CUSTOMS TARIFF

(as at 1 January 2003)¹

CUSTOMS TARIFF LAW, October 9, 1986
(as at 1 January 1999)

SECTION 1 Principles

Article 1 Extent of liability to duty

All goods imported or exported across the Swiss customs border shall be presented for clearance in accordance with the General Tariff in Annexes 1 and 2 to this Law, subject to exceptions laid down by treaties, by special provisions of laws or by Orders of the Federal Council made under this Law.

Article 2 Calculation of duty:

Goods shall be assessed to duty on the gross weight if no other duty assessment unit is provided.

The Federal Council shall issue provisions intended to ensure that goods shall be cleared on their gross weight, to prevent any attempt to evade duty and any unfair effects that this method of clearance may entail.

Where the duty assessment basis is 100 kg, the weight for clearance purposes shall be rounded up to the next 100 g.

SECTION 2 Customs Tariffs

Article 3 General Tariff

Where it is considered necessary the Federal Council may increase certain General Tariff rates of duty unilaterally.

Article 4 Working Tariff

When the interests of the Swiss economy so require, the Federal Council may temporarily apply customs duty agreements and the tariff rates resulting therefrom. It may, furthermore, temporarily enact tariff rates resulting from agreements, in accordance with Article 2 of the Federal Foreign Trade Law, June 25, 1982.

The Federal Council is empowered to reduce proportionately any rates which may prove to be too high in relation to reduced rates laid down in tariff treaties.

When the interests of the Swiss economy so require, the Federal Council may, irrespective of any tariff treaty and further to consultation with the Committee of Customs Experts:

- a) reduce duties appropriately;
- b) order the total or partial temporary suspension of the duties applicable to certain goods;
- c) set tariff quotas.

TARES ORDER, November 4, 1987 (as at January 1, 1996)
(As at 1 January 2002)

Article 1 Definitions

The gross weight comprises the effective weight of the goods and the weight of packing containers, packing materials and any supports with which the goods may be put up.

The net weight comprises the effective weight of the goods and the weight of supports and immediate packings. The net weight does not include the weight of packing used solely or principally for protecting the goods in international transport.

The tare is the difference between the gross weight and the net weight.

The additional tare is the weight supplement expressed as a percentage of the net weight (tare rate).

Article 2 Clearance according to gross weight

Goods whose packings offer sufficient protection against damage in transport are cleared according to their gross weight.

Unpacked goods or goods whose packings do not offer sufficient protection against damage in transport, will be subject to an additional tare. The rates for calculating the additional tare are given in the Annex.

Packaging is considered to offer sufficient protection against damage in transport if it complies with the requirements applicable to the type of transport in question.

Article 3 Cases in which the additional tare does not apply

The additional tare shall not apply to:

- a. goods which are usually transported unpacked; in international small package transport;
- b. goods transported by international postal traffic packed as appropriate for such traffic;

The following consignments may be cleared according to the net weight or the effective weight without an additional tare, whether or not placed under customs control packed:

- a) consignments which are almost within the requirements for duty-free treatment;
- b) consignments intended for official use, for public interest or welfare purposes.

Article 4 Clearance of packing containers and supports

Packing containers and supports shall be cleared separately:

- a) if they are subject to import duty at a rate significantly higher than the rate applicable to the goods they contain and, due to their nature, they may be suitable for repetitive use; or
- b) when circumstances clearly indicate the intention to evade the higher rates of duty which would be applicable thereto.

Article 5 Clearance according to net weight

At the request of the agent importing the goods, the following may be cleared, through principal Customshouses, in accordance with the net weight plus the additional tare:

Goods, for which no additional tare is fixed in the Annex, declared for clearance on the net weight, or unpacked in a free port and presented for clearance unpacked, will be subject to an additional tare equivalent to 10% of their net weight.

Article 6 Tare rate

The rates of additional tare, expressed as a percentage of the net weight, are given in the Annex.

The Federal Department of Finance may change the tare rate or complete the Annex if changes in the methods of packing goods so justify or, if necessary, to avoid abuse or unfair situations.

Article 7 Repeal of current duty and implementation

The Tares Order of December 1, 1959 is repealed.

This Order becomes effective on January 1, 1988.

PRELIMINARY PROVISIONS

Definitions:

“**Tariff Heading**” Column:

The first six digits of the Tariff heading are an integral part of the International Convention on the Harmonized Commodity Description and Coding System (HS), the first two indicating the Chapter in which the heading falls. The fifth and sixth digits indicate the HS subheading. The seventh and eighth indicate the Swiss subheading. Where the HS is not subdivided by Switzerland, the six-digit HS code ends in “00”.

S Indicates that special statistical information is required for goods of the heading or subheading concerned (*not given in this journal*)

D, R, R, r, r, A, B

Indicate Customs relief. See paragraph 11, “Goods which benefit from Customs Relief”.

CA Column

This column indicates the Customs Relief Code (CA). The CA determines the reduced rate of customs duty on clearance and, where necessary, the Inspection Tax. If clearance depends on conditions given in footnotes at the end of the Chapter, the CA must be indicated in accordance with the conditions which may be stipulated therein.

(1) From Bosnia-Herzegovina or Albania = NR

(2) Imported under code 1 of the General Import Permit (see § 6 "Prelim. Provs.") = see Chapter endnote for the corresponding NR.

(3) Imported within the framework of a special DGD (*Direction générale des douanes*) tariff quota (See § 19, Prelim. Provs.): Free

4. Provisions relative to the tare:

See the Tares Order, November 4, 1987. Tare rates in accordance with Article 6, 1st paragraph of the Tares Order, are given in the "Additional Tare" Column.

5. Value Added Tax (VAT):

5.1. General

The notes given in the VAT Column mean:

R = goods assessed to tax at the reduced rate of 2.4%; such goods are listed under 5.2.

N = goods assessed to tax at the standard rate of 7.6%.

R/N = These subheadings cover both goods assessed to tax at the reduced rate and those assessed to tax at the standard rate.

The classification of goods assessed to tax at the reduced rate is not related to their tariff classification. Therefore, the information given in the VAT Column can only be considered to be additional taxation information, they have no legal force. This means that certain Headings cover goods assessed to duty at the Reduced rate and certain goods assessed to duty at the Normal rate. In most cases this is expressly indicated by the symbol R/N in the "VAT" column. When this column contains only the symbol R or N it cannot be assumed, without further information, that the goods classified in the corresponding subheading may, without doubt, be assessed to tax at that rate.

5.2. Reduced rate of VAT

5.2.1. Water delivered by the mains

5.2.2. Foodstuffs and beverages.

Imports of foodstuffs and beverages, other than alcoholic beverages (beverages of an alcoholic strength by volume exceeding 0.5%) are assessed to tax at the reduced rate.

The following shall be taken to be foodstuffs and beverages assessed to tax at the reduced rate:

- All goods for human consumption, other than alcoholic beverages, which
- are fit for immediate consumption (for example, apples, cherries, bread, sugar, chocolate);
- become fit for consumption after simple preparation (cutting up, slicing, peeling, grinding, cooking, boiling, etc.) in the household, in hotels, restaurants, bakeries, butchers' shops and the food and beverages industries (flour, pasta, meat, vegetables, coffee, fish, etc.).
- The above used in the preparation of goods assessed to tax at the normal rate (for example, grape must for use in the preparation of alcoholic beverages, fruits for distillation).
- Agricultural produce, products of the forestry and fishing industries, including hydroponic produce, used in the preparation of foodstuffs and beverages for human consumption. The products concerned may be raw, semi-finished or finished (for example, sugar for the preparation of beverages; colza oil for the preparation of bakers' wares; vegetables for the preparation of juices; rabbits, partridges and pheasants for slaughter).
- Additives for foodstuffs and for non-alcoholic beverages (for example, baking powder, rennet, flavourings, colouring agents, gelling agents, thickeners, sweetening substances, mineral salts, vitamins, antioxidants, preservatives, yeast, auxiliary products for bakery and butchery, spices and mixtures of spices, artificial and natural sausage casings). On condition that such products comply with the requirements of the Swiss foodstuffs legislation.
- Materials and preparations used for technical purposes in the processing of foodstuffs (for example, anti-sticking oils for bakery machines, mould release oils for bakery, carbon dioxide cartridges for aerating non-alcoholic beverages, recharge cartridges for cream swelling devices, etc.). On condition that such products comply with the requirements of the Swiss foodstuffs legislation.

5.2.9. Newspapers, magazines, books and other printed matter not constituting advertising material

The following shall be taken to be forage products assessed to tax at the reduced rate:

- books
 - the term “books” shall be taken to mean printed matter which:
 - a) has a religious, literary, artistic, recreational, educational, instructive, informative, technical or scientific content; not constituting advertising material;
 - b) are in the form of books, brochures, leaflets or loose-leaf publications;
 - b) contain at least 16 pages, with the exception of children’s books, printed musical scores and loose-leaf part-works
- Newspapers and magazines

The expression “newspapers and magazines” shall be taken to mean publications appearing at least twice a year, carrying a fixed title, which are continuously numbered and dated, the periodicity should also be indicated, having an informational or entertainment content. Advertising material shall not be deemed to be newspapers or magazines.

Advertising material

Printed matter shall be deemed to be advertising material if it is clearly published for a commercial activity of the publisher or third party named therein. Advertising material is above all printed matter in which the editor’s goods or services are offered for sale, or which contain part of such goods or services (sample books, syllabuses, sales catalogues).

5.3 Standard rate of VAT

The following are assessed to tax at the standard rate:

- all goods not listed under 5.2;
- all goods which do not fulfil the conditions given in 5.2.

If the customhouse is not sure that assessment at the reduced rate is justified, the goods will be assessed to tax at the standard rate.

5.4 Additional services and sets

The provisions relative to additional services and sets apply only when different goods, assessed to tax at different rates, are imported together. When they are presented for clearance the customs must first decide whether one part is a principal service and the other an additional service. If both parts of the consignment are principal services then it will be considered to be a set.

5.4.1. Additional services provided with imported goods

The following will be considered to be provided with imports:

- Returnable packages
 - Packages, whatever their value, must always be considered to be additional services relative to the imported goods if they are of a kind normally used for packing such goods, even if, regardless of their use as packing, they have no durable value.
- Constituents and accessories
 - Constituents and accessories, of a kind normally presented with goods or having no independent durable value (for example, straws attached to fruit juice packages, spoons attached to ice-cream packages, can-openers attached to cans) will be considered to be additional services.
- Other services provided with imports
 - Services provided with imports, such as transport, planting and the like, are considered to be normal additional services. The cost of these additional services will be assessed to tax at the rate applicable to the principal service with which they are imported.

5.4.2. Sets

– Principal

For the purposes of assessment to tax, sets will be considered to be independent imports. If imports comprise goods assessed to tax at the reduced rate and goods assessed to tax at the standard rate, the individual goods will be assessed at the rate applicable thereto. The foreign supplier must, therefore, itemize the value of the goods on the statement of value, if this is not the case then all of the non-itemized goods will be assessed to tax at the standard rate.

– Exception

The above principal shall not apply if the 90% of the non-itemized goods are assessed to tax at the reduced rate. In that case all of the non-itemized goods will be assessed to tax at the reduced rate

This exception applies also if the non-itemized part of the set is mentioned in the value statement but that part which is assessed to tax at the standard rate is less than 10% of the total.

6. Import and export restrictions

GIP (General Import Permit) Procedure:

– Tariff Quota (e.g., 0101 11 10):

See § 19, Prelim. Provs.

– GIP Code (e.g., 0702 00 19):

For certain goods, the Federal Council may allow additional autonomous quotas at reduced rates or extra-quota standard rate. These rates are given in this document or by memorandum. Goods will be cleared at reduced rates only on request of the importer and the indication of the GIP 1 code.

