VITAL STATISTICS REPORT

Summary Report

Final Divorce Statistics, 1973

FROM THE

NATIONAL CENTER FOR HEALTH STATISTICS

In 1973 the divorce rate, 4.4 per 1,000 population, was the highest ever recorded for the United States. It exceeded, for the first time, the peak annual rate (4.3) experienced in 1946 in the wake of World War II. This continued the rapid increase in the divorce rate that began in 1968 following the slight upward trend of the mid-1960's and the relatively stable rates of the early 1960's. Provisional data for 1974 indicate an even higher rate (4.6).

A total of 915,000 divorces, including annulments, were granted in the United States in 1973. This figure was 8 percent above the total for 1972 (845,000) and 18 percent higher than the total for 1971 (773,000).

When compared with figures 10 years earlier (1963), the national divorce total more than doubled, from 428,000 to 915,000. The rate per 1,000 total population and the rate per 1,000 married females both increased around 90 percent, from 2.3 to 4.4 and from 9.6 to 18.2, respectively (table 2).

From 1972 to 1973 the divorce rate increased in almost all States for which information is available.

The rate decreased in Alaska, Connecticut, the District of Columbia, and Nevada and did not change in Massachusetts and Wyoming (table 1).

The median duration of marriage prior to divorce declined slightly. For the divorce-registration area, the median duration at time of decree was 6.6 years compared with 6.7 years for 1971 and 1972. From 1972 to 1973 this median declined in 17 States, increased in nine States, and remained unchanged in three States (table 3).

In 1973 the number of children under 18 years of age whose parents divorced was an estimated 1,079,000. This is the second year that more than 1 million children were affected by divorce. The 1973 estimate nearly doubled the estimate for 10 years earlier (562,000 in 1963). In spite of the pronounced increase, the average number of children per decree continued to decline, 1.17 in 1973 and 1.20 in 1972 compared with a maximum of 1.36 in 1964 (table 4).

In 1973, 40 percent of divorcing couples had no children under 18 years of age; 25 percent had one child; 19 percent, two children; and 15 percent had three children or more. Data for each reporting State are shown in table 5.

MONTHLY VITAL STATISTICS REPORT

Table 1. DIVORCES AND RATES: UNITED STATES, EACH REGION, DIVISION, AND STATE, 1971-73

[Data are counts of decrees granted (including reported annulments and dissolutions of marriage) supplied by States except as noted. Figures for the divorce-registration States differ slightly from those based on sample data shown in table 5. Rates per 1,000 population in each area estimated as of July 1, 1971, 1972, and 1973.]

MONTHLY VITAL STATISTICS REPORT

This report presents summary tabulations from the final divorce statistics for 1973. More detailed tabulations for 1973 will be published in *Vital Statistics of the United States, Volume III-Marriage and Divorce*. Prior to the publication of that volume, the National Center for Health Statistics will respond to requests for unpublished data whenever possible.

Table 4. ESTIMATED NUMBER OF CHILDREN INVOLVED IN DIVORCES AND ANNULMENTS: UNITED STATES, 1954-73

[Refers only to events occurring within the United States. For 1960-73 estimated from frequencies based on sample; for all other years estimated from total counts.]

Year	Estimated number of children involved	Average number of children per decree	Year	Estimated number of children involved	Average number of children per decree
1973 ¹	1,079,000	1.17	1963 ²	562,000	1.31
1972 ¹	1,021,000	1.20	1962 ²	532,000	1.29
1971 ¹	946,000	1.22	1961 ²	516,000	1.25
1970 ¹	870,000	1.22	1960	463,000	1.18
1969	840,000	1.31	1959	468,000	1.18
1968	784,000	1.34	1958	398,000	1.08
1967	701,000	1.34	1957	379,000	0.99
1966	689,000	1.34	1956	361,000	0.95
1965	630,000	1.32	1955	347,000	0.82
1964 ²	613,000	1.36	1954	341,000	0.80

¹Estimates are based on DRA frequencies instead of the 16 States previously used.
²Revised.

Table 5. DIVORCES AND ANNULMENTS BY NUMBER OF CHILDREN REPORTED: DIVORCE-REGISTRATION AREA AND EACH REGISTRATION STATE, 1973

[Based on sample data. Data relate to children under 18 years of age except as noted]

¹Data are for number of children affected by decree.

²Excludes data for Wayne County.

MONTHLY VITAL STATISTICS REPORT

TECHNICAL NOTES

Place and Time of Occurrence

Divorces and annulments are shown in all tables by State where decree was granted, which is also the State of legal residence of the plaintiff. The time of divorce or annulment is based on the date the decree was granted.

Sources of Data

Figures in tables 1 and 2 are based on totals of divorce or annulment decrees tabulated and reported by States and counties. Figures in tables 3 and 5 are based on probability samples of divorce and annulment records that were coded and tabulated in this office.

Figures in table 4 were estimated by using several methods. Estimates for 1954-59 were prepared on the assumption that the average number of children per decree for the Nation was identical with that for the reporting States. The figure for 1960 was based on a nationwide sample. Figures for 1961-73 were prepared by multiplying the national divorce rate total by the average number of children per decree found in the combined States with satisfactory reporting of the number of children. There were 16 such States in 1961-69, all 28 registration States in 1970, and all 29 registration States in 1971-73.

SAMPLING ERROR OF ESTIMATED FREQUENCY EXPRESSED AS PERCENTAGE OF AREA TOTAL: DIVORCE-REGISTRATION AREA, 1971-73 AND THE 29 REGISTRATION STATES, 1973

[Figures for Alaska, Hawaii, Montana, Rhode Island, South Dakota, Vermont, and Wyoming have no sampling errors because all records were tabulated]

Divorce Samples

Sample data used to estimate the 1973 frequencies in table 5 and the frequencies used to compute median duration of marriage for 1971-73 in table 3 were selected by using four different sampling rates, depending on the size of the annual divorce total for a State. The rates were 10, 20, 50, or 100 percent of the divorces granted in a State. Samples were selected only from the States that participated in the divorce-registration area.

Sampling errors are given in the table for the estimates which constitute 1, 10, 25, 50, 75, 90, and 99 percent of the annual divorce totals. These sampling errors are given for the divorce-registration area and each registration State for 1973 data and only for the divorce-registration area for 1971 and 1972 data.
