Librarians: Information Experts in the Information Age

by Olivia Crosby

Editor's Note: The following excerpt focuses on the rewards and drawbacks of careers as librarians. The original article appeared in the winter 2000-01 edition of the Occupational Outlook Quarterly, published by the U.S. Department of Labor, Bureau of Labor Statistics. The entire article is available online at <stats.bls.gov/opub/ooq/ooqhome.htm>.

For most librarians, the greatest benefits of the job are not financial or technological. And neither are many of its detriments. Librarians experience the unique perks and problems of information system management along with the more common rewards and drawbacks that come with public service.

Rewards

For book lovers, the most obvious advantage to library work is the chance to be surrounded by books and reading. Librarians are often the first to see new books and the first to checkout copies. For some, extra lending privileges come with the job.

Librarians also have the chance to satisfy their curiosity. "I learn every day," says corporate librarian Lee Stocker of Dow Chemical Company in Midland, Mich. "I can keep up with the latest advances in so many different fields." Sheila Rider, the children's services manager at the Cumberland County Public Library and Information Center in Fayetteville, N.C., feels the same way. "The questions we're

Career Trends to Consider

The number of librarian jobs is projected to grow about 5 percent between 1998 and 2008. This rate is slower than the average for all occupations. But a slower than average growth rate does not necessarily mean poor prospects. By 2008, librarians are expected to hold more than 159,000 jobs—7,000 more than they did in 1998.

Also, many experienced librarians are expected to retire, switch occupations, or leave the occupation permanently for other reasons. This will create about 39,000 job openings for new librarians between 1998 and 2008.

asked are so varied," she says. "This job is perfect for anyone interested in learning about the world.

For reference librarian Norma Copes, who maintains the art and career sections of the public library in La Porte, Ind., one of the best parts of the job is the detective work she does. "I love getting a reference question and thinking, 'How will I even approach this?'" she says. "It's a little like going on a scavenger hunt." And a successful search can bring high praise from patrons, especially when it helps with homework. "If you help a child find a book for an assignment, parents think you're just wonderful," says Rider.

Variety also makes library work interesting. Bill Jarvis, a technical services librarian at the public library in Harris County, Texas, relishes the diversity of his job. "I see books about every possible subject," he says. It's common for a science book to cross his desk on the same day as a bestseller from the fiction rack.

The Internet has added to the mix. "People ask the most amazing ques-

tions now that the Internet is popular," says Copes. She explains that they expect more answers because so much information is available.

Many librarians thrive on the orderliness of their work. They like organizing a jumble of materials and seeing details fall into place. Cataloger Jane Jacobs in the Queens Borough Public Library, says that "creating order out of chaos" is a prime enjoyment.

Flexible schedules are another plus. Many librarians work part-time—in fact, librarians have one of the highest rates of part-time work. Many public and academic libraries are open on weekends and evenings, giving librarians a chance to work nonstandard hours. School librarians often work only when school is open.

Flexibility extends to geography, too. There are libraries in cities, towns, and schools throughout the country, so librarian jobs are in nearly every urban, rural, and suburban setting imaginable.

Librarians also cite the chance

to be of service as an important job benefit. "I like seeing the information I uncover make an impact," says corporate librarian Marie Tirados, manager of the Business Information Center at Arthur Andersen Consulting in New York. Doug Kiker, reader services librarian at the U.S. National Library of Medicine, agrees, "When people have an urgent need to know something, it gives you a good feeling to be able to help them."

And helping people extends beyond finding facts. "I have the opportunity to open up new worlds for people," says Roberta Sibley, a school librarian in Birmingham, Mich. As Fred Fishel, a public services librarian at the public library in Queens, N.Y., puts it, "There's nothing like seeing the 'Aha!' moment. Helping someone discover something and achieve a new understanding is the most rewarding part of my work."

Drawbacks

Like all occupations, librarianship has drawbacks. Some librarians feel the stress of time pressure, especially when patrons expect the speed of Internet searches. "People come in with large projects and a deadline only hours away," says Tirados. Usually, she enjoys the rush—especially when she's working with a team of librarians to get the job done—but sometimes, she feels harried.

Catalogers, too, face time-related stress. Often, materials come into the library faster than they can be cataloged, saddling librarians with a work queue. "Backlogs are a challenge," says Jacobs. "I want to get them done fast because if I'm working on a book, no one can read it until I finish cataloging it."

The fast pace means that many librarians can't find time to read the books they organize. At times, some miss the bookish emphasis of traditional library work. "In high schools, we can't have as many reading programs as we used to because information technology takes so much teaching time," says Sibley.

Another drawback is dealing with troublesome patrons. The most unpleasant part of Fishel's job is handling annoyed customers. Especially difficult is requesting fines for overdue books. Occasionally, patrons berate librarians at the circulation desk.

Sibley also has a few unruly patrons at school. Stereotypes to the contrary, she says, hers isn't a quiet job. Sibley likes the energy, but occasionally she has to enforce library etiquette.

Library work has some physical demands, too. Although some library materials are digital, reference librarians still lift and carry books, and some librarians climb ladders to reach high stacks. Librarians sometimes shelve books themselves.

Keeping up with change can also be hard work. Librarians undergo constant training as new tools emerge. For many librarians, technological innovation is both stimulating and tiring. "I think it's exciting to see all the new things we can do," says Copes, "but as a librarian, you can spend your whole life chasing technology."
