U.S. Department of Commerce

ECONOMICS AND STATISTICS ADMINISTRATION
SEPTEMBER 1993 BUREAU OF THE CENSUS

FOR WIRE TRANSMISSION 8:30 A.M. EDT., Thursday, October 14, 1993
The Census Bureau of the Department of Commerce announced today that advance estimates of U.S. retail sales for September adjusted for seasonal, holiday, and trading-day differences, but not for price changes, were $\$ 174.4$ bilion, an increase of 0.1 percent ( $\pm 1.0 \%$ ) from the previous month and were 6.1 percent ( $\pm 1.6 \%$ ) above September 1992. Total sales in the third quarter were 6.6 percent ( $\pm 1.6 \%$ ) above the same quarter a year ago. The July to August 1993 percent change was revised from +0.2 percent ( $\pm 1.0 \%$ ) as published in the August advance, to +0.5 percent ( $\pm 0.2 \%$ ).

Durable goods decreased 1.0 percent ( $\pm 2.5 \%$ ) from August but were up 10.7 percent from the previous year. Automotive dealers and furniture stores were up 11.4 percent and 12.6 percent, respectively, from September 1992.

Nondurable goods increased 0.8 percent ( $\pm 1.0 \%$ ) from August and were 3.5 percent above a year ago. General merchandise stores increased 1.0 percent from the previous month and were 8.6 percent above September 1992. Food store sales were up 3.0 percent from last year.

The advance estimates are based on a small subsample of the Bureau's full retail sales sample. Estimates from the advance and the subsequent full survey can differ because of the earlier reporting in the advance and because of sampling variability present in both surveys.

The Advance Monthly Retail Sales Report for October is scheduled to be released November 12, 1993 at 8:30 a.m.

## ESTIMATED MONTHLY RETAIL SALES

October 1990-September 1993
(Data adjusted for seasonal, holiday, and trading-day differences, but not for price changes)

Address inquiries concerning this report to Ronald Piencykoski, Business Division, Bureau of the Census, Washington, D.C. 20233. Telephone: (301) 763-5294 or (301) 763-7561.

This report is available the day of issue through the Department of Commerce's online Economic Bulletin Board. For information call (202) 4821986. The data are also available through the Census Bureau's online information service - CENDATA. CENDATA is available from Dialog Information Services, INC. (1-800-334-2564) and CompuServe (1-800-848-8199). The CENDATA staff at the Bureau of the Census (301-7632074) can provide content information and general guidance.

*Advance estimates are not available from the subsample panel for these kinds of business
NA Not available.
'Revised.
${ }^{1}$ Data are concurrently adjusted for seasonal variations, holiday, and trading-day differences, but not for price changes. Concurrent seasonal adjustment uses all available unadjusted estimates as input to the X-11 program and the factors derived from the program are used in calculating all seasonally adjusted data shown in this publication. Factors and explanatory material are contained in the Monthly Retail Trade Report, BR-93-08.
${ }^{2}$ Advance estimates are based on early reporting by a small subsample of the full survey panel. All other estimates are based on the full sample.
${ }^{3}$ Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business totals.
${ }^{4}$ GAF represents stores which specialize in department store types of merchandise.
Note: Totals include data for kinds of business not shown separately.

Table 3. Estimated Monthly Retail Sales of Large (Group II) Companies, by Kind of Business
To obtain space for additional charts, this table has been discontinued. These data are published in the Monthly Retail Trade, Sales and Inventories Report.

## Sample Design and Reliability of Data

The advance estimates are based on a small subsample of the Bureau's full retail sales sample. Estimates from the advance and the subsequent full survey can differ because of the earlier reporting in the advance and because of sampling variability present in both surveys.

Percentage differences between advance and full sample preliminary estimates of month-to-month percentage change in seasonally adjusted total retail store sales have ranged from approximately -0.9 percent to +1.0 percent with the average of the absolute differences about 0.4 percent for the past 12 months. For individual kind-of-business groups, these differences tend to be higher. Sampling variability of and revisions to advance-to-preliminary estimates are shown in table 4 below.

Preliminary estimates for August 1993 and final estimates for July 1993 based on the full sample are published later this month in the Monthly Retail Trade Report for August (BR-93-08). The complete report will provide sales estimates in greater detail and will present a description of revisions and the techniques used in developing the estimates.

The margin of sampling error, as used on page 1, indicates a range about the estimate which corresponds to a 90 percent confidence interval. If, for example, the estimate is up 0.8 percent and the margin of sampling error is 1.2 percentage points above or below the estimate, then the indicated range is -0.4 percent to +2.0 percent. If the range contains 0 , it is uncertain whether there was an increase or decrease. The Monthly Retail Trade Report includes explanations of confidence intervals and sampling variability along with additional measures of sampling variability.

'The ranges of sampling variability shown are based on sales estimates not adjusted for seasonal variation, holiday, and trading-day differences for the data months of November 1990-March 1991.
${ }^{2}$ The ranges shown for the retail trade total are based on sales estimates adjusted for seasonal variations, holiday, and trading-day differences for the 12 -month period, September 1992 - August 1993. The ranges for all other totals and kinds of business are based on the 12 -month period April 1990-March 1991.
Note: Coefficients of variation for the ratio of current quarter to current quarter a-year-ago estimates are approximately the same as thos the ratio of current quarter to previous quarter. See appendix B. Reliability of Data in the Monthly Retail Trade Report for a discussion of th measures of sampling variability.
