT require students to have access to computers. This allows for the program to be widely implemented. The program includes course materials as well as traveling computers. | Hilltop Towers Middle | 25 | 181 days or more | \$5,325,000 |

| Summit | Training Ohio Business Owners to Market their Busi | Small business owners are being an opportunity to reach a wider audience by not adopting proven Internet strategies and tools. Most are confused on how they could use the Internet to expand their business. If our businesses are to be competitive and grow, they will need to learn how to expand out of our local region to compete with companies regionally and nationwide. We'll put on a series of meetings in person and online that will provide free guidance and advice for businesses to help them use the latest Internet marketing techniques and tools to expand their business. This program will require our firm to hire additional people to train business owners. We will also work with local colleges to hire interns to help implement the Internet business strategies for businesses. We will also work with the local SCORE offices. | Internet Strategies Group | 12 | 31 to 90 days | \$479,500 |
| Summit | Youth in Transition | The Youth in Transition provides at-risk high school youth who are limited English speaking or are immigrants and engages with intensive career development support and academic mentoring so they can achieve personal and academic success. YIT includes a small-business simulation to help youth better understand the real world. The project will serve 40 youth who currently working or is seeking work. | Asian Services in Action, Inc. | 40 | 31 to 90 days | \$75,000 |
| Summit | White Pond office park roadway | new green roadway into a office park | City of akron | 45 | 31 to 90 days | \$2,500,000 |
| Summit | Ohio State Thermal Scan | Our goal is to provide affordable home thermal imaging service to the public in an effort to reduce consumer energy waste. We plan on offering a normal scope and heat loss evaluation package for \$99. By offering this service to property owners and residents at an affordable price, we feel we can make a substantial impact on the gross energy loss within this region. Our service will provide a detailed analysis of the specific needs of each individual residence and provide recommendations on ways to reduce energy costs by pointing out insulation deficiencies and other areas of heat loss. With the proper funding, we feel we can help at least 25,000 homeowners in the next two years to reduce their energy use. The funding we are requesting will be used for the lease and purchase of equipment, the hiring and training of technicians, and the advertising of our low cost service. The gross energy savings for residents who use our service to help them to properly weatherize their homes should be quite significant. 6,000 Square Foot retail space rental. Purchase of store fixtures such as "green" lighting, cash register, display racks Etc. Purchase of goods to retail. Such as several HDTVs, DVD players, Blu Ray players, wiring, speakers and much more to support the retail efforts of this home entertainment store. 12 foot long by 6 foot tall store sign. Also, this money will give my partner and I the opportunity to hire 2 additional people on a full time basis to do different activities such as sales, stocking, home installation and remodeling. Our company strives to provide a level of customer service to Northern Ohio consumers that they are not offered by the huge retail outlets. We believe that home theater is an outstanding way for people to relax after a long day of work or a break from the monotony of their everyday lives. We feel that there is more than a desire for home theater but rather a need, and it is our intent to offer it on a level that is more affordable, more enjoyable and more service oriented than ever before. We also plan to work with our local communities to purchase and distribute sporting goods to disadvantaged youth that otherwise would not be able to afford them. | Ohio State Thermal Scan | 25 | 91 to 180 days | \$500,000 |
| Summit | Locally Owned Home Theater Store | | SCC Home Theater | 3 | 31 to 90 days | \$200,000 |
| Summit | HOMEOWNERS CLUELESS?? - ENERGY & DOLLARS LOSS THRU | HOMEOWNERS ARE CLUELESS WHEN IT COMES TO THE AMOUNT OF ENERGY LOST AND THE AMOUNT OF MONEY LEAVING THEIR HOME. IN OHIO ALMOST 1,000,000 HOMES ACCOUNT FOR A LARGE SHARE OF THE ENERGY LOSS EACH YEAR. ESPECIALLY DURING THE WINTER MONTHS AND THE HOTTEST SUMMER SEASON. 40 - 50% OF THESE HOMES ARE OLDER THAN 1980 BEFORE THE WHICH MEANS VERY LITTLE ENERGY CONSERVATION. WITH OUR PROGRAM WE ASSIST SENIORS WHO ARE NOT EVEN AWARE OF THE GREAT LOSS OR HOW TO REDUCE THEIR POOR ENERGY MANAGEMENT. AS A NATION WE CANNOT AFFORD TO CONTINUE OUR INEFFICIENT USE OF NON RENEWABLE ENERGY RESOURCES. WE ARE PROTECTING LARGE AND LARGE ENERGY SAVING ENERGY CONSERVATION PROGRAM. OUR PROGRAM EDUCATES THE PUBLIC AND CONVERTS ENERGY LOSS AND DOLLARS LOSS INTO SIMPLE TERMS THAT THEY CAN UNDERSTAND AND APPRECIATE. | TRINITY INFORMATION SYSTEM | 100 | 31 to 90 days | \$1,000,000 |
| Summit | BARNETT WATER RETENTION | CONSTRUCT A RETENTION POND DIRECTLY ADJACENT TO A DEDICATED WET LANDS THAT DRAINS INTO THE TUSCARAWAS WATERSHED. WATER DRAINS FROM THE STREET (MAPLE GROVE CHURCH) IN A CULVERT SYSTEM POND WOULD PREVENT SPLITING OF THE WET LANDS. HOLD BACK WATER, IMPROVE WILDLIFE HABITAT, AND PROVIDE WATER FOR FIRE FIGHTING. | DNA | 3 | 31 to 90 days | \$38,000 |
| Summit | Summit County Children's Services Visitation Centre | Build a new visitation center for Summit County Children Services for the purpose of providing enhanced visitation services to families whose children have been removed for protective reasons. The purpose of the center is to decrease the length of time children remain in out-of-home care, and expedite their reunification with their parents. 22 staff members work in the center. These funds will be used to build a new center the initial plans for which already exist. It will replace a 50 year old facility and provide resources to the agency that could prevent the layoff of an equal number of staff during the period of the current levy which ends in 2015. | Summit County Children's Services | 23 | 31 to 90 days | \$1,200,000 |
| Summit | Property Value Increase | Replace Kitchen appliances, Replace furnace and A/C | Lillian Group | 2 | 31 to 90 days | \$30,000 |
| Summit | AUL Minority Business Development Programs (MBDC, | The Minority Development Business Program at the Akron Urban League is comprised of three departments: (1) MBDC (Minority Business Development Center) - which works primarily with individuals that own a small start-up; (2) The IMBDO (Minority Business Development Organization) which serves larger, more established minority businesses in their effort to expand, establish procurement and supplier relationships with major corporations or government contracts; and assists with obtaining required certifications. The MBDC, in collaboration with the Greater Akron Chamber, also helps majority corporations with their supplier diversity efforts. (3) The PMBA (Partnership for Minority Business Accelerator) which offers a business accelerator program to African-American and Hispanic business owners. Services include customized, business development strategies, management assistance, and assistance in securing business loans. | Akron Urban League | 300 | 181 days or more | \$588,785 |
| Summit | Assisting Children in Transition | The Akron Urban League, established in 1925, determined that it was necessary to provide technical assistance to entrepreneurs in 2005. This vision was realized with the addition of the MBDC, collaborators with the Ohio Department of Development and community partners. The program has been designed to provide children with options and alternatives to a detrimental lifestyle and provide encouraging role models to help them recognize their worth. The key areas where ACT expects to become a positive influence on the children include: Environment - by offering a nurturing alternative environment where children are safe to express themselves without fear of neglect or retribution. Education - by providing tutoring and enrichment and homework assistance. Efficacy - The program address how these children see themselves. It is important to improve the child's self image while showing them that there are ways to create a positive lifestyle that anyone would be proud to lead. Personal Growth - The program seeks to increase each child's sense of self worth, social and emotional competency, stability, hope in the future, external support, as well as their overall ability and motivation to make positive choices and decisions about their future. | Akron Urban League | 5 | 181 days or more | \$32,500 |
| Summit | Ohio Recovery Photo-Essay Project | The objective of this economic stimulus project is to provide work opportunities for Ohio photographers, graphic artists, writers, project staff and related businesses. The photo-essay would focus primarily on Ohio economic recovery related projects. Creative approaches would be taken in gathering and presenting information specific to each initiative. These include, by example, photographs accompanying text, graphic depictions and high definition video clips. Various photographers would be employed on an as-needed basis throughout the state to follow said projects. Core staff would be employed to curate, process and coordinate the presentation of material produced. As projects move forward, the work would be presented to the public in a variety of ways, including website and traveling fine art installations. Staff would be available to discuss and to conduct formal presentations. In addition to providing employment opportunities for various Ohio-based persons and much needed financial stimuli to local businesses, the photo-essay would comprehensively document the historical efforts being made to revive the economy in Ohio. An immediate start is essential to be successful. | Millworks Gallery, Inc | 14 | 0 to 30 days | \$1,150,000 |
| Summit | After School Enrichment Program | The Akron Urban League After School Enrichment Program is designed specifically to provide an educational and enriching program for children during those critical hours immediately after school. The program provides homework assistance, tutoring, and culturally rich experiences to build the social interaction, character, and leadership skills of all participants. The Akron Urban League After School Enrichment Program is unique in that it operates five (5) days per week between 3pm - 7pm in accordance with Akron Public Schools calendar. The Akron Urban League After School Enrichment Program allows children to participate in safe and supervised activities during after school hours. The primary purpose of the After School Enrichment Program is to provide tutoring instruction and homework assistance to students who need and to provide enrichment activities for all children in the program. Youth aged 6-12 attending the Akron Urban League program will gain a greater understanding and respect of diversity as our curriculum promotes diversity as a source of strength, as opposed to a divisive force. Children are better socialized, do better in school with their work and behavior. | Akron Urban League | 15 | 181 days or more | \$58,183 |
| Summit | School's In - Youth GED Preparation and Job Traini | The School's In Program is an all encompassing alternative education program. The program provides students with educational preparation to take the State of Ohio GED test, employment readiness, employment placement, mentoring, and follow up services. The School's In Program has a long history in Akron of providing these types of services to students who are habitually absent from the public school system. The collaboration with Akron Public Schools has provided the Urban League the opportunity to identify students eligible for a withdrawal from traditional school to attend the program. Students enrolled in the School's In Program are provided with both paid and unpaid work experience. Paid work experience is provided during the summer months as well as year round. The Workforce Development department of the Akron Urban League works with students to assist them with job placement for paid work experience. Unpaid work experience is sought out in the form of community service projects and volunteer work. The Urban League through case management provides follow up services (phone/employment visits) for 12 months after a student completes this programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Akron Urban League | 100 | 31 to 90 days | \$178,440 |
| Summit | Wills Trucking Co, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Summit | 1 Nation Logistics, Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 31 to 90 days | \$713,250 |
| Summit | PSC Metals, Cummins Bridgeway, Clean Fuels Ohio Pa | In order to accomplish this goal we are seeking resources for 20 anti idling units for tractors, 100 anti idling units, CHD conversion for 25 vehicles. | Clean Fuels Ohio | 5 | 0 to 30 days | \$80,000 |
| Summit | Karvo Paving, Cummins Bridgeway, Clean Fuels Ohio | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a scrap handler. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 8 | 0 to 30 days | \$150,000 |
| Summit | Davey Tree Expert Company, Cummins Bridgeway, Clea | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering 30 pieces of equipment and modifying vintage trucks. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 20 | 0 to 30 days | \$500,000 |
| Summit | Technology Integration /Profession Development | Assist school districts with technology implementation including new computers and software programs to help with our Special Education, Gifted and at-risk programs. Create professional development opportunities for all staff to integrate technology into the curriculum using community resources, on-line resources and other programs demonstrating ways to help differentiate learning to all learners. Provide 150 new computers to teachers to be used in the classroom. Provide the latest software programs including Office 07, Skills Tutor, Pro-Ohio, Study Island, etc. so teachers have access to these programs in their classrooms. Our current Free and Reduced Lunch rate is 57%. | Coventry Local Schools | 10 | 91 to 180 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Summit | Misdemeanant Secure Halfway House Facility | The Misdemeanant Secure Halfway House Facility (MSHF) pilot program will provide targeted evidence-based practices to treat the growing population of chronic misdemeanor offenders who typically become repeat felony offenders without comprehensive, court-ordered rehabilitation services and treatment. The mission of the MSHF is to provide cost-effective, comprehensive intervention before such offenders become greater risks to public safety and place more crowded state correctional facilities. MSHF would allow Akron, Eastman, and Summit Municipal Courts the ability to confine, control and reintegrate the chronic misdemeanor offender and make more efficient use of the very limited jail beds for the confinement of more serious felony offenders. This program is designed to assist an offender's re-entry into the community through a process of assessment, intervention, treatment and supervision. The building will be locked and offender's access to the community limited. Programming includes a confinement/assessment period of 30 days progressing into a full range of programming/services. This facility would provide 75-125 beds for this population. | Oriana House Inc. | 45 | 91 to 180 days | \$900,000 |
| Summit | Employment Preservation | This request for project funding is for preserving the jobs of 120 people, most of whom are currently on layoff due to the economic conditions in the automobile industry. The Company produces stamped and welded assemblies used by the US military and automotive industry. Personnel have been laid off beginning in November 2008 due to the economic downturn. The Company expects to reach its full production level as business volume increases and the economy recovers. The Company faces the challenge of surviving until the economy recovers and the funding would be used to help retain retaining employees and pay suppliers. | Hamlin Steel Products, LLC | 120 | 0 to 30 days | \$700,000 |
| Summit | Comet Lake Dam Modification ODNR File# 0714-003 | Modifications and repairs to existing Comet Lake Dam. The structure is 25 ft high and 240 ft long with a concrete roadway. The Ohio Dept of Natural Resources has requested the dam from a class 3 to a class 1 HIGH HAZARD category. FILE# 0714-003. due to insufficient capacity to pass the design flood. This will require increasing spillway capacity, armor the entire earthen dam with Roller Compacted Concrete. The design of modification and repairs for this project was done by URS Corporation. Outcome is to meet ODNR Class 1 dam requirements. | Comet Lake Club (aka Family Home Owners Assoc) | 100 | 181 days or more | \$500,000 |
| Summit | Shared Financial Services | Provision of financial services in 2009 for at least 10 small to mid-sized nonprofit organizations through a shared accountant/bookkeeper. Services include all bookkeeping functions, payroll, development of financial reports for board and management, bulk purchasing of related supplies and equipment. Services are intended to reduce unnecessary administrative accounting personnel in smaller agencies, increase compliance through use of qualified personnel and training of management and board; improve understanding and accountability of nonprofit boards and staff regarding financial requirements and transparency. | Center for Nonprofit Excellence | 6 | 0 to 30 days | \$100,000 |
| Summit | reuse akron univ. rubber bowl | to purchase akron iv rubber bowl and reuse it for use as year round baseball/softball soccer football game and practice field house. | indoor sports | 10 | 181 days or more | \$10,000,000 |
| Summit | Soundproof wall | I'm writing with a request/question for the use of the Stimulus money. My neighborhood has a peculiar situation and I think Federal help could possibly be the only way to solve it. Our problem is noise and odors coming from a metal recycling facility. It is so large, it runs the span of four of our yards, but can be heard in the next development north of us and the next cross street south of our neighborhood. It sits only 120 feet from my back yard and the noise is unbearable to anybody that does. There are crates, scraping, sawing and dumping...meat on me...every day long. It's like ferrets on a chaffboard. The decibel levels sometimes reach 80 decibels. We neighbors are all united on this subject and are going to the city to complain. The city did go to bat for us and asked the company for violating the city code (about disturbing residential areas). However, when it came to settling the case, they fell short and only got the company to quit seeing some trailers outside. I'm sure they don't want to get into any legal battles...not to mention the company pays more taxes than we do. However, this was only a small portion of the noise and odors address the other problem. Not only is the noise causing mental anguish, but studies have shown detrimental effects of loud noise exposure. Some of these headaches are: sleeplessness, irritability, hypertension, and heart disease. This will be accompanied with the field-based data for America's Graduates (AG) model for program services in coordination with youth cultural competency curriculum and other employment outcomes. JOG specializes in working directly with at-risk, low income youth that are basic skill deficient, at-risk of not graduating and/or have dropped out of the educational system. Our proven eighty-one (81) competency work readiness curriculum is individualized to client needs while assisting the youth to graduate, by improving basic skills, providing financially literate and realistic career and training advice to achieve career ambitions. JOG will present clients for transition from school-to-career through a twelve month intensive program that delivers life skills, communication, and job readiness training while exposing individuals to multiple careers through our work experience opportunities. 90% graduation rate and over an 80 percent job placement rate is expected. | neighborhood group | 15 | 0 to 30 days | \$100,000 |

| Summit | Youth Employment Program for Dropouts and Re-entry | Youth Employment program focusing on GED and Diploma attainment, Job Preparedness, paid work experiences and job placement serving 150 dropouts and/or youth offenders. Training opportunities leading to self-sufficiency employment opportunities is the focus of this program for those youth that are considered the most at-risk of graduating and/or attaining employment opportunities. We have extensive experience and proven positive outcomes when working with these program participants and have in place several community based collaborations to aide our clients in a positive transition to the workforce. This program is NOT scheduled to be renewed for 2008-2010 program year. It is currently being funded by the Governor's office and his YEPR initiative. | Tri-County JOG | 100 | 0 to 30 days | \$350,000 |
| Summit | Energy Star Rated Homes | Habitat for Humanity places Energy Star appliances in every home built in the county. Whirlpool refrigerators, stoves, washers, and dryers are all included in each home built. Additionally, energy efficient light bulbs are installed in all light fixtures. 80% efficient kitchen, tankless hot water heaters, and other Energy Star guidelines are complied with in new construction. Habitat has had a large current inventory of Energy Star appliances for construction program and every home is rated by an independent Energy Star certified technician and we receive the Energy Star paperwork on all homes built. If families choose garbage disposals and dishwashers for their homes those items are also purchased by Habitat under the Energy Star appliance program. | Habitat for Humanity of Summit County Inc. | 13 | 31 to 90 days | \$50,000 |
| Summit | Capital Campaign - A Home Of Our Own | This project is a capital campaign for the Habitat affiliate in Summit County to expand its operations under one roof. The site purchased at 2301 Riving Rd. in the Rolling Acres Mill area. The mill recently closed and much of the property in the area has been in decline. The building has purchased across the street will help to stabilize the neighborhood. The interior renovations to the facility will be Energy Star standard and utilize green building methods to house our operations, pre-fabrication construction of house wall panels, door headers, and stairs, and our Habitat ReStore. The ReStore is a retail store open to the public that sells new and gently used donated building materials, home furnishings, appliances, and supplies at a discount price. The dollars generated from the sales at the ReStore are returned to the affiliate to build more homes. The new facility we anticipate our home construction group to build between 10-15 homes per year in Summit County. The ReStore will expand the amount of sales floor space from 11,700 to 25,000. The stimulus grant would provide funds to assist with the installation of Energy Star building materials in the renovation. | Habitat for Humanity of Summit County Inc. | 13 | 31 to 90 days | \$125,000 |
| Summit | GED Fast Track Plus | GED Fast Track Plus is a six week workshop that will help adults pass their GED quickly and effectively transition to the postsecondary education and vocational training arena. The workshop will help adult students move beyond the skills needed to pass the GED to skills needed to successfully complete college or other vocational training. The GED Fast Track Plus is not a test. A quick fast track GED program with a career and college readiness component to help adult students transition back into the workforce quickly. By providing adults with the educational skills, the program will help them to make a more positive transition into the workforce and gain employment. The program will be implemented in the district by adding 5 social workers, 3 para-professional nurses, a Project Leader, and two part-time consultants (1 with expertise in PATHS and trauma, and 1 with expertise in autism). | Project Learn of Summit County | 100 | 31 to 90 days | \$79,500 |
| Summit | Beech Brook Support of Twinsburg City Schools | In its 5 buildings serving Pre-K to high school students, Twinsburg City Schools educates 4,300 economically, socially, and racially diverse boys and girls a year without adequate resources to meet their increased and alarming developmental, social, and emotional needs. The entire district has some guidance counselors, but not a single social worker. Founded in 1892, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 480, Beech Brook serves over 21,600 children, youth and adults in northeast Ohio every year. | Beech Brook | 15 | 91 to 180 days | \$750,000 |
| Summit | Employment Counseling and Training | The International Institute of Akron provides employment counseling, job search training, resume development and cross cultural counseling to work authorized, foreign-born residents of Summit and surrounding counties. The agency works with both individuals and employers to ensure the foreign-born workers (immigrants and refugees) migrate successfully into the US workforce and achieve economic self-sufficiency. The requested funding will allow the IIA to increase counseling staff from 1 part-time counselor to two full-time counselors, thus increasing capacity to assist more individuals. The IIA does not currently receive WIA funding for this function. The IIA will assist 300 work-authorized foreign-born individuals search for and obtain jobs. | International Institute of Akron | 300 | 0 to 30 days | \$85,000 |

| Summit | T12 FLUORESCENT LIGHTING UPGRADE | THIS FUNDING WILL ALLOW FOR THE REPLACEMENT OF APPROXIMATELY 1,000 4-LAMP T-12 FLUORESCENT LIGHTING TROFFERS IN SEVERAL OFFICE AREAS OF THE BABCOCK & WILCOX NUCLEAR OPERATIONS GROUP. NEW HIGH EFFICIENT SMI 2-LAMP T5 FITTURES WILL BE PURCHASED AND INSTALLED, AND THE OLD FITTURES WILL BE DISPOSED OF USING THIS FUNDING. THE NET RESULT OF THIS PROJECT WILL BE THE REDUCTION OF ELECTRICAL CONSUMPTION OF APPROXIMATELY 40% ANNUALLY. IT IS ANTICIPATED THAT ELECTRICIANS WILL BE CONTRACTED TO PERFORM THE INSTALLATION AND THEREFORE THAT FIGURE HAS BEEN USED AS THE BASIS FOR MY CLAIM THAT THIS OHIO DOLLAR WOULD BE RETAINED AS A RESULT OF THIS FUNDING. | BABCOCK & WILCOX - NUCLEAR OPERATIONS GROUP | 2 | 31 to 90 days | \$250,000 |
| Summit | AAA Building Project | The Area Agency on Aging proposes to construct a 30,000 sq. ft. office building on land donated to the City of Green. This facility will house 200+ employees, thereby accommodating the demand for community-based long-term care resulting from growth in the PASSPORT Program. The building will serve as headquarters for operations in Stark, Summit, Portage, and Wayne Counties. According to CAM Inc., our proposed builder, the construction of this project could begin in approximately 90 days. Over the course of construction, approximately 250 jobs will be created for contractors and sub-contractors. The preliminary designs for the building are completed. The ultimate purpose of the building is to allow for growth in Area Agency on Aging staff in the City of Green. The new building will allow us to increase staff size by 33% (approximately 50 new positions over the next five years). The success of the PASSPORT program has resulted in the AAA outgrowing its current facility. Over the last fifteen years, the number of PASSPORT enrollees increased from 640 in 1990 to 1,837 in 2000 to over 3,200 in 2008 (+400%). At the same time, the number of AAA staff has | Area Agency on Aging 10B, Inc. | 300 | 31 to 90 days | \$3,846,000 |
| Summit | Child care | Entrepreneur child care proposed to serve low income families for 38 years and employ 32 people, provide support to 50 adults for employment and training by providing child care for 100 preschool children and 42 school-age children that are transported from their homes to children's school. This agency has attained Step Up Quality Star rating, collaborates with Early Learning Initiative, Jump Start program from University of Akron, Summit County Children Service Board and contracts with Summit County Dept of Job & Family Services. Servicing Monday thru Saturday 8:00am to 11:00pm. In desperate need of funding for this quality childcare agency. | Kandy Kane Children's Learning Center, Inc | 32 | 0 to 30 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Summit | Stan Hywet Hall & Gardens Sustainable Urban Agricu | Stan Hywet Hall & Gardens seeks funding for the establishment of a sustainable urban agriculture enterprise developed in partnership with Growing Power, a Milwaukee-based nonprofit by 2008 MacArthur Fellow Will Allen. The Growing Power Community Food Center is the first of its kind in the nation and offers schools, universities, government agencies, farmers and community members the opportunity to participate in sustainable community food systems. Stan Hywet will utilize its resources and horticultural expertise to develop a sustainable composting and growing program to engage community youth and the general public in urban agriculture and serve as a regional training site for the Growing Power model. Stan Hywet will also be the parent for training, educational programming, community engagement and food production at a new business venture to support operations and help sustain the institution's fiscal health. Further development of the existing partnership between Stan Hywet and the Akron Public Schools is inherent in this project. Stan Hywet's assets will provide a venue for science- and horticulture-based curriculum development and hands-on vocational training. | Stan Hywet Hall & Gardens | 10 | 91 to 180 days | \$750,000.00 |
| Summit | Geothermal cooling/heating on the lower level of S | Stan Hywet will install geothermal wells under the Manor House's West Terrace that will serve the lower level of the Manor House, including the subterranean space used for meetings and events. The Manor House is not air conditioned, as an air conditioning was not available when the house was built in 1912 and is not possible to install the required duct work to serve the building's 65,000 square feet. The Manor House lower level is very warm in the summer, impeding staff and visitor comfort and Stan Hywet's ability to rent the space for private functions. The West Terrace is currently the focus of a major restoration project, since the area is under construction, now is the time to drill 14 vertical geothermal wells 350 feet deep to provide cooling and heating to the Manor House's lower level. This energy will be less expensive and more environmentally sound than the existing natural gas. The project also includes creating a functional mechanical room beneath the West Terrace that will be fully accessible from the Manor House Auditorium, installing a 10-ton geothermal equipment system and installing a complete supply and return duct system with the Manor House Auditorium. | Stan Hywet Hall & Gardens | 10 | 31 to 90 days | \$200,415.00 |
| Summit | Historic Dry Stone Wall | The border of Stan Hywet's property is marked by a 1.655 linear-foot dry stone wall, which is a prominent feature of the landscape and is highly visible by Stan Hywet's visitors, passing vehicles, pedestrians and residents of Stan Hywet's West Akron neighborhood. Nearly 100 years old, the wall was built as a simple garden wall but has become a beautiful and defining aspect of the estate. Since 1912 the wall has been rebuilt twice (most recently in 1978), both times incorrectly and not according to original specifications. It has been repaired piecemeal over the years with mismatched materials, resulting in a wall that is less stable and lacks aesthetic and historic cohesion. It is a high priority for Stan Hywet to rebuild the dry stone wall in a manner that ensures it will last for another 100 years. The current wall will be demolished and the proper foundation, footer and drains will be installed. The wall will be rebuilt with a stone core and to the correct height. This project provides a unique opportunity to reuse approximately 20 tons of Stan Hywet's stone. Stan Hywet will partner with the Dry Stone Conservancy to use the parameter wall project as a history teaching tool for its members or clients. | Stan Hywet Hall & Gardens | 30 | 31 to 90 days | \$1,157,854.00 |
| Summit | Development of Fuel-Efficient Fuel Cell Generator | Work in this area is already underway in a cooperative effort between Lockheed Martin MS2 of Akron, Ohio (17th District) and Technology Management Inc. (TMI) of Cleveland, Ohio (14th District), along with support from Stark State College of Technology of North Canton, Ohio (15th District). Development of core fuel cell stack technology and general system development is currently underway, funded by a combination of internal R&D funds and Ohio Third Frontier funds. | Lockheed Martin MS2 | 30 | 31 to 90 days | \$15,000,000.00 |
| Summit | One MegaWatt Fuel Cell to Support Peak Capacity Ne | Funding of this project will be used to accelerate the maturation of this technology towards readiness for DOD insertion. Specific areas of work will include transforming cell and stack technologies towards manufacturing readiness, development and demonstration of complete generating units including hot assembly, balance of plant and power electronics, and integration of the overall system to DOD standards. Additionally, this project, Lockheed Martin and TMI will continue their cooperation with Stark State College of Technology, providing students in the field of electrical engineering with hands-on experience in fuel cell technology. | FirstEnergy Corp | 2 | 0 to 30 days | \$2,205,000.00 |
| Summit | Child Advocate Team Program | This project will install a 1.8MW PEM fuel cell system for peaking capacity and grid load management. System includes 5 x 360kW fuel cells, 1.8MW inverter & balance of plant. Packaged in two mobile trailers, (one each for fuel cell system & fuel supply system) to enable storage and transport. PEM modules of this design have been used extensively in transit bus applications, performed at 40% efficiency, >90% availability, >20,000 hours and 2.2 million km of the road operators. Fuel supply will be hydrogen. | Summit County Juvenile Court | 9 | 0 to 30 days | \$380,000.00 |
| Summit | Outcome Measurement Training Project | Expected outcomes include: peak drawing for utility load, improved grid reliability, improved air quality, and reduced fossil fueled alternatives, transfer of advanced knowledge on design of large scale PEM systems to engineering, installation, and operation. Stan Hywet is a Collaborator including university researchers, and industrial partners. | Center for Nonprofit Excellence | 2 | 0 to 30 days | \$40,000.00 |
| Summit | Historic restoration | Design and manufacturing expected to commence Q2-2009 with install and commissioning by December 31, 2009. System expected to operate 2 8 hours per day, 5-days per week during the summer season (period of highest peak loads) for a total of 400 hours per year. System to undergo testing and evaluation for summer seasons. | New Hope Generations | 3 | 0 to 30 days | \$253,985.82 |
| Summit | solar thermal power generation demonstration | Replace the majority of LHM positions which were funded by Title XXIV TANF dollars to work as full and part-time Guardian ad Litem to serve and protect the best interests of children in the custody of Children's Services as a result of allegations of abuse and/or neglect against their caregivers. As of 6/20/2008, these funds (totaling \$966,000) will not be available in the state of Ohio budget for the foreseeable future. This program provides more than 700 child victims annually with services that cannot be offered through any other means currently. | rexorice thermionics, inc | 10 | 0 to 30 days | \$750,000.00 |
| Summit | Youth Advocacy | A key factor in program accountability is the capacity to document and report program outcomes of performance measures. This project will provide specialized training for nonprofit staff and board members on development and use of outcome measures. The program will teach nonprofit agencies how to establish performance measures for their programs, systematically track progress of actual performance and how to utilize findings to enhance program effectiveness. This three-part training program will be conducted in 5 areas of the state, up to 5 sessions in each area. | East Akron Community House | 80 | 31 to 90 days | 100,000.00 |
| Summit | VAWA Prosecutor | To create a workshop dedicated to the preservation and restoration of antique furniture, both historic and period pieces. This workshop would be stocked with various essential wood working tools and materials, including but not limited to: 40" wood plane, table saws, band saws, routers, sanders, wood planes, chemical strippers, stains, etc. This shop would specialize in antique restoration from both public and private collections, along with the creation of period reproductions and unique created furniture. The shop would also serve as a teaching/opportunity working environment with one to two students employed and taught wood working skills at any given time. This shop would also offer and enhance current crafted furniture, it would also serve to pass on the art of furniture restoration/creation to apprentices, who would then in turn, be able to start their own shop. I believe this shop could be productive within one year of startup, well-sustained after three years, and profitable within 5 years. | Summit County Prosecutor's Office | 1 | 0 to 30 days | 73,766.39 |
| Summit | PACT | rexorice, an Akron based company, would deliver a 10-15kW thermal engine to serve as a powerblock for solar thermal power generation, coupled to commercially available solar thermal receivers, and supply electric power and hot water to a designated facility (e.g. a state or local government facility and/or a regional/local transportation terminal (for example, Akron's new intermodal terminal for METRO)). rexorice is currently developing a contract for demonstration purposes in an industrial waste heat recovery application under an OODD Third Frontier Grant (upon recommendation from the National Academy of Sciences). The successful demonstration of its thermal engine at the 10-15kW scale and in a solar thermal application would enhance the development of a portfolio of applications in which the rexorice technology was demonstrated. Within two years, rexorice would use the portfolio of successes to support the launch of its products at commercial scale, creating and supporting employment levels within rexorice and within its supply chain. | International Institute of Akron | 5 | 0 to 30 days | 50,000 |
| Trumbull | West Farmington Wastewater Treatment Project | As a result of the successful demonstration, both rexorice and the State of Ohio would have the opportunity to build a core competency (and as well as the need to reduce crimes committed by juveniles, by providing adequate programming and mentoring to our youth during the hours of 4:00pm - 8:30pm, to youth between the ages of 11-17 years. | Village of West Farmington | 2 | 91 to 180 days | \$1,000,000 |
| Trumbull | BEW Renewable Energy Model Education & Training P | The Summit County General Fund currently pays the salary and benefits for 2 of our 4 Domestic Violence Unit prosecutors. In 2008, the Prosecutor's Office general fund budget was reduced by 5%. Additional cuts between 5% and 10% are expected in 2010. Without this funding we no longer be able to maintain current staffing levels within our Domestic Violence Unit. If received, this funding will provide salary and benefit costs for 1 of our current domestic violence prosecutors. Otherwise, this position will be eliminated. | Trumbull County Planning Commission | 1000 | 0 to 30 days | \$2,300,000 |
| Trumbull | Millikin Place Stormwater Upgrades | The International Institute of Akron (IIA) has identified 52 low income refugee families that have lived in Akron for less than one year and are in immediate need of educational assistance in order to secure employment and greater increase their post secondary opportunities. The PACT program serves 62 of those families. | City of Warren Water Pollution Control Center | 10 | 0 to 30 days | \$402,000 |
| Trumbull | Belmont Ave. Retention Pond | Middle and high school can be difficult to navigate for even the most well-adjusted adolescent; for a refugee, the challenges can be more humorous and extreme. In addition to the usual concerns (peer pressure, sex, and drugs) refugees face an unfamiliar school environment whose rules may not have been fully understood because of cultural/language barriers. Further, their parent's ability to assist can be limited by many of the same factors. | Liberty Township | 30 | 0 to 30 days | \$200,000 |
| Trumbull | Central Fire Station | As a year round program for low-income refugee adolescents and their parents, PACT (Parents and Children Together) provides adolescents the support and opportunities they need to succeed academically. In addition, PACT prepares participants to more effectively navigate the school system, provides them with the basic skills necessary to explore various employment opportunities, and seek out post-secondary education choices. | Liberty Township | 50 | 31 to 90 days | \$1,000,000 |
| Trumbull | Mosquito Creek Boardwalk Phase II | This project involves an innovative approach to solving water pollution problems in the rural Village of West Farmington and a proposed service area is covered by existing Home Based HSTs. The Village is planning a series of improvements to its wastewater treatment plant (1). The construction of a 100,000 GPD packaged treatment plant with a centralized collection system (or 2). A Group On-Site Treatment System that is a more localized solution because of the rural location of West Farmington area. It is determined that this type of system is the more cost effective of the two technologies, the system will work like a small package plant except that it is a biological process in a container that has no chemical process. It is a system that has been used with great success in other rural areas in Ohio. The project scope requires that each household replace their current HSTs with a newer, state-of-the-art HSTs that will meet county and state standards. The households with the new HST's will be connected together in clusters, based on their spatial distribution, with new sanitary lines linking the clusters to a common discharge pipe at the River Drive. | Trumbull County Planning Commission | 25 | 0 to 30 days | \$750,000 |
| Trumbull | 14. Mosquito Lake Handicapped & Senior Access Over | Solar & wind renewable energy models set up at three locations in the Research & Development Parkway area for testing purposes. Models set up at BEW/Research Parkway Learning Center, Kent State University (KSU) Trumbull Campus and Trumbull Career and Technical Institute (TCTI) to show students and interested opportunities on the operating system. Models include Solar Panel System of 40-80 Kilowatt Direct Grid to PV Systems (\$5-\$800,000 each), Residential model, Model Water and Roof Exposed Operating System, 50M Watt Wind Turbine (40-60) feet towers/wind meters to monitor wind speed at varying locations. Wind meters can be left out at different locations in the county for 12-month periods to monitor wind speeds, relating to wind speeds in different locations in the county to determine wind speeds. BEW will make installations as it moves around the county to monitor wind speeds at different locations and BEW has provided the energy engineering study for the three solar & wind renewable energy models. | Trumbull County Planning Commission | 10 | 0 to 30 days | \$250,000 |
| Trumbull | 15. Renewable Energy - Solar Panels Job & Family S | Project will upgrade the existing storm sewer system and improve the inlet capacity of the existing drainage system by extending an 18-inch storm sewer along the drainage channel and adding detention/water quality structures. | City of Warren Engineering Department | 10 | 181 days or more | \$1,000,000 |
| Trumbull | 2009 Resurfacing Program | Engineering complex | Liberty Township | 15 | 91 to 180 days | \$300,000 |
| Trumbull | Shady Road Sidewalk Project | Normal Fire Station - costing 2 to build one - LED lighting - energy efficient. | Liberty Township | 35 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Trumbull | Enterprise Drive One Million Gallon Storage Tank | Construct a (1) one million gallon storage tank to enable the City of Warren to promote future growth and development and assist a neighboring community to provide its citizens with safe drinking water. | City of Warren Utility Services | 20 | 181 days or more | \$2,500,000 |
| Trumbull | Waterline Project | 300,000 linear feet of 12" iron ductile pipe. This project will promote and allow future growth and development. | City of Warren Utility Services | 100 | 181 days or more | \$15,000,000 |
| Trumbull | 480 Voly Electrical Switch Gear Project | Upgrade electric service to Filtration Plant to allow for increased pumping requirements | City of Warren Utility Services | 25 | 91 to 180 days | \$2,000,000 |
| Trumbull | State Route 422 Pump Station Project | Enable the City to enhance pumping pressures along the 422 corridor | City of Warren Utility Services | 20 | 181 days or more | \$1,500,000 |
| Trumbull | Gypsy Lane Storm Sewer Project | Install 1,600 LF of new Storm Sewer on Gypsy Lane between Moseland Ave. and USR422 | City of Niles | 10 | 0 to 30 days | \$290,905 |
| Trumbull | Little Squaw Creek Interceptor - Phases 3, 4 and 5 | This sanitary sewer project is targeted to serve over 300 existing homes and businesses within the State Route 193 corridor who have documented water pollution problems that threaten the health, safety and welfare of the entire community. This project is also necessary to satisfy a consent decree between Trumbull County and the Ohio EPA. Phase 1 is currently under construction. Phase 2 is scheduled to be constructed in 2015. Phases 3 through 5 will complete the entire project and bring sanitary sewer service to the Youngstown Warren Regional Airport. All future economic development in the SR 193 corridor is dependent on this project. Development in and around the Youngstown Warren Regional Airport (which includes over 5,000 acres of developable vacant industrial and commercial property) benefits virtually all residents in Trumbull and Mahoning Counties through job creation and by bringing outside dollars to the Mahoning Valley. Design Engineering is complete, the project is shovel ready. Trumbull County will accept any amount of grant funds less than this request and reduce the scope if necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 1000 | 31 to 90 days | \$2,600,000 |
| Trumbull | USR 422 Mill & Fill, Phase 2 | Resurface USR422 from Gypsy Lane to BLM 17.40 (approx 3,600 LF, avg 5 lanes). This project is currently progressing under the ODOT Urban Design Initiative and is PD #666. | City of Niles | 20 | 31 to 90 days | \$1,000,000 |
| Trumbull | Street Reconstruction | The City of Newton Falls has selected two and two-thirds (2.2) miles of streets for consideration. The project consists of milling and pavement buildup of two (2) inches of hot Asphalt Concrete Surface Course, Type 1 P684-22. This project requires no right-of-way acquisition. The streets service manufacturing and commercial establishments which require load bearing capabilities. The engineering firm of Thomas Foak & Associates supplied the data included in this submission. | City of Newton Falls | 25 | 31 to 90 days | \$387,443 |
| Trumbull | Niles Wastewater Treatment Plant Improvements | Upgrade the City's Wastewater Treatment Facility using green technology to meet NPDES permit requirements, enhance the solids treatment to allow beneficial reuse, and minimize flooding and pass-through to the Mahoning River. | City of Niles | 50 | 91 to 180 days | \$30,000,000 |
| Trumbull | Fairlawn Avenue Sanitary Detention Basin | Construct a detention basin at the end of Fairlawn Ave. to eliminate basement flooding for the area bounded by North Road and Mosquito Creek. | City of Niles | 20 | 91 to 180 days | \$2,000,000 |
| Trumbull | Citywide Resurfacing Program | Resurfacing approximately 20 City Streets within the Niles City Limits using 2" mill and fill. | City of Niles | 10 | 31 to 90 days | \$650,000 |
| Trumbull | Niles Trumbull Transit Jobs Program | Provide transportation services to those seeking access to job training and employment opportunities by operating transit service for the Trumbull County Educational Service Center Work-Studies Program for those 16-22 years of age. | City of Niles | 50 | 0 to 30 days | \$420,000 |
| Trumbull | Maplewood Park Sanitary Sewer Improvements | This sanitary sewer project is targeted to serve over 200 existing homes and businesses who have documented water pollution problems that threaten the health, safety and welfare of the entire community. This project is also necessary to satisfy a consent decree between Trumbull County and the Ohio EPA. Residents and businesses downstream of the project area will also benefit due to the elimination of local coliform and other pathogens that currently enter the ecosystem. Phase 1 was completed in 2008 and included the installation of a 25,000 GPD Wastewater Treatment Plant (WWTP) and the trunk line currently in place along State Route 5. Since the Farmdale neighborhood is a Low to Moderate Income (LMI) area, Trumbull County also intends to apply for a \$800,000 CDBG Water & Sewer Grant to help pay soft costs. This project will also provide an economic development opportunity due to over 800 acres of vacant industrial property that will be benefited with sanitary sewer service. Trumbull County will accept any amount of grant funds less than this request and reduce the scope if necessary to build as much of the project as financially possible. Design engineering is complete, this project is shovel ready. | Trumbull County Sanitary Engineers | 50 | 31 to 90 days | \$1,500,000 |
| Trumbull | Cold Forming Project | The Cold Forming Project at Ohio Star Forge Co. would be the purchase and installation of 2 cold forming machines and one phosphate coating line. This would extend our capabilities to increase our supply of forgings to the Wind Energy and Power Generation markets. This would also allow approximately 20 new jobs and allow the customer base. This would also provide approximately 20 new jobs and allow the customer base. This would also provide approximately 20 new jobs and allow the customer base. | Ohio Star Forge Co. | 29 | 181 days or more | \$10,500,000 |
| Trumbull | Kinsman Sanitary Sewer Improvements Phase 2 | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Mosquito Creek in Hubbard Township. The WWTP is currently operating very near its design capacity of 4.2 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Howard, Hanna, Bazett, Fowler, Meach, and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. An infiltration and flow (I & F) Study for the existing collection system was completed in 2008 to identify the amount and extent of storm water I & F into the sanitary sewer system. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 200 | 31 to 90 days | \$3,000,000 |
| Trumbull | Mosquito Creek Sanitary Sewer District - I&I Remov | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Mosquito Creek in Hubbard Township. The WWTP is currently operating very near its design capacity of 4.2 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Howard, Hanna, Bazett, Fowler, Meach, and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. An infiltration and flow (I & F) Study for the existing collection system was completed in 2008 to identify the amount and extent of storm water I & F into the sanitary sewer system. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 100 | 31 to 90 days | \$3,000,000 |
| Trumbull | Brookfield Sanitary Sewer Subdistrict - I&I Remov | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Yankee Run Creek in Brookfield Township. The County's WWTP at this location treats wastewater generated by the majority of residences and businesses in Brookfield Township and the northern portion of Hubbard Township. The WWTP is currently operating very near its design capacity of 1.3 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Brookfield and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. An infiltration and flow (I & F) Study for the existing collection system is planned to be completed in 2009 to identify the amount and extent of storm water I & F into the sanitary sewer system. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as possible. | Trumbull County Sanitary Engineers | 300 | 31 to 90 days | \$2,000,000 |
| Trumbull | Little Squaw Creek Interceptor - Phases 3, 4 and 5 | This sanitary sewer project is targeted to serve over 300 existing homes and businesses within the State Route 193 corridor who have documented water pollution problems that threaten the health, safety and welfare of the entire community. This project is also necessary to satisfy a consent decree between Trumbull County and the Ohio EPA. Phase 1 is currently under construction. Phase 2 is scheduled to be constructed in 2015. Phases 3 through 5 will complete the entire project and bring sanitary sewer service to the Youngstown Warren Regional Airport. All future economic development in the SR 193 corridor is dependent on this project. Development in and around the Youngstown Warren Regional Airport (which includes over 5,000 acres of developable vacant industrial and commercial property) benefits virtually all residents in Trumbull and Mahoning Counties through job creation and by bringing outside dollars to the Mahoning Valley. Design Engineering is complete, the project is shovel ready. Trumbull County will accept any amount of grant funds less than this request and reduce the scope if necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 1000 | 31 to 90 days | \$2,600,000 |
| Trumbull | Maplewood Park Sanitary Sewer Improvements | This sanitary sewer project is targeted to serve over 200 existing homes and businesses within the State Route 193 corridor who have documented water pollution problems that threaten the health, safety and welfare of the entire community. This project is also necessary to satisfy a consent decree between Trumbull County and the Ohio EPA. Residents and businesses downstream of the project area will also benefit due to the elimination of local coliform and other pathogens that currently enter the ecosystem. Since this project complies with a Low to Moderate Income (LMI) area, Trumbull County intends to apply for a \$800,000 CDBG Water & Sewer Grant and also allocate \$350,000 from CDBG Formula Program. Trumbull County shall also apply for a 4th Ohio EPA Water Pollution Control Loan for the remainder of this project. This project may also provide an economic development opportunity along the Jacobs Road Corridor between the cities of Hubbard and Youngstown. Trumbull County will accept any amount of grant funds less than this request and reduce the scope if necessary to build as much of the project as financially possible. Design engineering is complete, this project is shovel ready. | Trumbull County Sanitary Engineers | 50 | 31 to 90 days | \$1,500,000 |
| Trumbull | Biosolids Improvement Project | Installation of a Gasification/Pyrolysis system that will convert wastewater sludge into renewable electrical energy, generating up to 15 MW/day. This project is intended to provide sanitary sewer to over 200 homes and businesses in Farmdale and Kinsman Center, located in the east/northeast corner of Trumbull County, Ohio. This project is also necessary to satisfy a consent decree between Trumbull County and the Ohio EPA. Residents and businesses downstream of the project area in the Pymatung Creek and Shrewage River watersheds will also benefit due to the elimination of local coliform and other pathogens that currently enter the ecosystem. Phase 1 was completed in 2008 and included the installation of a 25,000 GPD Wastewater Treatment Plant (WWTP) and the trunk line currently in place along State Route 5. Since the Farmdale neighborhood is a Low to Moderate Income (LMI) area, Trumbull County also intends to apply for a \$800,000 CDBG Water & Sewer Grant to help pay soft costs. This project will also provide an economic development opportunity due to over 800 acres of vacant industrial property that will be benefited with sanitary sewer service. Trumbull County will accept any amount of grant funds less than this request and reduce the scope if necessary to build as much of the project as financially possible. | City of Warren Water Pollution Control Center | 30 | 0 to 30 days | \$6,500,000 |
| Trumbull | Kinsman Sanitary Sewer Improvements Phase 2 | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Mosquito Creek in Hubbard Township. The WWTP is currently operating very near its design capacity of 4.2 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Howard, Hanna, Bazett, Fowler, Meach, and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. An infiltration and flow (I & F) Study for the existing collection system was completed in 2008 to identify the amount and extent of storm water I & F into the sanitary sewer system. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 200 | 31 to 90 days | \$3,000,000 |
| Trumbull | Mosquito Creek Sanitary Sewer District - I&I Remov | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Mosquito Creek in Hubbard Township. The WWTP is currently operating very near its design capacity of 4.2 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Howard, Hanna, Bazett, Fowler, Meach, and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. An infiltration and flow (I & F) Study for the existing collection system was completed in 2008 to identify the amount and extent of storm water I & F into the sanitary sewer system. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as financially possible. | Trumbull County Sanitary Engineers | 100 | 31 to 90 days | \$3,000,000 |
| Trumbull | Brookfield Sanitary Sewer Subdistrict - I&I Remov | This project is intended to decrease the flow to Trumbull County's Wastewater Treatment Plant (WWTP) located on the Yankee Run Creek in Brookfield Township. The County's WWTP at this location treats wastewater generated by the majority of residences and businesses in Brookfield Township and the northern portion of Hubbard Township. The WWTP is currently operating very near its design capacity of 1.3 million gallons per day (MGD). In order to provide sanitary sewer service to additional areas in the WWTP drainage area, including "consent decree areas" and petion projects in Brookfield and Hubbard Townships, it is necessary to decrease the flow to the WWTP especially during rain and melt events. The scope of this project includes major repairs and relines to the existing sanitary sewer interceptors, collection lines and manholes. Trumbull County will accept any amount of grant funds less than this request and reduce the scope as necessary to build as much of the project as possible. | Trumbull County Sanitary Engineers | 300 | 31 to 90 days | \$2,000,000 |
| Trumbull | South Canal Street Waterline Replacement | This project consists of constructing one thousand nine hundred and ten (1,910) linear feet of new twelve (12) inch waterline to replace existing four (4) and six (6) inch waterlines. Existing hydrants and valves will be installed. Existing waterlines are very old and substandard, susceptible to frequent breaks and deliver very poor flow rates (less than 500 gpm). This project was selected due to results of a hydraulic study of the water distribution system performed by Arcadis Engineering. Engineering design and data performed by Foak and Associates. | City of Newton Falls | 40 | 31 to 90 days | \$378,500 |
| Trumbull | State Route 46 Improvements | Improving 7400 feet (1.40 miles) of State Route 46 from the Baltimore and Ohio Railroad bridge to 1st Street by full depth asphalt pavement removal and replacement with concrete pavement, underdrains, curb and gutter, storm sewers, concrete walls, curb ramps, and pavement marking. | City of Niles | 10 | 181 days or more | \$2,527,500 |
| Trumbull | 2009 Trumbull County Road Improvement Program | Project consists of approximately six (6) miles of roadway resurfacing and repair on four (4) different County Highways. Project plans and specifications are being prepared by County Engineer staff. | Trumbull County Engineer | 8 | 91 to 180 days | \$359,225 |
| Trumbull | Funeral Services and Merchandise | The Holsten-Yuhasz Funeral Home of Niles, Ohio would provide assistance to Trumbull County workers and their families who have been hurt by the current economic situation with needed funeral or cremation services and merchandise in the case of the death of a loved one. The funds would allow us to offer these families a dignified funeral service package or a cremation service package with curb ramps and pavement marking over the next several years. The funds would also allow us to hire a full time funeral director/embalmer along with the improvement and expansion of our facilities to handle the increasing number of funerals we would serve with honor. The Holsten-Yuhasz Funeral Home is a family owned business since 1889 and was the 2008 recipient of the Youngstown-Warren Regional Chamber Community Pride Award for Niles. We are members of the National Funeral Directors Association and the Ohio Funeral Directors Association and strictly abide by their Code of Ethics. | Holsten-Yuhasz Funeral Home | 1 | 31 to 90 days | \$555,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Trumbull | Downs North Road Paving | TOTAL REPAVING OF DOWNS ROAD IN NORTHERN TRUMBULL COUNTY PAVING VARIOUS ROADS IN CHAMPION TOWNSHIP Raymond Ave - 316mi Folsom Street - 374mi Luster Drive - 476mi Aspen Drive - 573mi Shelton Street - 671mi Cleveland Ave - 733mi Miss Street - 816mi Lester Drive - 183 mi Strafer Road - 1,520mi Pheasant Road - 2,456mi | CHAMPION TOWNSHIP | 20 | 0 to 30 days | \$472,500 |
| Trumbull | Champion Township Road Paving | | CHAMPION TOWNSHIP | 30 | 0 to 30 days | \$1,736,796 |
| Trumbull | 2009 Trumbull County Road Improvement Program, Phase | Project consists of approximately twenty-seven (27) miles of roadway resurfacing and repair on fifteen (15) different County Highways. Project plans and specifications to be prepared by County Engineer staff. | Trumbull County Engineer | 8 | 91 to 180 days | \$5,000,000 |
| Trumbull | 2009 Stimulus Trumbull County Road Improvement Program | Project consists of approximately eleven (11) miles of roadway resurfacing and repair on eight (8) different County Highways. Project plans and specifications to be prepared by County Engineer staff. | Trumbull County Engineer | 8 | 91 to 180 days | \$2,500,000 |
| Trumbull | 2009 Stimulus Countywide Traffic Signal Upgrade Project | Upgrade forty-two (42) Trumbull County owned and maintained traffic signals, flashers and school zone signs to more energy efficient and longer lasting LED type signals, including controllers, loop detectors and wiring as necessary. Project plans and specifications to be prepared by County Engineer staff. | Trumbull County Engineer | 8 | 91 to 180 days | \$600,000 |
| Trumbull | Trumbull County Bridge Load Rating Project, Phase | Perform or Update the Load Rating Analysis on approximately 140 Trumbull County Bridges with a span of 20 feet or greater. Bridges over 20 feet span in need of analysis consist of 47 Steel Beam Bridges, 26 Prestressed Concrete Box Beam Bridges, 23 Metal Culverts, 13 Truss Bridges, 12 Concrete Slab Bridges, 10 Concrete Box Culverts, 3 Concrete Arch Bridges, 3 Prestressed I Beam Bridges and 1 Concrete Viaduct. The analysis of the 13 Truss Bridges will include an analysis of all gusset plates. Load Rating Analyses to be performed by Engineering Consulting Firms. | Trumbull County Engineer | 8 | 91 to 180 days | \$876,500 |
| Trumbull | Trumbull County Bridge Load Rating Project, Phase | Perform or Update the Load Rating Analysis on approximately 178 Trumbull County Bridges with a span of less than 20 feet. Bridges under 20 feet span in need of analysis consist of 118 Metal Culverts, 26 Concrete Slab Bridges, 19 Concrete Box Culverts, 9 Steel Beam Bridges, 6 Concrete Culverts and 1 Stone Arch Bridge. Load Rating Analyses to be performed by Engineering Consulting Firms. | Trumbull County Engineer | 8 | 91 to 180 days | \$208,000 |
| Trumbull | Trumbull County Bridge Scour Assessment | Evaluate approximately 380 Trumbull County Bridges for scour susceptibility. Scour evaluations to be performed by Engineering Consulting Firms. | Trumbull County Engineer | 8 | 91 to 180 days | \$250,000 |
| Trumbull | TRU-CH-92 (NEWTON #17) Bridge Replacement Project | Project consists of providing engineering services for the preparation of the construction plans and any required right of way services necessary to replace an existing load posted 40' steel truss bridge which is in poor condition and has a substantial 19' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. Design Services to be performed by an Engineering Consulting Firm. | Trumbull County Engineer | 8 | 91 to 180 days | \$60,000 |
| Trumbull | TRU-CH-92 (NEWTON #17) Bridge Replacement Project | Construction project will replace an existing load posted 40' steel truss bridge which is in poor condition and has a substantial 19' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. | Trumbull County Engineer | 8 | 91 to 180 days | \$142,760 |
| Trumbull | TRU-CH-79 (WARREN #16) Bridge Replacement Project | Project consists of providing engineering services for the preparation of the construction plans and any required right of way services necessary to replace an existing load posted 42' steel truss bridge which is in poor condition and has a substantial 16' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. Design Services to be performed by an Engineering Consulting Firm. | Trumbull County Engineer | 8 | 91 to 180 days | \$60,000 |
| Trumbull | TRU-CH-79 (WARREN #16) Bridge Replacement Project | Construction project will replace an existing load posted 42' steel truss bridge which is in poor condition and has a substantial 16' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. | Trumbull County Engineer | 8 | 91 to 180 days | \$142,760 |
| Trumbull | TRU-CH-187 (HARTFORD #25) Bridge Replacement Project | Project consists of providing engineering services for the preparation of the construction plans and any required right of way services necessary to replace an existing 70' steel truss bridge which is in poor condition and has a substantial 15' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. Design Services to be performed by an Engineering Consulting Firm. | Trumbull County Engineer | 8 | 91 to 180 days | \$60,000 |
| Trumbull | TRU-CH-187 (HARTFORD #25) Bridge Replacement Project | Construction project will replace an existing 70' steel truss bridge which is in poor condition and has a substantial 15' of roadway width. The anticipated scope of work consists of replacing the existing bridge with a single span bridge along with constructing approximately 400 feet of approach roadway improvements. | Trumbull County Engineer | 8 | 91 to 180 days | \$225,800 |
| Trumbull | Mahoning Valley Sanitary Dist. Re-carbonation Impr | This project is for the benefit of the 220,000 people served by the District. The Water Plant at the District is a lime softening treatment facility that produces water supersaturated with calcium carbonate from the lime addition. Water from the Settling will remain supersaturated with calcium carbonate until it can be reacted with carbon dioxide. Carbon dioxide is usually added to the supersaturated water to eliminate the excess calcium carbonate by reducing the pH, and neutralizing the hydroxide alkalinity and removing the excess lime calcium carbonate. The carbon dioxide addition occurs in a specially designed treatment process upstream of filtration process. Without this improvement consumers and the District will experience the scaling treatment processes, piping, valve and plumbing that will hinder their operation and result in unnecessary maintenance costs. | Mahoning Valley Sanitary District | 20 | 91 to 180 days | \$2,007,711 |
| Trumbull | Southington Wastewater Project | The project proposes the installation of approximately 58,000 LF of gravity sewers, 286,000 LF of low pressure force main, 910 grinder pumps, 20,000 LF of lift station force main, 8 sewage lift stations, and upgrade of 1 lift station. Sewage treatment is proposed at the existing City of Warren Wastewater Treatment Plant (WWTP). The service area consists of a majority Southington Township, residents in the adjacent City of Warren Township along State Route 305, and residents in Warren Township along State Route 422 and Trenton Road. In addition to the environmental and financial issues that would be addressed for the existing residents and businesses of Southington Township, a central public storage system would allow for development of the Road 422 Corridor the main connector between the Warren-Youngstown area and metro Cleveland, which has been identified by Township Trustees as a potential growth area in the Township. | Southington Township | | 91 to 180 days | \$18,500,000 |
| Trumbull | MVSD - Meander Water Plant Control Valves and High | There are five (5) sluice gates that need replaced to control the plant flow and isolated sections of the water treatment process in the high service pump station for maintenance work and repairs. There are five (5) high service pumps that distribute water to the District's 220,000 customers. The installation of the three (3) variable frequency drives on three pumps will greatly enhance the District's ability to alter the volume of water being pumped while greatly reducing electrical consumption (saving energy and money) especially during peak demand time periods. The five (5) high service pumps would also be fitted with reaction seals which will reduce friction and allow the pumps to consume far less electricity while operating. These two improvements would lead to a considerable savings in electrical consumption. | Mahoning Valley Sanitary District | 4 | 91 to 180 days | \$635,000 |
| Trumbull | MVSD - Physical Protection System | This project is for the benefit of the 220,000 people served by the District. These improvements involve the installation of a physical protection system consisting of a security gate, lighting, security cameras, motion detectors and keyless entry system for the Meander Water Treatment Plant. This is necessary to secure the plant facilities against hostile actions under the Federal Homeland Security Program. | The Mahoning Valley Sanitary District | 6 | 31 to 90 days | \$177,000 |
| Trumbull | MVSD - Distribution and Plant Valve and Meter Impr | This project is for the benefit of the 220,000 people served by the District. The purpose of these improvements is to replace 70-year old improvements main valves, flow valves, air release valves, plant sluice gates, plant flow meters and flow weirs. | Mahoning Valley Sanitary District | 20 | 91 to 180 days | \$2,250,000 |
| Trumbull | Cortland Branch | These improvements are necessary so that reliable equipment is available to necessitate the conveyance, operation, and maintenance of the District's distribution system of the public water supply to the Cities of Miles and Youngstown and the Village of McDonald. The project will build a 10,000 sq feet LEED certified library branch utilizing geothermal heat and green building materials. The current branch of 4,000 sq feet is much too small to meet the needs of the community and needs replaced. | Warren-Trumbull County Public Library | 20 | 0 to 30 days | \$2,000,000 |
| Trumbull | GROUP HEALTHCARE PROVISION | THE LIBRARY HAS PURCHASED THE LAND NEEDED FOR THIS PROJECT, AND HAS BUILDING PLANS COMPLETED, WE JUST LACK THE NECESSARY FUNDS TO COMPLETE THE PROJECT. | | | | |
| Trumbull | High Street Resurfacing | I HAVE BEEN NOTIFIED BY DELPHI RACHARD THAT I WILL BE LOSING MY RETIREE HEALTH CARE BENEFITS. I WOULD LIKE TO SET UP A SITE THAT COULD HELP ALL DELPHI RETIREES SIMILARLY AFFECTED TO CREATE A NEGOTIATING ENTITY THAT WOULD ALLOW US TO GET A GROUP RATE FOR INSURANCE THAT WOULD HELP US NOT SINK INTO A POVERTY LEVEL. | DELPHI | 0 | 0 to 30 days | \$0 |
| Trumbull | Mosquito Lake Renewable Energy Model Cabins | The proposed project includes the paving and resurfacing of 1.78 miles of roadway. The project will include incidental curb and concrete walk replacement. Signage will be upgraded and pavement markings replaced. | City of Warren Engineering Department | 10 | 181 days or more | \$1,000,000 |
| Trumbull | Griswold Street Reconstruction | A dog park, pet beach and an All Terrain Vehicle (ATV) Course. The Griswold Street Reconstruction Project includes the widening and resurfacing of 0.65 miles of road. Cuts (8,000 LF), sidewalks (7,000 SF), and curb ramps (10 EA) will be constructed as part of the project. Storm sewers (4,000 LF) will be constructed. Pavement markings and street signs will be included within the project. | Trumbull County Planning Commission | 25 | 31 to 90 days | \$1,700,000 |
| Trumbull | Park Avenue Resurfacing | The proposed project that consist of the paving and resurfacing of 1.88 miles of roadway with rubberized sand asphalt on an asphalt leveling course. Incidental drainage work and curb and sidewalk replacement shall be performed as required. Curb ramps will be constructed. New pavement markings will be placed and signing upgraded. Decorative concrete crosswalks will be constructed in the historic district. Resurfacing 15,724 linear feet of roadway to asphalt pavement. | City of Warren Engineering Department | 10 | 181 days or more | \$1,500,000 |
| Trumbull | 2009 Dirt Road Safety Upgrade | The improvement will eliminate health problems created by roadway dust and promote commercial and residential growth. | Brookfield Township Highway Department | 10 | 31 to 90 days | \$961,760 |
| Trumbull | Elm Road Resurfacing | The proposed project includes paving and resurfacing of 2.78 miles of roadway. The alignment shall follow the existing and include incidental curb and concrete walk replacement. Signage will be upgraded and pavement markings replaced. | City of Warren Engineering Department | 25 | 181 days or more | \$2,500,000 |
| Trumbull | Warren Industrial Incubator | To establish an incubator for small manufacturing businesses in vacant, industrial buildings in the City of Warren. Buildings will be donated by owner and will be match for requested grant. There is approximately 800,000 sq. ft. of space available on Case Street. Renovations include environmental remediation, painting, clearing, demolition and new loading docks. Estimated 500 jobs created. | Trumbull County Planning Commission | 500 | 181 days or more | \$9,000,000 |
| Trumbull | Parkman Road Phase 2 | The proposed project includes paving and resurfacing of 1.08 miles of roadway. The alignment shall follow the existing and include curb and concrete walk replacement. Concrete step curb and ramps will be constructed. Signage will be upgraded and pavement markings replaced. | City of Warren Engineering Department | 25 | 181 days or more | \$2,500,000 |
| Trumbull | Parkman Road Phase 3 | The proposed project includes the widening and resurfacing of 0.51 miles of road. Left hand turn lanes will be constructed at major intersections. A two way left turn lane will be constructed through a commercial district. Intersection improvements and drive reduction are being undertaken to mitigate a high number of traffic accidents. Right of way will be needed. Cuts, sidewalks, and curb ramps will be constructed as part of the project. Storm sewers will be constructed. Pavement markings and street signs will be included within the project. | City of Warren Engineering Department | 65 | 181 days or more | \$6,500,000 |
| Trumbull | Warren Greenway Bike Trail | The Warren Greenway project includes the construction of a bike trail through the City of Warren. The project is a local component of and subsidiary to a regional project, The Great Lakes River Driveway. Warren's portion will utilize an existing 10' wide concrete city street, two bridges and a stone culvert will be rehabilitated. Right of way will be needed. A trailhead will be constructed. | City of Warren Engineering Department | 40 | 181 days or more | \$4,000,000 |
| Trumbull | Braceville Fire Station | Warren subsidizes the protection for Braceville Township residents and businesses by supplying Braceville Township's fire department. The department, several vehicles and firefighting equipment, which were destroyed by an electrical fire in the firehouse. The Braceville FD protects 3,000 people in a 25 square mile area. 40 jobs. | Trumbull County Planning Commission | 40 | 0 to 30 days | \$125,000 |
| Trumbull | Willow Park Elevated Tank Replacement | 200,000 gallon elevated storage tank for the City of Cortland Public Water System. Construction of the tank will improve pressure within the city and improve the flow demand. The funding assistance will reduce the debt service incurred by the city. Rates can remain lower allowing more disposable income for customers. | City of Cortland | 40 | 31 to 90 days | \$1,620,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Trumbull | Kent State/Trumbull R&D Park | The major part of this project is the proposed access improvements from the 120 acre RTAD Park to the Warren Outer belt to facilitate the movement of increased traffic and alleviate traffic congestion on SR 45 by providing an additional outlet by attaching a roadway to an underused access ramp approximately one mile east of the RTAD Park. This roadway project would also serve to greatly increase existing congestion currently experienced by residents and workers at Kent State Trumbull, the Trumbull County Technical Center, Omega Packard Product Testing Center and the ILE Training Center. Dual Access electrical feeds are an essential element for world class research and technology centers and crucial to product testing centers. This would make the existing park a model study for any facility that would locate at the park. Other project components include road right-of-way, design, engineering including preparation of technical drawings, wetland mitigation, bid specifications, and related activities. The project maximizes attraction of the private sector, with a high probability of access for creating higher paying jobs (Approx. 600) while maximizing the return on taxpayer investment. The proposed project is regional in nature, is responsive to the new economy, and meets | Trumbull County Planning Commission | 500 | 181 days or more | \$9,000,000 |
| Trumbull | Making a Splash! | The YWCA of Warren is looking to open the pool facilities to serve the community with a healthy alternative for fitness, wellness and activities. The expected outcome of this project is to engage at least 300 local women, youth and children in the YWCA of Warren's pool facilities. | YWCA of Warren | 15 | 91 to 180 days | \$125,000 |
| Trumbull | Packard Music Hall | 2. Parking Lot Resurfacing & Expansion Project - to replace the Hall's very old parking lot for the safety of guests and the general public along with additional capacity with addition of new parking spaces. 3. Stage safety and equipment upgrades - to complete current project related to the stage (performance areas) for safety and equipment modernization. 4. Addition of first ever public elevator to allow access to balcony area to assist aging population and physically challenged patrons; this will also improve safety and reduce falls on balcony stairwells. 5. HVAC heating, ventilation air conditioning improvements to replace original (1955) equipment including air handlers, chillers, pumps, other related equipment and abandonment of old duct. This would include the first ever water tower and energy star rated equipment which will improve the water and energy efficiencies of the local government venue. | City of Warren, Ohio DBA Packard Music Hall | 150 | 31 to 90 days | \$3,514,595 |
| Trumbull | Gates Road Safety Upgrade | The paving of an 1/8 mile stretch of gravel road which is unsafe due to pot holes, lack of proper drainage and hills. This makes road very unsafe for the passing of Amish buggies, cars or trucks. | Mesopotamia Township | 10 | 91 to 180 days | \$275,000 |
| Trumbull | Heating/Cooling System Geo Thermal | Geo Thermal will be installed to the Township building which will heat and cool Township Fire Dept and offices, Township offices, meeting hall, and during or eliminating the use of fossil fuels. | Mesopotamia Township | 8 | 0 to 30 days | \$60,000 |
| Trumbull | Trumbull County Courthouse and Parking Improvement | The project proposes to beautify the existing historic Trumbull County courthouse by planting decorative landscape trees, shrubs, and flowering plants. It also includes the existing parking lot (110) featuring decorative plantings. The Project proposes to Plant approximately ten (10) flowering decorative plants. The beautification of the existing overgrown hedges and installation of two (2) decorative perennial beds for the benefit of all Trumbull County residents. Furthermore the proposed project includes to rehabilitate the existing, historic, downtown Trumbull County Parking lot, by implementing an initial pavement leveling phase followed by an asphalt concrete overlay. The existing parking lot will be expanded to accommodate the existing parking area. ADA parking striping and signage will be installed and some guard rail will be installed and upgraded to meet current vehicle traffic. | Trumbull County Planning Commission | 50 | 31 to 90 days | \$500,000 |
| Trumbull | Sanitary Sewer Interceptor Rehab Project | Project involves the rehab of 13000 linear feet of large diameter sanitary sewer and manholes. Interceptor is located in the City of Warren and runs through the Township of Warren. Project will be managed by the Township of Warren. | City of Warren Water Pollution Control Center | 10 | 0 to 30 days | \$1,000,000 |
| Trumbull | Renewable Energy Model - LEED Certified One-Stop B | The project proposes to construct a renewable energy, LEED Certified county building to house the County Commission, Building Department and Health Department for easy one-stop permitting. | Trumbull County Planning Commission | 200 | 91 to 180 days | \$3,700,000 |
| Trumbull | Farmington Group On-Site Treatment System | This project involves an innovative approach to solving water pollution problems in rural West Farmington Village caused by failing septic systems. The City of Warren and the Trumbull County Board of Health are concerned about the health hazard in this area. The normal course of action would be to extend sanitary sewers, but because this area of concern is in northwest rural Trumbull County - outside the "201" Facilities Planning Area - a more localized solution must be implemented. In this case, a "Group On-Site Treatment System" is the answer. The system will work like a small package treatment plant, except that it is a biological process using ultraviolet rays, not a chemical process. It is a system that has been used with great success in other rural areas in Ohio. Each household would replace its current septic system with a new "group on-site" system that meets county and state standards. The new systems will be connected together in clusters, with new sanitary sewer lines linking the clusters to a common discharge pipe at the Grand River. Great funds are necessary to construct the sanitary sewer connecting the clustered households to the discharge pipe. | Trumbull County Planning Commission | 40 | 91 to 180 days | \$2,000,000 |
| Trumbull | Eastland Area Drainage Improvements | Storm water improvements will include the installation of 2054 linear feet of storm sewer and manholes, along with the installation of eight (8) additional catch basins. Project will include making open lines within backyards and will help alleviate street flooding on the City's southeast side. | City of Warren Water Pollution Control Center | 15 | 31 to 90 days | \$396,250 |
| Trumbull | Golf Drive & Trumbull County Club Stormwater Upgr | Stormwater Improvements will include two (2) detention basins with a total capacity of 10.4 acre-ft along with the replacement of 600 linear feet of storm sewers. Project will alleviate flooding of golf course and private residences which experience property damage during heavy rain events. | City of Warren Water Pollution Control Center | 15 | 31 to 90 days | \$790,000 |
| Trumbull | Traceville-Robinson Road Waterline | Project to construct 13,572 ft of 10" waterline and another 2,110 ft of 18" service line to potentially serve 48 households. | Trumbull County Planning Commission | 40 | 31 to 90 days | \$1,100,000 |
| Trumbull | 2nd Avenue NW Stormwater Upgrades | Stormwater improvements include the construction of 1500 linear feet of new storm sewer to alleviate private property damage from runoff from residential ditches. | City of Warren Water Pollution Control Center | 15 | 31 to 90 days | \$421,000 |
| Trumbull | Coit Drive Stormwater Improvements | Stormwater improvements will include the installation of 644 linear feet of new storm sewer to reduce street flooding. | City of Warren Water Pollution Control Center | 10 | 31 to 90 days | \$153,000 |
| Trumbull | Sludge Thickening Upgrades | Project includes the replacement of existing DAF flocculation system with Gravity Bar Thickener at the City's Wastewater Treatment Plant. The useful life of the current DAF system has expired. | City of Warren Water Pollution Control Center | 25 | 91 to 180 days | \$2,000,000 |
| Trumbull | Golden Triangle Regional Detention Pond | This project involves the construction of a regional detention pond focused on providing detention of storm water for the entire Golden Triangle Watershed. The design of the pond would have a maximum storage volume of 3,340,000 cubic feet and a footprint area of 500 feet x 600 feet (21 acres) x 1 feet deep with 4:1 side slopes. The outlets consist of four 30" conduits for all flow events. The pond as designed provides excess capacity of 70 cfs for the existing 60" Reinforced Concrete outlet that conveys flow through Golden Triangle Properties. | Trumbull County Planning Commission | 250 | 31 to 90 days | \$1,500,000 |
| Trumbull | Wastewater Headworks Improvements Project | Replacement of existing screens and grit removal system. The useful life of the existing primary treatment processes has expired. | City of Warren Water Pollution Control Center | 30 | 91 to 180 days | \$2,500,000 |
| Trumbull | Mahoning Valley Sanitary Dist. Re-carbonation Impr | This project is for the benefit of the 200,000 people served by the District. The Water Plant at the District is a Line softening treatment facility that produces water supersaturated with calcium carbonate from the lime addition. Water from the Settling will remain supersaturated with calcium carbonate until it can be reacted with carbon dioxide. Carbon dioxide is usually added to the supersaturated water to eliminate the excess calcium carbonate by reducing the pH, and neutralizing the hydroxide alkalinity and removing the excess lime calcium carbonate. The carbon dioxide addition occurs in a specialized treatment process upstream of filtration process. Without this improvement consumers and the District will experience the scaling treatment processes, piping, valving and plumbing that will hinder their operation and result in unnecessary maintenance costs. | Mahoning Valley Sanitary District | 20 | 91 to 180 days | \$2,007,711 |
| Trumbull | MVSD - Distribution and Plant Valve and Meter Impr | This project is for the benefit of the 225,000 people served by the District. The purpose of these improvements is to replace 75-year old transmission main valves, blow off valves, air release valves, plant sluice gates, plant flow meters and field vaults. These improvements are necessary so that reliable equipment is available to necessitate the conveyance, operation, and maintenance of the District's distribution system of the public water supply to the Cities of Niles and Youngstown and the Village of McDonald. | Mahoning Valley Sanitary District | 20 | 91 to 180 days | \$2,250,000 |
| Trumbull | Meander Water Plant Control Valves and High Servic | There are five (5) sluice gates that need replaced to control the plant flow and isolated sections of the water treatment process in the high service pump station for maintenance work and repairs. There are five (5) high service pumps that distribute water to the District's 220,000 customers. The installation of the three (3) variable frequency drives on three pumps will greatly enhance the District's ability to alter the volume of water being pumped while greatly reducing electrical consumption (saving energy and money) especially during peak demand time periods. The five (5) high service pumps would also be fitted with mechanical seals which will reduce friction and slow the pumps motor to consume less electrical energy while operating. These two improvements would lead to a considerable savings in electrical consumption. Community risk management to better serve mentally ill offenders through the development of a collaborative local force that plans local criminal justice and mental health programs. Development and implementation of a mental health and criminal justice plan from the task force will reduce the criminalization of the mentally ill and further protect the community. | Mahoning Valley Sanitary District | 4 | 91 to 180 days | \$635,000 |
| Trumbull | Forensic Monitoring | | Forensic Psychiatric Center of Northeast Ohio Inc | 1 | 31 to 90 days | \$40,000 |
| Trumbull | One Stop Shop Building | The proposed project involves the design and construction of a 40,000 square foot building to consolidate city offices at one location. Mesopotamia Kid's Playground Fund is a non-profit group of three girls soccer moms looking for a safe place for our 80% Amish children to play. Statistically there is a higher incidence of both physically and mentally handicapped children in the Amish community. We had previously raised funds and received an OHIO Department of Public Safety's approval for a possible initial handicapped accessible playground. We are now attempting to implement a 100% handicapped accessible basketball court. We have no place for any of our children to play for 5 miles, and that is an awful long way to go by horse and buggy to play on the swings. It would be a great service to our "Little House on the Prairie" town to develop and implement this addition to our area and for area. The expected outcome of this project would be not only a playground, but a healthy place to develop large and small muscle groups. It would also increase socialization skills between the two cultures of both Amish and Yankee kids. (that is us). The measurable outcome would be a decrease in soccer, basketball, and the accidents if the kids had no where to go, a general sense of community happiness with the project measured by survey. Thank you. | City of Warren Engineering Department | 50 | 181 days or more | \$5,000,000 |
| Trumbull | Mesopotamia Kid's Playground | | Mesopotamia Kid's Playground | 1 | 0 to 30 days | \$10,000 |
| Trumbull | Ohio Commerce Center | The Village to purchase through the local Community Improvement Corporation (CIC) the 480 acre land, 1,500,000 sq ft buildings under roof Rail Road spur and other infrastructure, that is currently available for sale. The CIC would operate the Industrial facility utilizing the current business base employ 100 employees, and market the available 100 acres of "shovel ready" land for additional commercial/industrial jobs. | Village of Lordstown | 100 | 31 to 90 days | \$2,750,000 |
| Trumbull | Kinsman Township Sewer Project | EPA mandated project per EPA Consent Order. Approx. 20,000 linear feet of sewer line which would serve 207 Equivalent Dwelling Units. | Kinsman Township | 10 | 0 to 30 days | \$4,200,000 |
| Trumbull | Webber-Cole Road Safety Upgrade | Provide safety upgrades to existing township road, including paving 1.5 miles, installing necessary drainage, and erecting necessary safety barriers. | Kinsman Township | 8 | 31 to 90 days | \$228,000 |
| Trumbull | Heaton-Chute Sanitary Sewer | Project to construct sanitary sewer in an OEPA consent decree unsewered area of concern. | Trumbull County Planning Commission | 20 | 181 days or more | \$1,500,000 |
| Trumbull | Kernont Heights Sanitary Sewer | Project to construct sanitary sewer in an OEPA consent decree unsewered area of concern. | Trumbull County Planning Commission | 20 | 181 days or more | \$2,500,000 |
| Trumbull | Maplewood Park Area Sanitary Sewer - Phase II | Project to construct sanitary sewer in an OEPA consent decree unsewered area of concern. | Trumbull County Planning Commission | 40 | 181 days or more | \$12,000,000 |
| Trumbull | Meadowbrook Sanitary Sewer | Project to construct sanitary sewer in an OEPA consent decree unsewered area of concern. | Trumbull County Planning Commission | 20 | 181 days or more | \$10,000,000 |
| Trumbull | Regional Renewable Energy Smart Grid (RREGS) Model | In compliance with recent and anticipated Federal and State energy policy, Trumbull County, Ohio, is pursuing a secure, clean energy strategy. Trumbull County has adopted a comprehensive Renewable Energy District. Models of renewable energy projects, which also address energy opportunities for other counties and states, will be developed within the district. This appropriations request is for the funding of a RREGS Model. A cooperative partnership with county and township officials, educational entities and private industry, will participate in the RREGS Model. The RREGS Model Project includes planning and engineering, generation, transmission, distribution and marketing, utilizing advanced communications and distribution infrastructure for electrical energy and renewable energy and the main grid. The RREGS Model Project also includes a governmental users will tie into the Smart Grid. The Smart Grid Model will include implementation of a Command/Control Center to administer operations and security. Ideally, the base location will be the City of Niles, municipal power distribution, which uses grid supplied power. It is anticipated that others will follow suit. | Trumbull County Planning Commission | 500 | 181 days or more | \$10,000,000 |
| Trumbull | LED Lighting | Change sodium vapor lights to LED's to reduce energy. | Liberty Township | 20 | 0 to 30 days | \$1,000,000 |
| Trumbull | Belmont Ave Rt. 193 Curb & Drive Approach | Re Rt. 193 Belmont Avenue north to RT 304 - curb and drive approach | Liberty Township | 40 | 31 to 90 days | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Trumbull | Seaborn Street Safety Update | This request is for phase one of a three phase project. It will provide approx 500 feet of new side walk, adding curbs and new drainage, and paving one quarter mile of road. This project will make a safer for students walking near the high school and for residents walking for exercise and recreation. It will make the street safer with consistent walking curbs. The drainage will help eliminate snow on the road in winter. Future phases of this project will include additional sidewalks and paving in order to provide a safe one mile walk for residents, safe access to the high school for students, and access to a "half" mile trail that is in process. | Weathersfield Township | 10 | 31 to 90 days | \$180,000 |
| Trumbull | Trumbull Animal Care and Training Facility | Federal funds will be used to construct a LEED-certified 22,000 sq ft training animal care facility. A partnership of the County Commission, the Trumbull County Career & Technical Center, Kent State University & the Animal Welfare League of Trumbull County will, for the 1st time in NE Ohio, provide a state-of-the-art facility for animal welfare, education, care & control. Operation, maintenance, equipment & educational programming costs will be paid by the local partnership. Programs now at 3 locations will be consolidated, refurbished & operated at this new facility. A dogwood program for veterinary technicians will be installed by Kent State Trumbull. The project will support the needs of shelter animals & the public; increase the number of shelter animal adoptions, expand programs to decrease neglect, abandonment & cruelty; & enable a new 2 year degree program for vets. The new facility will also facilitate training for attorneys & humanitarians involved in animal care & control with the OHC & other standards. Animal care & control means protecting people, pets & wildlife from uncontrolled dogs & cats, & protecting those stray from dangers on the street. | Trumbull County Planning Commission | 120 | 91 to 180 days | \$2,500,000 |
| Trumbull | Station 77 Trumbull County HazMat / Training Centre | Trumbull County Hazardous Materials Bureau covers approx. 17,000 square miles. The HazMat team is the only Hazardous Materials Team in the County. This team is a Type I team and verified by the State of Ohio EMA. At the present time we rent a building to store all of our equipment. Presently we have a 30' response trailer with a Command Post built in, a 2008 Ford F550 to tow it. We also have a ECECON trailer and a 1999 Chevy Suburban to tow it. Our team also has a 30' Mobile Command Post which serves as the back up for our County 911 Center. We also have 4 other trailers that are used by various emergency response agencies. This station would house the HazMat Team in their own world house all of the Co. trailers and provide the county with central training facility and area for all emergency responders. Fire EMS Law. Our HazMat team has been recognized with four counties around our county. This gives us a total of five HazMat Teams that can respond together at a given time. We have over a million dollars worth of equipment and we had to find a location to rent in order to keep our equipment out of the weather. 2009 was the first year we were able to accomplish this task. | Trumbull County Hazardous Materials Bureau | | 181 days or more | \$200,000 |
| Trumbull | Trumbull County Senior Services Unit | The project will provide services to the senior citizens in the county, ages sixty and above, focusing on areas outside of city limits. The coordinators will keep a data base of health conditions the elderly citizens have, to provide to law enforcement officials and dispatchers. They will educate elderly on scams, such as home repairs and so forth. They will also hire the elderly with safety forsenes and services available in the community. | Trumbull County Sheriff's Office | 3 | 0 to 30 days | \$57,015 |
| Trumbull | Weathersfield Township Salt Storage Facility | Construction of salt storage facility (building with solid walls, 'lofters', concrete floor and canvas roof). This building will store salt and road aggregate used to control ice and snow in the winter. It will bring salt storage under roof, eliminating saline runoff from outside storage. This is an EPA project. | Weathersfield Township Trustees | 10 | 31 to 90 days | \$50,000 |
| Trumbull | COPS Officers | The project would allow the Sheriff's Office to hire five new officers. This would allow the department to provide protection and services to the county. The cities within the county limits are extremely understaffed and the department is forced to patrol areas, that would not otherwise need our assistance. Our officers are stretched extremely thin and our department is also facing the possibility of youth, which would force the road patrol to cover vacant positions in the jail. | Trumbull County Sheriff's Office | 5 | 0 to 30 days | \$480,000 |
| Trumbull | Fire Station Energy Efficient | This project would be for a new Fire Station that would use 75% green technology to operate. I would use Geo thermal, solar, and wind if applicable may have restrictions due to Youngstown Air Reserve Base. This project would replace to 10+ year old buildings reducing energy cost and saving us payer numerous dollars. | Bazetta Township | 10 | 91 to 180 days | \$1,800,000 |
| Trumbull | Basement Reconstruction Southington Township Hall | This project is a public works project subject to chapter 153 or the Ohio Revised Code ("IRC" or "Revised Code") for the reconstruction of the Southington Township Hall. The original portion of the Township Hall was constructed in 1930 for use as a courtroom. It is the only remaining structure of this type in the Township. An addition was placed on the building in 1960 and the basement was replaced at this time. Decommission over the past 50 years has been such that the basement is no longer usable. This Trumbull County Council has determined it is unsafe for continued use. The township uses the building to hold its Township meetings and numerous other organizations hold events at the site. Repairing of the structure is important to the Township as well as the community. The Township has obtained plans and advertised for bids for completion of the project. The bids will be opened on 3/11/09. | Southington Township | 10 | 0 to 30 days | \$78,500 |
| Trumbull | Police and Fire Department | The Newton Township fire and police departments are currently regionalizing with the city of Newton Falls and other police departments. The reason for this move is to cut costs for the residents but to also give them the best protection possible. A new public safety building would be ideal with this move. Newton Township has 6,000 residents. The city of Newton Falls has just under 5,000. This building would serve around 10,000 people and give the citizens of these community's the best protection in these public safety forces. This move is a great start to regionalization between the two communities. | Newton Township | 112 | 31 to 90 days | \$2,000,000 |
| Trumbull | New Fire Station | Many factors have contributed to the need for our community to construct a new fire station. The original building was constructed in 1946. It had had one revision since then in 1977. The current building is far too small for the operations we conduct here. We serve as the primary emergency medical service for a 20 square mile area in Trumbull County. We also respond as primary paramedic service for an area over 100 square miles. Our department has gone from an all volunteer status to one that houses a full crew of two part time fire fighters, medical responders 24 hours a day. The current building was never designed for such a use. Our intent is to construct a new building on property already owned and owned the current building into a township administration building and community center. | Bristol Fire Department | 2 | 181 days or more | \$375,000 |
| Trumbull | Build access roads, aprons, taxiways, hangars | Build access roads, aprons, taxiways, hangars | Western Reserve Port Authority | 100 | 91 to 180 days | \$6,550,000 |
| Trumbull | Roof Removal and Replacement | Removal and Replacement of badly leaking roof at the middle-high school building. Total area is approximately 10,000 sq ft. Existing roof must be removed to concrete decking due to water saturation. An architectural engineering study was completed in November of 2008. | Bloomfield-Mespo Local Schools | 10 | 31 to 90 days | \$250,000 |
| Trumbull | Repair and Up Grade Septic Systems | EPH is requiring the upgrade of all sewage treatment facilities to comply with federal standards. We lack the funding to meet this request in full. Some upgrades have been addressed as affordable. | Bloomfield-Mespo Local Schools | 6 | 31 to 90 days | \$120,000 |
| Trumbull | Interoperable communications between local agencies | Communications is a very important issue in public safety. Being able to communicate with data and voice is a must. In every day life and in the event of a disaster. This project would allow all public safety, uniformed and uniformed county agencies to communicate. Not only would the communication system leave room for error which can relate in loss of life. | Trumbull County Emergency Management | 40 | 181 days or more | \$1,500,000 |
| Trumbull | Construction Work / Home-Entry Improvement | Trying to get on contractor for all energy improvement. Roofing, siding, insulation, windows, heating. | CYW,inc | 4 | 0 to 30 days | \$500,000 |
| Trumbull | Rebuilding Lower Girard Lake Dam | Full Employed contractor in Trumbull area for 15 years have had no work for atleast 6 months. Will travel to other counties in Ohio for work. This is not sure on estimated stimulus request or estimated total project cost - used approx. figure | City of Girard, Ohio | 75 | 0 to 30 days | \$16,000,000 |
| Trumbull | Removal and Replacement of Middle/High School Roof | Due to water damage and total saturation of the middle-high school roof removal to the concrete slab and a new roof are needed. Total area is estimated at 10,000 square feet. An engineering study was completed in November of '08 for safety and mild concerns. Local available revenue is not adequate to cover all of the costs associated with this critical need. 1 mil only generates \$55,000 in our district. | Bloomfield-Mespo Local Schools | 10 | 31 to 90 days | \$250,000 |
| Trumbull | Fire Station | Mesopotamia Fire Dept is located in the North West corner of Trumbull County. We serve over 25 sq miles with over 3000 residents which over half are Amish. We started our dept in 1978 with donations and the hard work of the towns people. Our Station is a building well over 50 years old now and was given to us by the Youngstown area before the town it down. We have run out of room and are thinking ahead for the time when Amish will come together to cut costs. We would like to be the example of this services working together by adding a training center, parking area, sleeping quarters, which other dept's can share. | Mesopotamia Vol. Fire Dept | 20 | 181 days or more | \$1,200,000 |
| Trumbull | Funds to buy building for Fire Station | Mesopotamia Fire Dept is located in the North West corner of Trumbull County. We serve over 25 sq miles with over 3000 residents which over half are Amish. We started our dept in 1978 with donations and the hard work of the towns people. Our Station is a building well over 50 years old now and was given to us by the Youngstown area before the town it down. Just this week the only factory in town closed down. This has left a large building sitting empty. The building would be an asset to the fire dept, and not an eye sore for the county, and township. We would be able to save many surrounding townships to help cut costs. | Mesopotamia Vol. Fire Dept | 50 | 31 to 90 days | \$1,000,000 |
| Trumbull | Low Head Lowry Dam Reconstruction | Repair of the existing Low Head Lowry Dam and the existing powerhouse. Dam repair includes: 1.) Patching delaminated concrete. 2.) Installing rock channel protection. 3.) Removing divertoryway wingwall. Power House repair includes: 1.) Conducting a full-depth concrete repair. 2.) Patch delaminated concrete. 3.) Fill the existing Power House building with concrete grout. 4.) Backfill and sheet pile well area. | City of Newton Falls | 6 | 31 to 90 days | \$200,000 |
| Trumbull | Street Sign Upgrade - Safety Enhancement Project | This Citywide Project will replace all existing street signs to improve visibility and decrease maintenance costs allowing for expenditures in other areas of need. Greater visibility will also enhance safety by allowing for better response by emergency personnel. | City of Hubbard | 10 | 91 to 180 days | \$375,000 |
| Trumbull | Elmwood Waterline Looping Project | This Project consists of installation of approximately 1,100 linear feet of 10-inch waterline that would close a loop in the distribution system. In addition to improving reliability of the system, capacity will be increased around the US 62H-80 commercial corridor thereby allowing the distribution system to support additional development. | City of Hubbard | 10 | 91 to 180 days | \$1,000,000 |
| Trumbull | Elmwood Waterline Looping Project | In addition to improving reliability of the system, capacity will be increased around the US 62H-80 commercial corridor thereby allowing the distribution system to support additional development. | City of Hubbard | 10 | 91 to 180 days | \$200,000 |
| Trumbull | WWTP Bar Screen Replacement Project | This project consists of replacing the existing bar screens at the WWTP that has exceeded its useful life and is causing extraordinary maintenance costs. | City of Hubbard | 10 | 91 to 180 days | \$200,000 |
| Trumbull | Oak Knoll Sanitary Sewer Rehabilitation Project | This Project consists of replacing and/or relining sections of approximately 1,500 linear feet of sewer to decrease the amount of infiltration and flow being introduced into the collection system. This, combined with other improvements to the wastewater treatment plant, will allow for additional EDU's thereby allowing for increased commercial and residential development. | City of Hubbard | 10 | 91 to 180 days | \$400,000 |
| Trumbull | Drummond Avenue Sewer Project | This Project would consist of the installation of approximately 2,875 linear feet of gravity sanitary sewer within the right-of-way of Drummond Avenue and situated within the corporate boundaries of the City of Hubbard. It is possible that in the future regulatory agencies may require individual property owners to upgrade existing septic systems deemed to be deficient. The cost for these upgrades may range from \$12,000 to \$20,000. | City of Hubbard | 10 | 91 to 180 days | \$500,000 |
| Trumbull | Mackey St./E. Park Avenue Interceptor Replacement/ | This Project, similar to the Oak Knoll Interceptor project will help to alleviate inflow and infiltration problems that have been identified by City personnel. | City of Hubbard | 10 | 91 to 180 days | \$510,000 |
| Trumbull | WWTP Final Clarifier Installation Project | This project consists of the installation of an additional final clarifier to allow the plant to meet increased organic and hydraulic load that will be placed on it due to the introduction of unsewered areas to the existing collection system, and will also add additional residential and commercial development. | City of Hubbard | 10 | 91 to 180 days | \$1,250,000 |
| Trumbull | Comprehensive Sanitary Manhole Rehabilitation/Repl | This Project will consist of the replacement or rehabilitation of sanitary sewer manholes throughout the collection system to decrease the amount of inflow/infiltration capacity at the WWTP for future residential and commercial development. | City of Hubbard | 10 | 91 to 180 days | \$475,000 |
| Trumbull | Mud Run Dredging and Cleaning Project | This Project consists of work to mitigate flooding at low water areas of the City and surrounding unincorporated areas. In addition to flood mitigation, additional areas will be open for economic development. | City of Hubbard | 10 | 91 to 180 days | \$785,000 |
| Trumbull | West Park Avenue Storm Sewer Improvement Project | This Project consists of the installation of approximately 1,800 linear feet of storm sewer to alleviate flooding and related water damage through a residential corridor. | City of Hubbard | 10 | 91 to 180 days | \$245,000 |
| Trumbull | Catch Basin Improvement/Replacement Project | This Project consists of improving catch basins and the collection of stormwater throughout the City. In addition to allowing for the efficient removal and conveyance of stormwater, this project will also help to mitigate the introduction of stormwater into the sanitary sewer collection system, thereby reducing inflow and infiltration. | City of Hubbard | 10 | 91 to 180 days | \$480,000 |
| Trumbull | Belit Filter Press Replacement | Project also includes replacing the sludge feed pump, polymer blending system and flow meter. | City of Girard | 10 | 31 to 90 days | \$985,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Trumbull | WWTP UV Disinfection and Influent Screen Replaceme | The existing mechanical screen is unreliable and requires frequent maintenance, which is time consuming and expensive. The new screen would have a self-cleaning feature. The UV system will replace the existing gas chlorine system for disinfection of the treated plant effluent. UV will provide a safer method of disinfection both to the operators, local residents and aquatic life. Benefits of this project will be improved plant efficiency, efficient use of WWTP operating funds through reduced maintenance, better wastewater treatment, protection of treatment equipment through better solids removal, safer operating environment through the elimination of gas chlorine, improved water quality. Project will provide need water to serve a new industrial customer located in Girard. The current water system cannot deliver the required water volume and provide required residual pressures during peak flow conditions. The project includes installation of approximately 10,100 feet of 12-inch water line and approx. 2,400 feet of pavement replacement. | City of Girard | 10 | 31 to 90 days | \$1,297,000 |
| Trumbull | Churchill Tank to State Street Water Line | Benefits will be additional jobs for the City of Girard (estimated at 200), improved water distribution system pressures and flows for the target area and other areas within the City. | City of Girard | 200 | 31 to 90 days | \$2,211,000 |
| Trumbull | Infrastructure Uogrades | Install geothermal unit for High School and Elementary. Upgrade the HVAC in each building. \$3,900,000.00 Install energy efficient lighting and controls, upgrade electrical system. \$460,000.00 Replace windows and doors with energy efficient type. \$150,000.00 Replace hot water system with more efficient units. \$ 50,000.00 Replace High School roof. \$1,200,000.00 Install Fire Suppression system. \$1,200,000.00 Replace bleachers at High School. \$175,000.00 Repair concrete walks and entrances. \$250,000.00 Replace 30 year old carpet. \$325,000.00 Demolition of Old Elementary. \$300,000.00 Thankyou for your consideration | Lordstown Local School District | 10 | 31 to 90 days | \$7,800,000 |
| Trumbull | Roadway Resurfacing and Rehabilitation | Resurfacing and rehabilitation of Ohio Turnpike mainline roadway, Milepost 205.0 to Milepost 209.0 | Ohio Turnpike Commission | 75 | 31 to 90 days | \$3,000,000 |
| Trumbull | Bazetta Green Fleet Project | The project is to increase the use of cleaner American built and vehicles and energy-saving transportation technologies in order to improve air quality and health, reduce climate change, curb dependence on imported petroleum, and support Ohio's economy. This will be accomplished by purchasing twelve newer, more efficient vehicles that operate on Alternative Fuel, from a local Ohio auto dealer, over a five-year period. The project will reduce the carbon footprint of our vehicles significantly improving the environmental performance of our vehicle fleet through reduced fuel usage and increasing the use of alternative fuels. | Bazetta Township Police Department | 26 | 0 to 30 days | \$87,150 |
| Trumbull | Tradeswomen TOOLS - Warren | HRW, in partnership with organizations in each region of the state, is preparing to launch Tradeswomen TOOLS: Training, Outreach, Opportunity, Leadership and Support. Funds will support establishment of a Regional Office in Warren, Ohio with a Supportive Services Coordinator, Knowledge Manager, a Tradeswoman Liaison, and 12 program specialists. This program will use the expertise of women already working in nontraditional fields to advance diversity initiatives in the fields of construction, heavy highway, energy, and advanced manufacturing. Providing resources for outreach, education and support are proven to increase women's rate of success within these fields. Programs offered year-round include: orientation to nontraditional careers, individualized career counseling, one-stop career career referrals, employer-sponsored training, mentoring, math literacy and tradeswoman leadership development. HRW's passion and expertise is unique in the state. HRW embraces a unique strategy approach, using demand-driven programming to connect job seekers to employers. 2000 linear feet of new storm water replacement. Upgrade the existing 12" storm sewer to 18" and 24". Replace existing drive aprons composed of concrete and asphalt. | Hard Hatted Women | 10 | 31 to 90 days | \$200,000 |
| Trumbull | south ray watershed improvements phase 2 | removal and replacement of 4 miles of existing asphalt surface course. Removal and replacement of various areas of poor base and subbase. This project is sought for by Bazetta Township for the purchase of a new dump truck, sander and snowplow. The current truck in use is a 1988 International and is on the verge of total failure. The truck is used for salting township roads and as a result the characteristics show abnormal wear and tear because of the salt, although the drivers take proper care and give a regular washings the truck is rusting out and has been been embarking more than usual. The township has recently seen a dramatic loss of jobs and cuts in tax base, due to the losses of Kmart Distribution Center and Dejeu Automotive. | howland township | 10 | 31 to 90 days | \$110,000 |
| Trumbull | road resurfacing 2009 | removal and replacement of 4 miles of existing asphalt surface course. Removal and replacement of various areas of poor base and subbase. This project is sought for by Bazetta Township for the purchase of a new dump truck, sander and snowplow. The current truck in use is a 1988 International and is on the verge of total failure. The truck is used for salting township roads and as a result the characteristics show abnormal wear and tear because of the salt, although the drivers take proper care and give a regular washings the truck is rusting out and has been been embarking more than usual. The township has recently seen a dramatic loss of jobs and cuts in tax base, due to the losses of Kmart Distribution Center and Dejeu Automotive. | howland township | 8 | 31 to 90 days | \$400,000 |
| Trumbull | Transportation Updates | 1.5 miles of removal and replacement of 50 year old asphalt pavement, concrete curbing and storm sewer structures. | Bazetta Township | 1 | 0 to 30 days | \$97,500 |
| Trumbull | fairhill area rehabilitation roads, curbs, waterli | 15 miles of removal and replacement of 50 year old asphalt pavement, concrete curbing and storm sewer structures. | howland township | 25 | 91 to 180 days | \$830,000 |
| Trumbull | morgandale area sanitary sewer | install 12,000 l.f. sanitary sewers to an existing residential area with 90 percent failed septic systems. Area predominantly low income. | howland township | 10 | 91 to 180 days | \$1,000,000 |
| Trumbull | venice heights watershed improvements phase 3 | 3200 l.f. of ditch and drainage improvement. Regrading of existing water courses, replacement of 2 undersized culverts | howland township | 8 | 91 to 180 days | \$100,000 |
| Trumbull | howland springs road safety upgrade/slope failure | Safety upgrades of an existing embankment adjacent to roadway, total length of project is 150 ft. Removal and replacement of embankment to construct a retaining headwall at an existing 72" culvert. Reprofile existing culvert, the drain and construct new profile of existing pavement for improved drainage | howland township | 10 | 91 to 180 days | \$80,000 |
| Trumbull | Restore Police Jobs | The Police Department lost one paramitar last year due to finances and will lose another this year. | Hubbard Police Department | 2 | 0 to 30 days | \$250,000 |
| Trumbull | Ohio Commerce Center Industrial Park | Acquire the Ohio Commerce Center, 400 acre level, 1.5 million square foot building, railroad tracks and existing business. Green Flex Epic Building Construction. | Village of Lordstown | 505 | 31 to 90 days | \$5,250,000 |
| Trumbull | Army Ordnance Depot Land Acquisition & Building R | Acquire the 8.75 acre Army Ordnance Depot land and buildings. The buildings need major rehabilitation. Once it is acquired it will be used to attract industry to lease. | Village of Lordstown | 100 | 31 to 90 days | \$5,000,000 |
| Trumbull | Raze vacant school building | Raze the abandoned, vacant school building in the center of town. | Village of Lordstown | 50 | 91 to 180 days | \$250,000 |
| Trumbull | spoth bolindale watershed improvement phase 2 | 3000 l.f. of storm sewer replacement. Installation of new storm basins. The proposed upgrade will alleviate existing flooding and drainage problems. | howland township | 8 | 91 to 180 days | \$150,000 |
| Trumbull | Recreation and Senior Center | 50,000 square foot building placed on the school property to be used as a senior center for the 55 and over and a recreation center for the residents of the Village of Lordstown. | Village of Lordstown | 50 | 181 days or more | \$2,500,000 |
| Trumbull | south bolindale watershed improvement phase 3 | 3700 l.f. of storm sewer replacement. Installation of new storm basins and improvement of existing drainage problems. Safety upgrade of 1250 l.f. of existing pavement to 15' width minimum. | howland township | 10 | 91 to 180 days | \$175,600 |
| Trumbull | Industrial Trace, Industrial Parks Area | Two mile, 24 foot wide industrial grade pavement including curb and gutter for truck route transferring between two major industrial parks including two mile 12 inch sanitary sewer and two mile 8 inch potable water line. | Village of Lordstown | 50 | 181 days or more | \$3,245,250 |
| Trumbull | Secondary Road Mill & Fill | 34,500 feet long by 24 feet wide mill and fill secondary road replacement. | Village of Lordstown | 50 | 91 to 180 days | \$2,700,561 |
| Trumbull | East Side Sanitary Sewer Completion | Install 17,500 feet sanitary sewer ranging from 12 to 30 inch diameter pipe serving the northeast side of the Village and including some northeast jobs of the Village and completing the sanitary sewer for the Village. | Village of Lordstown | 50 | 91 to 180 days | \$3,935,000 |
| Trumbull | devon watershed improvement phase 2 | removal of 2200 l.f. of undersized storm sewer pipe. Installation of new 18" and 24" storm sewer including catch basins. Re-profile existing pavement to improve drainage. | howland township | 10 | 91 to 180 days | \$160,000 |
| Trumbull | Thirty-second Street Water Project | Installation of 950 feet of 8 inch water line to serve residents on Thirty-Second Street. | Village of Lordstown | 50 | 31 to 90 days | \$50,000 |
| Trumbull | ublic works building upgrade | Rea mandated improvements to comply with NPDES storm water phase 2. Includes the installation/1500 l.f. of new sanitary sewer from main and sewer lift pump station, one debris separator tank and auxiliary generator, abandonment of existing septic system. Regrading the 6000 sq. ft. of surface area, landscape to control storm water run off. Installation of debris collectors within the existing storm sewer network. Replacement of existing fuel storage tanks including the installation of spill containment barrier. Removal and disposal of 2500 cu. yd. of unusable fill. Upgrade to existing 45 year old building, roof, plumbing, electrical and HVAC. | howland township | 25 | 91 to 180 days | \$662,500 |
| Trumbull | Apprentice Training Facility | Renovation of existing manufacturing structure and the purchase and installation of various pieces of manufacturing equipment that will be used to train workers in the fields of machining and welding. The actual work being done would be related to the energy industry. The Mahoning Valley Opportunity needs skilled workers. There are no skilled workers coming up through the ranks to replace the existing aging workforce here in the Youngstown/Warren area. As new companies in Ohio emerge into the energy fields, they will be looking for both skilled help and existing manufacturers to partner with. JAS Manufacturing can position itself to fill that need with the right equipment, training and skilled labor. If the program was state sponsored, perhaps the state could help to identify manufacturing businesses related to the energy industry who would consider partnering with JAS Manufacturing as an effort to produce their products. Our skilled workforce can only be considered a renewable resource if we see to it that candidates are continually identified and trained to fill a need here in the Mahoning Valley. | PCF Services, LLC dba JAS Manufacturing | 25 | 91 to 180 days | \$2,500,000 |
| Trumbull | Warren Woods | 55 unit subsidized housing for disabled. The property needs to become energy efficient with new HVAC and roofs. The units also need a rehab. | Summit management Services Inc. | 10 | 181 days or more | \$3,500,000 |
| Trumbull | road resurfacing 2010 | Removal and replacement of 4 miles of existing asphalt surface. Removal and replacement of various areas of poor base and subbase. | howland township | 8 | 31 to 90 days | \$410,000 |
| Trumbull | THE MAHONING VALLEY SANITARY DISTRICT SETTLING AND | THESE IMPROVEMENTS INVOLVE THE CONSTRUCTION OF NEW SETTLING TANKS AND RECARBONATION FOR THE DISTRICT'S REGIONAL WATER TREATMENT PLANT WHICH SERVES 200,000 PEOPLE. THE PROJECT ALSO INVOLVES THE INSTALLATION OF TWO RAW WATER METERS AND TWO PLANT RAW WATER LINES. | MAHONING VALLEY SANITARY DISTRICT | 40 | 91 to 180 days | \$17,200,000 |
| Trumbull | road resurfacing 2011 | removal and replacement of 4 miles of existing asphalt surface. Removal of various areas of poor base and subbase. | howland township | 8 | 31 to 90 days | \$425,000 |
| Trumbull | road resurfacing 2012 | removal and replacement of 4 miles of existing asphalt surface. Removal and replacement of various areas of poor base and subbase. | howland township | 8 | 31 to 90 days | \$450,000 |
| Trumbull | road resurfacing 2013 | removal and replacement of 4 miles of existing asphalt surface. Removal and replacement of various areas of poor base and subbase. | howland township | 8 | 31 to 90 days | \$455,000 |
| Trumbull | New Fire Station #47 | Warren Township is respectfully requesting two million dollars (\$2,000,000.00) to construct a new fire station. Fire station #47 was constructed in 1950 in Leansburg, Ohio against the Mahoning River in Southwest Trumbull County. Throughout the years, the fire station has been a victim of near back erosion. The resulting fire has caused wall cracking and bowing. The west wall is also suffering the same damage. The interior of the fire station has also been damaged as the roof has been pulled away from the walls due to the shifting of the building. The apparatus floor is also sinking, placing the personnel, apparatus and general public's safety in danger. Utility bills are sky rocketing due to the leaks in the building. The new fire station would allow for an environmentally friendly and structurally sound building. Land has been acquired for the project previously but due to the economic down turn involving numerous steel mills in the jurisdiction, funding this project has been impossible. Warren Township is denied for this project, the uncertainty of the fire station is unclear. | Warren Township Fire Department | 50 | 0 to 30 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Trumbull | Grocery Store | Re-establish a grocery store in Loridon. This project will serve senior citizens, save energy, create jobs at minimal cost. This being cost effective in the use of taxpayers money. Our population is 52 years and older with a substantial population of 62 years and older. Gas prices are high and will continue to climb. We need a local grocery store for our seniors who can't drive or can't drive far (to the local stores to cover it miles away). Having a store in our village will conserve gasoline since people will not have to drive as far to shop. Finally, the store would create 10 jobs, plus construction jobs. Once in operation we hope the creation of 10 additional jobs. The mix of jobs will be 12 full time and 8 part time jobs. Plus the increased taxes of our suppliers. The funding from this project will have immediate and long term impact on our local economy. Taxpayers money couldn't be better spent. Sincerely, Rita McGee | California Pizza & Things | 20 | 0 to 30 days | \$350,000 |
| Trumbull | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly northern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be Internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Trumbull | Champion Township Safety Services Complex | Our community would request funding to replace two non handicap accessible facilities, our current the station which is over 64 years old, our current police and township hall and offices. It is our goal to secure funding to build one new ADA compliant and environment friendly building would be a model for the safety services complexes in the state. We would like to make the facility cost effective. As the project is funded by current expenditures with the facilities that we have, could be used for future infrastructure projects within our township. The replacement of the facility would be performed by local workers, therefore keeping all funds used in the project locally and in Ohio. By building the safety services training and community center for our residents, it is a catalyst for the growth of our local economy and the Champion Township. | Champion Township Fire Department | 50 | 181 days or more | \$1,500,000 |
| Trumbull | Rescue/Pumper for Champion Township Fire Department | Our department would like to seek funding to purchase a new rescue vehicle for our department. Due to the current situation in our township, we are unable to replace much needed equipment and vehicles. The loss of over 10,000 jobs in the township over the last 10 years has put a severe strain on our township budget. We would like to see the funding to purchase the vehicle that we need to properly protect our residents and a vital link in the states transportation system, the SR26 routes that travel from the Ohio Turnpike to the SR26. | Champion Township Fire Department | 30 | 181 days or more | \$250,000 |
| Trumbull | O.H.I.O Ohio Hydrogen Inovation Organization | We need nothing but the money to get our project tested and approved. We have plenty of energy storage and an plenty of willing and ready people ready to work. We will need equipment and raw material to produce our product. This product uses water and at least doubles our gas mileage and as this point with all our costs makes it go over 4 times the mileage. We have all certified and verified tools. | International Hydrogen Generator Inc. | 5,000 | 0 to 30 days | \$20,000,000 |
| Trumbull | Buy a popular, but now closed restaurant & put it 10 | I would like to purchase & reopen a once thriving restaurant. It is not necessary, it put at least ten people back to work, including myself. This has been the long dream of mine. I am unemployed & need a job. I am not exactly sure of the purchase price at the moment, but the Warren, Ohio area needs to come alive again. I am willing to do my part in making that happen if given a chance. Thank you. | UNEMPLOYED! | 10 | 91 to 180 days | \$400,000 |
| Trumbull | Tod Avenue Reconstruction (Engineering & R/W) | The Tod Avenue Project would consist of engineering & R/W services for a roadway improvement project. The engineering would include all preliminary development, environmental studies, and final design. R/W services would include plan preparation, appraisals, reviews, negotiations, and acquisition. | City of Warren Engineering Department | 5 | 181 days or more | \$600,000 |
| Trumbull | Lovers Lane Reconstruction (Engineering & R/W) | The Lovers Lane Project would include engineering and R/W services. Engineering includes all preliminary development, environmental studies, and detailed design. R/W services includes plan development, appraisals, reviews, negotiations, and acquisition. | City of Warren Engineering Department | 5 | 181 days or more | \$600,000 |
| Trumbull | Johnson Township Community Hall Elevator | Reopen the Johnson Township community center with an elevator to provide better access to the building's kitchen and a meeting hall, both located in the basement. The basement is now accessible only by a steep set of stairs and a ramp that was designed for food and beverage deliveries. An elevator would allow senior citizens and persons with disabilities to access a 50 person meeting space and the building's kitchen. | Trumbull County Planning Commission | 12 | 31 to 90 days | \$55,000 |
| Trumbull | Resurfacing Program - Federal Aid System Roadways | This project consists of the milling and resurfacing of roadways within the City that are currently included on the Federal Aid System. The streets are SR24, SR25 and US67. The project includes the milling of 2 inches of asphalt off of each roadway and the installation of 2 inches of asphalt concrete and road striping. | City of Hubbard | 12 | 0 to 30 days | \$1,000,000 |
| Trumbull | Youngstown-Warren Regional Airport - Intermodal Ra | This project will establish the Airport as a full intermodal facility connecting air, rail, and highway accessibilities and providing easy reliable access to waterways. This project consists of reconstructing a one and half-mile rail line, tying in an existing rail bed, and constructing an additional new one quarter mile rail bed providing a rail spur to the Airport's Cargo Development Area. Potential job creation for manufacturing and higher connectivity to domestic and international destinations could easily exceed 800-1000 jobs. | Western Reserve Port Authority | 800 | 31 to 90 days | \$25,000,000 |
| Trumbull | Bedford Road Sanitary Sewer | Program WPCFL - The Bedford Road Sanitary Sewer Project involves the construction of approximately 784 feet of 8' SDR-35 PVC Pipe, 612 feet of 8' SDR-26 Pipe, 392 feet of 6' SDR-35 PVC Pipe Lateral and 5-Precast Concrete Manholes located in Bedford Township, Trumbull County, Ohio within the Metropolitan Sanitary Sewer District. There are 14 households located within the project area benefiting from the construction of a sanitary sewer. The Trumbull County Board of Health documented that the area is a Public Health Nuisance and the preferred course of action to address the Nuisance is the construction of sanitary sewer. Engineering for this project is complete and a public hearing has already been conducted. The project will alleviate a human health risk and benefit groundwater and streamwater runoff which enters the Yankee Creek Watershed. The Median Household Income for this area is \$34,191 per year according to Census 2000. The project is ready to go and can be bid as soon as permits funding is in place. | Trumbull County Planning Commission | 20 | 0 to 30 days | \$250,000 |
| Trumbull | Youngstown-Warren Regional Airport - Airline Propo | This project will create Ohio's only based commercial air passenger airline. With the Airport's ongoing opportunity to lease/purchase two Embraer 190 Series commercial passenger aircraft, the Airport will own and operate an airline for the purpose of servicing Ohio's commercial airports to highly frequented destinations. The Embraer 190 Series aircraft is the most cost efficient commercial aircraft of its size. Requested funding will be used to offset start-up costs, including deposits for aircraft acquisition and payments, FAA certifications, regulatory compliance, marketing, and other related costs. Once established the Airport has the opportunity to acquire additional aircraft to expand service throughout Ohio. Project job creation will be 140 total jobs with an additional 50 jobs per added aircraft. | Western Reserve Port Authority | 140 | 31 to 90 days | \$13,750,000 |
| Trumbull | Acquisition of Apartments for Crisis Stays | Money is requested for the acquisition of an apartment complex to serve as a crisis shelter for individuals with mental illnesses. Valley Counseling Services is a local, non-profit, mental health care provider that services the residents of Trumbull County at three locations throughout the area. | Valley Counseling Services | 5 | 31 to 90 days | \$100,000 |
| Trumbull | Development of Adult Care Facilities | Funds would be used to acquire as few as one, as many as three, vacant homes within the city of Warren. Homes would be rehabilitated and developed into adult care facilities to serve those with moderate to severe mental illnesses. Such facilities would help prevent homelessness among this at-risk group, and allow individuals to have access to the mental health services they need. | Valley Counseling Services | 15 | 31 to 90 days | \$150,000 |
| Trumbull | Consumer Run Community Drop-In Center | Funds are requested to help cover the start-up costs of a consumer run community drop-in center. This drop-in center would provide activities and programming for adults with moderate to severe mental health illnesses. Clients would benefit from the program by not only having an outlet for activity, but would have quick access to mental health services they may need. | Valley Counseling Services | 5 | 31 to 90 days | \$25,000 |
| Trumbull | Purchase of Fuel-Efficient Cars for Service Fleet | Valley Counseling Services is a local, non-for-profit behavioral health provider serving the residents of Trumbull County at three locations throughout our community. Funds are being requested to purchase several alternative fuel vehicles to replace current vehicles being used. The new, additional vehicles will not only cut down on maintenance and fuel costs for VCS, but will allow staff members to operate in a more efficient manner and provide a better delivery of services to VCS clients. Valley Counseling Services is a local, non-profit mental health care provider serving the residents of Trumbull County at three offices around the county. | Valley Counseling Services | 20 | 0 to 30 days | \$150,000 |
| Trumbull | Replacement of building roof | Requesting funds for the replacement of roof to existing structure at our southeastern office location. Valley Counseling Services is a local, non-for-profit mental health care provider funded by Trumbull. Utilities. | Valley Counseling Services | 10 | 0 to 30 days | \$50,000 |
| Trumbull | Youngstown-Warren Regional Airport - Commercial Ha | Construction of new large, 100,000 sq. ft. aircraft hangar for maintenance and storage of commercial size aircraft. The Airport has invested \$7 million in this area to accommodate this highly attractive project to locally create 150+ high paying jobs in North East Ohio. Currently there are no facilities available at the Airport to attract this type of quality jobs. With the 2008 abatement of Ohio's Aviation Maintenance Sales Tax, Ohio now an attractive location for regional and national aircraft maintenance services. Properly marketed, this facility could easily attract and exceed the job projection stated here. | Western Reserve Port Authority | 150 | 31 to 90 days | \$12,000,000 |
| Trumbull | Technology Upgrade | Funding is needed for the completion and implementation of an electronic health care system including the upgrading and replacement of software hardware, and necessary infrastructure. This system will be designed to replace the current paper based record management system and to make appropriate updates to software and hardware that is currently used to support the daily operations of VCS at three locations in Trumbull County. These upgrades will not only allow VCS to improve the quality of care offered to our clients, but will also dramatically reduce the costs of providing service to our clients. | Valley Counseling Services | 10 | 0 to 30 days | \$200,000 |
| Trumbull | Youngstown-Warren Regional Airport - Hangar One | Demolition of two existing main corporate hangars and construction of one modern corporate hangar, 50,000 sq. ft. Existing facilities were built in 1939 (PWA Project) and 1950. These facilities are antiquated and do not meet today's aeronautical standards. Current facilities' maintenance and utilities costs are excessive and current clients and operators are stressed by these costs, and as such, hinder retaining employees, lease employment, and significantly inhibiting growth to the Airport. As a result of this project, we expect retention of 50 employees with expectations of an additional 100 new jobs. | Western Reserve Port Authority | 60 | 31 to 90 days | \$7,300,000 |
| Trumbull | West Liberty/Hughes/McDonald/Hillcrest Waterline P | This project will construct approximately 2,700 feet of 8 inch waterline on the subject streets. This project will provide water services to 30 existing homes of Italy low to moderate income. | Weathersfield Township | 10 | 0 to 30 days | \$305,000 |
| Trumbull | Trumbull County Railroad Crossing Underline | This project is for Railroad Crossing upgrade on the Warren & Trumbull Rail Road. This project will allow for the rehabilitation of 7 road crossing surfaces and 8 warning devices. This will increase the public safety of these crossings and the safe passage of trains. These crossings are located in the Warren area. | Ohio Central Railroad | 50 | 31 to 90 days | \$2,061,040 |
| Trumbull | Cityde Resurfacing Program | Resurface 30 various City Streets by milling 2" mill and fill with Asphalt Concrete. | City of Niles | 20 | 31 to 90 days | \$650,000 |
| Trumbull | Fire Station Renovations | Renovations to a fire station built in the 1920's | City of Hubbard | 2 | 0 to 30 days | \$370,000 |
| Trumbull | Safety equipment-Officers manpower | Replacement old light bars and radios, hire part time officers to supplement remaining force. Part time officers are essential in securing our presence and safety of our citizens. Light bars are outdated and hazardous to the officers when using them. | Warren Township Police Department | 10 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Trumbull | Youngstown-Warren Regional Airport - Sewage Collec | The Airport's sewage collection station is inclusive of an infrastructure designed and constructed in the 1940's. The amount of Airport surface wear that is currently directed into the collection system, and treated through Trumbull County's sewage treatment plant, causes excessive wear to airport operations and causes an unnecessary burden to the County's capacity to treat wastewater. Construction of a new sewage collection station will alleviate the Airport excessive and unnecessary sewer cost and will increase Trumbull County's sewage capacity as its Hazardous Waste Treatment Plant. Although no new direct jobs can be created by this project, the indirect contributions could be significant through increased treatment capacity needed for industrial, commercial, and residential growth. | Western Reserve Port Authority | 0 | 31 to 90 days | \$250,000 |
| Trumbull | Gilbert Street Sanitary Sewer | Program WPCFL - Gilbert Street Sanitary Sewer, Weatherfield township, Trumbull County, Ohio. The Gilbert Street Sanitary Sewer Project consists of an 8" sanitary collector sewer starting from the east end of Gilbert Street flowing west to the dead end where a pump station will be constructed to convey flow via a 4" force main connecting to an existing manhole located on Mahoning County's property that includes the Meadow Wastewater Treatment Plant. design engineering for this project is almost complete. This area has been designated by the State of Ohio EPA as an Unsewered Area of Concern for Trumbull County. The project shall benefit approximately 15 Low and Moderate Income households. | Trumbull County Planning Commission | 20 | 31 to 90 days | \$350,000 |
| Trumbull | Bolindale Sanitary Sewer | Program WPCFL - The Bolindale Sanitary Sewer Project located in Howland Township, Trumbull County, Ohio includes 1,500 linear feet of 8" sanitary sewer laterals, 10,025 linear feet of 8" sanitary sewer (PVC 8 D 30), 3,100 linear feet of 10" sanitary sewer (PVC 10 D 36) and 2,400 linear feet of 8" sanitary force main (PVC). The project scope also includes the installation of a wastewater pumping station along with a standby generator and a flow meter in meter pit. Mobilization, restoration and erosion control items are also included in this project. The proposed Bolindale Sanitary Sewer shall service 59 very low income single family dwellings. Over 24 percent of all persons in the project area are living below the poverty level according to Census 2000 compared to the county's average of 10.3 percent. The project design engineering shall be completed by June 1, 2008 with an approved Permit To Install. Construction shall begin shortly thereafter assuming stimulus grant funds are secured to move forward with the project. If CDBG funds need to be applied for and approved then project construction shall start in Fall 2008. | Trumbull County Planning Commission | 20 | 91 to 180 days | \$1,900,000 |
| Trumbull | Vienna Township Sanitary Sewer Project | This project is intended to bring sanitary sewer to homes that currently have septic systems. Trumbull County is notorious for having poor soil and as a result, many of the septic systems, new and old, are failing. To replace these systems, the county has mandated costly and unsightly septic systems that many residents can't afford. This project would make sanitary sewer available to most if not all homes in Vienna Township eliminating the need for costly septic systems that will eventually fail again and be a cost burden. This new system will also increase the property values in the area and make it more attractive for new housing developments and small business. | Turkey Run Control Committee | 50 | 181 days or more | \$12,000,000 |
| Trumbull | Mosquito Lake State Park Municipal Sewer Connectio | Project includes connecting the campground and other public facilities at Mosquito Lake State Park to Trumbull County Municipal Sewer service. Connection would provide for better sanitation for the public and provide for reduced environmental hazard of contamination for this important recreation destination. Currently the park is served by vault toilets for overnight and day-use visitors. | ODNR-Parks & Recreation | 35 | 31 to 90 days | \$250,000 |
| Trumbull | Purchase of a Senior Citizen Van | The city currently offers transportation to the senior citizens of our city. We cut down from five days a week to two days due to lack of funds. The van we use is a 2002 with 100,000 miles and is getting to the point where it is not safe to transport seniors. The seniors are very dependent on this service and, when broken down, they are at a loss for transportation. By not having to fund repairs, we may be able to offer service five days a week again. The City of Girard has been in Fiscal Emergency since 2001. | City of Girard | 25 | 0 to 30 days | \$40,000 |
| Trumbull | Street Resurfacing | City streets and roads are in desperate need of resurfacing. Potholes on just about every street in city of Girard has been in Fiscal Emergency since 2001 and short of money for funding projects. | City of Girard | 100 | 0 to 30 days | \$500,000 |
| Trumbull | Park Improvements/Bathroom facilities | Bathroom facilities at city parks need renovation. | City of Girard | 50 | 0 to 30 days | \$500,000 |
| Trumbull | Business Growth Project | To expand the business and create new jobs that we currently cannot afford to do without help. We have the opportunity to quickly expand and grow the business do to the current economic situation, but do not have the funds to do so. | Falls Asset Management, LLC | 15 | 31 to 90 days | \$100,000 |
| Trumbull | Waterline replacement | Water lines are antiquated and in dire need of replacement. Constant water breaks. | City of Girard | 50 | 0 to 30 days | \$2,000,000 |
| Trumbull | Purchase of six (6) police cruisers | The city was able to purchase six (6) police cruisers in 2008. The remaining six (6) cruisers are 1995's with 100,000+ miles on them. | City of Girard | 25 | 0 to 30 days | \$200,000 |
| Trumbull | Removal of telephone poles on N. State St. to comp | | City of Girard | 50 | 0 to 30 days | \$1,000,000 |
| Trumbull | Strategic Languages Inst.'s Ohio Public School Ini | Strategic language instruction (Arabic, Chinese, Russian, Korean, Farsi, Hindi, Pashtoon, etc.) offered on a secured on-line network to all Ohio PUBLIC school systems. Learning these languages is mandatory for future business applications and securing job opportunities within Ohio. Waiting until a few college level students show interest is too little, too late - we need to begin to offer this program in the public school system immediately. Our program includes an interactive, instructional and interdisciplinary approach to teaching languages. Upon successful implementation within the Ohio school system, we expect to market this program, nationwide and internationally (Canada, South America, Australia), creating a 100 person sales team, as well as, co-creating English language offerings in countries of the languages we teach - thereby, creating a further 100 jobs for Ohio native English speakers, to act on-line and by telecom, to instruct foreign students in English language dialect. These foreign based affiliates will reciprocate with help to Ohio students, involved in language learning. | StrategicLanguagesInstitute.com | 200 | 91 to 180 days | \$100,000 |
| Trumbull | Fire Station Replacement Project | The project involves the construction of a new fire station and related appliances in order to replace the current station that was destroyed by a fire in 2007. The project includes the new building, septic system, utilities & all other required elements according to current building codes. | Braceville Township | 25 | 31 to 90 days | \$125,000 |
| Trumbull | handicap vehicle needed for kidney dialysis | Need a new handicap accessible lift van, six or eight cylinder all wheel drive with swivel front passenger seat with automatic open and close door electric filter a blanket warmer, which is a kidney dialysis patient. This will be her primary form of transportation as there is no local transportation available for her and she can not afford to pay for a new vehicle, she is only 51 years old and is not a home bound patient needing doctors appointments kidney dialysis, trips to kidney transplant hospital and clinics, and outpatient surgeries and procedures, a ramp for a lift van already exists at the home address. Please help this lady, she is a person who has much to live for this vehicle as she does not have a lift van at this time and it is very difficult on both of us with her having to lift her in to the vehicle I can by hand as this is not safe for her. Thank you so much for your consideration. She is a doomy. | | 1 | 0 | \$70,000 |
| Trumbull | Bolindale Sanitary Sewer | This is an updated version of a previous submission - Program WPCFL - The Bolindale Sanitary Sewer Project located in Howland Township, Trumbull County, Ohio includes 1,500 linear feet of 8" sanitary sewer laterals, 10,025 linear feet of 8" sanitary sewer (PVC 8 D 30), 3,100 linear feet of 10" sanitary sewer (PVC 10 D 36) and 2,400 linear feet of 8" sanitary force main (PVC). The project scope also includes the installation of a wastewater pumping station along with a standby generator and a flow meter in meter pit. Mobilization, restoration and erosion control items are also included in this project. The proposed Bolindale Sanitary Sewer shall service 59 very low income single family dwellings. Over 24 percent of all persons in the project area are living below the poverty level according to Census 2000 compared to the county's average of 10.3 percent. The project design engineering shall be completed by June 1, 2008 with an approved Permit To Install. Construction shall begin once all grant funds have been secured including CDBG Formula, Water & Sewer and a 0% WPCFL loan. | Trumbull County Sanitary Engineer | 20 | 31 to 90 days | \$134,873 |
| Trumbull | Bedford Road Sanitary Sewer | This is an updated revision to a previous submission - Program WPCFL - The Bedford Road Sanitary Sewer Project involves the construction of approximately 784 feet of 8" SDR-36 PVC Pipe, 610 feet of 8" SDR-26 Pipe, 392 feet of 8" SDR-36 PVC Pipe Laterals and 5-Precast Concrete Manholes located in Broadfield Township, Trumbull County, Ohio within the Metropolitan Sanitary Sewer District. There are 14 households located within the project area benefiting from the construction of a sanitary sewer. The Trumbull County Board of Health documented that the area is a Public Health Nuisance and the preferred course of action to address the nuisance is the construction of sanitary sewer. Engineering for this project is complete and a public hearing has already been conducted. The project shall alleviate a human health risk and benefit groundwater and stormwater runoff which enters the Yankee Creek Watershed. The Median Household Income for this area is \$34,191 per year according to Census 2000. The project is ready to go and can be bid out as soon as stimulus funding is in place. | Trumbull County Sanitary Engineer | 20 | 31 to 90 days | \$236,647 |
| Trumbull | Gilbert Street Sanitary Sewer | This is an updated version of a previous submission - Program WPCFL - Gilbert Street Sanitary Sewer, Weatherfield township, Trumbull County, Ohio. The Gilbert Street Sanitary Sewer Project consists of an 8" sanitary collector sewer starting from the east end of Gilbert Street flowing west to the dead end where a pump station will be constructed to convey flow via a 4" force main connecting to an existing manhole located on Mahoning County's property that includes the Meadow Wastewater Treatment Plant. design engineering for this project is almost complete. This area has been designated by the State of Ohio EPA as an Unsewered Area of Concern for Trumbull County. The project shall benefit approximately 15 Low and Moderate Income households. | Trumbull County Sanitary Engineer | 20 | 31 to 90 days | \$295,573 |
| Trumbull | WWPC Hydro Electric Project | Final design and construction of a hydro-electric unit to be installed at the wastewater treatment plant effluent weir. The unit will produce 15 KW @ the average plant flow of 15 mgd. | City of Warren Water Pollution Control Center | 5 | 31 to 90 days | \$500,000 |
| Trumbull | Ambulance | This project would replace a 1996 sit out ambulance with a new ambulance. This project would not have to be bid as it is a state purchase project. This would include all emergency lights, siren, lettering striping, and vehicle to operational. This project would be operational the day the township receives the vehicle as all equipment for use is all ready owned by the Township. | Bazetta Fire Department | 25 | 0 to 30 days | \$106,000 |
| Trumbull | Empowerment of People with Disabilities | 1. Hire 5 new employees (people with disabilities included) 2. Open a satellite office in Mahoning County to better serve people with disabilities and increase our consumers there by 50%. 3. Expand our employment and housing programs to provide more available services to 50%. 4. Increase consumer outreach about our services by 50%. 5. Increase our capacity building towards the operations of our center and its ability to increase services for people with disabilities. 6. Possible expansion into Columbiana County as well. | Western Reserve Independent Living Center, Inc. | 5 | 31 to 90 days | \$80,000 |
| Trumbull | Command Vehicle | This command vehicle would replace a 1993 Command vehicle. This would not have to be bid, specs are at the Ohio State Purchase. This price includes emergency lights, siren, lettering/striping, and Vehicle. This project list numerous areas in trouble from auto industry to small animals. This project would be completed in less than 30 days. | Bazetta Fire Department | 35 | 0 to 30 days | \$29,900 |
| Trumbull | Ladder Truck | To replace a 20 year old ladder truck. The truck is over 16 years old. The process would State purchase would not have to be bid, 9 month build time. Within one year would have ladder truck. | Bazetta Fire Department | 15 | 91 to 180 days | \$866,000 |
| Trumbull | Lawnview Sanitary Sewer Overflow Retention Basin | Prevent basement flooding from sanitary sewer in NW quadrant of the City of Niles | City of Niles | 10 | 91 to 180 days | \$2,000,000 |
| Trumbull | Fire Fighters Laid Off | This money would be used to return 2 bid of firefighters back to work. With a 12% reduction from are tax base this year. With the reduction of taxable tax rate year the Bazetta Fire Department will not be able to afford to bring these firefighters back to work with our stimulus money. This area has been hit very hard with job loss and plant closures. | Bazetta Fire Department | 2 | 0 to 30 days | \$178,000 |
| Trumbull | Niles Wastewater Treatment Facility Upgrade | Upgrade existing 20 year old municipal wastewater treatment facility | City of Niles | 50 | 91 to 180 days | \$22,000,000 |
| Trumbull | New Fire Station | Replace 2 Fire Stations that are 40 plus years old, with One fire station centrally located, with the construction of this station trying to reach 75% more energy use. This Project can be expanded to add an administration building with a community room, the community room would be open to all residents for their use. | Bazetta Fire Department | 150 | 91 to 180 days | \$1,800,000 |

