

**Coefficients of Variation and Standard Errors by Type of Construction**  
(percent)

| Type of Construction              | Coefficient of variation | Standard error      |
|-----------------------------------|--------------------------|---------------------|
|                                   | Monthly estimate         | Year-to-year change |
| <b>Total Federal Construction</b> | 0.7                      | 1.5                 |
| Residential                       | 1.4                      | 2.2                 |
| Nonresidential                    | 0.8                      | 1.6                 |
| Office                            | 1.0                      | 2.2                 |
| Commercial                        | 2.9                      | 4.2                 |
| Health care                       | 4.2                      | 10.0                |
| Educational                       | 3.9                      | 6.8                 |
| Public safety                     | 1.1                      | 8.0                 |
| Amusement and recreation          | 7.2                      | 13.4                |
| Transportation                    | 1.6                      | 5.2                 |
| Power                             | 4.3                      | 11.3                |
| Highway and street                | 7.9                      | 15.1                |
| Conservation and development      | 2.6                      | 2.8                 |
