

NOTICE OF OFFICE OF MANAGEMENT AND BUDGET ACTION

Date 04/08/2008

Department of Commerce  
National Oceanic and Atmospheric Administration  
FOR CERTIFYING OFFICIAL: Barry West  
FOR CLEARANCE OFFICER: Diana Hynek

In accordance with the Paperwork Reduction Act, OMB has taken action on your request received 11/25/2007

ACTION REQUESTED: Extension without change of a currently approved collection  
TYPE OF REVIEW REQUESTED: Regular  
ICR REFERENCE NUMBER: 200711-0648-007  
AGENCY ICR TRACKING NUMBER:  
TITLE: Reporting Requirements for the Ocean Salmon Fishery off the Coasts of Washington, Oregon, and California  
LIST OF INFORMATION COLLECTIONS: See next page

OMB ACTION: Approved with change  
OMB CONTROL NUMBER: 0648-0433  
The agency is required to display the OMB Control Number and inform respondents of its legal significance in accordance with 5 CFR 1320.5(b).

EXPIRATION DATE: 04/30/2011 DISCONTINUE DATE:

BURDEN:	RESPONSES	HOURS	COSTS

## 19. Certification for Paperwork Reduction Act Submissions

On behalf of this Federal Agency, I certify that the collection of information encompassed by this request complies with 5 CFR 1320.9

**NOTE:** The text of 5 CFR 1320.9, and the related provisions of 5 CFR 1320.8(b)(3), appear at the end of the instructions. *The certification is to be made with reference to those regulatory provisions as set forth in the instructions.*

The following is a summary of the topics, regarding the proposed collection of information, that the certification covers:

- (a) It is necessary for the proper performance of agency functions;
- (b) It avoids unnecessary duplication;
- (c) It reduces burden on small entities;
- (d) It used plain, coherent, and unambiguous terminology that is understandable to respondents;
- (e) Its implementation will be consistent and compatible with current reporting and recordkeeping practices;
- (f) It indicates the retention period for recordkeeping requirements;
- (g) It informs respondents of the information called for under 5 CFR 1320.8(b)(3):
  - (i) Why the information is being collected;
  - (ii) Use of information;
  - (iii) Burden estimate;
  - (iv) Nature of response (voluntary, required for a benefit, mandatory);
  - (v) Nature and extent of confidentiality; and
  - (vi) Need to display currently valid OMB control number;
- (h) It was developed by an office that has planned and allocated resources for the efficient and effective management and use of the information to be collected (see note in Item 19 of instructions);
- (i) It uses effective and efficient statistical survey methodology; and
- (j) It makes appropriate use of information technology.

If you are unable to certify compliance with any of the provisions, identify the item below and explain the reason in Item 18 of the Supporting Statement.

**SUPPORTING STATEMENT  
REPORTING REQUIREMENTS FOR THE OCEAN SALMON FISHERY OFF THE  
COASTS OF WASHINGTON, OREGON, AND CALIFORNIA  
OMB CONTROL NO.: 0648-0433**

**A. JUSTIFICATION**

**1. Explain the circumstances that make the collection of information necessary.**

Based on the management regime specified each year, designated regulatory areas in the commercial ocean salmon fishery off the coasts of Washington, Oregon, and California may be managed by numerical quotas (by salmon species). Quotas are necessary to ensure that the allowable levels of ocean harvest of salmon are not exceeded in these areas. To accurately assess catches relative to quota attainment during the fishing season, catch data by regulatory area must be collected in a timely manner. Requirements to land salmon within specific time frames and in specific areas may be implemented in the preseason regulations to aid in timely and accurate catch accounting for a regulatory area.

If unsafe weather conditions or mechanical problems prevent compliance with landing requirements, fishermen are exempt from these landing requirements so long as the appropriate notifications are made by at-sea radio and cellular telephone and information on catch and other required information is given. The preseason regulations will specify annually the contents and procedure of the notifications, and the entities receiving the notifications. The information collection is intended to be general in scope by leaving the specifics of the notifications for annual determination, thus providing flexibility in responding to salmon management concerns in any given year.

This federal collection of information concerning alternative reporting in unsafe conditions has implemented uniform reporting requirements across the entire geographic range of the commercial ocean salmon fishery and, thus, resolves the problem associated with reliance on each state to independently implement the same requirements in the territorial waters off of each state (Washington, Oregon, and California).

Authority for the collection is provided by: (1) **50 CFR §§ 660.408**, and (2) the **Magnuson-Stevens Fishery Conservation and Management Act of 1996, 16 USC 1801 et seq., as amended in 2006**, which states at 16 USC 1855(d) that "The Secretary shall have general responsibility to carry out any fishery management plan or amendment approved or prepared by him, in accordance with the provisions of this Act."

**2. Explain how, by whom, how frequently, and for what purpose the information will be used. If the information collected will be disseminated to the public or used to support information that will be disseminated to the public, then explain how the collection complies with all applicable Information Quality Guidelines.**

The alternative reporting information will be collected by a federal or state entity to be specified annually, and then transmitted to the appropriate state fishery agencies in a timely manner. The

specific contents of the reports and the procedure for submitting the reports will be specified annually, and will likely include the name of the vessel, port where delivery will be made, approximate amount of salmon (by species) on board, and estimated time of arrival.

Regular landings information, although required by NMFS, is already being collected by the states and thus is not counted in this collection as burden. The state fishery managers will use the information collected on vessel name, port of delivery, and estimated time of arrival to facilitate monitoring of the actual catch reports submitted in accordance with state landing requirements under existing state data collection and reporting systems.

As explained in the preceding paragraphs, the information gathered has utility. NMFS will retain control over the information and safeguard it from improper access, modification, and destruction, consistent with National Oceanic and Atmospheric Administration (NOAA) standards for confidentiality, privacy, and electronic information. See response #10 of this Supporting Statement for more information on confidentiality and privacy. The information collection is designed to yield data that meet all applicable information quality guidelines. Although the information collected is not expected to be disseminated directly to the public, results may be used in scientific, management, technical or general informational publications. Should NMFS decide to disseminate the information, it will be subject to the quality control measures and pre-dissemination review pursuant to Section 515 of Public Law 106-554.

**3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological techniques or other forms of information technology.**

Information is submitted via the available technology for at-sea radio and cellular telephone transmissions for reporting during unsafe collections.

Specific information on the reporting requirements is made available in a booklet of federal regulations which is printed each year. This booklet is mailed to licensed commercial fishermen in each state (Washington, Oregon, and California).

**4. Describe efforts to identify duplication.**

Current state reporting systems do not regularly collect this specific type of inseason radio report. This federal information collection requirement provides consistency in reporting throughout the area covered.

**5. If the collection of information involves small businesses or other small entities, describe the methods used to minimize burden.**

The burden on small entities to report information during unsafe conditions is minimized by requiring this alternative notification when unsafe conditions prevent normal compliance with landing requirements and notification procedures.

**6. Describe the consequences to the Federal program or policy activities if the collection is not conducted or is conducted less frequently.**

If the collection could not be conducted, a safe alternative to regulatory requirements would not be available to fishermen when dealing with unsafe weather conditions or mechanical problems. The collection is made on occasion as necessary, so thus could not be conducted less frequently.

The consequences of this collection not occurring would be the inaccurate management of the fishery during the fishing season. During normal conditions the collection of information by the states of Washington, Oregon, and California provide fishery managers with up to date catch information which is essential to the management of the fisheries. If this information was collected at the end of the season, all at once for example, there is the risk that the fisheries would exceed their quotas.

**7. Explain any special circumstances that require the collection to be conducted in a manner inconsistent with OMB guidelines.**

The collection will be conducted in a manner consistent with the OMB guidelines.

**8. Provide information on the PRA Federal Register notice that solicited public comments on the information collection prior to this submission. Summarize the public comments received in response to that notice and describe the actions taken by the agency in response to those comments. Describe the efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.**

A notice published in the Federal Register on June 15, 2007 (72 FR 33204) solicited public comment on this information collection renewal request. No comments were received.

The public as well as federal and state fishery management and enforcement agencies are consulted during all phases of the preseason process for setting the annual management measures in March and April. Public meetings, public hearings, and written comments provide interested persons the opportunity to express their views on the availability of data, the frequency of collection, the clarity of instructions, the amount of burden to be imposed, and ways to minimize the burden.

**9. Explain any decisions to provide payments or gifts to respondents, other than remuneration of contractors or grantees.**

Payment or gift to respondents is not provided by the information collection.

**10. Describe any assurance or confidentiality provided to respondents and the basis for assurance in statute, regulation, or agency policy.**

The information will be collected by specified federal or state entities and forwarded to the appropriate state fishery agencies. Assurance of confidentiality to respondents is based on the

policies of the federal and/or state agencies involved. The information collected by NMFS is confidential under section 402(b) of the Magnuson-Stevens Act (16 U.S.C. 1881, *et seq.*). It is also confidential under NOAA Administrative Order 216-100, which sets forth procedures to protect confidentiality of fishery statistics.

**11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.**

Not applicable.

**12. Provide an estimate in hours of the burden of the collection of information.**

The estimated burden of the collection of information during unsafe condition is as follows:

The number of respondents will vary each year depending on the management regime adopted and the regulatory areas subject to the collection of information, but is expected to average 40 annually; these respondents are expected to respond once each fishing season. Therefore, a total of 40 responses is expected annually. Response time per respondent is expected to average 15 minutes. Total annual response time is estimated to be 10 hours (40 x 15/60).

Labor costs are based on the wage of \$50 per hour (based on the high end of the \$20,000-100,000 range of the annual income of salmon trollers). The information collection would not impose additional operational expenses to the respondents because their normal operations include maintaining catch records for state reporting requirements and operating a radio and/or cellular phone to monitor, receive, and transmit communications. Using the estimate that 20 percent of the 10 total burden hours (i.e., 2 hours) would impose actual costs to respondents, total annual costs to all respondents are estimated to be \$100, or an average of \$2.50 for each of the 40 respondents annually (\$100/40).