| Trumbull | HELP TAXPAYERS GET OUT OF DEBT | THE STATE NEEDS TO HELP WORKING FAMILIES WHO ARE STUCK IN CREDIT CARD DEBT. IF OHIOANS CAN GET OUT OF THE HIGH INTEREST RATE DEBTS, THEY WOULD BE ABLE TO SPEND MONEY THEREFORE, BOOST THE ECONOMY. SPEND ON THINGS OTHER THAN HIGH FINANCE CHARGES AND 1 DAY LATE A \$30.00 LATE FEE!! THAT SHOULD BE ILLEGAL. MISS 1 PAYMENT IN 15 YEARS AND YOU HAVE A 20% INTEREST RATE. INSTEAD OF GIVING THE UNEMPLOYED MORE MONEY AND LOWERING INTEREST RATES FOR THOSE WHO DONT PAY THEIR MORTGAGES, I THINK PEOPLE WHO WORK SHOULD GET HELP FIRST WITH LOWER INTEREST RATES AND A PAY INCREASE FIRST. WHY SHOULD SOMEONE SITTING AT HOME GET MORE MONEY THAN SOMEONE WHO IS WORKING. MAIN POINT: THE CREDIT CARDS ARE HURTING EVERYONE. THE NON PROFIT ORGANIZATIONS ARE NOT EVEN HELPING ANYMORE. THEY WANT TO INCREASE WHAT YOU ARE CURRENTLY PAYING OUT. THERE ARE ALOT OF AMERICANS LIVING FROM PAYCHECK TO PAYCHECK. IT NEEDS TO BE ADDRESSED ABOUT HELPING LOWER INTEREST RATES ON LOANS WHERE THE CUSTOMER IS ACTUALLY MAKING PAYMENTS. | H & R BLOCK | 1,000 | 0 to 30 days | \$500,000 |
| Trumbull | Horses for Heroes | New program called Horses for Heroes to provide therapeutic horserback riding lessons to military veterans of all ages and disabilities. Project will include 1 staff horse of the correct size and disposition to carry heavier riders. Also included cost of certified instructor to conduct lessons, assist certified instructor, cost of program supplies, paperwork, grain, hay, farrier cost and vet costs for 1 year. Have also applied for grants to cover costs and, hopefully, continue the program after the first year. | Camelot Center Therapeutic Riding Program | 3 | 31 to 90 days | \$25,000 |
| Trumbull | Indoor arena | 90'x120' indoor riding arena in order to serve more riders with disabilities, school groups. Plans are to begin Horses for Heroes program in Spring 2009, which will provide therapeutic riding to military veterans of all ages & disabilities. Approx. cost to build is \$150,000. Includes construction, electrical, plumbing, arena footing, etc... ASB# project to build classrooms, viewing area, handicapped accessible bathrooms, office, septic system at an approx. cost of \$50,000. Our present temporary indoor arena is only approx. 40' x 40', which doesn't allow us to serve many riders or allow them to achieve the full therapeutic benefits of horserback riding. A larger arena is our main focus, at this time, with the goal of building a very close second. We are a 5-1-(c)-3 non profit organization & a Premier Accredited Center thru NARHA. (nahta.org) Thank you | Camelot Center Therapeutic Riding Program | 3 | 31 to 90 days | \$700,000 |
| Trumbull | Warren Avenue Sewer Separation Project | The project will consist of constructing a new 24" sewer to separate all storm water from an existing 12" combined sewer. The existing 12" sewer will be left in place as a sanitary only sewer. | City of Newton Falls | 10 | 31 to 90 days | \$183,000 |
| Trumbull | jete to the stars competition for scholarships | Competition for artistic dance starting in Ohio & eventually expanding to other states. Regional & National competitions. Business was set up in 2008, however bank funding was turned down. Research on other similar businesses shows an exceptional profit 200 Jobs Potential, 17 Business Served, Laidoff from Ohio Purchase and Upgrade 477 Acre Industrial Park. Current out state owners closing facility in December 2009. | Jete to the stars | 20 | 31 to 90 days | \$500,000 |
| Trumbull | Purchase and Upgrade 477 Acre Industrial Park | Shovel Ready Projects: Repair roof systems, replace or repair outdated shipping docks, and rail siding. Upgrade electrical and plumbing systems in buildings. Green Projects: Replace outdated building lighting and heating systems with energy efficient technology. Install loading dock doors, insulate doors, ceilings and walls. Expanded Customer: Retain current Business and Employment profile while Attracting New Business Opportunities. Upgrade energy efficient facility. | Custom Packing & Inspecting | 250 | 31 to 90 days | \$5,000,000 |
| Trumbull | Salt Storage Shed | Newton Township needs to build a Salt Storage Shed to be in compliance with the Phase II Storm Water Management Ordinance. This project will reduce the amount of salt we will have to store in the ground water. 1000 sq. training facility to work with displaced workers in helping them with technical training (ie. computer training) as well as resume writing, interview letter writing, job search techniques and providing networking leads for positions that are currently available. Training in interviewing and also providing the clothing in some cases for the interview. | Newton Township | 3 | 0 to 30 days | \$32,000 |
| Trumbull | Unemployed worker Stimulus | Convert current plant to produce seats for General Motors's fuel-efficient Cruze (41mpg). Plant would retain 88 employees that would otherwise lose their jobs when Cobalt model ends and also hire an additional 47 employees. Project cost includes \$2,260,000 in equipment purchase and \$200,000 to train employees and convert \$2,000 sq. ft facility for new process. Facility is leased through 2011. This lease would be extended with the Cruze. 135 employees comprised of 26 salaried and 109 union hourly. | Rehab Placement Services, LLC. | 10 | 31 to 90 days | \$100,000 |
| Trumbull | J300 Seating | Convert current plant to produce seats for General Motors's fuel-efficient Cruze (41mpg). Plant would retain 88 employees that would otherwise lose their jobs when Cobalt model ends and also hire an additional 47 employees. Project cost includes \$2,260,000 in equipment purchase and \$200,000 to train employees and convert \$2,000 sq. ft facility for new process. Facility is leased through 2011. This lease would be extended with the Cruze. 135 employees comprised of 26 salaried and 109 union hourly. | Lordstown Seating Systems-Lordstown | 135 | 181 days or more | \$250,000 |
| Trumbull | Prisoner women re-entry program | It is my intention to assist the women leaving prison with transitioning back into society. I will enter the prison and work with women scheduled to leave the prison system in 1 month. Obtaining very valuable information that concerns our current economic, jobs, and social situation. I also want to create 1-2 small job shops with the funds I need to open and operate so that I can provide help. I have a job available to one woman that may be serious about the job opportunity available upon leaving the prison system. | Urban Crime Aide | 5 | 0 to 30 days | \$150,000 |
| Trumbull | Window replacement program for low income families | WeatherTite Windows proposes to initiate a program of replacement windows for low income families in Ohio. WeatherTite is a 19 year veteran of the replacement window industry. We request Federal State Funds to aid in window replacement for low income families. An entire house of new windows reduces fuel bills by up to 40% and goes GREEN. WeatherTite proposes to replace windows at a reduced cost with the aid of the US Govt and State of Ohio. We are offering a \$1,500. to replace all old windows. (WeatherTite can install 600 houses for \$1million, 1333 houses for 2 million. We have been in contact with Senator Sherrod Brown and Rep Ryan's Office about this project. Both think this is a good idea! WeatherTite can do all the marketing for this project. We have significant brand awareness in the State of Ohio. We look forward to hearing from you soon! Sincerely, Eric Healdner WeatherTite Windows www.WeatherTiteWindows.com. | WeatherTite Windows | 25 | 0 to 30 days | \$2,000,000 |
| Trumbull | project upgrade for our daycare kids | I am a type B daycare provider that provides home daycare to children with bi-polar and autism and other children as well. I am certified through Trumbull county job and family services, my daycare is in need of computers, educational toys for special needs children, we need a fence around the whole yard, this fence is the most important item right now. Also would like to turn my daycare into a type A but need more space and need the funds to build a building so I may use my daycare in the new building not my home. I have been doing home care of my home myself and love the children and would love to expand my daycare and hire additional help. By doing this the children will have more room, new educational toys, help from other providers not just myself, and I will feel better having the fence put up to keep the children safe. | sue's happy home daycare | 3 | 181 days or more | \$100,000 |
| Trumbull | Bulebush Freedom | Giving people the opportunity for higher education and a better life. Training and equip to monitor lease sites attempting to locate child predators and work with local law enforcement in capturing/prosecuting these individuals | Bulebush Freedom | 1 | 31 to 90 days | \$300,000 |
| Trumbull | preditor | The purchase of equipment to enable our business and offer our clients a broader range of security destruction services. This equipment will provide the ability to offer mobile shredding of secure documents in a more energy efficient fashion saving fuel resources and greatly increasing profitability throughout. We will also be able to provide a new service, E-destruction and recycling, to allow clients to destroy confidential information stored electronically. This will help prevent more identity theft along with the ability to recycle valuable electronic components and prevent them from being discarded in landfills. These services are completely recyclable and protect our land resources as well as preventing identity theft, corporate espionage and other crimes associated with confidential information. The increase in revenue and efficiency will enhance the company's profits, resulting in an increase in job growth within the company and outside. Equipment to purchase: - New Mobile Shred Truck - Plan Ejector Electronic Media Shredder. - High Efficiency Paper Baler. | none | 6 | 0 to 30 days | \$200,000 |
| Trumbull | Business Development and Expansion | I would like to expand my business from my basement to a store front. Making it an everyday operation would allow me to hire three new employees. Most of The Stimulus Money would be used to pay for the store front, and larger equipment, to be able to larger volumes of Printed shirts and Hoodies within two years I plan to double my employees to ten and keep expanding from there. Delphi Packard is a world leading supplier of automotive electrical cables. The proposed project is to develop the next generation of lighter weight, but effective automotive electrical cables. Both cables today use almost exclusively copper based conductors. Copper is an excellent conductor of electricity with good mechanical strength, good environmental resistance and adequate fatigue properties. However, the weight, cost, and availability of copper have been a roadblock in making some advances in the automotive wiring systems. Aluminum is underutilized, but is an enabler to reduce automotive weight and cost. The goal is to make cables out of light aluminum alloys, rather than the heavier copper. In automotive applications, the lighter weight translates into direct energy savings. Overall use of aluminum has the potential to cut a vehicle's weight by 10 percent and can lower its fuel economy up to 8 percent. If this project is successful we expect to replace at least 40% of the copper in the wiring with aluminum. This collaborative project with Case Western Reserve University will include alloy development, cable fabrication, and characterization of alloy properties. | Protect-N-Shred | 4 | 0 to 30 days | \$350,000 |

| Trumbull | Development of the Next Generation of Light Weight | Wind power is currently the fastest growing renewable energy source, and looks like remaining so into the next decade. Commitments are in process, without the thought of transporting the large blades associated with them. Current cost to move the wind turbines is \$700 plus per mile. The Dynalifter is a heavier-than-air aircraft (not a blimp, not a crane), using a combination of lifting body, wings/canards, all augmented by helium lift. The design allows the craft to operate under a much wider envelope of loads and buoyant lift combination than historical designs, or current lifting body designs. Dynalifter prototype 120 ft is completed, and funding is for completion of a 500 ft freighter. Dynalifter will be the most energy efficient way of transporting these components to near destination. This increases the amount of fuel efficiencies of the wind turbines industry. This technology was to be used by NASA to move the space shuttle. The large cargo bay can be converted to accept large wind turbine blades. The uniqueness of Dynalifter aircraft will allow the industry to land near the final location on very short runways, the aircraft to develop is less than 120 MB. State of the art lighting systems that will improve operations, safety, and tremendous energy conservation. 130,000 sq ft of new building lighting. 130,000 sq ft of new building lighting. | Delphi Packard Electrical / Electronic Architectur | 80 | 31 to 90 days | \$980,000 |

| Trumbull | Teach young adults how to own and operate a small | Program Description: To assist five (5) low-income young adults ages 18-19 to learn how to own and operate a small home maintenance company. Participants spend eight (8) weeks dividing time between the construction site and the class room, learning how to operate a small business. Students will be taught basic tax principles, verbal as well as physical presentation skills and how to develop successful marketing strategies. Classes will be small allowing one-on-one attention to students. The home maintenance skills and business skills learned will be put into practice by remodeling homes for the elderly and/or low-income people in Trumbull County. Strong emphasis is placed on entrepreneurship, leadership development and community service. Our program allows disadvantaged young adults to develop business plans that will provide a valuable and viable community for the elderly and low-income earners in our communities. During the job training program, young adults will be provided with close supervision and training in home maintenance, landscaping and other business skills by qualified instructors. Those enrolled will learn to take responsibility for the direction of their lives and give back to their neighborhoods. By providing young adult | Chatman Home Maintenance | 7 | 31 to 90 days | \$17,000 |

| Trumbull | RecPro Ballroom Dancing Program | The purpose is to bring back arts on a different level to the school and expose students to an art of dance that they are unfamiliar with outside of their culture, and social environment. Students will learn Ballroom dancing the basic steps to the Swing, Cha Cha, and then the Tango. With the goal of promoting positive and pro-social behavior and social skills needed for a positive academic performance and later vocational success in adulthood. To teach them a new form of dance that will expand their talents, self-esteem, and social skills. Goal is to use ballroom dancing as a means: • To decrease rates of drop out. This goal supports the implementation of programs and services that promote positive school attendance and school engagement with the ultimate goal being that students achieve the attendance and academic goals necessary to graduate from high school. It is well documented that students who complete their high school education earn higher wages, enjoy greater vocational success and more positive life outcomes than students who drop out of high school. | RecPro LLC | 6 | 31 to 90 days | \$15,000 |
| Trumbull | computers for kids 7 playground renovation | We would like to offer our students ages 3-12 an opportunity to learn and explore with computers. We would need 4 to 6 computers, preferably as well as software. We would also like to offer our students a playground making it more age appropriate for our school ages. Our summer program will be beginning in June and due to the state of the economy, we have had to consider cancelling the many educational field trips that the students usually go on. We will need to be creative and find ways to center as much as possible. Therefore, since our regular field trips are being cancelled most times at our center in the summer, we would like to provide them with adequate equipment to promote proper social skills, to encourage fitness and healthy living through the use of large motor skills daily. | Children's Activity Center | 5 | 31 to 90 days | \$10,000 |
| Trumbull | Building Improvement | The Trumbull County YMCA has been a cornerstone of downtown Warren, Ohio since 1928. Over the years, the facility may have changed, but our heart and soul has remained the same. For generations, the YMCA has developed young adults who are confident and values have come first. Today, the YMCA remains a vital part of life in Warren and Trumbull County. Physically and spiritually, the heart of downtown, the YMCA wishes to see and adults, men, a woman, soon get together to act on the values they believe in. The YMCA wishes to remain a vital part of downtown Warren the 80 year old facility is in need of major renovations and repairs. The management of the YMCA is looking at energy conservation renovations to help combat the cost of utilities. We are in need of new energy efficient windows, a resurfacing of our indoor track, major roof replacement, renovation of at least one racquetball court, isolation of our large swimming pool onto its own boiler system so our main boiler can remain dormant during the warmer months, new heating and air conditioning and a new filter system for our 80 year pool. | Trumbull County YMCA | 100 | 0 to 30 days | \$600,000 |
| Trumbull | City Hall Energy Efficient Roof Replacement | Replace existing roof system on the Niles City Building with energy efficient, UV reflective, ozone and chemical resistant roof. | City of Niles | 10 | 0 to 30 days | \$50,000 |
| Trumbull | Smartgrid Meter Upgrade | The City of Niles, an electric utility and power provider, over the past two years has been upgrading its information technology infrastructure which included a WiMax/WiFi mesh network over the entire city. This infrastructure has been put into place for multiple uses but the primary use is to prepare for the smart grid environment. We are currently installing wireless meter readers to better lose expenses and to provide a new level of service to our consumers. We would like to upgrade our electrical environment to take full advantage of the IT infrastructure we have put into place. We would like to utilize smartmeters to reduce approximately 14,000 meter calls a year. Currently, meter calls are a significant expense. We would like to upgrade the WiFi backbone for the additional data loads, and install wireless in-home displays that visually show consumers the best times to use their electric that will save them money and help balance the grid. This would also upgrade several hundred safety and low income homes to a safe and efficient electrical service. This is one of several key steps needed to provide jobs and possibly create an environment here in the foothill for technological growth. | City of Niles Ohio (Municipality) | 50 | 31 to 90 days | \$4,000,000 |
| Trumbull | towing & recycling of automobiles | 7 acres utilized for auto wrecking (towing, storage, recycling/scraping of metal). Already a licensed yard that has been inactive. | Trumbull | Trumbull County Regional Mechanics/Fabrication and | The Trumbull County Engineer proposes to expand the existing Trumbull County Commission Highway Department Mechanics Facility to REGIONALIZE township mechanization/fabrication facilities. This expanded facility will include two (7) Bay Garage Buildings specific for township maintenance, additional mechanic bays for county and township maintenance, two large wash bays for county and township vehicles, one additional ingress/egress access to Trumbull County secure property without disruption of existing county vehicle fleet/maintenance. Utilizing this expanded facility to fabricate and repair township vehicles in addition to Trumbull County vehicles will decrease the probability for local communities to upgrade or construct their own mechanic facilities and prevent timely delays in repairs due to lack of manpower, accessibility and/or equipment. The Trumbull County Engineer's facility in Warren, Ohio is conveniently located near the population center of the County specifically. | Trumbull County Engineer | 155 | 181 days or more | \$3,700,000 |
| Trumbull | Feed the Future | The project will permit the installation of a secure, user friendly system that will allow students eligible for free/reduced lunch to be allowed to have access to that food in a manner that is confidential and assures that students will take advantage of the opportunity. The system assures accurate procurement, record keeping, accountability, and reporting. It prevents over identification of students receiving free/reduced meals, thus reducing their anxiety over accepting their meals and increasing the number of eligible students who actually accept the meals to which they are entitled. In addition, the system will allow parents to pre-fund their account, allow them to see their child's account balances, monitor items purchased, and view the school's menu, thereby enabling parents to discuss nutrition with their children. The system's menu staff to analyze student menus based on USDA guidelines and to communicate with parents. | Girard City School District | 1 | 31 to 90 days | \$20,400 |
| Trumbull | Countywide Intergovernmental Material Storage Faci | As of March 2008, Trumbull County and most of the cities, villages and townships within Trumbull County are in violation of the U.S. EPA Clean Water Act as it relates to storage of salt, slag, etc. The Trumbull County Engineer intends on working with Trumbull County cities, villages and townships to REGIONALIZE salt and slag purchasing and storage facilities. INTERGOVERNMENTAL AGREEMENTS: Trumbull County intends to store under cover, all salt and other environmentally sensitive construction materials. This will bring Trumbull County and local communities into compliance with current MANDATES of the Clean Water Act. Trumbull County is requesting an amount to install a total of 11 storage sheds, placing 10 at our Warren, Ohio transportation center, and placing 1 at our Corbin, Ohio outdoor. The WARREN, Ohio facility will include: (a) THREE sheds at 100' diameter and ONE shed at 50' diameter to store various grades of slag. (b) TWO sheds at 72' diameter to store gravel and concrete pipe control materials. (c) ONE shed at 100' diameter to store salt and ice control materials. (d) ONE shed at 124' diameter to store salt and ice control materials. (e) ONE shed at 124' diameter to store salt and ice control materials. (f) ONE shed at 124' diameter to store salt and ice control materials. (g) ONE shed at 124' diameter to store salt and ice control materials. (h) ONE shed at 124' diameter to store salt and ice control materials. I plan to hire at least 2 people to use if I am able to receive some assistance. | Trumbull County Engineer | 200 | 181 days or more | \$4,775,000 |
| Trumbull | Huntermaid Products | | International Design Solutions, LTD. | 2 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Trumbull | LED Light Replacement | The City of Niles, an electric, water and sewer provider, has been investigating switching out Sodium Vapor street lighting throughout the entire city. We would like to decrease the use of energy while providing a greater quality of life for our citizens. The LED lighting would decrease our usage of fossil fuels by approximately 60% or 1,850,000 lbs per year keeping the cost of electricity stable. | City of Niles Ohio (Municipality) | 10 | 31 to 90 days | \$2,000,000 |
| Trumbull | 40MgW Transformer 2nd Delivery Point | The City of Niles, an electric, water and sewer provider, over the past few years has been upgrading its information technology infrastructure which included a VMware/VMware refresh over the entire city. This infrastructure has been put into place for multiple uses but the primary use is to prepare for the smart grid environment. To further improve our electric efficiency we are requiring stimulus funds to build a second delivery point to the city to decrease PV's line loss by approximately 50% for substantial savings not only monetarily but environmentally. The second point would be located at our local water treatment plant of which we own 50%, having a capacity of 11 billion gallons a service approximately 600,000 residents and businesses and would become their primary feed along with a proposed biomass plant as a secondary feed. The two feeders into the substation would consist of 40 Mega Watt Transformers and would allow us to expand our territory and increase our work force to cover the demand keeping the cost of electricity stable as well as the customers water cost. Installation of two 5MW Coker Oven Gas (COG) furnaces. The COG is supplied as a by product of the coke making process. Currently a portion of this gas is flared. Installation of these units will eliminate the need to purchase electricity for the plant and there would be the opportunity to generate excess power to be sold. To provide refunds to individual home owners that meet the low to moderate income guidelines that provide proof that they have insulated, installed storm windows & doors or installed an energy efficient heating system. worthy non-profit company. We have the confidence that we will spend the government available funds in a timely and responsible manner. As a currently stable and growth oriented energy installation program for severe mentally and physically handicapped individuals. Our mission is to improve the quality of life work experiences for individuals with mental retardation. Achieving this goal is our strong desire. We are aware that the State of Ohio is distributing monies for Vocational Rehabilitation within Ohio. We wish to apply for funding available so we can continue to upgrade our already outstanding existing work program. THC first opened its doors in January of 2008 and has been steadily growing ever since. We have welcomed the significant growth we have received in the last year. I am pleased to write to you about the many exciting programs that I believe will be of interest to you and the State of Ohio. THC is seeking 1.9 million dollars to expand to very successful MRDQ work program. This year we will be implementing a computer learning center, alternative learn! We are seeking support from the State of Ohio in order for us to use as a This project would rehabilitate the Ward Thomas Historical House and Museum located in the City of Niles. The work will include stipping paint on the homes exterior to bare wood, repair rotted wood and paint. The work would also include removing and replacing the rear steps and installing a wheel chair access ramp. | City of Niles Ohio (Municipality) | 35 | 91 to 180 days | \$5,000,000 |
| Trumbull | ArcelorMittal Warren Cogen Project | | ArcelorMittal Warren Inc | 145 | 31 to 90 days | \$35,000,000 |
| Trumbull | Home Weatherization | | City of Lordstown | 0 | 31 to 90 days | \$1,000,000 |
| Trumbull | Ohio Recovery | | The Nicholson Center | 150 | 0 to 30 days | \$1,900,000 |
| Trumbull | Ward Thomas House Renovations | | City of Niles | 10 | 31 to 90 days | \$111,100 |
| Trumbull | Smart Boards for Smart Students | We would like to install 6 wall mounted Smartboard interactive smart board systems in five classrooms and one Lab in our Elementary. We currently have two mobile units that are being shared by 5 classrooms. Each teacher must borrow a unit and call it from room to room. Each time they are moved, they require recalculation before using. The time involved can be frustrating and reduces the actual time teachers are able to use the boards. Several of our teachers are requesting the use of smart boards, but unfortunately with only two mobile units, there are times when they have nothing to use. The addition of 6 more systems would go along way to alleviate much of the problems our staff is experiencing. I've always been excited about using smart boards to improve student learning. This enthusiasm should not be allowed to dwindle away. Electrical updates in facility to reduce power consumption. Efficient use of color or white power as an alternative source. To keep up with the growing need to educate our students with the most current technology and to prepare them for the future, we would like to install a new Laptop lab in our school district. | Maplewood Local School District | 0 | 0 to 30 days | \$26,460 |
| Trumbull | Renewable Energy and Energy Efficient Updates | | Starr Manufacturing, Inc. | 75 | 91 to 180 days | \$200,000 |
| Trumbull | Technology Upgrade | | Mathews Local School | 1 | 91 to 180 days | \$28,000 |
| Trumbull | Mobile home park improvements / Free Housing | Due to our classroom space restriction a convention lab is not a possibility. We own an operate a mobile home park in Warren OH. We have many people looking to rent or own a home and we need funds to fix up current homes and plan to donate them for free to possible tenants. They would still pay a fee for utilities and other home needs. We make our money from the lot fees. Blank job Dave | Sokemo, LLC | 10 | 0 to 30 days | \$1,000,000 |
| Trumbull | Intensive Community/Intervention/Probation Program | This program seeks to divert and reduce minority youth's delinquency involvement in the justice system through both early identification at time of arrest and for those youth at risk for incarceration through intensive probation services and intensive referrals to appropriate and needed services providers. The program will work with first time offenders, chronic status offenders and those in danger of commitment to the Ohio Dept of Youth Services. | Trumbull County Family Court | 2 | 0 to 30 days | \$54,351.12 |
| Trumbull | Street Crimes Unit | The Trumbull Metropolitan Housing Authority proposes to recruit/train 3 laid off police officers to enhance police protection and investigations for increasing violent crimes from drug trafficking and gang activity. Over the last 60 days, two gang related shootings have resulted in two homicides and two injured children in an amount TRMA properties. The City of Warren has laid off 20 police officers since 12/08 and is considering additional workforce reductions due to loss of revenue from recent closures at Duffin Parkland, Reverend Street and Duffin Parkland. This proposed project would increase police presence in involved neighborhoods and provide the necessary investigations to solve violent crimes. | Trumbull Metropolitan Housing Authority | 3 | 0 to 30 days | 135,000.00 |
| Trumbull | Trumbull County - Champion Township - IBEW Renewab | Trumbull County would like to apply for Energy Efficiency Community Development Block Grant Funding as a sub-grantee of the State of Ohio Energy Office. The Federal Department of Energy notified Trumbull County that it is not an eligible entity under this program because the City of Warren (with a population of 48,232 reported under Census 2000) received a direct allocation of \$196,700. The Federal Department of Energy calculates the allocation based on population. Therefore, for the purposes of formulating their allocations, Trumbull County's Census 2000 population of 225,116 is reduced by 48,232 to 176,884 which is below the "two tier" or over 200,000 population threshold for a direct allocation to a county through the Federal Department of Energy. Solar & wind renewable energy models will be set up in the Research & Development Park area in Champion Township, Trumbull County for education & training purposes. Models set up at B&B Research Park Learning Center to train/career apprentices on the operating system. | Trumbull County Planning Commission | 100 | 0 to 30 days | 250,000.00 |
| Trumbull | Trumbull County Solar PV System Job & Family Servi | Trumbull County would like to apply for Energy Efficiency Community Development Block Grant Funding as a sub-grantee of the State of Ohio Energy Office. The Federal Department of Energy notified Trumbull County that it is not an eligible entity under this program because the City of Warren (with a population of 48,232 reported under Census 2000) received a direct allocation of \$196,700. The Federal Department of Energy calculates the allocation based on population. Therefore, for the purposes of formulating their allocations, Trumbull County's Census 2000 population of 225,116 is reduced by 48,232 to 176,884 which is below the "two tier" or over 200,000 population threshold for a direct allocation to a county through the Federal Department of Energy. Installation of 80 kW solar panel photovoltaic (PV) system on the roof of our Job and Family Services. This direct grid tie PV system (net metering) estimated to produce 7,660 kWh monthly average energy output. Trumbull County would like to apply for Energy Efficiency Community Development Block Grant Funding as a sub-grantee of the State of Ohio Energy Office. The Federal Department of Energy notified Trumbull County that it is not an eligible entity under this program because the City of Warren (with a population of 48,232 reported under Census 2000) received a direct allocation of \$196,700. The Federal Department of Energy calculates the allocation based on population. Therefore, for the purposes of formulating their allocations, Trumbull County's Census 2000 population of 225,116 is reduced by 48,232 to 176,884 which is below the "two tier" or over 200,000 population threshold for a direct allocation to a county through the Federal Department of Energy. | Trumbull County Planning Commission | 50 | 0 to 30 days | 750,000.00 |
| Trumbull | Trumbull County LEED Certified One-Stop Permitting | The project proposes to construct a new 20,000 square foot renewable energy LEED Certified County Building to house the Trumbull County Planning Commission and Building Department for one stop permitting. The building will need to be handicapped accessible including parking and an elevator. The solar panel system will be a solar photovoltaic system and include bio-thermal wells. Total project cost = \$3.7M | Trumbull County Planning Commission | 200 | 91 to 180 days | 3,700,000.00 |
| Trumbull | Warren City Police Department Victim's Program | The City of Warren, located in Trumbull County, Ohio, has a lot of problems that they are seeking to resolve. The Warren City Police Department is seeking funding to develop a multidisciplinary approach in regards to responding to violent crimes against women. The City of Warren Police Department wants to continue its mission of involvement and commitment to community policing. Beginning January 1, 2009, 25% of the work force was laid due to loss of tax base related to unemployment. This has had an effect on the department's ability to continue the mission of Community Policing. Another 20 officers are planned to be laid off on 6/1/2009. The Warren PD wants to continue to have officers be members and board members of community organizations and continue to participate in community activities. When the department area is full staff, the Warren PD along with the Neighborhood Associations and Community Safety Initiative, meet and trained on how the community and the police can work together to solve problems in the respective neighborhoods. Command officers and zone officers participated in meetings to help break down the barriers between the community and the police. The decisions to problem solve and improve the quality of life have been made by the people involved. The community knows what problems are in their neighborhood. We want to improve these relationships and the community involved to be successful in our efforts. | Warren City Police Department | 3 | 31 to 90 days | 250,000.00 |
| Trumbull | Warren City Police Department | | City of Warren | 5 | 31 to 90 days | 1,000,000.00 |
| Trumbull | Domestic Violence Special Docket Court Program | The purpose of this court is to increase victim safety and hold offenders accountable. The Court recognizes that violence is a means for the perpetrator to control the victim and that the victim is never responsible for the perpetrator's choice to use violence. Therefore, it is necessary for the defendant to accept full responsibility for their acts, demonstrate awareness that violence is a choice, and come to realization that the victim is never responsible for offender's acts. This program is a post-arrest program and part of their probation. The court recognizes the proven success of specialized programs providing collaborative services, intensive monitoring of offender progress and utilization of immediate sanctions on offenders that follow terms of probation and/or their case plan. As a result, the numbers of offenders who successfully complete requirements of probation are greatly improved. Specialized dockets have also contributed to a significant reduction in the rate of recidivism. | Warren Municipal Court | 3 | 0 to 30 days | 334,679.76 |
| Tuscarawas | CONVERSION TO 18 ENERGY EFFICIENT FLUORESCENT LIGH | REPLACE 100 EXISTING LIGHTING FIXTURES WITH HIGH ENERGY EFFICIENT T-8 FLUORESCENT FIXTURES THAT WILL REDUCE LIGHTING ENERGY CONSUMPTION 50% AND IMPROVE LIGHT LEVELS. | UHRDEN INC. | 0 | 0 to 30 days | \$20,000 |
| Tuscarawas | Tuscarawas Regional Technology Park Erosion Control | Throughout the Tuscarawas Regional Technology Park, a high tech industrial park promoting a campus setting and energy conservation through smart Office, LEED Certified structure development, there is need for erosion control through natural water channeling throughout the rolling landscape. With the strategic placement of rocks, boulders, ground cover, shrubbery, and trees, the rolling hills setting can be maintained providing green views, walking trails, and natural surroundings for the resident community. The erosion control project will include the strategic appearance to the park, and the "green" natural appearance will help to attract creative, intellectual property generating companies to this unique facility. This will be the final step in creating a marketable, high-tech park. Once both tasks are complete, jobs and training will be provided to hundreds over the next 5 to 10 years with the companies that will locate in the park. Output will be the development of erosion control landscapes throughout the common areas of the 170 acre high park. | Tuscarawas County Board of Commissioners | 15 | 0 to 30 days | \$15,000 |
| Tuscarawas | Community Center Renovation | City of Uhrichsville is in need of a Community Center. The City owns an 12,000 sq ft warehouse currently vacant. The City would like to renovate the warehouse for a Community Center which is desperately needed for our citizens and particularly our youth. The Center would be used for youth activities, senior center, and banquet hall. The Center would have a full kitchen, and be divided into 3 sections for multiple use. Demolition a portion of the current building would open the way for parking area. This is a much needed facility for our City. The City has invested \$4,000,000 in a new Water Park facility which is attracting many tourists to our area and working hard to revitalize our downtown area. The building is to be used for the community center is in the downtown area and part of our downtown revitalization process. | City of Uhrichsville | 3 | 91 to 180 days | \$1,500,000 |
| Tuscarawas | Dist 11, PID 85421, RI Corman Cleveland Line Rehab | General Service - Poor Performing Pavements | Ohio Department of Transportation | 25.8 | 31 to 90 days | \$900,000 |
| Tuscarawas | Dist 11, PID 81687, TUS US 250 23-460 | | Ohio Department of Transportation | 21.4 | 31 to 90 days | \$745,646 |
| Tuscarawas | Tuscarawas Regional Technology Park Core Samples | Structures that will be located throughout the 170-acre technology park will require core samples to ensure structural integrity and adequate materials for two and possibly three story centers, brick, and stone structures. Once companies move into the technology park, job creation is expected to be in the hundreds over the next 5 to 10 years. Output of the project will be the taking of core samples throughout the park at locations which architect and engineers feel are the most probable sites for structure development. The benefit of the project is to improve marketability of the technology park properties and increase probability of private enterprise development and business location in the park. The provision of substantial broadband infrastructure in the technology park could act as an attractor to high tech research and development companies that need large size broadband capacity for the transmission of data, research documents, and extensive imagery. The park is focusing upon the attraction of high tech, research, development, and intellectual property companies that require large volume bandwidth. This finding will provide needed broadband lines and equipment of a capacity to assist and cooperate with volume and data intensive companies in their related needs. It will also provide marketability of the technology park properties and increase probability of private enterprise development and business location in the park. | Tuscarawas County Board of Commissioners | 15 | 0 to 30 days | \$180,000 |
| Tuscarawas | Tuscarawas Regional Technology Park Broadband Comp | | Tuscarawas County Board of Commissioners | 15 | 0 to 30 days | \$33,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Tuscarawas | Tuscarawas County Wastewater Treatment Plant Impro | The proposed project improves the ability of the Wilkshire Hills, Sandville, and Mineral City WWTPs to maintain proper bio-solids levels without loss of solids. Currently DEPA is extremely concerned that proper solids balances cannot be maintained at any of our facilities because of inadequate solids handling capabilities. This project will correct that condition. The conversion of our current use of chlorine for disinfection with UV will eliminate the use of a hazardous material and eliminate the need for use of another hazardous material for de-chlorination, provide emergency power generation to fully operate Sandville WWTP and an emergency knock top for venting operators to maintain vital communications and management functions. This project is currently in the final design stage. | Tuscarawas County Board of Commissioners | 50 | 0 to 30 days | \$995,400 |
| Tuscarawas | Tuscarawas County Phase 1A Dundee Water System Imp | The Dundee water system was constructed in the late 1970s using 24" waterlines. Current minimum recommended size is 48" and the system cannot provide adequate fire protection flow or normal operating service with the small fire lines. The upgrade will allow better fire flows and normal operating service and bring the Dundee system in compliance with state and county standards. Final design engineering is scheduled to begin in February 2008. | Tuscarawas County Board of Commissioners | 25 | 0 to 30 days | \$397,810 |
| Tuscarawas | Tuscarawas County Dover Township Sewer Extension P | This sewer system will be part of the County system but is suitable to the City of Dover. Phase 1 will be eliminating manufacturing on-let sewer systems for approximately 24 homes and businesses. The estimates for Phase 1 is 11,200 gpd which the City of Dover can accept without any upgrades in their system. | Tuscarawas County Board of Commissioners | 25 | 0 to 30 days | \$429,200 |
| Tuscarawas | Tuscarawas County Sandy Township Water System Impr | Current residents of Sandville, Jerry Brick Road and SR 183 are serviced by private wells with poor water quality. The proposed project will supply a safe and reliable source of water to those residents. The transmission line will also provide a backup source of water to the Sandy Township Mineral City area should the Mineral City Booster Pump Station or tank be out of service. The project will allow better fire flows and fire protection to the newly constructed Sandy Valley High School and Middle School Complex and the Crossroads shopping plaza located at the intersection of SR 600 and SR 183. The project is currently in the final design stage of engineering. | Tuscarawas County Board of Commissioners | 100 | 0 to 30 days | \$7,692,820 |
| Tuscarawas | Tuscarawas County Water Meter Replacement Project | This project consists of replacing all 2400 of the Tuscarawas County Metropolitan Sewer District's water meters. In early 2008 the district advised that the current Automated Meter Reading technology was no longer supported by the district's current meter vendor. Approximately 67% of the district's meter installations had been converted to the current technology over a 12 year period beginning in 1996. Approximately 50% of the meters are 10 years old or older. Since after 10 years of service meters begin to lose accuracy, it is in the district's best interest, under the circumstances, to upgrade all meters to current technologies and at the same time improve accuracy by eliminating old meters. The project is currently being reviewed by the National Services Group to develop turn-key, dependable, and flexible solutions. | Tuscarawas County Board of Commissioners | 35 | 0 to 30 days | \$720,000 |
| Tuscarawas | Newcomerstown Industrial Park Roadway and Utility | Throughout the park's existing development on Enterprise Drive and the proposed development of an additional 220 acres immediately adjacent to the existing park, there are needs for additional roadways and utility extensions in order to make the entire area more marketable to potential businesses. With the strategic placement of roadways and utility extensions/relocations the entire area will become much more attractive to potential industries as well as benefit the park's current tenants. The project will help to maintain the appearance and layout of the park as well as help to facilitate organized/developed development of the proposed park addition as per the Newcomerstown Community Improvement Corporation's current plans. Construction jobs will range anywhere from several dozen to several hundred over the construction of the proposed project. In the next 5 to 10 years, two hundred jobs are expected to be created based upon the actual companies that choose to locate in the park. Outfit will be the development of approximately 6700 linear feet of roadway, 13000 LF of utility lines with all appurtenances and 1200 LF of curb and gutter throughout the park. | Tuscarawas County Board of Commissioners | 200 | 31 to 90 days | \$2,221,429 |
| Tuscarawas | Newcomerstown Industrial Park Rail Siding/Access t | Throughout the park's proposed development of an additional 220 acres immediately adjacent to the existing park, there are needs for additional siding access in order to make the entire area more marketable to potential businesses. With the strategic placement of a rail siding, the entire area will become much more attractive to potential industries as well as benefit the park's current tenants. The project will help to maintain the appearance and layout of the park as well as help to facilitate organized/developed development of the proposed park addition as per the Newcomerstown Community Improvement Corporation's current plans. Construction jobs will range anywhere from several dozen to several hundred over the construction of the proposed project. In the next 5 to 10 years, two hundred jobs are expected to be created based upon the actual companies that choose to locate in the park. Outfit will be the development of approximately 1700 linear feet of rail siding lines with all necessary switches and appurtenances. The final utilization to serve the proposed industrial park addition. | Tuscarawas County Board of Commissioners | 200 | 31 to 90 days | \$585,260 |
| Tuscarawas | Newcomerstown Industrial Park--building the Tuscar | Throughout the park's proposed development of an additional 220 acres immediately adjacent to the existing park, there is a need for an alternate truck traffic access to the park in order to make the entire area more accessible and always traffic flow. The County Road #15 due to current and potential truck traffic making the area more marketable to potential businesses. With the strategic placement of a new bridge the entire area will become much more attractive to potential industries as well as benefit the park's current tenants. The project will help to facilitate organized/developed development of the proposed park addition as per the Newcomerstown Community Improvement Corporation's current plans. Construction jobs will range anywhere from several dozen to several hundred over the construction of the proposed project. In the next 5 to 10 years, two hundred jobs are expected to be created based upon the actual companies that choose to locate in the park. Outfit will be the development of a bridge, approaches of approximately 350 linear feet spanning the Tuscarawas River and connecting the park to State Route 626, and the widening of SR 226 to accommodate this. | Tuscarawas County Board of Commissioners | 200 | 31 to 90 days | \$3,036,308 |
| Tuscarawas | water plant | Twin City has a 45 year old surface water plant. Well water is available to this area. This would benefit the community to have a more cost effective water source. | twin waterand sewer district | 2 | 181 days or more | \$8,000,000 |
| Tuscarawas | Baltic West Street Rehab | West Street Water line, Storm Sewer and Roadway Replacement | ADR and Associates | 50 | 0 to 30 days | \$500,000 |
| Tuscarawas | Navarre Stormwater System | Complete replacement of five (5) bridges on the County system, consisting of driven piling, cast-in-place concrete abutments, steel or concrete beams, waterproofing, asphalt wearing surface, and guardrail. Bridges are: G008-10-12 in Oosteen Township G005-12-13-208 in Oosteen Township G048-6-8 in Washington Township Y0R-24-37 in York Township NE-31-50 in Mill Township | ADR and Associates | 100 | 0 to 30 days | \$5,000,000 |
| Tuscarawas | Bridge replacement | Renovation of three (3) existing bridges on the County system, including steel beam repair and painting, deck repair, repair of waterproofing, and repair of wearing surface. Bridges are DOV-26ST-522 in the City of Dover LWV-42-116 in Lawrence Township H048-248-248 in Warren Township | Tuscarawas County | 15 | 31 to 90 days | \$2,447,200 |
| Tuscarawas | Bridge renovations | Twin City Water has 8000 feet of 80 year old water mains that need replaced. These lines have had numerous line breaks. The project would remove water from for all mains in the district service areas. This project is in real need. | Tuscarawas County | 15 | 31 to 90 days | \$1,924,000 |
| Tuscarawas | water main replacement | Reprofiling and repaving of approximately 56 miles of County Roads. This is about 12% of our total road mileage. Due to sharply rising costs and stagnant income, the amount of resurfacing done by the County recently has decreased significantly. This program would be a "catch-up" to repair roads that are the worst in our inventory. Roads included are County Roads #19, 20, 21, 24, 26, 41, 43, 52, 53, 71, 72, and 107. Construction of approximately 125,000 linear feet of safety guardrail on the most critical areas of County Roads. Previous surveys have accumulated a need for approximately 600,000 linear feet of safety guardrail on County Roads, so this project would address 20% of the County's unmet need for safety guardrail. | twin waterand sewer district | 0 | 181 days or more | \$600,000 |
| Tuscarawas | Roadway reprofiling | Small low interest loans to a minimum of 45 working families to allow them to purchase a reliable vehicle to retain employment as county has no public transportation. The stimulus request is for operating funds for the program. The Way to Work Program is a collaboration with Huntington National Bank. This program has been in operation since 2001 and has served approximately 500 working families. 40% of the families increase their income as a result of having reliable transportation. The families are successful in repaying the loans, increasing their credit scores, and not having to go back to public assistance. The default rate is 4.2% and cars are reported to be in good condition on the 24000 passengers to customers. The phase expense item rate states more on one unit and returning loans with an estimated interest value of \$ to 8 million. Because they are evening rides, most folks stay over night, greatly contributing to restaurant, gas and motel sales. | Tuscarawas County | 20 | 31 to 90 days | \$3,920,000 |
| Tuscarawas | Safety Guardrail construction | It has the great advantage of not only helping excursions and potentially an Ohio Rail Tourism Corridor from Pittsburgh to Columbus, but it also will be ready as a passenger siding next to an active Depot on the Panhandle line in the event regular passenger service between Pittsburgh & Columbus is implemented. | Tuscarawas County | 10 | 31 to 90 days | \$2,100,000 |
| Tuscarawas | Ways to Work | The rail tourism corridor can link tourism sites from Pittsburgh to Columbus including The Denison Depot, Roscoe Village, Longberger/Dresden, the Zanesville-Muskingum area, Newark, Columbus Tappan Lake and Pittsburgh. The need is critical to maintain current tourism dollars and jobs, and has great potential for new tourism dollars and jobs. | Personal & Family Counseling Services of Tuscarawa | 45 | 0 to 30 days | \$100,000 |
| Tuscarawas | Denison Depot Rail Siding | The Denison Depot is a National Landmark candidate for a Historic category. It is one of our nation's only remaining WWII homefront Cannon Sites. The project scope includes restoration of stone & woodwork, door replacement, repair of ceiling & floor, painting, the construction of an area to be used for exhibits, mobile, special events programs, & a Bar and Breakfast area. The Depot located in rural Appalachia Ohio is the heart of the community, a leader and catalyst in economic development, tourism and preservation. We play a very important role in our region in developing tourism momentum. Currently, we are leading the Columbus-Pittsburgh Corridor tourism effort, and our location exactly halfway between Pittsburgh & Columbus makes us critical to Ohio's east-west tourism efforts. We began with one job, & now are responsible for 20 & plan to increase that to 25-30 with this project. These funds will match dollars already raised for this project. | Denison Railroad Depot Museum, Inc. | 20 | 181 days or more | \$750,000 |
| Tuscarawas | Restoration of the Historic Denison Depot | In 1988, so much has changed in the world of libraries in those twenty years. Because another expansion is not possible, we would like to complete a space reallocation and renovation project to our main floor as we did with our lower floor (children's area) in 2007. Our goals for this project include: - bring for increased computers in a training lab - wireless hub - defined teen space - gathering area for seniors - shelving to accommodate changing formats - space for ESL and New Reader materials - quiet study rooms - increased floor space to meet increased usage - flexible and comfortable seating and tables - modernized elevator - updated lobby entrance - updated public computing and furniture - reading room for periodicals and genealogy - single service desk (on call) with re-thought staff workstations and storage solutions - self-checkout stations - downloadable stations - defined audiobook and popular materials area | Denison Railroad Depot Museum, Inc. | 25 | 181 days or more | \$130,000 |
| Tuscarawas | Library Renovation and Space Re-allocation: Phase | The new family life center would serve as a place to meet the Sandy Valley area's food, shelter, health, and development needs. The center would serve the needs of the community by, among other things, serving meals to the needy, providing health services, offering grocery relief, providing free clothing, offering parenting classes, offering financial literacy training, providing career assistance, providing access to assistance avenues, and additional needs as identified. The center would also house the area's only Head Start program. The facility is currently ready for construction. If additional to include the building, this project could help individuals and others find the immediate employment. The construction workers, when the facility opens, it will result in 104 paid employees and many other volunteer opportunities for the community. The community consists of 26 census tracts, 14271 4-6 grade schools, & 4 schools. This area has a high poverty rate and is now suffering a high unemployment rate. Funding for this family life center is desperately needed by the community. | Tuscarawas County Public Library | 150 | 91 to 180 days | \$400,000 |
| Tuscarawas | R.J. Corman Railroad - Dover, OH | | R.J. Corman Railroad Group | 20 | 31 to 90 days | \$1,241,232 |
| Tuscarawas | Family Life Center | | Shepherd of the Valley Lutheran Church | 70 | 91 to 180 days | \$1,250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Tuscarawas | Library Elevator Modernization | operations. It has not been trustworthy in the past year. This involves bringing the elevator and the fire alarm system up to code, as well as modernizing the lobby entrance where the elevator is accessed. We have sought alternative funding for this project. As this time we have advanced \$12,000, but we are in need of the remaining funds to complete the project. | Tuscarawas County Public Library | 1,000 | 31 to 90 days | \$90,000 |
| Tuscarawas | Library Mobile Computer Training Lab | Our library is in Tuscarawas County—a rural and Appalachian area where there is a literacy problem and many residents without access to print, audiovisual and computer resources. We have some 600 people a day visit our library with many of these being parents with strollers and adults or children with mobility issues. The only floor accessible from ground level is the lobby where no library service is offered. Library services are offered on the basement and first floor levels. Services include children's programming, computer services, literacy materials, ESL materials, reference services, as well as access to print and audiovisual materials to checkout. | Tuscarawas County Public Library | 1,000 | 31 to 90 days | \$35,000 |
| Tuscarawas | Road Repair | The money requested will allow the Township to repair roads damaged during flood of 2008 for which FEMA nor OEMA were able to fund. There are approximately 30 miles of township road way requiring repair and resurfacing. | Lawrence Township Board of Trustees | 6 | 0 to 30 days | \$120,000 |
| Tuscarawas | Township Police Force | In order to better provide for the welfare and security of all Township residents, the Lawrence Township Board of Trustees plan to enhance security and safety by way of expanded police coverage from one full time police officer to three full time police to allow for 24/7 coverage. | Lawrence Township Board of Trustees | 2 | 0 to 30 days | \$150,378 |
| Tuscarawas | Zutavern Church Road Upgrade | This project will fund the widening and straightening of a 2.5 mile section of the concerned road. At present this is a very narrow road. | Lawrence Township Board of Trustees | 4 | 0 to 30 days | \$250,000 |
| Tuscarawas | New MR/DD Office Building | Our plan is to construct an office building for the Tuscarawas County Board of Mental Retardation and Developmental Disabilities on the same campus as our school and workshop. Presently these offices are spread across three sites in separate areas of the county. There are significant cost savings from eliminating monthly lease payments, reducing mileage costs between sites, eliminating duplicate office costs, and gaining numerous efficiencies from having the offices together at the same location. These savings would be passed on to the MR/DD for the MR/DD when faced with the difficulty of passing new leases and/or compensating for significant reductions in state funding. We are attempting to overcome ever rising costs. The construction of the building would put approximately 40 or more people to work over the 18 months in a county where new construction is at a virtual standstill. The office itself would provide modern facilities for a staff of 10 employees and would enable the MR/DD to better serve 540 children and adults who reportedly need our services. | Tuscarawas County Board of MR/DD | 40 | 91 to 180 days | \$1,820,000 |
| Tuscarawas | Reiser Avenue Sanitary Sewer and upgrade | Upgrade of existing lift station to handle larger volume. Over 10,000 feet of new sanitary force main line sewer to serve existing industrial park and growth in new industrial area. Also project will greatly relieve volume on aging existing line. Two project in the works now being discussed to build two new facilities and add new jobs to this area of the city. Other tend to still available for growth. This line will divert sanitary waste from an old line that already is stressed. The old line will still be receiving future increased capacity from new sewer sources under construction which makes the new line installation even more important. | City of New Philadelphia | 300 | 91 to 180 days | \$300,000 |
| Tuscarawas | Twin City Water & Sewer District - WWTP Sludge Pre | Installation of a sludge presettler for dewatering sludge for the wastewater treatment plant. The new press will eliminate the need for the sludge drying beds and will give the operator the ability to remove sludge from the plant when needed. | W.E. Quicksall and Associates, Inc. | 0 | 91 to 180 days | \$449,000 |
| Tuscarawas | Twin City Water & Sewer District - Roanoke Lift St | Under the terms of a court order issued in 1984, the district was directed to identify and eliminate infiltration/overflow. While progress has been made, additional corrective actions are needed and this project is another step towards that goal. The lift station and 1,150 feet of force main will replace an old gravity sewer located through the US/US/2000 interchanges in Uhrichsville and will reduce infiltration into the system as well as allow for better maintenance of the line. The project also includes 2,000 feet of Corundum Pipe (CPP) lining of the main trunk sewer serving the city of Uhrichsville. This sewer is located in an area subject to flooding by the nearby creek, and the CPP lining will eliminate infiltration in this area. | W.E. Quicksall and Associates, Inc. | 0 | 91 to 180 days | \$927,300 |
| Tuscarawas | City of Uhrichsville East 2nd Street Storm Sewer P | Storm sewer replacement will eliminate indirect cross connection between storm and sanitary sewers by eliminating storm water infiltration into the sanitary. The project includes 3,000 feet of 12" dia. 30' catch basins, and 10 storm sewer manholes. The project also includes elimination of two direct piping connections between the storm and sanitary sewers. A Facilities Plan was submitted to Ohio EPA in December 2008. | W.E. Quicksall and Associates, Inc. | 0 | 91 to 180 days | \$589,200 |
| Tuscarawas | Village of Sugar Creek - WRF SCADA System Replaceme | Replacement of existing SCADA system at the village's Water Reclamation Facility (WRF) and Water Treatment Plant. The amount of funding requested represents the wastewater portion only. | W.E. Quicksall and Associates, Inc. | 0 | 0 to 30 days | \$136,400 |
| Tuscarawas | Village of Sugar Creek WTP SCADA System Replacement | Replacement of existing SCADA system at the village's water reclamation facility (WRF) and water treatment plant (WTP). The project also includes installation of valves and valves actuators at the WTP to allow the SCADA system to automate the filter backwash and customer regeneration processes. The amount of funding requested represents the drinking water portion of the project only. | Village of Sugar Creek - W.E. Quicksall and Associates, Inc. | 0 | 0 to 30 days | \$232,500 |
| Tuscarawas | Trenton Avenue Improvement Project | The Trenton Avenue Improvement Project is approximately 2,140 feet long and includes improvements to Trenton Avenue from Newport Avenue to Wardell Street in the city of Uhrichsville, Tuscarawas County. Major items of work include: Add a drop out lane at the school for parents to pick off and pick up children; pavement clearing and resurfacing from Newport Avenue to the railroad tracks; full-width/depth pavement removal and reinforced concrete replacement from the railroad tracks to Wardell Street (this is a heavy truck traffic area to local businesses and concrete is more feasible and cost effective); replacement of existing curbs and sidewalks; improvements to intersection turn radii; railroad crossing upgrade; new storm sewer systems. | City of Uhrichsville | 25 | 91 to 180 days | \$3,208,000 |
| Tuscarawas | M & M Industrial Park Road & Utility Extension Pro | Extension of roadway, water, sanitary sewer, storm sewer, electricity and fiber optic into and throughout a 43,598 acre industrial tract. | City of Dover, Ohio | 75 | 181 days or more | \$1,000,000 |
| Tuscarawas | Water Treatment Plant Replacemnt | This project will supply access and utilities for an industrial park being developed by the City of Dover. Plans include dividing acreage into approximately 10 buildable lots specifically geared towards attracting industrial clients. | Village of Baltic, OH | 40 | 0 to 30 days | \$720,000 |
| Tuscarawas | RJ Corman Cleveland Line | The property is adjacent to State Route 39 and fronts Interstate 77. The property is within the Dover City limits and will receive all city utilities. | RJ Corman Railroad Group | 510 | 31 to 90 days | \$1,241,232 |
| Tuscarawas | Electronic Classroom Project/Technology Upgrades | Additional job creation is subject to the number and types of end users for each lot to be made available. | Tuscarawas Valley Local Schools | 0 | 0 to 30 days | \$125,000 |
| Tuscarawas | Dover Fiber To The Premise (FTTP) Project | Water treatment plant replacement to provide better finished water quality (responsive to both CEQA and local industries. (Plastic plant and Gensie Storage Door Openers). Project will consist of in-ground clearwell and iron and manganese removal equipment. Better water quality will allow operation of industries that require good quality water for manufacturing as well as replacing old, unreliable treatment equipment. | City of Dover, Ohio | 18 | 181 days or more | \$8,000,000 |
| Tuscarawas | Bookmobile | The RJ Corman Cleveland Line serves several large companies in New Philadelphia and Dover. Forty percent of the traffic on the line is hazardous material transported safely on rail as opposed to highways. The RJ Corman Cleveland Line needs further rehabilitation: the installation of 28,000 tons and resurfacing must be done before the track deteriorates any further. The estimated cost of the 13 mile project is \$1,241,232. While employing 10 personnel to perform the needed repair, the long term rehabilitation preserves the 500 jobs along the line. The "Electronic Classroom Project" converts traditional classroom environments into 21st Century learning environments by utilizing current technology. Provides increasing student level of engagement and overall achievement. Specifically, the project includes the purchase, wiring, and installation of interactive whiteboards (SMART technologies) and projection systems into as many classrooms as possible. Additional technology upgrades in each classroom, such as Turnpoint software (student response systems) will allow teachers to provide immediate feedback about student learning. | Tuscarawas County Public Library | 4 | 31 to 90 days | \$100,000 |
| Tuscarawas | Bridge load ratings | Build-out of 90 miles of 96 strand fiber optic cable throughout the City of Dover, with fiber connected to each premise in the city. | Tuscarawas County | 10 | 31 to 90 days | \$225,000 |
| Tuscarawas | Indian Valley Energy Consumption Reduction | Currently the city has a 96 strand fiber optic ring around the city which provides broadband services to all city buildings, all Dover City School facilities, approximately 14 businesses, including our same day surgery center, with plans to connect to Union Hospital and the surrounding medical parks. Dover provides head end services for the Tuscarawas County Tech Park and will also provide services to Kent State University Tuscarawas Campus as well as the Buckeye Career Center. Dover has a direct connection to Ohio's Super Computer System that will make this services all the more valuable moving forward. This project will allow us to provide high speed broadband services to all Industrial Parks within the city as well as our many industrial and commercial businesses not new on the service. | Indian Valley Local School District | 10 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Tuscarawas | Convert our Buses | Our school district spends hundreds of thousands of dollars per school year on highly inefficient diesel fuel school buses with no chance of exchanging them with our fiscal situation. The most logical choice would be to charge all of our buses over to Natural Gas, which would allow for cleaner emissions for the bus and reduce our fuel costs. I have been in contact with several other school districts: Fremontville (Cincinnati), Indiana, Lower Merion Schools, Admore, Paris/Varian, Tulsa Public Schools, Tulsa, Oklahoma and many more, but none in Ohio. It would be a great opportunity for the government to show what is possible if the right minds get together and do the right thing. The Tuscarawas RCAD has an operating RLF loan that needs re-cap. We serve Carroll, Columbiana, Coshocton, Glenmyer, Harrison, Holmes, Jefferson, Mahoning, Muskingum, Stark, Tuscarawas, and Wayne Counties. | Indian Valley School District | 10 | 181 days or more | \$750,000 |
| Tuscarawas | Revolving Loan Fund ReCap | Our RLF program was initiated in 1998 with funding from RD, ARC, and private foundations. The board is established, all policies are in place and staff is on hand to administer the program. Loans are made to small (under \$1,000,000) income and 15 employees) businesses to create/retain jobs. When originally established, the emphasis was on rural agricultural and natural resources business. We wish to expand our emphasis to target energy efficiency and renewable energy businesses. Our RLF does not serve as sole source funding. At least one private lender must be involved and the borrower must provide at least 10%. We anticipate making 5 to 15 loans and create 1 FTE for each \$25,000. | Crossroads Resource and Conservation District | 20 | 0 to 30 days | \$100,000 |
| Tuscarawas | Village of Bolivar - Burfield Farm Development | Reconnection of Bolivar St and Delaware Ave enabling residential development of approximately 33 acres currently owned by the village of Bolivar. Additional 41 acres owned by the village to be reserved for recreational purposes and to provide protection of the village's existing wet field. Sanitary sewer will be extended to recreational property to provide service to future concession building. Water line will be extended to for future development. | W.E. Quicksall & Associates, Inc. | 15 | 91 to 180 days | \$590,000 |
| Tuscarawas | Village of Bolivar - Sanitary Sewer Extension | 2500 L.F. sanitary sewer extension to provide service to an area of planned future development. This extension will provide service to a future concession building and has the potential to provide service to approximately 33 acres of planned residential development currently owned by the village of Bolivar. | W.E. Quicksall & Associates, Inc | 8 | 91 to 180 days | \$361,800 |
| Tuscarawas | Exodus House | Provide transitional housing for up to five family units for up to two years each while awaiting section 8 housing through HUD. We would serve 10-15 families per year. | Friends of the Homeless of Tuscarawas County | 1.5 | 0 to 30 days | \$100,000 |
| Tuscarawas | Tourist Information Center | Build a new 4,000 sq. ft. tourist information center and rest area with restrooms for visitors. Current rest stops at Dover on 177 are slated to be torn down in the summer of 2009 to make way for new overpass ramps. There is a 1-acre parcel of land that we sit in the middle of the project, which is owned by the Convention and Visitors Bureau and will be used to build a new information center provided funding is available. The center will be located on the 30 bank and near spots included to the site. We have \$100,000 earmarked for this project which is already included in the budget. Transportation bill as part of the overpass ramp project. This \$100,000 is to be used exclusively for the building of a tourist information center. Lastly, fiscal COOP rest stops are not slated to be replaced, leaving 108 miles of extension 77 without an official rest stop. | Tuscarawas County Convention and Visitors Bureau | 4 | 91 to 180 days | \$300,000 |
| Tuscarawas | Information Kiosks | 30 freestanding tourist information kiosks will be built by our local Buchanan Career Center students. These kiosks will provide information to be able to withstand all sorts of weather; they will fit the character of each town or village or existing site they are built in. They will be maintained with current visitor and safety information, they will include a "take one" weather-resistant display rack and the kiosks will be located at 15 locations in Tuscarawas County along with 5 kiosks in the adjacent counties of Harrison, Holmes, Carroll, Stark, and Champaign. These kiosks will not only provide information and education on area attractions and businesses thus increasing economic development in the area, but the actual building of the kiosks will provide a "hands on" experience for our career center students in the building of kiosks. The kiosks will include: roofing, marketing and advertising, landscaping, electrical and metal working. This is a terrific program because it combines economic development with education and "real world" applications. | Tuscarawas County Convention and Visitors Bureau | 10 | 0 to 30 days | \$85,000 |
| Tuscarawas | Home Energy Conservation | Replace 1928 windows with new energy efficient windows throughout the home. Have a geothermal heating system installed to eliminate the need for the high cost natural gas furnace. | Individual | 3 | 31 to 90 days | \$10,000 |
| Tuscarawas | Fresh Start | Would like to tear down old homes and rebuild affordable homes in their spot. Homes under 100,000. I believe that this would help this dying community rebuild and bring many jobs and new business to the area. This area has lost many jobs and has had many layoffs. If something isn't done soon I see this community collapsing. It is my mission and goal to try to take this from happening! Please research and give this proposal serious consideration! I thank you for your attention to this matter and look forward to the future progress of our great nation. Thank You and God Bless America | D.T.Y.S Construction & More | 100 | 91 to 180 days | \$552,888 |
| Tuscarawas | Education Center | Construction of an education center for students of all ages to observe wildlife and other wildlife. Facilitate research on Ohio woodlands. Construction of a larger enclosure for the current exhibit. Construction of a nature walk with a walking bridge. | Wolf Timbers | 5 | 0 to 30 days | \$500,000 |
| Tuscarawas | help a trucking co survive | Purchasing of new sewer road tractor, keeping a maintenance shop with work, tires, keeping a family business from going under purchasing fuel, buying lifts, road cones, steel floor plates. | Randy Sanders Trucking | 3 | 0 to 30 days | \$200,000 |
| Tuscarawas | tusc wind coop | wind generator farm 25 plus turbines allow wind of tusc county to have more affordable electricity | scranton wind | 10 | 91 to 180 days | \$100,000,000 |
| Tuscarawas | Growth | hire one additional employee for our small engineering and design firm to handle the multiple requests for our services in 2009. | The Precedent Group | 1 | 0 to 30 days | \$50,000 |
| Tuscarawas | Race Road Restoration [resurfacing] | Resurfacing and Drainage paves of about 4 miles of Township Road 425 (Race Road). A project located at Campbell, 41st and 42nd streets north side area just across from covering in concrete or near chamber. It will keep our money here in our state and change our health needs here. Most people can't afford to travel and stay plus pay the \$2000 visits. I am a day at home man and I have a 4yr old son who has a brain disorder who would very much benefit from those treatments however it is a long drive and it is very costly. Not only that but my wife, husband job and oldest boy school work while giving my youngest child the treatment that would be so good for him. A chamber locally would not only help us but very many families who need the same thing. It would change so many lives. Help reduce care on many secure medications and improve our health around us and for the future. My family and as well as a great community are willing to work hard at this and help save so many lives changed. Even if only a little glimpse of hope leads us to keep going and improve our health needs. | Race Road Restoration | 25 | 181 days or more | \$3,000,000 |
| Tuscarawas | Hyperbaric oxygen chamber | wanting to start a organization | wanting to start a organization | 30 | 91 to 180 days | \$1,300,000 |
| Tuscarawas | broadband wireless rural business program | Cleanwire is a company specializing in custom software and website design. Cleanwire needs capital to research and develop an infrastructure of broadband wireless internet access points and to create custom websites for Amish and Mennonite small businesses who at this point have no access to technology. This project would stimulate new growth in this rural community and create multiple job opportunities within the company as the businesses they are helping to get on the net in Tuscarawas, Holmes and surrounding counties. | Quantuscenter LLC | 50 | 31 to 90 days | \$1,500,000 |
| Tuscarawas | Hart's Lift Station Upgrade | This project is to upgrade an existing lift station that is now handling more volume more often than it was designed to. This is a situation that is in a growing and expanding area of our city that is growing both businesses and residentially. | Cit of New Philadelphia | 25 | 31 to 90 days | \$50,000 |
| Tuscarawas | Third Street NE Storm Sewer/Street upgrade | This project would redesign a street in a residential area and that abuts a school. The current issue is that area is at the bottom of a hill and storm water is currently misdirected causing large amounts of water accumulation at the low spot. Also, curb, sidewalk, driveway aprons need resurfaced in addition to street surface and curbside located catch basins. New storm sewer lines will also be installed where needed. | City of New Philadelphia | 0 | 91 to 180 days | \$180,000 |
| Tuscarawas | Rebuild Fort Laurens | Rebuild Fort Laurens, Ohio's only Revolutionary War fort in what is now Ohio. The project would create 20 new construction jobs and take 18 months to complete. After completion, a new job would be created. In addition to the job creation, tourism is economic development and the rebuilding of the Fort deserves consideration. This money would be used to complete the archaeological dig, site survey plan, build corner bastions, blockhouse, main gate, officers and soldiers barracks, postside wall and recreated hospital. | Tuscarawas County Convention and Visitors Bureau | 20 | 181 days or more | \$1,500,000 |
| Tuscarawas | K9 Help | To place a certified K9 unit on the streets in a small town of approximately 3,000 residence. The Village has approximately 30,000 cars that travel through it on 3 state routes every day. The dog would assist in an attempt to help control the drug problem we are facing. | Strasburg Police Department | 1 | 91 to 180 days | \$20,000 |
| Tuscarawas | Protecting Officers | To purchase new protective vests for officers, and to purchase video cameras for the patrol units. This would help ensure the safety of officers responding to emergency calls. | Strasburg Police Department | 1 | 91 to 180 days | \$25,000 |
| Tuscarawas | K9 Patrol | To place a K9 drug dog on the streets of a town that sees an estimated 30,000 vehicles travel through it daily. The dog would assist in apprehending individuals transporting narcotics on one of three state routes that travel through our jurisdiction. | Strasburg Police Department | 1 | 91 to 180 days | \$25,000 |
| Tuscarawas | Schoenbrunn Village Replace Church Roof | Schoenbrunn Village, consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. The church roof is old and decaying. It has spaced wood shingles partially covered with organic growth (e.g. moss) all of which accelerate the wood decay. The leading contributes to deteriorating underlayment, structural members and logs walls. Scope of Project Remove roofing down to the decking. Replace damaged and/or rotted wood boards and structural support members Install a new wood shingle roofing system with antifungal zinc strips The project will stop the leaking roofs, reducing the rate of building decay. It will restore an important part of the village and prolong its life. | Ohio Historical Society | 5 | 91 to 180 days | \$58,700 |
| Tuscarawas | Schoenbrunn Village Restore Log Cabin 2 | Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. Round log cabin #2 has a leaking wood shake roof that needs replacing. The shakes are old, deteriorated, warped and partially covered with organic growth. Roof leaks contribute to deterioration of the cabin. Many logs need mitigation from insect infestation damage and protection from future infestation. Scope of Project Install a new roof Replace damaged, rotted rafters Replace, repair chinking Apply environmentally responsible treatment to prevent new infestations These actions will reduce eliminate the leaking roof, slow the decay of the cabin, and prolong its life. | Ohio Historical Society | 5 | 91 to 180 days | \$22,000 |
| Tuscarawas | Schoenbrunn Village Restore Log Cabin 16 | Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as a mission to the Delaware Indians. It produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. Log cabin #16 wood shake roof is deteriorated, leaking and has mold and fungi. It causes rafters and wall logs deterioration, fungi and mold. It needs to be replaced. There is insect infestation and the chinking needs repair and replacement. The cabin will be re-roofed, damaged and rotted rafters and logs will be replaced, the chinking repaired and/or replaced. The cabin will be treated to prevent new insect infestations. This will eliminate the leaking roof, mitigate the water damage, arrest the chinking decay and insect damage, and prolong the life of the cabin. | Ohio Historical Society | 5 | 91 to 180 days | \$29,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------|----------------|--------------------|---------------------------|
| Tuscarawas | Schoenbrunn Village Restore Log Cabin 17 | Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. Round log cabin #17 is in extremely poor condition and is infested with insects. It should be replaced to maintain this reconstruction of a cabin authentic of its time period. Scope of Project Demolish cabin Treat soil beneath the cabin site to prevent new infestations Re-construct the cabin with authentic materials and detail Apply environmentally responsible treatment to prevent new infestations These actions continue the integrity of the reconstructed village and its legacy. It will fill a void left by the decay of the example cabin for the period it models. | Ohio Historical Society | 5 | 91 to 180 days | \$48,500 |
| Tuscarawas | Schoenbrunn Village Restore Log Cabin 18 | Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. Round log cabin #18 has a leaking wood shake roof that needs replacing. The shakes are old, deteriorated, warped and partially covered with organic growth. Roof leaks contribute to deterioration of the cabin. Many logs need mitigation from insect infestation damage and protection from future infestation. Scope of Project Install a new roof Replace damaged, rotted rafters and logs Replace, repair chinking Apply environmentally responsible treatment to prevent new infestations | Ohio Historical Society | 5 | 91 to 180 days | \$27,400 |
| Tuscarawas | Schoenbrunn Village Restoration of Church | Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. The church building is in poor condition due to deterioration and disrepair. Foundation logs are missing; other logs need replacement. Roof leaks and fungi on the roof have accelerated the wood decay. Some chinking needs repair. The scope entails: Lift structure and remove damaged, rotted logs Install replacement logs Install missing foundation logs Repair, replace chinking as needed White wash interior walls Wash, treat roof with antifungal Repair, restore windows | Ohio Historical Society | 6 | 91 to 180 days | \$40,000 |
| Tuscarawas | Schoenbrunn Village Restore Schoolhouse | The project will eliminate the roof leak, slow the decay of the church, restore its character and prolong its life. Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. The school house is in poor condition. Foundation logs need repair and replacement due to insect infestation and rot. Insect damage and shrinking need repair. The interior needs fungus removed and white washed. Window frames need repair. The project will: Remove and replace un-useable foundation logs Repair damaged logs Repair, replace chinking as needed Remove fungus from walls, treat with fungicide White wash interior walls Repair, restore windows Apply insecticide | Ohio Historical Society | 5 | 91 to 180 days | \$25,000 |
| Tuscarawas | Tallmadge Church Paint Exterior & Install HVAC | This Congregational Church at Tallmadge was dedicated on September 8, 1825. Regarded as the first early church in Ohio, it is the state's longest continually operating church. Col. Lemuel Porter, a master builder in the Western Reserve designed and constructed this landmark. The brace-framed church features a steeple that is 100 feet high and a portico supported by four great columns, each carved from a solid walnut log. The architecture exhibits refined Greek Revival and Federal style detailing. Scope of work: Install new heating and air conditioning system Repaint exterior using original colors Install interior storm windows for energy efficiency When completed, this project will have extended the life of this fine structure, improved the comfort of its visitors, and restored its exterior beauty for all to enjoy. | Ohio Historical Society | 10 | 31 to 90 days | \$90,000 |
| Tuscarawas | Zoar Village Restore Foundation & Structural to Bl | This project will restore the former home of William Emelar, a son of Joseph Emelar, the first leader of the Zoar Settlers. Founded by religious dissenters in 1817 as a communal society, Zoar is one of the nation's best preserved examples of the religious utopias created in America in late eighteenth and early nineteenth centuries. The Emelar House, built in 1868, was seriously damaged by a flood in 2005. Structural corrections scope of work: Raise foundation of house to original level condition Repair and/or rebuild basement walls, vault and foundation Tuck-point deteriorated masonry joints Install new underground utility lines | Ohio Historical Society | 10 | 31 to 90 days | \$400,000 |
| Tuscarawas | Zoar Village #1 House HVAC and Restore Exterior | The restoration and repair will allow the building to be accessible by the public and to be used for historical purposes. Founded by religious dissenters in 1817 as a communal society, Zoar is one of the nation's best preserved examples of the religious utopias created in America in late eighteenth and early nineteenth centuries. This project will restore Number One House and provide environmental conditioning. It was built in 1835. Designed as a home for the elderly of the community, it later became the home of Joseph Emelar, the Society's leader. It is the most architecturally conspicuous structure in Zoar Village. Scope of Work: Install and remove temporary shoring Remove, repair, and re-install stone porch columns, pilings, iron railings, curb stones and stone paving units on north and end of porch Install new heating and air conditioning system and ductwork | Ohio Historical Society | 8 | 31 to 90 days | \$116,000 |
| Tuscarawas | Zoar Village Store Restore Windows & Exterior Carp | This project will restore the Zoar Store was built in 1833. It was the business headquarters for the Society, the Post Office, and a store. Zoarites made articles in their homes then sold them in the store to people from the surrounding area. Founded by religious dissenters in 1817 as a communal society, Zoar is one of the nation's best preserved examples of the religious utopias created in America in late eighteenth and early nineteenth centuries. Scope of Work: Repair or replace deteriorated beaded wood clapboards and wood trim Repair and replace window sash Repair or replace deteriorated window frames and sills Prepare and repair building using original color scheme | Ohio Historical Society | 6 | 31 to 90 days | \$75,000 |
| Tuscarawas | Schoenbrunn Village Site & Landscape Improvements | This project will restore the building, preserving it for the historical legacy of Zoar Village and Ohio. Schoenbrunn Village consists of seventeen log structures. It was founded in 1772 as mission to the Delaware Indians and produced Ohio's first civil code, church, and schoolhouse. The Ohio Historical Society reconstructed the village c1930. The village then, as it is today, was set in a wooded area with clearings for several fields, gardens, and a cemetery. As the trees matured, some have grown too close to the buildings. Some trees have substantial damage due to weather, lightning, diseases or age. This project will produce a thorough survey of all tree conditions and will develop a comprehensive landscape plan, with prioritized action plan for care of the trees and the planting of new ones. This master plan will be the guide for proper management of the site resources. | Ohio Historical Society | 5 | 91 to 180 days | \$50,000 |
| Tuscarawas | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be Internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. My company is in need of updating equipment, paving down dirt that has incurred over the past 3-4 months from the economy down turn. Start a new dispatcher system will mean updating computer systems. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Tuscarawas | updating old equipment | | Randy Sanders Trucking | 3 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Tuscarawas | Pickles Start Up | Start Up for a non-profit in the Tuscarawas Co. area for handicapped individuals ranging from ages 3 on up. We will also be accommodating our veterans who have been injured. Therapy on horseback, once a week, for those who have a dx release. Any type of handicapped is included, for ADHD to CP and more. Can be physical, emotional or cogntial. We will employ 5 people to start with and grow to around 10-15 per week. It will become one of the counties best non-profit volunteer organizations, giving this community something to be very proud of. | Pickles Therapeutic Riding Center for the Handicap | 8 | 31 to 90 days | \$60,000 |
| Tuscarawas | S.T.O.P. | The project is a self protection program intended to educate individuals (women) and families versus home invasions, attacks on women, and other safety abductions. It is currently on DVD, is set for distribution and is to be taught hands on as well. The program needs to be re-film and edited. Also funds for marketing and distribution is needed. Which of course could produce up to twenty history type jobs, and numerous instructional jobs throughout the state. | rmway productions | 10 | 0 to 30 days | \$150,000 |
| Tuscarawas | Tuscarawas Avenue Bridge Replacement | Replacement of the Tuscarawas Avenue Bridge is imperative to the traveling safety of the general public within the City of Dover. This bridge spans the Tuscarawas River and is one of the major through streets in the city. It is also one of the 3 main access routes to the Tuscarawas County Fair Grounds. The bridge has been determined a hazard by the Ohio Department of Transportation and it has been determined that replacing the structure rather than repairing the structure is critical to the health and well being of the community at large. | City of Dover, Ohio | 100 | 31 to 90 days | \$500,000 |
| Tuscarawas | Fish Hatchery | Set up fish hatcheries throughout the county to create jobs and healthy food sources | W.P.S Construction & More | 20 | 91 to 180 days | \$1,500,000 |
| Tuscarawas | Guy Smith Way | The necessity of constructing Guy Smith Way is to provide a new access road to the Progress Street Industrial Park at the north end of the City of Dover. This road is due to the construction of a new interchange at County Road 80 and Interstate Route 77. This interchange will close off the current access to Progress Street due to the close proximity of Progress Street to the new interchange Ramps. | City of Dover, Ohio | 45 | 91 to 180 days | \$500,000 |
| Tuscarawas | Bellevue/Wills Avenue Storm Sewer Project | The Bellevue Avenue and Wills Avenue Storm Sewer project will relieve flooding problems in this area of the City of Dover has experienced for well over 50 years. The lack of a storm sewer in this area hampers access to Union Hospital during situations of heavy rainfall. It is especially problematic at times of the year when the water table is high due to excessive moisture from snow melting and spring rainfall. With the recent expansions of Union Hospital, New Dawn Retirement Center, and Country Club Retirement Center and the recent planned expansion of Union Hospital will create additional water run-off from increased paved parking areas thus exacerbating the situation. This project needs to move forward this calendar year (2009). | City of Dover, Ohio | 30 | 91 to 180 days | \$400,000 |
| Tuscarawas | Crater Avenue Road Improvements | Crater Avenue is on the west side of the city and is the only access to Dover's Dels Hill Park. Dels Hill Park has 5 large picnic shelters, playground area, amphitheater, shuffleboard and bocce courts. The access to the park is at the end of Crater Avenue which is a dead end. The entrance is situated in a manner that creates a blind spot for motorists driving south with the possibility of park traffic being obscured from view as they cross the hill. The improvements are to be installed to increase visibility and reduce the risk of an accident in this area. | City of Dover, Ohio | 25 | 181 days or more | \$550,000 |
| Tuscarawas | Dover City Parks, Recreation & Shade Tree Office R | The Dover Parks, Recreation & Shade Tree Office are currently located in the basement of Memorial Hall, connecting Memorial Hall to Veterans of WW1. The building is in a bad state of disrepair and is not handicap accessible. The city recently purchased the building immediately adjacent to the Dover City Parks headquarters all fields and recreation area. The building was the office area of a Phipps company and is in need of a major overhaul. New office needs to be designed, the roof needs replacing, the roof needs weatherband and the other areas of the building need major improvements. A plan to add heating cages for both birds and fish. In addition, an indoor simulated golf driving range area, meeting room and restrooms are needed to be located in the building. | City of Dover, Ohio | 18 | 181 days or more | \$450,000 |
| Tuscarawas | New Dover City Hall | Dover City Hall has been in a state of disrepair for several decades. Parts of the building were constructed in the late 1900's with the majority of the facility being built in 1903. It houses the Dover Police Department and the City Administration Offices. The Police side is the former Fire Department, with the Fire horses stables being converted to jail cells. The jail has not been in operation since 1984. Located on the second floor is City Council Chambers, and the Telecommunications Office and Head End for Dover's Fiber Optic Network System. The entire building is not handicap accessible, nor are the stairs wide enough for individuals in wheel chairs to access rest room facilities. Not only is the building in a state of emergency it is in need of major repairs. Dover City Hall should have been replaced in the 1980's or earlier. | City of Dover, Ohio | 300 | 181 days or more | \$5,000,000 |
| Tuscarawas | Oxford/Prospect Street Extension Project | The extension of Oxford Street will provide improved access to the Reeves Mill Industrial Park and Business Incubator located on the former Reeves Street Mill property currently owned by the Tuscarawas County Port Authority. This access will provide the ability to divide this property into multiple lots for business and industrial purposes. The extension and improvement of Progress Street will provide improved access to the Greer Steel Mill adjacent to the Reeves Mill Industrial Park. Both extensions and improvements will not only provide a new roadway but extend city water, sewer, storm sewer, fiber optic and electric service to these areas. | City of Dover, Ohio | 175 | 91 to 180 days | \$550,000 |
| Tuscarawas | Dover Light & Power Light Plant Expansion | This is an existing industrial area of the city that has great potential for expansion once this project is completed. The City of Dover is one of the communities in the State of Ohio that still generates a portion of its electricity needs. The city currently generates its power with a 192' era boiler located in the #2 and #3 to make room for a new boiler that would use clean coal technology. The size of the boiler and output would be determined by the amount of funding available and secured. The above figures are for a 25 megawatt unit, but if economics of scale would dictate a larger unit the city would increase the size of the boiler and turbine along with the amount of our funding request. The 1500 jobs would be created during construction. The number of jobs created after construction and during plant operation would be a in the neighborhood of 24. | City of Dover, Ohio | 1500 | 181 days or more | \$60,000,000 |
| Tuscarawas | Dover City Park Walking, Jogging, Exercise Path | For years it has been the desire of the City of Dover to construct a walking, jogging exercise path around the 3.1 mile perimeter of the Dover City Park system. This path would be well lit, with optimized asphalt pavement surface, lined with various exercise stations and the rest areas with convenient refreshments. This path will increase and enhance the exercise opportunity for all residents of Dover in every age bracket. It will increase the health and well being of residents and decrease health related expenses throughout the community. | City of Dover, Ohio | 24 | 181 days or more | \$900,000 |
| Tuscarawas | Baseball & Softball Fields New Lighting & Fencing | The majority of the 10 Baseball and Softball fields at the Dover City Park area are in need of new fencing. The old fences are well over 40 years old and are beginning to become rusted and create a hazard. They also need to be raised several feet so as not to injure the youth that are playing on them. Additionally, Fields #2, #3, #4, #5, #6 and #11 need new lighting installed. By installing lighting, and increased number of games can be played in any one evening and this accommodates more recreational opportunities for the youth of the community. | City of Dover, Ohio | 12 | 91 to 180 days | \$100,000 |
| Tuscarawas | Landfill Gas Electric Generation | The City of Dover is intent on embarking on a Landfill Gas Electric Generation project in conjunction with the Kinbas Landfill just outside of the Dover City limits. Renewable energy is a must for any community that generates its own electricity. In the long run renewables make sense and they lower our coal emissions and burn garbage into electricity. The City of Dover is already using solar on the city projects but we are ready to move forward with our own project to help spread our electric resources across the board and not remain reliant on any one type of fuel. This is good for our environment and it is good for our community. | City of Dover, Ohio | 300 | 181 days or more | \$4,000,000 |
| Tuscarawas | Goettge Run Storm Sewer Project | Goettge Run is an open storm water run-off ditch running throughout the City of Dover. Its origin is north of the city in Dover Township and increases the flooding and into the City of Dover traveling through at least 8 different alleys and neighborhoods until its termination in the Sugarcrest at Davis Street in the City of Dover. For many decades Goettge Run has created flooding in all of these neighborhoods to various degrees. The hardest hit areas are in the middle of the city and in the western business. This project will make a great difference in the health and well being of the neighborhoods this problem affects, as well as to the safety of the residents all along its route. This project is akin to the Dry Hollow Storm Sewer Project that began in the late 1990's and completed in the early 1990's. The completion of that project has improved the areas of the city affected by Dry Hollow and the project was well worth the monies spent to remediate this problem. Initiating and completing the Goettge Run project will be the best interests of the City of Dover and our residents, business and industry. | City of Dover, Ohio | 36 | 181 days or more | \$4,500,000 |
| Tuscarawas | Dover Dam Hydroelectric Project | The Dover Dam, just north of the City of Dover on State Route 800, is ranked approximately 8th in the country among dams in most need of repair. Over the last several years there have been numerous public meetings to discuss various funding mechanisms, various engineering remedies and fees that need to be made to the Dover Dam. Initial work began in 2008 and/or on the dam in place, the next step is to move forward to begin work to fully fix the dam and remedy its many problems. Now is the time to consider the addition of electric generation to the dam while it is in the process of being rehabilitated. The City of Dover is working in cooperation with Orbital Engineering Services and B&B-GEO to explore the feasibility and cost to add electric generation to this dam at this time. Preliminary cost figures have been provided, which may be high or low, depending on the final project investigation. This project would add to the City of Dover's electric generation mix by adding renewables to our portfolio, which is a renewable and clean energy source. Since this project would be using the dam, which would create any additional disruption to the Tuscarawas River. | City of Dover, Ohio | 500 | 181 days or more | \$15,000,000 |
| Tuscarawas | 69 KV Eastern Loop Extension | The Eastern 69 KV Loop Extension from the Northern limits on Progress Street back to the Dover Light Plant is essential for the safe day-to-day operation of the Dover Light & Power Electric System. In order for the city to have as "back tier" operation as it we need to extend this line back to the plant. We have stopped several years ago by residents who were opposed. However, we have determined that a new route plan is in need to facilitate this project. This project needs to be a direct route back to the plant. The Rolling Acres and Renner Additions have areas that have been annexed into the city and areas that are still out of the city. One of the projects that we have been contemplating for a number of years is the extension of city water, sewer, electric, fiber optics and other city owned utilities. The residents of these areas are requesting our service and we would like to respond in a positive manner as soon as possible. These costs are only for the extension of these services and do not include any expansions to our treatment and generation plants that may be caused by the extension of these utilities. | City of Dover, Ohio | 18 | 181 days or more | \$3,000,000 |
| Tuscarawas | Rolling Acres & Renner Additions Utility Extension | For many years the City of Dover has needed to construct a Safety Forces Sub-Station. For the past 18 years the City of Dover has been depending on the north and continues to do so. With the new interchange at County Road 80 and Interstate Route 77, the city will drastically expand its need to be at least 800 acres. The majority of these expansions have been and are expected to be located in nature, thus creating a burden on our safety forces. By being able to construct a new Safety Forces Sub-Station in the village area, we will be able to alleviate some of that burden and shorten our response time to these areas of the city. | City of Dover, Ohio | 23 | 181 days or more | \$3,500,000 |
| Tuscarawas | East & West Electric Sub-Stations | As the city grows so does the need to expand our utilities and services. As one of the five remaining electric generating public power communities in the state of Ohio, the City of Dover needs to construct new electric sub-stations to maintain and expand our electric system. With the planned expansion of the city to the west and the planned extension of the 69KV line to the east, the city will need to construct two new electric sub-stations to accommodate this growth. | City of Dover, Ohio | 50 | 181 days or more | \$6,500,000 |
| Tuscarawas | County Road 80/ State Route 516 Utility Extensions | With the proposed annexation of between 400 and 600 acres west of the new interchange at County Road 80 and Interstate Route 77 comes the need to extend utilities to this area. The City of Dover owns all utilities but gas so the utility extensions are for water, sewer, electric and fiber optics. The projected land usage of this acreage is approximately 60% residential, 20% commercial and the remaining 20% industrial. All utilities will need to be extended to serve this growing area and it will be more cost effective to plan and install the project all at once than it will be to piece meal it over a number of years. | City of Dover, Ohio | 300 | 181 days or more | \$10,000,000 |
| Tuscarawas | Crater Avenue Storm Sewer Project | The Crater Avenue Storm Sewer Project will allow for the containment of storm water that floods Crater Avenue and residences and businesses along this road on a regular basis. One of the hardest hit businesses is the Park Village Health Care Center. On more than one occasion this facility has had to evacuate its residents due to flooding problems and the loss of electricity due to that flooding. This project will alleviate this problem and provide for the removal of storm water in a safe and efficient manner. Lawrence Township would like to develop a Park and Ride facility near the SR 212 / I 77 interchange. This facility will provide Tuscarawas County and Bank County residents with the ability to carpool for commuting to either county. The implementation of this project will be a step towards the reduction of traffic congestion, as well as significant gas emissions in the area. It is anticipated that the facility will have an immediate occupancy of 20 to 30 users. The facility will have a total parking capacity of 40 cars with the ability to expand in the future. | City of Dover, Ohio | 25 | 181 days or more | \$850,000 |
| Tuscarawas | Lawrence Twp Park and Ride Facility | | W.E. Quicksall and Associates, Inc | 14 | 31 to 90 days | \$90,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Tuscarawas | Amish Country Adventures | Amish Country Adventures is a regional television show promoting tourism within the state of Ohio, primarily focusing on Amish based activities and locations. The need office space and staffing along with production people. We can create jobs and stimulate the local economy but we need start up capital. Eventually the show can maintain its success this advertising and sponsorship from Ohio businesses. Our goals are to create permanent jobs in our state and have a long running program which will be expandable via different formats. Project will reimburse approximately 2100 feet of roadway from Bluestad Drive east to the railroad tracks in the City of New Philadelphia. Existing parcel payment will be placed prior to starting. Material and value boxes will be adjusted as necessary. Signage and other items will be replaced. | Falling Timbers Productions | 10 | 0 to 30 days | \$1,750,000 |
| Tuscarawas | New Philadelphia West High Avenue Resurfacing | The Muskingum Watershed Conservancy District, a political subdivision of the State of Ohio, manages the public lands around US Army Corps of Engineers flood control reservoirs. Among these lands are residential cottage areas home to thousands of local residents. The North Shore Cottage Area at Ansel Lake is one such area. The roads through this cottage area are in need of significant repair, so much so that a complete reconstruction is now the best option. This project would involve the reconstruction and paving of approximately 7,100 feet of roadway. 80 households and approximately 300 residents would benefit from much improved and safer roads. This would also help limit the annual maintenance costs associated with deteriorating roads. Existing installation requiring 68 lbs across entire 195 mile so-called "Panhandle Rail Line" owned by the state of Ohio will improve speed, safety and fuel operations of significant interstate and interstate commerce. | W.E. Quicksall & Associates, Inc. | 10 | 91 to 180 days | \$100,000 |
| Tuscarawas | North Shore Cottage Area Road Re-Construction/Paving | This project is to widen a city street from two lanes to four lanes. In addition, water and sewer lines will be upgraded and replaced and a sanitary pump station installed. Also, a four lane bridge will have to be constructed to replace and existing two lane one and one new signal added. Telephone poles will also have to be relocated. The estimated length of this project is 4070 feet and additional right of ways will also be needed. This project is important due to the growth of traffic on this street with a new performing arts center under construction and the first building being constructed in our 170 acre new high technology park which is now being marketed. Also the Tuscarawas Campus of Kent State University uses this stretch of roadway and their student population is constantly increasing. They currently serve over 2000 students. | Muskingum Watershed Conservancy District | 5 | 31 to 90 days | \$860,781 |
| Tuscarawas | Panhandle Line Tie Replacement | Masonry building to house 3 pressure filters for removal of iron and manganese from the Village's well water supply. The building will include storage and permeable chemical feed room and systems and controls for the water filtration treatment system. Building 30' x 48' | Ohio Central Railroad | 15 | 31 to 90 days | \$3,200,000 |
| Tuscarawas | University Drive Expansion/water and sewer upgrade | Vertical Greenwater Filters 7' Diameter (3 Each) Backwash water holding tank 14,000 gallon Submersible pumps (2) 7.5HP Force main 2.75 I.D. of 8" PVC SDR 26 Sanitary Sewer 1.48 I.D. of 8" PVC SDR 35 4' Diameter Manhole | City of New Philadelphia | 600 | 181 days or more | \$3,600,000 |
| Tuscarawas | Village of Midvale Well Water Filtration System | Currently our local community hospital has built a new 17 million dollar addition to provide more services to the local and surrounding communities. Access to this new and improved facility is limited and rough due to older roads, roads that are not made to handle heavy traffic, as well as broken down curbs, sidewalks, roadways, and lack of sufficient handicap accessibility. We would like to do some road improvements and reconstructing to make the hospital more accessible for local residents as well as those from the surrounding counties for our hospital. Our current building that houses our Police/Fire/Village offices is equipped with an older, inefficient boiler system. The building is equipped with steam radiators that were installed in the early 1980's, although the boiler is approximately 25 years old. The boiler is inefficient and requires costs the Village above and beyond what is normal for heating/cooling costs. We would like to update the boiler and make it up to standard for today's efficiency guidelines. Currently our Village of Dennison office building that houses Police/Fire/Village offices is out of compliance with Handicap laws/regulations. We are a three story historic building with no access to third floor due to stairs. No office or department would be able to do split-level layout of the building. It would allow access to a potential third floor community room, as well as easy access to police/Village offices as needed for the community. | Village of Midvale- Civil Design Associates, Inc. | 15 | 31 to 90 days | \$676,000 |
| Tuscarawas | Hospital Roadway Improvements | Repairing approximately 27.13 miles of Federal Aid County Roads. Roads included are all or portions of CR 10.21,68.82,103.107, and 108. | Village of Dennison | 50 | 91 to 180 days | \$300,000 |
| Tuscarawas | Heating/Cooling System for Village Building | Receiving approximately 32.45 miles of Federal Aid County Roads. Roads included are County Roads # 28.34,39,46.52, and 90 | Village of Dennison | 15 | 91 to 180 days | \$350,000 |
| Tuscarawas | Historic Building Improvement (Elevator) | Seven programs have been identified to promote the need for education beyond high school. The primary beneficiaries of the program will be approximately 300 juniors and seniors in high school and subsequently their families. The objective is to help every student realize that they can attend a post secondary educational institution. The expected outcome is that we will have introduced all students to the possibility of college or school either through actual visits and tours of campuses, participation in a school labor law, or a program where students are "host" teachers. Students and families will also be offered help with filling out post secondary institution applications, FAFSA forms, and scholarship applications. | Village of Dennison | 5 | 91 to 180 days | \$250,000 |
| Tuscarawas | Federal Aid Paving #2 | Receiving approximately 32.45 miles of Federal Aid County Roads. Roads included are County Roads # 28.34,39,46.52, and 90 | Tuscarawas County | 20 | 31 to 90 days | \$1,899,100 |
| Tuscarawas | Federal Aid paving #1 | Receiving approximately 32.45 miles of Federal Aid County Roads. Roads included are County Roads # 28.34,39,46.52, and 90 | Tuscarawas County | 20 | 31 to 90 days | \$2,271,500 |
| Tuscarawas | Realizing Your Potential | Receiving approximately 32.45 miles of Federal Aid County Roads. Roads included are County Roads # 28.34,39,46.52, and 90 | Claymont City Schools | 1 | 91 to 180 days | \$15,000 |
| Tuscarawas | TRUMPET IN THE LAND Management Office | To build a management office on the grounds of Ohio's longest running outdoor drama. One of the areas too tourist attractions, TRUMPET IN THE LAND provides approximately 65 jobs per year, draws tourists annually from all 50 states and several foreign countries and has had an economic impact of excess of \$215,000,000 to Tuscarawas County over the past 39 years. An on-site management facility will continue to provide employment to theatre professionals, entertainment tourists and economic impact to Tuscarawas County. | Ohio Outdoor Historical Drama Association, Inc. | 20 | 91 to 180 days | \$150,000 |
| Tuscarawas | Storm Windows for Historical Library Building | 31 storm windows for confederate style windows | Tuscarawas County Public Library | 12 | 31 to 90 days | \$20,000 |
| Tuscarawas | Dover Township Sewer Extensions, Phase 2 | We are a library nestled in the Appalachian area of Ohio. We have a beautiful building that was originally built in 1934 with PWA funding and added onto in 1951. Our library in New Philadelphia which was situated after Philadelphia Pennsylvania with original government buildings constructed in a confederate style. We have lovely confederate style windows throughout the buildings, which do not have storm windows. There is a great deal of heat and air conditioning loss through these windows. With storm windows, the energy efficiency of the building would be improved. The library's heating and cooling bills could be significantly reduced moving forward. This project will extend sanitary sewers from the Phase 1 project north to serve the Columbus and Beaman areas located south of 177. These areas are generally residential areas with small residential lots that can not properly support on-site wastewater treatment system. The OEPA has a history of complaints of malfunctioning septic systems for this area. | Tuscarawas County Board of Commissioners | 20 | 181 days or more | \$1,825,000 |
| Tuscarawas | KSU - Regional Campus Renovations | A majority of the primary classroom buildings on the regional campuses were constructed in the late 1960's or early 1970's and therefore are aging or exceeding 40 years old. The classrooms and laboratories have undergone only selective renovations during the 40 years. This project will provide six of the seven campuses to replace failing mechanical and electrical systems, address asbestos abatement concerns, implement energy conservation measures, and modernize the classrooms, laboratories and lecture halls to match today's teaching needs. The renovations to the Main Hall at the Athensville Campus are addressed under a separate project. | Kent State University | 730 | 181 days or more | \$73,000,000 |
| Tuscarawas | School Street Improvement Project | The primary purpose of this project is correct the drainage problems along School Street between Center Street and Main Street in the Village of Tuscarawas. This project will provide safer access for the 500 students and staff who attend the Indian Valley Middle School and for residents of the village who live and travel on School Street. Specific improvements include: 1,435 linear feet of storm sewer (12 inch, 16 inch, and 18 inch diameter), 16 catch basins, 3 manholes, 1,210 linear feet of 8-inch diameter water line, 1,758 linear feet of curb, planting and resurfacing the street, and widening the road to 48 feet. By replacing the existing 8-inch water line with an 8-inch water line will improve the fire protection for the new school. The estimated ADT is 1,100. | W.E. Quicksall and Associates, Inc. | 15 | 91 to 180 days | \$404,250 |
| Tuscarawas | Clean Air and fuel saving Transportrtion | To install heat jobs by purchasing new semi-trucks and trailers that meet the new E.P.A. laws for year 2010 that will create Clean Air and fuel saving Transportation. | TOMAR TRANSPORTATION LLC | 2 | 0 to 30 days | \$350,000 |
| Tuscarawas | Village of Stone Creek Public Water System | This project is to provide a public water system for the Village of Stone Creek. Village residents and businesses currently rely on private water wells for potable water. An engineering feasibility study had been completed for this project. Project components and outcomes include the following: two water wells, chlorination building, 8700' of 6" waterline, 40,000 gallon water storage tank, sidewalk replacement and appurtenances. This project will replace an outdated (30 year old) and maintenance prone pump station. The current station is a well used well station that continuously has problems with pump and motor control failures. Replacing this station with a new submersible pump station will eliminate the problems. | Village of Stone Creek- Civil Design Associates, Inc. | 30 | 181 days or more | \$1,318,300 |
| Tuscarawas | Sandyville PS #2 Replacement | During the low conditions, there is insufficient residual pressure in various locations throughout the village of Bolivar's water distribution system. In addition, the village does not have the required emergency storage capacity to support an existing existing during center located within the village. These deficiencies only limit the service the village can provide to their existing customers. It requires the village's ability to accommodate future growth. To correct this problem, the village would like to construct a 500,000 gallon elevated water storage tank to meet the water pressure and fire protection needs of the village. | Tuscarawas County Board of Commissioners | 6 | 91 to 180 days | \$500,000 |
| Tuscarawas | Village of Bolivar - Elevated Water Storage Tank | 1100 linear ft. of 10" ductile iron water line that will service a new school that is under construction. 1000 linear ft. of 8" sewer line that will also be installed in the same school construction site. 1500 linear ft. of 12" ductile iron water line that will service 5 businesses that are currently located within the corporate limits of the village of Bolivar and serving wells for a potable water supply. The village of Bolivar currently has approximately 12,000 feet of 4 inch water lines that are connected to hydrants to provide fire protection. Current Ohio EPA and Ten State Standards require fire lines serving hydrants be a minimum of 6 inch. In addition, portions of the village have residual pressures less than 20 psi during fire low conditions. The village would like to replace these lines with both 6 inch and 8 inch water lines. This will bring the village into compliance with current standards concerning minimum pipe size. It will also be a step towards connecting the sufficient pressures within the system. | Village of Bolivar- W.E. Quicksall and Associates, Inc | 25 | 91 to 180 days | \$1,140,300 |
| Tuscarawas | waterline and sewer line extensions | Project includes 8,000 feet of new storm sewer ranging in size from 12" to 42" along E 1st Street, E Bank St, E High St, St. and Thompson St in the city of Uhrichsville. E 1st Street is a heavily traveled street which connects the city of Uhrichsville to the village of Dennison and currently has no storm sewer system. The project will improve safety for vehicles by removing excess stormwater from the roadway. The sewer streets connect storm sewers that are underlaid and/or are in poor condition. Recent video inspection of the sewers could not be completed in some areas due to sections of collapsed pipe. | village of Strasburg | 10 | 31 to 90 days | \$249,500 |
| Tuscarawas | Village of Bolivar - Water Distribution System Imp | Sanitary Fiber is a full service paper converter located in Northern Tuscarawas County. With the stimulus we would invest in a high speed laminator and an automatic roll wrapper. Both pieces of equipment could be purchased within 30 days, with 30-40 additional days for installation. With these two pieces of equipment, we would be able to increase our efficiencies and be able to compete on a national scale, rather than regional. By installing this equipment we will expect to increase our production by 50%, immediately, this offer our local employees the opportunity to increase their pay and benefit package with the new business we would acquire. This could just be the beginning. Once established on a national level we could then continue to expand manufacturing space, equipment and labor. A conservative 5-year plan after the initial investment would be to double our annual sales, a manufacturing addition of 15,000 square feet, another high-speed rewinder and six additional employees. Thanks for your consideration. | Village of Bolivar- W.E. Quicksall and Associates, Inc | 8 | 91 to 180 days | \$887,700 |
| Tuscarawas | Uhrichsville East 1st Street Storm Sewer | Sanitary Fiber is a full service paper converter located in Northern Tuscarawas County. With the stimulus we would invest in a high speed laminator and an automatic roll wrapper. Both pieces of equipment could be purchased within 30 days, with 30-40 additional days for installation. With these two pieces of equipment, we would be able to increase our efficiencies and be able to compete on a national scale, rather than regional. By installing this equipment we will expect to increase our production by 50%, immediately, this offer our local employees the opportunity to increase their pay and benefit package with the new business we would acquire. This could just be the beginning. Once established on a national level we could then continue to expand manufacturing space, equipment and labor. A conservative 5-year plan after the initial investment would be to double our annual sales, a manufacturing addition of 15,000 square feet, another high-speed rewinder and six additional employees. Thanks for your consideration. | W.E. Quicksall and Associates, Inc. | 10 | 91 to 180 days | \$1,813,600 |
| Tuscarawas | Equipment Acquisition | It has been almost 20 years since the city has resurfaced our basketball courts at the Dover City Park. The courts have large cracks running through them and these cracks are beyond the stage where crack sealer will do any good. The courts need the present pavement removed and to be totally reconstructed complete with underlaid new pavement, ermping backboards and benches. This project will provide quality recreational facilities for the youth of the City of Dover for many years to come. | Gemini Fiber Corporation | 12 | 31 to 90 days | \$600,000 |
| Tuscarawas | Dover City Par Basketball Court Reconstruction | The Sanitary Sewer which serves the Front Street area of the City of Dover is in a drastic state of danger. Additionally, the Lateral extending to the residences from the Sanitary Sewer are also in a state of danger. The lining of the Sanitary Sewer and the Lateral will provide a brand new Sanitary Sewer System to this area of the city at a fraction of the cost of installing a new system by conventional means. The homes in this area experience water encroachment into the sanitary laterals, and the system at large via the sanitary main. This project will alleviate these problems. | City of Dover, Ohio | 12 | 91 to 180 days | \$250,000 |
| Tuscarawas | Front Street Sanitary Sewer Lining | The Sanitary Sewer which serves the Front Street area of the City of Dover is in a drastic state of danger. Additionally, the Lateral extending to the residences from the Sanitary Sewer are also in a state of danger. The lining of the Sanitary Sewer and the Lateral will provide a brand new Sanitary Sewer System to this area of the city at a fraction of the cost of installing a new system by conventional means. The homes in this area experience water encroachment into the sanitary laterals, and the system at large via the sanitary main. This project will alleviate these problems. | City of Dover, Ohio | 18 | 91 to 180 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Tuscarawas | Fire Department Construction Project | In the 1930s the existing fire station was constructed as a community hall, theater, and basketball court. In 1989 it was converted into a fire station. Located in flood zone we have two to three inches of water enter the bay during heavy rains and flash floods. The building is not energy efficient, lacking about anywhere of energy saving modifications. The fire department covers five townships over two counties. Expected outcome is an energy efficient station meeting large enough to meet the needs of the future. | Village of Sugar Creek Fire Department | 235 | 0 to 30 days | \$1,800,000 |
| Tuscarawas | Road repair | We would like to level up and chip and seal main rd for roads in our year. We only have the money to cover 4 or 5 miles. Consequently the worst roads get the attention and the rest we do what we can. We would like to have a asphalt company to level the roads. Then we would come back and chip and seal them. | Franklin Township | 10 | 31 to 90 days | \$500,000 |
| Tuscarawas | Stocker Trucking Co, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Tuscarawas | Improving Energy Efficiency | The Tuscarawas County Sheriff's Office, which includes a full service jail with a maximum capacity of 100 inmates, was constructed in 1992. The current budget of our facility is \$1,300. Minimum standards for full service jails require a large range of energy efficient lighting. Our goal - while meeting these standards - is to improve energy efficiency by upgrading our insulation and by switching to more energy efficient lights. The projected cost of such project is \$113,100. | Tuscarawas County Sheriff's Office | 8 | 181 days or more | \$113,100 |
| Tuscarawas | DRUG AWARENESS | DESCRIPTION: THESE FUNDING DOLLARS WILL BE USED TO ASSIST IN DRUG ACTIVITY INVESTIGATIONS. IN OUR COMMUNITY WE HAVE PERSONS ENTERING OUR COMMUNITY FROM OTHER JURISDICTIONS THAT ARE KNOWN DRUG USERS AND DISTRIBUTORS. EXPECTED OUTCOMES: INCREASED INVESTIGATIVE RESOURCES THROUGH INCREASED PERSONNEL HOURS TO RESPOND TO COMPLAINTS OF DRUG ACTIVITY IN OUR COMMUNITY. IN ADDITION TO PERSONNEL, TRAINING AND EQUIPMENT WILL BE NEEDED PROPERLY EQUIP THE OFFICERS TO COMPLETE THE TASKS IN A SAFE AND COMPETENT MANNER. | MIDDLETOWN POLICE DEPARTMENT | 4 | 31 to 90 days | \$24,000 |
| Tuscarawas | small business | Restaurant for a community The program is a tiered with technology teachers being hired to teach students while embedding the professional development daily into the building with teachers observing and helping in the second half of creating technology classrooms of the future. The third tier is to hire a technology management team to oversee the project to gain the high-yield results and ensure that the technology is in line with business expectation for future jobs. | small business | 25 | 181 days or more | \$200,000 |
| Tuscarawas | 3-Tier Technology Training | Tier 1 = Hiring of 7 teachers to place in each building to meet State Technology Standards for students while providing on-site training for teachers. This tier would be phased out over two years and the 7 teachers would move into the technology classroom area as Lead Teachers. Tier 2 = Classrooms being updated with computers, projectors, digital cameras, and scanners where teachers would volunteer for 40 hours of professional development to have their classroom become a model room. Tier 3 = To hire a consulting company for the long term duration of the project and help to take care of technical difficulties as well as strategic plans of the district to ensure alignment of goals. | New Philadelphia City Schools | 7 | 0 to 30 days | \$500,000 |
| Tuscarawas | Rebuilding Horizons | To purchase an 18,800 square foot building previously to meet our needs as a Mentally Retarded Developmentally Disabled (MR/DD) Adult Day Services Center with necessary office space. | Horizons of Tuscarawas and Carroll Counties, Inc. | 200 | 31 to 90 days | \$1,109,221 |
| Tuscarawas | New Fire Station construction | The purpose of this request is to acquire land and construct a new fire station replacing one built in the early 1970s. The current building serves as the only fire station in our city of 18000. There are currently 22 firefighters and 10 fire trucks. The current budget is insufficient to purchase the apparatus needed to be custom made to fit the building rather than what we want. This increases costs. The existing building also is in need of upgrades on a regular basis. There are two potential locations being considered for this project. | City of New Philadelphia | 50 | 181 days or more | \$5,500,000 |
| Tuscarawas | Police Protection Project | Funding is much needed in order to address the insufficient law enforcement services for the Village of Mineral City. The current budget is insufficient to provide adequate services for a village of our size. The Village is in need of additional funding for uniforms, training, and police services. Includes the acquisition and construction of a radio and cellular phone tower. No service exists in the community, and such project would greatly enhance communications and safety for the village. | Village of Mineral City | 5 | 0 to 30 days | \$60,000 |
| Tuscarawas | Cellular Phone and Radio Tower Project | These would be construction of improvements to the Village's streets and storm sewer systems in fire need of repair due to insufficient local funding due to an ending tax base. Would include grading, drainage, curbing and paving and otherwise improving in excess of 63,000 sq. ft. of streets and 45 curb basins and related improvements and the acquisition of related equipment. | Village of Mineral City | 20 | 0 to 30 days | \$153,000 |
| Tuscarawas | Village Street and Storm Sewer Improvement Project | Construction of a new safety and service garage to enable the Village to store and maintain service equipment and fire equipment and achieve energy cost savings over existing facility. | Village of Mineral City | 10 | 0 to 30 days | \$870,436 |
| Tuscarawas | Safety and Service Garage Project | Acquisition of the protection equipment and expansion of the station. | Village of Mineral City | 5 | 0 to 30 days | \$405,214 |
| Tuscarawas | Fire Department Improvement Project | The project would create a local franchise of a children's clothing consignment store to generate funding to operate the mission of the agency while at the same time creating job training and jobs for the clients served by the agency. This would include clerical staff had been victims of family violence, women with addictions and those with young children - all of whom have no marketable skills to gain entry into the job market. The funding would allow for the purchase of equipment and initial inventory as well as the first three months of operation. In addition to job skills, soft skills including appropriate dress, behavior and work ethics would be taught. As skills are learned, the women would go on to jobs in the general job market and other would come into the program to gain skills. Once the business generates a profit the proceeds would go to fund programs and services to help the same populations. | Personal & Family Counseling Services of Tuscarawas | 10 | 91 to 180 days | \$150,000.00 |
| Tuscarawas | For-Profit Arm | The project would provide a safe environment for patients to visit with their parent to avoid exposure to continued family violence. Visits would be provided at our agency in specially designed family rooms where visits are monitored through a one-way mirror and sound system. Law enforcement is present in the building to ensure that the parent who is visiting does not return to the child and to ensure that the residential parent leaves the premises. This ensures that the parents do not have contact and an opportunity for violence to occur. Families served in the program would be low income and not have an open case with child welfare agency. | Personal & Family Counseling Services of Tuscarawas | 10 | 0 to 30 days | \$35,000.00 |
| Tuscarawas | Supervised Visitation Program | Harbor House is the domestic violence program serving Tuscarawas County. Services include a domestic violence shelter. The funding for this program is very complex and includes more than 12 revenue sources. Additionally, due to the low wages staff turn over is at times significant. Funding cuts this year required that we eliminate all clerical support, donations/volunteer coordinator and maintenance staff. This request would allow us to add part-time fiscal and human resources staff and maintenance staff. These positions are vital to the overall functioning of the program and to allow us to best serve the victims of violence in our county. If we are not accountable to funders, we risk losing revenue and if we do not have staff to manage donations, we lose resources that are vital to providing services. If we do not hire and train competent staff we will not be capable of providing quality services. If we do not maintain our facility we will have bigger problems in the future that are more costly. The services to victims will be enhanced by each of these positions. | Personal & Family Counseling Services of Tuscarawas | 5 | 0 to 30 days | \$40,000.00 |
| Tuscarawas | Victim Assistance Enhancement | An energy conservation master plan was completed in 2008 and included projects which would save energy at each of the seven regional campuses. This project will permit the university to move forward quickly with the energy conservation projects identified in the master plan and provide immediate operational savings. The preparation of the request for proposals from energy conservation companies is already underway. | Kent State University | 225 | 91 to 180 days | \$15,000,000.00 |
| Tuscarawas | KSU- Regional Campus Energy Conservation Improve | This project will replace two failing lift stations. In addition of sanitary treatment and distribution process to aging wastewater treatment facility. Improvements are necessary to meet Ohio EPA NPDES discharge limits for permit renewal. | Village of Richwood | 50 | 91 to 180 days | \$250,000 |
| Union | Sewer System Improvements | Existing wastewater treatment facility built in 1970s with approximate flow of 105,000 gal per day. Deteriorating condition creates excessive O&M (operating and maintenance expenses) and makes it difficult to meet Ohio EPA and NPDES discharge limits. Plant has exceeded useful life and needs replaced or taken off-line, with a new pump station and force main installed to send sewage to neighboring Mansfield Water Reclamation Facility. New facility will have potential to serve surrounding areas for additional environmental benefit by sequestering contaminated isolating sites. | Union County Engineer | 10 | 0 to 30 days | \$100,000 |
| Union | Darby Meadows WWTP Improvements | Replaces structurally deficient bridge that was originally constructed in 1930. | Union County Engineer Office | 8 | 91 to 180 days | \$1,400,000 |
| Union | Millcreek Estates Wastewater Treatment Facility Re | Improves existing roadways for safety in an industrial area. CR165 is the main entrance roadway into Honda's Marysville operations. | Union County Engineer Office | 75 | 181 days or more | \$179,500 |
| Union | Cobb-Harriman Road (CR338) Bridge Replacement | Improve existing roadways in need of safety improvements and maintenance in an industrial and technology corridor. Good opportunity for incubator and job ready sites. | Union County Engineer Office | 100 | 31 to 90 days | \$460,000 |
| Union | Resurfacing/Widening CR 165 A and TR 68 | Replace existing structurally deficient bridge in conjunction with a resurfacing project in an industrial and technology corridor. Good opportunity for incubator and job ready sites. | Union County Engineer Office | 200 | 31 to 90 days | \$676,500 |
| Union | Resurfacing CR1 D-H / CR165 B-C / TR69 / CR37 A-B | Replacement of structurally deficient bridge built in 1913 with a modern covered bridge. This would bring tourism into the County because it will be attraction at the County's annual covered bridge festival. | Union County Engineer Office | 50 | 0 to 30 days | \$140,000 |
| Union | CR1 H-6.366 Small Bridge Replacement | Widening and reconstruction of heavily traveled road in an industrial and technology corridor. Directly adjacent to Central Ohio Innovation Center and US33/BR161 interchange modifications. Great opportunity for incubator and medical technology sites to support Central Ohio Innovation Center. | Union County Engineer Office | 200 | 91 to 180 days | \$377,000 |
| Union | TR99 Bridge Replacement | Major improvement on congested road through an industrial and technology corridor. This will also serve as a major safety improvement to the intersection. | Union County Engineer Office | 500 | 181 days or more | \$800,000 |
| Union | CR 1 Reconstruction Phase 2 | The improvement of an aging and substandard drinking water system. | Union County Engineer Office | 200 | 181 days or more | \$1,500,000 |
| Union | US RT. 42 and CR1 Intersection Improvement | The City of Dublin is reconstructing the US 33/BR 161 Post Road interchange that will serve as the entrance to the economic development opportunities at the Central Ohio Innovation Center (COIC). The first phase of this larger overall project is the BR 161 Widening and the Relocation of Industrial Parkway. The reconstruction will provide upgrades to the interchange that will impact safe and efficient traffic flow in the area for the next twenty five years. These improvements will facilitate traffic and continue the City's commitment to smart growth. Construction drawings are ready to submit to the Ohio Department of Transportation for a right-of-way permit and we can be ready to bid the project in the next 30-90 days. It is anticipated this project will require about 14,000 man hours to complete over the course of one construction season. This number of man hours relates to approximately 300 full-time and part-time construction jobs created by building this project. | City of Dublin | 300 | 31 to 90 days | \$7,226,000 |
| Union | Village of Milford Center Water System Improvement | The City of Dublin is reconstructing the US 33/BR 161 Post Road interchange that will serve as the entrance to the economic development opportunities at the Central Ohio Innovation Center (COIC). This project is the second, larger phase that completes the combined project of the interchange reconstruction and the BR 161 Widening and the Relocation of Industrial Parkway. The reconstruction will provide upgrades to the interchange that will impact safe and efficient traffic flow in the area for the next twenty five years. Construction drawings are complete and bid to the Ohio Department of Transportation for an COIC bid letting and we can be ready to bid the project in the next 120 days. It is anticipated this project will require about 91,000 man hours to complete over the course of one construction season. This number of man hours relates to approximately 2,000 full-time and part-time construction jobs created by building this project. This project constructs infrastructure necessary to support the increased economic growth and anticipated 2,250 permanent jobs that are expected to be generated by the COIC for years to come. | City of Dublin | 2,000 | 91 to 180 days | \$24,100,000 |
| Union | US 33 24.870 | The Union County Mental Health and Recovery Board purchased the Ohio National Guard hospital building built in 1911. This solidly built building has been a social treasure for almost 100 years. Our Board has saved this building (2nd OMO bidg. built in Ohio) from the wrecking ball. We have received several thousand dollars in restoration and now need help in making this building energy efficient. We want to rehabilitate the building by insulating the brick walls, install a geothermal and solar heating and cooling system, insulated doors and windows. When finished this building will serve as an after school program for youth with a focus on inner-city youth and families, and community activities. We are ready to begin our project within 30 days. | ADAMHS Board | 20 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Union | Communities of Raymond & Peoria Wastewater Facility | 27,340 linear feet of new sewer line 3 pump stations 1 new wastewater treatment facility Area is under Findings & Orders issued by EPA Director Korleski on Oct 1, 2008. Area suffers from lack of sewers, lack of septic systems, and high rate of failing septic systems, creating unsanitary conditions. Project is a high priority of Ohio EPA, and suffers only from lack of funds due to large majority of LMI (low-to-moderate income) residents in project area. High cost of construction will result in unacceptably high user fees, creating a financial burden for residents. County is already pursuing all available state and federal grant & loan programs to defray cost. However, grants/loans available under existing programs are NOT sufficient to make project financially feasible for residents. County will add matching funds, as best as possible, to help defray cost to residents | Union County Engineer | 55 | 91 to 180 days | \$4,300,000 |
| Union | Streng Road (CR67) Historic Bridge Rehabilitation | Rehabilitation of a historic steel truss bridge built in 1914 over the scenic, Duffly. It currently has a load rating of 20 tons in order to maintain school bus traffic to a public school campus that is adjacent to the bridge structure. If there is no rehabilitation we may be forced to lower the load rating and buses will no longer be able to cross and utilize the bridge causing the buses to take a longer route to get to the school facilities. This will be a major safety improvement. | Union County Engineer | 150 | 91 to 180 days | \$500,000 |
| Union | Snediker Road (TR 279) Bridge Replacement | Replace structurally deficient bridge that was constructed in 1930. | Union County Engineer | 100 | 181 days or more | \$158,100 |
| Union | CHANGE TO SOLAR NOW OHIO | Change to Solar Now is a company that is focused on a variety of renewable energy products for the home, business and municipalities. These products will include solar, wind, geothermal and other renewable energy products. Within the first year we estimate the installation of over 1000 renewable energy home units. We estimate engaging over 50 municipalities for solar products from street lights to solar powered park lighting. We anticipate engaging 100 businesses with renewable energy products. These installations could take advantage of any or all of the products listed. We also have a solar community loan program available. We have no current access center or business, however we intend to start a solar only program providing victims services. Due to budget and manpower shortages, we've been unable to conduct outreach activities to the rising number of hospitalizations women here about their rights if they are a victim of sexual assault, domestic violence, or stalking or about the resources and services available to them. Our SART/SANE and domestic violence protocols do not include culturally appropriate responses to these victims. | Change to Solar Now | 50 | 31 to 90 days | \$200,000 |
| Union | Union County Ethnic Women's Service Project | The Union County Prosecutor's Office through the Victims of Crime Assistance Program will hire a full-time, culturally diverse victim advocate to work with our collaboration boards to periodically review our existing protocols to include culturally sensitive information and services to the victims, conduct outreach activities TBD, create/distribute 200 targeted pamphlets to areas frequented by these women addressing legal rights. | Union County Prosecuting Attorney's Office | 1 | 31 to 90 days | \$80,000 |
| Union | Wireless Broadband Internet Service | This Wireless Broadband Internet Service offering would target potential customers who are in un-served and/or under-served areas and do not have access to Broadband Internet Services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Marysville (Union County) area, whether an existing or a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer support and equipment in order to provide the radio link between the customer and the base station radios. The service would be provided for the 700 MHz licensed wireless pathway. NKTelco Inc. already owns the 700 MHz license for Union and surrounding counties. Unlike other radio services, the 700 frequency is not strictly "line of sight". Thus, NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funding. The rollout, serving in excess of 260 customers would be possible utilizing the estimated \$225,000 in total project cost estimate. | NKTelco Inc. | 2 | 31 to 90 days | \$85,000 |
| Union | Hi-Q Egg Products, LLC | The stimulus funding would be used to improve roads and infrastructure, including Davis Road and other county and township roads, in the area of the new Hi-Q Egg Products which the Union County Engineer has identified and requested be improved. | Dinsmore & Shohl, LLP | 75 | 31 to 90 days | \$6,000,000 |
| Union | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDC's mission is to invest in people to provide job opportunities and economic change. These funds will support ECDC's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, individual development accounts (IDAs), microloans, technical assistance, and credit counseling. As the only U.S. Small Business Administration designated Community Development Financial Institution (CDFI) in Central Ohio, ECDC addresses the needs of small business owners in the creation and expansion of microenterprises. ECDC's Microenterprise Loan Fund fills a gap in the credit markets by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDC is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs. | Economic and Community Development Institute | 20 | 0 to 30 days | \$150,000 |
| Union | Town Run 319 Construction Match | City match for 319 Stream Restoration of 400 linear feet of Town Run in Downtown Marysville | City of Marysville | 28 | 181 days or more | \$300,000 |
| Union | Town Run 319 Engineering costs | City engineering costs for 319 Stream Restoration for section of Town Run located in Downtown Marysville | City of Marysville | 3 | 91 to 180 days | \$85,000 |
| Union | Sanitary Collections/Maintenance Facility | Construction of operations and maintenance facilities for sanitary collections operations (design complete) | City of Marysville | 120 | 0 to 30 days | \$2,000,000 |
| Union | Timberview Basin/London Ave. Storm | Stormwater flood/sedimentation control for Town Run/Mill Creek. Identified as part of recommended actions for Mill Creek Watershed | City of Marysville | 25 | 181 days or more | \$635,000 |
| Union | Marysville School Detention/Milford Ave Culvert | Stormwater flood/sedimentation control for Town Run/Mill Creek. Identified as part of recommended actions for Mill Creek Watershed | City of Marysville | 21 | 181 days or more | \$535,000 |
| Union | Maple and Milford Sidewalk extensions | Extend Sidewalk along school paths that do not currently have sidewalks. Includes paths to multiple schools within the City of Marysville. | City of Marysville | 20 | 91 to 180 days | \$510,000 |
| Union | Maple and Milford Sidewalk extensions | Extend Sidewalk along school paths that do not currently have sidewalks. Includes paths to multiple schools within the City of Marysville. | City of Marysville | 20 | 91 to 180 days | \$510,000 |
| Union | Cherry St/Carriage Acres Lift Station Eliminatn | Eliminate Sanitary lift station and extends gravity sewer to Trunk Interceptor Project (Design in Progress) | City of Marysville | 120 | 91 to 180 days | \$3,000,000 |
| Union | Open a business as a windmill distributor to promo | Begin promoting the use of renewable energy by becoming a distributor of windmills in rural areas. The grant would assist with start-up costs associated with hiring installers, electrician, freight hauler, office staff, site prep. Additional work would be contracted out, which would assist other companies. | Name not filed with Secretary of State yet | 10 | 91 to 180 days | \$250,000 |
| Union | Franchise Restaurant | With the present economy it has been shown there is a need for fast food restaurants due to the cheaper cost of meals. The people of the Plain City, Ohio area only have one fast food restaurant and one of the many of that restaurants closing due to no competition. My wife and I feel we have the ability, work ethic and business savvy to operate this business. We are enclosed please growth on investment plan in Marysville, Ohio. This effort along with the first full sized prototype that Liventure has already built would create 200,000 gallons of enclosed growth media (water for culturing and harvesting algae). The resulting algae oil and biomass from large-scale cultivation will enable us and our collaborating researchers to advance the development of this 2nd generation biofuel. In total the project is expected to create 22 new high tech Green jobs. Approximately six (6) will be needed to operate this research facility, create with advanced degrees. The remainder (16) would evolve into our first Field Installation Team. These construction positions would cover a wide range of skill sets. The group assembled will have the needed skill and complement of skills to complete all phases of construction for all installations. It would be responsible for our building out first commercial operations and form the nucleus for developing new installation teams as demand increases. Money needed to pay bills to keep minority retail business running. Hiring of 5+ employees to help run minority retail business. Business is so slow that I am not making enough money to pay the bills nor do I have the funds to hire & pay employees. I am currently running all aspects of business by myself and need help desperately! The majority of my business debt has been funded on credit cards and lines of credit with low APR's. However, because of the economy, these rates have now changed and have gone as high as 20% APR on my total balance. Note that my balances carry thousands of dollars. I can't hardly pay the minimum due amounts because I need to provide food & basic needs for my family. I have turned to the advice of financial professionals for help who have advised me to apply for other means of credit loans to either consolidate my loans or find lower APR offers. Needless to say, I have been denied credit because of the amount of debt that I can't pay down and the number of inquiries made to the credit agencies. Also, I now have to deal with my credit ratings/score being lowered because of the inquiries made to the credit unions. I don't want to lose my business or home! | Individual | 30 | 181 days or more | \$800,000 |

