Seminar  
**JAM**  
winter2009

## Weekly Seminar Series

at the Northwest Fisheries Science Center Auditorium  
Thursdays at 11 AM

- JAN 08** What is the Worst that Global Warming Has Done in the Past? **PETER WARD**  
Department of Biology  
University of Washington
- JAN 15** Learning from POPs: What Anthropogenic Chemicals Might Tell Us About the Puget Sound Ecosystem **JOEL BAKER**  
Department of  
Environmental Science  
University of Washington, Tacoma
- JAN 22** Foraging Ecology of Bowhead Whales in West Greenland **KRISTIN LAIDRE**  
Polar Science Center  
University of Washington
- JAN 29** Changes in Northwest Climate and Their Significance for Aquatic Organisms **PHIL MOTE**  
JISAO/CSES Climate  
Impacts Group  
University of Washington
- FEB 05** Habitat Use and Bioenergetics of Southern Resident Killer Whales **DAWN NOREN**  
Conservation Biology Division  
Northwest Fisheries Science  
Center
- FEB 12** Sixgill Shark Research at the Seattle Aquarium: A Brief Program Overview, and Preliminary Results **JEFF CHRISTIANSEN**  
Life Science  
The Seattle Aquarium
- FEB 19** Classmates.com Can't Match the Fishy Friendships of Old School Ties: Implications of Relatedness and Familiarity on Patterns of Social Organization in Fish **SIÂN GRIFFITHS**  
School of Biosciences  
Cardiff University
- FEB 26** Why Ecosystem Management is a Human Dimensions Phenomenon **MICHAEL ORBACH**  
Nicholas School Marine Science  
and Conservation  
Duke University
- MAR 05** Ecological and Genetic Mechanisms of Divergence in Threespine Stickleback **KERRY MARCHINKO**  
Zoology Department  
University of British Columbia
- MAR 12** Evolution in Ocean Data Collection - Gliders, Floats, and Other Wild Things Roaming the Seas **FRITZ STAHR**  
School of Oceanography  
University of Washington