7. Monopoly duties:

7.1 General

- a) Imports of goods containing alcohol, fit for human consumption, are, as a rule, subject to Monopoly duty (exceptions: see paragraph 7.2 below). Tariff subheadings covering such goods are indicated by the (M.D.) footnote. Imported goods containing ethyl alcohol, subject to the legislation concerning alcohol which are not indicated by the (M.D.) footnote, should be reported to the Federal Alcohol Authority (*Régie fédéral des alcools*) (RFA), including a copy of the import declaration.
- b) Monopoly duty will not be collected on goods of an alcoholic strength by volume not exceeding 1.2% vol.
- c) The expression “fit for human consumption” will be taken not to cover medicaments and pharmaceutical preparations or goods for scientific, chemical or technical uses. The RFA will decide whether Monopoly duty should be levied if there is any doubt.
- d) Goods classified in certain headings of the tariff may be cleared “for the preparation of foodstuffs not containing alcohol (if end-use is specified in the customs declaration)” free of Monopoly duty on condition that a commitment of use be registered with the RFA; i.e. preparations for the industrial or professional preparation of foodstuffs for immediate consumption not containing alcohol (see Chapter endnotes).

7.2 Definition: “Alcoholic goods obtained by fermentation only”:

shall be taken to mean:

- a) wine, cider, diluted cider, beer, fruit wine;
- b) vermouth and other wine of fresh grapes flavoured with plants or aromatic substances of heading 2205;
- c) fermented beverages, unmixed, obtained from other raw materials, e.g., sake, mead) (See D61, 2206, ch. 3-10).
- d) shandy, i.e., beer and lemonade mixed together (ex 2206.0090);
- e) mixtures of beverages consisting of sparkling wines or natural wines of heading 2204 (known as wine cocktails, ex 2206.0090);

Goods of an alcoholic strength not exceeding 15% vol, not containing added spirits, are **not** subject to Monopoly Duty.

Other goods containing alcohol, for human consumption (of an alcoholic strength exceeding 1.2% vol, whether or not containing added spirits) **are** subject to Monopoly Duty. Mixtures of beverages, alcopops and the like (subheading 2206 00 90, statistical code 802, 818), other than shandy or wine cocktails are also subject to duty.

7.3 Rate of duty (Additional Charge Code (ACC): 280)

The standard rate is Fr. 29/litre of pure alcohol (SCALE 001).

The reduced rate of Fr. 14.50/litre of pure alcohol (SCALE 002) applies to the following goods:

- a) Wine of fresh grapes, fruit wines and wines obtained from other raw materials, of an alcoholic strength by volume exceeding 15% vol but not exceeding 22% vol (ex headings 2204 and 2206);
- b) Sweet wines, specialities and mistelles, of an alcoholic strength by volume not exceeding 22% vol (ex subheadings 2204 2150 and 2204 2950, definitions: see D 6 I, 2204, Swiss Explanatory Notes, Ch 1-3);
- b) Vermouth and other wine of fresh grapes flavoured with plants or aromatic substances, of an alcoholic strength by volume not exceeding 22% vol (heading 2205);

Foodstuffs containing alcohol (for example, chocolate, fine bakers' wares) will be assessed to duty at the rate applicable to the alcoholic products contained therein.

The RFA may authorise importers to suspend the payment of duty when the spirituous beverages are stocked in customs warehouses or sealed warehouses. Monopoly duty is collected by the RFA when the goods are withdrawn from warehouse. The Scale of additional charges (SCALE) to be indicated on the import documents is 200 (= a rate of 0.00). Only spirituous beverages (headings and subheadings 2106 90 29, 2204, 2205, 2206, 2208, 3302 10 00) may be cleared with Monopoly duty suspended. Monopoly duty will be collected on imports of other goods containing alcohol (for example, chocolate (heading 1806 and fine bakers' wares, heading 1905).

7.4 What should be indicated on the import declaration

- a) The exact alcoholic strength in % vol should be included in the text of the declaration in the single document and in the additional charges box in model 90. Importers must prove the calculation of quantity (litres).
- b) The RFA permit No.(box 44 (single document), “Permit” box (model 90)) must be stipulated if suspension is requested.

8. Veterinary Legislation

The veterinary legislation is enshrined in the following acts:

The Epizootic Diseases Order (RS 916.401), the Animal Waste Disposal Order (RZ 916.441.22), the Meat Inspection Order (RS 817.191), the Animal Protection Order (RS 455.1), the Animal and Animal Products Import, Transit and Export Order (ITEO) (RS 916.443.11), the Federal Veterinary Office Tax Collection Order (RS 916.412), the Convention on International Trade in Endangered Species (CITES) and its corresponding Orders (RS 0.453, RS 453, RS 453.1, RS 453.3).

The abbreviations used in relation to the veterinary legislation, given in footnotes at the end of Chapters, have the meanings hereunder assigned to them:

V.i. Veterinary inspection.

CITES Convention on International Trade in Endangered Species (also known as the Washington Convention on the Preservation of Species).

The following abbreviations indicate that the conditions stipulated should be met in compliance with the veterinary legislation.

OVF

V.i.

Indicates that goods of the heading concerned will be inspected by the border veterinary inspector. The rates of tax to be collected are given in the table below. If the heading or the indication V.i. is qualified by the term "ex", only the animals or goods specifically listed are subject to inspection and tax.

In principle, import provisions in force apply also to goods stored in a Customs warehouse. The veterinary inspection is, however, free of charge.

The provisions relative to the quantity of goods admitted without permit (see paragraph 6, Import and Export restrictions, not given in this Journal) apply also to the veterinary inspection.

Goods not subject to permit in accordance with the veterinary legislation will not be subject to veterinary inspection, except:

- unaccompanied pet cats and dogs;
- forage of animal origin of headings 0508, 0511 and 2309

See the General clause below concerning goods covered by the CITES convention.

Indicates that the animals and goods concerned are subject to permit only by virtue of the Washington Convention on the Preservation of Species, determined by the Convention and its annexes. Information on the subject is available from the Federal Veterinary Office (...).

General Clause

Goods for which no mention of CITES is made in the tariff but which, on the basis of a document, packing, description or label, are clearly parts of animals or animal products, listed in Annexes I - III of the Convention or birds, protected by virtue of hunting control law (e.g., pianos with ivory keys, guitars containing tortoise-shell, arms of any kind combined with goods subject to the preservation of species, "artificial flowers" of feathers of protected birds) will also be subject to the legislation on the preservation of species and, in consequence, subject to veterinary inspection by the border veterinary inspector. The tax and the border veterinary inspection are set at the flat rate of Fr. 13/100 kg gross, with a minimum of Fr. 24 per consignment (see table below, SCALE 099).

9. Plant health legislation

The abbreviations, appearing in the footnotes at the end of the Chapter, indicate the regulations applicable (subject to inspection and compulsory certification) on import. Goods stocked in Customs warehouses are subject to the same regulations.

Plant-health inspections are carried out by the Plant-health service of the Federal Bureau of Agriculture (*Office fédéral de l'agriculture* (OFAG)) or by the Customs Service depending on the goods concerned. The responsibility of each service is laid down in Notice No.1 of the OFAG.

Terms used in relation to plant-health regulations have the meanings hereby assigned to them:

“Compulsory inspection and certificate”

Goods are inspected by the Federal plant-health service, which also sets the rate of tax to be collected. Plant health certificates are necessary for certain goods only if they are imported from and originating in specified countries. Goods may be imported only through customshouses approved for that purpose.

“Compulsory certificate”

Goods must, in all cases, be accompanied by a plant health certificate. Random inspections may be carried out if the plant health service of the OFAG so orders by special directive.

Countries listed in the in the Swiss “European” Foreign Trade Statistics Directory will be considered to be European, with the exception of Armenia, Azerbaijan, Kazakhstan, Kirghizstan, Uzbekistan, Tajikistan and Turkmenistan.

All other countries are considered to be non-European within the meaning of the plant health legislation.

“CITES flora, compulsory certificate”

Where this phrase is given, it means that the plants, vegetable products and plant-based products in question must be covered by a valid “conservation of species” certificates, by virtue of the Washington Convention on the conservation of species, customshouses collect the certificates (without charge). No permit is required. The determining factor is the Convention and the annexes thereto. Information on the subject is available from the Federal Veterinary Office.

General Clause

Plants, vegetable products and plant-based products for which the tariff makes no mention of the convention on the conservation of species, but for which a document, wrapping, description or label would tend to imply that they are listed in Annexes I-III of the convention (for example, a picture frame of precious wood of protected species) are also covered by the legislation on the conservation of species and, in consequence, subject to permit.

To obtain a Customs relief certificate the importer must present an end-use commitment and have obtained a permit from the General Directorate of Customs (*Direction générale des douanes* (DGD)), Customs relief, export charges and completion for re-export, 3003 Berne.

r, r Have the same meaning as “R”, and “R”, and, in addition, the requirement stipulated in the footnotes at the end of the Chapter must also be fulfilled.

D End-use must be stipulated in the import declaration.

The declaration has legal force, it attests that the goods imported will not be used or transferred for purposes other than those given in the text of the declaration.

A Specified goods may be imported free of duty by virtue of the Agreement of 12 April, 1979 concerning the trade in civil aircraft (RS 0.632.231.8) and the Order, of 3 December, 1984 implementing the GATT Agreement on the trade in civil aircraft (RS 632.231). See List A, Goods benefiting from relief.

B Specified goods of the subheadings concerned for embroidery may be imported at a reduced rate.

14. Mineral oil tax and surtax

The following requirements should be fulfilled when importing goods liable to the mineral oil tax. The tax is indicated for the tariff codes concerned by a footnote.

The tax declaration is made on the customs declaration on import. The warehouse code (box 44 (single document), "EC" box (model 90)) indicates the type of tax under which the goods should be declared.

Codes:

Warehouse code 1: The goods are entered for consumption; final tax declaration.

Warehouse code 2: The goods are entered for consumption; provisional tax declaration.

Warehouse code 3: Transport of untaxed goods to an approved warehouse.

Warehouse code 4: Transport of untaxed goods to a compulsory reserves warehouse which is not an approved warehouse.

Warehouse code 5: Transport of untaxed goods to privileged users.

When goods are declared under warehouse code 1 or 2, the ACC and **Scale** should be declared for the purposes of levying the mineral oil tax (box 47 (single document), "additional charge" box (model 90)).

The applicable rates are given in two tables: Table I: the tax tariff in accordance with Annex 1 to the Mineral Oil Tax Law (RS 641.61) and Table II: tax reductions in accordance with the Federal Department of Finance Order, other than tax reductions granted by the reimbursement procedure.

Explanatory notes to the tables

- Tariff subheading column
The Tariff heading corresponding to the Customs tariff.
- ACC column
Additional charge code (see Note 1. above).
- Scale column
Scale of additional charges (see Note 1. above).

– Remarks (**Rem.**) column

The abbreviation "De" (End-use) indicates that the corresponding rate of tax will be levied, if

- the goods are used in accordance with the end-use indicated for the tax reduction, and
- the end-use is indicated on the import declaration (e.g.: "toluole, not intended for use as fuel").

The abbreviation "D" (guarantee declaration) indicates that the corresponding rate of tax will be levied, if

- the goods are used in accordance with the end-use indicated for the tax reduction, and
- the importer deposits a special declaration with the Directorate General of Customs The offices concerned are published in a data base on intranet. When a declaration is made under Warehouse code 1 or 2, the number of the guarantee declaration or the special declaration should be indicated on the tax declaration (box 44 (single document), "TIT-REV" box (model 90)). Furthermore, the service requirements for the tax on mineral oils also apply.

15. Motor vehicle tax:

15.1 Object

The Federal Motor Vehicle Tax Law of June 21, 1996 provides for a tax of 4% on importation of the following vehicles:

- motor vehicles for the transport of 10 or more persons, including the driver, weighing not more than 1 600 kg each (subheadings 8702 10 10 and 8702 90 10 of the Customs Tariff);
- motor cars and other motor vehicles principally designed for the transport of persons (other than those of paragraph a)), including station wagons and racing cars (subheadings 8703 10 00-90 30 of the Customs Tariff);
- motor vehicles for the transport of goods, weighing not more than 1 600 kg each (subheadings 8704 21 10 and 21 20, 31 10 and 31 20, 90 10 and 90 20 of the Customs Tariff).

The Additional Charge Code (ACC 660) and the Scale of Additional charges (SCALE) 001 should be indicated in box 47 (single document) or the "additional charges" box (model 90).

15.2 Basis of calculation

The basis of calculation corresponds, in principle, to that of value added tax, i.e.:

- on the invoice price for a contract of sale or commission
- on the catalogue price in all other cases.