**13. Provide an estimate of the total annual cost burden to the respondents or record-keepers resulting from the collection (excluding the value of the burden hours in #12 above).**

During unsafe conditions, respondents will submit their reports during time in transit at zero cost to the respondents.

**14. Provide estimates of annualized cost to the Federal government.**

If the entity collecting the information is a federal agency, the annual costs to the federal government would be based on the costs of receiving the reports. The U.S. Coast Guard and the states of the Washington, Oregon, and California are expected to receive these reports during the course of normal operations. Therefore, no additional costs are expected to be imposed on the federal government.

**15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB 83-I.**

There are no changes.

**16. For collections whose results will be published, outline the plans for tabulation and publication.**

The results of the collection will not be published.

**17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons why display would be inappropriate.**

Not applicable.

**18. Explain each exception to the certification statement identified in Item 19 of the OMB 83-I.**

There are no exceptions.

**B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS**

Statistical methods are not used.

change if the Secretary assumes responsibility for the regulation of the salmon fishery within state waters under section 306(b) of the Magnuson Act.

*Freezer trolling vessel* means a fishing vessel, equipped with troll fishing gear, that has a present capability for:

- (1) On board freezing of the catch.
- (2) Storage of the fish in a frozen condition until they are landed.

*Land or landing* means to begin transfer of fish from a fishing vessel. Once transfer begins, all fish onboard the vessel are counted as part of the landing.

*Plugs* means artificial fishing lures made of wood or hard plastic with one or more hooks attached. Lures commonly known as "spoons," "wobblers," "dodgers," and flexible plastic lures are not considered plugs, and may not be used where "plugs only" are specified.

*Recreational fishing* means fishing with recreational fishing gear as defined annually under § 660.408 and not for the purpose of sale or barter.

*Recreational fishing gear* will be defined annually under § 660.408.

*Regional Director* means the Director, Northwest Region, NMFS, or a designee. For fisheries occurring primarily or exclusively in the fishery management area seaward of California, *Regional Director* means the Director, Northwest Region, NMFS, acting in consultation with the Director, Southwest Region, NMFS.

*Salmon* means any anadromous species of the family Salmonidae and genus *Oncorhynchus*, commonly known as Pacific salmon, including, but not limited to:

Chinook (king) salmon, *Oncorhynchus tshawytscha*  
 Coho (silver) salmon, *Oncorhynchus kisutch*  
 Pink (humpback) salmon, *Oncorhynchus gorbuscha*  
 Chum (dog) salmon, *Oncorhynchus keta*  
 Sockeye (red) salmon, *Oncorhynchus nerka*  
 Steelhead (rainbow trout), *Oncorhynchus mykiss*

*Total length of salmon* means the shortest distance between the tip of the snout or jaw (whichever extends furthest while the mouth is closed) and the tip of the longest lobe of the tail, without resort to any force or mutilation of the salmon other than fanning or swinging the tail.

*Treaty Indian fishing* means fishing for salmon and steelhead in the fishery management area by a person authorized by the Makah Tribe to exercise fishing rights under the Treaty with the Makah, or by the Quileute, Hoh, or Quinault Tribes to exercise

fishing rights under the Treaty of Olympia.

*Troll fishing gear* will be defined annually under § 660.408.

*Whole bait* means a hook or hooks baited with whole natural bait with no device to attract fish other than a flasher.

#### § 660.403 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 600.705 of this chapter, § 660.2, and paragraphs (b) and (c) of this section.

(b) Any person fishing subject to this subpart who also engages in fishing for groundfish should consult Federal regulations in subpart G for applicable requirements of that subpart, including the requirement that vessels engaged in commercial fishing for groundfish (except commercial passenger vessels) have vessel identification in accordance with § 660.305.

(c) Any person fishing subject to this subpart is bound by the international boundaries of the fishery management area described in § 660.402, notwithstanding any dispute or negotiation between the United States and any neighboring country regarding their respective jurisdictions, until such time as new boundaries are published by the United States.

#### § 660.404 Recordkeeping and reporting.

(a) This subpart recognizes that catch and effort data necessary for implementation of any applicable fishery management plan are collected by the States and Indian tribes of Washington, Oregon, California, and Idaho under existing data collection requirements. Except as provided in paragraph (b) of this section, no additional catch reports will be required of fishermen or processors so long as the data collection and reporting systems operated by State agencies and Indian tribes continue to provide NMFS with statistical information adequate for management.

(b) Persons engaged in commercial fishing may be required to submit catch reports that are specified annually under § 660.408.

#### § 660.405 Prohibitions.

(a) In addition to the general prohibitions specified in § 600.725 of this chapter, it is unlawful for any person to do any of the following:

(1) Take and retain or land salmon caught with a net in the fishery management area, except that a hand-held net may be used to bring hooked salmon on board a vessel.

(2) Fish for, or take and retain, any species of salmon:

(i) During closed seasons or in closed areas;

(ii) While possessing on board any species not allowed to be taken in the area at the time;

(iii) Once any catch limit is attained;

(iv) By means of gear or methods other than recreational fishing gear or troll fishing gear, or gear authorized under § 660.408(k) for treaty Indian fishing;

(v) In violation of any action issued under this subpart; or

(vi) In violation of any applicable area, season, species, zone, gear, daily bag limit, or length restriction.

(3) Fish for salmon in an area when salmon of less than the legal minimum length for that area are on board the fishing vessel, except that this provision does not prohibit transit of an area when salmon of less than the legal minimum length for that area are on board, so long as no fishing is being conducted.

(4) Remove the head of any salmon caught in the fishery management area, or possess a salmon with the head removed, if that salmon has been marked by removal of the adipose fin to indicate that a coded wire tag has been implanted in the head of the fish.

(5) Take and retain or possess on board a fishing vessel any species of salmon that is less than the applicable minimum total length, including the applicable minimum length for dressed, head-off salmon.

(6) Possess on board a fishing vessel a salmon, for which a minimum total length is extended or cannot be determined, except that dressed, head-off salmon may be possessed on board a freezer trolling vessel, unless the adipose fin of such salmon has been removed.

(7) Fail to return to the water immediately and with the least possible injury any salmon the retention of which is prohibited by this subpart.

(8) Engage in recreational fishing while aboard a vessel engaged in commercial fishing. This restriction is not intended to prohibit the use of fishing gear otherwise permitted under the definitions of troll and recreational fishing gear, so long as that gear is legal in the fishery for which it is being used.

(9) Take and retain, possess, or land any steelhead taken in the course of commercial fishing in the fishery management area, unless such take and retention qualifies as treaty Indian fishing.

(10) Sell, barter, offer to sell, offer to barter, or purchase any salmon taken in the course of recreational salmon fishing.

(11) Refuse to submit fishing gear or catch subject to such person's control to

inspection by an authorized officer, or to interfere with or prevent, by any means, such an inspection.

(12) Take and retain Pacific halibut (*Hippoglossus stenolepis*) except in accordance with regulations of the International Pacific Halibut Commission at part 300 of this title. Pacific halibut that cannot be retained lawfully must be returned to the water immediately and with the least possible injury.

(13) Violate any other provision of this subpart.

(b) The fishery management area is closed to salmon fishing except as opened by this subpart or superseding regulations or notices. All open fishing periods begin at 0001 hours and end at 2400 hours local time on the dates specified.

**§ 660.406 Exempted fishing.**

(a) NMFS may allow such exempted fishing in the fishery management area as may be recommended by the Council, the Federal Government, state government, or treaty Indian tribes having usual and accustomed fishing grounds in the fishery management area.

(b) NMFS will not allow any exempted fishery recommended by the Council unless NMFS determines that the purpose, design, and administration of the exempted fishery are consistent with the goals and objectives of the Council's fishery management plan, the national standards (section 301(a) of the Magnuson Act), and other applicable law.

(c) Each vessel participating in any exempted fishery recommended by the Council and allowed by NMFS is subject to all provisions of this subpart, except those portions which relate to the purpose and nature of the exempted fishery. These exceptions will be specified in a permit issued by the Regional Director to each vessel participating in the exempted fishery and that permit must be carried aboard each participating vessel.

**§ 660.407 Treaty Indian fishing.**

Except as otherwise provided in this subpart, treaty Indian fishing in any part of the fishery management area is subject to the provisions of this subpart, the Magnuson Act, and any other regulations issued under the Magnuson Act.

**§ 660.408 Annual actions.**

(a) *General.* NMFS will annually establish or, as necessary, adjust management specifications for the commercial, recreational, and treaty Indian fisheries by publishing the action in the Federal Register under § 660.411.

Management specifications are set forth in paragraphs (b) through (n) of this section.

(b) *Allowable ocean harvest levels.* The allowable ocean harvest for commercial, recreational, and treaty Indian fishing may be expressed in terms of season regulations expected to achieve a certain optimum harvest level or in terms of a particular number of fish. Procedures for determining allowable ocean harvest vary by species and fishery complexity, and are documented in the fishery management plan and Council documents.

(c) *Allocation of ocean harvest levels—(1) Coho and chinook from the U.S.-Canada border to Cape Falcon—(i) Overall allocation schedule.* Initial allocation of coho and chinook salmon north of Cape Falcon, OR, will be based on the following schedule:

Allowable non-treaty ocean harvest (thousands of fish)	Percentage <sup>1</sup>	
	Commercial	Recreational
Coho:		
0-300 .....	25	75
>300 .....	60	40
Chinook:		
0-100 .....	50	50
>100-150 .....	60	40
>150 .....	70	30

<sup>1</sup>The percentage allocation is tiered and must be calculated in additive steps when the harvest level exceeds the initial tier. For example, for a total allowable ocean harvest of 150,000 chinook, the recreational allocation would be equal to 50 percent of 100,000 chinook plus 40 percent of 50,000 chinook or 50,000 + 20,000 = 70,000 chinook.

(ii) *Deviations from allocation schedule.* The initial allocation may be modified annually in accordance with paragraphs (c)(1)(iii) through (vii) of this section. These deviations from the allocation schedule provide flexibility to account for the dynamic nature of the fisheries and better achieve the allocation objectives and fishery allocation priorities in paragraphs (c)(1)(viii) and (ix) of this section. Total allowable ocean harvest will be maximized to the extent possible consistent with treaty obligations, state fishery needs, and spawning requirements. Every effort will be made to establish seasons and gear requirements that provide troll and recreational fleets a reasonable opportunity to catch the available harvest. These may include single-species directed fisheries with landing restrictions for other species.

