1966

VOLUME III—MARRIAGE AND DIVORCE

U.S. DEPARTMENT OF  
HEALTH, EDUCATION, AND WELFARE  
PUBLIC HEALTH SERVICE

HEALTH SERVICES AND MENTAL HEALTH ADMINISTRATION  
NATIONAL CENTER FOR HEALTH STATISTICS

Washington: 1969

## NATIONAL CENTER FOR HEALTH STATISTICS

THEODORE D. WOOLSEY, *Director*

PHILIP S. LAWRENCE, Sc.D., *Associate Director*

OSWALD K. SAGEN, Ph.D., *Assistant Director for Health Statistics Development*

WALT R. SIMMONS, M.A., *Assistant Director for Research and Scientific Development*

ALICE M. WATERHOUSE, M.D., *Medical Consultant*

JAMES E. KELLY, D.D.S., *Dental Advisor*

EDWARD E. MINTY, *Executive Officer*

MARGERY R. CUNNINGHAM, *Information Officer*

## DIVISION OF VITAL STATISTICS

ROBERT D. GROVE, Ph.D., *Director*

ROBERT A. ISRAEL, M.S., *Deputy Director*

ROBERT A. ISRAEL, M.S., *Acting Chief, Mortality Statistics Branch*

JOHN E. PATTERSON, *Chief, Natality Statistics Branch*

LOREN E. CHANCELLOR, *Chief, Registration Methods Branch*

ALICE M. HETZEL, *Chief, Marriage and Divorce Statistics Branch*

ARNE B. NELSON, M.A., *Chief, Vital Records Survey Branch*

MICHAEL J. ZUGZDA, *Chief, Statistical Resources Section*

## VITAL STATISTICS OF THE UNITED STATES, 1966

### VOLUME III—MARRIAGE AND DIVORCE

A brief summary of the contents for each section is listed below for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

#### Section 1. Marriages

For the United States:

- National trend data.
- Marriage totals and rates for each State, division, and region.
- Marriage totals for each county or county equivalent.
- Monthly marriage totals for each State, division, and region.

For the marriage-registration area:

- Marriages classified by major demographic characteristics of bride and groom and by characteristics of marriages performed in each participating State; marriage rates specific for sex, age, and marital status.

#### Section 2. Divorces

For the United States:

- National trend data.
- Divorce totals and rates for each State, division, and region.
- Divorce totals for each county or county equivalent.
- Trend of national totals of children involved in divorce.

For the divorce-registration area:

- Divorces classified for each participating State by major demographic characteristics of husband and wife, characteristics of their marriage, and number of children.

#### Section 3. Technical Appendix

Historical and contemporary sources of marriage and divorce statistics, design of the samples of marriages and divorces and annulments, variability of sample estimates, and uniformity and completeness of the reporting forms and the collected data. Tables of population estimates used as bases for rates.

# Section 1. Marriages

Table	Page
1-1. Estimated number of marriages and marriage rates with percent changes from preceding year: United States, 1920-66, and marriage-registration area, 1957-66-----	1-5
1-2. Estimated marriage rates per 1,000 men and women 15 years of age and over: United States, 1940-66-----	1-5
1-3. Estimated marriage rates per 1,000 unmarried women 15 years of age and over and 15-44 years of age: United States, 1940-66-----	1-5
1-4. Estimated number of marriages and marriage rates by month, with and without seasonal adjustments: United States, 1958-66-----	1-6
1-5. Marriages and marriage rates: United States, each region, division, and State, 1962-66--	1-7
1-6. Marriages by month: United States, marriage-registration area, each region, division, and State, 1966-----	1-8
1-7. Marriage rates by previous marital status and age: Marriage-registration area, 1966---	1-9
1-8. Median and first and third quartiles of age at marriage for brides and for grooms, by previous marital status of each partner: Marriage-registration area, 1966-----	1-9
1-9. Median and mean age of bride and groom, by specified age of spouse at first marriage of both: Marriage-registration area, 1966-----	1-10
1-10. Percentage distribution of marriages by previous marital status of bride and groom: Marriage-registration area and each registration State, 1966-----	1-10
1-11. Percentage distribution of marriages by marriage order of bride and groom, by color: Marriage-registration area and each registration State, 1966-----	1-11
1-12. Percentage distribution of marriages by month marriage performed, by marriage order and color of bride and groom: Marriage-registration area, 1966-----	1-11
1-13. Percentage distribution of marriages by resident status of bride and groom in State where married: Marriage-registration area and each registration State, 1966-----	1-12
1-14. Percentage distribution of all marriages, first marriages, and remarriages of bride and groom by age at marriage, and median age: Total of 22 selected States, 1957-66-----	1-13
1-15. Marriages by marriage order, age, and color of bride and groom: Marriage-registration area, 1966-----	1-14
1-16. Remarriages by age, previous marital status, and color of bride and groom: Marriage-registration area, 1966-----	1-14

1-17. Marriages by marriage order and age of bride and groom: Each marriage-registration State, 1966-----	1-15
1-18. Marriages by age of bride, by age of groom: Marriage-registration area, 1966-----	1-18
1-19. First marriages of both bride and groom, by age of bride, by age of groom: Marriage-registration area, 1966-----	1-18
1-20. Marriages by age and previous marital status of bride, by age of groom (all grooms and single grooms): Marriage-registration area, 1966-----	1-19
1-21. Marriages by age and previous marital status of groom, by age of bride (all brides and single brides): Marriage-registration area, 1966-----	1-20
1-22. Marriages by age of widowed and divorced brides, by age of widowed and divorced grooms: Marriage-registration area, 1966-----	1-21
1-23. Marriages by age of white bride and groom and by age of nonwhite bride and groom: Marriage-registration area, 1966-----	1-21
1-24. Marriages by previous marital status and color of bride and of groom: Marriage-registration area and each registration State, 1966-----	1-22
1-25. Marriages by number of this marriage of bride and of groom: Marriage-registration area and each registration State, 1966-----	1-24
1-26. Marriages by previous marital status of white and nonwhite brides and grooms: Marriage-registration area, 1966-----	1-24
1-27. Marriages by marriage-order and age of bride and groom, by month marriage performed: Marriage-registration area, 1966-----	1-25
1-28. Marriages by marriage order and color of bride and groom, by month marriage performed: Marriage-registration area, 1966-----	1-26
1-29. Marriages by day of week marriage performed: Marriage-registration area and each registration State, 1966-----	1-26
1-30. Marriages by resident status of bride and of groom in State where married: Marriage-registration area and each registration State, 1966-----	1-27
1-31. Marriages by marriage order and age of bride and groom, by resident status of bride and groom in State where married: Marriage-registration area, 1966-----	1-28
1-32. Marriages by marriage order and age of bride and groom, by resident status in State where married: Marriage-registration area, 1966-----	1-30
1-33. Marriages by previous marital status of bride and groom, by resident status in State where married: Marriage-registration area and each registration State, 1966-----	1-31
1-34. Marriages: United States, each State and county, 1966-----	1-36

## Sampling Variability of the Marriage Statistics

In the tables which present statistics based on data from probability samples of marriage records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 3-6 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown in the table.

