02/03/06	1.0	Inaugural On The Map application	02/03/2006

On The Map Version 1.1.1 Update (John Carpenter)

New Features or Fixes

1. **The State of Iowa was added as the 16th On The Map state.**

2. **The following fixes were implemented:**
   a. Reset maximum packet size setting in MySQL - fixed an error associated with large overlay queries.
   b. Fixed a problem where certain multi-part counties were not selectable.
   c. Fixed a problem where the overlay key was disappearing when a Labor Shed map was resized.
   d. Fixed a problem where the user was unable to select the same circle or buffer center point twice in a row.
   e. A hand/pointer now displays over the tools in the selector panels.
   f. The very small red block that sometimes displays at the bottom left of the screen has been removed.
   g. The loading popup now has a 'clear' button which permits the user to stop the loading process.

Known and Unresolved Bugs

1. The Pair Area report generates an error when the user resizes the map between selection of the first and second area.
2. The Circle and Concentric Circle selection areas are not retaining the original selection point chosen by the user.
3. The Print/Save window does not yet provide 'save' options and the map image does into incorporate a map scale and overlay key.
