

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 2000

by Heather R. Duffy and William P. Jauquet

Statistics of Income studies of the transactions between large “foreign-owned domestic corporations” (see Explanation of Selected Terms) and related foreign persons, conducted annually beginning with Tax Year 1988 and then biennially beginning with 1994, reflect the substantial interest in direct foreign investment in the United States. For Tax Year 2000, large foreign-owned domestic corporations reported receipts of \$265.3 billion and payments of \$480.2 billion in transactions with 12,276 related foreign persons. These 612 large domestic corporations (in general, each with total receipts of \$500 million or more) also reported outstanding balances at the end of the accounting periods of \$418.2 billion in loans received from, and \$97.0 billion in loans granted to, the same related foreign persons.

Receipts and Payments by Industrial Sectors
Foreign-owned domestic corporations classified in the finance and insurance sector reported the largest amount of nonloan transactions (\$309.9 billion or 41.6 percent of the total receipts and payments), but with the third largest number of related foreign persons (613 persons or 5.0 percent of the total). These finance and insurance corporations accounted for \$154.3 billion (58.2 percent) of receipts and \$155.6 billion (32.4 percent) of payments. Corporations classified in the manufacturing sector reported the second largest amount of nonloan transactions, \$207.8 billion (27.9 percent), despite having transactions with the largest number of related foreign persons (7,150 persons or 58.2 percent). These foreign-owned manufacturers accounted for \$66.0 billion (24.9 percent) of receipts and \$141.8 billion (29.5 percent) of payments. Transactions by foreign-owned domestic corporations classified in the wholesale trade sector were the third largest amount (\$189.4 billion or 25.4 percent). These foreign-owned wholesalers accounted for \$32.1 billion (12.1 percent) of receipts and \$157.3 billion (32.8 percent) of payments. This sector also accounted for transactions with the second largest number of related

foreign persons (2,306 or 18.8 percent).

It is important to note that the number of related foreign persons is not necessarily the same as the number of transactions. A related foreign person may have had multiple transactions with a

foreign-owned domestic corporation during an accounting period included in this study. The number of transactions were not available for this study.

Over 77 percent of the 612 large foreign-owned domestic corporations were classified in either the manufacturing, wholesale trade, or finance and insurance sectors. The remaining returns, totaling 23 percent, were divided, in decreasing order, among: retail trade; information; transportation and warehousing; management of companies and enterprises; mining; construction; administrative and support and waste management and remediation services; accommodation and food services; professional, scientific, and technical services; real estate and rental and leasing; utilities; health care and social assistance; and other services (Figure A and Table 1).

Nonloan Receipts and Payments

Over half of the related foreign persons were “residents” (see Explanation of Selected Terms) of one of the following ten countries: the United Kingdom, Canada, Japan, Germany, France, the Netherlands, Australia, Sweden, Mexico, and Singapore. Nonloan transactions with residents of these ten countries accounted for 90.0 percent of amounts received and 82.7 percent of amounts paid for Tax Year 2000 (Table 2). Transactions with related persons resident in the United Kingdom were the largest source of amounts received, accounting for \$89.5 billion, or 33.7 percent of the total. United Kingdom companies classified in the finance and insurance sector reported 89.2 percent of these receipts, which were primarily from sales of stock in trade. Stock-in-trade transactions of a financial corporation are primarily purchases and sales of securities held in inventory. Transactions with related persons resident in Japan were the largest source of amounts paid, accounting

