## ACKNOWLEDGMENTS

The staff of the Governments Division's Recurring Programs Area, headed by **Henry S. Wulf**, is responsible for the preparation of this report. **Ellen A. Thompson** and **Kheang Hang** supervised the data collection and editing activities. **Joseph Talbot** provided technical and programming assistance. **Fannie Turner, William Koerber, Regina Padgett, Crystal Miller, Katrina Sutich,** and **Sandra Reading** reviewed final data tabulations. **Donna A. Hirsch** coordinated publication preparation.

Governments Division's Employment Branch staff reviewed and assembled data for the states and largest local governments covered by this report.

The staff of the National Processing Center, **Judith N. Petty**, Chief, reviewed and assembled data for all other local governments.

The Systems Support Division provided the table composition system. **Robert Joseph Brown**, Table Image Processing System (TIPS) Senior Software Engineer, was responsible for the design and development of the TIPS, under the supervision of **Robert J. Bateman**, Assistant Division Chief for Information Systems.

**Kim D. Ottenstein, Margaret A. Smith, Meshel L. Butler,** and **Corey T. Beasley** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Chief, and **Susan L. Rappa**, Chief, Publications Services Branch.

**Carma Hogue** of the Economic Statistical Methods and Programming Division, **Howard Hogan**, Chief, supplied advice and assistance in statistical methodologies.

The U.S. Census Bureau offers special thanks for the cooperation and assistance of the thousands of state and local government officials in providing information for this report.

For information regarding data in this report, contact the Chief, Governments Division, U.S. Census Bureau, Washington, DC 20233-6800 or phone toll free 1-800-642-4901.

# Compendium of Public Employment

---

## INTRODUCTION

A census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 2002 census, similar to those taken since 1957, covers three major subject fields—government organization, public employment, and government finances.

Volume 3, *Public Employment*, contains two reports: No. 1, *Employment of Major Local Governments*; and No. 2, *Compendium of Public Employment*.

This report, No. 2, provides a comprehensive summary of census findings on government employment and payrolls for March 2002. National and state-by-state data are shown for the federal government, state governments, and local governments by type of government. Additional data are provided on local governments by county area and by size groups.

## ORGANIZATION OF THIS REPORT

This introduction provides a brief overview of major findings from the 2002 Census of Governments, Survey of Government Employment; an explanation of the sources of data; a description of the limitations of data; and the availability of additional data and sources related to this report.

Following this introductory text are 20 statistical tables.

- Tables 1 through 8 provide national summaries of government employment, payrolls, and full-time employee average earnings by type of government and by government function.
- Tables 9 through 15 present similar data for each state and the District of Columbia, with additional detail on the ratios of employment and payrolls to population and on full-time employee average earnings.
- Table 16 shows aggregates of local government employment and payrolls by county areas.
- Table 17 presents data on employment and payrolls by employment-size group and state for special districts.
- Table 18 presents employment and payroll by state and enrollment-size group and state for school systems.
- Table 19 shows aggregates of local government employment and payrolls by county areas.

- Table 20 provides national and state distributions of local governments and full-time equivalent employment by employment size and by type of government.

Following the tables is Appendix A. Definition of Selected Terms, which contains definitions of various concepts used in this report, including definitions of the various types of governments.

## SCOPE

### Governmental Units

The U.S. Census Bureau classifies local governments by five major types as described below. Additional information on the classification of local governments is presented in Volume 1, Number 1, *Government Organization*, 2002 Census of Governments.

## COUNTY GOVERNMENTS

Organized county governments are found throughout the nation except in Connecticut, Rhode Island, the District of Columbia, and limited portions of other states where certain county areas lack a distinct county government (see Appendix D for a listing of county-type areas without county government). In Louisiana, the county governments are officially designated as “parish” governments, and the “borough” governments in Alaska resemble county governments in other states. Both are classified as county governments for census statistics on governments.

Not all geographic areas known as counties have county governments. Where municipal and county governments have been consolidated, or substantially merged, the composite units are counted as municipal governments in census statistics on governments. Moreover, the cities of Baltimore, Carson City, and St. Louis are outside the areas of adjacent counties, and a similar situation exists among 39 independent cities in Virginia.

### Municipal and Township Governments

The 35,933 subcounty general-purpose governments enumerated in 2002 include 19,429 municipal governments and 16,504 town or township governments. A breakdown by state between municipal and township governments appears in Table 10. These two types of governments are distinguished primarily by the historical circumstances surrounding their incorporation. In many states, most

notably in the Northeast, municipal and township governments have similar powers and perform similar functions. The scope of governmental services provided by these two types of governments varies widely from one state to another, and even within the same state.

