2009	3.5%	3.2%	2.8%									

* December value will be the cap value for annual mid-May rate adjustments per USPS schedule.

Explanation of How "Change in CPI-U" is Calculated:

The Commission determines the price cap for any 12-month period by calculating the ratio of two 12-month CPI-U averages that are 12 months apart, subtracting one, and expressing the value as a percentage. For a more detailed explanation of the calculation of the price cap please see 39 CFR §3010.21, or the Commission's Final Rules at <<http://www.prc.gov/prc-docs/home/PAEA/FinalRulesWeb.pdf>>.
