Table 2. Animals by Species and Initial Condition

Table 3. Live Animals to the Alaska Sea Life Center for Rehabilitation by Outcome

Table 4. Human Interaction: preliminary

Table 5. Animals by Area, Species, and Initial Condition

### **Summary**

Strandings of cetaceans and pinnipeds that occurred in Alaska waters and were reported to the National Marine Fisheries Service, Alaska Region (NMFS) are summarized here. Currently a total of 114 events are recorded, involving 117 individual animals. This data is subject to change as more information becomes available and with further review of the records; at this time level A reports are not yet available for at least 5 events (including one Minke whale).

Stranding events include animals found dead (floating and beach-cast) and reports of live stranded, mass stranded, abandoned, sick or injured animals. Human interactions like collisions, fishery interactions and entanglements are included. Known subsistence takes are not included, but suspected subsistence animals are in some cases included here (e.g., animals reported shot). Fishery observer reports are not included unless the animal was observed outside of statistical reporting protocols (and thus would not be included by the observer program as part of their watch data set).

Stranding events where the animal(s) could not be examined are included in the numbers below as long as the animal was at least identified as either cetacean or pinniped. Both unconfirmed and confirmed reports are compiled here.

Events involving two or more species are rare in the Alaska stranding data: two harbor porpoises were caught in a subsistence net this winter, and three Steller sea lions were found beach-cast. There were three unusual species strandings this year: an out of range Guadalupe fur seal and striped dolphin as well as a ribbon seal that was transported and released.

Further stranding information and references are available at the NMFS Alaska Region webpage:  
<http://www.fakr.noaa.gov/protectedresources/strandings.htm>

### **Acknowledgements**

This summary is made possible by the people who report stranding events and the efforts of the Alaska Marine Mammal Stranding Network.

## Tables

**Table 1.** Draft 2008 Alaska Region Stranding Reports by Initial Sighting Month, Number of Events, and Number of Animals.

Month	Events	Actual
Jan	3	3
Feb	1	1
March	2	2
Apr	6	6
May	22	22
June	27	27
July	20	20
Aug	16	18
Sept	7	7
Oct	8	8
Nov	1	2
Dec	1	1
Total	114	117

**Table 2.** Draft 2008 Alaska Region Marine Mammal Strandings by Initial Condition, Species, and Number of Animals.

	Initial Condition		
	Alive	Dead	Total
Beluga	1	19	20
Grey		2	2
Large cetacean		5	5
Humpback	15	4	19
Orca		1	1
Dall's porpoise		1	1
Sperm		1	1
Harbor porpoise		3	3