As defined for census statistics on governments, the term “municipal governments” refers to political subdivisions within which a municipal corporation has been established to provide general local government for a specific population concentration in a defined area, and includes all active government units officially designated as cities, boroughs (except in Alaska), towns (except in the six New England states, Minnesota, New York, and Wisconsin), and villages. This concept corresponds generally to the “incorporated places” that are recognized in Census Bureau reporting of population and housing statistics, subject to an important qualification—the count of municipal governments in this report excludes places that are currently governmentally inactive.

The term “town or township governments” is applied here to 16,504 organized governments located in the following 20 states in the Northeast and the Midwest:

|               |               |
|---------------|---------------|
| Connecticut   | New Hampshire |
| Illinois      | New Jersey    |
| Indiana       | New York      |
| Kansas        | North Dakota  |
| Maine         | Ohio          |
| Massachusetts | Pennsylvania  |
| Michigan      | Rhode Island  |
| Minnesota     | South Dakota  |
| Missouri      | Vermont       |
| Nebraska      | Wisconsin     |

This category includes governmental units officially designated as “towns” in the six New England states, New York, and Wisconsin, and some “plantations” in Maine and “locations” in New Hampshire, as well as townships in other areas. In Minnesota, the terms “town” and “township” are used interchangeably with regard to township governments. Although towns in the six New England states and New York and townships in New Jersey and Pennsylvania are legally termed “municipal corporations” and perform municipal-type functions, and frequently serve densely populated urban areas, they have no necessary relation to concentration of population, and are thus counted for census purposes as town or township governments.

Excluded from this count of town or township governments are unorganized township areas, townships coextensive with cities where the city governments have absorbed the township functions, and townships known to have ceased to perform governmental functions. Also excluded are the townships in Iowa, which are not counted as separate governments, but are classified as subordinate agencies of county governments.

Only one state, Indiana, has township governments covering all its area and population. In six states (Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, and Wisconsin), operating towns or townships comprise all territory other than that served by municipalities. The same is true for Maine, except for “unorganized territory” that lacks any local government. Of the remaining 12 town or township states, there are 10 where this type of government occurs only in certain county or county-type geographic areas as of early 2002: Illinois, in 85 of the 102 county-type areas; Kansas, in 95 of 105; Minnesota, in 85 of 87; Missouri, in 22 of 115; Nebraska, in 27 of 93; North Dakota, in 48 of 53; Pennsylvania, in 66 of 67; South Dakota, in 52 of 66; and Wisconsin, in 71 of 72. In New York, town governments exist in each county outside New York City.

The area served by municipal and town or township governments may overlap in 11 states. All municipal governments in Indiana, and some but not all municipalities in 10 other town or township states (Connecticut, Illinois, Kansas, Michigan, Minnesota, Missouri, Nebraska, New York, Ohio, and Vermont) operate within territory that is served also by town or township governments. In the remaining 9 of the 20 town or township states (Maine, Massachusetts, New Hampshire, New Jersey, North Dakota, Pennsylvania, Rhode Island, South Dakota, and Wisconsin), there is no geographic overlapping of these two kinds of units.

### Special District Governments

Special district governments are independent, special purpose governmental units (other than school district governments) that exist as separate entities with substantial administrative and fiscal independence from general purpose local governments. As defined for census purposes, the term “special district governments” excludes school district governments.

Special district governments provide specific services that are not being supplied by existing general-purpose governments. Most perform a single function, but, in some instances, their enabling legislation allows them to provide several, usually related, types of services. The services provided by these districts range from such basic social needs as hospitals and fire protection to the less conspicuous tasks of mosquito abatement and upkeep of cemeteries.

### School District Governments and Public School Systems

Of the 15,014 public school systems in the United States in 2002, only the 13,506 that are independent school districts are included in the count of governments. The other 1,508 “dependent” public school systems are classified as agencies of other governments. State, county, municipal, or town or township school systems are not counted as separate governments.

---

Because of the variety of state legislative provisions for the administration and operation of public schools, marked diversity is found in school organization throughout the United States. The number of states providing for public schools solely through independent school districts numbered 31 in 2002. This independent district arrangement, which prevails in most parts of the country, is practically universal in the West.

