## SOI BULLETIN

A Quarterly Statistics of Income Report

## Volume 17, Number 2

The Statistics of Income (SOI) Bulletin is issued quarterly, in July, October, January, and April, by the Statistics of Income Division of the Internal Revenue Service. The report provides the earliest published annual financial statistics obtained from the various types of tax and information returns filed, as well as information from periodic or special analytical studies of particular interest to students of the U.S. tax system, tax policymakers, and tax administrators. It also includes personal income and tax data by State and historical data for selected types of taxpayers, in addition to data on tax collections and refunds and on other tax-related items.
Information on the availability of supplemental data on the topics included in this issue, special tabulations undertaken on a reimbursable basis, or other SOI subjects, may be obtained by telephoning the SOI Statistical Information Services office (202-874-0410), or by writing to the Director, Statistics of Income Division CP:R:S, Internal Revenue Service, P.O. Box 2608, Washington, D.C. 20013-2608.

Beth Kilss and Tom Petska of the Statistics of Income Division are the editors of the Bulletin. Wendy Alvey, James Dalton, James Hobbs, Ruth Schwartz, Lisa Smith, Mike Strudler, and also Bob Wilson, as a private contractor, made major contributions in the production of this issue. Views expressed in the articles are those of the authors and do not necessarily represent the views of the Treasury Department or the Internal Revenue Service.

## This Issue at a Glance

## Individual Income Tax Refurns, 1995 by Therese Cruciano

Adjusted gross income (AGI) reported on U.S. individual income tax returns for 1995 exceeded $\$ 4$ trillion for the first time-The-\$4.2- trillion reported-was-7:2-percent-more than for 1994. While salaries and wages continued to be the major source of income, taxable interest increased by 22.7 percent to $\$ 154.8$ billion; dividends, capital gains, and taxable social security benefits also showed sharp percentage increases compared to 1994. "Taxable income," the base on which the regular income tax was computed, increased 8.3 percent to $\$ 2.8$ trillion, while "total income tax,". which includes the "alternative minimum tax" (AMT) on "tax preferences," increased 10.0 percent to $\$ 588.4$ billion. AMT, alone, grew 3.6 percent to $\$ 2: 3$ billion. That "taxable income" grew at a rate exceeding the rate for AGI reflects the fact that amounts deducted from AGI to arrive at taxable income increased at lower rates: "persōnal exemption" amounts, by only 3.9 percent; and deductions, the sum of "standard" and "itemized" deductions, by 5.6 percent. The average tax rate for 1995 increased 0.3 of a percentage point to 14.0 percent of AGI. The total "earned income credit" increased 23.0 percent, reaching $\$ 26.0$ billion compared to $\$ 21.1$-billion the year before. This increase was due primarily to phasein provisions of an earlier tax law change. There were 19.3 million low-income recipients who claimed the credit for 1995 , compared to 19.0 million for 1994.

## Partnership Rełurns, 1995

by Timothy D. Wheeler
The increase in partnership profits for 1995 compared to 1994 was the largest in history, reaching total profits of $\$ 106.8$ billion. Meanwhile, the number of partnerships increased 6 percent to 1.6 million, the largest increase since 1984, while the number of partners, mostly reflecting the increases reported for holding and investment companies and legal services, increased to 15.6 million. The increase in partners was the first since 1989. Overall, partnerships continued to be dominated by businesses or firms classified under finance, insurance, and real estate, particularly operators or lessors of buildings, and by those classified under services, particularly legal and medical and health services. By type of partnership, the $\$ 24.6$ billion total increase in net income (less deficit) for 1995 was distributed as follows: limited partnerships (up \$14.6 billion to $\$ 32.5$ billion); general partnerships (up $\$ 7.2$ billion to $\$ 69.4$ billion); and limited liability companies (up $\$ 2.8$ billion to $\$ 4.9$ billion). Although real estate operators and lessors of buildings historically accounted
for most of the overall losses partnerships reported for years before their "tax sheltering" activities were gradually curtailed by the 1986 changes in the tax law, businesses and firms in this industrial group were the major contributors to the overall increase in partnership profits for 1995 , the same as for 1994. While accounting for only 9 percent (\$9:5-billion) of profits for 1995 -operators-and-lessors of buildings represented 35 percent of all partnerships and 37 percent of all partners. However, the firms in this industry group that were classified as limited partnerships continued to show a net loss, $\$ 1.9$ billion, which was down from the $\$ 6.1$ billion loss reported for 1994.

## Corporate Foreign Tax Credit, 1993: An Industry and Geographic focus

## by Sarah E. Nutter

U.S. corporations are subject to U.S. tax on income from all sources, whether earned at home or abroad. The foreign tax credit provisions allow U.S. corporations to offset a portion of the U.S. tax on their worldwide income with a credit for taxes paid to a foreign tax authority on their foreign-source income. For 1993, U.S. corporations reported $\$ 23.7$ billion in taxes paid to foreign governments on foreign-source taxable income of $\$ 94.7$ billion. After statutory limitations were applied, these 6,322 corporations reported foreign tax credits of $\$ 22.9$ billion. The credit enabled these corporations to decrease their U.S. income tax liability from approximately $\$ 81.9$ billion (U.S. income tax before credits) to $\$ 59.0$ billion after the foreign tax credit, a reduction of nearly 28 percent. Overall, U.S. corporations with a foreign tax credit reported $\$ 228.7$ billion in worldwide taxable income for 1993 , of which $\$ 134.0$ billion was U.S.-source. The remainder, approximately 41 percent of the total, was from foreign sources, down 3.4 percentage points from 1992. The United Kingdom, Canada, Brazil, Japan, Germany, and Mexico were the leading sources of foreign-source income; together, these six countries accounted for about half of the foreign-source taxable income and tax. Manufacturers (led by petroleum refiners) and corporations classified under finance, insurance, and real estate (led by banks) reported the bulk of the foreign-source taxable income, foreign taxes, and foreign tax credits.

## U.S. Possessions Corporations, 1993

by Sarah E. Nutter
U.S. corporations whose income was primarily derived within U.S. possessions claimed a possessions tax credit of $\$ 4.6$ billion on net income of $\$ 13.3$ billion. In general, the credit equaled the U.S. income tax computed on the net income derived from these possessions. Approximately 83

## Bulletin Board

percent of the 474 qualifying corporations active in 1993 claimed the credit. The net effect of the credit (because corporations claiming the credit were denied certain other tax benefits) was to reduce the total U.S. income tax liability of these corporations by 85 percent. The bulk of the credit, which was designed in part to encourage U.S. companies to make employment-producing investments in U.S. possessions, was claimed by manufacturers. These 368 manufacturers, operating primarily in Puerto Rico, accounted for nearly 97 percent of the total credit claimed. Drug manufacturers reported the largest share of the credit, claiming approximately 45 percent of the total.

## Transadions Eetweon Large Forelenn-Owned Domestic Copporations and Related Foroign Persons, 1993

## by Daniel S. Holik and Sarah E. Nutter

During 1993, there were 437 large "foreign-owned" domestic corporations (in general, with total receipts of $\$ 500$ million or more) that reported transactions with 7,662 "related foreign persons." The domestic corporations received $\$ 77.1$ billion and paid $\$ 185.3$ billion. Most of the transactions involved sales and purchases of stock in trade. Domestic corporations also reported outstanding balances at the end of their accounting periods of $\$ 88.6$ billion in loans received from, and $\$ 24.0$ billion in loans granted to, related foreign persons. Foreign-owned domestic corporations classified under manufacturing reported transactions with the largest number $(4,995)$ of related foreign persons, while foreign-owned domestic corporations classified under finance, insurance, and real estate reported the largest dollar volume ( $\$ 30.5$ billion) of transactions in which amounts were received from related foreign persons. Companies classified as wholesalers or retailers reported the largest dollar volume of transactions in which amounts were paid to related foreign persons ( $\$ 96.2$ billion). Over half of the related foreign persons were "residents" of one of the following eight countries: Australia, Canada, France, Germany, Japan, the Netherlands, Switzerland, and the United Kingdom. Transactions with related persons resident in Japan, the largest source of both amounts received and amounts paid, accounted for $\$ 25.8$ billion ( 33 percent) and $\$ 80.6$ billion ( 44 percent) of the totals, respectively. Most of the amounts associated with "persons" resident in Japan were to or from foreignowned domestic wholesalers and retailers.

 Data ReleaseSome Observations and Insights

## Now IRS Commlasloner

Statistics of Income joins the rest of the Internal Revenue Service (IRS) in welcoming our new Commissioner -Charles O. Rossotti. Mr. Rossotti comes to IRS with a strong background in computer systems development and change management. As the 45th IRS Commissioner, he will oversee renewed efforts to complete IRS' tax systems modernization and to improve customer service efforts for American taxpayers.
Rossotti was formerly Chairman of American Management Systems, Inc. The company, which he founded in 1970, is an independent computer systems and consulting firm, which provides consulting systems development services from strategic business and technology analysis to business process renewal and change management. Prior to setting up his own company, Rossotti served in a number of Federal government positions, including Deputy Assistant Secretary of Defense in the Office of Systems Analysis. He has received the Distinguished Civilian Service Award, serves on the Board of Directors of Intersolv, Inc. and Georgetown University, and is a member of the Council on Foreign Relations, a trustee of the Committee on Economic Development and the George C. Marshall Foundation, and is a principal of the Council of Excellence in Government. Rossotti graduated magna cum laude with a BA from Georgetown University and received an MBA with high distinction from Harvard Business School. He succeeds Margaret Milner Richardson, who stepped down earlier this year.

## TeleFile Award

We are very proud to report that the IRS TeleFile system recently received an award for excellence. The TeleFile program, which allows eligible taxpayers to file their returns by telephone, was selected as one of ten winners of the Innovations in American Government competition, sponsored by the Ford Foundation and Harvard University's John F. Kennedy School of Government in partnership with the Council for Excellence in Government. SOI has been involved in the development of Telefile since its inception.
Competition for the award, which was announced on October 8, 1997, was fierce. The IRS program was selected from 25 finalists, out of 100 semifinalists, and from among over 1,540 initial applicants. TeleFile's winning selection was based on the IRS application, a report prepared by an innovation site visitor, and on a presentation by IRS program representatives. IRS will

## Bulletin Board

receive a $\$ 100,000$ grant to spread the use of the winning idea to other government agencies and institutions.

SOI -- specifically, the Statistical Support Section of the Statistical Computing Branch -- has been a partner with the TeleFile Project Office since 1994 and works actively with the Project Office on quality measures and system performance. Because of his critical role in those-efforts, the innovation site visitor requested a meeting with Glenn White from SOI to discuss the quality measures, customer surveys, statistics from TeleFile, data from non-users, and other in depth questions regarding the. challenges of the innovative idea. White met with the site visitor for an hour on June 19, 1997, and provided him with preliminary measures data and work in progress. He must have
 done a great job, since TeleFile won!

## Mew Corporation Section Chiefs Chosen

SOI is pleased to announce changes in section chiefs for: two areas in the Corporation Statistics Branch. Ken Szeflinski has been appointed Chief of the Corporation Research Section. The section is responsible for several projects, including the Corporate Panel, the Corporation Tax Adjustment Study, interagency data sharing, and other research initiatives. Szeflinski joined SOI as a statistician in 1975 and worked on just about every SOI program over the years. In 1989, he was selected Chief of the Corporation Returns Analysis Section (CRAS) and was involved with many significant changes to the Corporation SOI program, including the development of the on-line edit system and the centralization to four editing centers. For over 15 years, Szeflinski has also been the liaison with the Census Bureau for administrative records.
Marty Shiley was welcomed as the new Chief of the Corporation Returns Analysis Section, the position vacated by Ken. This section has responsibility for statistical processing of data from sampled corporation income tax returns, with the data classified chiefly by industry group or asset size for subsequent publication. Shiley came to SOI in 1985 and since that time has been a senior analyst on the individual income tax side for statistical processing of Forms 1040 in the service centers. She participated in the first cross-functional management preparatory program, along with 29 other IRS employees, several years ago. Prior to her career at IRS, she managed the personnel
and facilities at the main academic library at George Washington University, which is also her alma mater. Shiley is enjoying the challenges of her new position and feels very fortunate to have this opportunity to participate in SOI's two largest programs.

## Corporation Statistics for 1994 Released

Statistics of Income-1994, Corporation Income Tax Returns has now been published. This report presents more comprehensive statistics about corporations than heretofore shown in the Bulletin. Data on income statements, balance sheets; and income tax and tax credits by "major" industrial group are all featured, along with limited data cross-classified by industry grouping and size of corporation:- (The Source Book of Statistics of In-… .... come-1994, Corporation Income Tax Returns was released previously. It contained more extensive crossclassifications of income statements, balance sheets, and income tax and credits for more detailed industrial groupings than underlie those featured in the newly-released report.) For those interested in obtaining a copy of this report from the U.S. Government Printing Office, ordering and pricing information can be found under "SOI Products and Services," toward the end of this issue of the Bulletin.

## Behind the Scenes

## Jolint Sturlistical Meetings

This year, SOI staff traveled to Anaheim, California, to attend the annual meetings of the American Statistical Association (ASA). Those present at the ASA conference included representatives of Government, academia, and industry, from the United States and other countries.

Six SOI staff members attended, most of whom were there to present papers that were methodological in nature, covering a range of topics on ongoing statistical and related research:

- Barry Johnson and Gerhard Fries, from the Federal Reserve Board, presented a paper on Analyzing Disclosure Review Procedures for the Survey of Consumer Finances, which they co-authored with former SOI employee Louise Woodburn;
- Peter Sailer spoke about Household and Individual Income Data from Tax Returns, a paper written with: Mike Weber of his staff;
- Susan Hinkins presented a paper on Replicate Variance Estimates: Reducing Bias by Using Overlapping

## Bulletin Board

## Replicates, based on research she is doing with Lock

 Oh; and- Tom Petska gave an updated look at Taxes and Business Organizational Choice: Deja Vu All Over Again?

Petska was also part of a special contributed panel session on Case Studies in Partnerships: How Administrative Agencies and Statistical Agencies Cooperate in the Use of Administrative Records for Statistical Purposes and wrote a paper on SOI's relationship with the Bureau of Economic Analysis. He chaired a session of the Business and Economic Statistics Section, as well, on Count and Truncated Data, Nonnested Testing, and Inequality Measures, which featured papers from four countries.

Wendy Alvey represented SOI at the semiannual meeting of the ASA's Committee on Privacy and Confidentiality. She was also involved in a number of business and committee meetings, including those of the Government Statistics Section as publications officer and the Council of Section's governing board as secretary. Yahia Ahmed is secretary/treasurer for the Government Statistics Section of ASA and attended some meetings in that capacity.

We plan to include all of the papers mentioned above in the next volume of the Methodology Reports series, Turning Administrative Systems Into Information Systems, along with the papers presented at the 1996 annual meetings, to be published early next year. This year's papers will also appear in the American Statistical Association Proceedings to be published in 1998. Abstracts for these papers will appear in the Winter 1997-1998 SOI Bulletin.

## SOI on Display in Fresno

Statistical Information Services (SIS) staff members Sandra Byberg and John Comisky represented Statistics of Income at the seventh annual IRS symposium for tax professionals at the California State University at Fresno (CSUF) in August. The Fresno and Ogden IRS Centers hosted the event, which was attended by approximately 400 participants and included a wide range of workshops and exhibits aimed at bringing these tax practitioners the latest information that will affect the American taxpayer. Acting Commissioner Mike Dolan was the keynote
speaker at the opening session. The next three days sessions featured talks on administrative appeals procedures, bankruptcy procedures, legislative affairs, penalties, accessing the IRS Internet site, the future of electronic filing, collection processing, emerging compliance issues, and much more. Several other high-level IRS executives were also in attendance, including National Director, Compliance Research, Wayne Thomas.

The exhibit area, where Byberg and Comisky set up an attractive, portable display of SOI products and services, offered Symposium participants an opportunity to talk one-on-one with IRS personnel from specialized areas of the Service. The SIS staffers made it a multi-media event -they took along copies of SOI's most recent publications, a newly-designed brochure about SOI, as well as two laptop computers on which they demonstrated the IRS Internet Homepage and presented a Harvard Graphics slideshow giving an overview of the Division. In this setting, they were also able to informally talk to attendees and answer questions about SOI.

## Your Call

## Histerical Tables

Occasionally, we modify the content of the Bulletin's historical tables to present time series data for specific. items for which there is a current interest, as evidenced by what is reported in the media or in current tax proposals, and in what kinds of requests we receive from you, the public.
We previously added individual income tax return data on the earned income tax credit to Table 1, and introduced a new table, Table 20, showing excise taxes by type. Starting with this issue, we have added data to Table 1 about the Presidential Election Campaign Fund checkoff, taxpayer filing status, the home mortgage interest deduction, and tax payments by type. For corporations (Table 13), we have included the number reporting the "alternative minimum tax" and the number claiming the "foreign tax credit."
Presentation of the tax collections data in Table 17 has been revised so that excise taxes are "handled" more consistently with what is presented in Table 20, which focuses on excise taxes alone. Our philosophy here is that totals for tax collections should not be confined just to what the Internal Revenue Service reports, but should also include other Treasury tax collections, including the excise taxes on alcohol, tobacco, and firearms, formerly administered by IRS but now administered by Treasury's Bureau of Alcohol, Tobacco and Firearms. The IRS collections, including the excise taxes administered by IRS, are also

## Bulletin Board

shown separately, since, after all, the Bulletin is an IRS publication and because IRS collections comprise the vast majority of the total tax collected.

We are considering other modifications to the historical tables and will announce them as they occur. We welcome your input and comments for consideration in this regard.

## Defa Release Dates

It is not unusual for some users to be surprised by the fact that we "still" do not have individual income tax return data available for 1996, because, "after all, weren't the returns supposed to be filed last April?" Of course, such comments overlook that some returns for 1996 are filed late in the year, and that all returns must undergo administrative processing before being sampled for Statistics of Income. For corporations, the answers are further compli-. cated by the fact that many businesses file for a noncalendar year and some, including many of the largest companies which dominate the statistics, obtain extensions of time in which to file.
With this in mind, the table below presents SOI's most recent annual goals for completing the major statistical programs now in the pipeline. Included is the month in which we expect to be able to release the results, ahead of publication, upon request. The table also shows some of ${ }^{-}$ the critical dates preceding the release dates, in order to clarify some of the constraints under which we must operate in order to make data available when we do.
While we may not always achieve some of these release dates (e.g., resource cutbacks), we make every effort to do so. This enables us to continue to provide you, the public, with timely and accurate data.

Overall, SOI is an annual program, and many data requirements are unchanged from year to year. Nevertheless, some requirements do change because the tax laws change, the tax forms change, and the needs of the tax policymakers in the Treasury Department and Congressional Joint Committee on Taxation change. In addition, there are sometimes revisions to the program dictated by resource constraints and by changes in the system of administrative processing of tax returns on, which the SOI samples "piggyback." Then, there are other adjustments necessitated by statistical processing.

The changing content of the program is not always evident from what we show in the individual and corporation Statistics of Income reports, where data or tables on special subjects or on some of the major tax law changes are no longer published in the same detail they once were. This helps assure that we publish the "unchanged" benchmark statistics on schedule. We try to pick up some of the
slack through the summary statistics on special subjects that we include in the Bulletin. In addition, we provide some unpublished data to the public in answer to requests directed to our Statistical Information Services office. Users should be aware though that, because of the resources required, we are not always able to validate some of the unpublished data to the same extent-we do the published data. In addition, as the law requires, we meet our commitments to the tax policymakers by providing them with the computer tape files containing the source data that underlie all the statistics for each SOI tax return record included in our samples. These records also include data on the unpublished items. In this way, policymakers have access to "everything we have" for use in their forecasting or other models. Privacy constraints prohibit such broad distribution to other users.

When we last published our release dates in the Fall 1996 issue of the Bulletin, we noted that for budgetary reasons we were discontinuing preliminary data from individual income tax returns (although we also indicated plans to continue producing the limited "early" data from returns filed through April) -- we reported that these early data would be published in the Fall issues of the Bulletin. For 1996, however, they will
 not appear until the Winter 1997-1998 issue. The "early" tax estimates for future years are still in our plans, even though the dates for this program are not shown in the table below. We do not show preliminary corporation data separately in this table either, because what we publish as preliminary (in the Bulletin historical tables, for instance) are actually data for which our review is not yet complete.

Every year brings new challenges or changes in plans for Statistics of Income. We will continue to use the "Bulletin Board" as the vehicle with which to keep you posted on these events.

## SOI Data Dissemination

SOI data are disseminated electronically both through the SOI Bulletin Board (EBB) and the Internet. The EBB now includes over 1,200 "files" containing SOI, as well as other IRS statistics and information. There have been almost 22,000 users since the EBB's inception in June

1992, with over 18,000 "downloads." During the last 12 months alone, there were over 3,000 users and over 2,000 "downloads." During the last 12 months, another 98,000 "downloads" were made from the 600 files available on Tax_Stats, the SOI home page on the IRS World Wide Web site. However, the number of Web site requests is unavailable.

Bulletin users may be interested to learn that the EBB and the Web site both include information about taxexempt organizations -- private foundations, public charities, and some others. There is a difference, however, in what the EBB and the Web site include.

The EBB presents the comprehensive financial data contained in the SOI records for each exempt organization return included in our samples for a specific income year; to obtain these records, however, they must be purchased from us. In addition to financial data, the SOI records include name and address, the Internal Revenue Code section under which tax-exempt status was granted, and various technical codes. The Web site, on the other hand, includes the SOI tabulations presenting statistics about exempt organizations and, in addition, includes the IRS Master File record of each organization, whether it is included in the SOI sample or not: The Master File information shows the name and address of the organization, Códe section under which tax-exempt status was granted, the year of the information, affiliation code indicating whether the organization was related to another exempt organization, activity code, and various technical codes, plus just two financial items, "total income" (revenue before subtraction of certain investment and other expenses) and "total assets." Plans are under way to
include Master File information about "employee plans" on the Web site within the next few months.
We are able to provide information about specific taxexempt organizations on the EBB and Web site because the privacy restrictions that apply to IRS tax records do not apply to exempt organizations. However, because of these same.privacy-restrictions, the information available to the public excludes the list of major contributors to the organization (filed as part of the return) and records of the separate business tax returns that show the computation of exempt organization unrelated business income and tax.
For additional information about the EBB and the Web site, see the "SOI Products \& Services" section at the end of this issue.

## Upcoming Features

The following are articles or "data releases" planned for inclusion in the Winter 1997-1998 issue of the Statistics of Income Bulletin:

- Individual Income Tax Returns, 1996: Early Tax Estimates,
- High-Income Individual Income Tax Returns, 1994,
- Personal Wealth Estimates, 1992,
- Projections of Returns to be Filed, 1998-2004,
- International Boycott Participation, 1994,
- Transactions of Foreign-Controlled Domestic Corporations, 1994, and
- Nonresident Alien Estate Tax Returns, 1995-1996.

# Individual Income Tax Refurns, 1995 

by Therese Cruciano

Taxpayers filed 118.2 million U.S. individual income tax returns for Tax Year 1995, 2.0 percent more than for 1994. For 1995, adjusted gross income (AGI) exceeded $\$ 4$ trillion for the first time, increasing 7.2 percent to nearly $\$ 4.2$ trillion. The largest components of AGI, salaries and wages and taxable pensions and annuities, increased 5.8 percent and 7.6 percent, respectively. Other sizable increases included taxable interest ( 22.7 percent), net capital gain (less loss) ( 19.8 percent), taxable social security benefits ( 18.3 percent), and dividends ( 14.8 percent). The total exemption deduction increased 3.9 percent to $\$ 584.5$ billion and total deductions (itemized and standard) increased 5.6 percent to almost $\$ 941.0$ billion. With these deductions, taxable income increased 8.3 percent to equal $\$ 2.8$ trillion. All of these increases exceeded the 2.8 percent rate of inflation for 1995.

Total income tax rose 10.0 percent to $\$ 588.4$ billion, and the average tax rate increased 0.3 percentage points to 14.0 percent. Total tax credits increased 12.5 percent to $\$ 10.0$ billion, and the total earned income credit (EIC) increased 23.0 percent to reach nearly $\$ 26.0$ billion. The large increase in the amount of the EIC was primarily a result of the continued phase-in of changes contained in previous tax legislation.

## Adjusted Gross Income and Selected Sources of income

As shown in Figure A, AGI for 1995 increased 7.2 percent to nearly $\$ 4.2$ trillion. This growth rate was substantially higher than the 2.8 percent annual inflation rate for the same period [1]. The principal components of AGI and statutory adjustments to AGI are presented in Figure B and Table 1. The largest component of AGI, salaries and wages, increased $\$ 174.7$ billion, or 5.8 percent, for 1995. The second largest component of AGI, taxable pensions and annuities, increased 7.6 percent, to $\$ 221.1$ billion. The largest percentage increase of any income item was for taxable interest, which increased 22.7 percent to $\$ 154.8$ billion. This increase, which reversed a four-year downward trend, may be partially due to interest rates being higher during most of 1995 than they were for 1994 [2].

Other income items with large percentage increases included net capital gain (less loss), which increased 19.8 percent to $\$ 170.4$ billion and taxable social security

Therese Cruciano is an economist with the Individual Returns Analysis Section. This article was prepared under the direction of Jeff Hartzok, Chief.

benefits, which increased 18.3 percent to $\$ 45.7$ billion. In addition, partnership and $S$ Corporation net income (less loss) increased 9.9 percent to $\$ 125.8$ billion, and dividends increased 14.8 percent to $\$ 94.6$ billion. Unemployment compensation declined 4.7 percent to $\$ 19.3$ billion, reflecting the 5.6 percent national unemployment rate for 1995, the lowest since 1990 [3].

## Lesses

Total negative income includes net negative income line items from individual tax returns [4]. Total negative income, i.e., net loss, included in AGI increased for 1995 by 3.5 percent to $\$ 177.5$ billion (Figure C). Accounting for 27.8 percent of total net losses, net operating loss increased 4.9 percent to $\$ 49.3$ billion [5]. Partnership and $\mathbf{S}$ Corporation net loss, the second largest component of the total, increased 1.9 percent to nearly $\$ 40.7$ billion. Other increases included total rent and royalty net loss, which increased 1.4 percent to $\$ 26.1$ billion; business or profession net loss, which increased 7.0 percent to $\$ 22.5$ billion; and farm net loss, which rose 1.7 percent to reach $\$ 16.0$ billion. Net capital loss, which decreased 7.0 percent to $\$ 9.7$ billion, was the only net loss item showing a substantial decline for 1995.

## Statutory Adjustments

Statutory adjustments, which are subtracted from total income in the computation of AGI, increased 5.2 percent to $\$ 41.1$ billion for 1995 (Figure D). The largest of all statutory adjustments was the self-employment tax deduction, representing 32.4 percent of the total. This adjustment increased 1.8 percent to $\$ 13.3$ billion for 1995. Payments to a self-employed retirement (Keogh) plan increased 6.6 percent to $\$ 8.7$ billion, while deductible payments to Individual Retirement Arrangements (IRAs) declined 0.6 percent to $\$ 8.3$ billion, continuing the

downward trend that began with 1986.

## Deductions

The total standard deduction claimed on 1995 individual income tax returns, i.e., the basic standard deduction plus the additional standard deduction for age or blindness, increased 4.1 percent to $\$ 413.6$ billion (Figure E). Total deductions, the sum of the total standard deduction and total itemized deductions (after limitation), equaled $\$ 941.0$ billion, an increase of 5.6 percent. (See the Changes in Law section of this article for a definition of the itemized deduction limitation.)

The number of returns claiming a standard deduction increased 1.6 percent for 1995 , accounting for 70.4 percent of all returns filed and 44.0 percent of the total deductions amount. The 1995 average standard deduction equaled $\$ 4,970$, up $\$ 124$ from the average for 1994. The increase was largely due to inflation-indexing of the standard deduction amounts.

Statistics for returns with itemized deductions are presented in Figure E and Table 3. Itemized deductions were claimed on 28.8 percent of all returns filed and represented 56.0 percent of the total deductions amount
[6]. The average total for itemized deductions (after limitation) equaled $\$ 15,507$, up $\$ 556$ from the average for 1994.

Total itemized deductions (before limitation) increased 7.1 percent for 1995. All of the itemized deductions for 1995 increased, except for casualty and theft losses, which decreased 49.0 percent to $\$ 1.8$ billion. Interest paid constituted the largest portion ( 39.6 percent) of the total, with home mortgage interest accounting for 94.4 percent of total interest paid. The remaining portion of interest paid was divided between investment interest and deductible points paid on a mortgage. The home mortgage interest deduction increased 9.4 percent and the total interest paid deduction increased 9.0 percent to $\$ 215.1$ billion. The taxes paid deduction increased 7.3 percent to $\$ 188.6$ billion, and comprised 34.7 percent of total itemized deductions (before limitation). Among the other deductions, charitable contributions increased 6.3 percent to $\$ 75.0$ billion, medical and dental expenses increased 2.2 percent to almost $\$ 27.0$ billion, and gambling losses and other unlimited miscellaneous deductions increased 24.6 percent to $\$ 4.5$ billion.

The AGI threshold for the limitation of itemized deduc-

1 Includes adjustments not shown separately.
${ }^{2}$ This deduction expired in 1993 and was not reinstated and made permanent until Aprll 1995. Taxpayers who wished to daim this deduction for 1994 but had already filed their returns, had to file amended returns, which are not reflected in these statistics. Therefore, the number of returns claiming the deduction and the amount of the deduction for 1994 are understated.
tions increased to $\$ 114,700$ ( $\$ 57,350$ if married filing separately) for 1995 . Due to this limitation, 3.7 million higher-income taxpayers were unable to deduct nearly $\$ 15.6$ billion in itemized deductions, an increase of 16.5 percent from the 1994 amount.

## Taxable Income and Total Income Tax

For 1995, AGI grew at a lower annual rate than taxable income, 7.2 percent compared to 8.3 percent (Figure A). Since taxable income is the result of AGI less exemptions
and deductions, smaller increases in deductions (5.6 percent) and exemption amounts deducted ( 3.9 percent) resulted in a larger percentage increase in taxable income. Taxable income totaled over $\$ 2.8$ trillion, and total income tax increased 10.0 percent to $\$ 588.4$ billion. The alternative minimum tax rose 3.6 percent to $\$ 2.3$ billion.

Average AGI reported on 1995 individual income tax returns was $\$ 35,438$, and average taxable income was $\$ 29,741$ [7]. These amounts represent a growth of 5.2 percent and 6.2 percent, respectively, from the 1994

${ }^{1}$ Returns with no adjusted gross income are excluded from the deduction counts. For this reason, the sum of the number of returns with total itemized deductions and the number of returns with total standard deduction is less than the total number of returns for all filers.
${ }^{2}$ Total deductions for 1994 indude $\$ 448$ million in prlor-year-moving expenses.
${ }^{3}$ indudes investment interest and deductible mortgage "points" not shown separately.
amounts of $\$ 33,702$ (average AGI) and $\$ 27,998$ (average taxable income). Figure F shows that the average tax rate for 1995 (i.e., total income tax divided by AGI reported on all returns, taxable and nontaxable) was 14.0 percent, 0.3 percentage points more than for 1994. In the statistics, all income size classes except the highest had average tax rates that were the same as, or lower than, those shown for 1994. The increased average tax rate for 1995 most likely resulted from taxpayers, as a whole, earning more income and, thus, moving into higher tax brackets. For example, the highest income size class (" $\$ 1,000,000$ or more") had an increased number of taxpayers (up 24.3 percent) and AGI (up 25.2 percent). Consequently, these taxpayers faced higher tax rates and higher average taxes. This income size class showed a 31.4 percent average tax rate, 0.3 percentage points higher than the 1994 rate. These highest-income taxpayers comprised less than 1 percent of all taxpayers for 1995. The constant or lower average tax rates for the remaining income size classes for 1995 were mainly the result of inflation-indexing of the size of the standard deduction, the size of the deduction for personal exemptions, and the width of the tax rate brackets.

