U.S. Department of Agriculture (USDA) Grant and Partnership Programs that Can Address Invasive Species Research, Technical Assistance, Prevention and Control

January, 2005

Introduction

This workbook contains basic information on programs in USDA that could be used to fund invasive species related projects. This list should be a helpful place to start a search for resources for invasive species activities but by no means represents the complete universe of potential invasive species funding opportunities. USDA contacts listed below and several contacts listed in the other grant information section can assist you in determining which opportunities may fit best with your needs. Please use this workbook to help in your important and vital work in safeguarding natural, recreational and agricultural resources.

USDA Programs

Program Name:	Program of Research on the Economics of Invasive Species Management (PREISM)
Agency:	USDA, Economic Research Service (ERS)
Funding Method:	National competitive funding
Match:	None
Authority:	Omnibus Budget Appropriations Act, Fiscal 2004 (P.L. 108-7)
Eligible Entities:	Any public or private research institution or organization, or individuals meeting peer-reviewed professional criteria as economic researchers
Taxa:	The program is not taxa-specific, nor geared toward particular taxa
Contact Info:	Craig Osteen (costeen@ers.usda.gov) and Donna Roberts (droberts@ers.usda.gov)
Purpose:	To provide analysis of economic issues related to managing invasive pests in increasingly global agricultural markets, in order to inform national decision-making concerning invasive species of agricultural significance or affecting, or affected by, USDA programs.
<hr/>	
Program Name:	Cooperative Forest Health Management Program
Agency:	USDA Forest Service (FS)
Funding Method:	National competition
Match:	50 percent if less than 500 acres; 33 percent if over 500 acres; 25 percent if non-federal public lands
Authority:	Cooperative Forestry Assistance Act of 1978
Eligible Entities:	Cooperative Weed Management Areas, States, non-profit organizations
Taxa:	Invasive plants/weeds, plant pathogens/diseases and insects
Contact Info:	Rob Mangold (703) 605-5340 (rmangold@fs.fed.us)
Purpose:	To fund weed management activities on State and private forested lands.
<hr/>	
Program Name:	National Research Initiative (NRI) – Biology of Weedy and Invasive Plants.
Agency:	USDA Cooperative State Research, Education and Extension Service (CSREES)
Funding Method:	National competition
Match:	Cost sharing or matching is not required
Authority:	Section 401 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7621)
Eligible Entities:	State agricultural experiment stations, all colleges and universities, other research institutions and organizations, Federal agencies, national laboratories, private organizations or corporations, and individuals

USDA Programs (continued)

Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Diana Jerkins, National Program Leader (202) 401-6996 (djerkins@csrees.usda.gov)
Purpose:	This program aims: 1) to support research on general processes and principles which contribute to plant competitiveness or invasiveness; 2) to support the development of novel methods to alter plant species competitiveness, invasiveness, or abundance.
<hr/>	
Program Name:	National Research Initiative - Integrative Biology of Arthropods and Nematodes
Agency:	USDA CSREES
Funding Method:	National competition
Match:	Cost sharing or matching is not required
Authority:	Section 401 of the Agricultural Research, Extension and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7621)
Eligible Entities:	State agricultural experiment stations, all colleges and universities, and research institutions and organizations, Federal agencies, national laboratories, private organizations or corporations, and individuals
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Mary Purcell-Miramontes, National Program Leader (202) 401-5168 (mpurcell@csrees.usda.gov)
Purpose:	<p>This program invites both fundamental and mission-linked proposals for innovative research in the following priority areas: 1) population biology, 2) biological control, 3) chemical ecology, 4) behavioral ecology, and 5) fundamental resistance management studies (proposals on this topic must show how results will be applied to development of resistance management programs). Priority will be given to projects that demonstrate relevance to U.S. agriculture.</p> <p>Model organisms will be considered for support only if clear justification is given for how information gained will be applied to agriculturally relevant species. Proposed studies must include a justification for how anticipated results will be relevant to reduced stress on plants or livestock. Proposals that include a modeling component must give consideration to validation of the model.</p>
<hr/>	
Program Name:	Regional Integrated Pest Management Competitive Grant Program
Agency:	USDA CSREES
Funding Method:	Regional competition
Match:	No matching requirements
Authority:	Authority for the funding of research projects is contained in Section 2 (c)(1)(B) of the Act of August 4, 1965, Public Law No. 890106, as amended (7 U.S.C. 450i (c)(1) (B)). Authority for the funding of extension projects is contained in Section 3(d) of the Smith-Lever Act of May 8, 1914. ch. 79, 38 Stat. 372, 7 U.S.C. 341 et.seq. Note: For combined effort applications, separate awards will be executed for P.L. 89 -106 and Smith-Lever funds.

