

APPENDIX**PEER REVIEW**

A peer review panel was assembled for 1,1,2-trichloroethane. The Panel consisted of the following members: Dr. James V. Bruckner, Associate Professor and Director of Toxicology, University of Georgia College of Pharmacy; Dr. Richard J. Bull, Associate Professor of Pharmacology/Toxicology, University of Washington; Dr. Mildred Christian, Argus Research Laboratories; and Dr. Curtis Klaasen, University of Kansas. These experts collectively have knowledge of 1,1,2-Trichloroethane's physical and chemical properties, toxicokinetics, key health end points, mechanisms of action, human and animal exposure, and quantification of risk to humans. All reviewers were selected in conformity with the conditions for peer review specified in the Superfund Amendments and Reauthorization Act of 1986, Section 110.

A joint panel of scientists from ATSDR and EPA has reviewed the peer reviewers' comments and determined which comments will be included in the profile. A listing of the peer reviewers' comments not incorporated in the profile, with a brief explanation of the rationale for their exclusion, exists as part of the administrative record for this compound. A list of databases reviewed and a list of unpublished documents cited are also included in the administrative record.

The citation of the peer review panel should not be understood to imply their approval of the profile's final content. The responsibility of the content of this profile lies with the Agency for Toxic Substances and Disease Registry.