Any customs duty (motor vehicles of heading 8703 of the Customs Tariff) and additional costs (transport, etc. costs) up to the first destination on Swiss territory must be included in the basis of calculation. The tax authority may increase the taxable value to include the value of missing parts of incomplete or unfinished vehicles.

The following are not liable to tax on importation:

- a) chassis fitted with cabs;
- b) "motor wagons" in accordance with Article 11, paragraph 2 g) of the Motor vehicles (technical specifications) Order of June 19, 1995 (RS 741.41; RO 1995 4425);

17. Incentive tax

The following conditions must be observed when importing goods subject to the incentive tax on extra-light heating oil and volatile organic compounds (VOC).

The tax is indicated by a reference to a Chapter endnote for the tariff subheadings concerned.

17.1 Extra light heating oil

Extra light heating oil of a sulphur content by weight of more than 0.1% is subject to the Incentive Tax. For customs purposes, this concerns the gas oils of the following tariff subheadings:

- 2710.1992: extra light heating oil, dyed and marked;
- 2710.1912: diesel oil; this product must subsequently be converted into extra light heating oil at an approved warehouse.

The incentive tax is levied in accordance with the Revenue Duty on Mineral Oils. The Warehouse Code set out in paragraph 14 of the Preliminary Provision indicates how goods are to be treated for tax purposes with regard to the Incentive Tax. Goods subject to the Incentive Tax may be cleared under the following Warehouse Codes:

- diesel oil: 3;
- heating oil: 1 to 5.

The Additional Charge Code (ACC) and the Scale of Additional Charges (SCALE) applicable to goods classified under codes 1 and 2 should be declared, in accordance with the following table, in addition to information concerning the Mineral Oil Tax (box 47 (single document, "additional charges" box (model 90)).

Tariff heading	Description of goods	Rate of Tax.	ACC	Rate of Tax
				Fr./1 000 l at 15°C
2710.1992	Extra light heating oil of a sulphur content by weight of more than 0.1%	710	940	10.14

17.2 Volatile Organic Compounds (VOC)

17.2.1 The following will be liable to tax:

- a) VOC given in the list of products (see § 17.2.6);
- b) VOC covered by a) above contained in imported goods given in the list of goods (incentive tax is indicated by a footnote at the end of the Chapter covering the headings concerned).

17.2.2 The following will not be liable to tax on import:

- a) VOC contained in products of a VOC content not exceeding 3% by weight;
- b) Methylated spirits of subheading 2207.2000 solely for use as fuel and described as such on the label, in containers holding not more than 10 litres;
- b) Petroleum oil of subheading 2710.1991 solely for use as fuel and described as such on the label, put up in containers for retail sale;
- d) Liquefied propane of subheading 2711.1290 and liquefied butane of subheading 2711.1390, if containing odoriferous substances, for use as fuel (the import declaration should contain the statement "no VOC tax" on importation of such liquefied gas for use as fuel).

17.2.3 Importation

The incentive tax is, in general, collected on importation. However, holders of certificates of authorization linked to a formal commitment in accordance with article 21 of the Volatile Organic Compounds Incentive Tax Order (VOCO); RS 814.018) may import VOC which will not be subject to the tax temporarily. The names of the holders concerned are published on the Intranet.

The import declaration (Box No.47 (single document), "additional charges" box (model 90)) must state the quantity (in kg) of VOC contained in the imported goods. If the consignment contains several goods containing VOC, the invoice, delivery notice or other documents must state the VOC content in kg (or percentage by weight) and the net weight of each product. VOC should be listed in the import declaration in accordance with their tariff classification.

The import declaration for goods, for which an incentive tax is indicated by Chapter endnotes not containing VOC or whose VOC content does not exceed 3% should contain the statement "no VOC tax".

**VOC Incentive Tax Table
(Additional Charge Code [ACC]: 700)**

ACC	Rate of Tax - Fr. per kg of VOC
001 3.--
002	Temporarily not liable to tax within the framework of a formal commitment procedure. The number and the date of issue of the certificate of authorization should be indicated on the import declaration (box 44 (single document), "authorization" box (model 90)).

17.2.4 Value added Tax

The value for the calculation of the VAT on imported goods liable to the tax shall include the tax itself. This also applies when payment is deferred if the import or consignee holds a formal commitment procedure authorization certificate.

18. Anticipative Elimination Tax (Taxe d'Élimination Anticipée (TEA)) on glass containers

18.1. General

The Beverage Containers Order (*ordonnance sur les emballages pour boissons* (OEB; RS 814.621)) legislates for the provision and return of beverage containers for consumption in Switzerland and the financial provisions for the elimination of glass containers. Importers must pay the anticipative elimination tax (TEA) on glass containers to an organization approved by the Federal Office for the Environment, Forestry and the Landscape (*l'Office fédéral de l'environnement, des forêts et du paysage* (OFEFP)).

18.2. What should be indicated on the import declaration

The Federal Customs Administration informs the organization responsible for the payment of the TEA of imports of consignments concerned. The import declaration should contain the following additional information:

- the statistical code indicated on the (a) pages of the tariff (Chapter endnotes in this Journal);
- in addition, for glass bottles:
 - the Additional Charge Code (ACC) 970;
 - the scale of additional charges (SCALE) due relative to capacity, in conformity with the following table
 - The number of bottles, in the "Additional Charges, quantity" box (TEI 90) and "Tax basis" (DU, box 47);
- The rate of the charge (Fr. 0.--) need not be indicated. The rate of the charge is Fr. 0.--.

Additional Charge Code (ACC) 970

ACC	Capacity of the container
001	Less than 0.09 litre
002	0.09 litre or more but not more than 0.33 litre
003	More than 0,33 litre but not more than 0,6 litre
004	More than 0.6 litre

19. Tariff quotas

19.1 General

Under certain conditions, contractual tariff quotas open the market to a fixed quantity of goods at a reduced rate of duty (Tariff quota rate (taux du contingent tarifaire (TCT)) or preferential rate).

The way in which the quota is managed is distinct from the permit issuing office. The goods listed hereunder are managed by the Federal Customs Administration. The federal office of agriculture (*L'Office fédéral de l'agriculture* (OFG)) manages the remaining tariff quotas (see § 6, Prelim. Provs.).

19.2 Quota allotment

19.2.1 Global quotas

Global quotas covering

- natural wines of tariff headings 2204.2121, 2131, 2141, 2921, 2922, 2931 and 2932 in accordance with the Viticulture and Wine Imports Order (Wine Order, RS 916.140),
- eggs for human consumption and eggs for processing of tariff heading 0407.0010, in accordance with the Egg Marketing Order (Egg order, OO; RS 916.371),
- asses, mules and hinnies of tariff headings 0101.1021 and 0101.9021, in accordance with the Equine Animals Import Order (Horse Imports Order, OICh; RS 919.322.1),

are treated in the chronological order of acceptance of the import declaration (the "first come, first served" principle). The quota will be attributed automatically if the Number of the General Import Permit (GIP) is given on declarations submitted electronically. When the tariff quota is exhausted, goods will be cleared at the out-quota rate only.

19.2.2 Preferential quotas

(see also the Duties Order applicable to goods originating in EFTA and EC countries

[Free-Trade Order; RS 632.421.0], the Duties Order applicable to goods originating in countries which have concluded free-trade agreements (excluding the EC and EFTA) and the Cheese Import/Export order applicable to trade with the European Communities [RS 632.110.411, RO 2002 902])

Preferential tariff quotas covering

- feathers of tariff heading 0505.1090
- mineral waters of tariff heading 2202.1000
- other non-alcoholic beverages of tariff heading 2202.9090
- dog and cat food of tariff headings 2309.1021 and 2309.1029
- cigarettes of tariff heading 2404.2020
- Smoking tobacco of tariff heading 2403.1000
- olive oil of tariff heading 1509.1091

are allotted in accordance with the **reimbursement procedure**. Imports within the framework of tariff quotas are cleared at the normal rate of duty, in so far as no other preferential rate applies. The Federal Customs Administration allots the tariff quota on request. The order of arrival of requests and, for goods of tariff headings 2402.2000 and 2403.1000, the date of acceptance of the import declaration determine allotment. On the day on which the tariff quota will be exhausted, it is allotted proportionally in relation to the total quantity required on that day. Requests must be presented, in writing, to the Federal Customs Administration, with the original of the Customs receipt, copy of the Customs declaration and proof of origin. The Federal Customs Administration reimburses the difference between the import duty received and the preferential customs duties provided the correct documents are been presented.

Preferential tariff quotas covering

- cut flowers of tariff headings 0603.1031, 1041, 1051 and 1059 ⁽¹⁾
- tomatoes of tariff headings 0702.0010, 0020, 0030 and 0090
- Iceberg lettuce of tariff heading 0705.1111
- Witloof chicory of tariff heading 0705.2110
- aubergines of tariff heading 0709.3010

- Retsina of tariff headings 2204.2121, 2921 and 2922

are treated in the chronological order of acceptance of the import declaration (the “**first come, first served**” principle).

The quota will be attributed automatically if the Number of the General Import Permit (GIP) is given on declarations submitted electronically. When the corresponding quota is exhausted no more goods will be cleared within the framework of the Preferential Tariff Quota

19.2.3 Special Tariff Quotas

(see also the Preferential Duties Order applicable to goods originating in developing countries [Preferential Tariff Order RS 632.911]).

SWISS CUSTOMS IMPORT TARIFF

GENERAL RULES FOR THE INTERPRETATION OF THE HARMONIZED SYSTEM

Classification of goods in the Nomenclature shall be governed by the following principles:

1. The titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions.
2. a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled.
- b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

⁽¹⁾ The OFG grants General import Permit (GPI) numbers and allots fractions of tariff quotas to importers on the basis of imports in the preceding year.

3. When by application of Rule 2 b) or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:
 - a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
 - b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3 a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
 - b) When goods cannot be classified by reference to 3 a) or b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein :
 - a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This Rule does not, however, apply to containers which give the whole its essential character;
 - b) Subject to the provisions of Rule 5 a) above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related Subheading Notes and, *mutatis mutandis*, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

ADDITIONAL SWISS RULES

1. The classification of goods in Swiss subheadings shall be determined according to the terms of those subheadings and, Any related Swiss notes and, *mutatis mutandis*, to the above Rules, on the understanding that only Swiss subheadings at the same level are comparable. For the purposes of this Rule the relative section, chapter and subheading Notes also apply, unless the context of Swiss subheadings otherwise requires.
2. Unless the context of the Tariff and the Customs Law otherwise requires, used articles shall be assessed to duty at the rates applicable to new articles.
3. Unless the context of the Tariff otherwise requires the unit-weight shall be taken to mean the effective weight of the goods concerned.
4. The term "container", as used in certain subheadings, shall be taken to mean any immediate packing containing goods, of wood, sheet metal, glass, paperboard, paper, plastic or any other material.

CHAPTER 4

DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

NOTES

1. The expression "milk" means full cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0405:
 - a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids-not-fat content of 2% by weight and a maximum water content of 16% by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralizing salts and cultures of harmless lactic-acid-producing bacteria.
 - b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
 - a) a milkfat content, by weight of the dry matter, of 5% or more;
 - b) a dry matter content, by weight, of at least 70% but not exceeding 85%; and
 - c) they are moulded or capable of being moulded.
4. This Chapter does not cover:
 - a) products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702); or
 - b) albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).

SUBHEADING NOTES

1. For the purposes of subheading 0404 10, the expression "modified whey" means products consisting of whey constituents, i.e., whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of subheading 0405 10 the term "butter" does not include dehydrated butter or ghee (subheading 0405 90).

 provided that they retain the character of dried fruit or dried nuts.

**CHAPTER 11
PRODUCTS OF THE MILLING INDUSTRY; MALT; STARCHES; INULIN; WHEAT GLUTEN**

NOTES

1. This Chapter does not cover:
 - a) roasted malt put up as coffee substitutes (heading 0901 or 2101);
 - b) prepared flours, groats, meals or starches of heading 1901;
 - c) corn flakes or other products of heading 1904;
 - d) vegetables, prepared or preserved, of heading 2001, 2004 or 2005;
 - e) pharmaceutical products (Chapter 30); or
 - f) starches having the character of perfumery, cosmetic or toilet preparations (Chapter 33).
2. A) Products from the milling of the cereals listed in the table below fall in this Chapter if they have, by weight on the dry product:
 - a) a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in Column (2); and
 - b) an ash content (after deduction of any added minerals) not exceeding that indicated in Column (3).

