

Annex 3

Products that are Currently Eligible for Duty-Free Treatment Under GSP

The following is a list of products currently eligible for duty-free treatment if imported from a GSP beneficiary. Annex 2 contains a list of additional products, some of which (those with an A+ under GSP Status) are currently eligible for GSP treatment if imported from a GSP least- developed beneficiary developing country (those countries with an * under the GSP list in Annex 1).

For this Annex, if an “A” is listed under “Special” it means the product is eligible for duty-free treatment for imports from all GSP beneficiary countries. An A* indicates articles that are GSP-eligible except for imports from one or more specific countries that have lost GSP eligibility for that article (this currently applies to very few articles from sub-Saharan African countries).
