JULY/AUGUST 1974 REVIEW

This application requests support of nine projects at a cost of \$342,947. The proposed projects were selected on the basis of priority from a larger group.

Listed as new activities two of the projects would expand services of the Renal Disease Program at the Washington Hospital Center.

Project #18 (on ambulatory care data) is sponsored by the Metro Washington Council of Governments and is strongly endorsed by appropriate planning agencies.

All proposals have been submitted for CHP review and comment and responses from four agencies are reflected; all positive. Judging from correspondence included, interaction between Maryland, Virginia and D.C. planning interests seems extensive, extending beyond review and comment agreements.

MAY/JUNE 1974 REVIEW

Request: \$1,272,385

Committee Recommendation: \$1,100,000

Overall assessment by individual reviewers: Average - above average

Critique: This application requesting support for staff, eight ongoing projects and four new projects, appeared to the reviewers to be a cohesive request in line with the objectives and needs of the region. The Regional Advisory Group appears to be an active body in contrast to the situation several years ago; the review structure is well organized and the relationships of the RMP to the CHP agencies have been strengthened. The activities, both proposed and ongoing, appear to be directed at major needs for the population served, with a strong emphasis on improving clinical services for non-emergency patients and kidney diseases. The RMP has been effective in developing joint funding for a number of the projects.

The Committee believes this region has improved. The Committee recommends that the application be approved at a reduced level of \$1,100,000.

JULY/AUGUST REVIEW

Estimated request as of May 1974: \$450,000

EO/5/27/74