A “mixed” situation is found in 15 states, with the public schools that provide elementary and secondary education operated in some areas by independent school districts and elsewhere by a county, municipal, town or township, or state government. In the District of Columbia and in four states (Alaska, Hawaii, Maryland, and North Carolina), there are no independent school districts; all public schools in those jurisdictions are administered by systems that are agencies of the county, municipal, or state government.

Alaska, Connecticut, Hawaii, Maine, Massachusetts, Michigan, New Jersey, Rhode Island, and Texas have one or more state-dependent public school systems. The 19 state-dependent public school systems in Alaska serve sparsely-populated areas not served by borough or city school systems. All public schools in Hawaii are administered directly as part of the state government, but, in Maine, this arrangement applies only to one sparsely populated area. In New Jersey, three public school systems that are undergoing reorganization are state-operated.

Public school systems operating as dependent agencies of county governments appear mostly in North Carolina, Tennessee, and Virginia, which contain nearly two-thirds of all county-dependent systems. However, California has 59 county-dependent systems and New Jersey 50. Other states with public school systems operating as dependent agencies of county governments are Alaska (13), Arizona (14), Maryland (38), Massachusetts (2), Mississippi (3), New York (25), and Wisconsin (2). Systems dependent on town or township governments are found only in Connecticut, Maine, Massachusetts, New Jersey, and Rhode Island. There are public school systems operated by municipal governments in each of 13 states and the District of Columbia, but in most of these states, some other pattern predominates, and only in the District of Columbia are all public schools operated by a municipally-dependent system.

California and Texas, each of which had more than 1,000 school district governments, accounted for 15 percent of all school district governments in the nation. The number of states having at least 1,000 school district governments decreased from 25 in 1942 to 20 in 1952, 15 in 1962, 4 in 1972 and 1982, 3 in 1987, and 2 in 1992, 1997, and 2002.

## **BASIC CONCEPTS**

### **Employment and Employees**

Employment, as used in this report, refers to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in paid leave status, and persons paid on a per meeting, annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees. Full-time employees are defined as those who work the standard full-time hours prescribed by each government.

Part-time employees are those persons who work less than the standard number of hours for full-time work in their employer government.

### **Full-Time Equivalent Employment**

The term “full-time equivalent employment” refers to a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the “part-time hours paid” by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

### **March Payroll**

Payroll amounts shown in this report represent gross payrolls for the 1-month period of March, 2002. The gross payroll includes all salaries, wages, fees, or commissions paid to employees during the pay period which included the date of March 12, 2002.

Payroll amounts reported for a period other than 1 month were converted to represent an amount for the month of March by multiplying the reported payroll by an appropriate factor. For example, a 2-week payroll was multiplied by 2.214, a 1-week payroll was multiplied by 4.429, and a half month payroll was multiplied by 2.

Effective with the 1997 Census of Governments, the reference period for measuring government employment was changed from October of the calendar year to March of the calendar year. As a result, there was no annual survey of government employment covering the October, 1996 period. As shown in Table 4, the prior reference month of October was used from 1958 to 1995.

### **Average March Earnings**

Average March earnings shown are for full-time employees only and represent the quotient of full-time employee payroll divided by the number of full-time employees.

---

## COUNTY AREA DATA

All county area information pertains only to local government data—that is counties, municipalities, townships, special districts, and school districts. Table 16 provides information about county area. Individual local governments county area data are presented in Table 19.

When comparing county areas, remember that the average earnings data are unadjusted for any differences in cost of living. Further, these data can be influenced heavily by the presence of intercounty governments and unique local circumstances such as difficult geography or very small populations.

## INTERCOUNTY LOCAL GOVERNMENTS

Most local governments in the United States operate entirely within a single county area, but there are some whose territory extends into two or more county areas. Each of these intercounty governments is counted only once in this report and has been assigned for purposes of enumeration to the county area where its headquarters is located, or in the case of municipal governments to the county area having the largest share of its population.

Knowledge about intercounty governments and the assignments of data are very important in making inter-area comparisons from Table 16. For example, the Washington Metropolitan Area Transit Authority (WMATA) is a special district government operating in eight county areas in the proximity of Washington, DC Its employees and payrolls are assigned to the District of Columbia area, site of its principal offices. The Washington, DC data in Table 16, therefore, are increased in their employment and payroll totals. In fact, however, a portion of these data belong in the seven other county areas served by this special district.

