## HIGHLIGHTS OF SAN JOSE-SAN FRANCISCO-OAKLAND, CA NATIONAL COMPENSATION SURVEY APRIL 2008

Workers in the San Jose-San Francisco-Oakland metropolitan area earned an average of $\$ 28.12$ per hour in April 2008, according to new survey results from the National Compensation Survey (NCS) released by the U.S. Department of Labor’s Bureau of Labor Statistics (BLS). Regional Commissioner Richard J. Holden reported wage data for workers in a wide range of occupational groups, including average hourly earnings of $\$ 52.48$ for management occupations and $\$ 43.98$ for architecture and engineering occupations. In two other occupational groups, protective service had a mean hourly wage rate of $\$ 26.96$ and food preparation and serving related workers earned $\$ 10.93$. The NCS data available for the San Jose area include earnings for 21 major occupational groups with additional detail for selected occupations within those groups. (See table 1.)

Marketing managers, part of the management occupational group, earned $\$ 61.07$ per hour. Within the architecture and engineering occupational group, civil engineers earned $\$ 44.47$ per hour and in the protective service occupational group, security guards averaged $\$ 14.34$. Bartenders, an occupation within the food preparation and serving related group, registered an average hourly rate of $\$ 9.16$ per hour.

Broad coverage of selected occupational characteristics is available from NCS for the local area. Full-time workers averaged $\$ 29.37$ per hour while their part-time counterparts earned $\$ 18.99$. Union workers earned $\$ 28.80$ and non-union workers, $\$ 27.92$. Workers in establishments with 1-99 workers averaged $\$ 23.01$ per hour, those in establishments with 100-499 workers earned $\$ 27.33$, and those in establishments with 500 or more employees earned \$37.40.

The occupational wage data available from NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. NCS results also include the work level and respective earnings for occupations determined by a point factor leveling process. The four occupational leveling factors are: knowledge, job controls and complexity, contacts, and physical environment. Details on the NCS are available at http://www.bls.gov/ncs/home.htm.

The NCS data provided in the detailed bulletin covered 943 establishments with one or more workers in private industry and State and local governments. Agricultural establishments, private households, the self-employed, and the Federal Government were excluded from the survey. This sample of establishments represented 3,260,600 workers in the San Jose-San Francisco-Oakland Combined Statistical Area (CSA) which is comprised of Alameda, Contra Costa, Marin, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma Counties in California.

## Survey Availability

Complete survey results are contained in the San Jose-San Francisco-Oakland, CA National Compensation Survey April 2008 which is available on the Internet in both text and PDF formats at http://www.bls.gov/ncs/ocs/compub.htm.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau data, contact the Western Information Office by calling (415) 6252270 from 9:00 a.m. to 11:30 a.m. and 1:30 p.m. to 4:00 p.m. PT.

| Packers and packagers, hand ............................ | 13.01 | 6.6 | 13.47 | 7.3 | - | - |

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35 -hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40 -hour week is the minimum full-time schedule.

Workers are classified by occupation using the 2000 Standard

Occupational Classification (SOC) system.
The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.