	<i>Minimum useful figure</i>		<i>Minimum useful figure</i>
Marriage-registration area -----	175	Massachusetts -----	100
Alabama -----	100	Michigan -----	225
Alaska -----	10	Mississippi -----	50
California -----	225	Montana -----	15
Connecticut -----	50	Nebraska -----	50
Delaware -----	10	New Hampshire -----	15
District of		New Jersey -----	100
Columbia -----	15	New York (including	
Florida -----	100	N.Y.C.) -----	225
Georgia -----	225	North Carolina -----	100
Hawaii -----	15	Ohio -----	225
Idaho -----	50	Oregon -----	50
Illinois -----	225	Pennsylvania -----	225
Indiana -----	100	Rhode Island -----	15
Iowa -----	50	South Dakota -----	15
Kansas -----	50	Tennessee -----	100
Kentucky -----	100	Utah -----	15
Louisiana (including		Vermont -----	10
New Orleans) -----	50	Virginia -----	100
Maine -----	15	West Virginia -----	50
Maryland -----	100	Wisconsin -----	100
		Wyoming -----	10

## SECTION 1 - MARRIAGES

Table 1-4. Estimated Number of Marriages and Marriage Rates by Month, With and Without Seasonal Adjustments:  
United States, 1958-66

[Rates on an annual basis per 1,000 estimated population for specified month. The number and rates of marriages by month adjusted for seasonal variation are the figures that would have occurred during the month if the characteristic seasonal pattern of marriages observed during the years 1958-66 had been eliminated]

Item and year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
<b>NUMBER OF MARRIAGES</b>

Table 1-7. Marriage Rates by Previous Marital Status and Age: Marriage-Registration Area, 1966

[Based on sample data; for frequencies, see tables 1-15 and 1-16; for population bases, see table 3-14, Section 3. Rates per 1,000 population in specified group. Rates for all marriages are based on unmarried population, those for first marriages are based on single population, and those for remarriages are based on widowed and divorced population. Figures for widowed and divorced, but not for all remarriages, exclude data for Michigan and Ohio. All marriages include previous marital status not stated; all remarriages include widowed or divorced not stated]

Previous marital status and age	Bride	Groom
<b>ALL MARRIAGES</b>		
14 years and over	63.9	76.3
14-17 years	25.4	3.1
18-19 years	163.0	73.8
20-24 years	261.6	195.1
25-44 years	122.7	162.6
45-64 years	20.0	51.7
65 years and over	2.3	14.1
Median age	21.5	23.8
Mean age	25.2	28.0
<b>FIRST MARRIAGES</b>		
14 years and over	65.0	69.4
14-17 years	25.1	3.1
18-19 years	159.9	73.0
20-24 years	247.9	187.9
25-44 years	92.8	122.4
45-64 years	9.7	13.8
65 years and over	1.0	3.5
Median age	20.3	22.6
Mean age	21.5	24.0
<b>ALL REMARRIAGES</b>		
14 years and over	34.2	110.1
14-24 years	473.3	534.7
25-44 years	156.7	322.2
45-64 years	23.4	98.1
65 years and over	2.4	17.7
Median age	35.2	39.2
Mean age	37.6	41.6
<b>WIDOWED</b>		
14 years and over	10.0	39.8
14-44 years	77.8	193.8
45-64 years	15.7	75.6
65 years and over	2.1	16.9
Median age	50.2	57.9
Mean age	49.7	57.0
<b>DIVORCED</b>		
14 years and over	130.0	210.8
14-24 years	492.7	518.0
25-44 years	190.7	344.3

## SECTION 1 - MARRIAGES

1-13

Table 1-14. Percentage Distribution of All Marriages, First Marriages, and Remarriages of Bride and Groom by Age at Marriage, and Median Age: Total of 22 Selected States, 1957-66

[Selected States are Alabama, Alaska, Connecticut, Delaware, Georgia, Hawaii, Idaho, Iowa, Kansas, Maine, Maryland, Michigan, Montana, New Hampshire, New York,<sup>1</sup> Oregon, South Dakota, Tennessee, Utah, Vermont, Virginia, and Wyoming. For 1957-59, basic data are counts of marriages supplied by each State. For 1960-66, data are based on samples. Figures for all marriages include marriage order not stated]

Age and marriage order of bride and groom	1966	1965	1964	1963	1962	1961	1960	1959	1958	1957

<sup>1</sup>Data are estimated.<sup>2</sup>"Districts" shown are election districts, the nearest equivalent to counties.<sup>3</sup>Includes District 1, Prince of Wales.<sup>4</sup>Marriage licenses issued.<sup>5</sup>Data are estimated for 11 months.<sup>6</sup>Marriages by county where license was issued.<sup>7</sup>Geographically located within limits of Idaho, Montana, and Wyoming.<sup>8</sup>Divisions are parishes.<sup>9</sup>Independent cities have the same status as counties and are listed after counties.<sup>10</sup>Independent city formed January 1, 1963, by consolidating Norfolk County and the independent city of South Norfolk.<sup>11</sup>Princess Anne County consolidated with this independent city, January 1, 1963.

## *Section 2. Divorces*

Table	Page
2-1. Estimated number of divorces and annulments and rates, with percent changes from preceding year: United States, 1920-66-----	2-5
2-2. Divorces and annulments and rates: United States, each region, division, and State, 1961-66-----	2-6
2-3. Reported annulments: United States, each region, division, and State, 1961-66-----	2-7
2-4. Median ages of divorced husband and wife at time of decree and at time of marriage: Divorce-registration area and each registration State, 1966-----	2-8
2-5. Percentage distribution of divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1966-----	2-8
2-6. Median duration of marriage prior to divorce or annulment: Divorce-registration area and each registration State, 1966-----	2-8
2-7. Divorces and annulments by color of husband by color of wife: Divorce-registration area, 1966-----	2-9
2-8. Estimated number of children involved in divorces and annulments: Divorce-registration area and each registration State, 1966-----	2-9
2-9. Estimated number of children involved in divorces and annulments: United States, 1953-66-----	2-9
2-10. Percentage distribution of divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1966-----	2-9
2-11. Divorces and annulments by age of husband and wife at time of decree: Divorce-registration area and each registration State, 1966-----	2-10
2-12. Divorces and annulments by age of husband and wife at marriage: Divorce-registration area and each registration State, 1966-----	2-11
2-13. Divorces and annulments by race of husband and wife: Divorce-registration area and each registration State, 1966-----	2-12
2-14. Divorces and annulments by number of this marriage of husband and wife at time of decree: Divorce-registration area and each registration State, 1966-----	2-12

Table

Page

2-15. Divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1966----- 2-13

2-16. Divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1966----- 2-13

2-17. Divorces and annulments by duration of marriage and number of children reported: Divorce-registration area and each registration State, 1966----- 2-14

2-18. Divorces and annulments by month marriage performed: Divorce-registration area and each registration State, 1966----- 2-15

2-19. Divorces and annulments: United States, each State and county, 1966----- 2-16

### Sampling Variability of the Divorce Statistics

In the tables which present statistics based on data from probability samples of divorce records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 3-8 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown in the table.

