NEW HOUSES SOLD AND FOR SALE

This report provides statistics for new privately owned one-family houses sold and for sale. The U.S. Census Bureau and the U.S. Department of Housing and Urban Development jointly release this report.

Sales of new one-family houses in December 1999 were at a seasonally adjusted annual rate of 900,000 compared with the revised November rate of 861,000. The December 1998 rate was 958,000.

The median sales price of new houses sold in December was \$160,900; the mean sales price was \$200,500. Changes in median and average sales prices reflect changing proportions of houses with different locations, sizes, etc., as well as changes in the prices of houses with identical characteristics. For a measure of the change in the sales price of new houses sold which are the same with respect to important characteristics, see the price index in Tables 12a through 14 of this report. Table 12 presents the Fisher Ideal chain-type annual-weighted index that does not hold these important characteristics constant. For a description of these indexes read the appendix in the March 1997 issue of this report.

The seasonally adjusted estimate of new houses for sale at the end of December was 322,000. This represents a supply of 4.4 months at the current sales rate.

In 1999 there were 904,000 houses sold compared with 886,000 houses sold in 1998. This is an increase of 2 percent.

EXPLANATORY NOTES

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting. Estimated average relative standard errors for preliminary statistics for houses sold and for sale are shown in the tables. For monthly estimates they are based upon the latest 6-month period ending June or December (January-June or July-December). Quarterly estimates are based upon the more recent of the first 2 quarters or last 2 quarters of the most current year; annual estimates on the last 2 years.

For month-to-month comparisons of total houses sold, the range of the 90-percent confidence interval is ± 9 percentage points from the estimated change. For year-to-year comparisons the range is ± 2 percentage points. When the range of the confidence interval contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant.

In interpreting changes in the statistics in this report, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It takes 4 months to establish an underlying trend for new houses sold. Preliminary new home sales figures are subject to revision due to the survey methodology and definitions used. The survey is primarily based on a sample of houses selected from building permits. Since a "sale" is defined as the acceptance of a deposit or the signing of a contract, the sale can occur prior to the building permit being issued. An estimate of these sales is included in the sales figure. On average, the preliminary seasonally adjusted estimate of total sales is revised ± 3 percent. This does not include the revisions made when new seasonal factors are computed.

HUD-coded manufactured houses are not included in these statistics. Data for these houses can be found on the internet at:

www.census.gov/const/www/index.html

For further information on these data, contact the Construction Expenditures Branch, Manufacturing and Construction Division. Telephone: 301-457-1605.

Historical statistics on new one-family houses sold and for sale from 1963 to date are available from the Residential Construction Branch, Manufacturing and Construction Division, U.S. Census Bureau Washington, DC 20233-6900. Telephone: 301-457-1321.

¹Houses for which sales price was not reported have been distributed proportionally to those for which sales price was reported.

²Total equals 100 percent.

Note: The sales price includes the land.

Table 5. Current Seasonal Factors

Month and year	New houses sold					New houses for sale	Months' supply at current sales rate	Median months from start to—	
	United States implicit factor	Northeast	Midwest	South	West			Sale	End of month
1999: September ^f	93.6	101.1	86.8	93.4	96.3	100.6	104.9	90.4	93.1
October ^f	89.9	80.8	91.4	90.2	91.0	100.5	109.0	94.0	95.0
November ^f	86.5	96.0	85.7	87.6	83.2	100.6	114.1	101.3	96.2
December ^p	75.7	77.6	72.2	79.5	70.8	102.3	131.8	108.8	101.1

^pPreliminary. ^fRevised.

Note: These are the seasonal factors used to adjust the most current preliminary and revised estimates. The factors are produced by running each series through the Census Method II X-12 version seasonal adjustment program. For new houses sold, only the four regional series are run through this X-12 program. The resulting seasonally adjusted estimates are then added to produce an estimate for the United States. The implicit factor is the result of dividing the unadjusted estimate by the seasonally adjusted estimate. It provides an indication of the overall seasonality for the particular month.

Table 6. Median Number of Months on Sales Market

[Houses not started are excluded. Medians computed from unrounded figures]

Period	Houses sold, measured from month of start		Houses for sale			Period	Houses sold, measured from month of start		Houses for sale		
	Not seasonally adjusted	Seasonally adjusted	Measured from month of start		Measured from month of completion seasonally adjusted		Not seasonally adjusted	Seasonally adjusted	Measured from month of start		Measured from month of completion seasonally adjusted
			Not seasonally adjusted	Seasonally adjusted					Not seasonally adjusted	Seasonally adjusted
