Great Science on Tap for Your Company's Innovations

Los Alamos National Laboratory Industrial Fellows Program

Los Alamos National Laboratory scientists can help your company.

Industrial Fellows are key Los Alamos National Laboratory staff members assigned to premier U.S. firms for up to two years.

Some companies with which we have partnered:

The goal of the program is to forge long-term, strategic partnerships between Los Alamos National Laboratory and industry through increased mutual understanding of the technical capabilities and needs of each partner.

How does industry benefit?

By hosting a Laboratory staff member, companies can benefit through

- Exposure to world class research and development practices;
- Joint development of new technology;
- Assistance with solving unique technical problems;
- Exposure to technology solutions that Los Alamos has to offer; and
- A sustained competitive advantage through innovation.

How can a company request a Los Alamos Industrial Fellow?

Companies are encouraged to make informal inquiries before submitting formal proposals. In addition, companies interested in hosting a Laboratory staff member and in developing long-term strategic relationships with the Laboratory are invited to submit proposals for assignment of an Industrial Fellow.

Selection Criteria

Industrial Fellow candidates are chosen for their combination of technical, professional, and managerial skills, as well as for their ability to build problem-solving teams.

Length of Assignments

Industrial Fellow assignments are typically for one to two years but are negotiated through a formal contract maintained between the Laboratory and the host company.
