*This report has been reviewed by the Minerals Management Service and approved for publication. Approval does not signify that the contents necessarily reflect the views and policies of the Service, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.*

Ice, metocean, and geotechnical data presented within this report (and appendices) have been considered or used in identifying analogue areas and assessments of technology. These data should not be used as definitive design criteria and should not be used for design activities. The reader should consult source (as well as other) references and investigate the suitability/applicability of data for design activities.

Similarly, assessments of technology presented in this report are not to be used in design activities. The assessments were carried out to evaluate technologies and are not design exercises. While the Author's believe that they have researched as much information on existing projects as reasonable, there may be information that was missed.

# **Arctic Offshore Technology Assessment of Exploration and Production Options for Cold Regions of the US Outer Continental Shelf**