Otherwise, they fall in heading 2302. However, germ of cereals, whole, rolled, flaked or ground, is always classified in heading 1104.
- B) Products falling in this Chapter under the above provisions shall be classified in heading 1101 or 1102 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in Column (4) or (5) is not less, by weight, than that shown against the cereal concerned.

Otherwise, they fall within heading 1103 or 1104

Cereal (1)	Starch content (2)	Ash content (3)	Rate of passage through a sieve with an aperture of	
			315 micrometres (microns) (4)	500 micrometres (microns) (5)
Wheat and rye	45%	2.5%	80%	–
Barley	45%	3 %	80%	–
Oats	45%	5 %	80%	–
Maize (corn) and grain sorghum	45%	2 %	–	90%
Rice	45%	1.6%	80%	–
Buckwheat	45%	4 %	80%	–

3. For the purposes of heading 1103, the terms “groats” and “meal” mean products obtained by the fragmentation of cereal grains, of which:
 - a) in the case of maize (corn) products, at least 95% by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
 - b) in the case of other cereal products, at least 95% by weight passes through a woven metal wire cloth sieve with an aperture of 1.25 mm.

**SECTION IV
PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES**

NOTE

1. In this Section the term “pellets” means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

**CHAPTER 16
PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES**

NOTES

- This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading 0504.
- Food preparations fall in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 1902 or to the preparations of heading 2103 or 2104.

SUBHEADING NOTES

- For the purposes of subheading 1602 10, the expression “homogenized preparations” means preparations of meat, meat offal or blood, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 1602.
- The fish and crustaceans specified in the subheadings of heading 1604 or 1605 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

 - b) food preparations containing more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof (Chapter 16); or
 - c) homogenized composite food preparations of heading 2104.
2. Headings 2007 and 2008 do not apply to fruit jellies, fruit pastes, sugar-coated almonds or the like in the form of sugar confectionery (heading 1704) or chocolate confectionery (heading 1806).

For the purposes of subheading 2005 10, the expression “homogenized vegetables” means preparations of vegetables, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparations for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of vegetables. Subheading 2005 10 takes precedence over all other subheadings of heading 2005.
2. For the purposes of subheading 2007 10, the expression “homogenized preparations” means preparations of fruit, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition, no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. **CHAPTER 22
BEVERAGES, SPIRITS AND VINEGAR**

NOTES

1. This Chapter does not cover:
 - a) products of this Chapter (other than those of heading 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally heading 2103);
 - b) sea water (heading 2501);
 - c) distilled or conductivity water or water of similar purity (heading 2851);
 - d) acetic acid of a concentration exceeding 10% by weight of acetic acid (heading 2915);
 - e) medicaments of heading 3003 or 3004; or
 - f) perfumery or toilet preparations (Chapter 33).
2. For the purposes of this Chapter and of Chapters 20 and 21, the “alcoholic strength by volume” shall be determined at a temperature of 20°C.
3. For the purposes of heading 2202, the term “non-alcoholic beverages” means beverages of an alcoholic strength by volume not exceeding 0.5% vol. Alcoholic beverages are classified in headings 2203 to 2206 or heading 2208 as appropriate.

SUBHEADING NOTE

1. For the purposes of subheading 2204 10, the expression “sparkling wine” means wine which, when kept at a temperature of 20°C in closed containers, has an excess pressure of not less than 3 bars.

SWISS NOTE

1. Alcoholic beverages are classified in heading 2204 according to their total alcoholic strength. The total alcoholic strength is the sum of the alcohol actually present and of the unfermented sugar convertible into alcohol.

NOTES

1. This Chapter does not cover:
 - a) slag or similar industrial waste prepared as macadam (heading 2517);
 - b) natural magnesium carbonate (magnesite), whether or not calcined (heading 2519);
 - c) Sludges from the storage tanks of petroleum oils, consisting mainly of such oils (heading 2710);

 - g) copper, nickel or cobalt mattes produced by any process of smelting (Section XV).
2. For the purposes of headings 2601 to 2617, the term “ores” means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading 2844 or of the metals of Section XIV or XV, even if they are intended for non-metallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
3. Heading 2620 applies only to:
 - a) ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals, excluding ash and residues from the incineration of municipal waste (heading 2621); and
 - b) ash and residues containing arsenic, whether or not containing metals, of a kind used either for the extraction of arsenic or metals or for the manufacture of their chemical compounds.

SUBHEADING NOTES

1. For the purposes of subheading 2620 21, “leaded gasoline sludges and leaded anti-knock compound sludges” mean sludges obtained from storage tanks of leaded gasoline and leaded anti-knock compounds (for example, tetraethyl lead), and consisting essentially of lead, lead compounds and iron oxide.
2. Ash and residues containing arsenic, mercury, thallium or their mixtures, of a kind used for the extraction of arsenic or those metals or for the manufacture of their chemical compounds, are to be classified in subheading 2620 60.

CHAPTER 27
MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

NOTES

1. This Chapter does not cover:
 - a) separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading 2711;
 - b) medicaments of heading 3003 or 3004; or
 - c) mixed unsaturated hydrocarbons of heading 3301, 3302 or 3805.
2. References in heading 2710 to “petroleum oils and oils obtained from bituminous minerals” include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.
 However, the references do not include liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1 013 millibars when a reduced-pressure distillation method is used (Chapter 39).
3. For the purposes of heading 2710, “waste oils” means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in Note 2 to this Chapter), whether or not mixed with water. These include:
 - a) such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);
 - b) sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of primary products; and
 - c) such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills, storage tank washings, or from the use of cutting oils for machining operations.

SUBHEADING NOTES

1. For the purposes of subheading 2701 11, “anthracite” means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14%.
2. For the purposes of subheading 2701 12, “bituminous coal” means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14% and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5 833 kcal/kg.
3. For the purposes of subheadings 2707 10, 2707 20, 2707 30, 2707 40 and 2707 60, the terms “benzol (benzene)”, “toluol (toluene)”, “xylol (xylenes)”, “naphthalene” and “phenols” apply to products which contain more than 50% by weight of benzene, toluene, xylenes, naphthalene or phenols, respectively.
4. For the purposes of subheading 2710 11, “light oils and preparations” are those of which 90% or more by volume (including losses) distil at 210°C (ASTM D 86 method).

SECTION VI PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES

NOTES

1. a) Goods (other than radioactive ores) answering to a description in heading 2844 or 2845 are to be classified in those headings and in no other heading of the Nomenclature.
b) Subject to paragraph a) above, goods answering to a description in heading 2843 or 2846 are to be classified in those headings and in no other heading of this Section.
2. Subject to Note 1 above, goods classifiable in heading 3004, 3005, 3006, 3212, 3303, 3304, 3305, 3306, 3307, 3506, 3707 or 3808 by reason of being put up in measured doses or for retail sale are to be classified in those headings and in no other heading of the Nomenclature.
3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII are to be classified in the heading appropriate to that product, provided that the constituents are:
 - a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - b) presented together; and
 - c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

CHAPTER 28 INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES

NOTES

1. Except where the context otherwise requires, the headings of this Chapter apply only to:
 - a) separate chemical elements and separate chemically defined compounds, whether or not containing impurities;
 - b) the products mentioned in a) above dissolved in water;
 - c) the products mentioned in a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - d) the products mentioned in a), b) or c) above with an added stabilizer (including an anti-caking agent) necessary for their preservation or transport;
 - e) the products mentioned in a), b), c) or d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.
2. In addition to dithionites and sulphonylates, stabilized with organic substances (heading 2831), carbonates and peroxocarbonates of inorganic bases (heading 2836), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 2837), fulminates, cyanates and thiocyanates of inorganic bases (heading 2838), organic products included in headings 2843 to 2846 and carbides (heading 2849), only the following compounds of carbon are to be classified in this Chapter:
 - a) oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading 2811);
 - b) halide oxides of carbon (heading 2812);
 - c) carbon disulphide (heading 2813);
 - d) thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiamminochromates (reineckates) and other complex cyanates, of inorganic bases (heading 2842);
 - e) hydrogen peroxide, solidified with urea (heading 2847), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (heading 2851) other than calcium cyanamide, whether or not pure (Chapter 31).

3. Subject to the provisions of Note 1 to Section VI, this Chapter does not cover:
- a) sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;
 - b) organo-inorganic compounds other than those mentioned in Note 2 above;
 - c) products mentioned in Note 2, 3, 4 or 5 to Chapter 31;
 - d) inorganic products of a kind used as luminophores, of heading 3206; glass frit and other glass in the form of powder, granules or flakes, of heading 3207;
 - e) artificial graphite (heading 3801); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; cultured crystals (other than optical elements) weighing not less than 2.5 g each, of the halides of the alkali or alkaline-earth metals of heading 3824;
 - f) precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (headings 7102 to 7105), or precious metals or precious metal alloys of Chapter 71;
 - g) the metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or
 - h) optical elements, for example, of the halides of the alkali or alkaline-earth metals (heading 9001).
4. Chemically defined complex acids consisting of a non-metal acid of sub-Chapter II and a metal acid of sub-Chapter IV are to be classified in heading 2811.
5. Headings 2826 to 2842 apply only to metal or ammonium salts or peroxysalts.
Except where the context otherwise requires, double or complex salts are to be classified in heading 2842.
6. Heading 2844 applies only to:
- a) technetium (atomic 43), promethium (atomic 61), polonium (atomic 84) and all elements with an atomic number greater than 84;

 - e) spent (irradiated) fuel elements (cartridges) of nuclear reactors;
 - f) radioactive residues whether or not usable.
- The term "isotopes", for the purposes of this Note and of the wording of headings 2844 and 2845, refers to:
- individual nuclides, excluding, however, those existing in nature in the monoisotopic state;
 - mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.
7. Heading 2848 includes copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus.
8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this Chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading 3818.

CHAPTER 29 ORGANIC CHEMICALS

NOTES

1. Except where the context otherwise requires, the headings of this Chapter apply only to:
 - a) separate chemically defined organic compounds, whether or not containing impurities;
 - b) mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
 - c) the products of headings 2936 to 2939 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 2940, or the products of heading 2941, whether or not chemically defined;
 - d) the products mentioned in a), b) or c) above dissolved in water;
 - e) the products mentioned in a), b) or c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - f) the products mentioned in a), b), c), d) or e) above with an added stabilizer (including an anti-caking agent) necessary for their preservation or transport;
 - g) the products mentioned in a), b), c), d), e) or f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
 - h) the following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotizable amines and their salts.
2. This Chapter does not cover:
 - a) goods of heading 1504 or crude glycerol of heading 1520;
 - b) ethyl alcohol (heading 2207 or 2208);
 - c) methane or propane (heading 2711);
 - d) the compounds of carbon mentioned in Note 2 to Chapter 28;
 - e) urea (heading 3102 or 3105);
 - f) colouring matter of vegetable or animal origin (heading 3203); synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 3204) or dyes or other colouring matter put up in forms or packings for retail sale (heading 3212);
 - g) enzymes (heading 3507);
 - h) metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm³ (heading 3606);
 - ij) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; or
 - k) optical elements, for example, of ethylenediamine tartrate (heading 9001).
3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.
4. In headings 2904 to 2906, 2908 to 2911 and 2913 to 2920, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.
Nitro and nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading 2929.
For the purposes of headings 2911, 2912, 2914, 2918 and 2922, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 2905 to 2920.
5. a) The esters of acid-function organic compounds of sub-Chapters I to VII with organic compounds of these sub-Chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-Chapters.
b) Esters of ethyl alcohol with acid-function organic compounds of sub-Chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.

- c) Subject to Note 1 to Section VI and Note 2 to Chapter 28:
- 1) inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-Chapters I to X or heading 2942, are to be classified in the heading appropriate to the organic compound; and
 - 2) salts formed between organic compounds of sub-Chapters I to X or heading 2942 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter.
- d) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 2905).
- e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
6. The compounds of headings 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms.
 Heading 2930 (organo-sulphur compounds) and heading 2931 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).
7. Headings 2932, 2933 and 2934 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids or imides of polybasic acids.
 These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclizing function or functions here listed.
8. For the purposes of heading 2937:
- a) the term “hormones” includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);
 - b) the expression “used primarily as hormones” applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

SUBHEADING NOTE

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named “Other” in the series of subheadings concerned.