USDA Programs (continued)

Eligible Entities:	Eligibility for research projects includes: State agricultural experiment stations, land-grant colleges and universities, research foundations established by land-grant colleges and universities, colleges and universities receiving funds under the Act of October 10, 1962 (16 U.S.C. 582a et.seq.), and accredited schools or colleges of veterinary medicine. Eligibility for extension projects is limited to land-grant colleges and universities.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Mike Fitzner, National Program Leader (202) 401-4939 (mfitzner@csrees.usda.gov)
Purpose:	The Regional Integrated Pest Management (IPM) Competitive Grants Program supports the continuum of research and extension efforts needed to increase the implementation of IPM methods, from the development of individual pest control tactics and the integration of tactics into an IPM system, to extension, education, and training. The program is administered by the four regions (North Central, Northeastern, Southern, Western) of the land-grant university system in partnership with CSREES. The goal of the Regional IPM Competitive Grants Program is to provide support for projects that develop and help users implement IPM systems that 1) are profitable and environmentally sound over the long term; 2) reduce reliance on pesticides; and 3) protect and conserve ecosystem quality and diversity. It is recognized that the specific needs of each region vary, and thus specific program priorities will vary among the regions.

Program Name:	Wetlands Reserve Program
Agency:	USDA Natural Resources Conservation Service (NRCS)
Funding Method:	Within-State competition based upon State-specific priorities; State conservationists, with input from State technical committees, develop ranking criteria based upon broad national guidelines. Options are permanent easement, 30-year easement, and restoration cost-share agreements.
Match:	USDA pays 75 percent of restoration costs; landowner pays 25 percent
Authority:	Reauthorized in the Farm Security and Reinvestment Act of 2002
Eligible Entities:	Landowners of non-Federal lands and Tribes
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Leslie Deavers (202) 720-1067 (leslie.deavers@usda.gov)
Purpose:	A voluntary program offering landowners the opportunity to protect, restore and enhance wetlands on their property. The goal is to achieve the greatest wetland functions and values, along with optimum wildlife habitat, on every acre enrolled in the program.

Program Name:	Conservation Reserve Program (CRP)
Agency:	USDA Farm Service Agency (FSA) administers CRP, while technical support functions are provided by USDA NRCS; USDA CSREES; State forestry agencies; local soil and water conservation districts; and private sector providers of technical assistance.
Funding Method:	Provides annual payments for retirement of environmentally sensitive croplands and cost share for establishing and maintaining cover; restores herbaceous vegetation for 10 years; restores forested vegetation for 15 years.

