

Postdoctoral Research Position

Iowa State University

Candidates are sought for a postdoctoral research position to start as soon as possible. The primary work will be in the development of DNA-based transition metal catalysts. Experience with molecular biology techniques (PCR, cloning, etc.) is preferred; additional knowledge of transition metal and organic chemistry would be useful. The yearly salary is \$35,500. Please submit resume and have three confidential letters of recommendation sent to:

Keith Woo
Department of Chemistry
Iowa State University
Ames, IA 50011.