CHAPTER 38 MISCELLANEOUS CHEMICAL PRODUCTS

NOTES

1. This Chapter does not cover:
 - a) Separate chemically defined elements or compounds with the exception of the following:
 - 1) artificial graphite (heading 3801);
 - 2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products put up as described in heading 3808;
 - 3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 3813);
 - 4) certified reference materials specified in Note 2 below;
 - 5) products specified in Note 3 a) or 3 c) below;
 - b) Mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally heading 2106);
 - c) ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of Note 3 a) or 3 b) to Chapter 26 (heading 2620);
 - d) Medicaments (heading 3003 or 3004); or
 - e) Spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 2620), spent catalysts of a kind used principally for the recovery of precious metal (heading 7112) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
2. A) For the purpose of heading 3822, the expression “certified reference materials” means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 3822 shall take precedence over any other heading in the Nomenclature.
3. Heading 3824 includes the following goods which are not to be classified in any other heading of the Nomenclature:
 - a) cultured crystals (other than optical elements) weighing not less than 2.5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
 - b) fusel oil; Dippel’s oil;
 - c) ink removers put up in packings for retail sale;
 - d) stencil correctors and other correcting fluids put up in packings for retail sale; and
 - e) ceramic firing testers, fusible (for example, Seger cones).
4. Throughout the Nomenclature, “municipal waste” means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term “municipal waste”, however, does not cover:
 - a) individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the Nomenclature;
 - b) industrial waste;
 - c) waste pharmaceuticals, as defined in Note 4 k) to Chapter 30; or
 - d) clinical waste, as defined in Note 6 a) below.
5. For the purposes of heading 3825, “sewage sludge” means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilized sludge. Stabilized sludge when suitable for use as fertilizer is excluded (Chapter 31).
6. For the purposes of heading 3825, the expression “other wastes” applies to:
 - a) clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
 - b) waste organic solvents;

- c) wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and
 d) other wastes from chemical or allied industries.

The expression "other wastes" does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 2710).

SUBHEADING NOTE

1. For the purposes of subheadings 3825 41 and 3825 49, "waste organic solvents" are wastes containing mainly organic solvents, not fit for further use as presented as primary products, whether or not intended for recovery of the solvents.

SECTION VII PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

NOTES

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - b) presented together; and
 - c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of heading 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

CHAPTER 39 PLASTICS AND ARTICLES THEREOF

NOTES

1. Throughout the Nomenclature the expression "plastics" means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerization or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticizer) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.
Throughout the Nomenclature any reference to "plastics" also includes vulcanized fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.
2. This Chapter does not cover:
 - a) waxes of heading 2712 or 3404;
 - b) separate chemically defined organic compounds (Chapter 29);
 - c) heparin or its salts (heading 3001);
 - d) solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading 3208); stamping foils of heading 3212;
 - e) organic surface-active agents or preparations of heading 3402;
 - f) run gums or ester gums (heading 3806);
 - g) diagnostic or laboratory reagents on a backing of plastics (heading 3822);
 - h) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;
 - ij) saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;
 - k) plaits, wickerwork or other articles of Chapter 46;
 - l) wall coverings of heading 4814;
 - m) goods of Section XI (textiles and textile articles);
 - n) articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);
 - o) imitation jewellery of heading 7117;
 - p) articles of Section XVI (machines and mechanical or electrical appliances);
 - q) parts of aircraft or vehicles of Section XVII;
 - r) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

- s) articles of Chapter 91 (for example, clock or watch cases);
 - t) articles of Chapter 92 (for example, musical instruments or parts thereof);
 - u) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
 - v) articles of Chapter 95 (for example, toys, games, sports requisites); or
 - w) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).
3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
- a) liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1 013 millibars when a reduced-pressure distillation method is used (headings 3901 and 3902);
 - b) resins, not highly polymerized, of the coumarone-indene type (heading 3911);
 - c) other synthetic polymers with an average of at least 5 monomer units;
 - d) silicones (heading 3910);
 - e) resols (heading 3909) and other prepolymers.
4. The expression “copolymers” covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.
For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.
If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.
5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. In headings 3901 to 3914, the expression “primary forms” applies only to the following forms:
- a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
 - b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
7. Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).
8. For the purposes of heading 3917, the expression “tubes, pipes and hoses” means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
9. For the purposes of heading 3918, the expression “wall or ceiling coverings of plastics” applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
10. In headings 3920 and 3921, the expression “plates, sheets, film, foil and strip” applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of sub-Chapter II:
- a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;
 - b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
 - c) gutters and fittings therefor;
 - d) doors, windows and their frames and thresholds for doors;
 - e) balconies, balustrades, fencing, gates and similar barriers;
 - f) shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;

- g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
- h) ornamental architectural features, for example, flutings, cupolas, dovescotes; and
- ij) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

SUBHEADING NOTES

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
 - a) Where there is a subheading named “Other” in the same series:
 - 1) The designation in a subheading of a polymer by the prefix “poly” (e.g., polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.
 - 2) The copolymers named in subheadings 3901 30, 3903 20, 3903 30 and 3904 30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content.
 - 3) Chemically modified polymers are to be classified in the subheading named “Other”, provided that the chemically modified polymers are not more specifically covered by another subheading.
 - 4) Polymers not meeting 1), 2) or 3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.
 - b) Where there is no subheading named “Other” in the same series:
 - 1) Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.
 - 2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.
 Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.
2. For the purposes of subheading 3920 43, the term “plasticizers” includes secondary plasticizers.

CHAPTER 40 RUBBER AND ARTICLES THEREOF

NOTES

1. Except where the context otherwise requires, throughout the Nomenclature the expression “rubber” means the following products, whether or not vulcanized or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This Chapter does not cover:
 - a) goods of Section XI (textiles and textile articles);
 - b) footwear or parts thereof of Chapter 64;
 - c) headgear or parts thereof (including bathing caps) of Chapter 65;
 - d) mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
 - e) articles of Chapter 90, 92, 94 or 96; or
 - f) articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 4011 to 4013).
3. In headings 4001 to 4003 and 4005, the expression “primary forms” applies only to the following forms:
 - a) liquids and pastes (including latex, whether or not pre-vulcanized, and other dispersions and solutions);
 - b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In Note 1 to this Chapter and in heading 4002, the expression “synthetic rubber” applies to:
 - a) unsaturated synthetic substances which can be irreversibly transformed by vulcanization with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanizing activators or accelerators, may be added; the presence of substances as provided for by Note 5 b) ii) and iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;
 - b) thioplasts (TM); and
 - c) natural rubber modified by grafting or mixing with plastics, depolymerized natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanization, elongation and recovery in a) above.
5. a) Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
 - i) vulcanizing agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanized rubber latex);
 - ii) pigments or other colouring matter, other than those added solely for the purpose of identification;
 - iii) plasticizers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under b);b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
 - i) emulsifiers or anti-tack agents;
 - ii) small amounts of breakdown products of emulsifiers;
 - iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), anti-oxidants, coagulants, crumbling agents, freeze-resisting agents, peptizers, preservatives, stabilizers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of heading 4004, the expression “waste, parings and scrap” means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanized rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 4008.
8. Heading 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.

9. In headings 4001, 4002, 4003, 4005 and 4008, the expressions “plates”, “sheets” and “strip” apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.
In heading 4008 the expressions “rods” and “profile shapes” apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

RAW HIDES AND SKINS (OTHER THAN FURSKINS) AND LEATHER

NOTES

1. This Chapter does not cover:
 - a) parings or similar waste, of raw hides or skins (heading 0511);
 - b) birdskins or parts of birdskins, with their feathers or down, of heading 0505 or 6701; or
 - c) hides or skins, with the hair or wool on, raw, tanned or dressed (Chapter 43); the following are, however, to be classified in Chapter 41, namely, raw hides and skins with the hair or wool on, of bovine animals (including buffalo), of equine animals, of sheep or lambs (except Astrakhan, Broadtail, Caracul, Persian or similar lambs, Indian, Chinese, Mongolian or Tibetan lambs), of goats or kids (except Yemen, Mongolian or Tibetan goats and kids), of swine (including peccary), of chamois, of gazelle, of reindeer, of elk, of deer, of roebucks or of dogs.

CHAPTER 48
PAPER AND PAPERBOARD; ARTICLES OF PAPER PULP, OF PAPER OR OF PAPERBOARD

NOTES

1. For the purposes of this Chapter, except where the context otherwise requires, a reference to “paper” includes references to paperboard (irrespective of thickness or weight per m²).
2. This Chapter does not cover:
 - a) articles of Chapter 30;
 - b) stamping foils of heading 3212;
 - c) perfumed papers or papers impregnated or coated with cosmetics (Chapter 33);
 - d) paper or cellulose wadding impregnated, coated or covered with soap or detergent (heading 3401), or with polishes, creams or similar preparations (heading 3405);
 - e) sensitized paper or paperboard of headings 3701 to 3704;
 - f) paper impregnated with diagnostic or laboratory reagents (heading 3822);
 - g) paper-reinforced stratified sheeting of plastics, or one layer of paper or paperboard coated or covered with a layer of plastics, the latter constituting more than half the total thickness, or articles of such materials, other than wall coverings of heading 4814 (Chapter 39);
 - h) articles of heading 4202 (for example, travel goods);
 - ij) articles of Chapter 46 (manufactures of plaiting material);
 - k) paper yarn or textile articles of paper yarn (Section XI);
 - l) articles of Chapter 64 or Chapter 65;
 - m) abrasive paper or paperboard (heading 6805) or paper- or paperboard-backed mica (heading 6814) (paper and paperboard coated with mica powder are, however, to be classified in this Chapter);
 - n) metal foil backed with paper or paperboard (Section XV);
 - o) articles of heading 9209; or
 - p) articles of Chapter 95 (for example, toys, games, sport requisites) or Chapter 96 (for example, buttons).
3. Subject to the provisions of Note 7, headings 4801 to 4805 include paper and paperboard which have been subjected to calendering, super-calendering, glazing or similar finishing, false water-marking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibres, coloured or marbled throughout the mass by any method. Except where heading 4803 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed.
4. In this Chapter the expression “newsprint” means uncoated paper of a kind used for the printing of newspapers, of which not less than 65% by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m² and not more than 65 g/m².
5. For the purposes of heading 4802, the expressions “paper and paperboard, of a kind used for writing, printing or other graphic purposes” and “non perforated punch-cards and punch tape paper” mean paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process and satisfying any of the following criteria:
 For paper or paperboard weighing not more than 150 g/m²:
 - a) containing 10% or more of fibres obtained by a mechanical or chemi-mechanical process, and
 1. weighing not more than 80 g/m², or
 2. coloured throughout the mass; or
 - b) containing more than 8% ash, and
 1. weighing not more than 80 g/m², or
 2. coloured throughout the mass; or
 - c) containing more than 3% ash and having a brightness of 60% or more; or
 - d) containing more than 3% but not more than 8% ash, having a brightness less than 60%, and a burst index equal to or less than 2.5 kPa.m²/g; or

e) containing 3% ash or less, having a brightness of 60% or more and a burst index equal to or less than 2.5 kPa.m²/g.

For paper or paperboard weighing more than 150 g/m²:

- a) coloured throughout the mass; or
- b) having a brightness of 60% or more, and
 - 1. a caliper of 225 micrometres (microns) or less, or
 - 2. a calliper of more than 225 micrometres (microns) but not more than 508 micrometres (microns) and an ash content of more than 3%; or
- c) having a brightness of less than 60%, a caliper of 254 micrometres (microns) or less and an ash content of more than 8%.

Heading 4802 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.

