Table A4.1-1 Species of Flora for Type of Habitat

TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
ACANTHACEAE	X							
<i>Aphelandra campanensis</i>	X				X	X		
<i>Blechnum pyramidatum</i>		X	X	X				
ACTINIDACEAE								
<i>Saurauia yasicae</i>	X				X	X		
ANACARDIACEAE								
<i>Anacardium occidentale</i>	X	X	X	X	X		X	X
<i>Astronium graveolens</i>		X	X	X				
ANNONACEAE								
<i>Anaxagorea sp.</i>	X				X	X		
<i>Annona montana</i>	X	X			X	X		
<i>Annona pittieri</i>	X				X	X		
<i>Annona spraguei</i>		X	X	X			X	X
<i>Rollinia mucosa</i>	X				X	X		
APOCYNACEAE								
<i>Aspidosperma spruceanum</i>	X	X	X	X	X			
<i>Lacmellea speciosa</i>	X	X	X	X		X		
<i>Stemmadenia alfari</i>	X				X	X		
ARALIACEAE								
<i>Dendropanax arboreus</i>	X	X	X	X	X	X		
<i>Dendropanax sessiliflorus</i>	X				X	X		
ARECACEAE								
<i>Aiphanes hirsuta</i>	X				X	X		
<i>Attalea butyracea</i>		X	X	X				
<i>Chamaedorea tepejilote</i>	X				X	X		
<i>Cryosophila warscewiczii</i>	X	X			X	X		
<i>Euterpe precatoria</i>	X				X	X		
<i>Geonoma cuneata</i>	X	X			X	X		
<i>Socratea exorrhiza</i>	X	X	X		X	X		
<i>Welfia regia</i>	X	X	X	X				
ASCLEPIADACEAE								
<i>Asclepias curassavica</i>	X	X	X		X	X	X	
ASTERACEAE								
<i>Verbesina lanata</i>	X				X	X		
BIGNONIACEAE								
<i>Amphitecna isthmica</i>	X				X	X		
<i>Amphitecna spathicalyx</i>	X				X	X		
<i>Tabebuia rosea</i>		X	X	X		X	X	
<i>Tabebuia guayacan</i>		X	X			X	X	
BOMBACACEAE								
<i>Matisia exaltata</i>	X				X	X		
<i>Matisia sanblasensis</i>	X							
<i>Pachira aquatica</i>	X	X	X	X	X			
<i>Pachira sessilis</i>		X	X	X	X			
<i>Quararibea asterolepis</i>	X	X	X		X			
<i>Quararibea obliquifolia</i>	X				X			
BORAGINACEAE								
<i>Cordia alliodora</i>	X	X	X	X			X	
<i>Cordia cymosa</i>	X				X	X		
<i>Cordia lucidula</i>	X	X			X	X		
BURSERACEAE								
<i>Protium aff. guianense</i>	X	X		X				
<i>Protium tenuifolium</i>	X			X				
<i>Tetragastris panamensis</i>	X	X	X	X				
CAPARIDACEAE								
<i>Capparis antonensis</i>	X				X	X		
<i>Capparis discolor</i>					X	X		
<i>Capparis pittieri</i>	X				X	X	X	

TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
CECROPIACEAE								
<i>Cecropia garciae</i>	X			X				
<i>Cecropia insignis</i>	X	X	X		X	X		
<i>Cecropia obtusifolia</i>	X	X	X	X	X	X	X	X
CELASTRACEAE								
<i>Maytenus schippii</i>	X	X	X	X				
CHLORANTHACEAE								
<i>Hedyosmum bonplandianum</i>	X				X	X		
<i>Hedyosmum scaberrimum</i>	X				X	X		
CHRYSOBALANACEAE								
<i>Hirtella latifolia</i>	X	X	X	X		X	X	
<i>Hirtella triandra</i>	X	X	X		X	X		
<i>Hirtella tubiflora</i>	X			X				
<i>Licania macrocarpa</i>	X			X				
CLETHRACEAE								
<i>Clethra lanata</i>	X				X	X		
CLUSIACEAE								
<i>Calophyllum brasiliense</i>	X	X	X	X	X	X		
<i>Calophyllum longifolium</i>	X				X			
<i>Chrysochlamys grandifolia</i>	X	X			X			
<i>Clusia divaricata</i>	X				X	X		
<i>Dystovomita paniculata</i>	X			X	X	X		
<i>Marila laxiflora</i>	X	X	X	X	X			
<i>Marila pluricostata</i>	X			X				
<i>Symphonia globulifera</i>	X	X	X		X	X		
<i>Tovomita longifolia</i>	X			X				
<i>Vismia baccifera</i>	X			X				
<i>Vismia billbergiana</i>	X	X	X	X	X	X		
<i>Vismia macrophylla</i>	X			X	X	X		
COMBRETACEAE								
<i>Terminalia amazonia</i>	X	X	X	X	X	X	X	
CYATHEACEAE								
<i>Cyathea petiolata</i>	X				X	X		
ELAEOCARPACEAE								
<i>Sloanea aff.meianthera</i>	X							
ERYTHROXYLACEAE								
<i>Erythroxylum macrophyllum</i>	X				X	X		
EUPHORBIACEAE								
<i>Acalypha diversifolia</i>	X				X	X		
<i>Alchornea costaricensis</i>				X	X			
<i>Alchornea latifolia</i>	X			X	X			
<i>Cc. eveiba pleiostemona</i>	X	X		X				
<i>Croton draco</i>	X	X	X	X	X			
<i>Croton lanjouwensis</i>	X			X	X			
<i>Drypetes sp.aff.amazonica</i>	X	X		X	X			
<i>Hieronyma oblonga</i>	X			X	X			
<i>Maprounea guianensis</i>	X	X		X				
<i>Pera arborea</i>	X	X	X	X		X	X	
<i>Sapium glandulosum</i>	X			X	X			
<i>Tetrorchidium gorgonae</i>	X			X	X			
FABACEAE								
<i>Dussia macrophyllata</i>	X			X	X			
<i>Dussia munda</i>	X	X		X	X			
<i>Dussia tessmannii</i>	X							
<i>Erythrina costaricensis</i>	X	X			X			
<i>Inga ciliata ss:subcapitata</i>	X			X	X			
<i>Inga laurina</i>	X	X	X		X			
<i>Inga filiformis</i>	X				X			
<i>Inga marginata</i>	X	X		X	X			

TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
<i>Inga oerstediana</i>	X			X	X			
<i>Inga punctata</i>		X	X	X				
<i>Inga sapindoides</i>	X	X	X					
<i>Inga sertulifera</i>	X				X	X		
<i>Inga sierrae</i>	X			X	X	X		
<i>Inga urceolata</i>	X			X	X	X		
<i>Iriartea deltoidea</i>	X	X						
<i>Lonchocarpus oliganthus</i>	X			X				
<i>Ormosia amazonica</i>	X	X	X	X	X			
<i>Platymiscium pinnatum</i>	X		X	X				
<i>Sclerolobium costaricense</i>	X			X				
<i>Senna dariensis</i>	X		X	X				
<i>Swartzia simplex var. ochracea</i>	X	X	X	X	X			
<i>Tachigali versicolor</i>	X	X	X		X			
FLACOURTIACEAE								
<i>Casearia arborea</i>	X			X				
<i>Casearia commersoniana</i>	X	X	X		X			
<i>Casearia sylvestris</i>	X			X	X			
<i>Laetia thamnia</i>	X	X	X	X	X			
<i>Lunania piperoides</i>	X			X	X			
<i>Mayna odorata</i>	X	X		X	X			
<i>Ryania speciosa</i>	X			X				
<i>Xylosma oligandra</i>	X				X			
GESNERIACEAE								
<i>Besleria formicaria</i>	X				X	X		
HERNANDIACEAE								
<i>Hernandia stenura</i>	X				X	X		
HIPPOCRATEACEAE								
<i>Salacia petenensis</i>	X				X			
HUMIRIACEAE								
<i>Humiriastrum diguense</i>	X			X	X	X		
ICACINACEAE								
<i>Calatola costaricensis</i>	X			X	X	X		
LACISTEMATAACEAE								
<i>Lacistema aggregatum</i>	X	X	X	X				
<i>Lozania pittieri</i>	X			X				
LAURACEAE								
<i>Cinnamomum paratriplinerve</i>	X				X	X		
<i>Licaria excelsa</i>	X				X	X		
<i>Ocotea dendrodaphne</i>	X			X	X			
<i>Ocotea meziana</i>	X	X			X	X		
<i>Ocotea tonduzii</i>	X				X	X		
<i>Pleurothyrium aff. hexaglandulos</i>	X				X	X		
LECYTHIDACEAE								
<i>Eschweilera sp. aff. angustifolia</i>	X	X		X				
<i>Eschweilera calyculata</i>	X	X		X				
<i>Gustavia dubia</i>	X	X		X				
<i>Gustavia superba</i>	X	X	X	X		X	X	
MALPIGHIACEAE								
<i>Bunchosia dwyeri</i>	X				X			
MALVACEAE								
<i>Hampea albipetala</i>		X		X				
<i>Hampea appendiculata</i>	X			X	X			
MELASTOMATAACEAE								
<i>Aciotis indecora</i>	X				X			
<i>Clidemia octona</i>	X				X			

TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
<i>Conostegia rufescens</i>	X				X			
<i>Conostegia xalapensis</i>	X				X			
<i>Graffenrieda galeottii</i>	X	X			X			
<i>Henriettella tuberculosa</i>		X	X	X				
<i>Miconia argentea</i>	X	X			X		X	
<i>Miconia minutiflora</i>	X	X	X		X			
<i>Miconia dorsiloba</i>	X				X	X		
<i>Miconia elata</i>	X				X			
<i>Miconia ligulata</i>	X				X			
<i>Miconia simplex</i>	X			X	X			
<i>Miconia sp.aff.umbriensis</i>	X						X	
<i>Mouriri sp.aff.exilis</i>		X	X	X				
MELIACEAE								
<i>Carapa guianensis</i>	X			X	X			
<i>Guarea kunthiana</i>	X	X		X	X			
MONIMIACEAE								
<i>Mollinedia pinchotiana</i>	X				X	X		
<i>Siparuna conica</i>	X				X	X		
<i>Siparuna pauciflora</i>	X	X	X	X	X			
MORACEAE								
<i>Brosimum guianense</i>	X				X	X		
<i>Clarisia biflora</i>	X	X		X				
<i>Ficus colubrinae</i>	X	X	X	X	X			
<i>Ficus petenensis</i>	X				X			
<i>Ficus tonduzii</i>	X	X	X		X			
<i>Ficus yoponensis</i>	X	X	X		X			
<i>Helicostylis towarensis</i>	X	X			X	X		
<i>Maquira guianensis</i>	X		X		X	X		
<i>Naucleopsis capirensis</i>	X				X	X		
<i>Naucleopsis naga</i>	X			X	X			
<i>Perebea xanthochyma</i>	X			X	X	X		
<i>Poulsenia armata</i>	X	X	X	X	X	X		
<i>Pourouma bicolor</i>	X	X			X			
<i>Pourouma minor</i>	X				X	X		
<i>Sorocea affinis</i>	X	X	X		X	X		
<i>Sorocea pubivena</i>	X			X	X			
MYRICACEAE								
<i>Myrica mexicana</i>	X	X			X			
MYRISTICACEAE								
<i>Otoba acuminata</i>	X				X	X		
<i>Otoba novogranatensis</i>	X				X	X		
<i>Virola sebifera</i>	X	X		X	X	X		
MYRSINACEAE								
<i>Myrsine coriacea</i>	X			X	X			
<i>Parathesis amplifolia</i>	X				X			
MYRTACEAE								
<i>Eugenia galalonensis</i>	X	X	X	X	X			
<i>Eugenia octopleura</i>	X			X	X			
<i>Eugenia oerstediana</i>	X			X	X			
<i>Myrcia gatunensis</i>	X	X	X	X	X		X	
<i>Plinia povedae</i>	X			X	X			
OCHNACEAE								
<i>Cespedesia macrophylla</i>	X	X		X	X	X		
OLACACEAE								
<i>Heisteria acuminata</i>	X	X	X		X			
<i>Chionanthus panamensis</i>	X	X		X	X			
PIPERACEAE								
<i>Piper arboreum</i>	X	X	X	X	X		X	
<i>Piper augustum</i>	X				X

Table A4.2-1 Species of Flora for Type of Habitat

TAXON		UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
ACANTHACEAE		X							
	<i>Aphelandra campanensis</i>	X				X	X		
	<i>Blechum pyramidatum</i>		X	X	X				
ACTINIDACEAE									
	<i>Saurauia yasicae</i>	X				X	X		
ANACARDIACEAE									
	<i>Anacardium occidentale</i>	X	X	X	X	X		X	X
	<i>Astronium graveolens</i>		X	X	X				
ANNONACEAE									
	<i>Anaxagorea sp.</i>	X				X	X		
	<i>Annona montana</i>	X	X			X	X		
	<i>Annona pittieri</i>	X				X	X		
	<i>Annona spraguei</i>		X	X	X			X	X
	<i>Rollinia mucosa</i>	X				X	X		
APOCYNACEAE									
	<i>Aspidosperma spruceanum</i>	X	X	X	X	X			
	<i>Lacmellea speciosa</i>	X	X	X	X		X		
	<i>Stemmadenia alfari</i>	X				X	X		
ARALIACEAE									
	<i>Dendropanax arboreus</i>	X	X	X	X	X	X		
	<i>Dendropanax sessiliflorus</i>	X				X	X		
ARECACEAE									
	<i>Aiphanes hirsuta</i>	X				X	X		
	<i>Attalea butyracea</i>		X	X	X				
	<i>Chamaedorea tepejilote</i>	X				X	X		
	<i>Cryosophila warscewiczii</i>	X	X			X	X		
	<i>Euterpe precatoria</i>	X				X	X		
	<i>Geonoma cuneata</i>	X	X			X	X		
	<i>Socratea exorrhiza</i>	X	X	X		X	X		
	<i>Welfia regia</i>	X	X	X	X				
ASCLEPIADACEAE									
	<i>Asclepias curassavica</i>	X	X	X		X	X	X	
ASTERACEAE									
	<i>Verbesina lanata</i>	X				X	X		
BIGNONIACEAE									
	<i>Amphitecna isthmica</i>	X				X	X		
	<i>Amphitecna spathicalyx</i>	X				X	X		
	<i>Tabebuia rosea</i>		X	X	X		X	X	
	<i>Tabebuia guayacan</i>		X	X			X	X	
BOMBACACEAE									
	<i>Matisia exaltata</i>	X				X	X		
	<i>Matisia sanblasensis</i>	X							
	<i>Pachira aquatica</i>	X	X	X	X	X			
	<i>Pachira sessilis</i>		X	X	X	X			
	<i>Quararibea asterolepis</i>	X	X	X		X			
	<i>Quararibea obliquifolia</i>	X				X			
BORAGINACEAE									
	<i>Cordia alliodora</i>	X	X	X	X			X	
	<i>Cordia cymosa</i>	X				X	X		
	<i>Cordia lucidula</i>	X	X			X	X		
BURSERACEAE									
	<i>Protium aff. guianense</i>	X	X		X				
	<i>Protium tenuifolium</i>	X			X				
	<i>Tetragastris panamensis</i>	X	X	X	X				
CAPARIDACEAE									
	<i>Capparis antonensis</i>	X				X	X		
	<i>Capparis discolor</i>					X	X		

	TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
	<i>Capparis pittieri</i>	X				X	X	X	
CECROPIACEAE									
	<i>Cecropia garciae</i>	X			X				
	<i>Cecropia insignis</i>	X	X	X		X	X		
	<i>Cecropia obtusifolia</i>	X	X	X	X	X	X	X	X
CELASTRACEAE									
	<i>Maytenus schippii</i>	X	X	X	X				
CHLORANTHACEAE									
	<i>Hedyosmum bonplandianum</i>	X				X	X		
	<i>Hedyosmum scaberrimum</i>	X				X	X		
CHRYSOBALANACEAE									
	<i>Hirtella latifolia</i>	X	X	X	X		X	X	
	<i>Hirtella triandra</i>	X	X	X			X	X	
	<i>Hirtella tubiflora</i>	X			X				
	<i>Licania macrocarpa</i>	X			X				
CLETHRACEAE									
	<i>Clethra lanata</i>	X				X	X		
CLUSIACEAE									
	<i>Calophyllum brasiliense</i>	X	X	X	X	X	X		
	<i>Calophyllum longifolium</i>	X				X			
	<i>Chrysochlamys grandifolia</i>	X	X			X			
	<i>Clusia divaricata</i>	X				X	X		
	<i>Dystovomita paniculata</i>	X			X	X	X		
	<i>Marila laxiflora</i>	X	X	X	X	X			
	<i>Marila pluricostata</i>	X			X				
	<i>Symphonia globulifera</i>	X	X	X		X	X		
	<i>Tovomita longifolia</i>	X			X				
	<i>Vismia baccifera</i>	X			X				
	<i>Vismia billbergiana</i>	X	X	X	X	X	X		
	<i>Vismia macrophylla</i>	X			X	X	X		
COMBRETACEAE									
	<i>Terminalia amazonia</i>	X	X	X	X	X	X	X	
CYATHEACEAE									
	<i>Cyathea petiolata</i>	X				X	X		
ELAEOCARPACEAE									
	<i>Sloanea aff. meianthera</i>	X							
ERYTHROXYLACEAE									
	<i>Erythroxylum macrophyllum</i>	X				X	X		
EUPHORBIACEAE									
	<i>Acalypha diversifolia</i>	X				X	X		
	<i>Alchornea costaricensis</i>				X	X			
	<i>Alchornea latifolia</i>	X			X	X			
	<i>Conceveiba pleiostemona</i>	X	X		X				
	<i>Croton draco</i>	X	X	X	X	X			
	<i>Croton lanjouwensis</i>	X			X	X			
	<i>Drypetes sp. aff. amazonica</i>	X	X		X	X			
	<i>Hieronyma oblonga</i>	X			X	X			
	<i>Maprounea guianensis</i>	X	X		X				
	<i>Pera arborea</i>	X	X	X	X		X	X	
	<i>Sapium glandulosum</i>	X			X	X			
	<i>Tetrorchidium gorgonae</i>	X			X	X			
FABACEAE									
	<i>Dussia macroprophyllata</i>	X			X	X			
	<i>Dussia munda</i>	X	X		X	X			
	<i>Dussia tessmannii</i>	X							
	<i>Erythrina costaricensis</i>	X	X			X			
	<i>Inga ciliata ss: subcapitata</i>	X			X	X			
	<i>Inga laurina</i>	X	X	X		X			

TAXON		UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
	<i>Inga filiformis</i>	X				X			
	<i>Inga marginata</i>	X	X		X	X			
	<i>Inga oerstediana</i>	X			X	X			
	<i>Inga punctata</i>		X	X	X				
	<i>Inga sapindoides</i>	X	X	X					
	<i>Inga sertulifera</i>	X				X	X		
	<i>Inga sierrae</i>	X			X	X	X		
	<i>Inga urceolata</i>	X			X	X	X		
	<i>Iriartea deltoidea</i>	X	X						
	<i>Lonchocarpus oliganthus</i>	X			X				
	<i>Ormosia amazonica</i>	X	X	X	X	X			
	<i>Platymiscium pinnatum</i>	X		X	X				
	<i>Sclerolobium costaricense</i>	X			X				
	<i>Senna dariensis</i>	X		X	X				
	<i>Swartzia simplex var. ochracea</i>	X	X	X	X	X			
	<i>Tachigali versicolor</i>	X	X	X		X			
FLACOURTIACEAE									
	<i>Casearia arborea</i>	X			X				
	<i>Casearia commersoniana</i>	X	X	X		X			
	<i>Casearia sylvestris</i>	X			X	X			
	<i>Laetia thamnia</i>	X	X	X	X	X			
	<i>Lunania piperoides</i>	X			X	X			
	<i>Mayna odorata</i>	X	X		X	X			
	<i>Ryania speciosa</i>	X			X				
	<i>Xylosma oligandra</i>	X				X			
GESNERIACEAE									
	<i>Besleria formicaria</i>	X				X	X		
HERNANDIACEAE									
	<i>Hernandia stenura</i>	X				X	X		
HIPPOCRATEACEAE									
	<i>Salacia petenensis</i>	X				X			
HUMIRIACEAE									
	<i>Humiriastrum diguense</i>	X			X	X	X		
ICACINACEAE									
	<i>Calatola costaricensis</i>	X			X	X	X		
LACISTEMATAACEAE									
	<i>Lacistema aggregatum</i>	X	X	X	X				
	<i>Lozania pittieri</i>	X			X				
LAURACEAE									
	<i>Cinnamomum paratriplinerve</i>	X				X	X		
	<i>Licaria excelsa</i>	X				X	X		
	<i>Ocotea dendrodaphne</i>	X			X	X			
	<i>Ocotea meziana</i>	X	X			X	X		
	<i>Ocotea tonduzii</i>	X				X	X		
	<i>Pleurothyrium aff. hexaglandulos</i>	X				X	X		
LECYTHIDACEAE									
	<i>Eschweilera sp.aff. angustifolia</i>	X	X		X				
	<i>Eschweilera calyculata</i>	X	X		X				
	<i>Gustavia dubia</i>	X	X		X				
	<i>Gustavia superba</i>	X	X	X	X		X	X	
MALPIGHIACEAE									
	<i>Bunchosia dwyeri</i>	X				X			
MALVACEAE									
	<i>Hampea albipetala</i>		X		X				
	<i>Hampea appendiculata</i>	X			X	X			

