## HOUSING STARTS AND BUILDING PERMITS

Privately owned housing starts in November 1997 were at a seasonally adjusted annual rate of 1,531,000; this is 1 ( $\pm 6$ ) percent above the revised October rate of 1,519,000 and 3 ( $\pm 6$ ) percent above the November 1996 rate of 1,486,000.

Single-family housing starts in November 1997 were at a rate of 1,166,000; this is 2 ( $\pm 7$ ) percent above the October figure of 1,138,000. The November rate for units in buildings with five units or more was 328,000. The November rate for units in buildings with two to four units was 37,000.

During the first 11 months of this year, 1,368,400 housing units were started compared with 1,383,700 units for the same period in 1996. This is a decrease of 1 ( $\pm 1$ ) percent.

New privately owned housing construction was authorized in November in the 19,000 permit-issuing places at a seasonally adjusted annual rate of 1,448,000; this is 3 ( $\pm 1$ ) percent below the revised October rate of 1,487,000, but 4 ( $\pm 2$ ) percent above the November 1996 figure of 1,391,000.

Single-family authorizations in November 1997 were at a rate of 1,057,000, this is 3 ( $\pm 1$  percent) below the October figure of 1,087,000. Authorizations of units in buildings with five units or more were at a rate of 330,000 in November. The November rate of permit-authorized units in buildings with two to four units was 61,000.

During the first 11 months of this year, 1,334,300 housing units were authorized by permits in the 19,000 places compared with 1,326,400 units authorized for the same period in 1996. This is an increase of 1 ( $\pm 1$ ) percent.

In interpreting changes in housing starts and building permits, note that month-to-month changes in seasonally adjusted statistics often show movements which

may be irregular. It may take 4 months to establish an underlying trend for total starts, 3 months for building permit authorizations, and 2 months for mobile home shipments.

Except for those on mobile home shipments, the statistics in this report are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated average relative standard errors of preliminary data are shown in the tables. Whenever a statement such as "2 ( $\pm 3$ ) percent above" appears in the text, this indicates the range (-1 to +5 percent) in which the actual percent change is likely to have occurred. All ranges given are 90-percent confidence intervals and account for only sampling variability. If a range contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant. For any comparison cited without a confidence interval, the change is statistically significant. Explanations of confidence intervals and sampling variability appear in the appendix to the April 1997 Current Construction Reports, C20/97-4. On average, the preliminary seasonally adjusted estimates of total housing starts and building permits are revised about  $\pm 1$  percent.

Housing starts and building permits data do not include mobile home units. Mobile home statistics are shown in Table 5.

## HISTORICAL DATA

Historical data on housing starts and residential permit authorizations are available from Residential Construction Branch, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6900. Telephone 301-457-4703.

<sup>P</sup>Preliminary. <sup>R</sup>Revised.

<sup>1</sup>Average Relative Standard Errors: Average for the latest 6-month period (January through June or July through December).

Note: These backlog data represent the number of housing units authorized in all months up to and including the last day of the reporting period and not started as of that date without regard to the months of original permit issuance. Cancelled, abandoned, expired, and revoked permits are excluded from the backlog.

<sup>1</sup>Data for placements and shipments of mobile homes are seasonally adjusted at an annual rate.

<sup>2</sup>Average Relative Standard Errors (Avg. RSE): Annual—Avg. RSE for the last 2 years; Monthly—Avg. RSE for the latest 6-month period (January through June or July through December).

Source: Except for manufacturers' shipments, these data are produced by the Commerce Department's Bureau of the Census from a survey sponsored by the Department of Housing and Urban Development. Statistics on shipments are compiled from manufacturers' reports to the National Conference of States on Building Codes and Standards (NCSBCS).

<sup>p</sup>Preliminary. <sup>r</sup>Revised.

<sup>1</sup>The implicit seasonal index is the ratio of the unadjusted number of housing units started in the United States to the seasonally adjusted national total of housing units started. It provides an indication of the overall seasonality for the particular month.

Note: These seasonal indexes include trading-day adjustment factors.