(iii) *Preseason trades.* Preseason species trades (chinook and coho) may be made if they are based upon the recommendation of the commercial and recreational Salmon Advisory Subpanel

representatives for the area north of Cape Falcon; simultaneously benefit both the commercial and recreational fisheries or benefit one fishery without harming the other; and are supported by a socio-economic analysis that compares the impacts of the recommendation to those of the standard allocation schedule to determine the allocation that best meets the allocation objectives. This analysis will be made available to the public during the preseason process for establishing annual management measures. Preseason trades will use an exchange ratio of four coho to one chinook as a desirable guideline.

(iv) *Commercial allocation.* The commercial allowable ocean harvest of chinook and coho derived during the preseason allocation process may be varied by major subareas (i.e., north of Leadbetter Point and south of Leadbetter Point) if there is need to do so to decrease impacts on weak stocks. Deviations in each major subarea will generally not exceed 50 percent of the allowable ocean harvest of each species that would have been established without a geographic deviation in the distribution of the allowable ocean harvest. Deviation of more than 50 percent will be based on a conservation need to protect the weak stocks and will provide larger overall harvest for the entire fishery north of Cape Falcon than would have been possible without the deviation.

(v) *Recreational allocation.* The recreational allowable ocean harvest of chinook and coho derived during the preseason allocation process will be distributed among the three major recreational subareas as described in the coho and chinook distribution sections below. Additionally, based upon the recommendation of the recreational Salmon Advisory Subpanel representatives for the area north of Cape Falcon, the Council will include criteria in its preseason salmon management recommendations to guide any inseason transfer of coho among the recreational subareas to meet recreational season duration objectives. The Council may also establish additional subarea quotas with a major subarea to meet recreational season objectives based on agreement of representatives of the affected ports.

(A) *Coho distribution.* The preseason recreational allowable ocean harvest of coho north of Cape Falcon will be distributed to provide 50 percent to the area north of Leadbetter Point and 50 percent to the area south of Leadbetter Point. In years with no fishery in Washington State management area 4B, the distribution of coho north of Leadbetter Point will be divided to

provide 74 percent to the subarea between Leadbetter Point and the Queets River (Westport) and 26 percent to the subarea north of the Queets River (Neah Bay/La Push). In years when there is an area 4B fishery under state management, 25 percent of the numerical value of that fishery shall be added to the recreational allowable ocean harvest north of Leadbetter Point prior to applying the sharing percentages. That same value would then be subtracted from the Neah Bay/La Push share in order to maintain the same total distribution north of Leadbetter Point.

(B) *Chinook distribution.* Subarea distributions of chinook will be managed as guidelines based on calculations of the Salmon Technical Team with the primary objective of achieving all-species fisheries without imposing chinook restrictions (i.e., area closures or bag limit reductions). Chinook in excess of all-species fisheries needs may be utilized by directed chinook fisheries north of Cape Falcon or by negotiating a preseason species trade of chinook and coho between commercial and recreational allocations in accordance with paragraph (c)(1)(iii) of this section.

(vi) *Inseason trades and transfers.* Inseason transfers, including species trades of chinook and coho, may be permitted in either direction between commercial and recreational fishery quotas to allow for uncatchable fish in one fishery to be reallocated to the other. Fish will be deemed uncatchable by a respective commercial or recreational fishery only after considering all possible annual management actions to allow for their harvest that are consistent with the harvest management objectives specific in the fishery management plan including consideration of single species fisheries. Implementation of inseason transfers will require consultation with the pertinent commercial and recreational Salmon Advisory Subpanel representatives from the area involved and the Salmon Technical Team, and a clear establishment of available fish and impacts from the transfer. Inseason trades or transfers may vary from the guideline ratio of four coho to one chinook to meet the allocation objectives in paragraph (c)(1)(viii) of this section.

(vii) *Other inseason provisions.* Any increase or decrease in the recreational or commercial allowable ocean harvest resulting from an inseason restructuring of a fishery or other inseason

management action does not require reallocation of the overall non-treaty allowable ocean harvest north of Cape Falcon between the recreational and commercial fisheries. Inseason redistribution of subarea quotas within the recreational fishery or the distribution of allowable coho catch transfers from the commercial fishery among subareas may deviate from the preseason distribution. Inseason management actions may be taken by the Regional Director to assure meeting the primary objective of achieving all-species fisheries without imposing chinook restrictions in each of the recreational subareas north of Cape Falcon. Such actions might include, but are not limited to: Closure from 0 to 3, 0 to 6, 3 to 200, or 5 to 200 nm from shore; closure from a point extending due west from Tatoosh Island for 5 nm, then south to a point due west of Umatilla Reef Buoy, then due east to shore; closure from North Head at the Columbia River mouth north to Leadbetter Point; change in species that may be landed; or other actions as prescribed in the annual management measures.

(viii) *Allocation objectives.* The goal of allocating ocean harvest north of Cape Falcon is to achieve, to the greatest degree possible, the following objectives for the commercial and recreational fisheries. When deviation from the allocation schedule is being considered, these objectives will serve as criteria to help determine whether a user group will benefit from the deviation.

(A) Provide recreational opportunity by maximizing the duration of the fishing season while minimizing daily and area closures and restrictions on gear and daily limits.

(B) Maximize the value of the commercial harvest while providing fisheries of reasonable duration.

(ix) *Fishery allocation priorities.* The following fishery allocation priorities will provide guidance in the preseason process of establishing final harvest allocations and structuring seasons that best achieve the allocation objectives. To the extent fish are provided to each fishery by the allocation schedule, these priorities do not favor one user group over the other and should be met simultaneously for each fishery. Seasons may be structured that deviate from these priorities consistent with the allocation objectives.

(A) At total allowable harvest levels up to 300,000 coho and 100,000 chinook: For the recreational fishery, provide coho for a late June through early September all-species season;

provide chinook to allow access to coho and, if possible, a minimal chinook-only fishery prior to the all-species season; and adjust days per week and/or institute area restrictions to stabilize season duration. For the commercial fishery, provide chinook for a May and early June chinook season and provide coho for hooking mortality and/or access to a pink fishery, and ensure that part of the chinook season will occur after June 1.

(B) At total allowable harvest levels above 300,000 coho and above 100,000 chinook: For the recreational fishery, relax any restrictions in the all-species fishery and/or extend the all-species season beyond Labor Day as coho quota allows; provide chinook for a Memorial Day through late June chinook-only fishery; and adjust days per week to ensure continuity with the all-species season. For the commercial fishery, provide coho for an all-species season in late summer and/or access to a pink fishery; and leave adequate chinook from the May through June season to allow access to coho.

(2) *Coho south of Cape Falcon*—(i) *Allocation schedule.* Preseason allocation shares of coho salmon south of Cape Falcon, OR, will be determined by an allocation schedule, which is based on the following formula. The formula will be used to interpolate between allowable harvest levels as shown in the table below.

(A) Up to 350,000 allowable ocean harvest: The first 150,000 fish will be allocated to the recreational fishery. Additional fish will be allocated 66.7 percent to troll and 33.3 percent to recreational. The incidental coho mortality for a commercial all-salmon-except-coho fishery will be deducted from the troll allocation. If the troll allocation is insufficient for this purpose, the remaining number of coho needed for this estimated incidental coho mortality will be deducted from the recreational share.

(B) From 350,000 to 800,000 allowable ocean harvest: The recreational allocation is equal to 14 percent of the allowable harvest above 350,000 fish, plus 217,000 fish. The remainder of the allowable ocean harvest will be allocated to the troll fishery.

(C) Above 800,000 allowable ocean harvest: The recreational allocation is equal to 10 percent of the allowable harvest above 800,000 fish, plus 280,000 fish. The remainder of the allowable ocean harvest will be allocated to the troll fishery.

Allowable ocean harvest (thousands of fish)	Commercial		Recreational	
	Number (thousands)	Percentage	Number (thousands)	Percentage
2,700	2,230	82.6	470	17.4
2,600	2,140	82.3	460	17.7
2,500	2,050	82.0	450	18.0
2,400	1,960	81.7	440	18.3
2,300	1,870	81.3	430	18.7
2,200	1,780	80.9	420	19.1
2,100	1,690	80.5	410	19.5
2,000	1,600	80.0	400	20.0
1,900	1,510	79.5	390	20.5
1,800	1,420	78.9	380	21.1
1,700	1,330	78.2	370	21.8
1,600	1,240	77.5	360	22.5
1,500	1,150	76.7	350	23.3
1,400	1,060	75.7	340	24.3
1,300	970	74.6	330	25.4
1,200	880	73.3	320	26.7
1,100	790	71.8	310	28.2
1,000	700	70.0	300	30.0
900	610	67.8	290	32.2
800	520	65.0	280	35.0
700	434	62.0	266	38.0
600	348	58.0	252	42.0
500	262	52.4	238	47.6
400	176	44.0	224	56.0
350	133	38.0	217	62.0
300	100	33.3	200	66.7
200	133	16.5	167	83.5
100	( <sup>1</sup> )	( <sup>1</sup> )	( <sup>1</sup> )	( <sup>1</sup> )

<sup>1</sup> An incidental coho allowance associated with any commercial all-salmon-except-coho fishery will be deducted from the recreational share of coho during periods of low coho abundance when the commercial allocation of coho under the schedule would be insufficient to allow for incidental hooking mortality of coho in the commercial all-salmon-except-coho fishery.

(ii) *Geographic distribution.*

Allowable harvest south of Cape Falcon may be divided and portions assigned to subareas based on considerations including, but not limited to, controlling ocean harvest impacts on depressed, viable natural stocks within acceptable maximum allowable levels; stock abundance; allocation considerations; stock specific impacts; relative abundance of the salmon species in the fishery; escapement goals; and maximizing harvest potential.