USDA Programs (continued)

Match:	50 percent of establishment costs plus annual payment based on soil rental rate; funding limit of \$50,000 per accepted application per fiscal year
Authority:	Food Security Act of 1985, as amended, and regulations published in 7 CFR, part 1410
Eligible Entities:	Individuals and/or groups who have owned highly erodible or cropped wetlands and for at least one year
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Robert Stephenson, Conservation and Environmental Programs Division, FSA (202) 720-6221 (robert.stephenson@usda.gov) and Malcolm Henning, National Program Manager, NRCS (202) 720-1872 (malcolm.henning@usda.gov)
Purpose:	The Conservation Reserve Program reduces soil erosion, protects the nation's ability to produce food and fiber, reduces sedimentation in streams and lakes, improves water quality, establishes wildlife habitat, and enhances forest and wetland resources. It encourages farmers to convert highly erodible cropland or other environmentally sensitive acreage to vegetative cover, such as tame or native grasses, wildlife plantings, trees, filter strips, or riparian buffers. Farmers receive an annual rental payment for the term of the multi-year contract. Cost sharing is provided to establish the vegetative cover practices.

Program Name:	Wildlife Habitat Incentives Program (WHIP)
Agency:	USDA NRCS
Funding Method:	Within-State competition based upon State-specific priorities; State conservationists, with input from State technical committees, develop ranking criteria based upon broad national guidelines. WHIP agreements between NRCS and the participant generally last from 5 to 10 years from the date the agreement is signed.
Match:	Provides both technical assistance and up to 75 percent cost-share assistance to establish and improve fish and wildlife habitat.
Authority:	Farm Security and Rural Investment Act of 2002 reauthorized WHIP
Eligible Entities:	Private landowners, owners of Federal land when the primary benefit is on private or Tribal lands, owners of State and local government land on a limited basis, owners of Tribal land
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Martha Joseph (202) 720-7157 (martha.joseph@usda.gov)
Purpose:	A voluntary program for people who want to develop and improve wildlife habitat primarily on private land.

Program Name:	Environmental Quality Incentives Program (EQIP)
Agency:	USDA NRCS
Funding Method:	Within-State competition based upon State-specific priorities; State conservationists, with input from State technical committees, develop ranking criteria based upon broad national guidelines.
Match:	EQIP may cost-share up to 75 percent of the costs of certain conservation practices. Limited resource producers and beginning farmers and ranchers may be eligible for cost-shares up to 90 percent.

USDA Programs (continued)

Authority:	Reauthorized in the Farm Security and Rural Investment Act of 2002 (Farm Bill of 2002)
Eligible Entities:	Persons who are engaged in livestock or agricultural production on eligible land may participate in the EQIP program.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Gary Kobylski, Acting National EQIP Manager (202) 720-1840 (gary.kobylski@usda.gov)
Purpose:	To provide a voluntary conservation program for farmers and ranchers that promotes agricultural production and environmental quality as compatible national goals. EQIP offers financial and technical help to assist eligible participants install or implement structural and management practices on eligible agricultural land.

Program Name:	Conservation Reserve Enhancement Program (CREP)
Agency:	USDA FSA with technical support from NRCS
Funding Method:	A specific CREP project begins when a State, Indian tribe, local government, or local non-governmental entity identifies an agriculture-related environmental issue of State or national significance. These parties and FSA then develop a project proposal to address particular environmental issues and goals. Enrollment in a State is limited to specific geographic areas and practices. CREP contracts require a 10- to 15-year commitment to keep lands out of agricultural production. CREP provides payments to participants who offer eligible land.
Match:	A Federal annual rental rate, including an FSA state committee-determined maintenance incentive payment, is offered, plus cost-share of up to 50 percent of the eligible costs to install the practice. Further, the program generally offers a sign-up incentive for participants to install specific practices.
Authority:	U.S. Code Title 16, Chapter 58, Subchapter IV, Part I, subpart b
Eligible Entities:	The program is a partnership among producers; Tribal, State, and Federal governments; and, in some cases, private groups. CREP addresses high-priority conservation issues of both local and national significance, such as loss of critical habitat for threatened and endangered wildlife species, soil erosion, and reduced habitat for fish populations such as salmon. The land must have been owned or operated by the applicant for the previous 12 months and must have been planted in crops 2 of the last 5 years and be physically and legally capable of being planted in a normal manner.
Taxa:	Invasive plants/weeds
Contact Info:	County Department of Agriculture Service Center
Purpose:	CREP is a voluntary land retirement program that helps agricultural producers protect environmentally sensitive land, decrease erosion, restore wildlife habitat, and safeguard ground and surface water. Unique State and Federal partnerships allow one to receive incentive payments for installing specific conservation practices. Through the CREP, farmers can receive annual rental payments and cost-share assistance to establish long-term, resource-conserving covers on eligible land.