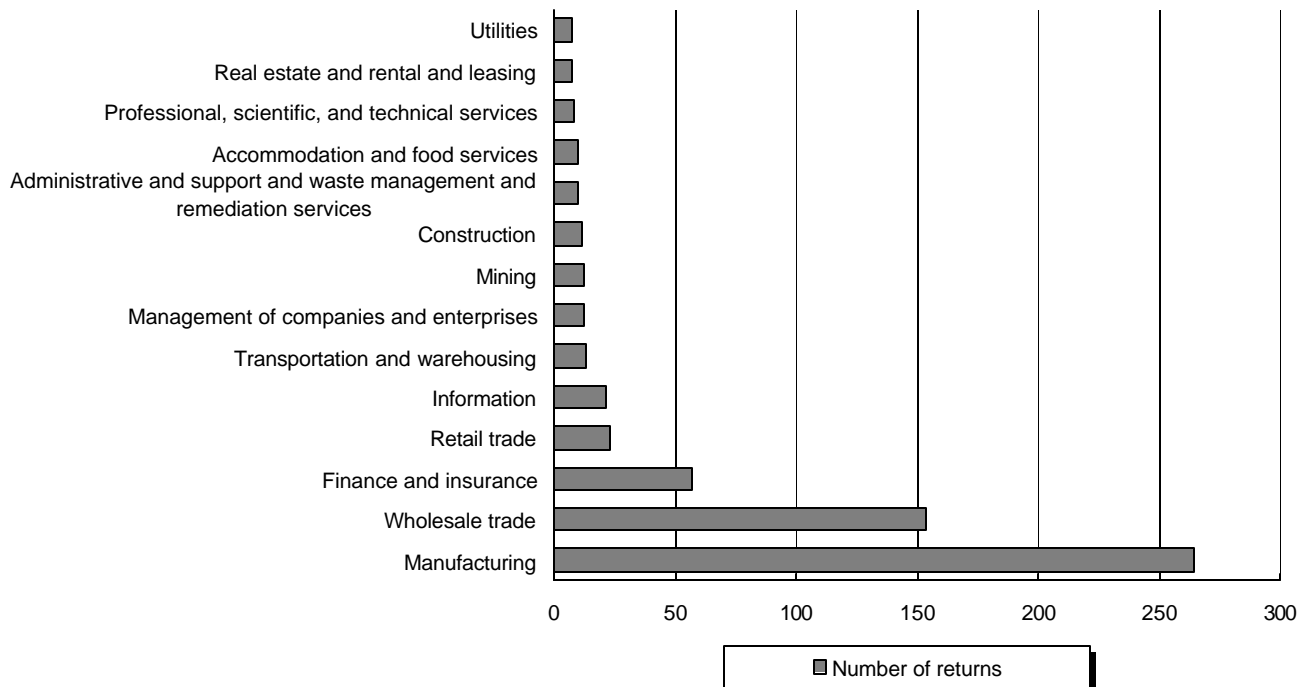

Foreign-owned domestic corporations classified in the finance and insurance sector reported the largest amount of nonloan transactions.

Heather R. Duffy and William P. Jauquet are economists with the Corporation Returns Analysis Section. This article was prepared under the direction of Martha Shiley, Chief.

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 2000

Figure A

Foreign-Owned Domestic Corporations with Total Receipts of \$500 Million or More and with Form 5472: Number of Returns, by NAICS Industrial Sector of Domestic Corporation, Tax Year 2000

NOTES: NAICS is the abbreviation for the North American Industry Classification System. The health care and social assistance and other services sectors are not shown to avoid disclosure of information for specific corporations.

for \$124.4 billion, or 25.9 percent of the total. For Japan, companies classified in the wholesale trade sector reported 71.4 percent of these payments, which were primarily from purchases of stock in trade.

Nonloan transactions with related persons resident in the Netherlands were the second largest source of total amounts received, with \$68.1 billion or 25.6 percent of the total. The second largest dollar volume of payments by domestic corporations was made to residents of the United Kingdom, accounting for \$94.9 billion, or 19.8 percent. The majority of these transactions were reported in the finance and insurance sector, \$65.1 billion in receipts from the Netherlands (95.6 percent) and \$78.1 billion in payments to the United Kingdom (82.3 percent).

Nonloan transactions with related persons resident in Japan, Canada, Germany, France, and Singapore, in decreasing order, accounted for an additional 27.9 percent of the total amount received by large foreign-owned domestic corporations.

Transactions with related foreign persons resident in the Netherlands, Canada, Germany, South Korea, France, and Switzerland, in decreasing order, accounted for an additional 39.9 percent of the total amount paid by the corporations (Table 3).

Stock-in-trade transactions generally dominated both the reported amounts received and paid. Stock-in-trade transactions involve the inventory held for sale during the ordinary course of business. Sales of stock in trade accounted for 60.0 percent of the nonloan total amount received from related foreign persons, and purchases of stock in trade accounted for 72.3 percent of the nonloan total amount paid to related foreign persons. Foreign-owned domestic corporations reported 32.9 percent of all stock-in-trade transactions with related persons resident in the United Kingdom. These foreign-owned domestic corporations reported stock-in-trade transactions of \$83.8 billion (52.6 percent of the total) received from, and \$82.7 billion (23.8 percent of the total) paid to,

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 2000

related foreign persons in that country. Sales and purchases of stock in trade also comprised the largest amounts of nonloan transactions with related persons residing in Canada, Mexico, Germany, Japan, and Singapore, among other countries.

