## UNION MEMBERSHIP IN NEW YORK AND NEW JERSEY, 2008

In 2008, union members accounted for 24.9 percent of wage and salary workers in New York and 18.3 percent in New Jersey, compared to 25.2 percent and 19.2 percent, respectively, in 2007 according to the U.S. Department of Labor's Bureau of Labor Statistics. Regional Commissioner Michael L. Dolfman noted that the union membership rates in both New York and New Jersey have generally edged down since 1995 when they were at 27.7 and 21.9 percent, respectively. (See chart A and tables A-1 and A-2.) However, both states had union membership rates above that for the nation in 2008, as union members accounted for 12.4 percent of employed wage and salary workers in the United States. In 1995, the union membership rate for the nation was 14.9 percent.

Chart A. Union membership rates, New York, New Jersey, and the United States, 1995-2008

New York had 2,029,000 union members in 2008 and New Jersey, 703,000. In addition to these members, another 141,000 wage and salary workers in New York and 28,000 in New Jersey were represented by a union on their main job or were covered by an employee association or contract while not union members themselves. (See tables A-1 and A-2.) Nationwide, about 16.1 million wage and salary workers were union members in 2008 and about 1.7 million wage and salary workers were nonmembers represented by a union or covered by a contract.

[^0]In 2008, 29 states and the District of Columbia had union membership rates below the U.S. average, while 20 had higher rates, and 1 state had the same rate. (See table 1.) All states in the East North Central, Middle Atlantic (which includes New York and New Jersey), and Pacific divisions reported union membership rates at or above the national average, and all states in the East South Central and West South Central divisions had rates below it. (See chart 1.) Union membership rates rose over the year in 26 states and the District of Columbia, declined in 20 states (including New York and New Jersey), and were unchanged in 4 states.

Three states had union membership rates above 20 percent in 2008. New York had the highest rate, followed by Hawaii and Alaska, with rates of 24.3 and 23.5 percent, respectively. In fact, New York has had the highest membership rate for 11 of the past 12 years. Six states had union membership rates below 5.0 percent, with North Carolina having the lowest, 3.5 percent. The next lowest rates were recorded in Georgia (3.7 percent), South Carolina (3.9 percent), Virginia (4.1 percent), Texas (4.5 percent), and Louisiana (4.6 percent).

More than half ( 8.7 million) of the 16.1 million union members in the United States lived in just seven states (California, 2.7 million; New York, 2.0 million; Illinois, 0.9 million; Pennsylvania and Michigan, 0.8 million, each; and Ohio and New Jersey, 0.7 million each), though these states accounted for about one-third of wage and salary employment nationally.

State union membership levels depend on both the union membership rate and the employment level. For example, despite having 1.8 million fewer wage and salary employees statewide, New York had four and a half times as many union members as Texas. Similarly, New Jersey, with 241,000 fewer wage and salary employees, had over four and a half times as many union members as Georgia.

## Technical Note

The estimates in this release are obtained from the Current Population Survey (CPS), which provides the basic information on the labor force, employment, and unemployment. The survey is conducted monthly for the Bureau of Labor Statistics by the U.S. Census Bureau from a scientifically selected national sample of about 60,000 households. The union membership and earnings data are tabulated from one-quarter of the CPS monthly sample and are limited to wage and salary workers. All self-employed workers are excluded.

Union membership data, particularly for levels, are not strictly comparable with data for earlier years because of the introduction of updated population controls used in the CPS. These updated controls have little or no effect on unemployment rates and other ratios, such as union membership rates. For technical documentation and related information, including reliability of the CPS estimates, see www.bls.gov/cps/documentation.htm.

For personal assistance or further information on union membership, as well as other Bureau data, contact the New York Information Office at 646-264-3600 from 9:00 a.m. to 12:30 p.m. and 1:30 p.m. to 4:30 p.m. ET. Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200, TDD message referral phone number: 1-800-877-8339.

## Definitions

The principal definitions used in this release are described briefly below.
Union members. Members of a labor union or an employee association similar to a union.
Represented by unions. Union members, as well as workers who have no union affiliation but whose jobs are covered by a union or an employee association contract.

Wage and salary workers. Workers who receive wages, salaries, commissions, tips, payment in kind, or piece rates. The group includes employees in both the private and public sectors, but, for the purposes of the union membership and earnings series, excludes all self-employed persons, regardless of whether or not their businesses are incorporated.