Though the Census Bureau acknowledges the advisability of allocating these intercounty governments, we have made no attempt to do this because there was no standard criterion or methodology available that could be applied practically in the majority of cases. The listings in Appendix B and C provide some details in those cases where there might be the most severe data dislocations. Further information regarding intercounty governments may be requested from the Chief, Governments Division, U.S. Census Bureau, Washington, DC 20233.

## RELATION TO OTHER CENSUS REPORTS

Volume 3, Number 1 of the 2002 Census of Governments supplies detailed information on the employment and payroll of counties, municipalites, townships, school districts, and special districts. Except in a very few instances, where limited revisions may have applied, amounts appearing in that report agree with corresponding items shown here.

## SOURCES OF DATA

Data in this publication are based on information obtained in the 2002 Census of Governments. Federal government data were compiled by Census Bureau staff from records of the U.S. Office of Personnel Management. Thirty-seven state governments provided data from central payroll records for all or most of their agencies/institutions. Data for agencies and institutions for the remaining 13 state governments, and any not included in the central payroll systems of the above referenced 37 state governments, were obtained by mail canvass questionnaires or through an Internet data collection site.

Local government data were generally requested by mail canvass questionnaires except for the following cases:

- Elementary and secondary school system data in Florida, North Carolina, North Dakota, and Washington were supplied by special arrangements with the state education agency in each of these states.

Eight different mail canvass questionnaires were used in the 2002 Census of Governments, Survey of Government Employment. Each mail questionnaire included a User ID for accessing our Internet form where respondents could submit their data. Each of the reporting documents was tailored to specific types of reporting entities:

- State government agencies and institutions except higher education institutions, state operated elementary/secondary school systems, and state police protection agencies.
- State institutions of higher education.
- State and local government police protection agencies (local police agencies were canvassed only when data were not available from the government's primary reporting office).
- All county governments plus municipal and township governments.
- Municipal and township governments.
- Elementary and secondary school systems and local institutions of higher education.
- Single function special districts (except fire protection districts) and single function agencies (except police protection agencies) of county, municipal, and township governments (these individual local agencies were canvassed only when data were not available from the government's primary reporting office).
- Multiple function and fire protection special districts plus multiple function agencies of county, municipal, and township governments (these individual local agencies were canvassed only when data were not available from the government's primary reporting office).

Each type of questionnaire requested information on:

- Number of paid full-time and part-time employees for the pay interval that included the date of March 12, 2002.
- Gross pay of full-time and part-time employees for the pay interval that included the date of March 12, 2002.
- Number of paid hours of work for part-time employees during the reported pay interval.
- The length of the reported pay interval.
- The standard number of weekly hours of work for the majority of full-time employees.

General reporting instructions and definitions were modified for each questionnaire type to take into account the nature of the applicable reporting entities. Further, the section requesting data on employees, pay, and part-time employee hours worked was modified on each questionnaire type for the appropriate government function detail required for this census.

Information provided on mail canvass questionnaires or the Internet site, and by special collection arrangements was electronically recorded and edited for consistency and reasonableness. Incomplete returns and replies containing information that failed consistency or reasonableness tests were referred to trained Census Bureau personnel for review, possible follow-up, and any necessary corrections. Additional or corrected information obtained in the review of these “failed edit” cases was entered into electronic data records for corrective processing.

## LIMITATIONS OF DATA

### Nonresponse

Some local governments did not provide data requested in the Census of Governments, Survey of Government Employment. For such cases, the census totals given in the Compendium of Government Employment contain data derived from:

- The Census Bureau’s recent annual surveys of government employment (surveys that request similar government employment and pay data for a sample of local governments) or the 1997 Census of Governments.
- Imputation procedures that use 2002 Census of Governments data reported by like types of governments of similar size in the same state, or use secondary data sources.

The nonresponse rate for all local Governments was 24.0 percent.

