

# Controlled Foreign Corporations, 1996

by Sarah E. Nutter

For 1996, the 7,500 largest (in total assets) foreign corporations controlled by large (more than \$500 million in total assets) U.S. multinational corporations held \$2.7 trillion in assets and reported receipts of \$1.7 trillion. These amounts reflect increases from 1994 of 35.4 and 24.6 percent, respectively [1].

More than two-thirds of the largest 7,500 Controlled Foreign Corporations (CFC's) were concentrated in two industrial divisions, manufacturing, and finance, insurance, and real estate [2]. These two industrial divisions accounted for 83.1 percent of average total assets, 66.8 percent of total receipts, and 74.0 percent of current earnings and profits (less deficit) before taxes.

Approximately one-sixth of the 7,500 largest CFC's were located in the United Kingdom. These 1,200 U.K.-based CFC's accounted for nearly one-third of the average total assets and one-fifth of the total receipts reported by the largest CFC's. A substantial number of the CFC's located in the United Kingdom were concentrated in the finance, insurance, and real estate industry. The 535 U.K.-based CFC's in finance, insurance, and real estate accounted for more than three-fourths of the \$0.8 trillion average total assets and one-fifth of the \$0.3 trillion of total receipts reported by CFC's located in the United Kingdom.

## Controlled Foreign Corporations

Direct foreign investment by U.S. persons may take several forms, including establishing foreign branches of U.S. corporations, partnerships with foreign entities, and separate corporations. For Federal income tax purposes, a foreign corporation is a Controlled Foreign Corporation (CFC) if U.S. shareholders own more than 50 percent of its outstanding voting stock, or more than 50 percent of the value of all its outstanding stock (directly, indirectly, or constructively) on any day during the foreign corporation's tax year. A U.S. shareholder for these purposes is defined as a U.S. person who owns 10 percent or more of the foreign corporation's total combined voting stock [3]. A foreign corporation is controlled,

for SOI purposes, only if a single U.S. corporation satisfies either of the above 50-percent ownership requirements for an uninterrupted period of at least 30 days.

In general, the foreign source income of a foreign corporation is not taxable to its U.S. shareholders until repatriated. Recognizing that income could be accumulated in a CFC, thus deferring U.S. tax on this income indefinitely, Congress enacted the Subpart F provisions of the Internal Revenue Code in 1962. These provisions require certain items of income to be treated as deemed paid to the U.S. shareholders (as if repatriated) and therefore subject to U.S. taxation. Currently, a U.S. shareholder of a CFC may be required to include in gross income the shareholder's ratable share of the CFC's: (1) Subpart F income (see *Subpart F Income* in the *Explanation of Selected Terms*); (2) increase in earnings invested in U.S. property; (3) previously excluded Subpart F income withdrawn from "qualified investments" in less developed countries and in "foreign base company" shipping operations; (4) previously excluded export trade income withdrawn from investment in export trade assets; (5) increase in earnings in excess passive assets; and (6) factoring income (income derived from the acquisition of a trade or service receivable). This article reports on the largest 7,500 Controlled Foreign Corporations controlled by U.S. corporations with \$500 million or more of total assets.

## Industrial Composition

Over the last several years, the number of U.S. multinational corporations with Controlled Foreign Corporations that were among the 7,500 largest CFC's has steadily risen, from 731 for 1990 to 890 for 1996, an increase of 21.8 percent. During this time period, the industrial mix of the 7,500 largest CFC's has continued to shift away from manufacturing, wholesale and retail trade, and construction (Figure A). From 1990 to 1996, the number of CFC's grew steadily in the following industries: agriculture, forestry, and fishing (33.3-percent increase); transportation and public utilities (32.8-percent increase); mining (18.9-percent increase); and finance, insurance, and real estate (10.8-percent increase). Although CFC's in the services industry increased by 6.1 percent from 1990 to 1996, the number of CFC's in this industrial division peaked at

<sup>1</sup> Includes "Nature of business not allocable," not shown separately.

737 CFC's for 1992 before falling to 695 for 1996.

For 1996, CFC's engaged in finance, insurance, and real estate activities accounted for 56.8 percent of average total assets (see definition of Total Assets in the *Explanation of Selected Terms*), 11.8 percent of total receipts, and 26.1 percent of current earnings and profits (less deficit) before income taxes reported by the largest CFC's (Table 1). Over seventy percent of the total receipts and current earnings and profits (less deficit) before taxes reported by CFC's engaged in finance, insurance, and real estate activities was accounted for by three minor industrial groups: holding and other investment companies (except bank holding companies); security, commodity brokers, and services; and insurance.