- 6. In this Chapter “kraft paper and paperboard” means paper and paperboard of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.
- 7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings 4801 to 4811 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.
- 8. Headings 4801 and 4803 to 4809 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:
 - a) in strips or rolls of a width exceeding 36 cm; or
 - b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.
- 9. For the purposes of heading 4814, the expression “wallpaper and similar wall coverings” applies only to:
 - a) paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:
 - i) grained, embossed, surface-coloured, design-printed or otherwise surface-decorated (e.g., with textile flock), whether or not coated or covered with transparent protective plastics;
 - ii) with an uneven surface resulting from the incorporation of particles of wood, straw, etc.;
 - iii) coated or covered on the face side with plastics, the layer of plastics being grained, embossed, coloured, design-printed or otherwise decorated; or
 - iv) covered on the face side with plaiting material, whether or not bound together in parallel strands or woven;
 - b) borders and friezes, of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration;
 - c) wall coverings of paper made up of several panels, in rolls or sheets, printed so as to make up a scene, design or motif when applied to a wall.

Products on a base of paper or paperboard, suitable for use both as floor coverings and as wall coverings, are to be classified in heading 4815.
- 10. Heading 4820 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.
- 11. Heading 4823 applies, *inter alia*, to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.
- 12. Except for the goods of heading 4814 or 4821, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

7. For the purposes of subheading 4810 22, “light-weight coated paper” means paper coated on both sides, of a total weight not exceeding 72 g/m², with a coating weight not exceeding 15 g/m² per side, on a base of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical process.

- B) For the purposes of the above rule:
 - a) gimped horsehair yarn (heading 5110) and metallized yarn (heading 5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

4. A) For the purposes of Chapters 50, 51, 52, 54 and 55, the expression “put up for retail sale” in relation to yarn means, subject to the exceptions in paragraph B below, yarn (single, multiple (folded) or cabled) put up:

7. For the purposes of this Section, the expression “made up” means:
- cut otherwise than into squares or rectangles;
 - produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);
 - hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;
 - cut to size and having undergone a process of drawn thread work;
 - assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);
 - knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.
8. For the purposes of Chapters 50 to 60:
- Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and
 - Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.
9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.
10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.
11. For the purposes of this Section, the expression “impregnated” includes “dipped”.
12. For the purposes of this Section, the expression “polyamides” includes “aramids”.
13. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale. For the purposes of this Note, the expression “textile garments” means garments of headings 6101 to 6114 and headings 6201 to 6211.

SUBHEADING NOTES

1. In this Section and, where applicable, throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:
- Elastomeric yarn**
 Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.
 - Unbleached yarn**
 Yarn which:
 - has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or
 - is of indeterminate colour (“grey yarn”), manufactured from garnetted stock.
 Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).
 - Bleached yarn**
 Yarn which:
 - has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
 - consists of a mixture of unbleached and bleached fibres; or
 - is multiple (folded) or cabled and consists of unbleached and bleached yarns.

d) Coloured (dyed or printed) yarn

Yarn which:

- i) is dyed (whether or not in the mass) other than white or in a fugitive colour, or printed, or made from dyed or printed fibres;
- ii) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;
- iii) is obtained from slivers or rovings which have been printed; or
- iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply, *mutatis mutandis*, to monofilament and to strip or the like of Chapter 54.

e) Unbleached woven fabric

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

f) Bleached woven fabric

Woven fabric which:

- i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
- ii) consists of bleached yarn; or
- iii) consists of unbleached and bleached yarn.

g) Dyed woven fabric

Woven fabric which:

- i) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or
- ii) consists of coloured yarn of a single uniform colour.

h) Woven fabric of yarns of different colours

Woven fabric (other than printed woven fabric) which:

- i) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);
- ii) consists of unbleached or bleached yarn and coloured yarn; or
- iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvages and piece ends is not taken into consideration).

ij) Printed woven fabric

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process).

The process of mercerization does not affect the classification of yarns or fabrics within the above categories.

The definitions at e) to ij) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

k) Plain weave

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 or of heading 5809 consisting of the same textile materials.

B) For the application of this rule:

- a) where appropriate, only the part which determines the classification under Interpretative Rule 3 shall be taken into account;
- b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
- c) in the case of embroidery of heading 5810 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

**CHAPTER 54
MAN-MADE FILAMENTS**

NOTES

1. Throughout the Nomenclature, the term “man-made fibres” means staple fibres and filaments of organic polymers produced by manufacturing processes, either:
 - a) by polymerization of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or
 - b) by chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates. The terms “synthetic” and “artificial”, used in relation to fibres, mean:
synthetic: fibres as defined at a); artificial: fibres as defined at b).
The terms “man-made”, “synthetic” and “artificial” shall have the same meanings when used in relation to “textile materials”.
2. Headings 5402 and 5403 do not apply to synthetic or artificial filament tow of Chapter 55.

CHAPTER 56
WADDING, FELT AND NONWOVENS; SPECIAL YARNS;
TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

NOTES

1. This Chapter does not cover:
 - a) wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading 3401, polishes, creams or similar preparations of heading 3405, fabric softeners of heading 3809) where the textile material is present merely as a carrying medium;
 - b) textile products of heading 5811;
 - c) natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 6805);
 - d) agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 6814); or
 - e) metal foil on a backing of felt or nonwovens (Section XV).
2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.
3. Headings 5602 and 5603 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular). Heading 5603 also includes nonwovens in which plastics or rubber forms the bonding substance. Headings 5602 and 5603 do not, however, cover:
 - a) felt, impregnated, coated, covered or laminated with plastics or rubber, containing 50% or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
 - b) nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or
 - c) plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
4. Heading 5604 does not cover textile yarn, or strip or the like of heading 5404 or 5405, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

CHAPTER 59
IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

NOTES

1. Except where the context otherwise requires, for the purposes of this Chapter the expression “textile fabrics” applies only to the woven fabrics of Chapters 50 to 55 and headings 5803 and 5806, the braids and ornamental trimmings in the piece of heading 5808 and the knitted or crocheted fabrics of headings 6002 to 6006.
2. Heading 5903 applies to:
 - a) textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:
 - 1) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
 - 2) products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually Chapter 39);
 - 3) products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
 - 4) fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);
 - 5) plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or
 - 6) textile products of heading 5811;
 - b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 5604.
3. For the purposes of heading 5905, the expression “textile wall coverings” applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading 4814) or on a textile backing (generally heading 5907).
4. For the purposes of heading 5906, the expression “rubberized textile fabrics” means:
 - a) textile fabrics impregnated, coated, covered or laminated with rubber,
 - i) weighing not more than 1 500 g/m²; or
 - ii) weighing more than 1 500 g/m² and containing more than 50% by weight of textile material;
 - b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 5604; and
 - c) fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre.

This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of heading 5811.
5. Heading 5907 does not apply to:
 - a) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
 - b) fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);
 - c) fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this heading;
 - d) fabrics finished with normal dressings having a basis of amylaceous or similar substances;
 - e) wood veneered on a backing of textile fabrics (heading 4408);
 - f) natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading 6805);
 - g) agglomerated or reconstituted mica, on a backing of textile fabrics (heading 6814); or
 - h) metal foil on a backing of textile fabrics (Section XV).

6. Heading 5910 does not apply to:
- a) transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or
 - b) transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 4010).
7. Heading 5911 applies to the following goods, which do not fall in any other heading of Section XI:
- a) textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of headings 5908 to 5910), the following only:
 - i) textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);
 - ii) bolting cloth;
 - iii) straining cloth of a kind used in oil presses or the like, of textile material or of human hair;
 - iv) flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;
 - v) textile fabrics reinforced with metal, of a kind used for technical purposes;
 - vi) cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;
 - b) textile articles (other than those of headings 5908 to 5910) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in paper-making or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

CHAPTER 61
ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

NOTES

1. This Chapter applies only to made up knitted or crocheted articles.
2. This Chapter does not cover:
 - a) goods of heading 6212;
 - b) worn clothing or other worn articles of heading 6309; or
 - c) orthopaedic appliances, surgical belts, trusses or the like (heading 9021).
3. For the purposes of headings 6103 and 6104:
 - a) the term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

 - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
 - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
 - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
 - b) the term "ensemble" means a set of garments (other than suits and articles of heading 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
 - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 6112.
4. Headings 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading 6105 does not cover sleeveless garments.
5. Heading 6109 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.
6. For the purposes of heading 6111:
 - a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
 - b) articles which are, *prima facie*, classifiable both in heading 6111 and in other headings of this Chapter are to be classified in heading 6111.
7. For the purposes of heading 6112, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:
 - a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

b) a “ski ensemble”, that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

- one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
- one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The “ski ensemble” may also consist of an overall similar to the one mentioned in paragraph a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a “ski ensemble” must be made up in a fabric of the same texture, style and composition, whether or not of the same colour, they must also be of corresponding or compatible size.

8. Garments which are, *prima facie*, classifiable both in heading 6113 and in other headings of this Chapter, excluding heading 6111, are to be classified in heading 6113.

9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men’s or boys’ garments and those designed for right over left closure at the front as women’s or girls’ garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

CHAPTER 62
ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

NOTES

1. This Chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 6212).
2. This Chapter does not cover:
 - a) worn clothing or other worn articles of heading 6309; or
 - b) orthopaedic appliances, surgical belts, trusses or the like (heading 9021).
3. For the purposes of headings 6203 and 6204:
 - a) the term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

 - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
 - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
 - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
 - b) the term "ensemble" means a set of garments (other than suits and articles of heading 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
 - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 6211.
4. For the purposes of heading 6209:
 - a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
 - b) articles which are, *prima facie*, classifiable both in heading 6209 and in other headings of this Chapter are to be classified in heading 6209.
5. Garments which are, *prima facie*, classifiable both in heading 6210 and in other headings of this Chapter, excluding heading 6209, are to be classified in heading 6210.
6. For the purposes of heading 6211, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:
 - a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
 - b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
 - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading 6213). Handkerchiefs of which any side exceeds 60 cm are to be classified in heading 6214.
8. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.
Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.
9. Articles of this Chapter may be made of metal thread.

GLASS AND GLASSWARE**

NOTES

1. This Chapter does not cover:
 - a) goods of heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
 - b) articles of Chapter 71 (for example, imitation jewellery);
 - c) optical fibre cables of heading 8544, electrical insulators (heading 8546) or fittings of insulating material of heading 8547;
 - d) optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;
 - e) lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 9405;
 - f) toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
 - g) buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
2. For the purposes of headings 7003, 7004 and 7005:
 - a) glass is not regarded as “worked” by reason of any process it has undergone before annealing;
 - b) cutting to shape does not affect the classification of glass in sheets;
 - c) the expression “absorbent, reflecting or non-reflecting layer” means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.
3. The products referred to in heading 7006 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of heading 7019, the expression “glass wool” means:
 - a) mineral wools with a silica (SiO₂) content not less than 60% by weight;
 - b) mineral wools with a silica (SiO₂) content less than 60% but with an alkaline oxide (K₂O or Na₂O) content exceeding 5% by weight or a boric oxide (B₂O₃) content exceeding 2% by weight.
 Mineral wools which do not comply with the above specifications fall in heading 6806.
5. Throughout the Nomenclature, the expression “glass” includes fused quartz and other fused silica.

SUBHEADING NOTE

1. For the purposes of subheadings 7013 21, 7013 31 and 7013 91, the expression “lead crystal” means only glass having a minimum lead monoxide (PbO) content by weight of 24%.

SWISS NOTE

1. Glass articles, with ground stoppers and necks, of which the ends, base or sides have been ground or polished for technical purposes only, shall be assessed to duty at the rates applicable to unworked articles.

 - a) of natural or cultured pearls or of precious or semi-precious stones (natural, synthetic or reconstructed), or
 - b) of precious metal or of metal clad with precious metal, are to be classified in this Chapter.
2. a) Headings 7113, 7114 and 7115 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph b) of the foregoing Note does not apply to such articles.
b) Heading 7116 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).
3. This Chapter does not cover:
 - a) amalgams of precious metal, or colloidal precious metal (heading 2843);

4. a) The expression "precious metal" means silver, gold and platinum.
b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.
c) The expression "precious or semi-precious stones" does not include any of the substances specified in Note 2 b) to Chapter 96.