TAXON		UCA	MCA	LCA	bpot	bspots	bpotm	rast	past
MELASTOMATACEAE									
	<i>Aciotis indecora</i>	X				X			
	<i>Clidemia octona</i>	X				X			
	<i>Conostegia rufescens</i>	X				X			
	<i>Conostegia xalapensis</i>	X				X			
	<i>Graffenrieda galeottii</i>	X	X			X			
	<i>Henriettella tuberculosa</i>		X	X	X				
	<i>Miconia argentea</i>	X	X			X		X	
	<i>Miconia minutiflora</i>	X	X	X		X			
	<i>Miconia dorsiloba</i>	X				X	X		
	<i>Miconia elata</i>	X				X			
	<i>Miconia ligulata</i>	X				X			
	<i>Miconia simplex</i>	X			X	X			
	<i>Miconia sp.aff.umbriensis</i>	X						X	
	<i>Mouriri sp.aff.exilis</i>		X	X	X				
MELIACEAE									
	<i>Carapa guianensis</i>	X			X	X			
	<i>Guarea kunthiana</i>	X	X		X	X			
MONIMIACEAE									
	<i>Mollinedia pinchotiana</i>	X				X	X		
	<i>Siparuna conica</i>	X				X	X		
	<i>Siparuna pauciflora</i>	X	X	X	X	X			
MORACEAE									
	<i>Brosimum guianense</i>	X				X	X		
	<i>Clarisia biflora</i>	X	X		X				
	<i>Ficus colubrinae</i>	X	X	X	X	X			
	<i>Ficus petenensis</i>	X				X			
	<i>Ficus tonduzii</i>	X	X	X		X			
	<i>Ficus yoponensis</i>	X	X	X		X			
	<i>Helicostylis tovarensis</i>	X	X			X	X		
	<i>Maquira guianensis</i>	X		X		X	X		
	<i>Naucleopsis capirensis</i>	X				X	X		
	<i>Naucleopsis naga</i>	X			X	X			
	<i>Perebea xanthochyma</i>	X			X	X	X		
	<i>Poulsenia armata</i>	X	X	X	X	X	X		
	<i>Pourouma bicolor</i>	X	X			X			
	<i>Pourouma minor</i>	X				X	X		
	<i>Sorocea affinis</i>	X	X	X		X	X		
	<i>Sorocea pubivena</i>	X			X	X			
MYRICACEAE									
	<i>Myrica mexicana</i>	X	X			X			
MYRISTICACEAE									
	<i>Otoba acuminata</i>	X				X	X		
	<i>Otoba novogranatensis</i>	X				X	X		
	<i>Virola sebifera</i>	X	X		X	X	X		
MYRSINACEAE									
	<i>Myrsine coriacea</i>	X			X	X			
	<i>Parathesis amplifolia</i>	X				X			
MYRTACEAE									
	<i>Eugenia galalonensis</i>	X	X	X	X	X			
	<i>Eugenia octopleura</i>	X			X	X			
	<i>Eugenia oerstediana</i>	X			X	X			
	<i>Myrcia gatunensis</i>	X	X	X	X	X		X	
	<i>Plinia povedae</i>	X			X	X			
OCHNACEAE									
	<i>Cespedesia macrophylla</i>	X	X		X	X	X		
OLACACEAE									
	<i>Heisteria acuminata</i>	X	X	X		X			

TAXON		UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
	<i>Chionanthus panamensis</i>	X	X		X	X			
PIPERACEAE									
	<i>Piper arboreum</i>	X	X	X	X	X		X	
	<i>Piper augustum</i>	X				X			
	<i>Piper cordulatum</i>	X	X	X		X			
	<i>Piper fimbriulatum</i>	X				X			
	<i>Piper longispicum</i>	X			X	X			
	<i>Piper reticulatum</i>	X	X	X	X				
POACEAE									
	<i>Andropogon bicornis</i>								
	<i>Axonopus fissifolius</i>	X	X	X		X			
PODOCARPACEAE									
	<i>Podocarpus guatemalensis</i>	X				X			
POLYGONACEAE									
	<i>Coccoloba manzinellensis</i>	X	X			X			
	<i>Coccoloba padiformis</i>		X	X	X			X	
PROTEACEAE									
	<i>Panopsis suaveolens</i>	X				X			
PTERIDACEAE									
	<i>Adiantum lucidum</i>	X	X		X	X			
	<i>Adiantum villosum</i>	X	X		X				
RHIZOPHORACEAE									
	<i>Cassipourea elliptica</i>	X	X	X	X	X			
RUBIACEAE									
	<i>Allenanthus erythrocarpus</i>	X				X			
	<i>Chimarrhis latifolia</i>	X				X			
	<i>Cosmibuena macrocarpa</i>	X				X			
	<i>Coutarea hexandra</i>	X	X		X				
	<i>Elaeagia auriculata</i>	X				X			
	<i>Faramea eurycarpa</i>	X				X			
	<i>Genipa americana</i>		X	X	X		X	X	
	<i>Genipa williamsii</i>	X				X			
	<i>Gonzalagunia rudis</i>	X	X			X			
	<i>Guettarda crispiflora</i>	X				X			
	<i>Ladenbergia brenesii</i>	X				X	X		
	<i>Palicourea guianensis</i>	X	X	X	X		X		
	<i>Palicourea triphylla</i>	X				X			
	<i>Psychotria acuminata</i>	X		X		X	X		
	<i>Psychotria allenii</i>	X				X	X		
	<i>Psychotria capitata</i>	X	X	X		X			
	<i>Psychotria chagrensis</i>	X	X	X	X	X			
	<i>Psychotria correae</i>	X				X			
	<i>Psychotria deflexa</i>	X	X	X	X	X			
	<i>Psychotria elata</i>	X	X	X	X	X			
	<i>Psychotria luxurians</i>	X	X	X		X			
	<i>Psychotria marginata</i>	X	X	X	X	X			
	<i>Psychotria pittieri</i>	X				X			
	<i>Psychotria poeppigiana</i>	X				X			
	<i>Randia lasiantha</i>	X				X			
	<i>Rondeletia buddleioides</i>	X	X			X			
RUTACEAE									
	<i>Stauranthus perforatus</i>	X				X			

	TAXON	UCA	MCA	LCA	bpot	bpots	bpotm	rast	past
	<i>Zanthoxylum juniperinum</i>	X				X			
SABIACEAE									
	<i>Meliosma grandiflora</i>	X				X			
	<i>Meliosma occidentalis</i>	X				X			
SAPINDACEAE									
	<i>Allophylus gentryi</i>	X				X			
	<i>Allophylus psilospermus</i>	X			X	X			
	<i>Cupania cinerea</i>	X	X		X	X			
SAPOTACEAE									
	<i>Chrysophyllum brenesii</i>	X				X			
	<i>Chrysophyllum venezuelanense</i>	X	X		X	X			
	<i>Pouteria calistophylla</i>	X				X			
	<i>Pouteria congestifolia</i>	X				X			
	<i>Pouteria silvestris</i>	X				X			
	<i>Sarcaulus brasiliensis</i>	X			X	X			
SIMAROUBACEAE									
	<i>Simarouba amara</i>	X			X	X			
SOLANACEAE									
	<i>Solanum hayesii</i>	X	X		X	X			
STAPHILIACEAE									
	<i>Turpinia occidentalis</i>	X			X	X			
STERCULIACEAE									
	<i>Sterculia recordiana</i>	X	X		X	X			
	<i>Theobroma simiarum</i>	X			X				
TEOPHRASTACEAE									
	<i>Clavija mezii</i>	X	X		X	X			
THEACEAE									
	<i>Gordonia brandegeei</i>	X			X	X			
	<i>Laplacea fruticosa</i>	X							
THYMELACEAE									
	<i>Daphnopsis americana</i>	X			X				
TILIACEAE									
	<i>Apeiba membranacea</i>	X	X	X	X	X			
	<i>Heliocarpus americanus</i>	X	X	X	X	X			
ULMACEAE									
	<i>Celtis schippii</i>	X	X		X	X			
VERBENACEAE									
	<i>Aegiphila anomala</i>	X				X			
	<i>Aegiphila panamensis</i>				X	X			
	<i>Vitex cooperi</i>	X			X	X			
VIOLACEAE									
	<i>Gloeospermum blakeanum</i>	X	X	X	X	X			
	<i>Hybanthus denticulatus</i>	X			X	X			
	<i>Rinorea dasyadena</i>	X			X	X			
VOCHYSIACEAE									
	<i>Vochysia ferruginea</i>	X			X	X			
	<i>Vochysia hondurensis</i>	X				X	X		
Total of Family: 71	Total of species: 256								