## Tax Credits

Statistics for the earned income credit (EIC) and the other tax credits are shown in Tables 2 and 4. Total tax credits increased 12.5 percent, or $\$ 1.1$ billion, for 1995 to over
$\$ 10.0$ billion (Figure G). With the exception of the child care credit, which decreased 0.3 percent, all of the tax credits increased for 1995 . The change in total tax credits was primarily a result of increases in the earned income credit (used to offset income tax before credits) and the foreign tax credit, the two largest credits. The portion of the earned income credit used to offset income tax before credits increased 12.9 percent to $\$ 3.1$ billion, and the foreign tax credit increased 28.4 percent to nearly $\$ 3.0$ billion.

Unlike other tax credits, the EIC may not only offset income tax before credits, but may also offset all other taxes and may even be refundable. The refundable portion, the largest segment of the EIC, was treated as a refund and paid directly to taxpayers who had no tax against which to apply the credit, or whose EIC exceeded income tax (and other income-related taxes). The refundable portion of the EIC totaled $\$ 20.8$ billion for 1995, an increase of 25.5 percent from 1994 (Figure H).

Over 19.3 million taxpayers claimed the earned income credit for 1995, an increase of 1.7 percent from 1994. The total earned income credit, however, increased 23.0 percent to nearly $\$ 26.0$ billion, largely due to the continued phase-in of eligibility levels and increased rates for taxpayers with qualifying children [8]. (See the Changes in Law' section of this article for more details on the earned income credit.) For taxpayers with no qualifying children, the only changes in eligibility levels and rates were due to inflation-

NOTE: Detail may not add to totals because of rounding.
indexing. The number of EIC returns with no qualifying children and the amount of EIC claimed on these returns decreased 13.7 percent and 10.2 percent, respectively. The phase-in of tax legislation only affected the maximum EIC rates for taxpayers with one qualifying child. The number of returns for this group increased 18.1 percent, and the amount of EIC claimed increased 12.7 percent. The phase-in of tax legislation for taxpayers with two or more qualifying children affected eligibility levels, the maximum EIC amount, and the maximum EIC rate. While the number of these taxpayers only increased 10.8 percent, the amount of EIC claimed by taxpayers with two or more qualifying children increased 38.6 percent. Similar percentage changes are shown in Figure H for the numbers of returns and amounts of the refundable portion of the EIC.

## Historical Trends in Constant Dollars

As shown in Figure I, both AGI and salaries and wages showed large increases in constant dollars for 1995. Both salaries and wages and AGI decreased (in constant dollars) beginning with 1980, and continued to decline
until 1982. For 1983, AGI increased and continued to steadily increase through 1986. Between 1988 and 1993, constant dollar AGI fluctuated within a narrow band before increasing substantially for both 1994 and 1995. The trend for salaries and wages over this same period is comparable.

Over the same period, total income tax varied dramatically (Figure J). For 1980 and 1981, total income tax (in constant dollars) increased gradually, then declined sharply between 1981 and 1983, coinciding with the lower tax rates provided by the Economic Recovery Tax Act of 1981 (ERTA81). Although the ERTA81 tax reductions were still being phased in, total income tax increased for 1984, and continued to increase through 1986, as AGI began to steadily climb. Total income tax decreased for 1987, the first year under the Tax Reform Act of 1986 (TRA86), as the maximum tax rate was reduced from 50 percent to 38.5 percent. For 1988, total income tax rebounded as AGI increased. Between 1988 and 1991, total income tax (in constant dollars) declined modestly each year, mirroring the gradual decline of AGI. For 1992, total income tax increased, and continued to increase until

1995, reflecting higher AGI and higher tax rates (for 1993 and later years).

Net capital gain (less loss) is the sum of capital gain distributions reported on Form 1040 and sales of capital assets reported on Schedule D (net gain less loss).

Figure K shows that, in constant dollars, net capital gain (less loss) increased 16.5 percent and capital gain distributions (reported on Schedule D and Form 1040) increased 23.6 percent for 1995. Net capital gain (less loss) decreased 9.6 percent, 25.6 percent, and 13.7 percent for 1989, 1990, and 1991, respectively. The post-recession years of 1992 and 1993 were marked with double-digit growth in net capital gain (less loss), before 1994 saw a decline of 3.8 percent. The constant-dollar percentage changes in capital gain distributions for this same period were larger. After increasing 34.9 percent for 1989, these distributions declined 32.4 percent for 1990 and then
rebounded by 14.6 percent the following year. Similarly to net capital gain (less loss), 1992 and 1993 saw large increases in capital gain distributions ( 54.5 percent and 56.8 percent, respectively) before the decline reported for 1994. Although 1995 showed the highest capital gain distributions of recent years, net capital gain (less loss) was still below the constant-dollar level shown for 1988.

Figure L presents several income, deduction, and tax items (in constant dollars) over time. Real taxable interest declined annually between 1990 and 1994. For 1992 and 1993, these declines were substantial, 24.8 percent and 21.6 percent, respectively. The increase for 1995 , while quite large, only brought the taxable interest amount to levels less than those reported for 1992, and far below ( 42.8 percent) the maximum amount reported for 1989. Dividends decreased for 1990, and continued to decline until 1994, when they showed a slight increase. However,

the 11.6 -percent increase for 1995 still left the dividends amount slightly below the amount reported for 1989.

Constant-dollar business or profession net income (less loss) fluctuated with increases and decreases, within a narrow range, between 1988 and 1995. This trend continued with the 0.9 percent decline for 1995. Taxable Individual Retirement Arrangement (IRA) distributions showed substantial increases for recent years, with the 1995 amount more than double the level shown for 1988. Taxable social security benefits increased each year since 1988. The large increase for 1994 reflected the change in law requiring up to 85 percent of social security benefits to be included in taxable income for some beneficiaries. Taxable pensions and annuities increased annually since 1979, with double-digit growth for 1983 through 1987. Tax Year 1995 levels were nearly three times the amount reported for 1979. Total rent and royalty net income (less loss) and partnership and $\mathbf{S}$ Corporation net income (less loss) both showed large increases and large decreases over time. For most of the 1980's, rent and royalty net income (less loss) decreased annually, and for many years the total was negative. This trend changed with TRA86 and its passive loss rules [9]. For 1991, this item finally reached a level exceeding the amount reported for 1981, and continued to increase through 1995. Similarly, partnership and S Corporation net income (less loss) was negative from 1981 through 1986. For 1987, this item reached a level higher than the amount reported for 1979. Partnership and S Corporation net income (less loss) more than doubled between 1987 and 1988 and, despite a decline for 1991, steadily increased through 1995. Real Tax Year 1995 amounts were over four times the amount
reported for 1979.
The inflation-adjusted amount of total itemized deductions after limitation increased from 1979 through 1986, then declined for the next two years because of provisions in TRA86. The amounts increased slightly the next two years, but beginning with 1991 , when itemized deductions were limited for taxpayers with AGI above certain income thresholds, total itemized deductions decreased again. The total itemized deduction amount reported for 1995 nearly matches the level shown for 1984. During this same period, the real itemized deduction for charitable contributions increased each year until 1987, when provisions of TRA86 reduced the total number of itemizers. Since 1987, this deduction increased for most years.

The fluctuations in alternative minimum tax shown for 1988 through 1995 reflect the changes in law. For 1989, when the AMT exclusion was phased out, AMT declined 22.9 percent. Likewise, AMT showed double-digit growth for both 1991 and 1993, coinciding with increases in the AMT rate introduced for these years.

With the exception of 1985 , the real value of the total earned income credit declined from 1980 through 1986. Tax Year 1987 showed the largest percentage increase in the EIC, 89.0 percent, primarily due to the increases in both the rate and the base of the credit. Since 1987, total EIC increased each year, exhibiting double-digit growth for many of the these years. The total EIC amount for 1995 was more than six times the level reported for 1979.

## Summary

For 1995, both AGI and taxable income grew at over twice the annual rate of inflation ( 2.8 percent). AGI

NA - Not applicable.
' Constant dollars were calculated using the U.S. Bureau of Labor Statistics' consumer price index for uban consumers (CP1-U, 1982-84=100). See footnote 1 of this articie for further details.
${ }^{2}$ Iterized deductions for 1991 and later years were limited if ac\%usted gross income exceeded specified levels.
${ }^{3}$ Percentage not calculated.
increased 7.2 percent and taxable income increased 8.3 percent. These substantial increases contributed to the 10.0 percent increase in total income tax. The average tax rate increased 0.3 percentage points for the highest income size class, but either declined or remained the same as the 1994 rate for all other income size classes. Overall, the average tax rate increased for 1995 from 13.7 percent to 14.0 percent.

The largest components of AGI, salaries and wages and taxable pensions and annuities, increased 5.8 percent and
7.6 percent, respectively. A number of other income items contributed to the growth of AGI: taxable interest increased 22.7 percent; net capital gain (less loss) increased 19.8 percent; taxable social security benefits increased 18.3 percent; and dividends increased 14.8 percent. While 1995 saw record levels reported for most of these items, taxable interest, net capital gain (less loss), and dividends were still below the 1988 level (in constant dollars). Between 1994 and 1995, the number of returns claiming the earned income credit increased only 1.7

## Individual Income Tax Returns, 1995

percent, yet the total amount of the credit increased 23.0 percent, mainly as the result of the phase-in of changes enacted in 1993.

## Changes in Law

The following is a list of Federal tax law and Internal Revenue Service administrative changes that had a major bearing on the 1995 data presented in this article. In general, the definitions used in this article are the same as those in section 4 of Statistics of Income--Individual Income Tax Returns 1994--Publication 1304.

Earned Income Credit-As with previous years, the maximum amount of the earned income credit increased, as did the amount of earned income and AGI an individual could have and still claim the credit. The maximum credit for taxpayers with no qualifying children increased (due to inflation-indexing) 2.6 percent, from $\$ 306$ to $\$ 314$. The EIC rate for these taxpayers remained 7.65 percent of EIC income. For taxpayers with no qualifying children, earned income and AGI had to be less than \$9,230 (up 2.6 percent from \$9,000 for 1994). For taxpayers with one qualifying child, the maximum credit increased (due to inflation-indexing) 2.7 percent, from $\$ 2,038$ to $\$ 2,094$. The EIC rate for these taxpayers increased from 26.3 percent to 34.0. percent of EIC_income. For taxpayers with two or more qualifying children, the maximum credit rose 23.0 percent, from $\$ 2,528$ to $\$ 3,110$. The EIC rate for these taxpayers increased from 30.0 percent to 36.0 percent of EIC income. To be eligible for the credit, a taxpayer's earned income and AGI had to be less than $\$ 24,396$ (up 2.7 percent from $\$ 23,755$ for 1994) for one qualifying child, or less than $\$ 26,673$ (up 5.4 percent from $\$ 25,296$ for 1994 ) for two or more qualifying children.
Exemption Amount--Indexing for inflation allowed a taxpayer to claim a $\$ 2,500$ deduction for each exemption to which he or she was entitled for 1995 , a $\$ 50$ increase over the amount allowed for 1994. The AGI threshold for the limitation ofexemption amounts was also indexed for inflation, from $\$ 111,800$ to $\$ 114,700$ for single filers; $\$ 167,700$ to $\$ 172,050$ for married persons filing jointly and surviving spouses; $\$ 139,750$ to $\$ 143,350$ for heads of household; and $\$ 83,850$ to $\$ 86,025$ for married persons filing separately. For 1995, the phaseout of the deduction for exemptions was completed at AGI levels above $\$ 237,200$ for single filers; $\$ 294,550$ for married persons filing jointly and surviving spouses; $\$ 265,850$ for heads of household; and $\$ 147,275$ for married persons filing separately. Above these levels, no deduction for exemptions was allowed.

Form 1040EZ--For the first time, taxpayers were permitted to report unemployment compensation on Form 1040EZ.
Form 8615, Tax For Children Under Age 14 Who Have Investment Income of More Than \$1,300--The amount of investment income a child under age 14 could have without having to file Form 8615 increased from $\$ 1,200$ to $\$ 1,300$.

Household Employment Taxes--For 1995, taxpayers paying domestic employees $\$ 1,000$ or more generally had to pay social security and Medicare taxes for these employees. The taxes were paid with the income tax return by filing Schedule H, Household Employment Taxes. (Household employment taxes are reflected in the statistićs for" "total tax liability"" and are tabulated in Table 2.) Previously, social security and Medicare taxes for household employees were reported quarterly on Form 942, Employer's Quarterly Tax Return for Household Employees.

Itemized Deductions--If a taxpayer's AGI was greater than $\$ 114,700$ ( $\$ 57,350$ if married filing separately), some types of his or her itemized deductions were limited; this threshold increased from $\$ 111,800(\$ 55,900)$ for 1994 , as a result of indexing for inflation. The limitation did not apply to deductions for medical and dental expenses, investment interest expenses, casualty or theft losses, and gambling losses; all other deductions were subject to the limitation. To arrive at allowable itemized deductions, total itemized deductions were reduced by the smaller of: (a) 80 percent of the deductions that were subject to the limitation, or (b) 3 percent of AGI in excess of the limitation threshold.

Self-employed Health Insurance Deduction--The selfemployed health insurance deduction, which expired on December 31, 1993, was retroactively extended and made permanent. In addition, the percentage of health insurance premiums that self-employed taxpayers were able to deduct increased from 25 percent to 30 percent.

Self-employment Tax--The ceiling on taxable "selfemployment income" was changed for 1995. The maximum amount of net earnings subject to the social security part of self-employment tax increased to $\$ 61,200$. This threshold was increased from $\$ 60,600$ for 1994, as a result of indexing for inflation.

Social Security Numbers--Taxpayers were required to provide the social security number for each dependent claimed on their income tax return and for each dependent listed on Schedule EIC, unless the dependent was born after October 1995.

Standard Deduction--The basic standard deduction and

## Individual Income Tax Returns, 1995

additional standard deduction for age or blindness increased for 1995 as a result of inflation-indexing. For single filers, the basic standard deduction rose from $\$ 3,800$ to $\$ 3,900$; for married persons filing jointly or surviving spouses, from $\$ 6,350$ to $\$ 6,550$; for married persons filing separately, from $\$ 3,175$ to $\$ 3,275$; and for heads of household, from $\$ 5,600$ to $\$ 5,750$. The basic standard deduction claimed by filers who were dependents of other taxpayers increased from $\$ 600$ to $\$ 650$. The additional standard deduction for people age 65 or older or the blind remained $\$ 950$ for single filers and heads of households, and $\$ 750$ for married persons filing jointly, surviving spouses, and married persons filing separately.

Tax Brackets--To counterbalance the effects of inflation, the boundaries for the tax brackets were widened. The 15 percent bracket applied to taxable income equal to or below $\$ 23,350$ ( $\$ 22,750$ for 1994) for single filers; $\$ 39,000$ ( $\$ 38,000$ for 1994) for joint filers or surviving spouses; $\$ 19,500$ ( $\$ 19,000$ for 1994) for married persons filing separately; and $\$ 31,250$ ( $\$ 30,500$ for 1994) for heads of household. The 28 percent tax bracket applied to taxable income in excess of the 15 percent bracket ceiling and equal to or below $\$ 56,550(\$ 55,100$ for 1994) for single filers; $\$ 94,250$ ( $\$ 91,850$ for 1994) for joint filers or surviving spouses; $\$ 47,125$ ( $\$ 45,925$ for 1994) for married persons filing separately; and $\$ 80,750(\$ 78,700$ for 1994) for heads of household. The 31 percent tax bracket applied to taxable income in excess of the 28 percent bracket ceiling and equal to or below $\$ 117,950$ ( $\$ 115,000$ for 1994) for single filers; $\$ 143,600(\$ 140,000$ for 1994) for joint filers or surviving spouses; $\$ 71,800(\$ 70,000$ for 1994) for married persons filing separately; and $\$ 130,800$ (127,500 for 1994) for heads of households. The 36 percent tax bracket applied to taxable income in excess of the 31 percent bracket ceiling and equal to or below $\$ 256,500$ ( $\$ 250,000$ for 1994) for single filers, joint filers or surviving spouses, and heads of households and $\$ 128,250$ ( $\$ 125,000$ for 1994 ) for married persons filing separately. The 39.6 percent tax rate applied to taxable income in excess of the upper boundary for the 36 percent tax bracket.

## Deta Sources and limitations

These statistics are based on a sample of individual income tax returns (Forms 1040, 1040A, 1040EZ, 1040T, and 1040 PC ; including electronically-filed returns) filed during Calendar Year 1996. Returns in the sample were stratified based on: (1) the larger of positive income or negative income; (2) the size of business and farm receipts; (3) the presence or absence of specific forms or
schedules; and (4) the usefulness of returns for tax policy modeling purposes [10]. Returns were then selected at rates ranging from 0.02 percent to 100 percent. The 1995 data are based on a sample of 114,591 returns and an estimated final population of $118,650,252$ returns. The corresponding sample and population for the 1994 data were 108,861 and $116,878,243$ returns, respectively.

Since the data presented here are estimates based on a sample of returns filed, they are subject to sampling error. To properly use the statistical data provided, the magnitude of the potential sampling error must be known; coefficients of variation (CV's) are used to measure that magnitude. Estimated CV's for the numbers of returns and money amounts for selected income items are presented in Figure M. The reliability of estimates based on samples, and the use of coefficients of variation for evaluating the precision of estimates based on samples, are discussed in the appendix to this issue of the Bulletin.

## Nofes and Reforences

and Loss (From rental real estate, royalties, partnerships, $S$ Corporations, estates, trusts, REMICs, etc.), was separated into the following components: rent and royalty net loss, partnership and S Corporation net loss, and estate and trust net loss. When any of these components were negative on a return, the corresponding loss (rather than the netted total amount from Schedule E) was included in the statistics for total net loss. For example, if a return showed estate and trust net income of $\$ 20,000$ and rent and royalty net loss of $\$ 12,000$, total net loss would include the $\$ 12,000$ of estate and trust net loss, rather than the $\$ 8,000$ netted total of both sources of
supplemental income.
[5] Net operating loss is a carryover of the loss of a business when AGI for a prior year was less than zero. The loss could be applied to the AGI for the current year and carried forward for up to 15 years. Net operating loss is included in other income and edited separately for SOI purposes.
[6] The remaining 0.8 percent of the returns did not claim either a standard deduction or itemized deductions because no AGI was reported.
[7] Average AGI is defined as the amount of AGI

## Individual Income Tax Returns, 1995

divided by the number of returns filed. Average taxable income is defined as the amount of taxable income divided by the number of returns with taxable income. Average total income tax is defined as the amount of total income tax divided by the number of taxable returns. Taxable returns are defined as returns with "total income tax" (the sum of income tax after credits and the alternative minimum tax) present.
[8] U.S. Congress, Omnibus Budget Reconciliation Act of 1993 (H.R. 2264, 103rd Congress; Public Law 10366), August 10, 1993.
[9] Losses generated by any "flow-through" business activity (i.e., such as partnerships or S Corporations for which profits and certain other amounts are passed through to the owners for taxation) in which the taxpayer did not "materially participate" (i.e., was not involved regularly and substantially in the operations
of the activity) are categorized as passive activity losses. TRA86 gradually eliminated the use of passive losses as offsets to nonpassive income, such as salaries and wages. TRA86 provided for a 5-year phase-in (ending in 1991) of the limitations on passive losses for investments made prior to 1987; since Tax Year 1991, the restrictions applied to all passive losses. However, exceptions up to $\$ 25,000$ were made for certain real estate losses. Under prior law, passive losses were fully deductible.
[10] Returns in the sample were stratified based on the presence or absence of one or more of the following forms or schedules: Form 2555, Foreign Earned Income; Form 1116, Foreign Tax Credit (Individual, Fiduciary, or Nonresident Alien Individual); Schedule C, Profit or Loss from Business (Sole Proprietorship); and Schedule F, Profit or Loss From Farming.

*Estimate should be used with caution because of the small number of sample returns on which it ls based.

* Data combined to avoid disclosure of information for specific taxpayers.

I Not induded in achusted gross income.
2 Other Income indudes all items reported on line 21 of Form 1040, such as prizes, awards, recoveries of bad debts, insurance received as reimbursement for medical expenses taken as a deduction in the previous year, and any other income subject to tax for which no specific line was provided on the form. Any forelgn-earned income exclusion or net operatime lops in an eartier year (that was not carried forward and dectucted for 1995) was entered as a negative amount on line 21 by the taxpayer but was edited into separate fields during service center processing. Beginning in 1995, gambling earnings entered on line 21 by the taxpayer were also edited into a separate field during service center processing.
NOTE: Debail may not add to totals because of rounding.

Footnotes at end of table.

Individual Income Tax Returns, 1995

Table 3.--Returns with Itemized Deductions, by Size of Adjusted Gross Income-Continued
[All figures are estimates based on samplee-money amounts are in thousands of dollars]

*Estimate should be used with caution due to the small number of semple returns on which it is based.
NOTE: Detail may not add to totals because of rounding.

Table 4.--Returns with Earned Income Credit, by Size of Adjusted Gross Income
[All figures are estimates based on samples--money amounts are in thousands of dollars]

| Size of adjusted gross income | Number of returns | Adjusted gross income (less deficit) | EIC salaries and wages |  | Nontaxable earned income |  | EIC sell-employment income (less loss) |  | EIC earned income |  |

# Parłnership Returns, 1995 

by Timothy D. Wheeler

Partnership returns for 1995 reported the largest increase for net income (less deficit) in history as net income increased by 30 percent to $\$ 106.8$ billion. This increase continued the trend of large percentage increases in overall net income (less deficit) first seen for 1991. Within the finance, insurance, and real estate industrial division, operators and lessors of buildings reported the largest increase. Net income (less deficit) for this industry rose $\$ 6.9$ billion to $\$ 9.5$ billion for 1995 . This was only the second time since 1967 that this industry reported a positive net income (less deficit). For the first time since 1980, partnerships overall showed a positive rental real estate income (less deficit) of $\$ 4.4$ billion, a $\$ 6.9$ billion increase from the $\$ 2.5$ billion loss reported for 1994. Also, for the first time since 1960, the operators and lessors of buildings industry -- the main source of rental real estate losses in the past -- reported a positive rental real estate income (less deficit) of $\$ 4.7$ billion, up from the $\$ 1.4$ billion loss reported for 1994.

The year 1995 was the first since 1988 that partnerships reported increases for all the following: number of partnerships; number of parmers; total assets; total receipts; and overall net income. For 1995, the number of partnerships increased 6 percent to $1,580,900$, the largest increase since 1984. The number of partners increased 4 percent to $15,605,686$. This was the first increase since 1989. Total assets increased 18 percent, which was the largest increase since 1985. Total receipts increased 18 percent, which was the largest increase since 1987 [1,2].

## Parmership Activity in 1995

For 1995, the number of partnerships increased 5.8 percent to $1,580,900$, which was the largest annual increase since 1984 and only the second increase since 1988 (Figure A). Sixty-nine percent of this 1995 increase was shown by partnerships in the finance, insurance, and real estate and services industrial divisions (Figure B). The number of partners increased 4.1 percent to $15,605,686$, the first increase since 1989. Most of this increase was reported by holding and investment companies and services (Figure B and Table 6).
Partnership returns reported the largest increase in overall net income (less deficit) in history, as this amount rose $\$ 24.6$ billion to $\$ 106.8$ billion for 1995 [ 1,2$]$. Most of this increase was a result of rises in portfolio interest income, real estate rental income (less deficit), and net

Timothy D. Wheeler is a statistician in the Corporation Special Projects Section. This article was prepared under the direction of Doug Shearer, Chief.

' Less than 0.05 percent.
income (less deficit) from trade or business, which rose by $\$ 11.8$ billion, $\$ 6.9$ billion, and $\$ 4.6$ billion, respectively (Figure C). Only the agriculture, forestry, and fishing, construction, and wholesale and retail trade industrial divisions showed decreases (Figure D). Eighty-three percent of the entire increase in net income (less deficit) for all partnerships was reported by the finance, insurance, and real estate industrial division. Net income (less deficit) for this division increased from $\$ 24.1$ billion for 1994 to $\$ 44.5$ billion, for 1995 . This was the third consecutive year this division reported a gain -- the only years for which a gain was reported by this division since 1979. Within this division, the largest increases were reported by holding and investment companies ( $\$ 7.5$ billion) and real estate operators and lessors of buildings ( $\$ 6.9$ billion). Other industrial divisions which showed large increases were manufacturing, transportation and public utilities, and services, for which net income (less deficit) rose by $\$ 2.6$ billion, $\$ 1.1$ billion and $\$ 1.1$ billion, respectively (Figure D).

Partnership statistics for 1995 show the continuing domination of the finance, insurance, and real estate and the services industrial divisions (Figures B and D). The finance, insurance, and real estate division accounted for 53.7 percent of all partnerships, 46.4 percent of the net income and 53.4 percent of the deficit. While only 17.9 percent of all partnerships were in the services division, these partnerships reported 27.7 percent of the net income and 16.9 percent of the deficit for all partnerships. Together these two divisions accounted for almost threequarters of both net income and deficit for all partner-

NOTE: Detail may not add to totals because of rounding.
ships. For 1995 the net income (less deficit) for services - : increased $\$ 1.1$ billion to $\$ 37.4$ billion [1]. Eighty-three percent of the total net income (less deficit) for this division was attributable to partnerships in the following industries: legal services ( $\$ 19.2$ billion); medical and health services ( $\$ 7.3$ billion); and accounting, auditing, and bookkeeping services ( $\$ 4.7$ billion). For 1995, this amount increased for all these industries except medical and health services, which declined slightly. For 1995, the largest increase for net income (less deficit) within
services-was shown by hotels and other lodging places,which rose almost one billion dollars, from a $\$ 0.9$ billion loss for 1994 to a $\$ 0.03$ billion gain for 1995 .

For 1995, the $\$ 24.6$ billion increase for net income (less deficit) for all partnerships was mostly caused by increases in the gain for the three types of partnerships, rather than declines in the losses (Figure E). The gains for limited partnerships, general partnerships, and limited liability companies rose $\$ 14.2$ billion, $\$ 7.2$ billion, and $\$ 6.3$ billion, respectively. Limited partnerships showed

T Includes "Nature of business not allocable," which is not shown separately.
NOTE: Detail may not add to totals because of rounding.
the largest increase in net income (less deficit) rising $\$ 14.6$ billion to $\$ 32.5$ billion (Figure F). However, limited partnerships in the real estate industry continued to show losses for 1995, although the losses declined from $\$ 6.9$ billion for 1994 to $\$ 2.5$ billion for 1995. This decline was driven by limited partnerships in the operators and lessors of buildings industry. These partnerships reported a decline in net deficit from $\$ 6.1$ billion for 1994 to $\$ 1.9$ billion for 1995 .

Although the number of both gain and loss partnerships increased for 1995, the increase in the number of gain partnerships was more than three times the increase in the number of loss partnerships (Figure G). The number of gain partnerships increased by 66,000 while the number of loss partnerships increased by only 21,000 (Figure G). For 1995, the number of partners in both general and limited liability partnerships increased, while the number of partners in limited partnerships decreased (Figure H). This decline was caused by fewer partners in limited loss partnerships, even though the number of limited loss partnerships increased slightly (Figure G).

For 1995, the number of limited liability companies continued to increase dramatically, rising 148 percent to 118,559 (Figure F ). More than two-thirds of these companies were classified in the finance, insurance, and real

## Reql Estate Operators and Lessors of Buildings

Although the real estate operators and lessors of buildings industry has historically reported large deficits, for 1995 this industry was the largest contributor, for the second consecutive year, to the rise in net income (less deficit) for all partnerships, accounting for $\$ 6.9$ billion of the overall $\$ 24.6$ billion increase (Figure D). In addition, this
industry showed a profit for only the second time since 1967, as net income (less deficit) rose from a $\$ 2.6$ billion gain for 1994 to a $\$ 9.5$ billion gain for 1995 . The 560,145 real estate operators and lessors of buildings reported total assets of $\$ 789.2$ billion --29 percent of the total reported for all partnerships -- an increase from the $\$ 740.9$ billion reported by this industry for 1994 [1]. Overall, this industry accounted for 35 percent of all partnerships and 37 percent of all partners (Table 1). Although this industry accounted for only 9 percent of the net income

${ }^{1}$ The term Limited Liability Company is dscussed in the Explanation of Selected Terms section. NOTE: Detail may not add to totals because of rounding.
(less deficit) for all partnerships for 1995 , this was a dramatic increase from 1988, when this industry reported a $\$ 31.3$ billion deficit and all partnerships showed a positive net income (less deficit) of $\$ 14.5$ billion (Table 6).

For 1995, real estate operators and lessors of buildings reported the largest increase in the number of partnerships $(19,771)$, while at the same time showing the largest decline in the number of partners $(265,809)$. This increase

| 1994... | 14,990 | 2,657 | 1,737 | 5,885 | 4,398 | 241 | 72 |
| 1995............ | 15,606 | 2,897 | 1,772 | 6,378 | 3,846 | 491 | 222 |

[^6]in the number of partnerships was due to a rise in the number of limited liability companies $(19,498)$ and limited partnerships $(6,028)$, while the decline in the number of partners was mostly the result of fewer limited partners $(447,767)$. Also, limited partnerships in this industry were responsible for $\$ 4.2$ billion of the $\$ 24.6$ billion increase for net income (less deficit) for all partnerships. These partnerships reported a decline in net deficit from $\$ 6.1$ billion for 1994 to $\$ 1.9$ billion for 1995. This increase was the result of a 9.4 percent increase in the number of gain limited partnerships, from 67,733 for 1994 to 74,117 for 1995. The number of loss limited partnerships remained virtually unchanged for 1995. Thus, this sector of limited partnerships can no longer be labeled a lossgenerating haven, as it was during the mid-1980's. If the deficit-declining trend of the mid-1990's continues, this sector will report a positive net income (less deficit) by the turn of the century.

## Rental Real Estate Income (Less Defici)

Table 4 presents data from Form 8825, Rental Real Estate Income and Expenses of a Partnership or an S Corporation. Rental real estate income (less deficit) for all partnerships increased $\$ 6.9$ billion, from a $\$ 2.5$ billion loss for 1994 to a $\$ 4.4$ billion gain for 1995 (Figure I). This was the first positive rental real estate net income (less deficit) since 1980. This increase accounted for 28 percent of the $\$ 24.6$ billion increase in overall profits for all partnerships. Ninety percent of the increase was attributable to real estate operators and lessors of buildings. For the first time since 1960, this industry reported a positive rental real estate income (less deficit) of $\$ 4.7$ billion, up from the $\$ 1.4$ billion loss shown for 1994.

