NEW HOUSES SOLD AND FOR SALE IN MARCH 1998

This report provides statistics for new privately owned one-family houses sold and for sale. The Bureau of the Census and the U.S. Department of Housing and Urban Development jointly release this report.

Sales of new one-family houses in March 1998 were at a seasonally adjusted annual rate of 828,000 compared with the revised February rate of 872,000. The March 1997 rate was 823,000.

The median sales price of new houses sold in March 1998 was \$153,900; the mean sales price was \$183,500. Changes in median and average sales prices reflect changing proportions of houses with different locations, sizes, etc., as well as changes in the prices of houses with identical characteristics. For a measure of the change in the sales price of new houses sold which are the same with respect to important characteristics, refer to the price index found in Tables 12, 12a, and 13 of this report.

The seasonally adjusted estimate of new houses for sale at the end of March was 290,000. This represents a supply of 4.3 months at the current sales rate.

EXPLANATORY NOTES

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting. Estimated average relative standard errors for preliminary statistics for houses sold and for sale are shown in the tables. For monthly estimates they are based upon the latest 6-month period ending June or December (January-June or July-December).

Quarterly estimates are based upon the more recent of the first 2 quarters or last 2 quarters of the most current year; annual estimates on the last 2 years.

For month-to-month comparisons of total houses sold, the range of the 90-percent confidence interval is ± 7 percentage points from the estimated change. For year-to-date comparisons, the range is ± 3 percentage points. When the range of the confidence interval contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant. On average, the preliminary seasonally adjusted estimate of total sales is revised ± 3 percent. This does not include the revisions made when new seasonal factors are computed.

In interpreting changes in the statistics in this report, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It takes 4 months to establish an underlying trend for new houses sold.

Mobile homes are not included in these statistics. Mobile home data can be found in Current Construction Reports, *Housing Starts*, Series C20.

Historical statistics on new one-family houses sold and for sale from 1963 to date are available from the Residential Construction Branch, Manufacturing and Construction Division, Bureau of the Census, Washington, DC 20233-6900. Telephone: 301-457-4666.

^PPreliminary. ^rRevised.¹Houses for which sales price was not reported have been distributed proportionally to those for which sales price was reported.²Total equals 100 percent.

Note: The sales price includes the land.

Table 5. Current Seasonal Factors

Month and year	New houses sold					New houses for sale	Months' supply at current sales rate	Median months from start to—	
	United States implicit factor	Northeast	Midwest	South	West			Sale	End of month
1997: December ^r	75.4	87.0	67.1	78.2	73.0	101.9	128.4	107.5	100.4
1998: January ^r	90.5	73.6	80.9	95.9	93.2	100.2	108.8	117.9	105.7
February ^r	103.4	106.0	94.8	103.6	109.3	98.3	95.5	110.1	109.1
March ^P	116.1	94.3	120.9	117.4	118.5	98.7	82.6	101.9	110.1

^PPreliminary. ^rRevised.

Note: These are the seasonal factors used to adjust the most current preliminary and revised estimates. The factors are produced by running each series through the Census Method II X-11 version seasonal adjustment program. For new houses sold, only the four regional series are run through this X-11 program. The resulting seasonally adjusted estimates are then added to produce an estimate for the United States. The implicit factor is the result of dividing the unadjusted estimate by the seasonally adjusted estimate. It provides an indication of the overall seasonality for the particular month.

Table 6. Median Number of Months on Sales Market

[Houses not started are excluded. Medians computed from unrounded figures]

Period	Houses for sale				Period	Houses for sale					
	Houses sold, measured from month of start		Measured from month of start			Houses sold, measured from month of start		Measured from month of start			
	Not sea-sonally adjusted	Season-ally adjusted	Not sea-sonally adjusted	Season-ally adjusted		Not sea-sonally adjusted	Season-ally adjusted	Not sea-sonally adjusted	Season-ally adjusted