| Union | Church Street storm sewer replacement | Replace deficient storm sewer. | Village of Plain City | 6 | 181 days or more | \$150,000 |
| Union | Noteman Road storm sewer | Replace and repair deficient storm sewer. | Village of Plain City | 10 | 181 days or more | \$250,000 |
| Union | Sewer Plant mechanical and systems upgrade. | To get a Sewer Plant and Associated Computer Systems updated to ensure EPA compliance and minimize potential violations. | Village of Richwood | 364 | 31 to 90 days | \$350,000 |
| Union | Town Run 319 matching construction | 319 Grant recommended to LUBEPA. | City of Marysville | 28 | 181 days or more | \$3,000,000 |
| Union | Grove Street widening and improvements | Collector street in from of two schools (Elementary and Jr. High School). | Village of Richwood | 15 | 31 to 90 days | \$376,751 |
| Union | Jerome Force Main & Pump Station | Installation of dual force mains from the lift station to Marysville sewer plant (approximately 6.5 miles). | Union County Engineer's Office | 200 | 31 to 90 days | \$5,000,000 |
| Union | Industrial Pkwy. watermain | Installation of roughly one (1) mile of 36" watermain for capacity. | Union County Engineer's Office | 92 | 31 to 90 days | \$2,300,000 |
| Union | Blagrove Street watermain replacement | This is one of the worst lines in town. | Village of Richwood | 20 | 31 to 90 days | \$500,000 |
| Union | Salt Brine tank rehab. | Replace existing tank roof which is structurally deficient. | Village of Plain City | 1 | 181 days or more | \$30,000 |
| Union | Insertion of Valves Project - approximately 8 valv | Enables the shutdown of greatly reduced areas within the water system. | Village of Plain City | 2 | 91 to 180 days | \$45,000 |
| Union | South Chillicothe Street far south sidewalks to ne | Increase safety of children walking to school. | Village of Plain City | 2 | 91 to 180 days | \$50,000 |
| Union | West Avenue sidewalks & walk bridge on West over B | Allow pedestrians to walk safely on West Avenue without walking onto the road to cross the bridge. | Village of Plain City | 2 | 91 to 180 days | \$60,000 |
| Union | South Chillicothe New Storm, Curb and Gutters | Improve traffic safety. | Village of Plain City | 20 | 31 to 90 days | \$500,000 |
| Union | Shepper Avenue - Sanitary sewer approximately 600 | This is existing homes from sub-standard sewer main. | Village of Plain City | 4 | 181 days or more | \$100,000 |
| Union | Bigelow Water Tower rehab. | Upgrade water tower to meet OSHA Standards. | Village of Plain City | 504 | 91 to 180 days | \$100,000 |
| Union | Purchase and renovation of New Administration buil | City Hall renovation needed. | Village of Richwood | 20 | 31 to 90 days | \$500,000 |
| Union | Downtown Storm Sewer tie into East Main STM | Tie in existing storm sewer into new main trunk line. | Village of Plain City | 368 | 91 to 180 days | \$450,000 |
| Union | Plain City Elementary School renovations | This is a Historic building that we want to rehab to use as our municipal offices, police department and for other Village Office functions. | Village of Plain City | 12 | 91 to 180 days | \$300,000 |
| Union | Shepper Avenue storm sewer | Install storm sewer where there is none. | Village of Plain City | 20 | 181 days or more | \$500,000 |
| Union | North Chillicothe Street Storm and Curb replacem | Install storm sewer where there is none. | Village of Plain City | 520 | 181 days or more | \$500,000 |
| Union | Far South Chillicothe Street watermain replacement | Improve fire flow to new elementary school location. | Village of Plain City | 28 | 31 to 90 days | \$700,000 |
| Union | East Main Street watermain replacement | Replace deficient watermain. | Village of Plain City | 30 | 31 to 90 days | \$750,000 |
| Union | Salt Brine tank | Saline for streets. | Village of Richwood | 3 | 181 days or more | \$65,000 |
| Union | Paved walking path around the lake | Provides recreational opportunities for residents. | Village of Richwood | 2 | 181 days or more | \$50,000 |
| Union | Permanent generator for the Water Plant. | None exist for power outages. | Village of Richwood | 4 | 31 to 90 days | \$100,000 |
| Union | Storage Garage | To store EOP inside. | Village of Richwood | 5 | 31 to 90 days | \$125,000 |
| Union | Storm drains | To raise drains. | Village of Richwood | 6 | 31 to 90 days | \$150,000 |
| Union | Lift Station replacement East Ottawa Street | Needs replaced due to age and constant repairs. | Village of Richwood | 6 | 31 to 90 days | \$150,000 |
| Union | Industrial Park land acquisition | Provides for business growth. | Village of Richwood | 20 | 31 to 90 days | \$500,000 |
| Union | Curbs for all non State Routes | Curbs are needed for storm water management. | Village of Richwood | 30 | 31 to 90 days | \$750,000 |
| Union | Village wide repaving program | Realty, East Ottawa and Bombard Streets. | Village of Richwood | 44 | 31 to 90 days | \$1,100,000 |
| Union | Opera House/Administration renovations | Restoration of Historic building. | Village of Richwood | 80 | 91 to 180 days | \$1,500,000 |
| Union | New sewer lines | New lines to divert the amount of infiltration. | Village of Richwood | 100 | 181 days or more | \$2,500,000 |
| Union | New Sewer Plant | Upgrade sewer system in Village. | Village of Richwood | 400 | 31 to 90 days | \$10,000,000 |
| Union | Helping All People Improve | Provide computer training for displaced workers. We will focus on office productivity software, web development and computer technician training. | Helping All People Improve (HAPI) | 10 | 31 to 90 days | \$75,000 |
| Union | Raymond & Peoria Wastewater Treatment Plant & Coll | The communities of Raymond and Peoria are currently serviced by falling on-site septic systems. The Ohio EPA has mandated construction of a centralized wastewater collection system. This project is currently in the design stage. | URS Corporation | 12 | 181 days or more | \$4,300,000 |
| Union | saving our business | We would like to buy inventory for our businesses of carpet/dishes of ceramic the sides of hardwood and laminate if you buy in large quantities you can pass savings on to the public then we can pay our installers back to work. | custom carpet sales and service | 5 | 0 to 30 days | \$50,000 |
| Union | My College Education | I am a hardworking individual who is trying to better my future. I am in a situation where I can't afford to go to college but I would like to receive a higher education, but money is the only thing in my way. If I was to work out and I get the money to go to school I WILL receive a degree and start a business upon my graduation. Thank You Jacob Moore | myself | 0 | 31 to 90 days | \$50,000 |
| Union | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a wireless infrastructure to equip rural residents with the benefits to be able to access the internet & broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New Wimax technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. Tear off and replacement of existing siding and underlayment on a 2 story, 2000 sq ft home. Removal of 1 row, 1 standing door, 10 windows and 6 doors 30'x42' | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Union | Insulation Wrap, Energy Efficient Siding and Low E | New energy efficient furnace and cooling system for 2000 sq ft home. Move air conditioning condenser unit from present location, out of heat and sun for more energy efficient cooling. Replace entire roof, eaves and gutter from damage caused by hurricanes like wind storm and recent severe weather/wind storms | None | 3 | 31 to 90 days | \$500,000 |
| Union | Energy Efficient Heating and Cooling w/roof replac | Installation of approximately 8,000 feet of 36" diameter watermain. Transmission line will boost pressures for existing customers who are currently suffering from low pressure volumes - primarily affecting the industrial and technology business corridor in SE Union County. Will also improve pressures enough to provide service to new customers in Jerome Township who currently have no access to public drinking water and suffer from non-potable water and inadequate well service. | none | 10 | 31 to 90 days | \$25,000 |
| Union | Industrial Parkway 36" Water Line | Construction of 10mgd (million gallon per day) regional pump station to provide regional sanitary sewer service to areas currently unserved in Jerome Township. Also includes approximately 6.5 miles of dual force mains from regional pump station to City of Marysville Wastewater Reclamation Facility. | Union County Engineer | 90 | 31 to 90 days | \$2,300,000 |
| Union | Jerome Force Main & Pump Station | Asst and remote existing building that was built in 1930's to bring up to mid state and local codes. distribute funds to current vendors and creditors to free up assets to grow the community. to create a small local meeting place for the community to fellowship and gather. to become a convention center of off entertainment as well as current cultural firms as an business to the community awareness (bars, hotels, etc.) work with local gov org (local police dept, the dept, etc) to have a formal to project meaningful expressions of awareness to the community. with the allocated funds from the stimulus request, debt will be paid and repairs will be made and this will help keep cost to the average patron down to allow everyone to enjoy this space. approx 4000 sq ft will be renovated and approx \$100,000.00 of case equipment will be replaced or repaired. | Union County Engineer | 200 | 31 to 90 days | \$5,000,000 |
| Union | community entertainment outreach | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, relief, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our device. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when someone enters a specific location can issue an alarm. For location information to multiple choice phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously access systems fulfill the objectives of the Stimulus Act for it provides broadband to unserved and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and DSL, the underserved areas still exist today. Now it's time to try something different. Rural America needs access today not the failed promises of the past. Our unique process for deployment utilizes the most cost effective wireless mode available. Each dollar spent produces the most coverage and miles of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. This new service is being provided by actual deployment, evidence of our existing network, the most advanced and cost effective Wimax technology available. | hometown hollywood llc | 15 | 0 to 30 days | \$300,000 |
| Union | Personal Security for Union County | Project exceeds \$300,000 total of 24 private sanitary sewer along Industrial Parkway from US 42 to an existing pump station. This improvement will bypass an existing pump station that is currently operating at capacity. Approximately 3,460 acres of service area is tributary to the proposed improvement. This same area will be removed from lake pump station, allowing the pump station to provide capacity and permit lake development within lakefront areas. | Nuleaf Ohio Limited | 1 | 31 to 90 days | \$106,260 |
| Union | Wireless Broadband for Union County | Establish offices in 12 West-Central Ohio rural counties. Preliminary counties are Marion, Union, Madison, Clark, Champaign, Logan, Hardin, Adams, Shelby, Miami, Meigs, and Clarke. The offices in each of these counties will be staffed by approximately 2 individuals who responsibilities will be to identify local businesses with current 401(k) plans or other retirement plans and businesses that do not yet have a retirement savings plan. Helping these companies get a better and more efficient plan that has investment guarantees for employees. These plans will help thousands of workers in West-Central Ohio save more money for retirement and help them from losing their hard-earned dollars due to stock market volatility. The project should cost \$5 million with approximately 50 employees. Also the 5 year funding period has ended, the income should be sufficient enough to maintain and fund the business without further assistance. Project will immediately employ approximately 50 people plus offer residual employment and stimulus in supporting community businesses such as office supply stores, bookkeeping, utilities and other business associated with the daily operations. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Union | 24" Industrial Parkway Sewer Connection | Establish offices in 12 West-Central Ohio rural counties. | Union | EASY (Energy Aggregation System) | A certified woman owned Minority and EDGE Business Enterprise seeking funding for the development of a web-based touch-screen software application to monitor and control residential and light commercial power generation and consumption. The Energy Aggregation System (EAS) will aggregate power from dispersed energy sources (including grid, wind, solar, fuel cell, battery, etc.) as well as monitor and control power-consuming devices. EASY will reduce dependency on grid power, reduce peak-hour consumption, and provide power source redundancy while ensuring the most efficient energy production and consumption for residential and light commercial environments. EASY will reduce grid energy consumption for an average American household or small business by 15%, facilitate integration and simplify maintenance of alternate energy sources, and significantly reduce or eliminate peak-hour grid power consumption. | Development Consultants Incorporated | 25 | 0 to 30 days | \$845,000 |
| Union | Union-Shelby Educational Ethernet | Expansion of Ethernet Network to provide cost-effective High Capacity Ethernet Connectivity to School Districts in Union, Logan and Shelby Counties for connecting them back to their Information Technology Center for e-learning and expanded technology-based learning opportunities. This project would involve the purchase of electronic transmission equipment as well as the construction of ~30 Route miles of new Optical fiber line through rural areas of Union, Logan and Shelby counties. | Independents Fiber Network, LLC | 6 | 91 to 180 days | \$840,000 |
| Union | Wind Turbine Hydrostatic Drive Train Demonstration | This project involves the development of a hydrostatic drivetrain (HDTs) to replace the gearbox in wind turbines. Gearboxes are the number one point of failure in a wind turbine. Gearbox repair is costly because it requires skilled workmen and a crane to reach the gearbox in the nacelle of the turbine. It is also costly in downtime and revenue lost for wind farm operators. Parker proposes to develop a hydrostatic-based alternative to gearboxes. The HDTs would be more reliable, guarantee more "uptime" (power and revenue produced) and dramatically reduced repair and replacement costs. The requested federal funding would be used to produce and demonstrate initial HDTs units. | Parker Hannifin Hydraulics | 187 | 0 to 30 days | \$1,500,000 |

The requested federal funding would be used to produce and demonstrate initial HDTs units. | Parker Hannifin Hydraulics | 185 | 0 to 30 days | \$1,500,000 |
| Union | Solar Panel Education | Purchase and install 2 laptop solar panels to teach about renewable energy sources in our science curriculum. These panels would also be used to reduce the amount of electric energy used by our schools district. | Fairbanks Local Schools | 1 | 31 to 90 days | \$10,000 |
| Union | Environmental Health Technology Infrastructure Dev | Purchase and install 2 laptop solar panels to teach about renewable energy sources in our science curriculum. These panels would also be used to reduce the amount of electric energy used by our schools district. | Union County Health Department | 10 | 91 to 180 days | \$250,000 |
| Union | Microchannel Enabled Synthetic Fuel Manufacturing | Ultimately, the project would increase in the efficiency of local and state government in the conduct of these programs. Velocys partnering w/AF Forest(AF) proposes to demonstrate 25 gallon/day methanol to synthetic fuel mfg. facility at Velocys' Ohio R.D. #E center. This project will make up for ~9 months of Third Frontier (TF) Project infrastructure delays at WPAF Base (24 mo. total delay), and allow Velocys Team to apply for DOE/EEEA funding in 2016 for the first Commercial Ohio Synthetic Fuels Plant w/ Fischer-Tropsch Technology. This project eliminates Technology Immaturity Issue Velocys encountered in unsuccessful 2007 30 MM DOE grant request. AF Mission is to consume 400 millions gallon/year of renewable Velocys AFM immaterially. To date Velocys, AF & collaborators have invested \$48 million in technology development. Job creation comes on three timelines: 25 MM Year (MY) immaterially, 50 MY related to first comm. plant, & 227 MY of jobs related to Velocys R&D growth. In total project cost/employees 302M total jobs 175 in Ohio from 2009-2012. Personal income associated with these jobs is \$1.14B Million. This project aligns w/Ohio's objective to become a significant alternate energy player (businesses, technology, facilities and high quality jobs). Legislative/Supporter/Available | Centennial Associates LLC/Velocys Inc. | 175 | 0 to 30 days | \$5,600,000.00 |