For 1995, the $\$ 6.9$ billion increase in rental real estate income (less deficit) for all partnerships was mostly caused by a $\$ 10.8$ billion increase in gross rental income,

## Figure I

## Partnership Returns, 1995

from $\$ 163.5$ billion for 1994 to $\$ 174.3$ billion for 1995 (Table 4 and [1]). Also, the $\$ 6.9$ billion increase in rental real estate income (less deficit) was caused by both an increase in rental income and a decline in rental deficit. Rental income increased $\$ 4.0$ billion to $\$ 32.1$ billion while the deficit declined $\$ 2.9$ billion to $\$ 27.7$ billion (Figure J). Although, for the period 1993 to 1995, rental income increased $\$ 7.1$ billion and rental deficit declined only $\$ 5.7$ billion, quite the reverse was shown for the period 1990 to 1993. For this period, rental income increased only $\$ 5.3$ billion, from $\$ 19.7$ billion for 1990 to $\$ 25.0$ billion for 1993 , while rental deficit declined a dramatic $\$ 21.4$ billion, from $\$ 54.8$ billion for 1990 to $\$ 33.4$ billion for 1993.

## Total Receipts and Total Assets

For 1995, total receipts for all partnerships increased $\$ 149.4$ billion ( 17.7 percent) to $\$ 993.8$ billion (Figure D). This increase was 36.4 percent more than the $\$ 109.5$ billion increase for 1994, consistent with an improving economy [1]. Eighty-seven percent ( $\$ 130.2$ billion) of this rise for 1995 was due to increases in business receipts ( $\$ 104.5$ billion), portfolio net long-term capital gain ( $\$ 13.9$ billion), and portfolio interest income ( $\$ 11.8$
billion). All industrial divisions showed increases in receipts for 1995 . Nearly three-quarters of the $\$ 149.4$ billion increase in total receipts was concentrated in finance, insurance, and real estate ( $\$ 54.3$ billion), wholesale and retail trade ( $\$ 29.9$ billion), and services ( $\$ 24.8$ billion). The manufacturing and transportation and public utilities divisions also showed sizable increases of $\$ 20.1$ billion and $\$ 11.0$ billion, respectively. Eighty-one percent of the increase for finance, insurance, and real estate was contributed by the holding and investment companies ( $\$ 23.7$ billion) and the security and commodity brokers and services ( $\$ 20.5$ billion). More than fifty percent of the $\$ 993.8$ billion in total receipts reported for 1995 for all partnerships was concentrated in the finance, insurance, and real estate añd servicees (Figures $K$ and $L$ ) - approximately the same percentage as in prior years. (See the Explanation of Selected Terms section for the definition of total receipts.)

For 1995, approximately 33 percent of all partnerships -- generally partnerships with total assets of less than $\$ 600,000$ and total receipts of less than $\$ 250,000$-- were not required to file balance sheets. Table 3 presents balance sheet data, by industrial group and by profit status, for the remaining 67 percent of partnerships that

NOTE: Detail may not add to totals because of rounding.
filed balance sheets with their returns. For 1995, partnership returns in finance, insurance, and real estate accounted for 76 percent of the total assets for all partnerships -- the same percentage as for 1994. Partnerships in this division had reported more than 50 percent of the total assets for all partnerships for more than 20 years.

For 1995, total assets grew 18 percent ( $\$ 423.4$ billion)
to $\$ 2,718.6$ billion, a significant increase over the 8 percent growth rate for 1994 (Figure D). Although "other investments" accounted for only 27 percent of total assets for 1995, this item accounted for 54 percent of the increase. Partners' capital accounts contributed 47 percent of the increase in total liabilities and capital. Approximately two-thirds of the increase in total assets was shown

## figure 1

Total Assets by Industrial Groups, Tax Year 1995
Total Receipts by Industrial Groups, Tax Year 1995

by holding and investment companies and security and commodity brokers and services.

## Distributions to Partners

Partnerships are not taxed;-instead, their-income, credits, and deductions flow through to the partners who are liable for any tax. Partners may be individuals, corporations, other partnerships, tax-exempt organizations, nominees, or other legal entities. Table 5 presents data on the distributions (or allocations) of partnership income (or losses) to limited and general partners by industrial division. These data were obtained from Schedule K, Partners' Shares of Income, Credits, Deductions, etc., of the partnership return. This schedule reports the partners' shares of each component of the partnership's distributive income, deductions, and tax credits, as totals and by type of partner.

For 1995, the total income (less loss) available for distribution -- without regard to separately-allocable deductions -- increased 32.5 percent, from $\$ 156.6$ billion to $\$ 207.5$ billion [1]. This was a dramatic increase over the 10.4 percent ( $\$ 14.7$ billion) increase for 1994. For 1995, all industrial divisions showed increases in the income available for distribution except wholesale and retail trade, which declined by 6.2 percent to $\$ 5.3$ billion. The largest increases were reported by finance, insurance, and real estate ( $\$ 43.8$ billion), manufacturing ( $\$ 3.9$ billion), and services ( $\$ 3.3$ billion). For 1995, separately allocable deductions for all partnerships increased 20.5 percent to $\$ 35.8$ billion, a rise over the 14.7 percent
increase for 1994. Most of the increase in deductions was shown by partnerships in finance, insurance, and real estate.

The difference between the income (less loss) and deductions resulted in $\$ 171: 7$-billion available for distri- bution or allocation to partners. This was a $\$ 44.8$ billion increase over the $\$ 126.9$ billion available for 1994 . Of the $\$ 171.7$ billion available for distribution or allocation for 1995, $\$ 159.9$ billion was identified by type of partner. The difference was due to partnerships that failed to report allocations or distributions by type of partner.

As in the prior year, individuals who were general partners were the principal category of income recipients for all industrial divisions except mining, manufacturing, and transportation and public utilities. Corporate general partners received the largest distribution of income or loss for these divisions, as in the prior year. Individual general partners in the services division continued to dominate the statistics, receiving 20.3 percent ( $\$ 32.4$ billion) of all reported allocations, though it was down from a 25.6 percent share for 1994. Distributions to this group increased by only 4.4 percent for 1995 , rising from $\$ 31.0$ billion for 1994.

Distributions to partners in real estate partnerships continued to be positive for the third consecutive year, increasing 40 percent to a $\$ 32.5$ billion gain. Most of this increase was reported by operators and lessors of buildings. This increase was led by increases in allocations to individual general partners ( $\$ 3.5$ billion), corporate general partners ( $\$ 2.4$ billion), and partnership general
partners ( $\$ 1.9$ billion). Distributions to individual limited partners in real estate, a group which had historically received net losses, continued to be positive for the third year, increasing 18.4 percent to a $\$ 5.8$ billion gain.

In addition, distributions to corporate general partners in real estate, another group which had historically received net losses, was positive for the second year, rising from a $\$ 0.4$ billion gain for 1994 to $\$ 2.8$ billion gain for 1995. However, distributions to corporate limited partners in real estate continued to be negative, although declining from a $\$ 0.4$ billion loss for 1994 to $\$ 0.2$ billion loss for 1995.

## Summary

The year 1995 was the first since 1988 that partnerships reported increases in the same year for the number of partnerships, the number of partners, total assets, total receipts and net income (less deficit). For 1995, partnership net income (less deficit) showed the largest increase in history. This amount rose 30 percent to $\$ 106.9$ billion, continuing the recent trend of increasing profits and reflecting improvement in the economy. Over half of this increase was reported by partnerships classified as holding and investment companies and the real estate operators and lessors of buildings. Partnerships overall showed the first positive rental real estate income (less deficit) since 1980. Also, operators and lessors of buildings reported the first positive amount since 1960. Although limited partnerships showed a gain for the third consecutive year, limited partnerships in real estate continued to show a deficit. Activity by individual general partners in services continued to dominate the statistics for partnership income (less loss) available for distribution to partners, accounting for $\$ 32.3$ billion of the $\$ 159.9$ billion reported by all partnerships.

## Sample Seledion

Tax Year 1995 statistics are estimates based on a stratified probability sample of almost 35,000 returns selected from a population of approximately 1.6 million partuerships. Tax Year 1995 covers returns processed by the Internal Revenue Service during Calendar Year 1996. All partnerships engaged in business in, or having income from sources within, the United States were required to file a Form 1065, U.S. Partnership Return of Income, to report income or loss, deductions, tax credits, and other tax-related items generated by the partnership. The statistics are only for active partnerships, which are defined as those that reported any items of income or deduction derived from a trade or business, or from rental or portfolio income.

The population was stratified into classes based on size of total assets, receipts, net income (or deficit), and industry. Returns were selected from these classes at various probabilities ranging from 0.18 percent to 100 percent, and were weighted to represent the total population. Approximately 3 percent of the returns selected for the sample were not included in the tabulations because they represented inactive partnerships or multiple returns with identical accounting periods filed by the same partnership.

Because the data presented in this article are based on a sample of returns, they are subject to sampling error. To properly use the data, the magnitude of the potential sampling error needs to be known. Coefficients of variation (CVs), the ratio of an estimate's standard error to the estimate, are used to measure this magnitude. Figure M

## Figure $M$

Partnership Coefficlents of Varlation for Selected Industrial Groups and Items, Tax Year 1995

presents the coefficients of variation for certain money amounts, for selected industrial groups. The smaller the coefficient of variation, the more reliable the estimate is judged to be [3].

## Explanation of Seleded Terms

Āssets and Liābilities.-- Bālance sheet information was required to be provided, in general, only if the partnership had total receipts of $\$ 250,000$ or more and total assets of $\$ 600,000$ or more. No attempt was made to estimate the assets and liabilities of partnerships which did not provide this information. Efforts were made to overcome the effects of nonuniform reporting, such as when partnerships used balance sheets of their own design instead of that provided on the-return form.

Limited Liability Companies.-- Limited liability companies (LLCs) were required to file Form 1065, U.S. Partnership Return of Income, and were identified by a question on Schedule B, Other Information. There were 118,559 such companies in the 1995 population, a dramatic increase over the 47,816 shown for 1994 . All states except three had LLC laws in effect by the end of 1995: Hawaii, Massachusetts, and Vermont [4]. LLCs are hybrid business entities that combine the corporate characteristics of limited liability for all owners (members) with the pass-through tax treatment of a partnership. LLCs offer more organizational flexibility than do S Corporations. For example, unlike S Corporations, LLCs are not limited in the number of owners and can have corporate or foreign members. Also, unlike partners in limited partnerships, all members of LLCs benefit from limited liability protection, even if they actively participate in the management of the business.

Partners.-- Partners can be individuals, corporations, other partnerships, or any other legal entity. Partners are classified as either general or limited. General partners are those who assume liability for the partnership's debts and losses. Limited partners are those whose liability in the partnership does not exceed their investment. By definition, a partnership must have at least two partners, at least one of which must be a general partner. A general partnership is composed entirely of general partners. A limited partnership has at least one general partner and one or more limited partners.
Partnerships.-- A partnership is a relationship between two or more entities or persons which join to carry on a trade or business, with each partner contributing money, property, labor, or skill and each expecting to share in the profits and losses. Every partnership that engages in a trade or business or has income from sources in the United

States must file an annual information return, Form 1065, U.S. Partnership Return of Income, with the Internal Revenue Service, showing the partnership's taxable income or loss for the year. A partnership must file this return even if its principal place of business is outside the United States or if all its members are nonresident aliens. Partnership Net Income (Less Deficit).-- Through Tax Year 1986, partnership net income (less deficit) represents "ordinary income" (loss). Beginning with Tax Year 1987, because of tax law changes and tax form revisions, a similar net income (less deficit) figure has been computed for Statistics of Income studies as the sum of: ordinary income or loss from trade or business; portfolio income distributed directly to partners (excluding net short-term and-long-term capital gains and losses, and prior to 1994, other portfolio income was also excluded); net income or loss from rental real estate activities; and net income or loss from other rental activities. The sum of these components is a comprehensive measure of overall partnership profits or losses which enables comparisons to be made with amounts of net income (less deficit) reported for years prior to 1987. The profit status of partnerships is determined as the sum of the gains or losses from the four activities listed above. Partnerships with a breakeven between gains and losses are included with loss partnerships.

Total Receipts.-- Through Tax Year 1986, partnership total receipts represents "ordinary income." Beginning with Tax Year 1987, because of tax law changes and tax form revisions, a similar total receipt figure has been computed for Statistics of Income studies as the sum of positive income (negative amounts or losses are not included) received by partnerships for the specific items listed below. Total receipts of partnerships consist of: gross receipts or sales less returns and allowances (i.e., "business receipts" in the statistics); ordinary income from other partnerships and fiduciaries; farm net profit; net ordinary gain from sales of business property; other income from a trade or business; net income from rental real estate activities; net income from other rental activities; portfolio interest income; portfolio dividend income; portfolio royalty income; net short-term capital gain; net long-term capital gain; other portfolio income; net gain from sales or exchanges of property used in a trade or business (Internal Revenue Code section 1231); and other income distributed to partners. Therefore, total receipts differs from the total receipts presented in Table 11 in the Selected Historical and Other Data section of this issue of the Statistics of Income Bulletin in that certain income and deduction items distributed or allocated directly to part-
ners (such as net short-term and long-term capital gains, net gain under Internal Revenue Code section 1231, other portfolio income, and other income) are exc luded in the latter.

Footnotes at end of table.

Table 1.--All Partnershlps: Total Assets, Trade or Business Income and Deductions, Portfolio Income,
Rental Income, and Total Net Income, by Industrial Groups--Continued
[All fgures are estimates based on samples-money amounts are in thousands of dollars]

- Estimate should be used with caution because of the small number of smaple rehurns on whish it tis based.
' Total net income (less defidit) is the sum of net income (less deficit) from trade or business, portfolio income distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (less deficit) from rental real estate, and net income (less deficit) trom other rental activity.
${ }^{2}$ Less than $\$ 500$.
NOTE: Detail may not add to totals because of rounding.

Table 2.--Partnerships With Net Income: Total Assets, Trade or Business Income and Deductions, Portiollo Income, Rental Income, and Total Net Income, by Industrial Groups
[All flgures are estimates based on samples-money amounts are in thousands of dollars]

Table 3.-Balance Sheets, by Profit Status and Industrial Group-Continued
[All figures are estimatres based on samples--money amounts are in thousands of dollare]

Footnotes at end of table.

Table 3.-Balance Sheets, by Profit Status and Industrial Group-Continued
[All flgures are estimates based on samples-money amounts are in nousands of dollars]

- Estimate should be used with caution because of the small number of sample retums on which it is based.

1 The difference between "number of partnerships" and "number of partnerships reporting balance sheet data" is because of partnerships exempl from filing balance sheets. Since mese parnerships are generally smalt-total assets less than $\$ 800,000$ and total receipts less than $\$ 250,000$--balance sheet data tor parnerships are slightly understated.

- Less than $\$ 500$.

NOTE: Detad may not add to totals because of rounding.

## Partnership Returns, 1995

Table 4.--Rental Real Estate Income, by Selected Industrial Groups

- Estimate should be used with caution because of the small number of sample returns on which it is based.
- "Nature of Business not allocable" is not shown in this table because no partnersnip retums classified in this industrial group reported real estate rental income.

2 Less than $\$ 500$.
NOTE: Detail may not add to totals because of rounding.

# Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus 

by Sarah E. Nutter

For 1993, U.S. corporations claiming a foreign tax credit "paid" $\$ 23.7$ billion in taxes to foreign governments on $\$ 94.7$ billion of foreign-source taxable income. After limitations, these 6,322 companies reported foreign tax credits of $\$ 22.9$ billion. The foreign tax credit decreased their U.S. tax liability from $\$ 81.9$ billion (U.S. income tax before credits) to $\$ 59.0$ billion, a reduction of nearly 28 percent. Additional credits, including the U.S. possessions tax credit and the general business credit, further reduced their U.S. tax liability to $\$ 54.8$ billion (U.S. income tax after credits).

Overall, U.S. corporations reported "worldwide taxable income" of $\$ 228.7$ billion ( $\$ 134.0$ billion in U.S. taxable income and $\$ 94.7$ billion in foreign-source taxable income) and worldwide income taxes of $\$ 78.5$ billion ( $\$ 54.8$ billion in U.S. income taxes and $\$ 23.7$ billion in foreign taxes). Approximately 41 percent of their "worldwide taxable income" (i.e., "income subject to U.S. tax" in the statistics, the base on which the U.S. tax was calculated) was derived from foreign sources, a 3.4 percent decline from 1992.

The United Kingdom, Canada, Brazil, Japan, Germany, and Mexico were the leading sources of foreign income for U.S. corporations claiming the foreign tax credit. Together, these six countries accounted for approximately 50 percent of the $\$ 94.7$ billion in foreign-source taxable income and 48 percent of the $\$ 23.7$ billion in current-year foreign taxes.

## Background

U.S. corporations are subject to tax on their worldwide income [1]. The foreign tax credit provisions, first enacted as part of the Revenue Act of 1918, allow U.S. corporations to offset a portion of the U.S. tax on their worldwide income with a credit for taxes paid to a foreign tax authority on their foreign-source income. Throughout its history, the foreign tax credit has served to help reduce the impact of double taxation on the same income, first by the foreign government and, again, by the U.S. Government.

Since its inception, the foreign tax credit provisions have been modified many times. An "overall limitation" on the amount of the foreign tax credit was first introduced as part of the Revenue Act of 1921 . Prior to this time, taxpayers were allowed an unlimited credit that, in effect, also allowed them to offset some of the U.S. tax on income earned within the United States. Congress included the

[^14]overall limitation to restrict the foreign tax credit to an amount equivalent to the U.S. tax on foreign-source taxable income. Computationally, this limitation is equal to the amount of U.S. tax multiplied by the ratio of for-eign-source to worldwide taxable income. Except for a brief period beginning after the enactment of the Intemal Revenue Code of 1954 and lasting until the passage of Public Law $86-870$ in 1960, the overall limitation has been an integral part of the foreign tax credit provisions [2].

Beginning with the passage of the Revenue Act of 1962, foreign tax credit limitations based on the type of income have also been included in the foreign tax credit provisions. Initially, under the 1962 Act, Congress required taxpayers to compute a separate limitation for nonbusiness interest income. Across time, the types of income subject to a separate limitation have been expanded, especially under the Tax Reform Act of 1986. For 1993, in addition to the overall limitation, taxpayers had to compute a separate foreign tax credit limitation for the following categories of foreign-source income (described in the Explanation of Selected Terms section below): passive income, high withholding tax interest, financial services income, shipping income, dividends from "noncontrolled" section 902 foreign corporations, dividends from Interest Charge-Domestic International Sales Corporations (IC-DISC's) or former DISC's, income related to Internal Revenue Code sections 904(g) or 901(j), certain distributions from Foreign Sales Corporations (FSC's) or former FSC's, and "all other income from outside the United States" (often referred to as general limitation income, due to its description on Form 1118, Computation of Foreign Tax Credit--Corporations) [3].

In addition, Congress first allowed a carryover of "unused" foreign taxes in the Technical Amendments Act of 1958. For 1993, the carryover provision allowed foreign taxes that exceeded the limitations to be carried back two years and then carried forward five years and used as a credit for those years, to the extent the foreign taxes did not exceed the limitations for each year. The foreign taxes available for credit shown in this article include only those carried over for 1993 from previous years; no taxes carried back to 1993 are included in the statistics.

## Foreign Tax Credit

Following the decline of the early 1980 's, the foreign tax credit climbed during the latter part of the decade from $\$ 18.9$ billion for 1982 to a high of $\$ 27.1$ billion for 1988 (Figure A). The credit has declined from this amount throughout the early 1990 's, rebounding slightly to $\$ 22.9$ billion for 1993 from $\$ 21.5$ billion for 1992. Because the

[^15]credit may not exceed the amount of U.S. taxes for a particular tax year, a portion of the fluctuation in the total foreign tax credit may be due to changes in the level of U.S. tax obligations for each year. In contrast, the number of U.S. corporations claiming foreign tax credits fell nearly 30 percent during the 1980 's, from 6,199 corporations for 1980 to 4,230 corporations for 1988. During the early 1990's, the number of corporations claiming a credit has generally increased with 6,322 corporations reporting a credit for 1993.

In general, current-year foreign taxes as a percentage of foreign-source taxable income have continued to decline, falling from 62.4 percent for 1978 to 25.0 percent for 1993. In part, this decrease may be due to the decline in nominal corporate tax rates that occurred in many foreign countries during the decade of the 1980's and early 1990's [4]. During this same time period, the foreign tax credit as a percentage of current-year foreign taxes generally increased, from 64.8 percent for 1978 to 96.5 percent for 1993. The split between foreign-source and domesticsource income for all U.S. corporations claiming a foreign tax credit has fluctuated across this same time period; the range of foreign-source income as a percentage of worldwide taxable income for these corporations has been 41.1 percent to 55.5 percent. For 1993, it was 41.4 percent.

## Industry Composition

U.S. corporations classified in manufacturing and in finance, insurance, and real estate continued to account for the bulk of the foreign-source taxable income, current-year foreign taxes, and foreign tax credits claimed (Figure B). For 1993, U.S. manufacturers (led by petroleum) reported 60.8 percent, or $\$ 57.6$ billion, of the total foreign-source taxable income. These U.S. manufacturers also reported 70.6 percent of the current-year foreign taxes and 71.4 percent of the foreign tax credit claimed. U.S. manufacturers in the petroleum industry, alone, reported 13.3 percent of total foreign-source taxable income, 20.5 percent of current-year foreign taxes, and 18.5 percent of the foreign tax credit claimed. U.S. corporations classified in finance, insurance, and real estate (primarily banks and insurers) reported 27.2 percent, or $\$ 25.8$ billion, of total foreignsource taxable income. They also accounted for 18.0 percent of current-year foreign taxes and 18.1 percent of the total credit claimed.

Average foreign tax rates remained relatively steady when compared to similar statistics for 1992 . For purposes of this article, the average foreign tax rate is defined as current-year foreign taxes divided by foreign-source taxable income. As shown in Figure B, relatively small changes in the average foreign tax rates were calculated for

## Figure C-2

## Percentage of Current-Year Foreign Taxes, by Country or Area, Tax Year 1993

foreign-source taxable income and current-year foreign taxes reported by U.S. corporations claiming a-foreign tax credit (Figure C). For 1993, European countries were the source of 42.9 percent of the $\$ 94.7$ billion in foreign-source taxable income and 45.9 percent of the $\$ 23.7$ billion in current-year foreign taxes. These percentages differ slightly from 1992, when European countries were the source of 46.5 percent of the $\$ 86.9$ billion in foreign-
source taxable income and 45.9 percent of the $\$ 22.6$ billion in current-year foreign taxes: Latin-American countries, however, were a larger source of foreign-source taxable income and current-year foreign taxes than in prior years. For 1993, Latin American-source taxable income and current-year foreign taxes accounted for 18.4 percent and 11.5 percent of the totals, respectively. These percentages are up from 1992, when Latin American

[^16]
## Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus

countries were the source of 13.3 percent of foreign-source taxable income and 9.2 percent of current-year foreign taxes.

Six countries accounted for half of the total foreignsource taxable income: the United Kingdom (14.4 percent), Canada ( 8.9 percent), Brazil ( 7.8 percent), Japan ( 7.5 percent), Germany ( 5.8 percent), and Mexico ( 5.5 percent). Foreign-source taxable income is presented in Figure D for these six countries by selected industries. For 1992, the United Kingdom (12.4 percent), Germany (8.5 percent), Japan ( 7.7 percent), Canada ( 6.1 percent), the Netherlands ( 4.8 percent), and Brazil ( 4.4 percent) were the primary sources of the $\$ 86.9$ billion in foreign-source taxable income.

Manufacturers reported the majority of the foreignsource taxable income generated in five of the six countries. For 1993, approximately half of the U.K.-source taxable income was reported by U.S. manufacturers, with those in the petroleum industry group reporting approximately 13.6 percent of the $\$ 13.7$ billion of U.K.-source taxable income. The bulk of the non-manufacturing U.K.source taxable income was reported by U.S. banks ( 24.1 percent). The industrial mix of U.S. corporations reporting Canadian-source taxable income differed from that of the United Kingdom. Although 64.6 percent of the Cana-dian-source taxable income of $\$ 8.5$ billion was reported by U.S. manufacturers (especially those of motor vehicles), a
large part of the remainder was reported by U.S. insurers ( 16.0 percent). U.S. manufacturers also reported more than 70.0 percent of the taxable income derived in Japan, Mexico, and Germany. However, Brazilian-source taxable income was concentrated in the banking industry. U.S. banks reported 77.3 percent of the $\$ 7.4$ billion in Brazil-ian-source taxable income.

## Oil and Gas Extraction Income

U.S. corporations claiming a foreign tax credit related to oil and gas extraction income are required to separately report the gross income, deductions, and taxes related to that income [5]. These items are shown for 1993 by selected industrial groups and countries in Figure E. The gross income (less loss) minus the deductions is equal to the foreign-source taxable income related to oil and gas extraction.

Virtually all of the $\$ 13.7$ billion in foreign oil and gas extraction gross income (less loss) was reported by U.S. corporations classified in three industrial groups: petroleum manufacturing ( 79.3 percent), oil and gas extraction ( 12.2 percent), and industrial plastics and synthetic material manufacturing ( 7.2 percent). About 92.2 percent of the foreign oil and gas extraction gross income (less loss) was from the 16 countries shown in Figure E. More than

half of this income was from just four countries: the United Kingdom ( 18.0 percent), Norway (17.3 percent), Australia ( 10.3 percent), and Indonesia ( 9.9 percent).

Gross foreign oil and gas extraction income from the Organization of Petroleum Exporting Countries (OPEC) accounted for-about $\$ 2.9$ billion, or 20.9 -percent, of-the total. Nearly all of the OPEC income was from four countries: Indonesia ( 9.9 percent), Nigeria ( 5.9 percent), the United Arab Emirates ( 3.2 percent), and Saudi Arabia ( 1.0 percent). A complete list of OPEC countries is shown in the Explanation of Selected Terms section, below.

## Organizational Structure of Poreign Operations

U.S. corporations seeking to establish an overseas presence may do so by investing in an existing foreign corporation, forming a subsidiary under the laws of the foreign country, or using an unincorporated foreign branch operation. Investments in an existing foreign corporation may take the form of purchasing stock in a "noncontrolled" foreign corporation (i.e., a corporation of which the U.S. corporation owns at least 10 percent, but collectively, U.S. shareholders own no more than 50 percent of the stock). Dividends from a noncontrolled foreign corporation are reported in a separate limitation category on Form 1118, Foreign Tax Credit--Corporations. Foreign subsidiaries of U.S. corporations are generally classified as "Controlled Foreign Corporations" (defined in the Explanation of Selected Terms section) for U.S. income tax purposes [6]. Income received from noncontrolled foreign corporations or from Controlled Foreign Corporations may include dividends (actual or constructive), as well as income from such items as interest, rents, and royalties. For 1993, actual dividends amounted to $\$ 38.3$ billion, while constructive (or deemed paid) dividends were $\$ 14.7$ billion. Tables $1-3$ show these, as well as other, gross income items.

Gross income from foreign branch operations of U.S. corporations is reported separately on Form 1118; taxable income from branch operations is not separately reported. For 1993, U.S. corporations claiming a foreign tax credit reported nearly $\$ 63.5$ billion in gross income from foreign branch operations. Most of this income was reported by corporations concentrated in four industrial classifications:
banking (47.4 percent), petroleum manufacturing ( 19.0 percent), all other manufacturing ( 13.3 percent), and insurance ( 8.6 percent). More than $\$ 39.2$ billion, or 61.7 percent, of the total foreign branch gross income reported by these U.S. corporations was connected with operations in nine countries:- Brazil, the-United-Kingdom, Japan,-Indonesia, Belgium, Australia, Mexico, Canada, and Hong Kong (Figure F).
U.S. corporations with branch operations in Brazil reported nearly one-sixth, or $\$ 10.2$ billion, of the total branch gross income. Nearly all of the Brazilian-source branch income was related to banking operations; U.S. banks reported $\$ 9.6$ billion in Brazilian-source branch income, nearly 31.9 percent of the $\$ 30.1$ billion total reported by U.S. banks. Substantial offshore operations of U.S. banks were also located in the United Kingdom, Japan, Belgium, Mexico, and Hong Kong. Approximately 59.9 percent ( $\$ 5.7$ billion) of the $\$ 9.6$ billion in U.K.source branch income and 18.4 percent ( $\$ 1.3$ billion) of the $\$ 7.2$ billion of Japanese-source branch income was reported by U.S. banks. U.S. banks also reported 45.1 percent ( $\$ 1.0$ billion) of the $\$ 2.2$ billion of Belgian-source branch income and 57.3 percent ( $\$ 1.0$ billion) of the $\$ 1.8$ billion of Hong Kong-source branch income. U.S. insurers reported Japanese-source branch income of $\$ 4.2$ billion, approximately 76.0 percent of the $\$ 5.5$ billion insurance total.
U.S. manufacturers (including those in the petroleum industry) reported over $\$ 20.4$ billion in foreign branch gross income. U.S. petroleum corporations reported $\$ 12.0$ billion, with nearly half related to operations in Australia ( $\$ 1.6$ billion), the United Kingdom ( $\$ 1.6$ billion), Indonesia ( $\$ 1.4$ billion), Belgium ( $\$ 0.9$ billion), and Brazil ( $\$ 0.4$ billion). All other U.S. manufacturers, collectively, reported over $\$ 8.4$ billion in foreign branch income. More than half of the Mexican-source branch income of $\$ 1.9$ billion was connected with U.S. nonpetroleum manufacturers.

Of the nine countries shown in Figure F, Canada had the largest percentage ( 41.3 percent) of branch income that was not accounted for by manufacturers, bankers, or insurers. Rather, this $\$ 0.8$ billion of branch income was produced primarily by wholesalers, retailers, and mining corporations. Indonesia also had a substantial portion ( 28.1 percent) of branch income produced by companies classified outside of manufacturing, banking, or insurance.

## Summary

For 1993, U.S. corporations claiming a foreign tax credit reported foreign tax credits of $\$ 22.9$ billion on $\$ 94.7$ billion of foreign-source taxable income. The foreign tax

## U.S. Corporation Returns With a Foreign Tax Credit: Foreign Branch Income, by Selected Country and Industrial Group, Tax Year 1993

Totals arein billions of dollars]

credit decreased their U.S. tax liability from $\$ 81.9$ billion (U.S. income tax before credits) to $\$ 59.0$ billion, a reduction of nearly 28 percent.

Overall, more than 41 percent of their "worldwide taxable income" of $\$ 228.7$ billion was derived from foreign sources. The United Kingdom, Canada, Brazil, Japan, Germany, and Mexico were the leading sources of
the foreign taxable income. Together, these six countries accounted for approximately 50 percent of the $\$ 94.7$ billion in foreign-source taxable income and 48 percent of the $\$ 23.7$ billion in current-year foreign taxes.