(iii) *Recreational allocation at 167,000 fish or less.* When the recreational allocation is at 167,000 fish or less, the total recreational allowable ocean harvest of coho will be divided between two major subareas with independent impact quotas. The initial allocation will be 70 percent from Cape Falcon to Humbug Mountain and 30 percent south of Humbug Mountain. Coho transfers between the two impact quotas may be permitted on a one-for-one basis, if chinook constraints preclude access to coho. Horse Mountain to Point Arena will be managed for an impact guideline of 3 percent of the south of Cape Falcon recreational allocation. The recreational coho fishery between Humbug Mountain and Point Arena may be closed when it is projected that the

harvest impact between Humbug Mountain and Point Arena, combined with the projected harvest impact that will be taken south of Point Arena to the end of the season, equals the impact quota for south of Humbug Mountain. The recreational fishery for coho salmon south of Point Arena will not close upon attainment of the south of Humbug Mountain impact quota.

(iv) *Oregon coastal natural coho.* At Oregon coastal natural coho spawning escapements of 28 or fewer adults per mile, the allocation provisions of paragraph (c)(2)(i) of this section do not apply. Fisheries will be established that will provide only the minimum incidental harvest of Oregon coastal natural coho necessary to prosecute other fisheries, and that under no circumstances will cause irreparable harm to the Oregon coastal natural coho stock.

(v) *Inseason reallocation.* No later than August 15 each year, the Salmon Technical Team will estimate the number of coho salmon needed to complete the recreational seasons. Any coho salmon allocated to the recreational fishery that are not needed to complete the recreational seasons will be reallocated to the commercial fishery. Once reallocation has taken place, the remaining recreational quota

will change to a harvest guideline. If the harvest guideline for the recreational fishery is projected to be reached on or before Labor Day, the Regional Director may allow the recreational fishery to continue through the Labor Day weekend only if there is no significant danger of impacting the allocation of another fishery or of failing to meet an escapement goal.

(d) *Management boundaries and zones.* Management boundaries and zones will be established or adjusted to achieve a conservation purpose. A conservation purpose protects a fish stock, simplifies management of a fishery, or promotes wise use of fishery resources by, for example, separating fish stocks, facilitating enforcement, separating conflicting fishing activities, or facilitating harvest opportunities. Management boundaries and zones will be described by geographical references, coordinates (latitude and longitude), LORAN readings, depth contours, distance from shore, or similar criteria.

(e) *Minimum harvest lengths.* The minimum harvest lengths for commercial, recreational, and treaty Indian fishing may be changed upon demonstration that a useful purpose will be served. For example, an increase in minimum size for commercially caught salmon may be necessary for

conservation or may provide a greater poundage and monetary yield from the fishery while not substantially increasing hooking mortality. The removal of a minimum size for the recreational fishery may prevent wastage of fish and outweigh the detrimental impacts of harvesting immature fish.

(f) *Recreational daily bag limits.* Recreational daily bag limits for each fishing area will be set equal to one, two, or three salmon of some combination of species. The recreational daily bag limits for each fishing area will be set to maximize the length of the fishing season consistent with the allowable level of harvest in the area.

(g) *Fishing gear restrictions.* Gear restrictions for commercial, recreational, and treaty Indian fishing may be established or modified upon demonstration that a useful purpose will be served. For example, gear restrictions may be imposed or modified to facilitate enforcement, reduce hooking mortality, or reduce gear expenses for fishermen.

(h) *Seasons*—(1) *In general.* Seasons for commercial and recreational fishing will be established or modified taking into account allowable ocean harvest levels and quotas, allocations between the commercial and recreational fisheries, and the estimated amount of effort required to catch the available fish based on past seasons.

(2) *Commercial seasons.* Commercial seasons will be established or modified taking into account wastage of fish that cannot legally be retained, size and poundage of fish caught, effort shifts between fishing areas, and protection of depressed stocks present in the fishing areas. All-species seasons will be established to allow the maximum allowable harvest of pink and sockeye salmon without exceeding allowable chinook or coho harvest levels and within conservation and allocation constraints of the pink and sockeye stocks.

(3) *Recreational seasons.* If feasible, recreational seasons will be established or modified to encompass Memorial Day and Labor Day weekends, and to avoid the need for inseason closures.

(i) *Quotas* (by species, including fish caught 0–3 nm seaward of Washington, Oregon, and California). Quotas for commercial, recreational, and treaty Indian fishing may be established or modified to ensure that allowable ocean harvests are not exceeded. Quotas may be fixed or adjustable and used in conjunction with seasons. Any quota established does not represent a guaranteed ocean harvest, but a maximum ceiling on catch.

(j) *Selective fisheries.* In addition to the all-species seasons and the all-species-except-coho seasons established for the commercial and recreational fisheries, selective coho-only, chinook-only, or pink-only fisheries may be established if harvestable fish of the target species are available; harvest of incidental species will not exceed allowable levels; proven, documented selective gear exists; significant wastage of incidental species will not occur; and the selective fishery will occur in an acceptable time and area where wastage can be minimized and target stocks are primarily available.

(k) *Treaty Indian fishing.* (1) NMFS will establish or modify treaty Indian fishing seasons and/or fixed or adjustable quotas, size limits, gear restrictions, and/or area restrictions taking into account recommendations of the Council, proposals from affected tribes, and relevant Federal court proceedings.

(2) The combined treaty Indian fishing seasons will not be longer than necessary to harvest the allowable treaty Indian catch, which is the total treaty harvest that would occur if the tribes chose to take their total entitlement of the weakest stock in the fishery management area, assuming this level of harvest did not create conservation or allocation problems on other stocks.

(3) Any fixed or adjustable quotas established will be consistent with established treaty rights and will not exceed the harvest that would occur if the entire treaty entitlement to the weakest run were taken by treaty Indian fisheries in the fishery management area.

(4) If adjustable quotas are established for treaty Indian fishing, they may be subject to inseason adjustment because of unanticipated coho hooking mortality occurring during the season, catches in treaty Indian fisheries inconsistent with those unanticipated under Federal regulations, or a need to redistribute quotas to ensure attainment of an overall quota.

(l) *Yurok and Hoopa Valley tribal fishing rights.* For purposes of section 303 of the Magnuson Act, the federally reserved fishing rights of the Yurok and Hoopa Valley Indian Tribes as set out in a legal opinion<sup>2</sup> dated October 4, 1993, by the Office of the Solicitor, Department of the Interior, are applicable law. Under section 303 of the Magnuson Act, allowable ocean harvest must be consistent with all applicable laws.

<sup>2</sup> Copies of the Solicitor's Opinion are available from the Director, Southwest Region, NMFS.

(m) *Inseason notice procedures.* Telephone hotlines and USCG broadcasts will provide actual notice of inseason actions for commercial, recreational, and treaty Indian fishing.

(n) *Reporting requirements.* Reporting requirements for commercial fishing may be imposed to ensure timely and accurate assessment of catches in regulatory areas subject to quota management. Such reports are subject to the limitations described herein. Persons engaged in commercial fishing in a regulatory area subject to quota management and landing their catch in another regulatory area open to fishing may be required to transmit a brief radio report prior to leaving the first regulatory area. The regulatory areas subject to these reporting requirements, the contents of the radio reports, and the entities receiving the reports will be specified annually.

#### § 660.409 Inseason actions.

(a) *Fixed inseason management provisions.* NMFS is authorized to take the following inseason management actions annually, as appropriate.

(1) *Automatic season closures based on quotas.* When a quota for the commercial or the recreational fishery, or both, for any salmon species in any portion of the fishery management area is projected by the Regional Director to be reached on or by a certain date, NMFS will, by an inseason action issued under § 660.411, close the commercial or recreational fishery, or both, for all salmon species in the portion of the fishery management area to which the quota applies as of the date the quota is projected to be reached.

(2) *Rescission of automatic closure.* If a fishery is closed under a quota before the end of a scheduled season based on overestimate of actual catch, NMFS will reopen that fishery in as timely a manner as possible for all or part of the remaining original season provided NMFS finds that a reopening of the fishery is consistent with the management objectives for the affected species and the additional open period is no less than 24 hours. The season will be reopened by an inseason action issued under § 660.411.

(3) *Adjustment for error in preseason estimates.* NMFS may, by an inseason action issued under § 660.411, make appropriate changes in relevant seasons or quotas if a significant computational error or errors made in calculating preseason estimates of salmon abundance are identified, provided that such correction can be made in a timely manner to affect the involved fishery without disrupting the capacity to meet

(a) FINDINGS.—The Congress finds and declares the following:

(1) The fish off the coasts of the United States, the highly migratory species of the high seas, the species which dwell on or in the Continental Shelf appertaining to the United States, and the anadromous species which spawn in United States rivers or estuaries, constitute valuable and renewable natural resources. These fishery resources contribute to the food supply, economy, and health of the Nation and provide recreational opportunities.

**104-297**

(2) Certain stocks of fish have declined to the point where their survival is threatened, and other stocks of fish have been so substantially reduced in number that they could become similarly threatened as a consequence of (A) increased fishing pressure, (B) the inadequacy of fishery resource conservation and management practices and controls, or (C) direct and indirect habitat losses which have resulted in a diminished capacity to support existing fishing levels.

(3) Commercial and recreational fishing constitutes a major source of employment and contributes significantly to the economy of the Nation. Many coastal areas are dependent upon fishing and related activities, and their economies have been badly damaged by the overfishing of fishery resources at an ever-increasing rate over the past decade. The activities of massive foreign fishing fleets in waters adjacent to such coastal areas have contributed to such damage, interfered with domestic fishing efforts, and caused destruction of the fishing gear of United States fishermen.

(4) International fishery agreements have not been effective in preventing or terminating the overfishing of these valuable fishery resources. There is danger that irreversible effects from overfishing will take place before an effective international agreement on fishery management jurisdiction can be negotiated, signed, ratified, and implemented.

(5) Fishery resources are finite but renewable. If placed under sound management before overfishing has caused irreversible effects, the fisheries can be conserved and maintained so as to provide optimum yields on a continuing basis.

**104-297**

(6) A national program for the conservation and management of the fishery resources of the United States is necessary to prevent overfishing, to rebuild overfished stocks, to insure conservation, to facilitate long-term protection of essential fish habitats, and to realize the full potential of the Nation's fishery resources.