| VanWert | Van Wert Mega-Mfg Site Railroad Improvements | The project includes the construction of 11,000' of mainline railroad, including drainage, a mainline track turnout, and railroad bridge repairs. This site potentially will allow for the creation of 500 to 2000 jobs and \$20 to \$500 Million in private sector investment. These estimates are based on the "near miss" with landing Honda at this site and current marketing efforts. Van Wert along with local and state officials continue to diligently market this site for a mega-manufacturing facility. With the addition of rail service, PRTech II (an existing plastics extrusion facility) is committed to expanding and adding another extrusion line, increasing jobs and private sector investment. Additionally, Scott Eagle, a grain mill facility, is committed to expand and add jobs. | Van Wert | 500 | 91 to 180 days | \$2,900,000 |
| VanWert | Install geothermal system for the Waste Water Plant | Van Wert is experiencing economic distress due to the mass layoffs in the automobile industry. Lost jobs in just the past 24 months total more than 850 jobs with 520 to 580 that are automotive related. | City of Delphos | 40 | 91 to 180 days | \$400,000 |
| VanWert | Water Line to Industrial Park | Green Initiative - Install geothermal system to offset the cost of operating the Waste Water Plant. | City of Delphos | 50 | 31 to 90 days | \$690,000 |
| VanWert | Sewer line and lift station to Industrial Park | Shovel Ready Project - PFI issued - Install approximately 1.2 miles of twelve inch water line to a 117 acre industrial park. The industrial park is located on Us 30 at St. Rt. 66, 11 miles due east of Ohio's 1600 acre super site. | City of Delphos | 60 | 91 to 180 days | \$940,000 |
| VanWert | Principle Forgiveness on Wastewater Construction L | Principle Forgiveness on Construction Loan - The Delphos sewer utility fees, resulting from the construction of a replacement Waste water Treatment Plant, are one of the highest in the state creating a financial hardship on the population. In 2004 the Ohio EPA filed a Finding and Order (F&O) against the City of Delphos. To satisfy the F&O the city was forced to construct a new waste water plant at the cost of \$36 million. The relief would inject approximately \$330,000 per year into the local economy and would provide a long term stimulus not just one time fee but over the life of the plant. | City of Delphos | 200 | 0 to 30 days | \$7,500,000 |
| VanWert | Principle Forgiveness on Water Construction Loan | Principle Forgiveness on Construction Loan - The Delphos water consumption fees are far above the Ohio average. Because the city's population exceeds 5% percent low to moderate (L&M) income the high water rate creates a financial hardship on the population. The relief would inject over \$300,000 per year into the local economy and would provide a long term stimulus not just one time fee but over the life of the plant. | City of Delphos | 200 | 0 to 30 days | \$5,000,000 |
| VanWert | Life Star Rescue Remount Program | Engineering complete - Install approximately 1.2 miles of sewer line and a lift station to a 117 acre industrial park. The industrial park is located on Us 30 at St. Rt. 66, 11 miles due east of Ohio's 1600 acre super site. | Life Star Rescue, Inc. | 50 | 0 to 30 days | \$400,000 |
| VanWert | Upgrade to river intake-Installation of a second | The City constructed the Gilmer - Delphos Reservoir in 2007. In an effort to reduce cost, one of the two river pump systems was removed from the design. This has proven to be a massive mistake. With only one pump, the city has difficulty keeping the reservoir full. Additionally, when the single pump fails the city is not able to pump into the reservoir. | City of Delphos | 40 | 91 to 180 days | \$500,000 |
| VanWert | Turbo Blowers on aerators at Wastewater Plant | Costal line energy efficient turbo blowers at the Delphos Waste water Plant. The new blowers are estimated to reduce energy consumption by 17%. | City of Delphos | 50 | 181 days or more | \$1,500,000 |
| VanWert | Install Solar Panels at Wastewater Plant | Green Initiative - Install solar panels to offset the cost of the waste water plant. The Delphos Waste water plant's annual electrical demand exceeds \$430,000 per year. The installation of solar panels will supply power during normal operating hours when the demands on the electrical grid is highest and the cost of electricity is also at a premium. | City of Delphos | 50 | 91 to 180 days | \$450,000 |
| VanWert | Install Solar Panels at Municipal Building | Green Initiative - Install solar panels to offset the cost of operating the Municipal Building. The Delphos Municipal Building is a converted station used to support the Miami Erie Canal. Because of the building's age it is not in very energy efficient. The installation of solar panels will supply power during normal operating hours when the demands on the electrical grid is highest and the cost of electricity is also at a premium. | City of Delphos | 30 | 91 to 180 days | \$250,000 |
| VanWert | Third Street Sewer Separation | Repair approximately 3000 linear feet of combined sewer. The Third Street sewer and its lateral is a problem area. During periods of heavy rains the combined sewer cannot handle the load. This condition has a tendency of backing up the system causing a combined sewer overflow (CSO) and often results in sewage backing up into the basements of the residents. This condition obviously causes a health risk to the residents. | City of Delphos | 35 | 181 days or more | \$685,000 |
| VanWert | Water line loop Lincoln Highway to St Rt. 697 | Install approximately 3000 linear feet of twelve inch water line. The project would tie two dead end lines into one continuous line. This would improve the water quality by increasing the water flow and provide a greater volume of water, needed in the event of a fire. | City of Delphos | 25 | 181 days or more | \$250,000 |
| VanWert | East Lincoln Highway Resurfacing | Plane and resurface - 6 miles of 24 wide asphalt. Already programmed with CSTP funding, the project is almost ready to go. | Van Wert County Engineer | 25 | 31 to 90 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| VanWert | Harner Road Bridge WI-T041-02 | Bridge replacement. This bridge is Van Wert County's largest span at 147' over the St. Marys River. It has been programmed for LBR funding through the County Engineer's Association. We've already received quotes from the Ohio Bridge Corporation for the new truss replacement of 1400 linear feet of water main in downtown Delphos. Providing new gas and meters to all existing downtown buildings. This project is being done ahead of a Street Sweep Project that is scheduled to begin after July of 2009. The project is ready to advertise for bids today. | Van Wert County Engineer | 35 | 91 to 180 days | \$300,000 |
| VanWert | Downtown Water Main Replacement | Replacement of 1400 linear feet of water main in downtown Delphos. Providing new gas and meters to all existing downtown buildings. This project is being done ahead of a Street Sweep Project that is scheduled to begin after July of 2009. The project is ready to advertise for bids today. | City of Van Wert | 5 | 0 to 30 days | \$350,000 |
| VanWert | Dist 1, PID 80465, VAN/PAU SR 49 19.83/0.00 | Dieline resurfacing | Ohio Department of Transportation | 28.6 | 31 to 90 days | \$997,000 |
| VanWert | Sprayer Assembly | To add new employment for the industrial facility and to maintain these jobs into the future | Fleet 1 Automotive | 8 | 31 to 90 days | \$200,000 |
| VanWert | Emergency Services Expansion | This project would assist in local job creation during both the construction and post-construction phases of the expansion. Van Wert County Hospital provides essential medical services to residents of Van Wert and the surrounding counties, and this project would allow for increased patient capacity. The emergency department census is projected to increase sharply from more than 16,000 at present to 20,000 by 2010. Funds would be used to expand the emergency services department, with an additional construction of a second floor shell. The total project cost reflects the "hard costs" of the project, including demolition and construction, as well as "soft cost," which would include updates to the electrical and mechanical infrastructure and building connections. \$6.84 million in costs for the base floor addition to the emergency services department. \$1.60 million in costs for the construction of a second floor shell. Project would begin as early as July 6, 2009 and will take 46 weeks to complete. | Van Wert County Hospital | 100 | 91 to 180 days | \$1,000,000 |
| VanWert | Electronic Medical Records Transition Project | The project would make critical upgrades to the Van Wert County Hospital medical records system. The practices of Internal Medicine, OB/GYN, General Surgery and the local community physicians are still using an outdated paper charting system for the purposes of recordkeeping. An Electronic Medical Records/Electronic Practice Management system would improve communication between primary care and referring physicians, improve chronic disease management, streamline the patient registration process, and eliminate costs and waste associated with a paper system. \$194,500 in up front costs for the EMR transition \$183,000 in installation/training costs \$66,150 in first year operation expenses \$200,000 for IT network upgrades, computers, 4 servers (database, imaging, terminal and application), backup and disaster recovery hardware To transition the local community physicians an additional \$250,000 will be required. | Van Wert County Hospital | 2 | 91 to 180 days | \$643,650 |
| VanWert | County Engineer Administration/Road Department | We have had a new facility under design for the past 1 1/2 years. The ground has been purchased and drainage is currently being installed. Plans will be ready in March to begin construction. We are planning to finance the project, or possibly just to hold due to the economy. Based on the state of our current facility, we will need to do something in the near future. The current structure was built around 1905, and all four exterior walls are deteriorating to the point of collapse. Our department is also spread around four or five different facilities. This improvement will allow us to consolidate onto one campus where our existing maintenance facility is located. | Van Wert County Engineer | 50 | 31 to 90 days | \$3,500,000 |
| VanWert | TU-055-23 | Bridge rehabilitation. We have a proposal from Ohio Bridge to come in and rehab the steel beam structure. This would include jacking up the beams, add new stringer bearing plates, clean and paint each beam, and install new anchor bolts. | Van Wert County Engineer | 8 | 31 to 90 days | \$20,000 |
| VanWert | UN-075-25 | Bridge rehabilitation. Jack-up existing beams, remove old bearing plates and replace, clean and paint each beam, provide and install new anchor bolts. | Van Wert County Engineer | 8 | 31 to 90 days | \$20,000 |
| VanWert | Terry Road Bridge Replacement | Bridge replacement. This bridge is a deteriorated truss that is in need of replacement. We were planning to fund the project locally, and perform the construction using force account. It would be a good candidate for a contract job, since it is a fairly long span (around 80'). | Van Wert County Engineer | 10 | 91 to 180 days | \$300,000 |
| VanWert | Wireless Broadband Internet Service | This wireless Broadband Internet Service offering would target potential customers who are in unserved and under served rural areas who do not have access to Broadband Internet services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Van Wert, Ohio (Van Wert County) area or other locations or in a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 MHz licensed wireless radio band. NKTelco Inc. already owns the 700 MHz license for Van Wert and surrounding counties. Unlike other radio services, the 700 MHz frequency is not strictly "line of sight". Thus, NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 300 customers would be possible utilizing the estimated \$200,000 in total project cost estimate. | NKTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| VanWert | State Road Bridge Replacement | Bridge Replacement. This structure is on a collapsed road and has a posted weight limit. We were planning to replace the bridge this summer using our force account. It would be a good project to contract out because of its longer span (80'). | Van Wert County Engineer | 10 | 91 to 180 days | \$300,000 |
| VanWert | South Water Tower Recoating | The City of Van Wert has a 400,000 gallon elevated water tower that is in serious need of a new external coating (paint job). The project will require the structure to be encapsulated and sand blasted to original metal and then recoated. This is a project that the City needs to complete but has been unable to fund due to other mandates that have had a higher priority. It is important to preform this work as a new structure would be desirable if we could afford during these economic times. Recoating the tower should provide an additional 15 years of protection. Construct a new stadium with bleachers to replace the existing structure built by the VWC. The new facility will house the recreation offices, locker rooms for the football team, a concession stand and ADA approved restrooms. | City of Van Wert | 6 | 91 to 180 days | \$350,000 |
| VanWert | Construct a new stadium with bleachers | | City of Delphos | 150 | 31 to 90 days | \$4,950,000 |
| VanWert | Water meter pit and valve | Replace 150 old meter pits and valves. Replace 260 meters with radio read meters. | Village of Middle Point | 8 | 181 days or more | \$175,000 |
| VanWert | Shane Street Reconstruction Project | Reconstruction of Shane Street (State Route 118). 3000 linear feet of roadway and drainage 6000 linear feet of curb and sidewalk. 40 street signs. | Village of Ohio City | 0 | 31 to 90 days | \$1,200,000 |
| VanWert | Hoffman Street Reconstruction Project | Reconstruction of 2,500 linear feet of roadway including 5,000 linear feet of Curb and sidewalks and 1000 linear feet of storm drainage. | Village of Ohio City | 0 | 31 to 90 days | \$1,000,000 |
| VanWert | Koch Street Reconstruction Project | Reconstruction of 2000 linear feet of roadway, 4000 linear feet of Curb and sidewalk and 1000 linear feet of storm water drainage. | Village of Ohio City | 0 | 31 to 90 days | \$900,000 |
| VanWert | Reconstruction of Main Street | Reconstruction of 3,000 linear feet of Main Street including 6,000 linear feet of Curb and sidewalk and 2000 linear feet of storm drainage. | Village of Ohio City | 0 | 31 to 90 days | \$1,000,000 |
| VanWert | Reconstruction of State Route 49 | Reconstruction of 2,500 linear feet of roadway and 5,000 linear feet of curb and sidewalks and 2,000 linear feet of storm water drainage. | Village of Wren | 0 | 91 to 180 days | \$1,000,000 |
| VanWert | Wind Farm for Industrial Park | Create a wind farm to support the electrical needs of the city's waste water plant (electrical cost of \$450,000 per year) and Ohio's Super Site east of the farm. The site is approx. 1/2 miles for the grid. | City of Delphos | 200 | 31 to 90 days | \$4,950,000 |
| VanWert | Village of Middle Point -New Water Plant | Build a new water treatment plant for the village. | Village of Middle Point | 20 | 181 days or more | \$1,200,000 |
| VanWert | water meters | Install new water meter pits, valves, and meters. | Village of Middle Point | 10 | 181 days or more | \$150,000 |
| VanWert | Generator | We want to place a permanent generator at our sewer lift station. | Village of Middle Point | 3 | 91 to 180 days | \$20,000 |
| VanWert | Ohio City new WWTP | The village's current waste water treatment plant was built in 1968 and is out dated and cannot stay in compliance with CEPA's regulations. We are currently going through "Findings & Orders" with CEPA and will have to build a new wastewater treatment plant to be able stay in compliance with CEPA. As being a small village with a population of around 600 we do not have the funds needed to get this accomplished without help. We are just beginning the design phase and will be meeting with CEPA soon to finish up the Findings & Orders Then we will have to proceed quickly meet our time frame of having a new plant up and running by the end of 2010. Thank for the opportunity to apply for assistance. | Village of Ohio City | 2 | 181 days or more | \$2,500,000 |
| VanWert | Delphos State Street Waterline Replacement | Installation of approximately 1400 linear feet of waterline to replace existing deteriorated lines. The existing lines have experienced numerous breaks and have thus resulted in the loss of potable water. The replacement will provide better service and fire protection to residents. | City of Delphos | 5 | 91 to 180 days | \$202,000 |
| VanWert | Delphos Bredeck Street Resurfacing | Resurfacing of approximately 2675 feet of Bredeck Street to restore the surface of the pavement disrupted during a recent sewer project. | City of Delphos | 5 | 0 to 30 days | \$65,000 |
| VanWert | Downtown Waterline Replacement | This is part of an overall public & private reinvestment program | City of Van Wert | 10 | 91 to 180 days | \$450,000 |
| VanWert | Sewage Plant Improvements | Improvements to primary settling & disinfection processes at the existing WWTP | City of Van Wert | 25 | 181 days or more | \$1,200,000 |
| VanWert | Stormwater Management Improvements | Construction of a stormwater pumping & equalization basin | City of Van Wert | 25 | 181 days or more | \$2,700,000 |
| VanWert | Downtown Streetscape Improvements | This is part of an overall downtown public & private reinvestment program | City of Van Wert | 10 | 91 to 180 days | \$930,000 |
| VanWert | Local Revolving Loan Fund Capitalization | This fund would leverage business investment & job creation by providing 50% incentive grants to re-employ workers laid off by the area auto and RV industries. | City of Van Wert | 300 | 91 to 180 days | \$500,000 |
| VanWert | Innovation Incubator | This is for purchase & development of the building at 718 Fox Road as a business incubator above 10%. Since the first of the year the county has seen companies close their doors and move to Mexico. Other companies are laying off part of their labor force for up to 12 months. ABM has not experienced the type of economic pressures. In fact, ABM is expanding just the opposite. Sales and market share is increasing due to a number of factors. First, our present operating micro encapsulation system and products manufactured with that system are in high demand. Second, due to high acceptance of our natural products, expanded production facilities are needed now, not in five years as planned. Third our set of natural products for tampons have been successful and have experienced increased demand in Peru, Thailand, and The Philippines because our products increase yields in rice which is the number 1 food staple in those countries. The stimulus legislation just passed by Congress and the Senate and signed into law by President Obama positions ABM to create new jobs for Ohio and Van Wert County. With the increased production capacity we can shorten the time needed to expand into additional markets in the United States and International Biological Marketing has received \$12,000,000 to expand our manufacturing and production capabilities. Existing cattle operation would like to expand to meet production. Funds needed for construction of a facility for retail & wholesale business, vehicles and equipment. To complete a small batch reactor biodiesel plant. The plant is 70% complete with my own funds. This project will complete the plant and allow us to make biodiesel from animal fats and vegetable oils. In first year the capacity will be 500,000 gallons and the second year increase to 1,000,000 gallons. This fuel will be blended with diesel fuel and sold to local truck fleets and local government fleets with the balance sold to fuel suppliers. | Advanced Biological Marketing | 31 | 91 to 180 days | \$12,000,000 |
| VanWert | Landeck Cattle Company | | Bonifas Farm | 5 | 91 to 180 days | \$300,000 |
| VanWert | Complete biodiesel batch reactor | | Van Wert Biofuels, Inc | 5 | 31 to 90 days | \$110,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------------------|---------------------------|
| VanWert | Behavioral Health Hospital | The #2 need in Ohio for Youth Services is Acute Care Psychiatric Hospitals and there are none in NW Ohio. ODMH issued a report in 2004 stating to this. The report documents a steady decrease in psychiatric services available to youth and a loss in short term beds, creating an empty waiting list. Phoenix Homes intends to remedy this dearth in services with a facility currently ready to serve this population. We purchased a former Assisted Living Center in NW Ohio in 2008 and renovated the facility spending over \$200,000. The facility has a state of the art security system, is locked 24/7, can serve up to 48 youth, is staffed including a psychiatrist, CACI and Accredited. ODMH licensed and received emergency crisis referrals. We have everything in place to provide this needed service except continuation funding as our initial operating loan has not been sufficient. The outcome of this service include: lessening waiting lists, improving the lives of 100+ of youth yearly, creating 20 stable jobs and adding 60 dollars to an area in dire need (one with a 10% unemployment rate). The hospital needs 1.2 million to be fully functional and self supportive within 18 months. | Phoenix Homes, Inc. | 50 | 0 to 30 days | \$1,200,000 |
| VanWert | Shannon Street Reconstruction | The City through ODOT is scheduled to begin total reconstruction of Shannon Street (S. R. 118) within the City of Van Wert. The project includes placement of water and sanitary sewer lines, widening of the street, new curb and gutter, new sidewalks and new ADA compliant crosswalks along with ADA components. The project is on schedule to begin early in 2010. Total project length is over one mile. | City of Van Wert | 40 | 181 days or more | \$2,000,000 |
| VanWert | Fire Station | A new fire station that will be used to serve and protect our community. This will also be used for a shelter house during severe weather. Rebuilt at grade without encroachment along the Chicago, Ft Wayne and Eastern Railroad at the following locations: Peace Street, Main Street, Jefferson Street, S. Blacklock Street, Fisher Ave, N. Maxwell St, Jackson Street, Main Street, Pearson Rd, State Street, Canal Street, City Street, Wayne Street, Race Street, Butt Street. The project will increase public safety at the railroad crossing along with creating/reinstating 10 jobs in the State of Ohio. | Wren Fire & EMS Chicago, Ft. Wayne and Eastern RR | 30 10 | 31 to 90 days 31 to 90 days | \$850,000 \$778,600 |
| VanWert | Stemen Plumbing | This would pay off business debt for materials and gas and any other debts that I have incurred in my business. I am a plumber with a very small business which is struggling and would take off if I had the funds to back me and get me started I believe this amount would make that happen. This money will pay off my debt and help me go to college to be an electrician due to my job is very unstable and I only get 3 days a week or no work at all | plumber | 2 | 0 to 30 days | \$70,000 |
| VanWert | personal issues | | my personal | 0 | 0 to 30 days | \$50,000 |
| VanWert | New Fire House Construction | Construction of a 200,000 sq. foot fire house | Village of Willshire | 7 | 91 to 180 days | \$500,000 |
| VanWert | Community Park Improvement Project | New Shelter house and restrooms in Community park and new roof on existing building | Village of Willshire | 3 | 31 to 90 days | \$100,000 |
| VanWert | Community Park Improvement Project | New Shelter house and restrooms in Community park and new roof on existing building | Village of Willshire | 3 | 31 to 90 days | \$100,000 |
| VanWert | Main Street Reconstruction Project | Project is the reconstruction of MAIN Street in the village of Ohio City. It includes 3000 linear feet of street reconstruction and 6000 linear feet of the curb and sidewalks and 2000 linear feet of storm sewer drainage pipe | Village of Ohio City | 5 | 91 to 180 days | \$1,000,000 |
| VanWert | Koch Street Reconstruction Project | Reconstruction of 2000 linear feet of roadway including 4000 linear feet of curbs and sidewalks and 1000 linear feet of storm water drainage | Village of Ohio City | 5 | 91 to 180 days | \$1,000,000 |
| VanWert | Van Wert United Way Emergency Funding | To feed at least 3,000 individuals and shelter approximately 150 families. | United Way of Van Wert County | 3 | 31 to 90 days | \$60,000 |
| VanWert | Americas Online Auto Mail Inc. "Van Wert Call Cent | 45891. This project is developed, ready, and is in progress in Van Wert, Ohio. Funding is needed to create jobs for our veterans and families (sales, management, marketing, advertising, and legal). This model is planned to be expanded to all 50 states. Mission Statement: "The goal of ADAM is to remain competitive, greatly reduce advertising cost for dealers, better serve our customers and provide employees with the best tools to bring years of excellence and service to the American people. Americas Online Auto Mail will provide a professional website for private individuals and automotive dealers to advertise their automotive needs." ADAM not only seeks to serve the US automotive industry through its years of experience in the automotive industry but also strives to become a cooperative social asset for the American Community. ADAM has set aside 90% of all its net profits to finance the charitable organizations which support our veterans, troops and their families. http://www.aboutus.org/AmericasOnlineAutoMail.com | Americas Online Auto Mail Inc | 100 | 0 to 30 days | \$7,500,000 |
| VanWert | Village of Ohio City Water improvement Project | This is a water line replacement project, along with a new 300,000 gallon water tower, a new water treatment plant (we currently don't have a treatment plant, we chlorinate at the wells) and individual water meters. We are asking for stimulus money because we are a fairly poor community and the financial stress that we put on a village of our size will make it hard to raise taxes for our customers. We are currently getting a \$2,044,000 loan from rural development at a 4% interest rate which we are hoping to get a better rate or some more help through the stimulus money. We are ready to start construction as soon as we have a presentation meeting with rural development. We already have pipe delivered to Ohio City, and are about digging by the end of the month. Thanks. Thank you in advance for consideration on our project. | Village of Ohio City | 28 | 0 to 30 days | \$3,086,410 |
| VanWert | Middle Point Fire Station | Jeff Kough The Middle Point Fire Department currently is squeezed into two older buildings adjacent to each other. Most of the equipment is in a 40' x 60' steel building built in the 1970's. It houses our communication equipment, computers, desks, files, kitchen, gear, tools, and hose/water and drier. It is all open under one roof, no interior walls. If personnel need to clean up after a run they do so in the kitchen sink. It has no restrooms and no office space for administrative staff. The other building is the original 1921 brick two story town hall. It has one very small restroom during the summer because the pipes break in the winter. The building has the original windows and is not insulated. Paint and plaster is peeling falling and rotting in the corners. The heating costs are outrageous. We are a financial distressed community with a good portion on a fixed income. We work on a small budget and are using most of that to replace aging equipment and maintain what is required of us. We serve over 4000 people and 79 cover square miles. This new facility would be an asset for the community. It will allow us to better function, train and protect our citizens who rely on us. | Middle Point Fire Department | 100 | 91 to 180 days | \$1,100,000 |
| VanWert | Water Tower Replacement | The village of Willshire has an aging Water tower that has been a maintenance liability over the past 10 years. The village is seeking funding to replace the existing water tower with a new 500,000 gallon water tower. The replacement is an LR qualified community with very little revenue. | Village of Willshire-Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$750,000 |
| VanWert | Water Distribution System Replacement | The village of Willshire has severely aged and deteriorated water lines throughout the village. The village would like to replace those waterlines as they have frequent main breaks. The village is an LR qualified community with very little revenue. | Village of Willshire-Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$1,600,000 |
| VanWert | Power Optimizer Wastewater Plant | Green Initiative - Install power conditioner on the equipment that has heavy power consumption at the waste water plants. This plants are equipped with large motor and blowers that rapidly draw large amounts of power off the grid. This rapid draw causes spikes in power consumption the study on the project is complete and a return on investment is estimated at 52 months. | City of Delphos | 10 | 0 to 30 days | \$75,000 |
| VanWert | Van Wert County Engineer's Garage | Construction of a joint 17,800 sq. ft. administration center and 32,600 sq. ft. garage to house the Van Wert County Engineers program including a self storage building, waiting station, asphalt tank, salt depot, and various additional facilities. It is an additional office, storage, and mechanical space to existing Sheriff's office. In the 20 years since initial construction the Sheriff's operation has grown their facility because of added mandatory duties and responsibilities. The facility is in dire | Van Wert County Commissioners | 100 | 0 to 30 days | \$3,450,000 |
| VanWert | Van Wert County Sheriff's Addition | Additional office, storage, and mechanical space to existing Sheriff's office. In the 20 years since initial construction the Sheriff's operation has grown their facility because of added mandatory duties and responsibilities. The facility is in dire | Van Wert County Commissioners | 35 | 31 to 90 days | \$1,742,851 |
| VanWert | Wind Energy | The school district would construct a wind turbine on recently purchased property. The energy that is generated would be used to power district facilities. Excess energy would be sold back and the revenue that was generated would be used to stabilize the district's funding. | Crestview Local Schools | 8 | 31 to 90 days | \$2,250,000 |
| VanWert | Lawn Maintenance Company | We are a small lawn maintenance company that was started in 2000. For the past 8 years it has just been my wife and I that are doing the work with the help of some summer employees. We would like to be able to expand and grow our small business. In order to do this we would need to hire more employees and also purchase more equipment and vehicles. If we could hire more employees, we could purchase more business, thereby creating more jobs and hopefully help some of those that are currently unemployed. This would greatly help to keep our business going and growing. Thank you for your time in considering this request. | Buckeye LawnScape, I Inc. | 5 | 0 to 30 days | \$250,000 |
| VanWert | Village of Ohio City Business Development | We need to purchase ground to promote business development in Ohio City for the loss of jobs in our community and our county. If we were able to purchase the farm ground at the edge of town and get utilities on the land and possibly build a building we might be able to revive a business to lease or purchase the property and building and we stimulate our village and Van Wert county which has a unemployment rate of 13.7% right now | Village of Ohio City | 25 | 91 to 180 days | \$500,000 |
| VanWert | Replace township house | Replace aging and decrepit township house, built in the 1800's. Building first served as a church and then at various times a school, garage hall, and became the township house in 1923. In 2005, voting was moved from this building because it is not handicap accessible. At current time the roof needs to be replaced, windows need replacement. Floor is weak and sags under weight. Estimated cost to make this structure handicap accessible is 60% of the cost of building a new structure plus all other repairs that need to be completed. As with nearly all small local government agencies, we struggle with just keeping up with what we have due to reduced funding, and restrictions on the funding we do have. | Jackson Township | 6 | 91 to 180 days | \$100,000 |
| VanWert | Van Wert-Mercer K-12 Ethernet Connectivity | Construction of .33 Miles of Fiber for the purpose of providing high capacity Ethernet transport service to School Districts through rural portions of Van Wert County and Mercer County. This fiber construction is part of a collaborative effort between FN and rural, community based independent network providers to link to existing fiber systems to improve protection and survivability in connecting school districts in rural Northwest Ohio back to their Information Technology Center in Lima, OH. | Independents Fiber Network, LLC | 3 | 91 to 180 days | \$360,000 |
| VanWert | E and R Trailer Sales and Service, a Clean Fuels | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. In addition, would purchase class 7 diesel hybrid | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Vinton | Jackson County Water/Vinton County Water Intercone | 1000 L of 8" and 16" water line to replace source of treated water currently exhibiting high dis-infection byproducts. This project will connect two existing PWS systems in an existing PWS system supplying treated ground water. One of these systems is in danger of being closed due to findings and orders by DEPA and the other PWS has been fixed, is under findings and orders by DEPA and is expected to be turned over to the City. One of the beneficiaries is a PWS having 242 connections, the other has 600 connections. | Jackson County Water Company | 0 | 31 to 90 days | \$1,000,000 |
| Vinton | Jackson Vinton Interconnect | The project will install 52,000 L.F. of extra line and provide emergency connections to the Village of Hamden, City of Williston, and Vinton County Water. | Jackson County Water Co. | 5 | 31 to 90 days | \$1,500,000 |
| Vinton | Sludge & Hendering Project | The project will provide sludge handling facilities to help reduce operating costs and ensure affordable rates for the Village residents. | Village of Hamden | 5 | 91 to 180 days | \$350,000 |
| Vinton | Vinton County Drug Prevention and Prosecution Prog | The Vinton County Sheriff's Dept has only 5 deputies for about 500 sq. miles of Appalachian hill country. Only one town (McArthur) in the county even has a small police force. We need money for more deputies and supplies. We could also use a small stipend for surveillance and trafficking activities. The problem has gotten progressively worse recently and is endemic to the southeast Ohio region. The Prosecutor's Office desperately needs funds for additional staff as well as the retention of current staff. We currently have only two attorneys, each of whom are splitting a single salary and working near an secretary wage (c. \$30,000 annual). Our administrative staff consists of the secretary and one full time volunteer. The prosecutor is taking a part time salary to keep up with to keep the staff that we have. This office cannot continue to operate in an efficient manner on the funding currently received. | Vinton County Prosecutor's Office | 5 | 0 to 30 days | \$500,000 |
| Vinton | Improve Runway Safety Area | Improve Runway Safety Area | Vinton County | 20 | 31 to 90 days | \$1,200,000 |
| Vinton | Safer Community through Increased Protection | Employment of 5 full time police officer to supplement the existing force of 4 would allow for police protection 24 hours a day 7 days a week to the community. This would also allow 2 new jobs within allowing local money to maintain current number of officers. It would benefit the Village of McArthur, the County of Vinton, and the public in general by helping to make this County Seek a safer place to live and conduct business. | Village of McArthur, the Village of McArthur, the County of Vinton, and the public in general | 6 | 0 to 30 days | \$450,000 |
| Vinton | Refurbish Village Property | The 8 buildings owned by the Village of McArthur are all in need of repair and refurbishing. This operation would involve everything from painting to replacement and would benefit the Village of McArthur, the County of Vinton and the public in general by making local governments buildings safer more energy efficient and much more accessible to the public use. This would provide much needed employment to this high unemployment area while providing the hope of training that could be utilized in the future to enable sustained employment. | McArthur Village | 15 | 0 to 30 days | \$475,000 |
| Vinton | Storm Drain Renovations | The replace and or create storm sewer within the Village of McArthur, Ohio. This would eliminate the flooding of many of the basements and basements within the Village and would eliminate in many cases those waters going in to the existing sanitary sewer system of the Village. This would involve the installation of some 3000 linear feet of storm sewer pipe. | Village of McArthur Ohio | 12 | 31 to 90 days | \$775,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Vinton | Village of Hamden Water System Renovations | The Village of Hamden has a water system that was installed in the 1930's and the system is failing. They experience many water leaks each year and have an average water loss of 25-30%. The Village buys water from the City of Weston and these amounts while the difference between what the Village bills its own customers versus what the City bills them is 100%. The Village recently raised their water rate to \$1.00 / 1000 gallons in order to help generate the funds to replace the failing water system and also keep current with the operations and safety they have been experiencing. This project has the potential to save the residents of Hamden at least \$10 per month on their water bill. The impact would be high considering the Village just installed a sewer system that requires a \$42.50 rate for its customer on top of the recent water increase. | Village of Hamden - Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$2,000,000 |
| Vinton | Equipment For Further Developing Business | I am the proud owner of Tri-Star Recovery, a vehicle recovery business for southern Ohio spanning over 17 counties. I am working with the recovery Database Network and some car lots. There is a lot of demand for my services, but an in need of equipment to be more productive so that it is more profitable. With the help of this money I would be able to create 2 or 3 more positions. I would spend approximately \$80,000 for two trucks with auto-boosters, \$2,500 for computer equipment and \$1,500 for tools needed on trucks. Money for these items covers 3 months worth of expenses. \$4,000 to further my insurance coverage, \$1,500 for start up maintenance on trucks, \$2,000 for business monthly expenses in fuel, telephone and internet and another \$500 for office and other supplies for a total of \$21,500. I have already invested over \$5,000 into the business for insurance, legal fees, fuel and miscellaneous supplies and am in the process of filing for a LLC. I have an established business plan with 3 year projections that show a profitable business and my dream is to expand by hiring more employees to cover more counties and possibly expand to surrounding states. | Tri-Star Recovery Services | 5 | 0 to 30 days | \$93,331 |
| Vinton | Domestic Violence and Sexual Assault Shelter and s | To add additional victim advocates in order to meet demand for services and to expand shelter stays from emergency 3 days to allowing up to 60 days if needed. Expected outcome would be an increase of over 200% of the number of shelter days victims and their children can access, and will provide for continuous 24 hour advocate presence to victims in a timely manner by having office staffed 24 hours per day. We would also be able to expand the shelter and triple the number of beds available for shelter clients, meaning fewer victims are turned away due to lack of space. Currently we have 6 beds and could care for 18 to 20 beds to adequately serve this area. Vinton County is an economically distressed area and receives minimal funding to provide for victims of domestic violence and sexual assault. The isolation and apathetic lifestyle actually assist abusers in victimizing their families. Expansion of our program is planned to reach this very hard to reach population and is essential in order to meet the increasing needs of this area. | Shepherd's House Inc. | 3 | 31 to 90 days | \$70,000 |
| Vinton | Shepherd's House Inc. | Building of a centralized emergency shelter and transitional housing for victims of domestic violence and sexual assault in Vinton County, Ohio. Currently there is a small emergency shelter with limited beds and limited days of habitation due to lack of staff to cover shelter hours and lack of space for additional beds. There is no transitional housing for victims and very limited community support properties, leaving victims with no place to go while they try to obtain employment and save enough money to obtain their own housing. The addition of a shelter complex with transitional housing would mean a much higher percentage of victims who do not need to return to the abuser in order to have somewhere to live. Lack of the ability to find housing is the second most common reason victims return to the abuser. Expected outcome would be to at least triple the number of victims who do not return to the abuser after they would have housing until they can get on their feet and find and pay for their own housing. This would directly benefit at least 100 women and children every year in this county. | Shepherd's House Inc. | 2 | 91 to 180 days | \$350,000 |
| Vinton | Village of Hamden SR 93 Reconstruction Project | SR 93 in the Village of Hamden is in poor shape and in need of a complete reconstruction. The section of SR 93 that runs through Hamden considerable amount of truck traffic from log trucks and has been damaged to the point where vehicles drive left of center to avoid rough spots. The Village applied for OHIO Curb Cuts but does not have the funds to complete the project. This project will replace the curb, sidewalk, storm sewer and roadway to provide for a safe travelable road that will function as designed and not come. There has been complaints by local businesses that the condition of the road is affecting their business and that the project is creating alternate routes to avoid the rough road. | Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$1,600,000 |
| Vinton | Save Our Jobs & Services | Save Our Jobs & Services is a project of the Vinton County Health District to offset projected cuts in funding from the state. Our goal is to recalculate the elimination of local health & wellness related services and the elimination of at least six full time employees. We currently offer health & wellness related services to approximately 200 families in Vinton County. These services are at risk families that earn less than the federal definition of poverty and up to 300% of poverty. These programs and services have been cut off between the last 10-20 years. We have regular contact with the state of Ohio and other local service providers that these programs and services will either cease altogether or will be reduced in funding. There is no conceivable way to generate or offset the projected funding losses at the local level. If new and/or additional funding cannot be secured, it will be devastating to this rural rural county that is already designated as a severely medically underserved area. Current plans call for funding to be cut between now and the start of the new state budget year which is July 1, 2009. This is a disaster for our county. | Vinton County Health District | 6 | 0 to 30 days | \$200,000 |
| Vinton | Jackson County Water - Vinton County Water Interco | This project involves the installation of approximately 7000 ft of 8" water main and 3000 ft of 6" watermain in interconnection to existing Public Water Supply systems to resolve a health concern, maximize hydraulic for service area and improve infrastructure for economic development. Project will include emergency connections for adjacent water systems, GIS software and mapping for the new combined system, and replacement of residential water meters in order to improve system efficiency. The project will reconstruct SR 93 through Hamden including new curb, sidewalks, storm sewers and street. The current condition creates a safety hazard and there are several log trucks and coal trucks that travel the road each day. Local businesses complain that the condition of the road is affecting their business. | Jackson County Water Company | 2 | 31 to 90 days | \$1,500,000 |
| Vinton | Village of Hamden SR 93 Reconstruction Project | This bridge will be replaced by a galvanized, steel truss bridge. The existing bridge is structurally deficient and in need of replacement soon. This bridge is located in the northern part of the village of Hamden, near the recycling area, and is beside one of the remaining covered bridges in our County, which draws tourism much of the year. | Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$1,600,000 |
| Vinton | Woodgeard Road Bridge Replacement | This bridge will be replaced by a galvanized, steel truss bridge. The existing bridge is structurally deficient and in need of replacement soon. This bridge is located in the northern part of the village of Hamden, near the recycling area, and is beside one of the remaining covered bridges in our County, which draws tourism much of the year. | Vinton County Engineer | 16 | 31 to 90 days | \$325,000 |
| Vinton | Hot Mix Paving Various County Roads | This project would hot mix pave several miles of County Roads in Vinton County. (approximately 10 miles) The hot mix application will last much longer than our current paving application which we normally do each year. By extending the number of years of maintenance, this will allow the funds to be directed to other areas of road and bridge maintenance. The life of a hot mix road should be around 15 years as opposed to 7 years of more paving. This project will include consolidation of wastewater handling into a single treatment well. This plan serves the unsewered cottages and surrounding at the state park. These facilities are important drivers of both local recreation and tourism economy. Improvements will alleviate general compliance issues related to these facilities. Install 45,000 ft of water lines in Vinton and Brown Townships in Vinton County. | Vinton County Engineer | 30 | 91 to 180 days | \$1,500,000 |
| Vinton | Lake Hope State Park WWTP Rehabilitation | This project would hot mix pave several miles of County Roads in Vinton County. (approximately 10 miles) The hot mix application will last much longer than our current paving application which we normally do each year. By extending the number of years of maintenance, this will allow the funds to be directed to other areas of road and bridge maintenance. The life of a hot mix road should be around 15 years as opposed to 7 years of more paving. This project will include consolidation of wastewater handling into a single treatment well. This plan serves the unsewered cottages and surrounding at the state park. These facilities are important drivers of both local recreation and tourism economy. Improvements will alleviate general compliance issues related to these facilities. Install 45,000 ft of water lines in Vinton and Brown Townships in Vinton County. | ODNR-Parks & Recreation | 35 | 31 to 90 days | \$2,300,000 |
| Vinton | Arbugh Water Project | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with emergency services. | Vinton County Development Department | 25 | 91 to 180 days | \$750,000 |
| Vinton | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Vinton | Connecting Appalachia: World Class Connectivity fo | Employment. The Connecting Appalachia World Class Connectivity for Industrial Parks project will bring fiber optic broadband connectivity, supporting high-speed voice, data and video transmissions, to 34 industrial parks across the 34 rural counties via the Southern Ohio Health Care Network project's Fiber Optic Backbone. For sustainability, physically diverse fiber runs will minimize service disruptions from cable cuts. Project funds will also be used to extend fiber optic cables from the local telephone company, the local cable company and Internet Service Providers already in the area. This combination of facilities will create a competitive environment, providing a rich set of services at urban-market rates that will attract businesses looking to relocate. Community Points of Presence (C-POP) will be built in each park to house fiber termination and electronic equipment. These small computer rooms provide power and security systems, environmental controls, fire suppression, and remote monitoring. Including the 10 poorest and all 6 ARC-distressed counties in Ohio. | Vintn Hocking BBAC | 270 | 91 to 180 days | \$23,641,900 |
| Vinton | Connecting Appalachia: Telemedicine Initiative | Once SOHCN members have reliable, high-speed broadband connectivity, telemedicine equipment for rural hospitals, clinics and homes will improve the continuity and quality of care while reducing costs by minimizing hospital stays, travel/transport, and eliminating duplication of services. Critical and intensive care consultations from urban medical centers to rural hospitals save lives, time and money while providing continuing medical education for geographically isolated physicians. At-home telemedicine helps patients better understand and manage chronic conditions, greatly increasing medication compliance and improving prognosis. Requested project funds will primarily be used to purchase telemedicine equipment. Increased efficiency and expected changes to reimbursement models for telemedicine (shift to pay-for-performance) will enable Southern Ohio Health Care Network providers to take over operating costs. | Vintn Hocking BBAC | 410 | 91 to 180 days | \$28,130,938 |
| Vinton | We have no law officials here, please help change | The village of Willsville is a small town that has no law enforcement. Because of this, we rely on the Vinton County Sheriff's Department and State Highway patrol for our public safety assistance. Currently, there is at least a 30 minute or longer response time for help. This also has some problems with drug dealers and burglary rates as well. The town's people of Willsville have continually voted their faith and concerns in the village council about their safety and the safety of their children. What we are looking for is 2 full-time police officers and one brand new patrol. One time, many years ago what we could get for funding, this is how we handled things, and it worked out really well. Here is an estimated breakdown of the costs associated with this project. Salary per officer: \$20,000.00 New police cruiser: \$20,000.00 Extra costs for insurance, car maintenance, gas and additional supplies related to project. Total requested \$100,000.00 The expected outcome of this project will be dramatic. Having the presence of police officers will strengthen our community, deter illegal activity, protect our village and its inhabitants and potentially save lives. Renovations of existing nursing home with addition of 5 private rooms and reduction of ward rooms to large semi private and 1 suite for married couple and 1 large private suite. This will allow 4-5 year old businesses to improve its marketability therefore maintaining 40 positions and adding 9 new full time positions in a county that has a high unemployment rate. The added positions will put approximately \$8,468,000 back into vinton counties economy. The improved customer related to renovations will also allow the facility to increase their starting wages to a more competitive rate and allow for annual raises for staff that have not had a raise in over 3 years. This will add an additional \$4,230,000 to the economy. The renovations needed will cost approximately 300,500.00. Most of the work will be done locally also helping the local economy. The renovations would include carpet and flooring: 150,000.00ceiling: 40,000.00cabinets: 25,000.00disinfectant room furniture: 145,500.00comm area furniture: 40,000.00total: 300,500.00We will be putting 160,919.00 back into the community per year after all renovations completed and our census mean budget. | Wilkesville Village Council | 2 | 31 to 90 days | \$100,000 |
| Vinton | Vinton County Jobs | Renovations of existing nursing home with addition of 5 private rooms and reduction of ward rooms to large semi private and 1 suite for married couple and 1 large private suite. This will allow 4-5 year old businesses to improve its marketability therefore maintaining 40 positions and adding 9 new full time positions in a county that has a high unemployment rate. | Vinton | Biomass Division | We are interested in converting our hardwood logging and pulpwood producing operation to biomass energy production. We have been approached by GenEnergy in Chillicothe and Shurtz-Slopes in Colton to supply them with boiler fuel chips. The demand for this type of alternative energy is here and being utilized now. With our small sawmill going out of business and the larger area logging production in full, the sawmill and bark they provided is sorely missed by these companies who have been partners in the biomass energy movement. Sawmill produces 40% of their energy needs with biomass products at this time. We need a chipper to produce the wood chips and trucks to haul the product to market. We have the basic timbering operation in place and could make the transition as soon as a chipper and trucks are purchased. | Biomass Producers | 10 | 0 to 30 days | \$1,025,000 |
| Vinton | Courthouse HVAC Improvements | Replace existing boiler system in Vinton County Courthouse and install energy efficient HVAC system. Due to the drastic decline in the lumber industry since the housing market crashed, I need to diversify and produce a product from my logging operation that is in demand. Wood chips are being used for boiler fuel and other applications as an alternative energy source. I need to purchase a chipper, chip trailers and additional equipment to enter this growing market. This would create/retain 10 jobs in an economically distressed county. | Vinton County Commissioners Development Department | 5 | 91 to 180 days | 450,000 |
| Vinton | Chipper | Replace existing boiler system in Vinton County Courthouse and install energy efficient HVAC system. Due to the drastic decline in the lumber industry since the housing market crashed, I need to diversify and produce a product from my logging operation that is in demand. Wood chips are being used for boiler fuel and other applications as an alternative energy source. I need to purchase a chipper, chip trailers and additional equipment to enter this growing market. This would create/retain 10 jobs in an economically distressed county. | Gambill Logging | 10 | 0 to 30 days | 400,000.00 |
| Warren | East Fosters-Maineville Road | Village of Maineville - East Foster-Maineville Road Improvements - project limits are from State Route 48 to eastern village corporation limited road construction and widening with new curb and gutter. | Village of Maineville | 20 | 0 to 30 days | \$390,000 |
| Warren | Water System Improvements | The project involves the replacement of an above ground water storage tank, the upgrade of the water treatment plant, the acquisition of an emergency generator, the rehabilitation of the existing wells and the upgrading/replacement of over 10,000 linear feet of undersized and inadequate waterlines. | Village of Morrow, Ohio | 800 | 0 to 30 days | \$3,500,000 |
| Warren | Drug task force law enforcement grants | Establish one position that was recently laid off and hire two additional positions that would provide extended services on the investigation of prescription drug abuse, and new work on high-level money laundering offenses also related to drug trafficking. | Warren County Drug Task Force | 3 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|------------------|--------------------|---------------------------|
| Warren | Bus Barn/Maintenance Building | Build new maintenance and bus barn facility for school district. Existing structure is dilapidated and needs replaced. Project is not eligible for Ohio School Facility Commission funding or no duplication of grant funding. Location would be on existing school property which is already zoned. Construction could begin upon receipt of funding. | Carlisle Local School District | 15 | 31 to 90 days | \$350,000 |
| Warren | Operation Alternative | We own a small business (coffee shop). There are really no safe and worthy places for young people to congregate. We host several events throughout the year to give young people a place to hang out and stay off the streets. These events would be a safe place where young people can congregate. Additional funds would allow us to continue this outreach as well as expand to reach more teenagers with quality activities. With these funds we could make a less expensive for the young people to participate. With additional funds we could purchase additional equipment that would draw more young people to our events. The Village of Waynesville operates a Waste Water Treatment Plant (WWTP) that treats waste water from approximately 1,200 households and businesses throughout the Waynesville area. | Kidd Coffee 20 Mile Station | 5 | 0 to 30 days | \$10,000 |
| Warren | WWTP Filtration and Grit Removal Process | A feasibility study conducted by ATE Engineering, Inc. recommended upgrading the WWTP in order to allow a capacity of up to one (1) million gallons per day (MGD) of flow through the plant. Modifying the filtration and grit removal process will not only increase the WWTP's capacity, but it will also allow us to operate in a more cost-effective and in a more environmentally sound manner. This process will allow the Village to "thicken" the sludge, which is the byproduct of the sewage sluff. The dewatered sludge will then have any debris removed that would otherwise hinder the treatment process can then be treated over a specified treatment process. Once the debris and grit is removed from the effluent waste water, the foreign matter is disposed of in a landfill. The remaining waste water and sludge can then be effectively processed and ultimately the treated water will be channeled into the Little Miami River in strict compliance of standards mandated by the EPA. | Village of Waynesville | 25 | 31 to 90 days | \$332,037 |
| Warren | Dist 8, PID 22950, WAR IR 71 14.20 | Bridge Replacement | Ohio Department of Transportation | 2,870.00 | 31 to 90 days | \$100,000,000 |
| Warren | Carpe Diem | We are an existing business which has helped local residents, high school kids and businesses lower their health care cost by providing them with proper fitness and nutritional guidance. I currently have eight employees, three of which may be laid off due to the declining economic situation we are currently in. I plan on getting the majority of my home builders, real estate agents and car dealers back in to help release stress accumulated which deteriorates individual health and causes non-warranted medical issues and costs. A large percentage of those clients can no longer afford other health care cost or membership cost. | Ohio Champions Personal Training Center | 8 | 0 to 30 days | \$70,000 |
| Warren | Waste Water Sludge Treatment Process Improvements | Approximately 294,000 gallons of sludge (undigestible wastes) were hauled from the Village's Waste Water Treatment Plant (WWTP). The sludge hauler was not "Class A" sludge, which could be used as fertilizer or vitally important, but could only be hauled to an EPA-approved place of land. Furthermore, this sludge was approximately 4% solids and 96% moisture. The Village of Waynesville is currently looking at implementing an alternative sludge management system, such as microwave technology, which would destroy all harmful pathogens and yield a "Class A" sludge that could be used for landscaping, agriculture and even home gardens. Furthermore, energy consumption would also be reduced through the use of electric as the primary heat source with natural gas used as a secondary heat source. This combination process is the most cost-effective measure for processing sludge. Energy cost would be reduced as this process will not generate forty-nine semi loads of sludge, as they existing process did in 2008. | Village of Waynesville | 25 | 31 to 90 days | \$237,000 |
| Warren | S.R. 123-Phase X | Stimulus money would be used to install approx. 1000 linear feet of 12" Water main. The total project will improve a major roadway and business corridor into the City from the West. Project components, widening roadway to three lanes 12' feet wide, overlaying asphalt, curbs, install 3,000 linear feet of curb/gutter, 2,600 linear feet of sidewalk, 3 1/2 feet low lawn, 100 linear feet of storm sewer, 100 linear feet of 6" drains, and 25 yard drains. | City of Carlisle | | 181 days or more | \$240,000 |
| Warren | Dayton Road/Edwards Road | This project is the final leg of a ten phase reconstruction project along the major corridor through the City. Following a 2008 water study conducted by Stantec Consulting, Inc., the Village of Waynesville determined the need for replacing a six inch antiquated waterline with a twelve inch line as an improvement that should take place in the near future. The Water Commission supplies the local school facility, Wayne Local Schools. Last year, this line fractured four times, with one break occurring in front of the schools and resulting in closure of the entire school and the line was repaired the following day. Repairs were made to this school closures in the future and will also improve the water capacity for consumption and fire protection throughout the eastern portion of the Village. This project would also enable the Village to continue providing water to an additional 365 households outside the corporation limit as well. | Village of Waynesville | 15 | 31 to 90 days | \$325,045 |
| Warren | Hoff Run Flood Improvements (Eagle View Drive & Th Construct Tertiary Treatment Facility for Mason WR | Replace aging storm system & eliminate area flooding issues | City of Mason, Ohio | 5 | 181 days or more | \$500,000 |
| Warren | Main St., Forest St., First St. Storm and Sewer Re | Significantly increases City's ability to supply plant effluent for re-use as irrigation water | City of Mason, Ohio | 10 | 181 days or more | \$1,200,000 |
| Warren | Socialville-Fosters Road Landscaping | Replace failing storm pipe, correct street flooding and basement flooding | City of Mason, Ohio | 10 | 91 to 180 days | \$1,165,000 |
| Warren | Bethany Road Widening (SR 741 to Sports Park) | Add landscaping and irrigation to medians as well as street trees to complete the improvement project | City of Mason, Ohio | 5 | 91 to 180 days | \$175,000 |
| Warren | Community Center Addition | Widen to 3 lanes in accordance with the SW Warren County Trans. Study, add bike path, curb and gutter, storm sewer, and sidewalk | City of Mason, Ohio | 150 | 181 days or more | \$6,348,000 |
| Warren | Mason Road Widening (Phase 1 & 2) | Expand existing community center | City of Mason, Ohio | 400 | 181 days or more | \$28,000,000 |
| Warren | Greenree Health Science Academy | Replace two culverts, add left turn lanes, curb and gutter, bike path and sidewalk from west crop limits to Forest Avenue Greenree Health Science Academy is a model public/private collaboration is designed to align secondary, adult workforce, and post-secondary education to meet the workforce challenges faced by one of the regions major employers in health care, and the growing number of hospitals and other health care providers. This collaboration with Atrium Medical Center, Miami University Middletown, and the Warren County Career Center is designed to serve traditional and non-traditional students, developing clear educational and career advancement in the health care field. This 30,000 sq. ft. construction project will allow the partners to meet the ever-increasing need for healthcare workers. The current Academy is housed in a former high school. With this building on the Artium campus, we expect our outcomes to create 200-300 healthcare jobs and 50-150 construction jobs for the Middletown/Southwest region of Ohio. Greenree is designed not only to help educate future employees, but also to help employers in hte longer-term strategic investment of retaining employees by providing opportunities for educational and career advancement. | Atrium Medical Center | 500 | 31 to 90 days | \$10,000,000 |
| Warren | Meadows Park Bridge and Bike Trail | Replace existing bridge and construct trail connection to additional greenspace | City of Mason, Ohio | 10 | 181 days or more | \$245,950 |
| Warren | Public Works Garage | New Public Works Facility | City of Mason, Ohio | 5 | 181 days or more | \$7,000,000 |
| Warren | SR 741 Widening (Parkside Dr. to Bethany Rd.) | Widen to 4 lanes in accordance with the SW Warren County Trans. Study, add bike path, curb and gutter, storm sewer, and sidewalk | City of Mason, Ohio | 999 | 181 days or more | \$8,000,000 |
| Warren | Church Street & Forest Avenue Storm Sewer System R | Replace aging storm system & eliminate area flooding issues | City of Mason, Ohio | 5 | 181 days or more | \$186,000 |
| Warren | Parking Lot for Train Depot | Provide parking for up to 50,000 potential visitors to scenic train | City of Mason, Ohio | 4 | 91 to 180 days | \$75,000 |
| Warren | Geo-thermal wells as heating/cooling source | Park facilities climate controlled year-round could be heat/cooled via alternative energy at significant savings Village Council completed a sewer feasibility study in 2008 in preparation for future development in the Waynesville area. In an effort to properly manage growth, Council anticipates the need for an upgrade of the Waste Water Treatment Plant, which will increase the plant's capacity from 170 million gallons per day (MGD) to 1 MGD. Phase 1 of this project would involve the construction of a new settling tank and aeration tank, which will have a volumetric capacity of approximately 45,200 cubic feet. The two existing clarifying tanks have a combined volume of approximately 32,668 cubic feet. The existing clarifiers will be left in place and used during peak flows in order to increase the lifespan of the infrastructure improvements to the treatment plant. The Village of Waynesville provides water for not only its residents, but also for residents in Wayne Township as well. There are a total of approximately 1,200 households and local businesses that rely on the Village's treatment plant for waste water treatment services. The proposed upgrade will enable the village to continue providing waste water services without harming the environment in the process. Replace 4 existing low efficiency heating and cooling units that use R-22 refrigerant with new high efficiency units using R-410A environmentally friendly refrigerant. Replace existing inefficient heating and cooling systems that use 70% efficient gas fired furnaces and air conditioners that use R-22 refrigerant with new hi efficiency units that utilize R-410A environmentally friendly refrigerant and variable speed, variable output 90%+ efficiency gas furnaces | Village of Waynesville | 20 | 31 to 90 days | \$880,455 |
| Warren | Rooftop HVAC replacement | Warren County Board of MR/DD | 1 | 0 to 30 days | \$35,000 | |
| Warren | Split System HVAC replacement - Young Center | Warren County Board of MR/DD | 1 | 0 to 30 days | \$35,000 | |
| Warren | Parking lot repair - PSU | Warren County Board of MR/DD | 4 | 91 to 180 days | \$50,000 | |
| Warren | Parking lot replacement at WCYC | Warren County Board of MR/DD | 4 | 91 to 180 days | \$50,000 | |
| Warren | Parking lot repair at Banta | Warren County Board of MR/DD | 2 | 91 to 180 days | \$22,000 | |
| Warren | Roof replacement at Young Center | Warren County Board of MR/DD | 4 | 91 to 180 days | \$50,000 | |
| Warren | Sound attenuation panels in classroom area of Early Intervention building | Warren County Board of MR/DD | 2 | 91 to 180 days | \$23,000 | |
| Warren | Solar Tubes for Lighting Fire Station & Community | City of Mason, Ohio | 2 | 181 days or more | \$30,000 | |
| Warren | Phase Signal Elimination Project (Fairway/Rd) | City of Mason, Ohio | 10 | 181 days or more | \$307,880 | |
| Warren | Mason-Montgomery/Tylersville Intersection Improvment | Add left turn lane to Village Lakes and eliminate the split phase signal also add second left turn lane at Citrus Blvd to avoid the need for a split phase signal | City of Mason, Ohio | 80 | 181 days or more | \$750,000 |
| Warren | Bethany Road/Mason-Montgomery Road Roundabout | Construct 2 lane roundabout to eliminate the traffic backups and avoid the need for a bus stop signal | City of Mason, Ohio | 100 | 181 days or more | \$1,150,000 |
| Warren | Snider Rd.: Western Row Rd. to US 42 | Widen Snider Road to 3 lanes to accommodate traffic growth in accordance with the SW Warren County Study | City of Mason, Ohio | 50 | 181 days or more | \$1,500,000 |
| Warren | US 42: Tylersville Rd. to Butler Warren Rd. | Widen to 4 lanes plus left turn lane, add bike path, curb and gutter, storm sewer, and sidewalk | City of Mason, Ohio | 75 | 181 days or more | \$8,143,000 |
| Warren | Bethany Road Widening (SR 741 to Sports Park) | Widen to 3 lanes in accordance with the SW Warren County Trans. Study, add bike path, curb and gutter, storm sewer, and sidewalk | City of Mason, Ohio | 150 | 181 days or more | \$6,348,000 |
| Warren | Bethany Rd. Widening (Mason-Montgomery Rd. to SR 7 | Widen to 3 lanes in accordance with the SW Warren County Trans. Study, add bike path, curb and gutter, storm sewer, and sidewalk | City of Mason, Ohio | 125 | 181 days or more | \$5,800,000 |
| Warren | Western Row Rd. / I-71 Interchange and I-71/SR 741 | Add left turn lane on ramps, SB off-ramps to WRR and Wilson SR 741 interchange | City of Mason, Ohio | 999 | 181 days or more | \$21,000,000 |
| Warren | Kings Island Dr. Traffic Safety Improvements | Add medians, left turn lanes and reflective safety traffic signals to improve safety and reduce traffic congestion | City of Mason, Ohio | 70 | 181 days or more | \$3,000,000 |
| Warren | Southwind Drive & Windsor Court Storm Sewer Syste | Replace aging storm system & eliminate area flooding issues | City of Mason, Ohio | 5 | 181 days or more | \$85,000 |
| Warren | Indianwood Drive, Seneca Dr., Cherokee Dr. Storm | Replace aging storm system & eliminate area flooding issues | City of Mason, Ohio | 5 | 181 days or more | \$265,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Warren | US 42 North Trunk Sewer Reconstruction - Phase 3 | Completes multi-phase reconstruction of City's major trunk sewer, to significantly reduce maintenance and conserve energy use | City of Mason, Ohio | 20 | 181 days or more | \$1,425,000 |
| Warren | Provide Storage/Transmission of Treated Wastewater | Eliminate need for purchase and use of drinking water for irrigation, significantly reducing overall energy usage | City of Mason, Ohio | 5 | 181 days or more | \$500,000 |
| Warren | Rehabilitate Beach Lift Station | Provides long-term wastewater relief for important local business and future commercial development | City of Mason, Ohio | 2 | 181 days or more | \$200,000 |
| Warren | Rehabilitate Concrete Walkways on WRP Oxidation Di | Eliminate safety hazard to Mason WRP personnel due to possible catastrophic failure of concrete walls of major wastewater treatment facility | City of Mason, Ohio | 3 | 181 days or more | \$250,000 |
| Warren | Bethany Road Sewer/Parkside Lift Station Eliminat | Provides for gravity wastewater flow from Parkside district, which will significantly conserve energy now being expended for pumping and maintenance | City of Mason, Ohio | 4 | 181 days or more | \$400,000 |
| Warren | Muddy Creek Bike Path - Phase II | Extension of the existing trail that connects Fire Hill Park with Heritage Oak Park | City of Mason, Ohio | 25 | 181 days or more | \$937,500 |
| Warren | Replace Outdoor Pool Roofing with Green Roof | Replace aging roof with environmentally friendly green roof and rain barrels to store water for irrigation | City of Mason, Ohio | 2 | 181 days or more | \$50,000 |
| Warren | Fire Station #51 | Replacement for existing underused station | City of Mason, Ohio | 6 | 181 days or more | \$2,000,000 |
| Warren | Storage Building for V-Box Spreaders | Storage building to get equipment out of weather and extend the service life | City of Mason, Ohio | 4 | 181 days or more | \$100,000 |
| Warren | State Property Park Infrastructure & All-Inclusive | Infrastructure for future MRDQ facility, ADA Playground, new parking lot and park amenities | City of Mason, Ohio | 20 | 181 days or more | \$2,500,000 |
| Warren | Solar Panels for heating water | Provide alternative energy for heating the pool water in the Community Center and hot water usage at the Fire Station | City of Mason, Ohio | 7 | 181 days or more | \$100,000 |
| Warren | Water/Air Heat Pump for new Fire Station | Use the retention basin on site to help heat/cool the fire station. | City of Mason, Ohio | 2 | 181 days or more | \$30,000 |
| Warren | WCCC Regional Public Safety Training Facility | In response to requests from several of our local fire departments we want to build a 40 ft. Class A Burn Tower and a dining kitchen that will be able to be utilized by the fire and police departments in Warren County as well as surrounding counties. Currently the closest facility of this type is approximately 40-50 minutes away. We currently offer training for those who are interested in pursuing careers in public safety and we also provide training for both paid and volunteer fire personnel reading to upgrade skills and meet continuing education requirements. This would be a collaboration between our adult and high school programs and many local fire departments and police departments. It will require 1 acre of land which we already have identified on our campus. As a result of this project we will be meeting the needs of our local public safety organizations and personnel improve training opportunities in Warren County and the surrounding counties, maximize existing economic, create construction jobs and at the same time increasing the pool of well trained fire and police personnel resulting in worker retention, and improve safety in our area. | Warren County Career Center | 50 plus | 91 to 180 days | \$2,000,000 |
| Warren | Chilled Water System Conversion | Convert the chilled water system at the Municipal Center to an ice storage unit to conserve energy | City of Mason, Ohio | 5 | 181 days or more | \$300,000 |
| Warren | Methane Gas Collection System | Use methane gas generated at the WRP as an alternative energy source to generate heat or electricity for on-site use Waynesville Village Council would like to replace approximately 5,000 feet of the existing 108 year old water main on Main Street. With funding through the proposed stimulus package funds, Council would be willing to do the project in a single phase manner but matching funds would be a major issue for Council's end. The existing water main was installed in 1901, following a devastating fire that destroyed much of downtown. The existing main has served the village well over the past century, but this four inch, mineral deposit filled water line cannot provide the adequate water capacity to meet the needs of the community. The existing line also fails to meet the community's needs in the way of pipe protection. The Village of Waynesville provides water for residents outside the village limits as well, including families in Wayne, Lake and other Townships, here in Warren County, and families in Clinton County and Greene counties as well. Although we are currently operating in a "best emergency" it is Council's desire to improve the water quality of well over 2,500 households by continuing to improve the water infrastructure in a timely and cost effective manner. | City of Mason, Ohio City of Mason, Ohio | 10 | 181 days or more | \$500,000 |
| Warren | Main Street Water Main Replacement | Use methane gas generated at the WRP as an alternative energy source to generate heat or electricity for on-site use Waynesville Village Council would like to replace approximately 5,000 feet of the existing 108 year old water main on Main Street. With funding through the proposed stimulus package funds, Council would be willing to do the project in a single phase manner but matching funds would be a major issue for Council's end. The existing water main was installed in 1901, following a devastating fire that destroyed much of downtown. The existing main has served the village well over the past century, but this four inch, mineral deposit filled water line cannot provide the adequate water capacity to meet the needs of the community. The existing line also fails to meet the community's needs in the way of pipe protection. The Village of Waynesville provides water for residents outside the village limits as well, including families in Wayne, Lake and other Townships, here in Warren County, and families in Clinton County and Greene counties as well. Although we are currently operating in a "best emergency" it is Council's desire to improve the water quality of well over 2,500 households by continuing to improve the water infrastructure in a timely and cost effective manner. | Village of Waynesville | 30 | 91 to 180 days | \$1,350,000 |
| Warren | 175 / SR 73 North Bound Ramp | Land acquisition for the construction of a single entrance ramp to interchange 75 for westbound traffic from State Route 73. Land acquisition would be the first step in the project that is part of an Interchange Modification Study to be submitted for final CDDT approval in 2009 in conjunction with the City of Franklin, Ohio and part of CDDT's Interstate and Lane and Bridge Rehabilitation project at State Route 73. SR 73 SR 122 3.40 PM 10754 Current land owner is BP Petroleum/ initial contacts have been made at this time. | City of Springboro | 100 | 181 days or more | \$500,000 |
| Warren | State Route 73 Enhancement Project | To complete a state route enhancement project began 5 years ago and to allow for the redevelopment of potential hazard property bringing economic development to the intersection of our community. Project includes purchase of a gas station property estimated at \$1,000,000 and the installation of traffic signal mast arms at two intersections and installation of median and street lighting on the SR 73 corridor of approximately 75 miles to complete a piece of SR73 enhanced with the same improvements about 5 years ago. The project would estimate includes all facets of the improvements and land purchase. | City of Springboro | 50 | 91 to 180 days | \$2,150,000 |
| Warren | Community Paper Recovery | For necessary equipment and employees to place recycle container for recovered paper and cardboard throughout Warren, Butler, and Clinton County. A percentage of revenue gained from this project goes directly back to the counties, cities, and other local government to help increase the volume of their recycling programs. This includes increasing community involvement through advertising and paper drives. The recovered paper is then sent mill direct for processing. Recovered paper helps to keep raw material costs low avoiding the need for virgin pulp, as well as reducing the amount of energy that is needed for manufacturing. This project will improve an existing roadway that serves five local jurisdictions including Franklin Township, Springboro, Chardon Township, the City of Franklin, and Miami Township as a north-south gateway. The roadway is narrow and has major elevation changes and serves as a collector road needing major safety improvements. | S. Mindlin & Son, Inc. | 6 | 31 to 90 days | \$50,000 |
| Warren | Clearcreek Franklin Road Up grade | This project will improve an existing roadway that serves five local jurisdictions including Franklin Township, Springboro, Chardon Township, the City of Franklin, and Miami Township as a north-south gateway. The roadway is narrow and has major elevation changes and serves as a collector road needing major safety improvements. | City of Springboro | 50 | 91 to 180 days | \$1,500,000 |
| Warren | Road Improvements for School Safety - 2 Locations | Little Miami Local Schools has road improvement projects at 2 different school buildings within the school district. The school has worked with the community to build new school buildings that were needed as a result of the growth in student enrollment (50% increase over the past 7 years). As a result of the new school buildings, there needs to be improvements in roads for safety reasons. As the Intermediate School (grades 5 and 6), there is a hump in the road close to the building that will not be safe with the increased traffic on site. At the High School, a turn lane needs to be installed as a safety measure as well. The projects are anticipated to begin in the Spring of 2009. The school has already been working with the County engineer's office and is ready to move forward with these projects. | LITTLE MIAMI LOCAL SCHOOL DISTRICT | 40 | 0 to 30 days | \$1,000,000 |
| Warren | Dist 8, PID 85839, WAR Purchase 3 LTNs | Purchase 3 light transit vehicles with a name body for the Warren County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$135,000 |
| Warren | Dist 8, PID 85841, WAR Trapeze disp/sched system | Trapeze dispatch/scheduling system for the Warren County Commissioners | Ohio Department of Transportation | 2 | 31 to 90 days | \$123,100 |
| Warren | Lindemann Lane Emergency Storm Sewer System Replac | Emergency replacement of 800' of collapsed & aging storm system to prevent area flooding issues. | City of Mason | 5 | 0 to 30 days | \$125,000 |
| Warren | Eagle Quest | Middletown Christian Schools' Foundation is raising capital monies, through the Eagle Quest Campaign, for the development of a new Middletown Christian High School. This new facility of 15,500 square feet, located in the school currently used by elementary and junior high is unfinished. The newly developed area will include state-of-the-art chemistry and science labs. Chemistry and science are two very important elements in this education. This will help promote job growth in Ohio by providing well-educated students and prepare them for college. This school project will also include a life skills room (home economics). This will include space for all the modern appliances needed for group cooking sessions, sewing and other skills for life. A 1200 square foot modern art room and music room will be provided as well. We will begin this project in June 2009 and finish in August 2009. Currently, the school operates out of a space graciously provided by Grace Baptist Church. Our high school is the fastest growing department in our school system. With increasing enrollment, it is imperative that we complete this high school. | Middletown Christian Schools' Foundation | 100 | 31 to 90 days | \$500,000 |
| Warren | Hosted Broadband VoIP | Work with local service providers in installing and configuring 75-100 new Broadband connections (customers) using Cisco Systems' routers/switches/appliances to provide LOW COST Voics over IP (VoIP) hosted services at a data center in the greater Cincinnati area. This will provide affordable phone, ACD and voicemail applications and services to small business in the greater Cincinnati area. This project will allow small businesses to afford cutting edge voice technologies to make them more competitive in their marketplace. | e-velocity technical consulting llc. | 4 | 91 to 180 days | \$240,000 |
| Warren | Narcotic Investigative Initiative | Hiring of one additional police officer to allow the re-assignment of one officer to conduct narcotic specific investigation and enforcement with a county-wide drug task force. The recent economic downturn reduced the funding available to continue this innovative program. If this funding was restored by the City of Franklin Police Division, the narcotic investigations officer could be re-assigned to the county-wide drug task force, thereby reducing drug crimes in the local and county-wide areas. Target measures of effectiveness include reduction of drug overdose deaths by 20%, increase drug arrests by 25%, and increase closure of drug houses by 10%. | Franklin Police Department | 1 | 31 to 90 days | \$270,000 |
| Warren | Towne Mall Redevelopment | This City would seek to redevelop Towne Mall, a nearly half square, 1970's retail center that includes 450,000 square feet on 48 acres of land. The funding would allow the City to control the common space owned by the mall owner and three anchor stores. Once acquired, the City would seek for redevelopment partners to redevelop the retail or an educational institution. | City of Middletown | 500 | 91 to 180 days | \$18,000,000 |
| Warren | N. Union Road Improvement Project | The City continues to widen the interstate system reliever corridor to alleviate congestion on the nation's interstate system. This project would extend the current five-lane improvements to the north-south corridor. | City of Middletown | 25 | 181 days or more | \$1,400,000 |
| Warren | St. Rt. 123, Phase VIII & IX | Would add a third lane, curb and gutter, sidewalks, and waterline extension. This project would reduce outstanding curve and reprofile a dangerous intersection. | City of Carlisle | 5,000 | 91 to 180 days | \$1,400,000 |
| Warren | Union Rd Extension | This project would tie north and south sides of the City together and provide a north/south connector road off S.R. 123. This project would include curb and gutter, sidewalks, waterline extension and eliminate a sight distance problem on Parkview Dr. This project would play a major role in economic development for the City by tying a north/south corridor to the City's business park. | City of Carlisle | 1500 | 181 days or more | \$1,000,000 |
| Warren | North Branch Dick's Creek | New bridge over Dick's Creek that would provide second entrance customers from State Route 122. | City of Middletown | 50 | 181 days or more | \$2,500,000 |
| Warren | Atrium Boulevard Extension | New construction of minor arterial to alleviate congestion at the Union Road/SR 122 intersection. | City of Middletown | 50 | 181 days or more | \$4,000,000 |
| Warren | Towne Boulevard Improvements | Collector improvements to address congestion and ingress/egress conflicts in retail corridor. | City of Middletown | 50 | 181 days or more | \$3,500,000 |
| Warren | Mall & Flea Markets Foot, Bike, & Segway Patrol | Hiring 5 new police officers and purchasing bikes and segways to enable them to patrol a major outlet mall and two of the largest flea markets in Ohio. This is to reduce crime and improve community relations for the police department. The flea markets are already designated by Homeland Security as "target areas" and we are presently in the process of obtaining the same designation for the Mall. Under the award Schedule/Foster #6001.1 of 12' GDP | Monroe Police Department | 5 | 91 to 180 days | \$1,135,000 |
| Warren | Snider Rd. and Socialville Foster | System Upgrade The water mains associated with this project are being upgraded (replaced) based on the current age and size of pipe. The new mains will improve hydraulic system conditions with increased water volume, improved capacity for domestic needs and required fire flows in the area, and improve water quality parameters. Green Initiative Water mains installations qualify as "green initiatives" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 5.55 | 181 days or more | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Warren | Mason Road – Whispering to W Main | Mason Road – Whispering to W Main 2500 L. of 12" DIP Water Main Replacement GC/WW stresses to coordinate work with other jurisdictions to optimize work in areas to keep customer disruptions to a minimum. We cooperate with the project team to upgrade our water mains based on the age and size of pipe. Some of the water mains are experiencing maintenance problems, but many times the extent of the improvement creates occupancy conflicts/interference requiring utility relocation. GC/WW tries to be proactive with street improvements to minimize the inconvenience to our customers while maintaining funds through paved projects. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 1.5 | 91 to 180 days | \$200,000 |
| Warren | Castle Drive | Castle Drive 2,400 L. of 12" DIP New Mains/Capper The water main associated with this project involves the installation of a new main which connects two dead end water mains and thereby completing a hydraulic loop. This new water main will improve system capacity through system looping, extend water service to additional customers, and improve water quality in the system by eliminating dead water mains. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 4.4 | 91 to 180 days | \$600,000 |
| Warren | Atrium Blvd Bridge | Construction of a new entrance from SR 122 onto the campus is planned for Atrium Medical Center, a level III Trauma Center, located in Warren County and the city of Middletown (Butler County) Ohio. This new entrance will allow faster access to the medical center for many residents of both Butler and Warren Counties. The improved access is vitally important to Emergency Medical Services during transport of critical patients to the Emergency Trauma Center as in these critical situations - minutes count. Those served by others who respond in emergency situations, such as police, fire, surgeons and other healthcare professionals will also benefit from the additional entrance. Specifically, funds requested from the Federal Stimulus Initiative would be used to construct a bridge that is a necessary component of this entrance. | Atrium Medical Center | 50 | 91 to 180 days | \$2,500,000 |
| Warren | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. Its mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. business administration non-profit, ECDI's Microenterprise Development Program is the only business administration non-profit in the U.S. that addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Development Program fills a gap in the credit industry by providing training, technical assistance and loans (up to \$10,000) to underserved small business owners. ECDI also serves vulnerable populations, including low-income individuals, those with little or no credit, or those precluded from credit because of religious beliefs. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Warren | Kings Island South Exit Signal Replacement | Replace a 35-year old traffic signal that is in need of replacement and services well over 3 million vehicles at Kings Island amusement park each year. | City of Mason | 10 | 31 to 90 days | \$120,000 |
| Warren | Kings Island Drive Resurfacing | Mill, resurface and restripe roadway that consists of 500' of 6-lane, 1,300' of 6-lane and 3,500' of 4-lane roadway plus shoulders from Western Row Road north for about 1 mile. Roadway is experiencing extensive alligator cracking and service over 3 million visitors to Kings Island & Great Wolf Lodge each year. | City of Mason | 10 | 31 to 90 days | \$475,000 |
| Warren | Columbia Road Resurfacing | Mill, resurface and restripe 2,500+ feet of 5-lane roadway from Catalina lake to Western Row Road. This major arterial roadway has not been resurfaced since it was widened in 1992. | City of Mason | 10 | 31 to 90 days | \$225,000 |
| Warren | Lebanon Rail Line Improvements | Replace approximately 1,200 defective rail line ties on the 5 miles of rail line owned and operated by the City of Lebanon. This rail line supports both a passenger train operation, and potential freight use. This line runs between the City of Lebanon and the City of Mason. Recent engineering evaluation has determined the need to replace defective ties. | City of Lebanon | 4 | 31 to 90 days | \$180,000 |
| Warren | Lebanon Traffic Signal Improvements | Replace 26 existing traffic signal and pedestrian heads with LED signals, and upgrade the traffic controllers. This project will help modernize the City's traffic control system. Additionally, it will provide a long-term cost savings by reducing the amount of power consumed by the traffic signals. | City of Lebanon | 3 | 31 to 90 days | \$300,000 |
| Warren | East Warren Street Reconstruction | Reconstruction of 795 L. of roadway, water and sewer replacement of water and sewer infrastructure that has reached its useful life. Project also includes the installation of a new storm sewer system to improve drainage in the area. The existing roadway is deteriorated and is in need of complete reconstruction. | City of Lebanon | 5 | 91 to 180 days | \$400,000 |
| Warren | Janet Way Road Extension | This project entails the extension of Janet Way by 1,150 L. to support the continued development of the Lebanon Commerce Center industrial park. This area supports many manufacturing and office facilities that create jobs for the City of Lebanon. The extension of the roadway will allow for additional acreage to be opened up for economic development. | City of Lebanon | 5 | 181 days or more | \$600,000 |
| Warren | Maple Street Reconstruction | Reconstruction of 1,150 L. of existing roadway. The existing roadway is deteriorated and requires complete replacement. This project will also include the installation of a new drainage system, and the replacement of underground utilities that have reached their useful life. | City of Lebanon | 5 | 91 to 180 days | \$700,000 |
| Warren | West Street Reconstruction | This project entails the reconstruction of 520 L. of roadway, West Street services an arterial roadway that has reached its useful life. Project also includes the installation of a new drainage system, and the replacement of underground utilities. This project will also include the installation of a new drainage system, and the replacement of underground utilities. | City of Lebanon | 5 | 31 to 90 days | \$580,000 |
| Warren | Columbia Road Improvements | This project entails the reconstruction and widening of 1,500 L. of roadway and the installation of underground utilities. Columbia Road is a direct access point to 3 separate industrial park developments in Lebanon including the Lebanon Commerce Center, Kingsview Industrial Park, and Columbia Business Park. This area supports thousands of jobs in the City of Lebanon, and is the primary employment center for the City. The widening of Columbia Road will improve accessibility to the area and help facilitate additional economic development in Lebanon. | City of Lebanon | 5 | 181 days or more | \$1,000,000 |
| Warren | Carson Drive Culvert and Erosion Control Project | This project entails the replacement of a deteriorated culvert that extends under Carson Drive in the City of Lebanon. The existing compacted soil pipe has deteriorated and needs to be replaced. This project will also address existing erosion issues associated with the culvert. The existing culvert will be replaced with a concrete culvert. | City of Lebanon | 5 | 91 to 180 days | \$200,000 |
| Warren | Lebanon WWTP Headworks Screen Replacement | Lebanon's wastewater treatment plant has an average daily flow design capacity of 6.0 mgd. The treatment plant is currently experiencing problems at the headworks with the existing screening mechanisms. The existing screens are not properly capturing all solids, which is creating problems in the wastewater treatment process. This project will replace the existing headworks screens with a new screening system to address these problems. | City of Lebanon | 5 | 91 to 180 days | \$500,000 |
| Warren | Tecumseh Trails Water Main Replacement | This project entails the replacement of 4,500 L. of old and undersized water mains in the Tecumseh Trails subdivision. All water mains will be replaced with new 8" mains to ensure that adequate flow is provided to the subdivision. The existing water mains in this area have experienced a total of 14 main breaks in recent years and have reached their useful life. | City of Lebanon | 5 | 181 days or more | \$500,000 |
| Warren | Glosser Road Water Main | This project entails the installation of a new 16" water main along Glosser Road to serve adjacent properties, and to provide redundancy in the City's water distribution system. This project is necessary for the City to transition to the purchase of wholesale water from Cincinnati Water Works beginning in 2012. This water transmission line is necessary to move water from the south pressure zone to the north zone. | City of Lebanon | 5 | 181 days or more | \$1,000,000 |
| Warren | Lebanon Public Works Facility | This project entails the construction of a new 24,000 s.f. public works facility to support the City's operations. The existing facility was originally constructed in 1982 and has significant functionality and code issues. The public works operation is responsible for all street maintenance, park maintenance, storm sewer system, cemetery administration and maintenance, and automotive maintenance. | City of Lebanon | 15 | 181 days or more | \$3,000,000 |
| Warren | Fire Station Remodeling | Remodel and restore a fire station built in 1979 to meet today's standards, utilize space, and serve the additional growth we have experienced over the past years. | Franklin Township | 6 | 0 to 30 days | \$35,000 |
| Warren | Corwin Roads Project | This project is for resurfacing of 15,523 feet of asphalt pavement. The width is 20 feet and the overlay would be 1 1/2 inches deep of a 301 modified asphalt with a life expectancy of twenty years. These roads are major roads leading into and out of the Village of Corwin and would serve the entire community. | Wayne Township | 12 | 31 to 90 days | \$180,480 |
| Warren | USU Wright Flyer Museum | Build museum to display 1905 Wright Flyer replica built by USU University students. Provide facility to invite school groups and the public to see and have explained how the Wrights developed powered flight and to see a replica of the first "practical" airplane, the 1905 Flyer. The museum would explain the origins of flight and how the first "practical" airplane evolved from the first powered flight in 1903 and be available to educators at all grade levels. | USU Wright Flyer of Ohio | 10 | 91 to 180 days | \$1,000,000 |
| Warren | Integrated Utility PV smart grid control system | Students would be encouraged to participate in projects involving the Flyer. With proper adaptation of smart grid technology and careful algorithm development, it is possible to shed loads, adjust thermostats, bring ICE or PV panels on line, etc. to improve the efficiency of the grid. Grid efficiency is best measured by the ratio of total energy required to produce electricity at the point of use divided by the amount of electricity at the point of use. Generating electricity by coal, natural gas, hydro-power, nuclear, petroleum, and renewable energy contributes to currently about 34.6% efficient. The transmission and distribution of electricity is approximately 90% efficient. This means for every kWh of electricity generated at the power plant, 0.9 kWh of energy reach the point of use. However, it took 2.0 kWh of raw energy going into the power plant to begin with. This EMTEC coordinated project focuses on grid efficiency between the power plant and the consumer and will ignore the conversion losses (mostly in the form of heat) required to convert the coal, etc. into electricity. Emerson does \$780 million annually in control systems and would be well positioned to provide market pull and fast track commercialization of the technology. | EMTEC | 28 | 0 to 30 days | \$1,000,000 |
| Warren | Garage Addition | Construct a 40 ft. x 60 ft. steel building addition with heat to our existing garage for racked space and a wash bay. The addition also includes new entry door, concrete block walls, 6 in. concrete flooring with ramped areas for truck washing. | Franklin Township | 9 | 31 to 90 days | \$165,000 |
| Warren | Coordinated Care Services | Coordinated Care is a sub-committee of the Warren County Family And Children's First Council. The purpose of C.C. is to identify and provide services to youth who are high risk to harm themselves and/or the community. Case managers evaluate the needs of the child and family and services that are needed. It is C.C.'s goal to keep youth out of the justice system and when possible to keep them out of residential placement. Youth who are high risk are assigned case aids to help the child and family. The case aid provides a positive role model to the child and also provides respite to the family. Wrap around services are also provided on an as needed basis. Wrap around services can include: Children Services assistance, Juvenile Court interventions, Mental Health interventions, MFCO and other individualized services depending on the needs of the child and family. Special interventions for youth who are acting out in a sexual manner are also provided. Youth who have to receive residential services are monitored by C.C. case managers to help insure that youth are receiving the services that are needed. This helps to cut the number of days in residential placement. | Warren County Coordinated Care | 10 | 31 to 90 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Warren | Integrated Utility PV smart grid control system | With proper adaptation of smart grid technology and careful algorithm development, it is possible to shed loads, adjust thermostats, bring ICEs or PV panels on line, etc. to improve the efficiency of the grid. Grid efficiency is best measured by the ratio of total energy required to produce electricity at the point of use divided by the amount of electricity at the point of use. Generating electricity by coal, natural gas, hydropower, nuclear, petroleum, and renewable energy combined is currently about 34.4% efficient. The transmission and distribution of electricity is approximately 90% efficient. This means for every kWh of electricity generated at the power plant, 0.9 kWh of energy reach the point of use. However, it took 2.99 kWh of raw energy going into the power plant to begin with. This EMTEC coordinated pilot focuses on grid efficiency between the power plant and the consumer and will ignore the conversion losses (mostly in the form of heat) required to convert the coal, etc. into electricity. Emerson does \$780 million annually in control systems and would be well positioned to provide market pull and fast track commercialization of the technology. | EMTEC | 28 | 0 to 30 days | \$1,000,000 |
| Warren | Project Recovery | I am a victim of the predatory lender interest rate went from 4 to 9 then 12. I was pressured to sign. I lost my home after becoming disabled from an ER placement. I want the assistance that others are going to receive to save their homes which I lost. This stimulus will make me add free and able to rebuild my credit etc. Thank you. | Personal | 0 | 31 to 90 days | \$15,000 |
| Warren | Officer Program | We are new to the Village in under a fiscal emergency and we are unable to hire the needed full time officer because of lack of funding. We are projected to be out of fiscal emergency within 3 years. This project would allow us to fill that vacancy now and after the 3 years we have the ability pay for this additional officer. | Waynesville Police Department | 1 | 0 to 30 days | \$225,000 |
| Warren | Addition and Renovation of Children's Room | 2000 square foot addition to existing Children's Room of library. Project includes construction and furnishing room with library appropriate shelving, computer stations and seating. Possible collaboration with Warren County Career Center capacity, electronic and plumbing repairs to see project as educational lab. Expansion of existing entrance to room from main part of library and incorporation of a new entrance and visits to the library gardens through the children's room to a proposed multi-story garden for handicapped patrons to be added to the existing educational gardens adjacent to room. These gardens are maintained by Warren County Master Gardeners. | Mary L Cook Public Library | 15 | 181 days or more | \$500,000 |
| Warren | Sewer System Upgrade | Upgrade approximately 1600 ft of existing 30 year old clay pipe to a PVC material. | Mid-Western Children's Home | 6 | 181 days or more | \$100,000 |
| Warren | Gardrail Replacement Program | This project is to remove and replace 5280 linear feet of guardrail to meet Ohio Department of Transportation specifications on township maintained roads within Wayne Township, Warren County. | Wayne Township | 10 | 31 to 90 days | \$97,680 |
| Warren | Firefighter/EMS Personnel | To hire a matching additional part-time Firefighter / EMS personnel to go along with the existing 21 weeks four shifts per month for the next five years. We currently have 7 part-time people filling the 21 shifts. This would double the the shifts and provide a shorter response time and better coverage of service for the entire community. | Wayne township | 7 | 0 to 30 days | \$113,400 |
| Warren | Firefighter/EMS Personnel | To match an existing \$52,000 economic revitalization program created by the Waynesville Area Chamber of Commerce with an additional \$24,000 to leverage existing local monies to help 188 vacant businesses in the downtown Waynesville Area with new upstart entrepreneurs with viable business plans. | Wayne Township | 20 | 0 to 30 days | \$24,000 |
| Warren | Z.A.P. zee axis protocol | Z A P is a high speed elevated rail line that could connect Cincinnati and Cleveland with a travel time targeted at TWO HOURS...using the median strip in the highway for the foundations-incorporating utilities and a service corridor would also help the electric grid, and expand the fiber optic net... --using already established transportation routes and the ability to bank turns, etc to Cleveland via Columbus inside of two hours should be obtainable. --where my idea is superior to the other systems has at least TWO major differences. --1--it doesn't kill... --2--it DOESN'T add to traffic congestion as ground based transport systems such as trains at crossings have.. | I'm not organised yet | 10,000 | 181 days or more | \$10,000,000 |
| Warren | WCTS Computer Terminal | Purchase of computer terminal | OKI Regional Council of Governments | 5 | 0 to 30 days | \$15,400 |
| Warren | Railroad Line Improvements | Lebanon--Replace 1,200 defective rail ties | OKI Regional Council of Governments | 4 | 31 to 90 days | \$180,000 |
| Warren | Western Row Road Turn Lanes | Mason--Western Row Road and Cirrus Bld--Add 2 Left Turn Lanes | OKI Regional Council of Governments | 8 | 31 to 90 days | \$307,880 |
| Warren | Wilmington Road Bridge Replacement | Wilmington--Replace Bridge Superstructure | OKI Regional Council of Governments | 30 | 31 to 90 days | \$900,000 |
| Warren | WCTS - 2 replacement vehicles | Purchase of 2 replacement CTI narrow body vehicles | OKI Regional Council of Governments | 2 | 31 to 90 days | \$90,000 |
| Warren | WCTS - Mobile Data Terminal | Purchase of mobile data terminals | OKI Regional Council of Governments | 5 | 31 to 90 days | \$57,000 |
| Warren | WCTS - Computer Software | Purchase of computer software | OKI Regional Council of Governments | 2 | 31 to 90 days | \$29,170 |
| Warren | WCTS - Software training | Software training and tech | OKI Regional Council of Governments | 2 | 31 to 90 days | \$15,500 |
| Warren | Greenfield Place Storm Sewer Replacement | Installation of 1100 linear feet of 42-inch and 48-inch storm sewer to replace a failed storm sewer. The storm sewer failures have resulted in the formation of two large sinkholes in the residential subdivision of Greenfield Place. The intent of the storm sewer replacement is to eliminate the increased amount of sediment being carried to the downstream storm system. This increased amount of sediment has resulted directly from the sewer failure and the formation of the two associated sinkholes. Repair to the system will also eliminate the flooding of residential streets and homes and will eliminate the increased sedimentation within upstream storm sewers. As part of this project, a french drain system will be installed to alleviate standing water issues in the backyards of residents. This project addresses water quality concerns in addition to eliminating health and safety problems within this neighborhood. | CDM, Inc on behalf of the Deerfield Regional Storm | 10 | 91 to 180 days | \$354,180 |
| Warren | Design Company for Students | To start a design company which employs college students who are currently in college for design. This company would provide them the opportunity to work part time at full time, helping them pay for their education while utilizing the skills they are currently learning in school. Currently it is somewhat difficult for students to find prospective clients for freelance design work, because they are not well established yet as designers. Conversely, businesses who need design services but cannot afford an expensive design agency due to the weak economy, would be able to afford the services offered by this student-staffed company. | Ashley Halsey Design | 10 | 0 to 30 days | \$15,000 |
| Warren | Greentree Road Safety Improvements | Replace two bridge/culvert structures constructed in 1921. Reconstruct 2500-Lin. Ft two-lane roadway along a safer vertical and horizontal alignment with shoulders and guardrail. Add left turn lanes at two intersections. Three owners have agreed to donate the easement and/or right-of-way areas required for the project. No other easements are required. A significant increase in traffic volume is expected in 2010 when the Ohio Department of Transportation (ODOT) closes SR 122 for a number of months to construct their improvements to the 5-point intersection at Red Lion (including SR 122, SR 123, SR 741). Warren County plans to construct their Greentree Phase 1 Safety Improvements (\$800,000) in 2009 ahead of the ODOT Red Lion project but lacks sufficient funding to construct the Phase 2 improvements. Stimulus money would permit the County to bid Phase 2 concurrently with Phase 1. The cost estimate reflects Phase 1 (Warren County) + Phase 2 (Stimulus). | Warren County Engineer's Office | 15 | 91 to 180 days | \$1,500,000 |
| Warren | Woodfield Global Warming Drainage Problem Remediat | Install approximately 500 feet of sub-barrain 4" PVC drain piping along with 7.5 cubic feet of gravel. Drainage will be run underground to existing above ground street drainage. Purpose is to stop soil erosion from above ground runoff that is effectively removing approx. 200 lbs of topsoil per year. Run-off in neighborhood has worsened during the last 10 years due to the Global Warming induced heavy thunders. | Woodfield Drainage Association | 3 | 31 to 90 days | \$10,000 |
| Warren | staffing retention and increase | Project Co-Leader: Mrs. Tereasa Jennings (513) 683-9422 Retention / increase in staffing and equipment to produce an additional 75 to 100 units (at an average retail price point of 2,000 each). Company designs and manufactures costumes, competing chiefly with companies based in Ireland and Canada. | Kilkenny Creations Inc | 8 | 0 to 30 days | \$50,000 |
| Warren | Natrop Blvd/Duke Blvd Rehabilitation | Rehabilitate 1.25-mile segment of roadway including Natrop Blvd east of Mason-Montgomery Road and Duke Boulevard south of train-Simpson Road. Benefits: - Permits Timely Rehabilitation to Avoid More Extensive Rehabilitation Necessary Later if Project is deferred. - Maintains a functioning roadway corridor for existing employment centers. Some of the companies located along the Duke Blvd corridor: * Arden Insurance * Federated Claims Services * Harris Broadcast Communications * Macy's Credit and Consumer Services (MCCS, Inc.) * Proctor and Gamble Also, Deerfield Township owns 100 acres along Duke Blvd available as a site for corporate office development. This project along with the proposed Issue 2/Warren County project to add a northbound lane to Mason-Montgomery from Fields-Erlet to Natrop Blvd will provide an improved entryway to the proposed jobs site. | Warren County Engineer's Office | 200 | 91 to 180 days | \$1,200,000 |
| Warren | Mason-Montgomery Road Add Lane | Add a northbound lane along Mason-Montgomery Road from Fields-Erlet to Natrop Blvd (2640-Lin.Ft). Benefits: - Improved High way capacity for peak morning rush hour traffic from 171 to the employment corridor along Natrop/Duke Blvd. - Some of the companies located along the Duke Blvd corridor: * Arden Insurance * Federated Claims Services * Harris Broadcast Communications * Macy's Credit and Consumer Services (MCCS, Inc.) * Proctor and Gamble Also, Deerfield Township owns 100 acres along Duke Blvd available as a site for corporate office development. This project along with the proposed Issue 2/Warren County project to add a northbound lane to Mason-Montgomery from Fields-Erlet to Natrop Blvd will provide an improved entryway to the proposed jobs site. Please also note the companion project to this one submitted to www.recovery.oh.gov titled "Natrop Blvd/Duke Blvd Rehabilitation". | Warren County Engineer's Office | 200 | 91 to 180 days | \$719,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------|----------------|--------------------|---------------------------|
| Warren | Warren County Roadway and Guardrail Rehabilitation | Resurface 25.6 - miles of county roads. The speed limit along these roadways is 55-mph in accordance with Ohio Revised Code. The project will include spot repairs of guardrail including upgrade of barrier and treatments with impact barriers approved by FHWA for 55-mph speed. Benefits: - Preserve Existing Transportation System. - Permit Timely Rehabilitation to Avoid More Extensive Rehabilitation Necessary Later if Project is Deferred. - Improve travel safety with replacement of badly deteriorated guardrail sections. - Improve travel safety with the installation of new energy absorbing impact barriers on guardrail ends where feasible. Does not require easement/right-of-way acquisition or utility relocations. | Warren County Engineer's Office | 20 | 91 to 180 days | \$3,400,000 |
| Warren | Business Establishment and Expansion program for R | We need to expand our new business, Revolution logging. In order to do this, I need to purchase a new heavy duty truck, a wood chipper, and several new chainsaws, as well as pay for our current log splitter. Currently, there are 2 people employed by the company, which as of now is new and remains unincorporated. We would like to incorporate, and hire at least 2 additional loggers and office staff. I own 11,000 sq ft of office space for employees. | Revolution Logging | 2 | 0 to 30 days | \$50,000 |
| Warren | Intellograted Mason Office Expansion | Add additional parking lot space for 140 cars Replace superspan for 285-Ln. Fl., four-span bridge, two-lanes wide plus shoulders. BRIDGE IS CURRENTLY CLOSED. | Intellograted Systems, LLC | 100 | 0 to 30 days | \$750,000 |
| Warren | Wilmington Road Bridge Superspan Replacement | Environmental permits obtained from ODNR, OEPA, Army Corp of Engineer's Office. Coordination remains only with the National Parks Service. No additional right-of-way needed. | Warren County Engineer's Office | 10 | 91 to 180 days | \$900,000 |
| Warren | Fort Ancient Earthworks Erosion Repair | This project will make watershed infrastructure improvements to this National Historic Landmark as those practices' earthworks will be protected from destruction due to erosion. Uncontrolled stormwater runoff is cutting deep channels in the earthworks, creating an imminent danger of collapse. Previously installed collection structures have failed and require replacement. The project will repair damage to three of the more than thirty locations that are experiencing erosion. Improvements include the installation of silt basins, drainage lines, and rock channel protection enhancement. Construction is expected to take four months and will employ heavy equipment operators, truck drivers, landscapers, and laborers. | Ohio Historical Society | 6 | 31 to 90 days | \$100,000 |
| Warren | Energy efficiency projects | We would like to hire new personnel to help educate users of very large industrial gas users on how to improve their energy saving techniques into their processes. This will include installation and implementation of heat recovery systems to reduce the amount of energy gas emissions from manufacturing processes. This will also include services to help re-balance manufacturing processes to reduce wasted energy. We expect to help these users implement solutions to increase energy efficiency to reduce overall fuel usage by 10-20%. Some target facilities would include steel mills, chemical plants, automotive manufacturing plants, gypsum wallboard manufacturing plants, and many others. We currently manufacture large gas fired heating systems for these types of processes and know how to make existing systems more efficient. | Star Combustion Sytems LLC | 3 | 0 to 30 days | \$250,000 |
| Warren | economic boost | I would use the \$20,000 to pay off my credit card, student loan, and auto loan debt that totals to \$24,000. My expected outcome is to purchase an \$80,000 house in the near future. I am currently a college student working three jobs while my husband is a part-time law enforcement officer who only goes to work a few days a month. We are just starting out but can't get ahead. This would give us a great opportunity to get our dreams going while we stimulate the economy until I graduate from college to get a good paying job in the business industry and my husband departs searches for another police department to work for. | Individual | 0 | 91 to 180 days | \$20,000 |
| Warren | Fort Ancient Earthworks Roof Replacements | The Museum at Fort Ancient exhibits focus on 15,000 years of American Indian history in the Ohio Valley. The small roof over the lobby develops periodic leaks in differing locations, creating interior water damage. The maintenance and vehicle garage building has a leaking single ply of "rubber" roofing. It is over 20 years old well beyond its service life. Both roofs leak and need replacing. Scope of Work: - Replace the existing advanced EPDM roof of the shop building with a new modified bitumen roof. - Replace existing ballasted EPDM roof over the museum lobby with a modified bitumen roof. The new roofs will prevent leaks and interior damage, eliminate potential safety hazards due to a leaking roof, and will reduce maintenance costs. | Ohio Historical Society | 6 | 31 to 90 days | \$20,000 |
| Warren | Waste Water Treatment Controls | Energy Efficient Waste Water Controls and System Monitoring Including RF wireless monitoring of Pumps, Motors, Temperature, Flowing, Flaming Systems, Water Strainers and filtration. Add New expansion for Fabrication, Development, Testing, and engineering to our existing facility. create up to 12 new Jobs, ranging from electrical panel fabrication, Electrical CAD Designers, Controls and Process Engineers, and office personnel. | Innovative Controls Engineering | 12 | 0 to 30 days | \$1,750,000 |
| Warren | BOOST (Best Out-Of-School Time) | Provide quality out of school experience opportunities that focus on academics, youth development, and family - community connections by providing a safe environment for trained professionals to offer their services to the local community. I desire to help solve the problem of child labor. Since 2007 the company has been run by Madeline LaRocca after her husband's untimely death. Our goal is to provide the best designs to move parts from supplier to end user designed to last for years. This combined with the products 100% recycle rates is the wave of the future for packaging. Although a small business Specialty Packaging has a significant impact on employment in the reusable industry. We work with over 250 parts suppliers and in a 19 year history have done thousands of design projects. Our main supplier base consists of 10 to 12 companies and they rely on us to provide designs for them to manufacture. Their employment ranges from 25 to 200 workers. Without our design work a significant amount of these workers would be released. We request the money to be able to fund on going operational expenses. This will allow us to continue designing packages that save the automotive companies millions in packaging costs. | Private Business Proposal | 20 | 31 to 90 days | \$150,000 |
| Warren | Automotive Rescue 09 Returnable Packaging/Green Pr | City of Franklin - Franklin-Trenton Road (a.k.a. | Warren | Delivering food for the economically starved area | An opportunity to provide food to economically troubled areas a very affordable price for the consumer. PRODUCT DESCRIPTION: Most compressed gas cylinders in use today can be safely recycled to some degree. An exception has long been tanks containing acetylene, which make disposal problematic because they contain a solid, solvent-bearing core used to stabilize the gas. As a result, most tank owners are forced to landfill these tanks, presenting numerous liability risks and environmental disadvantages. A safe and practical process for recycling acetylene tanks, including those contaminated with acetone, was developed by Ohio based Cylinder Processors. The process not only allows for recycling of the scrap metal from these cylinders, it also salvages any residual acetone for reuse. Salvaging acetone means less acetone is released into the environment, reducing landfill volumes, and eliminates the potential for soil and groundwater contamination and subsequent human exposure to solvent emanating from landfills. EXPECTED OUTCOMES: This stimulus will allow purchase of needed TOOLING (Pumps, tanks, trucks, scales), 1,000 tons of scrap metal and 500 tons of acetone re claimed per year and kept from the landfill. Employment to increase 400% from the present. Waste transferred to energy! The construction of Park and Beaulieu Road (SR 73) from the intersection of SR 73 to the intersection of SR 73 is a major project. It is a long and dangerous site distance. This project would include regrading a section of Beaulieu and Park to make a significant improvement in the intersection. We bought our house in Sept. when the wind storm hit we needed a new roof put on, which we were going to do but a few weeks later my wife lost her job and I was out down to 4 days a week and 7 hours a day. There is no way we can fix our roof. There is some structure damage also. We don't know what to do with it help. We believe there may be some kind of mold problem also from these leaks. Thank You Becky Banks | Puppy Hut Catering | 10 | 31 to 90 days | \$125,000 |

| Warren | I-75/SR 122 Gateway Enhancements, Phase 1 | The I-75/SR 122 interchange will be updated with the next phase of the interstate widening project beginning later this spring. The City is developing gateway enhancements including corridor lighting, wayfinding signs, and landscape/architecture improvements to improve the City's main entrance point. | City of Middletown | 100 | 181 days or more | \$1,500,000 |
| Warren | College Education Funding | I was laid off of as an Enterprise Architect after 12 years of services. My position was outsourced to another company. Since my position was an executive level position, most comparable positions require a College Degree. I am unable to find employment due to this. I have 120 credit hours towards a B.S. in Management Information Systems and I would like to finish this. I am requesting funding for 2 years of school and child care for my 3 children to finish my degree to be competitive in the Ohio technical economy. To create an initial engineering project to produce proprietary machinery for commercial health care distribution. This is a new project, developing new product and would initially employ 1-3 high-tech individuals earning up to 10-20 within 1-2 years. The long term outcome from this initial project will be a stable engineering company that would compete with health care equipment manufacturing companies across the country. | N/A | 1 | 31 to 90 days | \$56,800 |
| Warren | Project HC | | RMGE | 10 | 31 to 90 days | \$4,500,000 |
| Warren | Tools for 21st Century Learning | Provide classroom Schofield replacement computers and Audio/Video systems that enhance the classroom/instructional experience by providing instruction that connects with K-12 students on many different levels needed for the 21st Century learner. | Mason City Schools | 8 | 91 to 180 days | \$4,261,400 |
| Warren | Computer Monitor Energy Savings Plan | Provide replacement of older non-energy compliant classroom monitors with newer energy efficient computer monitors. | Mason City Schools | 4 | 91 to 180 days | \$1,000,000 |
| Warren | Fire Engine Replacement | This is for the replacement of a 30 year old 1979 Seagraves Fire Engine that does not pass the pump test. We are asking for a 50% match of funds to replace this Engine with a New 1500 Gallon Per Minute Engine. Due to lack of funds, this engine may not get replaced until 2011 or 2012. With the stimulus money, we would be able to move this project up for immediate replacement. | Wayne Township | 10 | 91 to 180 days | \$225,000 |
| Warren | New Fire Station Construction | This is for the replacement of a 60 year old fire station. The new station would replace a facility that doesn't meet the Fire Department or community needs. The building of a new station would involve employment from all fields of construction industry including planning and design. The local entity is willing and capable of matching 25% of the cost of this project. | Wayne Township | 100 | 31 to 90 days | \$2,500,000 |
| Warren | Hiring additional staff | We wish to expand our sales force in order to take advantage of upcoming market opportunities. Upon receiving our stimulus grant, we can immediately hire 3 full time employees. Stimulus money will be used to pay base salary of new hires. The newly hired will earn bonuses paid based on production. We expect the new hires to become long term employees of our firm. | Bull Group Advisors, LTD | 3 | 0 to 30 days | \$100,000 |
| Warren | Updating Facilities at Bicentennial Park | To make community park upgrades as follows: 1. Resurface four tennis courts. 2. Resurface two basketball courts. 3. Refinish Amphitheater Band Shell 4. Refinish one picnic shelter and 12 tables. | Wayne Township | 10 | 31 to 90 days | \$55,000 |
| Warren | Village of SanMarGale (South Wastewater Treatment) | The proposed San Mar Gale development is located in Turtle Creek Township, Warren County, Ohio, totaling 3372 lots on approximately 3,320 acres. The San Mar Gale development located in Turtle Creek Township, Warren County has received an approved Permit to Install (PTI) from the Ohio Department of Public Safety and is a 20,000 GPD Water Reclamation Facility and Land Applied in accordance to the approved final application permit. Wastewater generated from the community will be treated, stored, and then used to irrigate surrounding green space. The wastewater treated at the Turtle Creek Water Reclamation Facility will discharge into 22.3 MGAL irrigation impoundment and then land applied on the projects common green space. Supplement the irrigation water on the project. The Land Application Management Plan and design of the Turtle Creek Water Reclamation Facility are consistent with the Ohio EPA's Rule 234-43-134 Land Application Systems. The 491 acres of irrigation area provided are green spaces, active recreational areas, and natural buffers adjacent to the proposed roadways that will provide a buffer with the surrounding single family development. | SanMarGale Community Development Authority | 5,000 | 91 to 180 days | \$7,000,000 |
| Warren | LECI Window Replacement | At the Lebanon Correctional Institution, replace remaining cell windows in north side cell blocks. The windows are approximately 10 years of use. They are 45+ years old and are single paneled without weather seals and do not meet energy standards. Windows are to be replaced with energy efficient energy efficiency and energy conservation. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$3,112,419 |

| Warren | Start Up | This would be to help the start up of a business called Star Beta that strives to create all natural organic products. The products will not contain ingredients that harm the environment and will be packaged in recycled materials or in materials that can be recycled to help with Green initiatives. The startup will also help to create jobs as well as the company starts up and grows. | Star Bella | 10 | 31 to 90 days | \$30,000 |
| Warren | THE ZELLERS HOUSE | CURRENTLY I HAVE FOUR PEOPLE IN MY HOME AND I AM IN NEED OF FUNDS TO EXPAND THE HOME. I AM OUT OF WORK AND AM ON UNEMPLOYMENT. THESE FUNDS WILL BE PUT TO GOOD USE. | ZELLERS FAMILY | 2 | 0 to 30 days | \$12,000 |
| Warren | The Green Family | I am in need of money to buy a house with another bedroom. I currently live in a two bedroom with two kids. I would also like to go back to school but need to pay off some bills for halfway into school. | single mom needs help | 2 | 31 to 90 days | \$15,000 |
| Warren | FOUNDATION REPAIR | Have major foundation work that needs to be done to my house. I can't refinance because my house is no longer worth what I paid for. My job also cut my hours so work due to the economy and I can't enough to make ends meet as a single mom. I am scared that this could make me another foreclosure victim. I don't get help to repair the problem. I have had several estimates all are 30,000 dollars. My whole house is sinking and I need help to repair. I have very good credit and would appreciate any available help that is given to prevent that from happening. | OLSHAN | 5 | 31 to 90 days | \$30,000 |
| Warren | water-borne refinish facility | Funds needed to expand current facility to house the new water-borne refinish booth and then rework the lot. | waynesville body shop | 6 | 31 to 90 days | \$750,000 |
| Warren | waynesville car wash resurfacing project | The facility is a self serve car wash and it is in need of new concrete floors and new paving around the exterior of the facility. The floor in the car wash also needs to be replaced for several areas which will increase the cost of the repairs. | waynesville car wash | 2 | 31 to 90 days | \$200,000 |
| Warren | Zoar Road/Stephens Intersection Improvements | Widen 2500-Ln. P segment of Zoar Road to add a northbound left turn lane at Stephens Road and also a northbound left turn lane proposed entrance to the Little Miami School District, Grade 6 site (new school currently under construction), lower roadway profile just north of Stephens Road to improve sight distance, widen 1600-Ln. S. Stephens Road from 16' pavement width/shoulders to 24' pavement width/6' shoulders. Benefits: - Improves traffic safety. There is an accident history at the Stevens and Zoar intersection. Poor sight distance looking north from Stephens Road is a contributing factor and will be addressed with this project. - Improves traffic safety. The need for increased pavement and shoulder width is critical to permit school bus traffic to safely utilize Zoar and Stephens Roads. Construction drawings are complete. | Warren County Engineer's Office | 15 | 91 to 180 days | \$600,000 |
| Warren | Business Expansion | Regarding new logging business. Need to hire 2 loggers plus logging staff. purchase additional logging equipment. Need money asap so that we can harvest the wood in time to get it prepared for sale this coming fall. | Revolution Logging, Inc. | 6 | 0 to 30 days | \$100,000 |
| Warren | Finishing a basement | My wife and I have 3 kids. We have a 14 year old daughter and 11 month old twin girls. We currently have a three bedroom house with a basement. We would like to finish the basement so every child will get their own room. The twins would each get their own room upstairs and the 14 year old would get a room down in the basement. I would like sell the house and get a 4 bedroom house but the current state of the economy prevents us from doing this. Plus we like the location we live in. My wife recently hurt her back with a herniated disk and she is unable to play with the kids. With a finished basement we could buy fitness equipment so she can strengthen her back. These economic stimulus funds would provide work to local contractors who need things to do. The current state of the economy is hurting the housing industry. I would provide jobs to drywallers, painters, flooring and trim people, plumbers, etc. if my basement was to be finished. I look forward to explaining more if needed. Thanks | Representing Myself | 12 | 0 to 30 days | \$10,000 |
| Warren | WAR Capitalized Maintenance; PID 86117 | Just Capitalized Maintenance. This is a cost travel project whose funding comes through ODOT. Construct retaining wall to clear line of sight for motorist entering Foster-Maineville Road from Butterworth Road, construct a right-turn lane for eastbound Foster-Maineville Road to southbound Butterworth Road traffic. Add shoulders in the intersection area. | Ohio Department of Transportation | 3 | 0 to 30 days | \$115,394 |
| Warren | Foster-Maineville/Butterworth Intersection Improve | Benefits: - Improves traffic safety. There is an accident history at this intersection. Inadequate pavement width and poor sight distance are contributing factors to the above average accident rate at this intersection. Construction drawings are nearly complete. | Warren County Engineer's Office | 15 | 181 days or more | \$800,000 |
| Warren | Liberty-Kueter Retaining Walls | Construct retaining walls as needed to support roadway slip areas in the northbound lane of Liberty-Kueter Road between SR 123 and Wilmington Road. Benefits: - Improves traffic safety. Pavement cross-slope compromised. Guardrail leaning away from roadway. - Preserves the existing roadway network. | Warren County Engineer's Office | 15 | 181 days or more | \$800,000 |
| Warren | Stephens Road Improvements | Construct base repairs as needed (eastbound lane, 5000' total east of SR-48, widen roadway for two full lanes minimum near the Little Miami School District, Grade 6 school building currently under construction (1600-Ln. P), resurface (1.75 mile x 24 ft) Stephens Road between SR 48 and Zoar Road. Benefits: - Improves traffic safety. A 600-foot segment of roadway immediately adjacent to a new school scheduled to open in August 2009 is only 1.5-lanes wide. Two school buses cannot pass simultaneously. This requested project will include pavement widening necessary for two to three lanes pavement width. - Improves traffic mobility. - Preserves the existing roadway network. | Warren County Engineer's Office | 15 | 91 to 180 days | \$1,200,000 |
| Warren | PROJECT HOPE | The Warren County Engineer submitting on behalf of Hamilton Township, Warren County. PROJECT WOULD BUILD A NEW PERKINS FAMILY RESTAURANT AND BAKERY IN MONROE, OHIO. THIS AREA COULD REALLY USE A SHOT IN THE ARM. THERE IS A GREAT NEED FOR THIS FAMILY TYPE RESTAURANT. THE OLD PERKINS IN MONROE CLOSED DOWN ABOUT 3 YEARS AGO. AFTER A LONG SUCCESSFUL RUN, IT FELL VICTIM TO THE DEPRESSIONED ECONOMY. THIS RESTAURANT CLOSING COST THE CITY OF MONROE AROUND 40 FULL TIME JOBS AS WELL AS ALL THE TAX BASE. I REALLY BELIEVE FINDING A NEW PERKINS RESTAURANT NOT ONLY TO ALL THE EMPLOYEES WE WOULD HIRE BUT BENEFIT MONROE AND THE SURROUNDING CITIES, MIDDLETOWN, HT HARD AS WELL. I AM A VERY EXPERIENCED RESTAURANT MANAGER, I HAVE OPENED 40 YEARS IN THE RESTAURANT FIELD WITH 30 OF THOSE YEARS BEING WITH PERKINS. I WOULD BE THE OWNER, OPERATOR I LOOK FORWARD TO THE OPPORTUNITY TO DO MY PART TO HELP ALL THOSE LIVES WE WOULD TOUCH BY OPENING THIS NEW RESTAURANT AND BE A PILLAR OF THE COMMUNITY. I LIVE IN LEBANON, APPROX 10 MINUTE DRIVE AWAY. LOOK FORWARD TO HEARING FROM YOU SOON. SINCERELY, JAMES HAMMERLING | Food Service | 45 | 91 to 180 days | \$4,000,000 |
| Warren | Feeding our community | This money would be used to help fund the need for emergency money and food for the community. We serve approximately 300 people per month. There is no cost to the program except to buy the food for the families. We serve families that are biweekly class that do not receive funding thru the state due to being over income. All of our families work or just lost their jobs. | Springboro Community Assistance Center | 5 | 0 to 30 days | \$12,000 |