USDA Programs (continued)

Program Name:	Conservation Innovation Grants (CIG)
Agency:	USDA NRCS
Funding Method:	Environmental Quality Incentives Program (EQIP) funds are used to award competitive grants to non-Federal governmental or non-governmental organizations, Tribes, or individuals. CIG enables NRCS to work with other public and private entities to accelerate technology transfer and adoption of promising technologies and approaches to address some of the nation's most pressing natural resource concerns.
Match:	Selected applicants may receive grants up to 50 percent of the total project cost. Applicants must provide nonfederal matching funds for at least 50 percent of the project cost. An exception allows for beginning and limited resource farmers and ranchers, Tribes and community-based organizations representing these groups to obtain a higher percentage of project matching funds from in-kind contributions. The Federal contribution may not exceed \$1 million for a single project.
Authority:	Authorized as part of the EQIP with an unspecified annual funding level from FY 2003 thru FY 2007.
Eligible Entities:	EQIP funds are used to award competitive grants to non-Federal governmental or non-governmental organizations, Tribes, or individuals. Project must include participation of producers eligible under the EQIP. Project may be watershed based, regional, multi-state, or nation-wide in scope.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Kari Cohen, Natural Resources Specialist (202) 720-2335 (cig@usda.gov or kari.cohen@usda.gov)
Purpose:	CIG is a voluntary program intended to stimulate the development and adoption of innovative conservation approaches and technologies while leveraging federal investment in environmental enhancement and protection, in conjunction with agricultural production. CIG enables NRCS to work with other public and private entities to accelerate technology transfer and adoption of promising technologies and approaches to address some of the nation's most pressing natural resource concerns.

Program Name:	Grassland Reserve Program
Agency:	USDA NRCS, FSA, and FS are coordinating this program.
Funding Method:	Applications will be rated based on ranking and selection criteria developed in the states following broad national guidelines. USDA proposes that land eligibility criteria should focus on preserving the nation's most critical grassland resources, the native and natural grasslands and shrub lands.
Match:	Participants may choose a 10, 15, 20, or 30-year contract with USDA providing annual payments of not more than 75% of the grazing value of the land covered by the agreement for the length of the agreement.
Authority:	Section 2401 of the Farm Security and Rural Investment Act of 2002 (Pub. L. 107-171) amended the Food Security Act of 1985 to authorize this program.
Eligible Entities:	Offers for enrollment must contain at least 40 contiguous acres unless special circumstances exist that allow accepting a smaller acreage, as determined by the NRCS State Conservationist.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species

USDA Programs (continued)