UCA=Upper Catchment Area ;MCA=Middle Catchment Area;LCA=Lower Catchment Area

bpot= Tropical Evergreen Ombrophilous Lowlands Forests <500m

bpots=Tropical Evergreen Ombrophilous Submontane Forest

bpotm=Tropical Evergreen Ombrophilous Montane Forest

rast=Shrublands or Productive System with Significant Natural Woody or Spontaneous Vegetation (10-50%)

past=Pasture land or Productive System with Significant Natural Woody or Spontaneous Vegetation (<10%)

Aquatic Macrophytes for Catchment Areas**

Family/Specie	CATCHMENT AREAS			HABIT		
	Ciri	Lagarto	Alhajuela			
ALISMATACEAE						
<i>Sagittaria platyphylla</i>		M, L				Sum
ARACEAE						
<i>Montrichardia arborescens</i>	M, L	M, L				Mar
<i>Pistia stratiotes</i>		M, L		Fl		
<i>Spatiphyllum friedrichsthalii</i>		U, M, L				Mar
<i>Spatiphyllum quindiuense</i>		U, M				Mar
ASTERACEAE						
<i>Ambrosia cumanensis</i>			Li			Mar
AZOLLACEAE						
<i>Azolla sp.</i>	M, L	M, L	Li	Fl		
CABOMBACEAE						
<i>Cabomba piauhyensis</i>	M, L	A, M				Sum
CERATOPHYLLACEAE						
<i>Ceratophyllum demersum</i>	M, L	M, L				Sum
CHARACEAE						
<i>Chara sp.</i>	M, L	M, L	Li			Sum
COMMELINACEAE						
<i>Commelina elegans</i>	M, L	U, M, L	Li			Mar
CYCLANTHACEAE						
<i>Dicranopigyum crinitum</i>		U, M				Mar
CYPERACEAE						
<i>Cyperus giganteus</i>	M, L	U, M, L				Mar
<i>Eleocharis elegans</i>	M, L	U, M		Em		
<i>Fuirena umbellata</i>	M, L	U, M, L				Mar
FABACEAE						
<i>Mimosa pigra</i>			Li			Mar
<i>Senna alata</i>	M, L		Li			Mar
<i>Sesbania emerus</i>	M, L		Li			Mar
HYDROCHARITACEAE						
<i>Hydrilla verticillata</i>	M, L	M, L	Li			Sum
JUNCACEAE						
<i>Juncus sp.</i>	M, L	U, M, L		Em		
LEMNACEAE						
<i>Lemna minor</i>	M, L	M	Li	Fl		
LENTIBULARIACEAE						
<i>Utricularia sp.</i>	M, L	U, M		Fl		Sum
LIMNOCHARITACEAE						
<i>Limnocharis flava</i>	M, L	U, M, L		Em		
MARSILEACEAE						
<i>Marsilea policarpa</i>	M, L	U, M		Em		
MAYACACEAE						
<i>Mayaca sp.</i>	M, L	U, M				Sum
MENYANTHACEAE						
<i>Nymphoides indica</i>	M, L	U, M		Em		

Family/Specie	SUB BASIN			HABIT			
	Ciri	Lagarto	Alhajuela				
NYMPHAEACEAE							
<i>Nymphaea ampla</i>		U, M		Em

Table A4.2-7. Ecological characteristics and State of Conservation of the Species of Birds of the Catchment Area of the Lagarto River.

KEY: State of conservation: ER=endemic regional, it can be shared by Colombia or by Costa Rica; T=Threatened; EX=Exotic; M=migratory; I, II=CITES; AU=Threatened according to the UICN. Period of activity: D=diurnal; N=nocturnal. Nourishing habit: Fru=frugivore; Car=carnivore; Ins=insectivore; Nec=nectarivore; Ca=carion eating; Pis=piscivore; Her=herbivore. Behavior: T=terrestrial; SA=semiaquatic; Ar=arboreal or shrubby

Table A4.3-3
Aquatic Macrophytes for Catchment Areas

Family/Specie	CATCHMENT AREAS			HABIT		
	Ciri	Lagarto	Alhajuela			
ALISMATACEAE						
<i>Sagittaria platyphylla</i>		M, L				Sum
ARACEAE						
<i>Montrichardia arborescens</i>	M, L	M, L				Mar
<i>Pistia stratiotes</i>		M, L		Fl		
<i>Spatiphyllum friedrichsthalii</i>		U, M, L				Mar
<i>Spatiphyllum quindiuense</i>		U, M				Mar
ASTERACEAE						
<i>Ambrosia cumanensis</i>			L			Mar
AZOLLACEAE						
<i>Azolla sp.</i>	M, L	M, L	L	Fl		
CABOMBACEAE						
<i>Cabomba piauhyensis</i>	M, L	U, M				Sum
CERATOPHYLLACEAE						
<i>Ceratophyllum demersum</i>	M, L	M, L				Sum
CHARACEAE						
<i>Chara sp.</i>	M, L	M, L	L			Sum
COMMELINACEAE						
<i>Commelina elegans</i>	M, L	U, M, L	L			Mar
CYCLANTHACEAE						
<i>Dicranopigyum crinitum</i>		U, M				Mar
CYPERACEAE						
<i>Cyperus giganteus</i>	M, L	U, M, L				Mar
<i>Eleocharis elegans</i>	M, L	U, M		Em		
<i>Fuirena umbellata</i>	M, L	U, M, L				Mar
FABACEAE						
<i>Mimosa pigra</i>			L			Mar
<i>Senna alata</i>	M, L		L			Mar
<i>Sesbania emerus</i>	M, L		L			Mar
HYDROCHARITACEAE						
<i>Hydrilla verticillata</i>	M, L	M, L	L			Sum
JUNCACEAE						
<i>Juncus sp.</i>	M, L	U, M, L		Em		
LEMNACEAE						
<i>Lemna minor</i>	M, L	M	L	Fl		
LENTIBULARIACEAE						
<i>Utricularia sp.</i>	M, L	U, M		Fl		Sum
LIMNOCHARITACEAE						
<i>Limnocharis flava</i>	M, L	U, M, L		Em		
MARSILEACEAE						
<i>Marsilea policarpa</i>	M, L	U, M		Em		
MAYACACEAE						
<i>Mayaca sp.</i>	M, L	U, M				Sum
MENYANTHACEAE						
<i>Nymphoides indica</i>	M, L	U, M		Em		
NYMPHAEACEAE						
<i>Nymphaea ampla</i>		U, M		Em		
<i>Nymphaea sp.</i>	M, L	U, M		Em		
ONAGRACEAE						
<i>Jussiaea natans</i>	M, L	U, M, L	L			Mar
<i>Ludwigia helminthorrhiza</i>		U, M, L				Mar

