Current Construction Reports

This report is the last publication of "New One-Family Houses Sold." All information will be available in the "New Residential Sales" press release which can be found on our Web site at www.census.gov/mcd. With the issuance of April 2001 data we will introduce new estimation methods and revise unadjusted and seasonally adjusted data back to January 1999. We have begun publishing the Fixed-Weighted Laspeyres Price Index on a 1996 base year. This index is available online at www.census.gov/const/www/c25index.html. We will no longer publish the Fisher Ideal Chain-Type Annual-Weighted Price Index.

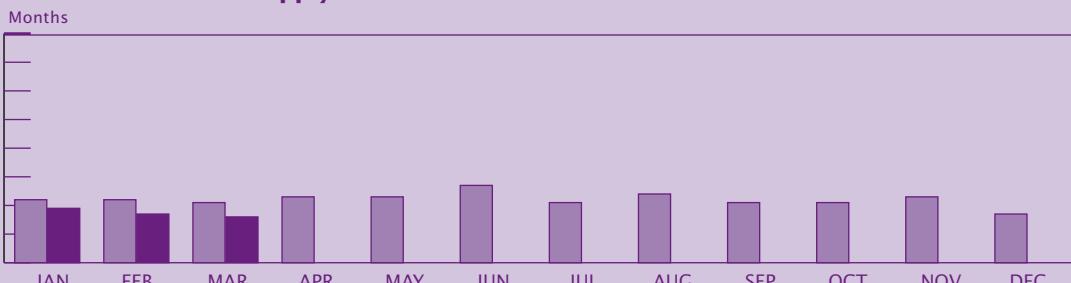

New One-Family Houses Sold and For Sale and Months' Supply at Current Sales Rate

Seasonally adjusted

2000
2001

Number of Months' Supply¹

¹Ratio of houses for sale to houses sold at current sales rate.

Source: U.S. Census Bureau, New One-Family Houses Sold.

Questions regarding these data may be directed to **Dale R. Jacobson**, Residential Construction Branch, Manufacturing and Construction Division, telephone: 301-457-1321.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

NEW HOUSES SOLD AND FOR SALE

This report provides statistics for new privately owned one-family houses sold and for sale. The U.S. Census Bureau and the U.S. Department of Housing and Urban Development jointly release this report.

Sales of new one-family houses in March 2001 were at a seasonally adjusted annual rate of 1,021,000 compared with the revised February rate of 980,000. The March 2000 rate was 947,000.

The median sales price of new houses sold in March was \$164,900; the mean sales price was \$209,400. The seasonally adjusted estimate of new houses for sale at the end of March was 300,000. This represents a supply of 3.6 months at the current sales rate.

LASPEYRES FIXED-WEIGHTED PRICE INDEX

Changes in median and average sales prices often reflect changing proportions of houses with different locations, sizes, etc., as well as changes in the prices of houses with identical characteristics. For a measure of the change in the sales price of new houses sold which are the same with respect to important characteristics, refer to the Fixed-Weighted Laspeyres Price Index. This index has been revised and now uses 1996 as its base year. The previously published Chain-Type Annual-Weighted (Fisher Ideal) Price Index has been discontinued.

As this is the last issue of this report that will be published in paper form, the price index data are not included in it. These data and a description of this price index can be found on the internet at:

www.census.gov/const/www/c25index.html

EXPLANATORY NOTES

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting. Estimated average relative standard errors for preliminary statistics for houses sold and for sale are shown in the tables. For monthly estimates, they are based upon the latest 6-month period ending June or December (January-June or July-December). Quarterly estimates are based upon the more recent of the first 2 quarters or last 2 quarters of the most current year; annual estimates on the last 2 years.

For month-to-month comparisons of total houses sold, the range of the 90-percent confidence interval is ± 9 percentage points from the estimated change. When the range of the confidence interval contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant.

In interpreting changes in the statistics in this report, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It takes 4 months to establish an underlying trend for new houses sold. Preliminary estimates of new sold are subject to revision due to the survey methodology and definitions used. The survey is based primarily on a sample of houses selected from building permits. Since a "sale" is defined as a deposit being accepted or a sales contract being signed, the sale can occur prior to the issuance of the building permit. An estimate of these prior sales is included in the sales figure.

On average, the preliminary seasonally adjusted estimate of total sales is revised ± 3 percent. This does not include the revisions made when new seasonal factors are computed.

HUD-coded manufactured homes are not included in these statistics. Data for these homes can be found on the Internet at:

www.census.gov/const/www/mhsindex.html

For more information about these data, contact the Construction Expenditures Branch, Manufacturing and Construction Division, U.S. Census Bureau, Washington, DC 20233-6900. Telephone: 301-457-1605.

Historical statistics on new one-family houses sold and for sale from 1963 to date are available on the Internet at:

www.census.gov/const/www/c25index.html

Contact the Residential Construction Branch, Manufacturing and Construction Division, U.S. Census Bureau, Washington, DC 20233-6900, for more information or help. Telephone: 301-457-1321.

B Withheld because estimate did not meet publications standards based on sample size.

^PPreliminary.^rRevised.¹Houses for which sales price was not reported have been distributed proportionally to those for which the sales price was reported.²Total equals 100 percent.

Note: The sales price includes the land.

Table 5. Current Seasonal Factors

Month and year	New houses sold					New houses for sale	Months' supply at current sales rate	Median months from start to—	
	United States implicit factor	Northeast	Midwest	South	West			Sale	End of month
2000: December ^r	77.3	86.4	69.0	80.1	75.7	101.3	129.5	112.0	102.6
2001: January ^r	90.0	76.1	74.7	94.4	95.8	100.5	110.0	113.4	106.7
February ^r	105.2	104.3	99.2	106.1	107.1	98.5	93.9	112.7	110.1
March ^P	118.9	109.8	127.5	117.3	119.7	99.0	81.8	102.5	110.9

^PPreliminary. ^rRevised.

Note: These are the seasonal factors used to adjust the most current preliminary and revised estimates. The factors are produced by running each series through the X-12 ARIMA version seasonal adjustment program. For new houses sold, only the four regional series are run through this X-12 program. The resulting seasonally adjusted estimates are then added to produce an estimate for the United States. The implicit factor is the result of dividing the unadjusted estimate by the seasonally adjusted estimate. It provides an indication of the overall seasonality for the particular month.

Table 6. Median Number of Months on Sales Market

[Houses not started are excluded. Medians computed from unrounded figures]

Period	Houses sold, measured from month of start		Houses for sale		Period	Houses sold, measured from month of start		Houses for sale	
			Measured from month of start					Measured from month of start	Measured from month of completion (not seasonally adjusted)
	Not seasonally adjusted	Seasonally adjusted	Not seasonally adjusted	Seasonally adjusted		Not seasonally adjusted	Seasonally adjusted	Not seasonally adjusted	Seasonally adjusted