Contact Info:	NRCS: Floyd Wood (202) 720-0242 (floyd.wood@usda.gov) and FSA: Jim Williams (202) 720-9562 (jim.williams@wdc.usda.gov)
Purpose:	GRP helps landowners restore and protect grassland, rangeland, pastureland, shrub land and certain other lands and provides assistance for rehabilitating grasslands.
<hr/>	
Program Name:	Conservation Technical Assistance (CTA)
Agency:	USDA NRCS
Funding Method:	Assistance is provided to land users voluntarily applying conservation and to those who must comply with local or state laws and regulations.
Match:	Not applicable
Authority:	NRCS and CTA established by Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6962) which combined the authorities of the former Soil Conservation Service (Soil Conservation Act of 1935) with seven cost-share programs for natural resource conservation.
Eligible Entities:	This program provides technical assistance to participants in USDA cost-share and conservation incentive programs. (Assistance is funded on a reimbursable basis from the Commodity Credit Corporation.) Private land users, communities, units of State and local government, and other Federal agencies are eligible recipients.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Walley Turner, National Program Manager (202) 720-1875 (walley.turner@usda.gov). Eligible participants contact their local USDA NRCS office to request assistance.
Purpose:	The CTA program provides voluntary conservation technical assistance to land-users, communities, units of State and local government, and other Federal agencies in planning and implementing conservation systems. This assistance is for planning and implementing conservation practices that address natural resource issues. It helps people voluntarily conserve, improve and sustain natural resources. Technical assistance is for planning and implementing natural resource solutions to reduce erosion, improve soil health, improve water quantity and quality, improve and conserve wetlands, enhance fish and wildlife habitat, improve air quality, improve pasture and range health, reduce upstream flooding, improve woodlands, and address other natural resource issues. The CTA program supports the National Resources Inventory (NRI). The NRI is a statistically based survey to assess conditions and trends of soil, water, and related resources on non-Federal lands in the United States.
<hr/>	
Program Name:	Plant Materials Program
Agency:	USDA NRCS
Funding Method:	NRCS field offices receive technical information and transfer it to end users, such as farmers and ranchers.
Match:	Not applicable
Authority:	The program operates under the basic authority of P.L. 74-46, Apr, 27, 1935, Ch., 85, Sec. 1, 49 Stat. 163, 16 U.S.C. 590 [a-f]. Other authorities include: 7 CFR Part 613, P.L. 95-192, P.L. 74-210 (7 U.S.C. 1010-1011), and 7 U.S.C. 6962.

USDA Programs (continued)

Eligible Entities:	It is limited to conservation cooperators' properties in conjunction with conservation districts, State Agricultural Experiment Stations, State Crop Improvement Associations and other Federal and State agencies. Plants or seed are not provided to the general public, and the public is not eligible to participate in the program.
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Robert Escheman, National Plant Materials Specialist (609) 561-3223 X20 (robert.escheman@usda.gov)
Purpose:	Technical assistance through plant science technology to NRCS field offices for transfer to end users, such as landowners and land managers. The program provides vegetative solutions for natural resource problems. It develops plant materials and information technology on how to establish and manage plants. The program emphasizes field-testing to determine a plant's value and restoration techniques.

Program Name:	Conservation on Private Lands Program
Agency:	USDA NRCS
Funding Method:	Competitive grants administered by the National Fish and Wildlife Foundation
Match:	At least 50 percent match required
Authority:	Soil Conservation and Domestic Allotment Act, 16 U.S.C. 590a – 590f; Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act
Eligible Entities:	Private landowners, primarily farmers and ranchers
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects, animals, animal pathogens, diseases, aquatic species
Contact Info:	Jody Olson, National Fish and Wildlife Foundation (202) 857-0166 x555 (Jody.Olson@nfwf.org)
Purpose:	Conservation and enhancement of wildlife and natural resources on private lands.

Program Name:	Pest Detection (Cooperative Agricultural Pest Survey—CAPS)
Agency:	USDA – Animal and Plant Health Inspection Service (APHIS)
Funding Method:	Cooperative Agreements
Match:	No matching funds are necessary.
Authority:	Plant Protection Act (7 U.S.C. 7701 et seq.)
Eligible Entities:	State Departments of Agriculture and their cooperating partners (occasionally universities)
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects
Contact Info:	Coanne O'Hern (301) 734-4387
Purpose:	The Pest Detection Program works to ensure the early detection of harmful or economically significant plant pests and weeds through a nationally-directed survey program through the CAPS network. The program works with State and university cooperators through national, regional, and State-level committees to prioritize survey projects and provides funds for State cooperators to conduct the agreed-upon surveys. The program also trains and equips State cooperators to conduct national surveys.

