

COASTAL ZONE MANAGEMENT

DEFINING THE FUTURE OF THE COASTAL NONPOINT PROGRAM

Workshop Proceedings and Continuing Effort to Redefine 6217

Omni Richmond Hotel

Richmond, VA April 28-May 1, 2003

This workshop (also known as the Richmond Workshop) is part of the ongoing efforts by the states, National Oceanic and Atmospheric Administration (NOAA), and Environmental Protection Agency (EPA) to implement coastal nonpoint source pollution control programs. Four workgroups were established with the express purpose of evaluating key issues and developing a set of recommendations. Each workgroup created an initial white paper to discuss issues, roles, and responsibilities.

Draft Implementation Papers

Subsequent to the conference, each workgroup began developing draft papers which focus on how to implement the recommendations that were developed. These papers will be listed here as they become available.