Foreign-owned domestic corporations classified in the finance and insurance sector reported the majority of sales of stock in trade, with related persons resident in the United Kingdom alone accounting for 49.1 percent (\$78.2 billion) of the total sales. Foreign-owned domestic corporations classified in the wholesale trade sector reported the largest part of purchases of stock in trade, with related persons resident in Japan alone accounting for \$84.8 billion of purchases by the companies, which is 24.4 percent of the total purchases of stock in trade.

The largest share of the amounts received by foreign-owned domestic corporations from insurance transactions came from related persons resident in Canada, while the largest part of the amounts paid by these companies associated with insurance transactions were to related persons resident in Switzerland. Foreign-owned domestic companies reported that related persons resident in Canada accounted for \$0.5 billion of the \$1.2 billion total amount for premiums received by the companies (40.6 percent). These same companies also reported that related persons resident in Switzerland accounted for \$0.4 billion of the \$2.0 billion total amount for insurance premiums paid by the companies (21.3 percent).

Amounts Borrowed and Loaned

Based on their year end balances, foreign-owned domestic corporations reported owing \$418.2 billion in loans from related foreign persons, compared with \$278.3 billion at the beginning of the year, an increase of 50.3 percent. Loans made by foreign-owned domestic corporations to related foreign persons were less than one-fourth the size of amounts borrowed. There were \$97.0 billion in loans to related foreign persons outstanding at the end of Tax Year 2000, an increase of 90.6 percent from the beginning balance of \$50.9 billion. These borrowing differences are reflected in the interest income and expenses of foreign-owned domestic corporations. For all of Tax Year 2000, interest paid by these domestic corporations to related foreign persons of \$26.1 billion far exceeded the \$4.6 billion of interest they received.

Transactions with related persons resident in the United Kingdom accounted for the largest single amount of outstanding borrowing activity by foreign-owned domestic corporations, with \$123.1 billion in amounts borrowed at the end of the tax year, 29.4 percent of the total. Amounts borrowed from related persons resident in the Netherlands and Switzerland ranked second and third, respectively. Related persons resident in the Netherlands accounted for \$55.5 billion (13.3 percent) of the total amounts borrowed by the companies, and related persons resident in Switzerland accounted for \$55.1 billion (13.2 percent) of the total amounts borrowed. These totals were followed, in decreasing order, by lesser amounts reported as loaned from related persons resident in France, Luxembourg, Ireland, Canada, and Germany, which combined for 35.8 percent of the total.

On the lending side, related persons resident in the United Kingdom also borrowed the most from foreign-owned domestic corporations, with balances of \$31.5 billion at the end of the tax year, or 32.5 percent of the total. Related persons resident in Switzerland, France, Canada, and the Netherlands, in decreasing order, also accounted for large proportions of the residual balance of loans. The combined total for related persons resident in these four countries was \$45.8 billion, 47.2 percent of the total.

Comparison of Selected Tax Years 1991–2000

Figure B presents selected data for large foreign-owned domestic corporations filing Forms 5472 for selected Tax Years 1991 through 2000 [1]. The number of foreign-owned domestic corporations (i.e., “number of returns” shown in the statistics) stayed relatively flat between Tax Years 1998 and 2000, with an increase of less than 1 percent. However, the number of related foreign persons increased 7.9 percent during the same period. Total nonloan receipts decreased from Tax Year 1998 to 2000 by 10.9 percent, while total nonloan payments showed an increase of 20.4 percent. The decrease in amounts received was generally due to a large decrease for sales of stock in trade, which showed a decline of 38.6 percent. The large decrease in sales of stock in trade was primarily due to a large decrease in the finance and insurance sector. Sales of stock in trade last declined between 1994 and 1996, then showed a large increase from 1996 to 1998. Purchases of stock in trade stayed relatively flat

NOTE: Detail may not add to totals because of rounding.

between 1998 and 2000, again echoing the stability of the numbers between Tax Years 1994 and 1996, which was then followed by a significant increase between 1996 and 1998.

Amounts of interest received by large foreign-owned domestic corporations continued to rise, increasing by 70.3 percent in Tax Year 2000 over Tax Year 1998. This is commensurate with the increase in loans to related foreign persons, which increased 73.8 percent for 2000. Interest paid also continued its strong upward trend, which began in 1993, showing an increase of 80.0 percent for Tax Year 2000.

Once again, this is consistent with the increase in amounts borrowed from related foreign persons, which showed an increase of 102.5 percent for 2000. It is important to note, however, that beginning and ending loan balances are balance sheet "snapshots" at the beginning and ending of a particular period of time, while interest received and interest paid are income statement concepts that include all transactions that took place within the accounting period.