	<i>Minimum useful figure</i>		<i>Minimum useful figure</i>
Divorce-registration area -----	100	Montana-----	15
Alabama-----	100	Nebraska-----	15
Alaska -----	10	Ohio -----	100
Georgia -----	50	Oregon-----	50
Hawaii -----	10	Pennsylvania -----	100
Idaho-----	15	Rhode Island-----	10

SECTION 2 - DIVORCES

Table 2-7. Divorces and Annulments by Color of Husband by Color of Wife: Divorce-Registration Area, 1966

[Based on sample data. Ohio did not require reporting of color. For sample design and sampling variability, see Technical Appendix]

Color of husband	All divorces and annulments	Color of wife		
		White	Nonwhite	Not stated
Total	173,562	91,126	9,915	72,521
White	91,163	90,503	336	324
Nonwhite	9,878	270	9,563	45
Not stated	72,521	353	16	72,152

Table 2-9. Estimated Number of Children Involved in Divorces and Annulments: United States, 1953-66

[For 1960-66, estimated from frequencies based on sample; for other years, estimated from total counts]

Year	All divorces and annulments	Estimated number of children involved	Average number of children per decree	Rate per 1,000 children under 18 years of age
1966	489,000	669,000	1.34	9.5
1965	479,000	630,000	1.32	8.9
1964	450,000	613,000	1.36	8.7
1963	428,000	562,000	1.31	8.2
1962	413,000	532,000	1.29	7.9
1961	414,000	516,000	1.25	7.8
1960	393,000	463,000	1.18	7.2
1959	395,000	468,000	1.18	7.5
1958	368,000	398,000	1.08	6.5
1957	381,000	379,000	0.99	6.4
1956	382,000	361,000	0.95	6.3
1955	377,000	347,000	0.92	6.3
1954	379,000	341,000	0.90	6.4
1953	390,000	330,000	0.85	6.4

Table 2-8. Estimated Number of Children Involved in Divorces and Annulments: Divorce-Registration Area and Each Registration State, 1966

[Refers to children under 18 years of age except as noted. Estimated from frequencies based on sample which are shown in table 2-16]

Area	All divorces and annulments	Estimated number of children involved	Average number of children per decree	Rate per 1,000 children under 18 years of age
Divorce-registration area	173,562	229,000	1.32	8.6
Alabama	11,270	12,500	1.11	9.4
Alaska	1,112	1,500	1.35	12.9
Georgia	12,925	15,500	1.20	9.1
Hawaii <sup>2</sup>	692	1,000	1.12	3.5
Idaho <sup>3</sup>	3,028	3,900	1.29	14.4
Iowa	5,606	8,200	1.46	8.3
Kansas <sup>4</sup>	6,148	8,600	1.40	10.6
Maryland	7,020	9,300	1.32	7.0
Michigan	21,750	30,200	1.39	9.4
Missouri	15,760	16,500	1.20	10.5
Montana	2,089	3,100	1.48	11.5
Nebraska <sup>5</sup>	2,638	3,900	1.48	7.4
Ohio	28,380	38,900	1.37	10.2
Oregon	6,730	9,200	1.38	13.5
Pennsylvania	16,920	22,500	1.33	5.7
Rhode Island	1,271	1,800	1.42	6.0
South Dakota	964	1,500	1.56	5.7
Tennessee <sup>6</sup>	11,650	14,300	1.23	10.4
Utah	3,090	5,100	1.65	11.9
Virginia	9,530	11,200	1.18	6.9
Wisconsin	5,326	8,500	1.60	5.5
Wyoming	1,463	2,000	1.37	16.3

<sup>1</sup>Number of children under 21 affected.  
<sup>2</sup>Number of children under age 20.  
<sup>3</sup>Number of children affected by decree.  
<sup>4</sup>Number of children.  
<sup>5</sup>Number of children under 18 of this marriage.

Table 2-10. Percentage Distribution of Divorces and Annulments by Number of Children Reported: Divorce-Registration Area and Each Registration State, 1966

[Based on sample data; for frequencies, see table 2-16. Refers to children under 18 years of age except as noted]

Area	Total	Number of children reported						
		None	1	2	3	4	5	6 or more
Divorce-registration area	100.0	39.7	22.8	18.2	10.4	5.3	2.1	1.6
Alabama	100.0	45.5	22.8	17.4	8.0	4.3	1.0	1.0

## SECTION 3. TECHNICAL APPENDIX

### SOURCES OF DATA

Marriage and divorce statistics currently are based on information from two sources: (1) complete counts of events obtained from all States and (2) samples of marriage and divorce certificates obtained from States meeting certain reporting criteria.

Complete counts of marriages and divorces are provided annually by State and local officials by county; marriages are also reported by month of occurrence. From these counts, totals are derived and rates computed for publication for each State, geographic division, and region, the United States, and the marriage-registration area (MRA). Totals but not rates are published for the divorce-registration area (DRA).

The sample records are selected from microfilm copies of the original certificates received from the registration offices of States and areas comprising the MRA and the DRA. The statistical information on these records, including data on the characteristics of marriages and divorces and the persons involved in them, are edited, classified, placed on punchcards, transferred to tape for computer processing, and tabulated in the National Center for Health Statistics (NCHS).

Marriage and divorce statistics for the United States and for the registration areas are limited to events occurring during the year and registered within the specified area. Tabulations for States and other areas are by place of occurrence. Events occurring to nonresidents are included; marriages or divorces of members of the Armed Forces or other U.S. nationals that occur outside the United States are excluded. *United States* refers to the 50 States and the District of Columbia. Alaska has been included in the U.S. tabulations since 1959 and Hawaii since 1960. Because of economy measures data reported for Puerto Rico and the Virgin Islands for 1966 were not processed and do not appear in this volume as they have in reports for past years.

Sources of marriage and divorce data since 1867 are shown in table 3-1; a description of these sources can be found in Section 7, Volume III, *Vital Statistics of the United States, 1960*.

#### Registration areas

Registration areas for the collection of marriage and divorce statistics were established in 1957 and 1958, respectively. Similar in concept to the registration areas developed earlier to promote national natality and mortality

statistics, they included States with adequate programs for collecting marriage and divorce statistics. Criteria for participation in the registration areas are

1. A central file of marriage or divorce records in the State office.
2. A statistical report form conforming closely in content to the Standard Record of Marriage (figure 3-1) or Standard Record of Divorce or Annulment (figure 3-2) issued by the Public Health Service.
3. Regular reporting to the State office by all local areas in which marriages or divorces are recorded.
4. Agreement on tests for completeness and accuracy of marriage or divorce registration to be carried out in cooperation with NCHS.

When established the MRA included 28 States and, in addition, all of New York except the city of New York, Alaska, Hawaii, Puerto Rico, and the Virgin Islands. The DRA included 14 States, Alaska, Hawaii, and the Virgin Islands. Table 3-2 shows when States and independent areas established central files and when they began participating in the MRA and DRA.

In 1966, as in 1965, 38 States, the District of Columbia, Puerto Rico, and the Virgin Islands constituted the MRA (figure 3-3) and 22 States and the Virgin Islands made up the DRA (figure 3-4). Two independent registration areas, New Orleans and the city of New York, were part of the MRA in 1966. New Orleans and the rest of the State of Louisiana have participated in the MRA since it was established. New York State was a charter member, but the city of New York did not participate in the MRA until 1965. In 1966 neither the two cities nor the remainder of the States of Louisiana and New York was participating in the DRA. In the statistical tabulations *marriage-registration area* refers only to the 38 States (including the two cities with independent registration) and the District of Columbia; *divorce-registration area* refers to the 22 States.

Marriages in the MRA accounted for 76 percent of all marriages in the United States in 1966 and divorces in the DRA for 35 percent of all divorces.