| Warren | Fields-Ertel Road/Columbia Road Intersection Impro | Construct a new left turn lane eastbound and westbound Fields-Ertel Road at Columbia Road. left turn lanes southbound Columbia and northbound Johnson Roads. Roadway resurfaced at the intersection to improve drainage. The current level of service is falling during peak hour periods. Roadway plans are complete. The cost estimate includes \$1,700,000 (construction) + \$300,000 (right-of-way) + \$200,000 (design and right-of-way acquisition). Benefits: - Improve traffic mobility/relieve congestion. | Warren County Engineer's Office | 15 | 181 days or more | \$2,000,000 |
| Warren | Sociaville-Foster/Columbia Road Intersection Impr | Construct a new left turn lane eastbound and westbound Sociaville-Foster Road at Columbia Road. The current level of service is falling during peak hour periods. Roadway plans are complete. Electrical relocations planned for spring/summer of 2009. The cost estimate includes \$750,000 (construction) + \$150,000 (Construction design + Utility relocations). | Warren County Engineer's Office | 15 | 181 days or more | \$750,000 |
| Warren | Franklin Township Local Road Reconstruction | Rebuild a total of 0.28 miles of roadway originally constructed in the 1950's to a total roadway width of 10' - 12' (one lane road) to a standard at least equal to the AASHTO-recommended minimum roadway width for roadways less than 400 ADT (18). Cost estimate includes \$450,000 construction + \$50,000 design. Includes the following roadways: Locust 0.08 mile, 12' roadway width currently Paul Ln. 0.06 mile, 10' roadway width currently Trench Dr. 0.08 mile, 10' roadway width currently Wallace Ln. 0.10 mile, 12' roadway width currently | Warren County Engineer's Office | 15 | 181 days or more | \$450,000 |
| Warren | Franklin Township Chamberland Road Rehabilitation | Rebuild a total of 0.28 miles of roadway originally constructed in the 1950's to a total roadway width of 10' - 12' (one lane road) to a standard at least equal to the AASHTO-recommended minimum roadway width for roadways less than 400 ADT (18). Cost estimate includes \$450,000 construction + \$50,000 design. Warren County Engineer serving as project manager on behalf of Franklin Township. | Warren County Engineer's Office | 15 | 181 days or more | \$450,000 |
| Warren | Franklin Township Chamberland Road Rehabilitation | Remove and replace an existing bridge/culvert; culvert improvements to include increasing shoulder widths and installing new guardrail and drainage treatments. Resurface Chamberland Road (1.15 mile x 24'). Warren County Engineer serving as project manager on behalf of Franklin Township. Resurface Franklin-Trench Road (1.69 mile x 20'). Resurface Chandler Road (0.82 mile x 21'). Resurface Park Travers Trail (1.08 mile x 8'). Resurface Woodhall Cemetery Roads (1.08 mile x 12'). Warren County Engineer serving as project manager on behalf of Franklin Township. | Warren County Engineer's Office | 15 | 181 days or more | \$680,000 |
| Warren | Franklin Township (Warren County) Resurfacing | The improvements to the Service Department Facility would include the construction an additional salt storage area, additional office space and expanded storage facilities. This project would provide modifications to the Wet Well at Wastewater Treatment Plant. The wet well would be replaced to provide improved hydraulics through the plant. | Warren County Engineer's Office | 15 | 91 to 180 days | \$900,000 |
| Warren | Service Department Improvements | Improve the existing effluent channel to provide space for Hydrocort Treatment Plant. | City of Springboro | 15 | 91 to 180 days | \$350,000 |
| Warren | Wet Well Modification at Wastewater Treatment Plant | Customer storm basins along various streets where erosion is beginning to become a serious problem. | City of Springboro | 25 | 181 days or more | \$750,000 |
| Warren | Effluent Flow Modification at Waste Water Treatment | Install two bio swales and two rain gardens within two city parks. | City of Springboro | 4 | 91 to 180 days | \$30,000 |
| Warren | Stream Bank Restoration | Extend a 12" sanitary sewer to eliminate the Creekside Lift Station. | City of Springboro | 10 | 181 days or more | \$200,000 |
| Warren | Bio Swales and Rain Garden | Install emergency generators at various lift stations throughout the City and provide upgrades for these lift stations. | City of Springboro | 5 | 0 to 30 days | \$100,000 |
| Warren | Creekside Lift Station Elimination Project | Install a 10" ductile iron water main on Heaton Dr. from Renwood Place to Stillwater Court to keep a main and provide for better fire flow protection in the area. | City of Springboro | 9 | 181 days or more | \$180,000 |
| Warren | Emergency Generators Installation | Install a 12" ductile iron water main and appurtenances along Factory Road from Market St. to Lower Springboro Road. This will complete a loop in the water system. | City of Springboro | 10 | 91 to 180 days | \$200,000 |
| Warren | Heston Dr. Water Main | Install a 6" ductile iron water main on Tamarack Trail and Renwood Place from Basil Pl. to Alleppe. Completes water main loop in area. | City of Springboro | 7 | 91 to 180 days | \$125,000 |
| Warren | Factory Road Water Main | Install a 10" Ductile Iron Water Main on Penroyal Road from Deer Trail Drive to State Route 741. This project will resurface Lytle Five Points Road from State Route 741 to 125 feet west of Spanglers Springs Drive. The project will include grinding, base repair, a SAMI interface layer, intermediate course, final course and pavement markings. | City of Springboro | 15 | 91 to 180 days | \$600,000 |
| Warren | Tamarack - Renwood Water Main | This project will resurface Clearcreek Franklin Road from 160 feet south of Whispering Pines to Penroyal Road. The project will include grinding, base repair, a SAMI interface layer, intermediate course, final course and pavement markings. Current storm sewer systems in Deerfield Township are open ditches and require planned retention basin structures to mitigate erosion concerns. I would like to work with Warren County Engineers to develop a plan for our subdivision to remediate our storm sewer system into a safer, more uniformly closed system that could serve as a model for similar subdivision efforts around Warren county. The dollars estimated in the request would be only for a proposal study and the actual engineering work by Warren County would have to be submitted as a separate request through the Warren County Engineer. | City of Springboro | 9 | 91 to 180 days | \$175,000 |
| Warren | Pennyroyal Water Main | Replace existing signal heads and pedestrian heads with new LED fixtures at various intersections on State Route 73 and State Route 741. Install battery backup systems at these intersections. | City of Springboro | 10 | 31 to 90 days | \$200,000 |
| Warren | Lytle Five Points Road Resurfacing | City of Springboro | 15 | 181 days or more | \$300,000 | |
| Warren | Clearcreek Franklin Road Resurfacing | Homeowner | 8 | 31 to 90 days | \$160,000 | |
| Warren | Warren County Storm Sewer Remediation | Warren County Engineer | 2 | 91 to 180 days | \$150,000 | |
| Warren | Various Signal Head Retro Fit and Battery Backup I | City of Springboro | 15 | 31 to 90 days | \$300,000 | |
| Warren | Nursing Degree | The Ryan Family | 1 | 31 to 90 days | \$20,000 | |
| Warren | Clearcreek - Franklin Road Resurfacing | City of Springboro | 6 | 91 to 180 days | \$185,900 | |
| Warren | Lytle Five Pts. Road Resurfacing | City of Springboro | 10 | 91 to 180 days | \$330,000 | |
| Warren | Lytle Five Pts. Road Resurfacing | City of Springboro | 10 | 91 to 180 days | \$330,000 | |
| Warren | Lytle Five Pts. Road Resurfacing | City of Springboro | 10 | 91 to 180 days | \$330,000 | |
| Warren | Traffic Signal Improvements, SR 73 & SR 741 | City of Springboro | 10 | 91 to 180 days | \$330,000 | |
| Warren | Springboro Vision Center Expansion | Springboro Vision Center | 4 | 0 to 30 days | \$250,000 | |
| Warren | Housing & work opportunities for south west Ohio | Jonas Homes Inc. | 90 | 0 to 30 days | \$650,000 | |
| Warren | Police Dog Training | Police Dog Services, LLC | 3 | 0 to 30 days | \$787,900 | |
| Warren | Lowering Baker Energy Bills | Baker Family | 15 | 0 to 30 days | \$25,000 | |
| Warren | West Mackinaw Sanitary Sewer Lining | City of Franklin | 10 | 31 to 90 days | \$398,500 | |
| Warren | Commerce Center Drive Sanitary Sewer Extension | City of Franklin | 500 | 31 to 90 days | \$182,000 | |
| Warren | Water Treatment Plant Generator | City of Franklin | 5 | 31 to 90 days | \$200,000 | |
| Warren | Springboro Library Expansion and Renovation | Franklin-Springboro Public Library | 120 | 91 to 180 days | \$3,500,000 | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Warren | Bauer Roofing Recovery | Repair and rehang of leaking roof. Environmental Benefit: Roofing is over 20 years and may contain Asbestos. Further Environmental Benefit: Elimination of leaks will allow replacement of roof insulation furthering efficiency of cooling/heating thus saving energy. Employment Benefit: Maintain employment of local Roofers and Roofing contractors. Economic Benefit: use of local Roofing suppliers. | Bauer Housing Trust | 10 | 31 to 90 days | \$6,000 |
| Warren | Utility Reduction Program | My suggestion is that the state implement individual citizens in their efforts to keep their home or business utility costs and impact on the environment to a minimum. I have looked at using solar panels to help offset my utility bills, and I have an alternate source of minimal power when the electricity is out. The state should provide, and doing what is necessary is continuing. I have the state stimulus program and offered assistance in the form of a reduction in cost and a list of qualified contractors. I could help people in our state. I expect the bulk of the cost myself, but finding someone I can trust to do the work makes me nervous. Many people are ripped off by incompetent contractors, and with the rates so high for the necessary hardware and solar units, I cannot take chances that it will not be installed properly. I have seen not only one who would use such a program. It could also add jobs in a sector that has been hurting badly. I don't know how many jobs or how much \$\$ to allocate, nor do I think it should only exist in our state, but your form expressed choice, not I think in the blanks as best I could. Thank you. This project involves bringing the new well #1 online in the existing well field of the Village of Morrow, Ohio and combining the old and antiquated treatment facilities into one building that will treat the raw water from all three wells instead of each having its own individual treatment and filtration process. | One needs to be treated for this program | 300 | 31 to 90 days | \$2,000,000 |
| Warren | Water Treatment Plant Upgrade | This project involves approximately 6000 linear feet of 8 inch ductile iron water line from SR 123 and Salem Road to blackhawk road. there will be a new sewer sewer system, curb and gutter and a 1000 linear feet of reconstructed street with asphalt overlay. | Village of Morrow, Ohio | 20 | 0 to 30 days | \$1,500,000 |
| Warren | Blackhawk Road Water Line Loop and Replacement | The project involves the replacement of a deteriorated 75,000 gallon above ground water storage tower with a new 125,000 gallon water tower to serve the eastern portion of the water system. The Village has experienced numerous hazardous issues with the existing water tower and needs to replace as soon as possible. | Village of Morrow | 30 | 0 to 30 days | \$613,000 |
| Warren | Water Tower Replacement Project | This project involves the replacement of old transte and undersized waterline that will be replacing various 2", 4" and 6" with 8" ductile iron water line with necessary hydrants and valves. | Village of Morrow, Ohio | 20 | 0 to 30 days | \$750,000 |
| Warren | Route 22-3 Rochester Area Waterline Replacement | I am an unemployed construction worker I wish to start my own property maintenance and handyman service for my surrounding community. I have over 25 years of trade experience. I would like to give something back to my community by beautification and employing and teaching a trade to young people a responsible adult. | Village of Morrow, Ohio | 20 | 0 to 30 days | \$405,000 |
| Warren | Property Maintenance & Handyman Services | to retain workers in southern Ohio who have lost manufacturing jobs by offering nurse aid training as well as licensed practical nurses they can enter the health care field, which has growing shortages in these areas. | Property Maintenance Services | 5 | 91 to 180 days | \$100,000 |
| Warren | Factory to Healthcare | The complete rehabilitation of Main Street along the Little Miami River and Soenic Bikeway. This project will eliminate the possibility as well provide a new storm sewer system, curb and gutter and a 1000 linear feet of reconstructed street with asphalt overlay. | Learning to Care Healthcare Training | 400 | 31 to 90 days | \$400,000 |
| Warren | Main Street Rehabilitation Project | The Main St Project involves performing preventive maintenance on residential A/C commercial A/C and other systems as well as "hauling" home/business on owner what they can do between annual tune-ups to keep their systems running efficiently, efficiency operating systems and less energy. Plans are in place to install smart and smart energy that can make connections to smart meters that can affordably (low sweeps, insulation, window coverings, weather stripping, correct dryer vent and use of CFL's. We have been permitted to review past and have 12 month utility bills to quantify results. Business owners would take what they learned and take them and residents will take what they learn to work with them. The main idea is to teach that efficiency is cheaper than fuel. | Village of Morrow Ohio | 20 | 31 to 90 days | \$230,000 |
| Warren | Energy Savings through Efficient | Things are tight for everyone, but these are baby-steps that if all American households and business implemented preventive maintenance the results would be dramatic. This program can be done in so many communities and make a difference that is affordable to almost all. We will recycle" reclaimed refrigerators, returning to it's purest state for reuse. | In House Services | 6 | 0 to 30 days | \$366,000 |
| Warren | Photo, PC and Hobby Education Center | Pinobobbies is a photo studio, PC and hobby center where young and old alike can have fun while learning. | Pinobobbies | 10 | 31 to 90 days | \$200,000 |
| Warren | Plainview Acres Sanitary Sewer Improvements | Project is ready for immediate construction of 8,400 feet of 8 inch sanitary sewer to serve 73 existing single family homes with failing or faulty onsite sewage treatment systems. Project includes construction of a neighborhood with failing septic systems. Engineering drawings are prepared, permits are obtained and the project was set by Warren County 2003. At that time, construction bids exceeded the engineer's estimate and the local residents could not afford the project cost. Funding for this project will improve the quality of life for local residents, reduce surface water pollution, and provide jobs for local contractors. | Warren County Water and Sewer Department | 20 | 0 to 30 days | \$1,450,000 |
| Warren | Lower Little Miami WWTP Phase III Upgrades | Major construction project for wastewater treatment plant improvements increasing the capacity from 7.28 million gallons per day to 12.0 million gallons per day. Design is completed and project is ready for construction. County Officials are contemplating delaying the construction of the improvements until economic conditions improve and the number of sewer connection fees (the primary revenue for payment of the improvements) increases. Without delaying the County will be forced to significantly raise sewer rates to finance the improvements, thus creating an additional economic hardship on local residents. Improvements will provide treatment capacity for the 20 year planning period and advanced treatment including phosphorus removal and ultraviolet disinfection. These improvements are necessary for future commercial, industrial, and residential growth. The existing treatment plant is at 90% capacity and has limited capacity for future growth. Without these improvements the County will continue restoring future sewer connections and eventually cease issuing future sewer connections within the next 2-3 years. | Warren County Water and Sewer Department | 200 | 0 to 30 days | \$36,000,000 |
| Warren | Valve Replacement Project | Most of the valves within the water system are extremely old and many have never been exercised. Each time the village has gone to use the older valves they end up snapping and needing replaced. There are approximately forty valves within the system that need to be replaced. | Village of Morrow, Ohio | 20 | 0 to 30 days | \$50,000 |
| Warren | Greentree Road Water Main Extension | Install 2,200 feet of new water main along Greentree Road. The area is zoned commercial/industrial but does not have water service. | City of Monroe | 270 | 91 to 180 days | \$190,000 |
| Warren | SCADA and security system for water system | The Village water system has no means to call out operators if there is a power outage and pumps down. And we also have inadequate fencing and lighting at the towers and the well field. | Village of Waynesville | 5 | 0 to 30 days | \$79,000 |
| Warren | Painting Water Towers | In 2006 the Village had our 2 water towers inspected by Utility Service Co. and they recommended where that also have the towers painted inside out to prevent and corrosion from occurring. | Village of Waynesville | 7 | 0 to 30 days | \$126,400 |
| Warren | Lebanon Public Library Park Program | The Lebanon Public Library will begin the development of a library owned park for public use on land adjacent to the Library. The property has already been acquired and reserved in preparation for the construction project. An architect has developed a plan for the park which will be reviewed by the Lebanon City Planning Commission in April. | Lebanon Public Library | 35 | 91 to 180 days | \$350,000 |
| Warren | Automatic Meter Readers | The 11,000 square foot park will feature a 34' x 20' pavilion, tables and seating, free wireless Internet access, handicapped accessibility and professionally designed landscaping. The Library and planned park are located in the central business district. Currently, no other in the downtown area is handicapped accessible. | Village of Waynesville | 10 | 31 to 90 days | \$197,500 |
| Warren | Lindemann Lane Emergency Storm Sewer System Replac | The Village of Waynesville has 1645 water service connection which most of the meters are a least 20 years old. The Village would like to update those meters and thus give the customer better service. | City of Mason, Ohio | 5 | 0 to 30 days | \$125,000 |
| Warren | Bethany Road Sewer/Parkside Lift Station Eliminat | EMERGENCY REPAIRS OF COLLAPSED & AGING STORM SYSTEM TO PREVENT AREA FLOODING ISSUES. | City of Mason, Ohio | 4 | 181 days or more | \$400,000 |
| Warren | Main St., Forest St., First St. Storm and Sewer Re | Provides for gravity wastewater flow from Parkside district, which will significantly conserve energy now being expended for pumping and maintenance. | City of Mason, Ohio | 10 | 91 to 180 days | \$1,165,000 |
| Warren | Rehabilitate Concrete Walkways on WRP Oxidation Di | REPLACES FAILING STORM PIPE, CORRECT SEWER FLOODING AND BASEMENT FLOODING. | City of Mason, Ohio | 3 | 181 days or more | \$250,000 |
| Warren | Rehabilitate Beach Lift Station | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 2 | 181 days or more | \$200,000 |
| Warren | Provide Storage/Transmission of Treated Wastewater | Provides long term wastewater relief to important local business and future commercial development. | City of Mason, Ohio | 5 | 181 days or more | \$500,000 |
| Warren | Construct Tertiary Treatment Facility for Mason WR | Eliminate need for purchase and use of drinking water for irrigation, significantly reducing overall energy usage. | City of Mason, Ohio | 10 | 181 days or more | \$1,200,000 |
| Warren | US 42 North Trunk Sewer Reconstruction - Phase 3 | Significantly increases City's ability to supply plant effluent for re-use as irrigation water. | City of Mason, Ohio | 20 | 181 days or more | \$1,425,000 |
| Warren | Hoff Run Flood Improvements (Eagle View Drive & Th | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$500,000 |
| Warren | Indianwood Drive, Seneca Dr., Cherokee Dr. Storm | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$265,000 |
| Warren | Church Street & Forest Avenue Storm Sewer System R | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$186,000 |
| Warren | Southwind Drive & Winsong Court Storm Sewer Syste | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$85,000 |
| Warren | US 42 North Trunk Sewer Reconstruction - Phase 3 | Completes multi-phase reconstruction of City's major trunk sewer, to significantly reduce maintenance and conserve energy use. | City of Mason, Ohio | 20 | 181 days or more | \$1,425,000 |
| Warren | Indianwood Drive, Seneca Dr., Cherokee Dr. Storm | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$265,000 |
| Warren | Church Street & Forest Avenue Storm Sewer System R | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$186,000 |
| Warren | Southwind Drive & Winsong Court Storm Sewer Syste | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$85,000 |
| Warren | Hoff Run Flood Improvements (Eagle View Drive & Th | REPLACES AGING STORM SYSTEM & ELIMINATES AREA FLOODING ISSUES. | City of Mason, Ohio | 5 | 181 days or more | \$500,000 |
| Warren | Water Treatment Plant Improvements | Project includes multiple repairs, replacements and upgrades to the existing treatment plant. These improvements include a installing a new SCADA system to help monitor and operate the plant. In addition, filters, softeners, pumps, and control valves need repair or replacement. The original 1000hp 480 V main control center will also be replaced. This project is necessary to provide an adequate supply of safe water for residential, commercial, and industrial development. | City of Monroe | 2500 | 31 to 90 days | \$900,000 |
| Warren | Solar Energy (Mega Generating Site) | ODOT (on-site) approx. \$5 acres that are adjacent to the SR 171 Rest Area whereby a solar mega generating station can potentially be considered. This is a project that could be benefited in a few ways. We could generate the Rest Area's and avoid additional power to a local power grid. Or, all of the power could be fed into the local power grid and we could receive revenue to support transportation projects relative to energy and environmental throughout the agency. With a being alternative energy we could as well as the local electrical supply company (Duke Energy) also receive credits for the carbon footprint reduction which complies with Gov. Strickland's Exec. Order. This project could potentially stimulate jobs in one or more of the nine existing solar manufacturing companies here in Ohio. We could get people to work in the manufacturing, transporting, construction, operation and maintenance of such facility. This would help to Grow Ohio and benefit many people who not only live but several through this Great State of Ohio. | ODOT | 25 | 181 days or more | \$4,000,000 |
| Warren | Foster-Maineville Waterline | Construction of 1,800 feet of 12-inch ductile iron waterline to provide a second feed to the neighboring Village on the Green housing development. Design plans are completed and the project is ready for construction. | Warren County Water and Sewer Department | 4 | 0 to 30 days | \$160,000 |
| Warren | Grandin Ridge Waterline | Construction of 800 feet of 12-inch ductile iron waterlines to improve reliability to customers through a second service feed. Engineering design is complete and project is ready for immediate construction. | Warren County Water and Sewer Department | 4 | 0 to 30 days | \$70 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------|----------------|--------------------|---------------------------|
| Warren | Affordable Personal and Home Security Items | This is to be able to open more than one store front to make personal and home security items available to the general public at a very affordable price. Everything from DVR Cam systems for home and businesses, Sun guns to local stores that are in high crime areas as well as the normal person walking the street day or night. Many items that anyone can use such as Pepper Sprays etc. There is a very large need for these types of items and businesses. I have been dealing in these items on a door to door type basis for a while and do think I had some items I could give many Employment Opportunities as the business would expand. The business would expand everything from store store fronts, to employee salary, supplies, insurance, advertising and other expenses to start up a business such as this. | Superior Ventures Inc. | 20 | 91 to 180 days | \$45,000 |
| Warren | One-to-One Education Technology | Purchase 700 laptops from an Ohio based company to provide wireless technology access to all students in grades 11 and 12 at the Warren County Career Center. This will allow us to integrate all academic and career technical curricula with project based learning lessons. Project requirements include an upgrade to our existing wireless infrastructure and ongoing professional development for staff outside the American Competes Act. With this project our students will be college ready as well as ready to enter the workforce. Statistics show that One-to-One technology increases attendance, improves behavior, and increases student achievement. | Warren County Career Center | 100 | 0 to 30 days | \$500,000 |
| Warren | WCCC School Building Renovation | This project is designed to be a complete renovation of the Warren County Career Center's existing 35-year old school building. The renovation will result in a modern and energy efficient and energy saving building which will continue to be used to provide career and technical education programming to both high school and adult students. It is the major part of our master facilities plan for our district and will allow us to provide state-of-the-art energy efficient technologies and to upgrade the overall infrastructure of the building including the suppression, HVAC, and electrical and plumbing systems so that we are not only saving energy but also training students in these new technologies. Our district has already been accredited by CDEE for their local expanded partnership/PLP program. The renovation will also result in the building being ADA compliant and earning the silver LEED certification. The redesign of the existing space will be completed so that CTE labs and academic classrooms meet are energy efficient. | Warren County Career Center | 60 | 31 to 90 days | \$32,000,000 |
| Warren | Disc Jockey Services | With this funding, I would be able to purchase speaker subs, speaker cables, power amps, music, lighting, lighting panels, lighting tubes, CD-players, turn tables, microphones, boom stands for the microphones, soundboard, compacted mixing software, computers, power cables, power strips, stage boxes to transport equipment, and a trailer to transport all of the equipment noted previously. | Myself | 1 | 0 to 30 days | \$30,000 |
| Warren | Uniform and Delivery Company, Clean Fuels Ohio Par | 10 electric walk-in vans and did not have such harmful effects on the environment. Even pessimistic estimates put the total efficiency of electrolysis at 30%-40%. The result of electrolysis is to break water into its constituent components oxygen and hydrogen. These components can be used as a fuel source for internal combustion engines. The challenge is how to store this explosive mixture. If these gases can be produced on demand and immediately consumed by the engine the need for any significant storage is dramatically reduced. | Clean Fuels Ohio | 5 | 31 to 90 days | \$1,000,000 |
| Warren | Vehicle Electrolysis Range Extender | I would like funds to research the potential for adding a hydrogen/oxygen fuel cell to a vehicle's electrical system and advanced battery packs to power existing vehicles. I believe this would have multiple benefits. Harmful emissions would be drastically reduced. The need to re-charge the battery would be significantly reduced. Changes to the existing infrastructure would be significantly reduced. Impact to the utility grid would be reduced due to the reduced charging requirements. Recovery of road funds could be managed easier than with current EV or PHEV technology. This would be a non-profit and data collected would be released to the public domain. | Self employed | 6 | 31 to 90 days | \$2,000,000 |
| Warren | Sinclair Courseview Campus Center Health Sciences | Senior administrators at Sinclair Community College have been in discussions with a neighboring company to purchase a 16,431 sq. ft. building to be used as the Sinclair Courseview Center in Mason, Ohio. Student enrollment at the Courseview Campus Center is projected to reach 2,000 students in the fall of 2010 outpacing existing capacity. Purchasing the building would allow for the renovation and construction of additional BTM classrooms which are needed to educate future healthcare workers for the growing Warren County area. The building has additional parking, which is at a premium at Courseview for the future expansion. Approximately 23 jobs will result from the construction and the installation of equipment and three new jobs (lab technicians) will be created at Sinclair to operate expanded Courseview Campus Center. Additionally, the community college would be able to educate students for high-demand technical jobs for the healthcare and technology industry. | Sinclair Community College | 26 | 31 to 90 days | \$4,388,000 |
| Warren | Exterior Lighting Retrofit | To replace all outdoor light poles that currently have HVM/MSL halide lighting with new LED systems in the following locations: Columbia Elementary School, Kings Jr. High, Kings High School and Transportation Building. Expected 70% reduction in energy use and new lights. | Kings | 4 | 31 to 90 days | \$115,000 |
| Warren | Preservation of Rural Small American Nationally Kn | Preserve an Ohio small but nationally known business that has been in operation by same family for over 100 years producing quality American made traditional products. Business is located on property that has been in family for over 150 years, with 5 generations of family having lived and worked on the farm like property. The business has been greatly affected by the economic downturn and have had a staff reduction to half of their workforce. This creates a serious business without some modifications made on the BSA have the company's investment into this company of stimulus funds would not only retain the remaining jobs, but enable the company to bring back a portion of the staff that was released. This creates a better quality business serves customers throughout the U.S. and strives to educate all encountered with the tradition of American Crafts and Heritage Arts - traditions that are being lost in our great country. | The Workshops of David T. Smith | 32 | 0 to 30 days | \$2,000,000 |
| Warren | Stadium Visitor Restrooms/Concession/Shower Rooms | In 2003, the school district was forced to construct a new stadium due to the discovery of lead contamination on our football field. The district had to find alternative funding sources to complete this project. Funding sources included local tax dollars, low interest loans from the state, and community donations. Since this was an anticipated expense, the project was not complete. We still need financing for the visitor's side of the stadium, concession stand, and shower rooms. New construction provides employment for construction industry expected outcomes are benefits additional space and utilization for high technology Jr. high student population. | Kings Local Schools | 30 | 0 to 30 days | \$1,750,000 |
| Warren | Replacement of Elementary Teaching Labs | This request would replace 217 computers in 7 lab settings in 4 elementary buildings. These labs are currently utilizing recycled (5 to 7 years old) desktops from other buildings in the district. Our current desktops will be replaced with 30 laptop computers and a wireless network printer. The increased flexibility of mobile labs will ensure that all students have access to learning 21st century technology skills. Currently this is not readily available to all students due to overcrowding of current state labs and outdated technology. | Kings Local Schools | 30 | 31 to 90 days | \$275,000 |
| Warren | Mobile Computer Labs | Thirty mobile labs (six per school building) will be supplied with 30 laptop computers and a wireless network printer. The increased flexibility of mobile labs will ensure that all students have access to learning 21st century technology skills. Currently this is not readily available to all students due to overcrowding of current state labs and outdated technology. | Kings Local Schools | 75 | 31 to 90 days | \$1,100,000 |
| Warren | Installation of Wireless Network | The wireless network will enable Kings to provide wireless computer networking throughout the district. Student/staff will be able to bring mobile labs directly into their current classrooms. This mobility will lead to technology integration into all curricular areas. | Kings Local Schools | 75 | 0 to 30 days | \$495,000 |
| Warren | AV Classroom Solution | To install interactive whiteboards, projectors, enhanced sound, and centralized AV switching systems with audio amplification in all classrooms, teaching labs, large instruction rooms, cafeterias and training centers throughout the district. Expanded outcomes: • Higher quality work developed by teachers • Greater student engagement • Better serve all learners with multiple learning styles auditory, kinesthetic and visual • Move teachers and students into the 21st century of technology • Studies have shown that students master standards at a much faster rate • We expect this solution to become an indispensable tool in every classroom | Kings Local Schools | 100 | 0 to 30 days | \$1,125,000 |
| Warren | Solar Technology Transportation Building | Eliminate Transportation Facility's use of electricity from local electric provider grid and replace with solar electric capability. | Kings Local Schools | 12 | 91 to 180 days | \$650,000 |
| Warren | Window and Door Replacement | Replace all single pane windows in district buildings with energy efficient double pane glass with expanded costs of reduced energy cost through reduction of heat/cooling loads in buildings | Kings Local Schools | 15 | 31 to 90 days | \$1,300,000 |
| Warren | Mason City Schools, Cummins Bridgeway, Clean Fuels | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by installing 30 diesel reduction catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$33,000 |
| Warren | JPS Transportation Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to install anti-idling devices and GPS units on 15 tractors implement the use of E20 Biodiesel. These upgrades will increase the fleet's efficiency and reduce its emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$77,000 |
| Warren | Work Motor Transport, a Clean Fuels Ohio Partner | This programmatic partner wishes to install anti-idling devices and GPS units on 23 tractors as well as install storage tanks at their facility for E20 biodiesel. These upgrades will increase the fleet's efficiency and reduce its emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$181,000 |
| Warren | Help feeding hungry people | People are struggling so badly that many cannot eat or feed their families. We have some folks we eat a meal every 3 or 4 days! Because of this, we have begun the process of forming a non-profit agency with the goal of feeding hungry people and families in our community. We want to have a food pantry, provide "power packs" to children (this is weekly packages they take home every Friday with 5 meals for the week or their family), expand our feeding center to more nights per week, provide essential groceries for needy families, assist people in finding viable work, assist people (or even provide) in finding much needed housing and shelter for their families, and provide workshops for those who help to educate them into believing in themselves, and know that they are worth something! We want to provide comprehensive help for those in need. | We Help Others, LLC | 2 | 31 to 90 days | \$1,000,000 |
| Warren | Video Security Surveillance | Recently, the district increased school security by installing door access controls in all six school buildings, the transportation building, and the parent office. This was paid for through local bus dollars at a cost of \$120,000.00. The video surveillance is a needed tool to help insure the safety of our students and staff throughout the district. We expect to reduce the occurrences of vandalism and theft to district equipment and buildings. This needed equipment would also allow us to identify and prosecute/denigrate individuals that have involved in these activities. This project will convert waste organic oils (such as restaurant frying oils) into biodiesel. The initial outcome is the positive impacts to the environment of waste reduction and waste conversion. A neat outcome, also to the environment, is the reduction of diesel emissions by producing a cleaner fuel. The aforementioned outcomes are currently difficult to quantify. Another outcome, directly impacting our company, is that this project provides a greatly reduced source of fuel costs, potentially up to a \$1.25 per gallon cost reduction (not including start up costs and continuing labor and materials). This saving is an additional outcome directly addressing the goal of the American Recovery and Reinvestment Act. This cost reduction, with the planned additional associated business development, allows our company to retain current employees and to plan to expand by 1 additional employee. This would account for an approximately \$25,000 continuing annual salary for the retained employee and equally for the additional employee. This, along with the jobs associated with the biodiesel processing equipment being purchased, directly furthers the goal of stimulating the economy. | Kings Local Schools | 25 | 31 to 90 days | \$645,000 |
| Warren | Biodiesel Processing | Recently, the district increased school security by installing door access controls in all six school buildings, the transportation building, and the parent office. This was paid for through local bus dollars at a cost of \$120,000.00. The video surveillance is a needed tool to help insure the safety of our students and staff throughout the district. We expect to reduce the occurrences of vandalism and theft to district equipment and buildings. This needed equipment would also allow us to identify and prosecute/denigrate individuals that have involved in these activities. This project will convert waste organic oils (such as restaurant frying oils) into biodiesel. The initial outcome is the positive impacts to the environment of waste reduction and waste conversion. A neat outcome, also to the environment, is the reduction of diesel emissions by producing a cleaner fuel. The aforementioned outcomes are currently difficult to quantify. Another outcome, directly impacting our company, is that this project provides a greatly reduced source of fuel costs, potentially up to a \$1.25 per gallon cost reduction (not including start up costs and continuing labor and materials). This saving is an additional outcome directly addressing the goal of the American Recovery and Reinvestment Act. This cost reduction, with the planned additional associated business development, allows our company to retain current employees and to plan to expand by 1 additional employee. This would account for an approximately \$25,000 continuing annual salary for the retained employee and equally for the additional employee. This, along with the jobs associated with the biodiesel processing equipment being purchased, directly furthers the goal of stimulating the economy. | The RCE Group | 2 | 0 to 30 days | \$35,000 |
| Warren | Fire Station 82 Renovation | Final Project Description and Projected Outcome: To expand small fire station from two (2) apparatus bays, to four (4) apparatus bays. Will include additional room for the apparatus and ambulance. Expected outcome is to improve response times to fire and medical emergencies. | Harlan Township | 17 | 0 to 30 days | \$164,000 |
| Warren | Government Center Addition | Addition to and upgrade existing Government Center. (Advancement and education rooms for EMS and fireman, Community room, lounge, fitness area and additional indoor parking and storage for Township equipment) | Massie Township | 30 | 31 to 90 days | \$387,300 |
| Warren | Cruiser Replacement | Replace 2001 Police Cruiser with a more economical Ford Dodge Charger, current unit has 114,000 miles on it and Village has not means of replacing it at this point, current used and administrative Police Ford sedans and new placed in local emergency. | Village of Waynesville | 5 | 0 to 30 days | \$35,372 |
| Warren | Fire Station 83 Construction | To construct a new fire station on property that was recently purchased by Harlan Township. Station will be located on a main highway (SR, Rt. 28) to Cincinnati and Chillicothe. Expected outcome is to greatly improve response times to fire and medical emergencies in the Southeast corner of Harlan Township. | Harlan Township | 37 | 31 to 90 days | \$825,000 |
| Warren | Tornado Warning System | System will notify residents of severe weather conditions in a timely manner. | Township Trustee | 8 | 31 to 90 days | \$75,000 |
| Warren | Create website for Township and software to mainta | Website will be used to communicate with Township residents and county agencies. Emergency Services | Massie Township | 3 | 31 to 90 days | \$6,500 |
| Warren | Tornado Warning System | Website will be used to communicate with Township residents and county agencies. Emergency services | Massie Township | 3 | 31 to 90 days | \$6,500 |
| Warren | Ambulance replacement and rescue equipment upgrade | Upgrade existing services and equipment for public safety. | Massie Township | 3 | 31 to 90 days | \$189,750 |
| Warren | Solar Energy Conversion | This project will retrofit an existing company building with renewable solar energy. This represents phases 1 of an estimated phase project. Phase 1 represents an approximately 20% "kick start" with the remaining approximately 80% of the total costs planned to be provided through private company loans and credit lines. The expected outcome, directly affecting the company, is to reduce a major portion of the organization's fixed operating costs, with this associated cost reduction creating funds which will be applied to the retention of existing employees and the expansion of at least one part time employee to full time employment. The overall 2008 company electrical costs were approximately \$10,750.00. This phase 1 project is expected to reduce the total company electrical costs by 15 to 20%. This cost reduction, along with the additional job created by the manufacturing of the solar energy equipment being purchased, and then the additional project phases to move to 100% solar energy, will allow for projected employment retention and the move from part time employment to full time employment of 1 person, considering a continuing annual salary in the \$30,000 plus range. | Cady Shak's | 1 | 0 to 30 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Warren | Geothermal, Solar Panels & Wind Turbine Installati | To advertise for installation of underground geothermal water lines to supply heat & air conditioning pumps to control inside air temperatures of private dwellings. Some funds will be used to replace aging equipment such as dump trucks, trenchers, back hoes, excavators, tractors and supply vehicles. Funds will also be used for installation of solar panels and solar water for private and residential use. Also funds will be used to supply inventory for said projects. | Jeff Smith Construction, LLC | 10 | 0 to 30 days | \$2,000,000 |
| Warren | Domestic Hot Water Unit Replacements | Warren has already replaced domestic hot water boiler in our other six buildings with instantaneous heater systems. We would like to continue this project by replacing the domestic hot water boiler in our other six buildings with instantaneous heater systems. This would mean that all domestic hot water boiler units in the district that run 24/7 with on-demand hot water systems that will reduce heat load on the building and the cost of energy due to gas and electric purchases. | Kings Local Schools | 20 | 31 to 90 days | \$745,000 |
| Warren | Interior Lighting Retrofit | The district has a plan to replace all old lighting with better more energy efficient lighting. Over the past year we replaced metal halides in our high school and junior high schools with T5 and fluorescent lighting. We would like to continue this project by replacing the lighting in J.F. Burns Elementary, Columbia Elementary to either LED or plasma lighting technology. Expected outcomes would be significant reduction in energy consumption through reduced electrical costs and reduced lighting heat load. | Kings Local Schools | 25 | 31 to 90 days | \$900,000 |
| Warren | Roofing Restoration | The district has begun installing a vented metal roof roofing system over sections of our Junior High and High School. We would like to install this same system at J.F. Burns Elementary, Kings Education Center (our Board Offices) and complete the project at Kings Junior High. This will help us to maintain existing roof assets and incorporate new energy upgrade roofing system to extend roof life and reduce roof surface temperatures. The system is energy efficient and reduce building's annual energy cost. | Kings Local Schools | 30 | 31 to 90 days | \$750,000 |
| Warren | DW Underground Expansion | Branch out into other underground utility installation. Purchase new tools, equipment and materials. Will seek other contracts, possibly employing additional full time employees. | DW Underground | 4 | 0 to 30 days | \$50,000 |
| Warren | Surf with Safety | The proliferation of technology devices (cell phones, laptops, mini-video cams, iPads, etc.) among school children creates a tremendous need to educate students, parents, and teachers with the dangers associated with these technologies: Personal safety, bullying, suicide, child exploitation, nude student photography, "sexting" are just some of the concerns that students, parents, and teachers need to be educated about. | Southwestern Ohio Instructional Technology Associa | 70 | 31 to 90 days | \$275,000 |
| Warren | Spinks-Ace Security Dealership | SOITA, a non-profit Ohio corp. provides Internet Safety training to Ohio schools since 2005 through webconferences, workshops, regional meetings and the internet. SOITA has worked with state service providers including the Ohio Attorney General's Office. SOITA proposes to provide free access to Internet Safety training to the state's students and parents of all public and private Ohio K-12 schools through a variety of online resources, videoconferences, or assemblies. Schools and parent groups could schedule a presentation at their facility for no fee. | Ace Security Dealership | 5 | 181 days or more | \$500,000 |
| Warren | Job Creation | The cost to train the required number of trainees to present the anticipated high-volume of requested sessions would be \$27,000 for the one-year period. | MarPet Industries | 10 | 91 to 180 days | \$750,000 |
| Warren | Tennis Courts | ACE of Advanced Coatings Engineering is the world's leader in high performance window laminates. ACE has UL, LEED, and the stringent UL (Underwriters Laboratories) standards. So why is ACE recession proof? In every past economic downturn the demand for an increase in crime and threats to people and property. This makes the need for security products like ACE window laminates a recession prevention strategy for businesses and home owners. Of note, our products are warranted for life! Yes, as long as your clients own the laminate, we warrant it for life! No ever discolor, delaminate, come off, or fail to perform. | Kings Local Schools | 10 | 91 to 180 days | \$275,000 |
| Warren | Multipurpose Auxiliary Gym Facility | Starting a business that will assist people who have been laid off find work. Proposal to build ten tennis courts at Kings Mills Elementary. The Kings tennis program has grown to 80 players in the fall and in the spring. We currently have to use tennis facilities off site to support our program. In addition we host a large tennis event each year and fall. There are about 15 different schools that visit our site over a 2 day period. The new courts would also benefit the elementary school. The children could use the facility during the school day and additional parking would be part of this project. Partial funding is possible through a USTA grant, fundations sponsored by the Athletes Boosters, and donations. | Kings Local Schools | 60 | 91 to 180 days | \$1,500,000 |
| Warren | Senior Care Drug Management | This software system is designed for accuracy of prescribing, dispensing and administering drugs in independent long term care settings. It will save the State of Ohio and other payers of prescription benefits, millions of dollars over the next five years. With the infusion of cash, Healthcare would complete development of software that enhances prescribing, a more, and cost accountability for other residents. There is no system available currently. It will be interoperable with other EHR/EMR systems. | Skilled Care | 75 | 31 to 90 days | \$1,750,000 |
| Warren | Energy-efficient electronic infrastructure upgrade | Healthcare would complete development of software that enhances prescribing, a more, and cost accountability for other residents. There is no system available currently. It will be interoperable with other EHR/EMR systems. This includes: providing electronic medical records to upgrade its infrastructure through energy-efficient network linkages on all campuses; providing electronic medical records to upgrade its infrastructure through energy-efficient network linkages on all campuses; providing electronic medical records to upgrade its infrastructure through energy-efficient network linkages on all campuses that we serve. The upgrade of electronic medical records on the historic and largest Lebanon campus is the last remaining Oberlin Community reading assistance. Quantified outcomes include: A quick and efficient no-toll electronic communications system linking all of Oberlin's campuses; plus 4 readers throughout Ohio, providing a safe emergency response and retirement responding within seconds rather than minutes to emergency situations and providing critical upgraded communications with local municipality responders, return dignity and "re-boneness" to riders while providing efficient energy-saving data stored electronically, in a seamless environment that is built on a mission-driven emphasis on non-institutional settings serving Ohio riders. | Otterbein Homes | 50 | 31 to 90 days | \$250,000 |
| Warren | Ohio Wind Turbine Initiative | The Ohio Wind Turbine Initiative is designed to promote the state of Ohio as one of the nation's leading wind turbine energy producers. Stimulus funds would be used to develop and identify primary sources, within the state, to maximize wind turbine usage throughout every county. The initiative would manage necessary relations with property owners, investors and the public utility companies. This initiative would also provide feasibility and engineering studies at primary locations. The primary goals of this project is to lessen the dependency of "man-made" energy, create the ability to install approximately 20-30 turbines annually, purchase all turbines through Ohio manufacturing plants and bring Ohio to the forefront of "Green Energy" technology and production. | G & J Enterprise | 200 | 0 to 30 days | \$8,500,000 |
| Warren | Geothermal Energy Installation | Proposal involves a request for approx. \$325,000 to purchase geothermal drilling equipment needed to install utility connecting company. Equipment will be used to install new geothermal heating/cooling systems for residential and commercial applications. Funding request would go towards drilling rigs, rig components, associated tools and necessary modifications to existing office to house and maintain new equipment. | G & J Enterprise | 6 | 0 to 30 days | \$425,000 |
| Warren | School to Work Mentoring Project | The School to Work Mentoring Project is designed to assist qualifying youth transitioning from high school to the world of work by utilizing mentorship and community employment contracts. In particular, the project targets youth who are not or will not be advancing to higher education college or program and prefer to begin their work lives. The project will establish a network with local service clubs i.e. Rotary, Kiwanis, to solicit community mentors and/or job opportunities to enhance the likelihood of vocational success. The sponsoring agency will also provide wrap around mental health and vocational rehabilitation support for program participants as needed. | Mental Health Recovery Center of Warren/Clinton Co | 22 | 31 to 90 days | \$120,000.00 |
| Warren | Access to Jobs | Warren & Clinton Counties, Warren County, despite being the 2nd fastest growing County in Ohio, has no public transportation system. Clinton County citizens, due to its rural nature and recent loss of jobs from the DHE crisis, have to travel farther to access jobs. The County Mental Health Board would like to target people with mental illness or other disabilities as primary recipients for this transportation service. People with mental illness through our regular data analysis are unemployed at a rate of 78% in the Warren & Clinton County area. The most commonly cited factor for lack of employment is the issue of using Medicaid benefits. Our Board has funded a benefit counselor the past 2 years to more fully educate individuals on the limits of their employment & wages. However, transportation access to jobs remains a significant issue for this population. This project will create new transportation jobs i.e. drivers while yielding a secondary employment gain for those people accessing new jobs that were heretofore unavailable to them. | Mental Health Recovery Center of Warren/Clinton Co | 25 | 0 to 30 days | \$250,000.00 |
| Warren | Traffic Signal Energy Efficiency Upgrade | Replace a total of 26 traffic signals in the City of Lebanon with new LED signal and pedestrian heads to improve functionality and energy efficiency. This project will include the necessary upgrades to the traffic controllers to support the new system. | City of Lebanon | 3 | 31 to 90 days | \$250,000.00 |
| Warren | Pharmaceutical Diversion Investigator | Hiring and retention of one full time investigator dedicated to the detection, apprehension and prosecution of traffickers and abusers of pharmaceutical drugs illegally diverted from their distribution and use. | Greater Warren County Drug Task Force | 1 | 0 to 30 days | 97,500.00 |
| Washington | CR-25-0000 Asphalt Resurfacing | Asphalt pavement resurfacing of 1.19 miles of 2 lane road. | Washington County | 13 | 91 to 180 days | \$145,600 |
| Washington | The Ohio Appalachian Sustainable Agriculture Proje | To improve the quality of food being served to children through USDA Child Nutrition Programs throughout Appalachian Ohio by using local farm products provide a major boost to small family farms located in Adams, Morgan, Monroe and Noble Counties. | The Appalachian Nutrition Network | 59 | 31 to 90 days | \$250,000 |
| Washington | Matamoras Water System Improvements and Extensions | Goals Include: - Increase agricultural employees on 4 counties by 515 - 8 PFE workers moved to 1 school district - 40 new Summer Food Service Sites added | Village of Matamoras- Burgess & Niple, Inc. | 5 | 91 to 180 days | \$1,990,000 |
| Washington | Countywide Wireless Wide Area Network | Construction of a water system extension to provide water service to a potential of 103 customers in areas of Grandview Township adjacent to the Village. Water system extension would consist of 18,200 LF of 6-inch, 4-inch and 2-inch water main, and a water booster pump station. Project also includes replacement of 10,200 LF of deteriorated water mains within the existing water distribution system using 8-inch and 8-inch mains to replace asbestos cement mains as well as replacement of deteriorated cast iron mains to improve water service reliability and fire flow capability. | City of Marietta | 5 | 91 to 180 days | \$225,000 |
| Washington | Gilman Ave. Resurfacing & Sidewalk Installation | The CAN network will enable businesses, citizens, and public entities of Marietta and Washington County and those business people traveling through to obtain access to their valuable network based resources so that they may perform business transactions and access vital new locked behind inaccessible network barriers. Additionally, this project has been identified as the #1 infrastructure project for the Washington County Connect Ohio Committee. This group is a public-private partnership with technology minded businesses, government entities and universities to help bridge the digital divide and progress our area of Appalachian Ohio. In addition to the important public safety and service implications, this project will provide the backbone and necessary bandwidth to support significant economic development in our grossly underserved region. | City of Marietta | 15 | 91 to 180 days | \$863,139 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--------------------------------------|----------------|--------------------|---------------------------|
| Washington | Various City Street Paving Projects & ADA Ramps | This project is a resurfacing of existing asphalt concrete streets and includes reconstruction of the ADA Curb Ramps required to be brought into compliance with current ADA requirements. The local City streets were selected based upon the use of MicroPAVER Pavement Magnet Software developed by the U.S. Army Corps of Engineers and implemented by the City of Marietta in 2006. A 2009 Work Plan was prepared by SMS & Associates which includes 41 City streets totaling approximately 102,000 sq. ft. The total length of city streets that would be paved totals approximately 7.6 miles out of a total network of 87 miles. The avg pavement condition index (PCI) rating for all of the city streets would improve from 0.7 to 1.8 as a result of work. Project would benefit Marietta (population of 14,515) as well as outlying areas of Washington County (population of 87,276). The total funds required for this project are \$1,200,000. Approximately \$250,000 to be spent on reconstruction of 100 curb ramps to meet current Fed ADA requirements and \$950,000 would be spent resurfacing 7.6 city streets 7.6 miles, incl. mill, joint, garage improvements, markings and adjusting utilities to grade. | City of Marietta | 30 | 31 to 90 days | \$1,200,000 |
| Washington | Barlow Library Community Room | The Barlow Library serves a growing community in rural Ohio. It is a wonderful community, however, it lacks a meeting/learning space. By finishing the basement of the Barlow library an area of 8,000 square feet could be created to meet this need. This area could serve as a learning center where the library/community could present children and adult programs. The area could also be used to house educational items provided by area businesses that we currently lack the space for. A computer center could be created, which would allow the library to work with local colleges to conduct adult learning programs to teach people the skills needed to qualify for jobs. The community consists of hard working individuals that deserve every opportunity to succeed in these hard economic times. The project will be a continuation of the River Trail shared use path. This project, River Trail Phase IV, would connect the existing River Trail which runs along the east bank of the Muskingum River to Historic Hammar on the west side of the river. This will be accomplished by refurbishing and re-decking the existing Historic Hammar Railroad Bridge. The project will include the length of the bridge and approaches at each end for a total distance of approximately 1200 ft. This will provide a vital link pedestrian and bicycle traffic between our historic downtown and historic Hammar neighborhoods. This direct link between our two historic downtown business districts will act as a catalyst for economic development. It will also help divert much of the bicycle traffic from our two motor traffic bridges which are ill equipped to handle bicycles. The project is supported by the Mayors Alternative Transportation Advisory Committee (MATAC) and is included in the County-wide Alternative Transportation Plan. Funds requested will be expended on plans for the renovation of the bridge. With these documents in hand, transportation enhancement funds will be sought for construction. | Washington County Public Library | 15 | 91 to 180 days | \$385,000 |
| Washington | Harnar Bridge Renovation/Restoration | This will provide a vital link pedestrian and bicycle traffic between our historic downtown and historic Hammar neighborhoods. This direct link between our two historic downtown business districts will act as a catalyst for economic development. It will also help divert much of the bicycle traffic from our two motor traffic bridges which are ill equipped to handle bicycles. The project is supported by the Mayors Alternative Transportation Advisory Committee (MATAC) and is included in the County-wide Alternative Transportation Plan. Funds requested will be expended on plans for the renovation of the bridge. With these documents in hand, transportation enhancement funds will be sought for construction. | City of Marietta | 50 | 181 days or more | \$292,128 |
| Washington | Armory Square | Armory Square will be a regional visitors center located in Marietta, Ohio, the first settlement in the Northwest Territory. Changing displays will introduce the visitor to this piece of American history emphasizing the role of the miller as a highway which carried the first settlers to this new territory. The Armory Square project is an important piece of the City of Marietta's "Renaissance Marietta" and downtown living initiative. Heritage Ohio has dubbed the renovation of Marietta's Armory building as one of the top 10 preservation opportunities in the state. Heritage Ohio is the founding partner of the National Trust for Historic Preservation in Ohio. The building was retained to the site to recognize the potential value the historic building could provide as a multi-use visitors center for Marietta and to spur downtown revitalization. | City of Marietta | 50 | 91 to 180 days | \$500,000 |
| Washington | River Trail Phase 2 | The River Trail Phase II project will extend an existing multi-use path along the Muskingum and Ohio Rivers through Marietta's historic downtown. It is a part of a larger planned path expansion as well as a county-wide alternative transportation plan. Recaptured funds will be used to offset the local funds required for construction. Total Project Costs: \$842,000 ODOT Transportation Enhancement Grant: \$593,000.00 Recreational Trails Program: \$160,000 | City of Marietta | 30 | 91 to 180 days | \$64,487 |
| Washington | Dist 10, PID 84447, WAS SR 60 5.130 | Two-Lane Resurfacing Project Using An Asphalt Overlay Treatment. | Ohio Department of Transportation | 28.7 | 31 to 90 days | \$1,000,000 |
| Washington | Area Agency on Aging 8 Workforce Development (COAL) | COALA is a program offering low-cost training and job placement in the home health care field. Training allows workers to experience real-world, on-going situations that may be encountered in the home. Project Outcomes: supply workforce with 240 trained home health care workers over two years | Buckeye Hills - Area Agency on Aging | 0 | 31 to 90 days | \$552,000 |
| Washington | City of Marietta WTPP Improvement Sewer Upgrades | The general purpose of project is to enhance the sewer treatment capability and capacity of the City of Marietta to respond to current and imminent needs of the residential and industrial community and to provide a discharge point for effluent for the River, Oak Grove, and Devola communities which are the responsibility of the Washington County Commission. The City of Marietta provides public services to a population of 14,515. The City is located at the confluence of the Muskingum and Ohio Rivers and is Ohio's oldest settled community. This project is one facet of a plan to revitalize the social and economic environment conditions in the area. State level benefits: (a) Addresses issues the Ohio EPA has with both the City and County wastewater treatment plants; (b) Allows for capacity for growth along the State Route 7 area, Devola, Reno, Oak Grove, and Interstate 77 areas; and (c) Provides opportunities for eco-tourism and was completed in 2006. River Trail Phase I has been awarded an ODOT Transportation Enhancement Grant and is scheduled for construction in 2009. This project, River Trail Phase II, would continue from where Phase I ends at Fourth and Ohio Streets. River Trail Phase II will extend the shared use path from Fourth and Ohio Streets to Chuck Creek where it empties into the Ohio River. The entire proposed route will be off street with the exception of the Pine Alley section which is extremely low traffic. The purpose of this project is to provide one more link in the planned alternative transportation route along the scenic Muskingum and Ohio Riverfronts. The public will benefit with a better quality of life through increased historic tourism and economic growth. The project has been reviewed and is supported by the Mayors Alternative Transportation Advisory Committee (MATAC) and is part of the County-wide Alternative Transportation Plan. ODOT Transportation Enhancement Grant: \$951,600.00 | City of Marietta | 30 | 181 days or more | \$847,500 |
| Washington | River Trail Phase 3 | Improves passenger access and all weather bus shelters and elevators adjacent to the Intra-modal facilities nearing construction at the Amory in Marietta. Project encompasses the Intra-modal Control with improved access for bus passengers and provides a better design for ADA accessibility to existing bldg. The project also includes redesigning driveways to accommodate all types of passenger buses. The enhancement would include lanes and parking areas for private autos, lefting retained structures, i.e., visitor's center, excursion bldgs, small boat marina and a bike trail. Project constructed on publicly-owned land at the Amory site and will be constructed simultaneously with the Intra-modal Center. In 2007, the City obtained a low interest loan from ODOT's Energy Loan Fund to provide initial funding for the first phase of this project. Construction Documents have been prepared for the following Energy Conservation Measures (ECM): LED Traffic Lights at 4 existing Intersections, improvements to two municipal office bldgs including window replacement, HVAC and lighting improvements, and relocating computer server room and replacing 21 servers with low power and efficient virtual servers. Total estimated cost for this phase is \$800,000. Phase 2 will include comprehensive energy audits, energy modeling and LEED consulting of all remaining City facilities including the water and wastewater treatment plants, streets dept. facilities, fire stations, fire stations and water booster stations, water wells, city parks and recreation facilities, street lights and decorative street lights. The ECM's to be designed and completed in Phase 2 include: insulation, window replacement, HVAC, upgrades, and replace irr. and ext. lighting at all facilities with occupancy/inmotion sensors, and replace pumps with high efficiency motor w/ VFD. Total estimated cost for this phase is \$5,100,000. 50' x 150 foot structure to store road salt and grit mix for highway snow and ice control. Save costly road salt from dissolving due to rain and weather acting on the enclosed storage area. | City of Marietta | 30 | 181 days or more | \$339,054 |
| Washington | Intermodal Passenger Accessibility & Traffic Enhan | Improves passenger access and all weather bus shelters and elevators adjacent to the Intra-modal facilities nearing construction at the Amory in Marietta. Project encompasses the Intra-modal Control with improved access for bus passengers and provides a better design for ADA accessibility to existing bldg. The project also includes redesigning driveways to accommodate all types of passenger buses. The enhancement would include lanes and parking areas for private autos, lefting retained structures, i.e., visitor's center, excursion bldgs, small boat marina and a bike trail. Project constructed on publicly-owned land at the Amory site and will be constructed simultaneously with the Intra-modal Center. In 2007, the City obtained a low interest loan from ODOT's Energy Loan Fund to provide initial funding for the first phase of this project. Construction Documents have been prepared for the following Energy Conservation Measures (ECM): LED Traffic Lights at 4 existing Intersections, improvements to two municipal office bldgs including window replacement, HVAC and lighting improvements, and relocating computer server room and replacing 21 servers with low power and efficient virtual servers. Total estimated cost for this phase is \$800,000. Phase 2 will include comprehensive energy audits, energy modeling and LEED consulting of all remaining City facilities including the water and wastewater treatment plants, streets dept. facilities, fire stations, fire stations and water booster stations, water wells, city parks and recreation facilities, street lights and decorative street lights. The ECM's to be designed and completed in Phase 2 include: insulation, window replacement, HVAC, upgrades, and replace irr. and ext. lighting at all facilities with occupancy/inmotion sensors, and replace pumps with high efficiency motor w/ VFD. Total estimated cost for this phase is \$5,100,000. 50' x 150 foot structure to store road salt and grit mix for highway snow and ice control. Save costly road salt from dissolving due to rain and weather acting on the enclosed storage area. | City of Marietta | 14 | 91 to 180 days | \$1,100,000 |
| Washington | City Wide Energy Conservation Project Phase 2 | In 2007, the City obtained a low interest loan from ODOT's Energy Loan Fund to provide initial funding for the first phase of this project. Construction Documents have been prepared for the following Energy Conservation Measures (ECM): LED Traffic Lights at 4 existing Intersections, improvements to two municipal office bldgs including window replacement, HVAC and lighting improvements, and relocating computer server room and replacing 21 servers with low power and efficient virtual servers. Total estimated cost for this phase is \$800,000. Phase 2 will include comprehensive energy audits, energy modeling and LEED consulting of all remaining City facilities including the water and wastewater treatment plants, streets dept. facilities, fire stations, fire stations and water booster stations, water wells, city parks and recreation facilities, street lights and decorative street lights. The ECM's to be designed and completed in Phase 2 include: insulation, window replacement, HVAC, upgrades, and replace irr. and ext. lighting at all facilities with occupancy/inmotion sensors, and replace pumps with high efficiency motor w/ VFD. Total estimated cost for this phase is \$5,100,000. 50' x 150 foot structure to store road salt and grit mix for highway snow and ice control. Save costly road salt from dissolving due to rain and weather acting on the enclosed storage area. | City of Marietta | 23 | 91 to 180 days | \$5,180,000 |
| Washington | Road salt/grit storage facility | 50' x 150 foot structure to store road salt and grit mix for highway snow and ice control. Save costly road salt from dissolving due to rain and weather acting on the enclosed storage area. | Washington County | 6 | 31 to 90 days | \$200,000 |
| Washington | Water Treatment Plant Slip Repair | Slip plane, which resulted in a sewermain (71 feet high x hundred and sixty (160) feet long escarpment adjacent to a twelve (12) inch diameter pressurized raw water feed line. The City of Marietta, Ohio authorized an investigation and assessment of the slip, including soil borings. The results of the assessment concluded that the entire slope west of the Lime Storage Bin is unstable and therefore is threatening our raw water supply line. This project will stabilize the slope using thirty-three (33) concrete drilled shafts with a diameter of thirty-six (36) inches, drilled at six (6) feet on center spacing the length of the slip. The project will also incorporate two hundred and twenty-four (224) square feet of pre-cast concrete lagging panels to help stabilize the slope, with forty (40) tons of aggregate backfill (ODOT Item 304) and six hundred (600) tons of dump rock fill (ODOT Item 501). This project will include the grading of topsoil, as well as seeding and mulching. The total estimated cost of this project is \$480,000. | City of Marietta | 7 | 31 to 90 days | \$347,640 |
| Washington | Traffic Signal / Intersection Improvements at Puth | This project consists of replacing the existing straph poles, span wires, vehicular and pedestrian signal heads, pedestrian pushbuttons, overhead signage and the signal controller. Additionally, an unintermittible power supply will be added to the signal controller and the signal timing and phasing will be optimized to improve traffic flow. Signal heads will be strategically located to improve signal visibility at all of the approaches to the intersection. The existing overhead approach lane designations will be modified to an exclusive left turn lane and through/right turn lane. New signage and pavement markings will be provided to improve traffic flow, reduce delays, and improve safety at the intersection. Additionally, ADA compliant curb ramps will be constructed at the intersection. The total cost of these improvements is \$149,000. This project has been programmed by ODOT and assigned a PID No. 86596. This project has also been added to the list of accepted projects by WWWW (Wood Washington Win Interstate Planning Commission) for the Long Range Plan. | City of Marietta | 3 | 31 to 90 days | \$149,000 |
| Washington | Employment | We are a non-profit agency whose sole purpose is to provide jobs for adults with disabilities. We do this by creating many sub-businesses within our non-profit. We are in the process of renting a store front downtown and employing 10-15 people with disabilities per year. Many adults with disabilities enjoy working in this sub-business of the non-profit called River City Jewelry, and many adults who live in the community are also interested in working there. Although we would like to provide enough work for everyone, we just don't have the space. Last fiscal year River City Jewelry ended with a deficit of \$6,933. We did everything we could to save money, but the increases in individual's productivity and the increase in market caused potential problems for a non-profit such as ours. We are requesting some funds from the stimulus package to help us get started in expanding this business that will create more jobs for people in our community. | WASCO, Inc. | 25 | 31 to 90 days | \$15,000 |
| Washington | Health Care | WASCO, Inc. employs 64 people to work with adults with disabilities. Many employees make minimum wage. We would like to provide health care benefits for these employees, but our non-profit ended the year with a deficit, and employees are unable to afford even the most basic package of health care benefits. We have interviewed people desiring themselves medical treatment for fear of a financial crisis. We would like to offer our employees a basic package of medical coverage for one year, in hopes that our president will have something to offer in the way of public health care in the coming years. The figure submitted will take care of all employees for one year in a non-insured health care program. | WASCO, Inc. | 64 | 31 to 90 days | \$55,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Washington | Marietta Wastewater Treatment Plant Phase 1 Improv | <p>Priority systems for the Marietta WWTP upgrade include the following:</p> <p>Electrical system to add additional power to allow the existing system to meet current needs without experiencing electrical problems.</p> <p>Screening system improvements to the existing system that has reached the end of its design life.</p> <p>Hydraulic improvements that will incorporate a biological selector to address problems associated with chronic sludge bulking.</p> <p>Sludge pumps and associated piping will replace a system that has reached the end of its useful life and for which there are no spare parts.</p> <p>Improvements to the pre-aeration tank system that will replace the functionally poor aeration system.</p> <p>The construction of a chamber that will allow the main pump station to be taken off line for structural repairs. This will allow the WWTP to achieve a functionally acceptable bypass pumping operation and will allow repairs to the main pump station to be performed.</p> | City of Marietta | 30 | 91 to 180 days | \$5,043,000 |
| Washington | Mound Cemetery Fence Restoration Project | <p>The project involves the complete repair and restoration of the steel fence and gates surrounding the historic Mound Cemetery in Marietta. The Mound Cemetery is listed on the National Register of Historic Places. It is bounded by Fifth, Sixth, Tepper and Cutler Streets in the Downtown area of Marietta, Ohio.</p> <p>Disassemble and remove approximately 2018 linear feet of fence panels surrounding the Mound Cemetery. Disassemble and remove gates and iron gates. Repair and rehabilitate all fence components. Remove any steel post that measures more than one (1) inch in diameter. Remove and install all posts set in concrete. Check the fence line of disjunctions. Disassemble and remove the entire fence line and install new main gates for the repair and rehabilitation of all components. Place new mid-panel anchors. Reuse the Main Gate on a new foundation.</p> | City of Marietta | 3 | 31 to 90 days | \$160,000 |
| Washington | VILLAGE OF BEVERLY STREETSCAPE | Redevelopment of SR-60 in the Village of Beverly to include urban beautification, street amenities, parking, bicycle accessibility features in support of a strategic development plan for the Village of Beverly, Ohio. Disposal is approximately 60,000 lbs. | WASHINGTON COUNTY, OHIO STATE UNIVERSITY EXTENSION | 75 | 91 to 180 days | \$900,000 |
| Washington | WATERFORD TOWNSHIP ROAD IMPROVEMENTS | Installation of safety improvements on CR-6 and 174 and SR-339 in support of a \$70 million investment in a new manufacturing facility which will produce solar-panel material. | WASHINGTON COUNTY, OHIO STATE UNIVERSITY EXTENSION | 400 | 91 to 180 days | \$600,000 |
| Washington | Dist 10, PID 85946, WAS 1 replacement LTV | 1 replacement light transit vehicle for the Washington County/Community Action Bus Lines | Ohio Department of Transportation | 1 | 31 to 90 days | \$70,000 |
| Washington | Grandview Township Culvert Replacements | Replacement of deteriorated culverts of various diameters and lengths at existing location and installation of rock channel protection in Grandview Township, a large rural community in extreme eastern Washington County, Ohio. Project will complete a comprehensive culvert replacement program initiated in 2000. | Grandview Township | 10 | 31 to 90 days | \$65,587 |
| Washington | Dist 10, PID 85945, WAS Facility rehabilitation | Intermodal facility accessibility and enhancement project for the Washington County/Community Action Bus Lines | Ohio Department of Transportation | 22 | 181 days or more | \$1,100,000 |
| Washington | I & I Remediation | This project will reduce or eliminate I & I in the County's sanitary sewer collection system. Currently I & I mandates the collection system resulting in overloading these WWTP's or increases cost for regional treatment. | Washington County Commissioners | 5 | 91 to 180 days | \$900,000 |
| Washington | Energy Modification | Energy modification of existing High School through the installation of solar panels, roof, and HVAC system for the Marietta High School. This will also provide incentive for the district and community to proceed with a more affordable ballot issue of 77 million for facility construction in November of 2009. This new facility project will be underway in the spring of 2010. | Marietta City School District | 30 | 31 to 90 days | \$2,130,000 |
| Washington | Health Science Building | The energy modification project is ready to proceed immediately and be completed by September 2009. Washington State Community College will construct a stand-alone Health Sciences Education Facility. The 54,000 square foot structure will accommodate new current health programs, and allow growth in programs and update and expand lecture and laboratory facilities. The facility will include our first interactive lecture hall for campus and community use and house a Continuing Education Center to serve all levels of noncredit workers in regional hospitals and healthcare institutions. Since 1991, college health programs have increased to meet regional healthcare workforce needs, growing from 2 to 8 programs with enrollment increasing from 500 students to 750 in the same scheduled space. Because of our rural location, healthcare employees in the region have adopted the philosophy of "we grow our own" workforce. To accomplish this, WSCC will collaborate with and serve the needs of local and regional healthcare providers. The addition of a new health sciences building will allow us to continue to develop new programs and expand programs that can better address employer needs. The project is complete through schematic design. Funding will allow construction to begin within 6 months. | Washington State Community College | 20 | 91 to 180 days | \$14,900,000 |
| Washington | New Campus Entrance | Washington State Community College will construct a second campus entrance and 300 space parking lot at the intersection of Colleges Drive and Glendale Road on the college campus in Marietta, Ohio. This second entrance is a critical campus improvement project addressing the safety and security of all students, visitors, faculty, and staff, as there is currently no means of entry/exit to the campus if the existing entry is closed. Constructing a second entrance will allow another means by which emergency vehicles can enter the campus, and which vehicles can enter/leave the campus. The new campus entry will support future regional economic development facilities, such as an amphitheater, arts and culture center, and a business conference center included in the campus master plan. The parking lot will allow for construction of a new classroom building on another portion of the campus. | Washington State Community College | 0 | 91 to 180 days | \$2,000,000 |
| Washington | Safe Routes to School Project Completion | Additional funding to complete an already approved Safe Routes to School project for the Village of Beverly and the Fort Frye Local School District in northwest Washington County. Infrastructure will include sidewalks to facilitate movement of children to school from heavily traveled residential areas. | Village of Beverly | 20 | 0 to 30 days | \$200,000 |
| Washington | Fire Hall Construction | Project is described as construction of a 3700 sq foot 4-bay fire department building to service a rapidly growing rural service area in northwest Washington County. Building will include meeting rooms, public spaces and equipment storage area. | Watertown Volunteer Fire Department | 20 | 31 to 90 days | \$150,000 |
| Washington | Belpre Senior Center Expansion | Project anticipates a significant expansion to an existing Senior Citizens Center in Belpre, Ohio. Center has witnessed a total organizational change with expanded services and increase in regular membership from 25 to 100. Expansion will accommodate new programs to enhance Senior Center active participation in community life. Project anticipates interior improvements on SR-7, a 4-lane expressway in Belpre, Ohio. Improvements are endorsed by all developmental planning organizations in the metropolitan area. Improvements will mitigate hazardous situation at dangerous intersections. Previous accidents have resulted in several deaths and significant property damage. | City of Belpre | 15 | 31 to 90 days | \$150,000 |
| Washington | State Route 7 Safety Improvements | | City of Belpre | 30 | 31 to 90 days | \$720,000 |
| Washington | Community Resource Center | Our goal is to finish the lower level of our rural public library serving Western Washington County. Our programs attract people from 5 communities, 10 townships, 7 neighboring cities and counties. We want to expand the outreach capability by the library. Cooperative Extension, college, universities, schools, and organizations which use our facility for workshops, testing, and programs. Plans include upgrading the HVAC, additional lighting, adding restrooms, and installation of movable walls which will increase room versatility for maximum usage of the space. The addition of an elevator will make the lower level accessible to the library's main floor for ADA compliance. Our area is the fastest growing in Washington County with 10% growth in the last census. Recent completion of a major highway interchange makes the area even more attractive with additional housing and business development has already taken place. Circulation increased 70% annually before the additional development. We expect usage will increase fivefold by having additional areas available. A strict usage policy exists due to severe space limitations. This project will enhance this area's quality of life. | The Friends of the Barlow Library, Inc. | 14 | 0 to 30 days | \$254,000 |
| Washington | Beverly and Waterford Interconnect And Fire Protec | 1000 feet of water line to connect Beverly and Waterford water systems together for backup water supply and fire protection | Village of Beverly and Waterford Water | 10 | 31 to 90 days | \$85,686 |
| Washington | Kraton Biomass Fueled Cogeneration Project | Install a new Biomass Fueled steam-electric cogeneration unit on the Kraton Belpre Site. Unit expected to burn wood chips and generate 50 MW electricity. Approximately 20 MW of the electricity will be consumed on Site for ongoing polymer operations. Steam will be supplied from the new facility to maintain ongoing polymer operations at the Site. New biomass facilities will enable shutting down two coal fired boilers currently in operation on the Site. New facilities will allow displacing coal generated energy with a renewable source and reduce overall Site air emissions. The Kraton Belpre site is a 24/7 operation employing approximately 350 employees. New biomass cogeneration facilities will protect these current positions, and will enable the addition of 10-15 new jobs. | Kraton Polymers | 350 | 0 to 30 days | \$200,000,000 |
| Washington | Solisil - Solar Grade Silicon (SoG-Si) Manufacturer | Solisil, a subsidiary of Globe Specialty Metals, produces very high purity silicon for use in photovoltaic solar cells, by means of a proprietary metallurgical process. Solisil currently supplies its industry leading solar-grade silicon to top-tier manufacturers of silicon wafers and photovoltaic cells. Solisil has invested millions of dollars in research and development in order to obtain continuous improvement in purity and production costs. In order to increase capacity, the Solisil project will require a new 150,000 square foot facility to be built in Watertown Township, significant new equipment to support a 24-hour operation along with support equipment, and continued investment in research and development in order to achieve purity and production cost improvements. The proposed jobs for this facility when fully operational is 350, including production and specialized technical jobs and corporate staff. | Globe Specialty Metals | 350 | 0 to 30 days | \$65,000,000 |
| Washington | HVAC Program for Belpre High School | <p>Note: Belpre Elementary K-6 campus is already air conditioned. This was accomplished with funds obtained through one-time stock payment from Anthem Insurance.</p> <p>Belpre is ranked 509 on the Ohio School Facilities Commission with a 16.1% match from the state. We are not expected to get any help for several years. However, we have lost about 35% of our valuation due to the phase out of tangible personal property. The median income is about \$10,000 below the national average, and 50% of our students qualify for free & reduced lunch and breakfast.</p> <p>Benefits of the project include: improvement to the learning environment, a better teaching environment, higher student achievement, and the ability to develop a year-round school calendar.</p> <p>We have already been through a OSGC building evaluation and we await the results. We have received estimates for the electrical upgrades and HVAC project.</p> <p>Belpre students have been left behind other students in the state in regard to school facilities. They deserve the opportunity to achieve in a quality learning environment.</p> <p>Replacement of all windows in the High School to make it more energy efficient. Replace the windows in the older section of the Elementary school to make it more energy efficient.</p> <p>To make the high school and elementary more energy efficient.</p> <p>To make the doors at both schools more energy efficient.</p> <p>Install air conditioning throughout the High School (currently window units in some areas of the school), to help with the possible proposal of the extension of the number of school days.</p> <p>Bring old sewer to keep infiltration of rain water out of our sewer system and overloading the sewer plant.</p> <p>Prevention of contamination to the Muskingum River.</p> | Belpre City Schools | 10 | 91 to 180 days | \$250,000 |
| Washington | Windows - Elementary and High Schools | | Wolf Creek Local School District | 4 | 91 to 180 days | \$500,000 |
| Washington | Windows - Elementary and High Schools | | Wolf Creek Local School District | 4 | 91 to 180 days | \$500,000 |
| Washington | Doors - High School and Elementary | | Wolf Creek Local School District | 4 | 91 to 180 days | \$500,000 |

| Washington | Village of Beverly Water line upgrade and improvem | Upgrading old water line and improving water supply through out our water system | Village of Beverly | 10 | 181 days or more | \$369,847 |
| Washington | Watertown Township Road Improvement Project | Watertown Township would like to do major reconstruction to three Township roads, Waterborn Township is a rapidly growing community. Township RD 108 Camp Herolds Rd (3.06 miles) is in desperate need of reconstruction due to a high volume of traffic in the area because of the Mt Carmel Church located on that road. The road is used by a tremendous amount of vehicles from Washington County going to the Camp grounds. Tap Rd 107 Kern Rd (0.76 miles) and Tap Rd 181 Pottwyer Rd (0.75 miles) is also in deplorable condition. We desperately need to do something with these roads. Our budget will not permit us to keep the roads up like they need to be. The road materials that would be put down would give it a lifetime of 20 years. Please consider this project. Thank You! Huron: Township Trustee 1,258 head feet of 6" water line New Building and Equipment | Watertown Township | 30 | 31 to 90 days | \$1,319,326 |
| Washington | Tri County and Village of Beverly Water line Proje | Interconnection of two water supplies (Tri County and Village of Beverly) for emergency back-up water supply. Extended supply for fire protection. | Tri County and Village of Beverly | 10 | 91 to 180 days | \$167,387 |
| Washington | TCRWS - Lowell Waterline Extensions | The proposed waterline extensions will include 11,000' of 8" PVC waterline, 18,000' of 4" PVC waterline, 8,000' of 4" ductile iron waterline, 30,000' of 3" PVC waterline, 5,000' of 3" service line, valves, service meters, and other necessary appurtenances. | Tri-County Water District- ME Companies, Inc. | 30 | 91 to 180 days | \$949,700 |
| Washington | Cooperative Street Paving | Cooperative Paving Project - City of Belpre resurfacing of city streets - total of 4,200 feet of street length with widths ranging from 14 to 23 feet. Village of Beverly resurfacing of village streets - total of 3,200 feet of street length with widths ranging from 12 to 46 feet. Village of Mockingbird resurfacing of village streets - total of 880 feet of street length with a width of 16 feet. Project is necessary to remove safety hazards including potholes, and cracking (delicacy, longitudinal and transverse). | City of Belpre | 5 | 31 to 90 days | \$210,000 |
| Washington | House of Hope Peer Support Program for Washington | Availability of a mental health peer support program for Washington County adults with severe and persistent mental illness with the objective of improving and maintaining stability and level of functioning, integrating adults with mental disability into the community and supplementing traditional mental health interventions. | Washington County Mental Health & Addiction Recove | 5 | 0 to 30 days | \$92,400 |
| Washington | Teen Depression Awareness Campaign | Media campaign, written materials and teen events designed to increase awareness among Washington County youth regarding teen depression symptoms, treatment options, coping skills and recovery tools. | The Right Path for Washington County, Inc. | 1 | 31 to 90 days | \$25,000 |
| Washington | MITIGATION OF DEFILTRATION AND INFLOW PROBLEM | Project anticipates mitigation of sewage infiltration and flow problems in a regional sewer collection system in a rapidly growing area of southwestern Washington County. Project will increase system efficiency, contribute to growth and development and promote health and safety in the three township areas. | WASHINGTON COUNTY BOARD OF COMMISSIONERS | 25 | 91 to 180 days | \$1,000,000 |
| Washington | ECEF Sprinkler system | The Ely Chapman Education Foundation (ECEFF) center, a historic 199 year old building, with marble facade, concrete block brick exterior, wood floors, plaster on old walls with tin tile plaster ceilings, houses 800 programs by the ECEFF. Average of 500 youth and 2500 adults use the building over the course of a year. Monthly fire drills held. All required fire extinguishers and exit lighting fixtures checked monthly. Due to the age of the building and its usage the local Fire Department would like a sprinkler system installed in the facility when funding is available. Install an additional water main (10" from the street to the side of the building, approximately 400'). Install the required piping throughout at 20,000 sq. ft. building (permitted to be determined by the contractor). Install sprinkler heads in the correct location on each floor (number to be determined by the contractor). Installation of the sprinkler system installed with the help from local construction companies. Repairing of areas in the building altered by the installation of the system - to be done by local companies or inmates from the County Correctional Center. Re-piping of the Main Muskingum River Crossing at Marietta by preparing construction plans based on the engineering recommendations, surface/highway location alternative. Installation of all current original windows with energy-efficient thermal-paneled windows, 34 windows, 12' by 48" W, 23 windows average 55" by 48" W. Windows will be constructed and installed to maintaining the historic value of the building. Re-piping 1500's sales and unrails with self-flushing units that will improve the water usage, and the plumbing work. Installing a WC ramp for the front entrance and an elevator (small teen person elevator) to go from the first to second floor of the building. Handicap access from the second to the first floor will be provided by the Shrinkers. Installing 8,000 sq feet of solar panels to improve energy efficiency and provide electricity to many of the programs so well as the elevat. Building has a 11,000 sq ft roof on which these panels will be installed. | Ely Chapman Education Foundation | 20 | 91 to 180 days | \$750,000 |
| Washington | North Muskingum River Crossing | Replacement of all current original windows with energy-efficient thermal-paneled windows, 34 windows, 12' by 48" W, 23 windows average 55" by 48" W. Windows will be constructed and installed to maintaining the historic value of the building. Re-piping 1500's sales and unrails with self-flushing units that will improve the water usage, and the plumbing work. Installing a WC ramp for the front entrance and an elevator (small teen person elevator) to go from the first to second floor of the building. Handicap access from the second to the first floor will be provided by the Shrinkers. Installing 8,000 sq feet of solar panels to improve energy efficiency and provide electricity to many of the programs so well as the elevat. Building has a 11,000 sq ft roof on which these panels will be installed. | Washington County | 15 | 91 to 180 days | \$600,000 |
| Washington | Retrofit for energy efficiency and Handicap Access | Replacement of all current original windows with energy-efficient thermal-paneled windows, 34 windows, 12' by 48" W, 23 windows average 55" by 48" W. Windows will be constructed and installed to maintaining the historic value of the building. Re-piping 1500's sales and unrails with self-flushing units that will improve the water usage, and the plumbing work. Installing a WC ramp for the front entrance and an elevator (small teen person elevator) to go from the first to second floor of the building. Handicap access from the second to the first floor will be provided by the Shrinkers. Installing 8,000 sq feet of solar panels to improve energy efficiency and provide electricity to many of the programs so well as the elevat. Building has a 11,000 sq ft roof on which these panels will be installed. | Ely Chapman Education Foundation | 100 | 91 to 180 days | \$400,000 |
| Washington | Physician Assistant Expansion Program | Need for health care in Appalachia & beyond. Historically, 30% of our PA graduates practice in Ohio & 68% serve in the region (OH, WV, PA). Market conditions suggest that the College can increase PA enrollment from 22 masters-level students in each cohort (44 total) to 36 students/cohort (72 total), thus fostering a larger health care workforce for primary care & specialty settings. With 36 students/cohort we expect to annually produce 11 physician assistants for employment in Ohio health care facilities. Expanded PA enrollment requires larger, renovated facilities. The College has purchased a building & initiated its renovation. Design is complete & construction bids are being compiled. Construction begins now for August occupancy. It converts 11,000sq ft into modern classrooms, laboratories, seminar rooms, student study & lounge space, a library, construction & handprints are budgeted at \$960,000. Estimated equipment costs are \$98,000. The total project budget is \$1,058,000. The project will employ 15-20 people. | Marietta College | 20 | 0 to 30 days | \$1,058,000 |
| Washington | Multi-purpose Agricultural Building | Project anticipates construction of a 15,000 square foot exposition and multi-purpose facility to be utilized at the Barlow Fairgrounds in west central Washington County. The Barlow Fair is the oldest independent fair in the State of Ohio and annually attracts thousands. The building will be used by the community as a multi-purpose community activity center when not employed as an agricultural event facility. New construction and widening of a connector road in a rapidly growing area of Washington County. Opened in Township exceeded 50% of the period 1990-2000 added by the construction of a \$500 million bridge to West Virginia. Road project is part of a system of projects designed to accommodate development. | Barlow Independent Fair Board | 40 | 91 to 180 days | \$430,000 |
| Washington | Moody Ridge Road Reconstruction | Improvements to both the inside and outside of a former elementary school building retrofitted for Township use. Improvements to include air conditioning and heating for expansion of a walking track and pavilion on the playground. Community in Washington County's largest unincorporated areas and is developing rapidly. | Dunham Township | 7 | 0 to 30 days | \$263,435 |
| Washington | Enhancements to the Reno Community Building | Stabilization improvements to a former school house maintained for community use as a Township Center. Improvements both internal and external to the facility. Comments focused in the north central portion of Washington County and is among the most rural in the County. Improvements for a Township Building and Community Center in a rural Township in the northwest corner of Washington County. With no urban settlement the community building is the heart of this agricultural Township. Upgrades include improvements to the building interior and installation of playground equipment. Bank of the Muskingum River to Historic Hammar on the west side of the river. This will be accomplished by stabilizing and re-decking the existing Historic Hammar Railroad Bridge. The project will include the length of the bridge and approaches at each end for a total distance of approximately 1200 ft. | Marietta Township | 10 | 91 to 180 days | \$100,000 |
| Washington | Township Building Stabilization | Stabilization improvements to a former school house maintained for community use as a Township Center. Improvements both internal and external to the facility. Comments focused in the north central portion of Washington County and is among the most rural in the County. Improvements for a Township Building and Community Center in a rural Township in the northwest corner of Washington County. With no urban settlement the community building is the heart of this agricultural Township. Upgrades include improvements to the building interior and installation of playground equipment. Bank of the Muskingum River to Historic Hammar on the west side of the river. This will be accomplished by stabilizing and re-decking the existing Historic Hammar Railroad Bridge. The project will include the length of the bridge and approaches at each end for a total distance of approximately 1200 ft. | Liberty Township | 5 | 91 to 180 days | \$25,000 |
| Washington | Palmer Community Building Improvements | Stabilization improvements to a former school house maintained for community use as a Township Center. Improvements both internal and external to the facility. Comments focused in the north central portion of Washington County and is among the most rural in the County. Improvements for a Township Building and Community Center in a rural Township in the northwest corner of Washington County. With no urban settlement the community building is the heart of this agricultural Township. Upgrades include improvements to the building interior and installation of playground equipment. Bank of the Muskingum River to Historic Hammar on the west side of the river. This will be accomplished by stabilizing and re-decking the existing Historic Hammar Railroad Bridge. The project will include the length of the bridge and approaches at each end for a total distance of approximately 1200 ft. | Palmer Township | 3 | 91 to 180 days | \$20,000 |
| Washington | Harmar Bridge Renovation/Restoration | The purpose of this project is to provide a vital link for pedestrian and bicycle traffic between our Historic Downtown and Historic Hammar neighborhoods. This direct link between our two historic downtown business districts will act as a catalyst for economic development. It will also help divert much of the bicycle traffic from our two motor traffic bridges which are ill equipped to handle bicycles. The project has been reviewed and is supported by the Mayor's Alternative Transportation Advisory Committee (MATAC) and is included in the County-wide Alternate Transportation Plan. | City of Marietta | 10 | 91 to 180 days | \$2,072,984 |
| Washington | River Trail Phase 3 | Shared use path. River Trail Phase I was funded with an ODOT Transportation Enhancement Grant and was completed in 2005. River Trail Phase II has been awarded an ODOT Transportation Enhancement Grant and is scheduled for construction in 2009. This project, River Trail Phase III, would continue from where Phase II ends at Fourth and Ohio Streets. River Trail Phase III will extend the shared use path from Fourth and Ohio Streets to Duck Creek where it empties into the Ohio River. The entire proposed trail will be off street with the exception of the Pine Alley section which is extremely low traffic. The purpose of this project is to provide one more link in the planned alternative transportation route along the scenic Muskingum and Ohio Rivers. The public will benefit with a better quality of life through increased historic tourism and economic growth. The project has been reviewed and is supported by the Mayor's Alternative Transportation Advisory Committee (MATAC) and is part of the County-wide Alternate Transportation Plan. | City of Marietta | 12 | 91 to 180 days | \$339,054 |
| Washington | Dist 10, WAS CR 9-8.55 (PID 83259) | Forest Highway Project - Full depth pavement restoration, guardrail and pavement markings from CR to CR 544. This project will provide an opportunity for Washington State Community College to develop a regional training center that accommodates distance learning as well as traditional Health Science coursework. | Ohio Department of Transportation | 3 | 31 to 90 days | \$85,662 |
| Washington | Increasing Opportunities in Healthcare through Con | Outputs: 100 participants in training program 72 employees using program Improved access to skilled, trained workforce This project would support the efforts of a County Career Coordinator to link students and businesses in job exposure opportunities. It will address the need for prepared students with job skills needed to area work demands. By exposing graduates to various job experiences, students will be better prepared to choose appropriate career paths and seek required training. Linking students with businesses will develop networking pathways to future employment. | Washington State Community College | 0 | 31 to 90 days | \$88,855 |
| Washington | Teen Career Awareness Initiative | Outputs: 71 new job created Improved access to career training/opportunities for all students in grades 7 - 12 throughout Washington County Increased number of high school seniors enrolling in post-secondary education/training plan for after high school | Washington County Family & Children First Council | 1 | 0 to 30 days | \$32,250 |
| Washington | Historic Hippodrome/Colony Theatre Restoration | This project will complete funding to restore the Historic Colony Theatre in Downtown Marietta. Renovation will result in a fully-usable 20,000 square foot 1,000 seat theatre with fully-modernized rigging, sound, light, projection, and conference capacity that will provide year-round entertainment and meeting space for a 10-12 county region. Outputs: 77 staff jobs created 16 temporary construction jobs created 2 jobs retained Permanent home created for the River Cities Symphony An economic catalyst for area restaurants, shops, and businesses | Hippodrome/Colony Historical Theatre Association | 9 | 31 to 90 days | \$1,000,000 |
| Washington | Muskingum River Hydro-power | 15MW hydro power project. Clean energy | DiverseCo, LTD | 400 | 181 days or more | \$65,000,000 |
| Washington | repair of boat ramp used by rescue boats | Repairing a private boat ramp that is used by rescue boats on busy summer days when public ramp is clogged by boaters, also used by Coast Guard department to police river activity. will need to have river end of ramp rebuilt to allow deeper insertion of boats into water An upgrade to an existing water line to a residential/development community established on island in the Muskingum River. Buell Island is home to the community park which annually draws tens of thousands of visitors to annual festivals held in the spring and the fall of each year. Increased capacity is needed for the protection and sanitation. | dave's marine | 6 | 181 days or more | \$500,000 |
| Washington | Village of Lowell Buell Island Water Line Upgrade | Repairing a private boat ramp that is used by rescue boats on busy summer days when public ramp is clogged by boaters, also used by Coast Guard department to police river activity. will need to have river end of ramp rebuilt to allow deeper insertion of boats into water An upgrade to an existing water line to a residential/development community established on island in the Muskingum River. Buell Island is home to the community park which annually draws tens of thousands of visitors to annual festivals held in the spring and the fall of each year. Increased capacity is needed for the protection and sanitation. | Village of Lowell | 10 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Washington | W.P. Snyder Jr Towboat Restore Superstructure & In | W. P. Snyder, Jr., is the only remaining steam-powered stern-wheel towboat in the United States and is designated as a National Historic landmark. This project will virtually complete the full restoration of the vessel. The steel superstructure will be repaired, the paddlewheel rebuilt, and the hazardous electrical system will be replaced with a safe, efficient one. The corroded steel deck will be replaced with new plating. The entire vessel will be painted. Welders, carpenters, painters, and electricians will be employed for approximately six months. The project will ensure that the vessel is weather tight and the interior is safe and will restore and preserve the W. P. Snyder for use as an educational tool about Ohio history. | Ohio Historical Society | 10 | 91 to 180 days | \$665,500 |
| Washington | Warren Water Major Water System Upgrades | Project anticipates water supply distribution upgrades including storage tanks (2) and transmission lines to enhance service in the eastern and central portion of Washington County. Warren also supplies water to an adjacent system which serves the northern and eastern portions of the county and maintains an emergency connection to the system which provides service to the western sections of Washington County. This project is the full system for most of Washington County. | Warren Community Water & Sewer Association | 50 | 91 to 180 days | \$1,000,000 |
| Washington | New Business Development Initiative | Definite Salter LLC is an Ohio firm headquartered in Marietta, OH formerly launched on January 1, 2009 jointly by Ottensberger & White, Inc., Marietta, OH (est. 1888) and Salter & Associates, LLC, Vienna, WV (est. 1988). The new company retained a extensive plant in Ohio and imported 4 new jobs from Vienna, WV. Our objective is to establish a New Business Development program managed by a former employee of Scott Paper Cleveland OH, laid-off effective February 29, 2009. This person will manage existing and newly identified opportunities in the science, business and drug discovery industries in the USA and abroad which require highly vertical, integrated technical marketing services as we have provided to the industry for over 24 years. Our clients include companies in Singapore, Japan and throughout the USA. We cannot fund this effort through internal working capital. We have never received assistance from any outside government agency. We are registered with the Federal Procurement Agency as a small business, 100% veteran owned. We need this in-house person to manage and follow-up on opportunities already identified. All positions include paid medical, disability, 401k and other benefits. | White Salter LLC | 9 | 0 to 30 days | \$92,335 |
| Washington | Village of Matamoras - Installation of Water Meter | Water customers are currently not metered; the use of a flat rate is not an equitable basis for customer billing, and leads to wasteful water consumption by customers. The project includes 550 meters in sizes ranging from 3/4" to 2" to be installed in pits. Metering package includes meter reading "gear", data collector, software, and startup services. | Village of Matamoras- Burgess & Niple | 10 | 0 | \$591,000 |
| Washington | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming at a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Estimated service price is much more affordable than leasing cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be Internet access and phone service, with a goal of adding IPTV. TV services packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with other grant monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will increase commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Washington | Project Roof Replacement | Replace two existing roofs within our School District with new membranes. One building is located in Matamoras and the other is in Newport. | Frontier Local School District | 6 | 31 to 90 days | \$256,000 |
| Washington | Project Cable | Run approximately 1 mile of cable to Frontier High School. | Frontier Local School District | 5 | 31 to 90 days | \$75,000 |
| Washington | Project Radios | Purchase new radios for school buses for communication. There is no cell phone service in many areas of District. | Frontier Local School District | 0 | 0 to 30 days | \$7,500 |
| Washington | Route 7 Rail/Passenger Bridge Sustainability | Repair or replace Route 7 rail & passenger bridge piers. Bridge has been derated due to stress cracks in pier caps. Bridge is used by EMT, Police and American Dynamics and must be repaired to allow regular switching operations to continue. | Eramet Marietta, INC | 10 | 0 to 30 days | \$250,000 |
| Washington | Workforce Sustainability, Growth, & Measurement | This project will impact over 40 companies in eight southeastern Ohio counties. Large companies such as Bakley Advanced Polymers, AMP Ohio, H&A, SKF International and large healthcare facilities (3,000+ employees) will benefit through measurable advanced skills. Many of the training tools already earn credit toward associate degrees at local community colleges. A systemic impact will be made toward the attainment of higher education and credentials that will make Ohio students more competitive economy. Local companies are in need of skills training to train a safe and efficient workforce in order to sustain and expand their presence in Ohio. This program will encompass other training and educational groups and include local service agencies as a cost-share and effective programming is delivered on-site to strengthen our workforce. Targeted workforce areas include medical, industrial, computer and networking technology, and essential skills in communication, service, and sales. Nationally recognized credentialing and/or college credit will be included in the measurable outcomes of this project. Health Field House at High School \$200,000 All weather running track at High School \$140,000 High School Stadium Lights \$100,000 High School Chemistry and Biology Labs \$150,000 Newly-Centered Elementary HVAC-Restorations \$300,000 Replacement of high school heating system \$2,600,000 Estimated Total \$3,630,000 | The Wash. Co. JVS District | 500 | 31 to 90 days | \$750,000 |
| Washington | Maintenance and Updates | Estimated Total \$3,630,000 | Fort Frye Local School District | 120 | 91 to 180 days | \$3,630,000 |
| Washington | Glycerin Purification | Our plant needs to add some equipment to completely treat the biodiesel glycerin so that we can make a high grade of glycerin usable to the market and also a high strength methanol (99.7%) that can be recycled back to the biodiesel companies. For the glycerin purification, a thin film evaporator to distill off salts is needed. Also, tankage and instrumentation is required for surge capacity and process control respectively. For the methanol purification, we need to add approx. 30' high distillation tower to provide the mass transfer and residence time to purify the methanol. Tankage for storage of feed and finished products is necessary as well. There are not a lot of good outlets for biodiesel glycerin but we are one of them. The glycerin coming from the plants is of very poor quality containing water, methanol, unreacted fats and fatty acids and the glycerin. Lots of processing is needed to make the product salable. We have a lot of experience and can show the plant and expansion plans at any time. Our local rep - Jay Donohoe as well as Jan Dahler from the Honorable Charles Wilson's office has been to see the plant. | Coil Specialty Chemicals, LLC | 5 | 0 to 30 days | \$1,950,000 |
| Washington | LTV Public Transit Bus | One new replacement light transit vehicle (bus) to be used in public transit in the city of Marietta and Washington County, Ohio. Bus will be owned by Washington County and operated by CMBL Bus Lines | Washington County Commissioners (WMCAP) | 10 | 31 to 90 days | \$70,000 |
| Washington | Installation of Electric Co-generation Units | Currently, Washington County has several energy intensive manufacturing facilities. With rising energy prices and alternative energy requirements under a new Ohio law, at least four local industries who employ about 900 total people) are contemplating the installation of at least 4 electric co-generation units. These units take waste heat/gas/products of an existing industrial process and create steam, which turns a turbine and generates electricity with no additional emissions to the environment. A systemic impact will be made toward the attainment of higher education and credentials that will make Ohio students more competitive economy. Local companies are in need of skills training to train a safe and efficient workforce in order to sustain and expand their presence in Ohio. This program will encompass other training and educational groups and include local service agencies as a cost-share and effective programming is delivered on-site to strengthen our workforce. Targeted workforce areas include medical, industrial, computer and networking technology, and essential skills in communication, service, and sales. Nationally recognized credentialing and/or college credit will be included in the measurable outcomes of this project. Health Field House at High School \$200,000 All weather running track at High School \$140,000 High School Stadium Lights \$100,000 High School Chemistry and Biology Labs \$150,000 Newly-Centered Elementary HVAC-Restorations \$300,000 Replacement of high school heating system \$2,600,000 Estimated Total \$3,630,000 | Southeastern Ohio Port Authority | 160 | 91 to 180 days | \$40,000,000 |
| Washington | \$206K investment Reduces Healthcare costs by \$1.2 | Replace 80 year old gas boiler system used to heat water in an indoor pool and towel rack room and changing area to become handicapped accessible. Remove steps to showers, install chair lift in pool, repair ramp to pool. Pool is currently used by 155 people, over 23,000 times each year. An additional 155 people can be anticipated if the facility was handicap accessible. | The Betsey Mills Club | 2.8 | 31 to 90 days | \$206,000 |
| Washington | Window Replacement to increase energy efficiency | Replace 122 single-pane, 80-year old windows in a building listed on the National Register of Historic Places. Building is the birthplace of Charles Dawes, 30th Vice President and winner of the Nobel Peace Prize. Very large, single-pane windows would be replaced with Pella double-pane, energy star windows. 25%- 32% energy savings is expected according to The Efficient Windows Collaborative. Wood frame windows will be used in order to maintain the historic integrity of the building and gain the additional efficiency of a solid substance instead of using a hollow vinyl frame. This historic building provides vital services to the community including Children, housing for low income women, indoor heated pool used by rehab patients and those living with arthritis. | The Betsey Mills Club | 0.35 | 31 to 90 days | \$264,000 |
| Washington | Childcare Window Replacement | Replace 26 single-pane, 100-year old windows in an infant childcare center. | The Betsey Mills Club | 0.2 | 31 to 90 days | \$7,000 |
| Washington | Beverly Cops Position | We are village in southeastern Ohio, who is great need for an additional police officer. We still have hours through the week that we have no law enforcement coverage. If an officer has to take a day off we can't afford to pay over time for the other officers to cover their shift. Hiring an additional officer would provide 24 hours coverage for the community and decrease crime rate in the area. It would take us up to full staff and easy the work load of the other officers. | Beverly P.D. | 1 | 0 to 30 days | \$120,000 |
| Washington | Tri County Rural Water & Sewer District - Office B | New building for the District offices. The current offices are housed in an office trailer on a rented lot. The District wants to construct a new office building on its well fled property. The building will include a maintenance garage, office space, and a conference room. Tri-County has experienced most problems in their existing office, which is in poor condition. A new office building will replace the existing structure. In addition, the conference room of the new building could be utilized for public meetings of local groups. The project will include the construction of the new office building complete with a sanitary grinder pump station and 4,500 feet of force main. The force main will transport the sanitary wastes to an existing sanitary sewer operated by Tri County. | ME Companies, Inc. | 20 | 91 to 180 days | \$350,000 |
| Washington | Fairfield Twp. Chip and seal | Prime coat and double chip and seal all Fairfield Twp roads road conditions greatly improved. | Fairfield Township | 0 | 181 days or more | \$1,150,000 |
| Washington | Tri County Rural Water & Sewer District - Emergenc | Emergency Backup Generator The proposed project will provide five fixed in place generators to provide emergency backup power for the wellfield/treatment plant, three booster stations on the existing distribution system, and the system office. These generators will provide backup power to the sole source of water for the system and will insure they can maintain possible water service during power outages. These stations have had power for extended periods and generators had to be added in order to maintain service. The addition of emergency backup power is critical to Tri-County being able to provide continuous service. | Tri County Rural Water & Sewer District- ME Companies, Inc. | 15 | 31 to 90 days | \$225,000 |
| Washington | Highland Ridge Water - Emergency Backup Generator | Emergency Backup Generator The proposed project will provide two portable generators to provide emergency backup power for these booster stations on the existing distribution system and the system office. These generators will provide backup power to the sole source of water for the system and insure they can maintain possible water service during power outages. These stations have had power for extended periods and generators had to be added in order to maintain service. The addition of emergency backup power is critical to Highland Ridge being able to provide continuous service. | Highland Ridge Water- ME Companies, Inc. | 10 | 31 to 90 days | \$85,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Washington | Tick Ridge Road Improvements | This would chip and seal 33 miles of roadway in Fairfield Township. Our Township could not afford due to current tax status as we have dirt roads in our Township. This would eliminate the need for dust control and an environmental fee to receive road work to be focused on maintaining and snow removal. This Stimulus would improve the flow of the Fairfield Township residents. We have no manufacturing or business to help support our township so we have very little monies that come through Washington County. | Fairfield Township | 3 | 91 to 180 days | \$957,000 |
| Washington | Revision to: Gilman Ave. Resurfacing & Sidewalk In | The project consists of overlaying approximately 3,875 feet of the existing concrete with a 2 1/2" thick asphalt intermediate course and a 1 1/2" thick asphalt surface course. Removal of the existing 10' wide curb on both sides of the roadway and installation of approximately 1,280 feet of COOT Type 6 curb. Removal of the existing 7' wide curb on the west side of the roadway and installation of a new 7' wide 4" thick sidewalk. Installation of a new 7' wide 4" thick sidewalk on the east side of the roadway, extending approximately 1,398 feet from Putnam Ave. to the Washington St. Bridge. There will also be installed 16 ADA compliant curb ramps along the section of roadway. The roadway will be striped with one 10' wide lane each direction and one 10' wide parking lane on each side of roadway for a minimum total width 40'. | City of Marietta | 30 | 91 to 180 days | \$863,139 |
| Washington | Revision to: Various City Street Paving Projects | This project is a resurfacing of existing asphalt concrete streets and includes reconstruction of the ADA Curb Ramps required to be brought into compliance with current ADA requirements. The total City streets were selected based upon the use of MicroPAVER Pavement Mgmt Software developed by the U.S. Army Corps of Engineers and implemented by the City of Marietta in 2008. A 2009 Work Plan was prepared by K&E Associates which includes 54 City streets totaling approx. 102,000 sq. ft. The total length of city streets that would be paved totals approximately 7.8 miles out of a total network of 37 miles. The city pavement condition index (PCI) rating for all of the city streets would improve from 67.3 to 71.8 as a result of work. Project would benefit Marietta (population of 14,515) as well as outlying areas of Washington County (population of 91,576). The total funds required for this project are \$1,200,000. Approximately \$250,000 to be spent on reconstruction of 100 curb ramps to meet current Federal ADA requirements. | City of Marietta | 42 | 31 to 90 days | \$1,200,000 |
| Washington | Student Housing Project | Construct a new residence hall to replace Parsons Hall, completely renovate two other campus residences, and add central air conditioning to the existing residence complex. This project would replace 225 beds, add 100 new beds, and provide central air conditioning to 400+ beds on campus. In the past several years, Marietta College has experienced consistent capacity shortfalls. Recently the College has had to release up to 100 students to off-campus housing due to insufficient housing on campus. The rising enrollment trend at the college is expected to continue, so the need for adequate housing is both a current and future need. | Marietta College | 80 | 31 to 90 days | \$19,000,000 |
| Washington | Revision to: Intermodal Passenger Accessibility & | Improve passenger access and all weather bus shelters and elevators adjacent to the Intermodal facilities nearing beginning construction at the airport in Marietta. Project complements the Intermodal Center with improved access for bus passengers and provides a better design for ADA accessibility to existing stop. The project also includes resurfacing driveway to accommodate all types of passenger buses. The enhancement would include lanes and parking areas for private autos utilizing related attractions; i.e., visitor's center, excursion buses, small boat marina and the trail. Project constructed on publicly owned land at the airport site and will be constructed simultaneously with the Intermodal Center. | City of Marietta | 38 | 91 to 180 days | \$1,100,000 |
| Washington | Revision to: Harmar Bridge Renovation/Restoration | The project will be a continuation of the River Trail shared use path. This project would connect the existing River Trail which runs along the bank of the Muskingum River to Historic Harmar on the west side of the river. This will be accomplished by rehabilitating and re-decking the existing Harmar Railroad Bridge. The project will include the length of the bridge and approaches at each end for a total distance of approximately 1,200'. The purpose of this project is to provide a safe pedestrian and bicycle trail through our Historic Downtown and Historic Harmar neighborhoods. This direct link between the two historic downtown business districts will act as a catalyst for business development. It will also help divert much of the traffic from the two major traffic bridges which are ill equipped to handle bicycles. The project is supported by the Mayors Alternative Transportation Advisory Committee (MATAC) and is included in the County-wide Alternate Transportation Plan. | City of Marietta | 73 | 91 to 180 days | \$2,072,984 |
| Washington | Highland Ridge Water - Bearcreek Waterline Extensi | The proposed project will include waterline extensions into Washington County. The project will include waterline, meter pits, valves, hydrants, and miscellaneous appurtenances. | Highland Ridge Water- ME Companies, Inc. | 20 | 0 to 30 days | \$350,000 |
| Washington | Recreation improvement | Purchase new playground equipment from an Ohio manufacturer and install in our 3 ac. Community playground. This will allow the children in our area to play on the new equipment and get exercise to help fight obesity in Ohio. | The East Muskingum Civic Organization | 2 | 31 to 90 days | \$20,000 |
| Washington | Oak Grove Recreation Center | Improve recreational facility. Construction of full playground, shelter, and maintain the current paved walking trail. The Oak Grove Recreation Center is an old elementary school purchased from Marietta City Schools. Paid for by a 5 year levy which showed local residential support, and much of the renovations were done by local grants, donations of time, labor, and materials. The continued success of the project will be dependent on fulfilling the promise of creation of recreation opportunities to the local people and their children. The flat roof of the school could also use some repair and improvement. | Muskingum Township | 5-10 | 31 to 90 days | \$100,000 |
| Washington | Paving Project 2009 | Improvement to the nearly 50 miles of roadway in Muskingum Township to make safer access for fire and EMS, school bus traffic, general travel, and recreational and historical tourism. Improvements would include ditch and drainage improvement, culvert replacement, paving and berming. | MUSKINGUM TOWNSHIP | 12+ | 91 to 180 days | \$750,000 |
| Washington | chip and seal solid based township roads | Prepared road, primed, double chip and seal at a cost of about \$37,000.00 per mile for 22 - 23 miles. This would encourage more people willing to move to a rural area if they don't have to drive on a dirt road. Also seal for school buses and definitely would be a benefit to our rural community. Salem township is close to Harston 77 so improving our own roads would be an asset for improving job development. | Salem Township of Washington County | 15 | 31 to 90 days | \$740,000 |
| Washington | WATERFORD TOWNSHIP ROAD IMPROVEMENTS | CHIP SEAL 15 MILES OF TOWNSHIP ROADWAYS. RESURFACE 3 MILES OF TOWNSHIP ROADWAY WITH ASPHALT. SEVERAL ROADWAYS SERVE EXISTING INDUSTRY AND ONE LARGE PROPOSED INDUSTRIAL SITE. | WATERFORD TOWNSHIP WASHINGTON COUNTY, OHIO | 18 | 31 to 90 days | \$500,000 |
| Washington | Restructuring Chip@Seal Rds. | This is to restructure existing roads that are chipped and sealed. This entails approx. 18 miles Redding base work needed. Replacing approx. 10-15 culverts. Sealing the surface and then applying a double chip@seal. This should give approx. 5-6 yrs. life to road. Thank you, Phil Smiley, Trustee | Newport Township | 6-10 | 31 to 90 days | \$630,000 |
| Washington | Volunteer Fire Department Building and Grounds Imp | Necessary repairs to an existing Fire Hall and Construction of a pavilion adjacent to the fire hall as for use during community events and fund raisers. The Oak Grove Community is situated in Muskingum Township west of the Muskingum River and is a rapidly developing community. Project anticipates the construction of an additional emergency service building in an unincorporated Township in the east central portion of Washington County. Growth of the township has necessitated expansion to respond to added responsibilities, enhance basic training and provide office and community activity space. | Oak Grove Volunteer Fire Department | 5 | 31 to 90 days | \$10,000 |
| Washington | Expansion of an Existing Emergency Services Buildi | Improvement of existing roads for the benefit of residents, school buses, mail carriers and emergency vehicles in this poverty stricken area. The improvement of the roads would help bring industry to this area, creating needed jobs and helping put unemployed people to work for the long term. This area has approx. 40% low to moderate income at this time. | Fearing Township Volunteer Fire Department | 20 | 91 to 180 days | \$150,000 |
| Washington | Road construction | Construction of a regional emergency services training facility to serve the City of Blaine, Washington and Wood Counties (WV) as well as safety components from area industries. The City of Blaine is a recognized leader in safety training (ret. an McQuay Valley) and maintains a burn building and existing hazardous materials, severe highway accidents and a large and diverse population. Construction will facilitate optimal use of training space. | Grandview Township | 15 | 0 to 30 days | \$650,000 |
| Washington | Construction of an Emergency Services Training Fac | Project anticipates construction of an addition to an existing emergency service facility in a western Washington County community. Project essential to the continued effective operation of the fire and EMS component owing to overcrowding as he need for training, office and community meeting space. | Belpre Volunteer Fire Department | 25 | 91 to 180 days | \$350,000 |
| Washington | VFD Building Expansion | Construction of satellite emergency services building to serve an extremely low income community and township in extreme northern Washington County. Service area will include 177 in Austine and Salem Townships. Building will be staffed by volunteers from the Salem Township Volunteer Fire Department. | Wesley Township Volunteer Fire Department | 25 | 91 to 180 days | \$150,000 |
| Washington | VFD Satellite Building Construction | Project anticipates several projects essential to the successful operation of a school district encompassing two counties in southeastern Ohio. Among the projects are construction of an athletic field house, installation of an all-weather running track and stadium lights, development of a new chemistry and biology labs and heating and air conditioning improvements at an elementary school and the district high school. | Village of Macksburg | 20 | 91 to 180 days | \$200,000 |
| Washington | Various Projects Associated with Improved School O | Projects anticipate the construction of a new firehouse and related meeting and community rooms to replace an overcrowded building in a rapidly developing heavily industrialized portion of Washington County. Given its location, the department has a significant responsibility for handling accidents involving hazardous materials, severe highway accidents and a large and diverse population. Construction will facilitate optimal use of training space. | Fort Frye Local School District | 150 | 91 to 180 days | \$3,000,000 |
| Washington | Fire Department Building Construction | Purpose of this proposal is to develop a digital media firm that would develop computer based educational materials for all levels of traditional educational facilities. Additionally, the above mentioned firm will develop computer based training programs for industrial facilities state and nation wide. | Warren Township Volunteer Fire Department | 25 | 91 to 180 days | \$1,100,000 |
| Washington | Digital Media/Computer Based Training Production C | The Washington County Sheriff's Office is requesting funding for the purchase of three body worn digital video recording devices. Our agency does not have any body worn device capable of capturing video. We do have body worn devices that capture audio, but they are antiquated and obsolete which compromises the safety of persons receiving the device. Our agency has a Detective Bureau that is currently investigating violations. We also participate in a County Major Crimes Task Force which also works a large volume of narcotics cases. These devices would be instrumental in enhancing these investigations, while aiding in their prosecution. These devices could also be used in other criminal investigations which are not necessarily narcotics related. | SRS Media | 15 | 0 to 30 days | \$1,000,000 |
| Washington | Purchase Body Worn Digital Recording Devices | The Washington County Sheriff's Office is seeking funding for the purchase of two Binlog GPS tracking devices. These devices are used by our Detective Bureau and the County Major Crimes Task Force for training suspect or target individuals. These units are primarily used in the area of narcotics investigation and enforcement, which is a major concern in our County and Southeastern Ohio. These units could also be used for intelligence gathering in criminal investigations other than narcotics investigations. The addition of these units would greatly enhance our investigative abilities while increasing our rate of prosecution. | Washington County Sheriff's Office | 0 | 31 to 90 days | \$9,590 |
| Washington | Purchase GPS Tracking Devices | The Washington County Sheriff's Office is requesting funding for four uniformed officers. The agency currently has two positions that are being vacated due to health issues. Due to budgetary constraints, we do not anticipate filling these two positions based on our current financial situation. The agency further believes that we may be required to eliminate two more uniformed officer positions. Elimination of these positions would impact the service we are able to provide to citizens of the County, along with compromising the safety of the current staff. | Washington County Sheriff's Office | 0 | 31 to 90 days | \$14,590 |
| Washington | Maintain and Augment Current Staffing | The Washington County Sheriff's Office is requesting funding for the replacement of the seventeen ballistic entry raid vests used by our Special Response Team. These raid vests provide maximum protection to officers on this high risk squad when officers are serving high-risk warrants. The current raid vests are approximately twelve years old. This is outside the recommended effective range as stipulated by the manufacturer. Our agency uses the Special Response Team within our county for high risk arrests, high risk search warrants, and hostage and barricaded situations. We have also made this team available to neighboring counties who do not have this type of resource. | Washington County Sheriff's Office | 4 | 31 to 90 days | \$293,372 |
| Washington | Replace Ballistic Body Armor | The Washington County Sheriff's Office is requesting the above listed amount to replace the engine in our helicopter. The current aircraft engine has approximately one hundred hours remaining before we will be required to take it out of service. Our agency uses this aircraft for missions within our county, and we also have used it to assist various counties within Southeastern Ohio. Since our aircraft was acquired in 1984 it has been used on approximately two hundred and twenty-two missions both within our county and other counties. The majority of these missions have been for law enforcement purposes, while several have been rescue missions for the preservation of human life. It was required to ground the aircraft, will leave the Southeastern portion of the State without local air support capabilities. | Washington County Sheriff's Office | 0 | 31 to 90 days | \$51,000 |
| Washington | Replacement of Helicopter Engine | People problems in Ruthe addition (leach fields unable to leach) Extend Sewer line to pick up Ruthe addition 1,880 linear feet of 8" sewer line 1,380 linear feet of house laterals | Washington County Sheriff's Office | 0 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Washington | Palmer Waterline Extensions | Palmer Waterline Extensions - The proposed project will provide water service to Palmer Township in Washington County. The project will serve approximately 100 customers with clean potable water. Private water supplies in the area are of poor quality and limited quantity. Many residents rely upon springs and cisterns which present health threats for contamination. For these reasons, residents in the area have petitioned Tri County to extend water service into Palmer Township. The proposed waterline extensions will include 114,000' of waterline, 3,000' of 3/4" service line, service meters, valves, hydrants, and other necessary appurtenances. 1. Storm windows and doors, multi-glazed windows and doors, heat-reflective glazed and coated window and door systems, additional glazing, reductions in glass area, and other window and door system modifications. 2. Automatic Energy Control System. 3. Heating, ventilating or air conditioning system modifications or replacements 4. Cabling and re-wiring/renovating 5. Replacement or modification of lighting fixtures to increase the energy efficiency of the system without increasing the overall illumination of a facility, unless such an increase in illumination is necessary to conform to the applicable state or local building code for the proposed lighting system. 6. Co-generation systems that produce steam or forms of energy such as heat as well as electricity, for use primarily within a building or complex of buildings. 7. Energy recovery systems. 8. Any other modification, installation, or remodeling approved by the Legislative Authority of the Municipal Corporation, the County Commissioners or the Board of Township Trustees as an energy conservation measure. | Tri County Rural Water and Sewer District | 20 | 91 to 180 days | \$1,377,300 |
| Washington | City Wide Energy Conservation Project | 1. Storm windows and doors, multi-glazed windows and doors, heat-reflective glazed and coated window and door systems, additional glazing, reductions in glass area, and other window and door system modifications. 2. | Washington | Globe Metallurgical Beverly Charcoal to Solar Ener | Globe Metallurgical, Inc., a subsidiary of Globe Specialty Metals, produces silicon metal for use in the chemical, automotive, aluminum, electronic, and solar industries. Funding will facilitate the construction of a manufacturing plant to produce charcoal, which is used in the production of silicon metal. This silicon metal is further refined into solar-grade silicon, which is sold to manufacturers of photovoltaic panels, wafers, and cells. Preliminary investigation with EPA permitting has already been completed with emission credits in place, creating a shovel ready project. The use of charcoal, instead of coal, in the production of silicon metal will reduce sulfur emissions by 200 tons per year as well as NOx and CO2 emissions. The project is expected to create 200 jobs once the facility is fully operational. | Globe Specialty Metals | 200 | 91 to 180 days | \$20,000,000 |
| Washington | Palmer Waterline Extensions | Palmer Waterline Extensions - The proposed project will provide water service to Palmer Township in Washington County. The project will serve approximately 100 customers with clean potable water. Private water supplies in the area are of poor quality and limited quantity. Many residents rely upon springs and cisterns which are potential health threats for contamination. For these reasons, residents in the area have petitioned Tri County to extend water service into Palmer Township. The proposed waterline extensions will include 114,000' of waterline, 3,000' of 3/4" service line, service meters, valves, hydrants, and other necessary appurtenances. Including the 10 poorest and at 6 ARC-designated counties in Ohio. Once SOHCN members have reliable, high-speed broadband connectivity, telemedicine equipment for rural hospitals, clinics and homes will improve the continuity and quality of care while reducing costs by minimizing hospital stays, travel/transport, and eliminating duplication of services. Critical and intensive care consultations from urban medical centers to rural hospitals save lives, time and money while providing continuing medical education for geographically isolated physicians. At-home telemedicine helps patients better understand and manage chronic conditions, thereby increasing medication compliance and improving outcomes. Requested project funds will primarily be used to purchase telemedicine equipment. Increased efficiencies and expected telemedicine reimbursement models for telemedicine (DNR to pay-for-performance) will enable Southern Ohio Health Care Network to pay for the state over operating costs. Unemployment. The Connecting Appalachia World Class Connectivity for Industrial Parks project will bring fiber optic broadband connectivity, supporting high-speed voice, data and video communications, to 34 industrial parks across the 34 rural counties via the Southern Ohio Health Care Network's Fiber-Optic Backbone. For redundancy, physically diverse fiber runs will minimize service disruptions from cable cuts. Piggy-backing will also be used to extend fiber-optic cables from the local telephone company and Internet Service Provider backbones to the sites. This combination of facilities will create a competitive environment, providing a rich set of services at urban-market rates that will attract businesses looking to relocate. Community Points-of-Presence (C-POP) will be built in each park to house fiber-termination and electronic equipment. These small computer rooms provide power and security systems, environmental controls, the suppression, and remote monitoring. The network will feature primary towers linked via fiber to the Southern Ohio Health Care Network's (SOHCN) backbones. The primary towers will deliver high-speed point-to-point connections reaching any business location and at secondary towers in the 17,000 square mile service area. 215 secondary towers will blanket over 5,000 sq. mi. of rural expanse with fixed wireless broadband. An additional 110 wireless towers will provide backhaul to reach areas where the signal has been degraded by terrain, providing nearly universal coverage. The large infrastructure build creates jobs immediately, stimulating the growth of Wireless Internet Service Providers. The resulting network provides basic services that satellite service at a much lower cost than building copper and fiber-optic cables to every home & business in sparsely populated areas. Broadband infrastructure is essential to economic development, education, health care & tourism in Appalachian Ohio. | Tri County Rural Water & Sewer District | 20 | 91 to 180 days | \$1,377,300 |

| Washington | Repair the dam to the lake | The dam for lake at the Goodfellows Club park does not meet the Ohio Department of Natural Resources requirements as a Class 1 dam. The Goodfellows Club is a not for profit organization. The Club does not have the money to either repair the dam or to repair it and make it safe. The lake serves the community in the following ways: 1. It is a source for fishing for club members and their families. 2. It serves as a source of water for the local fire department. 3. It serves as a water supply for local farmers during late summer when the water supplies are low. The Goodfellows Club already has approved engineering drawings that are ready to start construction. The construction involves moving dirt to increase the width of the dam, lowering the spillway and placing a wing on the inside of the dam to prevent wave erosion. To chip-and-seal our Township roads. Work will be contracted out. The chip-and-seal that is on the roads now has almost deteriorated in many places. It has been 2 years since chip-and-seal has been done to our roads due to not having funds available. | Goodfellows Club | 12 | 31 to 90 days | \$125,000 |

| Washington | Procure Barcoding System for the Departmental Evid | The Washington County Sheriff's Office would like to procure funding assistance to purchase a Barcoded Evidence Analysis Software and Tracking system to maintain the evidence in our departmental evidence room. Our evidence room maintains approximately 8,000 to 9,000 items of evidence. The evidence technicians maintain the evidence by using evidence tracking cards and an outdated computer data tracking system. The agency maintains evidence for our officers along with officers from the County Major Crimes Task Force. The Major Crimes Task Force is comprised of officers from our agency along with other local agencies and BCI. Another consideration for this system is that it is currently used by the State Bureau of Criminal Identification. This would allow us to make simple transfer of evidence with the parallel programs. This program would greatly assist our agency in maintaining an efficient and accurate evidence storage facility. This project will train a home health care cooperative covering eight counties in southeastern Ohio. Goals include: Training for STNA, Patient Care Technician, LPN, RN, LSW, and other associated health care professions; Provide higher wage job opportunities, access to health care services, and manage reimbursement; Self-sustaining program that provides training, support, and a livable wage for those who wish to work in the health care field Outputs: Recruit and provide training resulting in certification or a degree for 168 individuals | Washington County Sheriff's Office | 2 | 31 to 90 days | \$16,062 |

|----------------|--|--|---|----------------|-------------------------------|---------------------------|
| Washington | Trucking Company Funding Request | Trucking Company Funding Request In order to comply with the new EPA 2010 diesel emission standards, Marietta Industrial Transport (MIT) is seeking stimulus, grant or loan based financing to be used in the purchase of eight new tractor trailer rigs. The units will be new or gently used, EPA compliant, equipped with premium tires, and positive displacement tank trucks. These units will be used to transport powdered minerals from the MIT facilities in Marietta, Ohio, and Parkersburg West Virginia to the customers of MIT throughout the Mid-West. MIT has been a Contract Carrier for over 75 years and has experienced first hand the great strides that have been made in diesel technology. We have PUCO and CC authority, and we are in good standing with the DOT and the State of Ohio. MIT has recently obtained several long term contracts with stable business partners which will ensure that the tractor trailer units to be purchased will be kept working for at least for the next five years. MIT maintains a truck repair and dispatch facility in Constitution, Ohio five miles south of Marietta, Ohio on State Route 7. The trucks will be maintained and dispatched from this location. The acquisition of these units will generate eight new jobs for truckers and one mechanic job. The development and implementation of a Drug Court as a means of reducing recidivism improving community outreach, enhancing employment opportunities and establishing barriers to the illicit distribution and use of street narcotics. | Marietta Industrial Trucking | 9 | 31 to 90 days | \$1,200,000 |
| Washington | Washington County Drug Court | This project is an energy efficiency project to reduce utility cost for building operations. The building is air conditioned, so the energy savings will be both for heating and cooling. The project will also create a safer school environment for the K-6 students at Belpre Elementary. Presently, many of our doors and windows do not open and close in a dependable fashion. At times windows are permanently closed due to the inoperable condition of the windows. Building security is compromised due to doors that do not shut and lock consistently. In addition, this project will provide handicapped accessibility in regards to exterior doors. This will assist many special education students and community members who benefit when a facility is made to be in ADA compliance. Although Belpre is a poor community, we ask high on the OSFC equity list. We are not expected to get very much help (16% state match), and our district is not expected to be funded for many years. Nevertheless, we have initiated a facility study with OSFC & Hammond Construction. The total cost estimates have been provided by this study. | Washington County | 4 | 91 to 180 days | \$120,000 |
| Washington | Energy Efficiency at Belpre Elementary | CHIP-AND-SEAL TOWNSHIP ROADS Stone Elementary is a temporary closed building for Belpre City Schools. It is in need of a new heating system, electrical system, plumbing, lights, windows and doors. The successful completion of this project would result in an energy efficient building that would serve as a community center and a school building. In addition, the building would be used as the site for a before and after school (latch-key) program. This would provide additional employment beyond the construction phase. The building has a nice gym that is in demand for use by various student youth groups and programs. Another goal of this renovation project is to have a site for adult education and recreation programs. In addition, the board of election uses the building as the site for six precincts within the city of Belpre. We have initiated a facility study with the Ohio School Facility Commission & Hammond Construction. The total cost estimates have been provided by this study. | INDEPENDENCE TOWNSHIP | 6 | 0 to 30 days | \$80,000 |
| Washington | CHIP-AND-SEAL | TO BUILD AN EQUIPMENT STORAGE BUILDING. CURRENT BUILDING IS FALLING IN. CHIP AND SEAL TOWNSHIP ROADS THAT THE CHIP AND SEAL HAS DETERIORATED OR HAS NEVER HAD CHIP AND SEAL. The project consists of upgrading & widening Furnace 12 to enable EMF to restart it as a production unit for high carbon ferroalloys. The project will increase the energy efficiency of Furnace 12 by reducing carbon & electric consumption by 10%. A redesign of the tapping line & ladle ladle collection system will reduce dust emissions by 10%. The Furnace 12 units will also be the catalyst for construction of a manufacturing plant by Fibroc Technology & Armstrong ("F/A") on EMF property because it will demonstrate EMF's long-term ability to generate "slag," a by-product of EMF's production processes. Slag is the main ingredient in the manufacture of Fibroc Mineral Flax, used in building products. Fibroc has been shipping the slag from EMF in Canada where it undergoes a melting & reformation process. The F/A plant location will reduce processing & distribution costs, & allow F/A to use the motion slag at the EMF facility, which reduces the electricity required to transform slag from a liquid state to nearly 50% compared to the current process in Canada. Construction of the plant will create 150 temporary construction jobs & 40 permanent production & maintenance jobs. | LAWRENCE TOWNSHIP LAWRENCE TOWNSHIP | 6 6 | 31 to 90 days 0 to 30 days | \$50,000 \$80,000 |
| Washington | Rennoation of Stone Elementary School | Belpre High School Energy Project This project is an energy efficiency project to reduce utility cost and provide a safe learning environment for students. It includes a new heating system, electrical system, plumbing, lights, windows and doors. Belpre is a poor community. The median income is well below national and state averages, and fifty percent of our students receive free or reduced lunch. Yet, we rank high (509) on the Ohio School Facilities Commission equity list. We rank high due to the personal tangible property (PTP) of local industry, which accounted for about 35% of our tax base. However, we no longer receive property tax on personal tangible property due to change in state law. Even when the OSFC gets to # 509, we are not expected to get very much help (16% state match), and our district is not expected to be funded for many years. We have initiated a facility study with OSFC & Hammond Construction. The total cost estimates have been provided by this study. | Belpre City Schools | 80 | 31 to 90 days | \$2,247,335 |

