

THE HOSPITAL OF THE ROCKEFELLER INSTITUTE  
FOR MEDICAL RESEARCH  
66TH STREET AND YORK AVENUE, NEW YORK 21, N. Y.

January 5, 1946

Dr. Wendell M. Stanley  
Rockefeller Institute  
Princeton, New Jersey

Dear Dr. Stanley:

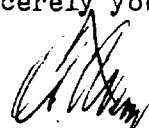

In regard to the meeting of the American Chemical Society at Atlantic City April 12, I am very happy to say that Dr. McCarty has agreed to present our work on the transformation of pneumococcal types.

The title of the paper might read as follows: "Chemical Nature of Substance Inducing Transformation of Pneumococcal Types," by Maclyn McCarty. While I appreciate the spirit in which you write, I feel it would be quite superfluous for my name to appear on the program.

I have not yet received from Dr. Brand any further details regarding the preparation of an abstract or plans for publication. The tentative program looks interesting, and I am sure the meeting will be both interesting and successful.

With kindest regards,

Sincerely yours,

Oswald T. Avery, M.D.