#### Standard certificates

The Standard Record of Marriage and the Standard Record of Divorce or Annulment, issued by the Public Health Service, serve as the principal means of attaining

uniformity in content of documents used to collect information on marriages and divorces in the United States. These model reporting forms, prepared in close collaboration with the Public Health Conference on Records and Statistics, were first recommended to the States in 1954 for adoption January 1, 1955, and in 1966 were still in use without revision.

Each State and independent registration area determines the form and content of its vital records. Consequently the records vary in certain details. Although modified in each State as required by particular needs or by special provisions of the State vital statistics law, the marriage and divorce records of most States in the MRA and DRA conform closely to the standard records.

Table 3-3 lists the items appearing on the Standard Record of Marriage and shows which States had the items

on their forms in 1966. Table 3-4 shows the same information for the Standard Record of Divorce or Annulment.

**Nationwide counts**

In 1966 the total counts of marriages were furnished from central files of marriage records for the 44 States maintaining them and for the District of Columbia. Counts for the five boroughs of the city of New York were supplied by the New York city clerk. In the areas without central files the counts were obtained from surveys conducted by registration officials. State officials reported for Arizona, Oklahoma, Washington, and for some counties in New Mexico. County officials in Colorado, Nevada, and in a few New Mexico counties reported totals directly to NCHS on a monthly basis. Because of incomplete reporting for New

Mexico from both sources, data for that State were estimated.

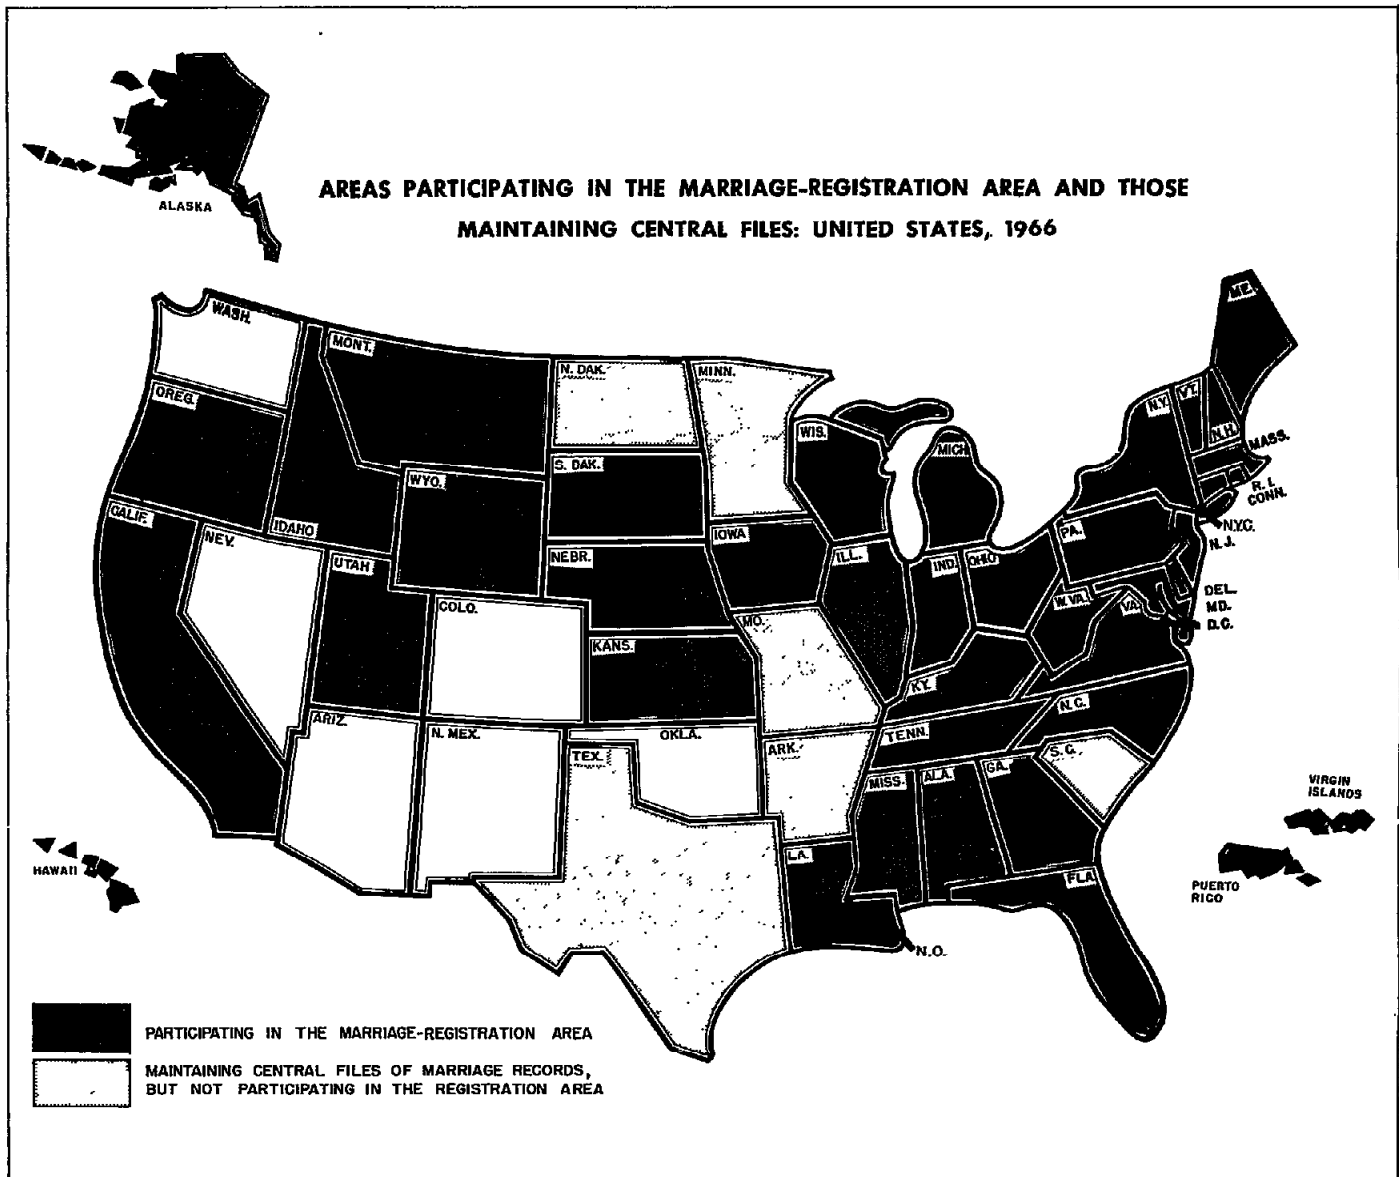

The number of marriage licenses issued rather than the number of marriages performed was reported for a few areas—Colorado, Kentucky, Nevada, Washington, and some counties in Arizona. Marriages performed were reported for the remaining counties in Arizona and for the other 45 States. The number of marriage licenses issued is usually 1 or 2 percent greater than the number of marriages performed. (See page 2-1, Section 2, Volume I, *Vital Statistics of the United States, 1959*.) Georgia, Massachusetts, and Michigan reported marriages performed by county where license was issued.