## Dafa Sources and Limitations

The 1993 statistics were derived from corporation income

# Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus 

tax returns with a foreign tax credit that were included in the Statistics of Income sample. To be included in the sample, returns had accounting periods ending between July 1993 and June 1994. The 1993 corporation income tax return sample included 91,643 returns chosen from the 4,340;684 returns filed for Tax-Year-1993-- These returns were selected after administrative processing was complete, but before any audit examination. Because some of the returns with a foreign tax credit that were sampled at the 100-percent rate were received too late to be included in the regular corporate statistics (although estimates for these returns were included in the regular corporate statistics), there are slight differences between the more complete statistics on the foreign tax credit presented in this article and those published in Statistics of Income-1993, Corporation Income Tax Returns [8].

The foreign tax credit is claimed under section 901 of the Internal Revenue Code. Corporations report the foreign income and taxes related to the credit on Form 1118, Computation of Foreign Tax Credit-Corporations, filed with their corporate income tax returns. The statistics in this article are based on information reported on Forms 1118 and the related corporate return. Corporations with "alternative minimum tax" (AMT) had to compute a separate "alternative minimum tax foreign tax credit." Data on this computation are not reflected in the statistics presented in this article, even if the corporation reported both the regular and AMT computations, and even if the

## Approximately 41

 percent of the reported $\$ 228.7$ billion in worldwide taxible income of U.S. Corporations claiming the foreign tax credit was foreign source. corporation reported only the AMT computation (because it had AMT but no regular tax). The statistics do not reflect adjustments made during audit examination, which determines the acceptability of the foreign income and taxes reported. Some corporations reported preliminary data on their tax returns because complete information on their overseas operations was often not available on their returns as originally filed and amended returns were not used for these statistics. However, when necessary, additional information was obtained directly from the taxpayer.Foreign income and taxes are understated in this article to the extent that they either were not or did not have to be reported on Form 1118. Some corporations did not file this form because they had no U.S. income tax to report and consequently were unable to claim the foreign tax credit for 1993 (any "unused credits" could, however, be carried over or back for use in other years). Others may
have chosen to deduct their foreign taxes from their gross income instead of taking the credit.

## Explanation of Selected Terms

Adjustments to Taxable Income.--Includes allocations of current-year U:S.-source-losses and recapture of foreign losses, as well as other adjustments. These are reported in column 38 of Table 1 and column 24 of Table 2.

Average Foreign Tax Rates.--For purposes of this article, average foreign tax rates are equal to current-year foreign taxes divided by foreign-source taxable income.

Carryover of Foreign Taxes.--Under Internal Revenue Code section 904, U.S. persons are allowed a 2 -year carryback and 5-year carryforward of "excess". foreign taxes for purposes of computing the foreign tax credit for those years. Such taxes were included in the current-year credit to the extent that they did not exceed the credit limitations for the current year. The 1993 statistics shown in this article include only those taxes carried forward to 1993 from previous years. See column 42 of Table 1 and column 28 of Table 2.

Controlled Foreign Corporation.--Under Internal Revenue Code section 957, a foreign corporation is a "Controlled Foreign Corporation" if more than 50 percent of its outstanding voting stock, or more than 50 percent of the value of all its outstanding stock is owned (directly, indirectly, or constructively) by "U.S. shareholders" on any day during the foreign corporation's tax year. A "U.S. shareholder" for these purposes is a U.S. person (defined below) who owns 10 percent or more of the foreign corporation's total combined voting stock. Ownership attribution rules are provided in Code section 958.

Current-Year Foreign Taxes.--The current-year foreign taxes include foreign taxes paid, accrued, or deemed paid (defined below) and are reported in column 43 of Table 1, column 29 of Table 2, and column 15 of Table 3. Currentyear foreign taxes do not include any carryback or carryforward of foreign taxes from future or prior tax years.

Export Financing Interest.--This interest is related to financing the sale or disposition of property that is manufactured, produced, grown, or extracted in the United States by the taxpayer (or a "related" person), with components primarily of U.S. origin ( 50 percent or more of the fair market value attributable to U.S. components).

Financial Services Income.--Financial services income includes income (as well as "passive income," defined below) produced in the active conduct of a banking, insurance, financing, or similar business, and certain types of insurance investment income. Financial services income does not include "high withholding tax interest" or

## Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus

dividends from a "noncontrolled" foreign corporation. For corporations with financial services income, "export financing interest" (defined above) is subject to special rules under section 904(d) of the Internal Revenue Code. This item is shown in Table 2.

Foreign Dividend Income Resulting from Foreign Taxes Deemed Paid (Gross-Up).--U.S. corporations may take an "indirect" foreign tax credit for taxes paid by a related foreign corporation (generally owned 10 percent or more by the U.S. corporation). Under Internal Revenue Code section 78, these taxes are "deemed paid" by the U.S. corporation under sections 902 and $960(a)$ with respect to distributions by a foreign corporation and must be included in income as a "dividend gross-up." This item is shown in columns 7 and 18 of Table 1 , and column 4 of Tables 2 and 3.

Foreign Sales Corporation.--A Foreign Sales Corporation (FSC) is a company incorporated abroad, created to promote U.S. exports, and usually controlled by a U.S. person (defined below). A portion of the FSC's "foreign trade income" is exempt from U.S. taxation. The latter is income attributable to the sale or lease of "export property" outside the United States and to the performance of various types of export services outside the United States.

Foreign-Source Taxable Income.--Foreign-source taxable income is equal to foreign gross income (less loss) less deductions and is reported on Schedule A, Separate Limitation Income or (Loss) Before Adjustments, of Form 1118. Adjustments to foreign-source taxable income include allocations of current-year U.S.-source losses and recapture of foreign losses, as well as other adjustments. Foreign-source taxable income is reported as "foreign taxable income (less loss) before adjustments" in Table 1, column 37, Table 2, column 23, and Table 3, column 14, at the end of this article. "Foreign taxable income (less loss) after adjustments" is also shown in Table 1, column 39, and Table 2, column 25.

High Withholding Tax Interest.--High withholding tax interest is interest subject to a foreign withholding tax of at least 5 percent. "Export financing interest" cannot be classified as high withholding tax interest. This item is shown in Table 2.

Includable Income of Controlled Foreign Corpora-tions.--This is the U.S. parent's total pro rata share of income constructively received under Subpart F rules. As such, it consists of "Subpart F income" (defined below), increases in earnings invested in U.S. property, certain previously excluded Subpart F income, and factoring income. See column 6 of Table 1.

Income Related to Sections 904 (g) or 901 (j).--Internal

Revenue Code section 904(g) generally requires certain income (primarily interest and dividends) that otherwise would have been treated as foreign-source income to be treated as U.S. source income for purposes of calculating the foreign tax credit. Exceptions to these rules exist for foreign corporations with small amounts of U.S. source income (Internal Revenue Code section 904(g)(5)) and under treaty (Internal Revenue Code section 904(g)(10)). In general, Internal Revenue Code section 901(j) denies the use of the foreign tax credit provisions for taxes paid to foreign governments, which the United States does not recognize or with whom the United States has severed diplomatic ties. For 1993, these countries were Afghanistan, Cambodia, Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria, and Vietnam. However, taxpayers occasionally reported income from these countries, which is reported in Table 3, even though the taxes were not creditable. This item is shown in Table 2.

Income Subject to U.S. Tax.--Income subject to U.S. tax, the corporate tax base ("worldwide taxable income"), is generally equal to net income minus certain statutory nonbusiness deductions. See column 9 of Table 1.

Interest Charge-Domestic International Sales Corpora-tion.--Interest Charge-Domestic International Sales Corporations (IC-DISC's) are certain small domestic corporations formed to export U.S. products. To elect IC-DISC status, at least 95 percent of a domestic corporation's gross receipts must be "qualified export receipts" and at least 95 percent of its assets must be "qualified export assets."

Noncontrolled Section 902 Foreign Corporation Dividends.--A foreign corporation is classified as a noncontrolled foreign corporation if at least 10 percent of its stock was owned by one U.S. taxpayer and, collectively, U.S. taxpayers owned 50 percent or less of its stock. This item is shown in Table 2.

OPEC Countries.--The members of the Organization of Petroleum Exporting Countries (OPEC) for 1993 were: Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, and Venezuela.

Passive Income.--Passive income generally includes income such as dividends, interest, rents, and royalties not connected with the active conduct of a trade or business. The passive income category does not include any "export financing interest," any income taxed at a rate higher than the highest U.S. tax rate, any foreign "oil and gas extraction income," or any income that could be classified under any other category (except the "all other" income category). This item is shown in Table 2.

Shipping Income.-- Shipping income is generally

## Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus

income obtained from the use (or leasing for use) of a vessel or aircraft in foreign commerce, income from directly-related services, gains on the sale or exchange of a vessel or aircraft used in the performance of such services, and income generated from other space and oceanic activities. Income that would be "foreign base company shipping income" for purposes of determining the income constructively received from Controlled Foreign Corporations for U.S. taxation purposes (under Internal Revenue Code section 954(f)) is also classified as shipping income. This item is shown in Table 2.

Specifically Allocable Income.--Internal Revenue Code section 863(b) provides special rules for determining taxable income from sources outside the United States with respect to gross income derived partly within and partly outside the United States. The income apportioned to sources outside the United States under these special rules is shown in Table 1, column 25 and Tables 2 and 3, column 11 .

Subpart F Income.--For 1993, Subpart F of the Internal Revenue Code required certain U.S. shareholders of Controlled Foreign Corporations (CFC's) to include in their gross income the shareholder's ratable share of the CFC's: (1) Subpart F income, (2) increase in earnings invested in U.S. property, (3) previously excluded Subpart F income withdrawn from "qualified investments" in less developed countries and in "foreign base company" shipping operations, and (4) factoring income. The Subpart F income of a CFC included: (1) certain insurance income,
(2) "foreign base company" income, (3) international boycott participation income, (4) illegal bribes and other payments made to government officials that would be unlawful under the Foreign Corrupt Practices Act of 1977, and (5) income derived from a country, which is not recognized by the United States, with which the United States does not conduct or has severed diplomatic relations, or which repeatedly provides support for acts of international terrorism.

Taxes Deemed Paid.--A U.S. corporation, which received actual or constructive dividends from a related foreign subsidiary, is allowed to include a portion of the foreign taxes paid by the subsidiary for purposes of determining the foreign tax credit. The foreign taxes paid by the foreign subsidiary are considered to be indirectly, or deemed, paid by the related U.S. corporation. See column 52 of Table 1 , column 38 of Table 2, and column 24 of Table 3.
U.S. Person.--A U.S. person is any citizen or resident of the United States, a domestic partnership, corporation, association, company, or any estate or trust that is not considered "foreign." See Internal Revenue Code section 7701 for more information on the definition of a U.S. person.

## Nofes and References

[1] The recognition of earnings and profits of a foreign subsidiary by the U.S. parent corporation is deferred, for U.S. tax purposes, until they are distributed or deemed distributed.
[2]_At_various times, Congress has also-incorporated a "per-country" limitation, which required taxpayers to calculate a foreign tax credit limitation on a country-by-country basis. Congress included this limitation to prevent taxpayers from using foreign taxes incurred on income earned in a higher-tax foreign country to offset U.S. taxes on income earned in a lower-tax foreign country. In various forms, this per-country limitation was operational from 1932 until 1976. (For 1932-1954 and 1960-1976, both the per-country and the overall limitations were in effect.)
[3] Because tax returns for FSC's were not included in the sample used for the statistics, an income category related to the foreign trade income of a Foreign Sales Corporation (FSC) is not shown in the statistics for 1993. However, distributions from FSC's or former FSC's are reported on the parent corporation returns and in the statistics.
[4]-For more information on the decline in corporate-foreign tax rates, see, for example, Cinnamon, Allan, "Trends in International Corporate Taxation," Tax Planning International Review, Volume 21, Issue 3, March 1994, and Francis, David R., "As Nations Vie to Cut Tax Rates, U.S. is Envied Leader," Financier, Volume 11, Issue 1, January 1987. For a discussion of possible motivations for these widespread tax rate reductions during this period, see Lee, Dwight R. and McKenzie, Richard E., "The International Political Economy of Declining Tax Rates," National Tax Journal, Volume 42, Issue 1, March 1989.
[5] The income, deductions, and taxes related to oil and gas extraction income are reported on Schedule I, Computation of Reduction of Oil and Gas Extraction Taxes, of Form 1118, Foreign Tax Credit - Corporations.

## Corporate Foreign Tax Credit, 1993: An Industry and Geographic Focus

## Footnotes and Notes to Table 1:

${ }^{1}$ Interest Charge - Domestic Intemational Sales Corporation (IC-DISC) and Domestic International Sales Corporation (DISC).
${ }^{2}$ In addition to the credits shown in columns 12-14, this is after reduction by other credits, such as the jobs credit and the investment credit, which are not shown separately in this table.
${ }^{3}$ Included in gross income (less loss), columns 16-22. See notes below.

- Included in deductions, columns 26-35. See notes below.
s Less than $\$ 500$.
NOTES: Columns 2 through 15 present statistics on assets, receipts, income, and taxes reported on Form 1120 (Comporation Income Tax Retum) series for corporations claiming a foreign tax credit. Columns 16 through 52 present statistics from Form 1118, Foreign Tax Credit-Corporations. Schedule references indicate the schedule of Form 1118 from which the data were obtained. Columns 16 through 36 present statistics on foreign income (i.e., income from sources outside the United States) and deductions reported primarily on Schedule A, Form 1118. Although the amounts of oil and gas income and deductions (columns 23 and 36, respectively) are contained in the summary columns (i.e., columns 16 through 22 and 26 through 35), these amounts are also reported separately (on Schedule I) because oil and gas income is subject to special rules under Internal Revenue Code section 907, which may result in a reduction of foreign taxes available for credit. Section $863(\mathrm{~b})$ Income (income partly within and partly without the United States) and foreign branch income are also included in the summary amounts reported in columns 16 through 22 and are also reported separately (on Schedule F) in columns 24 and 25 . Total deductions not allocable to specilic types of income (column 32) are equal to the sum of columns 33 through 35 (any differences are due to taxpayer reporting practices). Total foreign-source gross income (column 16) less total foreign deductions (column 26) is equal to foreign-source taxable income before adjustments (column 37).

Adjustments to foreign-source taxable income (reported in column 38) indude allocations of current-year U.S.-source losses and recapture of foreign losses, as well as other adjustments. These adjustments (reported on Schedule J ) affect the numerator of the limitation fraction used to compute the foreign tax credit. The foreign-source taxable income after adjustments (the numerator of the limitation fraction) is reported in column 39. The limitation fraction, which represents the ratio of foreign-source taxable income after adjustments to total (U.S. and foreign) taxable income after adjustments, is applied to the total U.S. tax against which the credit is allowed to determine any limitation on the foreign tax credit.

Statistics on foreign taxes are reported in columns 40 through 52. Data on forelgn taxes paid, accrued, and deemed paid (through related foreign corporations or their subsidiaries) from Schedule B, Form 1118, are reported in columns 43 through 52. Total foreign taxes paid or accrued (column 44) are the sum of columns 45 through 51 (any differences are due to taxpayer reporting practices). Total foreign taxes paid, accrued, and deemed paid (column 43) are equal to the sum of total taxes paid or accrued (column 44) and taxes deemed paid (column 52). Total foreign taxes paid, accrued, and deemed paid are then adjusted for certain items (e.g., reductions of foreign taxes under Code section 907 related to oil and gas income), which are reported in column 41, as well as carryovers of foreign taxes not credited in prior years, which are reported in column 42. Thus, total foreign taxes available for credit (column 40) are equal to total foreign taxes paid, accrued, and deemed paid (column 43) less certain foreign taxes (column 41), plus any caryover of prior-year foreign taxes (column 42).

# U.S. Possessions Corporations, 1993 

by Sarah E. Nutter

For 1993, U.S. possessions corporations claimed possessions tax credits of $\$ 4.6$ billion on net income of $\$ 13.3$ billion. As shown in Figure A, approximately 83 percent of the 474 active U.S. possessions claimed the credit for 1993. For 1989, the most recent year for which statistics were previously compiled, about 85 percent of the 513 active U.S. possessions corporations reported $\$ 2.8$ billion of possessions tax credits on $\$ 8.5$ billion of income [1]. The "net effect" of the $\$ 4.6$ billion of credit was to reduce the total U.S. income tax liability of the possessions corporations by 85 percent for 1993.

More than 96 percent of the 395 corporations claiming a possessions tax credit were located in Puerto Rico. These 381 corporations reported nearly all of the posses-sions tax credit claimed. The remaining corporations were located primarily in the U.S. Virgin Islands and Guam.

Manufacturers continued to claim the bulk of the credit. For 1993, nearly 78 percent of the corporations claiming a possessions tax credit were manufacturers. These 368 corporations reported possessions tax credits of \$4.4 billion, almost 97 percent of the total. The 354 manufacturers located in Puerto Rico claimed virtually all of this amount. As in prior years, drug manufacturers accounted for the largest share of the credit. These 61 corporations reported possessions tax credits of $\$ 2.1$ billion, nearly 45 percent of the total.

## Background

Since 1921, Federal income tax laws have provided an incentive for U.S. corporations to operate in U.S. possessions. The original legislation provided an exemption from taxation on all income derived from sources outside the United States if certain conditions were met. Specifically, the corporation had to derive 80 percent or more of its gross income from U.S. possessions and 50 percent or more of its gross income from the active conduct of a trade or business in the possessions. These tax provisions were originally enacted to help U.S. corporations compete with foreign companies in the Philippines, which was then a U.S. possession.

The Tax Reform Act of 1976 significantly changed the taxation of U.S. corporations operating in U.S. possessions, creating a new section 936 of the Internal Revenue Code. Rather than exempting all income derived from sources outside the United States for qualifying corpora-

| 1989................ | 513 | 434 | 2.8 |
| 1993..... | 474 | 395 | 4.6 |

tions, the new legislation allowed a credit against taxes only for income derived from the active conduct of a trade or business in a possession and "qualified possessions source investment income" (see the Explanation of Selected Terms section). The intent of this legislation was to encourage employment-producing investments by U.S. corporations in U.S. possessions.

The Tax Equity and Fiscal Responsibility Act of 1982 and the Tax Reform Act of 1986 further restricted the tax benefits available under section 936 by modifying the tax treatment of income derived from intangible assets and passive investments. In general, the 1982 Act provided that possessions corporation's income from intangible assets, such as patents and copyrights, would be taxable to the U.S. shareholders (usually the U.S. parent corporation) of the possessions corporation [2]. By meeting either a direct labor test or a value added test, a possessions corporation could elect out of this general rule if it could demonstrate that it had a significant business presence in a possession with respect to a specific product or type of service. Electing corporations could then choose to allocate income between the U.S. shareholders and the possessions corporation using either the cost-sharing or profit split method. In addition to these two methods, the 1986 Act allowed the possessions corporation to compute its income using the appropriate method as provided under section 482 of the Internal Revenue Code. The 1982 Act also increased the percentage of gross income that a possessions corporation must earn from the active conduct of a trade or business in U.S. possessions to 65 percent; the 1986 Act increased this ratio to 75 percent [3].

In general, to qualify for the possessions tax credit, a U.S. corporation must have filed Form 5712, Election to be Treated as a Possessions Corporation under Section 936. To qualify for the credit for 1993 , the possessions
corporation must have derived 80 percent or more of its gross income from sources in a U.S. possession and 75 percent or more of its gross income from the active conduct of a trade or business in a U.S. possession during the applicable period, which is generally the shorter of 36 months or the period when the corporation actively conducted a trade or business in a U.S. possession. If these requirements were met, the corporation could credit that portion of its U.S. tax attributable to the active conduct of a trade or business within the U.S. possession and "qualified possessions source investment income."

## Highlights

As shown in Figure A, the statistics for 1993 reflect a continuing trend of a smaller number of U.S. possessions corporations reporting larger amounts of possessions tax credit. For 1993, there were 474 active possessions corporations, an 8 percent decrease from the 513 corporations for 1989 [4]. During this same time period, the total possessions tax credit climbed from $\$ 2.8$ billion to nearly $\$ 4.6$ billion.

The estimated reduction in U.S. tax liability as a result of the possessions tax credit was approximately $\$ 3.9$ billion, an increase from 1989 of nearly 60 percent [5]. This amount was less than the total possessions tax credit because possessions corporations could not claim other benefits that would have otherwise been available to them. For example, taxes paid to possessions governments would have been eligible for credit under the foreign tax credit provisions. For 1993, U.S. possessions corporations reported Federal income tax liabilities (after credits) of $\$ 31.7$ million, a slight decrease from the $\$ 34.7$ million reported for 1989. These amounts were only about 1 percent of the income tax liabilities before credits.

As shown in Figures B and C, manufacturers continued to be the predominant claimants of the reported possessions tax credit, accounting for 78 percent of the retums filed by the 474 active possessions corporations and nearly all of the possessions tax credit [6]. These 368 corporations reported total receipts of $\$ 31.1$ billion, net income of $\$ 12.8$ billion, and possessions tax credits of

## Figure B

Percentage of Active U.S. Possessions Corporations by Industry, 1993

NOTE: Detail may not add to totals because of rounding.

## figure $\mathbf{C}$

Percentage of U.S. Possessions Tax Credit by Industry, 1993

$\$ 4.4$ billion. The 61 drug manufacturers, the dominant group of corporations in this classification, reported $\$ 2.1$ billion of possessions tax credits, nearly 45 percent of the total. This amount represents an increase from 1989 when 57 drug manufacturers reported $\$ 1.4$ billion of possessions tax credits. Electrical and electronic equipment manufacturers and food and kindred products manufacturers reported approximately 22 percent and 12 percent of the total possessions tax credit, respectively. Although manufacturers of apparel and other textile products represented 10 percent of the total returns filed, they reported only 2 percent of the total possessions tax credit.

Consistent with prior years, the largest corporations (in terms of asset size) claimed the majority of the possessions tax credit. For 1993, the 20 largest corporations, which represent only 4 percent of the 474 possessions corporations, claimed nearly 66 percent of the total credit of $\$ 4.6$ billion. The 50 largest corporations claimed approximately 85 percent of the total possessions tax credit.

## Employment Dafa

A part of the original intent of the possessions tax credit provisions was to provide employment in U.S. possessions by encouraging employment-producing
investments by U.S. corporations. For 1993, more than 96 percent of the 395 corporations claiming a possessions tax credit were located in Puerto Rico. These 381 corporations reported virtually all of the $\$ 4.6$ billion of possessions tax credits and the bulk of these credits was claimed by 354 manufacturers. The impact of the credit provisions on these manufacturers in Puerto Rico is estimated using. information collected from Federal unemployment tax forms (Forms 940).

Table 3 presents tax benefit, employment, and compensation information for selected manufacturing industries located in Puerto Rico. All available Forms 940, Employer's Annual Federal Unemployment (FUTA) Tax Return, were collected for U.S. possessions corporations classified as manufacturers in Puerto Rico. In all, 286 of the 354 Puerto Rican manufacturers' Federal unemployment forms were used to model the impact of the credit provisions. Estimates of the number of Puerto Rican employees were based on the taxable wages reported on Form 940 (line 5). The total taxable wages divided by $\$ 7,000$ (the base amount) provides an estimate of the number of employees. An estimate of the total gross compensation was determined by multiplying the total payments reported on Form 940 (line 1) by a factor of 1.252 [7]. This factor provides an estimate of the various employee fringe benefits, which would not be

## U.S. Possessions Corporations, 1993

included in the total payments. Weights, based on the relative cost of goods sold within each industrial grouping, were used to estimate the number of workers and the gross compensation for all firms for which a Form 940 was not available. The benefits per worker were determined by dividing the estimated reduction in U.S. tax liability for each industrial grouping by the estimated number of workers in that grouping. The unweighted statistics for the 286 manufacturers located in Puerto Rico are shown in the first three columns of Table 3. Estimates for all 354 Puerto Rican manufacturers are shown in the remaining columns.

Overall, manufacturers received average estimated tax benefits of $\$ 34,296$ on gross compensation of $\$ 22,817$ per worker; a ratio of 1.50 to 1 . The estimated benefits per worker for chemical and allied product manufacturers were $\$ 77,699$ on gross compensation of $\$ 36,867$, which resulted in a 2.11 to 1 ratio. The ratio of tax benefits to worker compensation costs varied considerably among the different manufacturing industries. Manufacturers of scientific instruments had one of the highest ratios ( 2.77 to 1 ), with $\$ 84,121$ of benefits and $\$ 30,323$ of compensation costs. On the other end of the spectrum, manufacturers of textile mill products had one of the lowest ratios ( 0.09 to 1 ), with $\$ 955$ of benefits and $\$ 11,131$ of compensation costs per worker.

## Summary

For 1993, although the number of corporations claiming a possessions tax credit continued to decline, the total amount of the credit continued to climb. U.S. possessions corporations reported $\$ 4.6$ billion of possessions tax credits for that year. These credits were estimated to reduce the U.S. tax liability of the possessions corporations by more than $\$ 3.9$ billion.

As in prior years, U.S. possessions corporations located in Puerto Rico remain the predominant claimants of the possessions tax credit. These corporations accounted for more than 96 percent of active possessions corporations that reported a credit and virtually all of the possessions tax credit claimed. Manufacturers in Puerto Rico, the largest group of claimants, reported the bulk of the possessions tax credit.

## Explanation of Selected Terms

Gross Compensation.-- The gross compensation amounts in Table 3 include taxable wages reported on Form 940, Employer's Annual Federal Unemployment (FUTA) Tax Return, and imputed fringe benefits. These taxable wage amounts encompass salaries, wages, and compensation of officers reported separately on Form 1120, U.S. Corporation Income Tax Return, as well as labor costs included in
cost of sales and operations.
Income Subject to Tax.-- In the statistics, this amount consists of net income (less deficit) minus certain statutory special deductions, such as the dividends received deduction and dividends paid deduction on certain preferred stock of public utilities. Occasionally, either ordinary business deductions or the special deductions reduce taxable income below zero. The statistics include all taxpayer reported amounts for "Income subject to tax." Positive amounts are reported as "Income subject to tax $(+) "$ in the statistics.
Net Income (Less Deficit) per Books.-- This amount is reported on line 1 of Schedule M-1 on Form 1120, U.S. Corporation Income Tax Return, and may differ from the amount reported for net income (less deficit) due to either temporary or permanent differences in the computation of income under the Internal Revenue Code and financial accounting rules.

Qualified Possessions Source Investment Income.-Income attributable to the investment of funds derived from the active conduct of a trade or business in the same U.S. possession.

## Data Sources and Limitations

The statistics are based on data compiled from all returns filed by U.S. possessions corporations with accounting periods ending between July 1993 and June 1994. The statistics are not subject to sampling error since all returns filed are included. Data were collected from Form 1120, U.S. Corporation Income Tax Return, for possessions corporations and supplemented by information collected from Form 5712, Election to be Treated as a Possessions Corporation under Section 936, Form 5735, Possessions Corporation Tax Credit Allowed Under Section 936, and Form 940, Employer's Annual Federal Unemployment (FUTA) Tax Return. There are slight variations between the more complete statistics on the possessions tax credit presented in this article and those published in Statistics of Income--1993, Corporation Income Tax Returns, that are due primarily to processing differences.

## Motes and References

[1] The amount of the possessions tax credit is available for the intervening years from the Statistics of Income corporation program. The credit was $\$ 3.2$ billion for 1990, $\$ 3.5$ billion for 1991, and $\$ 3.7$ billion for 1992. Also, for 1994 and 1995, the credit equaled $\$ 3.8$ billion and $\$ 3.4$ billion, respectively. The data for 1995 are preliminary.
[2] Prior to the passage of the Tax Equity and Fiscal

## U.S. Possessions Corporations, 1993

Responsibility Act of 1982, U.S. parent corporations could deduct research and development costs relative to an intangible asset (for example, a patent) and could transfer the intangible asset to a related possessions corporation where the resulting income would qualify for the possessions tax credit under section 936. For further information, see General Accounting Office, "Report to the Chairman, Committee on Finance, U.S. Senate: Tax Policy, Puerto Rican Economic Trends," May, 1997.
[3] The Budget Act of 1993 and the Small Business Protection Act of 1996 have significantly modified the tax treatment of U.S. possessions corporations. The 1993 Act, which becomes applicable for taxable years beginning after December 31, 1993, limits the credit under either an economic-activity limitation or a percentage limitation. The 1996 Act generally repealed the credit for taxable years beginning after December 31, 1995. However, transition rules allow an existing possessions corporation to claim credits, with certain restrictions, through taxable years beginning before January 1, 2006.
[4] For 1993, 395 of the 474 active U.S. possessions corporations claimed a possessions tax credit. The 79 corporations not claiming a credit either reported no taxable income or did not satisfy the gross income tests for that year.
[5] The estimated reduction in U.S. tax liability was determined using the "qualified taxable income" of
each possessions corporation. This amount was found on line 10 of Form 5735, Possessions Corporation Tax Credit Allowed Under Section 936. If the corporation did not file Form 5735, then the sum of "taxable income" (line 30, Form 1120, U.S. Corporation Income Tax Return) was used as a proxy._These figures were then multiplied by the applicable tax rate. Credits for taxes paid to possessions governments (such as Puerto Rican income taxes and the "tollgate" tax on dividends paid to foreign shareholders) were estimated and subtracted from the tax liability. For 1993, tollgate taxes were estimated to be $\$ 158.0$ million, and income taxes paid were estimated to be $\$ 527.0$ million.
[6] Puerto Rico has tax incentives that are primarily for companies in the manufacturing or export business. Nonmanufacturing companies pay the full Puerto Rican income tax and then can claim the U.S. foreign tax credit. Thus, nonmanufacturing companies receive little reduction in their U.S. income tax liability through the use of the possessions tax credit. For additional information, see General Accounting Office, "Report to the Chairman, Committee on Finance, U.S. Senate: Tax Policy, Puerto Rican Economic Trends," May, 1997.
[7] This figure was supplied by the U.S. Department of the Treasury, Office of Tax Analysis, and is based on the Bureau of Labor Statistics' survey of fringe benefits.

# Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 1993 

by Daniel S. Holik and Sarah E. Nutter

s
tatistics of Income studies of transactions between large "foreign-owned" domestic corporations and related "foreign persons," conducted annually beginning with Tax Year 1988, reflect the substantial and increasing interest in direct foreign investment in the United States. For Tax Year 1993, large "foreignowned" domestic corporations reported amounts received of $\$ 77.1$ billion and payments of $\$ 185.3$ billion in transactions with 7,662 related foreign persons. These 437 large domestic corporations (generally with total receipts of $\$ 500$ million or more) also reported outstanding balances at the end of the accounting periods of $\$ 88.6$ billion in loans received from, and $\$ 24.0$ billion in loans granted to, the same related foreign persons.

## Amounts Recelved from, and Amounts Paid to, Related Foreign Persons

Sales and purchases of stock in trade accounted for the majority of the total amounts received from, and total payments made to, the 7,662 related foreign persons (Table 1). Large foreign-owned domestic corporations sold $\$ 53.1$ billion and purchased $\$ 153.4$ billion of stock in trade during 1993, nearly 69 percent and 83 percent of the total amounts received and the total amounts paid, respectively. Föreign-owned domestic manufacturers reported transactions with the largest number $(4,995)$ of related foreign persons.

Foreign-owned domestic corporations classified in the, finance, insurance, and real estate industrial division reported the largest dollar volume ( $\$ 30.5$ billion) of transactions in which amounts were received from related foreign persons. Large amounts received from related foreign persons were also reported by foreign-owned domestic manufacturers ( $\$ 13.5$ billion) and wholesalers and retailers ( $\$ 28.4$ billion).