However, we no longer receive property tax on personal tangible property due to change in state law. Even when the OSFC gets to # 509, we are not expected to get very much help (16% state match), and our district is not expected to be funded for many years. We have initiated a facility study with OSFC & Hammond Construction. The total cost estimates have been provided by this study. | Eramet Marietta, Inc. | 250 | 31 to 90 days | \$3,540,000 |
| Washington | Belpre High School Energy Project | Belpre High School Energy Project This project is an energy efficiency project to reduce utility cost and provide a safe learning environment for students. It includes a new heating system, electrical system, plumbing, lights, windows and doors. Belpre is a poor community. The median income is well below national and state averages, and fifty percent of our students receive free or reduced lunch. Yet, we rank high (509) on the Ohio School Facilities Commission equity list. We rank high due to the personal tangible property (PTP) of local industry, which accounted for about 35% of our tax base. However, we no longer receive property tax on personal tangible property due to change in state law. Even when the OSFC gets to # 509, we are not expected to get very much help (16% state match), and our district is not expected to be funded for many years. We have initiated a facility study with OSFC & Hammond Construction. The total cost estimates have been provided by this study. | Belpre City Schools | 90 | 31 to 90 days | \$6,580,000 |
| Washington | Re-start custom meat packing plant | To purchase and reopen this custom processing slaughter house in Marietta. It would create 5 jobs on start up and up to 12-15 when fully operational. This plant would benefit farmers and customers in Washington, Noble, Athens, Morgan, Monroe and other counties. There is not a processing plant within 25 miles of Marietta and the ones that are located within 25 to 30 miles have a 3 month waiting list. Bank & Brooklyn Streets are primary access routes. The project is reconstruction of approximately 600 LF of roadway, storm drainage & V/L improvement. These streets will serve a business industrial area. This project is an extension of the sewer line to meet the needs of the Apostolic Christian Home. The project would require to extend the line approximately 1500'. This line would transport all the raw sewage to the City of Rittman for processing. This would be a more efficient way to process our sewage. Major extension of trunk sewer(s) to serve a large area currently not served by public sewers. Installation of approximately 17,000 feet of trench, manholes, and a one lift station. | meat packers | 5 | 31 to 90 days | \$225,000 |
| Wayne | Bank & Brooklyn Streets Improvements | Bank & Brooklyn Streets are primary access routes. The project is reconstruction of approximately 600 LF of roadway, storm drainage & V/L improvement. These streets will serve a business industrial area. | Village of Continental | 15 | 31 to 90 days | \$360,000 |
| Wayne | Sewer Line Extension for the Apostolic Christian H | This project is an extension of the sewer line to meet the needs of the Apostolic Christian Home. The project would require to extend the line approximately 1500'. This line would transport all the raw sewage to the City of Rittman for processing. This would be a more efficient way to process our sewage. | Apostolic Christian Home | 25 | 31 to 90 days | \$350,000 |
| Wayne | Extend South Side Sewer | Major extension of trunk sewer(s) to serve a large area currently not served by public sewers. Installation of approximately 17,000 feet of trench, manholes, and a one lift station. | City of Orrville - Orrville Utilities | 30 | 91 to 180 days | \$2,963,270 |
| Wayne | Wooster - EB-5 Foreign Investment Center | The Wooster Growth Corporation (City of Wooster's Community Improvement Corporation) is the first entity within the State of Ohio to create an EB-5 regional foreign investment center. This center has been created to act as a mechanism for funding of large regionally economy shifting projects in Northeast Ohio. The center, known as NODC: Northeast Ohio Regional Center is requesting financial support for the marketing of this program. Initial funding for this project, will go to support the development of the Ohio State University BioHo Research and Development Park, located in the City of Wooster, Ohio. | City of Wooster, Ohio | 500 | 0 to 30 days | \$250,000 |
| Wayne | South Main Street Sanitary Sewer Improvements | Sanitary sewer improvements will benefit entire school district. 2,161 persons in Village and others from outlying areas served by the school system. | Village of Creston | 50 | 31 to 90 days | \$383,500 |
| Wayne | Pine Street/Jackson Road Waterline Loop | The project is looping of two dead-end waterlines on Pine Street and Jackson Road in the SW quadrant of the Village. Potential development 50 acres of undeveloped land | Village of Creston | 15 | 31 to 90 days | \$250,000 |
| Wayne | Burbank Street Culvert Replacement | The project includes replacing existing culverts with approximately 200 LF of 84" diameter concrete installed by open cut excavation. | Village of Creston | 15 | 31 to 90 days | \$250,000 |
| Wayne | Papermill Land Reclaim | The Rittman papermill back in the 1970's employed approximately 2,500 residents. In 2008 the plant owned by Carusstar Paper Company went out of business in Rittman due to high costs of meeting the state to meet EPA standards and compliance. When the plant went out of business it was the third highest employer in Rittman with approximately 150 employees. Now the plant sits vacant and is a major blight to the community. This is a major project for Brownfield sites. Rittman is surrounded by productive farmland and putting in a new industrial park will take up that productive land. This land can be reclaimed and productive as this is a railroad spur already incorporated. This project would provide Phase 2 and 3 studies as well as removing EPA issues to the final stage of tearing down and reutilizing the property for new use. We would be ready to start Phase 2 studies immediately, as Phase 1 has already been completed. The closing of this plant left the City of Rittman financially stricken in operations, a/c, generate electric utilizing biogas from anaerobic digesters at our wastewater plant. Electric generated would be used on-site to reduce electric costs and demand. We consider this project a renewable source of green energy. | City of Rittman | 25 | 31 to 90 days | \$8,000,000 |
| Wayne | Biogas Electric Generation | Generate electric utilizing biogas from anaerobic digesters at our wastewater plant. Electric generated would be used on-site to reduce electric costs and demand. We consider this project a renewable source of green energy. | City of Orrville - Orrville Utilities | 3 | 91 to 180 days | \$218,900 |
| Wayne | Treatment Wetlands | Treatment Wetland complex for polishing Wastewater Plant effluent. Pilot testing has been done and shows toxicity reduction in plant effluent. This project would also provide wildlife habitat and educational opportunities. A walking trail and observation deck are planned. | City of Orrville - Orrville Utilities | 12 | 91 to 180 days | \$1,356,250 |
| Wayne | Extend High St. Sewer | Extend sewer main approximately 2,000 feet to outlying areas currently not served by public sewers. We are currently in the process of securing funding for this project. We are currently in the process of securing funding for this project. We are currently in the process of securing funding for this project. | City of Orrville - Orrville Utilities | 3 | 181 days or more | \$224,000 |
| Wayne | Work for our community | Work for our community | Happy to Help Services | 10 | 0 to 30 days | \$300,000 |
| Wayne | Dist 3, PID 18241, WAY SR 0301 03.89 | Bridge Rehabilitation | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Wayne | Dist 3, PID 18242, WAY SR 0539 10.83 | Bridge Rehabilitation | Ohio Department of Transportation | 60.3 | 31 to 90 days | \$2,100,000 |
| Wayne | Dist 3, PID 18241, WAY SR 0301 03.89 | Bridge Rehabilitation | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Wayne | S.S.T.P. (Sanitary Septage Treatment Plant) for Se | Proposed 75,000 GPD Pre-treatment Plant for septage is intended to service 2 or 3 County areas in Ohio. The construction of each facility is estimated to create 150 jobs. | McGhee's Technical Water Services, Inc. | 139 | 181 days or more | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Wayne | capital acquisition for drop in center for the ment | Acquire a building suitable for housing a neighborhood drop in center for the severely mentally ill. Currently in Wayne and Holmes Counties we have no consumer operated drop in center or clubhouses for people recovering from mental illness. Consumers have told us they would like to develop such a project but no new funds have been available, and recently ODHM reduced funding to mental health boards in general. Consumer would direct the program in the acquired building and also participate in installation or remodeling of an existing building. The stimulus funds would be used to acquire an existing building for the drop in center which could accommodate groups, a coffee house/cafeteria, seminars and computer internet access. Ongoing operations would be sought from donors, ODHM, stimulus start up funds, membership fees, or sponsorships. If more details are required please contact us. Sincerely, Kim Tapscott | Wayne Holmes Mental Health and Recovery Board | 10 | 91 to 180 days | \$500,000 |
| Wayne | GRE-CR23-04.39 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 8 | 181 days or more | \$226,000 |
| Wayne | FRA-CR08-00.71 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 10 | 91 to 180 days | \$224,000 |
| Wayne | WAY-CR51-01.34 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 10 | 181 days or more | \$235,000 |
| Wayne | CHE-TR107-00.79 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 10 | 181 days or more | \$229,000 |
| Wayne | CAN-CR27-02.79 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 10 | 181 days or more | \$240,000 |
| Wayne | PLA-CR149-05.09 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. | Wayne | PAI-CR105-00.78 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 20 | 181 days or more | \$450,000 |
| Wayne | Hillcrest Wastewater System Improvements | Project includes abandonment of an existing Wayne County-owned wastewater treatment plant and installation of a pump station and force main to connect to the City of Wooster wastewater system. | Engineering Associates, Inc. | 20 | 0 to 30 days | \$88,250 |
| Wayne | SUG-CR52-00.98 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 20 | 181 days or more | \$450,000 |
| Wayne | SUG-TR98-00.66 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 20 | 181 days or more | \$414,000 |
| Wayne | Eastwood Wastewater System and Treatment Plant | Project includes the abandonment of an existing Wayne County-owned and operated wastewater treatment plant that serves a residential allotment and construction of a new 160,000 gallon per day membrane wastewater treatment plant that will be located approximately one mile east of the existing treatment plant along County Road 103. In addition to serving the allotment that the existing treatment plant serves, the new wastewater treatment plant will serve an additional 65 properties between the existing wastewater treatment plant and the proposed plant, including a mobile home park that contains a failing wastewater treatment system. This project is currently being advertised and construction should begin within the next few months. | Engineering Associates, Inc. | 50 | 0 to 30 days | \$730,000 |
| Wayne | SUG-CR188-03.03 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 20 | 181 days or more | \$414,000 |
| Wayne | WAY-CR54-01.60 | This is a bridge replacement project for a single span structure. The bridge is in poor condition. This bridge is primarily used by local residents, farming equipment and businesses. Without total replacement, the continuing deterioration of this structure would lead to requiring the posting of load restriction forcing area businesses and farmers to make costly detours around the bridge. The potential of posting load limit on the bridge would also restrict the trucks and school bus from using this structure. This will result in increasing the reaction time for emergency vehicles to area residents and increase cost to local school district for transportation. | Wayne County Engineer's Office | 25 | 181 days or more | \$650,000 |
| Wayne | Gingery Wastewater System Improvements | Project consists of abandonment of a Wayne County owned and operated wastewater treatment plant and installing a pump station, 1000 feet of 3" force main and 4000 feet of 8" gravity sewer to connect the Gingery allotment to the City of Wooster wastewater system. Project also consists of installing laterals along the 4000 feet of 8" gravity sewer for approximately 20 to 30 homes along State Route 3 in the Village of Wooster in order to serve their wastewater needs. Project will also include the upgrade of an existing pump station owned and operated by the City of Wooster, which the 8" gravity sewer as part of this project will connect to. The upgrade will provide larger capacity to a larger well to serve the properties that will be connected to the City wastewater system as part of this project. | Engineering Associates, Inc. | 20 | 181 days or more | \$562,500 |
| Wayne | Kidron Wastewater Plant SCADA System | Project includes the installation of a SCADA system at the Wayne County owned and operated Kidron Wastewater Treatment Plant in order to remotely monitor the plant. Intermittently ill adults. This program employs 45 FTE, a director, 3 job coaches and a part time secretary. On an annual basis we contracted for the following employment categories: levels, 11 66 people completed 8 hours of competitive employment, 21 46 completed 40 hours a week of employment for at least 3 months, 31 42 clients completed 40 hours a week for 6 months, and 41 24 clients achieved 40 hours a week for nine months. All were achieved. In order to bring back this program which is scheduled to be closed March 31st, we would need \$250,000. This would allow us to take out the coming year to test if this program could be sustained by securing other revenue during the coming year. This program is important as it helps consumers working and their support staff working. Research studies show that by getting consumers with mental illness employed there are significant cost to the state and they recover more fully and are no longer on the tax dock, they are contributors. Let us know if you need additional information about this proposal. Sincerely, Kim Tapscott | Engineering Associates, Inc. | 5 | 31 to 90 days | \$37,500 |
| Wayne | Community employment for the mentally ill | Intermittently ill adults. This program employs 45 FTE, a director, 3 job coaches and a part time secretary. On an annual basis we contracted for the following employment categories: levels, 11 66 people completed 8 hours of competitive employment, 21 46 completed 40 hours a week of employment for at least 3 months, 31 42 clients completed 40 hours a week for 6 months, and 41 24 clients achieved 40 hours a week for nine months. All were achieved. In order to bring back this program which is scheduled to be closed March 31st, we would need \$250,000. This would allow us to take out the coming year to test if this program could be sustained by securing other revenue during the coming year. Let us know if you need additional information about this proposal. Sincerely, Kim Tapscott | Wayne Holmes Mental Health and Recovery Board | 40 | 31 to 90 days | \$250,000 |
| Wayne | Barnard Road Sanitary Sewer Extension | Project includes the installation of 5,600 feet of 8" gravity sewer and 1,700 feet of 8" sewer laterals to connect several businesses and residential properties to the Wayne County Eastwood wastewater system. The existing businesses and residences are currently all on septic tanks. | Engineering Associates, Inc. | 20 | 91 to 180 days | \$472,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Wayne | Consumer operated drop in center | Board covers two counties program costs would include the cost of a van and driver plus mileage. Due to budget cuts from the Ohio Department of Mental Health, the Board eliminated the partial hospitalization program and social recreational program for mentally ill adults. The drop in center would be a lower cost replacement for the closed programs and involve consumers in their own recovery. If stimulus funds were available we could provide jobs for consumers and for some displaced staff at this drop in center. While we listed 10 jobs there could be more if the center also held vocational training groups etc.. In our rural community there is no day programming that is a consumer friendly alternative where clients can go and feel safe from labeling and stigma while they work on their own recovery and find mutual support. | Wayne Holmes Mental Health and Recovery Board | 10 | 91 to 180 days | \$250,000 |
| Wayne | Overhead Crane | Our local Wayne Holmes Mental Health Coalition which houses our NAMI chapter, Advocates and Suicide Prevention Coalition would be the provider agency for the above project. Sincerely, Kim Tapke | Mavedo, Stainless Fabrication, LLC | 5 | 91 to 180 days | \$50,000 |
| Wayne | Sonnenberg Village School | Replacing a Memorial One Room School to be used as a community center and by an adjacent school system. The building will use recycled materials and will be powered by solar and wind power. | Kippen Community Historical Society | 5 | 91 to 180 days | \$70,000 |
| Wayne | Envirnmently friendly HVAC | The project will allow the OARBC to lower its energy costs by over 50% as well as help to lower the carbon footprint of the 29,000 Sq Ft facility. Our main focus will be to replace the 7 rooftop units to make each individual space more comfortable and to decrease energy efficiency. All existing ductwork will be reused to limit the amount of waste on site. We will also be using a variable Refrigerant Flow system for the Conditioning of all non-gym areas of the facility. The facility will be heated using a controlled fan coil unit that is much like Geothermal but will require far less maintenance and will be much quieter. The system will use R-410 refrigerant which is, which is a non-ozone depleting refrigerant and would help us to become the first LEED certified Boys and Girls Club in the Country. | Orville Area Boys and Girls Club | 60 | 31 to 90 days | \$300,000 |
| Wayne | Airfield Lighting Development | This project will replace all existing airfield lighting installed in the early 1970's at the Wayne County Airport. Because of age the equipment is poor condition and parts are no longer available for them. This is also true with the base radio equipment. The base radio console problem needs to be replaced as soon as possible, but the city due to lack of funds with the closing of one of the major employers cannot afford to purchase this equipment at this time. This dispatch center is an enhanced 911 PSAP and dispatches for Rittman Police, Fire, EMS, Milan Twp Fire and EMS, Southwestern Village Police, as well as Chillicothe Twp. Fire and EMS Services. | Wayne County Planning Department | 100 | 91 to 180 days | \$300,000 |
| Wayne | Acquire Snow Removal Equipment | This project will be to acquire a piece of snow removal equipment for the Wayne County Airport. Currently the airport has no piece of equipment to adequately clear the runway during snow events. | Wayne County Planning Department | 100 | 91 to 180 days | \$90,000 |
| Wayne | Dist 3, PID 18241, WAY SR 0301 03.89 | The proposed snow removal equipment would be most likely a tractor with blower and blades to clear paved areas. | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Wayne | Dist 3, PID 18242, WAY SR 0539 10.83 | Bridge Rehabilitation | Ohio Department of Transportation | 60.3 | 31 to 90 days | \$2,100,000 |
| Wayne | S. Main Sewer Bypass Project | The City of Rittman recently discovered an obstructed or broken sewer line that goes under our Southern R. Railroad tracks. This project would involve re-routing the line to a new location, and again boring underneath an active railroad crossing to fix the problem. It was found that the original line was installed 1915 and is 94 years old. This project is currently being designed by an engineer and will be ready to go within 30 days to bid. The City is under the State median low average income and has a very limited budget. | City of Rittman | 10 | 0 to 30 days | \$125,000 |
| Wayne | Apple Creek Sewer trunk line | Replacement of Village's Main Sewer Trunk line and replacement of existing Lift station | ADR and Associates | 60 | 0 to 30 days | \$1,200,000 |
| Wayne | Apple Creek Water line replacement | Replacement of Village's water lines | ADR and Associates | 60 | 0 to 30 days | \$500,000 |
| Wayne | Apple Creek Wastewater Treatment Plant Repairs | Replacement and repair of Village's waste treatment plants | ADR and Associates | 50 | 0 to 30 days | \$500,000 |
| Wayne | North and Central Waterline Replacement Project | The City completed a total water system engineering study 2 years ago and it was determined that several areas of the City needed waterline replacements and enhancements to equate the pressure and low pressure areas up to proper 100' depth for the spring purposes. The water lines in the project that are being replaced are over 50 years in age. Basic engineering has already been completed for this project and it is anticipated that we could be out bid within 30 days. The City of Rittman's average income level is below state average and is not able to budget alternatives this project has been on hold. The City of Rittman Fire Dept. is desperately needed to replace their 1986 jumper truck for several years due to the closing of one of our major employers in the city we have not had the funds to proceed with this project. This truck continually and frequently breaks down and is not reliable anymore to carry the work load. We have the specifications done for a new truck and we can place the order for work to be done almost immediately if funded. | City of Rittman | 10 | 0 to 30 days | \$302,000 |
| Wayne | Fire Truck Pumper Replacement | The City of Rittman recently discovered an obstructed or broken sewer line that goes under our Southern R. Railroad tracks. This project would involve re-routing the line to a new location, and again boring underneath an active railroad crossing to fix the problem. It was found that the original line was installed 1915 and is 94 years old. This project is currently being designed by an engineer and will be ready to go within 30 days to bid. The City is under the State median low average income and has a very limited budget. | City of Rittman | 5 | 0 to 30 days | \$440,000 |
| Wayne | Sign Upgrade Project | Replace existing 'Engineer Grade' traffic signs along county roads with high-reflectivity versions required by recent Federal Highway Administration mandates. Approximately 1/4 of currently non-compliant signs would be replaced with this initial funding. | Wayne County Engineer's Office | 3 | 31 to 90 days | \$225,000 |
| Wayne | Police Dispatch Replacement | The City Police Dept. dispatches for multiple police and fire agencies. It was recently learned that the current radio consoles were not digital capable and parts were no longer available for them. This is also true with the base radio equipment. The base radio console problem needs to be replaced as soon as possible, but the city due to lack of funds with the closing of one of the major employers cannot afford to purchase this equipment at this time. This dispatch center is an enhanced 911 PSAP and dispatches for Rittman Police, Fire, EMS, Milan Twp Fire and EMS, Southwestern Village Police, as well as Chillicothe Twp. Fire and EMS Services. | City of Rittman | 10 | 0 to 30 days | \$140,000 |
| Wayne | Wooster - Combined Sewer Overflow Project | Combined Sewer Overflow (CSO) Elimination Project, NPDES Long Term Control Plan compliance. | City of Wooster, Ohio | 120 | 31 to 90 days | \$1,490,000 |
| Wayne | City Hall Roof Replacement | The replacement of Orville City Hall roof, this building houses essential city services which include Police, Planning & Zoning, Finance, Orville Offices, as well as offices of the Wayne County Clerk of Courts. | City of Orville | 5 | 0 to 30 days | \$30,000 |
| Wayne | Wooster - Burbank Road Water and Sewer Line Replac | Installation of new sewer and water line infrastructure on Burbank Road from State Route 83 to Highland Avenue. | City of Wooster, Ohio | 90 | 31 to 90 days | \$2,260,000 |
| Wayne | Lacy Center Roof Replacement | Replacement for roof on City of Orville Service Department Building, houses all equipment for Service Department as well as mechanics bay and office space. | City of Orville | 5 | 0 to 30 days | \$100,000 |
| Wayne | Washington Blvd Resurfacing | Resurface 156 cubic yards of Washington Blvd, which includes installation of 400 square feet of concrete walk, 8 ADA-compliant curb ramps, and 200 linear feet of concrete curb. | City of Orville | 10 | 31 to 90 days | \$40,000 |
| Wayne | West Chestnut Street Resurfacing | Asphalt resurfacing of 95 cubic yards of pavement, with the installation of 415 square feet of concrete walk, 8 ADA-compliant concrete curb ramps, and 100 linear feet of concrete curb. | City of Orville | 5 | 31 to 90 days | \$25,000 |
| Wayne | Concrete Pavement Replacement on Hostetler/Crown H | Repair of existing concrete streets | City of Orville | 5 | 0 to 30 days | \$150,000 |
| Wayne | Railroad Storm Sewer Repairs | Replacement of 213.6 linear feet of reinforced concrete pipe as well as 3 catch basins, 2 curb inlets, and 3 storm manholes | City of Orville | 5 | 31 to 90 days | \$50,000 |
| Wayne | New Fire Tanker | Purchase of a new tanker for the Orville Fire Department, which has mutual aid agreements with many localities and covers most of eastern Wayne County. | City of Orville | 5 | 31 to 90 days | \$250,000 |
| Wayne | Sewer Jet Purchase | The City of Rittman is in great need of replacing a 1998 Sewer Jet Utility Vehicle that is used on a daily basis to provide maintenance for the Wastewater treatment system for the City. The vehicle that is in current use is approximately 23 years in age and is in need of constant repairs to keep the vehicle in service. The city has not been able to budget for this item due to the fact that we lost one of our major employers and budget constraints are preventing this purchase at this time. | City of Rittman | 10 | 0 to 30 days | \$225,000 |
| Wayne | Wooster - Water Pollution Control Plant Expansion | Addition of an 8th Vertical Lobe Reactor to expand the aeration treatment capacity of Wooster's Water Pollution Control Plant. | City of Wooster, Ohio | 80 | 31 to 90 days | \$2,000,000 |
| Wayne | Thermal former | We are buying an energy efficient thermal forming machine in an attempt to renew a contract with the DOD for a 5 year contract. We need to reduce costs to compete with an out of state firm attempting to take this business from us, the machine uses alot of electricity and the new machine is a much greener machine, in addition to retaining jobs for wayne county we will create additional jobs by having a more competitive process for future bids. | Global Body & Equipment Coomany | 8 | 0 to 30 days | \$375,000 |
| Wayne | Commercial Printing | This project intend for to modernizing the entire company to enable us staying in the current market an prevent us from shut down the business. 1- changing our plant to green by using modern equipment and energy efficient. 2-Providing economy service to the state printing and the local printing by being on all state printing jobs with very competitive price and high quality. 3-keep local worker and employees in the job and prevent any more lay off, cutting people pay and hire new employees to keep up with expansion. 4-to stay strong in the market and up and running to benefit our community by creating new jobs, keep our workers and employees in their job, providing great service to the government and local community and working hard to prevent any opportunity parts out of business. | Shreve Printing LLC | 25 | 0 to 30 days | \$750,000 |
| Wayne | The Inflatables | We are in inflatable business with 17000 gross sales. We get kids motivated and teach them team work. We will be going out of business if we can't get affordable insurance. | DI Dave Inc | 10 | 0 to 30 days | \$50,000 |
| Wayne | Durable housing for transitioning youth with menta | Construction of an 8 bed durable efficiency apartment bldg with a common room, office and two additional resale beds for client crisis relief for youth transitioning from the child mental health system to the adult system. The building lot is already acquired and paid so the requested dollars would go for construction of the facility during the summer of 2009. We have a federal HUD grant for safety and costs to youth for the next five years. This would create construction jobs immediately and also solve a housing crisis for these vulnerable youth in our two county area. Staffing would be done by existing case managers. The jobs created would be the construction jobs. The value to the community would be safe, affordable housing for severely mentally ill youth ages 18-25, who have cannot manage their own living independent living resulting in the more expensive state hospital, jail or on the streets. This is also a priority population for our local Family Fire Councils in both Wayne and Holmes counties. Please contact me for additional information if needed. Thank you for your attention to our request. Sincerely, Kim Tapke, MESA, LISW | Wayne Holmes Mental Health and Recovery Board | 7 | 91 to 180 days | \$625,000 |
| Wayne | Creation of a Nursery Garden | I believe that the sum of \$165,000 will be sufficient for starting costs, with \$70,000 going towards new equipment, \$15,000 for irrigation systems, \$10,000 in deer-proof fencing, \$20,000 for new stock to be phased in throughout a 5 yr period, \$6,000 in fertilizers and pesticides, \$35,000 for a new building, \$5,000 for a parking lot, and \$1,000 in advertising expenses. Also included in this estimate is \$3,000 for miscellaneous expenses such as office equipment and supplies. | Jude Furniture | 3 | 31 to 90 days | \$165,000 |
| Wayne | Wayne County Courthouse Restoration Project | Constructed in 1878, the Wayne County Courthouse is the county's most outstanding architectural landmark. The centerpiece of the Wayne County Courthouse District, it is listed on the National Register of Historic Places. The offices in the Courthouse offer many services as the result of state and federal programs. Wayne County has spent over \$4 million of local funds over the past ten years on renovations. The costs of replacing our Courthouse would far exceed the costs of renovation. The renovation requires a one-time investment of \$5,000,000. It can be phased in over 10 years. Funds would be used for Courthouse exterior restoration and restoration of the interior. The restoration of the interior roof, repainting, painting, lead abatement, and clock tower structure restoration. Safety issues associated with the deteriorating state roof and with the water-damaged clock tower will be identified. Employment opportunities in unique trades, State Restoration and Stone Masons, will be created. These trades will be largely ignored by most projects proposed. Local contractors estimate over 50,000 hours of direct labor plus additional indirect labor hours in affiliated vendors and subcontractors. | Wayne County Commissioners | 40 | 91 to 180 days | \$3,750,000 |
| Wayne | Wooster - Henry Street Lift Station | Replacement and Upgrade of an existing sanitary sewer lift station to current EPA standards | City of Wooster, Ohio | 13 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Wayne | Expansion into Evergreen Farming | 36 Acres of Pine Trees, with 6 acre rotating plots, new glaze per year. For sale within 3 years to landscapers and for consumer use. | Jude Furniture | 3 | 91 to 180 days | \$125,000 |
| Wayne | Reclaiming Wildlife Habitat | 40 Acres of habitat as a reserve for migratory birds and other wildlife. | Jude Furniture | 2 | 31 to 90 days | \$100,000 |
| Wayne | Wooster, Ohio - North High Zone Water Tower | Hoover, Ohio - Increase storage capacity to meet EPA guidelines and improve fire protection to north and development. This project includes the construction of a 600,000 gallon water tower and 1000 gallon per minute booster pumping station to serve Wooster's northern water supply. Construct a bio-tower to provide pre-treatment for industrial wastes. This will significantly increase the capacity of Wooster POTW and improve the water quality of the receiving stream and provide capacity to include currently unserved areas. | City of Wooster, Ohio | 126 | 31 to 90 days | \$3,150,000 |
| Wayne | Wooster, Ohio - Pretreatment Bio-Tower | Installation of pretreatment bio-tower to serve the newly created Ohio State University and City of Wooster (BioBio Research) park in Wooster, Ohio. This project is currently on hold pending additional funding for extension of utilities into the newly created park. This park has regional economic and job creation potential and will assist with the commercialization of the City's distribution system, as well as to underwrite in Wooster, Ohio. | City of Wooster, Ohio | 480 | 0 to 30 days | \$2,000,000 |
| Wayne | Wooster and Ohio State University - BioBio Research | Complete installation of a new 16" water transmission main from the City of Wooster's water plant connecting to the City's distribution system, at intersection of Lowell and Liberty Street (near downtown). | City of Wooster, Ohio | 80 | 31 to 90 days | \$2,000,000 |
| Wayne | Wooster - Secondary Transmission Line | RBB helps entrepreneurs develop and market new devices that require printed circuit board assemblies. See www.rbbystems.com. Funds requested are for capital equipment purchases to enhance capabilities and help RBB and its Ohio customers grow their businesses. | City of Wooster, Ohio | 22 | 31 to 90 days | \$945,000 |
| Wayne | Technology Advancement to Assist Ohio Entrepreneur | MILL AND SUBSEQUENTLY RESURFACE 6.42 MILES OF PAVEMENT. | RBB Systems, Inc. | 20 | 31 to 90 days | \$300,000 |
| Wayne | CR 23 RESURFACING | MILL AND SUBSEQUENTLY RESURFACE 6.01 MILES OF PAVEMENT. | WAYNE COUNTY ENGINEER | 15 | 91 to 180 days | \$545,700 |
| Wayne | CR 3A, CR 57A, AND CR 95A RESURFACING | This project includes 2,300 feet of storm sewer ranging in size from 12 inches to 36 inches using approximately 41 storm sewer structures and appurtenances. This project replaces existing storm sewers, storm sewer structures and appurtenances that are over 50 years old on Lincoln Street. | WAYNE COUNTY ENGINEER | 15 | 91 to 180 days | \$510,850 |
| Wayne | West Salem, Lincoln & Cherry St. Storm Sewer Impro | West Salem is under orders from OEPA to eliminate overflows in their wastewater system. This project will reduce infiltration/inflow from the collection system. Approximately 7,850 feet of 8 inch sanitary sewer will be replaced, 31 manholes will be rehabilitated and 170 laterals will be sealed. | Engineering Associates, Inc. | 5 | 91 to 180 days | \$318,750 |
| Wayne | West Salem, Sanitary Sewer I/J Removal Project | The Village of West Salem is under OEPA orders to upgrade their wastewater plant. They have been working toward that end for many years but it has not been affordable. The plant will be upgraded by installing raw flow equalization, secondary and tertiary treatment followed by UV disinfection. | Engineering Associates, Inc. | 20 | 91 to 180 days | \$690,000 |
| Wayne | West Salem, Wastewater Plant Upgrade | The Village of West Salem is awaiting Water and Sewer 18 on undeveloped SRCS and Interstate 71 interchange for further development and create jobs. This project will include one pump station with generator, 3,000 feet of sanitary force main, 9,500 feet of 8 inch gravity sewer and 11,500 feet of 12 water line. | Engineering Associates, Inc. | 70 | 181 days or more | \$2,625,000 |
| Wayne | West Salem, Water & Sanitary Extension to Intersta | Replacement of 3,200 linear feet of 8-inch gravity sewer, manholes, pavement and restoration. | Engineering Associates, Inc. | 140 | 91 to 180 days | \$1,575,000 |
| Wayne | Church Road Collection System | New Destiny has received funds from the State of Ohio to build a new 4.4M LRP HOODING complex that will provide safe, affordable housing in a natural environment in the rural community of Clinton, Ohio. The New Destiny Center SRO is envisioned as a holistic housing and housing environment for chemically dependent men. The project has been designed to conform to its rural community surroundings with a "low" appearance that blends with the green space in a park-like atmosphere as well as numerous well-planned amenities designed to recovery and promote physical, mental and spiritual healing and renewal. | Village of Marshallville | 25 | 31 to 90 days | \$700,000 |
| Wayne | New Destiny Center SRO | Proposed Outcomes: 1. To complete construction of the new SRO facility and obtain an occupancy permit by May 2010. 2. To maintain at least 95% occupancy of qualified needy individuals. 3. At least 60% completing drug and alcohol treatment will remain sober for at least 12 months post completion of the program. 4. 60% of the men will obtain self-sufficiency by the completion of the program. | New Destiny Treatment Center | 30 | 181 days or more | \$150,000 |
| Wayne | Wastewater Treatment Plant Improvement | Replacement of existing wastewater treatment lagoons with new 130,000 gallon per day extended aeration treatment plant. | Village of Marshallville | 25 | 31 to 90 days | \$2,500,000 |
| Wayne | Waterline Replacement Project | The project replaces approximately 700 linear feet of water line from the water treatment plant to the intersection of the access road and State Route 84 and 825 linear feet of 4-inch water line with 8-inch water line from this intersection along State Route 84 to the Village's corporate boundaries. | Village of Marshallville | 20 | 91 to 180 days | \$160,940 |
| Wayne | Waterline Replacement Project | The project replaces approximately 370 linear feet of ductile iron pipe from the Village's raw water well to the treatment plant. | Village of Marshallville | 20 | 91 to 180 days | \$15,000 |
| Wayne | Allison Drive Waterline Extension | Project consists of extending waterlines from the Village of Doylestown to the Allison Drive abatement to serve 20 existing homes that currently use private water wells as their water supply. Waterlines will also be installed to serve future developments in the vicinity. Project includes the installation of 3,820 linear feet of 12" waterlines, 750 linear feet of 8" waterlines and 1,780 linear feet of 6" waterlines. The project will also serve as a new water line for our maintenance department and vehicle storage facility, which are currently adjacent to the building designated for a comprehensive array of mental health and vocational training programs for the children. The relocation of maintenance fleet and vehicles will allow for the current space to be added to the Programs Building and help us to better meet the growing and complex needs of our children. | Engineering Associates, Inc. | 8 | 91 to 180 days | \$300,000 |
| Wayne | Maximizing Space to Best Help the At-Risk Children | This "shovel ready" project has been planned and approved since 2002, but has not been implemented due to lack of funds. The activities related to this project include new steel frame structure, electrical components, phone, data cable, water, sewer, storm drains, fire hydrant and a generator. | The Village Network | 13 | 0 to 30 days | \$512,500 |
| Wayne | Revitalization of the Building for Mental Health P | The proposed project is "shovel ready," with approved plans. The requested funds will allow for completion and utilization of a 16,500 sqft. energy efficient building complex that will house a variety of mental health and vocational training services for approximately 100 abused, neglected and at-risk children we care for on a daily basis. These programs include vocational and life skills training for youth aging out of foster care system (trade skills and life skills), day treatment programs, foster care services, structured recreational activities, and a horticulture therapy program. | The Village Network | 12 | 0 to 30 days | \$550,000 |
| Wayne | South Main Street Sanitary Sewer Improvements | The requested funds are necessary for installation of an efficient HVAC system, upgrade electrical system, install new wiring and comply with required safety codes. Without the requested funds, we will be forced to delay the entire project, since we are projecting a decrease in revenue, and that it is extremely difficult to obtain a loan given the condition of the financial markets. | Village of Creston | 50 | 31 to 90 days | \$383,500 |
| Wayne | Bank & Brooklyn Streets Improvements | In addition to the 12 manufacturing and construction jobs created retained as the result of this project, 3 permanent jobs will also be created due to new or expanded programs. | Village of Creston | 15 | 31 to 90 days | \$359,555 |
| Wayne | Pine Street/Jackson Road Waterline Loop | Sanitary sewer improvements will benefit entire school district, 2,161 persons in Village and others from outlying areas served by the school system. | Village of Creston | 15 | 31 to 90 days | \$247,968 |
| Wayne | Burbank Street Culvert Replacement | Bank & Brooklyn Streets are primary access routes. The project is reconstruction of approximately 600 LF of roadway, storm drainage & V/L placement. These streets will serve as business industrial area. | Village of Creston | 15 | 31 to 90 days | \$248,630 |
| Wayne | WWTP Improvements | The project is looping of two dead-end waterlines on Pine Street and Jackson Road in the SW quadrant of the Village. Potential development 50 acres of undeveloped land. | Village of Creston | 25 | 181 days or more | \$1,472,000 |
| Wayne | BioEnergy Generation System and Sustainability Dem | The project includes replacing existing culverts with approximately 280 LF of 24" diameter concrete installed by open cut excavation. The project includes storm water pumping, flow diversion and flow equalization. Flow equalization will be completed at the headworks of the existing WWTP. | Wayne Economic Development Council | 15 | 91 to 180 days | \$2,000,000 |
| Wayne | PACS Acquisition | In collaboration with the Ohio Agricultural Research and Development Center (OARDC), Schmack BioEnergy, will develop a commercial scale integrated biogas system that will generate renewable energy from solid and liquid organic waste - primarily animal manure and food waste. | Orville Hospital Foundation, dba Orville Communi | 300 | 0 to 30 days | \$290,000 |
| Wayne | EHR Implementation | The centerpiece of the system is a fully functioning commercial anaerobic digester system producing biogas. The digester will handle up to 40 wet tons of waste per day and will provide gas for conversion to electricity and vehicle fuel (compressed natural gas) for the OARDC campus and vehicle fleet. Excess gas may be fed into the natural gas pipeline. | Orville Hospital Foundation, dba Orville Communi | 300 | 0 to 30 days | \$300,000 |
| Wayne | Liberty Street Library in Wooster | For added value, development, and demonstration the system will also include an algae farm and greenhouse making use of liquid and solid effluents and use of microinventions from the solids for agricultural application. | Wayne County Public Library | 60 | 91 to 180 days | \$6,475,000 |
| Wayne | Rehab lighting, purchase snow removal equipment | Additional benefits: • construction materials, local processing equipment manufacture, approx. 36 construction jobs • establishing a sustainable energy industry in Ohio - new class of technical positions not subject to offshoring worldwide development opportunity with Ohio State Univ. and OSU Agricultural Technical Institute adjacent • economic stimulus funds are applied for the purchase of a \$624,000 Picture Archiving and Communication System (PACS/Radiology Information System (RIS) network dedicated to the storage, retrieval, distribution and presentation of Digital Imaging and Communications in Medicine (DICOM) images. The sustained PACS/DICOM storage medium is essential for the continued viability of the radiology department and DICOM Accreditory. PACS/RIS funding: 1) promotes the electronic exchange of patients' health information; 2) increases DICOM revenues; and 3) supports the continued employment of DCH employees as the hospital strives to become a "measurable EHR user" as mandated by the American Recovery & Reinvestment Act. Dunlap Community Hospital (DCH), an independent, critical access facility in Orville, Ohio, is in the first stage of electronic health record (EHR) implementation. Although 40% of DCH 2009 capital budget is allocated to EHR hardware and software, implementation has been delayed due to lack of funding. Costly EHR allocations have been made at the expense of other critical health needs, such as facility and equipment upgrades. State economic stimulus funding in the amount of \$300,000 is sought for EHR components, such as hardware implementation hardware, EHR training, server upgrade and Optum patient registration, order communications, pharmacy, radiology and laboratory electronic systems. Funding will improve quality and coordination of care outcomes while lowering healthcare costs through improved efficiencies. With the assistance of state health information technology funds, Dunlap Community Hospital can achieve "measurable EHR user" status as mandated by the American Recovery & Reinvestment Act. 15,000 square feet of new construction 2,000 square feet of renovation Jobs retained: Design Professionals - 2 Construction Management - 1 Site Cleanup Design Professionals - 2 Construction Management - 1 Construction Workers - 54 | Wayne County Department of Planning | 6 | 181 days or more | \$390,000 |

| Wayne | Growing Healthy Habits | The only local community-based wellness initiative. Growing Healthy Habits (GHH) was formed in 2003 in response to the increasing obesity rates and unhealthy lifestyles of the citizens of the Orville, Ohio area. The coalition is comprised of members from local medical, educational, fitness, social and faith-based communities. Alarming, Orville children are falling victim to the obesity epidemic. Body Mass Index (BMI) measurements for students in kindergarten through second grade indicate that approximately 20% of these children are considered overweight or at risk for overweight. GHH seeks funding to implement its "Planting the Seed in Youth" program, a project addressing the obesity epidemic through individual assessments of BMI and stress levels, implementation of a structured school-based recess activity program, after school Activities Club and an educational outreach to parents. Expected outcomes include: 1) stable or decreased BMI measurements; 2) increased daily physical activity; 3) increased fitness levels; and 4) increased parental knowledge of nutritional and health topics. | Orville Hospital Foundation, dba Orville Communi | 0 | 31 to 90 days | \$30,000 |
| Wayne | Healthcare Cost Reduction Coalition | The Healthcare Cost Reduction Coalition (HCRC) project of Orville, Ohio is an innovative approach to increasing the quality of healthcare by offering an affordable, incentivized insurance product to healthier employees through partnering with an insurance broker. The HCRC consists of eight Orville area employers. During a two-year demonstration period at four large-scale companies, 716 employees will be offered an annual health risk assessment, quarterly screenings, personal wellness plans, incentives and wellness classes as a condition of their group health plan participation in a company wellness program. Employees will be eligible for enrollment in an insurance program offering health and dental premiums. Connections between company wellness programs and employee wellness will be evaluated. Trends in employee health care costs will be documented by monitoring employee premium costs and deductibles. Data will be entered into a community health database where each community member will eventually have a single electronic health record. The expected outcome of the project is a quantifiable reduction of employer and employee healthcare costs and retention of jobs through the promotion of employee wellness. | Orville Hospital Foundation, dba Orville Communi | 500 | 31 to 90 days | \$200,000 |
| Wayne | Emergency Services Vehicle Light Towers | This project to provide funding to outfit emergency scene light towers on fire, police and other emergency vehicles. Will-Burt light towers illuminate emergency scenes for safety and effectiveness of fire and police personnel and safety and rescue of victims in fire scenes, traffic accidents, and other rescue situations. Funding could provide for enhanced safety for local fire and police personnel from the largest city departments in Ohio to small towns and for Ohio citizens statewide. Funding would also benefit employment throughout Ohio. Will-Burt utilizes Ohio-based suppliers whenever possible. In total, Will-Burt uses 229 Ohio companies as suppliers. 62% of the materials used in our products are from these Ohio companies, representing over \$8 million in business to them and countless jobs. Project cost and jobs saved would be determined by the number of vehicles outfitted with lights and are therefore impossible to know now. Will-Burt is a 100% employee-owned company with approximately 300 employees. Will-Burt was the Ohio Department of Development Exporter of the Year in 2004 and won a Governor's "E" Award for Excellence in Exporting in 1999 and again in 2008. The development of electric tools, transformers and splices. Priority work upon general health (protecting the quality and security of the food supply and animal to human (zoonotic) disease control. Also work on insect pests impacting the quality & security of the food supply, wood products, the green industry and environmental quality. | The Will-Burt Company | 50 | 0 to 30 days | \$9,000,000 |
| Wayne | PAAR - Plant, Animal, and Agrosecurity Research an | This will be the only facility of its kind in Ohio. Economic impact in addition to employment figures above: • Near term, construction impact - materials purchasing and employment of estimated 300 workers - general trades and specialty construction as well as technicians/operatives - for 2+ years of construction. • Mid-to-long term, the PAAR research program supports the agricultural, biological and green industries of Ohio and will serve businesses across the state. PAAR is an integral part of the BioPark Research Park and will serve as an anchor facility attracting firms from outside of Ohio and helping to grow new companies in NE Ohio. • PAAR will create jobs for scientists, research scientists, research engineers, research engineering equipment, we serve a national customer base. I am a third generation owner and continue to grow and diversify the business. We have outgrown the current facility and are considering moving to another location. Our mission is to stay in Wayne Co. and believe the Wayne Co. Development Board will be instrumental in making it possible. | Wayne Economic Development Council | 55 | 91 to 180 days | \$5,000,000 |
| Wayne | Haynincorp Expansion | Our expansion project would immediately bring on 11 new, permanent, skilled jobs the first year, doubling that amount the second year. Career opportunities include cabinet engineers, sales manager and staff, plant manager, plant foreman, office manager and staff, and 8-12 hourly positions. Estimated 1st year payroll of \$ 383,000. The expansion would necessitate a new or updated facility of approximately 30,000 sq ft. (est 1.2 mil investment) and additional equipment purchases (est 1 mil investment). | Haynincorp | 25 | 31 to 90 days | \$3,000,000 |
| Wayne | Vetz Renewable Energy & Alternative Fuels | It conforms with it's strategic partners, Vets U.S.A. LLC Vetz developed to meet the world's growing demand for renewable fuels. This proposal will preview the methodology and business model that VETZ USA, will deploy to supply various global markets. VETZ USA, will satisfy the demand for renewable and alternative energy in the U.S. and abroad by implementing a three tier business model, focusing on the development of renewable energy sources, supply & distribution of these sources. Phase one: will require the construction of four 10 million gallon per year biodiesel processing plants, strategically located in America's heartland and easily accessible to rail and marine transportation. The first being constructed in North East Ohio. Each biodiesel processing plant will be developed and constructed using the latest, greatest automated systems and technology. With the capability of processing multiple types of feedstocks. 120th square mile farm on VETZ USA, Site. Each biodiesel plant will accommodate and supply fuel to the VETZ USA Travel Plaza / Truck Stop. VETZ USA, will build and franchise out 100 Alternative Stations within Ohio. (2years) | DcNG and Technical Service | 1,500 | 0 to 30 days | \$45,000,000 |
| Wayne | Sludge Storage Roof | Install roof over sludge storage area to improve drying of sludge cake. | Village of Dalton | 10 | 181 days or more | \$65,000 |
| Wayne | N. Church St. Sanitary Sewer Project | Install new sanitary sewer, sewer laterals and manholes where sewer is not currently available and much needed. 6000 linear feet 8 inch sanitary sewer 15 each Sd. 48 inch dia. manholes 1500 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 181 days or more | \$700,000 |
| Wayne | Freet St. to Buckeye St. Sanitary Sewer Replacem | Replace over 50 year old sanitary sewer, sewer laterals and manholes with new PVC sewers and manholes. 6000 linear feet 8 inch sanitary sewer 12 each Sd. 48 inch dia. manholes 1500 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 181 days or more | \$425,000 |
| Wayne | Young Dr. to Briarwood Dr. Sanitary Sewer Replacem | Replace over 50 year old sanitary sewer, sewer laterals and manholes with new PVC sewers and manholes. 500 linear feet 8 inch sanitary sewer 2 each Sd. 48 inch dia. manholes 50 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 181 days or more | \$80,000 |
| Wayne | Buckeye St. Sanitary Sewer Project | Install new sanitary sewer, sewer laterals and manholes where sewers are not available. 500 linear feet 8 inch sanitary sewer 2 each Sd. 48 inch dia. manholes 50 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 181 days or more | \$85,000 |
| Wayne | E. Main St. Sanitary Sewer Replacement Project | Replace over 50 year old day sanitary sewer, sewer laterals and manholes with new PVC sewers and manholes. 4600 linear feet 8 inch sanitary sewer 15 each Sd. 48 inch dia. manholes 2000 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 91 to 180 days | \$495,000 |
| Wayne | E. Schultz St. Sanitary Sewer Replacement Project | Replace over 50 year old day sanitary sewer, sewer laterals and manholes with new PVC sewers and manholes. 2000 linear feet 8 inch sanitary sewer 5 each Sd. 48 inch dia. manholes 300 linear feet 6 inch sanitary lateral pipe | Village of Dalton | 10 | 91 to 180 days | \$150,000 |
| Wayne | Fire station construction | Construction of a new fire station to replace two outdated buildings currently in use. • Upgrade current drinking well water system at Oak Grove Mennonite Church and Pre-School to meet Ohio EPA Requirements and future needs. | Town & Country Fire District | 30 | 181 days or more | \$1,500,000 |
| Wayne | Drinking water system upgrade to meet Ohio EPA req | (DAC 3745-90-01) Replace three(3) old drain-back with drip openings below ground outdoor yard hydrants and install three (3) EPA approved non-siphon, freeze-proof, drop yard hydrants. This will include replacing 800 linear feet of new drinking water line pipe with installation under a Wayne Co. Road (Brimmer Rd.). (DAC 3745-9-05(F)) Also, the replacement of an old water well head cap with a new galvanized and vented water tight cap. These two EPA requirements for water discharge from treatment facility. Failure to comply will result in shutting down or scaling back to a point of almost closing. | Oak Grove Mennonite Church | 2 | 31 to 90 days | \$3,100 |
| Wayne | Waste water treatment facility | | Ohio Farms Packing Co | 75 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Wayne | Weatherization Saves !!! | We would train unemployed individuals currently on public assistance to perform the work. We would also assist with the Bureau of Vocational Rehabilitation to provide employment opportunities to individuals with disabilities. Weatherization would be provided to low income households under current funding streams and to higher income groups as a service paid for by the home or business owner. The project would require initial funding to purchase equipment and training. Each year of operation it is anticipated that the number of workers would increase and the amount of required funding would decrease as the program generates an income. The goal would be to make this project self-funded. By providing employment to the unemployed and saving valuable energy for the homeowner and business, this project benefits both the environment, the economy and the lives of a large number of Ohioans. The Ohio Association of Goodwill Industries has endorsed this project and will allow us to be operating quickly. The City of Mansfield recently completed an engineering project for the City water system. It was discovered that there were several areas within the city that had low water pressures below the recommended levels recommended for adequately fire fighting. This project would provide a new water tower in the area recommended by engineers to place a new water tower to eliminate these low pressure areas. The city has already identified land and has a vertical contract for the site from the land owner. The site should be able to break ground within 91 days of the award of this grant. | Goodwill Industries of Wayne and Holmes Counties, I | 160 | 91 to 180 days | \$200,000 |
| Wayne | Northeast Water Tower Project | | City of Rittman | 10 | 91 to 180 days | \$950,000 |
| Wayne | family needs | my family needs new home repairs there is 7 of us in one home we also need a new vehicle to get our family to doctors appointments Blower and Baler systems to effectively collect, store and separate post consumer waste for appropriate recycling. Replace all fluorescent and incandescent lighting with energy efficient CFL, LED and T8 lighting. Replace current roofing with white energy and reflective quality roofing. Replace a flooring with US Green Building Council approved recycled tiles and carpeting. Replace current climate control with approved Geothermal climate systems. Replace floor caps with energy efficient emulsion vinyls. Upgrade equipment with non-recycled saving toners for its distribution. Upgrade current manufacturing and computer equipment with Government approved energy star equipment. Add a minimum 15% new jobs potential for our environmental control programs to continue our current certifications PSC, ISO9001, and Rainforest Alliance and the pursuit of audits and certification for: SFI, PEFC and our inclusion in to SGP (Sustainable Green Preferential) labeling, which provides green graphic solutions to government. Implementation of employee carpool and incentive programs for energy efficiency in and around the work environment and in their homes. | family | 44667 | 0 to 30 days | \$25,000 |
| Wayne | Clean Communities Project | | Wooster Printing & Litho | 88 | 0 to 30 days | \$2,975,000 |
| Wayne | Arthur family survival | Send 2 sons & daughter to college. Daughter is out of work, one son job being moved out of state. That son is expecting first child in April. Layout is scheduled for day before due date. Insurance benefits have been cut sharply so hospital bills will be overwhelming. I am helping as much as I can but husband was hurt Dec. 2007 and approved Nov 2008 (\$1000 per month). I'm sure this is not an economic easy in this economy. We need to figure out a way for our family to survive with unemployment and disabilities. Reeducation to more useful skills would help but has to be some financial advice while the education plans please. I don't expect this to be approved, but I wanted someone to know what is happening in the home, networking families in this country. I lay awake every night wondering how we will make it through. This funding is to maintain a local grocery store in a small town with elderly and high unemployment. These people mostly live on the food bank. The closest of this location does not even have a Wooster, about 20 miles west. | None | 3 | 0 to 30 days | \$200,000 |
| Wayne | Apple Creek Development Program | | Apple Creek Market | 18 | 0 to 30 days | \$100,000 |
| Wayne | The Daphne Ross Project | I want to be a small business owner. I want to own a shop where America's can buy "Made in America" products without the cost of China & without the criticism of buying that stinky "Made in China". I want to help young family members to own their own business. I have a business from my mother. I want to feature the excellent works of family and friends that need more income in their own products. I have many talented artists, crafters, etc. I want to combine articles of the past (antiques) and the gifts of talented people of the present. I have secured a location in the beautiful village of Steubenville, Ohio. The building is on State Highway 585. I am signed up for a business class with SCORE. My project notebook is full of organized notes, ideas, photos and plans. I have opened a special savings account for my dream, because saving is very important. I am doing my homework, because homework is important. Large stores are closing and I won't divorce. & folks are still going to shops, give the little guy a chance. | The Daphne Ross Project | 2 | 91 to 180 days | \$9,000 |
| Wayne | Hire and House Homeless | As a high school teacher, I have a surrogate mother-relationship with two former students, aged 21-26 who have significant physical and intellectual disabilities. These two are in need of family support, and have struggled with homelessness and unemployment since graduation from high school. With these funds, I would help each one purchase a used vehicle which would greatly enhance their employment opportunities, and housing on certain vehicles. I personally have no other children, and I won't divorce. & folks are still going to shops, give the little guy a chance. | Hire and House Homeless | 3 | 0 to 30 days | \$5,000 |
| Wayne | West Salem Community Campus Going Green | Removing gas furnace, and installing Geo-thermal or solar heating in the village's largest building. Reducing the amount of Natural Gas that is used each year. | West Salem Village | 10 | 91 to 180 days | \$500,000 |
| Wayne | Farm-to-table Disease Prevention | Agriculture in Ohio contributes \$94 billion to the state economy and is responsible for 1 in every 7 jobs in the Ohio. Foodborne diseases affect close to 2.6 million residents annually and result in \$7.7 billion dollars in health care costs and loss of productivity. Production of a SAFE food supply from Ohio farms is critical to agricultural sustainability AND reducing the public health cost. Most foodborne pathogens enter the food chain at the time of production, on the farm. Ensuring safer food production is a priority for Ohio farmers who will have significant impact on the economic sustainability of Ohio's agricultural industry and reduce health care cost. The Ohio State University, with its comprehensive disciplines of Veterinary Medicine, Agriculture, Public Health, and Medicine is in a unique position to contribute to the aim that will benefit Ohio, as well as other states and our national economy. | The Ohio Agricultural Research and Development Cen | 200 | 181 days or more | \$1,500,000 |
| Wayne | Orrville Business and Technology Park, Phase 3 | This project would involve the extension of Smucker Road from the existing Dairy Lane to Main Street (State Route 57) as well as utilities. Not only would this open up more land for industrial development but would also give alternative access from State Route 57 to the existing Business and Technology park. | City of Orrville | 100 | 31 to 90 days | \$500,000 |
| Wayne | Chippewa Youth Sports Complex | Purchase land within the Township of Chippewa, Ohio and construct a youth sports complex for use by children on the community and surrounding communities. Sports being football or soccer, baseball, softball, and soccer. This project would create numerous jobs during the construction phase and would also create permanent jobs for upkeep and maintenance of the facility. This complex could also generate income by hosting tournaments and other events, and contribute to a healthier youth population in our area. Our current sports programs keep kids off the street and focus on creating better citizens for our future. I personally have no other children, and I won't divorce. & folks are still going to shops, give the little guy a chance. | Chippewa Youth Football Association | 75 | 31 to 90 days | \$1,250,000 |
| Wayne | Converting Biomass Waste into Clean Electricity an | Technology Management, Inc. (TMI) a leading Ohio solid oxide fuel cell (SOFC) systems company in collaboration with The Ohio State University Biomass to Energy Program under an exclusive commercialization license from Epsilon (EA) propose to construct a combined pyrolysis-SOFC fuel cell system to convert farm and forest waste, a major source of pollution into a bio-char, a marketable soil enhancer and a proven form of carbon sequestration and b) zero carbon electricity and heat. Both TMI and Epsilon have previously demonstrated systems at the scale being proposed in public, but have never combined the two at a single location. | TMI Fuel Cell Systems | 15 | 0 to 30 days | \$2,500,000 |
| Wayne | West Salem Crime Prevention | This achievement will be unparalleled in the world because of the farm scale and permit OARDC to be the proving grounds for a revolutionary new commercial product. For a previous proposal, a site and an Ohio manufacturing team were identified which could be returned immediately to high engineering construction. A company (i.e. OM Energy) would evaluate the reactor for marketability. Subsequent funding would purchase the value of biochar to replenish soil carbon pools, restore soil fertility and sequester CO2 as a way to mitigate global climate change. | Village of West Salem | 3 | 91 to 180 days | \$50,000 |
| Wayne | Impact Christian Childcare | Purchase 2 new digital in car dash cameras for each Police cruiser. Purchase 2 new night vision and potentially a thermal imaging camera for the police cruisers. Purchase 3 new surveillance cameras to install on the wall for the community watch program. We are creating a Christian Daycare Center in Wayne County for all people. Are goal is to have a low tuition so that any parent can bring their kids. It will be for kids 1800 to school age. The money would go to the remodeling of the building, supplies, and new furniture. We want to give jobs a headstart in their education and development, and then have a place for them to get continued help as they go through school. Future plans include even a tutoring center as the kids get older. Funding is needed to reopen the Wayne County Pay to Stay (PTS) facility which is being shut down 2/28/09. The PTS facility opened almost 40 years ago and has served the community and justice system well. Over 3,100 individuals have been through the PTS program with a completion rate over 90%. This facility can house up to 100 non-violent children leaving jail space available for fathers. This program facility is similar to the Community Based Correctional Facilities (CBFC) that the Ohio Dept of Rehabilitation and Correction is recommending in traditional jails. The cost per day per inmate is half of PTS in the Wayne County jail. Also, the program provides counseling, GED, and Community Service opportunities. It also allows for work release for those who are employed to allow them to stay employed while serving their time. There have been many success stories cited by those who have completed the program. Judges and community groups are behind the PTS program. Funding is the only reason for the closing. Due to the economic downturn, funding was cut for the very important, but non-funded program. This request is for funding to reopen the PTS for 2009 and 2010. Project involves full reconstruction of approximately 900 lineal feet of South Street in the Village of Shreve. Project will entail replacing waterlines, storm sewer and sanitary sewer, along with full depth pavement replacement. | Impact Christian Fellowship | 15 | 31 to 90 days | \$15,000 |
| Wayne | Pay to Stay Continuation | | Wayne County Sheriff's Office | 10 | 0 to 30 days | \$800,000 |
| Wayne | South Street Reconstruction | | Engineering Associates, Inc. | 6 | 91 to 180 days | \$510,000 |
| Wayne | Manufacture Zone Control Dampers for HVAC | Manufacturing Zone Control dampers that utilize less energy for their control than existing units made by others. The dampers manufactured can be more easily utilized in the repair and modernizing old houses and buildings to save the cost of heating and cooling the structures. We have a simple procedure for installing the finished dampers and our motor consumes less energy when they generate the dampen tables. They can be controlled by simple on/off heat/cold thermostats made by any one. | ALAN Manufacturing Inc. | 30 | 0 to 30 days | \$500,000 |
| Wayne | Hydrogen generator that works for diesel engines | We have tested and proven an on demand hydrogen system designed to improve fuel economy and emissions on diesel engines. Tests are showing up to 30% increase in fuel economy and up to 40% Project in production phase. We stimulate money we will pass the savings on to the consumer 100% until the money is depleted. System costs consumer \$4,295.00. With stimulus money, \$3,265.00 unit funding is available. This system can be used on trucks, schoolbuses, public transportation, any diesel engine. We are also selling auto furnaces with diesel power units. We have proven our product and are moving forward with or without government funding. Funding will only allow us to pass the money savings to the consumer. | True Green Energy Solutions | 10 | 0 to 30 days | \$100,000 |
| Wayne | MORT AND ASSOCIATES | ALAN EFFORT TO ESTABLISH NEW JOBS IN THIS RURAL AREA, WOULD BE EXPANDING AN EXISTING BUSINESS. THIS BUSINESS HAS BEEN SUCCESSFUL IN THE PAST BUT IS FEELING THE EFFECT OF A FAILING ECONOMY. FUNDS WILL BE NEEDED TO TRIPLE THE WORK FORCE. AND THE JOB SITE WOULD HAVE TO BE MODIFIED TO ACCOMMODATE THE EXTRA WORKERS. | DON MORTIMER INSURANCE | 9 | 31 to 90 days | \$300,000 |
| Wayne | A Shovel-ready Energy Discovery-Innovation Insttu | Technology Management, Inc. (TMI) and The Ohio State University formed an innovative private-public partnership (in 2005) to commercialize farm-scale bioenergy systems for rural farms and build a major export market for Ohio. The systems would generate clean electricity and heat (using ethanol-based fuel cell systems) from biogas (made from farm manure) using farm-scale digesters and feeders. The unique farm-scale of the system positions Ohio to provide global leadership. The hub and spoke model uses narrow exclusive licenses to allow inclusiveness of multiple biomass conversion devices and energy conversion devices, including other fuel cell manufacturers. It is business-led, but has no restrictive academic freedom to explore or restrict. | Technology Management, Inc. | 75 | 31 to 90 days | \$10,000,000 |
| Wayne | Dalton Water Treatment Plant | A 2009 Brookings Institute report urges US implementation of the e-DI model to fast-track US innovation and merge federal and institutional research with industry commercialization objectives. TMI and OSU are already doing this. With the Brookings Institute, stimulus dollars would leverage several million dollars already invested. Fill the program to a national visibility, and launch a new Ohio industry. | Village of Dalton | 10 | 181 days or more | \$2,250,000 |
| Wayne | E. Main and Mill Street Waterline Replacement | The Village water supply system currently consists of groundwater wells with disinfection. The iron and manganese concentrations in the groundwater exceed the Ohio EPA Secondary Contaminant levels. Also, there is an inadequate disinfection prior to the first user in the current system. The proposed water treatment plant would remove iron and manganese to below the EPA levels and provide adequate contact time for the disinfection. The proposed water treatment plant would also include softening to remove hardness from the water. The proposed waterline will replace an existing waterline that is 90 years old. The existing waterline has approximately 4 breaks per year which disrupts water service for the residents in these areas and also increases the risk of contamination of the drinking water. Additionally, the waterline is undersized for adequate fire protection. | Village of Dalton | 10 | 91 to 180 days | \$417,000 |
| Wayne | Bank & Brooklyn Streets Improvements (Revisions to | Bank & Brooklyn Streets are primary access routes. The project is reconstruction of approximately 600 LF of roadway, storm drainage & VI. Improvement. These streets will serve a business industrial area. | Village of Creston | 15 | 31 to 90 days | \$359,550 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Wayne | POWER - Proactive Opportunities in Windpower Educa | Install a SkyStream 37 Windturbine in the Orville City School Educational Complex for Wind turbine and Alternative energy Education - P.O.W.E.R. is dedicated to alternative resource education. With diminishing resources we need to be active in environmental stewardship for the next generation. With much of our current energy dependent on nonrenewable forms of energy, it is our responsibility to educate the next generation on alternative forms of energy. The objectives of P.O.W.E.R. is to install a wind turbine on the grounds of the new Orville Elementary School, with a starting to integrate wind energy education. We will collaborate with the Ohio Energy Project and the National Energy Education Development Project to help integrate wind energy education in our elementary educational curriculum. This implementation will create a new set of wind energy education standards for our science department, thus creating opportunities for students, our community, and the surrounding region. We will be creating educational related and a wind energy website, which will all be handled, financially, by P.O.W.E.R. A wind turbine is the next opportunity for our schools and community. | Orville City Schools | 10 | 31 to 90 days | \$15,733 |
| Wayne | Fund for Expansion of Access to Communication Devi | To establish a fund to expand access to communication devices. Individuals with severe communication disabilities often lack funding for devices and experience increasing difficulty in obtaining funding from commercial lenders. The device permit people with severe disabilities to manage their other healthcare issues, remain independent, and lessen their dependence on other government resources. The fund would permit over 250 people per year to acquire new devices. Individuals would be expected to repay the loan fund; loan fund repayments would be returned to the State. Additional sales of 250 devices per year would generate between 40-50 new jobs in Northeastern Ohio. | Prentke Romich Company | 40 | 31 to 90 days | \$2,000,000 |
| Wayne | WAY-SR585 Reconstruction Phase 2 | This project will improve over 5100 feet of SR 585 within the City Corporation limits by widening, additional lanes, and utilities improvements. This project will reduce congestion and improve safety, facilitating commercial and industrial growth already taking place along this corridor. The business use is scattered throughout the entire length of the project. Recently developed industrial and technology parks in this area are expected to employ 600 people and occupy over 500,000 sq. ft. of buildings. In addition, the redesignment of the former RoboMarket facility located within the project limits would be facilitated by this improvement. There are over 16,000 jobs located within 3 miles of this project. The Wacoer Comprehensive Plan has identified this as an important roadway and area for the city. This portion of SR 585 has been identified as being an arterial and the Future Thoroughfare Plan has this as a 20 year arterial project on the 5 year capital improvement list. A multi-use path will provide alternative transportation options. | City of Wooster | 120 | 181 days or more | \$2,000,000 |
| Wayne | WAY-SR 585 Phase 1 | This project will improve over 3500 feet of SR 585 within the City Corporation limits by widening, additional lanes, and utilities improvements. This project will reduce congestion and improve safety, facilitating commercial and industrial growth already taking place along this corridor. The business use is scattered throughout the entire length of the project. Recently developed industrial and technology parks in this area are expected to employ 600 people and occupy over 500,000 sq. ft. of buildings. In addition, the redesignment of the former RoboMarket facility located within the project limits would be facilitated by this improvement. The Wooster Comprehensive Plan has identified this as an important roadway and area for the city. This portion of SR 585 has been identified as being an arterial and the Future Thoroughfare Plan has this as a 20 year arterial project on the 5 year capital improvement list. A multi-use path will provide alternative transportation options. | City of Wooster | 75 | 181 days or more | \$1,100,000 |
| Wayne | Mineral Spring Street Concrete Replacement | Concrete replacement of Mineral Spring Street | City of Orville | 5 | 91 to 180 days | \$200,000 |
| Wayne | South Crown Hill Road Concrete Repair/Replacement | Concrete repair and replacement of S. Crown Hill Road | City of Orville | 5 | 91 to 180 days | \$75,000 |
| Wayne | Towing business | New towing business. Would start with 1 truck, 1 driver, and dispatcher. Would offer 24/7 service. Would be available throughout the county. Primary zip would be 44691. Advertising & insurance would also be purchased using this money. 350 square feet of new structure to be renovated for office space. One acre of land to be purchased for storage of vehicles as needed. | Self | 10 | 31 to 90 days | \$200,000 |
| Wayne | Solar/Wind Consulting, Distribution and Installati | Certification for solar and wind energy system installation including: Distribution, custom design, installation, and financing as certified contractors within the State of Ohio. Currently there are very few consultants or installers within the state. We would employ warehouse personnel, office staff and installing staff. Would need certifications to design systems for customers within the state of Ohio. | SNL Enterprises, Inc | 15 | 91 to 180 days | \$165,000 |
| Wayne | Smithville to Orville Railroad Crossing Safety Pr | Five railroad crossings will receive lights and gates: TR145, Chipewee Rd., AAR DOT # 47318V TR216, Eggar Rd., AAR DOT # 47319T TR235, Leaky Rd., AAR DOT # 47315A TR228, Northeast St., AAR DOT # 47319C TR212, Paradise Rd., AAR DOT # 47318K All five currently have passive warning devices (crossbucks). | Ohio Rail Development Commission | 4 | 31 to 90 days | \$850,000 |
| Wayne | WAY-Melrose Drive Reconstruction | This project will improve over 4200 feet of Melrose Drive within the City Corporation limits by widening, improving intersections and utilities improvements. This project will reduce congestion and improve safety, and will complete corridor improvements connecting the north end and east side commercial districts, facilitating commercial and industrial growth. The Wooster Comprehensive Plan has identified this as an important roadway and area for the city. This portion of Melrose has been identified as being an arterial and this project is one of the top 2 projects in the 5 year capital improvement list. A multi-use path will provide alternative transportation options. In addition, this project has been identified by the City Schools as their top priority for school safety and transportation issues. | City of Wooster | 50 | 181 days or more | \$2,160,000 |
| Wayne | CR188, Wayne Co., Railroad Crossing Safety Project | Recessed warning devices added to CR 188, West Lebanon Rd., AAR DOT # 47316B. This crossing is ranked #200, of approximately 6000, on the list of most hazardous crossings in Ohio. | Ohio Rail Development Commission | 6 | 31 to 90 days | \$170,000 |
| Wayne | Hawg Closet | The "Hawg Closet" will be a retail store for bike and motorcycle clothes and accessories. This was a existing business until the downturn in the economy caused it to close. | Hawg Closet | 4 | 31 to 90 days | \$200,000 |
| Wayne | Sunrise Circle resurfacing | Resurfacing of Sunrise Circle | City of Orville | 5 | 91 to 180 days | \$16,000 |
| Wayne | Lynn Drive Resurfacing | Asphalt Resurfacing of Lynn Drive | City of Orville | 5 | 91 to 180 days | \$75,000 |
| Wayne | Hostetler Road Concrete repairs | Concrete repairs for Hostetler Road | City of Orville | 5 | 91 to 180 days | \$100,000 |
| Wayne | Viking, Meadow, Lakeview, Heights, Magnolia, Heath | Concrete repairs and/or replacement of Viking, Meadow, Lakeview, Heights, Magnolia, Cloveridge, Heatherwood, etc. | City of Orville | 5 | 91 to 180 days | \$500,000 |
| Wayne | East High Street Extension | Construction of new roadway - extension of East High Street | City of Orville | 10 | 91 to 180 days | \$358,306 |
| Wayne | WAY-Melrose Drive Reconstruction | This project will improve over 4200 feet of Melrose Drive within the City Corp. Limits by widening, improving intersections and utilities improvements. This project will reduce congestion and improve safety, and will complete corridor improvements connecting the north end and east side commercial districts, facilitating commercial and industrial growth. The Wooster Comprehensive Plan has identified this as an important roadway and area for the City. This portion of Melrose Drive has been identified as being an arterial and this project is one of the top 2 projects in the 5 year capital improvement list. A multi-use path will provide alternative transportation options. In addition, this project has been identified by the City Schools as their top priority for school safety and transportation issues. Individuals: Working together as a network of collaborating social service agencies, financial institutions and local employers, the initiative is helping families and individuals get the needed tools to gain and benefit from savings and assets such as homeownership, continued education, job, auto enterprise development. IDA Program: Grants to fund special-purpose, matched savings accounts called Individual Development Accounts (IDAs) families use their IDA savings, including the matching funds, to achieve any of three objectives: Acquiring a first home; Capitalizing a small business; Enrolling in postsecondary education or training. In addition to helping participants with their IDA savings, the project will provide basic training and supportive services related to family finances and financial management; among these and financial education on issues such as saving and managing a bank account or a credit card; Credit counseling and credit repair; Guidance in accessing refundable tax credits, including the Earned Income Tax Credit. This network based initiative seeks to empower low-income families out of poverty by enabling them to build relationships with community members and bridges to resources of higher income networks and public institutions. Families are mentored by middle and upper income allies who ballast them and kind support. The family is the Circle Leader, setting direction to activities. With the help and friendship of their allies, each family sets and achieves goals unique to their own needs. | City of Wooster | 60 | 181 days or more | \$2,160,000 |
| Wayne | Individual Development Accounts (IDA) | Individuals: Working together as a network of collaborating social service agencies, financial institutions and local employers, the initiative is helping families and individuals get the needed tools to gain and benefit from savings and assets such as homeownership, continued education, job, auto enterprise development. IDA Program: Grants to fund special-purpose, matched savings accounts called Individual Development Accounts (IDAs) families use their IDA savings, including the matching funds, to achieve any of three objectives: Acquiring a first home; Capitalizing a small business; Enrolling in postsecondary education or training. In addition to helping participants with their IDA savings, the project will provide basic training and supportive services related to family finances and financial management; among these and financial education on issues such as saving and managing a bank account or a credit card; Credit counseling and credit repair; Guidance in accessing refundable tax credits, including the Earned Income Tax Credit. This network based initiative seeks to empower low-income families out of poverty by enabling them to build relationships with community members and bridges to resources of higher income networks and public institutions. | Wayne | Bridges to Hope | Weekly Community Meetings gather Circle Leaders, Circle Allies, and other interested community members to provide support and networking opportunities. Monthly Big Year Meetings address the causes of poverty in the community over time, including community and service projects to economic and social justice. A Guiding Coalition composed of families with low income, community leaders, elected and appointed officials, faith based members, and other volunteers. The coalition works to change the mind set and policies of the community with respect to poverty. A Job program in Ames, IA, that showed increased earned income, more education, reduced welfare benefits, better transportation, housing, health care. We would like to be able to use this money to help a minimum of families/individuals maintain their homes, apartments, and utilities while experiencing layoffs and/or reduction in work hours. Our section 8 Voucher program predicts a 112 year wait for new vouchers, and emergency numbers and emergency assistance requests have increased significantly. Funding would provide the hiring of 2 additional full time officers to prevent crime and enforce Village and State ordinances. It would be replacing 2 full time positions lost in the last 10 years due to economic collapse. It would also provide 24 hour police protection which the village currently does not have. * * * * * 14 Representatives (Employees, then self sustaining) 940 Public High Schools 60 Private High Schools | United Way of Wayne and Holmes Counties, Inc. | 50 | 0 to 30 days | \$75,000 |
| Wayne | Supplemental Emergency Food and Shelter Dollars | Individuals: Working together as a network of collaborating social service agencies, financial institutions and local employers, the initiative is helping families and individuals get the needed tools to gain and benefit from savings and assets such as homeownership, continued education, job, auto enterprise development. IDA Program: Grants to fund special-purpose, matched savings accounts called Individual Development Accounts (IDAs) families use their IDA savings, including the matching funds, to achieve any of three objectives: Acquiring a first home; Capitalizing a small business; Enrolling in postsecondary education or training. In addition to helping participants with their IDA savings, the project will provide basic training and supportive services related to family finances and financial management; among these and financial education on issues such as saving and managing a bank account or a credit card; Credit counseling and credit repair; Guidance in accessing refundable tax credits, including the Earned Income Tax Credit. This network based initiative seeks to empower low-income families out of poverty by enabling them to build relationships with community members and bridges to resources of higher income networks and public institutions. Families are mentored by middle and upper income allies who ballast them and kind support. The family is the Circle Leader, setting direction to activities. With the help and friendship of their allies, each family sets and achieves goals unique to their own needs. | United Way of Wayne and Holmes Counties, Inc. | 100 | 0 to 30 days | \$50,000 |
| Wayne | Increase Police Personnel | Funding would provide the hiring of 2 additional full time officers to prevent crime and enforce Village and State ordinances. It would be replacing 2 full time positions lost in the last 10 years due to economic collapse. It would also provide 24 hour police protection which the village currently does not have. * * * * * 14 Representatives (Employees, then self sustaining) 940 Public High Schools 60 Private High Schools | Village of Dalton Police Department | 2 | 0 to 30 days | \$80,000 |

| Wayne | North Central Schools Turning Lanes | The project involves safety and capacity upgrades on State Route (SR) 3 south of the Village of Creston in Wayne County Ohio. The improvements will include widening 2,000 feet of SR 3 adjacent to the new elementary school and expanded middle and high schools. The widening will include the addition of a center left turn lane to provide left turn lane storage for vehicles turning into any one of the five drives associated with the three schools. The left turn lanes are vital important to provide safe storage of passenger cars (students, parents, faculty/staff and visitors) and school buses out of the high speed (50 mph) through lanes. Additionally right turn lanes are being added to the two highest volume drives of the five drives to facilitate the right turn volumes to the schools. | North Central Local Schools | 30 | 31 to 90 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Wayne | Waste-to-Fischer Tropsch (Green) Diesel | Phase One - Cost \$2.2M This project proves the historic values and volumes from the Fischer Tropsch Gasification Process. Built in cooperation with Floyd Schreiber of OSU Wooster. Inputs: Outputs 1 ton de-oiled adjudicatory waste: 68 galns FTD 1 ton pelletized plastic &/or tires: 100 galns FTD Others may input coal or gas. But both are expensive, not renewable inputs and will not enjoy economic incentives. Phase Two - \$40M 400 Ton per day plant that produces 3 million gallons of FT Diesel per day. This will be a stand alone fuel of an attractive blending agent to Ohio vehicles, selling \$1.00 per gallon in tax incentives. The \$2.75 per gallon direct reimbursement to producer (capped at \$1.9M) will cover the \$1.88M per year financing charge, plus add another \$215K. Should plant perform as predicted, this \$1.9M will be earned on production day #1, when the 2.53 million gallon batch is produced. FT Diesel (currently sold by Shell) as a premium diesel is environmentally sensitive. Europe enjoys the emissions characteristics of ultra low sulfur diesel, and therefore will enjoy a premium price when sold to Ohio vehicles, refiners or blenders. SHOWING FOOD FISH AND USING THE NUTRIENTS FROM THE FISH WASTE TO GROW VEGETABLES. WE WILL THEN TAKE THE REMAINING WASTE SOLIDS AND USE IT FOR PLANT FOOD FERTILIZERS. | Home Grown Partners | 36 | 0 to 30 days | \$1,000,000 |
| Wayne | GROW MORE FISH | | SCALES TO TAILS SEAFOOD SHOPPE | 5 | 0 to 30 days | \$700,000 |
| Wayne | SOLAR LIGHTS | GAMA SONIC solar charged lighting INCREASING EFFICIENCY OF ANY SOLAR TECHNOLOGY AVAILABLE BY 25% GAMA SONIC makes solar charged lights that are brighter and last up to 3 nights with a one-day charge. The unique designs available, light output and installation options are second to none worldwide. GAMA SONIC also offers innovative multi-purpose rechargeable products that range from party lights to emergency lighting products. | ORRICO INC | 60 | 0 to 30 days | \$300,000 |
| Wayne | Goodwill Industries Employment Program | Continue to train and develop life skills for individuals with disabilities or barriers to employment. Providing real life work experience, with eliminating barriers to employment. | Goodwill Industries of Wayne and Holmes Counties, | 50 | 31 to 90 days | \$100,000 |
| Wayne | Water Quality Trading Planning for Ohio Basin Water | This project requests funding for feasibility and planning studies required by state law for the development of water quality trading plans for the 17 of Ohio's MCHS watersheds opening over 1000 miles of courses in the areas that drain into the Ohio River. Realizing savings the average of 100 million dollars in reduced costs of upgrading their waste water treatment plants (WWTTP), the project will reinvest the savings primarily by creating 41 new jobs for each of the first 2 years due to stimulus funding and 1600 jobs for each of the first 5 years. The project implementation and 1500 jobs for the next 15 years through the savings in facilities upgrades. In each watershed we will evaluate the availability of water quality trading based on (a) the current status and sources of pollutants, (b) potential pollutant credit availability, (c) the needs of credit buyers and purchasers, and (d) the willingness of people to implement conservation measures and for the point sources to invest. In addition to meeting a substantial part of the pollution reduction requirements for wastewater treatment plants and coal power plants, WWTTPs reduce much more pollution from the watershed. Our primary goal is to be a leader in the production, marketing and sale of ethanol in the United States by obtaining significant breakthrough through the use of biotechnology. Our intent is to begin immediately with the production of a corn based ethanol plant to take advantage of the ethanol in the marketplace today, while simultaneously funding research and development to make cellulosic ethanol commercially viable. We have a chance to better the environment, increase Ohio's reputation on biotechnology, and receive endorsement on a nonrenewable resource coming from highly unstable locations around the world. | Ohio State University | 1750 | 0 to 30 days | \$4,128,800 |
| Wayne | Cellulosic Ethanol | | BioFuel, LLC | 700 | 91 to 180 days | \$39,000,000 |
| Wayne | Water Treatment Plant CL2 Storage Expansion | This project will expand the capacity of the water treatment plant to receive, store and distribute liquid hypochlorite solution used for disinfection of City's water supply. Current storage facilities have limited storage capacity, requiring frequent deliveries and inefficient operations. Family and Children First will assess that families with need, regardless of the number of children they have, or their ability to pay will receive ongoing home visits and support that children between the ages of 0-18. Family Support Aids will make referrals to a variety of services and facilitate family participation, they will provide parenting education, offer transportation and support to receive ongoing services, help families access appropriate benefits and respond to requests for help. Early developmental delays will be identified, mental depression screenings will be done, and child well being will be monitored. Home Learning curriculum will be used, and referral to early educational experience will be promoted. This program will be overseen by and report to the Family and Children First Council. | City of Wooster | 6 | 31 to 90 days | \$250,000 |
| Wayne | Family Support Aids | | Family and Children First Council | 4 | 181 days or more | \$100,000 |
| Wayne | New Born Nurse Gatekeeper Project | A Registered Nurse (RN) would be available to visit all Wayne County newborns in their home for face to face contact with the child and parents within the first 6 weeks after birth regardless of birth order, ability to pay or other risk factors. As a gatekeeper for the identification of health, mental health, abuse and neglect concerns the RN will provide the following services: 1. Help the family establish medical connections and supports in the community, 2. Provide and check Maternal Health, Newborn Health, Education about Newborn Care, promotion of early literacy, 3. Will perform Health and Developmental screenings, 4. Will provide resource information and make appropriate referrals to ongoing services, 5. Provide ongoing services and support. | Family and Children First Council | 1 | 181 days or more | \$25,000 |
| Wayne | Parkview Waterline Replacement | This project will replace over 500 feet of undersized and deteriorated waterline in a dense, residential area of the City that currently experiences frequent leaks and disruption of service. This project will increase circulation and improve water quality, as well as provide adequate flow and pressure for fire protection. This line is immediately adjacent to an elementary school's bus loading area, and will need to be replaced this summer to avoid disruption. | City of Wooster | 7 | 31 to 90 days | \$250,000 |
| Wayne | Morgan and Saunders Waterline Replacement | This project will replace over 400 feet of undersized and deteriorated waterline in a dense, residential area of the City that currently experiences low pressures and water quality problems, as well as frequent leaks and disruption of service and fire protection. This project will increase circulation and improve water quality, as well as provide adequate flow and pressure for the protection. | City of Wooster | 25 | 181 days or more | \$990,000 |
| Wayne | Skylark Neighborhood Waterline Replacement | This project will replace over 5,400 feet of undersized and deteriorated waterline in a dense, residential area that currently experiences low pressure and water quality problems. This project will increase circulation and provide increased fire flows. | City of Wooster | 25 | 91 to 180 days | \$990,000 |
| Wayne | Heyl Road Waterline Extension | Final design for construction of approximately 1,800 feet of 8" waterline to serve 52 homes along Heyl Road. Project will also include valves, hydrants and all other appurtenances. | Wayne County Department of Environmental Services | 5 | 91 to 180 days | \$177,000 |
| Wayne | 69KV loop | Install new 69KV loop within City. Will eliminate back up power supply from multiple source to improve customer reliability, will provide potential for future exchange of energy between two investor owned utilities increasing the grids reliability while providing savings to customers by purchasing energy from multiple independent system operators. | City of Orrville, Electric Division | 65 | 181 days or more | \$6,000,000 |
| Wayne | Bag Filter & Carbon Injection | Install existing electrostatic precipitator with bag filters & carbon injection systems to further reduce particulates & TSM and mercury emissions to meet upcoming regulations on three coal fired boilers. | City of Orrville, Electric Division | 65 | 181 days or more | \$2,700,000 |
| Wayne | Diesel Generator | Install diesel generator to serve as back-up & plant start capability. Can also be used to provide secondary power to Water & Wastewater facilities in emergency and provide transmission system voltage support during peak periods. | City of Orrville, Electric Division | 65 | 31 to 90 days | \$800,000 |
| Wayne | Phase I Transmission Study | Conduct feasibility study to evaluate a second transmission interconnection to improve system reliability and back up. Current interconnect provider has limited capability to serve needs. | City of Orrville, Electric Division | 65 | 31 to 90 days | \$50,000 |
| Wayne | Smart Electric Meter Project | This project is to provide labor and materials to install A121 1 new Industrial, Commercial and Residential "Smart" electric meters. This project will integrate with other initiatives to make the Utility electric system a "Smart" system. This will allow us to better forecast load, manage the system load and demand, and communicate with the customer to allow them to make informed choices in managing energy consumption. This will be part of the Utility's overall goal to have "Smart Grid" technology to help us prepare for future demands and allow us to integrate and share information with the Independent System Operators. | Orrville Utilities - City of Orrville | 1 | 91 to 180 days | \$867,000 |
| Wayne | Cooling Tower Efficiency Upgrade | Replace 88 & 98th eliminators systems. Reduce water loss (lowers water provided by City Water Dept) & improve thermal performance that will increase efficiency of electric turbine-generators. | City of Orrville, Electric Division | 65 | 31 to 90 days | \$350,000 |
| Wayne | System Control and Data Acquisition (SCADA) | This project will provide the labor and materials to install SCADA equipment on the Electric Utility electrical distribution system. The SCADA project will dovetail with a larger project to make the electric distribution system "Smart". This will allow for better operation and protection of the electric distribution system. This also provides the centralized SCADA control equipment at the power plant to communicate with the field devices out on the system. A SCADA system will result in an instant and measurable improvement in system reliability for customers. It will also provide data to the rest of the system as part of a "Smart Grid". | Orrville Utilities - City of Orrville | 2 | 31 to 90 days | \$267,000 |
| Wayne | Wooster Fire Station #2 | Replacement construction of Fire Station #2 that is currently located on East Highland Avenue. Construction would consist of a 12,000 square foot facility to replace the existing 3,800 square foot station. This increase safety of the firefighters and decrease response times in the city's growing north end. | City of Wooster, Ohio | 55 | 31 to 90 days | \$4,020,209 |
| Wayne | Fiber To The Home | This project provides a fiber optic connection to approximately 4,520 homes for the purpose of providing broadband telecommunication services to its residents. In addition, the Electric Utility will utilize this medium to migrate to Smart residential and commercial Electric meters to migrate with Demand/Response controls to help regulate system loads. The Fiber optics would also be used to provide a communication medium for the electric distribution System Control and Data Acquisition System (SCADA) as well as additional Smart Grid technology. This would be an important key part of an integrated system and infrastructure upgrade from which other projects would be made possible. | Orrville Utilities - City of Orrville | 4 | 31 to 90 days | \$4,267,000 |
| Wayne | Silver Creek Sanitary Sewer | Installation of 7,800 linear feet of sanitary sewer to eliminate temporary pump station and provide gravity sanitary sewer service with adequate capacity to permit development of large commercial area, possible office and medical site, and large residential subdivision. This is fourth and final phase of four phase program to provide utility service and encourage economic development of the serviced area. Village and private investors have funded first three phases, which included extension of water lines and portions of the sanitary sewer. The sewer line will also make possible the connection of existing developments that are presently on either failing septic systems or privately operated package treatment plants, thus providing for both economic development and environmental enhancement. Development of the target area will enhance the local economic base and create job opportunities within the Village. | Village of Doylestown | 150 | 91 to 180 days | \$1,216,000 |
| Wayne | Energy Efficiency and Emissions Reduction with Cow | Build plant to process 100,000 tons of low rank (high in moisture but low in mercury, sulfur, and ash) coal for the Vine Street Power plant. Outcome is to increase electricity output and reduce emissions for this older coal fired plant. Project can be replicated around Ohio, at older coal fired utility plants (processing more tons) to create more jobs and reduce Green House Gas emissions while permitting utilities to sell more electricity. Old, small coal fired plants are needed to meet electric demand but have had to convert to western US low rank coals (for emissions purposes). As such they are not as efficient as they were when burning eastern coals. Our technology removes water from these environmentally sound coals and improves the efficiency of older boilers. | FMI NewCoal | 12 | 0 to 30 days | \$10,000,000 |
| Wayne | Silver Creek Sanitary Sewer | Installation of 7,800 linear feet of sanitary sewer to eliminate temporary pump station and provide gravity sanitary sewer service with adequate capacity to permit development of large commercial area, possible office and medical site, and large residential subdivision. This is fourth and final phase of four phase program to provide utility service and encourage economic development of the serviced area. Village and private investors have funded first three phases, which included extension of water lines and portions of the sanitary sewer. The sewer line will also make possible the connection of existing developments that are presently on either failing septic systems or privately operated package treatment plants. This project will meet both economic development and environmental enhancement goals. The Village has been working diligently to provide for the development of the area to be serviced in order to enhance the community's economic base and to provide for the creation of a significant number of new job opportunities within the Village. | Village of Doylestown | 150 | 91 to 180 days | \$1,216,000 |
| Wayne | Early Childhood Mental Health Services | Provide 50 families with children from birth to 6 yrs with early mental health intervention to foster school readiness and prevent more serious mental health issues later on in childhood. | Catholic Charities Community Services of Wayne Co | 1 | 0 to 30 days | \$50,000 |
| Wayne | Water Treatment Plant | The project will consist of new 1,000 gpm water treatment plant to replace the existing water treatment plant at the new well field. The existing water treatment plant has trouble meeting Ohio EPA secondary limits for iron and manganese, especially during periods of high water demand. This project also includes installing a new well in a new well field. The new well field has very poor water quality (4.0 mg/l iron and 0.5 mg/l manganese). The new water treatment plant will allow the Village of Doylestown to produce drinking water meeting EPA requirements. | Village of Doylestown | 200 | 181 days or more | \$3,900,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Wayne | Water Quality Trading Planning for Ohio Basin Water | This project requests funding for feasibility and planning studies required by state law for the development of water quality trading plans (WQTPs) for 10 of Ohio's HUCs watersheds spanning over half the counties in the state that drain into the Ohio River. Based on the average small town several million dollars in reduced costs of upgrading their water treatment plants (WWTPL), the project will reinvest the money into the community by creating 4 new jobs for each of the first 2 years due to stimulus funding and 1600 jobs for each of the first 5 years of implementation and 1500 jobs for the next 15 years through the savings in facilities upgrades. In each watershed we will evaluate the feasibility of water quality trading based on (a) the current and source of pollutants, (b) potential pollutant credit availability, (c) probable credit sellers and purchasers, and (d) the willingness of people to implement conservation measures and for the point sources to buy credits. In addition to meeting a substantial part of the pollution reduction requirements for wastewater treatment plants and coal power plants, WQTPs reduce much more pollution from the watershed. | Ohio State University | 1750 | 0 to 30 days | \$4,128,800 |
| Wayne | Park Street Waterline Extension | This project installs approximately 400 feet of 8" CPV, waterline, 1 4" Gas Valve, and 1 hydrant to extend potable water from the intersection of Park St. and Westview to the intersection of Park Street and West Church Street. | Village of Marshallville | 10 | 31 to 90 days | \$75,000 |
| Wayne | TCR Steel Chlorinated Solvent Plume Remediation. | Create a test process using new variety of reactive Ozone Glass targeted at PCB clean up. The product is tested and confirmed to work on TCE, PCE and related chlorinated products. A new version has been derived which works on PCBs in the lab. This product needs a list of test beds on known PCB site. | ABSORBENT MATERIALS COMPANY OF WOOSTER OHIO | 4 | 0 to 30 days | \$250,000 |
| Wayne | break show wrestling | I want to start my own entertainment company. In the pro wrestling industry, I will need to purchase a bus truck, job wrestling ring, promoters licenses, vendors licenses, hire staff and wrestlers to work the shows. This would travel through Ohio counties and employ about 35 to 40 people if not more depending on the size of venue. Also would need to purchase advertising and pay for insurance and venue cost. Also any food and or merchandise that would be sold at the show. | personal | 35 | 31 to 90 days | \$200,000 |
| Wayne | structural home problems | is interior structural wall supports of personal home | personal | 2 | 31 to 90 days | \$6,000 |
| Wayne | Regal Chlorinated Solvent Plume Remediation | Nine (9) Injection Wells to remediate a pervasive TCE plume which is impacting drinking water in Wooster Ohio, and creating issues with community redevelopment of a dormant Timken plant. The plant has been donated to the city to convert to a tech-center, voc-tech training center, but all water wells on property exceed EPA safety standards. A test remediation was successful using ABSORBENT MATERIALS swelling glass with imbedded nanoTiO2 and Platinum. This grant would fund the remediation injectors and allow the facility to be upgraded. | ABSORBENT MATERIALS COMPANY OF WOOSTER OHIO | 8 | 0 to 30 days | \$825,800 |
| Wayne | Village of Fredericksburg Water System Generator | Project involves purchasing a portable generator for use at the village's two water wells, and upgrading the electrical systems at the two well houses to add transfer switches and other necessary components. The village received a letter from the Ohio EPA dated September 23, 2008 in which they strongly recommended that the village obtain a generator to be used only for the water system. | Engineering Associates, Inc. | 2 | 31 to 90 days | \$60,000 |
| Wayne | Cover Little Chippewa Creek | Cover sections of creek adjacent to power plant to allow access to transformers, eliminate potential for contamination due to oil spills, elimination of creek erosion. | City of Orrville, Electric Division | 65 | 31 to 90 days | \$350,000 |
| Wayne | New water well | Increasing C3 machining funds to install a new well at the generating plant to replace current well due to geological instability. New well increased capacity requiring less water supply and purchased from City's water utility. | City of Orrville, Electric Division | 65 | 31 to 90 days | \$200,000 |
| Wayne | Exterior modernization of utility office building | Increasing C3 machining funds to install a new well at the generating plant to replace current well due to geological instability. New well increased capacity requiring less water supply and purchased from City's water utility. | City of Orrville, Electric Division | 10 | 181 days or more | \$167,000 |
| Wayne | New geothermal heating system for utility office b | Increasing C3 machining funds for the installation of a new geothermal heating system on a vacant building purchased from the city and conversion into a new office building. Heating system will replace multiple gas fired units and will utilize the Electric Utilities geothermal heating system as the source. | City of Orrville, Electric Division | 10 | 181 days or more | \$100,000 |
| Wayne | Wastewater Treatment Plant Improvement | The village needs to replace their existing wastewater treatment lagoons with a new package treatment plant. | Village of Marshallville | 25 | 31 to 90 days | \$1,710,210 |
| Wayne | Park Street Paving Project | This project continues to 150 feet of paving for Park Street to top cooperation line. This includes full depth pavement and storm sewer installation. | Village of Marshallville | 15 | 91 to 180 days | \$552,000 |
| Wayne | Energy Improvements | To be used for energy efficient home improvements. Windows and energy efficient heating. As well as the installation of sidewalk and retaining wall. | The Keplers | 5 | 31 to 90 days | \$50,000 |
| Wayne | Farmers Building Rights | 1. To sue legislators/leg, to gain use of Farmer's buildings/farms under lock & key by over zealous and abusive State and County officials, who are trying to expand their police powers to retain the appearance of a necessary office, and to keep their employment. 2. To cover the damages caused by abusive State and County officials who under the color of law, enforce unconstitutional court orders, and mis apply codes and statutes. 3. To fund political campaigns to elect to office personnel who understand the Constitution and American Sovereignty rights. | Farmers for Freedom | 50 | 0 to 30 days | \$5,000,000 |
| Wayne | Cloth Diaper Advocacy, Education, Manufacturing an | We would like to launch a campaign to advocate for the use of cloth diapers. By educating more families on how easy, affordable and environmentally friendly cloth diapering is, we hope that more babies will be cloth diapered. Cloth diapering is the best choice of diapering because it saves on natural resources, requires less energy and water than the production of disposables, and they can be made from all organic materials. Additionally, they would save the average household an estimated \$2500, which in turn could be used to stimulate the economy in other ways. Our program would focus on community outreach at libraries, health centers, community centers, natural food stores and other community member organizations interested in learning more. Additionally, we could hold "make your own diaper" workshops, where we can teach people how to make their own diapers, and have beginner kits with popular diapering fabrics available for purchase. | Bamboo Bums | 3 | 31 to 90 days | \$30,000 |
| Wayne | COBRA help | Over all, we just want to bring some of the western ideals about natural family living to Ohio. My son was hospitalized last week at Alton Childrens for emergency surgery. I switched jobs in February and am not eligible for employer health care for 90 days. I am the only one working in my family (my wife lost her job in October). I cannot afford to pay for COBRA let alone the medical expenses for my son's surgery. We are barely getting by and need help. Sincerely, Todd Howman | Ohio Family | 100 | 0 to 30 days | \$1,600 |
| Wayne | Edible Arrangements | Edible Arrangements is a new business that could benefit Wayne county and surrounding counties. The money will be used to rent the retail space, renovations to the space, (painting, electrical, plumbing, etc.) delivery vehicle, marketing and purchasing of product for the business. I am a single mother hoping to open a new business that would thrive in my area and help to create at least 6-10 new jobs to start. | Edible Arrangements | 6 | 181 days or more | \$350,000 |
| Wayne | Addition and Renovation of Fire Station | 3000 square foot addition and renovation to existing Fire Station to update station and meet applicable building codes, increase efficiency, and provide facility and staff housing to meet demands of increasing call volumes. | Central Fire District | 45 | 91 to 180 days | \$190,000 |
| Wayne | BIO LUBRICANTS | We are a petro-chemical start-up company. We are looking to go green! We are looking to warehouse bio-lubes that are 100% made from vegetable oil. We would distribute these chemicals in Ohio with box trucks, creating about 10 jobs & saving Ohio's environment as well. | BUCKEYE LUBRICANTS | 10 | 31 to 90 days | \$150,000 |
| Wayne | Hydroponic Greenhouse | DESCRIPTION: To create a model for an inexpensive home solar hydroponic greenhouse garden system. Progress during development to be piloted with accompanying progress spreadsheet. OUTCOME: A model home greenhouse system that produces food for home or sale that is more nutritious, safer, "greener", and inexpensive (with a stated payback period) with a lower carbon footprint than is available through stores. 1000 CFY instructions. Results to supplement existing 2000 CFY hydroponic greenhouse enterprise results. 100,000.00 to bail out our debt as sole proprietor, since RETIRING FROM THE ARMY and starting business have burned and need to clean up, would be able to place 2 fulltime team members (loan and place). 200,000 would allow for the complete placement of 2 people, trained/equipped and ready to expand my business with incredible results. | E-Nexus | 3 | 0 to 30 days | \$100,000 |
| Wayne | Future | This project is meant to increase our Lavencore business capacity by hiring two new employees and purchasing the necessary equipment to perform their job. Equipment purchases would include 2 new 1 ton cargo vans, (helping the auto industry.) 2 new spreaders/grazer machines (helping the landscape manufacturing industry), and other assorted equipment necessary to performing the job requirements. This would be a 50% increase in manpower and gross receipts for our business. These jobs would be in the \$ 40,000 / year range in salary. I feel that the new business necessary to sustain the long term employment of these individuals will be obtainable in a reasonable time period once we have had to turn away 100 to 200 new customers every year for the last several years. | State Farm Insurance, Jeff Shamp | 4 | 181 days or more | \$300,000 |
| Wayne | Economic Green-Up | This project is meant to increase our Lavencore business capacity by hiring two new employees and purchasing the necessary equipment to perform their job. Equipment purchases would include 2 new 1 ton cargo vans, (helping the auto industry.) 2 new spreaders/grazer machines (helping the landscape manufacturing industry), and other assorted equipment necessary to performing the job requirements. This would be a 50% increase in manpower and gross receipts for our business. These jobs would be in the \$ 40,000 / year range in salary. I feel that the new business necessary to sustain the long term employment of these individuals will be obtainable in a reasonable time period once we have had to turn away 100 to 200 new customers every year for the last several years. | The Weed Zapper LLC | 2 | 31 to 90 days | \$157,000 |
| Wayne | Economic Green-Up | This project is meant to increase our Lavencore business capacity by hiring two new employees and purchasing the necessary equipment to perform their job. Equipment purchases would include 2 new 1 ton cargo vans, (helping the auto industry.) 2 new spreaders/grazer machines (helping the landscape manufacturing industry), and other assorted equipment necessary to performing the job requirements. This would be a 50% increase in manpower and gross receipts for our business. These jobs would be in the \$ 40,000 / year range in salary. I feel that the new business necessary to sustain the long term employment of these individuals will be obtainable in a reasonable time period once we have had to turn away 100 to 200 new customers every year for the last several years. | The Weed Zapper LLC | 2 | 31 to 90 days | \$157,000 |
| Wayne | Testing grounds | Make improvements to existing motor vehicle testing facility. Install skidpad, roughroad, and improve existing facilities. Currently used for the testing by several tire companies. Also used for performance testing of vehicles. Improvements would be geared toward construction of additional facilities for testing of alternative fueled vehicles, test, and use as testing facilities for law enforcement, bus drivers, etc. Close proximity to Alton line industry and Ohio fuel oil development makes an ideal location for necessary testing facilities. Also used to encourage safe driving for young drivers. Would help to retain 25+ existing jobs, and add approximately 10 additional positions. | Dragway 42 LLC | 35 | 0 to 30 days | \$1,500,000 |
| Wayne | Expansion of business to provide employment | expansion of my Archery business to employ more people in a small town environment which is losing business due to economic down turn. Hopefully the business can grow to establish its self in the trading industry and provide a small town with a better business base. | Hostetler's Archery | 5 | 31 to 90 days | \$50,000 |
| Wayne | apartment building | I would like to build a multi unit apartment building/complex this would create jobs in the area of construction from excavating, millwork, concrete, soffit builders, landscaping. To provide housing for all these people who have lost their homes to foreclosure. It would be a family friendly setting. Would also have concourse employment enables in maintenance, landscaping, and possible on site child care center. This project would save my small businesses and many other small businesses in the wayne and media county areas. | rick rosel construction | 500 | 181 days or more | \$750,000 |

