

- Title:** **Climate Change and Arctic Fisheries**
- Date/Location:** Tuesday 21 October 2008; 15:00-16:00h ETZ ([SSMC-3](#), Room 15836, [NMFS](#) seminar)
- Speaker(s):** [Dr. Michael Sigler](#) (NOAA Alaska Fisheries Science Center, Juneau, Alaska)
- e-mail(s):** Mike.Sigler@noaa.gov
- Abstract:** Fish harvests in the Arctic Ocean are small, yet the largest U.S. commercial fisheries lie immediately south in the Bering Sea. Some fish and crabs have moved northward. This trend is predicted to continue. A draft Arctic FMP sets science, sustainability and community criteria for opening new Arctic fisheries.
- Remote Access & Notes:** There will be no remote access to this seminar. For further information about this seminar please contact Ned.Cyr@noaa.gov.
- About the speaker(s):** http://www.afsc.noaa.gov/HEPR/staff/heprProfile_Sigler.htm
- Download Presentation(s):** TBD
- Seminar Added:** [OneNOAA Science Seminar](#) added Wednesday, October 8, 2008 6:54 AM