Foreign-owned domestic wholesalers and retailers reported the largest dollar volume of transactions in which amounts were paid to related foreign persons. These transactions accounted for 52 percent of the total amounts paid ( $\$ 96.5$ billion).

## Major Industrial Divisions of Foreign-Owned Corporations

The dominance of manufacturers, wholesalers and retailers, and financial entities in the statistics presented

[^45]can be shown in another way--over 70 percent of the 437 large foreign-owned domestic corporations were classified in the manufacturing ( 40 percent) or wholesale and retail trade ( 32 percent) industrial divisions (Figure A). Corporations in the finance, insurance, and real estate division accounted for an-additional 14 percent- - The remaining returns were divided among agriculture, forestry, and fishing; services; mining; transportation and public utilities; and "all other" [1]. (The Data Sources and Limitations section of this article presents additional information about industrial classification of corporation income tax returns.)

## Country of Residence of Related Foreign Persons

Over 50 percent of the related foreign persons were "residents" (see the Explanation of Selected Terms) of one of the following eight countries: Australia, Canada, France, Germany, Japan, the Netherlands, Switzerland, and the United Kingdom. ${ }^{\text {TTransactions with related }}$ foreign persons in these eight countries of residence accounted for 82 percent of the total amounts received and 83 percent of the total amounts paid (Table 2). Transactions with related persons resident in Japan, the largest source of amounts received and amounts paid; accounted for $\$ 25.8$ billion ( 33 percent) and $\$ 80.6$ billion ( 44 percent) of the totals, respectively. Nearly all of both the amounts received and the amounts paid associated with related persons resident in Japan were sales and purchases of stock in trade, primarily to or from foreign-owned domestic wholesalers and retailers. These wholesalers and retailers reported sales and purchases of stock in trade. with related persons resident in Japan of $\$ 15.7$ billion and $\$ 62.5$ billion, respectively (Table 3).

Stock-in-trade transactions generally dominated the amounts received and the amounts paid associated with related foreign persons in other top countries of residence (besides Japan), as well. Foreign-owned domestic wholesalers and retailers reported the majority of the stock-intrade transactions with related persons resident in the United Kingdom: 54 percent of the total sales ( $\$ 6.0$ billion) and 51 percent of the total purchases ( $\$ 12.6$ billion) of stock in trade, respectively. In transactions with related persons resident in Canada, foreign-owned domestic manufacturers accounted for 57 percent of the $\$ 4.1$ billion in sales and 65 percent of the $\$ 8.9$ billion in purchases of stock in trade. Sales and purchases of stock-in-trade transactions also comprised the largest dollar volumes of transactions with related parties "residing" in Australia, France, Germany, and Switzerland.

Most of the reported insurance transactions were

## Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 1993

## Figure $\boldsymbol{A}$

## Foreign-Owned Domestic Corporations: Number of Returns, by Industrial Division, Tax Year 1993

NOTES: Includes those corporations with total receipts of $\$ 500$ million or more and with Form 5472 attached. Detail may not add to total because of rounding.
between foreign-owned domestic insurance companies and related persons resident in Canada. These foreignowned domestic insurance companies reported Canadian related-party transactions accounting for $\$ 1.2$ billion out of the $\$ 1.4$ billion total received for insurance premiums and $\$ 0.6$ billion out of the $\$ 1.7$ billion total paid for such premiums.

## Amounts Borrowed and Loaned from Related Foreign Persons

Overall, based on year-end balances, foreign-owned domestic corporations borrowed $\$ 88.6$ billion from related foreign persons, almost four times the amount they loaned ( $\$ 24.0$ billion) to such persons during 1993. Transactions for interest received and interest paid reflect these borrowing differences; interest paid to related foreign persons of $\$ 5.7$ billion exceeded the $\$ 1.1$ billion of interest received by far. By the end of 1993, total loans outstanding from related foreign persons increased by nearly 15 percent from a beginning balance of $\$ 77.0$ billion, while amounts loaned to related foreign persons increased by 11 percent from a beginning balance of $\$ 21.6$ billion.

Transactions with related foreign persons resident in the United Kingdom comprised the largest single portion of the loan transactions, accounting for $\$ 35.1$ billion ( 40 percent) of the loans received and $\$ 9.7$ billion ( 41 percent)
of the loans granted. Transactions with related foreign persons resident in the Netherlands comprised the second largest portion of the loan transactions, accounting for $\$ 19.6$ billion ( 22 percent) of the loans received and $\$ 4.1$ billion ( 17 percent) of the loans granted.

## A Comparison of Tax Year 1991, 1992, and 1993 Statistics

Figure B presents selected data for large foreign-owned domestic corporations filing Forms 5472 for Tax Years 1991, 1992, and 1993 [2]. The number of related foreign persons reported increased steadily, rising by 16 percent from 1991 to 1992, and by 14 percent from 1992 to 1993. Other trends in these data are not as uniform. For example, the number of large foreign-owned domestic corporations reporting transactions with related foreign persons increased by 6 percent from 1991 to 1992, and by 19 percent from 1992 to 1993. This may reflect increasing direct foreign investment in large U.S. corporations. (See the Data Sources and Limitations section of this article for additional information.)

Total amounts received from, and total amounts paid to, related foreign persons increased by 4 percent from 1991 to 1992. However, from 1992 to 1993, total amounts received from, and payments to, related foreign persons increased by 22 percent and 33 percent, respectively. Caveats to year-to-year comparisons of these data

NOTE: Detail may not add to totals because of rounding.
are necessary. First, patterns of transactions between a foreign-owned domestic corporation and related persons may or may not be repeated on an annual (or even longerterm) basis. Consequently, a 3-year comparison of these data may not show changes that could be evident if a longer time series were available. Additional information about the year-to-year comparability of the data is presented below under Data Sources and Limitations.

## Legislative History

Even before the Tax Equity and Fiscal Responsibility Àct of 1982 (TEFRA), U.S. parent corporations were required to report transactions with and between their foreign affiliates [3]. However, no similar reporting requirements
existed for transactions between domestic subsidiaries (i.e., those incorporated in the United States) of foreign corporations, or between foreign corporations (i.e., those incorporated abroad) engaged in a U.S. trade or business and their related foreign affiliates. Concerned that these related party transactions-could be manipulated to-avoid U.S. taxation, Congress added new reporting requirements as part of TEFRA to provide the Internal Revenue Service with more information about the nature and amount of these transactions. Under Internal Revenue Code section 6038A, domestic corporations that are 25 -percent or more owned by a foreign person, as well as foreign corporations engaged in a U.S. trade or business, must report transactions with related foreign persons.. The transactions are reported on Form 5472, Information Return of a 25 Percent Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business. Form 5472 had to be filed with corporation income tax returns for tax years beginning after December 31, 1983.

The Omnibus Budget Rećonciliation Acts of 1989, 1990, and 1993 modified section 6038A penalties and other filing and reporting requirements. In general, these modifications to section 6038A were motivated by continuing concerns that foreign-owned domestic corporations could still manipulate transactions so as to avoid-U.S. taxation.

## Dafa Sources and Limitutiems

The foreign-owned domestic corporation statistics have been collected annually starting with 1988. The 1993 statistics include data from Forms 5472, in general, for all U.S. corporations with total receipts (as reported in the tax return income statement) of $\$ 500$ million or more that were (a) owned ( 25 percent or more) by a foreign person and reported transactions with related foreign persons, and (b) included in the Statistics of Income sample of U.S. corporation income tax returns with accounting periods ending July 1993 through June 1994 [4].

Once a corporation is selected for inclusion, its income tax return is included in all future Form 5472 studies, even if its total receipts drop in subsequent years below $\$ 500$ million [5]. For the 1993 statistics, 46 corporation returns included had total receipts less than $\$ 500$ million. However, the 437 large foreign-owned corporations included in the study for 1993 also included certain returns not included in 1992, due in part to the $\$ 500$ million dollar total receipts selection threshold. Approximately 15 percent of the 437 large foreign-owned corporation returns included in the study for 1993 did not qualify for the 1992 study because their total receipts for 1992 were less than $\$ 500$

## Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 1993

million. Finally, all of the 366 corporations included for 1992 were not included in the 1993 statistics, since their 1993 corporation returns did not have Forms 5472 attached. Twelve corporation returns included in the 1992 statistics were excluded from the 1993 statistics because no Forms 5472 were attached to their returns.

For Tax Year 1993, the corporation Statistics of Income sample comprised approximately 92,000 income tax returns chosen from the 4.3 million returns filed. These returns were selected after administrative processing was complete, but before any audit examinations [6]. Corporations with total receipts of $\$ 500$ million or more were included among the returns selected for the sample at the 100 percent rate. Only domestic corporations are included in the statistics; foreign corporations engaged in a U.S. trade or business (filing Form 1120F) were not included, even though they may have filed Forms 5472 for transactions with related foreign persons [7].

The statistics in this article augment the data for some of the companies included in the Statistics of Income data for domestic corporations "owned" by foreign persons [8]. These data show that, for 1993, the 437 large foreignowned domestic corporations filing Forms 5472 accounted for less than 1 percent of the returns, but approximately 67 percent of the $\$ 2.3$ trillion in total assets, and approximately 66 percent of the $\$ 1.3$ trillion in total receipts reported by all domestic corporations that were 25 percent or more owned by foreign persons (Figure C).

Total assets and total receipts of the large foreignowned domestic corporations filing Forms 5472 account for approximately 8 percent of the assets and total receipts reported by all domestic corporations (the sum of columns 1 and 3, Figure C) [9]. Based on Figure C, income subject to U.S. tax and total U.S. income tax after credits for these corporations accounted for approximately 4 percent of the income and tax reported by all domestic corporations.

The industry code used as a classifier of the returns for Figure A and Table 1 represented the principal business activity (i.e., the activity which accounted for the largest portion of total receipts as reported in the tax return income statement) of the corporation filing the return. However, a given return may have been for a company engaged in several business activities, or may have been a consolidated return filed for an affiliated group of corporations that conducted different business activities. To the extent that some consolidated and (non-consolidated) corporations were engaged in more than one type of business activity, transactions data in this article are not entirely related to the industrial activity under which they are shown. For example, foreign-owned domestic corpo-

rations classified in the manufacturing industrial division often engaged in loan or other financial transactions with related foreign persons.

There is an additional limitation related to the data presented by industrial classification. Companies that sell similar products may not be classified in the same industry. For instance, those large foreign-owned domestic corporations that were primarily U.S. distributors of products made in foreign countries by their parent or other related companies were classified as wholesalers. However, other domestic corporations that were also distributors and that were included in consolidated returns covering the manufacture and distribution of similar products may have been classified as manufacturers.

## Explanation of Selected Terms

Amounts Borrowed and Loaned.-- Because the beginning and ending balances generally reflect only the amounts outstanding at the beginning and end of the year, respectively, these amounts may not equal the actual amounts borrowed and loaned during Tax Year 1993.

Country of Residence of Related Person.--The income tax regulations related to Code section 6038A require that "each country in which each 25 -percent shareholder files an income tax return as a resident under the tax laws of that country" be reported on Form 5472 for each related foreign person (Regulation section 1.6038A-2). The

## Transactions Between Large Foreign-Owned Domestic Corporations and Related

 Foreign Persons, 1993statistics in Table 2 are based on this reported residence and, within this meaning, the related foreign person is a "resident" of a particular foreign country.

Foreign-Owned Domestic Corporation.--A "domestic" corporation is incorporated in the United States, while a "foreign" corporation is incorporated abroad. For purposes of these statistics, a domestic corporation was considered "foreign-owned" if at least 25 percent of the total voting power of all classes of stock entitled to vote, or 25 percent of the total value of all classes of stock of the corporation, was owned, directly or indirectly, at any time during the tax year, by a single foreign shareholder (usually a foreign parent corporation). This is in contrast to the other Statistics of Income data on "foreign-contrōlled" domestic corporations, which are based on 50percent or more ownership by a foreign person [10].

Foreign Person.--The term "foreign person" generally includes: (1) any partnership, association, company, or corporation that is not created or organized under the laws of the United States or the laws of any State; (2) any. individual who is not a citizen or resident of the United States; (3) any individual who is a citizen of a U.S. possession, but is not otherwise a U.S. citizen or resident; and (4) any foreign trust, estate, or government. For the most part, the foreign persons referred to in the statistics are corporations. See also "Related Person," below.

Large Corporation.--For purposes of the 1993 statistics, "large" corporations generally had to: (1) have total receipts, as reported in the tax return income statement, of $\$ 500$ million or more; or (2) have been included in a prior tax year Form 5472 Study. (See the Data Sources and Limitations section of this article for additional information, and also "Total Receipts," below.)

Number of Foreign Persons.--The data shown in the tables generally represent the number of foreign persons reported on Forms 5472 appended to the 437 income tax returns filed by corporations with total receipts of $\$ 500$ million or more that were owned 25 percent or more by a foreign person. Domestic member corporations of an affiliated group that filed a consolidated income tax return could also join in filing a consolidated Form 5472 for transactions with a given related foreign person. However, some affiliated domestic corporations that could have filed consolidated Forms 5472 filed separate forms instead. When these forms were identified during statistical processing, the information on them was combined, and the result treated as a single Form 5472 for consistency. To this extent, the "number of persons" understates the actual number of Forms 5472 attached to the 437 income tax returns included in the statistics.

OPEC Countries.--Summary statistics are provided (Table 2) for the following Asian countries that were members of the Organization of Petroleum Exporting Countries (OPEC) for 1993: Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates. Data for non-Asian OPEC members are not shown by country.

Related Person.--Persons related to the domestic corporation that filed a Form 5472 include the 25 -percent or more foreign shareholder, any person who was related to the reporting corporation or the 25 -percent or more shareholder (as described in Internal Revenue Code sections 267(b) or 707(b)(1)), or any other person who was related to the reporting corporation within the meaning of Internal Revenue Code section 482 (covering the allocation of income and deductions among related taxpayers) and the ${ }^{-}$ associated income tax regulations. See also "Number of Foreign Persons," above.

Total Receipts.-- Total receipts is the total income of the domestic corporation as reported on the income statement of the U.S. corporation income tax return. It was derived from the tax return as follows: (1) gross taxable receipts (before deduction of cost of sales and operations, and ordinary and necessary business expenses) and (2) taxexempt interest received from State and local Government obligations, less: (1) net losses from sales_of property other than capital assets and (2) certain taxable income from related foreign corporations only constructively received.

## Notes and References

[1] Data from the agriculture, forestry, and fishing, and construction industrial divisions were combined in a residual "all other" category to avoid disclosure of information about specific taxpayers.
[2] The Statistics of Income studies of foreign-owned corporations for Tax Years 1988 through 1990 included data from Forms 5472 for all foreign-owned U.S. corporations with total receipts as reported in the tax return income statement of \$1 billion or more, while the Tax Year 1991, 1992, and 1993 statistics included data for all foreign-owned U.S. corporations with total receipts of $\$ 500$ million or more. Consequently, direct comparisons of the data for these periods are not appropriate. (See also Data Sources and Limitations for other qualifications about selection of corporations based upon size of receipts.)

Transactions Between Large Foreign-Owned Domestic Corporations and Related Foreign Persons, 1993

Kathryn A., "Controlled Foreign Corporations, 1993," Statistics of Income Bulletin, Winter 19951996, Volume 15, Number 3.
[4] Additional information about Statistics of Income Form 5472 studies for Tax Years 1988 through 1992 may be found in the following Statistics of Income Bulletin issues: Tax Year 1988, Summer 1993, Volume 12, Number 1; Tax Year 1989, Spring 1993, Volume 12, Number 4; Tax Year 1990, Summer 1994, Volume 14, Number 1; Tax Year 1991, Summer 1995, Volume 15, Number 1; and Tax Year 1992, Fall 1996, Volume 16, Number 2.
[5] The use of "total receipts" as a size criterion for including U.S. corporation income tax returns in the Form 5472 studies may lead to a possible "bias." This "bias" may occur because classification of returns by size criteria other than total receipts, such as total assets, could lead to selection of a somewhat different set of large corporations. For example, corporation returns classified in the finance, insurance, and real estate industrial division may not have shown large amounts of total receipts in their income statements, but may have shown large amounts of total assets, when compared to corporation returns classified in the wholesale and retail trade industrial division.
[6] For more information on the sample of corporation income tax returns for 1993, see Statistics of Income--1993, Corporation Income Tax Returns.
[7] Foreign corporations engaged in a U.S. trade or business file Form 1120F. For Tax Year 1993, there were 39 Form 1120F returns with $\$ 500$ million or more in total receipts and with 800 Forms 5472 attached that otherwise qualified for inclusion in the Form 5472 statistics. However, data from these foreign corporations engaged in a U.S. trade or business were "out of scope" of the statistics which focus on domestic corporations. However, data reported by a few foreign life insurance companies filing Form 1120L were included in the statistics to ensure completeness of the industrial division statistics for domestic corporations.
[8] The statistics on domestic corporations controlled by foreign persons for 1993 are reported in Hobbs, James R., "Foreign-Controlled Domestic Corporations, 1993," Statistics of Income Bulletin, Fall 1996, Volume 16, Number 2.
[9] The statistics on all U.S. corporations are presented in Statistics of Income--1993, Corporation Income Tax Returns.

## Transactions Between Large Foreign-Owned Domestic Corporations and Related

 Foreign Persons, 1993Table 3.--Foreign-Owned Domestlc Corporations with Total Recelpts of $\$ 500$ Milion or More and with Form 5472 Attached: Transactions Between Corporations and Related Forelgn Persons, by Selected Industrial Division of Domestic Corporation and Selected Country of Residence of Related Forelgn Person--Continued [Money amounts are in thousands of dollars]

[^47]NOTE: Detail may not add to totals because of rounding.

# Private Foundations and Charitable Trusts, 1994 

by Paul Arnsberger

For 1994, private foundations and charitable trusts reported $\$ 30.3$ billion in total revenues and $\$ 12.5$ billion in contributions, gifts, and grants paid out. Private foundations are generally larger in terms of asset size and more numerous than charitable trusts. The 45,841 private foundations accounted for 98.5 percent of the combined total of $\$ 225.9$ billion in assets (based on their fair market value), while the 2,909 charitable trusts accounted for the remaining 1.5 percent.

A private foundation is a nonprofit, tax-exempt charitable organization, but in contrast to most charities, it is narrowly supported and controlled, usually by an individual, family, or corporation. A charitable trust filing under Internal Revenue Code section 4947(a)(1) is also a nonprofit organization, but it is not tax-exempt and is typically supported and controlled by an individual or family. Both private foundations and charitable trusts are required to file and make public an annual information return, Form 990-PF, Return of Private Foundation (or Section 4947(a)(1) Charitable Trust Treated as a Private Foundation). The statistics contained in this data release are based on data from these forms.

Figure A shows a 2-year comparison of selected data items for private foundations and charitable trusts [1]. Both types of organizations reported aggregate increases in all the major asset, revenue, and expense items. A large part of the 32 -percent increase in the contributions, gifts, and grants received by private foundations can be attributed to a single organization, which received a gift of nearly $\$ 900$ million [2]. Charitable trusts received over twice as much in contributions, gifts, and grants as those reported for 1993. The reason for such a large gain is twofold: many established trusts received significant contributions during the year; and several more new trusts were set up with very large gifts. Net gains from sales of assets rose sharply as well, because a few of the largest trusts reported huge increases in this area.

## Data Sources and Limitations

Tables 1 and 3 provide information for Reporting Year 1994 for private foundations, while Tables 2 and 4 provide similar data for charitable trusts. The statistics are based on a sample of Reporting Year 1994 Forms 990-PF that were filed by organizations with accounting periods beginning in 1994 (and, therefore, ending between December 1994 and November 1995). Some part-year

[^48]returns were included in the sample for organizations that changed their accounting periods or filed initial or final returns. Approximately 63 percent of the foundations and 60 percent of charitable trusts had full-year accounting periods covering Calendar Year 1994 (or part-year accounting periods that ended in December 1994). Additionally, 59 percent of total foundation assets and 55 percent of total trust assets were reported for the calendaryear accounting period. Therefore, the majority of the financial activities reflected in the statistics can be associated with Calendar Year 1994.

The 1994 stratified sample was based on type of organization (either private foundation or charitable trust) and, for the first time, size of fair market value of total assets. (Previous-year samples were based on the book value of total assets.) Foundation returns were selected at rates that ranged from approximately 2.4 percent (for the

 zations reported
## aggregate increases in

all the major asset,
revenue, and expense

## items.

 more numerous, but very small asset-size returns) to 100 percent (for the relatively few returns reporting large amounts of assets). Charitable trust returns were selected at rates that ranged from 13.6 to 100 percent. The 5,914 returns in the 1994 combined sample ( 5,246 foundations and 668 trusts) were drawn from the estimated population totals shown in Tables 1 through 4.Because the estimates are based on a sample, they are subject to sampling error. To properly use the data, the magnitude of the potential sampling error needs to be known. Coefficients of variation (CV's) are used to measure this magnitude. Figure B presents coefficients of variation for selected financial data. The smaller the coefficient of variation, the more reliable the estimate is judged to be.

The population from which this sample was drawn consisted of Form 990-PF records posted to the IRS Business Master File during 1994 and 1995. For the small number of large foundations and trusts whose returns for the 1994 Reporting Year were not yet filed or were otherwise unavailable for statistics, data were estimated using prior-year returns.

The data presented were obtained from returns as originally filed. These returns were subjected to comprehensive testing and correction procedures to ensure statistical reliability and validity. In most cases, changes made to the original return through administrative processing,

audit procedures, or a taxpayer amendment were not incorporated into the data base.

## Explanation of Selected Terms

Charitable Trust -- This type of organization, also referred to as a "nonexempt"-charitable trust, is defined in Internal Revenue Code section 4947(a)(1) as an organization (1) that is not considered tax-exempt under section 501(a); (2) that has exclusively charitable interests; and (3) for which donors are allowed to claim an income tax deduction for charitable contributions. Nonexempt charitable trusts that are not publicly supported are subject to the same excise tax provisions as private foundations (described under Distributable Amount below) and are required to file the same Form 990-PF. ("Publicly supported" nonexempt charitable trusts are required to file Form 990, Return of Organization Exempt From Income Tax, and are, therefore, not included in the statistics [3].) Nonexempt charitable trusts must pay an annual tax on income (usually from investments) that is not distributed for charitable purposes and must report such income and tax on Form 1041, U.S. Income Tax Return for Estates and Trusts.

Distributable Amount -- This was the minimum payout amount required to be distributed by the end of the year following the year for which the return was filed. Failure to distribute income within this period resulted in a 15 percent excise tax on the undistributed portion. The distributable amount was computed as 5 percent of "net investment assets" (called the "minimum investment return"), minus taxes on both "net investment income"
and "unnelated business income," plus or minus other adjustments either allowed or required.

Excess Distributions Carryover -- The excess carryover equaled the excess of "qualifying distributions" for 1994 (see below) over the "distributable amount" (see above). "Excess" amounts from the current year could be carried forward to be applied to the distributable amount for the following 5 years.

Minimum Investment Return -- This was the aggregate fair market value of assets not used for charitable purposes, less both the indebtedness incurred to acquire them and cash held for charitable activities, multiplied by 5 percent. The minimum investment return was used as the base for calculating the "distributable amount" (see above).

Nonoperating Foundations (and Section 4947(a)(1) , Charitable Trusts) -- Nonoperating foundations and trusts generally carried on their charitable activities in an indirect manner by making grants to other organizations directly engaged in charitable activities, unlike (operating) foundations and trusts which engaged in charitable activities themselves. However, some nonoperating foundations and trusts were actively involved in charitable programs of their own, in addition to making grants to other organizations. Nonoperating foundations and trusts were subject to an excise tax (and possible additional penalties) for failure to distribute an annual minimum amount for charitable purposes within a specified period.

Operating Foundations (and Section 4947(a)(1) Charitable Trusts) -- These organizations generally expended their income for direct, active involvement in a tax-

## Figure B

## Coefficients of Variation for Selected Items, by Type of Organization, 1994

exempt activity, such as operating a library or museum or conducting scientific research. Operating foundations and trusts were excepted from the income distribution requirement and related excise taxes applicable to their non-operating counterparts. To qualify as an operating foundation or trust for a particular taxable year, the private foundation or trust had to meet both an "income test" and one of the following: an "assets test," an "endowment test," or a "support test." (The tests described below with reference to private foundations also apply to charitable trusts.)

To meet the "income test," a private foundation had to spend at least 85 percent of the lesser of its "adjusted net income" or "minimum investment return" on the direct, active conduct of tax-exempt, charitable activities (as opposed to the payout of grants in support of such programs). The "assets test" was met if 65 percent or more of the foundation's assets were directly used for the active conduct of charitable activities. The "endowment test" was met if the foundation normally made distributions for the active conduct of charitable activities in an amount not less than two-thirds of its "minimum investment return." The "support test" was met if the foundation normally received substantially all of its support (other than from "gross investment income") from the public or from five or more qualifying exempt organizations, and (a) no more than 25 percent of its support (other than from "gross investment income") was normally received from any one such qualifying exempt organization; and (b) no more than 50 percent of its support was normally received from "gross investment income."

Private Foundation -- This type of organization is defined in Internal Revenue Code section 501(c)(3) as a nonprofit corporation, association, or trust with a narrow source of funds that operated or supported social, educational, scientific, charitable, religious, or other programs
dedicated to improving the general welfare of society. A private foundation is not: (1) a church, school, hospital, or medical research organization; (2) an organization with broad public support in the form of contributions or income from tax-exempt activities; (3) an organization that is operated by, or in connection with, any of the abovedescribed organizations; and (4) an organization that conducts tests for public safety. The primary difference between a private foundation and a public charity is the source of funding for each type of organization. A foundation usually receives its funds from an individual, a family, or a corporation, while a public charity receives its funds primarily from a large number of sources within the general public.

Qualifying Distributions -- Qualifying distributions include disbursements for charitable purposes; amounts paid to acquire assets used directly to accomplish taxexempt functions; charitable program-related investments; and amounts set aside for future charitable projects. Qualifying distributions can be credited toward a foundation or trust's obligation to pay out its "distributable amount."

Undistributed Income -- Undistributed income is the portion of the required "distributable amount" still undistributed after applying against it the sum of current-year qualifying distributions and any excess distributions carried over from prior years.

## Notes and References

[1] For information on private foundations and charitable trusts for 1993, see Arnsberger, Paul, "Private Foundations and Charitable Trusts, 1993," Statistics of Income Bulletin, Winter 1996-1997, Volume 16, Number 3.
[2] The Ewing Marion Kauffman Foundation of Missouri reported revenue of $\$ 892$ million in 1994 thanks almost entirely to an $\$ 891$ million contribution from the EMK Charitable Remainder Trust. (Mr. Kauffman died in 1993.)

Because Forms $990-\mathrm{PF}$ on which private foundations report their financial information are public documents, the names of individual foundations can be used in this article.
[3] For more information on charities and other taxexempt organizations, see Hilgert, Cecelia, "Charities and Other Tax-Exempt Organizations, 1993," Statistics of Income Bulletin, Spring 1997, Volume 16, Number 4.

## N/A - not applicable

* Estimate should be used with caution because of the small number of sample retums on which it is based.
' Less than $\$ 500$.
2 The data shown in columns 18 and 19 are based on the amount of contributions, gifts, and grants that foundations actually disbursed for charitable purposes for t994 using the cash receipts and disbursements method of accounting. These amounts difter somowhat from those reported as contributions, gitts, and grants paid shown in the income statement (Table 3) because foundations may use either the cash recoipta and disbursements of the accrual method of accounting.
NOTE: Detail may not add to totals because of rounding.

- Estimate should be used whth caution because of the amall number of sample returns on which it is based.
- The data shown in columns 18 and 18 are based on the amount of contributions, gitts, and grants that trusts actually disbursed for charliable purposes for 1994 using the cash receipts and disbursemems mathod of accounting. These amounts differ somewhat from those reported as contributions, gifts, and grants paid shown in the income statement (Table 4) because trusts may use either the cash receipts and disbursernents or the accrual method of accounting.
NOTE: Detall may not add to totalis because of rounding.

- Estimate should be used with caution because of the small nurmber of sample returns on which it is based.

The data in this row are based on the amount of contributions, gitts, and grants paid as reported on the income statement portion of the return. These amounts differ somewhat from the contributions, gifts, and grants paid in colums 18 and 19 of Table 2, which are calculated using the cash receipts and disbursements method of accounting.
${ }^{2}$ Less than $\$ 500$.
NOTE: Detail may not add to totals because of rounding.

## Revisions to the Summer 1997 Issue

## Sole Proprietorship Rełurns, 1995

## On page 22.

Table 1 is partially reproduced to correct alignment of amounts to columns 13-16 starting with "Miscellaneous personal services, including valet parking."

## Notes to Selected Historical and Other Data Tables

## General notations and statement

N/A - Not applicable.
n.a. - Not available.
p-Preliminary.
r-Revised.

* Estimate should be used with caution because of the small number of sample returns on which it is based. See "Appendix-SOI Sampling Methodology and Data Limitations."
** - Not shown to avoid disclosure of information about specific taxpayers. However, the data are included in the appropriate totals.
Detail may not add to totals because of rounding. All amounts are in current dollars. Percentages shown in some of the tables are based on dollar amounts rounded to the units indicated in the specific table heading. Therefore, they may not be as precise as percentages based on the fuller dollar amounts found in table contained in the source publications or articles which underlie the historical tables presented in this section of the Bulletin.

## Table 1

[1] Year-to-year comparability of the "all returns" total is affected by changes in dollar income filing thresholds, while year-to-year comparability of the number of returns by type of tax form used is affected by changes in the specific filing requirements, including adjustments for inflation, for each form. In general, the filing of "short forms" (mostly Form 1040A, then Form 1040EZ, starting with 1977, and 1040-T for 1985 only) has been encouraged by IRS to simplify both the taxpayer filing requirements and IRS processing. Filing requirements for each of the short forms has gradually been liberalized to facilitate (and encourage) their use. Increases in the number of short forms by type of form have mostly been at the expense of "long form" 1040 usage (and increases in the number of each of the short forms have often been at the expense of one short form over the other). While the number of 1040 (paper) returns has therefore increased over the time period shown, the rate of increase has been reduced by the growing use of the short forms and, later, by the introduction of Form 1040PC and of electronic filing options (see below). For additional information about the return filing requirements, see the annual
reports, Statistics of Income-Individual Income Tax Returns.