Total counts of divorces and annulments were furnished from central files of the 40 States maintaining them and from the District of Columbia. (Although Kentucky and Louisiana

maintain central files, counts for a few counties of Kentucky and some parishes of Louisiana were obtained by NCHS directly from local officials.) For States without central files of divorce records (Arizona, Colorado, Indiana, Minnesota, Nevada, New Mexico, Oklahoma, Texas, Washington, and West Virginia) State officials conducted special surveys to obtain county totals.

Totals for a few counties could not be obtained from either State or local officials. One county each in Arkansas, Georgia, and Missouri did not report marriages; only incomplete counts for a few counties were obtained from New Mexico. Divorces and annulments were not reported for one county or more in the following States: Arkansas (2), Colorado (1), Georgia (4), Hawaii (1), Kentucky (1), Louisiana (34 parishes), Michigan (2), Montana (2), New Mexico (3), North Dakota (5), South Carolina (2), South Dakota (8), and

FIGURE 3-3

Utah (2). The national total of marriages includes estimates for all counties in New Mexico, and the national total of divorces and annulments includes estimates for the three counties of New Mexico and the 34 parishes of Louisiana that did not report. Estimates of county divorce totals for Indiana were made by State officials. Estimates prepared by NCHS assume that the rate in nonreporting areas of the State was the same as that for reporting areas.

### Characteristics of marriages and divorces

Statistical information on characteristics of marriages and divorces is provided by the States participating in the registration areas. Items that are adequately reported are processed from the sample records of each State.

For marriages in 1966 these items include place (State) of marriage, month and day of marriage, and the following items relating to characteristics of bride and groom: place

(State) of residence, date of birth or age, race, number of this marriage, and marital status prior to this marriage.

For divorces the items include place (State) of divorce, month of divorce, number of children, month and year of marriage (from which duration of marriage is obtained), and the following items relating to husband and wife: date of birth or age, race, and number of this marriage.

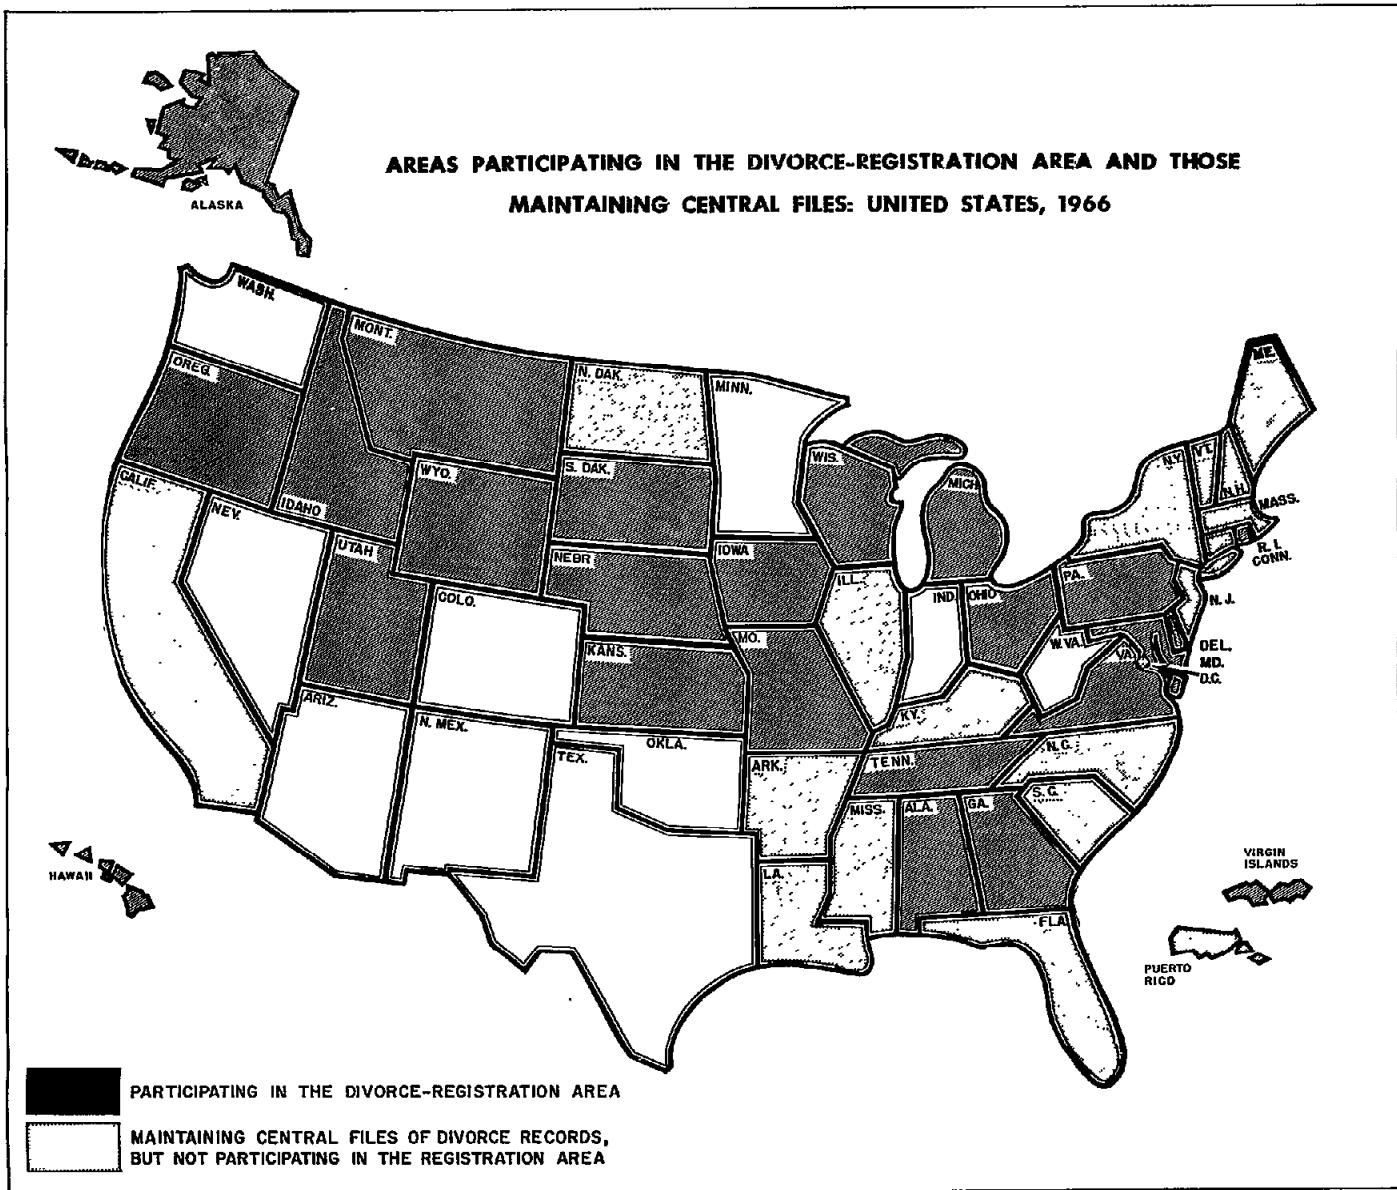

Certain items previously coded and tabulated were dropped from the 1966 processing as a result of program reduction. For marriages the deleted items were type of ceremony and State of birth of bride and groom. For divorces State of residence of husband and wife, State of marriage, to whom decree was granted, legal grounds for decree, and identity of plaintiff were deleted.