There are caveats to these year-to-year comparisons of the data. Foreign-owned domestic corporations with Forms 5472 attached that reached the

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 2000

\$500- million receipts threshold for the first time during Tax Year 2000 were included in the statistics for this tax year, and some previously included foreign-owned domestic corporations that were subject to merger and acquisition activities were removed from the current statistics. Moreover, patterns of transactions between a foreign-owned domestic corporation and related foreign persons may or may not recur on an annual (or even less frequent) basis. Additional information about the year-to-year comparability of the data is presented below under Sample Selection, Data Sources, and Limitations.

Legislative History

Even before the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), U.S. parent corporations were required to report transactions with and between their foreign affiliates.

However, no similar reporting requirements existed for transactions between domestic subsidiaries (i.e., those incorporated in the United States) of foreign corporations, or between foreign corporations (i.e., those incorporated abroad) engaged in a U.S. trade or business, and their related foreign persons. Concerned that these related party transactions could be manipulated to avoid U.S. taxation, Congress added new reporting requirements as part of TEFRA to provide the Internal Revenue Service with more information about the nature and amount of these transactions. Under Internal Revenue Code section 6038A, domestic corporations that are 25 percent or more owned by a foreign person, as well as foreign corporations engaged in a U.S. trade or business, have to report transactions with related foreign persons. The transactions are reported on Form 5472, *Information Return of a 25 Percent Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business*. Form 5472 had to be filed with corporation income tax returns for tax years beginning after December 31, 1983.

Sample Selection, Data Sources, and Limitations

The foreign-owned domestic corporation statistics were collected annually from 1988 to 1993 and have been collected biennially since 1994 [2]. The Tax Year 2000 statistics include data from Forms 5472, in general, for all U.S. corporations with total receipts of \$500 million or more, which were owned (25

percent or more) by a foreign person and reported transactions with related foreign persons.

The corporation Statistics of Income study is based on a sample of over 138,000 income tax returns chosen from 5.0 million returns filed for Tax Year 2000, i.e., accounting periods ending July 2000 through June 2001. These returns were selected after administrative processing was complete, but before any audit examinations [3]. From the corporate sample, those domestic corporations with total receipts of \$500 million or more and Forms 5472 attached were used for the statistics presented in this article. Returns with Form 5472 attached that were included in previous studies are also included in these statistics, even if they fell below the \$500 million receipts threshold. Foreign corporations (filing Form 1120F) engaged in a U.S. trade or business were not included in these statistics, even though they may have filed Forms 5472 for transactions with related foreign persons [4]. Corporation income tax returns with total receipts of \$500 million or more for which statistics are presented were included among the returns prescribed for sampling at the 100 percent rate. Thus, the data are not subject to sampling variability, although they may be subject to nonsampling error.

For 2000, the 612 “large” foreign-owned domestic corporations filing Forms 5472 comprised 70.8 percent of the total assets and 67.0 percent of the total receipts reported by all 25 percent or more foreign-owned domestic corporations. Total assets and total receipts of the large foreign-owned domestic corporations account for 9.5 percent of the total assets and 8.8 percent of the total receipts reported by all domestic corporations (Figure C).

The industry code used to classify returns for Figure A and Tables 1 and 3 represents the principal business activity (i.e., the activity that accounted for the largest portion of total receipts as reported in the income statement) of the corporation filing the tax return. However, a given return may have been for a company engaged in several business activities or may have been a consolidated return filed for an affiliated group of corporations that conducted different business activities. To the extent that some consolidated (and nonconsolidated) returns were engaged in more than one type of business activity, transaction data in this article are not entirely related to the industrial activity under which they are shown.

For the first time in Tax Year 1998, corporate returns reported their principal business activities according to the North American Industry Classification System (NAICS). This system was developed as a result of the North American Free Trade Agreement (NAFTA) to standardize business classifications for the United States, Canada, and Mexico. NAICS divides the economy into twenty sectors, with an emphasis on production processes. The statistics presented in this article are based on sixteen of these sectors [5]. NAICS replaced the Standard Industrial Classification (SIC) codes, which were used to classify corporations in past Statistics of Income studies, causing a break in the year-to-year comparability of the industrial data.

Explanation of Selected Terms

Amounts Borrowed and Loaned.--Because the beginning and ending balances, in general, reflect only the amounts outstanding at the beginning and end of the accounting period, respectively, these amounts do not reflect amounts borrowed and loaned in transactions that took place entirely within the accounting period.