In contrast, manufacturers reported 26.3 percent of average total assets, 55.0 percent of total receipts, and 47.9 percent of current earnings and profits (less deficit) before income taxes. CFC's engaged in motor vehicles and equipment; electrical and electronic equipment; food and kindred products; and office, computing, and accounting machinery activities accounted for 52.7 percent of the \$922.9 billion of total receipts and 42.7 percent of the \$67.5 billion of current earnings and profits (less deficit) before income taxes reported by manufacturers.

Although CFC's engaged in wholesale and retail trade activities accounted for only 7.3 percent of average total assets, they accounted for 24.1 percent of total receipts and 10.2 percent of current earnings

and profits (less deficit) before taxes. Wholesalers generated the vast majority of these amounts, accounting for more than 85.0 percent of the totals.

### Profitability

The pre-tax profitability of the Controlled Foreign Corporations was assessed using two ratios: rate of return on assets and profit margin. For purposes of this article, rate of return on assets was defined as current earnings and profits (less deficit) before taxes divided by average total assets. Profit margin was defined as current earnings and profits (less deficit) before taxes divided by total receipts.

Both measures indicate that the overall profitability of the 7,500 largest CFC's decreased from 1990 to 1992 and increased thereafter (Figure B). At the aggregate level, the rate of return on assets, which fell from 6.9 percent for 1990 to 4.6 percent for 1992, increased to 5.3 percent for 1996. The profit margin followed a similar pattern, falling from 8.0 percent for 1990 to 5.7 percent for 1992 before rebounding to 8.4 percent for 1996.

The pattern of profitability across industries was generally consistent with the pattern for the aggregate during this time period, falling from 1990 to 1992 before rebounding through 1996. However, the relative profitability among the industrial divisions varied substantially during this period. For 1996, the most profitable CFC's were engaged in mining activities; these CFC's had a rate of return on assets and

<sup>1</sup> See definition of average total assets in "Explanation of Selected Terms."

<sup>2</sup> For 1990, year-end amounts of total assets are reported.

profit margin of 19.3 percent and 32.3 percent, respectively. In contrast, CFC's engaged in agriculture, forestry, and fishing activities were the least profitable, with a rate of return on assets of 1.5 percent and a profit margin of 2.1 percent.

### Distributions of Earnings and Profits

For 1996, the largest 7,500 CFC's distributed \$68.8 billion to U.S. parent corporations and other shareholders (Figure C). Nearly two-thirds of these distributions were from current earnings and profits after taxes (\$45.5 billion). The remainder was distributed from previously taxed earnings and profits (\$21.8 billion) and accumulated earnings and profits (\$1.4 billion). The largest 7,500 CFC's distributed as

a percent of average total assets and total receipts, 2.7 percent and 4.2 percent, respectively. For 1996, these CFC's distributed 36.3 percent of the \$125.3 billion of positive current earnings and profits after taxes to their shareholders, a substantial increase from the 22.5-percent rate of distribution for 1994.

CFC's engaged in manufacturing and finance, insurance, and real estate activities accounted for more than three-fourths of total distributions. Manufacturers distributed \$34.0 billion, nearly half of the total. The bulk of these distributions were from positive current earnings and profits; manufacturers distributed 41.9 percent of their \$58.9 billion of positive current earnings and profits after taxes. CFC's engaged in finance, insurance, and real estate activi-

<sup>2</sup> For Controlled Foreign Corporations with positive current earnings and profits before taxes.

ties distributed \$18.4 billion, more than half of which were from previously taxed earnings and profits. CFC's engaged in finance, insurance, and real estate activities distributed only one-fourth of their \$34.7 billion of positive current earnings and profits. In contrast, CFC's engaged in mining activities distributed more than half of their \$8.5 billion of positive current earnings and profits. As a percent of average total assets and total receipts, CFC's engaged in mining activities distributed 8.1 percent and 13.6 percent, respectively, the highest percentages across all industry sectors.

### Geographic Distribution

For 1996, the European Economic Community accounted for more than half of the average total assets and total receipts and nearly half of the current earning and profits (less deficit) for large Controlled Foreign Corporations (Table 2). The United Kingdom, alone, accounted for nearly one-third of the average total assets and one-fifth of the total receipts reported by the largest CFC's.