Most of the items tabulated for marriages in 1966 were well reported by nearly all the States in the MRA. The marriage forms of all participating States contained an item for either age at marriage or date of birth or both items. The

SECTION 3 - TECHNICAL APPENDIX

FIGURE 3-4

race or color item was on the records of all States except California, Michigan, New York, and Ohio. The item appeared on the Illinois form but was optional and was completed on less than one-half of the records. Forms for four States (Idaho, Kansas, Maryland, and Oregon) did not ask for the number of this marriage but did include an item on previous marital status. Forms for two States (Ohio and Michigan) requested information about the number of previous marriages of each person but not about the marital status of the previously married. Although not tabulated, the county or minor civil division directly below the county level where the marriage was performed was reported by all but four of the States in the MRA (California, Florida, Kansas, and Maryland).

With the addition of New York and Michigan to the States dropping the race or color item from their marriage records, race or color was stated for less than two-thirds of the

marriages performed in the MRA during 1966. The proportion of marriages for which race or color was not stated increased from 22.3 percent in 1965 to 35.8 percent in 1966.

The six States that did not ask for both "previous marital status" and "number of times previously married" show a proportion of records with the missing item not stated equal to or slightly greater than the proportion of remarriages for that State rather than the 100 percent not stated to be expected. This comes about because for first marriages either of these two items can be determined from the other item. That is, if the individual is designated as single (marital status), the number of times previously married can be classified as "0," and, similarly, if the number of times previously married is stated as "0," the individual can be classified as single (marital status). Consequently when either item is missing, it has to be classified as not reportable only for the remarriages.

Of the items tabulated for divorces in 1966, date and place (State) where the decree was granted, number of children involved, date of marriage, and date of birth or age at time of decree were on the forms of all DRA States. All DRA States except Ohio included the race item, and only Nebraska did not have number of this marriage. However, several of these items were very poorly reported for at least half of the States. Date of birth (or age at divorce), age at marriage, and number of this marriage were entered on less than half of the records from several States and on only a very small proportion of the records from Alabama, Michigan, South Dakota, and Wyoming. Race also was poorly reported. Stated on less than half of the records for several States, the item was reported on only about 10 percent of the Michigan records and 27 percent of the Wyoming records.

Tables 3-3 and -4 and 3-9 and -10 show which of selected items appear on the records of the registration States and how well they are reported by each State.

## SAMPLE DESIGN

### Obtaining the records

Each year the States participating in the MRA and the DRA prepare microfilm copies of their records which are purchased by NCHS. Further processing steps, including sample selection, code punching, verification, and tabulation, are carried out by NCHS.

For marriages the records refer to all marriages performed in 1966 within the 38 MRA States and the District of Columbia. For divorces the records refer to all decrees of absolute divorce and annulment that were granted during 1966 within the 22 DRA States.

Interlocutory divorce decrees for all States which grant them except Utah are included among the records for the year in which they were granted. In most cases, interlocutory divorces become final automatically after the lapse of a certain period of time. Thus those granted late in 1965 did not become final until 1966, and those granted during the latter part of 1966 will not become final until sometime in 1967. It is possible that some interlocutory decrees never become final because of death or reconciliation, but it is believed that the number of such cases is very small. In Utah the divorce record is filed with the State in the year the interlocutory decree becomes final.

### Sampling procedures

The marriage sample was designed to yield estimates of State totals as well as frequency distributions. These estimates were made for the MRA and for each State in the registration area. A sampling rate was designated for each MRA State so that the selected sample for it would consist of at least 2,500 records. Five different sampling rates were used: all records, 1/2, 1/5, 1/10, and 1/20. The overall ratio for the MRA in 1966 was 1/8.

Sampling procedures for the divorce sample parallel those for the marriage sample. A sampling rate was selected

so that the sample for each DRA State would contain at least 1,000 records. Four different sampling rates were used: all records, 1/2, 1/5, and 1/10. Overall, about 1/4 of the records were selected for the DRA sample in 1966.

Although each State's records were sampled independently, each group of States with the same sampling rate was treated as a stratum for computing sampling errors. Estimated sampling errors for the MRA and the DRA States are likely to be somewhat larger than those that might have been computed using each State as a stratum.

The sampling rates, numbers of events, and sample cases by State for 1966 are shown in tables 3-5 (marriages) and 3-7 (divorces).

Sampling of marriage and divorce records for States in the registration areas was initiated in 1960. For earlier years data on characteristics had been compiled from pre-designed tables submitted by the States. The 1966 sample is an extension of the sampling procedures used each year since 1960. However, there have been several major modifications since that year.

1. In 1963 the size of both the marriage and divorce samples was increased greatly over that of prior years: for marriages it was almost tripled and for divorces about doubled. Using substantially the same sample design, the expansion was accomplished by increasing the sample selection rates and the minimum sample size for each State. In 1964 the marriage sample was again increased by raising the minimum sample size for six States. The divorce sample was also enlarged by increasing the sampling rates for Ohio and Missouri. The higher sampling rates significantly reduced sampling errors.
2. Beginning with 1964 copies of all marriage records (except for samples selected and reported for New York and the District of Columbia) and of all divorce records from the registration areas have been inspected and the sample selected in NCHS. In prior years the sample had been selected in the State offices. This change in procedure resulted in more uniform control over sampling procedures and specifications and in more detailed information about the type of nonsampling errors described in a later section of this appendix.
3. In 1960 the sampling program was nationwide; it included States not in the MRA and the DRA as well as those that were. Since 1960 only records of States in the MRA and DRA have been sampled. Thus some of the national and regional data available for 1960 are not available for later years.
4. Additional States have been admitted to the registration areas since 1960. In 1961 Indiana, Massachusetts, and the District of Columbia were admitted to the MRA and Michigan and Missouri to the DRA. Ohio and Rhode Island were added to the DRA in 1962 and 1963, respectively. Illinois and North Carolina were admitted to the MRA in 1964, and West Virginia and the city of New York were added in 1965. No States entered either the MRA or the DRA in 1966.

## ESTIMATING PROCEDURES

### Area totals

The figures obtained from complete counts of events furnished by the State and local offices differ slightly from the estimated totals based on sample data. When possible, major differences between the sample totals and the independent counts for each reporting State are reconciled before the sample data are weighted and tabulated.

For marriages in 1966 the complete count and the sample estimate differed by less than 2 percent for all States in the MRA except Utah, where the total based on the sample count was 8 percent above the independent count. This difference could not be satisfactorily explained and no adjustment was made.

Similarly for all States in the DRA except Utah the complete count of divorces and the sample estimate differed by less than 2 percent. The sample for Utah was 26 percent below the expected number of records. For this State the missing records appear as "not stated" in the tabulation of divorces by detailed characteristics.

### Frequencies

Procedures for estimating frequency distributions for various characteristics were similar for the marriage and divorce samples. Frequencies were estimated in two steps.

1. Each sample case was assigned a weight which was the reciprocal of the sampling ratio used to select the case. If a marriage record was selected from a State with a sampling ratio of 1/10, that record was assigned a weight of 10; whereas if 100 percent of the records were processed from a State, each record was assigned a weight of 1.
2. Tabulated counts consisted of summing the weights of the records. Thus each frequency distribution such as age at marriage of first-married brides is a sum of the weighted sample cases included.

