Sirs,

Implementation of our patented technology (5,680,329 and 5,950,150), that of Code Compliance Verification, will help ensure a safer mine environment. I ask that you review all the attached material, starting at http://www.koritech.com to learn more about how Code Compliance Verification Technology can help you vastly improve mine safety.

Much of the material is geared toward improving the life/safety of buildings but the same applies to mines.

Please do not hesitate to contact me as needed. We stand ready to assist you.

Thank you for your consideration.

jpc