Country of Residence of a Related Person.--Based on the income tax regulations related to Internal Revenue Code section 6038A, Form 5472 requires the reporting of each country in which a related person files an income tax return as a resident under the tax laws of that country. The statistics in

Tables 2 and 3 are based on this reported residence, and, within this meaning, the related foreign person is a resident of a particular foreign country.

Foreign-Owned Domestic Corporations.--For purposes of these statistics, a domestic corporation was considered foreign-owned if at least 25 percent of the total voting power of all classes of stock permitted to vote, or 25 percent of the total value of all classes of stock of the corporation, was owned, directly or indirectly, at any time in the tax year, by a single foreign shareholder (generally a foreign parent corporation). This is in contrast to the other Statistics of Income data on "foreign-controlled" domestic corporations, which are based on 50-percent or more ownership by a foreign person [6].

Foreign Person.--The term "foreign person" generally includes: (1) any partnership, association, company, or corporation that was not created or organized under the laws of the United States or of any of its States; (2) any individual who is not a citizen or resident of the United States; (3) any individual who is a citizen of a U.S. possession, but is not otherwise a U.S. citizen or resident; and (4) any foreign trust, estate, or government. For the most part, the foreign persons referred to in this article are corporations. See also "Related Foreign Person," below.

Number of Foreign Persons.--The data shown in the figures and tables, in general, represent the number of foreign persons reported on the Forms 5472 appended to the 612 income tax returns filed by

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 2000

domestic corporations with \$500 million or more in total receipts (defined below) that were 25-percent-or-more owned by a foreign person. Domestic member corporations of an affiliated group that filed a consolidated income tax return could also join in filing a consolidated Form 5472 for transactions with a given related foreign person. However, some affiliated domestic corporations that could have filed consolidated Forms 5472 filed separate forms instead. When these forms were identified during statistical processing, the information on them was combined, and the result treated as a single Form 5472 for consistency. To this extent, the "number of persons" understates the actual number of Forms 5472 attached to the 612 income tax returns included in the statistics.

OPEC Countries.--Summary statistics are provided in Table 2 for the following Middle Eastern countries that were members of the Organization of Petroleum Exporting Countries (OPEC) for 2000: Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates. Data for non-Middle Eastern OPEC members are not shown by country.

Related Foreign Person.--Persons related to the domestic corporation that filed a Form 5472 include the 25-percent-or-more foreign shareholder, any foreign person who was related to the reporting corporation or the 25-percent-or-more shareholder (as described in Internal Revenue Code sections 267(b) or 707(b)), or any other foreign person who was related to the reporting corporation within the meaning of Internal Revenue Code section 482 (covering the allocation of income and deductions among related taxpayers) and the associated regulations. See also "Foreign Person," above, for the definition of "person."

Total Receipts.--Total receipts are the total income of the domestic corporation as reported in the U.S. income tax return. In general, they are derived from the tax return as follows: (1) gross taxable receipts (before deduction of cost of sales and operations, and ordinary and necessary business expenses), plus (2) tax-exempt interest received from State and local government obligations, less: (1) net losses from sales of property other than capital assets and (2) certain taxable income from related foreign corporations only constructively received.

Notes and References

- [1] Form 5472 statistics for Tax Years 1988 through 1990 covered all foreign-owned domestic corporations with total receipts of \$1 billion or more. Statistics for Tax Years 1991 through 1994, 1996, 1998, and 2000 covered all foreign-owned domestic corporations with total receipts of \$500 million or more. Beginning with 1994, the Form 5472 study is conducted biennially. Consequently, data for 1991 and thereafter are not comparable to the earlier studies.
- [2] Additional information about Statistics of Income Form 5472 studies for Tax Years 1988 through 1998 may be found in the following *Statistics of Income Bulletin* issues: Tax Year 1988, Summer 1992, Volume 12, Number 1; Tax Year 1989, Spring 1993, Volume 12, Number 4; Tax Year 1990, Summer 1994, Volume 14, Number 1; Tax Year 1991, Summer 1995, Volume 15, Number 1; Tax Year 1992, Fall 1996, Volume 16, Number 2; Tax Year 1993, Fall 1997, Volume 17, Number 2; Tax Year 1994, Winter 1997-1998, Volume 17, Number 3; Tax Year 1996, Fall 1999, Volume 19, Number 2; and Tax Year 1998, Fall 2001, Volume 21, Number 2.
