See footnotes at end of table.

[This table was reissued in March 2009. See note at end of table.]

TABLE R102. Incidence rates<sup>1</sup> for nonfatal occupational injuries and illnesses involving days away from work<sup>2</sup> per 10,000 full-time workers by nature of injury or illness and gender, 2007 — Continued

Nature	Nature code <sup>3</sup>	Private industry <sup>4</sup>	Gender	
			Men	Women
Other diseases, conditions, and disorders, n.e.c. ....	59	( 5 )	( 5 )	( 5 )
<b>Multiple diseases, conditions, and disorders</b> .....	8	.1	.1	.1
<b>Nonclassifiable</b> .....	9999	.7	.5	.7

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

N = number of injuries and illnesses

EH = total hours worked by all employees

          during the calendar year

20,000,000 = base for 10,000 equivalent full-time workers

          (working 40 hours per week, 50 weeks per year)

<sup>2</sup> Days-away-from-work cases include those that resulted in days away from work, some of which also included job transfer or restriction.

<sup>3</sup> Based on the 1992 Occupational Injury and Illness Classification System developed by the Bureau of Labor Statistics.

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data too small to be displayed.

**6 Selected estimates for this category were affected by the March 2009 revision, see note below.**

NOTE: Dash indicates data do not meet publication guidelines. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

This table was reissued in March 2009 to revise selected estimates within the Mining (NAICS 21) and Railroad Transportation (NAICS 482) industries, and in their respective higher level industry sectors. Characteristic categories affected by the revisions, that appear in this table, are footnoted.
