HOUSING STARTS AND BUILDING PERMITS

Privately owned housing units were started in October 1996 at an estimated seasonally adjusted annual rate of 1,366,000. This is 5 (± 6) percent below the revised September rate of 1,440,000, but 1 (± 6) percent above the October 1995 figure of 1,351,000.

Single-family housing starts in October 1996 were at a rate of 1,069,000; this is 5 (± 5) percent below the September figure of 1,120,000. The rate in October for units in buildings with five units or more was 239,000. The October rate in buildings with two to four units was 58,000.

During the first 10 months of this year, 1,268,600 housing units were started compared with 1,154,100 units for the same period in 1995. This is an increase of 10 (± 2) percent.

The seasonally adjusted annual rate of housing units authorized by building permits in the 19,000 permit-issuing places in October was 1,361,000; this is 3 (± 1) percent below the revised September rate of 1,399,000 and 2 (± 1) percent below the October 1995 figure of 1,393,000.

Single-family authorizations in October 1996 were at a rate of 1,009,000; this is 3 (± 1) percent below the September figure of 1,040,000. Authorizations of units in buildings with five units or more were at a rate of 281,000 in October. The October rate of permit-authorized units in buildings with two to four units was 71,000.

During the first 10 months of this year, 1,230,100 housing units were authorized by permits in the 19,000 places compared with 1,127,300 units for the same period in 1995. This is an increase of 9 (± 1) percent.

In interpreting changes in housing starts and building permits, note that month-to-month changes in seasonally adjusted statistics often show movements which

may be irregular. It may take 3 months to establish an underlying trend for total starts and total building permit authorizations.

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting. Estimated average relative standard errors of preliminary data are shown in the tables. Whenever a statement such as "2 (± 3) percent above" appears in the text, this indicates the range (-1 to +5 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals. If a range contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant. For any comparison cited without a confidence interval, the change is statistically significant. The May 1996 Current Construction Reports, C20/96-5, includes explanations of confidence intervals and sampling variability. On average, the preliminary seasonally adjusted estimates of total housing starts and building permits are revised about ± 1 percent.

Housing starts and building permits data do not include mobile home units. Mobile home statistics are shown in table 5.

HISTORICAL DATA

Historical data on housing starts and residential permit authorizations are available from Residential Construction Branch, Manufacturing and Construction Statistics Division, Bureau of the Census, Washington, DC 20233. Telephone 301-457-4703.

A list of tables and special supplements is shown below:

^aPreliminary. ^bRevised.^cAverage Relative Standard Errors: Average for the latest 6-month period (January through June or July through December).

Note: These backlog data represent the number of housing units authorized in all months up to and including the last day of the reporting period and not started as of that date without regard to the months of original permit issuance. Cancelled, abandoned, expired, and revoked permits are excluded from the backlog.

^rRevised.

¹Metropolitan statistical areas.

²Includes units started in structures with two to four units.

³Average Relative Standard Errors (Avg. RSE): Annual—Avg. RSE for the last 2 years; Quarterly—Avg. RSE for the latest 2-quarter period (quarter 1 through quarter 2 or quarter 3 through quarter 4).

¹Data for placements and shipments of mobile homes are seasonally adjusted at an annual rate.

²Average Relative Standard Errors (Avg. RSE): Annual—Avg. RSE for the last 2 years; Monthly—Avg. RSE for the latest 6-month period (January through June or July through December).

Source: Except for manufacturers' shipments, these data are produced by the Commerce Department's Bureau of the Census from a survey sponsored by the Department of Housing and Urban Development. Statistics on shipments are compiled from manufacturers' reports to the National Conference of States on Building Codes and Standards (NCSBCS).

^pPreliminary. ^rRevised.

¹The implicit seasonal index is the ratio of the unadjusted number of housing units started in the United States to the seasonally adjusted national total of housing units started. It provides an indication of the overall seasonality for the particular month.

Note: These seasonal indexes include trading-day adjustment factors.

Table 7. Seasonal Indexes Used to Adjust Housing Units Authorized in Permit-Issuing Places

^pPreliminary. ^rRevised.

¹

Includes houses already sold when construction started.

²Average Relative Standard Errors (Avg. RSE): Annual—Avg. RSE for the last 2 years; Quarterly—Avg. RSE for the latest 2-quarter period (quarter 1 through quarter 2 or quarter 3 through quarter 4).

Note: Housing units for which purpose of construction was not reported have been distributed proportionally to those for which the information was reported.