Forms 1040, 1040A, and 1040EZ include "standard" electronically-filed (ELF) returns starting with 1985, and returns filed electronically by telephone ("TeleFile") starting with 1991. For 1992 and 1993, data for these forms also include computer-generated "paper" returns (Form 1040PC) that were reclassified as Form 1040, 1040A, or 1040EZ returns for Statistics of Income, depending on the filing characteristics of each return. The total number of ELF and Form 1040PC returns are also presented, as information items, starting with 1990 and for 1992 and 1993, respectively. However, starting with 1994, Form 1040PC returns were not reclassified for Statistics of Income. Therefore, starting with 1994, data for Forms $1040,1040 \mathrm{~A}$, and 1040 EZ are not comparable with the previous years.
Included in the "all returns" total for 1995 , but not shown separately, are returns filed on Form 1040-T, a "short form" lending itself to IRS optical scanning which was used for this one year only, on an experimental basis.
[2] Starting with 1993, taxpayers could elect to assign \$3 of the income tax reported on their income tax return ( $\$ 6$ on a joint return, if both spouses contributed) to help pay for the cost of Presidential election campaigns. To do so, a taxpayer had to check a box on the tax return. Before 1993, this tax offset was limited to $\$ 1$ (or $\$ 2$ ) per return. The relationship between the number of returns and boxes checked and the dollar amounts shown are only approximate because the frequencies and the amounts were obtained from different sources-the frequencies from Statistics of Income tax return data and the dollar amounts from IRS monthly tax collections, aggregated by calendar year. (Although not shown in Table 1 in this issue, the dollar amount resulting from the checkoff for Calendar Year 1996 was $\$ 66.9$ million.)
[3] Less deficit. Starting with 1987, data are not comparable with earlier years because of major changes in the law, many of which are referred to in other footnotes.
[4] Not included in AGI.
[5] Starting with 1987, represents total dividends; previously, represented total dividends after statutory exclusion.

## Notes to Selected Historical and Other Data Tables

[6] Starting with 1987, losses are after "passive loss" limitation.
[7] Starting with 1987, represents total capital gains; previously, represented total capital gains after statutory exclusion. For other changes affecting capital gains, see Statistics of Income_Individual Income Tax Returns, various years.
[8] Before 1980 and starting again after 1987, excludes Individual Retirement Arrangement (IRA) distributions; for intervening years, pensions and IRA distributions in AGI were reported together on the tax return. Effective during 1986, the more liberal of the two methods of computing the nontaxable portion of pensions and annuities (representing taxpayer contributions to certain pension plans) was repealed.
[9] Starting with 1987, represents total unemployment compensation; previously, all or part was excludable under certain conditions.
[10] Starting with 1994 , up to 85 percent of social security benefits were taxable; previously, the maximum percentage was 50.
[11] Excludes sole proprietorship (including farm) rental income or loss. Starting with 1987, rental losses arebefore "passive loss" limitation and, therefore, exceed the amount included in AGI.
[12] Excludes certain royalties included in computations of capital gain or loss and of ordinary gain or loss, sales of noncapital assets.
[13] Prior to 1981, amounts for net income are actually for net income (less loss). Net income and loss were not separately tabulated. Also, for these years, the number of returns shown with net income was rounded to the nearest hundred thousand during processing; the more exact number was not tabulated.
[14] See footnote 6.
[15] See footnote 13.
[16] See footnote 6.
[17] Includes adjustments not shown separately in this table. Starting with 1987, excludes certain business-related expenses, deduction for two-earner married couples, and certain alimony payments, but includes selfemployed health insurance deduction; see also footnotes 18 and 19. Also, for 1987-1993, excludes employee moving expenses. Starting with 1990, adjustments include deduction for one-half of self-
employment (social security) tax. For changes in adjustments for earlier years, see Statistics of IncomeIndividual Income Tax Returns.
[18] Deductible Individual Retirement Arrangement (IRA) contributions, reflected in adjustment statistics starting with 1980 , were limited starting with 1987.
[19] Deduction expired during 1992 and 1994, but was later reinstated retroactively for each of these years. Data for 1992 and 1994 are, therefore, understated because they exclude amounts subsequently claimed on amended returns. The deduction was liberalized starting with 1995.
[20] Includes exemptions for blindness repealed effective 1987. Deduction for exemptions was limited for higher-income taxpayers starting with 1991. Exemption amounts were indexed for inflation starting with 1985 and were limited for certain high-income taxpayers starting with 1987.
[21] In general, represents the sum of standard and itemized deductions. (Returns with "no AGI" were not supposed to show deductions; when they did, they were excluded from the deduction statistics.) For 1980 and 1985 data, includes total itemized deductions before subtraction of "zero bracket amount," plus, for non-itemized deduction returns, the zero bracket amount and, for 1985 data only, charitable contributions deduction. Starting with 1987, includes revised itemized deductions (see also footnotes 23-24); "basic" standard deduction and "additional" standard deductions for age 65 or over or for blindness (for changes in the standard deduction and its relation to the zero bracket amount, see Statistics of Income-Individual Income Tax Returns, for appropriate years). Starting with 1991, total. itemized deductions are after statutory limitation (see footnote 23).
[22] For 1980 and 1985 data, represents "zero bracket amount" used on returns of non-itemizers; see also footnote 26. Zero bracket amount for 1985 and standard deduction, starting with 1986, were indexed for inflation.
[23] Includes itemized deductions not shown separately in this table, including revised deductions, starting with 1987, for "miscellaneous expenses" after limitation and for employee moving expenses; see also footnotes 24 and 25 . For the most part, moving expenses are excluded after 1993 (see also footnote 17). In general, total itemized deductions were limited for
certain high-income taxpayers starting with 1991. For changes in deductions for earlier years, see Statistics of Income-Individual Income Tax Returns.
[24] Deductible medical and dental expenses were limited, starting with 1987, based on a revised percentage of AGI. For changes in the deduction for 1987 and earlier years, see Statistics of IncomeIndividual Income Tax Returns.
[25] Starting with 1987, State sales taxes were no longer deductible.
[26] Starting with 1987, deductions for "personal" interest and mortgage real estate loan interest were limited and, starting with 1991, personal interest was no longer deductible.
[27] For 1980 and 1985 data, taxable income includes the "zero bracket amount," repealed effective 1987 and partially replaced by standard deductions which were subtracted in computing taxable income. A standard deduction was similarly used prior to 1980. For the percentages of AGI used for the standard deduction and the limitation on the deduction, see Statistics of Income-Individual Income Tax Returns.
[28] Different tax rate structures applied to Tax Years 1971-1978, 1979-1981, 1982-1986, 1987, 19881990, 1991-1992, and 1993-1995. Indexing of tax rate boundaries for inflation was introduced starting with 1985. The preferential maximum tax rate on net long-term capital gains under "alternative tax" was revised over the years. Alternative tax was abolished effective 1987, but a maximum capital gains tax rate less than the maximum regular tax rate continued to apply under certain conditions starting with 1991. For additional information on changes affecting tax computations, see Statistics of Income-Individual Income Tax Returns.
[29] Includes that portion of the earned income credit used to offset income tax before credits; see also footnotes 34 and 40. Earned income credit is shown below in Table 1.
[30] Includes credits not shown separately in this table, such as the political contributions credit (repealed effective 1987), earned income credit (see below in Table 1; see also footnote 34), and low-income housing credit (introduced effective 1987); see also footnote 31. For changes in credits allowed for earlier years, see Statistics of Income-Individual Income Tax Returns.
[31] Investment credit was included in the more-inclusive general business tax credit starting with 1984. With exceptions, investment credit was repealed effective 1986.
[32] Includes income tax after credits and additional tax for tax preferences, i.e, "minimum tax" or "alternative minimum tax" (see footnote 33). This is the amount before any audits and enforcement activities by the Internal Revenue Service and was the amount payable to the U.S. Government as reported on the income tax return.
[33] The add-on "minimum tax" on "tax preferences" (chief among which were net long-term capital gains) was introduced starting with 1970. (This tax was formerly described in Statistics of Income as the "additional tax for tax preferences.") The minimum tax computation, using a base related to taxable income, was revised and the tax rate increased effective 1976. The number of preferences subject to tax was revised effective 1976 and 1981. Starting with 1979, two major preferences formerly subject to minimum tax (including net long-term capital gains) were subjected, instead, to the new "alternative minimum tax," which required taxpayers to pay the larger of the regular income tax or the AMT. Computation of AMT was revised effective 1980 (to allow tax to be reduced by certain credits) and, again, effective 1981 (to modify the graduated tax rate structure). Minimum tax was abolished effective 1983 and many of the tax preferences subject to this tax were subjected, instead, to a revised AMT. AMT was increased starting with 1983 by introduction of a single, higher tax rate which replaced two, lower graduated rates. The single rate was increased effective 1987 and 1991; two, higher graduated rates were introduced effective 1993.
[34] "Earned income credit," allowed certain low-income recipients, was liberalized starting with 1985, 1987, 1991, and 1994. Indexing for inflation was introduced into the credit computation starting with 1985. In Table 1, the amounts "used to offset income tax before credits" and "to offset other taxes" (that are income-related) are reflected in the statistics for "total tax credits"; however, "excess earned income credit (refundable)" is reflected in the statistics for tax "overpayments." The refundable portion of the credit is the amount (in excess of the taxes) that could not be credited, including any "advance earned income credit payments" on those returns which had
such an excess. ("Advance earned income credit payments" were made to employees electing to receive such payments currently through their paychecks. Such "payments" are included in the statistics only if the employees also met the tax return filing requirements; advance payments received by -those-not required to-file-are therefore excluded:) --
[35] Total includes the following not shown separately: "advance earned income credit payments" (see footnote 34 , above); excess social security and railroad retirement tax withheld; and credits for (a) capital gains tax paid by a Regulated Investment Company, but considered paid by shareholders, and (b) part of the purchase price of a diesel-powered highway vehicle.
[36] Represents tax withheld on salaries and wages; certain tip income; pensions and annuities; certain gambling winnings; and distributions from profitsharing plans, retirement plans, and Individual Retirement Arrangements (IRA's). Also inclüded are taxes withheld as a result of "backup withholding" on certain interest, dividends, and royalty payments, which otherwise were not subject to withholding.
[37] Represents the sum of (a) "estimated tax," generally. paid quarterly throughout the tax year by selfemployed and certain other taxpayers with insufficient or no tax withheld, and (b) prior-year tax overpayments taxpayers elect to credit to their current-year's "estimated tax," in lieu of requesting a refund.
[38] Represents the sum of payments made with a request for an "automatic" 4 -month extension of time in which to file an income tax return, and payments with a request for an additional 2 -month extension. Notwithstanding the timing of these requests, full payment of a tax estimate for the year had to be made with the original application; if adjustments to the amount thus paid were later necessitated, the difference was either refundable or payable subject to an interest charge (which is not reflected in the tax statistics).
[39] Includes income tax, tax recapture of certain prioryear tax credits, tax applicable to Individual Retirement Arrangements (IRA's), self-employment (social security) tax, social security tax on certain tip income, and certain other income-related taxes (for the taxes applicable to the years shown, see Statistics of Income-Individual Income Tax Returns).
[40] Includes refunds (shown separately), plus credits to the following year's estimated tax and the refundable portion of the "earned income credit" (see footnote 34). The taxes reflected in tax overpayments are the same as those listed in footnote 39.
SOURCE: Except for the dollar amounts associated with the Presidential election campaign checkoff, data are from Statistics of Income-Individual Income Tax Returns, appropriate years. Statistics of Income data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above. Dollar amounts associated with the Presidential election campaign checkoff were accumulated by calendar year from U.S: Department of the Treasury, Internal Revenue Service, "Table S-1 Collections, Comparative Summary, Document 7038," Report NO-Treas-103, monthly.
Table 2 - Not presented.

## Table 3

[1] In addition to low-income taxpayers, this size class (and others) includes taxpayers with "tax preferences," not reflected in adjusted gross income or taxable income, which are subject to the "alternative minimum tax" (included in "total income tax"), defined in footnote 32 , Table 1.
[2] AGI minus "total deductions, personal exemptions" will not equal "taxable income" because the total of deductions and exemptions could exceed AGI and therefore includes amounts that could not be used in computing taxable income.
[3] Tax includes income tax after credits and the alternative minimum tax (see footnote 1).

## [4] Not computed.

SOURCE: Statistics of Income-Individual Income Tax Returns, appropriate years. Data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 4

[1] Revised data for 1992, no longer shown, are available from U.S. Department of Commerce, Bureau of Economic Analysis, Survey of Current Business,

September 1997.
[2] Represents "income" from owner-occupied nonfarm housing (less actual rental income and subsidies); proprietors' income; services to individuals furnished without payment by financial intermediaries (except life insurance carriers and private noninsured pension plans); employment-related food to employees, including that related to military and domestic service; standard military clothing issued to military personnel; and employees' lodging. Excludes employer-paid health and life insurance premiums (which are included in "other labor income (except fees)").
[3] Represents income of low-income individuals not required to file individual income tax returns, estimates of unreported income included in the personal income measure, and the net effect of statistical errors or omissions in personal income and adjusted gross income measures.
SOURCE: U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts of the United States, 1929-94 (in preparation), and, for 1995, Survey of Current Business, September 1997.

## Tables 5 and 6

[1] See Table 4 for the differences between personal income and adjusted gross income.
[2] Beginning with 1987, data are not comparable with earlier years because of major changes in the definition of adjusted gross income.

SOURCE: U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts of the United Sates, 1929-94 (in preparation), and, for 1995, Survey of Current Business, various issues. Statistics of Income data are subject to sampling error; tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 7

[1] Sum of standard and itemized deductions, plus charitable deduction reported on standard deduction returns for Tax Years 1982-1986. For 1987-1988, total deductions also include "zero bracket amount" reported on a small number of returns (see footnote
4). Includes total deductions that could not be used because they exceeded AGI.
[2] See footnote 2, Tables 5 and 6 .
[3] Series revised starting with the Spring 1997 Bulletin, to exclude from the standard deduction statistics the relatively small number of returns with no adjusted gross income and no deductions; previously, these returns were classified as if they showed a standard deduction. For the 1977-1986 statistics, the standard deduction is the "zero bracket amount" (reported on returns with only a "zero bracket amount"). Such an amount was also included for a small number of returns for 1987-1988; see footnote 4. For years in which the "zero bracket amount" was in effect, frequencies shown for standard deduction returns were derived by subtracting the number reporting an income tax liability with no itemized deductions from the total of all returns. For 1944-1952, returns with itemized deductions include the small number of returns with no deductions and, for 1944-1954, as well as the small number with no adjusted gross income regardless of whether or not deductions were itemized. In later years, returns in these two categories were excluded from all the deduction statistics in this table.
[4] Amount of standard deduction for 1944-1957 was estimated by Joseph A. Pechman, The Brookings Institution, on the basis of the distribution of the number of returns by income class and marital status in Statistics of Income-Individual Income Tax Returns, and, starting with 1958, was obtained directly from Statistics of Income tabulations for these years. Represents "zero bracket amount" for 1977-1986. Starting with 1987, represents the sum of "basic" and "additional" standard deductions (for age 65 or over and for blindness); also includes zero bracket amount reported on the small number of prior-year returns filed in 1988-1989 that were included in the 1987-1988 statistics.
[5] For 1977-1986, total itemized deductions are before subtraction of the "zero bracket amount." Starting with 1991, total itemized deductions are after statutory limitation (see footnote 23, Table 1).

SOURCE: Except as indicated in footnote 1, Statistics of Income-Individual Income Tax Returns, and unpublished tables, appropriate years. Data are subject to sampling error. Tax law and form changes affect the year-to-year comparability of the data. See the specific

Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 8

[1] See Table 4 for the differences between personal income and adjusted gross income.
[2] Excludes the "zero bracket amount" for 1977-1986. Because of major changes in law, taxable income starting with 1955 and 1987 is not comparable with earlier years. See also footnote 27, Table 1.
[3] For the definition of total income tax, see footnote 32, Table 1.

SOURCE: U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts of the United States, 1929-94 (in preparation), and, for 1995, Survey of Current Business, various issues; and Statistics of Income-Individual Income Tax Returns, appropriate years. Statistics of Income data are subject to sampling error; tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 9

[1] Starting with 1975, includes refundable portion of the earned income credit.

SOURCE: Statistics of Income--Individual Income Tax Returns, and unpublished tables, appropriate years. Data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 10

[1] For 1980, represents number of businesses (up to a maximum of three per return). For other years, represents the number of returns, even if there were more than one business per return.
[2] Total deductions include amounts not shown separately in this table, as well as amounts not reported separately on Schedule C-EZ (short form) used by certain of the smaller businesses starting with 1992. Most deductions for which statistics are shown are slightly understated to the extent that only total deductions had to be reported on Schedule C-EZ. After 1986, total deductions exclude disallowed "passive losses"; but net income (less deficit), net
income, and deficit reflect these losses. In addition, net income (less deficit), net income, and deficit are after adjustment for the passive loss carryover from prior years. Therefore, business receipts minus total deductions do not equal net income (less deficit).
SOURCE: Statistics of Income Sole Proprietorship Returns, appropriate years, and Statistics of Income Bulletin, Summer issues (for most years). Data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 11

[1] Includes assets and liabilities not shown separately. Totals are somewhat understated because not all partnership returns included a complete balance sheet. In addition, after 1990 certain small partnerships were not required to file balance sheets.
[2] Short-term debt is the abbreviated title for mortgages, notes, and bonds payable in less than one year.
[3] Long-term debt is the abbreviated title for mortgages, notes, and bonds payable in one year or more.
[4] "Total receipts" and "total deductions" include amounts not shown separately. Prior to 1981, "total receipts" included gross income from farming, rents, and royalties. Expenses related to this income were included under "total deductions." Starting with 1981; only the net incomes or deficits from farming, rents, and royalties were tabulated; the positive amounts were included under "total receipts" and the negative amounts under "total deductions." The related expenses were not tabulated. Because of a redesign of the partnership return, starting with 1987, total receipts was computed for the statistics as the sum of "total income from a trade or business"; and the following income distributed directly to partners: "ordinary" gain from sales of property other than "capital assets"; "ordinary" income from estates, trusts, and other partnerships; "portfolio income," comprising interest, dividends, royalties, and other (excluding net capital gains), and rental real estate income (positive amounts only); income from other rental activities (positive amounts only). Most, but not all, of these types of income were included in receipts data for 1986 and earlier years.

Total deductions was computed as the sum of "cost of sales and operations," "total deductions from a

## Notes to Selected Historical and Other Data Tables

trade or business," and the following, which were allocated directly to partners: "ordinary" loss from sales of property other than "capital assets"; "ordinary" loss from estates, trusts, and other partnerships; rental real estate losses; other rental losses; and "portfolio losses" (excluding net capital losses). Portfolio income and loss from sales of "capital assets" was intentionally omitted from receipts and deductions to improve comparability with earlier years.
[5] Business receipts starting with 1981 is not comparable to 1980. Prior to 1981, when partnerships classified in finance, insurance, and real estate reported gross rentals as their principal operating income such rentals were transferred to "business receipts" for the statistics. No such transfers were made after 1980, so that starting with 1981, all rentals were included in the separate statistics for rental income (which is not shown in Table 12).
[6] Taxable interest only. For the 1985 statistics, also includes certain dividends reported in combination with taxable interest.
[7] After 1980, represents the more complete amounts reported in depreciation computation schedules, rather than the amounts reported as the depreciation deduction (augmented by depreciation identified for the statistics in cost of sales and operations schedules).
SOURCE: Statistics of Income-Partnership Returns, appropriate years, and Statistics of Income Bulletin, Summer or Fall issues (for most years). Data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 12

[1] Size classes are based on "business receipts," i.e., gross amounts from sales and operations, for industries except those in finance, insurance, and real estate. For the latter industries, "total receipts," which is the sum of business receipts and investment income, was used. For partnerships, comparability of data by size of receipts is affected by revisions to the definition of receipts; see also footnotes 4 and 5,
Table 11. To help minimize the break in comparability caused by the change in statistical treatment of partnership farm and rental income, an effort was made for 1981-1987 only, to include rental (though not farm) gross income in the receipts used for the
size distribution in Table 12. Starting with 1988 though, only partnership net rentals are reflected in the size distribution.
[2] Includes returns with no business receipts.
[3] Includes corporations and partnerships with zero assets and liabilities. In addition, for partnerships, includes partnerships without balance sheet information (see also footnote 1 , Table 11).
[4] For 1980 , the size distribution shows the number of businesses, rather than the number of returns; see footnote 1, Table 10. Therefore, the total for 1980 differs from that presented in Table 10.

SOURCE: Statistics of Income-Corporation Income Tax Returns; Statistics of Income-Partnership Returns, Sole Proprietorship Returns, and Business Income Tax Returns, depending on the year; and Statistics of Income Bulletin, Summer or Fall issues (for most years). Tax law and tax form changes affect the year-to-year comparability of the data. See the appropriate Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 13

[1] Starting with 1985, "number of returns" excludes taxable cooperatives; starting with 1987, Real Estate Mortgage Investment Conduits (REMIC's); and, starting with 1988, Foreign Sales Corporations (FSC's) and Interest-Charge Domestic International Sales Corporations (IC-DISC's); see also footnotes 5 and 6, below. "Number of returns" also excludes Personal Service Corporations for 1988-1993. Because of the omission of these categories of returns, totals for all income, financial, and tax items shown in the statistics (except those not applicable to IC-DISC's and FSC's, such as "income subject to tax," "income tax," and tax credits) are slightly understated. (There were 980 IC-DISC returns for 1991; see "InterestCharge Domestic International Sales Corporations, 1991," Statistics of Income Bulletin, Summer 1995, Volume 15, Number 1 ; and 3,073 FSC returns for 1992; see "Foreign Sales Corporations, 1992," Statistics of Income Bulletin, Summer 1997, Volume 17, Number 1.)
A change in the definition of $S$ Corporation net income starting with 1987 means that totals for receipts and deductions are slightly understated to the extent that they were not directly related to the "income from a trade or business" reported by these companies. Comparability of data for "returns with net income" is

## Notes to Selected Historical and Other Data Tables

also affected by this same change, as well as by a change in the definition of regulated investment company net income for certain years; for additional information about these changes and the estimated effect they have on the net income statistics, see footnote 16 , below.
[2] Consolidated returns were filed on an elective basis for groups of affiliated corporations (with exceptions), in general, if 80 percent or more of the stock of the affiliates was owned within the group and a common parent corporation owned at least 80 percent of the stock of at least one of the:affiliates.
[3] Included in "number of returns, total" and "number with net income."
[4] In general, certain small, closely-held corporations that elected to be taxed at the shareholder level, with no more than 35 shareholders ( 25 for 1982 and 15 for 1979-1981).
[5] Domestic International Sales Corporations (DISC's) were designed to promote U.S. exports. They were taxed through parent corporations, but only when profits were-distributed or deemed distributed to them. This system of tax deferral was generally replaced after 1984 with a new system of Foreign Sales Corporations (FSC's); see footnote 6. Tax benefits of DISC's remaining after 1984 were limited and an interest charge for tax-deferred amounts: was imposed on the parent shareholders, whose DISC subsidiaries were unable to meet the FSC requirements and that elected to continue as IC-DISC's.
[6] Foreign Sales Corporations (FSC's) generally replaced Domestic International Sales Corporations (DISC's) as a means of promoting U.S. exports (see footnote 5). Under the FSC provisions, a portion of these subsidiaries' "foreign trade income" was exempt from U.S. income tax.
[7] Starting with 1985 , inventories includes amounts reported by real estate subdividers and developers previously included in "other investments."
[8] For 1980, tax-exempt securities represent investments in State and local Government obligations. For 1985, these securities were reported with investments in U.S. Government obligations as a combined total on the tax return. After 1988, taxexempt securities were again reported separately on the tax return, but were redefined to include, not only
investments in State and local Government obligations, but also stock in investment companies that distributed dividends during the current year representing tax-exempt interest on such obligations.
[9] After 1990, accounts payable of banking and savings and loan institutions includes deposits-and-withdrawable shares previously reported in "other current liabilities."
[10] In general, after 1982, Statistics of Income data for receipts, deductions, and net income (or deficit) of $S$ Corporations are limited to those attributable to a trade or business. Therefore, most investment income or loss, such as from taxable interest, dividends, rents, royalties, and gain (loss) from sales of investment property; the deductions related to this income; as well as deductions for charitable contributions, intangible drilling and development costs, oil and gas depletion, foreign taxes paid, and the limited expensing of the cost of depreciable assets (Code section 179), are not reflected in net income (because they were allocated directly to shareholders, instead). See also footnote 11.

After 1991, statistics for the "cost of sales and operations" represent only the "cost of goods sold," applicable when inventories were an incomedetermining factor, i.e., when the corporation was engaged in the production, manufacture, purchase, or sale of merchandise in the course of its trade or business. Therefore, the statistics exclude amounts previously estimated for the "cost of operations," applicable whenever inventories were not an incomedetermining factor. Such estimates were constructed from expense data reported elsewhere in the tax return (often in "other deductions"), on returns of corporations reporting "business receipts" without a cost of goods sold. Most of these corporations were classified either in the "transportation and public utilities" or "services" industrial divisions. See also footnote 16.
[11] After 1986, "business receipts" includes the full amount reported by stock and commodity brokers and exchanges, and by real estate subdividers, developers and operative builders, even when they bought and sold securities, commodities and real estate on their own account. Previously; such transactions were treated as "net gain (loss), noncapital assets."

## Notes to Selected Historical and Other Data Tables

[12] See footnote 10.
[13] Starting with the 1985 statistics, "other interest" includes any dividends reported in combination with interest on Form 1120S by S Corporations, i.e., certain corporations that elect to be taxed through shareholders (see footnote 4). Based on prior years when Form 1120 S required each to be reported separately, nearly all of the combined amount represents interest.
[14] For the 1985 statistics, "other deductions" includes depletion and employer contributions to pension, profit-sharing, stock bonus, and annuity plans, and to employee benefit programs, reported on the Form 1120-A short form. After 1987, identifiable amounts reported on Form 1120-A for any of these items are included in the statistics for the appropriate deduction. Starting with 1992, "other deductions" include certain amounts previously treated as part of the cost of sales and operations for Statistics of Income. See also footnote 10.
[15] In general, "total receipts less total deductions" includes nontaxable interest on State and local Government obligations, but excludes income from related foreign corporations only "constructively" received. As such, "total receipts less total deductions" represents all income, taxable and nontaxable, "actually" received by the corporation, as reported on the corporation income tax return, and excludes all income only "constructively" received. In contrast, "net income (less deficit)" represents all taxable income, actually or constructively received. Therefore, in the statistics, "total receipts less total deductions" minus "nontaxable interest on State and local Government obligations" and "constructive taxable income from related foreign corporations" equals "net income (less deficit)." For the exception, due to regulated investment companies, see footnote 16.
[16] "Net income (less deficit)," "net income," and "deficit" shown for 1990-1994 exclude: (a) net longterm capital gain reduced by net short-term capital loss reported by regulated investment companies (see also footnote 15), and (b) amounts other than "from a trade or business" reported by S Corporations (see also footnote 4). For comparisons with earlier years, these amounts should therefore be added back in. Regulated Investment Company net long-term capital gain (reduced by net short-term capital loss) was excluded from the statistics for net income (less deficit) starting with 1990 . With reference to Table 13 , the amounts excluded were: $\$ 7.5$ billion for

1990; $\$ 33.3$ billion for 1993; $\$ 43.4$ billion for 1994 ; and $\$ 55.7$ billion (preliminary) for 1995. S Corporation net income (less deficit) excluded from the statistics was estimated at $\$ 12.1$ billion for 1993; $\$ 17.7$ billion for 1994; and $\$ 21.1$ billion (preliminary) for 1995. Data with which to estimate the S Corporation net income (less deficit) excluded from the statistics for 1990 were not tabulated. (For additional information about $S$ Corporation net income, see Statistics of Income Bulletin, "S Corporations, 1993," Spring 1996, Volume 15, Number 4, and "S Corporation Returns, 1994," Spring 1997, Volume 16, Number 4.)
[17] For most years, "income subject to tax" (the corporate tax base) exceeds "net income (less deficit)" in the statistics, chiefly because of the deficits reported on returns without net income. Moreover, it is the sum of the several tax bases applicable over time to different classes of corporations, not all of which were directly related to net income. Income subject to tax thus includes the "taxable income" base used by most companies (and defined for the statistics as net income minus certain statutory special nonbusiness deductions, such as for intercorporate dividends received and "net operating losses"): prior to 1988 , a variation of this base in combination with net long-term capital gains in certain situations where the lower capital gains tax applied; and the special tax bases applicable to $S$ Corporations (otherwise taxed through their shareholders), insurance businesses, and certain investment companies. Profits of Domestic International Sales Corporations or InterestCharge Domestic International Sales Corporations (depending on the year) were tax-deferred until distributed, actually or constructively, to parent businesses, and those of S Corporations were mostly taxed through their individual shareholders. Therefore, the net income of all these corporations is excluded from income subject to tax for years for which data for these companies are included in the statistics (see also footnote 1).
[18] For 1980, includes tax from recapture of Work Incentive Program (WIN) credit; starting with 1985, Personal Holding Company tax; after 1987, tax on "branch profits" of foreign corporations with U.S. operations; and, after 1988 , certain lesser taxes, including special taxes applicable to real estate investment trusts and foreign corporations with U.S.source income. "Income tax, total" more closely represents worldwide income tax liability because it
is before subtraction of the foreign tax credit, the largest of the tax credits. To the extent that foreign tax credits adequately reflect the total foreign income tax burden, total income tax includes these taxes. See also, footnotes 21 and 23.
[19] Different tax rate structures applied for Tax Years 1980-1981, 1982, 1983-1986, 1987-1992, and 19931995. In general, starting with tax years beginning in 1987, "alternative tax" was repealed. This tax included a maximum rate on net long-term capital gains that produced a tax that was less than that produced by the regular tax rates.
[20] Effective during 1987, the "alternative minimum tax" replaced the "minimum tax" (formerly referred to in the statistics as the "additional tax for tax preferences"). Therefore, the "number of returns" shown represents the number with the minimum tax for years before 1990 and the number with alternative minimum tax for the later years. The tax computation was modified effective with Tax Years 1983, 1984, and 1990. The alternative minimum tax rate exceeded that applicable under the former minimum tax.
[21] Tax credits are-applied against "regular and alternative tax" only.
[22] Data for 1980, 1990, 1993 are revised; also see the data sources described below.
[23] Starting with the 1985 statistics, general business credit includes alcohol fuel, investment, jobs and employee stock ownership plan (ESOP) credits which were reported separately for previous years. Also included are the research activities credit (starting 1986), the low-income housing credit (starting 1987), and the credit for contributions to certain community development corporations (starting 1993). With exceptions, investment credit was repealed effective 1986; employee stock ownership plan contributions credit was repealed effective 1987. For changes in definitions of component credits, see Statistics of IncomeCorporation Income Tax Returns, for the years concerned.
[24] Total income tax after credits is before any audits or enforcement activities by the Internal Revenue Service. It is the amount payable to the U.S. Government as reported on the income tax return, and, because it is after subtraction of foreign tax credit, the total does not include income taxes paid
to foreign governments.
[25] Reflects revisions to the foreign tax credit data for 1980, 1990, and 1993 (see footnote 22 and the data sources described below).
SOURCE: Except for the revised data on the foreign tax credit presented in Tāble 13 for 1980, 1990, and 1993 (and , as a result, for "total income tax (after credits)," Statistics of Income-Corporation Income Tax Returns. For the revised data on the foreign tax credit, special studies summarized in articles included in the Statistics of Income Bulletin, various issues. (Revised data based on special studies of the foreign tax credit for years other than those mentioned above may be found in articles included in previous issues of the Bulletin.) All of these special studies reflect the results of the in-depth analyses of tax return computation schedules in support of the credit reported in Statistics of Income-Corporation Income Tax Returns and include the results of taxpayer follow-up for additional data. All Statistics of Income data are subject to sampling error. Tax and tax form changes affect the year-to-year comparability of the data. See the appropriate Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 14

[1] Industrial classification is based on the product or service accounting for the largest percentage of the "total receipts" shown in this table. If this information was not discernible from the corporation income tax return, the return was classified as with "Nature of business not allocable." Data for "Nature of business not allocable" are included in the total for "All industrial divisions," but are not shown separately. Therefore, the statistics by industrial division do not add to this total.
[2] See footnote 1 , Table 13.
[3] Net worth is the sum of "capital stock," " paid-in or capital surplus," "retained earnings, appropriated," and "retained earnings, unappropriated," minus "cost of treasury stock." Data for each of these amounts are presented separately in Table 13.
[4] See footnotes 10 and 16, Table 13.
[5] See footnote 11, Table 13.
[6] Interest received is the sum of "interest on State and local Government obligations" (i.e., tax-exempt interest) and "other interest" (which includes
interest paid by banking and savings institutions). Data for both of these amounts are presented separately in Table 13. See also footnote 13, Table 13.
[7] In addition, to regular (and alternative tax, for years prior to 1988), includes certain other taxes either shown separately in Table 13 or mentioned in footnote 18 , Table 13.
[8] See also footnote 19, Table 13.
SOURCE: Statistics of Income-Corporation Income Tax Returns, appropriate years. Data are subject to sampling error. Tax law and tax form changes affect the year-to-year comparability of the data. See the appropriate Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 15

[1] Profits shown are without inventory valuation and capital-consumption adjustments.
[2] "Net income (less deficit)" and "income subject to tax" exclude taxable cooperatives starting with the 1985 data, and Real Estate Mortgage Investment Conduits starting with 1987. Net income (less deficit) starting with 1985 excludes Foreign Sales Corporations (FSC's) and Interest-Charge Domestic International Sales Corporations (IC-DISC's); see also Table 13, footnote 1 . For changes in the definition of regulated investment company and $S$ Corporation net income, see Table 13, footnote 16.
[3] For the definition of "income subject to tax," see footnote 17, Table 13. See also footnote 2, above.
SOURCE: U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts of the United States, 1929-94 (in preparation), and, for 1995, Survey of Current Business, various issues; and Statistics of Income-Corporation Income Tax Returns; appropriate years. Statistics of Income data are subject to sampling error; tax law and tax form changes affect the year-to-year comparability of the data. See the specific Statistics of Income reports for a description of sampling error and of the changes mentioned above.

