Integrated Acquisition Environment E-Gov Initiative

IAE Monthly Update—October 29. 2004

Vision:

A secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance.

Goals:

- Create a simpler, common integrated business process for buyers and sellers that promotes competition, transparency and integrity.

- Increase data sharing to enable better business decisions in procurement, logistics, payment and performance assessment.

- Take a unified approach to obtaining modern tools to leverage investment costs for business related processes.

IAE Business Areas and Objectives

- **Business Partner Network (BPN)—** Deploy a single point of registration and validation of supplier data accessed by all agencies.
- **Acquisition Information Reporting (AIR)—**Implement a central point for consolidated collection and access of statistical and management information related to government acquisitions.
- **eMarketplace**
  Phase 1: Provide a common on-line directory to GWAC and other multi-agency contracts to simplify selection and facilitate leverage of Government buying.
  Phase 2: Centralize and integrate market research and acquisition tools by providing access to, federal and open market eCatalogs, solicitations/responses, and small business opportunities to facilitate buying across the federal government.
- **Intra-government Transactions (IGT)—**Transform intra-governmental ordering and billing, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements.
- **Standard Transactions—** Develop a standard glossary and vocabulary to facilitate exchange of procurement data between and within agencies.