Family/Specie	CATCHMENT AREAS			HABIT			
	Ciri	Lagarto	Alhajueta				
POACEAE							
<i>Gynerium sagittatum</i>	M, L	U, M, L	L				Mar
<i>Hymenachne amplexicaulis</i>	M, L	U, M, L	L				Mar
<i>Luziola subintegra</i>	M, L	U, M, L					Mar
<i>Panicum grande</i>	M, L	U, M, L					Mar
<i>Panicum maximum</i>	M, L	U, M, L					Mar
<i>Panicum purpurascens</i>	M, L	U, M, L	L				Mar
<i>Paspalidium geminatum</i>	M, L	U, M, L					Mar
<i>Paspalum repens</i>	M, L	U, M, L	L				Mar
PODOSTEMACEAE							
<i>Maratrum sp.</i>							
POLYGONACEAE							
<i>Polygonum acuminatum</i>	M, L	U, M, L	L				Mar
<i>Polygonum hypsidum</i>	M, L	U, M, L	L				Mar
<i>Polygonum punctatum</i>	M, L	U, M, L					Mar
PONTEDERIACEAE							
<i>Eichhornia azurea</i>	M, L	U, M, L		Em			
<i>Eichhornia crassipes</i>	M, L	U, M, L			Fl		
<i>Pontederia rotundifolia</i>	M, L	U, M, L					Mar
PTERIDACEAE

Table A4.3-7 Ecological characteristics and State of Conservation of the Species of Birds of the Catchment Area of Alhajueta Lake.

KEY: State of conservation: ER=endemic regional, it can be shared by Colombia or by Costa Rica; T=Threatened; EX=Exotic; M=migratory; I, II=CITES; AU=Threatened according to the UICN. Period of activity: D=diurnal; N=nocturnal. Nourishing habit: Fru=frugivore; Car=canivore; Ins=insectivore; Nec=nectarivore; Ca=carion eating; Pis=piscivore; Her=herbivore. Behavior: T=terrestrial, SA=semiaquatic; Ar=arboreal or shrubby

ANNEX - 4

1.0 PLAN OF SECURITY

1.1 INTRODUCTION

The Study of Compilation of Environmental, Social and Cultural Information for Catchments areas in or Adjacent to the Eastern Region of the Canal of Panama watershed will be carried out to a great extent using detailed information that has been already raised in field under other efforts / contracts of consultancy. It is for it, that the work of field associated with the above mentioned study of compilation of information would be limited to recognitions and efforts of crosscheck. Therefore, the quantity of personnel that will have to work in field and the time of his demurrage in this one will be limited.

This Plan of Security tries to design specific measurements to assure the safety and health of the persons who should work in the field, inside the context of the project earlier mentioned. To assure the safety and health of the personnel, in this document there appear simple procedures that will have to be used by the whole personnel that takes part of the field activities. URS Holdings, also it has used as base his recent experience in the region to perfect some details that in this plan appear.

Before describing the principal elements of the plan, it is meritorious to indicate that all the members of URS Holdings, Inc. at the expense of the coordinating works, supervision and logistics of the personnel that will realize field works it has wide experience in this type of activities in remote, outlying areas or that they present adverse situations; such as the regions of the Darién or the Western Region of the Panama Canal Watershed. In addition, there will be hired personnel of the region that for his knowledge with the conditions of the same one they are less capable to risk. Nevertheless, in spite of these forecasts, the development and implementation of a Plan of Security it is the key in order that the activities are realized by a minimal risk, accidents and in the due time.

The intention of this Plan is to establish the requisites of health and safety, uniform and comprehensive, to carry out all the activities of field.

1.2 FULFILLMENT OF THE PLAN - OFFICIAL OF SECURITY

The field activities for this consultancy are of minor scale than for other projects that have developed in the Panama Canal Watershed and Bordering Areas. Consequently, it will not be asked from a safety official that it is present in the region during the execution of the contract. Nevertheless, to assure that they should be fulfilled by appropriate measurements of safety, the Coordinating one of Logistics and Administrative Support (Mariela Talavera) will be the Official of Security and it will be at the expense of assuring that all the persons who should take part of the field activities should read this plan and should promise to continue his indications. For such an effect the Lic. Talavera will provide any required support, as for example first-aid kits, vests lifebelt, etc. The

Lic. Talavera will be able, of considering it to be prudent, suspending the field activities if it is not fulfilled by the measurements established in this plan.

1.3 SUSPENSION OF WORKS

The works can be suspended if the personnel that is developing field activities experiences any symptom of illness (annoyance of the skin, eyes, gullet, nausea, vomiting, fevers, etc.). This decision will be a responsibility of the leader of the group.

Once the works are suspended, the Official of Security or his designated one, he will have to drive to the personnel that needs it to places of medical attention or out of areas of risk. The Official of Security will have to then inform the Project manager or the Local Coordinator of the happened. In his report, the Official of Security will have to explain the conditions or reasons that generated a situation of risk for the safety or the health and since anticipate them in the future.

1.4 PROTECTION MEASUREMENTS

The protection measurements include general topics as clothing and hydration, in addition to others to avoid specific illnesses as hanta virus, dengue and leishmaniasis. The whole personnel of field will have to respect the measurements arranged for his protection. These measurements include:

1.4.1 Generals

- There is recommended the use of the following appropriate clothing:
 - Shirt of sleeve talks
 - Boots of rubber
 - Beach thongs in the passages in rivers and gorges.
 - Cap or sombrero of wide wing
 - Long and resistant trousers.
 - Glasses or dark glasses for protection of solar beams.
- To take sufficient drinkable water in hermetically sealed receptacles or electrolytic solution sterile.
- To have tinned food or in conserves of sure origin.
- Use of repellent: we recommend bay run with sheet of tobacco or the available thing on the market.
- Always To use protection measurements: vest lifebelt; safety belt, hand lantern; portable radio; to use maps you guide, etc.
- To take briefcase of the first aids (at least one for team of work) which will have to include as minimum:
 - hydrogen peroxide (1 fco of 50 cc)
 - alcohol to 95 % (1 fco of 50cc)
 - soap hibiscrub (1 fco of 50 cc)

- gasas sterile (10)
 - Antiofidic polyvalent Serum

 - syringes of 5cc of of 21x 1 ½ (10)
 - adhesive cloth
 - gloves
 - antihistaminic: 1 frasco of benadryl of use i.m or i.v and/or (10) blisters of clorotrimetrón of use i.m or tablets (20)
 - diclofenac tablets of 50 mg. (20)
 - acetaminophen tablets of 500 mg (20)
 - thread of suture sedates N° 3 zero or 1 zero.
 - salvacolina tablets oral route for the cases of diarrheic cases
 - aeroxano plus suspension for the cases of cases of gastric annoyance or vomiting.
 - dehydration oral Serum in envelopes (N° 20)
 - solution of adrenaline (1 blister) subcutaneous route.
 - set of minor surgery
- To cover the wounds of the skin with a curita.
 - To wash food with water and soap and of being possible to submit them to cooking overhead of them 100°C before his ingestion.
 - In case of burns, use saline normal solution (plastic bottles of 1000cc)
 - In case of contact with irritating plants or sting of poisonous insect or bee Africanized, to use the antihistaminic with solution of adrenaline.

