Subject: MSHA hearing

As I mentioned, my client Eric Goplerud, a research scientist who specializes in alcohol problems among the workforce and in the importance of screening and treatment, is interested in speaking at the MSHA hearing scheduled next week in Virginia on the health and safety problems created by alcohol and other drugs.

First, I wanted to alert you to the work we've done in the specific area of the mining industry, captured in the following recent release: **Construction and Mining, Wholesale, Retail Top List of Industries With Problem Drinkers in the Workforce**
<http://www.ensuringsolutions.org/pages/031605.html>

The release was generated by a unique tool put together by Ensuring Solutions, the **Alcohol Cost Calculator for Business**
<http://www.alcoholcostcalculator.org/business/>

And here is more about Ensuring Solutions: **Ensuring Solutions to Alcohol Problems**
<http://www.ensuringsolutions.org/>