USDA Programs (continued)

Program Name:	Various Plant Health Programs
Agency:	USDA - APHIS
Funding Method:	Cooperative Agreements
Match:	No matching funds are necessary in most cases.
Authority:	Plant Protection Act (7 U.S.C. 7701 et seq.)
Eligible Entities:	State Departments of Agriculture
Taxa:	Invasive plants/weeds, plant pathogens/diseases, insects
Contact Info:	Assistant Deputy Administrator, Pest Detection and Management Programs (301) 734-3769
Purpose:	APHIS conducts a variety of survey, eradication, and management/control programs for invasive plant pests, diseases, and weeds. Depending on the program, State cooperators may conduct portions of the programs through cooperative agreements with APHIS. For example, APHIS provides funding for affected States to conduct eradication activities for Asian longhorned beetle, emerald ash borer, and citrus canker.
<hr/>	
Program Name:	Animal Health Monitoring and Surveillance
Agency:	USDA - APHIS
Funding Method:	Cooperative agreements
Match:	No matching funds are required.
Authority:	Animal Health Protection Act (7 U.S.C. 8301 et seq.)
Eligible Entities:	State Departments of Agriculture
Taxa:	Pests and diseases of livestock
Contact Info:	Debra Cox (301) 734-8093 (debra.cox@aphis.usda.gov)
Purpose:	The program conducts monitoring and surveillance activities for a variety of animal diseases, both invasive and domestic. While most of these activities are carried out by APHIS personnel, the program provides funding to State cooperators for specific initiatives, such as bovine spongiform encephalopathy testing and pilot projects for animal identification.
<hr/>	
Program Name:	Emergency Management Systems
Agency:	USDA – APHIS
Funding Method:	Cooperative agreements
Match:	No matching funds are required.
Authority:	Animal Health Protection Act (7 U.S.C. 8301 et seq.)
Eligible Entities:	State Departments of Agriculture and Tribal nations
Taxa:	Pests and diseases of livestock
Contact Info:	Glen Garris (301) 734-5875 (glen.i.garris@aphis.usda.gov)
Purpose:	The program cooperates with State partners and Tribal governments to implement and enhance emergency response capabilities for serious foreign animal disease outbreaks.

USDA Programs (continued)

Program Name: Various Animal Health Programs
Agency: USDA - APHIS
Funding Method: Cooperative agreements
Match: No matching funds are required.
Authority: Animal Health Protection Act (7 U.S.C. 8301 et seq.)
Eligible Entities: State Departments of Agriculture and Tribal nations
Taxa: Pests and diseases of livestock
Contact Info: Associate Deputy Administrator for National Animal Health Policy and Programs (301) 734-8093
Purpose: APHIS conducts a variety of survey, eradication, and management/control programs for invasive animal diseases. Depending on the program, State cooperators may conduct portions of the programs through cooperative agreements with APHIS. For example, APHIS provides funding for affected States and Tribes to conduct surveillance for chronic wasting disease and for States to conduct surveillance for scrapie.

Program Name: Wildlife Services Operations
Agency: USDA - APHIS
Funding Method: Cooperative agreements
Match: Cooperators provide matching funds, normally 50 percent of a project's cost.
Authority: Animal Damage Control (ADC) Act of March 2, 1931, (7 USC 426-426b, and 426c as amended)
Eligible Entities: State and local agencies, businesses, and private citizens
Taxa: Invasive animals
Contact Info: Bob Myers (301) 734-7921 (robert.p.myers@aphis.usda.gov)
Purpose: The Wildlife Services Operations program protects U.S. agriculture, natural resources, property, and human safety and health from wildlife damage and wildlife-borne diseases. The program works with affected States to manage certain invasive species, such as nutria in the Chesapeake Bay area, and to prevent the brown tree snake from becoming established in Hawaii.