**95-354**

(7) A national program for the development of fisheries which are underutilized or not utilized by the United States fishing industry, including bottom fish off Alaska, is necessary to assure that our citizens benefit from the employment, food supply, and revenue which could be generated thereby.

**16 U.S.C. 1801**  
**MSA § 2**

**101-627**

(8) The collection of reliable data is essential to the effective conservation, management, and scientific understanding of the fishery resources of the United States.

**104-297**

(9) One of the greatest long-term threats to the viability of commercial and recreational fisheries is the continuing loss of marine, estuarine, and other aquatic habitats. Habitat considerations should receive increased attention for the conservation and management of fishery resources of the United States.

**104-297**

(10) Pacific Insular Areas contain unique historical, cultural, legal, political, and geographical circumstances which make fisheries resources important in sustaining their economic growth.

**109-479**

(11) A number of the Fishery Management Councils have demonstrated significant progress in integrating ecosystem considerations in fisheries management using the existing authorities provided under this Act.

**109-479**

(12) International cooperation is necessary to address illegal, unreported, and unregulated fishing and other fishing practices which may harm the sustainability of living marine resources and disadvantage the United States fishing industry.

(b) PURPOSES.—It is therefore declared to be the purposes of the Congress in this Act—

**99-659, 101-627, 102-251**

(1) to take immediate action to conserve and manage the fishery resources found off the coasts of the United States, and the anadromous species and Continental Shelf fishery resources of the United States, by exercising (A) sovereign rights for the purposes of exploring, exploiting, conserving, and managing all fish within the exclusive economic zone established by Presidential Proclamation 5030, dated March 10, 1983, and (B) exclusive fishery management authority beyond the exclusive economic zone over such anadromous species and Continental Shelf fishery resources[, and fishery resources in the special areas]\*;

(2) to support and encourage the implementation and enforcement of international fishery agreements for the conservation and management of highly migratory species, and to encourage the negotiation and implementation of additional such agreements as necessary;

**104-297**

(3) to promote domestic commercial and recreational fishing under sound conservation and management principles, including the promotion of catch and release programs in recreational fishing;

(4) to provide for the preparation and implementation, in accordance with national standards, of fishery management plans which will achieve and maintain, on a continuing basis, the optimum yield from each fishery;

**101-627**

(5) to establish Regional Fishery Management Councils to exercise sound judgment in the stewardship of fishery resources through the preparation, monitoring, and revision of such plans under circumstances (A) which will enable the States, the fishing industry, consumer and environmental organizations, and other interested persons to participate in, and advise on, the establishment and administration of such plans, and (B) which take into account the social and economic needs of the States;

**95-354, 96-561, 104-297**

(6) to encourage the development by the United States fishing industry of fisheries which are currently underutilized or not utilized by United States fishermen, including bottom fish off Alaska, and to that end, to ensure that optimum yield determinations promote such development in a non-wasteful manner; and

**104-297**

(7) to promote the protection of essential fish habitat in the review of projects conducted under Federal permits, licenses, or other authorities that affect or have the potential to affect such habitat.

(c) POLICY.—It is further declared to be the policy of the Congress in this Act—

(1) to maintain without change the existing territorial or other ocean jurisdiction of the United States for all purposes other than the conservation and management of fishery resources, as provided for in this Act;

(2) to authorize no impediment to, or interference with, recognized legitimate uses of the high seas, except as necessary for the conservation and management of fishery resources, as provided for in this Act;

**101-627, 104-297**

(3) to assure that the national fishery conservation and management program utilizes, and is based upon, the best scientific information available; involves, and is responsive to the needs of, interested and affected States and citizens; considers efficiency; draws upon Federal, State, and academic capabilities in carrying out research, administration, management, and enforcement; considers the effects of fishing on immature fish and encourages development of practical measures that minimize bycatch and avoid unnecessary waste of fish; and is workable and effective;

(4) to permit foreign fishing consistent with the provisions of this Act;

**16 U.S.C. 1801-1802**  
**MSA §§ 2-3**

**99-659, 101-627**

(5) to support and encourage active United States efforts to obtain internationally acceptable agreements which provide for effective conservation and management of fishery resources, and to secure agreements to regulate fishing by vessels or persons beyond the exclusive economic zones of any nation;

**101-627**

(6) to foster and maintain the diversity of fisheries in the United States; and

**104-297**

(7) to ensure that the fishery resources adjacent to a Pacific Insular Area, including resident or migratory stocks within the exclusive economic zone adjacent to such areas, be explored, developed, conserved, and managed for the benefit of the people of such area and of the United States.

**SEC. 3. DEFINITIONS**

**16 U.S.C. 1802**

As used in this Act, unless the context otherwise requires—

(1) The term "anadromous species" means species of fish which spawn in fresh or estuarine waters of the United States and which migrate to ocean waters.

**104-297**

(2) The term "bycatch" means fish which are harvested in a fishery, but which are not sold or kept for personal use, and includes economic discards and regulatory discards. Such term does not include fish released alive under a recreational catch and release fishery management program.

**104-297**

(3) The term "charter fishing" means fishing from a vessel carrying a passenger for hire (as defined in section 2101(21a) of title 46, United States Code) who is engaged in recreational fishing.

**104-297**

(4) The term "commercial fishing" means fishing in which the fish harvested, either in whole or in part, are intended to enter commerce or enter commerce through sale, barter or trade.

- (5) The term "conservation and management" refers to all of the rules, regulations, conditions, methods, and other measures
- (A) which are required to rebuild, restore, or maintain, and which are useful in rebuilding, restoring, or maintaining, any fishery resource and the marine environment; and
  - (B) which are designed to assure that—
    - (i) a supply of food and other products may be taken, and that recreational benefits may be obtained, on a continuing basis;
    - (ii) irreversible or long-term adverse effects on fishery resources and the marine environment are avoided; and
    - (iii) there will be a multiplicity of options available with respect to future uses of these resources.

(6) The term "Continental Shelf" means the seabed and subsoil of the submarine areas adjacent to the coast, but outside the area of the territorial sea, of the United States, to a depth of 200 meters or, beyond that limit, to where the depth of the superjacent waters admits of the exploitation of the natural resources of such areas.

**99-659, 104-297**

- (7) The term "Continental Shelf fishery resources" means the following:

CNIDARIA

Bamboo Coral—*Acanella* spp.;  
Black Coral—*Antipathes* spp.;  
Gold Coral—*Callogorgia* spp.;  
Precious Red Coral—*Corallium* spp.;  
Bamboo Coral—*Keratoisis* spp.; and  
Gold Coral—*Parazoanthus* spp.

CRUSTACEA

Tanner Crab—*Chionoecetes tanneri*;  
Tanner Crab—*Chionoecetes opilio*;  
Tanner Crab—*Chionoecetes angulatus*;  
Tanner Crab—*Chionoecetes bairdi*;  
King Crab—*Paralithodes camtschatica*;  
King Crab—*Paralithodes platypus*;  
King Crab—*Paralithodes brevipes*;

104-297

**SEC. 402. INFORMATION COLLECTION**

16 U.S.C. 1881a

109-479

(a) COLLECTION PROGRAMS.—

(1) COUNCIL REQUESTS.—If a Council determines that additional information would be beneficial for developing, implementing, or revising a fishery management plan or for determining whether a fishery is in need of management, the Council may request that the Secretary implement an information collection program for the fishery which would provide the types of information specified by the Council. The Secretary shall undertake such an information collection program if he determines that the need is justified, and shall promulgate regulations to implement the program within 60 days after such determination is made. If the Secretary determines that the need for an information collection program is not justified, the Secretary shall inform the Council of the reasons for such determination in writing. The determinations of the Secretary under this paragraph regarding a Council request shall be made within a reasonable period of time after receipt of that request.

(2) SECRETARIAL INITIATION.—If the Secretary determines that additional information is necessary for developing, implementing, revising, or monitoring a fishery management plan, or for determining whether a fishery is in need of management, the Secretary may, by regulation, implement an information collection or observer program requiring submission of such additional information for the fishery.

109-479

(b) CONFIDENTIALITY OF INFORMATION.—

(1) Any information submitted to the Secretary, a State fishery management agency, or a marine fisheries commission by any person in compliance with the requirements of this Act shall be confidential and shall not be disclosed except—

(A) to Federal employees and Council employees who are responsible for fishery management plan development, monitoring, or enforcement;

(B) to State or Marine Fisheries Commission employees as necessary to further the Department's mission, subject to a confidentiality agreement that prohibits public disclosure of the identity of business of any person;

(C) to State employees who are responsible for fishery management plan enforcement, if the States employing those employees have entered into a fishery enforcement agreement with the Secretary and the agreement is in effect;

(D) when required by court order;

(E) when such information is used by State, Council, or Marine Fisheries Commission employees to verify catch under a limited access program, but only to the extent that such use is consistent with subparagraph (B);

(F) when the Secretary has obtained written authorization from the person submitting such information to release such information to persons for reasons not otherwise provided for in this subsection, and such release does not violate other requirements of this Act;

(G) when such information is required to be submitted to the Secretary for any determination under a limited access program; or

(H) in support of homeland and national security activities, including the Coast Guard's homeland security missions as defined in section 888(a)(2) of the Homeland Security Act of 2002 (6 U.S.C. 468(a)(2)).

(2) Any observer information shall be confidential and shall not be disclosed, except in accordance with the requirements of subparagraphs (A) through (H) of paragraph (1), or—

(A) as authorized by a fishery management plan or regulations under the authority of the North Pacific Council to allow disclosure to the public of weekly summary bycatch information identified by vessel or for haul-specific bycatch information without vessel identification;

(B) when such information is necessary in proceedings to adjudicate observer certifications; or

(C) as authorized by any regulations issued under paragraph (3) allowing the collection of observer information, pursuant to a confidentiality agreement between the observers, observer employers, and the Secretary prohibiting disclosure of the information by the observers or observer employers, in order—

(i) to allow the sharing of observer information among observers and between observers and observer employers as necessary to train and prepare observers for deployments on specific vessels; or

(ii) to validate the accuracy of the observer information collected.