The 2002 response rates for all local governments were as follows:

| Type of government                      | Total  | Respondent | Response rate |
|---|--------|------------|---------------|
| Local governments w/dependent schools   | 89,033 | 67,702     | 76.0          |
| Local governments w/o dependent schools | 87,525 | 66,687     | 76.2          |
| County                                  | 3,034  | 2,233      | 73.6          |
| Municipal                               | 19,429 | 15,092     | 77.7          |
| Town or township                        | 16,504 | 11,389     | 69.0          |
| Independent school district             | 13,506 | 10,592     | 78.4          |
| Dependent school                        | 1,508  | 1,015      | 72.6          |
| Special district                        | 35,052 | 27,381     | 78.1          |

### Reporting Errors

Extensive measures were taken to reduce reporting errors for this census. The mail canvass questionnaires and special data collection arrangements used in this phase of the 2002 Census of Governments contained detailed definitions and reporting instructions to assist state and local government officials in their preparation of replies and to facilitate uniform interpretation and reporting procedures. Each questionnaire and special collection request also contained a Census Bureau telephone number that reporting officials could call to obtain additional clarification and assistance from subject matter specialists. Quality control of reported data was aided also by reference to information collected by the Census Bureau in its annually conducted sample surveys of government employment and payrolls. These annual surveys request similar employment and payroll data, include the same general definitions and reporting procedures, and include all state governments and a sample of approximately 14,000 local governments.

However, human and mechanical errors occur in any mass statistical operation such as the Census of Governments, including omissions, misinterpretations, errors in reporting, errors in the electronic recording of data, errors in the clerical review and adjustment of electronically identified problem data, and at other stages of data processing. Procedures were applied at each stage of processing this phase of the 2002 Census of Governments to keep human and mechanical errors at an acceptable low level.

Although an effort is made in each census to maintain congruity of the definitions, concepts, and terms applied in data collection, historical and interarea comparisons should be made with care. Changes in the level or type of government providing particular services occur over time. Thus, a decrease in employment for a particular function of a government does not, in and of itself, signify a diminution of services the population receives. Moreover, certain services may be “contracted out” and the contractor’s employees are not counted as employees of the contracting government. Also, annexation, other boundary changes, consolidations of governmental entities, and changes in the demographic makeup of the area served may affect not only the number of persons for whom services must be provided, but also the nature and scope of the necessary services.

---

## Interarea Comparisons

Use caution in attempting to draw conclusions from direct interstate or intergovernmental comparisons of employment and payroll data. Such comparisons should take into account the diversity of responsibilities for various functions between different governments. Some state governments, for example, directly administer certain activities which elsewhere are undertaken by local governments, with or without state fiscal aid.

Even within the same state, one may observe marked diversity in the scope of functions performed by individual governments or governments of a particular type. It is not unusual, for example, for one or a few large county governments to provide services that are normally handled by municipalities. As an example showing a different perspective, there are certain sizable “contract cities” in California that operate mainly through county agencies rather than by direct employment of personnel for the entire range of common city functions.

Some individual governments reported here as municipalities operate in effect as composite city-county units. See Appendix D for a listing of the largest of these city-county governments classed as municipalities.

One variable that affects the scope and scale of government employment significantly is the placement of responsibility for administration of local public schools. In most states, this function is assigned to independent school districts. In many instances, however, including several of the largest cities, the school system is part of the municipal, county, or township government. Of similar nature are differences in state versus city, county, or township administration of public assistance programs, or of public hospital facilities and services.

Similarly, certain potential limitations need to be recognized with regard to direct interarea comparisons of county areas in Table 19. These data represent a summation of amounts for all local governments located entirely or mainly within each particular county. Refer to the previous discussion on intercounty governments for an explanation of how data for these units were assigned. Appendixes B and C provide a listing of the largest intercounty municipalities and special districts.

Beyond this, the residents of a particular governmental jurisdiction or even an entire county might not be the only beneficiaries of local government operations in the area. One might find, for example, that a scattered minority of individual county areas exhibit a relatively high level of employment for Health and Hospitals. This phenomenon, which occurs most frequently in sparsely populated states, is due to arrangements by which public hospitals in one county actually serve a group of counties. Another circumstance occurring with increasing frequency in urban areas is the establishment of solid waste processing facilities, operated by a single county or municipality but providing service to a wide area.

## AVAILABILITY OF DATA

Copies of this and other reports of the 2002 Census of Governments are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20302 and U.S. Department of Commerce District Offices.

Published data on the employment and payrolls of individual major local governments (all counties, municipalities and townships [in selected states] having 25,000 or more population, local school systems enrolling 10,000 or more pupils, and special districts employing 100 or more full-time workers) are presented in Volume 3, Number 1, Employment of Major Local Governments.

This report, as well as the 2002 Government Organization Data File, will also be available in electronic format on the Internet at [www.census.gov/govs/www/index.html](http://www.census.gov/govs/www/index.html). For details concerning the report, contact the Governments Division, U.S. Census Bureau, Washington DC 20233-6800, or telephone 800-242-2184. For details concerning the data included in the report, contact the Governments Division, U.S. Census Bureau, Washington DC 20233-6800, or telephone 800-642-4901.