| Wayne | Home Place Housing rehabilitation project | Homeplace Housing Corporation is a joint venture of Wayne Metropolitan Housing and the Wayne Homes Mental Health and Recovery Board. Homeplace owns nine building units (mostly older sub divided homes in Wooster, Ohio. These units have 32 apartments between them. Three quarters of the units are rented to persons with severe mental illness and the rest to low income tenants. Homeplace does not have sufficient cash flow due to the poverty level of mental health consumers to be able to afford repairs and periodic rehabilitation of these units. Many need to be sided, have new furnaces, and in one case the foundation needs to be redone. Metro Housing and the Mental Health Board do not have funding for rehabilitation of this nature. These apartments provide shelter to people who would otherwise be homeless. The Homeplace apartment dwellers have case management from the local mental health system to help them stay in their home and maintain it. Metro Housing handles the leases and minor repairs. This additional money for improvements and rehab would help to keep these units available for people in need and prevent homelessness. | Homeplace Housing Corp, and Wayne Metropolitan Hou | 10 | 31 to 90 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Wayne | Adult Day Care | The Gilcrest Center opened in Dec. of 07 which has proven to be a huge struggle for our business. We are fighting very hard to stay afloat and would love to be considered for the financial help. The benefits that adult day care provides to the care givers is freedom to work, improve personal health, Support, Education, Decreased stress, and much needed respite. Our seniors wellness program combines health services with social and therapeutic activities to maintain their day-to-day living. Activities, exercise parties, field trips, and memory new friendships are some of the social interactions we offer. We provide breakfast, lunch and snacks. We are opened from 7:30 am to 4:00 pm. We offer transportation, pet therapy, aromatherapy, massage, physical and occupational therapy and various other services. The adults who benefit from this kind of center are adults who need social interaction and are unable to get out on their own, adults who require supervision who remain at home instead of a institution such as a nursing home, and need day to day activities. We have a certified RN/LPN and staff to provide the best care possible. We need your help! | Gilcrest Senior Wellness & Fitness Center | 12 | 0 to 30 days | \$500,000 |
| Wayne | Opening a General Store | Brand new Car Wash & General Store-employing 3-5 people, not including people to do the construction work. | Kidron General Store | 15 | 91 to 180 days | \$495,000 |
| Wayne | Cedar Lane Farms Algae Carbon Capture & Beneficial | The proposed project will incorporate specialized algae growth and harvesting technology to capture a significant portion of the CO2 in the flue gas exhaust from an industrial-scale coal gasification project to be located at Cedar Lane Farms in Wooster. The project will leverage 80% of equipment of Energy kindred for design, construction, and operation over the next 4 years. As a result of the project, engineering, construction, operator, and management jobs will be created and a promising technology, an emerging industry for both CO2 capture and renewable fuels production will be demonstrated. The integrated technology will consist of algae growth ponds, harvest, dewatering, and processing. The gas collection and injection, algae harvesting and oil extraction, anaerobic digestion of residual algae biomass, and biogas electricity generation. This pilot-scale project will be co-located and integrated with a previously and currently funded clean coal project funded by the OGDOS and DOE at Cedar Lane Farms in Wooster, OH. | Touchstone Research Laboratory | 20 | 91 to 180 days | \$1,600,000 |
| Wayne | North East Ohio Food Processing Incubator and Ace | Business, an Edison Incubator, is requesting \$3.4M to establish a food processing incubation and acceleration program in NE Ohio. An existing building within Apple Creek (ECCO Center, Apple Creek, Ohio), is the primary target, which strategically places the project in an area of 70 counties with significant agricultural production and existing food processing entities. Projections, including initial interest of over 100 companies and entities, that the facilities and programs will support 10-15 companies year one and an additional 20 companies by the end of year five. Total job creation or retention would be 75-100 in year one and additional 200-300 jobs over next three years. The funds will be used to rehabilitate a facility, purchase equipment and acquire programming costs. Planned multi-brand offices and an enhanced level of equipment capacity for processing and packaging will bring the age community housed between kitchen incubators and self packing facilities. Funds earmarked for the long success of the project are relationships with the Brannan, CIFT as well as potential for collaborative programming with OSU including, but not limited to OARDC, ATI, and Food Fed, Center. | Managed-Richland Incubator, Inc DBA Brantree Bu | 300 | 31 to 90 days | \$3,400,000 |
| Wayne | Business Buy | I would like to help out in this economy. I would like to purchase an existing gas station in the town I grew up in to retain and create jobs. These jobs would also help the local community where there has been job losses. I would like to help these people continue to provide for their family. I would like to see these people continue to send their kids to school. I would also like to provide for my family and hope to confirm this dream. I would like to increase sales at this store which also mean more state taxes to be paid. Please consider this request. Thanks | J & K Car Care Inc | 8 | 0 to 30 days | \$1,200,000 |
| Wayne | Tri-County Child Development and Learning Center | Another McGuire Creation of a Child Development and Learning Daycare Center, which would serve 104 children, 60m-5-year-olds. The Center would employ staff members and provide evidence-based best practices in childcare and curriculum. There is a significant need for high quality daycare in Ashland County so that workers can secure jobs and maintain their employment. Evening and weekend care would also be available for workers. The center would be located near a major highway and would provide daycare for high school students who are unable to attend high school graduation will be expected to increase. With Help Me Grow budgets decreasing, the center would save at-risk, low-income families, who are no longer able to access HHS. Not only would the center serve low-income families, but would also provide much needed daycare for children with developmental delays and medical conditions. For children approaching school age, the center will focus on teaching basic life skills, especially with regard to pre-literacy skills. Many local agencies such as Family Council, Department of job training, services, Help Me Grow, and MRODC are working together to make this vision a reality. | Tri-County Educational Service Center | 26 | 0 to 30 days | \$250,000 |
| Wayne | Fuel Efficiency | Purchase Auxiliary Power Units for trucks to drastically reduce idle time which will lower emissions. Purchase of solar tiles to decrease fuel consumption and increase miles per gallon. Install aerodynamic fairings on van trailers to obtain maximum fuel mileage. Purchase satellite systems for all trucks which will greatly reduce location and routing time. Purchase of fuel management systems for all trucks which will reduce fuel consumption and increase miles per gallon. | CRW Inc. | 10 | 31 to 90 days | \$500,000 |
| Wayne | Expanded ER Department and New Hospital Entry Way | Wooster Community Hospital, a municipal hospital of the City of Wooster, is in need to build a new Emergency Department to handle the continued growing patient volume while better accommodating the pediatric patient population and the need to provide a more efficient and cost-effective patient treatment area. In addition, due to the ER accounting for well over 70% of the Hospital's admissions, we would like to have this new project be a new entry way to the Hospital including improving the environment for patients, family and staff through the establishment of a security garden. | Wooster Community Hospital | 60 | 181 days or more | \$25,000,000 |
| Wayne | Regional Health Information Exchange | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to provide a Health Information Exchange among health care providers in our region. This would allow patient information to be exchanged between providers to facilitate better care and save money for industry and Federal/State government payers by avoiding duplicate testing. | Wooster Community Hospital | 10 | 181 days or more | \$1,500,000 |
| Wayne | Computerized Physician Ordering Entry (CPOE) Syst | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to extend the use of Computerized Physician Order Entry (CPOE) system within our provider facility. This system would allow physicians to enter and sign their orders electronically. The electronic order would flag alerts and allow for improved patient safety. | Wooster Community Hospital | 3 | 0 to 30 days | \$100,000 |
| Wayne | Community Quality Reporting Data Repository | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to build a repository of data for reporting of clinical outcomes and concurrent flagging of safety and infection alerts. A Business Intelligence system that would allow for the above in preparation for systems of care that potentially will be required by future healthcare reform initiatives. | Wooster Community Hospital | 3 | 31 to 90 days | \$300,000 |
| Wayne | Community Health & Wellness Center | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to build a Community Health & Wellness Center that emphasizes prevention including actual lifestyle modifications via robust walking track and nutritional education including live demonstrations, diet intervention and miscellaneous health and wellness education for all ages. We believe that through complimentary programs, physical, mental and social health can be improved in our community and reduce healthcare costs to local industry and the Federal & State government programs. | Wooster Community Hospital | 15 | 181 days or more | \$5,000,000 |
| Wayne | Literacy Program for Mothers and Newborns | As a discharge gift from Wooster Community Hospital, a municipal hospital of the City of Wooster, all mothers and newborns will receive a book to promote literacy. One of the greatest gifts we can give is to love to read. We will encourage baby's first book to be the first of many books that the family will read aloud and share. We hope that this first step towards improving literacy in Wayne County can continue to help build a lifetime habit of reading. | Wooster Community Hospital | 1 | 0 to 30 days | \$10,000 |
| Wayne | Wind and Solar Project | This project is for the installation of two 50kw wind power units and one 40kw solar roof-mounted inverter unit to generate a total of 500,000 kWh of electricity per year. Last year, our Children's Residential Treatment Center used 486,750 kWh of electricity. These wind and solar units will feed into the power grid. We have a prime location, with 165 acres on one of the highest points in Wayne County, and are ready and able to move forward with this project toward an energy efficient, environmentally conscious future. | Christian Children's Home of Ohio (CCHO) | 5 | 0 to 30 days | \$911,000 |
| Wayne | McIvaine Trucking, Clean Fuels Ohio Partner | Planning to reduce our energy consumption formally began in 2006. Expected outcomes of this project include the reduction of fossil fuel emissions, reduction of operating cost, and increase long-term stability. Ultimately, once implemented, this project will save our net for profit. Children's agency around \$50,000 annually, which can then be channeled into direct services to abused and neglected children--as well as providing a long-term renewable energy source. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wayne | McIvaine Trucking | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wayne | Orran Hofstetter | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wayne | Wooster Motor Ways Inc., a Clean Fuels Ohio partne | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wayne | Ron Burg Trucking Inc., a Clean Fuels Ohio partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wayne | Milton Township Wayne County Ohio Road Improvement | Money requested for improvements of roads and drainage ditches within the confines of Milton Township, Wayne County Ohio. The Milton Township Trustees are responsible for 33 miles of roads. Funding would be used to make improvements to selected roads and drainage ditches along the 33 miles of roads within Milton Township. Currently our tax dollars are being spread very thin. The township needs additional funding to keep all our roads in the best condition possible for the residents of Milton Township. Also water drainage is a continuing problem for some areas of the township. This is the first one we have submitted a stimulus request. If you have further questions please contact me via e-mail or by telephone. Thank you for your consideration. | Milton Township Wayne County Ohio | 3 | 31 to 90 days | \$50,000 |
| Wayne | EntrepreOrville Micro Enterprise Loan Fund | Main Street Orville, Inc will establish a microenterprise loan program through its EntrepreneurOrville initiative to assist upstarts in funding their business ideas. Funding would be contingent upon successfully completing business and financial management training. | Main Street Orville, Inc. | 30 | 31 to 90 days | \$250,000 |
| Wayne | ePrescribing | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to implement an electronic system to allow discharge medications ordered to be sent electronically to the retail pharmacy chosen by the patient. This system is part of the federal mandate for electronic medical records. | Wooster Community Hospital | 1 | 181 days or more | \$100,000 |
| Wayne | Outpatient Orders/Results Interfacing with Physici | Wooster Community Hospital, a municipal hospital of the City of Wooster, would like to provide HL7 standard electronic interfaces for the data exchange of physician orders to our hospital and test results sent back to the physician's EMR (Electronic Medical Record). | Wooster Community Hospital | 1 | 0 to 30 days | \$100,000 |
| Wayne | Nrsing Lab LPN-BSN Program | The University of Akron Wayne College in Orville, Ohio is collaborating with the University of Akron's College of Nursing in Akron to start a new LPN-BSN program at the Wayne College campus. This program needs a furnished Nursing Simulation/Skills Lab for training, simulation and instruction. The nursing lab will be housed in an existing classroom at Wayne. This new program is vital in bringing a LPN-BSN to Wayne, Holmes, and Medina counties where there is an ongoing need to find nurses to work in the local hospitals and the healthcare field. Cost estimates: Equipment to support LPN-BSN Lab \$184,196.49 Storage/transport of equip \$ 8,000.00 Lab Audio/visual systems \$60,000.00 | Wayne College | 20 | 91 to 180 days | \$250,000 |
| Wayne | Interactive Systems in Triway Classrooms | Learning from interactive systems is a key to success in the 21st century. Effective use of an interactive whiteboard incorporates a variety of teaching techniques that support a range of preferred learning styles. Teachers are able to increase learning opportunities through visual, auditory, and kinesthetic learning exercises. This is especially helpful when dealing with students with learning disabilities. The student becomes an active learner in the process. A student response system engages students in active learning. Used in conjunction with an interactive whiteboard, this tool encourages students' critical thought processes requiring synthesis of knowledge by providing them a way to answer questions. It also improves student participation for the student who might be reluctant to volunteer an answer. Everyone's response is recorded. This tool also aids the teacher in understanding students' comprehension of the given curriculum and provides immediate feedback about the comprehension. Teachers gain the ability to customize instruction based on the student responses. | Triway Local School District | 2 | 31 to 90 days | \$328,355 |
| Wayne | Bio Bricks | Purchasing press and support equipment to recycle hardwood sawdust & chips into fuel bricks for heating purposes. The wood waste would be purchased from companies in Ohio. The process is being done in CT and surrounding states in the northeast. The cost of the project would be per 1 press. If the project goes well, we would purchase more presses as the demand rises. | Summit Wood Industries Inc | 5 | 0 to 30 days | \$350,000.00 |
| Wayne | Electronic fingerprint scanner | The purchase of an electronic fingerprint scanner to upgrade the release system that is currently in use. This will enable all officers to take and submit fingerprint prints of the same quality on all arrests. | Rittman Police Department | 0 | 0 to 30 days | 13,125.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Williams | Storm sewer extension | Extension of residential storm sewer | Maumee Valley Planning Organization | 1.79 | 31 to 90 days | \$107,625 |
| Williams | Storm, water, street reconstruction | Complete reconstruction of streets, storm, and water | Maumee Valley Planning Organization | 10.47 | 0 to 30 days | \$627,900 |
| Williams | Storm, water, street reconstruction | Complete reconstruction of storm, sewer, and streets | Maumee Valley Planning Organization | 28.02 | 0 to 30 days | \$1,681,368 |
| Williams | Storm, water, street reconstruction | Complete reconstruction of streets, storm, and water | Maumee Valley Planning Organization | 20.65 | 0 to 30 days | \$1,238,935 |
| Williams | Road reconstruction | Road reconstruction for Menards | Maumee Valley Planning Organization | 156.25 | 31 to 90 days | \$375,000 |
| Williams | Electrical substation | Construction of feeder line and substation | Maumee Valley Planning Organization | 37.5 | 31 to 90 days | \$2,250,000 |
| Williams | Pleasant Street Culvert Replacement | The project involves the replacement of an existing bridge which is in poor condition and is in need of replacement. The existing bridge will be removed and replaced with a new concrete box bridge with a width of 20 feet, a span of 16 feet and a height of 8 feet. | Feller, Finch & Assoc. | 15 | 91 to 180 days | \$80,150 |
| Williams | Street, Storm Sewer and Water Reconstruction Proje | Reconstruction of all or portions of nine streets within the Village of Pioneer. The work includes reconstructing 10,370 linear feet of street, 10,800 linear feet of water line and 11,600 linear feet of storm sewer along with excavation, seeding etc. | Village of Pioneer | 20 | 31 to 90 days | \$4,730,943 |
| Williams | Amtrak Station Improvements | Project consists of replacing the curbside train station which currently is unheated and has no restroom facilities with a new heated, insulated structure capable of handling the volume of people that currently use the facility. Public handicap accessible restroom facilities will be installed as part of this project. | The City of Bryan | 1 | 91 to 180 days | \$350,000 |
| Williams | North Main Street Railroad Underpass Improvements | Project will improve pedestrian access along a State Route Highway under a railroad underpass. Project will also remove the existing side slopes of the banks to prevent erosion and improve the ability to maintain the existing banks which erode and sink an eye-sore. Placement of the Railroad bridge will also occur as a part of this project. Some landscaping will also occur, as this facility is at the main entrance of the City of Bryan and is an eye-sore. | The City of Bryan | 0 | 91 to 180 days | \$500,000 |
| Williams | Dist 2, PID #5415, Indiana Northeastern Line Rehab | Indiana Northeastern Line Rehabilitation | IND Department of Transportation | 17.2 | 31 to 90 days | \$600,000 |
| Williams | Energy management and energy-related capital impro | New energy efficient lighting in all municipal buildings, more efficient heating systems, 2,800 new water meters, 4,900 new electric meters, automated reading system for all meters | Bryan Municipal Utilities | 6 | 31 to 90 days | \$500,000 |
| Williams | Renovation of Men's Halfway House | Recovery Services operates a men's residential facility serving clients with co-occurring substance abuse and mental health disorders. Many who are homeless or at risk to be homeless, and have severe mental health and physical health problems. Our current facility is a former railroad hotel, in a deteriorating state. In order to keep a safe environment for these residents, a complete renovation of the facility is necessary. We propose renovating the current facility to provide room like housing for 25 men, while they work on their recovery stories. Costs include building materials for a 15,000 square foot housing facility. Without our program, lives would be lost to alcoholism and mental illness. | Recovery Services of Northwest Ohio, Inc. | 20 | 31 to 90 days | \$1,000,000 |
| Williams | Case Management Services | 3 vehicles to replace current unacceptable vehicles. Also 2 staff members to provide Case Management services for clients of our agency that serve 4 rural Northwest Ohio counties. We provide behavioral health care services. | Recovery Services of Northwest Ohio, Inc. | 15 | 0 to 30 days | \$120,000 |
| Williams | City of Bryan Fire/Public Safety Building | This project will replace an existing 140+ year old aging structure. The structure is currently in poor condition and Fire Trucks are currently being stored at other locations throughout the City as the building is not large enough or in good enough shape to hold all equipment and personnel. | The City of Bryan | 1 | 91 to 180 days | \$7,500,000 |
| Williams | Melbern Sewer Project | The police Department is also housed within this structure and the City of Bryan intends to construct a new, modern, multi-story, similar state-of-the-art facility to house all public safety agencies within the city including but not limited to Fire Station, Police Station, Fire & Police Dispatch, Fire training facility and training quarters. | The City of Bryan | 1 | 91 to 180 days | \$7,500,000 |
| Williams | Williams Center Sewer Project | Village of Melbern to a proposed County owned and operated sanitary treatment works. Of the 81 prospective users, one half or more are economically suffering and would be classified as low to moderate income. Federal Grant dollars will enhance affordability for prospective users, especially those who would be classified as low to moderate income. Currently monthly user fees are estimated in the \$ 90.00 to \$ 110.00 per month area. | Williams County | 50 | 31 to 90 days | \$1,000,000 |
| Williams | Williams Center Sewer Project | Failed, missing, and inadequate septic systems are allowing untreated and partially treated sanitary sewer and sewage effluents to drain into public ditches, drains, and dikes which are tributary to Lick Creek (Defiance County portion), which is tributary to the Tiffin River (Defiance County) and subsequently the Maumee River and Lake Erie. Ultimately the wastewater will be treated in the South Central Wastewater Lagoons. In addition to the above a Lagoon Effluent Pumping Station will be added to the South Central Lagoon located at 11508 County Road C. | Williams County | 50 | 31 to 90 days | \$1,000,000 |
| Williams | REBUILD ELECTRIC DISTRIBUTION SYSTEM | Village of Williams Center and potential users along the two miles of route along State Route 576 from the project areas to an existing County owned and operated sanitary sewer pumping station on County Road C. Of the 97 prospective users, one half or more are economically suffering and would be classified as low to moderate income. Federal Grant dollars will enhance affordability for prospective users, especially those who would be classified as low to moderate income. Currently monthly user fees are estimated in the \$ 80.00 to \$ 100.00 per month area. | Village of Edgerton | 20 | 31 to 90 days | \$55,000,000 |
| Williams | Williams Center Sewer Project | Failed, missing, and inadequate septic systems are allowing untreated and partially treated sanitary sewer and sewage effluents in the Williams Center area of Center Township, Williams County to drain into public ditches, drains, and dikes which are tributary to Lick Creek, which is tributary to the Tiffin River and subsequently the Maumee River and Lake Erie. Federal Legislation in the form of the Clean Water Act and Ohio EPA Findings and Orders require collection of these wastes and their treatment in a POTW. Additional Federal Funds are integral to the completion of the project. Any Federal Grant dollars received will enhance affordability for prospective users, many of whom are currently economically suffering and would be classified as low to moderate income. Without additional financial assistance the projected monthly user fees have been estimated at over \$80.00 to \$100.00 per month per residential unit. A central sewer system will improve the surface water quality and lessen public health issues in the Williams Center Area. The bill would for this area is well north of 50%. | Williams County | 0 | 91 to 180 days | \$1,000,000 |
| Williams | Melbern Sewer | This project is designed to provide sanitary sewerage collection facilities for sixty one (61) residential units, which include the unincorporated Village of Melbern to a proposed County owned and operated sanitary treatment works. Of the 61 prospective users, one half or more are economically suffering and would be classified as low to moderate income. Federal Grant dollars will enhance affordability for prospective users, especially those who would be classified as low to moderate income. Currently monthly user fees are estimated in the \$ 90.00 to \$ 110.00 per month area. Failed, missing, and inadequate septic systems are allowing untreated and partially treated sanitary sewer and sewage effluents to drain into public ditches, drains, and dikes which are tributary to Lick Creek (Defiance County portion), which is tributary to the Tiffin River (Defiance County) and subsequently the Maumee River and Lake Erie. Ultimately the wastewater will be treated in either an existing County facility on CR C or in new facilities near Melbern. Federal Legislation in the form of the Clean Water Act and Findings and Orders from OEPA require collection of these wastes and their treatment in a POTW. Proper treatment of the wastewater will improve surface water quality and allow a 4,000 linear feet of sanitary sewer replacement. The City of Bryan is in the process of reducing infiltration of storm water into the city's sanitary sewer system. This is a long term problem and we are replacing as much sanitary sewer as we can in an effort to save Ohio EPA Penalties for sanitary sewer overflows due to storm water. | Williams County | 0 | 91 to 180 days | \$1,000,000 |
| Williams | Sunny Area Sanitary Sewer Replacement | The City of Bryan is in the process of reducing infiltration of storm water into the city's sanitary sewer system. This is a long term problem and we are replacing as much sanitary sewer as we can in an effort to save Ohio EPA Penalties for sanitary sewer overflows due to storm water. | The City of Bryan | 3 | 31 to 90 days | \$400,000 |
| Williams | North Myers Street Improvements | Full Depth removal and replacement of one block of city streets that are severely lacking drainage and pavement structure. Project consists of approximately 600 linear feet of full depth removal and replacement of curbing, pavement, storm, sanitary and wastewater. | The City of Bryan | 1 | 31 to 90 days | \$250,000 |
| Williams | Village hall and Fire Station | Rebuild 2500 feet of village streets with curb and gutter. | Village of Edgerton | 80 | 31 to 90 days | \$150,000 |
| Williams | REBUILD TOWN HALL AND FIRE HALL | Renovate existing town hall and open house and fire hall. Town hall originally built in the late 1800 is in need of major overhaul. The upstairs also houses an opera house which is in shambles. The fire hall is not adequate to house the new fire equipment being mandated. The plans are ready to go to bid. Public hearing have been held. | Village of Edgerton | 80 | 31 to 90 days | \$2,500,000 |
| Williams | UPGRADE WATER STORAGE TANKS | REFURBISH TWO EXISTING 100,000 GAL ELEVATED WATER TANKS TO PROVIDE SAFE AND RELIABLE DRINKING WATER TO VILLAGE RESIDENTS. | Village of Edgerton | 11 | 31 to 90 days | \$150,000 |
| Williams | PARK ROADWAY IMPROVEMENTS | PROJECT INCLUDES PAVING TWO PARKING LOTS AND 2000 FEET OF ROADWAYS WITH PAVING AND CURB AND GUTTER. | Village of Edgerton | 12 | 31 to 90 days | \$215,000 |
| Williams | North Central New Building Project | 150,000 square ft. one-12 school building to replace a 1900, 1950 and 1960 buildings that are an obstacle to the educational process of a 700 student school district. This project will enhance the educational process of the students as well as create over 200 jobs in a county that has an 11% unemployment rate. It will also re-energize the optimism of the entire community. | North Central Local Schools | 220 | 91 to 180 days | \$26,000,000 |
| Williams | Lincoln street storm sewer | 1100 linear feet of new storm sewer to alleviate the local flooding. | Village of West Unity | 15 | 0 to 30 days | \$75,000 |
| Williams | Retaining | Retain two positions of Deputy Sheriff | Williams County Sheriff's Office | 2 | 0 to 30 days | \$100,000 |
| Williams | Wastewater/Collections Improvements | Replacement of aeration blowers with new energy efficient blowers/energy efficient rating on new equipment should lower operational and maintenance expenses. | Edon Village | 10 | 31 to 90 days | \$35,000 |
| Williams | Reconstruct apron and runway | Collections, 181 into said 4 marshes are extremely high, which in turn upsets activated sludge process, and also causes strain on lift station pumps. Higher efficiency turnout on activated sludge, less maintenance and less run pump time. | Williams County Regional Airport Authority | 15 | 91 to 180 days | \$930,000 |
| Williams | Water Tower Replacement | Reconstruct apron and runway | Village of Pioneer | 100 | 31 to 90 days | \$592,800 |
| Williams | Patrol Car replacement | Proposed new water supply tower for entire village. Proposed tower will be 300,000 elevated gallons and 12 inch water line required to connect to the existing distribution system. | Williams County Sheriff's Office | 0 | 31 to 90 days | \$106,325 |
| Williams | Eco Brass / Take the lead out | We are in dire need of replacing 5 patrol cars as they have high mileage and are costing us more to keep on the road than they are worth. This money would help us do just that. Eco Brass is a no lead copper alloy material. An Eco Brass investment will provide necessary equipment (melting furnaces, finishing equipment, machinery) and infrastructure building additional to efficiently produce Eco Brass. Chase Brass produces leaded brasses for many markets including the housing and construction markets (approximately 40-45% of Chase's sales). With the passage of legislation in California, Vermont, and most recently, Maryland requiring restrictions of lead in plumbing fixtures, it is time to come in contact with possible water. We have chosen to participate and invest in the equipment and infrastructure that demands our industry to sell a no lead alloy. If the U.S. Congress enacts similar legislation, we estimate that approximately 21% of the total brass tool market will transition to Eco Brass or some other no lead alloy, which we need to be prepared to supply. The expected outcome is that we would increase our margins by selling Eco Brass or other no lead alloy as compared to our current alloy sales mix. Also, we would expect to be able to compete globally to support the needs for no or low lead alloys with assistance on this project. | Chase Brass and Copper Company, LLC | 282 | 0 to 30 days | \$23,500,000 |
| Williams | FRESH START HOMES COUNSELING OFFICE | Recovery Services of Northwest operates a men's residential facility serving clients with co-occurring substance abuse and mental health disorders. Many who are homeless or at risk to be homeless, and have severe mental health and physical health problems. Currently the treatment center consists of 2 1/2 stories of housing residents, and a makeshift office for counseling services. The effect is the result of combining 2 double wide trailers, and is not energy efficient nor does it provide the most therapeutic environment for staff and clients. We propose construction of a 3,000 square foot office facility to provide counseling services to the residents. Along with recovery, one of the program goals is that residents, re-enter the workforce, and become productive citizens. Without these counseling services, these residents may never recover from their very serious illnesses, re-enter the work force, or be re-united with their families. Lives would be lost to alcoholism and mental illness. | Recovery Services of Northwest Ohio, Inc. | 20 | 31 to 90 days | \$400,000 |
| Williams | Main Library Renovation & Expansion | Renovation and expansion of a 1900 Campus Library located in Bryan, Ohio. County wide Main library that serves 38,000 and circulates over 650,000 items annually. Located in the 1980 part of the state is a very rural area. Project would expand the collection and include larger children's areas for assisting in the Ready to Read program. More space will be made available for new technologies and for computers for the underserved. Land is owned by the library and expansion and renovation would add over 10,000 sq. feet to a 15,000 sq. foot building that employed over 20 people. | Williams County Public Library | 60 | 91 to 180 days | \$5,860,000 |
| Williams | ECO BRASS - Lead Free Brass Alloy | State and National laws are being changed to restrict the lead content in plumbing fittings that come in contact with drinking water. This creates the need for higher technology materials. Chase Brass is presently the leading manufacturer of leaded brass used in the U.S. This treatment would allow Chase to efficiently produce a "no-lead" alternative metal called Eco Brass. Eco Brass is a copper based alloy that replaces lead with silicon to achieve improved performance characteristics. This environmentally friendly and health-conscious metal also meets EPA guidelines for being anti-microbial. The investment to effectively make this product is approximately \$25 million. This includes infrastructure building additions and equipment finishing facilities, environmental testing equipment. This capital investment would ultimately approximately 300 existing manufacturing jobs. It would also set the table for job creation and tax revenue growth by producing a globally competitive no-lead material which would be a catalyst for returning foreign produced faucets back to the U.S. This project has been engineered and is shored ready to begin immediate construction. | Chase Brass and Copper Company, LLC | 282 | 0 to 30 days | \$25,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Williams | Reconstruction of Service Plaza Set in Williams Co | Reconstruction of two Service Plazas located at Milepost 20.8 on the Ohio Turnpike in Williams County. These Service Plazas (to be located in Northeast Ohio near the Indiana border) are vital to meet the needs of the traveling public on the Ohio Turnpike, which is a limited access highway. They include fuel, quick service restaurants, restrooms, overnight parking, tractor trailers and gift shops for travelers. It is estimated that the Project will create 250 construction jobs and up to 200 permanent jobs once the Plazas are completed. The Plazas were demolished a few years ago. Detailed plans have been completed, and the Project can easily be bid and scheduled for the start of construction within 90 days. | Ohio Turnpike Commission | 450 | 31 to 90 days | \$35,000,000 |
| Williams | Service Coordination/Wraparound | The Family Wrap around Coordinator for Service Coordination facilitates the coordination of services for youth as outlined in the County Service Coordination Mechanism as well as implementing the effective use of resources within the local social service system. These youth may be at risk of being removed from their home. The goal of the program is for community professionals to collaborate and assist in improving the family's stability and quality of life for the youth and removal of the youth from the home. The Family Wrap around Service Coordination program targets multi-system youth who have been identified as, or are at risk of becoming, abused, neglected, dependent, unruly, alleged abuser or delinquent under the jurisdiction of the juvenile court. The goal of the program is to strengthen the family unit by developing a single wrap around based wraparound plan for each family. The Wrap around Coordinator would accept referrals from various county entities and determine the service level of intervention based on the County Service Coordination plan. The Wrap around Coordinator would provide information and referral to families or relevant agencies. | Four County Family Center | 4 | 0 to 30 days | \$120,000 |
| Williams | UltraLatch | To introduce a new product that will be manufactured here in Williams County, Ohio. This money will be used to buy tooling and inventory to go into production. We expect to create 20 jobs the first year and 15 more thereafter. Approximately 75% of this project has been privately financed. | Universal Industrial Products, Inc. | 20 | 91 to 180 days | \$300,000 |
| Williams | Employee Wellness Program | Provide items listed below to improve overall health of employees and their families, increase productivity and profitability based on better health of employees, and reduce employee and Company expenditure on health claims by enabling employees and their families to be better health care consumers and providing viable means of improving their overall health. Money saved would result in retention of approximately 4 FTE positions. 1. On-site computer kiosks to allow employees web access for wellness purposes, including Health Risk Assessments 2. On-site training opportunities on various wellness topics and initiatives 3. Establishment of Wellness Committee 4. Development of on-site exercise facility and purchase of corresponding liability insurance 5. Provide meaningful incentives for reaching healthy goals 6. Extend assistance of Williams County Health Department to provide annual health screenings for employees and their family members and provide related training initiatives | Winzeler Stamping Company | 4 | 0 to 30 days | \$50,000 |
| Williams | housing 4 the poor | would buy foreclosed homes and rent them 4 300.00/350.00 per month this way i would have a job and t to for maintenance Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds. wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. Updates to the packages within a year. New Wimax technology will be able to push a strong enough signal to provide all services. Once we are able to establish our first several sites we will have the ability to use local county money, along with the Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. Install gear that's in pizza Hut restaurant to increase sales increase merchandise deliver and and create increase sales help the chicken suppliers in Ohio | adams rentals | 3 | 31 to 90 days | \$300,000 |
| Williams | Wireless Broadband for Rural Application | Track rehab project to upgrade 9-mile section of Indiana Northeastern Railroad (shortline) tracks in Ohio to FRA Class I condition. Requesting 80% federal stimulus funding and Railroad will fund the remainder. Work would start quickly upon approval. Project includes new crossings, bridge repair & bridge removal work, grade crossing restrooms, ballast & sanding, ball and anchor work. Project would put line in top shape for decades into the future, directly benefiting Exton Farmers Coop in Ohio and likely setting stage for new industry to locate in or near Exton. Would support in Ohio based railroad construction in Ohio and likely to perform most of the work. Also includes employee safety training and contractor jobs to the work. Shortline freight railroads are a vital link between businesses in rural communities and the mainline class I rail network - we provide price competitive, fuel efficient transportation service. Note: freight railroads on average move a ton of freight 436 miles on a single gallon of diesel fuel. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Williams | Wing Street/ Pizza Hut | Rebuild 2500 feet of village roadways Project includes paving two parking lots and 2200 feet of roadways with curb and gutter | Miami Valley Pizza Hut, | 300 | 31 to 90 days | \$450,000 |
| Williams | Ohio shortline railroad track upgrade project | Track rehab project to upgrade 9-mile section of Indiana Northeastern Railroad (shortline) tracks in Ohio to FRA Class I condition. Requesting 80% federal stimulus funding and Railroad will fund the remainder. Work would start quickly upon approval. Project includes new crossings, bridge repair & bridge removal work, grade crossing restrooms, ballast & sanding, ball and anchor work. Project would put line in top shape for decades into the future, directly benefiting Exton Farmers Coop in Ohio and likely setting stage for new industry to locate in or near Exton. Would support in Ohio based railroad construction in Ohio and likely to perform most of the work. Also includes employee safety training and contractor jobs to the work. Shortline freight railroads are a vital link between businesses in rural communities and the mainline class I rail network - we provide price competitive, fuel efficient transportation service. Note: freight railroads on average move a ton of freight 436 miles on a single gallon of diesel fuel. | Indiana Northeastern Railroad | 40 | 31 to 90 days | \$836,494 |
| Williams | STREET PAVING | Rebuild 2500 feet of village roadways | VILLAGE OF EDGERTON | 80 | 31 to 90 days | \$150,000 |
| Williams | Park Roadway Improvements (Revisions to previously) | Project includes paving two parking lots and 2200 feet of roadways with curb and gutter | Village of Edgerton | 12 | 31 to 90 days | \$215,000 |
| Williams | Miller park roadways | Project includes paving two parking lots and 2200 feet of roadways with curb and gutter | VILLAGE OF EDGERTON | 12 | 31 to 90 days | \$215,000 |
| Williams | Retain Officers | After a meeting with our County Commissioners today, we found there is a possibility of laying off 4 Deputies. We have requested monies to retain 4 and would like to add 4 more to the list for retention for a total of 8. | Williams County Sheriff's Office | 4 | 0 to 30 days | \$200,000 |
| Williams | Building Project | A new building for the Sheriff's Office and Communication center. Our was built in 1938 and has structural issues. It has asbestos in it. The building sits on a major water table under the building, the walls are leaking out in front a side wall has a large crack in it. We need a new facility. | Williams County Sheriff's Office | 20 | 91 to 180 days | \$4,000,000 |
| Williams | Sanitary & Storm Water Sewer Replacement-Phase I | Provide funding for Phase One of our EPA approved twenty year six phase Combined Sewer System Long-Term Control Plan to completely replace the combined sewers within the Village. The largest phase of the six phases, it includes approximately 2,047' of piping with appurtenances, a new pump station and approximately 3,870' of force main to the WWTP. | Village of Montpelier | 32 | 0 to 30 days | \$3,700,453 |
| Williams | Refurbish Park Concession Stand | Buildings existing and in poor condition with the foundation which is causing structural damage. This building houses one of the only revenue generating operations within the Park System. | Village of Montpelier | 1.5 | 31 to 90 days | \$22,000 |
| Williams | Improvements to Municipal Building including ADA C | Project entails renovation of existing Village Hall to meet current space & design needs, including ADA. | Village of Montpelier | 25 | 91 to 180 days | \$4,000,000 |
| Williams | Upgrade to Three Village Electric Substations and | Electric Substation Design, Transformer Purchase, Station Auxiliary Power Replacement, Relay Setting Changes, Capacitor Bank Upgrades, Distribution Circuit Work, Meter Recheck, Fuse Installation | Village of Montpelier | 8 | 31 to 90 days | \$760,200 |
| Williams | Road Resurfacing/Rebuild | Resurfacing/Rebuild approximately two miles of Village Streets. High unemployment rates have affected our village income tax which has curtailed the road resurfacing/rebuilding 2009 and 2010. | Village of Montpelier | 16 | 91 to 180 days | \$300,000 |
| Williams | Sanitary and Storm Sewer Replacement | Provide funding for Phase Two of our EPA approved twenty year six phase Combined Sewer System Long-Term Control Plan to completely replace the combined sewers within the Village. This would be approximately 2,000' of Sanitary Sewer. | Village of Montpelier | 8 | 91 to 180 days | \$400,000 |
| Williams | Employment of Patrol Officer | High unemployment rates have affected our village income tax along with low interest rates which has restricted the Village from replacing an officer who resigned. The funding would allow the Village's Police Department to be back in full force. | Village of Montpelier | 1 | 0 to 30 days | \$52,000 |
| Williams | Replacement of Two Patrol Cars | Maintenance to our 11,000 plus mileage patrol cars has been a strain on our General Fund. High unemployment rates have affected our village income tax along with low interest rates which has eliminated the purchase of any new vehicles. These vehicles would allow for the replacement of our high mileage, high-maintenance patrol cars. | Village of Montpelier | 0 | 0 to 30 days | \$50,000 |
| Williams | Village road ways | REPAIR VILLAGE STREETS APPROXIMATELY 4000 FEET The Commissioners believe this project will qualify as GREEN INFRASTRUCTURE as there will be zero discharge from the newly constructed pavement system. The waste stream will be recycled and used for irrigation. There will be zero discharge to waters of the State, which are in this case tributary to Lake Erie. | VILLAGE OF EDGERTON | 60 | 0 to 30 days | \$150,000 |
| Williams | Sanitary Sewer Improvements Melber Area | Williams County under OPEA Findings and Orders to correct existing water quality problems in the Melber area. Failed or inadequate on site sanitary facilities have created water quality and health issues in the surface waters in and around Melber. The local health department has posted warning signs on a drainage ditch in the community. Sixty One residential units are to share the 1.8 million dollar cost. At least half are low to moderate income. Without additional grant funds projected monthly sewer fees are near \$ 100.00 dollars. Grant funds are sorely needed to make the project affordable for the users and to minimize the water quality problems in the area. | Williams County - Board of Commissioners | 10 | 31 to 90 days | \$1,500,000 |
| Williams | Village road ways | 4400 feet of roadway paving and bumping | VILLAGE OF EDGERTON | 60 | 181 days or more | \$150,000 |
| Williams | Incar cameras | In car cameras in patrol cars have been proven to be a great asset for the officer. Safety and indisputable evidence are just two of the reasons for having them. The cameras in our patrol vehicles are not dated and not manufactured any longer. Replacing them is necessary to continue the safety of our officers. | Williams County Sheriff's Office | 3 | 31 to 90 days | \$95,000 |
| Williams | in car computers | We are requesting for laptop computers for the patrol vehicles. This would save time and fuel as the deputies would not have to come to the office for reports, they could be done on the road. | Williams County Sheriff's Office | 3 | 91 to 180 days | \$110,000 |
| Williams | Radio System | This request also includes the funding of air cards for the internet. The radio system in the county has many dead spots creating a safety hazard. Updated equipment will help elevate this problem plus help with interoperability of the agencies in the county. | Williams County Sheriff's Office | 3 | 91 to 180 days | \$200,000 |
| Williams | Vests | Review of the needs of the patrol officers wear are due for replacement. Due to budget cuts, we do not have the money to do so placing the officers in danger. | Williams County Sheriff's Office | 2 | 0 to 30 days | \$4,200 |
| Williams | Reconstruction of Township Road 15-75 | Final road reconstruction of Road 15-75 Airport removal, replace sub base, new asphalt, drainage work, striping. | Pulaski Township | 5 | 31 to 90 days | \$270,000 |
| Williams | Norlick | This project consists of replacing the existing extended aeration wastewater treatment plant with a new extended wastewater treatment plant. The new plant will have a capacity of 50,000 GPD. | Williams County | 10 | 31 to 90 days | \$400,000 |
| Williams | Safety fence around new water plant | Safety fence around water plant for security. | Village of West Unity | 2 | 0 to 30 days | \$10,000 |
| Williams | Fuel | The fuel budget for our agency has been cut by \$15,000 this year. To keep officers on the road and employed, we need additional funds for fuel. | Williams County Sheriff's Office | 6 | 0 to 30 days | \$15,000 |
| Williams | Waterline replacement on State Rte. 127 | Replacement of a 4 inch cast iron water line that has been replaced 6 times in the last two years. | Village of West Unity | 10 | 31 to 90 days | \$75,000 |
| Williams | Hillcrest C.C. Sewer and Renovation Project | New back fill, sand filter, curtain drain, pump station(s), labor and materials for new septic system mandated by Ohio EPA. Also, cash to help move existing building so as to expand clubhouse existing potential which could create 3 new jobs. Without funding for this project, this facility will possibly go out of business. Build approximately 18,000 linear feet of fiber optic to provide high speed internet to B&M customers outside the city limits where high speed access is not available. | Hillcrest Country Club, Inc | 15 | 91 to 180 days | \$75,000 |
| Williams | Rural Fiber Optic Extension | Build approximately 18,000 linear feet of fiber optic to provide high speed internet to B&M customers outside the city limits where high speed access is not available. | Bryan Municipal Utilities | 6 | 0 to 30 days | \$100,000 |
| Williams | Water & Sanitary Sewer Extension | 639' of new water line & 603' of new sanitary sewer line. This would be connected to the existing Montpelier city water and sewer lines which stop 1/4 of a mile short of our existing facility. This proposed project of water and sanitary sewer extension is to expand the existing building of River of Life Worship center, which also houses Little Light Daycare & Preschool. We are also planning to build residential housing, with a community building for fellowship and exercise of disciples from the community. At the south side of the property, we are planning a campground for families. This would include a office for the campground, restrooms and shower facilities, snack store and gear room with a reception. Because of the size of this project, we need city water & sewer in order to further pursue the phases of this project. | River of Life Worship Center | 50 | 91 to 180 days | \$200,000 |
| Williams | S Myers Street Waterline | 2,200 linear feet of 8 inch water line | Bryan Municipal Utilities | 6 | 31 to 90 days | \$100,000 |
| Williams | Aerator Media Replacement | New media in aeration tank that will help to raise the PH of the water and ensure we provide a water that is non corrosive and will pass the lead and copper rules keeping our water safe. | Bryan Municipal Utilities | 2 | 31 to 90 days | \$25,000 |
| Williams | Housing assistance | Upgrading of rental property for HUD qualified renter. Installation of high efficiency furnace, upgrade of restroom, repair of walkway, new vinyl siding installation. Funding being requested to improve quality of life for HUD assisted renter. Single mom w/ 2 children. | Milford Development LLC | 3 | 181 days or more | \$35,000 |
| Williams | 2-way Radio Upgrade | CC requirements will necessitate replacement of the company 2-way radios to meet narrow banding requirements. These radios are a critical component of daily operations of the not-for-profit electricity supply business. | North Western Electric Cooperative | 0 | 181 days or more | \$50,000 |
| Williams | SEDC Conversion | Upgrade of billing/accounting system to allow for modernization of services. The new system will allow on-line bill pay and pre-payment of power bills. The Engineering function will interface with a proposed SCADA system for mapping and improved automated outage notification. | North Western Electric Cooperative, Inc | 1 | 31 to 90 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Williams | AMI Meter Project | Upgrade all utility meters with modern, 2-way, communication equipment to read meters remotely and have the ability to remotely read power quality, current meter readings, remotely disconnect service. This equipment will also allow for cooperative control of demand side management equipment. This will allow time-of-use reading and a pre-payment program. As technology improves, this will allow for more end-use customer load control. | North Western Electric Cooperative | 1 | 0 to 30 days | \$1,100,000 |
| Williams | Bryan Truck Line Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Williams | '57 Energy Efficiency Retrofits | The '57 Energy Efficiency Retrofits project would allow our district to upgrade our current school building facilities to be energy efficient. The buildings were built in 1967 and 1976. With energy costs continuing to increase every year, these items listed will help the district reduce spending on our utility costs. The proposed project would consist of the following areas of inefficiency to be addressed: Installation of 160,000 sq. ft. of roof and ceiling insulation, upgrade/existing HVAC systems/units to energy efficient hot water boiler units, Upgrade 25 plumbing fixtures to water saving sensor fixtures, retrofit 100 electrical fixtures to energy efficient electronic ballast and sensors fixtures, Replace 42 windows to high efficiency (Low E or better), Installation of exterior wall insulation. Replace all exterior doors to insulated glazing or insulated core doors. Upgrade 35 exterior lights to energy efficient fixtures. Thank you for your consideration. | Stryker Local Schools | 32 | 0 to 30 days | \$1,800,000 |
| Williams | Tile replacement | Replacement of approximately 5,000 linear feet of tile. Currently tile is 15 inch in diameter and is undrained, creating flooding problems of adjacent property owners. This tile drains 200+ acres of farmland currently in production, and involves more than a dozen property owners. The tile needs to be replaced to a 24 or 30 inch tile to alleviate flooding problems, this should alleviate any road closures due to high water and any flooding of adjacent property. Any sizable rains creates travel hazards of adjacent county roads, and backs water up into neighbor's basements. | milford development llc | 5 | 91 to 180 days | \$200,000 |
| Williams | Hud housing improvement | Replacement of furnace with more energy efficient furnace, minimize exterior walls and replace with vinyl siding, insulate and repair interior garage walls, upgrade bathroom with new more efficient fixtures. This is a HUD assisted house currently being rented by a single mother with 2 small children. Our goal is to make it as energy efficient as possible to assist the tenant, to help make ends meet. | milford development llc | 5 | 91 to 180 days | \$35,000 |
| Williams | Zoom Tech | The Zoom Tech project would allow our district to utilize the latest interactive technologies available to educational entities. This would allow the district to add needed technology to our current school building facilities to meet the district's technology plan. This project would incorporate the use of interactive technologies for both voice and data instruction on a daily basis by the district's students and staff. 20 classrooms would use these interactive white boards daily. Interactive tools to be used simultaneously with the white boards would also be included, such as airports, globes and projectable eBooks. This project would expose our students to the advancements and applications of technology for the future and benefit our students for the 21st century workforce. Thank you for your consideration. | Stryker Local Schools | 2 | 0 to 30 days | \$103,000 |
| Williams | Camp Pioneer Water Treatment | Construction of a water treatment and filtration building for an existing groundwater well that has been unreliable due to no current treatment and filtering performed. Without completing this project we run the risk of having to shut this well down and use the back-up well for all water demand. Rationing of water would most likely result. The project is "Shovel Ready" with design finished and a construction completion date of June 1, 2009 established for the 2009 season. The well in question meets minimum health regulations, however it has a high degree of iron and manganese in the water. The proposed project completion will greatly improve the quality of the water that is consumed by the approx. 4000 individuals per year. Alternate programs through the Stimulus program that could be considered: "Water & Sewer Loans & Grants" and "Water Treatment Block Grants". | Boy Scouts of America, Erie Shores Council | 85 | 0 to 30 days | \$50,000.00 |
| Williams | Water & Sanitary Sewer Extension | This is an update to our original request. Our email address has changed. We wanted to make sure that you had the correct email address to contact us in the event that we would receive an award in the stimulus project in which we requested. Please note that our original request was for water and sanitary sewer work. That option was not available from the drop down list of the program menu. It would have been the same thing that portion out the bid form. Thank you for your understanding and help in getting this taken care of. Outdoor Cooling Tower system to reduce Electric Cost. We are looking at putting an Outside Water cooling system in. This will cut our electric bill during the summer months. We will make this interchangeable so we can run the indoor one in the winter months to heat the inside of the building. | River of Life Worship Center | 50 | 91 to 180 days | \$200,000.00 |
| Williams | Outside Water cooling tower | As a dedicated water and fiction fan, I am happy to start a website to facilitate the imagination and dreams of all children and their families. Being the mother of a 9 year old, I understand how the importance of creative writing and passion for reading can sometimes be pushed to the side. This led to an idea. Kids need a website that shows what they can write and read online, and even work with parents and friends to have fun creating and reading books! I believe there is a way for all of us to collaborate, in our own time, and promote writing and reading in our own children. By pooling our resources to create something wonderful and entertaining, we will have a website that is fun, educational, and will work for all children. I believe making that success possible, promote a connection with 2 of the 3 "R's", and help them experience the joy in exchanging points of view on the same story and stories in a fun and interactive environment. As we work together to build our children's "abilities", I believe we can encourage personal and group successes, provide inspiration, and reimagine the spirit of creativity in our families and communities worldwide. This is a small business that I am trying to expand. This is in the automotive repair field. Fixing a building paving a driveway and parking area, installing electrical and water, putting in shop equipment and venting to self employment. | Westar Plastics LLC | 2 | 0 to 30 days | \$10,000.00 |
| Wood | Let's Write a Book Together | This is a small business that I am trying to expand. This is in the automotive repair field. Fixing a building paving a driveway and parking area, installing electrical and water, putting in shop equipment and venting to self employment. | Let's Write a Book Together | 2 | 0 to 30 days | \$10,000 |
| Wood | Mike's Automotive | The project components include three manhole removals, 750 feet of 42" pipe removal, installation of 750 feet of 54" storm sewer, install one manhole, install two catch basins and repair 150 square feet asphalt pavement. Due to the extreme deteriorated condition of the existing brick sewer, a collapse of the sewer could happen in the near future. The replacement of the existing sewer would upgrade this section of sewer line to meet current transportation and ADA requirements. | Automotive repair | 2 | 31 to 90 days | \$95,000 |
| Wood | Oregon Road 54" Storm Sewer Replacement | The project components include three manhole removals, 750 feet of 42" pipe removal, installation of 750 feet of 54" storm sewer, install one manhole, install two catch basins and repair 150 square feet asphalt pavement. Due to the extreme deteriorated condition of the existing brick sewer, a collapse of the sewer could happen in the near future. The replacement of the existing sewer would upgrade this section of sewer line to meet current transportation and ADA requirements. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$102,750 |
| Wood | Teach Wood Working Skills | I need to replace a small outdated wood shop so that it is more conducive to teaching. I hope to build a new building dedicated to wood working with some updated newer equipment and the addition of some equipment that I do not have in my current shop. I will be retiring soon and it is my desire to use my shop to teach young people about wood working. I will teach them the skills as well as the long wood working skills that they can use for themselves in the future. Interested, advanced students can learn cabinet making and furniture making which may lead to income as independent craftsmen or as finish carpenters for hire. Cost to students will be the cost of materials. I will supplement my retirement by the sale of my projects. Some of the skills I will teach will be taught while doing projects for others such as small cabinet jobs, home entertainment centers, etc. | Shep-Arts | 9 | 31 to 90 days | \$138,000 |
| Wood | Curtice Road & Bradner Road Intersection Improve | Project components include removing one 42" culvert, installing 64 feet of 68" by 108" round, two concrete headwalls, 15 feet of 30" conduit, 15 feet of 18" conduit, 80 cubic yards of Type D dump rock, and replace 150 square yards of asphalt pavement. Due to the narrow width of Bradner Road at Curtice Road the school buses making left hand turns are stuck over a approaching left hand traffic causing a safety hazard. Therefore, the pavement and culvert at the intersection need to be wider to meet current transportation requirements. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$60,175 |
| Wood | Cygnet Elevated Water Tower & Water Plant Improv | The project components include repairing the existing water storage tower and installing approximately 900 feet of 8" high chain link fence around the water treatment plant. The water treatment plant in the plant which may require any needed repairs to the tower. This is the only water storage tower in town and if the tower fails this greatly hampers fire fighting. By renovating the tower the water system would meet current EPA and Fire requirements. Furthermore, the water treatment plant has no existing security surrounding the plant and providing an all high will provide security to the plant. | Village of Cygnet- Feller, Finch & Assoc. | 20 | 91 to 180 days | \$319,200 |
| Wood | Main Street & Sunset Street Storm Sewer Improvemen | 2050 LF of storm sewer improvements, 8 catch basins, 1130 LF of pavement repair | Village of Bloomdale | 10 | 31 to 90 days | \$250,000 |
| Wood | Skilled Trades Center | Skilled Trades Center for Welding, HVAC, automotive and trucking division. This project is shovel ready and will produce skilled workers for the automotive job work. | Terra State Community College | 400 | 91 to 180 days | \$3,200,000 |
| Wood | Wastewater Treatment Plant Ultraviolet Disinfectio | New Ultra-Violet disinfection system having a capacity of 30 million gallons per day | City of Bowling Green | 15 | 31 to 90 days | \$1,800,000 |
| Wood | Mandell Road Improvements | The project components include 189' 5" asphalt completion, 427' 0" aggregate base, 570' 0" asphalt concrete, 2401' feet of 18" to 24" of storm sewer, 10 catch basins, 388' 5" of driveway replacement and 5500' 5" of sealing. Due to the narrow road and deep ditch, the ditch will be enclosed and the road widened to meet current transportation requirements. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$188,300 |
| Wood | West Main Street Improvements | The project components include 2070' linear feet removal and replacement of curb, 298 cubic yards of asphalt concrete, 100 feet of 6" and 8" storm sewer removed, 175 feet of 12" storm sewer, 100 feet of 8" storm sewer, 500 square feet of sidewalk removal, 500 square feet of concrete sidewalk, 10 storm structures removed and 77 catch basins installed. West Main Street is in poor condition and needs replacement to meet current transportation and ADA requirements. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$107,550 |
| Wood | Energy Management Plan | Energy Management Plan that is ready for implementation opportunities for the College. The plan has been submitted to OER and meets HB 251 requirements (energy reduction by 20%). | Terra State Community College | 100 | 91 to 180 days | \$3,500,000 |
| Wood | CSO No. 1 Advanced Weir Modification | This project includes a comprehensive study to determine the feasibility of raising the overflow weir elevation at CSO No. 1. The project will include the development of a weir device inside the existing overflow chamber. A backwater prevention program will be considered to prevent adverse impacts from this project. The goal is to reduce the number of overflow frequencies at CSO No. 1. This project will significantly expedite the City's compliance with the Clean Water Act. | City of Fostoria | 5 | 91 to 180 days | \$375,000 |
| Wood | Front Street Improvements | The project components include the removal by pavement paving of 885' 5" of asphalt concrete, and the installation of 1000 gallons of back-saw, 261 tons of stabilized crushed aggregate, 970 tons of asphalt concrete intermediate course, 950 tons of asphalt concrete surface course, 11 manholes, adjusted to grade, and 12 catch basins adjusted to grade. The existing street is in poor condition due to the truck traffic and needs replacement to meet existing transportation requirements. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$155,000 |
| Wood | WOO - Stearns Road, City of Fostoria | This project involves the reconstruction of an existing roadway approx. 0.52 mile in length. Stearns Road will be upgraded between S.R. 199 and U.S. 21 with three lanes, curb and gutter, new storm sewer and a pavement suitable for heavy truck traffic. This project is part of the Loop Road study that was completed last year. This project has received OMAC monies from TRACCO's. | City of Fostoria | 10 | 181 days or more | \$250,000 |
| Wood | WWTP Plant Upgrades (Various Projects) | The project will provide for upgrades to the City's wastewater treatment plant. The last major improvements at the WWTP were completed in 1994. The projects will include the following: A new digester tank, a new float settling tank, new aeration basins, new activated sludge screen pump upgrades, grit chamber upgrades, EG basin improvements, installed siphon improvements, headwork improvements, O & M manual update, real time monitoring/control training. | City of Fostoria | 5 | 181 days or more | \$3,000,000 |
| Wood | Maryland Place Pavement & Utility Improvements | Remove and replace approximately 2700 feet of curb, 1360 feet of pavement, and 1369 feet of 8" sanitary sewer. Install 2376 feet of 6" to 18" storm sewers to eliminate combination sewers and install 1800 feet of manholes to replace existing deteriorated manholes. The infrastructure is approximately 80 years old and is deteriorated to the point of replacement. The City of Northwood and Sewer & Water District is putting up a 50% of the total share towards this project costs. Once the project is finished flooding of downstream basements of low sewage will be greatly reduced and all the existing infrastructure will be brought up to current standards. | Feller, Finch & Assoc. | 15 | 31 to 90 days | \$308,050 |
| Wood | Main St., Wall St., and Lincoln St. Bridge Replace | Remove three existing bridges in poor condition and replace with three 18 ft. by 10 ft. concrete box culverts that are long. Additional components include concrete wingwalls, Type C Rip Rap and 605 SF asphalt concrete replacement. | Feller, Finch & Assoc. | 20 | 91 to 180 days | \$346,800 |
| Wood | Wood Pallet Recycling of Northwest Ohio | This project consists of transportation, receiving, sorting, grading, A.C. repaving, building, and re-distributing wooden pallets into the market place. The pallet grading process is built on a rental pool pallet versus manufacture and purchase of new wood. Within the project scope is increased labor, equipment, transportation, local revenues, and green savings to the environment, current transportation equipment, and ultimately, the customers. A pool pallet full service center is NOT in the northwestern Ohio job markets. Currently, pool pallets are sorted and manufactured outside of northwest Ohio, but consumed within. | TMT, Inc. | 80 | 91 to 180 days | \$3,050,000 |
| Wood | Affordable Green Housing | TMT Inc. is a Heavy County based 3PL (third party logistics) company who provides specialty services to large national retailers and manufacturers. Our portfolio of services includes the following: •Club Packaging / Storage Affordable green, environmentally friendly, energy efficient "starter" and "ender" homes. "Starter" refers to first time home buyers and "ender" refers to retired people or those who are wanting to down size. The houses will be built using SIPs (structural insulated panels), metal roofs, green pricing and finishing materials, energy star appliances and passive solar technology. The SIPs provide superior insulated panels, metal roofs, green pricing and finishing materials, energy star appliances and passive solar technology. The SIPs provide superior insulated panels, metal roofs, green pricing and finishing materials. Each house will have 3 to 4 bedrooms and 1 1/2 to 2 1/2 baths. They will be 2 story houses with at least 1 bedroom down. They will be pre-wired for cable/internet in each room. Most of the rooms will be wired for a/c and do current. The do current will be used primarily for lighting. Houses will be priced under \$200,000. | Shep*Arts Construction & Re-construction | 14 | 31 to 90 days | \$760,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Wood | Fiscal Responsibility | This spending spree on the backs of state workers, tax payers and our children is irresponsible. I don't want money. I want Ohio to balance the budget with existing programs. I don't want anything new until the budget is balanced and there is an immediate surplus to pay for things. No politician should be asking anyone else to sacrifice while pursuing their own agenda with someone else's money. That seems like extortion to me. My plan will save the state money, allowing taxes to remain lower, thus attracting new business and creating jobs. It will also avoid giving up state's rights to the federal government. | Citizen | 20,000 | 0 to 30 days | \$0 |
| Wood | Environmental Reclamation and Preservation Project | Reclaim lost prairie and natural wetlands original to the Great Black Swamp. Move and relocate a half diamond out of the "lost prairie" area and enlarge the natural wetlands. Improve a local "river" (Middle Branch of the Portage River) and create walking paths including a board walk elevated slightly above a portion of the wetlands. Increase and improve natural habitat for indigenous birds, butterflies, beavers, and land and water animals. Build a small building to provide a history of the Great Black Swamp, its vegetation and inhabitants of old including American Indians and the building would include an interactive center for the newly created and reclaimed natural areas. This "center" would be open to the public and to schools and others interested in learning, teaching, preserving our natural resources. Located near to this area is a great park that needs to be reclaimed as well. This would create jobs for maintaining the area, teaching in the interpretive center, etc. It would provide another resource for teaching and learning. | Village of Portage | 5 | 31 to 90 days | \$750,000 |
| Wood | Windturbine Electricity | This wind generator on a 300' tower to provide electrical energy to 1-4 small communities with an approximate total of 500 homes with the excess energy dispersed to the local grid. | Village of Portage | unknown | 31 to 90 days | \$3,000,000 |
| Wood | Agricultural Security and Reinvestment Program | Provide funding to agricultural producers to enroll streamside ground in permanent environmental easements. Farmers would receive \$1500 per acre and would be enrolled in CREP for 10-20 years as well to leverage federal funding for habitat plantings, etc. 2000 acres would be protected against marginal to poor producing farmland that would better serve as active floodplain. Farmers would reinvest the money in purchasing new land or equipment. Land is "not" cheap now, so this is the time to do it. Permanent easement would be serviced by local SWCDs through ODHNR 2019C funding. Would protect against streamside buffers being sold when CREP contract runs out and commodities prices are high (as last fall). Leverages federal CREP dollars and makes the investment permanent - stimulates farmers, who invest regularly in their businesses, and improves water quality. | Myself | 30 | 0 to 30 days | \$3,000,000 |
| Wood | W&K Solar Manufacturing Park | W&K Solar Manufacturing Park will consist of two 250,000 sqft buildings, one of which is built, and 16 solar manufacturing production lines. Each building will employ 524 individuals totaling approximately 3,656. These employees will have the same skill sets as those in the auto manufacturing plants. Average wages including benefits \$65,000 per year. The initial building will allow W&K to put into production 4 production lines in W&K existing 555,000 sqft facility initially employing 924. After 6 months of operations W&K will construct a second building and install 4 more lines. This process will continue until four building are in full operation and 3,600 people are employed (approximately 3.5 years). The construction activities during the 3 years will employ approximately 300 construction workers. Presently W&K has sales of solar panels for 300 mega watts per year but will produce in one year, and W&K are in negotiations for an additional 7,000 mega watts. W&K Solar produces CoTiN cell solar panels similar to First Solar, except at a cheaper cost and a higher efficiency than First Solar. We would be able to supply any required additional information about W&K. | Willard & Kelsey Solar Group, LLC | 3600 | 0 to 30 days | \$100,000,000 |
| Wood | Dist 2, PID 85708, WOO Purchase 1 photo ID system | purchase 1 standard photo ID system for the City of Bowling Green | Ohio Department of Transportation | 1 | 31 to 90 days | \$4,550 |
| Wood | Dist 2, PID 85548, TARTA - Rehab/New Bus Stations | TARTA - Rehab New Bus Stations | Ohio Department of Transportation | 400 | 91 to 180 days | \$20,000,000 |
| Wood | COPS | Hire 3 more Officers for patrol that would allow for a full time detective position to follow up on some cases. 48 percent of case workload in 2007 and a decline down to 42 percent for 2008. Without more officers and a detective this will continue to slide and we will have more court-docketed cases. The hiring of 3 officers would allow for an experienced officer to be placed into the detective role, allowing the other two to not be overworked due to the high frequency of shift coverage overtime and rotations. | Rossford Police Department | 3 | 91 to 180 days | \$240,000 |
| Wood | Sanitary Sewer Separation Phase I | Reduction in flow to one CSDS and elimination of another CSDS by separation of the combined sewer system within the 1.1 miles of the Village to comply with its NPDES Permit requiring total separation. Project involves the installation of approximately 1000' of 36" diameter sanitary sewers, manholes and related structures. | Village of North Baltimore | 20 | 181 days or more | \$2,000,000 |
| Wood | 2009 Paving Program | Paving of various City Streets in Bowling Green. Potential streets include: S. Church St, E. Gypsy Lane, Pleasant Ridge Road, W. Poe Rd, Van Camp Hill, Dey St, Rutshoff Rd, Kael Ct, Prospect St, Road St, Industrial Dr, Enterprise St, Rockwood Dr, Lane, Dogwood, Washington and others. | City of Bowling Green | 10 | 91 to 180 days | \$600,000 |
| Wood | East Poe Rd Improvements | Resurface and repair East Poe Rd from North College to Dunbridge Rd, approximately 1.61 miles. | City of Bowling Green | 10 | 31 to 90 days | \$660,000 |
| Wood | North College Improvements | Resurface and repair North College Drive from Poe Rd to Newton Rd. North College is part in the City of Bowling Green and part in Wood County / Plain Township. Approximate length of project is 1.1 miles. | City of Bowling Green | 10 | 31 to 90 days | \$350,000 |
| Wood | East Newton Rd Improvements | Resurface and repair East Newton Rd from SR25 to North College Drive. Road is part in the City of Bowling Green and part in Wood County / Plain Township. Approximate length of project is 0.42 miles. | City of Bowling Green | 10 | 31 to 90 days | \$150,000 |
| Wood | East Wooster Street Improvements | Serving as a major vehicular and pedestrian traffic route between the Bowling Green's downtown commercial district and BGSU, this project is located between Prospect Street and the CBS Railroad Crossing. The scope of work includes complete pavement and selective sidewalk replacement as well as upgrades of bridge ramps. The existing pavement has poor drainage conditions and ride quality due to severe cross slopes. This section of pavement was omitted from two previous streetscape improvement projects due to limited project funding. With a total COT along this section of roadway in excess of 20,000 VPD, an upgrade to this section of pavement will serve to improve pedestrian and vehicular traffic between BGSU and the downtown commercial district of Bowling Green. Improved sidewalks also will serve to promote increased safety pedestrian and bicycle travel to the downtown of Bowling Green. The total project length is 1000'. | City of Bowling Green, Ohio | 15 | 91 to 180 days | \$620,000 |
| Wood | Wintergarden Rd Improvements | Resurface and repair Wintergarden Rd from Sand Ridge Rd to E. Wooster St. Approximate length of project is 1.1 miles of 2 lane road. | City of Bowling Green | 10 | 31 to 90 days | \$380,000 |
| Wood | 2009 Crack Sealing | This project involves selective crack sealing through the City of Bowling Green. This crack sealing will serve to sustain the longevity of the newer portions of the City of Bowling Green's street network, allowing the City to defer expensive street repair and replacement projects into the future. | City of Bowling Green, Ohio | 5 | 0 to 30 days | \$100,000 |
| Wood | 2010 Paving Program | Resurfacing and repair of various City streets from Major Arterials to local streets. The City has an annual paving program but funding has been reduced and needed road repair are not possible with current budgets. | City of Bowling Green | 10 | 181 days or more | \$300,000 |
| Wood | Haskins and Poe Intersection Improvement | The intersection of Poe and Haskins Road (SR56) is located directly adjacent to the Wood County Fairgrounds which is home of the Wood County Fair, the annual National Tractor Pull and various other events throughout the year. Improvements to this intersection will serve visitors to the City of Bowling Green attending these events as well as the traveling public. The scope of work includes the replacement and upgrade to the existing pavement surface, sidewalks and safety improvements such as traffic signals, pedestrian crossings and bollards. New sidewalks included in this project will also serve to provide part of a pedestrian way to the City of Bowling Green's Community Center which hosts community events through the year. | City of Bowling Green, Ohio | 10 | 91 to 180 days | \$885,000 |
| Wood | North Main Street Pavement Improvements (Clay Stre | This project involves resurfacing and the selective replacement of the underlying concrete pavement subgrade along North Main Street (SR25) between the limits of Clay Street and DR Street. North Main Street is the major north-south connection between the downtown and northern commercial districts of the City of Bowling Green. The average daily traffic along this section of roadway is in excess of 13,700 vpd. With several schools along this section of roadway, included in this project are the as-necessary upgrade of sidewalks and handicap ramps that will serve to improve the pedestrian safety along this section of roadway. | City of Bowling Green, Ohio | 5 | 181 days or more | \$444,000 |
| Wood | 2009 Sidewalk Program | Remove and replace existing sidewalks in heavy residential areas especially in areas of schools and Bowling Green State University where heavy pedestrian traffic is present. Also, install new sidewalk to residential areas that do not currently have sidewalks to encourage pedestrian traffic to downtown Bowling Green. | City of Bowling Green | 10 | 91 to 180 days | \$250,000 |
| Wood | 2009 Curb Ramp Improvements | Project will upgrade and improve curb ramps in Bowling Green to meet ADA compliance for slope and detectable warning surface and remove barrier curbs. Project will promote pedestrian safety throughout Bowling Green by using improved to allow access for all citizens. | City of Bowling Green | 10 | 91 to 180 days | \$200,000 |
| Wood | Ft. Meigs Rd. Improvements Phase 2 | When reconstructed 54 miles of an urban collector roadway from 2 lanes unimproved to 3 lanes including center turn lane. Roadway work includes curb, gutter, drainage, pavement marking, new signage, sidewalk and landscaping. | City of Perrysburg | 25 | 31 to 90 days | \$700,000 |
| Wood | 2009 Street Resurfacing | Project also includes the last section of a multi use path that will connect Ft. Meigs Elementary School, Perrysburg High School, The Lewis Commons shopping area, 30 acre Rivercrest Park, 20.5 acre Rotary Community Park, scheduled for phase 3 this summer, a township recreational facility, and 3 major residential areas. | City of Perrysburg | 25 | 91 to 180 days | \$600,000 |
| Wood | Equipment and Money for Manpower | Work will include curb and gutter repair as needed to facilitate drainage during rainfall events. ADA compliant curb ramps will be reconstructed as required. Project scope includes both local streets and state routes. | Pemberville Police Department | 1 | 181 days or more | \$50,000 |
| Wood | WWTP Ultraviolet Disinfection | My Department is in dire need of money for payroll and to stay active. We also need a large amount of equipment updated and replaced. | City of Bowling | 15 | 31 to 90 days | \$2,200,000 |
| Wood | North Main Street Waterline Replacement Phase 1 | New Ultra-Violet disinfection system having a capacity of 30 million gallons per day. | City of Bowling Green | 25 | 31 to 90 days | \$325,000 |
| Wood | Conneaut Avenue Sewer Replacement | Replacement of 2100 LF of substandard 4 inch waterline with a new 12 inch diameter waterline to provide improved fire flows along North Main Street and intersection of the City's North Main Street Commercial District and the Downtown Business District. | City of Bowling Green | 25 | 0 to 30 days | \$330,000 |
| Wood | Wallace Avenue Sewer Replacement | Replacement of 2100 LF of concrete sanitary sewer. This section of sewer has been identified as a major contributor of infiltration due to leaking pipe connections and a failed liner. The construction of this project will help to reduce the water/sanitary sewer expenses to the Belleville District at the Conneaut Pump Station. | City of Bowling Green | 25 | 31 to 90 days | \$70,000 |
| Wood | Fort Drive Sewer Replacement | Construction of 500 LF of new separated sanitary sewer to address clean water infiltration. | City of Bowling Green | 25 | 0 to 30 days | \$30,000 |
| Wood | Poe and Dunbridge Pump Station Replacement | Construction of 360 LF of sanitary sewer that was installed with inadequate hydraulic capacity due to insufficient slope. This section of sewer requires constant maintenance to avoid backups into tributary homes. | City of Bowling Green | 25 | 91 to 180 days | \$750,000 |
| Wood | Napoleon Road/South College Sewer Rehabilitation | Replacement of existing undersized sanitary pump station with a new sanitary pump station. The existing station serves an area of 400 acres of mixed commercial, business, and residential land and has reached the end of its design life. The new station will also maintain flows from existing customers while providing capacity for an additional 500 acres of mixed commercial, business and residential land. | City of Bowling Green | 25 | 0 to 30 days | \$350,000 |
| Wood | Various Streets Sewer Rehabilitation | Rehabilitation of 6600 LF of 8 and 10 inch combined and sanitary sewers. These sewer sections consist of various defects such as root intrusion, leaking laterals, broken or missing pipe sections. The goal of this project is to reduce clean water infiltration into existing sanitary sewers while addressing structural or hydraulic concerns in both combined and sanitary sewer segments. | City of Bowling Green | 25 | 0 to 30 days | \$250,000 |
| Wood | Various Streets Sewer Rehabilitation | Rehabilitation of 6600 LF of 8 and 10 inch combined and sanitary sewers. These sewer sections consist of various defects such as root intrusion, leaking laterals, broken or missing pipe sections. The goal of this project is to reduce clean water infiltration into existing sanitary sewers while addressing structural or hydraulic concerns in both combined and sanitary sewer segments. | City of Bowling Green | 25 | 0 to 30 days | \$250,000 |
| Wood | North Prospect Waterline Replacement | Replacement of 700 LF of 4 inch waterline with a new 10 inch waterline. | City of Bowling Green | 25 | 91 to 180 days | \$85,000 |
| Wood | East Gypsy Lane Waterline Loop Phase 1 | Construction of 1700 LF of 16 inch waterline to provide a backup head to development east of I-75. This project will serve to improve fire flows at the Wood County Complex in the event that the primary waterline serving development east of I-75 is unavailable. | City of Bowling Green | 30 | 91 to 180 days | \$500,000 |
| Wood | East Gypsy Lane Waterline Loop Phase 2 | Construction of 5900 LF of 16 inch waterline to provide a large diameter interconnection between the City's primary water storage towers. | City of Bowling Green | 30 | 91 to 180 days | \$1,200,000 |
| Wood | Napoleon Road Waterline Loop | Construction of 2200 LF of 12 inch waterline to provide a backup head to development east of I-75. This project will serve to maintain fire flows in the event that the primary waterline serving development east of I-75 is unavailable. | City of Bowling Green | 30 | 91 to 180 days | \$400,000 |
| Wood | East Poe Road Waterline Loop | Construction of 6000 LF of 24 inch waterline to provide a backup head to development east of I-75. This project will serve to maintain fire flows in the event that the primary waterline serving development east of I-75 is unavailable. | City of Bowling Green | 30 | 91 to 180 days | \$1,600,000 |
| Wood | Bowling Green-WTP LPRO Expansion/Treatment | Construction of a 3 MGD Membrane Reverse Osmosis water treatment plant. Required to meet USEPA quality requirements and to provide the City the quality necessary. | City of Bowling Green | 1000 | 91 to 180 days | \$11,000,000 |
| Wood | Bowling Green- Raw Water Reservoir Feed Pumps | Existing reservoir pumps can not supply the raw water necessary for the LPRO 3 MGD separation. | City of Bowling Green | 1000 | 91 to 180 days | \$2,500,000 |
| Wood | Bowling Green- WTP Accelerator Repair | A recent evaluation of the Accelerator (the flocculation units of the existing 6 MGD fine bubble aeration plant). These units were installed in 1980 and have been in continuous service for 56 years. There has been severe wear in the unit and it must be replaced as possible. | City of Bowling Green | 1000 | 91 to 180 days | \$285,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Wood | WWTP Ultra Violet Disinfection Unit Rated at 30 MGD | Ohio EPA compliance schedule in the City's NPDES Permit requires the UV to be constructed to treat 30 MGD. This project has been designed. | City of Bowling Green | 2000 | 91 to 180 days | \$2,300,000 |
| Wood | South Maple Street Infiltration and Inflow Removal | This project will remove 1.2 MGD of wet weather flow of clean storm water that enters the sanitary sewer. | City of Bowling Green | 4 | 0 to 30 days | \$400,000 |
| Wood | Primary Clarifier Drive Replacement | The primary settling tank drives are in need of replacement. The existing drives have been in continuous service for 25 years. These drives were scheduled to be replaced in 2009. | City of Bowling Green | 2000 | 0 to 30 days | \$140,000 |
| Wood | Propane Buses | In 2010 the United States EPA regulation for bus emissions is changing. This nationwide regulation to clean up the air quality of the utilization of diesel fuel is intended to assist our environment in becoming "greener". We have investigated propane-fueled buses, which are currently available and meet the diesel standards established by Federal Law in 2007. We are requesting 3 propane buses in the amount of \$300,000 to contribute to a "greener" environment. | Wood County Board of Mental Retardation and Develo | 0 | 91 to 180 days | \$300,000 |
| Wood | Sludge Storage and Centrifuge | Sludge storage building and an additional centrifuge would be provided. This project would also include relocating the existing centrifuge into the new building equipped with conveyors to transport the dewatered sludge. | City of Bowling Green | 2000 | 91 to 180 days | \$1,200,000 |
| Wood | Portage Home Nichols | Originally served 10 ambulatory individuals with mental retardation and developmental disabilities. Today we are serving 10 individuals in this home however 4 individuals are non ambulatory and utilize additional adaptive equipment. We also have 1 staff member who also is non ambulatory. The space in this home continues to be an issue based upon the number of individuals utilizing wheelchairs. We are requesting an addition of 10' of width to the dining room and living room spaces to meet the needs of individuals with mental retardation and developmental disabilities. Today we are serving 10 individuals in this home however 4 individuals are non ambulatory and utilize additional adaptive equipment. The space in this home continues to be an issue based upon the number of individuals utilizing wheelchairs. We are requesting an addition of 12' x 20' to this home to better meet the needs of the individuals served. | Wood County Board of Mental Retardation and Develo | 0 | 91 to 180 days | \$60,000 |
| Wood | Portage Home Werner | Originally served 10 ambulatory individuals with mental retardation and developmental disabilities. Today we are serving 10 individuals in this home however 4 individuals are non ambulatory and utilize additional adaptive equipment. The space in this home continues to be an issue based upon the number of individuals utilizing wheelchairs. We are requesting an addition of 12' x 20' to this home to better meet the needs of the individuals served. | Wood County Board of Mental Retardation and Develo | 0 | 91 to 180 days | \$25,000 |
| Wood | 21st Century Computer System | Need updated computer system to handle direct care staff documentation to better streamline the recording of homosexual/personal care services being delivered to individuals with MR/DD. Staff spend too much time documenting on outdated paper forms - time they could be spending with their residents. This will also help produce more accurate billing information. This billing for services will be how we are able to retain staff, if we are not getting reimbursed for what we are truly providing we cannot afford to provide that service, thus we will not staff. | Wood Lane Residential Services, Inc. | 20 | 0 to 30 days | \$100,000 |
| Wood | Acquisition of Building & Building Renovations | Acquisition of land & construction of new facility to replace existing offices & counseling service space. | Behavioral Connection of Wood County, Inc. | 220 | 31 to 90 days | \$4,000,000 |
| Wood | Main Street & Sunset Street Storm Sewer Improvemen | 200' LF of storm sewer improvements. 6 catch basins, 1150 LF of pavement repair | Village of Bloomdale | 10 | 31 to 90 days | \$248,495 |
| Wood | WWTP Improvements Phase 3 | Project includes expansion of existing WWTP capacity to accommodate growth in local sewer service area. On-site power generation utilizing biogas to improve energy efficiency of facility and to provide for continued operation of plant during power outages. Also includes conversion from base B to class A biosolids. | City of Perrysburg | 440 | 0 to 30 days | \$11,000,000 |
| Wood | WWTP Improvements Phase 2B | Effluent disinfection improvements including but not limited to replacement of Chlorine gas with Ultraviolet, increase in disinfection capacity to accommodate local growth. Installation of SCADA system for greater control and efficiencies. Improvements to effluent pumping capacity. | City of Perrysburg | 134 | 0 to 30 days | \$3,350,000 |
| Wood | Hadley Home | This home serves 4 individuals with mental retardation and developmental disabilities. The current siding on this home is approximately 20 years old and has deteriorated. We are proposing new siding to maintain its beautification in the downtown area of Bowling Green, Ohio. | Wood County Board of Mental Retardation and Develo | 0 | 91 to 180 days | \$30,000 |
| Wood | Dwight Miller Home | This home serves 8 individuals with mental retardation and developmental disabilities. The exterior of this building is in need of repair to the exterior. It has been difficult to maintain the painting of this home. We are proposing to place cement siding on this home to maintain its historical look. | Wood County Board of Mental Retardation and Develo | 0 | 91 to 180 days | \$40,000 |
| Wood | Maumee River Interceptor Replacement Phase 2 | Replace 4000 ft of 15" sewer with 24" sewer to gain capacity and reduce CSO's to the Maumee River. Will also include the removal of 3 lift stations resulting in a reduction of energy and maintenance costs. | City of Perrysburg | 28 | 0 to 30 days | \$705,000 |
| Wood | Storm Sewer Replacement | Replacement undersized and damaged storm sewers to provide adequate storm drainage | Village of Milton Center | 10 | 91 to 180 days | \$118,250 |
| Wood | White Road Lift Station | Replacement of an existing Sewage Lift Station with one of more capacity to address several problems. Project is not limited to basement flooding, sewage and gas odors. | City of Perrysburg | 14 | 0 to 30 days | \$350,000 |
| Wood | Ash Tree Reforestation | Remove 408 ash trees infested with Emerald Ash Borer located in public rights-of-way. The trees are either dead or dying and pose a public safety hazard. Replace 408 non-ash trees to rebalance the public rights-of-way. | City of Bowling Green | 6 | 0 to 30 days | \$248,800 |
| Wood | Storm Damage Reforestation | Remove 100 trees in public rights-of-way damaged by storm events such as thunderstorms, high winds, or hail. Storm damage trees would pose a public safety hazard. Replace 100 trees to rebalance the public rights-of-way. | City of Bowling Green | 6 | 0 to 30 days | \$60,000 |
| Wood | New Strategy for Pine Beetle Control | We have been exploring a deleterious Western pest in North America. The economic and ecological consequences of this pest are so enormous that this problem has recently been highlighted in several articles in the New York Times, and on national television via CNN. A new pheromone lures strategy for beetle control has been developed and shown to be effective in the laboratory. In this approach, a substance that resembles the natural pine beetle aggregation pheromone has been synthesized. This molecule initially attracts the beetles to its source, but upon very short exposure to minute quantities, the beetle's pheromone receptors in its antennae are shut down, and the beetles cease to communicate. This prevents coordinated beetle attacks on a tree which maximizes the tree's natural defenses. Efforts are continuing underway to take this substance from the laboratory and test its effectiveness in the field. Requested funds will provide the purchase of the largest quantity in the amount required for field testing, field testing itself. Two high-tech jobs are expected to be created immediately. The company plans to seek venture funding after testing proves effective. | Spectra Group Limited, Inc. | 2 | 0 to 30 days | \$150,000 |
| Wood | Extend runway and taxiway, expand apron | Extend runway and taxiway, expand apron | Wood County Regional Airport Authority | 25 | 181 days or more | \$1,520,000 |
| Wood | Cherry St. Sewer Separation | Sewer separation, 3500 ft of 6" thru 60" storm sewer. | City of Perrysburg | 36 | 31 to 90 days | \$893,000 |
| Wood | Five Point Rd Sanitary Sewer | 400' of new sanitary sewer from State Route 25 to Fruhar Rd. Will provide sanitary service to development corridor | City of Perrysburg | 23 | 91 to 180 days | \$570,000 |
| Wood | Southwood Storm sewer | 400' of 6" & 8" storm sewer to abate area flooding | City of Perrysburg | 22 | 31 to 90 days | \$537,000 |
| Wood | Storm Water Management Improvements | Rehabilitation and replacement of estimated 1,100 feet of existing storm water conveyance facilities and an estimated 25 selected storm structures. Services include visual and video investigation of an estimated 3,000 feet of storm conveyance facilities, construction of selected conveyance facilities and structures. Project will improve the environmental conditions and established neighborhoods through more effective storm management facilities, reduction of flooding, reduction of water, reduction of associated property damage and increased life of existing local transportation infrastructure. | Village of Milbury | 15 | 31 to 90 days | \$47,500 |
| Wood | Pemberville Opera House Elevator Project | This plan is elevated in the historic Pemberville Opera House, circa 1910. The Pemberville Opera House is a shining example of a local facility being restored to its original beauty and use and what this means in its ability to bring a community together for events that cater to a wide slice of the people in the area. The funding to provide an elevator can only enhance that reality and make available to a wider range of people the ability to see and enjoy the arts in Northwest Ohio. | The Pemberville Opera House | 15 | 31 to 90 days | \$250,000 |
| Wood | Hoytville Sanitary Sewer, Manhole, and Pump Stati | The project involves coating approximately 10 sanitary manholes with protective lining to eliminate inflow and infiltration into the sanitary sewer system and to rehabilitate the manholes and protect them from corrosive gases in the system. The project will also replace 15 cleanouts on the sanitary sewer system with new sanitary sewer manholes in order to provide proper access to the system to meet Ohio EPA requirements. The project will also add remote telemetry capabilities to the sanitary pump station to allow the system to be better monitored and maintained. | Feller, Finch & Associates, Inc. | 2 | 91 to 180 days | \$160,000 |
| Wood | SR 281 and Custar Road Resurfacing | Resurfacing and drainage improvements on SR 281 and Custar Road in the central business area in Custar. | Village of Custar | 15 | 91 to 180 days | \$58,000 |
| Wood | South Center Street Storm Sewer Upgrade | Construction of approximately 500 feet of storm sewer to provide drainage of this poorly drained area of the Village | Village of Wayne | 25 | 91 to 180 days | \$75,000 |
| Wood | WWTP Dechlorination | Replacement of the chlorination system at the wastewater plant with a new ultraviolet disinfection system. | Village of Wayne | 10 | 91 to 180 days | \$150,000 |
| Wood | Former Penta Administration Building Renovation | Renovate the aforementioned building to provide faculty offices to the School of Arts & Science as well as a number of mediated classrooms | Owens Community College | 15 | 91 to 180 days | \$1,300,000 |
| Wood | Lop Road & Parking Lot Improvements | This project will provide a safer campus by relocating traffic to the perimeter of campus & creating a unified, pedestrian friendly campus | Owens Community College | 15 | 91 to 180 days | \$2,922,000 |
| Wood | Thompson & Truman Rds Sanitary Sewer Systems | Provides sanitary sewers for County Department of Health ordered areas to serve residential properties. Project could be split in two parts. Thompson Rd area is ready for bid now. | Northwestern Water & Sewer District (ORC 6119) | 48 | 181 days or more | \$500,000 |
| Wood | Latcha Rd Lift Station Rehab & Wise St Lift Statio | Rehabilitates/grades one failing critical lift station. Eliminates a second lift station via new gravity sanitary sewer minimizing potential for sanitary sewer bypasses to waterway. Additionally provides sanitary service to unsewered area. Ready to bid now & funding were provided. | Northwestern Water & Sewer District (ORC 6119) | 56 | 0 to 30 days | \$1,105,000 |
| Wood | Wood County Landfill Leachate Sanitary Sewer | Constructs 4 miles of sanitary sewer collection system and pumping infrastructure from regional solid waste landfill facility to regional WWTP. Project will eliminate high leachate trucking costs and extend sanitary service to unsewered unincorporated area. | Northwestern Water & Sewer District (ORC 6119) | 56 | 91 to 180 days | \$600,000 |
| Wood | Sanitary Sewer Infiltration & Inflow (I&I) Elimina | Rehabilitates failed sanitary sewer collection system, removing stormwater inflow required by OEPA. Provides "anti-dog credits" for future permittees, industrial and residential development. Minimizes stormwater demand on regional WWTP reducing operational costs. Lowers contamination risk to the environment due to bypass pumping. | Northwestern Water & Sewer District (ORC 6119) | 48 | 91 to 180 days | \$500,000 |
| Wood | Tracy Rd Trunk Sanitary Sewer Rehabilitation Phase | Rehabilitates failed trunk sanitary sewer (Phase 2) serving prime industrial/commercial area (Phase 1 completed in 2008). Reduces risk of catastrophic sanitary sewer collapse (system condition has been well documented and evaluated by engineering survey reports). Mitigates infiltration & inflow (I&I) into the sanitary system that can reduce WWTP operating costs. | Northwestern Water & Sewer District (ORC 6119) | 46 | 91 to 180 days | \$1,150,000 |
| Wood | Pump Station Improvements | Rehabilitates/replace 5 pump stations with new fittings, valving, piping and new electrical controls. Equip stations with callout capabilities for emergency response to trouble. Report stations as needed structures for they have reached and service life so to locate environment of a sewer system. Numbers are from engineers probable cost study 2006. | Village of Bradner | 10 | 91 to 180 days | \$324,500 |
| Wood | Park Paving Program | Rehabilitation of parking facilities at City Park, Carter Park and Simpson Garden Park (21,906 sq ft) using mill and fill construction. Includes pavement grinding, seal, asphalt concrete and pavement markings. Labor to be supplied as in-kind by City of Bowling Green. | City of Bowling Green | 20 | 0 to 30 days | \$480,376 |
| Wood | Regional Multipurpose Trail | Two miles of multi-purpose trail would be constructed to link the Stoppel Elm trail to Hal Prairie Road. Filling a gap in the regional trail system for pedestrians and the cycling public. | City of Bowling Green | 25 | 31 to 90 days | \$500,000 |
| Wood | Energy Saving Public Park Buildings Rehabilitation | Energy efficiency rehabilitation of windows, doors and HVAC systems at the Veterans' Building in City Park and the Rotary Nature Center in Wintergreen Park. | City of Bowling Green | 20 | 0 to 30 days | \$412,000 |
| Wood | Park Multipurpose Trails | Three miles of multipurpose trail would be created at three City Parks, serving 45,000 people. | City of Bowling Green | 25 | 0 to 30 days | \$100,000 |
| Wood | Community Center Wind Energy Project | A wind turbine would be installed at the public Bowling Green Community Center to generate renewable energy on a smaller scale than our AAP Wind Farm. This accessible site would promote public education about alternative energy sources. | City of Bowling Green | 15 | 31 to 90 days | \$350,000 |
| Wood | Vehicle replacement | Includes main transport for the Bowling Green sewer and street departments (Buses 1987 model use for snowplowing and simple collection vehicles). | Village of Bradner | 1 | 0 to 30 days | \$42,251 |
| Wood | Park Access for Public | Rehabilitate existing trails and a new trail would be installed on portions of a 40-acre park that is not currently open to the public. Educational signage and kiosks as well as a park office would be added to a second phase of development. | City of Bowling Green | 20 | 31 to 90 days | \$350,000 |
| Wood | Carter Park Infrastructure Rehabilitation | Drainage, irrigation, infill/retained improvements and construction of a new baseball hub building are included in this project at Carter Park. The park serves over 100,000 people annually through recreational baseball and softball programming. | City of Bowling Green | 15 | 0 to 30 days | \$270,000 |
| Wood | Woodland and Praire Restoration in NW Ohio | Over 2,000 trees will be planted on parkland at Kemwood/Napoleon and at Simpson Garden Park (33 acres). This site is currently old farm field. An additional 30 acres of prairie habitat will be restored at Wintergreen Park. Do this project restores 68 acres of woodland and prairie habitat in NW Ohio. | City of Bowling Green | 23 | 0 to 30 days | \$75,000 |
| Wood | Community Center Expansion | This project will expand the fitness and prevention programs and housing for such programs at the Bowling Green Community Center. A Health Care partner will have space for cardiac rehab in the addition as well as cardiovascular, weight training and fitness class programs. We currently teach over 2,500 people and have an out of room for additional overflow in the existing facility. | City of Bowling Green | 90 | 91 to 180 days | \$2,000,000 |
| Wood | Community Center Expansion | This project will expand the fitness and prevention programs and housing for such programs at the Bowling Green Community Center. A Health Care partner will have space for cardiac rehab in the addition as well as cardiovascular, weight training and fitness class programs. We currently teach over 2,500 people and have an out of room for additional overflow in the existing facility. | City of Bowling Green | 90 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Wood | Environmental Education for Urban Students | City park naturalists will take their programming into area schools to offset the lack of transportation funds that normally bring the students to our parks. This project includes hiring two additional part-time educators for the outreach program and reaching 400 additional students. Recycling, energy, natural resources, habitat restoration, general education, and plant ecology are a focus of the program. | City of Bowling Green | 2 | 0 to 30 days | \$28,000 |
| Wood | Water recirculators for wastewater lagoons | Purchase and install 3 solar powered water recirculators in Bradner's wastewater treatment lagoons. To help with improving water discharge quality to the river and tributary. | village of Bradner | 1 | 31 to 90 days | \$117,429 |
| Wood | Pump Station Telemetry | Project includes new telemetry system for 12 pump stations, relay station, base station and accessories. New system will improve communications with pump stations, improve emergency response times, improve security of pump stations, improve manpower efficiencies, and reduce vehicle fuel costs. | City of Perrysburg | 4 | 0 to 30 days | \$105,000 |
| Wood | West Millgrove Sanitary Sewer System | Constructs sanitary sewer system in this unsewered community and surrounding unincorporated area. Scope includes 1 mile of gravity collection line, 4 miles of basement and lift station. CEPA Northwest District submitted proposed orders to Columbus in January 2009 with final orders anticipated mid-2009. Area is low/middle income, therefore, presents affordability constraints. Project will be served by an existing regional WWTTP with available capacity. "Design is complete, therefore, construction could be accelerated if funding and CEPA orders were available now." | Northwestern Water & Sewer District (ORC 6119) | 92 | 181 days or more | \$1,200,000 |
| Wood | Williamsburg/Otsego Regional WWTTP Replacement | Replace failing critical WWTTP and provides increased capacity to serve regional sanitary sewer 208 area. Built in the 1960's the WWTTP is subjected to harsh conditions, has a history of regular flooding due to proximity to the Maumee River (1700 feet), and has exceeded its useful life. The replacement WWTTP land has been purchased and is located away from the river and above the floodplain. The project design is complete, CEPA approved, construction contract advertised February 10, 2009 and bid opening is scheduled for March 3, 2009. THIS PROJECT IS READY FOR FUNDING NOW. | Northwestern Water & Sewer District (ORC 6119) | 56 | 0 to 30 days | \$1,150,000 |
| Wood | JRS (Jobs Ready Site) Eastwood Commerce Center Ind | Constructs sanitary sewer infrastructure (collection and pumping facilities) supporting ODOO \$2.6 million grant (Jobs Ready Site - JRS) to develop prime industrial property (1100 acres available in area) for large manufacturing facilities. Site is already served by trunk gas line, electrical peaking/substation facilities, and is accessible to major transportation facilities including I-80 corridor, rail, and regional airport (Metcalfe Field). | Northwestern Water & Sewer District (ORC 6119) | 1050 | 31 to 90 days | \$550,000 |
| Wood | Stony Ridge/Lemoyne Sanitary Sewer System | Constructs sanitary sewer lines in two unsewered, unincorporated communities under orders by CEPA since 1992. Project has been delayed due to affordability constraints in this low/middle income area. Scope includes gravity/flocculants, low pressure grinder pumps, and lift station. Project has along transportation corridor (US 20) and could open up area for economic development. | Northwestern Water & Sewer District (ORC 6119) | 208 | 31 to 90 days | \$2,000,000 |
| Wood | Sugar Ridge/Dunbridge Sanitary Sewer System | Constructs sanitary sewer collection system in CEPA identified Critical Home Sewage Disposal Area (CHSDA) serving two unincorporated communities. | Northwestern Water & Sewer District (ORC 6119) | 220 | 181 days or more | \$2,000,000 |
| Wood | Weston WWTTP Upgrade | Existing WWTTP built in the 1960's has not had a major rehabilitation nor has been updated to meet current treatment standards. WWTTP will be upgraded and rehabilitated to meet current design standards. | Northwestern Water & Sewer District (ORC 6119) | 60 | 181 days or more | \$600,000 |
| Wood | Skatepark/BMX Course | A 5 acre skatepark/BMX course will be built at City Park to serve 200 teens. The course consists of concrete ramps, bowls, rails and steps in the style of a street skate park. Local youth are also fundraising for this project the 2005 Recreation Survey of area teens listed this project in the Top Ten for city recreation. | City of Bowling Green | 6 | 31 to 90 days | \$100,000 |
| Wood | Needle Hall Restoration | Needle Hall will receive a new roof, decking and siding to restore this historic building to good condition. This is the last original structure remaining in City Park from the County Fair era. | City of Bowling Green | 6 | 91 to 180 days | \$225,000 |
| Wood | Public Restrooms in the Parks | Public restrooms would be provided to park users at Westwood Park and Dunbridge Road. Scope includes through this project. Park-a-jobs are currently at the two sites and the public has asked for a better solution. Two pre-fab restrooms would be installed in 2009 if funding is provided. | City of Bowling Green | 10 | 31 to 90 days | \$100,000 |
| Wood | Wastewater Treatment Plant & Pump Station Project | New wastewater treatment plant and pump station. We are experiencing an overflow problem near a park and the Elementary playground. These improvements will eliminate the existing lift problem. We are also hoping to work with the Northwest Water & Sewer District nearby allowing the expansion of sewer lines throughout Pemberville and the surrounding area. | Village of Pemberville | 100 | 31 to 90 days | \$2,500,000 |
| Wood | Wood Lane Group Homes Energy Efficiency Upgrades | Energy improvements to 15 older existing WoodLane Residential Services group homes: thermal envelopes, lighting, appliances and HVAC systems. Specific repairs and necessary improvements to be made will be based on energy audits performed by DOE-Appliance/Rescue/Certified Auditors. The types of improvements will include: replacing old furnace/heating systems and ducts with new energy efficient units; increasing attic and/or wall insulation R-values; replacing incandescent lighting fixtures and old appliances (refrigerators and water heaters) with EnergyStar models; replacement of old inefficient HVAC mechanical units with high SEER ones; addition of weatherstripping accessible weathering type entries (and where necessary, ramps) or windbreak landscape features (overgrown trees and/or windbreak trellis) on unfavorably-oriented homes. | McKenzie Builders and Developers | 20 | 31 to 90 days | \$600,000 |
| Wood | Retail hobby store creation | Outcomes: 1) Reduced energy and associated maintenance costs of Wood Lane's group homes by 30% (LEED). Targeted savings for each residence to be based on energy audit results and improvements. Actual results to be reported quarterly. 2) Improved health and comfort of Wood Lane residents. 3) Improved employment and building trades and suppliers. | ZDK Company, Inc. d/b/a HobbyTown USA | 12 | 31 to 90 days | \$350,000 |
| Wood | RisingSun/Lakota Schools Water Transmission Main | A second hobby store will be constructed to fill a niche created by a failed competitor in the area. ZDK Company already owns one store in the area, but a business development opportunity exists to better serve Northwest Ohio's educational toy and hobby market. Many customers currently travel 1-2 hours to get to the current store. A second store for physically removed from the existing one will better serve the needs of the geographic region. Also, the store will employ 3-4 full time people and 8-10 part time employees, thereby providing more job opportunities. | Northwestern Water & Sewer District (ORC 6119) | 106 | 181 days or more | \$1,200,000 |
| Wood | Walbridge Rd Water Transmission Main Extension | Constructs water transmission main to serve the Village of RisingSun and the Lakota school system that is searching for alternate high quality water source for their campus and fire protection. | Northwestern Water & Sewer District (ORC 6119) | 25 | 181 days or more | \$200,000 |
| Wood | Weston Area Regional Elevated Water Tank | Extend water transmission main to partially developed industrial area near the Village of Walbridge. It will provide high demand water flows for industrial processes and fire protection. | Northwestern Water & Sewer District (ORC 6119) | 44 | 31 to 90 days | \$550,000 |
| Wood | Custar/Milton Center Water Distribution System | Replaces undersized and poor condition elevated water tank (built in the 1920's). New tank's additional height and volume will increase pressure and capacity to serve regional water service area. Will improve fire flow capability for local fire departments. | Northwestern Water & Sewer District (ORC 6119) | 140 | 181 days or more | \$1,000,000 |
| Wood | Dunbridge Area Water Distribution Main | Construct municipal regional water distribution system for two villages including storage and treatment facilities. Construct water distribution main to the unincorporated Village of Dunbridge. Additionally, provides needed water for local manufacturer's (Brau Schaefer) industrial processes and fire protection requirements. | Northwestern Water & Sewer District (ORC 6119) | 60 | 181 days or more | \$600,000 |
| Wood | Completion of Third Lane Construction | Construction of 8.6 lane miles of third lane on the Ohio Turnpike in Lucas and Wood Counties near Perrysburg, Ohio - Completion of this Project will increase capacity and service level to customers traveling the Turnpike between Mississippis 59 and 64. The Project is estimated to create 250 construction jobs. This Project can be bid and scheduled for the start of construction within 90 days. | Ohio Turnpike Commission | 250 | 31 to 90 days | \$32,000,000 |
| Wood | Skills Center Renovation | As part of a planned campus expansion program, the College recently acquired the Potts Vocational School campus and existing building. To fit capabilities upon the College's investment and gain the College's needed, significant renovation is needed to assure compliance with ADA, life safety and building code requirements. Accordingly, the college has developed an extensive renovation plan to bring about required improvements to each building. The current project is to provide renovation to the 85,300 square foot Skills Center building to allow other sufficient space resources to support planned college services and programs. Renovations would result in sufficient space to accommodate offices for the School of Business, Department of Nursing and the Culinary Program. Beyond faculty offices and necessary support space, a significant number of academic classrooms and labs, designed to provide the "Classrooms of the Future," would be made available. While increasing enrollment makes these renovations essential, the potential of reduced state subsidies offsets the college's total grant support. | Owens Community College | 35 | 91 to 180 days | \$3,900,000 |
| Wood | Pemberville Streetscape | 1500 ft. of sidewalk replacement in the downtown area including handicapped compatible crosswalks, replacement of lamps and lightposts, bicycle ability lanes, plus benches, planters and other enhancements. Local business owners to upgrade and improve store fronts and entrances to create improved business climates. | Village of Pemberville | 30 | 91 to 180 days | \$130,000 |
| Wood | Wood County/Ottawa County Regional Water System | Constructs water trunk line from Ottawa County to Wood County to provide regional water distribution system. | Northwestern Water & Sewer District (ORC 6119) | 320 | 181 days or more | \$3,000,000 |
| Wood | Water System Master Meter & Clear Well for WL#100 | Constructs required 3MG "clear well" providing water system improvements, separation, and operational enhancements with a master meter for regional water distribution system. | Northwestern Water & Sewer District (ORC 6119) | 36 | 181 days or more | \$400,000 |
| Wood | Pathways to Literacy | Over the next biennium, provide a research based professional development course for teachers with a focus on analyzing student's reading and writing behavior and relating those behaviors to more general theories of literacy and learning. Through an ongoing, high quality professional development classes, teachers will refine and further develop their skills to effectively teach students who are at risk of failing to learn how to read and write. Teachers will be engaged in an apprenticeship during year one, work with children in order to learn how to design personalized lessons based upon student needs. In year two, training continues so that teachers can develop new students and refine their teaching to be effective in their work. This two year project will include extensive use of a one-way glass, teachers would watch each other work with students as they put their observations and analyses into words. Use of an online collaboration tool will also be utilized to further communications, learning and productivity. The goal is successful student performance within an average literacy setting in the classroom, to bring low readers and writers to average levels of performance. | Wood County Educational Service Center | 34 | 31 to 90 days | \$339,832 |
| Wood | Sunset Street from Main Street to Garfield Street | Replacement of 460 LF of badly deteriorated storm sewer along Sunset Street. This section is critical to alleviate regular flooding in a residential neighborhood. | Village of Bloomdale | 10 | 91 to 180 days | \$61,370 |
| Wood | Bloomdale Fire Station | Renovation of the Bloomdale fire station. New larger overhead doors are required to accommodate new fire equipment. Because the building is historic, construction substantial structural stabilization is required. | Village of Bloomdale | 10 | 91 to 180 days | \$66,733 |
| Wood | Ohio HB251 Energy Efficiency Projects | The University has already completed upgrades to central steam heating plant and first phase of lighting upgrades/retrofits. Pending projects include metering, setback controls, retro-commissioning, phase two lighting retrofit, VAV/Mechanical upgrades, research laboratory retrofit, and additional upgrades to central steam heating plant. | Bowling Green State University | 10 | 31 to 90 days | \$26,500,000 |
| Wood | Academic Buildings - Roof Replacement Phase II and | The University began a ten year roof replacement effort in 2008 replacing 5-10 roofs on academic buildings per year at an annual cost of \$1.3 - 2.5 million per year. Seven roof replacements will begin within 30 days and an additional 3-4 could be completed if funding were made available. | Bowling Green State University | 10 | 31 to 90 days | \$3,000,000 |
| Wood | Central Cooling Plant | As part of a major academic classroom capital project, the University chose to construct a high-efficiency central cooling plant sufficient to serve 4-5 buildings located within the quad instead of replacing less efficient individual building chillers. | Bowling Green State University | 10 | 91 to 180 days | \$5,000,000 |
| Wood | Fine Arts/Theater Classroom Building | The University determined that it was not cost effective to renovate existing aged space (building +40 years old) and chose to construct a new fine arts/theater classroom building utilizing significant "green" building techniques. | Bowling Green State University | 25 | 91 to 180 days | \$41,500,000 |
| Wood | Wood County EFSP | We received EFSP funding. Based on the recently held board meeting, the needs exceeded the funds. If we receive additional monies, we expect to shelter and feed the people of Wood County with the money. We received 107,475 in EFSP funding for phase 2? | United Way Wood County | 1 | 0 to 30 days | \$107,475 |
| Wood | South Tunnel Renovation | Renovation and modernization of tunnel to achieve safety, greater efficiency for water, steam, and condensate. Ability to add chilled water systems to southern region of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 0 to 30 days | \$5,800,000 |
| Wood | East Campus Data Ring/Kreischer Data Room | Extend and create redundant technology infrastructure to remaining region of campus not completed during initial network installation. Crucial to support campus expansion and research park tenants. | Bowling Green State University | 5 | 91 to 180 days | \$2,300,000 |
| Wood | McFall/Founders Tunnel Renovation | Renovation and modernization of tunnel to achieve safety, greater efficiency for water, steam, and condensate. Ability to add chilled water systems to southern region of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$6,500,000 |
| Wood | McDonald Tunnel Upgrades | Renovation and modernization of tunnel to achieve safety, greater efficiency for water, steam, and condensate. Ability to add chilled water systems to western region of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 5 | 181 days or more | \$2,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Wood | Ridge Street Tunnel Extension | Renovation and modernization of tunnel to achieve safety, greater efficiency for water, steam, and condensate. Ability to add chilled water systems to southern region of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$3,000,000 |
| Wood | Central Cooling Plant 2 | As part of the infrastructure master plan implementation, the University will construct a second high-efficiency central cooling plant to serve west side of campus replacing less efficient individual building chillers. | Bowling Green State University | 10 | 181 days or more | \$5,750,000 |
| Wood | Heating Plant Tunnel | Renovation and modernization of tunnel to achieve safety, greater efficiency for water, steam, and condensate. Connect Heat Plant to balance of campus and support Central Cooling Plant 2. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 3 | 181 days or more | \$1,750,000 |
| Wood | Sewer Upgrades/Separation | Replaces and upgrades original sewer service from entire north side of campus, assists city of Bowling Green in meeting EPA goals and guidelines for separating storm and sewer service for significant portion of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$3,000,000 |
| Wood | Roadway Repairs/Upgrades | Replacement or resurfacing multiple driveway entrances/exits, roadway and parking totaling 916,000 square feet of pavement. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$5,000,000 |
| Wood | Ridge and Willard Street Upgrades/Lot N | Rebuild Ridge and Willard Streets, renovate/expand parking for 500 spaces. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$4,100,000 |
| Wood | Middle Campus Tunnel Upgrades | Renovation and modernization of tunnels to achieve safety, greater efficiency for water, steam, and condensate to Science Hall, Williams Hall, Franzenman Quad, Rice Center, Education Building, Memorial Hall, and Corvax Hall. Ability to add chilled-water systems to southern region of campus. Part of campus-wide infrastructure master plan implementation. | Bowling Green State University | 10 | 181 days or more | \$10,000,000 |
| Wood | Small Group Learning Cottage Upgrades | Renovation of plumbing and mechanical services to small group learning units. | Bowling Green State University | 3 | 181 days or more | \$1,500,000 |
| Wood | McDonald Hall Roof Replacement | Roof replacement with lightweight concrete solution. | Bowling Green State University | 3 | 0 to 30 days | \$1,500,000 |
| Wood | Levis Commons Upgrades | Renovation of classroom space for off-campus and returning adult students. | Bowling Green State University | 3 | 0 to 30 days | \$1,000,000 |
| Wood | Harshman Student Success Center | Conversion of former dining center to Living/Learning Center in support of group study/tutoring and learning community. | Bowling Green State University | 3 | 0 to 30 days | \$1,000,000 |
| Wood | Life Science Laboratory Upgrades | Renovation and upgrade of research laboratory spaces within Life Science Building supporting Eminent Scholars. | Bowling Green State University | 3 | 181 days or more | \$575,000 |
| Wood | Main Sewer Pump Station Repair and Improvements | Main sewer pump station in Grand Rapids is in need of major improvements to meet current standards and add back up pumping and power capacity. | Village of Grand Rapids | 10 | 91 to 180 days | \$300,000 |
| Wood | Quarry Road Drainage Improvements | Installation of approximately 4,550 linear feet of storm pipe of various sizes to alleviate poor drainage conditions along Quarry Rd. (between N. and N. Main Street including the areas at the local Elementary School. This project is totally designed and has a bid opening date of 10/15/2014 including a base bid and two Alternates. The two alternatives will be based on location on available funding. | Village of North Baltimore | 8 | 0 to 30 days | \$500,000 |
| Wood | Bloomdale Police Employment Initiative | This project would implement one full-time police officer and two part-time officers to increase the safety and security of residents and properties within the Village of Bloomdale. Currently the Village of Bloomdale only has one full-time officer and one auxiliary officer on staff for a village of 10,000 residents. With the growing crime rate in Northwest, Ohio, the residents of the Village of Bloomdale are in need of police officer presence to help deter, any and all criminal activity. | Bloomdale Police Department | 3 | 31 to 90 days | \$50,000 |
| Wood | Wooster Street Center Renovation | Renovation of building for small theater and music performances by students and local community theater groups. Work includes electrical and ADA upgrades. | Bowling Green State University | 3 | 181 days or more | \$550,000 |
| Wood | Campus-wide Sidewalk Upgrades | Project is intended to replace approximately 120,000 sq ft of sidewalk throughout campus | Bowling Green State University | 10 | 91 to 180 days | \$1,100,000 |
| Wood | Wolf Center Tunnel Extension | Project provides 500 foot extension of campus tunnel providing redundancy of steam service to eastern campus, provides service expansion of Central Cooling Plant 1 | Bowling Green State University | 10 | 91 to 180 days | \$1,200,000 |
| Wood | Campus-wide Electrical Service Conversion | Project completes replacement of the original 4160 volt campus infrastructure with 12.47 KV transformers and switches. Provides system loop creating redundancy and eliminates older, inefficient and faulty equipment. | Bowling Green State University | 10 | 91 to 180 days | \$10,800,000 |
| Wood | Glass Kiln Replacement | Project provides replacement of old, faulty kilns and upgrades gas/energy source to fire replacement kiln | Bowling Green State University | 3 | 0 to 30 days | \$550,000 |
| Wood | Institute for Alternative Energy Research | Project will create facility to house the Institute for Alternative Energy Research. Interdisciplinary institute to provide a platform for cross-disciplinary research at the leading edge of the development of new sources of clean energy. Facility will include 65,000 sq ft of research laboratories and offices for faculty and incorporates a sustainable design concept to produce fossil fuel alternative energy sufficient for its own usage. | Bowling Green State University | 20 | 181 days or more | \$63,000,000 |
| Wood | Hanna/Moseley/University/South Hall Renovations | Renovation of three of the University's original academic halls and a fourth commonly situated in the quad. Will provide instructional and academic office space for multiple departments and disciplines | Bowling Green State University | 15 | 181 days or more | \$45,000,000 |
| Wood | Library Replacement | Replacement of 12 story, 45+ year old campus library. Newly constructed, modern library will provide greater service to students via learning commons, academic tutoring and student success centers | Bowling Green State University | 15 | 181 days or more | \$45,000,000 |
| Wood | Real Time communications Tool for Teachers | Funding to support the use of technology and modern equipment for professional development activities aligned with the Ohio Standards for Teaching Profession. We would like to enhance professional development sessions and connect teachers in 13 school districts, throughout seven counties, with an online audio and video conferencing tool. This technology would allow for teacher-to-teacher collaboration and problem solving, as well as, live interactive literacy coaching. We would like to connect teachers in order to stream live, on-site demonstration lessons without the teacher or student leaving their home school. Teachers can observe and engage in constructive discussions to apply new understandings towards their own teaching. Teachers will be able to open, upload and download files and saved video clips of best practices, as well. | Wood County Educational Service Center | 30 | 31 to 90 days | \$216,000 |
| Wood | Assistance with small business to avoid bankruptcy | We are asking for funds to be able to continue to operate our business, and to add a few facilities to our existing restaurant in an attempt to provide more services for customers in order to increase our revenue. We are a small family owned restaurant business with 25 employees who are the most honest, hardworking, and dedicated employees anywhere we want to maintain and grow their jobs, be able to grow their careers and possibly benefits, and avoid imminent bankruptcy and the closing of our business. We are asking only for funds to be able to continue to operate and to save jobs for our employees. We are good citizens who have always paid our taxes and have worked on hard over the years. Please help us keep our business alive & growing, and help us continue to provide jobs & security for our employees. We are good, honest business people who are trying to survive the current economic conditions. Please help our business stay alive and flourish! Small businesses are the backbone of this country, and we plead with you to help us. We want to continue to work hard and be successful in our business, in our community, and to be a leader for our employees. Thank you for listening to an already intensive local professional proposal. Please proper environmental storage services to raising one owner, one energy required to produce a cup of coffee is considerable. By combining the latest fuel-efficient roasting technologies with a new, environmentally-smart, storage/loading facility, the amount of energy required to produce coffee can be reduced by 80%. | Beier Enterprises, LLC | 25 | 0 to 30 days | \$40,000 |
| Wood | Energy Efficient Coffee Roasting and Storage | Grounds For Thought (GFT), a Bowling Green, Ohio landmark for 20 years, has been in the coffee roasting business for 18 of those years supplying its own need for coffee as well as meeting the needs of over 100 restaurants and coffee shops throughout Ohio and the nation. It is one of the 10 largest specialty coffee roasters in Ohio and the largest and oldest coffee roaster in northwest Ohio. GFT is requesting \$274,650 to buy a Kestral S35 high efficiency roaster and build a 3,600 sq ft storage/roasting facility in Bowling Green's Bedford Business Center. The building incorporates the latest in energy conservation measures including off-axis lighting, a geothermal heat pump, superinsulation and a net-metered 2.4 MW wind turbine. An estimated 12 new jobs will be created by this project. | Grounds For Thought | 12 | 31 to 90 days | \$274,650 |
| Wood | Paralegal Consultants | Paralegal Consultants, LLC is a locally based firm dedicated to providing affordable legal services to attorneys throughout the Northwest Ohio and Southwest Michigan area, specifically the Toledo and Detroit metropolitan areas. Whether in solo practice, private firms or legal departments of corporations, we strive to provide support to attorneys who find themselves in need of talented paralegals. As attorneys attempt to optimize cost effectiveness and efficiency, independent paralegals provide services which dramatically reduce overhead costs. Although our primary focus is document preparation and litigation case management, we have the ability to provide top notch services to clients with unique needs. This is a paralegal consulting business that I have a domain name and website set up for (www.paralegalconsultants.net). The monies would be used for website development, marketing and advertising. | Paralegal Consultants | 5 | 0 to 30 days | \$5,000 |
| Wood | Reducing Employer Healthcare Costs | Creation of new jobs - 1 full time and 2 part time positions for a period of 3 years. FT at \$40,000 PT at \$20,000 annually. | Consumer Driven Concepts, LLC | 7 | 0 to 30 days | \$240,000 |
| Wood | Scooter Sales | Add high mileage fuel efficient vehicles (motor scooters) to products we currently sell. This allows us to diversify and retain our nine full time and 20 contractors in the Ohio Hub - We serve a near routine, high-speed van system. | Mini-Engine Repair Inc. | 10 | 0 to 30 days | \$50,000 |
| Wood | Ohio Higher Education Rail Network Institute | By extending passenger rail to colleges and universities the chances for collaboration among schools improve. The union of rail and education creates new learning worlds with reducing the financial cost of transportation for students. Passenger rail decreases traffic congestion and lowers fuel consumption. On the other hand, partnering with higher education strengthens the Ohio Hub through increased ridership and revenues. The focus of this project is to organize and raise awareness among Ohio's more than 700,000 college students, faculty and staff about the benefits of passenger rail. The OHERN Institute is seeking \$353,000 to strengthen the alliance between passenger rail and schools. Year One outcomes will include: Formation of a statewide network of students and faculty, organizing the first of what will be an annual conference titled Passenger Rail, Higher Education and Ohio's Future, and developing extensive online educational materials. | Bowling Green State University | 5 | 31 to 90 days | \$353,000 |
| Wood | Lemoyne Road Resurfacing | Milling 3" of asphalt pavement (704 SY) and resurfacing with 1 1/2" asphalt concrete surface course (245 CY) and 1 3/4" asphalt concrete intermediate course (245 CY) along approximately 2100 feet of Lemoyne Road between Woodside Road (SR 51) and Curlew Road. Improvements include replacing pavement markings and full depth pavement repairs. | City of Northwood | 10 | 0 to 30 days | \$189,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Wood | Expansion | Fire and Train Manager and staff to expand operating hours of current business. Expanded customer base Generate 200,000.00 more per year in sales. Providing 2 full time and 4 part time employees | Ben's Table LLC | 6 | 31 to 90 days | \$52,000 |
| Wood | Wales Road Resurfacing | Milling 3" of asphalt pavement (SDA 57) and resurfacing with 1 1/4" asphalt concrete surface course (181CY) and 1 3/4" asphalt concrete intermediate course (252 CY) along approximately 1700 feet of Wales Road between Woodville Road (SR 51) and City Municipal Complex. Improvements include replacing pavement markings and full depth pavement repairs. | City of Northwood | 10 | 0 to 30 days | \$143,800 |
| Wood | the "Keeping my daughter in college" project | This "Keep my daughter in college" project will directly benefit my daughter and keep her in school. Due to the economy, my husband has not worked for 6 months despite numerous resumes and follow up calls. I am in fear of being laid off from my job at Ramsey Medical Center Foundation, where I have worked for 11.5 years. We need our house out to make the mortgage payments and live in an apartment to reduce our expenses. Keeping my daughter in college will result in an educated & motivated young individual. Despite Financial Aid, which we will still have to pay back in 4 years, we are waiting a sophomore on waiting for education. She does not want to go to school but she has to. I do not have the heart to let her go. I am planning to get a 2nd job, if someone will hire me for and will not go down without a fight, but I feel that she deserves to be rewarded for my sacrifice. I pay my bills on time, I do not owe anybody myself and I to play the rules. No one is going to bail me out. Rather the opposite. I am looking for someone who breaks the rules. Please give the business consideration. Sincerely, Teresa Galtierier | The Chloe Deskins College Fund | 1 | 0 to 30 days | \$4,000 |
| Wood | Phase V Sanitary Sewer Improvements | 2000 linear feet of new sanitary sewer lines to remove flow from the existing Gravity Sewer Inceptor to reduce flow to the Colony Rd. pump station. The improvement will reduce sanitary sewer flow to the Colony Rd. pump station. | City of Rossford | 15 | 91 to 180 days | \$700,000 |
| Wood | Enhanced Street Lighting in Downtown Rossford | The proposed Transportation Enhancement project involves upgrading the street lighting in Downtown Rossford along 2900 feet of SR 65. The existing lighting is antiquated and energy inefficient. The city desires to upgrade the lighting to enhance energy efficiency and aesthetically improve the downtown. The project is part of an on going revitalization effort to improve the commercial district creating new employment opportunities. The improved lighting will benefit several modes of transportation as it would improve visibility to motorists as well as pedestrians/bicyclists thereby increasing safety. | City of Rossford | 15 | 91 to 180 days | \$275,000 |
| Wood | SR65 Downtown Rossford Improvements | The project involves resurfacing, providing new raised curbside updating sidewalks and curb ramps to ADA standards, upgrading signs and crosswalks to improve the visibility of pedestrians and bicycles to motorists. The project involves 0.82 miles along SR 65 through the Downtown commercial district of the City of Rossford. The project will enhance the city's efforts to revitalize the commercial district thereby creating an environment conducive to new commercial investment. | City of Rossford | 25 | 91 to 180 days | \$1,650,000 |
| Wood | Vertran's Park/Marina Restroom Facility | This project involves the construction of a multi-use facility which will serve Vertran's Park and the Rossford Marina. The park/marina is located on the Maumee River and is used seasonally for recreation and boating on the Maumee River. The marina can dock 225 boats and is a popular public boat launch ramp. The facility will include public restrooms and Dock Master office. It will net an 1,000 sq. ft. facility. The facility will improve access to the Maumee River for recreational purposes, provide sanitation facility for users. | City of Rossford | 20 | 91 to 180 days | \$300,000 |
| Wood | Rossford Sidewalk Enhancement Project | This project will install or repair 10,000 linear feet of concrete sidewalks throughout the city. Many areas of the city lack sidewalks or the sidewalks in need of reconstruction. The project will provide a safe means of pedestrian travel including safe routes to schools thereby converting travel by auto/bus to safe walk routes. | City of Rossford | 20 | 31 to 90 days | \$300,000 |
| Wood | Main Street Improvements | Replace 19 lighting pole assemblies, remove and replace 4275 SF of sidewalks, remove and replace 2 curb basin, replace 4567 concrete curb, install 26 CY asphalt concrete. This project is an enhancement project for the downtown area of the Village. | Village of Weston | 11 | 91 to 180 days | \$328,140 |
| Wood | Pemberville Road Resurfacing Project | Mill and Resurface 12,500 linear feet of Right of Way adjust from Cash Bases and resurface 160,000 SQFT Business parking area. This project would be a bid Public Works Project. Done in Phases hopefully no later than 2010 starting date would depend upon availability of funds. | Pemberville Village Council | 35 | 181 days or more | \$800,000 |
| Wood | Update Pemberville Police Department Facility | Upgrade of Pemberville Police Department facility. | Pemberville Police Department | 10 | 31 to 90 days | \$55,000 |
| Wood | Pemberville COPS program | Addition of 1/2 officer for COPS duty in primary duty areas. | Pemberville Police Department | 1 | 31 to 90 days | \$84,000 |
| Wood | Pemberville Police Department Communications Upgra | Improve the communications system in the Pemberville Police Department and update our digital data base and our emergency response system. | Pemberville Police Department | 3 | 31 to 90 days | \$28,000 |
| Wood | Fort Meigs Road Improvement-Phase Three | Roadway project improvement of 0.82 miles of Fort Meigs Road from Five Pines Road to High School. The project will mill and reconstruct existing pavement to 24 feet with 2.5 feet wide concrete curbs and gutters, for an overall width of 20 feet from centerline. The new pavement is only 18-17 feet wide. Install sidewalk on east side of road install new drainage facilities to accommodate the new pavement. Upgrade signage and pavement markings. Restore drainage markings. Provide for post-construction water quality. Project will require a 15 foot wide strip of right-of-way from the east side from 20 property owners. | City of Perrysburg | 50 | 181 days or more | \$1,376,000 |
| Wood | Upgrade 138 KV Transmission Infrastructure - North | Upgrade existing 138KV transmission line to a 138KV Transmission line so that there is adequate transmission capacity in the area for economic development. This area has the need for economic development, but does not have the electric infrastructure to support very much commercial development. The addition of extending the 138KV line will open this area up for development, especially since it is an ideal location for development. This area sits between Lima, OH and Toledo, OH directly off of I75 corridor. The jobs will be contractor jobs that will construct this infrastructure. This will be a significant project and will involve equipment, supplies, materials, and contract labor to construct this line. | Hancock Wood Electric Cooperative | 100 | 181 days or more | \$3,000,000 |
| Wood | waterline up dates | Install new waterlines with correct valving, back flow preventers, pressure tanks, etc. in our elementary schools. | Eastwood high school | 4 | 31 to 90 days | \$25,000 |
| Wood | Distribution Automation | Distribution automation (DA) will consist of multiple smart grid applications consisting of functions such as auto-reconfiguring a line after a fault, SCADA operated switching, remote switching of capacitor banks, monitoring of voltage and control of voltage regulators based on more than local conditions. DA can improve reliability and enhance operations of the distribution system. | Hancock Wood Electric Cooperative | 20 | 31 to 90 days | \$400,000 |
| Wood | WOO Capitalized Maintenance ; PID 86084 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through the Ohio Department of Transportation. Installation of a SCADA system that provides emergency response to a rural electric distribution system over a 11 county area. This system will allow the rural cooperative utility to maintain service to its rural consumers in the event that there are problems on the transmission grid. This project will bring about over 20 contract jobs during the installation work. | The Ohio Department of Transportation | 1 | 0 to 30 days | \$12,400 |
| Wood | Substation SCADA Project | This project would help fund the replacement of our 18 year old gymnasium roof. Not only would these funds help offset the high cost of replacing the roof, they would also free up funds from our Parks & Recreation levy to be used towards other building and department improvements, such as new programs, cardio fitness equipment, and strength training equipment. It may also free up funds to be used in other types of major building improvements & renovations, such as expansion of the city's water treatment plant, and other recreational and fitness facilities of the citizens of Rossford & surrounding communities. | Hancock Wood Electric Cooperative | 20 | 0 to 30 days | \$300,000 |
| Wood | Rossford Rec Center gym roof project | This project would help fund the replacement of our 18 year old gymnasium roof. Not only would these funds help offset the high cost of replacing the roof, they would also free up funds from our Parks & Recreation levy to be used towards other building and department improvements, such as new programs, cardio fitness equipment, and strength training equipment. It may also free up funds to be used in other types of major building improvements & renovations, such as expansion of the city's water treatment plant, and other recreational and fitness facilities of the citizens of Rossford & surrounding communities. | Rossford Community Recreation Center | 8 | 91 to 180 days | \$40,000 |
| Wood | Construct 34.5KV Transmission Line - Economic Deve | Construct 5 miles of 34.5KV Transmission Line that will open up an area in Henry Township for Economic Development. The current area has no transmission lines in the local area, which makes it very difficult to serve non-commercial loads. CSD is installing the largest intermodal system in the US in this area and will require a stronger transmission source to be able to operate at this location. The addition of this transmission line will help the area up for additional manufacturing in the local area. | Hancock Wood Electric Cooperative | 120 | 181 days or more | \$1,500,000 |
| Wood | Colony Ct. Waterline Replacement | The project will replace approximately 1,600 feet of 2" waterline with 8 inch lines and install 4 new fire hydrants. The current line is substandard and does not provide sufficient water service for fire protection. Installation of the new water line will enhance the safety of the residents serviced by the line. | City of Rossford | 20 | 91 to 180 days | \$180,000 |
| Wood | Pemberville Flood Control Project | Flood Wall Construction 400 LFT River Waterwall Distribution Channel 5,280 Ft USGS Flood Study Potential Emergency Preparedness Equipment Various Storm Water Infrastructure Improvements | Pemberville Village Council | 200 | 181 days or more | \$250,000 |
| Wood | Sanitary sewer | Rehabilitate deteriorating sanitary sewer structures throughout the Village, including cleaning, painting, and epoxy coating the interior of 170 structures. | Village of Portage | 21 | 0 to 30 days | \$21,700 |
| Wood | Greensburg Storm Drain | Excavate and install approximately 650 feet of 6 inch perforated pipe, 670 feet of 6 inch SDR 35 sewer pipe, and 2000 feet of 8 inch perforated tile, and 5 catch basins, to alleviate serious chronic flooding of properties and roadway. | Village of Portage | 21 | 0 to 30 days | \$23,900 |
| Wood | Storm drains | Replace deteriorated storm structures throughout the Village including 9 manholes, 30 catch basins, and 9' brick concrete aprons. | Village of Portage | 21 | 0 to 30 days | \$161,500 |
| Wood | Utility Wireless Communication Project | Install 6 communication towers (180 feet height) to install communication connectivity into 13,000 rural community homes so that the utility company can provide real time information to consumers for future TDU and energy efficiency programs. This communication connectivity would also provide communications into 24 substations for SCADA applications to improve reliability to rural consumers. | Hancock Wood Electric Cooperative | 12 | 91 to 180 days | \$400,000 |
| Wood | Construct 34.5KV Transmission Tie Line | Construct 1 mile of 34.5KV transmission tie line with SCADA technology applied for automatic transfer between two transmission sources. This will improve reliability to two large commercial accounts as well as 727 rural electric consumers. The tie would provide a significant number of rural consumers as well as opening up more rural area for development with a more robust transmission loop system. | Hancock Wood Electric Cooperative | 10 | 91 to 180 days | \$250,000 |
| Wood | Luckey, Ohio - Adams Street and Gilbert Road Impro | The project involves the pavement repair and resurfacing of approximately 1,330 linear feet of Adams Street between Gilbert Road and Kenner Avenue and the widening, pavement repair, and resurfacing of approximately 2,350 feet of Gilbert Road between Adams Street and Lemoyne Road in Luckey, Ohio. | Feller, Finch & Associates, Inc. | 4 | 31 to 90 days | \$149,500 |
| Wood | SR 65 & Lime City Rd. Intersection Improvements | Project involves improving the intersection of SR 65 & Lime City Rd./Colony Rd. in the City of Rossford. This intersection has a frequency of crashes that exceed state safety criteria for a three year period and is thus considered a high crash location. The project will involve installing a new traffic signal with countdown pedestrian signals and paratransits, improving sidewalks and curb ramps to ADA standards, incorporating tie ditches where feasible, resurfacing, minor resurfacing for repairs, turning radii improvements, new signage, and new signage. SR 65 is an Urban Major Arterial and Lime City an Urban Collector. | City of Rossford | 15 | 181 days or more | \$450,900 |
| Wood | Agricultural Container Shipping Export Facility | Ohio enjoys a unique combination of production of soybeans, corn and wheat, along with superior logistics advantages. The goal of this new project would be to capitalize on those strengths, and exploit growing demand from international markets, particularly Asia and Europe. This facility would focus on exporting agricultural products in shipping containers, resulting in a premium price for the Ohio producer. The facility would also likely provide and commodity products. It would allow for grain to be brought in by truck or train to the facility, and then intermodalized into shipping containers for export. This facility would be located in Northwood Ohio, the center of Ohio agricultural production, and would take advantage of the National Gateway Project railroad upgrades by CSX, and a new intermodal facility being built by CSX in North Baltimore. It would complement existing facilities in Central and Southern Ohio that are taking advantage of the Heartland Corridor Project railroad upgrades by Norfolk Southern, and the new Rockcastle Intermodal Terminal, to make Ohio a center for container exports of ag products. A private investor will need to be identified. | Ohio Soybean Council | 100 | 181 days or more | \$5,000,000 |
| Wood | parking lot construction | replace stone drives and parking with concrete and asphalt as well as making the parking lot compliant. install concrete parking barriers, and stripe parking lot. install speed bumps in parking lot. said parking lot is village park and is the main parking area for youth baseball | north baltimore village | 10 | 31 to 90 days | \$150,000 |
| Wood | downtown revitalization | rehabilitation of downtown, involving replacement of utilities, sidewalks, lighting area ads requirements | north baltimore village | 30 | 91 to 180 days | \$500,000 |
| Wood | new hire police | hire 2 new police officers to help control local traffic and abuse in conjunction with county sheriff dept. | north baltimore village | 2 | 0 to 30 days | \$50,000 |
| Wood | fire truck/ambulance replacement | replacement of aging fleet, 1 new fire truck, 1 new ambulance. | north baltimore village | 10 | 31 to 90 days | \$450,000 |
| Wood | new fire/ems station | construction of a new fire/ems station for the south side of oak tracks in order to cover southern wood county due to increased train traffic in conjunction with the cux intermodal facility, current fire/ems station on north side of tracks, and unable to respond to emergencies when tracks are blocked. | north baltimore village | 25 | 91 to 180 days | \$750,000 |
| Wood | water line extension | placement and upizing of water line to feed the cux intermodal railyard being constructed in north baltimore/henry twp. | north baltimore village | 12 | 31 to 90 days | \$750,000 |
| Wood | Re-Tool for Corn Cob Alternative Production | To retrofit an existing tool and die shop, that is on the verge of closing due to the economy, to a facility that produces corn cob pellets for heating and corn cob chips for livestock bedding. This would transform a disposable waste material (corn cobs) into products that would produce a renewable energy source (corn cob pellets) and a use the economy friendly livestock bedding product (corn cob chips) instead of a existing facility would be use the corn cob pellets for heat. The business would also use vehicles utilizing alternative fuel products such as bio-diesel for delivery of its product. This results in 1 job and create job up to 9 new jobs, improving the economic base of an extremely economically depressed area, with unemployment rates in the double figures. | D. Jones Tool & Die, Inc. | 10 | 0 to 30 days | \$175,000 |
| Wood | In-Dash Mobile Camera | We are looking to put a camera in our police cruiser. Our goal is to provide visual and/or audio evidence to support police actions. | Luckey Police Department | 0 | 91 to 180 days | \$4,000 |
| Wood | Communications Update Program | A radio repeater needs to be installed in our police cruiser so our portable radios can be re-transmitted to our Sheriff's Office Dispatch. Currently, our portable radios will not reach the Sheriff's Office leaving all our officers at risk when out on an emergency call. | Luckey Police Department | 0 | 31 to 90 days | \$3,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Wood | American Railcar Repair Facility | Construct a rail repair facility at American Rail Logistics Center, Walbridge, Ohio. Project requires 8900 ft track and 4 turnouts, designed in 3 track layout. Connecting rail infrastructure is already in place connecting to the logistic center at CSC, Stranley yard. Very efficient rail operations. Requiring highway infrastructure. 1.75 x 1.5 x 80 ft. 30 miles from terminal converted to 4 lane state route 760. no grants needed. Facility to operate 2 shifts, using 51 worker members. 2 truck drivers, 2 railcoaches, perday, will repair 1 unit train, 135 cars per week, scheduled for 51 trains per year. The industry blends into the railroad environment and industrial zoned ground mass. A weather protection shop will be constructed and utilized for repairs, car passing this building system. | American Rail Center | 55 | 0 to 30 days | \$1,730,000 |
| Wood | Business Start Up | Progressive Power is a newly formed solar and wind installation company serving all of Northwest Ohio. The money requested would help with the start up cost and first three months of growth. | Progressive Power | 10 | 0 to 30 days | \$50,000 |
| Wood | JRS (Jobs Ready Site) Eastwood Commerce Center & I | Constructs water system infrastructure (16" watermain, cleanwell, booster pump station, and elevated water tank) supporting OODD \$2.6 million (Lake Road) Site. JRS is to develop the remaining 1,000 acres available in area for large manufacturing facilities. The site is already served from gas line, electrical peaking/substation facilities, and is accessible to major transportation facilities including I-80 corridor, rail, and regional airport (Mansfield Field). | Northwestern Water & Sewer District (ORC 6119) | 1050 | 31 to 90 days | \$950,000 |
| Wood | Water System Master Meter & Clear Well for WL #100 | Constructs required 3M3 "clear well" providing water system improvements, operation, and operational enhancements with a master meter for regional water distribution system. | Northwestern Water and Sewer District | 36 | 181 days or more | \$400,000 |
| Wood | Wood County/Ottawa County Regional Water System | Constructs water trunk line from Ottawa County to Wood County providing a regional water distribution system. | Northwestern Water and Sewer District | 320 | 181 days or more | \$3,000,000 |
| Wood | Glasstech EPB-I Demonstration System | Manufacture and install a Glasstech EPB-I Demonstration System at Glasstech's facility in Perryburg Ohio. | Glasstech, Inc. | 33 | 0 to 30 days | \$1,650,000 |
| Wood | Dunbridge Area Water Distribution Main | Constructs water distribution main to the unincorporated Village of Dunbridge. Additionally, provides needed water for local manufacturers (Bako industries) industrial processes and fire protection requirements. | Northwestern Water and Sewer District | 60 | 181 days or more | \$600,000 |
| Wood | Custar/Milton Center Water Distribution System | Constructs municipal regional water distribution system for two villages including storage and treatment facilities. | Northwestern Water and Sewer District | 140 | 181 days or more | \$1,000,000 |
| Wood | Weston Area Regional Elevated Water Tank | Replaces undersized and poor condition elevated water tank (built in the 1920's). New tank's additional height and volume will increase pressure and capacity to serve regional water service area. Will improve the flow capability for local fire departments. | Northwestern Water and Sewer District | 44 | 31 to 90 days | \$550,000 |
| Wood | Walbridge Road Water Transmission Main Extension | Extends water transmission main to partially developed industrial area near the Village of Walbridge. It will provide high demand water flows for industrial processes and fire protection. | Northwestern Water and Sewer District | 25 | 181 days or more | \$200,000 |
| Wood | Glasstech CRB-5 Demonstration System | Manufacture and install a Glasstech CRB-5 Demonstration System at Glasstech's facility in Perryburg Ohio. | Glasstech, Inc. | 33 | 0 to 30 days | \$2,925,000 |
| Wood | Risingsun/Lakota Schools Water Transmission Main | Constructs water transmission main to serve the Village of Risingsun and the Lakota School System that is searching for alternate high quality water source for their campus and fire protection. | Northwestern Water and Sewer District | 106 | 181 days or more | \$1,200,000 |
| Wood | Weston WWTP Upgrade | Existing WWTP built in the 1960's has not had a major rehabilitation nor has been updated to meet current treatment demands. WWTP will be updated to meet current treatment demands. WWTP will be upgraded and rehabilitated to meet current design standards. | Northwestern Water and Sewer District | 60 | 181 days or more | \$600,000 |
| Wood | Sugar Ridge/Dunbridge Sanitary Sewer System | Constructs sanitary sewer collection system in CEPA identified Critical Home Sewage Disposal Area (CHSDA) serving two unincorporated communities. | Northwestern Water and Sewer District | 220 | 181 days or more | \$2,000,000 |
| Wood | Stony Ridge/Lemoyne Sanitary Sewer System | Constructs sanitary sewers in two unsewered, unincorporated communities under orders by CEPA since 1992. Project has been delayed by affordability constraints in this low/middle income area. Scope includes gravity flow mains, two pressure grinder pumps, and lift station as well as along transportation corridor I-80 and road and rip-up area for economic development. | Northwestern Water and Sewer District | 208 | 31 to 90 days | \$2,000,000 |
| Wood | JRS (Jobs Ready Site) Eastwood Commerce Center | Constructs sanitary sewer infrastructure (collection and pumping facilities) supporting OODD \$2.6 million (Lake Road) Site. JRS is to develop the remaining 1,000 acres available in area for large manufacturing facilities. Site is already served by gas, electrical peaking/substation facilities, and is accessible to major transportation facilities including I-80 corridor, rail and regional airport (Mansfield Field). Replaces existing critical WWTP and provides increased capacity to serve regional sanitary sewer collection area. Bids for the WWTP is subjected to harsh conditions, has a history of regular flooding due to proximity to the Musumma River (100 ft high) and is excluded to unsuitable. The replacement WWTP has been purchased and is located away from the river and across the approach. CEPA approved, construction contract advertised February 10, 2009 and bid opening is scheduled for March 10, 2009. THIS PROJECT IS READY FOR FUNDING NOW! | Northwestern Water and Sewer District | 1050 | 31 to 90 days | \$550,000 |
| Wood | Williamsburg/Osago Regional WWTP Replacement | Constructs sanitary sewer system in this unsewered community and surrounding unincorporated areas. Scope includes 1 mile of gravity collection line, 4 miles of force main and lift station. CEPA identified Critical submitted proposed orders to Congress in January 2009 with local orders adopted and 2009. Area is low/middle income, therefore, presents affordability constraints. Project will be served by an existing regional WWTP with available capacity. Design is complete, therefore, construction could be accelerated if funding and CEPA orders were available now. | Northwestern Water and Sewer District | 56 | 0 to 30 days | \$1,150,000 |
| Wood | West Millgrove Sanitary Sewer System | Rehabilitates failed trunk sanitary sewer (Phase 2) serving prime industrial/commercial area (Phase 1 completed in 2008). Reduces risk of catastrophic sanitary sewer collapse (system condition has been well documented and evaluated by engineering survey report). Mitigates effluent & inflow (E & I) into the sanitary sewer system main to reduce WWTP loading costs. | Northwestern Water and Sewer District | 92 | 181 days or more | \$1,200,000 |
| Wood | Tracy Road Trunk Sanitary Sewer Rehabilitation Pha | We are a mental health agency providing services to children from birth to 18. Our current facility was created through a cooperative grant from the State of Ohio and Ohio. Funds in 1978. First, we would use stimulus money to convert our paper records to electronic "digital" records and to acquire the infrastructure to use electronic records in the future. This is proven to be more efficient and focuses on better client care. The second component of stimulus money would be used to acquire and install digital radio transmission from our main facility to all of our transportation vans. We have 8 vans that are used to transport our clients from their homes or schools and to our agency for services. Maintaining paper and secure communication is vital to the safety of our clients and staff. Finally, we would use infrastructure money to renovate our 175 therapy rooms to accommodate today's treatment. Our building has over 30 year old carpet and over 1000 sq ft each year. Rooms need to be wired for better technology, phones, etc. to meet current best practice methods. We believe these changes will provide better mental health care to our county. | Northwestern Water and Sewer District | 46 | 91 to 180 days | \$1,150,000 |
| Wood | Children's Resource Center | Rehabilitates failed sanitary sewer collection system removing stormwater inflow required by CEPA. Provides "anti-dig credits" for future commercial, industrial and residential development. Minimizes stormwater demand on regional WWTP reducing operational costs. Lowers contamination risk to the environment due to bypass pumping. | Wood County Children's Services association | 100 | 31 to 90 days | \$500,000 |
| Wood | Sanitary Sewer Infiltration & Inflow Elimination | Constructs 4 miles of sanitary sewer collection system and pumping infrastructure from regional solid waste landfill facility to regional WWTP. Project will eliminate high leachate trucking costs and extend sanitary service to unsewered unincorporated area. | Northwestern Water and Sewer District | 48 | 91 to 180 days | \$500,000 |
| Wood | Wood County Landfill Leachate Sanitary Sewer | Rehabilitates/grades one failing critical lift station. Eliminates a second lift station via new gravity sanitary sewer minimizing potential for sanitary sewer bypasses to waterway. Additionally provides sanitary service to unsewered area. Ready to bid now if funding were provided. Provides sanitary service for county department of health ordered areas to serve residential properties. Project could be split into two parts. Thompson Road area is ready to bid now. | Northwestern Water and Sewer District | 56 | 91 to 180 days | \$600,000 |
| Wood | Latcha Road Lift Station Rehab & Wise Street Lift | The equipment needed to clear up the gas has already been determined. Any Ohio is committed to purchase all electricity produced. Either microturbines or starting engine technology will be used to power the generator. This is an innovative project to produce electricity from a small landfill and has the ability to be replicated at other small to medium sized facilities. It will eliminate significant greenhouse gas emissions while producing renewable power. It is an excellent demonstration project as it is at the same location as the four commercial wind turbines and will be able to utilize the same electrical distribution lines. Without this project methane gas will continue to be vented rather than being used productively. | Northwestern Water and Sewer District | 56 | 0 to 30 days | \$1,105,000 |
| Wood | Thompson and Truman Roads Sanitary Sewer System | Rehabilitates/grades one failing critical lift station. Eliminates a second lift station via new gravity sanitary sewer minimizing potential for sanitary sewer bypasses to waterway. Additionally provides sanitary service to unsewered area. Ready to bid now if funding were provided. Provides sanitary service for county department of health ordered areas to serve residential properties. Project could be split into two parts. Thompson Road area is ready to bid now. | Northwestern Water and Sewer District | 48 | 181 days or more | \$500,000 |
| Wood | Landfill gas electrical generation project | Construction of a sewer force main from the Wood County landfill to connect with the Bowling Green wastewater system to enable efficient environmentally responsible transfer of landfill leachate to be treated at a publicly operated wastewater treatment plant. Leachate transfer is currently being done by tanker truck. It is an expensive procedure. Treatment will be required for as long as the landfill operates (projected at 75 years) 30 years. Installing this forceman will save at least \$300,000 per year for the next 50 years while providing jobs immediately. It will eliminate thousands of truck trips, fuel usage and potential spills. The force main provides an environmentally superior long term solution to the required treatment of leachate generated by operation of the publicly owned facility. Initial studies and cost estimates are complete. The route is currently being surveyed. This project can begin this spring and be completed in the current construction year. | Wood County | 5 | 0 to 30 days | \$1,000,000 |
| Wood | Landfill leachate force main | See almost 40% growth from the first year to the second, and are seeing another 30% of growth over this last year. The business grew 15% faster than retail projections had predicted. The small, woman-owned business has created new job over the past year, and is opening another position this spring. We are currently turning away \$1,500+ per week due to lack of facility space. | Wood County | 10 | 31 to 90 days | \$1,000,000 |
| Wood | Green Pet Care Facility Complex | We have found nine acres of usable, unowned land in the area for a one-stop pet care facility complex - all your pet care needs in one place. The project would include a new daycare bldg., pet hotel, grooming salon, holistic food store, dog park, and a small vet clinic. All buildings would be built utilizing renewable energy systems, including solar electricity, solar thermal, and geothermal systems. We believe that an initial investment in renewable energy systems will save enough money to create more jobs in the long run. The back two acres would be used for a utility sized solar array, which could produce enough power to run the entire complex. | Poco's Playhouse | 10 | 31 to 90 days | \$1,000,000 |
| Wood | Power Field | Proposed Solar Field in Perryburg Township, Wood County. This project will employ many local tradesmen it will also create 6-10 full time jobs. The proposed project will be a waste investment for utilities or local/state governments providing a ROI in ten to fifteen years. | Progressive Power | 30 | 0 to 30 days | \$5,000,000 |
| Wood | PEMBERVILLE HYDRANT AND VALVE REPLACEMENT | REPLACEMENT OF 75 HYDRANTS AND 200 VALVES THROUGHOUT THE VILLAGE. THIS PROJECT WILL INCREASE THE WATER FLOW CAPACITY AND PROVIDE SAFETY FOR THE AREA FIRE DEPARTMENT. | VILLAGE OF PEMBERVILLE | 15 | 0 to 30 days | \$610,000 |
| Wood | PEMBERVILLE SOUTH WATER LOOP | INSTALL A LOOP OF WATER LINE AND CONNECT TO MAKE LOOP FOR WATER SYSTEM. THIS WILL ALLOW MULTIPLE FEEDS FROM PLANTS TO VILLAGE LINES. | VILLAGE OF PEMBERVILLE | 15 | 91 to 180 days | \$500,000 |
| Wood | PEMBERVILLE WATER TOWERS | CONSTRUCTION OF TWO WATER TOWERS AND DEMOLITION OF CURRENT TOWER. CURRENT TOWER WAS BUILT IN 1935 AND WILL NEED TO BE REPLACED WITHIN THE NEXT 10 YEARS. | VILLAGE OF PEMBERVILLE | 15 | 91 to 180 days | \$1,200,000 |
| Wood | WEST FRONT STREET WATER & SEWER LINE EXT | EXTEND THE WATER AND SEWER LINE OUT WEST FRONT TO PROVIDE TO AREA BUSINESSES AND PROMOTE GROWTH AT THE WEST END OF TOWN. | VILLAGE OF PEMBERVILLE | 20 | 181 days or more | \$250,000 |
| Wood | PEMBERVILLE POOL BATHHOUSE | NEW BATHHOUSE FOR THE COMMUNITY POOL INCLUDING NEW RESTROOMS, SHOWERS, AND GUARD ROOM. | VILLAGE OF PEMBERVILLE | 25 | 91 to 180 days | \$200,000 |
| Wood | Computers | This project is an extension of the grant we received for 3 computers for use in our patrol cars. The main function of additional monies would allow us to place 2 more additional computers to each vehicle which would be outfitted with a computer. This would provide longevity of all the computers in the vehicles thus increasing officer safety while out on patrol. | Rosford Police Department | 0 | 0 to 30 days | \$10,000 |
| Wood | Officer Safety | These funds would be used to purchase safety equipment, such as electronic defibrillators, tasers, and gas locator devices for each vehicle for our patrol officers. Our officers receive many EMS calls to assist with our Fire Department and often the fire on scene. The use of these defibrillators would be beneficial to both the individual in need and the officer who will have the equipment to help. Tasers would assist in our officers safety. Because we only have officers working in our city, many times our officers find themselves on calls by themselves with back up on the way however geographically it may be a few minutes before they arrive. Having a taser available would assist in the comfort level of the officer knowing someone's backing up to them with a taser attached. They may be able to protect themselves as well as the comfort level of the user. GPS devices will be placed in each vehicle so that dispatch will always know where the officers are which will increase officer safety tremendously. GPS will also help in identifying which officer is closest to the call for service which will cut down our response time to the scene in need. | Rosford Police Department | 0 | 0 to 30 days | \$20,000 |
| Wood | PEMBERVILLE CB & STORM LINE REPLACEMENT | REPLACEMENT OF 19 CATCH BASIN AND STORM LINE TO ASSIST STORM WATER DRAINAGE A FLOODING ISSUE | VILLAGE OF PEMBERVILLE | 12 | 31 to 90 days | \$310,000 |
| Wood | Vehicle Replacement | This project will help us purchase 4 new vehicles for the use of our patrol officers. At this time our officers have over 180,000 miles on them and repairs are exceeding my budget. New vehicles would give the officers in a safer environment while on a patrol and provide for relief of budget constraints within our city government. We currently have a 5 year replacement plan for vehicles however due to the decline in funds, our 5 year plan has been placed on hold. Also in conjunction with the hiring of new officers, the need for more vehicles would be critical to the deployment of such. | Rosford Police Department | 3 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Wood | Proposed Addition to & Renovation of the Wood Courthouse | The current Wood County Jail which opened in 1989 has a capacity of 149 inmates. The average daily census in 2008 was 159 inmates. In order to maintain the current Jail Certification through the Bureau of Adult Detention, Wood County pays to house inmates in neighboring counties, and has done so for at least each of the last 5 years. This project will renovate much of the existing jail including booking and support areas. The project will also renovate the existing maximum housing area, add a new 128 bed housing unit (16 maximum & 112 medium housing), and renovate/expand the minimum security unit. The total cost is estimated at \$19,998,240. We are requesting \$10,000,000 through the stimulus program, and will likely use local funds to pay for the remainder. | Wood County Commissioners' Office | 50 | 91 to 180 days | \$10,000,000 |
| Wood | JERRYS AUTOMOTIVE AND TOWING | EXPANSION OF AUTOMOTIVE REPAIR AND TOWING BUSINESS, DOUBLE EMPLOYEES YEAR ROUND TO TEN. | DR. AUTO CARE LLC. | 10 | 0 to 30 days | \$260,000 |
| Wood | Widen I-75 to 6 lanes from Findlay to Perrysburg | Widening I-75 will help alleviate current congestion and prepare the area for the \$50 million intermodal rail terminal to be constructed by CSX Transportation near North Baltimore, Ohio, beginning in the spring of 2009. While the CSX terminal is expected to produce 100 jobs, the potential for job growth associated with this facility is estimated at 2,000 to 3,000 jobs from warehousing, distribution companies that will likely build nearby. The North Baltimore project is part of the \$700 million CSX National Gateway plan that will vastly improve railroads in the midwest. Our marketing study, funded by the Regional Growth Partnership, has shown that the small drinking water reservoirs that they cannot afford our yearly service, for which we charge \$10,000/year. We propose monitoring 15 Ohio small drinking reservoirs for just \$100,000, giving a return of \$100,000 from a project that would normally cost \$180,000. This would greatly improve drinking water in the state and give a new, high-tech Ohio company an opportunity to build its client list in its home state, which will help us sell more out of state (all over the world). This is a new service, protected by a \$800K patent. | Wood County Commissioners' Office | 500 | 181 days or more | \$101,000,000 |
| Wood | Brentwood Park Drainage Improvements | Install a storm pump station and approximately 300 feet of 18" stormmain at the new detention pond at Brentwood Park. This pump station will replace the existing temporary gasline pump located at the pond. | City of Northwood | 3 | 31 to 90 days | \$98,000 |
| Wood | Satellite monitoring for one year of 15 small publi | Blue Water Satellite, Inc. is a new company in Bowling Green, OH that has a patent for monitoring cyanobacteria (blue-green algae or harmful algal blooms) in drinking water reservoirs from LANDSAT 5 satellite data. BOCEI owns the patent for the algorithm for such monitoring and has the invention. We propose to monitor 15 small (less than 50,000 customers) drinking water reservoirs in Ohio for one year, every 16 days (about permitting) for early cyanobacteria blooms that can be eliminated with a judicious amount of chemicals while the blooms are small. Our marketing study, funded by the Regional Growth Partnership, has shown that the small drinking water reservoirs that they cannot afford our yearly service, for which we charge \$10,000/year. We propose monitoring 15 Ohio small drinking reservoirs for just \$100,000, giving a return of \$100,000 from a project that would normally cost \$180,000. This would greatly improve drinking water in the state and give a new, high-tech Ohio company an opportunity to build its client list in its home state, which will help us sell more out of state (all over the world). This is a new service, protected by a \$800K patent. | Blue Water Satellite, Inc. | 3 | 0 to 30 days | \$150,000 |
| Wood | Reclamation of Landfill Area | Reclamation of approximately 15-17 acres of land formerly utilized as a local landfill for construction demolition materials. Reclaimed space placed for campus expansion. | Bowling Green State University | 20 | 181 days or more | \$75,000,000 |
| Wood | Renovation of Administrative Office Swing Space | Project provides renovation of space adjacent to be utilized as administrative offices enabling currently occupied space in the core of campus to be redirected back to academic purposes. | Bowling Green State University | 3 | 0 to 30 days | \$550,000 |
| Wood | Institute for Alternative Energy Research | FF & Equipment - companion project request to the related facility requested for the Institute for Alternative Energy Research. Project-specific laboratory equipment, fume hoods, specialized interior finishes, auto-claves, and related laboratory furniture required as part of the research being conducted. | Bowling Green State University | 20 | 181 days or more | \$35,000,000 |
| Wood | Personal Security for Wood County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and vehicles employing hundreds of people in high paying jobs. With crime rates and out of control on the increase a solution is needed to protect the interest in the hands of individuals. Realtime tracking is required to protect our costs and protect valuable assets while the vehicle is in motion. We require immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, require operations. Realtime tracking is required for public, campus security and safety of the groups that benefit from our device. With our GPS tracking, we can track the location of the vehicle, mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can be used to set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information. Multiple choice phone numbers with built in microphone and speaker for communication. Asset tracking solutions are small, portable, and easy to use. Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served areas in Ohio while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing services to un-served areas in Ohio to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be financially unfeasible due to the high cost of deployment. Despite all the funds available to the providers of cable and sat, the underserved areas exist today. Now the time has come to do something different. Rural America needs access today not the failed promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fully the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective Wireless technology available. | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$282,660 |
| Wood | Wireless Broadband for Wood County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and vehicles employing hundreds of people in high paying jobs. With crime rates and out of control on the increase a solution is needed to protect the interest in the hands of individuals. Realtime tracking is required to protect our costs and protect valuable assets while the vehicle is in motion. We require immediate action to report suspicious activity. The current administration should fully the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective Wireless technology available. | NexGenAccess | 19 | 0 to 30 days | \$1,900,000 |
| Wood | Luckey, Ohio - Village Lane Improvements | The Village of Luckey, Ohio is faced with the need to provide public roadways to several existing homes in the Quarry Lane area. Currently there is no dedicated right-of-way provide access to the homes on Quarry Lane, and the existing private drives are not up to Village standards for public streets. The existing drives are gravel and unpaved in most areas and do not adequately support heavy service vehicles such as school buses and garbage trucks. The existing drives are only wide enough for one vehicle to pass. The proposed project will acquire the necessary right-of-way provide dedicated roads and will widen and install new pavement to provide access to the area and will include necessary drainage improvements. The project includes over 200 cubic yards of asphalt, over 600 cubic yards of granite, curb, and, and our 1,000 feet of storm drainage pipe. | Feller, Finch & Associates, Inc. | 7 | 91 to 180 days | \$225,000 |
| Wood | boiler installation | Asbestos abatement and removal of 2 - 50 year old boilers and install 2 new energy efficient boilers to heat Eastwood High School | Eastwood high school | 2 | 91 to 180 days | \$250,000 |
| Wood | replace carpet and ceiling tile at middle school | replace 30,000 square feet of worn carpet and falling ceiling tile in Eastwood Middle School | Eastwood high school | 2 | 31 to 90 days | \$20,000 |
| Wood | soccer facility | add irrigation, lights, bleachers, concession building, scoreboard with clock, irrigation to a practice, and security fencing to an existing soccer field with volunteer labor. These funds assist with the purchase, installation, and security of the facility and girls soccer teams. | Eastwood high school | 2 | 0 to 30 days | \$150,000 |
| Wood | PEMBERVILLE WASTEWATER TREATMENT PLANT | NEW WASTEWATER TREATMENT PLANT AND PUMP STATION TO ADD TO THE EXISTING PLANT OF AN ONGOING ISS PROBLEM THIS PROJECT WILL ALSO ALLOW COLLABORATION WITH NWISD TO PROVIDE SEWER SERVICE TO THE SURROUNDING AREA. | VILLAGE OF PEMBERVILLE | 100 | 31 to 90 days | \$2,500,000 |
| Wood | Sanitary Sewer Separation Phase I | Reduction in flow to one CSO and elimination of another CSO by separation of the combined sewer system within the corporate limits of the Village to comply with its NPDES Permit requiring total separation. Project involves the installation of approximately 53,800 linear feet of various size sanitary sewer, manholes and riser manholes. THIS IS A REQUIREMENT. | Village of North Baltimore | 20 | 91 to 180 days | \$2,000,000 |
| Wood | The Learning Academy | I am proposing the opening of a new preschool that reinvents the idea of Pre-K education. With a focus on creative learning and a concentration on developing a renewed interest in reading, writing, and math in our youngsters, I will provide a space where children can grow, learn, and have wonderful fun doing so. This project would create area job opportunities and also provide children for a growing and thriving community. I would like to partner with a local university where students could observe and receive the "real life" experience they need before starting careers in education. Please consider funding this project and making my dream come true. | Maumee Valley Planning Organization | 15 | 0 to 30 days | \$200,000 |
| Wood | Electronic Health Record System | Behavioral Connections is a comprehensive behavioral health care agency providing treatment for mental health and substance abuse for residents of Wood County, Ohio. | Behavioral Connections of Wood County, Inc. | 180 | 91 to 180 days | \$250,000 |
| Wood | Agricultural Methane Recapture and Ethanol Product | Services we provide: The To develop an equine stable that provides a system for recapture of methane from the horse manure which will be used as a heat source at the facility and surrounding homes. The methane will also be used to fire a small scale feed production area, burning the sugar rich horse manure and turning it into ethanol to run the equipment at the facility and also produce excess for sale. The captured manure will then be packaged for use as an organic fertilizer. The system will be totally energy autonomous. To develop a program for at-risk youth to develop a work ethic and prevent juvenile crime. The program will provide counseling and mentoring to juveniles at risk of committing crimes or already involved in the juvenile court system. The program would develop a work ethic and also improve the youth's social skills through interaction with the horses and other individuals. The program would include the youth's family as needed. The program would provide transportation to the facility as needed. (Program is in conjunction with therapeutic riding stable plan submitted in a separate proposal). | Harambee Stables and Rescue | 15 | 0 to 30 days | \$200,000 |
| Wood | Equine Therapeutic Riding Stable | To develop a program for at-risk youth to develop a work ethic and prevent juvenile crime. The program will provide counseling and mentoring to juveniles at risk of committing crimes or already involved in the juvenile court system. The program would develop a work ethic and also improve the youth's social skills through interaction with the horses and other individuals. The program would include the youth's family as needed. The program would provide transportation to the facility as needed. (Program is in conjunction with therapeutic riding stable plan submitted in a separate proposal). | Harambee Stables and Rescue | 5 | 0 to 30 days | \$75,000 |
| Wood | Equine Therapeutic Riding Stable | To develop a therapeutic equine stable to assist needy persons including people with special needs to develop physical and mental abilities to improve their quality of life and their ability to obtain gainful employment. The program would provide equine therapy to augment traditionally physical therapy and also encompass vocational and therapeutic counseling as needed. Additionally, develop a program for at-risk youth to develop a work ethic and prevent juvenile crime (submitted in separate proposal). | Harambee Stables and Rescue | 10 | 0 to 30 days | \$225,000 |
| Wood | Internet Connection Build Out | Currently Eastwood Schools is utilizing two T1 connections for internet access at it's High School and Middle School. We have been notified by our ITC (NDECA) that under an agreement with Time Warner Cable, we could upgrade our existing network to a 10mb fiber connection. The monthly price for the 10mb connection would be equal to the price of our current 2 T1 connection, \$800 per month. However, Time Warner has informed us that fiber is not currently available at our location, and the price to build out the cable to our district would roughly be \$100,000. We daily miss out the connection of our T1 lines. We feel that our district would greatly benefit from a fiber network connection. We could then host our own email and website, and open up many opportunities for our students to learn and excel in their school setting. Thank you for the opportunity to apply for funding. | Eastwood Local Schools | 0 | 0 to 30 days | \$100,000 |
| Wood | The Learning Academy | I am proposing the opening of a new preschool that reinvents the idea of Pre-K education. With a focus on creative learning and a concentration on developing a renewed interest in reading, writing, and math in our youngsters, I will provide a space where children can grow, learn, and have wonderful fun doing so. This project would create area job opportunities and also provide children for a growing and thriving community. I would like to partner with a local university where students could observe and receive the "real life" experience they need before starting careers in education. Please consider funding this project and making my dream come true. | Maumee Valley Planning Organization | 15 | 0 to 30 days | \$200,000 |
| Wood | Auto service shop | I plan on providing all service from oil changes to engine repair. | Automotive serviv shop | 4 | 31 to 90 days | \$150,000 |
| Wood | Levis Commons Senior | Levis Commons Senior is a 2-Story Elderly project completed 52 units located in the City of Perrysburg. These 2-story duplex units will be made available through a rental program to seniors in need of affordable housing. | The NRP Group LLC | 20 | 91 to 180 days | \$1,000,000 |
| Wood | Resurfacing Tracy Rd. | TRANSPORTATION PROJECT - originally submitted to TMAOCG Jan. 2009 | Wood County Engineer's Office | 40 | 0 to 30 days | \$400,000 |
| Wood | Resurfacing Tracy Rd. | MI 1-10" old asphalt and resurface with 2" of new intermediate course and surface course - approximately 1/2 mile | Wood County Engineer's Office | 40 | 0 to 30 days | \$500,000 |
| Wood | Resurfacing Oregon Rd. | TRANSPORTATION PROJECT - originally submitted to TMAOCG Jan. 2009 | Wood County Engineer's Office | 40 | 0 to 30 days | \$1,300,000 |
| Wood | Resurfacing Roachton Rd. | MI 1-10" old asphalt and resurface with 2" of new intermediate course and surface course - approximately 2-1/2 miles | Wood County Engineer's Office | 25 | 0 to 30 days | \$600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------------|----------------|--------------------|---------------------------|
| Wood | LEAN Institute | Owens Community College, through its Workforce & Community Services (WCS) division will consult with companies to provide a framework for quality, cost and delivery excellence. The services provided will offer a strategy that focuses on variation reduction and control in all facets of business. This will then enable NW Ohio companies to improve their Return on Investment thereby retaining in their company and their employees and retaining jobs. The majority of the funds requested will be used to offset the cost of training/consulting. The LEAN Institute will build on the existing WCS initiatives to create 11 part-time jobs at Owens. It will improve the accuracy of NW Ohio by strengthening companies' return on investment thereby helping to retain over 2,500 employees. | Owens Community College | 2,500 | 31 to 90 days | \$550,000 |
| Wood | Center for Emergency Preparedness (CEP) Training F | A recent state of Ohio mandate requires that all first responders participate in a pre-set number of annual continuing education hours as a condition of their continued employment. Because many individual departments have limited training budgets, this funding will help offset the cost of that required training by providing free or greatly reduced training to individual first responders. Additionally, funds will be used to develop valuable non-credit on-line training opportunities as well as hands-on training at the CEP's state-of-the-art 110,000 sq. ft. facility located on the Owens Community College Toledo-area Campus. Creating these additional training opportunities will add 11 part-time jobs to the CEP. By providing mandatory training to 10,000 first responders statewide the CEP will provide them with a safer work environment, help secure our communities, and help retain 10,000 jobs. | Owens Community College | 10,000 | 31 to 90 days | \$250,000 |
| Wood | Center for Green Energy | The Center will be a comprehensive green training center located within existing facilities at Owens Community College (OCCC) and will focus primarily on geo, wind and solar installation and maintenance training. The majority of the requested funds will go towards providing free or greatly reduced training to companies and to purchase additional "green" materials and equipment to include wind turbines, solar panels, solar water heating systems and geo wells. In addition, the Center will provide energy audits as well as LEED certification for green construction. The Center will create 12 part-time jobs at OCCC and train over 500 individuals across Northwest Ohio to become "residents experts" at their home organization. This will enable companies to gain understanding of green technology and allow them to bid on green projects. Energy audits of local businesses will help them to reduce their energy costs and favorably impact their operating margins. Finally, the equipment purchased for the Center will be fully functional as training aids but will also produce energy back to the grid when not used for training, thus enabling OCCC to become more energy efficient. | Owens Community College | 500 | 31 to 90 days | \$1,000,000 |
| Wood | Art Gallery Promoting Creativity and Awareness in | As the resident of a university community, a lover of creativity and art, and a mother of a 9 year old, I believe promoting learning and the arts are an integral part of building successful and progressive communities. We have an incredible amount of untapped talent in Bowling Green and I believe that opening an art gallery downtown would provide SOGI students an outlet to show their amazing work, see it as a place for the community to gather and enjoy each others company. My hope would be to have a child section as where local aging youth artists could hang their work for display. We could provide coffee and drinks, couches, and an area for people to relax and enjoy viewing in beauty and community. This money would help with costs of purchasing a commercial area and be sufficient start-up funding. To me, as a woman, owning a men business would be a wonderful opportunity and a great learning experience. Thank you for your consideration. | Maumee Valley Planning Organization | 10 | 31 to 90 days | \$200,000 |
| Wood | The Learning Academy | I am proposing the opening of a new preschool that reinvents the idea of Pre-K education. With a focus on creative learning and a concentration on developing a renewed interest in reading, writing, and math in our youngsters, I will provide a space where children can grow, learn, and have wonderful time doing so! This project would create job opportunities in an area with an unemployment rate of 12% and would provide children of all Americans, especially low income, to have an equal opportunity for an exemplary educational experience. I would also like to partner with a local university where students could observe and receive the "real life" experience they need before starting careers in education. Please consider funding this project and making my dream come true. | Maumee Valley Planning Organization | 15 | 31 to 90 days | \$200,000 |
| Wood | Rosford Fire Station South | The Fire Station will be built using renewable energy, a Northwest Ohio, company First Solar Inc, is the local leader in solar panels, and received federal grant money to further production and research in this field of renewable energy. Rosford Fire Department would like to follow and build a fire station using solar, and/or wind power, and use the newest forms of renewable energy. Northwest Ohio, seems to be one of the leading areas in renewable energy, with continuous research ongoing at the University of Toledo, and other local companies receiving federal grant money to make renewable energy work. The City of Rosford Fire Department would like to build this two bay fire station, utilizing all renewable energy we set a benchmark of the way future local or state governments build buildings in the future. | City of Rosford | 40 | 91 to 180 days | \$1,000,000 |
| Wood | The Learning Academy | Good afternoon, I am hoping to open a preschool called The Learning Academy which will be available to ALL children! I would be proud to be a woman and opening a small business in Bowling Green and promote the interests of women and children throughout the area. By providing a positive learning environment, understanding, and a rebirth of the "Three R's". I hope that I would be able to affect the family in a positive fashion! I will accept lower income families and welcome them to an environment that caters to their needs and subsequently keeps prices to a minimum. This would create around 15 jobs for local residents and we would even like to partner with the local University to give students the experience they need before they head out to teach themselves. Please consider funding my project. Opening my own preschool has always been a dream of mine and I hope you can make that come true! To build greenhouses to allow for larger production of fresh vegetables and fruit locally so less food has to be imported into the state, as early in the 1900's 90% of the food consumed in Ohio was produced in Ohio now it is 90% of the food consumed in Ohio is imported into the state. This project is designed to help stop this imbalance and cut down on transportation of food over long distances e.g. from California and Mexico, into Ohio. | Maumee Valley Planning Organization | 15 | 31 to 90 days | \$200,000 |
| Wood | Greenhouse | To build greenhouses to allow for larger production of fresh vegetables and fruit locally so less food has to be imported into the state, as early in the 1900's 90% of the food consumed in Ohio was produced in Ohio now it is 90% of the food consumed in Ohio is imported into the state. This project is designed to help stop this imbalance and cut down on transportation of food over long distances e.g. from California and Mexico, into Ohio. | English Gardener | 1 | 0 to 30 days | \$38,000 |
| Wood | Hancock-Wood K-12 Ethernet Connectivity | Construction of approximately 16 Miles of new fiber line extending primarily throughout rural areas of Wood County and into a small section of northern Hancock County. This fund would be contributed by Independent Fiber Network in a collaborative effort to connect with fiber segments of community based Rural Broadband Network Providers located in Northwest Ohio. This fiber network would provide cost-effective, high capacity Ethernet Transport to rural school districts located along the fiber route, providing them with Ethernet connectivity back to their Information Technology Center. | Independents Fiber Network, LLC | 3 | 91 to 180 days | \$440,000 |
| Wood | Titan Construction Supply, Inc, Clean Fuels Ohio P | This fiber line construction would also bring broadband services to underserved rural areas along the route for economic development opportunities. IFN's collaborative approach leads to local Ohio businesses and local Ohio entrepreneurs. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | Titan Construction Supply, Inc | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | Thermo King of Ohio, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | 1st Express Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | Craig Transportation Co., a Clean Fuels Ohio Partn | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | Bowling Transportation Inc, Clean Fuels Ohio Partn | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 31 to 90 days | \$50,000 |
| Wood | Trainco Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Wood | Pennington Energy Corp., a Clean Fuels Ohio partne | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. In addition, would purchase class 7 diesel hybrid. | Clean Fuels Ohio | 5 | 0 to 30 days | \$54,000 |
| Wood | The Learning Academy | I am proposing the opening of a new preschool that reinvents the idea of Pre-K education. With a focus on creative learning and a concentration on developing a renewed interest in reading, writing, and math in our youngsters, I will provide a space where children can grow, learn, and have wonderful time doing so! This project would create job opportunities in an area with an unemployment rate of 12% and would provide children of all Americans, especially low income, to have an equal opportunity for an exemplary educational experience. I would also like to partner with a local university where students could observe and receive the "real life" experience they need before starting careers in education. Please consider funding this project and making my dream come true. | Maumee Valley Planning Organization | 15 | 31 to 90 days | \$200,000 |
| Wood | Art Gallery to Promote Creative Learning in BG | My proposal is to open an art gallery in Bowling Green that would help support the arts and creativity of the local area, provide local residents, artists, and Bowling Green University art students a place to express themselves and gather together to good their love for art and social capital. As a mother of a 9 year old, I would also love to involve area children, with a focus on lower and middle income, to experience the arts in a healthy environment and give them creative inspiration. We could hypothetically work alongside other local artists, vendors and local artists such as Main Street BG and the Black Swamp Arts Festival, in downtown Bowling Green and promote community involvement and downtown revitalization. This would create jobs in construction and eventual employment at the gallery. It could expand into a meeting area and coffee shop if successful. Please consider funding my dream. Thank you. | Maumee Valley Planning Organization | 15 | 31 to 90 days | \$200,000 |
| Wood | Paintball Park | Expand current paintball park with 2.4 wheelie bridges and 3 foot bridges across the river. Construct more buildings. Construct a serpent mound with dots. Excavate trenches for trench warfare. In addition to recreational purposes, the park can be used for training of National Guard, ROTC, and police and military forces. Install a sound system throughout the park. Construct a shelter house for players. | Riverbottom Assault LLC | 6 | 0 to 30 days | \$200,000 |
| Wood | New Fire Station | This project, once completed will bring in more tax revenues than the current levels as well as income tax revenue from employees. | Village of Wayne | 10 | 91 to 180 days | \$750,000 |
| Wood | New Fire Station | Replacement of existing fire station that no longer meets current training and equipment storage needs. Replacement of existing fire station that no longer meets the current training and equipment storage needs of the Village. The Village provides EMS over a large area of southeast Wood County. | Village of Bradner | 30 | 91 to 180 days | \$2,000,000 |
| Wood | Jobs in Wind Energy | We currently have numerous employees engaging in the sale, installation and maintenance of small wind systems. If awarded funding, a portion would be used for creating several green jobs and training additional wind turbine maintenance and installation staff. We are also seeking funding for the addition of a wind system engineer, capital to expand our business, and funding for additional equipment necessary for the installation of the 2000w wind turbines. We offer numerous turbines currently, but will utilize funds for training and additional equipment needed to install wind energy systems for urban, as well as rural applications. With additional funding, we will be poised to serve as the leading installer of small wind systems in the state of Ohio. Our goals include further segmentation of our company, placing a stronger emphasis on the advancement of wind energy, growing our service area, and adding wind systems suitable for commercial facilities. By utilizing experience from previous wind projects, including the Toledo Zoo and Clay High School, we will choose focused training programs and equipment that will help jobs operate smoothly and with maximum profitability. | Stark's Inc. / Green by Design | 14 | 0 to 30 days | \$1,400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Wood | High School Boiler Replacement, convert heating sy | Removal of (2) existing steam boilers, replace with (2) energy efficient hot water circulation boilers. Convert existing steam plant to hot water circulation. Upgrade pneumatic controls to direct digital controls. Expected outcomes to include a highly efficient heating plant which will greatly reduce energy use in gas and electricity and save the district tens of thousands of dollars annually. | Bowling Green Schools | 40 | 31 to 90 days | \$2,445,000 |
| Wood | Retooling Products for Hybrid Electric Vehicles | Marathon Special Products have completed designing and quoting process to redesign Fuse Blocks for Li-Ion battery manufacturers for Hybrid Electric Cars. These Li-Ion battery manufacturers include A123 Systems, General Motors, Johnson Control and others. Marathon will have existing products from Phenolic to Plastic design and add a 3rd product to have a complete products for Hybrid Electric Vehicles. Current products are in plastic design and provide design help in field trials at A123 Systems. The redesigned product will save up to 10 jobs and provide incremental opportunities for Marathon Special Products. These projects will allow Marathon to stay competitive from Bowling Green for years to come. | Marathon Special Project | 7 | 0 to 30 days | \$60,000 |
| Wood | Power Terminal Blocks for Solar and Wind Power Ind | Wind Power and Solar Industry requires 1000V rated Power Terminal Blocks that are finger safe and meets North American and European Agency requirements for safety and other requirements. Marathon Special Products has completed the design and trying to develop two family of Power Terminal Blocks for Power Distribution Blocks that will meet all safety and agency requirements. These products will be rated up to 1,000 Volts applications with current capacity exceeding 1200 Amp. Marathon is only the 2nd company to have such products and will have a chance to capture 35-40% of the market in short period of time. Such a market will allow Marathon to create up to 10 jobs in Bowling Green OH. Project design is complete. Quoting for necessary tooling and testing is complete. A stimulus funding will ensure immediate kick start of project. We will be very happy to provide more details on these two new product families. With the elementary school and high school buildings need a back-up generator for backup power outages in the area. The generator will be used to keep minimal services in the buildings in order to maintain the sump pumps, refrigerators/freezers, minimal heating and other emergency equipment. A utility lift is required to reach the high electrical fixtures, duct work and air handler units in both buildings in the district. We will carry this every time needed for safety purposes. In order to comply with LEED, we a small mound of dirt around the perimeter of the Powell Elementary School. This mound will prevent standing water from entering the building. The newest addition to the Powell Elementary has air conditioning and this would complete the project. Current area for parking are stone with potholes and requiring maintenance annually. Currently the science lab in our high school building was renovated in 1991. Many safety features were installed and need to be brought into compliance in order for the district to continuing offering this program to our students. ADA compliance throughout the district is needed in the areas of handicapped door handles as well as a new elevator system to replace and standard stair climber in our High School building. Supplying alternative energy sources such as wind turbines, solar panels and geothermal heating for energy efficiency in the North Baltimore Schools. The district has 13 buses without security cameras or motion sensors. The conversion to digital is in the near future and the safety of a GPS system for our rural area. The district has some funds set aside for replacement of handicap buses. However, the amount is not nearly enough and we have special needs students that attend surrounding school districts that need daily transportation. Currently the district 10 buses sit unsecured in an unsecured area outside of the High School Building. A location is available to build a pole barn for our buses with an area for safety checks and minor maintenance for our current assets. Currently the district has no seating track. Bleachers for the football field are unstable and continually being replaced and repaired. This is original concrete from 1927 and is needing replaced for safety. The apron and steps have deteriorated to where they have become a significant safety issue. Renovation to the 1927 High School Auditorium. The original wiring and fixtures need replaced including stage wiring and lighting. The plaster and concrete work is deteriorating. Seating upgrades for safety of the community. Approximately 30 classroom unit heating ventilators need replaced for efficiency. These units are electric and no longer seamless with parts. Replaces the 1972 boiler in the high school building. This is an all electric boiler and presently reduced to 50% capacity. The boiler needs to be switched to natural gas for fuel efficiency and operating efficiency. Powell Building was built in the 1920's and has never had a roof replacement. High School Building Roof Replacement- This is a 1928 building with the last roof replacement done in the 1980's. Door entrances at the High School Building are over 30 years old, do not always lock for security purposes. Over a hundred year old building needs window replacement for energy efficiency at the High School Building. Windows leaking, cracking and will not open. Sidewalk repair and tree removal, trees overtopping causing sidewalk deterioration at the administrative building in the North Baltimore School District. Renovation of the Commadore Building. It was originally built in 1911 as Perryburg High School. In 1964 when a new High School was built, the building became the Junior High. When a larger High School was built and opened in 2007, the Junior High was moved to the former High School and for 1 year the 6th grade was moved to the Commadore Building to ease crowding at the elementary level. The following year, due to financial constraints, the 6th grade was relocated to the Junior High building, thus creating a 7, 8 & 9th grade environment. Currently, the Commadore Building is used for the purpose of housing Board Administrative Offices, specialized student programs, as well as, school and community related activities. Stimulus funds being requested to fund the cost of remodeling with energy efficient windows, and upgrading HVAC, lighting and electrical, which would result in significant energy dollars saved that could be used to offset costs connected with adequately staffing classrooms, and salaries of current staff. Obviously, this would be a recurring annual savings, which would have a positive impact on education in Perryburg for many years into the future. Purchase and update police both to move our department into the future. The purchase of 12 Radar that are compliant to the new standards required by 2010. The purchase of radar monitoring systems for public parks and right of ways. Purchasing of new in car data and the purchase of Bikes and equipment for bike patrol within the village. Purchase of traffic monitoring equipment and safety equipment to lower traffic fatalities. | Marathon Special Project | 10 | 0 to 30 days | \$100,000.00 |

