SUPPLEMENTARY INFORMATION: *Status:* These meetings will be open to the public.

Background

On July 6, 2006, the Bureau of Industry and Security (BIS) published a rule in the **Federal Register** that proposed amendments to the Export Administration Regulations (EAR) that would revise and clarify the United States' policy for exports and reexports of dual-use items to the People's Republic of China (PRC). Specifically, the proposed rule states that it is the policy of the United States Government to prevent exports that would make a material contribution to the military capability of the PRC, while facilitating U.S. exports to legitimate civil end-users in the PRC. Consistent with this policy, BIS proposes to amend the EAR by revising and clarifying United States licensing requirements and licensing policy on exports and reexports of goods and technology to the PRC.

The proposed amendments include a revision to the licensing review policy for items controlled on the Commerce Control List (CCL) for reasons of national security, including a new control based on knowledge of a military end-use on exports to the PRC of certain CCL items that otherwise do not require a license to the PRC. The items subject to this license requirement will be set forth in a list. This rule further proposes to revise the licensing review policy for items controlled for reasons of chemical and biological proliferation, nuclear nonproliferation, and missile technology for export to the PRC, requiring that applications involving such items be reviewed in conjunction with the revised national security licensing policy.

This rule proposes the creation of a new authorization for validated end-users in certain destinations, including the PRC, to whom certain, specified items may be exported or reexported. Such validated end-users would be placed on a list in the EAR after review and approval by the United States Government.

Finally, this rule proposes to require exporters to obtain End-User Certificates, issued by the PRC Ministry of Commerce, for all items that both require a license to the PRC for any reason and exceed a total value of \$5,000. The current PRC End-Use Certificate applies only to items controlled for national security reasons. This rule also proposes to eliminate the current requirement that exporters submit PRC End-User Certificates to BIS with their license applications but provides that they must retain them for five years.

Dated: August 3, 2006.

Deputy Assistant Secretary for Export Administration, Bureau of Industry and Security.

Approval and Promulgation of Implementation Plans; Designation of Areas for Air Quality Planning Purposes; State of Arizona; Finding of Attainment for Rillito Particulate Matter of 10 Microns or Less (PM₁₀) Nonattainment Area; Determination Regarding Applicability of Certain Clean Air Act Requirements; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to determine that the Rillito moderate PM-10 nonattainment area in Arizona attained the National Ambient Air Quality Standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM₁₀) by the applicable attainment date. In addition, EPA proposes to find that the Rillito area is currently attaining the PM₁₀ standards, and based on this latter finding, EPA is proposing to determine that certain Clean Air Act requirements are not applicable for so long as the Rillito area continues to attain the PM₁₀ NAAQS. Lastly, EPA is proposing to correct an error in a previous rulemaking that involved the classification of PM₁₀ nonattainment areas within the State of Arizona.
