# BE CAREFUL!

Entering an abandoned mine or swimming in a quarry can be as dangerous as playing in the middle of rush hour traffic.

## **Abandoned mines are not playgrounds.**

They are very dangerous places and contain many hazards that you may not be aware of. Here are just a few:

- Mines can have holes as deep as tall buildings.
- They can also be home to poisonous snakes and dangerous animals.
- Many contain deadly gases or spaces with NO AIR!
- Unused or misfired explosives can be set off by the slightest touch.

## **Quarries are not swimming pools.**

Even expert swimmers may encounter trouble in a quarry. Here's why:

- Water filled quarries are dangerously cold and very deep.
- Steep and slippery slopes can make it difficult to get out of the water.
- The water can hide rock ledges and old machinery.

**Tell a friend to Stay Out and Stay Alive!**

Never go in abandoned mines.

There are many hidden dangers!

Quarries are not swimming pools.

Stay away from sand and gravel pits.

What you can't see  
can hurt or kill you!