## Table 16

[1] Total adult deaths represent those of individuals age 20 and over, plus deaths for which age was unavailable.
[2] Prior to 1982, number of "taxable estate tax returns"
by year of death is only approximate because, while the majority of returns filed in a given calendar year represent estates of decedents who died in the immediately preceding year, many represent estates of decedents who died in earlier years. Therefore, the number of taxable returns shown for 1976 decedents, for example, is actually the number of taxable returns filed in 1977, regardless of year of death. Starting with 1982, statistics by year of death are more accurate because they are based on the year of death reported on return filings over a period of successive years.

Year-to-year comparability is affected by changes in the gross estate filing threshold which is based on date of death: $1934(\$ 50,000) ; 1935(\$ 50,000$ changing to $\$ 40,000$ ); 1942 ( $\$ 40,000$ changing to $\$ 60,000) ; 1943(\$ 60,000) ; 1977(\$ 120,000) ; 1978$ (\$134,000); 1979 (\$147,000); 1980 (\$161,000); 1981 (\$175,000); 1982 (\$225,000); 1983 ( $\$ 275,000$ ); 1984 ( $\$ 325,000$ ); 1985 ( $\$ 400,000$ ); $1986(\$ 500,000)$; and $1987(\$ 600,000)$.
SOURCE: For years after 1953, Statistics of IncomeEstate Tax Returns; Estate and Gift Tax Returns; Fiduciary, Estate and Gift Tax Returns; and unpublished tabulations, depending on the year. For years prior to 1954, Statistics of Income--Part 1. Adult deaths are from the National Center for Health Statistics, Public Health Service, U.S. Department of Health and Human Services, Vital Statistics of the United States, unpublished tables.

## Table 17

[1] Includes taxes collected by the Internal Revenue Service and, starting in Fiscal Year 1988 and the second quarter of Fiscal Year 1991, estimates of excise taxes collected by the Bureau of Alcohol, Tobacco and Firearms and the Customs Service, respectively. These excise taxes were formerly collected by the Internal Revenue Service. See footnote 5, below, for an explanation of the revisions to the excise tax data starting with the Summer 1997 issue of the Bulletin.
[2] Excludes various taxes paid by certain tax-exempt trusts at the individual income tax rates; these taxes were included with corporation income taxes. Individual income tax collections include that portion of the individual income tax transferred to the Presidential Election Campaign Fund as indicated by taxpayers on their income tax returns. Presidential

## Notes to Selected Historical and Other Data Tables

election campaign designations are shown in Table 1 by calendar year; designations by fiscal year are as follows: $\$ 66.3$ million in Fiscal Year 1996, $\$ 68.5$ million in $1995, \$ 69.7$ million in $1994, \$ 27.7$ million in 1993, \$29.6 million in 1992, $\$ 32.3$ million in 1991, \$32.5-million in_1990, \$32.3 million in 1989, and $\$ 33.2$ million in both 1988 and 1987. Income tax of estates and trusts collected in Fiscal Year 1996 was $\$ 8.0$ billion; in 1995, $\$ 5.3$ billion; in 1994, $\$ 6.2$ billion; in 1993, $\$ 6.0$ billion; in 1992, $\$ 6.1$ billion; in 1991, $\$ 4.8$ billion; in 1990, $\$ 5.9$ billion; in 1989, $\$ 6.0$ billion; in $1988, \$ 6.5$ billion; and, in 1987, $\$ 8.4$ billion.
[3] -Includes various taxes applicable to tax-exempt .... organizations, including the tax on "unrelated business income." Such taxes also include the taxes paid by certain tax-exempt trusts at the individual income tax rates; these taxes were combined with the corporation income tax collections. Total taxes collected from organizations otherwise tax-exempt were $\$ 699.9$ million in Fiscal Year 1996 (including $\$ 501.9$ million in unrelated business income tax); $\$ 484.9$ million in 1995 ( $\$ 294.3$ million in unrelated business income tax ); $\$ 571.5$ million in 1994 ( $\$ 372.4$ million in unrelated business income tax); $\$ 342.7$ million in 1993 ( $\$ 173.6$ million in unrelated business income tax); \$379.5 million in 1992 ( $\$ 181.6$ million in unrelated business income tax); $\$ 288.2$ million in 1991 ( $\$ 155.6$ million in unrelated business income tax); \$304.0 million in 1990 ( $\$ 127.9$ million in unrelated business income tax); \$271.4 million in 1989 ( $\$ 115.6$ million in unrelated business income tax); $\$ 284.0$ million in 1988 ( $\$ 137.5$ million in unrelated business income tax); and $\$ 244.3$ million in 1987 ( $\$ 19.9$ million in unrelated business income tax).
[4] See footnote 1 , above.
[5] Data shown for the Bureau of Alcohol, Tobacco, and Firearms (BATF) also include data for the Customs Service. To preserve the historical time series interrupted by the transfer of collection of the manufacturers excise taxes paid on alcohol and tobacco and of the manufacturers excise taxes on recreational products for the taxes paid on firearms from the Internal Revenue Service to BATF and the Customs Service starting in July 1987 and January 1991, respectively. Excise tax collections for these two Treasury Department agencies are shown
alongside the excise tax collections reported by the Internal Revenue Service for fiscal years beginning with 1988 in Table 17, and have been added to the total tax collections reported by the Internal Revenue Service to show a grand total of all tax collections (with the exception of cargo excise taxes collected by the Customs Service). For a description of the excise tax collection statistics presented in the Bulletin prior to the Summer 1997 issue, see Table 17 , footnote 5 , of that issue.
[6] Employment taxes include: (a) old age survivors, disability, and hospital insurance (OASDI) taxes, i.e., social security taxes, levied on salaries and wages (Federal Insurance Contributions Act or FICA taxes) (in 1996, $\$ 455.2$ billion; 1995, $\$ 394.4$ billion; 1994, $\$ 409.6$ billion; 1993, $\$ 381.1$ billion; 1992, $\$ 365.2$ billion; 1991, $\$ 349.3$ billion; 1990, $\$ 336.3$ billion; 1989, $\$ 317.8$ billion; 1988, $\$ 289.9$ billion; and 1987 , $\$ 252.6$ billion); (b) (social security) taxes levied on "self-employment" income (Self Employment Insurance Contributions Act or SECA taxes) (in 1996, $\$ 26.9$ billion; 1995, $\$ 60.1$ billion; 1994, $\$ 24.4$ billion, 1993, $\$ 20.6$ billion; 1992, $\$ 24.4$ billion; 1991, $\$ 25.5$ billion; 1990, $\$ 21.3$ billion; 1989, $\$ 19.0$ billion; 1988, $\$ 17.7$ billion, and 1987 , $\$ 14.0$ billion); (c) unemployment insurance taxes (in 1996, \$6.0 billion; 1995, $\$ 5.8$ billion; 1994 and 1993, $\$ 5.6$ billion each; 1992, $\$ 5.8$ billion; 1991 and 1990, $\$ 5.5$ billion each; 1989, $\$ 4.7$ billion; and, 1988 and 1987, $\$ 6.2$ billion each); and (d) railroad retirement taxes (in 1996 and 1995, $\$ 4.3$ billion each; 1994, \$4.2 billion; 1993, $\$ 4.3$ billion; 1992, $\$ 4.4$ billion; 1991 and 1990, $\$ 4.2$ billion each; 1989, $\$ 4.1$ billion; 1988, $\$ 4.3$ billion; and 1987, $\$ 4.2$ billion).

NOTES: In general, collections represent the gross amounts before refunds and include amounts paid with the tax return, prior to filing the return (as applicable), income tax withheld by employers, and "estimated tax" payments; and subsequent to filing the return (chiefly the result of initial administrative retürn processing or examination and enforcement activities). Collections also include interest and penalties.

Collection statistics reported by the Internal Revenue Service are not altogether comparable to those published by the Financial Management Service, also in the Treasury Department, because of timing differences resulting from the definitions each agency uses. The Internal Revenue Service counts the monies as they are received (to reflect

## Notes to Selected Historical and Other Data Tables

the status of its tax collection operation); Financial Management Service counts these amounts as received, but only after discrepancies (such as between what the employer reports as tax withheld and the amount actually withheld) are resolved. Also, Financial Management Service classifies the tax collected according to the Federal Budget account to which the tax receipts are assigned (so that, for example, the "environmental tax" reported on the corporation income tax return is not included in Treasury's monthly corporation income tax statistics because, by law, this tax is assigned to the environmental "Superfund," rather than to the General Fund to which most income taxes are assigned; in contrast, this tax is classified as a corporation income tax in the Internal Revenue Service statistics).

SOURCE: U.S. Department of the Treasury, Internal Revenue Service, Assistant Commissioner (Taxpayer Services), Customer Services Branch; Bureau of Alcohol, Tobacco and Firearms, Statistical Release: Alcohol, Tobacco and Firearms Tax Collections, quarterly, and Financial Management Service, unpublished data.

## Table 18

[1] Starting with Fiscal Year 1988 and 1991, total includes refunds of excise taxes collected by Bureau of Alcohol, Tobacco and Firearms and Customs Service, respectively. Formerly, these refunds were issued by the Internal Revenue Service.
[2] Includes refunds of taxes paid on the "unrelated business income" of certain tax-exempt trusts. Also, individual income tax refund data have not been revised to provide for consistent treatment of the refundable portion of the "earned income credit" from year to year. Individual income tax refunds are net of offsets under laws which require the Internal Revenue Service to act as collecting agent for delinquent payments owed various U.S. Government agencies under specific programs; see Table 19.
[3] Includes refunds of taxes on the "unrelated business income" of tax-exempt organizations, except for certain trusts.
[4] See footnote 1. Also, as further explained in the Notes to Table 20, taxpayers can offset certain refundable excise tax payments against the tax of subsequent time periods and claim certain other refunds as a credit against income tax; however, these amounts are not reflected in the excise tax refund
statistics. Depending on the tax, some other excise tax refunds could be claimed as a credit against income tax; therefore they are not reflected in the excise tax refund data. However, still other types of excise tax, refundable on income tax returns, are treated as excise tax refunds and are included in the excise tax refund statistics.
[5] The kinds of employment taxes subject to refund are included in footnote 6, Table 17.

SOURCE: U.S. Department of the Treasury, Internal Revenue Service, Assistant Commissioner (Taxpayer Services), Customer Service Branch.

## Table 19

[1] Represents repayments to specific Federal agencies for debts, such as student loans, mortgage and loan foreclosures, dishonored checks, and overpayments of benefits. There was no refund offset program prior to Fiscal Year 1982.
[2] After 1990, number of offsets includes adjustments for injured spouse claims filed with the original return.
[3] Net amount collected after injured spouse claims and after processing of reversal claims; excludes fees charged by the Internal Revenue Service and Financial Management Service, U.S. Department of the Treasury.
[4] Total also includes repayments to the Public Health Service (starting with 1987) and to the Social Security Administration (for 1992 through 1994), not shown separately. Data for the Social Security Administration (SSA) are included under "All other" programs or agencies starting with 1995, when SSA became an independent Federal agency, no longer affiliated with the Department of Health and Human Services. Therefore, data for the Department of Health and Human Services and "All other" programs or agencies are not comparable with previous years, starting with 1995.
[5] Represents repayments to State treasuries for funds disbursed to families receiving State assistance.
[6] Represents repayments to State treasuries for distribution to custodial parents.

## Notes to Selected Historical and Other Data Tables

## Table 20

[1] Tax liability statistics include "collections" of use tax on heavy highway vehicles and of crude oil windfall profit tax. See the notes below, also.
-[2]--Represents aggregates for two or more. specific taxes for which amounts have either been combined or are not available separately.
[3] This tax is in addition to the regular tax on gasoline.
[4] Includes small amounts of taxes on alcohol, tobacco, and firearms collected by the Internal Revenue Service after Fiscal Years 1987 and 1991 for tax liabilities incurred previously (effective with or during Fiscal Years 1988 and 1991, responsibility for new tax liabilities was transferred to the Bureau of Alcohol, Tobacco and Firearms and the Customs Service).
[5] Tax liability statistics include tax "collections" on imported items shown in the statistics. See the notes below, also.

NOTES: Grand totals for taxes shown for the Internal Revenue Service (IRS), the Bureau of Alcohol, Tobacco and Firearms (BATF), and the Customs Service represent tax "collections." (Taxes on certain cargoes treated as excise-taxes under the Internal Revenue Code are also collected by the Customs Service, but are not included in these statistics because they are not treated as excise taxes in the Federal Budget.) Total collections rounded to millions of dollars are all that are available from the source used for the statistics.

Total IRS collections represent payments made during the indicated fiscal year (or fiscal year quarter), either through the semi-monthly deposits required of most taxpayers with significant excise tax liabilities, or as payments attached to quarterly excise tax returns. Collections are accounted for without identifying the specific excise taxes the payments are for; therefore, the only statistics on specific taxes are for the "liabilities" reported on excise tax returns. There are two exceptions, for the use tax on heavy highway vehicles and the crude oil windfall profit tax, which are accounted for separately. Therefore, tax "collections" for these two taxes are available and are included in the statistics which otherwise show the tax liability reported.

Starting with Fiscal Year 1994; the statistics for total tax collections and tax liabilities by type of tax take into account the normal lag between the time most taxes are collected via deposits and the recording of tax liabilities by type of tax as reported on tax returns. This was accom-
plished by matching Internal Revenue Service collection statistics for a specific quarter with tax liability data from returns processed in the following quarter. Prior to 1994, the statistics for collections in a quarter were matched with the liabilities certified during that same quarter. The table entry for "collections less reported amounts" is a balancing amount representing the difference between excise tax collections and the sum of excise tax liabilities "certified" from returns processed in the following quarter (for fiscal years starting with 1994) and from returns processed in the same quarter (for fiscal years preceding 1994). Therefore, because of this change in how tax collections are matched with tax liabilities, the balancing amounts are not comparable for all of the years shown.

To effectuate this change in concepts between Fiscal Years 1993 and 1994, the tax liabilities reported for the quarter ended Deciember 31, 1993 (the first Fiscal Year 1994 quarter under the revised definition) were matched both with collections processed in the quarter ended March 31, 1994 (to meet the new definition), and also with collections processed in the quarter ended December 31, 1994 (for the prior definition). For additional information about how the changeover was accomplished, see Statistics of Income Bulletin, "Federal Excise Taxes, Fiscal Years 1994 and 1995,"-Fall-1996, Volume 16, Number 2:

In the IRS "certification" process, certain adjustments are made for returns missing or filed late and to correct obvious taxpayer errors. As evidenced by the statistics, some certified amounts are rounded to the nearest $\$ 1,000$, $\$ 10,000$, or $\$ 100,000$, during administrative processing. Adjustments made in a particular quarter are reversed in a subsequent quarter to avoid double counting when late or missing returns are later filed and processed. This can result in amounts being reported in quarters long after a tax is expired or has been repealed. It can also result in the negative amounts shown in the data as corrections are made to earlier quarter(s). Negative amounts also result from prior misclassifications made during the certification process, or from taxpayers using a subsequent quarter's tax return to claim refunds for an earlier quarter or to correct prior mistakes. Corrections to the Internal Revenue Service data are reflected in the data for the quarter(s) and year in which the corrections were made, rather than in data for quarter(s) and year in which the original tax liability arose. The certified tax is net of refund credits reported on excise tax returns, not only for this reason, but also for reasons based on the tax code. As examples, tax can be offset for commodities exported that were previously taxed (exports are usually nontaxable), for the

## Notes to Selected Historical and Other Data Tables

tax-free sale of previously-taxed gasoline to a State or local Government or, in the case of the BATF taxes, for alcohol used for a non-beverage purpose. Other taxpayers apply directly for refunds and, in some instances, are allowed to claim them as a credit against income tax; however, these amounts are not reflected in Table 20.

Excise taxes on alcoholic beverages and tobacco products are collected by both the Customs Service (on imports) and BATF (on domestic production). Taxes on firearms and certain occupational taxes are also collected by BATF. Data on imports represent the tax "collected"; all other data by type of excise tax represent tax "liabilities." Therefore, the totals shown for BATF and Customs Service tax "liabilities" are actually a mixture of tax liabilities and collections. Also, the grand totals for BATF and Customs Service tax "collections" as shown are residual amounts derived by subtracting total Internal Revenue Service gross tax collections, i.e., before refunds, from the grand total of all excise tax gross collections reported in the Monthly Treasury Statement, rounded to millions of dollars, as shown at the beginning of this table.
The BATF data are based on returns filed with respect to tax liabilities arising in that same quarter. In Table 20, the BATF quarterly data have been rearranged starting with the Spring 1997 Bulletin so that the tax liability data are matched with the tax "collections" in that same quarter. In contrast to the BATF data, all Customs data represent the amounts actually "collected."

BATF amounts are often revised slightly as late returns are processed or other adjustments made. Unlike the Internal Revenue Service data, revisions are made to BATF data for the specific quarter(s) and year in which the original tax liability arose, so that data for prior periods may be revised on a continuing basis (although the prior-year data are retabulated for only one year).

In the Table 20 statistics for BATF/Customs Service, "collections less reported amounts" is the balancing amount which reconciles the BATF/Customs tax "collections" (derived in the manner previously described) with the sum of the tax liabilities by type of tax shown for the quarter or year. These latter totals are described in Table 20 as "tax liabilities by type of excise tax, total" (even though they actually represent combinations of Customs tax collections and BATF tax liabilities). Because of the method used to calculate the grand total for BATF/ Customs tax collections (see above), it is possible for the sum of the detailed types of BATF/Customs excise tax "liabilities" to exceed this total.

To improve comparability of all the historical data by type of excise tax from one year to the next, specific excise taxes have been classified as they appear in the Internal Revenue Code for 1996, even when they were classified differently prior to 1996. As a result, the excise tax totals are not comparable to the totals in previous versions of Table 20, including that published in the Summer 1996 and earlier issues of the Statistics of Income Bulletin. For the same reason, they are not comparable to the excise tax statistics pablished by the Internal Revenue Service for earlier years or quarters.
"Floor stocks taxes" are shown separately because they are nonrecurring. They are generally imposed on holders of inventories on the date a new excise tax is imposed or a tax rate is increased.

The tax rates in effect at the beginning of Fiscal Year 1996 are shown in Table 20. Most of the rates shown for the previous years for which historical data are presented in Table 20 may be found on Form 720, Quarterly Federal Excise Tax Return, and its attachments, for the year(s) concerned.

SOURCE: U.S. Department of the Treasury, Financial Management Service, Montily Treasury Statement of Receipts and Outlays of the United States Government; Bureau of Alcohol, Tobacco and Firearms, Statistical Release: Alcohol, Tobacco and Firearms Tax Collections, quarterly (also includes data from the U.S. Customs Service); Internal Revenue Service, Internal Revenue Service Data Book, annual, and its predecessor, Annual Report, Commissioner and Chief Counsel, Internal Revenue Service, and the Assistant Commissioner (Taxpayer Services), Submission Processing Division, Revenue Accounting Branch, Internal Revenue Report of Excise Taxes, for fiscal years before 1994, and unpublished corrected data for 1994 and 1995 and data for 1996 (unrevised data for 1994 and 1995 were published in Davie, Bruce F., "Federal Excise Taxes, Fiscal Years 1994 and 1995," Statistics of Income Bulletin, Fall 1996, Volume 16, Number 2). See, also, (unrevised) data included in Davie, Bruce F., "Excise Taxes, Fiscal Year 1992," Statistics of Income Bulletin, Fall 1993, Volume 13, Number 2.

## Table 21

[1] Form 1040 is the long form, and Form 1040A, one of the two (three for Filing Year 1996) "short forms." Prior to 1994, Form 1040EZ, the other "short form" (except for 1996) was for single taxpayers with no

## Notes to Selected Historical and Other Data Tables

dependents; starting with 1994, certain married taxpayers with no dependents could also file on this form. Schedule C is for reporting nonfarm sole proprietorship business income and deductions, and Schedule F is for reporting farm sole proprietorship income and expenseses; short-form Schedule C-EZ was introduced in 1993. (Añ "experimental" short form, 1040-T was used in 1996, but was discontinued thereafter.) The reported figures for total Forms 1040 (including 1040-T), 1040A, 1040EZ, and 1040PC, as well as totals for business and nonbusiness Form 1040 returns with Schedules C or F attached, all include "paper" returns plus "standard" electronically-filed (ELF) returns (usually filed by-tax-preparers) starting with -1986 . Starting with 1992, these totals also include returns filed by telephone ("TeleFile"). Form 1040PC represents "paper" Form 1040, 1040A, or 1040EZ returns filed by taxpayers (or tax preparers) using an IRSapproved computer software-generated format, rather than a specific tax form. Calendar Year 1992 is the first for which this "form" applied. The last category under individual income includes Form 1040C (departing alien) in years before 1992; 1040NR (nonresident alien); 1040PR (self-employment tax, Puerto Rico); and 1040 SS (self-employment tax, U.S. Virgin Islands, Guam, and American Samoa); but excludes Form 1040X (amended return).
[2] Form 1120 is the basic corporation income tax return; Form 1120-A is the short form; and Form 1120 S is for S Corporations (certain small companies electing to be taxed through their shareholders, no more than 35 shareholders starting with 1985 , no more than 15 for 1980 , and no more than 10 for 1975). "Other" includes Forms 1120-F (most foreign companies with U.S. income); 1120-L (life insurance companies) starting in 1992 (included in the statistics for Form 1120 in the earlier years); 1120 POL (certain political associations); 1120 H (homeowners associations); 1120-FSC (Foreign Sales Corporations or FSC's) starting in 1986; starting in 1988, 1120REIT for real estate investment trusts, 1120 -RIC for regulated investment companies (both of which formerly filed on Form 1120), and 1120-PC for property and casualty insurance companies (which formerly filed on Form 1120 or 1120M, described below). "Other" also includes Form 1120DF (for designated funds) starting in 1988; and for years before 1988, Form 1120M, now discontinued, for mutual nonlife insurance companies which now file on Form

1120 or Form $1120-\mathrm{PC}$ (and are included in the statistics for Form 1120 in the earlier years). "Other" excludes Forms 1120-DISC for Domestic International Sales Corporations or DISC's, discontinued after 1985 and mostly replaced by FSC's (see above); 1120 IC-DISC for Interest-Charge Domestic Interna-tional-Sales Corporations, which replaced certain DISC's after 1985; and 1120X, amended returns.
[3] Form 1041 is the regular income tax return filed for estates and trusts. For 1988-1990, includes Form 1041S (short form).
[4] Form 706 is the regular estate tax return; Form 706NA is for U.S. estates of nonresident aliens; Forms 706 GS(D) and $706 \mathrm{GS}(\mathrm{T})$ are for estate tax returns for which the generation-skipping transfer tax applies.
[5] Form 990 is for tax-exempt organizations, except private foundations (Form 990-PF). Form 990EZ is the short form. Form 990-T is the income tax return filed for businesses conducted by tax-exempt organizations. Form 990-C is for farmers' cooperatives. Form 4720 is for computing the special excise taxes applicable to certain private foundations and Form 5227 is for split-interest trusts treated as private foundations.

- SOURCE: U.S. Department of the Treasury;-InternalRevenue Service, Research Division, Projections and Forecasting Group.

## Table 22

[1] Number of returns with a paid signature is based on different sources, depending on the year. Data for 1993-1995 are based on the Statistics of Income sample. Data for previous years are from the Individual Master File of all taxpayers, with the following exceptions: the number of returns with itemized deductions; and, starting with 1990, the number of returns filed electronically. These latter numbers were estimated from the Statistics of Income-Taxpayer Usage Study (TPUS) samples of returns filed during the first 4 months of the filing year, and, for 1992, from the full Statistics of Income sample of returns received throughout the entire filing year.
[2] Data on electronically-filed returns are included in the counts of Form 1040 returns shown above in Table 22, for all years. For Tax Year 1990, data are based on the TPUS samples (see footnote 1) of returns filed, extended to cover the first 8 months of the filing years. No adjustment was made for the
returns filed after the first 8 months on the assumption that few were likely to have been filed electronically during these months. Starting with Tax Year 1992, data are based on the full Statistics of Income samples of returns filed throughout the entire filing year.
[3] Data on IRS taxpayer assistance programs are actually for the fiscal year. In general, assistance rendered in a given fiscal year may be associated with returns due on April 15th of that fiscal year and is, therefore, for the tax year ending with the previous December. As a result, data in Table 22 on taxpayer assistance, shown as for Tax Year 1995, for example,
are actually for Fiscal Year 1996.
NOTE: Data on IRS assistance represent taxpayers contacts, unless otherwise indicated. Some taxpayers are contacted more than once. The number of taxpayers assisted (in contrast to the number of taxpayers contacted) is not known.

SOURCE: Data on paid preparers were obtained from Statistics of Income; and from the Corporate Systems Division, Individual Systems Branch. Data on IRS assistance were obtained from the Internal Revenue Service Annual Reports for Fiscal Year 1992; and Internal Revenue Service Data Book, starting with Fiscal Year 1993.

# SOI Sampling Methodology and Data Limitations 

Appendix

This appendix discusses typical sampling procedures used in most Statistics of Income (SOI) programs. Aspects covered briefly include sampling criteria, selection techniques, methods of estimation, and sampling variability. Some of the nonsampling error limitations of the data are also described, as well as the tabular conventions employed.

Additional information on sample design and data limitations for specific SOI studies can be found in the separate SOI reports (see the References at the end of this appendix). More technical information is available, upon request, by writing to the Director, Statistics of Income Division CP:R:S, Internal Revenue Service, P.O. Box 2608, Washington, DC 20013-2608.

## Sample Criteria and Selection of Retums

Statistics compiled for the SOI studies are generally based on stratified probability samples of income tax returns or other forms filed with the Internal Revenue Service (IRS). The statistics do not reflect any changes made by the taxpayer through an amended return or by the IRS as a result of an audit. As returns are filed and processed for tax purposes, they are assigned to sampling classes (strata) based on criteria such as: industry, presence or absence of a tax form or schedule, accounting period, State from which filed, and various income factors or other measures of economic size (total assets, for example, is used for the corporation and partnership statistics). The samples are selected from each stratum over the appropriate filing periods. Thus, sample selection can continue for a given study for several calendar years - 3 for corporations because of the prevalence of fiscal (non-calendar) year reporting. Because sampling must take place before the population size is known precisely, the rates of sample selection within each stratum are fixed. This means, in practice, that both the population and the sample size can differ from that planned. However, these factors do not compromise the validity of the estimates.

The probability of a return being designated depends on its sample class or stratum and may range from a fraction of 1 percent to 100 percent. Considerations in determining the selection probability for each stratum include the number of returns in the stratum, the diversity of returns in

[^75]the stratum and interest in the stratum as a separate subject of study. All this is subject to constraints based on the estimated cost or the target size of the total sample for the program.

For most SOI studies, returns are designated by computer from the IRS Master Files based on the taxpayer identification number (TIN), which is either the social security number (SSN) or the employer identification number (EIN). A fixed and essentially random number is associated with each possible TIN. If that random number falls into a range of numbers specified for a return's sample stratum, then it is selected and processed for the study. Otherwise, it is counted (for estimation purposes), but not selected. In some cases, the TIN is used directly by matching specified digits of it against a predetermined list for the sample stratum. A match is required for designation.

Under either method of selection, the TIN's designated from one year's sample are for the most part selected for the next year's, so that a very high proportion of the returns selected in the current sample are from taxpayers whose previous years' returns were included in earlier samples. This longitudinal character of the sample design improves the estimates of change from one year to the next.

## Method of Estimation

As noted above, the probability with which a return is selected for inclusion in a sample depends on the sampling rate prescribed for the stratum in which it is classified. Weights are, in general, computed by dividing the count of returns filed for a given stratum by the count of sample returns for that same stratum. "Weights" are used to adjust for the various sampling rates used - the lower the rate, the larger the weight. For some studies, it is possible to improve the estimates by subdividing the original sampling classes into "post-strata," based on additional criteria or refinements of those used in the original stratification. Weights are then computed for these post-strata using additional population counts. The data on each return in a stratum are multiplied by that weight. To produce the tabulated estimates, these weighted data are summed to produce the published statistical totals.

## Sample rełurns are

 designated bycomputer from the IRS Master Files based on the taxpayer identificafion number.

# SOI Sampling Methodology and Data Limitations 

## Sampling Variability

The particular sample used in a study is only one of a large number of possible random samples that could have been selected using the same sample design. Estimates derived from the different samples
In transcribing and
tabulating data from tax returns, checks are imposed to
improve the quality of the statistics. usually vary. The standard error of the estimate is a measure of the variation among the estimates from all possible samples and is used to measure the precision with which an estimate from a particular sample approximates the average result of the possible
samples. The sample estimate and an estimate of its standard error permit the construction of interval estimates with prescribed confidence that this interval includes the actual population value.