5. For the purposes of this Chapter, any alloy (including a sintered mixture and an intermetallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:
 - a) an alloy containing 2% or more, by weight, of platinum, is to be treated as an alloy of platinum;
 - b) an alloy containing 2% or more, by weight, of gold but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;
 - c) other alloys containing 2% or more, by weight, of silver are to be treated as alloys of silver.
6. Except where the context otherwise requires, any reference in the Nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in Note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.
7. Throughout the Nomenclature the expression “metal clad with precious metal” means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.
8. Subject to Note 1 a) to Section VI, goods answering to a description in heading 7112 are to be classified in that heading and in no other heading of the Nomenclature.
9. For the purposes of heading 7113, the expression “articles of jewellery” means:
 - a) any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, ear-rings, watch-chains, fobs, pendants, tie-pins, cuff-links, dress-studs, religious or other medals and insignia); and
 - b) articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses, cachou boxes).
10. For the purposes of heading 7114, the expression “articles of goldsmiths’ or silversmiths’ wares” includes such articles as ornaments, tableware, toilet-ware, smokers’ requisites and other articles of household, office or religious use.
11. For the purposes of heading 7117, the expression “imitation jewellery” means articles of jewellery within the meaning of paragraph a) of Note 9 above (but not including buttons or other articles of heading 9606, or dress-combs, hair-slides or the like, or hairpins, of heading 9615), not incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

SUBHEADING NOTES

1. For the purposes of subheadings 7106 10, 7108 11, 7110 11, 7110 21, 7110 31 and 7110 41, the expressions “powder” and “in powder form” mean products of which 90% or more by weight passes through a sieve having a mesh aperture of 0.5 mm.
2. Notwithstanding the provisions of Chapter Note 4 b), for the purposes of subheadings 7110 11 and 7110 19, the expression “platinum” does not include iridium, osmium, palladium, rhodium or ruthenium.
3. For the classification of alloys in the subheadings of heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals.

Throughout the Nomenclature, the expression “base metals” means: iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.
4. Throughout the Nomenclature, the term “cermets” means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term “cermets” includes sintered metal carbides (metal carbides sintered with a metal).
5. Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74):
 - a) an alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals;
 - b) an alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present;
 - c) in this Section the term “alloys” includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.
6. Unless the context otherwise requires, any reference in the Nomenclature to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.
7. Classification of composite articles:
Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the Interpretative Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals.

For this purpose:

- a) iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
 - b) an alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and
 - c) a cermet of heading 8113 is regarded as a single base metal.
8. In this Section, the following expressions have the meanings hereby assigned to them:

a) **Waste and scrap:**

Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

b) **Powders:**

Products of which 90% or more by weight passes through a sieve having a mesh aperture of 1 mm.

SWISS NOTE

1. Unless otherwise provided, base metals and articles thereof will be classified in the Nomenclature in accordance with the following definitions:

a) "Unworked" shall be taken to mean goods obtained by casting, forging, rolling, drawing, swaging or stamping but not further worked.

The following operations shall not be deemed to constitute working: removal of sprues, risers, burrs and defects of casting or moulding, by deburring, milling, hammering, chiselling, or filing; descaling; removal of feeder heads or hot tops; pickling; sand-blasting; roughing down; scraping, and other operations intended solely to detect defects in the metal; the application of rough coatings of graphite, oil, tar, red lead or similar products obviously intended to protect the goods from rust or corrosion; the presence of simple inscriptions, factory marks or the like, moulded, forged, stamped, printed, etc.;

b) "Worked" shall be taken to mean goods that have not undergone any preliminary mechanical processes beyond, for example, bending, folding, perforation, milling, boring, threading, tapping, riveting, screwing, and the assembly of various parts; the term likewise applies to products that have been filed, turned on a lathe, planed, milled or ground;

c) "Surface-treated" shall be taken to mean goods unworked or worked, that have undergone a surface treatment operation, i.e., blued (blue annealed), polished, oxidized, browned (bronzed), painted, varnished, enamelled, gold plated, silver plated, platinum plated, engraved, nickel plated, chromium plated, rendered stainless by any process, coated or clad.

d) **High speed steel:**

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by weight of 7% or more, 0.6% or more of carbon and 3% to 6% of chromium.

e) **Silico-manganese steel:**

Alloy steels containing by weight:

- not more than 0.7% of carbon,
- 0.5% or more but not more than 1.9% of manganese, and
- 0.6% or more but not more than 2.3% of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the subheadings of heading 7202 the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1 c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1 c) must each exceed 10% by weight.

CHAPTER 73
ARTICLES OF IRON OR STEEL

NOTES

1. In this Chapter the expression “cast iron” applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1 d) to Chapter 72.
2. In this Chapter the word “wire” means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER 74 COPPER AND ARTICLES THEREOF

NOTE

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) **Refined copper:**

Metal containing at least 99.85% by weight of copper; or

Metal containing at least 97.5% by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content (% by weight)
Ag Silver	0.25
As Arsenic	0.5
Cd Cadmium	1.3
Cr Chromium	1.4
Mg Magnesium	0.8
Pb Lead	1.5
S Sulphur	0.7
Sn Tin	0.8
Te Tellurium	0.8
Zn Zinc	1
Zr Zirconium	0.3
Other elements*, each	0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

b) **Copper alloys:**

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

- i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or
- ii) the total content by weight of such other elements exceeds 2.5%.

c) **Master alloys:**

Alloys containing with other elements more than 10% by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus falls in heading 2848.

d) **Bars and rods:**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including "modified rectangular") cross-section, exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 7403.

e) **Profiles:**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

f) **Wire:**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including "modified rectangular") cross-section, exceeds one-tenth of the width.

In the case of heading 7414, however, the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

g) **Plates, sheets, strip and foil:**

Flat-surfaced products (other than the unwrought products of heading 7403), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7409 and 7410 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

h) **Tubes and pipes:**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTE

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) **Copper-zinc base alloys (brasses):**

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements;
- any nickel content by weight is less than 5% (see copper-nickel-zinc base alloys (nickel-silvers)); and
- any tin content by weight is less than 3% (see copper-tin base alloys (bronzes)).

b) **Copper-tin base alloys (bronzes):**

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3% or more the zinc content by weight may exceed that of tin but must be less than 10%.

c) **Copper-nickel-zinc base alloys (nickel silvers):**

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5% or more by weight (see copper-zinc base alloys (brasses)).

d) **Copper-nickel base alloys:**

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1% of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

CHAPTER 75 NICKEL AND ARTICLES THEREOF

NOTE

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) **Bars and rods:**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

b) **Profiles:**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

c) **Wire:**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width.

d) **Plates, sheets, strip and foil:**

Flat-surfaced products (other than the unwrought products of heading 7502), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7506 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

e) **Tubes and pipes:**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTES

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) Nickel, not alloyed:

Metal containing by weight at least 99% of nickel plus cobalt, provided that:

- i) the cobalt content by weight does not exceed 1.5%, and
- ii) the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content (% by weight)
Fe Iron	0.5
O Oxygen	0.4
Other elements, each	0.3

b) Nickel alloys:

Metallic substances in which nickel predominates by weight over each of the other elements provided that:

- i) the content by weight of cobalt exceeds 1.5%,
- ii) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or
- iii) the total content by weight of elements other than nickel plus cobalt exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1 c), for the purposes of subheading 7508 10 the term “wire” applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

CHAPTER 76 ALUMINIUM AND ARTICLES THEREOF

NOTE

1. In this Chapter the following expressions shall have the meanings hereby assigned to them:

a) **Bars and rods:**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

b) **Profiles:**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

c) **Wire:**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width.

d) **Plates, sheets, strip and foil:**

Flat-surfaced products (other than the unwrought products of heading 7601), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7606 and 7607 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

e) **Tubes and pipes:**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTES

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) Aluminium, not alloyed:

Metal containing by weight at least 99% of aluminium, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content (% by weight)
Fe + Si (Iron plus silicon)	1
Other elements ⁽¹⁾ each	0.1 (2)

⁽¹⁾ Other elements are, for example Cr, Cu, Mg, Mn, Ni, Zn.
⁽²⁾ Copper is permitted in a proportion greater than 0.1% but not more than 0.2% provided that neither the chromium nor manganese content exceeds 0.05%.

b) Aluminium alloys:

Metallic substances in which aluminium predominates by weight over each of the other elements provided that:

- i) the content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or
- ii) the total content by weight of such other elements exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1 c), for the purposes of subheading 7616 91 the term “wire” applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

CHAPTER 78 LEAD AND ARTICLES THEREOF

NOTE

1. In this Chapter the following expressions have the meanings hereby assigned to them:

a) **Bars and rods:**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

b) **Profiles:**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

c) **Wire:**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section, exceeds one-tenth of the width.

d) **Plates, sheets, strip and foil:**

Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7804 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

e) **Tubes and pipes:**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

 - o) interchangeable tools of heading 8207 or brushes of a kind used as parts of machines (heading 9603); similar interchangeable tools are to be classified according to the constituent material of their working part (for example, in Chapter 40, 42, 43, 45 or 59 or heading 6804 or 6909);
 - p) articles of Chapter 95; or
 - q) typewriter or similar ribbons, whether or not on spools or in cartridges (classified according to their constituent material, or in heading 9612 if inked or otherwise prepared for giving impressions).
2. Subject to Note 1 to this Section, Note 1 to Chapter 84 and to Note 1 to Chapter 85, parts of machines (not being parts of the articles of heading 8484, 8544, 8545, 8546 or 8547) are to be classified according to the following rules:
 - a) parts which are goods included in any of the headings of Chapter 84 or 85 (other than headings 8409, 8431, 8448, 8466, 8473, 8485, 8503, 8522, 8529, 8538 and 8548) are in all cases to be classified in their respective headings;
 - b) other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 8479 or 8543) are to be classified with the machines of that kind or in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate. However, parts which are equally suitable for use principally with the goods of headings 8517 and 8525 to 8528 are to be classified in heading 8517;
 - c) all other parts are to be classified in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate or, failing that, in heading 8485 or 8548.
3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.
4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Chapter 84 or Chapter 85, then the whole falls to be classified in the heading appropriate to that function.
5. For the purposes of these Notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

SWISS NOTE

1. a) The weight of a machine shall be taken to be the total weight of the machine including parts thereof. The weight of a machine imported with interchangeable tools, tool holders and the like which cannot be used simultaneously, shall be taken to be that of the machine itself plus the weight of the heaviest interchangeable part necessary to operate the whole. The other parts shall be assessed to duty according to kind.
- b) For the purposes of this Section, when machines are classified according to the component material, classification shall be effected according to the material predominating by weight.

CHAPTER 84
NUCLEAR REACTORS, BOILERS, MACHINERY AND MECHANICAL APPLIANCES; PARTS THEREOF

NOTES

1. This Chapter does not cover:
 - a) millstones, grindstones or other articles of Chapter 68;
 - b) machinery or appliances (for example, pumps) of ceramic material and ceramic parts of machinery or appliances of any material (Chapter 69);
 - c) laboratory glassware (heading 7017); machinery, appliances or other articles for technical uses or parts thereof, of glass (heading 7019 or 7020);
 - d) articles of heading 7321 or 7322 or similar articles of other base metals (Chapters 74 to 76 or 78 to 81);
 - e) electro-mechanical domestic appliances of heading 8509; digital cameras of heading 8525; or
 - f) hand-operated mechanical floor sweepers, not motorized (heading 9603).
2. Subject to the operation of Note 3 to Section XVI, a machine or appliance which answers to a description in one or more of the headings 8401 to 8424 and at the same time to a description in one or other of the headings 8425 to 8480 is to be classified under the appropriate heading of the former group and not the latter.
 Heading 8419 does not, however, cover:
 - a) germination plant, incubators or brooders (heading 8436);
 - b) grain dampening machines (heading 8437);
 - c) diffusing apparatus for sugar juice extraction (heading 8438);
 - d) machinery for the heat-treatment of textile yarns, fabrics or made up textile articles (heading 8451); or
 - e) machinery or plant, designed for mechanical operation, in which a change of temperature, even if necessary, is subsidiary.
 Heading 8422 does not cover:
 - a) sewing machines for closing bags or similar containers (heading 8452); or
 - b) office machinery of heading 8472.
 Heading 8424 does not cover:
 ink-jet printing machines (heading 8443 or 8471).
3. A machine-tool for working any material which answers to a description in heading 8456 and at the same time to a description in heading 8457, 8458, 8459, 8460, 8461, 8464 or 8465 is to be classified in heading 8456.
4. Heading 8457 applies only to machine-tools for working metal, other than lathes (including turning centres), which can carry out different types of machining operations either:
 - a) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres),
 - b) by the automatic use, simultaneously or sequentially, of different unit heads working on a fixed position workpiece (unit construction machines, single station), or
 - c) by the automatic transfer of the workpiece to different unit heads (multi-station transfer machines).