(3) The Secretary shall, by regulation, prescribe such procedures as may be necessary to preserve the confidentiality of information submitted in compliance with any requirement or regulation under this Act, except that the Secretary may release or make public any such information in any aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such information. Nothing in this subsection shall be interpreted or construed to prevent the use for conservation and management purposes by the Secretary, or with the approval of the Secretary, the Council, of any information submitted in compliance with any requirement or regulation under this Act or the use, release, or publication of bycatch information pursuant to paragraph (2)(A).

**(c) RESTRICTION ON USE OF CERTAIN INFORMATION.—**

(1) The Secretary shall promulgate regulations to restrict the use, in civil enforcement or criminal proceedings under this Act, the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.), and the Endangered Species Act (16 U.S.C. 1531 et seq.), of information collected by voluntary fishery data collectors, including sea samplers, while aboard any vessel for conservation and management purposes if the presence of such a fishery data collector aboard is not required by any of such Acts or regulations thereunder.

(2) The Secretary may not require the submission of a Federal or State income tax return or statement as a prerequisite for issuance of a permit until such time as the Secretary has promulgated regulations to ensure the confidentiality of information contained in such return or statement, to limit the information submitted to that necessary to achieve a demonstrated conservation and management purpose, and to provide appropriate penalties for violation of such regulations.

**16 U.S.C. 1881a-1881b**  
**MSA §§ 402-403**

(d) **CONTRACTING AUTHORITY.**—Notwithstanding any other provision of law, the Secretary may provide a grant, contract, or other financial assistance on a sole-source basis to a State, Council, or Marine Fisheries Commission for the purpose of carrying out information collection or other programs if—

(1) the recipient of such a grant, contract, or other financial assistance is specified by statute to be, or has customarily been, such State, Council, or Marine Fisheries Commission; or

(2) the Secretary has entered into a cooperative agreement with such State, Council, or Marine Fisheries Commission.

(e) **RESOURCE ASSESSMENTS.**—

(1) The Secretary may use the private sector to provide vessels, equipment, and services necessary to survey the fishery resources of the United States when the arrangement will yield statistically reliable results.

(2) The Secretary, in consultation with the appropriate Council and the fishing industry--

(A) may structure competitive solicitations under paragraph (1) so as to compensate a contractor for a fishery resources survey by allowing the contractor to retain for sale fish harvested during the survey voyage;

(B) in the case of a survey during which the quantity or quality of fish harvested is not expected to be adequately compensatory, may structure those solicitations so as to provide that compensation by permitting the contractor to harvest on a subsequent voyage and retain for sale a portion of the allowable catch of the surveyed fishery; and

(C) may permit fish harvested during such survey to count toward a vessel's catch history under a fishery management plan if such survey was conducted in a manner that precluded a vessel's participation in a fishery that counted under the plan for purposes of determining catch history.

(3) The Secretary shall undertake efforts to expand annual fishery resource assessments in all regions of the Nation.

**104-297**

**SEC. 403. OBSERVERS**

**16 U.S.C. 1881b**

(a) **GUIDELINES FOR CARRYING OBSERVERS.**—Within one year after the date of enactment of the Sustainable Fisheries Act, the Secretary shall promulgate regulations, after notice and opportunity for public comment, for fishing vessels that carry observers. The regulations shall include guidelines for determining—

(1) when a vessel is not required to carry an observer on board because the facilities of such vessel for the quartering of an observer, or for carrying out observer functions, are so inadequate or unsafe that the health or safety of the observer or the safe operation of the vessel would be jeopardized; and

(2) actions which vessel owners or operators may reasonably be required to take to render such facilities adequate and safe.

**16 U.S.C. 1855**  
**MSA § 305**

(2) If a Council finds that an emergency or overfishing exists or that interim measures are needed to reduce overfishing for any fishery within its jurisdiction, whether or not a fishery management plan exists for such fishery—

(A) the Secretary shall promulgate emergency<sup>22</sup> regulations or interim measures under paragraph (1) to address the emergency or overfishing if the Council, by unanimous vote of the members who are voting members, requests the taking of such actions; and

(B) the Secretary may promulgate emergency<sup>22</sup> regulations or interim measures under paragraph (1) to address the emergency or overfishing if the Council, by less than a unanimous vote, requests the taking of such action.

**109-479**

(3) Any emergency regulation or interim measure which changes any existing fishery management plan or amendment shall be treated as an amendment to such plan for the period in which such regulation is in effect. Any emergency regulation or interim measure promulgated under this subsection—

(A) shall be published in the Federal Register together with the reasons therefor;

(B) shall, except as provided in subparagraph (C), remain in effect for not more than 180 days after the date of publication, and may be extended by publication in the Federal Register for one additional period of not more than 186 days, provided the public has had an opportunity to comment on the emergency regulation or interim measure, and, in the case of a Council recommendation for emergency regulations or interim measures, the Council is actively preparing a fishery management plan, plan amendment, or proposed regulations to address the emergency or overfishing on a permanent basis;

(C) that responds to a public health emergency or an oil spill may remain in effect until the circumstances that created the emergency no longer exist, *Provided*, That the public has an opportunity to comment after the regulation is published, and, in the case of a public health emergency, the Secretary of Health and Human Services concurs with the Secretary's action; and

(D) may be terminated by the Secretary at an earlier date by publication in the Federal Register of a notice of termination, except for emergency regulations or interim measures promulgated under paragraph (2) in which case such early termination may be made only upon the agreement of the Secretary and the Council concerned.

**101-627**

(d) **RESPONSIBILITY OF THE SECRETARY.**—The Secretary shall have general responsibility to carry out any fishery management plan or amendment approved or prepared by him, in accordance with the provisions of this Act. The Secretary may promulgate such regulations, in accordance with section 553 of title 5, United States Code, as may be necessary to discharge such responsibility or to carry out any other provision of this Act.

**97-453, 101-627, 104-297**

(e) **EFFECT OF CERTAIN LAWS ON CERTAIN TIME REQUIREMENTS.**—The Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and Executive Order Numbered 12866, dated September 30, 1993, shall be complied with within the time limitations specified in subsections (a), (b), and (c) of section 304 as they apply to the functions of the Secretary under such provisions.

# Administrative Management and Executive Secretariat

NAO 216-100

PROTECTION OF CONFIDENTIAL FISHERIES STATISTICS Eff: 7/18/94; Iss: 7/26/94

## SECTION 1. PURPOSE.

. 01 This Order:

a. prescribes policies and procedures for protecting the confidentiality of data submitted to and collected by the National Oceanic and Atmospheric Administration (NOAA)/National Marine Fisheries Service (NMFS) as authorized or required by law;

b. informs authorized users of their obligations for maintaining the confidentiality of data received by NMFS;

c. provides for operational safeguards to maintain the security of data; and

d. states the penalties provided by law for disclosure of confidential data.

## SECTION 2. SCOPE.

This Order covers all confidential data received, collected, maintained, or used by NMFS.

## SECTION 3. DEFINITIONS.

. 01 **Access to data** means the freedom or ability to use data, conditioned by a statement of nondisclosure and penalties for unauthorized use.

. 02 **Aggregate or summary form** means data structured so that the identity of the submitter cannot be determined either from the present release of the data or in combination with other releases.

. 03 **Agreement** refers to all binding forms of mutual commitment under a stated set of conditions to achieve a specific objective.

. 04 **Assistant Administrator** means the Assistant Administrator for Fisheries, NOAA, or a designee authorized to have access to confidential data.

. 05 **Authorized Use/User.**

a. **Authorized use** is that specific use authorized under the governing statute, regulation, order, contract or agreement.

b. An **authorized user** is any person who, having the need to collect or use confidential data in the performance of an official activity, has read this Order and has signed a statement of nondisclosure affirming the user's understanding of NMFS obligations with

respect to confidential data and the penalties for unauthorized use and disclosure.

. 06 **Confidential data** means data that are identifiable with any person, accepted by the Secretary, and prohibited by law from being disclosed to the public. The term "as used" does not convey data sensitivity for national security purposes [See Executive Order (E.O.) 12356 dated April 2, 1982].

. 07 **Data** refers to information used as a basis for reasoning, discussion, or calculation that a person may submit, either voluntarily or as required by statute or regulation.

. 08 **GC** means the Office of General Counsel, NOAA.

. 09 **Person** means any individual (whether or not a citizen or national of the United States), any corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of such governments, including Regional Fishery Management Councils (Councils).

. 10 **Public** means any person who is not an authorized user.

. 11 **Region** means NMFS Regional field offices, Fisheries Science Centers, and associated laboratories.

. 12 **Source document** means the document, paper, or electronic format on which data are originally recorded.

. 13 **State employee** means any member of a State agency responsible for developing and monitoring the State's program for fisheries or Marine Mammal Protection Act (MMPA) program.

. 14 **Submitter** means any person or the agent of any person who provides data to NMFS either voluntarily or as required by statute or regulation.

#### **SECTION 4. POLICY.**

For data subject to this Order, it is NMFS policy that:

a. confidential data shall only be disclosed to the public if required by the Freedom of Information Act (FOIA), 5 U.S.C. 552, the Privacy Act, 5 U.S.C. 552a, or by court order. Disclosure of data pursuant to a subpoena issued by an agency of competent jurisdiction is a lawful disclosure. Disclosure pursuant to a subpoena must be approved by GC;

b. individual identifiers shall be retained with data, unless the permanent deletion is consistent with the needs of NMFS and good scientific practice [See Section 6.02c]; and

c. a notice is required on all report forms requesting data and must comply with 5 U.S.C. 552a(e)(3) and Paperwork Reduction Act requirements in NAO 216-8, Information Collections and Requirements Needing Office of Management and Budget Clearance. [See E.O. 12600 of June 23, 1987, for additional information regarding the rights of submitters to designate commercial confidential data at the time of submission.]

#### **SECTION 5. OPERATIONAL RESPONSIBILITIES.**

. 01 The Regional Director of each region (or, in the case of headquarters, each Office

Director) has the responsibility to maintain the confidentiality of all data collected, maintained, and disclosed by the respective region.