The largest amounts of total receipts were reported by CFC's based in the following countries:

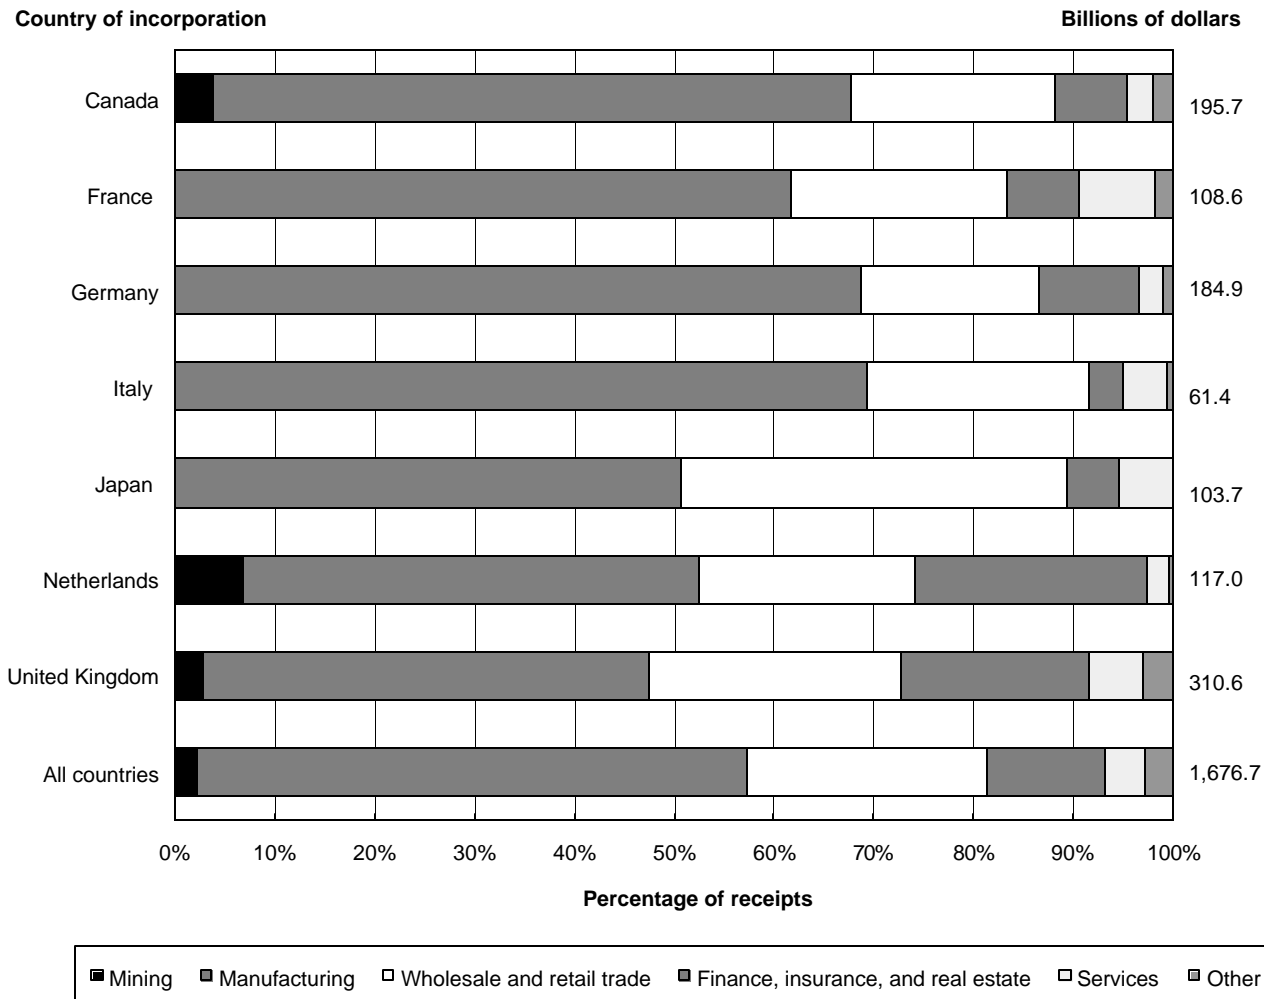

United Kingdom (\$310.6 billion), Canada (\$195.7 billion), Germany (\$184.9 billion), Netherlands (\$117.0 billion), France (\$108.6 billion), Japan (\$103.7 billion), and Italy (\$61.4 billion) (Figure D and Table 3). Collectively, these CFC's reported total receipts of \$1.1 trillion, an increase of 23.2 percent from 1994. The CFC's based in these countries were primarily engaged in manufacturing and wholesale and retail trade activities. CFC's based in the United Kingdom and the Netherlands also had substantial amounts of receipts from finance, insurance, and real estate activities.

