PLS - 4465<br>FOR RELEASE:<br>WEDNESDAY, NOVEMBER 5, 2008

## Highlights of Pittsburgh-New Castle National Compensation Survey February 2008

Workers in the Pittsburgh-New Castle metropolitan area earned an average of $\$ 18.95$ per hour in February 2008, according to new survey results from the National Compensation Survey (NCS) released by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. Sheila Watkins, the Bureau's regional commissioner, noted that wage data were reported for workers in a wide range of occupational groups, including average hourly earnings of $\$ 33.94$ for computer and mathematical science occupations and $\$ 19.05$ for construction and extraction occupations. Another occupational group, healthcare support, had a mean hourly wage rate of $\$ 11.47$. The NCS data available for the Pittsburgh area include earnings for 21 major occupational groups with additional detail for selected occupations within those groups. (See table 1.)

Within the computer and mathematical science occupational group, computer software engineers, applications earned $\$ 38.95$ per hour. Plumbers, pipefitters, and steamfitters, part of the construction and extraction occupational group, averaged $\$ 23.40$ per hour. Nursing aides, orderlies, and attendants, within the healthcare support occupational group, earned an average hourly rate of $\$ 11.78$. (See table 1.)

Broad coverage of selected occupational characteristics is available from NCS for the local area. Full-time workers averaged $\$ 20.75$ per hour while their part-time counterparts earned $\$ 10.06$. Union workers earned \$20.96 and non-union workers, \$18.33. Workers in establishments with 1-99 workers averaged $\$ 15.70$ per hour, those in establishments with 100-499 workers earned $\$ 18.53$, and those in establishments with 500 or more employees earned $\$ 24.46$.

The occupational wage data available from NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. NCS results also include the work level and respective earnings for occupations determined by a point factor leveling process. The four occupational leveling factors are: knowledge, job controls and complexity, contacts, and physical environment. Details on the NCS are available at www.bls.gov/ncs.

The NCS data reported here covered 491 establishments with one or more workers in private industry and State and local governments. Agricultural establishments, private households, the selfemployed, and the Federal Government were excluded from the survey. This sample of establishments represented 1,102,200 workers in the Pittsburgh-New Castle Combined Statistical Area which is comprised of Allegheny, Armstrong, Beaver, Butler, Fayette, Lawrence, Washington, and Westmoreland Counties in Pennsylvania.

## Survey Availability

Complete survey results are contained in the Pittsburgh-New Castle, PA National Compensation Survey February 2008 which is available on the Internet in both text and PDF formats at www.bls.gov/ncs/ocs/compub.htm.

For personal assistance or further information on the National Compensation Survey data, as well as other Bureau data, contact the Mid-Atlantic Information Office by calling (215) 597-3282 from 8:30 a.m. to 12:00 p.m. and 1:00 p.m. to 3:30 p.m. ET.

[^0]Occupational Classification (SOC) system.
The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

SOURCE: Bureau of Labor Statistics, National Compensation Survey
NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. Overall occupational groups may include data for categories not shown separately

[^0]:    1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

    2 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40 -hour week is the minimum full-time schedule.

    3 Workers are classified by occupation using the 2000 Standard
