

U.S. Department of Labor  
 Mine Safety and Health Administration  
 Approval and Certification Center

**List of Companies Holding Identification Numbers**

MSHA accepts only finished, manufactured products, not primary ingredients. Therefore, an identification number must not be construed as an acceptance of the product for underground mine use. The purpose is to eliminate duplication of effort and to expedite the acceptance process for finished products. This/these number(s) may be used by a number of companies in their manufacturing process. These companies may refer to your identification number(s) when applying for acceptance of their product, thus eliminating the need to obtain formulation and other proprietary information previously provided to the Center.