The weights for all sample records are identical within each State. However, as shown in tables 3-5 and 3-7, the weights for marriage records vary from 1 to 20 and those for divorce records from 1 to 10 among the registration States. Therefore any two approximately equal subtotals may have different sampling errors, varying with the proportion of cases from each stratum included in the estimate.

### Percents and rates

Percents shown in the tables in Sections 1 and 2 were computed from data excluding numbers of not stated cases. Rates appearing in these tables were based on population estimates developed by the U.S. Bureau of the Census (tables 3-11 through 3-14). The population estimates refer to July 1, 1966, and include Armed Forces stationed in the United States but exclude the Armed Forces abroad.

## Allocations

Because States in the DRA vary radically in the extent to which items are reported on the divorce records, no allocations were made prior to tabulation of the divorce data. On the marriage records, values were allocated for ages of brides and grooms and date of marriage. These items have been reported with 99 percent or more completeness since 1960.

The allocation procedures used were the same as in previous years and were as follows:

1. When the age of only one partner was reported, the age of the other was allocated as follows:  

$$\text{Allocated age of groom} = 1.14 (\text{age of bride}) - 0.35$$

$$\text{Allocated age of bride} = 0.88 (\text{age of groom}) + 0.31$$
2. If the ages of both partners were not reported and neither partner was widowed, ages allocated to each were those of the last preceding couple with neither partner widowed.
3. If the ages of both partners were not given and one or both partners were widowed, ages allocated to each were those of the last preceding couple with both partners widowed.
4. If month of marriage was not given, it was allocated sequentially from January through December.
5. If day of marriage was not reported, it was allocated sequentially from 1 through 28.

### Children involved in divorces

Procedures for estimating the number of children reported in divorce suits presented a special problem. The number of children was estimated for each registration State, the DRA, and the United States. In order to obtain a State total, the category "children not stated" was first distributed to reflect the distribution of divorces by number of children reported. Then the estimated number of divorces with a given number of children was multiplied by the number of children per divorce (that is, the number of divorces involving one child was multiplied by 1, the number involving two children was multiplied by 2, and so forth). The sum of the products is the estimated number of children of divorced parents in a given registration State. The sum of State estimates for participating States is the estimate for the DRA.

To obtain national estimates for 1965 and 1966, the average number of children per decree was computed for the 16 States that have a satisfactory degree of completeness of reporting children (Alaska, Hawaii, Idaho, Iowa, Kansas, Michigan, Missouri, Montana, Nebraska, Ohio, Oregon, South Dakota, Tennessee, Virginia, Wisconsin, and Wyoming) and the national divorce total was multiplied by this average. This method was also used to revise figures for the years

1961 through 1964 that had been estimated by using a different method. Hence data for these years shown in table 2-9 (Section 2) differ from figures appearing in Volume III of *Vital Statistics of the United States* for years prior to 1965.

### SAMPLING ERRORS

Each estimate based on a sample has a sampling error ( $\sigma$ ) except statistics for States where all records were used. Since all cases were selected with known probabilities, the sampling error of each estimate can be computed. The sampling errors shown in tables 3-6 and 3-8 are the amounts which, when added to and subtracted from the estimated frequency or percent, give the interval within which the actual quantity being estimated would lie in approximately two out of three samples of equal size. For example, if the sample estimate of the number of wives under 20 years of age at the time of divorce in 1966 is 15,000, and if the sampling error for this estimate is 320, the probability is about 2/3 that this sample estimate is plus or minus 320 of the true total and about 95/100 that this estimate is plus or minus two sampling errors (640) of the true total.

To make comparisons of sampling errors between registration States with widely varying totals of marriages or divorces, the sampling errors shown for frequencies are expressed as percents of State or registration area totals. The sampling error for an estimated percent based on the total number of events can be computed by dividing the sampling error shown for the frequency by the total number of events reported for the area. As an example of the procedure, suppose the number of nonwhite marriages in Alabama to be 8,390, or 20 percent of the total for the State. The sampling error shown in table 3-6 for this frequency is 245. By adding and subtracting 245 from 8,390, we obtain the interval 8,145 to 8,635; the chances are about 68 out of 100 that the actual number of nonwhite marriages is in this interval. In order to obtain the sampling error for 20 percent itself, we divide 245 by the State total, 41,730, with a resulting sampling error of 0.6 percent. Thus the chances are about 68 out of 100 that the actual percent of nonwhite marriages in Alabama falls between 19.4 and 20.6.

The standard error of a proportion which is based on a subgroup in a State may be represented by the following formula

$$S_p = \frac{\sqrt{P_y^2 S_x^2 - P_x^2 S_y^2}}{P_y^2 N}$$

where:  $P_y$  is the proportion the denominator is of the total marriages of the State;  $P_x$  is the proportion the numerator is of the State total;  $S_y$  is the standard error of the denominator;  $S_x$  is the standard error of the numerator; and  $N$  is the total number of marriages for the State. Use of this equation can best be described by an example. Suppose for the State of Alabama that 25 percent of the nonwhite brides were aged 15-19 years and we want to approximate the standard error of this proportion. Suppose also that the estimated number of nonwhite marriages for the entire State

was 8,390 and that 2,100 of all brides were aged 15-19 years. All nonwhite marriages represent 20 percent ( $P_y$ ), and 2,100 is 5 percent ( $P_x$ ) of the 41,730 ( $N$ ) marriages in Alabama during 1966. From table 3-6 we find that for Alabama the standard error of 8,390 is 245 ( $S_y$ ) and of 2,100 is 133 ( $S_x$ ). Substituting these values into the formula we obtain

$$S_{(.25)} = \frac{\sqrt{(.20)^2 (133)^2 - (.05)^2 (245)^2}}{(20)^2 (41,730)} = 0.014$$

Therefore the chances are about 68 in 100 that the true proportion is between .236 and .264, or 23.6 and 26.4 percent.

To determine if two proportions are significantly different, we divide the difference by the square root of the sum of the squares of their standard errors. If the quotient of this division is greater than 2, the probability that the difference between the two figures is due to chance is less than 1 in 20. To illustrate, suppose we wish to compare the proportion of nonwhite marriages in the 15-19 age group for Alabama and Louisiana. Assume that the proportions were 0.25 with standard error .014 for Alabama and 0.30 with standard error .016 for Louisiana. Division of the difference by the square root of the sum of the squares of the standard errors gives us

$$\frac{(.30 - .25)}{\sqrt{(.011)^2 + (.014)^2}} = 2.8$$

This value is greater than 2, and so the difference between the two proportions can be assumed to be significant.

### NONSAMPLING ERRORS

In addition to the sampling errors described above, there are several other sources of variation, most of which are little affected by the size or design of the sample. For example, items may be missing from reporting forms and therefore not reportable; items that do appear on a form may be vague and ambiguous; responses may be incorrect, unreadable, or missing; data may be submitted on outdated record forms; records may be erroneously included in the microfilm files sent to NCHS; or the editing or coding instructions may be inadequate to cover all cases.

For most of the data available from 1960 onward, the completeness and year-to-year consistency are evidence of the basic reliability and coverage of the marriage- and divorce-registration systems. Furthermore, several of the States are currently working to improve their registration practices in order to enter the registration areas. Some are achieving higher levels of completeness and adequacy of reporting than those currently in the MRA or the DRA. This is particularly true in the case of divorces.