## MEANINGS OF ABBREVIATIONS AND SYMBOLS

Symbols in statistical tables have the following meanings:

|    |  |
|----|--|
| –  | Represents zero or rounds to zero.                   |
| NA | Not available.                                       |
| r  | Revised.   |
| Z  | Less than one-half of the unit of measurement shown. |

**Table 1. Summary of Public Employment and Payrolls by Type of Government: March 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

| Item   | All governments | Federal government (civilian) <sup>1</sup> | State and local government | State government | Local governments |                 |                |                |                 |                  |

| October 1946   | 6,001                 | 2,434                                      | 3,567                       | 804   | 2,762  | 1,155.5                           | 571.5                                      | 584.0                       | 128.0    | 456.0    |

<sup>1</sup>Comprises all federal civilian employees, including those outside the United States.

Note: Statistics for local government data, except for 2002, 1997, 1992, 1987, 1982, 1977, 1972, 1967, 1962, and 1957 are estimated subject to sampling variation; see text for statement of reliability. Due to a change in the reference period, from October to March, the October 1996 Annual Survey of Government Employment and Payroll was not conducted. This change in collection period is effective beginning with the March 1997 survey.

**Table 3. Summary of Public Employment and Payrolls by Function: March 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

| Function   | Employees (thousands) |  |                            | Full-time equivalent employment (thousands) |  |                            | Full-time equivalent employment per 10,000 population | March payroll (million dollars) |  |                            | Percent distribution            |               |
|--|-----------------------|--|----------------------------|---|--|----------------------------|---|---------------------------------|--|----------------------------|---------------------------------|---------------|

Note: Statistics for local government data, except for 2002, 1997, 1992, 1987, 1982, 1977, 1972, 1967, 1962, and 1957 are estimated subject to sampling variation; see text for statement of reliability. Due to a change in the reference period, from October to March, the October 1996 Annual Survey of Government Employment and Payroll was not conducted. This change in collection period is effective beginning with the March 1997 survey.

**Table 5. Payrolls of State and Local Governments by Type of Government: 1957 to 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding.]

| Month and year                           | State and local governments |                 |                 |                  | Local governments |                 |                |                |                 |                  |

Note: Statistics for local government data, except for 2002, 1997, 1992, 1987, 1982, 1977, 1972, 1967, 1962, and 1957 are estimated subject to sampling variation; see text for statement of reliability. Due to a change in the reference period, from October to March, the October 1996 Annual Survey of Government Employment and Payroll was not conducted. This change in collection period is effective beginning with the March 1997 survey.

**Table 6. Average Monthly Earnings of Full-Time State and Local Government Employees by Type of Government: 1957 to 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

Note: Statistics for local government data, except for 2002, 1997, 1992, 1987, 1982, 1977, 1972, 1967, 1962, and 1957 are estimated subject to sampling variation; see text for statement of reliability. Due to a change in the reference period, from October to March, the October 1996 Annual Survey of Government Employment and Payroll was not conducted. This change in collection period is effective beginning with the March 1997 survey.

**Table 7. Employment and Payrolls of State and Local Governments by Type of Government and Function: 1957 to 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

| Type of government and function         | Employees         |                   |                                 | March payroll (thousand dollars) |                         | Average March earnings, full-time employees (dollars) | Percent distribution            |                     |
|---|-------------------|-------------------|---------------------------------|----------------------------------|-------------------------|---|---------------------------------|---------------------|
|   | Total             | Full-time only    | Full-time equivalent employment | Total                            | For full-time employees |   | Full-time equivalent employment | Total March payroll |
|   |                   |                   |                                 |                                  |                         |   |                                 |                     |

<sup>1</sup>Includes public libraries operated by school districts in Michigan, Missouri, and Ohio.

Note: Statistics for local government data, except for 2002, 1997, 1992, 1987, 1982, 1977, 1972, 1967, 1962, and 1957 are estimated subject to sampling variation; see text for statement of reliability. Due to a change in the reference period, from October to March, the October 1996 Annual Survey of Government Employment and Payroll was not conducted. This change in collection period is effective beginning with the March 1997 survey.

**Table 8. Percent Distribution of Full-Time Equivalent Public Employment by Type of Government and Function: March 2002**

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]
