(Includes workers participating in life insurance plans with flat-dollar amount formulas)

¹ Includes participants in plans providing a fixed benefit amount. Dollar amounts can-be-a flat amount or can vary by the employee's earnings or length of service. ² Includes workers in the private nonfarm economy except those in private households, and workers in the public sector, except the federal government. See Technical Note for further

except the federal government. See Technical Note for further explanation. ³ The 10th, 25th, 50th, 75th, and 90th percentiles designate

position within each published series. For example, at the 50th percentile or median, half of participating workers receive the same as or more than the amount shown, and half receive the same as or less than the amount shown. At the 25th percentile, one-fourth of participating workers receive the same or less than the amount shown. The remaining percentiles follow the same logic.