In SOI reports the standard error is not directly presented. Instead, the ratio of the standard error to the estimate itself is presented in percentage form. This ratio is called the coefficient of variation (CV). The user of SOI data may multiply an estimate by its coefficient of variation to recreate the standard error and to construct confidence intervals.

For example, if a sample estimate of 150,000 returns is known to have a coefficient of variation of 2 percent, then the following arithmetic procedure would be followed to construct a 68 percent confidence interval estimate:

$$
\begin{aligned}
150,000 & \text { (sample estimate) } \\
\times 0.02 & \text { (coefficient of variation) } \\
=3,000 & \text { (standard error of estimate) }
\end{aligned}
$$

then:
150,000 (sample estimate)

+ or - 3,000 (standard error)
$=\{147,000,153,000\}$ ( 68 percent confidence interval).
Based on these data, the interval estimate is from 147 to 153 thousand returns. This means that the average estimate of the number of returns lies within an interval computed in this way. Such an estimate would be correct for approximately two-thirds of all possible samples similarly selected. To obtain this interval estimate with 95 percent confidence, the standard error should be multiplied by 2 before adding to and subtracting from the sample estimate. (In this particular case, the resulting interval would be from 144 to 156 thousand returns.)

Further details concerning sample design, sample selection, estimation method, and sampling variability for a particular SOI study may be obtained on request by writing the Director, Statistics of Income Division, at the address given above.

## Nonsampling Error Controls and Limitations

Although the previous discussion focuses on sampling methods and the limitations of the data caused by sampling error, there are other sources of error that may be significant in evaluating the usefulness of SOI data. These include taxpayer reporting errors, processing errors, and effects of an early cut-off of sampling. More extensive information on nonsampling error is presented in SOI reports, when appropriate.

In transcribing and tabulating the information from the returns or forms selected for the sample, checks are imposed to improve the quality of the resultant estimates. Tax return data may be disaggregated or recombined during statistical "editing" in order both to improve data consistency from return to return and to achieve definitions of the data items that are more in keeping with the needs of major users. In some cases not all of the data are available from the tax return as originally filed. Sometimes the missing data can be obtained through field follow-up. More often, though, they are obtained through imputation methods. As examples, other information in the return or in accompanying schedules may be sufficient to enable an estimate to be made; prior-year data for the same taxpayer may be used for the same purpose; or data from another return for the same year that has similar characteristics may be substituted. Research to improve methods of imputing data that are missing from returns continues to be an ongoing process [1].

Quality of the basic data abstracted from the returns is subjected to a number of quality control steps including 100 -percent key verification. The data are then subjected to many tests based on the structure of the tax law and the improbability of various data combinations: Records failing these tests are then subjected to further review and any necessary corrections are made. In addition, the Statistics of Income Division in the National Office conducts an independent reprocessing of a small subsample of statistically-processed returns as a further check [2].
Finally, before publication, all statistics are reviewed

## SOI Sampling Methodology and Data Limitations

for accuracy and reasonableness in light of provisions of the tax laws, taxpayer reporting variations, as well as limitations, economic conditions, comparability with other statistical series, and statistical techniques used in data processing and estimating.

## Tabular Conventions

Estimates of frequencies and money amounts that are considered unreliable due to the small sample size on which they are based are noted in SOI tables. The presence of the indicator means that the sampling rate is less than 100 percent of the population and that there are fewer than 10 sample observations available for estimation purposes.

A dash in place of a frequency or amount indicates that no sample return had that characteristic. In addition, a dash in place of a coefficient of variation for which there is an estimate indicates that all returns contributing to the estimate were selected at the 100 -percent rate.

Whenever a weighted frequency in a data cell is less than 3 , the estimate is either combined with other cells or deleted in order to avoid disclosure of information about individual taxpayers or businesses. These combinations and deletions are indicated in the tables.

## Motes

[1] See, for example, Hinkins, Susan M., "Matrix Sampling and the Effects of Using Hot Deck Imputation," in 1984 Proceedings of the American Statistical Association, Section on Survey Research Methods. Other research efforts are included in Statistical Uses of Administrative Records: Recent Research and

Present Prospects, Volume 1, Internal Revenue Service, March 1984.
[2] Quality control activities for all SOI studies are published from time to time in a series of separate reports. These reports provide detailed information relating to quality in all phases of SOI processing.

## Refarences

Reports that contain additional information about the samples include:
Statistics of Income-1994, Individual Income Tax Returns, (see especially pages 19-22).
Statistics of Income-1994, Corporation Income Tax Returns (see especially pages 7-14).
Statistics of Income-1994, Compendium of Federal Estate Tax and Personal Wealth Studies (see descriptions for selected articles).
Statistics of Income-1974-1987, Compendium of Studies of Tax-Exempt Organizations (see descriptions at the end of each chapter).
Statistics of Income-1986-1992, Compendium of Studies of Tax-Exempt Organizations, Volume 2 (see descriptions for selected articles).
Statistics of Income-1984-1988, Compendium of Studies of International Income and Taxes, Foreign Income and Taxes Reported on U.S. Tax Returns (see descriptions at the end of each chapter).
Statistics of Income Bulletin (see each issue).

## SOI Projects and Contacts

## General Statistical Information: (202) 874-0410 Fax: (202) 874-0964

| Planned Projects, Year* | Primary Anclysts | Frequency and Program Content |

Estate Tax:
1992-1994 Program Barry Johnson
1995-1997 Program

This annual study includes information on gross estate and its composition, deductions, and tax; and information on the age, sex, and marital status of decedents. Basic estate tax return data by year in which returns are filed are produced each year. Also included are data on nonresident aliens who had more than $\$ 60,000$ of assets in the United States. Other statistics are available on a year-of-death basis (approximately every 3 years). The most recent study is based on decedents who died in 1992 with returns filed in 1992-95.

Exempt Orgenizations (Cheritable and Other):
1994 Program Cecelia Hilgert 1995 Program

This annual study includes balance sheet and income statement data for organizations classfied as tax-exempt under subsections 501(c)(3)-(9) of the Internal Revenue Code. The most recent study is for Tax Year 1994.

Exempl Organizations (Private
Foundations):
1994 Program Paul Amsberger
1995 Program

This annual study includes balance sheet and income statement data for private foundations and charitable trusts filing a Form 990-PF. For the 1994 program only, the study will be based on the entire population of Form 990-PF returns. The most recent study is for Tax Year 1994.

## Exempt Orgenizations Urrelated

## Business inxomes

1994 Program Peggy Riley
1995 Program

This annual study includes tabulations of "unrelated business" income and deductions for organizations classified as tax-exempt under the Internal Revenue Code. The most recent study is for Tax Year 1994.

Individual Income Tax Rofumss
1994 Program
1995 Program
1996 Program

Michael Strudler
Maureen Keenan Kahr
Jeff Curry

Basic data are produced annually and cover income, deductions, tax, and credits reported on individual income tax returns and associated schedules. Data are classified by size of adjusted gross income.

Inforest-Charge Domestic
Intemational Salos Corporations
(IC-DISC):
1991 Program
1996 Program

These corporations replaced the Domestic International Sales Corporation, or DISC, as of 1985. Balance sheet, income statement, and export-related data are tabulated annually through 1987; thereafter, on a 4-year cycle.

Informafional Boycot Participations
1995 Program

Parinership . Withholding Studys 1995 Program

Chris Carson
_Barry Johnson
Martha Eller

This annual study includes data on U.S. partnership payments to foreign partners. Data are classified by country and recipient type.

| Personal Wealth Studys 1992 Program | Barry Johnson Martha Eller | This periodic study provides estimates of personal wealth of top wealthholders that are generated from estate. tax return data using the "estate multiplier" technique, in conjunction with both filing-year and year-of-death estate data bases. The most recent data (1992) are based on returns filed from 1992 to 1995. |
| :---: | :---: | :---: |
| S Corporations | Susan Wittman | Annual study data are collected for the income statement, balance sheet, and from supporting schedules. Data are classified by industry group or asset size. |

## Sales of Copital Assetss

1985 Program
1985-1996 Panel Study
Barbara Livingston
Janette Wilson Victor Rehula Mike Weber

This periodic study provides detailed data on the sales of capital assets reported on Schedule D of the individual income tax return, sales of residences, and personal or depreciable business property.

A panel study provides the same data on capital asset transactions, over a period of years for a subsample of returns in the Sales of Capital Assets basic study.

## Seles of US. Real Property Inferest by Foreign Persenss 1996 Program

## Sele Proprietorships:

1994 Program
1995 Program 1996 Program

This annual study provides data on transfers of U.S. real property interests, acquired from foreign persons. Data include the amount realized on transfers, U.S. tax withheld, and countries of foreign persons.

Michael Strudler

Basic data, produced annually, cover business receipts, deductions, and net income reported on Schedule C (for nonfarm proprietors), classified by industry group. Similar data from Schedule F (for farmers) are available on an occasional basis.

1995 Program $\quad$ Marvin Schwartz

Texpoyer Usege Siudy:
1996 Program
Mike Weber

US. Possessions Corporations:
1993 Program
1995 Program
Randy Miller
This annual study provides information on private activity and governmental bond issues by type of property financed, size of face amount, and State. The most recent studies are 1994 for Public Purpose Bonds and 1993 for Private Activity Bonds.

Basic data, produced annually, provide weekly frequencies of specific line entries made by taxpayers, the use of various return schedules and associated forms, and general characteristics of the individual taxpayer population for returns received during the primary filing season (January through April).

This periodic study, planned for every 2 years, provides data on income statements, balance sheets, tax, and "possessions tax credil" for "qualifying" U. S. possessions corporations. (Most of these corporations are located in Puerto Rico.)
*Most projects shown below are currently in progress and, therefore, may not yet be completed. Data release dates, i.e., the months in which we expect to release data to users, ahead of publication, upon request, are published annually in the Fall issue of the SOI Bulletin. For more information about data availability for a particular project, call or fax the numbers shown at the top of the page.

## SOI Products \& Services

Statistics of Income (SOI) information is available in publication and electronic formats -- such as computer tapes and diskettes, as well as through the SOI electronic bulletin board and the IRS homepage on the Internet. These products and services are described below along with information on how to obtain them.

## Statistical Information Services

For questions on the availability of SOI data, other statistical services, or release dates for new publications, please contact Statistical Information Services (SIS) on:

Voice: (202) 874-0410
Fax: (202) 874-0964
e-mail: soi.sis@wpgate.irs.gov.
Media requests, however, should be directed to the IRS Media Relations Branch, Communications Division, on (202) 622-4000.

As its name implies, SIS is best able to answer questions about data. It does not supply tax forms or information about the status of an individual's tax refund or audit examination.

## SOI Data on the Internet

The IRS World Wide Web site provides another option for accessing SOI data. At present, nearly 800 files reside on Tax_Stats (the SOI homepage), covering data similar to that on the SOI electronic bulletin board system (BBS). The main difference between the two is that the BBS includes more information from individual income tax returns, including migration flow and county income data, and is more current. Also, none of the files for sale on the BBS is available on the Web site. To access SOI files on the Web site, look for us at:
http://www.irs.ustreas.gov/prod/tax_stats/index.html.
At the Tax_Stats site, you will find data on the following:

- Individuals
- Corporations
- Partnerships
- Exempt Organizations
- Estates/Wealth
- International Income and Taxes
- Sole Proprietorships
- Excise Taxes
- Other SOI Information
- About SOI
- Other IRS Information.

## SOI Electronic Bulletin Board

The BBS provides access to over 1,200 files. They include data from recent SOI Bulletins on returns covering individuals, corporations, partnerships, sole proprietorships, exempt organizations, and estates. The BBS also contains files on projections, excise taxes, personal wealth, and international topics, such as foreign tax credits and Controlled Foreign Corporations, as well as tax collections and refunds from the IRS administrative system:

Certain data files on the BBS, however, are only available on a reimbursable basis. After access is provided, you will be able to download them by calling (202) 874-9574. Most of these files will be tabulations of aggregated data, but some will be files of microdata records.

For orders of $\$ 300$ or less, access to your requested files will be given within two business days from the time we receive your order form. For orders over this amount, access will be given after we receive payment. You will have access to your requested files for at least one year from the time of your request.

To order any of these files, you may: (1) write to Statistical Information Services (SIS), Statistics of Income Division (CP:R:S:S:P), P.O. Box 2608, Washington, DC 20013-2608; (2) send a FAX to SIS on (202) 874-0964; or (3) e-mail us at soi.sis@wpgate.irs.gov. An order form is provided at the end of this Bulletin and must be completed when placing an order.

## Files Currently Available

The following files are currently available on a reimbursable basis.

## Individual Income Tax Returns, State Data <br> Product Code: 95INALST, Price: $\$ 200$ <br> Time Period Covered: Tax Year 1995

Type of File: One table, based on the population of returns from the IRS Individual Master File system. This table presents data by state (and for the U.S. total) and by size of adjusted gross income. The data include number of returns and exemptions, adjusted gross income (total and for selected sources), itemized deductions (total and for
selected types), taxable income, tax liability, and the earned income credit.
Formats: Excel version 4, Lotus 123 version 1a, ASCII text

## Individual Income Tax Returns, County-toCounty Migration Data

Product Code: 96MIALCC, Price: $\$ 250$
Time Period Covered: Filing Years 1995 to 1996
Type of File: One table, based on the year-to-year changes in the addresses shown on the population of returns from the IRS Individual Master File system. This table presents data on migration patterns by county for the entire United States, including inflows and outflows. The data include number of returns (which can be used to approximate the number of households), number of personal exemptions (which can be used to approximate the population), total "money income," and median "money income."
Formats: Excel version 4, Lotus 123 version 1a, ASCII text, Word Perfect
See also Other Reimbursable Services section.

## Individual Income Tax Returns, County-toCounty Migration Data

Product Code: 95MIALCC, Price: $\$ 100$
Time Period Covered: Filing Years 1994 to 1995
Type of File: See 96MIALCC above.
Formats: Excel version 4, Lotus 123 version la, ASCII
text
See also Other Reimbursable Services section.

## Individual Income Tax Returns, County-toCounty Migration Data

Product Code: 94MIALCC, Price: $\$ 100$
Time Period Covered: Filing Years 1993 to 1994
Type of File: See 96MIALCC above.
Formats: Excel version 4, Lotus 123 version 1a, ASCII text See also Other Reimbursable Services section.

## Individual Income Tax Returns, State-to-State Migration Data

Product Code: 96MIALSS, Price: $\$ 50$
Time Period Covered: Filing Years 1995 to 1996
Type of File: One table, based on the year-to-year changes
in the addresses shown on the population of returns from the IRS Individual Master File system. This table presents data on migration patterns by state for the entire United States, including inflows and outflows. The data include number of returns (which can be used to approximate the number of households), number of personal exemptions (which can be used to approximate the population), total
"money income," and median "money income."
Formats: Excel version 4, Lotus 123 version 1a, ASCII text
See also Other Reimbursable Services section.

## Individual Income Tax Returns, County Income Data

Product Code: 95INALCO, Price: $\$ 50$
Time Period Covered: Tax Year 1995
Type of File: One table, based on the population of returns from the IRS Individual Master File system. This table presents data for total "money income," adjusted gross income (total and for selected sources), number of returns (which can be used to approximate the number of households), and number of personal exemptions (which can be used to approximate the population). The data are presented by county (including state totals).
Formats: Excel version 4, Lotus 123 version 1a, ASCII text, Word Perfect
See also Other Reimbursable Services section.

## Individual Income Tax Returns, Complete Report

Product Code: 94INALCR--all 20 tables,
94IN01CR--9 tables, covering number of returns filed and sources of income,
94IN02CR-5 tables, covering exemptions and itemized deductions, or
94IN03CR-6 tables, covering tax computations.
Price: $\$ 225$ for 94 INALCR, or $\$ 75$ for $94 I N 01 C R$, 94IN02CR, or 94IN03CR. (See "Product Code" above.)
Time Period Covered: Tax.Year 1994
Type of File: Tables, based on SOI samples, weighted to estimate the population. Various tables present data by size of adjusted gross income, marital status, or type of tax computation.
Formats: Excel version 4, Lotus 123 version 1a, Adobe Acrobat PDF

## Corporation Income Tax Returns, Complete Report

Product Code: 93COALCR, Price: $\$ 225$
Time Period Covered: Tax Year 1993
Type of File: Tables, based on SOI samples weighted to estimate the population. Various tables include data on balance sheet, income statement, and tax items. Tables also include selected subjects, such as " $S$ " corporations. The data are presented by selected variables, such as industry, ending accounting periods, and sizes of total assets, business receipts, and total income tax after credits.

## SOI Products \& Services

Formats: Excel version 4, Lotus 123 version 1a, ASCII text, WordPerfect

## Exempt Organizations

Product Code: 94EOALMD, Price: $\$ 300$
Time Period Covered: Reporting Year 1994
-Type of File:- Microdata records of all Forms 990 and 990EZ sampled for the annual SOI study of tax exempt organizations. The sample includes approximately 11,100 IRC section 501 (c)(3) organizations and $8,500 \mathrm{IRC} \mathrm{sec}$ tion 501(c)(4)-(9) organizations. Sampling rates ranged from less than 1 percent for small asset classes to 100 percent for large asset classes (i.e., those with assets of $\$ 10$ million or more). Microdata records contain information on balance sheets and income statements, as well as.. weights (to estimate the population), for each exempt organization.
Formats: Excel version 4, Lotus 1-2-3 version 1a, ASCII text, Adobe Acrobat PDF

## Exempt Organizations

Product Code: 93EOALMD, Price: $\$ 200$
Time Period Covered: Reporting Year 1993
Type of File: Microdata records of all Forms 990 and 990EZ sampled for the annual SOI study of tax exempt organizations. The sample inclüdes approximately 11,900 IRC section 501 (c)(3) organizations and 8,100 IRC section 501 (c)(4)-(9) organizations. Sampling rates ranged from less than 1 percent for small asset classes to 100 percent for large asset classes. (i.e., those with assets of $\$ 10$ million or more). Microdata records contain information on balance sheets and income statements, as well as weights (to estimate the population), for each exempt organization.
Formats: Excel version 4, Lotus 1-2-3 version la, ASCII text, Adobe Acrobat PDF

## Private Foundations (and Charitable Trusts)

Product Code: 94PFALMD, Price: $\$ 300$
Time Period Covered: Reporting Year 1994
Type of File: Microdata records of all Forms 990-PF sampled for the annual SOI study of private foundations and IRC section 4947(a)(1) charitable trusts. The file contains both operating and nonoperating foundations and trusts. It includes approximately 51,000 returns, which represent all of the 1994 PF returns filed and processed through early-May 1997. SOI intends to continue processing 1994PF's through December 1997 to capture all returns filed over the three-year period, which began in

January 1995. Anyone who purchases the "early-May 1997" file will obtain free access to the "December 1997" file when it becomes available. Microdata records contain information on revenue, expenses, assets, and distributions for each foundation or trust.
Formats: Excel version 4, ASCII text, Adobe Acrobat PDF

## Private Foundations (and Charitable Trusts)

Product Code: 93PFALMD, Price: $\$ 200$
Time Period Covered: Reporting Year 1993
Type of File: Microdata records of all Forms 990-PF sampled for the annual SOI study of private foundations and Internal Revenue Code (IRC) section 4947(a)(1) charitable trusts. The file contains both operating and nonoperating foundations and trusts.. The sample includes approximately 5,200 returns. Sampling rates ranged from 3 percent for small asset classes to 100 percent for large asset classes. Microdata records contain information on revenue, expenses, assets, and distributions, as well as weights, for each foundation or trust.
Formats: Excel version 4, ĀSCII text, Adobe Acrobat PDF

## Files Available in the Future

The following file will be available on a reimbursablebasis in the future. Please check back with us to see when it is ready.

## Corporation Income Tax Returns, Complete Report

Product Code: 94COALCR, Price: to be announced Time Period Covered: Tax Year 1994
Type of File: Tables, based on SOI samples weighted to estimate the population. Various tables include data on balance sheet, income statement, and tax items. Tables also include selected subjects, such as " S " corporations. The data are presented by selected variables, such as industry, ending accounting periods, and sizes of total assets, business receipts, and total income tax after credits. Formats: to be announced
Estimated Availability: September 1997

## SOI Publications \& Tapes

The following Statistics of Income reports and tapes can be purchased from SOI. Prepayment is required for orders of $\$ 100$ or more, with checks made payable to the IRS Accounting Section. Please write:

## SOI Products \& Services

or contact SIS directly, as indicated above.

## Corporation Source Book, 1994

Publication 1053 -- Price: \$175, plus $\$ 10$ for shipping and handling

This 517-page document presents detailed income statement, balance sheet, tax, and selected items, by major and minor industrial groups and size of total assets, for all returns and separately for returns with net income. The report, which underlies the Statistics of Income -- Corporation Income Tax Returns publication, is part of an annual series and can be purchased in its entirety or by page. Corporation Source Book industry pages and notes for any year are available at a cost of $\$ 30$, plus $\$ 1$ per page copying charge (free for orders under 5 pages). (The Source Book is also available on 35 mm microfilm for $\$ 175$, plus \$10 for shipping and handling, for years from 1982-1992. Issues prior to 1982 are for sale at $\$ 150$ per year, plus $\$ 10$ for shipping and handling.) A magnetic tape or diskettes containing the tabular statistics for 1994 can be purchased for $\$ 1,500$.

## Studies of Tax-Exempt Organizetions, 1974-1987

Publication 1416 -- Price: $\$ 26$, plus $\$ 10$ for shipping and handling
This publication presents 22 articles from Statistics of Income studies on tax-exempt organizations. These articles, which emphasize important issues within the nonprofit sector, also appeared in the SOI Bulletin or in proceedings of the American Statistical Association and the Independent Sector Research forum. Topics include:

- nonprofit charitable organizations (primarily charitable, educational, and health organizations);
- private foundations and charitable trusts; and
- unrelated business income of exempt organizations.

## Studies of Tax-Exempt Organizotions, 1986-1992

Publication 1416 -- Price: $\$ 26$, plus $\$ 10$ for shipping and handling

This is the second volume in a series of SOI publications on tax-exempt, nonprofit organizations. It includes data covering 1986-1992 and contains 12 previously published
articles from SOI studies, including the SOI Bulletin, as well as papers prepared for the Journal of Nonprofit Management Sector Research Forum, the National Research Council's Committee on National Statistics, and the American Statistical Association.

Stedies of International Income and Taxes, 19841988<br>Publication 1267 -- Price: $\$ 26$, plus $\$ 10$ for shipping and handling

This report presents information from 13 SOI studies in the international area (many of them previously published in the SOI Bulletin), including:

- foreign activity of U.S. corporations;
- activity of foreign corporations in the United States; - foreign-controlled U.S. corporations; - statistics related to individuals, trusts, and estates; and - data presented by geographical area or industrial activity, as well as other classifiers.

## Compondium of Foderal Estate Tax and Personal Wealth Studios <br> Publication 1773 -- Price: $\$ 26$, plus $\$ 10$ for shipping and handling

Part I of this report focuses on data from estate tax returns, describing decedents, their beneficiaries, and the composition of their estates. It contains a methodological discussion of the strategy used in weighting sample data for the estate studies and presents statistics on selected components of decedents' estates, 1916-1990. Information on charitable giving is also included.

Part II presents a series of articles describing the estatemultiplier technique and its applications for personal wealth estimates, estimates of personal wealth for selected years 1962-1989, as well as a discussion of the relationship among realized income, wealth, and well-being.

## Turuing Administrative Systems Inte Information Systoms--1995

Publication 1299--Price: Free, except for $\$ 10$ for shipping and handling

This is the fourth volume in the current IRS methodology reports series, which documents technological and methodological changes in SOI programs and other related statistical uses of administrative records. (The series previously released 10 volumes under the title Statistics of Income and Related Administrative Record Research.) This year's

## SOI Products \& Services

compilation has been divided into five major sections, each focusing on a somewhat different area of research:

- description of SOI migration data;
- sample designs and redesigns;
- weighting and estimation research;
-analytical approaches to quality-improvement; and
- record linkage applications for health care policy.

## Individual Public-Use Magnetic Tape Miarodata Files

 Entire United States: \$2,150 (no identifiable data) Per State: $\$ 4,000$ (state tax authorities only; has identifiable data)These files include individual income tax returns for $1979-$ 1992. A limited number of files for 1989 are also available on CD-ROM. (Individual income tax returns for 1966-1978 are available for sale by writing to the Center for Electronic Records (NNX) of the National Archives and Records Administration, Washington, DC 20408.) Files containing more limited data for each State are also available for 1985 and 1988. All of these files have been edited to protect the confidentiality of individual taxpayers.

## Exempt Organizations (Forms 990 and 990EZ) Magnetic Tape Microdata Files <br> Any year: $\$ 450$ per year

Files for nonprofit charitable organizations for 1982-1983 and 1985-1994 are available.
See also the SOI Electronic Bulletin Board section.
Private Foundations (and Charilable Trusts) (Form 990-PF) Magnetic Tape Microdata Files
Any year: $\$ 400$ per year
Files for private foundations for 1982-1983 and 19851994 are available.
See also the SOI Electronic Bulletin Board section.

## SOI Publications Available from GPO

The following SOI publications are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC, by calling (202) 512-1800. They may also be obtained by using the order form at the end of this Bulletin or write:

> Superintendent of Documents
> P.O. Box 371954
> Pittsburgh, PA 15250-7954.

If you determine from the Government Printing Office that any of the next three items is out of print, please telephone the SIS on (202) 874-0410 for assistance.

## Statistics of Income (SOI) Bulletin <br> Quarterly, Publication 1136, Stock No. 748-005-00000-5 

This series provides the earliest published financial statistics from individual and corporation income tax returns. The Bulletin also includes annual data on nonfarm sole proprietorships and partnerships, as well as from periodic or special studies of particular interest to tax analysts and administrators and to economists. Historical tables include data from SOI, as well as on tax collections and refunds by type of tax.

## Statistics of Income--1994, Corporation Income Tax Refurns

Publication 16, Stock No. 048-004-02386-5
Price: $\$ 17$
This report presents more comprehensive data on corporation income tax returns with accounting periods that ended July 1994 through June 1995 than those published earlier in the SOI Bulletin:

Presents information on: Classifies data by:

- receipts;
- industry;
- deductions; a accounting period;
- net income; - size of total assets;
- taxable income; and
- income tax; - size of business receipts.
- tax credits;
- assets; and
- liabilities.

## Statistics of Income -- 1994,

 Individual Income Tax ReturnsPublication 1304, Stock No. 048-004-02377-6

## Price $\$ 14$

This report presents more comprehensive and complete data on individual income tax returns for 1994 than those published earlier in the SOI Bulletin.
Presents information on:
Classifies data by:

- sources of income;
- exemptions;
- itemized deductions; and
- size of adjusted gross income; and
- marital status.
- tax computations.

## SOI Products \& Services

## Other Reimbursable Services

The following SOI products are also available for sale in electronic or other formats. (Data availability and prices are subject to change and were most recently revised in July 1997.)

## County-fo-County Migration Data

Price for diskettes: Any year, 1984-1996-\$375 per year (entire United States); $\$ 50$ per year (single state)

Compilations are available showing migration patterns, from where to where, by county, based on year-to-year changes in the individual income tax return address. Selected data are available (according to the years in which the returns were filed) for all years between 1984 and 1996 and include counts of the number of returns and the number of personal exemptions (which can be used to approximate population). Tabulations are also available as hard copy for all years between 1978 and 1996 at $\$ 5$ per county (for inflows) and $\$ 5$ per county (for outflows), plus $\$ 30$ handling fee per order.
See also the SOI Electronic Bulletin Board section.

## State-to-State Migration Data

Price for diskettes: Any year, 1989-1996-\$75 per year (entire United States)

Compilations are available showing migration patterns, from where to where, by state, based on year-to-year changes in the individual income tax return address. Selected data are available (according to the years in which the returns were filed) for all years between 1989 and 1996 and include counts of the number of returns and the number of personal exemptions (which can be used to approximate population). Tabulations are also available as hard
copy for all years between 1986 and 1996 at $\$ 5$ per state (for inflows) and $\$ 5$ per state (for outflows), plus $\$ 30$ handling fee per order.
See also the SOI Electronic Bulletin Board section.

## County Income Data

Price for diskettes: Any year, 1989-1995-\$75 per year (entire United States)

Tables present adjusted gross income by source and number of personal exemptions (which can be used to approximate population) reported on individual income tax returns for Income Years 1989 through 1995. Data are also available as hard copy for all years between 1988 and 1995 at $\$ 10$ per state, plus $\$ 30$ handling fee per order. See also the SOI Electronic Bulletin Board section.

## ZIP Code Area Deta

Price: $\$ 2,000$ (entire United States); $\$ 40$ single state
Statistics are available for Income Year 1991 only, either on computer tape or diskette, showing the number of individual income tax returns, the number of personal exemptions (which can be used to approximate population), adjusted gross income, and income tax, by 5 -digit ZIP Code.

## Other Unpublished Tabulations

## Price depends on the request

Unpublished tabulations are also available, including detailed tables underlying those published in the SOI Bulletin. Special tabulations may also be produced, depending on the availability of resources.

## Announcing Latest IRS <br> Report of <br> Corporation Income Tax Statistics

Statistics of Income - 1994, Corporation Income Tax Returns, Publication 16, is an annual report which provides aggregate corporate statistics on the following:

| - receipts | - tax credits |
| :--- | :--- |
| - deductions | - income tax |
| - net income | - assets, and |
| - taxable income | - liabilities. |

The items are formatted in tables and categorized by industry, size of total assets, size of business receipts, size of income tax after credits, by accounting period ended, and by other selected variables. The data are based on a stratified random sample of approximately 91,000 unaudited returns in the Forms 1120 series, selected from nearly 4.4 million active corporate returns filed for the 1994 Income Year -- defined to include accounting periods which ended between July 1994 and June 1995. They provide unique information on corporation income and taxes for economic research and analysis.

The 212-page report is available for sale through the Government Printing Office -- stock number 048-004-02386-5. If this (or any other) SOI report is out of print, contact SOI's Statistical Information Services Office - at (202) 874-0410 - for assistance.

[^14]:    Sarah E. Nutter is a visiting Assistant Professor at George Mason University. This article was prepared under the direction of Tom Petska, Chief, Special Studies and Publications Branch.

[^15]:    ${ }^{1}$ For 1993, foreign-source taxable income is reported as "foreign taxable income (less loss) before adjustments," in Table 1, column 37, at the end of this article.
    ${ }^{2}$ Foreign-source taxable income (column 3) divided by income subject to U.S. tax (column 2). Wordwide taxable income is equal to U.S. income subject to tax.
    ${ }^{3}$ For 1993, current-year foreign taxes are reported as "toreign taxes paid, accrued, and deemed paid," in Table 1, column 43, at the end of this article.
    ${ }^{4}$ Current-year foreign taxes (column 5) divided by foreigr-source taxable income (column 3).
    ${ }^{5}$ Foreign tax credit (column 7) divided by current-year foreign taxes (column 5).
    ${ }^{6}$ Because limited data were collected for 1988 and 1991, the amount of foreign-source taxable income (column 3) reported is after adjustments, such as for allocations of current-year U.S.-source losses and recapture of foreign losses. Foreign-source taxable income shown for all other years is before these adjustments.

[^16]:    NOTE: .Detail may not add to totals because of rounding