This project would make the road better for the inhabitants to use and also for us to maintain (both summer and winter.) | Tynochtee Township | 8 | 91 to 180 days | \$41,532 |
| Wyandot | 80-Year Old Water Line Replacement | We request the funding for the replacement of approximately 4,800 linear feet of 80-year old water lines. We have experienced numerous water line breaks over the past several years. The cost of repairing the breaks, the thousands of gallons of lost treated water, damage to the roadways, and the possible contamination of our water supply weigh heavily on our request for their replacement. The expected outcome of replacement of the water lines would eliminate tens of thousands of dollars of repairs, save thousands of gallons of water and the cost of the chemicals to treat the water, save additional Village revenue in roadway replacement costs, and most importantly, protect our Village families' water supply from unnecessary and destructive contamination. | Village of Nevada | 150 | 181 days or more | \$270,000 |
| Wyandot | Two Hundred Thousand Gallon Water Tower Replacem | Request replacement of our aging 80 year old 100,000 gallon water tower. Although the present tower is being maintained, the daily wear and tear is contributing to very expensive repairs to the deteriorating steel structure. Additionally, our water tower has become obsolete due to the increasing water needs of our community. According to EPA regulations, communities are required to have at least a 60-day water supply in their water tower. The replacement of our water tower will bring our community into compliance with EPA regulations. A new tower will increase our chances of attracting new businesses in our community while decreasing maintenance and providing a safe and uninterrupted flow of water. | Village of Nevada | 175 | 181 days or more | \$300,000 |
| Wyandot | Wyandot County Courthouse Refurbishing Project | This 10 phase plan provides for structural refurbishing of the Wyandot County Courthouse. This our project booklet contains over 300 pictures of need in our structure. This is the deteriorating within the building, and enhance our capabilities to serve Wyandot County. This Wireless Broadband Internet Service offering would target potential customers who are in unsecured and under served rural areas who do not have access to Broadband Internet Services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Upper Sandusky (Wyandot County) area on either an existing or a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 MHz licensed wireless radio band. NKTelco Inc. already owns the 700 MHz licenses for Wyandot and surrounding counties. Unlike other radio services, the 700 MHz frequency is not strictly "line of sight". Thus, NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband Service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 100 customers would be possible utilizing the estimated \$225,000 in total project cost estimates. Money needed to finish the asphalt project TH 11. Part of TH11 was asphalted in 2008 and we would like to finish the project, but do not have the funds to complete the project. Full rehabilitation of the existing 178 foot long single span bridge. The entire structure to be disassembled and all members to be galvanized. Replacing any members replaced less than 100% or 100% Ohio Legal Load. Foundations of the bridge to be rebuilt and the structure reassembled and opened to traffic with no load restrictions. Remove existing bridge, which existing steel beams by abut blasting and hot dip galvanizing. Replace members that are below 150% Ohio Legal Load. Remove existing bridge abutments and walls. Replace with new reinforced concrete abutments, walls and erosion protection. Install new bridge structure with no service restrictions. Remove existing deficient truss bridge. Modify existing reinforced concrete bridge abutments and walls. Add erosion protection. Install new galvanized steel bridge structure with no service or weight restrictions. | Wyandot County | 15 | 31 to 90 days | \$1,300,000 |
| Wyandot | Wireless Broadband Internet Service | | NKTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| Wyandot | Resurfacing 0.6 mile TH 11 | | Tynochtee Township | 8 | 91 to 180 days | \$38,000 |
| Wyandot | Sandusky River Truss Rehabilitation | | Wyandot County Engineer | 12 | 0 to 30 days | \$157,500 |
| Wyandot | County Road 109 Bridge Rehabilitation | | Wyandot County Engineer | 10 | 0 to 30 days | \$145,000 |
| Wyandot | County Road 93 Bridge Replacement | | Wyandot County Engineer | 12 | 0 to 30 days | \$196,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Wyandot | Immunization clinics | Continue immunization clinics through Wyandot County Health department in Upper Sandusky, Carey and Sycamore. We are the ONLY provider of vaccines in our county. The immunization grant DOES NOT FUND FOR DIRECT SERVICE This money will also assist with mileage for employees to their respective clinics on a daily basis. We have found out some clinics are "leaving" but their cost contraproductives to make them last longer however, the effect of doing this is an increased risk of pregnancy. The remaining 200 grants in our county has created more healthcare barriers for residents if they are unable to obtain medical aid and also for those who are unable to find a medical provider in our county—not all our medical providers are accepting medical clients— With additional monies, we will be able to maintain the family planning clinic and provide the contraceptive choices we were initially able to provide when the clinic was established in 2005. Syringes/needles/therapeutic prep pads/syringe fee/paper/postage. | Wyandot County Health Depart | 7 | 0 to 30 days | \$50,000 |
| Wyandot | Family Planning Clinic | Additional funding requested for Family Planning/STD clinic. We currently do not have funding to assist clients with contraceptive therapy. Scripts are being written for clients to obtain meds. at a local pharmacy. Due to state budget cuts, we have had to implement this new policy creating more hardship on females to maintain consistency with their contraceptive choices on a daily basis. We have found out some clinics are "leaving" but their cost contraproductives to make them last longer however, the effect of doing this is an increased risk of pregnancy. The remaining 200 grants in our county has created more healthcare barriers for residents if they are unable to obtain medical aid and also for those who are unable to find a medical provider in our county—not all our medical providers are accepting medical clients— With additional monies, we will be able to maintain the family planning clinic and provide the contraceptive choices we were initially able to provide when the clinic was established in 2005. | Wyandot county Health Dept. | 7 | 31 to 90 days | \$50,000 |
| Wyandot | Short Term Water Line Improvements | 3000 Linear Feet of 8 inch water main. Project will loop eight "deadends". Outcome will be improved water quality and increased fire flows for a residential subdivision. | Village of Carey, Ohio | 10 | 91 to 180 days | \$370,000 |
| Wyandot | Mid-Term Water Line Improvements | Installation of Mid-Term Water Line Improvements. Project consists of 4500 feet of existing 4 inch line being replaced with 6 inch in several existing neighborhoods. This project would also provide the connection point for a proposed new school in the village. | Village of Carey, Ohio | 10 | 91 to 180 days | \$500,000 |
| Wyandot | Long Term Water Line Improvements | Installing 4500 linear feet of 8 inch water line. To replace 50 year old existing 4 inch and 6 inch lines leading an established residential neighborhood. | Village of Carey, Ohio | 10 | 91 to 180 days | \$512,000 |
| Wyandot | Water Meter Replacement Program | The project is a system wide replacement of aging water meters, incorporating Best Available Technology at the same time. Results will be less "lost" revenue due to aging meters and reduced errors in billing (due to touch read and radio read systems used) directly in conjunction with current billing software. | Village of Carey, Ohio | 10 | 31 to 90 days | \$645,000 |
| Wyandot | Drinking Water Treatment Plant | The project is the installation of a new water treatment facility for removal of iron, manganese and nitrates using filtration and reverse osmosis. Fluorination would likely be required as part of the updated treatment system. | Village of Carey, Ohio | 35 | 181 days or more | \$5,600,000 |
| Wyandot | Drinking Water Treatment Plant | A residual benefit will also be softening of an extremely hard limestone, which we draw from groundwater wells. | Village of Carey, Ohio | 35 | 181 days or more | \$5,600,000 |
| Wyandot | Elevated Water Storage Tank | This project would be the replacement of a 1999 elevated storage tank and an 1894 standpipe with a single 600,000 gallon tank. Benefits would be improved fire flows and more consistent pressure for both residents and businesses connected to the system. The project consists of replacement and enlargement of approximately 500 linear feet of existing overhead culvert to allow pipe to flow through the village in rainfall events. | Village of Carey, Ohio | 25 | 91 to 180 days | \$1,650,000 |
| Wyandot | JCP& Depot Culvert Replacement | Past history has shown serious flooding on LT 30 year cycles, the most recent being 2007. This is one of several projects identified by our Storm Water Management Study completed in 2008. | Village of Carey, Ohio | 15 | 91 to 180 days | \$1,450,000 |
| Wyandot | Patterson Street Storm Upgrade | The project consists of the removal of an undersized bridge culvert and replacement with a properly sized box culvert, approximately 82 linear feet allowing storm water flows to exit the village without upstream flooding. (Removing a "bottle-neck") The storm water drainage for downtown business district, north of E Findlay St., is currently controlled by a culvert only available to them. That culvert is the sanitary sewer running down the rear alley. This project would install a 24 inch storm water line to the existing Spring Run and allow operation of these flows from the WWTP. | Village of Carey, Ohio | 15 | 31 to 90 days | \$400,000 |
| Wyandot | Northwest Quadrant Water Transmission Improvements | 10,000 LF of water transmission mains to serve residential areas of City which also includes nursing home, school, restaurant and hospital | City of Upper Sandusky | 20 | 91 to 180 days | \$1,710,200 |
| Wyandot | Sanitary Sewer Collection & Treatment | Public sanitary sewer collection and treatment: controlled discharge lagoon with primary gravity flow collection system, augmented by one pump-out, 5 grinder pumps & 600 LF of 24" force mains to provide public sanitary sewer service to Village residents & small businesses | Village of Wharton | 20 | 181 days or more | \$3,400,000 |
| Wyandot | new cruiser | Due to the Village of Carey budget constraints, the police department was denied purchasing a new cruiser for 2009. Our newest cruiser (2007) has 65,000 miles and our second (2005) has over 150,000 miles. Extending the service life of the 2005 cruiser is of concern to both officer safety and repair costs. | Carey Police Department | 1 | 31 to 90 days | \$25,000 |
| Wyandot | County Highway Resurfacing | County Resurfacing Project that would include resurfacing of 9+ miles of County Highway, application of pavement markings and storm material. This project was part of an OPWV project 2008 that did not receive funding due to a larger than expected amount of project submittals. The Carey Police Department has lost one of its members due to a deployment to Iraq with the Navy reserves. I am going to hold his position for him, however, the Village has alerted the overtime hours in all departments that we need to cover that shift. A book of overtime dollars is needed to cover that shift by other full and part-time officers. | Wyandot County Engineer | 30 | 0 to 30 days | \$860,000 |
| Wyandot | Overtime funding | 1 mile of 20 inches thick by 17,000, wide +9873 S.Y. 1.138 Ton Type 1 Asphalt Concrete 248 gal. tack coat 300 sq. yd. base | Carey Police Department | 1 | 31 to 90 days | \$10,000 |
| Wyandot | Resurfacing 1.0 mile TH 31a from AH103 to CH16c | This is a turn builder and spray business on TH31 and the highway needs a lot of use and needs to be resurfaced. This would benefit all the business patrons and the business itself and also the inhabitants living on this highway. | Tynochtee Township | 10 | 91 to 180 days | \$88,473 |
| Wyandot | Wyandot East Fire District is in need of a new fir | To build a Fire/EMS station that will serve as an emergency community center and house fire trucks, ambulances and equipment. To serve as meeting place for Fire Fighters & EMTs. To attract Fire Fighters and EMTs to serve community. To provide educational space for learning opportunities for current and future EMTs and Fire Fighters. Outcome: To protect equipment and provide community pride. To provide the taxpayers in our rural community a new Fire Station without asking for more money through a tax levy. Create faster response times for emergencies. Create good paying local jobs. Attract new businesses. Attract new home building. Revitalize community. Support for people in need. Create a safer community. Attract new residents to community. | Wyandot East Fire District | 75 | 91 to 180 days | \$3,000,000 |
| Wyandot | Wyandot County Help Me Grow | The Wyandot County Family & Children First Council implements Help Me Grow (HMG) services, a comprehensive, interdisciplinary, family-oriented system for families of children age 0-6. Pending state budget cuts are prevented to our HMG services by 40%. Currently underfunded, each of HMG's highly-qualified staff members remain underemployed and underused, funding only 20-30 hrs/week each, although each service coordinator maintains caseloads at or above recommended levels of an FTE. Federal stimulus assistance will allow HMG to continue, as well as expand upon its current level of service, and begin providing services to families with children preschool age 3-6 as they transition through the preschool years into school. Federal dollars will enable HMG to meet the following objectives: 136 Newborn home visits to assess health of baby & more, 250 information packets to new parents about child development, Link 222 parents to available programs & resources, Identify early 68 children with developmental delays, Guide & provide available therapeutic interventions to 164 families, Screen 302 children for nutrition, hearing, vision & overall development, Literacy training for 204 parents. | Wyandot County Family and Children First Council | 8 | 0 to 30 days | \$287,908 |
| Wyandot | Wyandot County Strengthening Families Program | The Strengthening Families Program (SFP) has demonstrated statistically significant positive effects for families and adolescents. The Wyandot County Family and Children First Council currently implements the SFP on a limited basis, but due to lack of state funding its capacity to continue is unlikely without funds from the federal stimulus assistance fund. Continuation of this program will be complemented with needed follow-up services for families with middle school youth age 10-14. The SFP has been correlated to significantly reducing delinquency, youth violence, and drug abuse in families who complete program. Effective, measurable, community-based education program for families with children ages 10-14 who are at risk due to substance use and/or behavioral health issues are needed in Wyandot County. Federal stimulus grant dollars are needed to assist Wyandot County families living with high levels of stress. Our plan is to expand Wyandot County's capacity to continue providing this evidence-based family skills programming for 15-30 families with youth age 10-14 (goal 30-75 individuals) per year to decrease family conflict and increase family stability and functioning. | Wyandot County Family and Children First Council | 12 | 31 to 90 days | \$178,263 |
| Wyandot | Operations Facility Replacement | Replace existing highway maintenance facility with new centrally located facility of adequate size that will achieve an environmental achievement of silver level or higher. Current 60+ year old facility is undersized, inadequate and uncomformal to operate. Increased operational costs are attributed to increased equipment maintenance costs as a majority of the equipment cannot be shakedown and must be left to the elements throughout the year. Additional costs are a result of high additional safety costs and repair costs to the poor design and the outdated, rapidly aging facility. A new facility would also create a central salt storage facility for the County and the three townships that it cooperates with. This would enable the County and Townships to save money on salt and salt control. | Wyandot County Engineer | 50 | 0 to 30 days | \$2,500,000 |
| Wyandot | Firearms Project | Funding would permit agency to issue a firearm to all police officers which would standardize operators and training. Currently officers provide their own weapons and all are different and using this would allow this agency to move up the time table on this project and also permit funding for this project to be expended for other agency operations. | Sycamore Police Department | 5 | 181 days or more | \$2,950 |
| Wyandot | Mini Storage Enhancement | Renew driveway and parking area with blacktop | Wyandot Enterprises, LLC | 4 | 31 to 90 days | \$75,000 |
| Wyandot | 2009-2010 Road Resurfacing | 245 CY of pavement repair, 4150 SY of pavement paving, 200 CY asphalt surface course, 410 LF curb removal, 440 SY geotextile fabric, and 100 CY of asphalt intermediate course | Village of Sycamore | 10 | 31 to 90 days | \$189,000 |
| Wyandot | Upper Sandusky Water Treatment Plant | Project consists of a new 2 MGD water treatment plant to replace the old (180) water treatment plant. The current plant is antiquated and does not fully meet Ohio EPA regulations. Ohio EPA has documented TMR violations and other violations. New water treatment plant consists of aeration and nitrification membranes, a 500,000 gallon clarifier, various chemical feed systems, an emergency generator, and a 20,000 square foot building. | Upper Sandusky- URS Corporation | 4 | 91 to 180 days | \$14,000,000 |
| Wyandot | 2009 Street Paving Project | This project will be the paving of our business district within the Village. The existing pavement is in very poor condition and this area of our village will be much improved by this resurfacing. | Village of Sycamore | 15 | 31 to 90 days | \$182,237 |
| Wyandot | Personal Security for Wyandot County | Our security program falls the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates at all time highs an increase in security is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, seasonal operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can help prevent vehicle theft. Gas detecting transmitters can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphones and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously | Nucleaf Ohio Limited | 1 | 31 to 90 days | \$52,500 |
| Wyandot | Water Treatment Plant | New Water Treatment Plant building with filtration and ion exchange softening together with office, lab, control, piping, cleanwell, pumping | Village of Sycamore | 40 | 91 to 180 days | \$2,300,000 |
| Wyandot | WWTP generator upgrade | To replace existing older 400kw generator with 500 plus kw new generator | City of Upper Sandusky | 0 | 0 to 30 days | \$55,000 |
| Wyandot | WWTP centrifugal blower replacement | There are 5 blowers that need to be upgraded in size of output cfm to replace older undersized. | City of Upper Sandusky | 0 | 0 to 30 days | \$250,000 |
| Wyandot | Duckpond Road Sanitary Sewer Replacement | To replace approx. 300 feet of old sewer pipe. | City of Upper Sandusky | 5 | 0 to 30 days | \$100,000 |
| Wyandot | Collections Sewer Separation Phase II South Fourth | To continue with sewer separation in this area where there is a combined sanitary and storm sewer. | City of Upper Sandusky | 5 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Wyandot | Collections Sewer Separation South Seventh Street | The plans and specifications are complete. This is to separate the sanitary and storm sewers in this area where we have a combined system. Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds of high-paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and fiber, the underserved areas still exist today. Now it's the time to try something different. Rural America needs access today not the faded promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective WiMax technology available. | City of Upper Sandusky | 8 | 0 to 30 days | \$400,000 |
| Wyandot | Wireless Broadband for Wyandot County | The replacement of 60 feet of sewer pipe with new bigger size pipe to the headworks structure | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Wyandot | WWTP Headworks Improvements | Conversion of old tanks to aeration tanks for use in rain, heavy flow events, along with rehab of other equipment | City of Upper Sandusky | 5 | 31 to 90 days | \$55,000 |
| Wyandot | WWTP Stormwater Treatment Tanks | Federal stimulus money should be spent building new sheriff's department and all county fire and emergency medical service facilities in Wyandot County to include purchase of modern and state of the art emergency equipment to monitor and better serve the citizens of Wyandot County in preventing crime and saving lives. | City of Upper Sandusky | 10 | 91 to 180 days | \$320,000 |
| Wyandot | The Wyandot County Emergency Services Act | The Wyandot County Health Alliance is a multi-agency consortium of health & human services partners who serve the community in various capacities. The WCHA will commission a 2009 comprehensive health needs assessment for Wyandot County, which is continuously confronted with new economic challenges. Valid & reliable community health data is needed to identify and prioritize unmet needs. Demographic, physical health, access to healthcare & coverage, mental health & suicide, youth safety & violence, adult & youth alcohol & substance abuse data will be collected from county citizens & compared to baseline data collected in 2006 & 2003. The 2009 data will be used by local decision makers to compare information to regional, state & national statistics in order to give a clear direction of the best investment of public dollars for health & human services. This process allows us to geographically identify gaps in current services, establish priorities to address local needs, redirect existing & new resources toward needs, apply rational decision-making for program/services, ensure accountability for outcomes, & evaluate programs to pursue other funding for sustainability with current data. | None | 500 | 181 days or more | \$50,000,000 |
| Wyandot | Wyandot County Community Health Needs Assessment | The Village Police Department is seeking to replace its 2 police cars, one is a 2002 and the other a 2003. The vehicles are becoming cost prohibitive to operate, and both are powered by V8 motors. The agency is seeking to down size the engine to a V6 to conserve fuel and reduce agency cost. A survey of other agencies that operate this type of vehicle have shown significant savings in the operation of this type of vehicle thru the reduction in the amount of fuel being used and they report that these vehicles provide the same quality of service to the public for less money. Currently our cars show that miles per gallon is approximately 14 the MPG on the smaller car is almost twice that total. This agency currently struggles with budgetary issues like all other public safety entities and this funding would provide relief to local governmental funding for a project of this magnitude. It would also provide a greater degree of safety for the officers that would use the equipment. Currently both cars are worn and need to be replaced. Funding would permit a replacement schedule of cars | Wyandot County Health Alliance | 15 | 0 to 30 days | \$30,000 |
| Wyandot | Police Car Project | This project would provide the village additional time to build replacement funds to continue this project in the future. | Sycamore Police Department | 5 | 91 to 180 days | \$39,900 |
| Wyandot | Upper Sandusky Water Meter Replacement | This project will replace the aging water meters in the City with a new system to allow the implementation of water meter data via radio to the meter. | Upper Sandusky- URS Corporation | 1 | 0 to 30 days | \$1,632,527 |
| Wyandot | Upper Sandusky Elevated Water Tank | New 200,000 gallon elevated water tank to replace the recently failed water tank. Currently the City has only one elevated tank which is badly needed for reliability and safety. | Upper Sandusky- URS Corporation | 4 | 0 to 30 days | \$800,000 |
| Wyandot | Wyandot County Centralized Service Coordination | The Wyandot County FCFC has developed a mechanism for comprehensive, county-wide, centralized service coordination and facilitates to a broader range of community resources in order to adequately address and prevent youth problem behaviors, as well as | Wyandot County Family and Children First Council | 4 | 0 to 30 days | \$150,000 |
| Wyandot | Watershed Project | To create a new watershed in a subdivision of homes. Approx. 900 ft. Will protect residents from flooding. Will protect road from wash away. Will create work for local businesses for duration of project. Will create neighborhood pride. Will keep residents from moving away. Will keep road in better condition for residents to use for work/school/ daily living. Will help residents keep insurance rates in check. Will keep residents from being deemed uninsurable, will protect their home values. Thank you for your consideration | Eden Township | 4 | 0 to 30 days | \$10,000 |
| Wyandot | Carey School's Energy Efficiency Project | The project is to construct a new 12' facility approx 125,000 sq ft to replace an existing 1921-1928 building cobbled together with 1964 and 1963 additions. The current building is not energy efficient and two areas have recently been found to have unacceptable radon levels. The heating and ventilation systems are inadequate by today's standards. Construction will incorporate numerous LEED certified systems including the following: heating/ HVAC, restrooms, elevator, lighting, water reclamation, etc., which will in turn reduce the carbon foot print created by this educational facility. This construction project would create many new jobs in our community. The project would also provide an economic stimulus to our community as well as the surrounding counties through the purchase of building supplies and construction services, and increased business for restaurants, gas stations, hotels, and so forth. | Carey Exempted Village School | 100 | 91 to 180 days | \$5,831,775 |
| Wyandot | Wyandot-Hardin Educational Ethernet Project | Construction of approximately 40 Miles of fiber throughout rural areas of Wyandot and Hardin Counties. The primary purpose is for providing cost effective, high capacity Ethernet Service to Rural School Districts for connectivity back to their Information Technology Center and other Educational Technology Resources. | Independents Fiber Network, LLC | 3 | 181 days or more | \$1,400,000 |
| Wyandot | R-K Campf Transport, a Clean Fuels Ohio partner | Independents Fiber Network will connect these nodes in a collaborative fashion with area community-based broadband network providers. This will lead to further employment opportunities and economical development opportunities by local Ohio businesses and Ohio Entrepreneurs. Currently own 30 trucks. Need to install air-riding technology on 21 trucks. | Clean Fuels Ohio | 5 | 0 to 30 days | \$43,000 |
| Wyandot | Automotive Study | Restrictive to operate, both are powered by V8 motors. The agency is seeking to down size the engine size to a V6 to conserve fuel and reduce agency cost. Savings will preserved positions at the agency should cuts need to be made. A survey of other agencies that operate this type of vehicle have shown significantly savings in the operation of this type of vehicle thru the reduction in the amount of fuel being used and it is reported that these vehicles provide the same quality of service to the public for less money. Currently our cars show that they travel only 14 miles per gallon in the village, and the MPG on the smaller vehicles is almost twice that total. This agency struggles with budgetary issues like all other public safety entities and this funding would provide relief to local governmental funding for a project of this magnitude. It would also provide a greater degree of safety for the officers that would use the equipment. Currently both cars are worn and need to be replaced. Funding would permit a replacement schedule of cars | Sycamore Police Dept | 5 | 181 days or more | 39,900 |
| Wyandot | Automotive Study | Restrictive to operate, both are powered by V8 motors. The agency is seeking to down size the engine size to a V6 to conserve fuel and reduce agency cost.
