Defense Office of the Secretary/Wash. Hdqtrs. Services (WHS) - FY 2006
Glossary

Comprehensive Anti-Harassment Policy:

A comprehensive anti-harassment policy addresses all EEO bases.

DNF:

The agency did not file a FY 2006 MD-715 report with EEOC.

Federal Human Capital Survey:

The Federal Human Capital Survey is a tool that measures employees' perceptions of whether, and to what extent, conditions characterizing successful organizations are present in their agencies. The survey was first conducted in 2002, which set a baseline for ongoing assessment in the federal government. The survey was conducted again in 2004 and 2006. The goals of the survey include (1) providing general indicators of how well the federal government is running its human resources management systems; (2) serving as a tool for OPM to assess individual agencies and their progress toward "green" status on strategic management of human capital under the President's Management Agenda; and (3) giving senior managers critical information to answer the question of "what can I do to make my agency work better".

NA:

Not applicable.

NRF

Not required to file.

Occ. CLF:

The U.S. Census Bureau defines the Civilian Labor Force (CLF) as all non-institutionalized civilians 16 and older who are either working or looking for work. The 2000 Census includes over 31,000 occupation titles based upon how individuals reported their type of work. The occupational CLF provides a participation rate for each EEO group's employment in particular occupations.

Odds Ratio:

Odds ratio is a method of comparing whether the probability of a certain event is the same for two groups. Each EEO group is compared to the rest of the agency workforce and the event measured is promotion to GS-15 or SES. An odds ratio of 1 implies that a promotion is equally likely. An odds ratio greater than 1 implies that a member of the EEO group is more likely to be promoted than an employee in the rest of the workforce. An odds ratio less than 1 implies that a member of the EEO group is less likely to be promoted than an employee in the rest of the workforce. Odds ratio analysis is shown only for race, gender, and ethnicity. Promotion analysis for people with targeted disabilities was deemed inappropriate given the dearth of such persons in the federal workforce.

Odds Ratio Formulas:

$$\frac{\text{EEO Group SES} \times (\text{Total 15} - \text{EEO Group 15})}{(\text{Total SES} - \text{EEO Group SES}) \times \text{EEO Group 15}}$$

$$\frac{\text{EEO Group SES} \times (\text{Total 15\&14} - \text{EEO Group 15\&14})}{(\text{Total SES} - \text{EEO Group SES}) \times \text{EEO Group 15\&14}}$$

$$\frac{\text{EEO Group 15} \times (\text{Total 14} - \text{EEO Group 14})}{(\text{Total 15} - \text{EEO Group 15}) \times \text{EEO Group 14}}$$

Odds Ratio Scoring:

Odds > means the ratio is above 1

Odds < means the ratio is below 1

Odds = means the ratio is 1

Partic. Rate:

Participation Rate is the percentage of the total workforce represented by the particular group.

Raw Score for Indicators Evaluating Average Days in the EEO Program Activities:

The raw score for indicators evaluating the average days to submit complaint files at the hearing and appellate stages is calculated as follows: $[100 \text{ minus } \{(\text{the average days for EEOC to receive the agency's complaint files minus (the regulatory required time frame plus five days for mailing)) \text{ multiplied by two} \}]$. For example, if EEOC received the complaint files from an agency in an average of 47 days at the appellate stage, which is after the 30 day time frame, the raw score would be 76 $[100 \text{ minus } \{(47 \text{ minus } (30 \text{ plus } 5)) \text{ multiplied by } 2\}]$.

Resolution Rate:

Resolution rate is the percentage of EEO counselings that are resolved by either settlement or withdrawal from the EEO process during the pre-complaint stage.

Weighted Score of the EEO Program Activities Indicators:

Each of the MD-715 six essential elements is weighted equally at 200 total points per element, resulting in a maximum weighted score of 1200 points. Because some of the elements have a raw score that exceeds 200 points, the raw score is converted to a weighted score by using the following formula: $(\text{agency's raw score for that element multiplied by } 200) \text{ divided by the maximum raw score for that element}$. For example, if the agency has a raw score of 345 in the Efficiency element out of a maximum raw score of 500, the weighted score would be 138 $[(345 \text{ multiplied by } 200) \text{ divided by } 500]$.

TWF:

The total workforce is a snapshot of the agency's employees on Sept 30, 2006, as reported by the agency in its MD-715 workforce data table A-1.