1.4.2 Protection measurements To anticipate Infestation for Hanta Virus

- To keep the camp clean to avoid the presence of the rodents:
 - to store the meal in closed places and to place them to not minor height of 25 cm of the soil
 - to place the garbage or garbage produced in receptacles with hermetic cover or to use carrier bag.
 - of being necessary, burying the garbage in the soil to a depth of 30 cm.
 - to wash kitchen tools immediately after using them
 - to proceed to clean counters and soils of residues.

- If it has to enter a housing:
 - one assure that the same one is well ventilate, opening his windows and doors in order that between the solar light.
 - Do not sweep the soil with broom directly; use Lysol or Clorox this way: 1 ½ cup of Clorox for a gallon of water. Use a cloth for cleaning with the above-mentioned solution.
 - Support the surroundings of the housing free of undergrowths, sheets of foundation, poles, sticks, scrap, deposit of firewoods or area of culture of rice or corn. up to a distance of 100 feet.

- If you have to encamp outdoors, avoid sleeping next to garbage, dens or rodents.
- Avoid to sleep in open ground; use bedspread, mattress or other raised
- Guard the food in packing sealed against rodents.
- Practice the hand wash constantly.
- Do not inhale elevated dust of areas contaminated with excrement of rodents.
- Discard, bury or burn all the garbage as soon as possible.

1.4.3 Protection measurements To anticipate Infestation for Leishmaniasis

- Periodic application of insecticides of residual action. To spray the interior and exterior of doors and other openings of the housing dumps.
- To anticipate poisonings for the use of the same ones respect the period of return that indicates the label (it ranges between 1 hour up to 4 hours).
- Use windows and thin meshes.
- Dump elimination or other places that favor the multiplication of the female of the phlebotomy.
- Use repellent of insects especially in hours of the late afternoon.
- Use protective clothes: sleeve talks, trousers and caps.

1.4.4 Protection measurements To anticipate Infestation for Dengue

- To spray the area close to the camp with insecticide derivative of piretroide and to eliminate the breeding grounds of the mosquito *Aedes aegypti*, identified
- To sleep with mosquito net
- Use of protective clothes and repellent.

1.5 RECOMMENDED VACCINES

- Tetanic Toxoide
- It vaccinates against German measles and Measles
- Yellow fever

1.6 REPORTS

Since it has been indicated briefly, of situations of risk to take place for the health or the safety or of are provoked accidents that were giving as turned out the injury of personnel, the Official of Security will have to realize a report and present it to the Project manager. The report will have to include the reasons for which the incident happened and that measurements will have to take to prevent the same one from repeating. Additionally, the Official of Security will have to prepare a report at the end of the field activities that sums up and explains the level of success with the one that applied to him the plan and will have to give information that sustains the mentioned report. The report will have the following tentative structure:

Introduction

Summary of Field activities

Application of Measurements of Security

Summary of Incidents

Corrective actions

Conclusion

Annexes

The report will be of approximately 10 pages.

Minuta

Name: Meeting in the ACP

Ref. Presentation of the Matrix of Evaluation of Alternatives

Dates: January 15 of 2,004

Hour: 2:00 PM

Place: Building Not 744

Participants: ACP: Franklin Guardia, Emilio Messina, Hortencia Broce, Guadalupe Ortega, Octavino De Gracia

URS: Ing. Juan Carlos Vallarino, Eduardo Montenegro

Summary:

Last January 15 of the current year, there was realized the presentation of the Matrix of Evaluation of Alternatives, where there was described the used methodology, considered variables and the weighting proposed for discussion and approval on behalf of the ACP.

In the meeting the Ing. Vallarino gave an explanation detailed on the components of the Matrix and of the table that would feed the matrix, the weighting and results waited on having completed the information in the counterfoil.

At the conclusion of the presentation we passed to the questions and responses to clarify the questions arisen after the presentation, as soon as they were clarified that the questions criteria were preceded to unify:

- To fit to 30 % the Social and Internal criteria of the project.
- To fit to 20 % the environmental and economic criteria.
- There will be replaced the variable "Problems of Construction " by the line of Risk.
- The variable "loss of the forest " it was replaced by the variables: mature Forest, secondary Forest, Stubble and Pasture.
- The ACP accepted to support the unit of cost in money proposed by URS to estimate the losses in infrastructure.

Finally, it reminded to be checked and to update the information for Rio Indio.

MINUTA
12/12/03

Name: Meeting in the SIG of the ACP

Ref: Presentation of the Categories of Use of Soil

Dates: on December 12 of 2,003

Hour: 10:00 AM

Place: Building of the SIG Not 748

Participants: ACP: Franklin Guardia, Lic. Raúl Martínez
URS: Eduardo Montenegro, José Guardia
Representatives of Consulting Companies

Summary:

In this meeting there represented the representatives of URS, Holding, besides there were present the representatives of other consulting companies who support contracts with the Authority of the Canal of Panama.

The meeting was directed by the Lic. Martínez, who spoke on the different terminologies that were in use for the classification of the use of the soil in the diverse projects that were executed in the ACP. For such a reason the SIG of the ACP it prepared the homologation of categories of use with the purpose of which all the consulting companies realized his classifications being based on an already established terminology, with the target to support uniformity in the information generated in the diverse projects. As soon as there was concluded the presentation and discussion of the presented categories, one of the representatives suggested to add to the list the network vial, such a motion was accepted by the representatives of the SIG.

Other topics that were included it was the quality of the products that were submitting to the ACP since there had submitted a few products that were not coinciding with the information of the ACP.

Enclosure to this menu presents to itself a copy of the categories of use of soil that was given by the SIG of the ACP.

URS

Environmental, Social and Cultural Data Gathering for Catchment Areas in or Adjacent to the Eastern Region of the Panama Canal Watershed.

Prepared for:
Authority of the Canal of Panama.

Presented for:
URS Holdings Inc.

May 13, 2004

URS

Introduction

URS **Background**

- The transit of ships for the Canal of Panama depends on the availability of water stored in the lakes Alhajuela and Gatún.
- The volume of shipping traffic across the Canal turns out to be occasionally restricted during the dry season, especially in the frame of climatic extreme phenomena.

URS **Precedents**

- These facts sustain the need that there confronts the Authority of the Canal of Panama (ACP) to realize studies to evaluate the practicality of a new game of sluices, systems for the water saving and the improvement of the channels of navigation, between others.

URS

Objetives

URS

- Gathering environmental, socioeconomic and sociocultural information of the subbasins of the rivers Ciri Grande, Lagarto and of the Lake Alhajuela.
- To determine the possible impacts on the physical way, biótico and socioeconomic
- To compare Alternatives with the Option of Indio River.

URS

Area of Study

URS

Criteria of Definition

- Terms of Reference of the Project
- Hidrological delimitation of the Catchments of:
 - Ciri Grande River
 - Lagarto River
- Simulation of the elevation of the current level of the Lake Alhajuela.

