COMMODITY CODES

2002 COMMODITY FLOW SURVEY

COMMODITY CODES

INTRODUCTION

This listing provides the 5-digit Standard Classification of Transported Goods (SCTG) commodity codes that you will use to complete column '(f)' of the shipment characteristics, Item F.

For single shipments of more than one commodity, use the 5-digit code representing the largest commodity by weight.

It is important that you use the 5-digit SCTG codes in this listing to classify your commodities. This enables the Census Bureau to uniformly aggregate and present the data produced from the CFS.

How to Use This Listing

This listing presents the SCTG codes in numerical sequence. Following is an index to help you find the appropriate 5-digit SCTG code.

Find the major group description (in bold type) that best describes the shipment and turn to the indicated page. Note: subgroups are included below the major groups as a guide for locating the correct major group.

The abbreviation "**n.e.c.**" stands for "not elsewhere classified." As an example, the code 01009, "Live animals n.e.c." includes all live animals that have not been specifically classified elsewhere in the listing.

To assist in finding the correct 5-digit SCTG code, exceptions or inclusions are noted using italics, in parentheses. The numbers in the list of exclusions refer to the first 3, 4, or 5 digits of the correct SCTG code. For example: (except electrical equipment 359xx). Under SCTG code 359xx the correct 5-digit code may be 35911 (Primary cells and batteries), or 35912 (Secondary cells and storage batteries, etc.).

The term "including" is often followed by **examples** of products in that particular product definition. These lists are **not** all inclusive.

Machinery Parts: In general, machinery parts are included in the same SCTG code as the machinery for which they are parts. For example, product code 36351 includes motorcycles, and mopeds, and their parts. Exceptions to this rule are noted where they occur, for example: SCTG 37210, Aircraft, except parts.