5. A) For the purposes of heading 8471, the expression "automatic data processing machines" means:
- a) digital machines, capable of (1) storing the processing program or programs and at least the data immediately necessary for the execution of the program; (2) being freely programmed in accordance with the requirements of the user; (3) performing arithmetical computations specified by the user; and (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run;
 - b) analogue machines capable of simulating mathematical models and comprising at least: analogue elements, control elements and programming elements;
 - c) hybrid machines consisting of either a digital machine with analogue elements or an analogue machine with digital elements.
- B) Automatic data processing machines may be in the form of systems consisting of a variable number of separate units. Subject to paragraph E below, a unit is to be regarded as being a part of a complete system if it meets all of the following conditions:
- a) it is of a kind solely or principally used in an automatic data processing system;
 - b) it is connectable to the central processing unit either directly or through one or more other units; and
 - c) it is able to accept or deliver data in a form (codes or signals) which can be used by the system.
- C) Separately presented units of an automatic data processing machine are to be classified in heading 8471.
- D) Printers, keyboards, X-Y co-ordinate input devices and disk storage units which satisfy the conditions of paragraphs B b) and B c) above, are in all cases to be classified as units of heading 8471.
- E) Machines performing a specific function other than data processing and incorporating or working in conjunction with an automatic data processing machine are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings.
6. Heading 8482 applies, *inter alia*, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1% or by more than 0.05 mm, whichever is less.
Other steel balls are to be classified in heading 7326.
7. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose. Subject to Note 2 to this Chapter and Note 3 to Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading 8479. Heading 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.
8. For the purposes of heading 8470, the term "pocket-size" applies only to machines the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

SUBHEADING NOTES

1. For the purposes of subheading 8471 49, the term "systems" means automatic data processing machines whose units satisfy the conditions laid down in Note 5 B to Chapter 84 and which comprise at least a central processing unit, one input unit (for example, a keyboard or a scanner), and one output unit (for example, a visual display unit or a printer).
2. Subheading 8482 40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

CHAPTER 85
ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF;
SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS
AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

NOTES

1. This Chapter does not cover:
 - a) electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads and other electrically warmed articles worn on or about the person;
 - b) articles of glass of heading 7011; or
 - c) electrically heated furniture of Chapter 94.
2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.
 However, metal tank mercury arc rectifiers remain classified in heading 8504.
3. Heading 8509 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:
 - a) vacuum cleaners, including dry and wet vacuum cleaners, floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
 - b) other machines provided the weight of such machines does not exceed 20 kg.
 The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes-driers (heading 8421), dish washing machines (heading 8422), household washing machines (heading 84500), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8467) or to electro-thermic appliances (heading 8516).
4. For the purposes of heading 8534 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).
 The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.
 Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.
5. For the purposes of headings 8541 and 8542:
 - A) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
 - B) "Electronic integrated circuits and microassemblies" are:
 - a) monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;
 - b) hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semi-conductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;
 - c) microassemblies of the moulded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.
 For the classification of the articles defined in this Note, headings 8541 and 8542 shall take precedence over any other heading in the Nomenclature which might cover them by reference to, in particular, their function.
6. Records, tapes and other media of heading 8523 or 8524 remain classified in those headings when presented with the apparatus for which they are intended.
 This Note does not apply to such media when they are presented with articles other than the apparatus for which they are intended.
7. For the purposes of heading 8548, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

SUBHEADING NOTES

1. Subheadings 8519 92 and 8527 12 cover only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.
2. For the purposes of subheading 8542 10, the term “smart cards” means cards which have embedded in them an electronic integrated circuit (microprocessor) of any type in the form of a chip and which may or may not have a magnetic stripe.

CHAPTER 87
VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK,
AND PARTS AND ACCESSORIES THEREOF

NOTES

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.
2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.
Machines and working tools designed for fitting to tractors of heading 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.
3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.
4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9501.

SWISS NOTE

1. For the purposes of classification in headings Nos 8702 to 8704 and 8706, the weight of a motor vehicle or chassis shall be taken to be the weight in running order. Motor vehicles of the abovementioned headings, stripped of certain parts necessary for their normal operation, shall be classified as if they were not stripped.

CHAPTER 90
OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF

NOTES

1. This Chapter does not cover:
 - a) articles of a kind used in machines, appliances or for other technical uses, of vulcanized rubber other than hard rubber (heading 4016), of leather or of composition leather (heading 4204) or of textile material (heading 5911);
 - b) supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section XI);
 - c) refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;
 - d) glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or Chapter 71);
 - e) goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;
 - f) parts of general use, as defined in Note 2 to Section XV, of base metal (Section XV) or similar goods of plastics (Chapter 39);
 - g) pumps incorporating measuring devices, of heading 8413; weight-operated counting or checking machinery, or separately presented weights for balances (heading 8423); lifting or handling machinery (headings 8425 to 8428); paper or paperboard cutting machines of all kinds (heading 8441); fittings for adjusting work or tools on machine-tools, of heading 8466, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 8470); valves or other appliances of heading 8481;
 - h) searchlights or spotlights of a kind used for cycles or motor vehicles (heading 8512); portable electric lamps of heading 8513; cinematographic sound recording, reproducing, or re-recording apparatus (heading 8519 or 8520); sound-heads (heading 8522); still image video cameras, other video camera recorders and digital cameras (heading 8525); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading 8526); numerical control apparatus of heading 8537; sealed beam lamp units of heading 8539; optical fibre cables of heading 8544;
 - ij) searchlights or spotlights of heading 9405;
 - k) articles of Chapter 95;
 - l) capacity measures, which are to be classified according to their constituent material; or
 - m) spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 3923 or Section XV).
2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:
 - a) parts and accessories which are goods included in any of the headings of this Chapter or of Chapter 84, 85 or 91 (other than heading 8485, 8548 or 9033) are in all cases to be classified in their respective headings;
 - b) other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number or machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind;
 - c) all other parts and accessories are to be classified in heading 9033.
3. The provisions of Note 4 to Section XVI apply also to this Chapter.
4. Heading 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this Chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading 9013.
5. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in heading 9013 and in heading 9031 are to be classified in heading 9031.

6. For the purposes of heading 9021, the expression “orthopaedic appliances” means appliances for:

- preventing or correcting bodily deformities; or
- supporting or holding parts of the body following an illness, operation or injury.

Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided that they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.

7. Heading 9032 applies only to:

- a) instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value; and
- b) automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value.

CLOCKS AND WATCHES AND PARTS THEREOF**

NOTES

1. This Chapter does not cover:
 - a) clock or watch glasses or weights (classified according to their constituent material);
 - b) watch chains (heading 7113 or 7117, as the case may be);
 - c) parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);
 - d) bearing balls (heading 7326 or 8482, as the case may be);
 - e) articles of heading 8412 constructed to work without an escapement;
 - f) ball bearings (heading 8482); or
 - g) articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.
3. For the purposes of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.

DUTY-FREE PHARMACEUTICAL SUBSTANCES

- ANNEX I: List of International Non-proprietary Names (INNs), provided for pharmaceutical substances by the World Health Organization (WHO), which are free of duty.
- ANNEX II: List of prefixes and suffixes which, in combination with the INNs of Annex 1, describe the salts, esters or hydrates of INNs; these salts, esters and hydrates are free of duty, on condition that they are classifiable in the same 6-digit HS-heading as the corresponding INN.
- ANNEX III: Salts, esters and hydrates which are not classified in the same HS-heading as the corresponding INNs and which are admitted free of duty.
- ANNEX IV: List of pharmaceutical intermediates, i.e. compounds used for the manufacture of finished pharmaceutical substances, which are free of duty.

Abbreviations:**INN:**

Item appearing on the list of “International Non-proprietary Names for Pharmaceutical Substances” published by the World Health Organization (WHO).

CAS RN:

This number, assigned by the “Chemical Abstracts Service” (a division of the American Chemical Society) is used to identify chemical products.

Where a product does not have a CAS registration number, that number is replaced by zeros.

EXPLANATORY NOTE

- a) Duty-free customs treatment is granted automatically in respect of the goods mentioned in Annexes I, III and IV, and of the salts, esters and hydrates specified by the combination of an INN of Annex I and the prefixes or suffixes of Annex II classified in the same 6-digit HS subheading as the corresponding INN.
- b) Duty-free customs treatment is likewise granted to salts and esters obtained by the combination of two INNs of Annex I, provided that such products are classified in the same 6-digit HS subheading as one of the corresponding INNs.
- c) Where the INN is a specific isomer, only that isomer and its salts, esters and hydrates specified by the combination of an INN of Annex I and the prefixes or suffixes of Annex II fall within the scope of the Agreement. For example, “phenylalanine (INN)” corresponds to “L-phenylalanine” (CAS RN 63-91-2) “D-phenylalanine” (CAS RN 673-06-3) and “DL-phenylalanine” (CAS RN 150-30-1) fall outside the scope of the Agreement.
- d) Where the INN does not specify stereochemistry, all stereoisomers and their salts, esters and hydrates specified by the combination of an INN of Annex I and prefixes or suffixes of Annex II shall be taken as falling within the scope of the Agreement.
- e) A double derivative (for example, a derivative which is a salt and ester of Annex II) of an INN of Annex I likewise falls within the scope of the Agreement. For example, “Roxatidine acetate, hydrochloride” (classified as “roxatidine”) falls within the scope of the Agreement because “roxatidine” is an INN of Annex I and because “acetate” and “hydrochloride” are both suffixes listed in Annex II.
- f) Where the INN is a salt (or an ester), any other salt (or other ester) of the parent acid falls outside the scope of the Agreement. For example, “magnesium metamizole” falls outside the scope of the Agreement although “sodium metamizole” is an INN of Annex I and “magnesium” is listed in Annex II.

APPENDIX I
Rates Of Duty Applicable To Goods Which Have The “+” Footnote in the “oFTA” Column
 (Applicable to Chapters 1 to 23 and headings Nos.. 2905, 3505, 3506, 3809, 3823, 3824)

Preliminary Notes

The preferential rates of duty apply only to those countries listed in the “oFTA” column (in the preceding Schedule). Particulars are treated as footnotes.

This Schedule is laid out as follows:

Heading	Preferential tariff		Beneficiary country (ISO 2 Code)
	Applicable	Normal minus	

“Heading No.” column:

Custom tariff headings (see also “GENERAL” of the Preliminary Provisions).

“Preferential rates” column:

applicable: This duty is fixed and thus directly applicable.

Normal rate minus: This duty must be calculated.

PROCEDURE:

1. **Find** the normal duty in the “RATE OF DUTY/Normal” column of the Tariff.
2. **Subtract** the amount given in the “Normal rate minus” column from the Normal rate.

The resulting rate is the applicable rate.

The resulting rate may be "0", according to the method by which the Normal rate is fixed in the Order on Customs Duties concerning agricultural products or when fixed import duties are due but are not indicated in the Normal rate of duty.

N.B. The effective applicable rates are stored in electronic master files.

“Beneficiary country (ISO 2 Code)” column:

This column lists the countries which benefit from the rates indicated in the “Preferential rates” column. The abbreviations correspond to the ISO 2 Codes of the list of countries for external trade statistics for Switzerland (not given in this Journal).

Tariff quotas

When goods are imported within the framework of tariff quotas customs duties are collected at the rates set out in the “Normal” column of the working tariff if preferential rates do not apply.

The Federal Administration distribute quotas in accordance with quota requests. For the purpose of subheadings 2402 2020 and 2403 1000, the order in which such requests arrive will determine the order of acceptance of customs clearance declarations. If a tariff quota is fulfilled, the distribution will be calculated in proportion to the total quantity requested on the day in question.

Requests should be made, in writing, to the *Administration fédérale des douanes* (Federal Customs Administration), accompanied by an original copy of customs receipts and copies of customs declarations.

The *Administration fédérale des douanes* will reimburse the difference between the duty paid and that which should have been paid within the limits of the corresponding quota on presentation of proof of origin.