#### Incomplete reporting

Nonresponse errors in marriage and divorce data arise from two sources: (1) An item may not be included on the reporting form (not reportable), or (2) although the item

may be on the form, there may be no response or the response may be illegible (not completed). Regarding the second source of nonresponse, some reporting forms include items that are badly worded and do not elicit responses sufficiently precise to be classified. Sometimes when a State revises its form to include additional items, copies of the old form are used by registration offices until a supply of the new version is received. The items not included on the old forms are tabulated as "not completed."

Data presented in tables 3-9 and 3-10 show the proportions of not stated cases for specified characteristics of marriages and divorces for 1966. The proportions "not reportable" and "not completed" are shown separately for both the MRA and the DRA. Footnotes to entries under the characteristics identify the specific reporting areas for which an item was not reportable. Not completed cases were estimated by subtracting the not reportable responses from all nonresponses. Not completed cases were typically blank, but illegible responses and cases of records not received were also included in this category as well as some responses that were inappropriate. For example, numbers were written on some sample records instead of the specific previous marital status of the bride and groom. Checks of problems as they arose yielded evidence of only scattered instances of such responses. A major proportion of the not stated cases for marriages were due to the absence of items on some of the reporting forms. In contrast, the majority of not stated items on records of divorce and annulment arose from lack of response to some of the items requested on the reporting forms.

For divorces, items of personal information have typically been less complete than legal items and information about the marriage. One possible explanation of the incompleteness of personal items is that in several States the local court official responsible for filing the form is not empowered to require completion of the reporting form but can only secure information from transcripts of court proceedings on the case.

#### Other sources of error

*Inconsistent responses.*—Inconsistency between entries for related items on the certificates occurs occasionally for both marriages and divorces. When age and date of birth are both reported, they do not always agree. Previous marital status is sometimes not consistent with number of times married or number of this marriage. These differences are arbitrarily reconciled before tabulation.

*Ambiguous wording of items.*—Some of the items are worded so that they do not yield information easily classified in standardized categories. Some briefly worded items actually require additional questions on the part of the local recorder in order to obtain the detailed information sought. This type of error occurs most frequently in connection with items requesting geographic place names (residence, place of marriage, and place of birth) and those requesting data about previous marriages.

*Microfilm errors.*—Errors in the arrangement of the records received on microfilm in NCHS sometimes occur when numbers on the records are out of sequence, missing, or duplicated or when records that are not part of the universe being sampled are erroneously included in the file. A standardized order of records such as the one used for birth and death records has not yet been developed for microfilming the marriage and divorce records. In one area, permanent State files of marriage records are arranged by the date licenses are issued rather than by a number assigned to licenses actually used. Thus marriages occurring in any one year may have been included in files for earlier years. Special arrangements to locate and microfilm these records are made by NCHS each year.

Also, any records of marriages occurring in earlier or later years interspersed with records for the current data year are eliminated.

*Processing errors.*—All coding is verified; taped data are edited for impossible codes and for inconsistencies. Instances of impossible codes and inconsistencies in information about previous marriages are rechecked to the records. This editing and rechecking indicated only negligible coding errors in the 1966 data.

## SECTION 3 - TECHNICAL APPENDIX

Table 3-1. Sources of Marriage and Divorce Data: United States, 1867-1966

Time period	Marriage	Divorce <sup>1</sup>
1867-86	Estimates prepared by National Office of Vital Statistics based on results of field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.
1887-1906	Estimates based on data from field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.
1907-15	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1916	Numbers collected through mail survey conducted in 1917-18 by Bureau of the Census.	Numbers and detailed statistics collected through mail survey conducted in 1917-18 by Bureau of the Census.
1917-21	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1922-32	Annual collection by Bureau of the Census through mail query to States with central files and to counties in the remaining States.	Numbers and detailed statistics collected annually by Bureau of the Census through mail query to States with central files and to counties in the remaining States.
1933-36	Estimates by S. A. Stouffer and L. M. Spencer on basis of data available from selected States ( <i>American Journal of Sociology</i> , January 1939).	Same as for marriage.
1937-40	Estimates based on transcript returns and mail surveys of State and county offices conducted by Bureau of the Census. Some detailed statistics for 1940 based on transcript program.	Same as for marriage.
1941-43	Estimates based on data from published State reports and from files of Bureau of the Census and Federal Home Loan Bank Board.	Same as for marriage.
1944-47	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices.
1948-56	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.
1957	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the marriage-registration area (MRA).	Same as for 1948-56.
1958-59	Same as for 1957.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the divorce-registration area (DRA).
1960	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of marriage records designed to provide estimates for the United States, the four regions, the marriage-registration area, and each registration State. Totals of either marriages or marriage licenses by county and by month also tabulated in each State. These and totals estimated from samples were checked for consistency.	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of divorce records. Records in the sample provided statistics on absolute decrees of divorce and annulment for the United States, the four regions, the divorce-registration area, and each registration State. Totals for each State by county also tabulated in each State. These and totals estimated from samples were checked for consistency.
1961-66	Statistics prepared in the National Center for Health Statistics for the MRA and each MRA State from probability samples of the marriage records collected by each MRA State. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for MRA States, checked for consistency with totals estimated from sample records.	Statistics prepared in the National Center for Health Statistics for the DRA and each DRA State from probability samples of the records of absolute divorces and annulments collected by each DRA State. Pretabulated totals by county, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for DRA States, checked for consistency with totals estimated from sample records.

<sup>1</sup>Includes reported annulments.

Table 3.2. Years Central Files of Marriage and Divorce Records Were Established and Years Admitted to the Marriage- and Divorce-Registration Areas: 1966

[The marriage-registration area was established January 1, 1957, and the divorce-registration area January 1, 1958]

Area	Marriages		Divorces		Area	Marriages		Divorces

<sup>1</sup>Not on Standard Record of Marriage. (Information can be used to distinguish religious from civil ceremonies if type of ceremony not stated.)  
<sup>2</sup>Item reportable as "Number of previous marriages."  
<sup>3</sup>Item does not specifically request State, but State or city was reported on most records; major cities were allocated to appropriate States.  
<sup>4</sup>For this State, cities and towns are minor civil divisions directly below the county level. (Towns are equivalents of townships.)  
<sup>5</sup>Item not reportable; name of officiant requested but not title.  
<sup>6</sup>Item reportable as "Number of marriage."

Table 3-4. Selected Items of Statistical Information on Divorce or Annulment Records of Divorce-Registration States: 1966

[Items listed are those on the Standard Record of Divorce or Annulment, PHS-2040. "X" denotes presence of item on State record form]

State	Items concerning divorce						Items concerning marriage		Items concerning husband and wife			
	Date	County or county equivalent	Legal grounds	Plaintiff	To whom granted	Number of children	Date	State where marriage occurred	Date of birth or age	Race or color	Number of this marriage	State of residence
Alabama	X	X	X	X	X	X	X	X	X	X	X	X
Alaska	X	X	X	X	X	X	X	X	X	X	X	X
Georgia	X	X	X	X	X	X	X	X	X	(2)	X	X
Hawaii	X	X	X	X	X	X	X	X	X	X	X	X
Idaho	X	X	X	X	X	X	X	X	X	X	X	X
Iowa	X	X	X	X	X	X	X	X	X	X	X	X
Kansas	X	X	X	X	X	X	X	X	X	X	X	X