Total receipts for Netherlands-based CFC's, which were \$72.4 billion for 1994, increased 61.7 percent to \$117.0 billion for 1996. Netherlands-based CFC's engaged in manufacturing and finance, insurance, and real estate activities reported substantial increases in total receipts. Netherlands-based manufacturers reported \$53.0 billion in receipts, an increase of 46.8 percent from 1994. CFC's engaged in finance, insurance, and real estate activities nearly tripled their total receipts across the same 2-year period. For 1996, these Netherlands-based CFC's engaged in finance, insurance, and real estate activi-

# Controlled Foreign Corporations, 1996

Figure D

## Total Receipts by Selected Country of Incorporation of Controlled Foreign Corporation, by Selected Industrial Division, 1996

ties reported \$26.9 billion of total receipts, an increase of \$17.0 billion. Total receipts reported by Netherlands-based CFC's engaged in mining activities nearly doubled, growing from \$4.2 billion to \$7.8 billion.

### Data Sources and Limitations

The data presented in this article are based on information collected from corporation income tax returns with accounting periods ending July 1996 through June 1997 and their attached Form(s) 5471,

*Information Return of U.S. Persons With Respect to Certain Foreign Corporations.* Internal Revenue Service regulations require a U.S. corporation to submit a Form 5471 for any Controlled Foreign Corporation (CFC) with an accounting period ending with or within the U.S. parent's accounting period. Thus, the CFC accounting periods reflected in the statistics for 1996 may have ended as early as July 1995 or as late as June 1997. However, most CFC activity occurred in Calendar Year 1996.

These statistics report data for the largest (in

## Controlled Foreign Corporations, 1996

terms of total assets) active 7,500 foreign corporations controlled by U.S. corporations with total assets of \$500 million or more. (See definitions of “Active versus inactive Controlled Foreign Corporations” in the *Explanation of Selected Terms*.) The 7,500 largest CFC’s accounted for 92.5 percent of total assets, 85.4 percent of total receipts, and 90.7 percent of current earnings and profits before taxes reported by all active CFC’s of these U.S. corporations with assets of \$500 million or more [4]. The amount of total assets for these 7,500 largest CFC’s ranged from approximately \$42 million to about \$97 billion [5].

Because all U.S. parent corporations with assets of \$500 million or more are included in the *Statistics of Income* sample of corporation income tax returns, the data are not subject to sampling variability. However, the data may be subject to nonsampling error as it is difficult to determine the exact population of CFC’s controlled by these U.S. corporations. For example, a related party to the U.S. corporation, such as a partnership controlled by the corporation, can include Forms 5471 with the partnership return to satisfy the filing requirement. To the extent possible, these Forms 5471 were included in the study. Nonetheless, because the study focuses on those Forms 5471 attached to U.S. corporation income tax returns, these omissions could have occurred.

Several limitations apply when making comparisons to prior-year statistics for the 7,500 largest CFC’s. First, the composition of the 7,500 largest CFC’s is not completely consistent across years. For example, only 71.2 percent of the 7,500 largest CFC’s for 1996 were also included in the 7,500 largest CFC’s for 1994. Many of the 7,500 largest CFC’s for 1994 that were not included among the 7,500 for 1996 were still controlled by large U.S. corporations, but the size of their total assets for 1996 excluded them from this group. In addition, some of the 7,500 for 1994 were not included for 1996 because they were no longer “controlled” by the same corporations, or because the size of the U.S. parent’s total assets had dropped to less than \$500 million.

