

Title: **Addressing Challenges to Oyster Reef and Fishery Habitat Enhancement in Coastal Alabama**

Date/Location: Wednesday, 24 September 2008, 12:30 - 13:30 ETZ ([SSMC-3](#), Room 15836, NOAA [Fisheries Restoration Center](#))

Speaker(s): [Dr. Bob Shipp](#) (Professor and Chair of the Department of Marine Sciences, University of South Alabama) and [Dr. Sean Powers](#) (University of South Alabama)

Abstract: The seminar will present conservation, restoration and research findings of the Mobile Bay Oyster Enhancement Program (a partnership between NOAA Restoration Center and University of South Alabama). The discussion will focus on preliminary results from a comprehensive watershed assessment of the condition of shellfish reefs in Mobile Bay, site-specific observations about shellfish conservation and oyster restoration projects done in collaboration with NOAA, and the success of artificial reef fishery habitat enhancement projects in Mobile Bay, Alabama.

Remote Access & Notes: This seminar will be available via webcast (Details [PDF](#)). For questions about this seminar please contact [Craig A. Woolcott](#) [[NOAA Fisheries Restoration Center](#) (301) 713-0174 Ext 163].

Download Presentation(s): TBD
