

Four-and-a-half percent of workers in the United States were in business and financial operations occupations. This varied from over 10 percent in Tallahassee, Florida, and Warner Robins, Georgia, to about 1 percent in several nonmetropolitan areas in the South.

## FIGURE 40

- Many of the areas with a large share of employment in business and financial operations occupations were capital cities, including Tallahassee, Trenton, Washington, (DC), Olympia, Des Moines, and Sacramento.
- Areas with about 6 percent of their employment in business and financial operations occupations were large areas such as Chicago, Boston, Seattle, Detroit, and San Francisco.
- The areas with low concentrations of business and financial operations occupations tended to be nonmetropolitan.
- St. Mary's County, Maryland, was the only nonmetropolitan area among those with the highest concentrations of business and financial operations occupations. The St. Mary's County, Maryland nonmetropolitan area employed a large number of management analysts.
- Warner Robins, Georgia, had the largest employment concentration of logisticians.

Percent of area employment in business and financial operations occupations, May 2007