Second, the industrial mix of the 7,500 largest CFC’s is not representative of the industrial mix of all CFC’s controlled by U.S. corporations reporting \$500 million or more in assets. Because the largest 7,500 CFC’s are defined by CFC asset size, a greater percentage of these CFC’s are involved in business

activities that are more capital-intensive (i.e., require larger amounts of assets). Thus, the large CFC’s are engaged primarily in manufacturing or in finance, insurance, and real estate activities. While CFC’s classified in manufacturing, and in finance, insurance, and real estate accounted for 69.5 percent of the 7,500 largest CFCs for 1996, only 49.2 percent of the 37,970 total for active CFC’s of U.S. corporations with \$500 million or more in total assets were classified in these industrial divisions [6]. In contrast, the service and the wholesale and retail trade divisions tend to be underrepresented among the largest CFC’s. The services and wholesale and retail trade divisions accounted for 6.3 and 20.5 percent, respectively, of all active CFC’s controlled by parents with \$500 million or more in total assets, but 9.3 percent and 13.9 percent, respectively, of the largest CFC’s.

Finally, statistics previously published by *Statistics of Income* for tax years before 1986 were for all CFC’s controlled by U.S. parent corporations, not just the largest CFC’s. Therefore, the statistics for these years include smaller and inactive CFC’s. Comparisons between statistics on the largest CFC’s and statistics for years before 1986 should be made with caution.

In addition, caution should be used when comparing data by industrial group. CFC’s were classified by industry based on their principal business activity as reported on Form 5471. However, assets, receipts, and profits may have also been related to secondary business activities. It is not possible to measure the extent of these secondary business activities, because these activities were not detailed on Form 5471.

### Explanation of Selected Terms

*Active versus inactive Controlled Foreign Corporations.*—In general, a CFC was considered “active” if earnings and profits, income taxes, receipts, expenses, or certain transactions between the CFC and its majority shareholder were reported on Form 5471, *Information Return of U.S. Persons With Respect to Certain Foreign Corporations*. The filing of Form 5471 was required even if a CFC was dormant or inactive for 1996.

*Controlled Foreign Corporation.*—A foreign corporation was “controlled” if more than 50 percent of the value of its outstanding voting stock, or the value of all its outstanding stock, was owned (di-

## Controlled Foreign Corporations, 1996

rectly, indirectly, or constructively) by U.S. shareholders on any day during the foreign corporation's tax year. A U.S. shareholder for these purposes was defined as a "U.S. person" owning 10 percent or more of the foreign corporation's voting stock. A U.S. person could be a U.S. citizen or resident, a domestic partnership, a domestic corporation, or an estate or trust (other than a foreign estate or trust whose income from sources outside the United States was not includable in the beneficiaries' gross income). The current definition of a Controlled Foreign Corporation is given in Internal Revenue Code section 957. Ownership attribution rules are discussed in section 957(a) and 958. For purposes of these statistics, a foreign corporation was "controlled" only if a single U.S. corporation satisfied the ownership requirements for an uninterrupted period of at least 30 days. A CFC could be owned indirectly through a partnership if the U.S. corporation was a controlling partner. To the extent possible, these CFC's were also included in the statistics.

*Country of incorporation.*—The country of incorporation of a CFC was not necessarily the principal place of business. For 1996, there were 226 (3.0 percent) of the 7,500 largest CFC's whose principal places of business were in countries other than their respective countries of incorporation. Tables 2 and 3 provide data by country of incorporation; data by principal place of business are not included in these statistics.

*Current earnings and profits.*—Current "earnings and profits" represent the difference between total earnings and profits of the foreign corporation at the end of the current year (before reduction by dividends paid during the year) and the accumulated earnings and profits of the corporation at the beginning of the year. Although current earnings and profits typically are an after-tax measure of profits, they are shown in this article both before and after taxes. Earnings and profits are a tax concept referring to the economic capacity of a corporation to make a distribution to shareholders that is not a return of capital. The concept is similar to the notion of retained earnings. The term "earnings and profits" is not specifically defined in the Internal Revenue Code. In those instances where current earnings and profits were not reported for the foreign corporation, net income per books was used in the place of missing earnings and profits data.

*Distributions from earnings and profits.*—A distribution comes first from current earnings and profits and then from accumulated earnings and profits.

*Income taxes.*—Income, war profits, and excess profits taxes paid or accrued to the United States and to any foreign country or U.S. possession, following U.S. generally-accepted accounting principles (GAAP) for the annual accounting period were reported as income tax by the CFC.

*OPEC countries.*—The members of the Organization of Petroleum Exporting Countries (OPEC) for 1996 were: Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, and Venezuela.