. 02 Each region shall submit to the Assistant Administrator specific procedures governing the collection, maintenance, and disclosure of confidential data. These documents shall be compiled as regional handbooks following the guidelines and standards:

a. handbooks are to be developed in detail to ensure the maintenance of confidential data on a functional basis in each region; and

b. handbooks shall be coordinated through the National Data Management Committee (a NMFS group established by the Assistant Administrator to develop data management policies and procedures) and reviewed annually. The regional handbooks will address, at minimum, the contents of Sections 6-7.

## **SECTION 6. PROCEDURES.**

. 01 **Data Collection.** To collect data, the Secretary may use Federal employees, contractor employees, or, pursuant to an agreement, State employees.

### **a. General Requirements.**

1. Personnel authorized to collect Federal data must maintain all documents containing confidential data in secure facilities; and

2. may not disclose confidential data, whether recorded or not, to anyone not authorized to receive and handle such data.

### **b. Specific Requirements.**

1. Each Federal or contractor employee collecting or processing confidential data will be required to read, date, and sign a statement of nondisclosure, that affirms the employee's understanding of NMFS obligations with respect to confidential data and the penalties for unauthorized use and disclosure of the data. Upon signature, the employee's name will be placed on record as an "authorized user," and the employee will be issued certification.

2. Data collected by a contractor must be transferred timely to authorized Federal employees; no copies of these data may be retained by the contractor. NMFS may permit contractors to retain aggregated data. A data return clause shall be included in the agreement. All procedures applicable to Federal employees must be followed by contractor employees collecting data with Federal authority.

3. Under agreements with the State, each State data collector collecting confidential data will sign a statement at least as protective as the one signed by Federal employees, which affirms that the signer understands the applicable procedures and regulations and the penalties for unauthorized disclosure.

### **.02 Maintenance.**

a. Maintenance is defined as the procedures required to keep confidential data secure from the time the source documents are received by NMFS to their ultimate disposition, regardless of format. [See National Institute of Standards and Technology "Computer Security Publications, List 91" for guidance.]

b. Specific procedures in regional handbooks must deal with the following minimum security requirements, as well as any others that may be necessary because of the specific data, equipment, or physical facilities:

1. the establishment of an office or person responsible for evaluating requests for access to data;
2. the identifications of all persons certified as authorized users. These lists shall be kept current and reviewed on an annual basis;
3. the issuance of employee security rules that emphasize the confidential status of certain data and the consequences of unauthorized removal or disclosure;
4. the description of the security procedures used to prevent unauthorized access to and/or removal of confidential data;
5. the development of a catalog/inventory system of all confidential data received including: the type of source document; the authority under which each item of data was collected; any statutory or regulatory restriction(s) which may apply; and routing from the time of receipt until final disposition; and
6. The development of an appropriate coding system for each set of confidential data so that access to data that identifies, or could be used to identify, the person or business of the submitter is controlled by the use of one or more coding system(s). Lists that contain the codes shall be kept secure.

c. The permanent deletion of individual identifiers from a database shall be addressed on a case-by-case basis. Identifiers may only be deleted after:

1. future uses of data have thoroughly been evaluated, e.g., the need for individual landings records for allocating shares under an individual transferable quota program;
2. consultation with the agency(s) collecting data (if other than NMFS), the relevant Council(s), and NMFS Senior Scientist; and
3. concurrence by the Assistant Administrator has been received prior to deletion.

**.03 Access to Data Subject to This Order.**

a. **General Requirements.** In determining whether to grant a request for access to confidential data, the following information shall be taken into consideration:

1. the specific types of data required;
2. the relevance of the data to the intended uses;
3. whether access will be continuous, infrequent, or one-time;
4. an evaluation of the requester's statement of why aggregate or nonconfidential summaries of data would not satisfy the requested needs; and
5. the legal framework for the disclosure, in accordance with GC and this Order.

b. **Within NMFS.** NMFS employees requesting confidential data must have certification as being authorized users for the particular type of data requested.

c. **Councils.** Upon written request by the Council Executive Director:

1. "authorized user" status for confidential data collected under the Magnuson Fishery Conservation and Management Act (Magnuson Act) may be granted to a Council for use by the Council for conservation and management purposes consistent with the approval of the Assistant Administrator as described in 50 CFR 603.5;
2. "authorized user" status for confidential data, collected under the Magnuson Act and MMPA, will be granted to Council employees who are responsible for Fishery Management Plan development and monitoring; and
3. Councils that request access to confidential data must submit, on an annual basis, a copy of their procedures for ensuring the confidentiality of data to the region, or in the case of intercouncil fisheries, regions. The procedures will be evaluated for their effectiveness and, if necessary, changes may be recommended. As part of this procedure, an updated statement of nondisclosure will be included for each employee and member who requires access to confidential data.

d. **States.**

1. Requests from States for confidential data shall be directed in writing to the NMFS office that maintains the source data.
2. Each request will be processed in accordance with any agreement NMFS may have with the State:
  - (a) confidential data collected **solely** under Federal authority will be provided to a State by NMFS only if the Assistant Administrator finds that the State has authority to protect the confidentiality of the data comparable to, or more stringent than, NMFS' requirements; and
  - (b) the State will exercise its authority to limit subsequent access and use of the data to those uses allowed by authorities under which the data was collected.
3. If the State has no agreement with NMFS for the collection and exchange of confidential data, the request shall be treated as a public request and disclosure may be denied subject to FOIA or the Privacy Act.
4. Where a State has entered into a cooperative exchange agreement with another State(s), NMFS will facilitate transfer or exchange of State collected data in its possession if:
  - (a) NMFS has written authorization for data transfer from the head of the collecting State agency; and
  - (b) the collecting State has provided NMFS a list of authorized users in the recipient State(s); and
  - (c) the collecting State agrees to hold the United States Government harmless for any suit that may arise from the misuse of the data.

e. **Contractors.**

1. Pursuant to an agreement with NMFS, a NMFS contractor (including universities, Sea Grant investigators, etc.) may be granted "authorized user" status consistent with this Order if the use furthers the mission of NMFS.

2. The region will notify the contractor of its decision on access in writing within 30 calendar days after receipt of the request.

3. Contingent upon approval, the contractor will be provided with details regarding conditions of data access, any costs involved, formats, timing, and security procedures. If the request is denied, the reason(s) for denial will be given by the NMFS office involved. The denial will not preclude NMFS consideration of future requests from the contractor.

4. If access is granted, language in the agreement specifically dealing with confidentiality of data will be required. The language shall include all of the relevant portions of this Order and shall prohibit the further disclosure of the data. No data may be retained beyond the termination date of the agreement; and any disclosure of data derived from the accessed confidential data must be approved by NMFS.

5. Each agreement shall be reviewed by GC prior to its execution, and shall, to the extent possible, be consistent with the model agreement contained in Appendix D (Not included --WebEd).

f. **Submitters.** The Privacy Act allows for data to be released back to the submitter upon receipt and verification of a written request stating the data required.

**04. Requests for Confidential Data.** NMFS is authorized to collect data under various statutes [See Appendix A (Not include --WebEd)]. Two types of statutes govern the disclosure of confidential data collected by the Federal Government, those that contain specific and non-discretionary language within the Act, and those that provide overall guidance to the Federal Government. Sections of these Acts that deal with exceptions to disclosure may be found in Appendix B (Not included -- WebEd).

**a. Magnuson Act and MMPA.**

1. Data collected under 16 U.S.C. 1853 (a) or (b), and 16 U.S.C. 1383a (c),(d),(e),(f),or (h) will be handled in the following manner:

(a) data will only be disclosed to Federal employees and Council employees who are responsible for management plan development and monitoring; State employees pursuant to an agreement with the Secretary that prevents public disclosure of the identity or business of any person; a Council for conservation and management purposes [not applicable for MMPA data] or when required by court order. [See 50 CFR 229.10 and part 603];

(b) Council advisory groups are not permitted access to such confidential data [See 50 CFR 601.27(b)];

(c) requests from States that do not have an agreement with the Secretary will be processed in accordance with the Privacy Act or FOIA; and

(d) data collected by an observer under 16 U.S.C. 1853 (a) or (b) are not considered to have been "submitted to the Secretary by any person," and therefore are not confidential under Section 6.04.a of this Order. Data collected by an observer may be withheld from disclosure under the Privacy Act, or subsections (b)(3),(4),(5),(6), or (7) of FOIA.

2. Confidential data submitted to the Secretary under other Sections of the Magnuson Act or MMPA may only be disclosed in accordance with the Privacy Act or FOIA. Types of data and the collection authority may include among others:

(a) Processed Product Data -- 16 U.S.C. 1854(e);

(b) Fish Meal and Oil, Monthly -- 16 U.S.C. 1854(e);

(c) Data Collected Under State Authority and Provided to NMFS -- 16 U.S.C. 1854(e); and

(d) Tuna-Dolphin Observer Program -- 16 U.S.C. 1361 et seq.

b. **South Pacific Tuna Act.** Data collected under South Pacific Tuna Act 16 U.S.C. 973j is protected from disclosure to the public in accordance with section 973j(b).

c. **Other Statutes.** Confidential data collected under other NMFS programs as authorized by statutes other than South Pacific Tuna Act (16 U.S.C 973j), MMPA (16 U.S.C. 1361 et seq.), and Magnuson Act (16 U.S.C. 1801 et seq.), may only be disclosed to the public in accordance with the Privacy Act and FOIA. Types of data and the collection authority may include among others:

(1) Monthly Cold Storage Fish Report -- 16 U.S.C. 742(a);

(2) Market News Data -- 16 U.S.C. 742(a); and

(3) Seafood Inspection Data -- 7 U.S.C. 1621 et seq.

d. **Special Procedures.**

1. **Cold Storage Summary Reports.** NMFS publishes monthly cold storage holdings of fishery products. Advance knowledge of the content of these reports could give those who trade in the products an opportunity to gain competitive advantage. Therefore, in addition to the confidential protection provided to individual reports, the monthly summary report will not be disclosed to the public until 3:00 p.m. Eastern Time of the official release date. Release dates for these data are published 1 year in advance in November, and can be obtained from the NMFS Fisheries Statistics Division.

