

June 19, 2007

In the matter of  
FMC Corporation  
FMC @ Granger Mine  
ID No. 48-00639

Docket No. M-83-039-M

PROPOSED DECISION AND ORDER TO REVOKE

On December 10, 1984, FMC Corporation formerly (TG Soda Ash, Inc., Texas Gulf Chemicals Company) was granted a variance of Title 30 Code of Federal Regulations (30 CFR) § 57.22218 formerly (57.21-53) pursuant to Section 101(c) of the Federal Mine Safety and Health Act of 1977, based upon an alternative method of compliance. The variance allowed the use of extruded polystyrene (EFS) "Styrofoam" block during the construction of permanent mine stoppings between intake and return airways.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

Mine Safety and Health Administration (MSHA) Rocky Mountain District personnel have determined that the mining conditions have changed in that the mine was permanently closed on June 7, 2007. The modification of 30 CFR § 57.22218, therefore, is no longer necessary.

ORDER

Wherefore, pursuant to the authority delegated by the Secretary of Labor to the Administrator for Metal and Nonmetal Mine Safety and Health and pursuant to Section 101(c) of the Federal Mine Safety and Health Act of 1977, 30 U.S.C., Section 811(c), it is ordered that FMC Corporation's modification of 30 CFR § 57.22218 as it pertains to the FMC @ Granger Mine, is hereby:

**REVOKED.**

/s/ Felix A. Quintana