*Previously taxed earnings and profits.*—This includes any earnings and profits amounts that were taxed in a prior year but not distributed. Previously taxed earnings and profits include amounts related to Subpart F income (see definition below), earnings related to investments in certain U.S. property (Internal Revenue Code section 959(c)(1)(A)), and earnings invested in excess passive assets (Internal Revenue Code section 959(c)(1)(B)).

*Profit margin.*—For purposes of this article, a CFC's profit margin is the ratio of current earnings and profits (less deficit) before taxes to total receipts.

*Return on assets.*—For purposes of this article, a CFC's return on assets is the ratio of current earnings and profits (less deficit) before taxes to average total assets.

*Subpart F income.*—The Internal Revenue Code stipulates specific cases in which earnings and profits are deemed to have been paid by a CFC to the U.S. shareholder. These "deemed" distributions are taxable, even though the income may not have been repatriated to the United States in the form of an actual dividend. For 1996, the Subpart F income of a CFC included: (1) certain insurance income; (2) "foreign base company" income; (3) international boycott participation income; (4) illegal bribes and other payments made to government officials that were unlawful under the Foreign Corrupt Practices Act of 1977; and (5) income derived from a country which was not recognized by the United States, with which the United States did not conduct or had severed diplomatic relations, or which repeatedly provided support for acts of international terrorism. See Sections 951 and 952 of the Internal Revenue Code.

## Controlled Foreign Corporations, 1996

*Total assets.*—Three types of total assets are shown in the statistics: beginning-of-year, end-of-year, and average. Average total assets are used for both time series and ratio comparisons. Average total assets are calculated by using the sum of beginning and ending assets divided by two. However, not all of the 7,500 largest CFC's reported both beginning and end-of-year assets: 129 CFC's reported beginning-of-year assets only, and 440 CFC's reported end-of-year assets only. For these cases, average total assets were made equal to the single reported amount.

*Total receipts.*—Total receipts equal business receipts (gross receipts from sales and operations), plus income from investments. In the statistics reported prior to 1990, business receipts were used to describe the larger of gross receipts from sales and operations and "total income." The latter is a tax return concept used to describe the sum of business receipts less cost of sales and operations (i.e., gross profit), plus income (less loss) from investments.

### Notes and References

- [1] Statistics of Income studies of Controlled Foreign Corporations are conducted for even-numbered tax years. For 1994 data, see Schwartz, Ruth, "Controlled Foreign Corporations, 1994," *Statistics of Income Bulletin*, Winter 1995-96, Volume 15, Number 3.

- [2] In part, this is due to using the amount of total assets to determine the largest CFC's to be included in the study. Capital-intensive industries, such as manufacturing and finance, insurance, and real estate, are more likely to have larger amounts of assets. See *Data Sources and Limitations* for additional information.
- [3] The current definition of a Controlled Foreign Corporation is given in Internal Revenue Code section 957. Ownership attribution rules are discussed in section 958.
- [4] Based on unpublished data. For 1996, there were 1,499 U.S. corporation returns with 37,970 active controlled foreign corporations. These controlled foreign corporations held \$3,007.1 billion (based on end-of-year balances) in total assets, while beginning-of-year assets were \$2,550.6 billion. For 1996, the 37,970 active controlled foreign corporations reported total receipts of \$1,967.6 billion, current earnings and profits before taxes of \$155.6 billion, current earnings and profits after taxes of \$118.0 billion, and distributions out of earnings and profits of \$80.4 billion.
- [5] Based on unpublished data.

\*\* Not shown to avoid disclosure of information on specific corporations. However, the data are included in the appropriate totals.

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial group. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporations.

<sup>2</sup> See definition of average total assets in "Explanation of Selected Terms."

NOTE: Detail may not add to totals because of rounding and because data are shown for selected industries only.

\*\*Not shown to avoid disclosure of information on specific corporations. However, the data are included in the appropriate totals.

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one country of incorporation.

<sup>2</sup> See definition of average total assets in "Explanation of Selected Terms."

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.

\*\*Not shown to avoid disclosure of information on specific corporations. However, the data are included in the appropriate totals.

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial group or more than one country. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporation.

<sup>2</sup> See definition of average total assets in "Explanation of Selected Terms."

<sup>3</sup> Includes "Nature of business not allocable" not shown separately.

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.