2. **Surplus commodity purchases by USDA.** NMFS and the Department of Agriculture (USDA) have an interagency agreement relating to the purchase of surplus fishery products. NMFS is responsible for providing confidential data and recommendations to the USDA regarding these purchases. Advance knowledge of these data could cause a competitive advantage or disadvantage to the general public, fishing industry, and the program. Therefore, all NMFS personnel engaged in the surplus commodity purchase program will be required to sign a specific "USDA Responsibility Statement." A copy will be maintained in the Office of Trade Services.

3. **Agreements for Disclosure of Confidential Data.** A letter of agreement may authorize the disclosure of confidential data when both the Government and the submitter agree to disclosure of the data. The need to provide security for the data will vary depending on the type of data collected and the form of the disclosure. Disclosure can be undertaken if all the following conditions are met:

(a) the person has agreed in writing to the disclosure and is aware that disclosure is irrevocable;

(b) the recipient has been informed in writing of the sensitivity of the data; and

(c) the wording of the agreement has been approved by GC.

. 05 Disposal. NAO 205-1, NOAA Records Management Program, shall govern the disposition of records covered under this Order.

## **SECTION 7. PENALTIES.**

. 01 **Civil and Criminal.** Persons who make unauthorized disclosure of confidential data may be subject to civil penalties or criminal prosecution under:

- a. Trade Secrets Act (18 U.S.C. 1905);
- b. Privacy Act (5 U.S.C. 552a(i)(1));
- c. Magnuson Act (16 U.S.C. 1858); and
- d. MMPA (16 U.S.C. 1375).

. 02 **Conflict of Interest.** Employees are prohibited by Department of Commerce employee conduct regulations [15 CFR part 0] and by ethics regulations applicable to the Executive Branch [5 CFR 2635.703] from using nonpublic information subject to this Order for personal gain, whether or not there is a disclosure to a third party.

. 03 **Disciplinary Action.** Persons may be subject to disciplinary action, including removal, for failure to comply with this Order. Prohibited activities include, but are not limited to, unlawful disclosure or use of the data, and failure to comply with implementing regulations or statutory prohibitions relating to the collection, maintenance, use and disclosure of data covered by this Order.

**SECTION 8. EFFECT ON OTHER ISSUANCES.** None.

Department of Commerce. Applications may be examined between 8:30 A.M. and 5:00 P.M. in room 2104, U.S. Department of Commerce, 14<sup>th</sup> and Constitution Avenue, NW, Washington, DC 20230.

Docket Number: 07-025. Applicant: University of Minnesota, Institute of Technology Characterization Facility, 12 Shepherd Labs, 100 Union Street SE, Minneapolis, MN 55455. Instrument: Confocal Raman Microscope.

Manufacturer: Witec, Germany. Intended Use: The instrument is intended to be used in a centralized facility for a wide variety of research applications including: identifying phases of materials from the interior of the earth and other planetary bodies produced in high pressure/temperature experiments, identifying active pharmaceutical ingredients and various excipients and adjuvants in the dosage form, distinguishing polymorphs in organic crystalline films, identifying components in polymer blends at the micron level, distinguishing components in complex biofilms, characterizing the surface composition of coated aerosol particles, etc. Precise mapping control through a piezo scan table, as well as high resolution and adaptation to different wavelengths of the laser are essential features.

Application accepted by Commissioner of Customs: April 23, 2007.

Docket Number: 07-034. Applicant: Purdue University, 915 W State Street, West Lafayette, IN 47907-2054. Instrument: Electron Microscope, Model Titan KRIOS System. Manufacturer: FEI Company, The Netherlands. Intended Use: The instrument is intended to be used primarily on studies of alphaviruses and flaviviruses. Topics of investigation include: virus-receptor complexes, structure of naked viruses, structure of lipid enveloped viruses, virus-antibody complexes, assembly pathways and imaging techniques.

Application accepted by Commissioner of Customs: May 17, 2007.

Docket Number: 07-035. Applicant: Old Dominion University, 231 Kaufman Hall, Norfolk, VA 23529. Instrument: Mass Spectrometer, Model JEM-2100F. Manufacturer: JEOL, Ltd., Japan. Intended Use: The instrument is intended to be used to study the microstructure of materials prepared in the form of thin films. The microstructure features include defect density, precipitates, defect distribution, phase and phase distribution. It will also be used to image biological materials to identify cell and membrane properties and to study nanoparticle properties, their interactions, and their

morphology. Application accepted by Commissioner of Customs: June 5, 2007.

Dated: June 11, 2007.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Coast Pilot Report

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before August 14, 2007.

**ADDRESSES:** Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the internet at [dHynek@doc.gov](mailto:dHynek@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:**

Requests for additional information or copies of the information collection instrument and instructions should be directed to: Thomas W. Jackson at 301-713-2750, ext. 167, or at [Thomas.Jackson@noaa.gov](mailto:Thomas.Jackson@noaa.gov), [mailto:patsy.bearden@noaa.gov](mailto:mailto:patsy.bearden@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

#### I. Abstract

NOAA publishes the U.S. Coast Pilot, a series of nine books which supplement the suite of nautical charts published by NOAA. The U.S. Coast Pilot contains information essential to navigators plying U.S. coastal and intra-coastal waters which cannot be readily displayed upon the charts. The Coast Pilot Report is offered to the public as a means of facilitating suggested changes to the text made by the public.

#### II. Method of Collection

A paper form is used.

#### III. Data

*OMB Number:* 0648-0007.

*Form Number:* NOAA Form 77-6.  
*Type of Review:* Regular submission.  
*Affected Public:* Individuals or households.

*Estimated Number of Respondents:* 100.

*Estimated Time per Response:* 30 minutes.

*Estimated Annual Burden Hours:* 50.

*Estimated Total Annual Cost to Public:* \$0.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: June 12, 2007.

**Gwellnar Banks,**

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Reporting Requirements for the Ocean Salmon Fishery Off the Coasts of Washington, Oregon, and California

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before August 14, 2007.

**ADDRESSES:** Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at [dHynek@doc.gov](mailto:dHynek@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument and instructions should be directed to Sarah McAvinchey, (206) 526-4323 or [Sarah.McAvinchey@noaa.gov](mailto:Sarah.McAvinchey@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

Based on the management regime specified each year, designated regulatory areas in the commercial ocean salmon fishery off the coasts of Washington, Oregon, and California may be managed by numerical quotas. To accurately assess catches relative to quota attainment during the fishing season, catch data by regulatory area must be collected in a timely manner. Requirements to land salmon within specific time frames and in specific areas may be implemented in the preseason regulations to aid in timely and accurate catch accounting for a regulatory area. State landing systems normally gather the data at the time of landing. If unsafe weather conditions or mechanical problems prevent compliance with landing requirements, fishermen need an alternative to allow for a safe response. Fishermen would be exempt from landing requirements if the appropriate notifications are made to provide the name of the vessel, the port where delivery will be made, the approximate amount of salmon (by species) on board, and the estimated time of arrival.

**II. Method of Collection**

Notifications are made by at-sea radio or cellular phone transmissions.

**III. Data**

*OMB Number:* 0648-0433.

*Form Number:* None.

*Type of Review:* Regular submission.

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Respondents:* 40.

*Estimated Time per Response:* 15 minutes.

*Estimated Total Annual Burden Hours:* 10.

*Estimated Total Annual Cost to Public:* \$0.

**IV. Request for Comments**

Comments are invited on: (a) Whether the proposed collection of information

is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

**BILLING CODE 3510-22-P**

**COMMODITY FUTURES TRADING COMMISSION**

**Order Exempting the Trading and Clearing of Certain Credit Default Products Pursuant to the Exemptive Authority in Section 4(c) of the Commodity Exchange Act ("CEA"); Republication**

**Editorial Note:** FR Doc. 07-2878 originally published at pages 32079-32081 in the issue of Monday, June 11, 2007. Due to numerous errors, the document is being reprinted in its entirety.

**AGENCY:** Commodity Futures Trading Commission.

**ACTION:** Final order.

**SUMMARY:** On May 14, 2007, the Commodity Futures Trading Commission ("CFTC" or the "Commission") published for public comment in the **Federal Register**<sup>1</sup> a proposal to exempt from the CEA<sup>2</sup> the trading and clearing of certain products called credit default options ("CDOs") and credit default basket options ("CDBOs") that are proposed to be traded on the Chicago Board Options Exchange ("CBOE"), a national securities exchange registered under Section 6 of the Securities Exchange Act of 1934 ("1934 Act"),<sup>3</sup> and cleared through the Options Clearing

Corporation ("OCC"), a registered securities clearing agency registered under Section 17A of the 1934 Act,<sup>4</sup> and Derivatives Clearing Organization registered under Section 5b of the CEA.<sup>5</sup> The proposed order was preceded by a request from OCC to approve rules that would permit it to clear these CDOs and CDBOs in its capacity as a registered securities clearing agency. OCC's request presented novel and complex issues of jurisdiction and the Commission determined that an order exempting the trading and clearing of such instruments from pertinent requirements of the CEA may be appropriate. The Commission has reviewed the comments made in response to its proposal and the entire record in this matter and has determined to issue an order exempting the trading and clearing of these contracts from the CEA.

Authority for this exemption is found in Section 4(c) of the CEA.<sup>6</sup>

**DATES:** *Effective Date:* June 5, 2007.

**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

The OCC is both a Derivatives Clearing Organization ("DCO") registered pursuant to Section 5b of the CEA,<sup>7</sup> and a securities clearing agency registered pursuant to Section 17A of the 1934 Act.<sup>8</sup> The CBOE is a national securities exchange registered as such under Section 6 of the 1934 Act.<sup>9</sup>

CBOE has filed with the Securities and Exchange Commission ("SEC") proposed rule changes to provide for the listing and trading on CBOE of cash-settled products characterized by CBOE as options based on credit events in one or more debt securities of specified "Reference Entities."<sup>10</sup> These products are referred to as Credit Default Options ("CDOs"), and would pay the holder a specified amount upon the occurrence,