URS

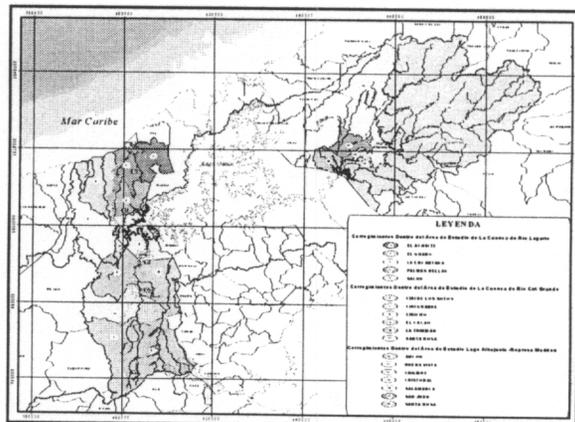

Areas of Interest

- Upper subbasin (SA)
- Middle Subbasin (MS)
- Lower Subbasin (LS)
- Area of Specific Interest (ASI)
- Buffer Zone (BZ)
- Area of General Interest (AGI)

URS Crustaceans y Molluscs

Aquatic Fauna	Ciri Grande River		Lagarto River		Lake Alhajuela		Indio River	
	No. Species	No. Families	No. Species	No. Families	No. Species	No. Families	No. Species	No. Families
Crustaceans	6	3	6	3	5	2	7	4
Molluscs	2	2	10	10	4	3	10	10

- The catchments Areas of Lagarto and Indio Rivers presents the biggest diversity of molluscs, it is due to the fact that in both subbasins one finds the Estuarine Water System.
- In Ciri Grande, Alhajuela and Lagarto possess fewer species of Crustaceans than Indio River.
- Of the whole of species of crustaceans 3 species correspond to 3 Families of Crabs, where the Families Grapsidae and Portunidae, they are of the Estuarine Water System.

URS**Matrix of Evaluation of Alternatives****URS****Introduction**

- The Matrix I is based on the concepts got in the TDR of the project
- The structure used in the proposal has been kept since it is simple and uses real values

URS**Criteria of Evaluation**

- Selected on the base of parameters for which information existed for all the projects
- Internal criteria
- Cost
- Risk
- Hydroelectric potential
- Water production

URS**Criteria of Evaluation**

- Environmental criteria
- Loss of Mature Forests
- Loss of Secondary Forests
- Loss of Pastizales and Stubble
- Social criteria
- Affected area
- Affected population
- Loss of Infrastructure
- Population Downstream

URS**Criteria of Evaluation**

- Economic criteria
- Loss of Production
- Loss of Agricultural Potential
- There express all the units of the criteria of evaluation for esclusaje:
- Hectares of lost forest / Lockage
- Affected inhabitants / Lockage

URS Structure of the Matrix

- Two Principal Tables
- Introduction of Information
- Revenue of real values for Lockage
- Values from the data bases SIG
- Every cell represents an analysis or operation in a data base SIG
- Evaluation of Options or Alternatives
- Matrix of evaluation
- Weighting of the criteria
- Puntaje for every alternative

Losses of Agricultural Potential / Lockage	Ha / Exchange	343.12	479.97	1623.64	121.40	743.34

URS Structure Of the Matrix

CRITERIA OF EVALUATION	Peso Especifico
INTERNAL CRITERIA OF THE PROJECT	25.00%
Cost / Esclusaje	15.00%
Water production	5.00%
Problems of Construction	2.50%
Hydroelectric potential / Lockage	2.50%
ENVIRONMENTAL CRITERIA	20.00%
Loss of Mature Forest / Lockage	10.00%
Loss Secondary Forest / Lockage	5.00%
Loss of Stubble / Lockage	2.50%
Loss of Pastures / Lockage	2.50%
SOCIAL CRITERIA	30.00%
Affected area	5.00%
Population / Lockage	15.00%
Loss of Infrastructure / Lockage	5.00%
Population Downstream / Lockage	5.00%
ECONOMIC CRITERIA	25.00%
Loss of Production / Lockage	10.00%
Loss of Agricultural Potential / Lockage	15.00%
	100.00%

URS Use of the Matrix

- Revenue of Information
- Allocation of Values for Every Criterion
- Allocation of points in a scale of 100 %
- Each of four categories of criteria has a specific gravity
- The project that presents the most favorable characteristic will receive the whole of the puntaje of the subcriterion
- The rest of the projects will receive a puntaje considered proportionally

URS Example

- Data Entries

CRITERIA OF EVALUATION	Source of Data		
	Unidad	Indio	Ciri Grande
INTERNAL CRITERIA OF THE PROJECT			
Cost	\$	230430000.00	71856000.00
Water production	Esclusajes	15.80	3.10
Cost / Esclusaje	\$ / Esclusaje	14584177.22	23179354.84
Contingencies	\$	28868000.00	14371106.00
Contingencies / Lockage	\$ / Esclusaje	1827088.61	4635840.65
Potential Hydroelectric	MW	1.60	2.20

URS Example

- Allocation and Weighting of Values for Internal Criteria

CRITERIA OF EVALUATION	Peso Especifico	Indio	Ciri Grande
INTERNAL CRITERIA OF THE PROJECT	25.00%	22.26%	13.53%
Cost / Lockage	15.00%	14.40%	9.00%
Water production	5.00%	5.00%	0.98%
Contingencies	2.50%	2.50%	0.99%
Hydroelectric potential / Lockage	2.50%	0.36%	2.50%

Development of Alternatives

- Alternatives:
 - Indio vs. Lagarto + Ciri + Alhajuela
 - Indio vs. Lagarto + Ciri
 - Indio vs. Lagarto + Alhajuela
 - Indio vs Ciri + Alhajuela
 - Indio vs Ciri
 - Indio vs Lagarto
 - Indio vs Alhajuela
- Every project is compared with Indio River
- Combinations are compared with Indio River

Comparison of Alternatives

- The Alternative 1 (Lake Alhajuela) would cause the minor number of environmental and social impacts for esclusaje.
- The Alternative 1, for not expiring for if alone with the water demand, it is a good option to combine with other alternatives.
- The use of the concept of "Lockage" allowed to carry out an evaluation of cost-benefit.
- The use of real information of SIG allowed to realize an evaluation objetiva.

Conclusion

Comparison of Alternatives

- Taking in consideration the demand of water projected for the operation of the channel, the Alternative of Indio River is the most favorable from the technical, environmental, social and economic point of view.
- The Alternative 2 (Ciri) is attractive from the environmental point of view but not from the social and economic point of view.
- The Alternative the minor received 3 (Lagarto) points since it is not favorable from the environmental point of view not socioeconomic.

URS

Comparison of Alternatives

- The Alternatives 4, 5 and 6 (Combinations of Rio Lagarto) receive a low average. It cost High Benefit.

URS

General Conclusions

- In the three Catchment Areas the types of dominant vegetation are the Pasture and Shrub Land. Nevertheless, the proportion of forests and Shrubland is different according to the evaluated Catchment; in Ciri Grande and Lagarto the forests do not occupy 20 %, whereas in the lake Alhajuela the forests occupy 46 % of the surface.
- In three evaluated catchment areas, the area of the possible reservoir or the area that would turn out to be affected by the increase of capacity of the reservoir in case of the Lake Alhajuela, corresponds principally to herdsmen's areas and/or stubbles, for what it is believed that the impact on species of special interest, both of flora and of fauna, will be minimal.

URS

- The area of study is very diverse and heterogeneous, and occupy regions that are so much to the west of the watershed of the Canal (rivers Ciri Grande and Lagarto) as to this (Lake Alhajuela) of the same one.
- Each of these areas has a particular situation as for his natural resources and socioeconomic situation; the residents in the outskirts of the Lake Alhajuela possess major accesses to basic services that the residents of the catchment of Ciri Grande and Lagarto.

URS

- The principal economic activities of three studied Catchments are centered in the agricultural sector and to a lesser extent in commercial activities and of services.