Other Sources of Information on Grants

Below are some additional resources to help in identify invasive species resource opportunities. This list represents only a sample of what is potentially out there. Please contact local, State, and Federal agencies directly for additional possibilities. Several foundations and other non-profit institutions may also have programs that may assist you in finding resources for your activities. The best place to look for Federal grants is the new Federal Grants Portal Website: www.grants.gov.

- Federal Grants website <http://www.grants.gov> . There are 26 Federal grant-making agencies and over 900 individual grant programs that award over \$350 billion in grants each year. The grant community, including state, local and Tribal governments, academia and research institutions, and not-for-profits, need only visit one website, Grants.gov, to access the annual grant funds available across the Federal government.
- National Invasive Species Council web site www.invasivespecies.gov. It has a list of grant opportunities for salt cedar (*Tamarix sp.*) control, management, research and education.
- Pioneer Grants Program from the Chesapeake Bay Trust awards competitive grants (up to \$100,000 in 2004). Contact information: 410-974-2941 www.chesapeakebaytrust.org . The purpose of this program is to fund projects leading to achievement of Chesapeake 2000 Agreement restoration & protection goals; and to complete projects or develop implementation strategies for projects resulting in measurable non-point source nutrient reductions.
- Chesapeake Bay Small Watershed Grants Program is administered by the National Fish and Wildlife Foundation. It provides grants to organizations working on a local level to protect and improve watersheds in the Chesapeake Bay basin, while building citizen-based stewardship. Contact information: http://www.nfwf.org/programs/grant_apply.htm.
- Delaware Estuary Grants Program administered by the National Fish and Wildlife Foundation. It provides grants to organizations working on a local level to protect and improve watersheds in the Delaware Estuary, while building citizen-based resource stewardship. Contact information: http://www.nfwf.org/programs/grant_apply.htm.
- The Native Plant Conservation Initiative is administered by the National Fish and Wildlife Foundation. It supports on-the-ground conservation projects that protect, enhance, and/or restore native plant communities on public and private lands. Projects typically fall into one of three categories and may contain elements of each: protection and restoration, information and education, and inventory and assessment. Contact information: http://www.nfwf.org/programs/grant_apply.htm.
- The Pulling Together Initiative is administered by the National Fish and Wildlife Foundation. It provides a means for Federal agencies to be full partners with State and local agencies, private landowners, and other interested parties in developing long-term weed management projects within the scope of an integrated pest management strategy. Contact information: http://www.nfwf.org/programs/grant_apply.htm.
- The Center for Invasive Plant Management (Montana State University) has a variety of grant programs—recently about 50 Grants listed (some are limited to Western United States) at <http://www.weedcenter.org/grants/overview.html>.

Conclusion

Here are some additional contact names for USDA, these people are the invasive species coordinators from the agencies that sponsor or administer the USDA programs above.

USDA Senior Invasive Species Coordinator: Hilda Díaz-Soltero (202) 354-1880; hdiagnoltero@fs.fed.us

ERS Invasive Species Coordinator: Utpal Vasavada (202) 694-5540; vasavada@ers.usda.gov

CSREES Invasive Species Coordinator: Robert Nowierski (202) 401-4900; rnowierski@csrees.usda.gov

NRCS Invasive Species Coordinator: Doug Holy (202) 720-9096; doug.holy@usda.gov

FSA Invasive Species Coordinator: Jim Michaels (202) 690-0794; James_Michaels@wdc.usda.gov

FS National Forest System Invasive Species Coordinator: Mike Ielmini (202) 205-1049; mielmini@fs.fed.us

APHIS Invasive Species Coordinator: Bill Wallace (301) 734-5136; bill.s.wallace@aphis.usda.gov

USDA hopes this information is helpful for those working with invasive species. Partnerships and cost-sharing programs help all of us advance our goals of protecting our natural and agricultural resources and ensuring safe, healthy land and water for all of us to enjoy. Join with USDA in fighting invasive species: prepare, protect, and prevent. Thank you for all your hard work and all your future work in this important area.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202)720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202)720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

January, 2005
