CB02-92

NEW RESIDENTIAL CONSTRUCTION IN JUNE 2002

BUILDING PERMITS

Privately-owned housing units authorized by building permits in June were at a seasonally adjusted annual rate of 1,700,000, according to estimates reported today by the U.S. Commerce Department's Census Bureau. This is 1.4 percent ($\pm 0.9\%$) above the revised May rate of 1,676,000 and is 5.1 percent ($\pm 1.2\%$) above the June 2001 estimate of 1,618,000.

Single-family authorizations in June 2002 were at a rate of 1,289,000; this is 1.7 percent ($\pm 0.9\%$) above the revised May figure of 1,268,000. Authorizations of units in buildings with five units or more were at a rate of 331,000 in June.

HOUSING STARTS

Privately-owned housing starts in June were at a seasonally adjusted annual rate of 1,672,000. This is 3.6 percent ($\pm 7.1\%$) below the revised May estimate of 1,735,000, but is 2.4 percent ($\pm 6.3\%$) above the June 2001 rate of 1,633,000.

Single-family housing starts in June 2002 were at a rate of 1,350,000; this is 2.9 percent ($\pm 6.9\%$) below the revised May figure of 1,390,000. The June estimate for units in buildings with five units or more was 285,000.

HOUSING COMPLETIONS

Privately-owned housing completions in June were at a seasonally adjusted annual rate of 1,587,000, according to estimates released jointly today by the U.S. Census Bureau and the U.S. Department of Housing and Urban Development. This is 5.9 percent ($\pm 9.0\%$) below the revised May estimate of 1,686,000 and is 3.5 percent ($\pm 8.8\%$) below the June 2001 rate of 1,645,000.

Single-family housing completions in June 2002 were at a rate of 1,282,000; this is 5.1 percent ($\pm 9.0\%$) below the revised May figure of 1,351,000. The June rate for units in buildings with five units or more was 272,000.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 4 months to establish an underlying trend for building permit authorizations, 5 months for total starts, and 6 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant. The same applies to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about one percent. Explanations of confidence intervals and sampling variability can be found on our web site listed below.

New Residential Construction data for July 2002 will be released on Friday, August 16, 2002, at 8:30 A.M. EDT.
